AUTHENTICATION OF RULES AND REGULATIONS

THIS IS TO CERTIFY That we, Derek Schmidt, Attorney General of and for the State of Kansas, and Scott Schwab, Secretary of State of and for the State of Kansas, pursuant to K.S.A. 77-429 have examined and compared this 2022 Volume 2 of the Kansas Administrative Regulations; and do hereby certify that this publication of rules and regulations contains all rules and regulations for agency 28 approved for printing by the State Rules and Regulations Board and otherwise complies with K.S.A. 77-415 *et seq.* and acts amendatory thereof.

Done at Topeka, Kansas, this 15th day of September, 2022.

DEREK SCHMIDT,
Attorney General

SCOTT SCHWAB,
Secretary of State

[SEAL]

EXPLANATORY PREFACE

This volume has been compiled and published in accordance with K.S.A. 77-430a and other applicable laws.

ARRANGEMENT OF RULES AND REGULATIONS

Administrative rules and regulations of the various state agencies are arranged in accordance with a three-part system of numbers divided by hyphens. The first number indicates the agency; the second number indicates the article (a group of regulations of such agency upon the same subject); the last number indicates the specific section or regulation within the article. For example, "1-4-11" refers to agency No. 1, article No. 4 and section No. 11.

The law requires that agencies cite the statutory authority for the regulation and the section(s) of the statutes which the regulation implements. This is published at the end of the text of the regulation. In addition, the Secretary of State includes a history of the regulation which indicates the original effective date of the regulation and each subsequent amendment.

SALES

Volumes of the Kansas Administrative Regulations are sold by the Publications Division of the Office of the Secretary of State, First Floor, Memorial Hall, 120 SW 10th Ave., Topeka, KS 66612-1594, 785-296-4557.

SCOTT SCHWAB, *Secretary of State*

COMMENTARY

This volume has been compiled and published in accordance with K.S.A. 77-430a and other applicable laws.

The 2022 Volumes contain rules and regulations filed before January 1, 2022. The volumes replace the 2009 Volumes and 2021 Supplement. Regulations filed on and after January 1, 2022, may be located by checking the Kansas Register, Kansas' official state newspaper. An index appears at the back of each Kansas Register and lists the volume and page number of the Register issue that contains the most recent version of the regulations filed after December 31, 2021.

To find the most recent version of a regulation:

First, check the table of contents in the most current issue of the Kansas Register

Then, check the Index to Regulations in the most current Kansas Register

Next, check the current K.A.R. Supplement

Finally, check the current K.A.R. Volume

If the regulation is found at any of these steps, stop. Consider that version the most recent. The most current regulations, proposed regulations open for public comment, and published regulations with a future effective date may also be found in the online K.A.R. at https://sos.ks.gov/publications/pubs_kar.aspx.

To determine the authorizing and implementing statute(s), the effective date, or to see when a regulation was amended or revoked, check the history found at the end of each regulation. The authorizing and implementing statute(s) are listed first followed by any subsequent action. For example, in "amended, T-7-12-11-90, Dec. 31, 1990" the "T" means temporary, the "7" is the number assigned to the agency in the K.A.R. Volumes, and 12-11-90 is the date that the regulation was filed. Following the last comma is the effective date. Therefore, the amendment was filed as a temporary regulation on December 11, 1990, and the amendment became effective on December 31, 1990. A temporary regulation becomes effective upon approval by the State Rules and Regulations Board and filing in the Secretary of State's Office or at a later date when specified in the body of the regulation. A temporary regulation lasts 120 days unless it is amended or revoked within 120 days. If the "T number" is not included in an action on a regulation, the regulation was filed as a permanent regulation. A permanent regulation is effective 15 days following publication in the Kansas Register or at a later date specified in the body of the regulation. Prior to July 1, 1995, a permanent regulation became effective 45 days following publication in the Kansas Register or at a later date specified in the body of the regulation. The regulation remains in effect until amended or revoked.

Any questions regarding the publication or use of the K.A.R. Volumes or questions regarding the regulation filing procedure may be directed to the Kansas Administrative Regulations Editor at 785-296-0082. For purchasing inquiries call 785-296-4557. Questions concerning the subject matter of a regulation should be directed to the agency administering the regulation.

Issues of the Kansas Register may be viewed and downloaded at <https://sos.ks.gov/publications/kansas-register.html>.

Article 1.—DISEASES

28-1-1. Definitions. As used in K.A.R. 28-1-1 through 28-1-23, each of the following terms shall have the meaning specified in this regulation: (a) “Case” means an instance of a diagnosed infectious or contagious disease or condition in a person or an animal.

(b) “Cluster, outbreak, or epidemic” means a situation in which cases are observed in excess of what is expected compared to the usual frequency of the incidence of the infectious or contagious disease or condition in a defined area, among a specified population, and during a specified period of time.

(c) “Condition” means any noninfectious adverse health event.

(d) “Correctional facility” means any city or county jail or any correctional institution, as defined in K.S.A. 75-5202 and amendments thereto.

(e) “Corrections officer” means an employee of the department of corrections, as defined in K.S.A. 75-5202 and amendments thereto, and any person employed by a city or county who is in charge of a jail or section of a jail, including jail guards and those individuals who conduct searches of persons taken into custody.

(f) “Department” means Kansas department of health and environment.

(g) “Emergency services employee” means an attendant, as specified in K.S.A. 65-6112 and amendments thereto; a supervised student, as described in K.S.A. 65-6129a and amendments thereto; an observer authorized by an employing agency or entity; or a paid or volunteer firefighter.

(h) “Infectious or contagious diseases” has the meaning specified for “infectious and contagious diseases” in K.S.A. 65-116a, and amendments thereto.

(i) “Local health officer” means each person appointed pursuant to K.S.A. 65-201, and amendments thereto.

(j) “Occupational exposure” has the meaning specified in K.S.A. 65-116a, and amendments thereto.

(k) “Other potentially infectious materials” has

the meaning specified in K.S.A. 65-116a, and amendments thereto.

(l) “Physician” means a person licensed by the state board of healing arts to practice medicine and surgery.

(m) “Secretary” means secretary of the department of health and environment.

(n) “Suspected case” means an instance in which signs and symptoms suggestive of an infectious or contagious disease or condition are present in a person or animal before confirmation of the diagnosis. (Authorized by and implementing K.S.A. 65-101 and K.S.A. 2017 Supp. 65-128; effective May 1, 1982; amended May 11, 2018.)

28-1-2. Reporting requirements for infectious or contagious diseases and conditions.

(a) Each person licensed to practice the healing arts or engaged in a postgraduate training program approved by the state board of healing arts, licensed dentist, licensed professional nurse, licensed practical nurse, administrator of a hospital, licensed adult care home administrator, licensed physician assistant, licensed social worker, and teacher or school administrator shall report each suspected case of the following infectious or contagious diseases or conditions to the secretary within four hours of knowledge of the suspected case:

- (1) Anthrax;
- (2) botulism;
- (3) cholera;
- (4) diphtheria;
- (5) measles (rubeola);
- (6) meningococcal disease;
- (7) mumps;
- (8) novel influenza A virus infection;
- (9) plague (*Yersinia pestis*);
- (10) poliovirus;
- (11) rabies, human;
- (12) rubella;
- (13) severe acute respiratory syndrome-associated coronavirus (SARS-CoV);
- (14) smallpox;
- (15) tetanus;
- (16) tuberculosis;

(17) vaccinia, postvaccination infection or secondary transmission;

(18) viral hemorrhagic fevers, including Ebola virus, Marburg virus, Crimean-Congo hemorrhagic fever virus, Lassa virus, Lujo virus, and any of the New World arenaviruses; and

(19) any exotic or newly recognized disease.

(b) Each person licensed to practice the healing arts or engaged in a postgraduate training program approved by the state board of healing arts, licensed dentist, licensed professional nurse, licensed practical nurse, administrator of a hospital, licensed adult care home administrator, licensed physician assistant, licensed social worker, and teacher or school administrator shall report each occurrence of any of the following to the secretary within four hours:

(1) Clusters, outbreaks, or epidemics;

(2) possible terrorist acts due to biological, chemical, or radiological agents;

(3) unexplained death suspected to be due to an unidentified infectious agent; or

(4) any unusual disease or manifestation of illness.

(c) Each person specified in subsection (a) shall report each case of the infectious or contagious diseases or conditions specified in this subsection to the secretary within 24 hours, except that if the reporting period ends on a weekend or state-approved holiday, the report shall be made to the secretary by 5:00 p.m. on the next business day after the 24-hour period. Each report for the following shall be required only upon receipt of laboratory evidence of the infectious or contagious disease or condition, unless otherwise specified or requested by the secretary:

(1) Acute flaccid myelitis (report all suspected cases, regardless of laboratory evidence);

(2) anaplasmosis;

(3) arboviral disease, neuroinvasive and non-neuroinvasive, including California serogroup virus disease, chikungunya virus, any dengue virus infection, eastern equine encephalitis virus disease (EEE), Powassan virus disease, St. Louis encephalitis virus disease (SLE), West Nile virus disease (WNV), western equine encephalitis virus disease (WEE), and Zika virus;

(4) babesiosis;

(5) blood lead level, any results;

(6) brucellosis, including laboratory exposures to *Brucella* species;

(7) campylobacteriosis;

(8) *Candida auris*;

(9) carbapenem-resistant bacterial infection or colonization;

(10) carbon monoxide poisoning (report all suspected cases, regardless of laboratory evidence);

(11) chancroid;

(12) chickenpox (varicella) (report all suspected cases, regardless of laboratory evidence);

(13) *Chlamydia trachomatis* infection;

(14) coccidioidomycosis;

(15) cryptosporidiosis;

(16) cyclosporiasis;

(17) ehrlichiosis;

(18) giardiasis;

(19) gonorrhea, including antibiotic susceptibility testing results, if performed;

(20) *Haemophilus influenzae*, invasive disease;

(21) Hansen's disease (leprosy) (report all suspected cases, regardless of laboratory evidence);

(22) hantavirus (report all suspected cases, regardless of laboratory evidence);

(23) hemolytic uremic syndrome, postdiarrheal (report all suspected cases, regardless of laboratory evidence);

(24) hepatitis A, acute hepatitis A (IgM antibody-positive laboratory results only);

(25) hepatitis B, acute, chronic, and perinatal infections;

(26) hepatitis B in pregnancy (report the pregnancy of each woman with hepatitis B virus infection);

(27) hepatitis B (report all positive, negative, and inconclusive results for children younger than five years of age);

(28) hepatitis C;

(29) hepatitis D;

(30) hepatitis E;

(31) histoplasmosis;

(32) human immunodeficiency virus infection;

