The Kansas DOT is seeking consultant services to prepare construction drawings for the extensions or additions of passing lanes for the projects listed above. Design surveys are currently in progress for all projects and will be provided by KDOT. One consulting firm will be selected for each bundle of projects.

#### **Instructions for LOI**

The main text of consultant's LOI must not exceed four (4) pages to address the topics listed below. LOI's shall address and include the following items:

- Project manager/engineer in charge.
- Provide name(s), qualifications, education, training, and expertise as well as prior relevant experience of consultant personnel intended to perform services.

#### **Qualifications-Based Selection Process**

No cost or pricing information shall be submitted with the LOI and will not be considered in the selection process to shortlist or rank proposals. Based on the qualifications submitted in the LOI and other information available to KDOT, on or about July 15, 2020 KDOT will shortlist three to five firms and notify all firms submitting LOIs of the names of the shortlisted firms by return email. Thereafter, KDOT will issue a Request for Proposal (RFP) to the shortlisted firms soliciting a technical proposal. At KDOT's option, shortlisted firms may be interviewed by telephone conference call or asked to attend meetings or participate in other discussions with KDOT. Technical proposals will be evaluated on the basis of the factors listed below, evenly weighted, to rank the most qualified firm in order of preference as first, second and third: 1) the quality and completeness of the response; 2) qualifications and experience of consultant design personnel/manager proposed for services; 3) proposed project approach; 4) availability to respond to the work; and 5) past performance history for similar projects/services for KDOT. The highest ranked firm will be asked to enter into negotiations with KDOT for a contract, with compensation provisions for payment of actual direct costs plus fixed fee, subject to an upper limit of compensation. In the event KDOT cannot reach agreement with the highest ranked firm, it will terminate negotiations with such firm and commence negotiations with the next highest ranked firm, and so on, until either agreement is reached for a satisfactory scope of services for a fair and reasonable price, or KDOT decides to pursue other alternatives.

### **Contract Terms and Conditions**

A standard KDOT agreement for engineering and technical services will be used for this project. Special attachments for the Kansas "Tax Clearance Certificate," the "Certification of Final Indirect Costs," and the Special Attachment No. 10 ("Policy Regarding Sexual Harassment") will also eventually become attachments to the contract. Being selected as a prime or subconsultant firm on these passing lane projects does not preclude the firm from being the prime program management consultant (PMC) or subconsultant for the Eisenhower Legacy Transportation Program (IKE) or the prime PMC or subconsultant for the US-69 expansion project 69-46 KA-5700-01.

The firm's accounting systems must have the following capabilities before the firm may be awarded a contract.

- Valid, reliable, and current costs must be available within the system to support actual costs and pricing data.
- Capability to provide a means of measuring the reasonableness of incurred costs.
- Capability to identify and accumulate allowable costs by contract or project records which will reconcile with the general ledger.
- Ability to provide supporting documentation of actual expenditures for each billing, based on costs.

Questions can be submitted to David Lutgen, P.E., Contracts Engineer at kdot.designcontracts@ks.gov.

Individuals with hearing and/ or speech disabilities may contact the Kansas Relay Center at 800-766-3777 for communication accommodations.

Copies of the proposed regulations and the economic impact statement may be found at http://www.kansas regents.org/about/rules-regulations or by contacting Renee Burlingham.

A summary of the proposed regulations and the economic impact statements for the regulations follows: K.A.R. 88-30-1 defines terms that are used in the Board's student health insurance regulations and currently defines a "student" who would be eligible for coverage under the Board's plans to exclude any student who is enrolled in only online/distance education courses. With the COVID-19 stay-at-home orders and the need to avoid group activities, the six state universities have suspended in-person classes and at this time there is no certainty as to when those in-person classes might resume or what they might look like. The Board is therefore seeking to amend the definition to allow continued coverage for students who wish to take advantage of the Board's plans. The proposed amendment to K.A.R. 88-30-1 would suspend the eligibility requirement that students not be entirely online or receive instruction by distance education only, beginning with the upcoming plan year, August 1, 2020, during any semester when the institution at which the student is enrolled has eliminated or substantially restricted in-person class options. The amendment has been limited to apply only during such times, thus minimizing the cost and impact of the amendment. There will be no economic impact on other public agencies or private businesses as a result of this regulation and the regulation will neither enhance or restrict business activities and growth.

A temporary version of this amendment is also being sought to cover the period between August 1 and the effective date of this permanent amendment.

K.A.R. 88-30-2 currently allows students to elect coverage for student only, student/spouse, student/dependents, or student/spouse/dependents. The proposed amendment would allow the Board of Regents the flexibility to determine for any plan year whether to offer dependent coverage or not, based on what makes the *(continued)*

most sense for the continued viability of the plan. If such coverage is offered, students would be able to elect it; if such coverage is not offered, students would not be able to elect it. The only businesses, sectors, public utility ratepayers, individual, or local governments that would be affected by the proposed rule and regulation are the student health insurance provider and possibly other providers that might pick up the dependent coverage, students (and their dependents) who choose to elect coverage under the plan, and the state universities, which pay a percentage of the student-only coverage for eligible graduate students. The impact could be positive or negative, depending on a variety of variables. There will be no economic impact on other public agencies or private businesses as a result of this regulation and the regulation will neither enhance or restrict business activities and growth other than as discussed previously.
