Sending a signed email with your Windows PC

Choose your email software from the options below.

- Microsoft Outlook
- Windows Mail
- Mozilla Thunderbird
Using Microsoft Outlook

**Step one**
Obtain and install your certificate if you don’t have one already. If you need help with this process, click here.

**Step two**
Open Microsoft Outlook and create a new mail message addressed to your county election office. Under *Options* in the Office Ribbon, click the button (red arrow) to digitally sign your message.

Attach your voted ballot materials and send your message.

This concludes your ballot submission process.
Using Windows Mail

**Step one**
Obtain and install your certificate if you don't have one already. If you need help with this process, click here.

**Step two**
Open Windows Mail and send an email to the address provided by your county. Windows Mail should default to signing all new messages, as evidenced by the badge icon to the right of the To field (green arrow).

Attach your voted ballot materials and send your message.

This concludes your ballot submission process.
Using Mozilla Thunderbird

Step one
Obtain and install your certificate if you don’t have one already. If you need help with this process, click here.

Step two
Create a new email and address it to your county election officer. Under Security in the message menu click *Digitally Sign This Message*.

You can verify that your outgoing message will be digitally signed by the sealed envelope icon (green arrow) at the bottom right of your message window.

Attach your voted ballot materials and send your message.

This concludes your ballot submission process.