(33) human immunodeficiency virus-positive cases (report either the CD4+ T-lymphocyte cell counts or the CD4+ T-lymphocyte percent of total lymphocytes);

(34) human immunodeficiency virus infection in pregnancy (report the pregnancy of each woman with human immunodeficiency virus infection);

(35) human immunodeficiency virus (report viral load of any value);

(36) influenza that results in the death of any child under 18 years of age (report both suspected cases and cases, regardless of laboratory evidence);

(37) legionellosis;

(38) leptospirosis;

- (39) listeriosis;
 - (40) Lyme disease;
 - (41) malaria;
 - (42) psittacosis;
 - (43) Q fever, acute and chronic;
 - (44) rabies, animal;
 - (45) salmonellosis;
 - (46) shiga toxin-producing *Escherichia coli* (STEC);
 - (47) shigellosis;
 - (48) spotted fever rickettsiosis;
 - (49) streptococcal toxic-shock syndrome;
 - (50) *Streptococcus pneumoniae*, invasive disease;
 - (51) syphilis, including congenital syphilis (report all suspected cases, regardless of laboratory evidence);
 - (52) toxic-shock syndrome, other than streptococcal;
 - (53) transmissible spongiform encephalopathy (TSE) or prion disease (indicate causative agent, if known);
 - (54) trichinellosis or trichinosis (report all suspected cases, regardless of laboratory evidence);
 - (55) tuberculosis infection (report all suspected cases based on positive tuberculin skin test or laboratory evidence);
 - (56) tularemia, including laboratory exposures;
 - (57) typhoid fever;
 - (58) vancomycin-intermediate *Staphylococcus aureus* (VISA);
 - (59) vancomycin-resistant *Staphylococcus aureus* (VRSA);
 - (60) vibriosis or non-cholera *Vibrio* species;
 - (61) yellow fever; and
 - (62) whooping cough (pertussis) (report all suspected cases, regardless of laboratory evidence).
- (d) Each person specified in subsection (a) shall report the following information in a manner specified by the secretary for any suspected case or case required to be reported by subsection (a), (b), or (c):
- (1) The following personal information for each patient:
 - (A) First and last names and middle initial;
 - (B) address, including city, state, and zip code;
 - (C) telephone number, including area code;
 - (D) date of birth;
 - (E) sex;
 - (F) race;
 - (G) ethnicity (specify if hispanic or non-hispanic ethnicity);
 - (H) pregnancy status;

- (I) date of onset of symptoms; and
- (J) diagnosis;
- (2) type of diagnostic tests;
- (3) type of specimen;
- (4) date of specimen collection;
- (5) site of specimen collection;
- (6) diagnostic test results, including reference range, titer if quantitative procedures are performed, and all available results concerning additional characterization of the organism;
- (7) treatment given;
- (8) name, address, and telephone number of the attending physician; and
- (9) any other necessary epidemiological information and additional specimen collection or laboratory test results requested by the secretary or local health officer. (Authorized by K.S.A. 65-101, K.S.A. 2017 Supp. 65-128, K.S.A. 65-1,202, and K.S.A. 65-6003; implementing K.S.A. 65-101, K.S.A. 2017 Supp. 65-118 and K.S.A. 65-6002; effective May 1, 1982; amended May 1, 1986; amended Dec. 24, 1990; amended April 19, 1993; amended Jan. 12, 1996; amended Dec. 1, 1997; amended Feb. 18, 2000; amended, T-28-11-20-03, Nov. 20, 2003; amended March 5, 2004; amended April 28, 2006; amended May 11, 2018.)

28-1-3. (Authorized by K.S.A. 65-102; effective Jan. 1, 1966; revoked Jan. 12, 1996.)

28-1-4. Hospital reporting requirements.

(a) The administrator of each hospital licensed in Kansas shall report the following information to the secretary when requested by the secretary and for the duration specified by the secretary, if this information is in the hospital's possession:

(1) The number of laboratory test orders for specified infectious or contagious diseases or conditions and the results for specified infectious or contagious diseases or conditions;

(2) the number of pharmacy prescriptions for medications used to treat specified infectious or contagious diseases or conditions;

(3) the number of emergency room visits for symptoms related to specified infectious or contagious diseases or conditions; and

(4) utilization rates of other services that can provide an early warning of an infectious or contagious disease, a condition, a cluster, outbreak, or epidemic, or any other public health threat specified by the secretary, if that information can be provided by the hospital with minimum additional burden.

(b) The administrator of each hospital licensed in Kansas may designate a person within the hospital to report infectious or contagious diseases or conditions on behalf of the individuals required by K.A.R. 28-1-2 to report suspected cases and cases observed at the hospital. Each report from the designated hospital person shall meet all reporting requirements for individuals required by K.A.R. 28-1-2 to report suspected cases and cases. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-101 and K.S.A. 2017 Supp. 65-102; effective May 1, 1982; amended May 1, 1986; amended Jan. 12, 1996; amended Oct. 16, 1998; amended, T-28-11-20-03, Nov. 20, 2003; amended March 5, 2004; amended May 11, 2018.)

28-1-5. General provisions for isolation or quarantine of persons afflicted with infectious or contagious disease; examination of persons; collection of specimens.

(a) When the conditions of isolation and quarantine are not otherwise specified by regulation, the isolation and quarantine of persons afflicted with or exposed to infectious or contagious diseases shall be ordered and enforced by the local health officer or the secretary of health and environment to preserve the public health, safety, or welfare. The conditions of isolation or quarantine so ordered shall be based on current medical knowledge of the infectious agent of the disease for which isolation or quarantine is ordered and may include consideration of the following factors:

- (1) The incubation period;
- (2) the communicable period;
- (3) the mode of transmission; and
- (4) susceptibility.

(b) Isolation or quarantine, or both, shall be ordered in conjunction with investigation of infectious or contagious disease cases and outbreaks for examining persons reasonably suspected of having these diseases and for obtaining specimens from these persons for laboratory evidence suggestive of infectious or contagious disease. (Authorized by K.S.A. 65-101 and 65-128; implementing K.S.A. 65-101; effective May 1, 1982; amended July 20, 2007.)

28-1-6. Requirements for isolation and quarantine of specific infectious or contagious diseases. (a) The requirements for isolation and quarantine shall be those specified in the department's "requirements for isolation and

quarantine of infectious or contagious diseases," dated March 15, 2018, which is hereby adopted by reference.

(b) No isolation or quarantine shall be required for the following infectious or contagious diseases:

- (1) Anaplasmosis;
- (2) anthrax;
- (3) babesiosis;
- (4) botulism;
- (5) brucellosis;
- (6) chancroid;
- (7) *Chlamydia trachomatis* infection;
- (8) coccidiomycosis;
- (9) cyclosporiasis;
- (10) ehrlichiosis;
- (11) gonorrhea;
- (12) Hansen's disease (leprosy);
- (13) hantavirus pulmonary syndrome;
- (14) hepatitis B, acute, chronic, and perinatal infections;
- (15) hepatitis C, acute and either past or present infections;
- (16) hepatitis D;
- (17) hepatitis E;
- (18) histoplasmosis;
- (19) human immunodeficiency virus;
- (20) legionellosis;
- (21) leptospirosis;
- (22) listeriosis;
- (23) Lyme disease;
- (24) malaria;
- (25) psittacosis;
- (26) Q fever, acute and chronic;
- (27) spotted fever rickettsiosis;
- (28) syphilis;
- (29) tetanus;
- (30) transmissible spongiform encephalopathy (TSE) or prion disease;
- (31) trichinellosis (trichinosis);
- (32) tularemia; and
- (33) yellow fever. (Authorized by K.S.A. 65-101 and K.S.A. 2017 Supp. 65-128; implementing K.S.A. 65-101, K.S.A. 2017 Supp. 65-118, K.S.A. 65-122, and K.S.A. 2017 Supp. 65-128; effective May 1, 1982; amended May 1, 1986; amended Sept. 5, 1997; amended July 16, 1999; amended July 20, 2007; amended May 11, 2018.)

28-1-7. (Authorized by K.S.A. 1981 Supp. 65-101, K.S.A. 65-128; implementing K.S.A. 1981 Supp. 65-101; effective May 1, 1982; revoked May 11, 2018.)

28-1-8. (Authorized by K.S.A. 1981 Supp. 65-101, K.S.A. 65-128; implementing K.S.A. 1981 Supp. 65-101; effective May 1, 1982; revoked Sept. 5, 1997.)

28-1-9. (Authorized by K.S.A. 1981 Supp. 65-101, K.S.A. 65-128; implementing K.S.A. 1981 Supp. 65-101; effective May 1, 1982; revoked May 10, 1996.)

28-1-10. (Authorized by K.S.A. 65-128, K.S.A. 1981 Supp. 65-101; implementing K.S.A. 1981 Supp. 65-101; effective May 1, 1982; revoked May 10, 1996.)

28-1-11. (Authorized by K.S.A. 65-101, 65-104, 65-128; effective Jan. 1, 1966; revoked May 1, 1982.)

28-1-12. Release from isolation or quarantine. All laboratory tests and cultures for the release of an individual from isolation or quarantine shall be performed by the department's laboratory or by a laboratory approved by the secretary for this purpose. (Authorized by K.S.A. 65-101 and K.S.A. 2017 Supp. 65-128; implementing K.S.A. 65-101; effective May 1, 1982; amended May 11, 2018.)

28-1-13. Rabies control. The requirements for the control of rabies shall be those specified in the department's "rabies control requirements," dated October 19, 2017, which is hereby adopted by reference. (Authorized by K.S.A. 65-101 and K.S.A. 2017 Supp. 65-128; implementing K.S.A. 65-101, K.S.A. 2017 Supp. 65-128, and K.S.A. 75-5661; effective May 1, 1982; amended May 1, 1986; amended July 5, 1996; amended April 24, 1998; amended May 11, 2018.)

28-1-14. Rabies control in wildlife mammals. (a) The possession or sale of skunks, raccoons, foxes and coyotes for keeping of these mammals as pets shall be prohibited.

(b) Removal of musk glands of skunks for purposes of attempted domestication shall be prohibited.

(c) Except as permitted by the secretary, attempts to immunize skunks, coyotes, raccoons, foxes, and other wildlife mammals known to be involved in the transmission of rabies shall be prohibited.

(d) Subsections (a) and (b) of this regulation shall not apply to bonafide zoological parks or research institutions. (Authorized by and imple-

menting K.S.A. 65-101; effective May 1, 1982; amended May 1, 1983; amended July 5, 1996.)

28-1-15. Psittacosis control; records of purchase and sale. Breeders, wholesalers, distributors and retailers of psittacine birds shall maintain a record of the date of purchase, source, and the species of each psittacine bird. When birds are sold, the seller shall record the name, address and telephone number of the customer, date of purchase, species purchased, and the band number, if applicable, for each psittacine bird sold. These records shall be kept for one year. (Authorized by and implementing K.S.A. 65-101; effective May 1, 1982; amended July 5, 1996.)

