The charge for copies is 50 cents per page. A summary of the regulations and the economic impact follows:

K.A.R. 40-4-41. Utilization review organizations; application; definitions. The purpose of the proposed amendments is to reflect changes made by the American Accreditation Health Commission, a/k/a URAC. This is one of the major entities that accredits utilization review organizations nationally. These amendments also were made after consulting with the Utilization Review Advisory Committee. The amendments to this particular regulation define the terms that are included in other utilization review regulations and are used in the utilization review process.

Some of the definitions require individuals and entities that perform certain utilization review functions to possess certain credentials and be trained in utilization review procedures.

Definitions have been added and deleted to accurately reflect those services that are subject to regulations regarding utilization review organizations. Language within existing definitions have been changed to update current terminology. Other changes include the addition and deletion of statutory citations and technical changes.

The entities most impacted are utilization review organizations and health insurance carriers that perform utilization review activities and consumers of health insurance. The economic impact on those entities that perform utilization review functions is justified in the protection of Kansas consumers in that these definitions could require the entities that perform utilization functions to hire new personnel who meet these qualifications or provide additional training to existing personnel. This could result in additional costs. However, with the increase of managed care as mechanism to deliver health care to consumers, many of these requirements are needed to safeguard consumers and ensure that they obtain the care that they need. There will be little or no economic impact on consumers, the Kansas Insurance Department, and other governmental agencies.

K.A.R. 40-4-25. Accident and sickness insurance standards for benefits. This proposed regulation provides exemptions regarding individual accident and sickness insurance policies and subscriber contracts of hospital and medical and dental service corporations delivered in the state of Kansas as required in K.A.R. 40-4-26 through 40-4-33. The primary changes to K.A.R. 40-4-25 are the addition and deletion of statutes and technical changes.

There is no economic impact on insurers, consumers, the Kansas Insurance Department, and other governmental agencies, if any.

Notice of Hearing on Proposed Administrative Regulations

The Kansas Department of Health and Environment, Division of Environment, Bureau of Air and Radiation, will conduct a public hearing at 2 p.m. Friday, February 24, in the fifth floor legal conference room, Curtis State Office Building, 1000 S.W. Jackson, Topeka, to consider the adoption of proposed amendments to K.A.R. 28-35-178b.

The time period between the publication of this notice and the scheduled hearing constitutes a 60-day public comment period for the purpose of receiving written public comments on the proposed regulatory action. All interested parties may submit written comments prior to 5 p.m. on the day of the hearing to Tom Conley, Kansas Department of Health and Environment, Bureau of Air and Radiation, 1000 S.W. All interested parties will be given a reasonable opportunity to present their views orally on the proposed regulatory action during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to require each participant to limit any oral presentation to five minutes.

Copies of the proposed amendments and the economic impact and environmental benefit statements may be obtained by contacting Seretha Potts, Bureau of Air and Radiation, at (785) 296-1560 or spotts@kdhe.state.ks.us. (continued) Questions pertaining to these proposed amendments should be directed to Tom Conley, (785) 296-1565 or tconley@kdhe.state.ks.us.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed amendments and the economic impact and environmental benefit statements in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Tom Conley.

A summary of the proposed amendments and the environmental and economic impact statements follows:

Part 3: LICENSING OF SOURCES OF RADIATION

Amended regulation: K.A.R. 28-35-178b

K.A.R. 28-35-178b enhances the accountability and security of generally licensed devices containing quantities of radioactive material that the NRC considers potentially attractive for terrorist uses by requiring them to be specifically licensed. Unless specifically exempt, all other generally licensed devices are required to be registered and a responsible individual designated.

Environmental Benefit Statement

The purpose of the regulation is to assure that all whom may operate and own radioactive materials or radiation devices are up-to-date with the current best practices and consistent with other states' safety regulations, with the overall purpose of ensuring the maximum protection of the environment, public health and the maximum safety to all persons at, or in the vicinity of, the place of use of radiation.

This change is necessary to maintain compatibility with the Code of Federal Regulations and Kansas' regulations and to stay current with technological advances in radiation protection and equipment design.

