(Authorized by and K.S.A. 39-1810 and K.S.A. 75-3304; implementing K.S.A. 39-1806 and K.S.A. 2008 Supp. 75-3307b; effective July 1, 1996; amended Jan. 15, 2010.)

**30-63-12. Licensing procedure; requirements; duration of license.** (a) Each provider required to be licensed pursuant to this article shall submit an application for an appropriate license to the commissioner, on a form provided by the commission.

(6) a written business plan that shows how the applicant intends to market its services, to accommodate growth or retrenchment in the size of its operations without jeopardizing consumer health or safety issues, to respond to other risk factors as could be foreseeable in the specific case of that applicant, and to keep the operation fiscally solvent during the next three years, unless the application is for a renewal of a succession of licenses that the applicant has had for at least three years. In this case, the viability of the applicant's operation shall be presumed, unless the commissioner determines that there is reason to question the viability of the licensed provider applying for license renewal and requires the submission of a written business plan despite how long the renewal applicant has been previously licensed; and

(7) if required of the applicant by the United States department of labor, a subminimum wage and hour certificate.

(c) For a limited license, each applicant shall provide the following:

(1) A description of the preexisting relationship with the one or two persons proposed to be provided services;

If the application is for a renewal of a succession of licenses that the applicant has had for at least three years, the viability of the applicant's operation shall be presumed, unless the commissioner determines that there is reason to question the viability of the licensed provider applying for license renewal and requires the submission of a written business plan, regardless how long the applicant has been previously licensed.

(d) Upon receipt of an application, the commission shall determine whether the applicant is in compliance with the requirements of subsection (b) or (c) and with this article.

(e) The applicant shall be notified in writing if the commission finds that the applicant is not in compliance with the requirements of subsection (b) or (c) or with this article.

(f) A temporary license or a temporary license with requirements may be issued by the secretary to allow an applicant to begin the operations of a new provider. A license with requirements may be issued by the secretary to allow a provider seeking renewal of a previously issued license to continue operations. A license with requirements shall be designated as contingent upon the provider's developing, submitting to the commission, and implementing an acceptable plan of corrective action intended to bring the provider into continuing compliance with the requirements of this article.

(1) Findings made by the commission with regard to the implementation of a plan of corrective action shall be given to the provider in writing.

(2) Failure of a provider to be in compliance with the requirements of this article or to implement an acceptable plan of corrective action may be grounds for denial of a license whether or not a temporary license or a license with requirements has been issued.

(g) Based upon findings made by the commission regarding compliance with or the implementation of an acceptable plan of corrective action, the commissioner shall determine whether to recommend issuance or denial of the full or limited license applied for. The applicant shall be notified in writing of any decision to recommend denial of an application for a license. The notice shall clearly state the reasons for a denial. The applicant may appeal

this denial to the administrative appeals section pursuant to article seven of these regulations.

(h)(1) A full or limited license issued pursuant to this article shall remain in effect for not more than two years from the date of issuance. The exact date on which the license expires shall be stated upon the license. However, the license shall earlier expire under any of the following circumstances:

(A) The license is revoked for cause.

(B) The license is voided.

(C) For a temporary license or a license with requirements, the license is superseded by the issuance of a full or a limited license as applied for.

(D) The license is voluntarily surrendered by the provider.

(2) Each license term shall be determined by the commissioner based upon the commission's findings regarding the history and strength of the applicant's provider operations, including evidence of the provider's having earned certification from a nationally recognized agency or organization that specializes in certifying providers of services.

(i) Each license with requirements shall specify the length of time for which the license is valid, which shall not exceed one year. Successive licenses with requirements may be issued by the secretary, but successive licenses with requirements shall not be issued for more than two years.

(j) Each temporary license shall be valid for six months. If, at the expiration of that six months, the licensee has not yet commenced providing services to any person but the licensee wishes to continue efforts to market the licensee's services, a successive temporary license may be issued for another six-month period. No further extensions of a temporary license shall be granted.