28-1-16. (Authorized by K.S.A. 65-128; effective Jan. 1, 1966; revoked May 1, 1982.)

28-1-17. (Authorized by K.S.A. 65-101; effective Jan. 1, 1966; revoked May 1, 1982.)

28-1-18. Reporting and submission requirements for laboratories. (a) Each person who is in charge of a laboratory as specified in K.S.A. 65-118, and amendments thereto, shall provide the reports required by K.A.R. 28-1-2 to the department using an automated, secure electronic laboratory-reporting system or other means acceptable to the secretary. A person's use of electronic or automated reporting shall not exempt that person from reporting a suspected case within four hours as required by K.A.R. 28-1-2.

(b) Each person who is in charge of a laboratory as specified in K.S.A. 65-118, and amendments thereto, shall submit the following to the department's office of laboratory services in the following order of preference, if the test results indicate the presence of any microorganism specified in subsection (c):

- (1) Isolates of positive cultures;
- (2) original clinical specimen from a patient;
- (3) nucleic acid; or
- (4) any other materials determined by the secretary.

(c) Each person who is in charge of a laboratory as specified in K.S.A. 65-118, and amendments thereto, shall submit the specimens specified in subsection (b) if the test results indicate the presence of any of the following microorganisms:

- (1) Any carbapenem-resistant organism;
- (2) *Candida auris*;
- (3) *Haemophilus influenzae*, if identified in a patient with invasive disease;

- (4) *Listeria* species;
- (5) *Mycobacterium tuberculosis*;
- (6) *Neisseria meningitidis*;
- (7) *Salmonella* species;
- (8) shiga toxin-producing *Escherichia coli* (STEC);
- (9) *Shigella* species;
- (10) *Streptococcus pneumoniae*, invasive; and
- (11) *Vibrio* species. (Authorized by and implementing K.S.A. 65-101, K.S.A. 2017 Supp. 65-118, and K.S.A. 2017 Supp. 65-128; effective, E-68-22, Aug. 9, 1968; effective Jan. 1, 1969; amended May 1, 1986; amended Aug. 23, 1993; amended Jan. 12, 1996; amended Dec. 1, 1997; amended Feb. 18, 2000; amended, T-28-8-9-02, Aug. 9, 2002; amended Dec. 2, 2002; amended May 11, 2018.)

28-1-19. (Authorized by K.S.A. 65-116j, 65-128; effective, E-76-49, Oct. 1, 1975; effective Feb. 15, 1977; amended Jan. 30, 1995; revoked May 10, 1996.)

28-1-20. Immunizations; schools, child care facilities, and preschool or child care programs operated by a school. (a) Definition. For the purposes of this regulation, “susceptible child” shall mean either of the following if, for that individual, there is no history of the disease that has been documented by a physician, no laboratory documentation of immunity, or no documentation acceptable to the secretary that demonstrates current vaccination against the disease:

- (1) Any individual who attends school as defined in K.S.A. 72-6261, and amendments thereto; or
- (2) any individual who is enrolled, is placed, or resides in a child care facility as defined in K.S.A. 65-503, and amendments thereto, or a preschool or child care program operated by a school.

(b) Required vaccinations. Except as provided in K.S.A. 72-6262 and amendments thereto, each susceptible child shall be required to receive the following vaccinations before enrolling in any school:

- (1) Diphtheria;
- (2) hepatitis A;
- (3) hepatitis B;
- (4) measles (rubeola);
- (5) meningitis;
- (6) mumps;
- (7) pertussis (whooping cough);
- (8) poliomyelitis;
- (9) rubella (German measles);
- (10) tetanus; and
- (11) varicella (chickenpox).

(c) Immunization record for school entry. The immunization record of each individual who attends school shall document that the individual has received the vaccinations specified in subsection (b) from a physician or local health department or is not a susceptible child, on forms provided by the department of health and environment.

(d) Immunizations required for a child in a child care facility or preschool or child care program operated by a school. Each susceptible child, including a child under 16 years of age of a child care provider who is enrolled, is placed, or resides in a child care facility or a preschool or child care program operated by a school, shall be required to receive the following immunizations as medically appropriate:

- (1) Diphtheria;
- (2) *Haemophilus influenzae* type B;
- (3) hepatitis A;
- (4) hepatitis B;
- (5) measles (rubeola);
- (6) mumps;
- (7) pertussis (whooping cough);
- (8) pneumococcal disease;
- (9) poliomyelitis;
- (10) rubella;
- (11) tetanus; and
- (12) varicella (chickenpox).

(e) Immunization records for a child care facility. Each child’s immunization record shall be maintained on the forms provided by the department of health and environment. (Authorized by K.S.A. 65-508 and 72-6264; implementing K.S.A. 65-508 and 72-6262; effective, E-79-18, July 20, 1978; effective May 1, 1979; amended April 9, 2004; amended July 11, 2008; amended Aug. 2, 2019.)

28-1-21. (Authorized by K.S.A. 1982 Supp. 73-1707; implementing K.S.A. 1982 Supp. 73-1702; effective May 1, 1983; revoked May 10, 1996.)

28-1-22. (Authorized by K.S.A. 1989 Supp. 65-101, 65-128 and K.S.A. 1989 Supp. 65-6003, as amended by L. 1990, Ch. 234, sec. 3; implementing K.S.A. 1989 Supp. 65-6001 and 65-6002, as amended by L. 1990, Ch. 234, sec. 1-2; effective Dec. 24, 1990; revoked May 10, 1996.)

28-1-23. Management of occupational exposures. (a) For the purpose of this regulation, each of the following terms shall have the meaning specified in this subsection:

(1) "Occupational exposure" means any occupational exposure, as defined in K.S.A. 65-116a and amendments thereto, that occurs to any of the following under the conditions specified:

(A) Any individual providing medical or nursing services, clinical or forensic laboratory services, emergency medical services, or firefighting, law enforcement, or correctional services, whether for compensation or as a volunteer;

(B) any individual in training for certification, licensure, a position, or a job providing any services listed in paragraph (a)(1)(A); or

(C) any individual receiving services from an individual specified in paragraph (a)(1)(A) or (B).

(2) "Exposed person" means any individual who had an occupational exposure.

(3) "Source person" means any individual from whom an occupational exposure originated.

(4) "Infection control officer" means the individual on duty and designated to monitor and respond to occupational exposures by an entity providing medical or nursing services, clinical or forensic laboratory services, emergency medical services, or firefighting, law enforcement, or correctional services.

(b) Each exposed person specified in paragraph (a)(1)(A) or (B) shall inform the entity's infection control officer about the occupational exposure as soon as possible, but within four hours of the occupational exposure.

(c) The infection control officer shall determine whether the occupational exposure was sufficient to potentially transmit a pathogen or an infectious and contagious disease, considering current guidelines from the Kansas department of health and environment, the centers for disease control and prevention, and the United States public health service.

(d) If the infection control officer determines that the occupational exposure was sufficient to potentially transmit a pathogen or an infectious and contagious disease, the infection control officer shall direct that an appropriate specimen be obtained from the source person for testing.

(1) If the source person refuses to provide a specimen for testing, the infection control officer may submit an application to a court of competent jurisdiction for an order requiring the source person to submit an appropriate specimen for testing. The application shall include the following:

(A) An allegation that the source person has refused to provide an appropriate specimen for testing following an occupational exposure;

(B) the specific test or tests needed to be performed; and

(C) specification of whether and how frequently any additional tests may be required.

(2) If the source person has died and the infection control officer requests a specimen, the custodian of the source person's remains shall obtain and preserve an appropriate specimen from the source person for testing.

(e) If a person who has been transported to a health care facility is subsequently determined to be a source person of a pathogen or an infectious and contagious disease that can be transmitted from person to person through the air or by exposure to respiratory droplets, the following notifications shall be required:

(1) Within four hours of the diagnosis, the treating health care provider shall notify the infection control officer of the health care facility of the presence of a source person.

(2) Within four hours of receiving notification from the treating health care provider, the infection control officer of the health care facility shall provide to the entity that transported the source person at least the following information:

(A) The name of the source person;

(B) the diagnosis; and

(C) the date and time the source person was transported to the health care facility.

(3) Within four hours of receiving notification from the health care facility, the infection control officer of the entity that transported the source person shall notify all other entities whose personnel could have cared for or interacted with the source person in a manner that could transmit the pathogen or the infectious and contagious disease and shall provide at least the following information:

(A) The name of the source person;

(B) the diagnosis; and

(C) the date and time the source person was transported to the health care facility.

(f) The results of the infectious and contagious disease test or tests shall be disclosed to the exposed person, the infection control officer responsible for the exposed person, and the source person as soon as possible. To the extent feasible, the disclosure to the exposed person shall not include the name or identity of the source person.

(g) If an infection control officer has determined that a person who is or has been in the care or custody of an individual providing medical or nursing services, emergency medical services, or firefighting, law enforcement, or correctional

services has been exposed to an infectious and contagious disease, blood, or other potentially infectious materials by the individual providing those services, the infection control officer shall advise the exposed person and recommend appropriate testing as soon as feasible. (Authorized by and implementing K.S.A. 2013 Supp. 65-128; effective April 11, 2014.)

28-1-25. (Authorized by K.S.A. 1972 Supp. 65-128; effective, E-72-9, Feb. 28, 1972; effective Jan. 1, 1973; revoked Feb. 12, 1999.)

28-1-26. Protection of confidentiality of information regarding individuals with HIV infection. (a) Definitions. Each of the following terms shall have the meaning specified in this subsection:

(1) "AIDS" means the acquired immune deficiency syndrome.

(2) "Authorized personnel" means individuals who have signed a confidentiality statement.

(3) "Confidentiality statement" means a written statement, dated and signed by an applicable individual, that certifies the individual's agreement to abide by the security policy of a public health agency and this regulation.

(4) "Counseling and testing site" means a site where counseling and testing for HIV infection are available.

(5) "HIV" means the human immunodeficiency virus.

(6) "HIV confidential information" means all combinations of individual data elements or information collected for surveillance purposes pursuant to K.S.A. 65-6002 and amendments thereto, in electronic or hard copy, that could identify anyone with HIV or AIDS, including the name, date of birth, address, and other identifying information.

(7) "HIV confidentiality officer" means the official in a public health agency responsible for implementing and enforcing all the measures to protect HIV confidential information as defined under this regulation.

(8) "HIV infection" means the presence of HIV in the body.

(9) "HIV prevention counseling" and "HPC" mean a client-centered counseling activity designed to assist clients in assessing their risks of acquiring or transmitting HIV and in negotiating a realistic and incremental plan for reducing risk.