Economic Impact

Minor increases in costs borne by licensees. K.A.R. 28-35-178b(a)(3) will require that devices containing quantities of radioactive material that the NRC considers potentially attractive for terrorist uses be specifically licensed. The annual general license fee of \$145 will increase to a \$800 specific license fee. The following table summarizes the costs for the affected licensees:

Licensee	Current Annual General License Fees	Proposed Initial Costs	Proposed Annual Specific License Fee	Net Annual Cost
Cargill, Inc.	\$145	\$364	\$800	\$655
Magellan Pipeline Co.	\$435	\$364	\$800	\$365
(3 facilities)				
Tamko Roofing	\$145	\$364	\$800	\$655
Products				
Vulcan Chemicals	\$145	\$364	\$800	\$655

This amendment will result in an approximate 1 percent increase in the number of specific licensees. There should be no increase in costs for the department or other state agencies as a result of the proposed amendment.

State Conservation Commission

Notice of Hearing on Proposed Administrative Regulations

A public hearing will be conducted at 9 a.m. Wednesday, February 15, in the State Conservation Commission's conference room, 109 S.W. 9th, Suite 500, Topeka, to consider the adoption of proposed permanent regulations of the State Conservation Commission Watershed Dam Construction Program.

This 60-day notice constitutes a public comment period for the purpose of receiving written public comments on the proposed regulations. Comments may be sent to the State Conservation Commission, 109 S.W. 9th, Suite 500, Topeka, 66612-1299, prior to the hearing date. All interested parties will be given an opportunity to present their views during the hearing. The State Conservation Commission will consider all written and oral comments submitted by interested parties as a basis for approving, amending and approving, or rejecting a proposed regulation.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and economic impact statements in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Scott Carlson at (785) 296-6803.

The proposed regulations address the expenditure and accountability of State Water Plan Special Revenue Funds and, if available, federal funds. The proposed amended regulations address the administration of a grant program targeted to construct, modify or rehabilitate detention or grade stabilization dams. The existing Watershed Dam Construction Program regulations address the preservation of the state's land and water resources through a cost-share program that provides financial assistance to watershed districts, drainage districts, and other special purpose districts for the construction of detention and/or grade stabilization dams. As dams age, rehabilitation is becoming an important concern. The state needs to ensure the safe operation of dams, protect investments, protect the environment, and extend and achieve the intended purpose of the structure.

The amendments to the Watershed Dam Construction Program are a result of 2005 Kansas legislative action that directed the State Conservation Commission to amend Kansas administrative regulations under the authority of K.S.A. 2-1915 to receive and disburse rehabilitation grant funds to address rehabilitation needs of detention or grade stabilization dams. Many of these dams have increased hazard classifications due to downstream development. The grant funds will be granted to watershed districts and other dam owners. This program also may provide funds for dam inundation area mapping.

The regulations must be adopted by the State Conservation Commission by March 1, 2006.

The proposed regulations consist of **K.A.R. 11-3-1 through 11-3-12.** The economic impact on other governmental agencies may require increased costs associated

with application review and prioritization. The general public would be impacted positively through implementation of this program by contributing to extending the life of flood mitigation structures.

A copy of the full text of the regulations and economic impact statements may be obtained by contacting the State Conservation Commission office at (785) 296-3600.

Permanent Administrative Regulations

(Effective December 30, 2005)

(Editor's Note: The complete text of the following regulations has not been published because of its length and the resulting cost of publication.)

The following is a summary of the changes that were made to radiation regulations that become effective December 30, 2005. The regulations can be found in full text at http://www.kdheks.gov/radiation/regs.html. For information or questions regarding these regulations, contact Tom Conley at (785) 296-1565 or e-mail at tconley@ kdhe.state.ks.us.

Summary of Regulation Changes

Changes in the organizational structure of the regulations were made to parallel the Suggested State Regulations adopted by the Conference of Radiation Control Program Directors. A number of regulations were moved to accommodate a logical overall structure. Many of the amendments, revocations and new regulations accommodate this structural redesign and are administrative in nature to conform to current regulatory format.

Part 1: GENERAL

Revoked regulations: K.A.R. 28-35-135, 28-35-136 New regulations: K.A.R. 28-35-135a through 28-35-135i K.A.R. 28-35-135k through 28-35-135y K.A.R. 28-35-148

The definitions of terms that are used in Article 35 are being organized alphabetically into K.A.R. 28-35-135a through 28-35-135i and K.A.R. 28-35-135k through 28-35-135y for easier access and to be consistent with the general format of Kansas' regulations. K.A.R. 28-35-148 provides for enforcement action to be taken against any person who willfully violates or causes a licensee or registrant to violate regulations in Article 35.