(k) A license previously issued shall be voided for any of the following reasons:

(1) Issuance by mistake;

(2) a substantial change of control or ownership, as provided for in K.A.R. 30-63-10(b); or

(3) for a limited license, the licensee's cessation of provision of services to the person or persons for whom the license was specifically sought and obtained.

## Article 29.—SOLID WASTE MANAGEMENT

**28-29-501. Uncontaminated soil.** For the purposes of K.S.A. 65-3402 and amendments thereto, "uncontaminated soil" shall mean soil that meets all the following conditions:

(a) The soil meets the definition of "construction and demolition waste" in K.S.A. 65-3402, and amendments thereto.

(b) The soil has not been generated at a facility that is under state or federal oversight for the investigation or cleanup of contamination, unless the state or federal project manager who is providing the oversight approves the use of the soil as clean rubble, as defined in K.S.A. 65-3402 and amendments thereto.

(c) The soil exhibits no characteristic that would be expected to create either of the following if the soil is managed as clean rubble:

(1) An odor or other nuisance that would be offensive to a reasonable person; or

(2) an obvious risk to human health or safety or the environment, due to any physical or chemical property of the soil.

(d) The soil is determined to be suitable for use as clean rubble by one of the following methods:

(1) The generator of the soil determines that there is no indication of contamination in the soil. Indication of contamination shall be based on information readily available to the generator of the soil, including the following:

(A) The visual appearance of the soil;

(B) the odor of the soil; and

(C) all known past activities at the site from which the soil is being removed.

(2) The generator of the soil obtains analytical data from representative soil samples according to the requirements in subsection (e) and all of the following criteria are met:

(A) The soil is not a hazardous waste.

(B) Total nitrate plus ammonia is less than 40 mg/kg.

(C) The level of total petroleum hydrocarbons is less than N=1, as described in section 5.0 of "risk-based standards for Kansas" ("RSK manual"), published in June 2007 by the department and hereby adopted by reference, including all appendices. The GRO tier 2 value shall be 39 mg/kg and the DRO tier 2 value shall be 2000 mg/kg.

(D) If the analyte is a chemical other than nitrate, ammonia, or a petroleum hydrocarbon, all of the following criteria are met:

(i) There is no more than one anthropogenic analyte present in the soil. For the purposes of this regulation, the term "anthropogenic analyte" shall mean a chemical or substance present in the environment due to human activity.

(continued)

(ii) The anthropogenic analyte is listed in the KDHE tier 2 risk-based summary table in appendix A of the RSK manual.

(iii) The concentration of the anthropogenic analyte is less than the level listed in the KDHE tier 2 risk-based summary table for residential scenarios for the soil pathway or for the soil to ground water protection pathway, whichever is lower.

(3) The secretary determines that if the soil is used as clean rubble, the soil will not present a risk to human health or safety or the environment, based on information provided by the generator of the soil. The generator of the soil shall submit the following information to the department:

(A) Analytical reports from representative soil samples; and

(B) the following information, if requested by the department:

(i) Analytical reports indicating naturally occurring background concentrations at the site from which the soil is being removed;

(ii) the cumulative cancer risk level of all analytes;

(iii) the hazard index value, as defined in K.A.R. 28-71-1, of all analytes; and

(iv) any other information required by the department to evaluate the potential risk to human health or safety or the environment.

(e) If analytical data is used to meet the conditions of this regulation, the following requirements are met:

(1) At least one representative sample shall be collected and analyzed for each 500 cubic yards of soil.

(2) Each analysis shall be performed and reported by a laboratory that has departmental certification, if this certification is available, for that analysis.

(3) Each analytical report shall include the following information:

(A) The results of each analysis;

(B) quality control data;

(C) a copy of the chain of custody for each sample; and

(D) a statement signed by the generator that the analytical results are representative of the soil.

(4) The generator shall maintain each analytical report on file for at least three years after the report is received and shall make the report available to the department upon request. (Authorized by K.S.A. 65-3406; implementing K.S.A. 2008 Supp. 65-3402; effective Jan. 15, 2010.)