(10) "HIV report" means a report of HIV infection or AIDS transmitted to a public health agen-

cy pursuant to K.S.A. 65-6002 and amendments thereto.

(11) "Partner counseling and referral services" and "PCRS" mean a prevention and control activity conducted by trained individuals who contact and counsel each individual with HIV infection or AIDS who is reported to the secretary utilizing HPC.

(12) "Public health agency" means any organization operated by any state or local government that acquires, uses, discloses, or stores HIV confidential information for public health purposes.

(13) "Secretary" means the secretary of health and environment.

(14) "Secured area" means the physical confinement limiting the location where HIV confidential information is available.

(15) "Written security policy" means written specifications of the measures adopted to protect HIV confidential information and a description of how to implement these measures.

(b) Each public health agency shall appoint an HIV confidentiality officer, who shall have the authority to make decisions about the agency operations that could affect the protection of HIV confidential information.

(c) HIV confidential information shall be maintained in a secured area that is not easily accessible through a window and that is protected by a locked door. Access to the secured area shall be limited to authorized personnel only, and "Restricted area—No unauthorized access" signs shall be prominently posted. Access to the secured area by cleaning crews and other building maintenance personnel shall be granted only during hours when authorized personnel are available for escort or under conditions in which the data is protected by security measures specified in the written security policy.

(d) Hard copy records containing HIV confidential information shall be kept in a locked cabinet located in a secured area, except when in use by authorized personnel. Records shall not be removed from any secured area without authorization from the HIV confidentiality officer.

(e) All electronic records containing HIV confidential information shall be kept on computers protected by coded, individual passwords and located in a secured area. Each transfer of records onto removable electronic media shall occur only if absolutely necessary for HIV surveillance program operations and shall be required to be authorized by the HIV confidentiality officer. The records shall

always be encrypted before the transfer to the removable media. Exchange of HIV confidential information using electronic mail shall be done only if encryption procedures are utilized.

(f) HIV confidential information shall be permanently removed from HIV records as soon as the information is no longer necessary for the purposes of the prevention and control of HIV infection.

(g) Mail containing HIV confidential information shall not include on the envelope or address any reference to the HIV infection, to the HIV virus, or to AIDS.

(h) All telephone conversations in which HIV confidential information is exchanged shall be conducted in a manner that prevents the conversations from being overheard by unauthorized persons.

(i) Each local health officer responsible for a public health agency shall adopt and implement a written security policy related to HIV confidential information consistent with the provisions of this regulation. A copy of the security policy shall be distributed to all authorized personnel.

(j) Access to HIV confidential information shall be restricted to a minimum number of authorized personnel trained in confidentiality procedures and aware of penalties for the unauthorized disclosure of HIV confidential information. The HIV confidentiality officer shall authorize the persons who may have access to HIV confidential information and shall keep a list of these authorized personnel.

(k) Each person authorized to access HIV confidential information shall sign a confidentiality agreement. The HIV confidentiality officer shall maintain a copy of the confidentiality agreement for all authorized personnel.

(l) HIV confidential information shall not be cross-matched with records in other databases if the resulting cross-matched databases do not have equivalent security and confidentiality protections, and penalties for unauthorized disclosure as those for the HIV confidential information.

(m) The use of records containing HIV confidential information for research purposes shall be required to be approved in advance by institutional review boards, and all researchers shall sign confidentiality statements. Information made available for epidemiologic analyses shall not include names or other HIV confidential information and shall not result in the direct or indirect identification of persons reported with HIV and AIDS.

(n) Authorized personnel designated by the secretary shall provide confidential, voluntary PCRS in accordance with this regulation. Any personnel providing PCRS who have reason to believe that a spouse, sex partner, or needle-sharing partner of a person who either is infected with HIV or has AIDS may be exposed to HIV or AIDS and is unaware of this risk of exposure may inform the spouse or partner of the risk of exposure if they do not reveal any identifying information about the original patient, including the name, physical description, time frame, method of transmission, and frequency of exposure.

(o) All communication between public health agencies, both interstate and intrastate, for the purpose of supporting surveillance and PCRS activities, shall disclose information only to the extent necessary to protect the public health pursuant to K.S.A. 65-6002 and amendments thereto.

(p) Each security breach of HIV confidential information shall be investigated by the HIV confidentiality officer, and personnel sanctions and criminal penalties shall be imposed as appropriate. The HIV confidentiality officer shall make an immediate telephone notification to the secretary that a breach of HIV confidential information occurred and shall transmit to the secretary a written report within seven days from the time the breach is discovered.

(q) This regulation shall apply to the following:

(1) All public health agencies engaged in the provision of services to prevent and control HIV or AIDS as specified in K.S.A. 65-6003 and amendments thereto;

(2) all individuals required to send HIV reports to the secretary under K.S.A. 65-6002, and amendments thereto; and

(3) all counseling and testing sites that receive funds from public health agencies. (Authorized by K.S.A. 65-101 and 65-6003; implementing K.S.A. 65-6002 and 65-6003; effective Feb. 18, 2000; amended July 7, 2006.)

28-1-27. HIV screening guidelines. (a) Adoption by reference. The HIV screening guidelines for each pregnant woman and newborn child whose HIV status is unknown shall be the section titled "recommendations for pregnant women" on pages 11 through 14 in the centers for disease control and prevention's document titled "revised recommendations for HIV testing of adults, adolescents, and pregnant women in health-care settings," dated September 22, 2006. This section is

hereby adopted by reference, except as specified in subsection (b).

(b) Deletions. In the portion titled “universal opt-out screening,” the following text shall be deleted:

(1) The words “oral or” in the following sentence: “Pregnant women should receive oral or written information that includes an explanation of HIV infection, a description of interventions that can reduce HIV transmission from mother to infant, and the meanings of positive and negative test results and should be offered an opportunity to ask questions and to decline testing”; and

(2) the following sentence: “No additional process or written documentation of informed consent beyond what is required for other routine prenatal tests should be required for HIV testing.” (Authorized by and implementing K.S.A. 2010 Supp. 65-6018; effective Feb. 25, 2011.)

28-1-30. Definitions. For the purposes of this article, the following definitions shall apply:

(a) “College designee” and “university designee” mean a person determined by the administration at a postsecondary educational institution to be responsible for the oversight and implementation of that institution’s TB prevention and control plan.

(b) “Department” means Kansas department of health and environment.

(c) “Health care provider” means any of the following licensed persons: medical doctor, doctor of osteopathy, doctor of podiatric medicine, advanced registered nurse practitioner as defined in K.S.A. 65-1113 and amendments thereto, and physician assistant.

(d) “High-risk student” means a student who meets any of the following conditions:

- (1) Has signs and symptoms of active TB;
- (2) has been in contact with a person who has been diagnosed with active TB; or
- (3) has traveled, resided in for more than three months, or was born in any country where TB is endemic as determined by the secretary and consistent with guidance provided by the centers for disease control and prevention.

(e) “Postsecondary educational institution” has the meaning specified in K.S.A. 65-129e, and amendments thereto.

(f) “Secretary” means secretary of health and environment or the secretary’s designee.

(g) “Student” means an individual who has been admitted to a postsecondary educational institution where the course of studies will require phys-

ical attendance in a classroom setting with one or more persons.

(h) “TB” means tuberculosis.

(i) “TB prevention and control plan” means the policies and procedures adopted pursuant to K.S.A. 65-129f, and amendments thereto, used at a postsecondary educational institution to reduce the risk of tuberculosis transmission and derived from pages 32 through 42 of the guidelines in “controlling tuberculosis in the United States: recommendations from the American thoracic society, CDC, and the infectious diseases society of America,” published in morbidity and mortality weekly report (MMWR) on November 4, 2005, vol. 54, no. RR-12. The pages specified in this subsection are hereby adopted by reference.

(j) “Tuberculosis” has the meaning specified in K.S.A. 65-116a, and amendments thereto. For the purposes of these regulations, the term “active TB” shall mean a person diagnosed with tuberculosis by a health care provider, and the term “latent TB infection” shall mean a person who is determined by a health care provider to have the bacterium that causes tuberculosis but has not been diagnosed with active TB. (Authorized by and implementing K.S.A. 2010 Supp. 65-129e and 65-129f; effective April 15, 2011.)

28-1-31. TB prevention and control plan.

(a) Each college designee and university designee shall implement a TB prevention and control plan.

(1) The TB prevention and control plan shall include a TB evaluation component for each student determined to be a high-risk student, which shall include the following as necessary:

- (A) Tuberculin skin testing;
- (B) interferon gamma release assay;
- (C) chest radiograph;
- (D) sputum evaluation;
- (E) physical exam; and
- (F) review of signs of symptoms.

(2) The TB prevention and control plan shall provide notification to the department if a student has been found to have latent TB infection or active TB, in accordance with K.A.R. 28-1-2.

(b) Each postsecondary educational institution shall be in compliance with this regulation within 12 months after the beginning of the academic year following the effective date of this regulation. (Authorized by and implementing K.S.A. 2010 Supp. 65-129e and 65-129f; effective April 15, 2011.)

28-1-32. Health services at colleges and universities; submission of a TB prevention and control plan; monitoring of compliance.

(a) Each college designee and university designee shall submit to the department a TB prevention and control plan and any revisions that have been developed in consultation with the department, to ensure that the TB prevention and control plan includes evaluation criteria that are in compliance with the best practice standards as recommended by the division of tuberculosis elimination of the centers for disease control and prevention.

(b) Each postsecondary educational institution that provides health services and that performs infection or disease evaluations, or both, shall keep internal TB evaluation records for each high-risk student.

(c) Each postsecondary educational institution that does not have health services to perform infection or disease evaluations, or both, shall maintain the data on the form provided by the department for each individual considered to be a high-risk student.

(d) Each postsecondary educational institution shall be in compliance with this regulation within 12 months after the beginning of the academic year following the effective date of this regulation. (Authorized by and implementing K.S.A. 2010 Supp. 65-129e and 65-129f; effective April 15, 2011.)

28-1-40. Definitions. (a) In addition to the terms defined in L. 2021, ch. 116, sec. 38 and amendments thereto, each of the following terms, as used in K.A.R. 28-1-40 through 28-1-43, shall have the meaning specified in this subsection:

(1) “Department” means Kansas department of health and environment.

(2) “Personal information” means contact data collected as specified in K.A.R. 28-1-42 and “personal information” collected pursuant to K.S.A. 50-7a01, and amendments thereto.

(3) “Protected health information” has the meaning specified in K.S.A. 65-6822, and amendments thereto.

