The facility is expanding from 4,100 head (1,640 animal units) of swine weighing greater than 55 pounds to a maximum total of 5,630 head (2,252 animal units) of swine weighing greater than 55 pounds, and for a maximum of 3,252 head (325.2 animal units) of swine weighing 55 pounds or less. The previous permit did not list the total number of swine weighing 55 pounds or less. Due to a change in the method of determining the animal unit capacity of the facility, they are now included and are reflected in the revised animal unit count. The expansion of the facility consists of the addition of a 300-head gestation building and accounting for the swine in the open lots, which was left off of the previous permit. The construction modification of the facility is the addition of a mortality compost building.

Wastewater will be impounded for subsequent application to agricultural land for beneficial use. Wastewater storage capacity is provided that meets or exceeds KDHE minimum requirements.

Request for Comments

The Kansas Department of Health and Environment and the Department of Air Quality of the Unified Government of Wyandotte County-Kansas City, Kansas, are announcing their intent to issue an air quality construction permit to CertainTeed Corporation for its facility located at 103 Funston Road, Kansas City, Kansas. The proposed project will be comprised of the expansion of one glass melting furnace and the installation of a new manufacturing line of unbonded wool fiberglass.

While the glass production capacity of the furnace will be increased to accommodate the new manufacturing line, a portion of the increased capacity will be used to increase production on an existing bonded wool fiberglass manufacturing line. New equipment installed will include a new manufacturing line and associated air pollution control equipment for particulate matter.

The proposed permit is to be issued in accordance with the provisions of K.A.R. 28-19-17, prevention of significant deterioration (PSD), which adopt the federal standards, procedures and requirements of 40 CFR 52.21 by reference. These air quality regulations apply to major stationary emission sources located in areas designated as "attainment" under the federal Clean Air Act (CAA). Attainment areas are areas where the air quality meets or exceeds the national ambient air quality standards (NAAQS).

The PSD regulations require evaluation of emission reduction techniques to identify the best available control technology (BACT) for each pollutant for which the emission rate exceeds the PSD significance level. The purpose of BACT is to apply the maximum degree of reduction achievable, taking into account energy, environmental and economic impacts for each pollutant under review. Evaluation of the estimated emissions for the proposed project indicates that the emission rate of particulate matter exceeds the significance levels. CertainTeed conducted the required BACT analyses. The department has reviewed CertainTeed's BACT analyses and concurs with its findings that partial enclosure with negative pressure and water sprays are BACT for the new manufacturing line project. In addition, a dry electrostatic precipitator, the use of pure oxygen with natural gas, good combustion practices and various good operating practices constitute BACT for the modified glass melting furnace.

The PSD regulations also require an evaluation of the impacts, if any, that emissions from the proposed modifications may have on the ambient air quality, visibility, vegetation and soils. CertainTeed has conducted the required analyses in accordance with methods approved by the U.S. Environmental Protection Agency. The results of the analyses conclude that there should be no significant impacts on the ambient air quality, visibility, local vegetation or soils.

A public comment period has been established to allow citizens the opportunity to express any concerns or comments they may have about this permitting action. The public comment period will end December 22 unless extended by the hearing officer. A public hearing will be conducted at 10 a.m. December 23 by the Kansas Department of Health and Environment at the Wyandotte County Health Department, third floor auditorium, 619 Ann Ave., Kansas City, to receive comments on the proposed issuance of an air quality construction permit. All comments should be submitted in writing to Donna Reno, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366, or may be provided in oral and/or written form at the public hearing.

A copy of the proposed permit, the permit application and the information relied upon during the permit application review process is available for public review during normal business hours, 8 a.m. to 5 p.m., at the KDHE, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka; and from 8:30 a.m. to 5 p.m. at the Wyandotte County Health Department, Department of Air Quality, 619 Ann Ave, Room 308, Kansas City, Kansas. Questions about the draft permit should be directed to Moses Coss at (913) 573-6700 or to Dana Morris at (785) 296-1578.