Part 2: REGISTRATION OF RADIATION PRODUCING DEVICES

New regulations: K.A.R. 28-35-167, 28-35-168, 28-35-169

Amended regulations: K.A.R. 28-35-154, 28-35-160, 28-35-162

The amended regulations clarify registration requirements, vendor notifications and exclusions from registration. Regulations for X-ray facility shielding plans and operator booth construction were moved from Part 5, "Use of X-Rays in the Healing Arts," and the requirements clarified.

Part 3: LICENSING OF SOURCES OF RADIATION

Revoked regulations: K.A.R. 28-35-193b, 28-35-199a

New regulations: K.A.R. 28-35-178j, 180b, 181s, 204, 205, 205a, 205b, 206

Amended regulations: **K.A.R. 28-35-175a, 176a, 177a, 178a, 180a, 181e, 181g, 181h, 181l, 181m, 184a, 184b, 185a, 195a**

Doc. No. 032687

Vol. 24, No. 50, December 15, 2005

Regulations were amended, revoked and added to ensure compatibility with the Nuclear Regulatory Commission regulations as required by the Agreement State Program. The requirements of K.A.R. 28-35-193b, "Emergency Plan Criteria," were enhanced and moved to Part 13 to raise the level of awareness to this area important to homeland security. K.A.R. 28-35-199 was moved to the definitions in Part 1 and is now incorporated into Part 6, "Use of Radioactive Materials in the Healing Arts."

Part 4: STANDARDS FOR PROTECTION AGAINST RADIATION

Revoked regulation: K.A.R. 28-35-230b New regulations: K.A.R. 28-35-211c, 28-35-231b,

28-35-231c

Amended regulations: K.A.R. 28-35-211d, 212a, 212b, 212d, 212e, 213b, 216a, 217a, 219a, 220a, 222a, 223a, 224a, 227d, 227f, 227g, 227h, 227j, 228a, 230a, 230d, 231a

A mechanism is provided by which a registrant may request the use of weighting factors to determine personnel exposure if a protective apron is worn by medical fluoroscopists performing special and interventional fluoroscopic procedures. Requirements for leak testing sealed sources that are currently listed as conditions on specific licenses are codified and no longer need to be specific license conditions. K.A.R. 28-35-231a requires a plan be developed and approved for the decommissioning

Part 5: USE OF X-RAYS IN THE HEALING ARTS

Revoked regulations: K.A.R. 28-35-243, 244, 247, 249, 250a, 252, 253, 254

New regulations: K.A.R. 28-35-242a, 242b, 243a, 244a, 247a, 248a, 256a

Amended regulations: K.A.R. 28-35-241, 242, 251, 255

This part has been reorganized into a more logical structure consistent with Suggested State Regulations (SSRs) adopted by the Conference of Radiation Control Program Directors. These regulations also have been enhanced to accommodate the latest technological advances in diagnostic X-ray. A new regulation codifying current industry practices for the operation and maintenance of computed tomography machines was added. The requirements for therapeutic radiation machines have been enhanced and moved to Part 14, "Therapeutic Radiation Machines."

Part 6: USE OF RADIOACTIVE MATERIALS IN THE HEALING ARTS

New regulation: K.A.R. 28-35-264

Revoked regulations: K.A.R. 28-35-261, 262, 263

Part 6 now specifies the requirements for using any radioactive material in the healing arts instead of only sealed sources. 10 CFR 35 is adopted by reference and substantially reduces the regulatory burden on medical licensees. For example, patients now will not be required to be hospitalized solely because they have been treated with radioactive material, provided precautions are taken to minimize exposures to the public and family. This will significantly reduce the burden and cost to patient, hospital and insurance companies.

Part 7: SPECIAL REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC OPERATIONS

Revoked regulation: K.A.R. 28-35-277

New regulations: K.A.R. 28-35-277a, 282a, 282b, 282c, 282d, 292, 293

Amended regulations: K.A.R. 28-35-274, 276, 278, 279, 280, 281, 282, 283, 284, 285, 287, 288, 289, 290, 291

Regulations were amended, revoked and added to ensure compatibility with the Nuclear Regulatory Commission regulations as required by the Agreement State Program. These changes codify requirements currently required by the NRC agreement to be specified by license condition. These changes also correct an error in the existing regulations that required personnel monitoring for cabinet X-ray systems specifically designed such that the operators do not need personnel monitoring.