(b) As used in L. 2021, ch. 116, sec. 38 and amendments thereto, “third party” shall mean any of the following, other than any of the entities specified in K.S.A. 65-118 and amendments thereto:

- (1) An individual, other than a contact tracer;
- (2) an organization; or
- (3) a business. (Authorized by and implement-

ing L. 2021, ch. 116, sec. 38; effective, T-28-7-30-20, July 30, 2020; effective Nov. 20, 2020; amended Jan. 14, 2022.)

28-1-41. Contact tracers. (a) Each individual acting as a contact tracer under the authority of the secretary or a local health officer shall meet the following qualifications and training requirements:

- (1) Be at least 18 years of age;
- (2) possess a high school diploma or GED certificate; and
- (3) complete a contact tracing training program approved by the secretary.

(b) Each individual acting as a contact tracer under the authority of the secretary or a local health officer shall execute the following oath or affirmation:

“I, ___[name]___, acknowledge that I have completed the training to become a contact tracer. I am familiar with the provisions contained in and duties required by L. 2021, ch. 116, sec. 38, attached hereto and incorporated by reference, including the duty of confidentiality stated therein. I do solemnly swear (or affirm) that I will comply with those Kansas COVID-19 contact tracing provisions while acting as a contact tracer. So help me God.

Signature: _____ Date: _____”

(c) Any individual having conscientious scruples against taking an oath ending with a reference to a deity may affirm with like effect without the need to make a reference to the deity.

(d) The oath or affirmation specified in subsection (b) may be executed before the secretary, the secretary’s designee, a local health officer, or the local health officer’s designee. (Authorized by and implementing L. 2021, ch. 116, sec. 38; effective, T-28-7-30-20, July 30, 2020; effective Nov. 20, 2020; amended Jan. 14, 2022.)

28-1-42. Contact data; communication with contacts. (a) Each individual acting as a contact tracer under the authority of the secretary or a local health officer shall be limited to collecting the following personal information for any contact:

- (1) Data that identifies the contact, including name, date of birth, and sex;
- (2) address;
- (3) telephone number;
- (4) electronic-mail address;

(5) geographical or similar location information at certain points in time; and

(6) the name of each individual who could be an additional contact.

(b) Each individual acting as a contact tracer under the authority of the secretary or a local health officer shall be limited to collecting the following health data for any contact:

- (1) Age;
- (2) vaccination and testing status;
- (3) temperature; and
- (4) symptoms.

(c) Whenever a contact tracer communicates with a contact, the contact tracer shall advise the contact that the contact shall not be compelled to participate in or be prohibited from participating in the contact tracing.

(1) The contact tracer shall use the following text when advising the contact:

“Participation in COVID-19 contact tracing is voluntary. You shall not be compelled to participate in or be prohibited from participation in contact tracing for COVID-19. If in good faith you do provide information requested by a contact tracer, you shall be immune from civil, criminal, and administrative liability for disclosing the information. If you do not provide information, you are not subject to civil, criminal, or administrative penalties. Do you understand what I have said? May I ask you questions concerning a COVID-19 contact tracing?”

(2) The contact tracer shall document in the contact data whether the text was provided and what were the contact’s responses to the questions. (Authorized by and implementing L. 2021, ch. 116, sec. 38; effective, T-28-7-30-20, July 30, 2020; effective Nov. 20, 2020; amended Jan. 14, 2022.)

28-1-43. Surrender or destruction of contact data. (a) Each individual acting as a contact tracer for the secretary or a local health officer who possesses contact data pursuant to L. 2021, ch. 116, sec. 38, and amendments thereto, shall surrender all contact data to the secretary or the local health officer when the contact has been released from quarantine.

(b) Each individual who possesses contact data permitted to be collected as specified in K.A.R. 28-1-42 shall safely and securely destroy, in a manner approved by the secretary, any contact data that contains protected health information, individual movement or mobility data, or personal

information whenever the secretary determines that the contact data that contains protected health information, individual movement or mobility data, or personal information is no longer necessary for the purpose of contact tracing, as defined in L. 2021, ch. 116, sec. 38 and amendments thereto. (Authorized by and implementing L. 2021, ch. 116, sec. 38; effective, T-28-7-30-20, July 30, 2020; effective Nov. 20, 2020; amended Jan. 14, 2022.)

28-1-44. Sunset provision. K.A.R. 28-1-40 through 28-1-43 shall have no force and effect after June 30, 2022. (Authorized by and implementing L. 2021, ch. 116, sec. 38; effective, T-28-7-30-20, July 30, 2020; effective Nov. 20, 2020; amended Jan. 14, 2022.)

Article 3.—HEARINGS

28-3-1. (Authorized by K.S.A. 74-901e; effective Jan. 1, 1966; revoked May 1, 1986.)

28-3-2. (Authorized by K.S.A. 74-901e; effective Jan. 1, 1966; revoked May 1, 1986.)

28-3-3. (Authorized by K.S.A. 74-901e; effective Jan. 1, 1966; revoked May 1, 1986.)

28-3-4. (Authorized by K.S.A. 74-901e; effective Jan. 1, 1966; revoked May 1, 1986.)

28-3-5. (Authorized by K.S.A. 74-901e; effective Jan. 1, 1966; revoked May 10, 1996.)

28-3-6. (Authorized by K.S.A. 75-5625 and L. 1984, ch. 313, section 13; implementing L. 1984, ch. 313, section 26; effective May 1, 1986; revoked May 10, 1996.)

28-3-7. Conduct of hearings not under Kansas administrative procedure act. (a) In all hearings not conducted under the provisions of the Kansas administrative procedure act, the hearing officer shall be guided by rules of evidence as employed by the courts of the state of Kansas, but may relax the rules to the extent the hearing officer deems appropriate, keeping always in mind that the judicially developed rules of evidence have been developed as procedures most likely to obtain the truth.

(b) In hearings appealing an order or action by the secretary or the secretary’s designee, the requesting party shall open and close. In all other hearings, there shall be no requirements as to order of procedure. The hearing officer shall consid-

er evidence in the order which appears most likely to reveal the facts.

(c) A record of proceedings may be kept by the hearing officer by electronic recording, notes made by the hearing officer or both. A transcript of the record need not be made unless specifically ordered by the hearing officer or in cases in which the party requesting a transcription pays its cost. Each party to a hearing may cause the proceedings to be recorded by a certified court reporter, providing the requesting party bears the expense of same.

(d) The provisions of this regulation shall apply to all hearings conducted under authority of statutes other than the Kansas administrative procedure act and shall be supplemental to any statutory requirements. At the conclusion of each hearing, the presiding or hearing officer shall prepare a written report stating findings of fact, any appropriate conclusions of law, and any further comments which the presiding or hearing officer deems appropriate. A copy of the report shall be mailed to the parties and filed with the secretary. (Authorized by and implementing K.S.A. 75-5625; effective May 1, 1986.)

Article 4.—MATERNAL AND CHILD HEALTH

GENERAL REGULATIONS

28-4-1 to 28-4-4. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-5. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; amended Jan. 1, 1970; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-6 and 28-4-7. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-8 to 28-4-19. (Authorized by K.S.A. 65-508; effective Jan. 1, 1966; revoked Jan. 1, 1973.)

28-4-20 to 28-4-25. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-26 to 28-4-36. (Authorized by K.S.A. 65-508; effective Jan. 1, 1966; revoked, E-81-22, Aug. 27, 1980; revoked May 1, 1981.)

28-4-37. (Authorized by K.S.A. 65-504, 65-508; effective Jan. 1, 1966; revoked, E-81-22, Aug. 27, 1980; revoked May 1, 1981.)

28-4-38 to 28-4-49. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-50. Acceptable types of water supplies for licensed child care homes. (a) Public water supply systems approved by the state department of health shall be used wherever such supplies are available or can be made available at reasonable cost.

(b) Properly located, constructed and equipped private ground water supplies approved by the department may be used if a public supply is not available. Environmental health services bulletin 4-1, a manual of recommended standards for locating, constructing, and equipping water wells for rural homes, shall be used as a guide for approving private ground water supplies.

(c) Stored water obtained from a supply approved by the department, and transported, and stored in facilities approved by the department may be used at homes where a public water supply or a satisfactory ground water supply is not available.

(d) Other methods of providing water for a home will be considered on an individual basis. All approval for such use shall be obtained from the chief engineer, state department of health.

(e) No water supply containing more than 45 mg/l of nitrates expressed as NO_3 shall be used at a home providing care for children under one year of age. (Authorized by K.S.A. 65-508; effective Jan. 1, 1966; amended Jan. 1, 1971.)

28-4-51 to 28-4-54. (Authorized by K.S.A. 65-508; effective Jan. 1, 1966; revoked Jan. 1, 1971.)

28-4-55. Acceptable sewage disposal systems for child care homes. (A) The home shall be connected to a public sewer system whenever such a system abuts the property or can be made to abut the property at a reasonable cost.

(B) Properly located, constructed, and operated septic tank-soil absorption systems, approved by the department, may be used for homes located in areas where a public sewer system is not available. Environmental health services bulletin 4-2, a manual of recommended standards for locating, constructing and operating septic tank systems for rural homes, shall be used as a guide in approving these systems.

(C) The home may be connected to any properly located, constructed and maintained waste stabilization ponds approved by the department where a public sewer system is not available and where soil is not suitable for use of a septic tank-soil absorption system. Environmental health services bulletin 4-2, a manual of recommended standards for locating, constructing and operating septic tank systems for rural homes, shall be used as a guide in approving these systems.

(D) The home may use any existing system that is functioning properly and is not discharging onto the surface of the ground, into a ditch or watercourse or into an underground fresh water aquifer and is not in violation of any public health or water pollution regulation adopted by the state board of health.

(E) The home may be permitted to use other types of sewage disposal systems provided prior approval for use of such a system is obtained from the chief engineer of the state department of health. (Authorized by K.S.A. 65-508; effective Jan. 1, 1966; amended Jan. 1, 1971.)

28-4-56. (Authorized by K.S.A. 65-502, K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-57 to 28-4-71. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1966; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-72. (Authorized by K.S.A. 65-507; effective Jan. 1, 1966; revoked May 10, 1996.)

28-4-73. Treatment of eyes of newborn.

(a) The prophylactic approved for instillation into the eyes of newly born infants shall be one of the following:

(1) One percent (1%) aqueous solution of silver nitrate,

(2) An ophthalmic ointment containing one percent (1%) tetracycline, or

(3) An ophthalmic ointment containing five-tenths percent (.5%) erythromycin.

(b) These prophylactic agents shall be distributed in single use containers which bear clearly the name and percentage strength and an expiration date beyond which the product shall not be used. (Authorized by K.S.A. 65-153b, 65-153d; effective Jan. 1, 1966; amended, E-81-39, Dec. 10, 1980; amended May 1, 1981.)

28-4-74. (Authorized by K.S.A. 65-202; effective Jan. 1, 1966; revoked, E-81-22, Aug. 27, 1980; revoked May 1, 1981.)

28-4-75. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1986; amended, May 1, 1979, T-86-46, Dec. 18, 1985; revoked May 1, 1986.)

28-4-76. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-508, K.S.A. 1982 Supp. 65-504, 65-505; effective, E-76-36, July 14, 1985; effective May 1, 1976; amended May 1, 1979; amended, T-83-24, Aug. 25, 1982; amended May 1, 1983; revoked May 1, 1986.)

28-4-77. (Authorized by K.S.A. 1985 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-78. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-79. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-80 and 28-4-81. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-82. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-83. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-84 and 28-4-85. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-86. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-87. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-88. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-89 and 28-4-90. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-91. Revocation of present regulations. The following present regulations as published in the Kansas administrative regulations are being replaced, so are hereby revoked:

General regulations 28-4-1 through 28-4-7.

Health standards for children's institutions 28-4-20 through 28-4-25.

Regulations for maternity homes and clinics 28-4-56 through 28-4-71.

(Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976.)

28-4-92. License fees. When an applicant or licensee submits an application for a license or for the renewal of a license, the applicant or licensee shall submit to the secretary the appropriate non-refundable license fee specified in this regulation:

(a) For each maternity center as defined in K.S.A. 65-502 and amendments thereto, \$75;

(b) for each child placement agency as defined in K.S.A. 65-503 and amendments thereto, \$75;

(c) for each child care resource and referral agency as defined in K.S.A. 65-503 and amendments thereto, \$75;

(d) for each of the following child care facilities, \$75 plus \$1 times the maximum number of children to be authorized under the license:

(1) Day care home or group day care home, as defined in K.A.R. 28-4-113; and

(2) child care center, as defined in K.A.R. 28-4-420; and

(e) for each of the following child care facilities with a license capacity of 13 or more children, \$35 plus \$1 for each child included in the license capacity, with the total not to exceed \$75, and for each of the following child care facilities with a license capacity of 12 or fewer children, \$15:

(1) Attendant care facility, as defined in K.A.R. 28-4-285;

(2) detention center or secure care center, as defined in K.A.R. 28-4-350;

(3) preschool, as defined in K.A.R. 28-4-420;

(4) psychiatric residential treatment facility, as defined in K.A.R. 28-4-1200;

(5) residential center or group boarding home, as defined in K.A.R. 28-4-268; and

(6) secure residential treatment facility, as de-

finied in K.A.R. 28-4-330. (Authorized by and implementing K.S.A. 65-505, as amended by L. 2010, ch. 161, sec. 6; effective, T-83-24, Aug. 25, 1982; effective May 1, 1983; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended, T-87-22, Aug. 21, 1986; amended May 1, 1987; amended, T-28-8-16-10, Aug. 16, 2010; amended Dec. 17, 2010.)

28-4-93. Online information dissemination system. This regulation shall apply to the department's online information dissemination system for child care facilities, as defined in K.S.A. 65-503 and amendments thereto. (a) Definitions. The following terms shall have the meanings specified in this regulation:

(1) "Applicant" means a person who has applied for a license to operate a child care facility but who has not yet been granted the license.

(2) "Applicant with a temporary permit" means a person who has been granted a temporary permit to operate a child care facility.

(3) "Department" means Kansas department of health and environment.

(4) "Licensee" means a person who has been granted a license to operate a child care facility.

(5) "Online information dissemination system" means the electronic database of the department that is accessible to the public.

(b) Identifying information. Each applicant, each applicant with a temporary permit, and each licensee that wants the department to display the address and the telephone number of the child care facility on the online information dissemination system shall notify the department on a form provided by the department. (Authorized by and implementing K.S.A. 2010 Supp. 65-534; effective Feb. 3, 2012.)

28-4-94. Background check requests for residential centers, group boarding homes, and child placement agencies. (a) Initial and renewal background check requests. Each applicant submitting an initial application and each licensee submitting a renewal application shall submit a background check request on a form provided by the department. The request form shall be submitted with the application and shall include the name and all other required information for each individual who is at least 10 years old and is residing, working, or regularly volunteering in the residential center, group boarding home, or child placement agency.

(b) Additional background check requests. Each applicant with a temporary permit and each licensee shall submit a background check request on a form provided by the department before any individual who is at least 10 years old begins residing, working, or regularly volunteering in the residential center, group boarding home, or child placement agency.

(c) Background check not required. No background check request form shall be submitted for any individual admitted for care.

(d) Documentation. A copy of each background check request form shall be kept on file at the residential center, group boarding home, or child placement agency. (Authorized by K.S.A. 2014 Supp. 65-508; implementing K.S.A. 2014 Supp. 65-516; effective May 15, 2015.)

28-4-95. Fee for fingerprint-based background checks. Each applicant, applicant with a temporary permit, and licensee shall submit a nonrefundable fee of \$48 to the department for the cost of each required fingerprint-based background check, as follows:

(a) For each day care home, group day care home, child care center, and preschool, each individual specified in K.A.R. 28-4-125;

(b) for each school-age program, each individual specified in K.A.R. 28-4-584; and

(c) for each drop-in program, each individual specified in K.A.R. 28-4-705. (Authorized by and implementing K.S.A. 65-516; effective Nov. 26, 2018.)

LICENSED DAY CARE HOMES AND GROUP DAY CARE HOMES FOR CHILDREN

28-4-100. (Authorized by K.S.A. 65-503, 65-508; effective Jan. 1, 1970; revoked May 1, 1981.)

28-4-101. (Authorized by K.S.A. 65-501, 65-504, 65-505, 65-508, 65-512; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-102. (Authorized by K.S.A. 65-504, 65-508; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-103. (Authorized by K.S.A. 65-508, 65-510; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-104 to 107. (Authorized by K.S.A. 65-508; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-108. (Authorized by K.S.A. 65-507, 65-508; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-109. (Authorized by K.S.A. 65-508; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-110. (Authorized by K.S.A. 65-501, 65-504, 65-508, 65-514; effective Jan. 1, 1970; revoked, E-80-18, Oct. 17, 1979; revoked May 1, 1980.)

28-4-113. Definitions. (a) “Applicant” means a person who has applied for a license but who has not yet been granted a license to operate a facility.

(b) “Applicant with a temporary permit” means a person who has been granted a temporary permit to operate a facility.

(c) “Care provider” and “provider” mean an individual who cares for and supervises children in a facility and has responsibility for the health, safety, and well-being of children, including the following:

(1) A primary care provider;

(2) an individual who is at least 16 years of age and who is working in the facility; and

(3) a substitute.

(d) “Day care home” means the premises on which care is provided for a maximum of 10 children under 16 years of age, with a limited number of children under five years of age in accordance with K.A.R. 28-4-114 (e).

(e) “Department” means Kansas department of health and environment.

(f) “Emergency care” means care for a period not to exceed two weeks for children not regularly enrolled in a facility.

(g) “Evening care” means care after 6:00 p.m. and before 1:00 a.m. the following day for children enrolled at a facility and present during operating hours.

(h) “Extended absence” means time away from a facility for a period of more than three hours in a day.

(i) “Facility” means a day care home or a group day care home.

(j) “Fire inspector” means a person approved by the state fire marshal to conduct fire safety inspections.

(k) “Group day care home” means the premises on which care is provided for a maximum of 12 children under 16 years of age, with a limited number of children under five years of age in accordance with K.A.R. 28-4-114 (f).

(l) “Large motor activity” means any movement involving the arms, legs, feet, or entire body, including crawling, running, and jumping.

(m) “License capacity” means the maximum number of children who are authorized to be on the premises at any one time.

(n) “Licensed physician” means an individual who is licensed to practice either medicine and surgery or osteopathy in Kansas by the Kansas state board of healing arts or who practices either medicine and surgery or osteopathy in another state and is licensed under the licensing statutes of that state.

(o) “Licensee” means a person who has been granted a license to operate a facility.

(p) “Overnight care” means care after 1:00 a.m. for children enrolled at a facility and present during operating hours.

(q) “Primary care provider” means an applicant with a temporary permit, a licensee, or the designee of an applicant with a temporary permit or a licensee. Each applicant with a temporary permit, each licensee, and each designee shall be at least 18 years of age and shall meet the requirements for a primary care provider specified in K.A.R. 28-4-114a.

(r) “Professional development training” means training approved by the secretary that is related to working with children in care.

(s) “Substitute” means an individual who supervises children in the temporary absence or extended absence of the primary care provider and who meets the following requirements:

(1) In the temporary absence of the primary care provider, the substitute shall be at least 16 years of age and shall meet all of the requirements for a provider specified in K.A.R. 28-4-114a (a)(2), (b)(4)(C), and (c).

(2) In the extended absence of the primary care provider, the substitute shall be at least 18 years of age and shall meet all of the requirements for a primary care provider specified in K.A.R. 28-4-114a.

(t) “Temporary absence” means time away from a facility for a period not to exceed three hours in a day.

(u) “Use zone” means the surface under and around a piece of equipment onto which a child falling from or exiting the equipment would be expected to land.

(v) “Weapons” means any of the following:

- (1) Firearms;
- (2) ammunition;

(3) air-powered guns, including BB guns, pellet guns, and paint ball guns;

(4) hunting and fishing knives;

(5) archery equipment; or

(6) martial arts equipment. (Authorized by K.S.A. 2010 Supp. 65-508; implementing K.S.A. 2010 Supp. 65-503 and K.S.A. 2010 Supp. 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended Feb. 26, 1990; amended Feb. 3, 2012.)

28-4-114. Applicant; licensee. (a) Application process.

(1) Any person desiring to operate a facility shall apply for a license on forms provided by the department.

(2) Each applicant and each licensee shall submit the fee specified in K.A.R. 28-4-92 for a license or for the renewal of a license. The applicable fee shall be submitted at the time of license application or renewal and shall not be refundable.

(3) The granting of a license to any applicant or applicant with a temporary permit may be refused by the secretary if the applicant or applicant with a temporary permit is not in compliance with the applicable requirements of the following:

(A) K.S.A. 65-504 through 65-506, and amendments thereto;

(B) K.S.A. 65-508, and amendments thereto;

(C) K.S.A. 65-512, and amendments thereto;

(D) K.S.A. 65-530 and 65-531, and amendments thereto; and

(E) all regulations governing facilities.

(4) Failure to submit the application forms and fee for renewal of a license shall result in an assessment of a late fee pursuant to K.S.A. 65-505, and amendments thereto, and may result in closure of the facility.

(b) Applicant and licensee requirements. Each applicant, if an individual, and each licensee, if an individual, shall meet the following requirements:

(1) Be at least 18 years of age;

(2) not be involved in child care or a combination of child care and other employment for more than 18 hours in a 24-hour period; and

(3) not be engaged in either business or social activities that interfere with the care or supervision of children.