Part 8: RADIATION SAFETY REQUIREMENTS FOR ANALYTICAL X-RAY EQUIPMENT

Amended regulations: K.A.R. 28-35-298, 28-35-299

K.A.R. 28-35-299 now enhances safety by requiring confirmation that the X-ray tube is off and will remain off until safe conditions have been restored during repairs, and prohibits relying on interlocks to shut off power during repairs. K.A.R. 28-35-298 clarifies when radiation surveys are required.

Part 9: RADIATION SAFETY REQUIREMENTS FOR PARTICLE ACCELERATORS

Revoked regulation: K.A.R. 28-35-312

Amended regulations: K.A.R. 28-35-308, 314, 318, 319

Changes to these regulations are primarily to correct references to regulations changed in other parts and to reduce the regulatory burden by changing the calibration of area radiation monitors from quarterly to annual.

Part 10: INSTRUCTIONS AND REPORTS TO WORKERS: INSPECTIONS

Amended regulation: K.A.R. 28-35-333

This change reduces the regulatory burden on licensees and registrants by requiring annual training only for those individuals who are likely to receive an exposure in excess of 100 mrem per year, which is the limit for members of the public. Currently, all staff that may work with or near radiation sources are required to be trained annually without regard to level of exposure.

Part 11: WIRELINE AND SUBSURFACE TRACER STUDIES

New regulation: K.A.R. 28-35-359a

Amended regulations: K.A.R. 28-35-342, 343, 345, 346, 349, 350, 351, 352, 353, 354, 355, 357, 359, 360

Regulations were amended and added to ensure compatibility with the Nuclear Regulatory Commission regulations as required by the Agreement State Program. The regulatory burden on licensees is reduced by specifically allowing the use of uranium sinker bars, energy compensation sources, and with approved procedures to prevent a source becoming lodged in the well, use sealed (continued) sources in a well without a surface casing. Safety is enhanced by requiring sources be locked and secured during transport, tested for integrity under conditions simulating use, inspections of equipment prior to use, and requiring a logging supervisor be physically present when sources are in use. The changes also clarify requirements for training, operating and emergency procedures, and radiation surveys.

Part 12: LICENSING AND RADIATION SAFETY REQUIREMENTS FOR IRRADIATORS

New regulation: K.A.R. 28-35-375

This is a new part adopting 10 CFR 36 by reference. Currently, there are no licensees using irradiators that fall under these regulations; however, should a facility desire to install an irradiator, the licensing requirements will be in place.

Part 13: CONTINGENCY PLANNING FOR RESPONSE TO RADIOACTIVE MATERIAL EMERGENCIES

New regulations: K.A.R. 28-35-400 through 28-35-411

The requirements of K.A.R. 28-35-193b, "Emergency Plan Criteria," were enhanced and moved to this part to raise the level of awareness to this area important to homeland security. Currently, there are no licensees required to have an emergency contingency plan in place; however, should a facility desire to increase the amount of radioactive material they are licensed for, the licensing requirements will be in place.

Part 14: THERAPEUTIC RADIATION MACHINES

New regulation: K.A.R. 28-35-450

The current regulations for therapeutic radiation machines are deleted from Part 5 and replaced with this new part adopting Part X of the Conference of Radiation Control Program Director's Suggested State Regulations (SSR), which codifies existing industry standards. The current regulations are outdated and in some respects contradictory to current standards. This new part corrects these discrepancies.

Part 15: PACKAGING AND TRANSPORTATION OF RADIOACTIVE MATERIAL

New regulations: K.A.R. 28-35-500 through 28-35-505

This is a new part added to ensure compatibility with the Nuclear Regulatory Commission regulations as required by the Agreement State Program. These regulations ensure that for Type B packages used to transport radioactive material there are no gaps between the state, Department of Transportation and NRC regulations. Currently, there are no users of Type B packages licensed by Kansas except industrial radiographers. The regulations in Part 7 cover the Type B packages used by industrial radiographers.