(c) Multiple child care facilities.

(1) Each applicant with a temporary permit and each licensee who operates more than one

child care facility, as defined in K.S.A. 65-503 and amendments thereto, shall maintain each child care facility as a separate entity.

(2) A license for an additional child care facility shall not be granted until all existing child care facilities for which the licensee has been granted a license are in compliance with licensing regulations.

(d) Multiple licenses. No licensee shall be licensed concurrently for or provide more than one type of child care or child and adult care on the same premises.

(e) License capacity for day care homes. Each applicant with a temporary permit and each licensee shall ensure that the requirements of this subsection are met.

(1) The maximum number of children for which a day care home may be licensed shall be the following:

TABLE I—LICENSE CAPACITY, ONE PROVIDER

Maximum Number of Children Under 18 Months	Maximum Number of Children at Least 18 Months but Under 5 Years of Age	Maximum Number of Children at Least 5 Years but Under 11 Years of Age*	License Capacity
0	7	3	10
1	5	4	10
2	4	3	9
3	3	2	8

*Children five years of age and over may be substituted for younger children in the license capacity.

(2) Children at least 11 years of age but under 16 years of age who are unrelated to the provider shall be included in the license capacity if child care for this age group as a whole exceeds three hours a week.

(f) Maximum capacity for group day care homes. Each applicant with a temporary permit and each licensee shall ensure that all of the requirements of this subsection are met.

(1) The maximum number of children for which a group day care home may be licensed shall be the following:

TABLE II—LICENSE CAPACITY, ONE PROVIDER

Age of Children Enrolled	License Capacity
At Least 2½ Years but Under 11 Years of Age	9
At Least 3 Years but Under 11 Years of Age	10
At Least 5 Years but Under 11 Years of Age	12

TABLE III—LICENSE CAPACITY, TWO PROVIDERS*

Maximum Number of Children Under 18 Months	Maximum Number of Children at Least 18 Months but Under 5 Years of Age	Maximum Number of Children at Least 5 Years but Under 11 Years of Age**	License Capacity*
1	8	3	12
2	7	3	12
3	6	3	12
4	4	2	10

*A second provider shall be present when the number of children exceeds the maximum number allowed for one provider. See Table I.

**Children five years of age and over may be substituted for younger children in the license capacity.

TABLE IV—LICENSE CAPACITY, TWO PROVIDERS*

Maximum Number of Children Under 18 Months	Maximum Number of Children at Least 18 Months but Under 2½ Years of Age	Maximum Number of Children at Least 2½ Years but Under 11 Years of Age**	License Capacity*
0	5	7	12

*A second provider shall be present when the number of children exceeds the maximum number allowed for one provider. See Table I.

**Children five years of age and over may be substituted for younger children in the license capacity.

(2) Children at least 11 years of age but under 16 years of age unrelated to the provider shall be included in the license capacity if child care for this age group as a whole exceeds three hours a week.

(g) Developmental levels. Any child who does not function according to age-appropriate expectations shall be counted in the age group that reflects the developmental age level of the child.

(h) License capacity not exceeded. Each applicant with a temporary permit and each licensee shall ensure that the total number of children on the premises, including children under 11 years of age related to the applicant with a temporary permit, the licensee, or any other provider, does not exceed the license capacity, except for additional children permitted in subsection (j).

(i) Emergency care. Emergency care may be provided if the additional children do not cause the license capacity to be exceeded.

(j) Additional children on the premises. In addition to the number of children permitted under the terms of the temporary permit or the license

and specified in subsections (e) and (f), other children may be permitted on the premises.

(1) Not more than two additional children 2½ years of age or older who attend part-day preschool or part-day kindergarten may be present at any time between the hours of 11:00 a.m. and 1:00 p.m. for the noon meal on days that school is in session.

(2) Not more than two additional children at least five years of age but under 11 years of age may be present between the hours of 6:00 a.m. and 6:00 p.m. The additional children may be present as follows:

(A) During the academic school year before and after school, in-service days, school holidays, scheduled or emergency closures, and school breaks not to exceed two consecutive weeks; and

(B) during the two consecutive weeks before the opening of the academic school year in August or September and following the end of the academic school year in May or June.

(3) Not more than two additional children 11 years of age or older, unrelated to the applicant with a temporary permit or the licensee, may be present for not more than two hours a day during child care hours if all of the following conditions are met:

(A) The additional children are not on the premises for the purpose of receiving child care in the facility.

(B) The additional children are visiting the applicant's or the licensee's own child or children.

(C) The additional children are supervised by a provider if they have access to the children in care.

(k) Substitute. Each applicant with a temporary permit and each licensee shall arrange for a substitute to care for children in the event of a temporary absence or extended absence of the primary care provider.

(l) Posting of temporary permit or license and availability of regulations. Each applicant with a temporary permit and each licensee shall post any temporary permit or license conspicuously as required by K.S.A. 65-504, and amendments thereto. A copy of the current regulations governing facilities shall be kept on the premises and shall be available to all providers at all times.

(m) Closure. Any applicant may withdraw the application for a license. Any applicant with a temporary permit and any licensee may submit, at any time, a request to close the facility. If an application is withdrawn or a facility is closed, any temporary

permit or license granted to the applicant or licensee for that facility shall become void. (Authorized by K.S.A. 2010 Supp. 65-508; implementing K.S.A. 2010 Supp. 65-504, K.S.A. 2010 Supp. 65-505, and K.S.A. 2010 Supp. 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended Feb. 26, 1990; amended Feb. 3, 2012.)

28-4-114a. Initial and ongoing professional development training. If an applicant, an applicant with a temporary permit, or a licensee is not an individual, the applicant, applicant with a temporary permit, or licensee shall designate an individual to meet the requirements of this regulation.

(a) Orientation.

(1) Each person shall, before applying for a license, complete an orientation program on the requirements for operating a facility, provided by the health department or the secretary's designee that serves the county in which the facility will be located.

(2) Each applicant, each applicant with a temporary permit, and each licensee shall provide orientation to each individual who will be caring for children about the policies and practices of the facility, including duties and responsibilities for the care and supervision of children. Each provider shall complete the orientation before the provider is given sole responsibility for the care and supervision of children. The orientation shall include the following:

(A) Licensing regulations;

(B) the policies and practices of the facility, including emergency procedures, behavior management, and discipline;

(C) the schedule of daily activities;

(D) care and supervision of children in care, including any special needs and known allergies;

(E) health and safety practices; and

(F) confidentiality.

(b) Health and safety training. Each applicant, each applicant with a temporary permit, each licensee, and each provider shall complete health and safety training approved by the secretary.

(1) Each applicant and each applicant with a temporary permit shall complete the training not later than 30 calendar days after submitting an application for a license.

(2) Each provider shall complete the training before the date of employment or not later than 30 calendar days after the date of employment.

(3) Each licensee whose license was issued before July 1, 2017 and who has completed the training in the subject areas specified in paragraphs (b)(4)(A), (B), and (C) shall be exempt from training in the subject areas specified in paragraphs (b)(4)(D) through (I). Each provider who was employed at the facility before July 1, 2017 and who has completed the training in the subject areas specified in paragraphs (b)(4)(A), (B), and (C) shall be exempt from training in the subject areas specified in paragraphs (b)(4)(D) through (I).

(4) The health and safety training shall include the following subject areas:

(A) Recognizing the signs of child abuse or neglect, including prevention of shaken baby syndrome and abusive head trauma, and the reporting of suspected child abuse or neglect;

(B) basic child development, including supervision of children;

(C) safe sleep practices and sudden infant death syndrome;

(D) prevention and control of infectious diseases, including immunizations;

(E) prevention of and response to emergencies due to food and allergic reactions;

(F) building and premises safety, including identification of and protection from hazards that could cause bodily injury, including electrical hazards, bodies of water, and vehicular traffic;

(G) emergency preparedness and response planning for emergencies resulting from a natural disaster or a human-caused event, including violence at a facility;

(H) handling and storage of hazardous materials and the appropriate disposal of bio-contaminants, including blood and other bodily fluids or waste; and

(I) precautions when transporting children, if transportation is provided.

(c) Pediatric first aid and pediatric cardiopulmonary resuscitation (CPR) certifications. Each applicant, each applicant with a temporary permit, each licensee, and each provider shall obtain certification in pediatric first aid and pediatric CPR as specified in this subsection.

(1) Each applicant and each applicant with a temporary permit shall obtain the certifications not later than 30 calendar days after submitting an application for a license.

(2) Each provider shall obtain the certifications before the date of employment or not later than 30 calendar days after the date of employment.

(3) Each individual required to obtain the certifications shall maintain current certifications.

(d) Medication administration training.

(1) Each of the following individuals shall complete the medication administration training as specified in this subsection:

(A) Applicant;

(B) applicant with a temporary permit;

(C) licensee; and

(D) provider designated to administer medications.

(2) The training shall be approved by the secretary.

(3) Each applicant and each applicant with a temporary permit shall complete the training not later than 30 calendar days after submitting an application for a license and before administering medication to any child.

(4) Each licensee whose license was issued before July 1, 2017 shall complete the training not later than December 31, 2017. The licensee shall not administer medications after December 31, 2017 unless the licensee has completed the training.

(5) Each provider designated to administer medications who is employed at the facility before July 1, 2017 shall complete the training not later than December 31, 2017. The designated provider shall not administer medications after December 31, 2017 unless the designated provider has completed the training.

(6) Each provider designated to administer medications who is employed at the facility on or after July 1, 2017 shall complete the training before administering medication to any child.

(e) Annual professional development training requirements.

(1) For purposes of this subsection, "licensure year" shall mean the period beginning on the effective date and ending on the expiration date of a license.

(2) In each licensure year, each primary care provider shall complete professional development training as follows:

(A) For each licensure year ending during the 2017 calendar year, five clock-hours;

(B) for each licensure year ending during the 2018 calendar year, five clock-hours;

(C) for each licensure year ending during the 2019 calendar year, 12 clock-hours; and

(D) for each licensure year ending during the 2020 calendar year, and for each subsequent licensure year, 16 clock-hours.

(f) Documentation. Documentation of all orientation, training, and certifications for each in-

dividual shall be kept in that individual's file in the facility. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective Feb. 3, 2012; amended May 12, 2017.)

28-4-115. Facility. (a) Water supply and sewerage systems. Each applicant, each applicant with a temporary permit, and each licensee shall ensure that public water and sewerage systems, where available, are used. If a nonpublic source for the water supply is used, the water shall be safe for drinking and shall be tested annually by a department-certified laboratory. If a well is used, the well shall be approved by the local authority for private well permitting, the department, or a licensed water well contractor. A copy of the test results and the approval shall be kept on file at the facility. Each private sewerage system shall be maintained in compliance with all applicable state and local laws.

(b) Drinking water for children under 12 months of age. If children under 12 months of age are enrolled in a facility using water from a nonpublic source, including private well water, commercially bottled drinking water shall be purchased and used until a laboratory test confirms that the nitrate content of the private well water is not more than 10 milligrams per liter (10 mg/l) as nitrogen.

(c) General environmental requirements. Each facility shall have 25 square feet of available play space per child and shall be constructed, arranged, and maintained to provide for the health and safety of children in care. Each applicant, each applicant with a temporary permit, and each licensee shall ensure that the facility meets the following requirements:

- (1) Has walls that are in good condition;
- (2) is skirted and anchored if a mobile home;
- (3) has a 2A 10B:C fire extinguisher;
- (4) has a working smoke detector on each level of the facility;
- (5) is uncluttered, visibly clean, and free from any evidence of vermin infestation and any objects or materials that constitute a danger to children in care;
- (6) has kitchen and outdoor trash and garbage in covered containers or in tied plastic bags;
- (7) meets all of the following requirements for each heating appliance:
 - (A) Has a protective barrier for each freestanding heating appliance to protect from burns; and
 - (B) has each heating appliance using combustible fuel vented to the outside;

(8) has each electrical outlet covered or inaccessible to prevent easy access by a child when the outlet is not in use;

(9) has any power strip or extension cord positioned in a manner that prevents a tripping or shock hazard;

(10) has each stairway with more than two stairs railed;

(11) if any children under 2½ years of age are in care, meets all of the following requirements:

(A) Has each stairway equipped with balusters not more than four inches apart or guarded to prevent a child's head or body from falling through;

(B) has each stairway guarded by a secured door or gated to prevent unsupervised access by the child, including a latching device that an adult can open readily in an emergency;

(C) does not have any accordion gate in use; and

(D) does not have a pressure gate at the top of any stairway;

(12) has a readily available second means of escape from the first floor;

(13) has each lockable interior door designed to permit the door to be unlocked from either side in case of an emergency;

(14) is maintained at a temperature of not less than 65 degrees Fahrenheit and not more than 85 degrees Fahrenheit in the play area;

(15) does not have any window coverings with strings or cords accessible to children in care; and

(16) has at least one bathroom with at least one sink and one flush toilet. All fixtures shall be in working order at all times. An individual towel and washcloth or disposable products shall be provided for each child. Hand soap shall be readily accessible in each bathroom.

(d) Fire safety. Each facility shall be approved for fire safety by a fire inspector.

(e) Basements and other floors. A basement or a second floor used for child care in a facility shall be approved for fire safety by a fire inspector before use. A third floor shall not be used for child care.

(f) Refrigerator. A refrigerator shall be available for the storage of perishable foods. Refrigerated medications shall be in a locked box.

(g) Storage of hazardous items. The following hazardous items shall be safely stored:

(1) All household cleaning supplies and all bodily care products bearing warning labels to keep out of reach of children or containing alcohol shall be in locked storage or stored out of reach of children under six years of age. Soap used for hand

washing may be kept unlocked and placed on the back of the counter by a bathroom or kitchen sink.

(2) Dangerous chemicals, household supplies with warning labels to keep out of reach of children, and all medications shall be in locked storage or stored out of the reach of children under 10 years of age.

(3) Sharp instruments shall be stored in drawers or cabinets equipped with childproof devices to prevent access by children or stored out of reach of children.

(4) Tobacco products, ashtrays, lighters, and matches shall be stored out of reach of children.

(h) Storage of weapons. No child in care shall have access to weapons. All weapons shall be stored in a locked room, closet, container, or cabinet. Ammunition shall be kept in locked storage separate from other weapons.

(i) Outdoor play area. The designated area for outdoor play and large motor activities on the premises shall meet all of the following requirements:

(1) The outdoor play area shall be fenced if the play area adjoins that of another child care facility, as defined in K.S.A. 65-503 and amendments thereto, or if the area surrounding, or the conditions existing outside, the play area present hazards that could be dangerous to the safety of the children, which may include any of the following:

(A) A fish pond or a decorative pool containing water;

(B) railroad tracks; or

(C) a water hazard, including a ditch, a pond, a lake, and any standing water.

(2) Outdoor play equipment that is safely constructed and in good repair shall be available and placed in an area free of health, safety, and environmental hazards.

(3) The use of a trampoline shall be prohibited during the hours of operation of the facility. If a trampoline is on the premises, the trampoline shall be made inaccessible to children during the facility's hours of operation.

(4) Climbing equipment and swings shall be either anchored in the ground with metal straps or pins or set in cement, to prevent movement of the equipment and swings.

(5) All surfaces under and around climbing equipment and swings shall meet the following requirements:

(A) Impact-absorbent surfacing material shall be installed in each use zone under and around anchored equipment over four feet in height, including climbing equipment, slides, and swings.

(B) Impact-absorbent surfacing material shall consist of material intended for playground use, including shredded bark mulch, wood chips, fine sand, fine gravel, shredded rubber, unitary surfacing material, or synthetic impact material.

(C) Hard-surfacing materials, including asphalt, concrete, and hard-packed dirt, shall not be used in any use zone. This requirement shall apply regardless of the height of the climbing equipment, slides, and swings.

(D) Surfaces made of loose material shall be maintained by replacing, leveling, or raking the material.

(6) Swings shall not have wooden or metal seats.

(7) Teeter-totters and merry-go-rounds designed for school-age children shall not be used by children under five years of age.

(j) Each facility licensed on and after March 1, 2012 shall have a designated area for outdoor play and large motor activities as part of the licensed premises. (Authorized by and implementing K.S.A. 2010 Supp. 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended May 1, 1986; amended May 1, 1987; amended Feb. 26, 1990; amended Feb. 3, 2012.)

28-4-115a. Supervision. (a) Supervision plan.

(1) Each applicant, each applicant with a temporary permit, and each licensee shall develop a supervision plan for children in care that includes all age ranges of children for whom care will be provided. A copy of the plan shall be available for review by the parents or legal guardians of children in care and by the department. The plan shall include the following:

(A) A description of the rooms, levels, or areas of the facility including indoor and outdoor areas in which the child will participate in activities, have snacks or meals, nap, or sleep;

(B) the manner in which supervision will be provided; and

(C) any arrangements for the provision of evening or overnight care.

(2) Each applicant, each applicant with a temporary permit, and each licensee shall update the supervision plan when changes are made in any of the requirements of paragraph (a)(1).

(3) Each provider shall follow the supervision plan.

(b) General supervision requirements. Each applicant with a temporary permit and each licensee

shall ensure that supervision is provided as necessary to protect the health, safety, and well-being of each child in care.

(1) Each child in care shall be under the supervision of a provider who is responsible for the child's health, safety, and well-being.

(2) Each provider shall be aware at all times of the location of each child in that provider's care and the activities in which the child is engaged. Each provider shall perform the following:

(A) Interact with the child and attend to the child's needs;

(B) respond immediately if the child is crying or in distress in order to determine the cause and to provide comfort and assistance;

(C) investigate immediately any change in the activity or noise level of the child; and

(D) respond immediately to any emergency that could impact the health, safety, and well-being of the child.

(3) No provider shall engage in business, social, or personal activities that interfere with the care and supervision of children.

(4) If used, electronic monitoring devices, including infant monitors, shall not replace any of the supervision requirements of this regulation.

(c) Indoor supervision requirements. When any child is indoors, each provider shall ensure that all of the following requirements are met, in addition to the requirements of subsection (b):

(1) For each child who is under 2½ years of age and who is awake, the provider shall be within sight of and in proximity to the child, watching and overseeing the activities of the child. When the provider is attending to personal hygiene needs or engaging in other child care duties and is temporarily unable to remain within sight of the child, the provider shall meet all of the following conditions:

(A) The provider has first ensured the safety of each child.

(B) The provider is able to respond immediately to any child in distress.

(C) The provider remains within hearing distance of each child.

(2) For each child 2½ years of age and older who is awake, the provider may permit the child to go unattended to another room within the facility to engage in activities if all of the following conditions are met:

(A) The provider determines, based on observations of the child's behavior and information from the parent or legal guardian, that the child can go unattended to another room within the facility.

(B) The door to each room remains open.

(C) The provider remains within hearing distance of the child.

(D) The provider visually checks on the child and responds as necessary to meet the needs of the child.

(3) Each applicant with a temporary permit and each licensee shall ensure that supervision is provided for each child who is napping or sleeping.

(A) Each child who is napping or sleeping shall be within sight or hearing distance of the provider and shall be visually checked on by the provider at least once every 15 minutes.

(B) The provider shall meet all of the requirements of K.A.R. 28-4-116a for any child who is under 12 months of age and is napping or sleeping.

(C) When any child is napping or sleeping in a room separate from the provider, the door to that room shall remain open.

(D) When a child awakens and is ready to get up, the provider shall attend to the child's needs and assist the child in moving to another activity.

(d) Outdoor supervision requirements. When any child is outdoors, each provider shall ensure that all of the following requirements are met, in addition to the requirements of subsection (b):

(1) For each child under five years of age, the provider shall be outdoors at all times and remain within sight of and in proximity to each child, watching and directing the activities of the child.

(2) For each child five years of age and older, the provider may permit the child to go unattended to the facility's designated outdoor play area on the premises if all of the following conditions are met:

(A) The designated play area on the premises is enclosed with a fence.

(B) The provider determines that the area is free of any potential hazards to the health and safety of the child.

(C) The provider remains within hearing distance of the child.

(D) The provider visually checks on the child and responds as necessary to meet the needs of the child.

(e) Evening care and overnight care. Each applicant with a temporary permit and each licensee who provide evening care or overnight care shall ensure that the following requirements are met:

(1) All requirements of subsections (a) through (d) shall be met.

(2) When overnight care is provided in a day care home, at least one provider shall remain awake at all times.

(3) When overnight care is provided in a group day care home, a second provider shall remain awake at all times if the number of children who are awake exceeds the requirements of K.A.R. 28-4-114 (e), table I. (Authorized by and implementing K.S.A. 2010 Supp. 65-508; effective Feb. 3, 2012.)

28-4-116. Daily care of children. (a) Daily activities.

(1) Each applicant with a temporary permit and each licensee shall provide daily activities that promote healthy growth and development, take into consideration the cultural background and traditions that are familiar to the children, and incorporate both indoor and outdoor activities that are appropriate for the ages and developmental levels of the children in care.

(2) Each child shall be offered a choice of activities and the opportunity to participate. Age-appropriate toys, play equipment, books, and other learning materials shall be available in sufficient quantities to allow each child a choice of activities.

(3) The activities, supplies, and equipment shall be designed to promote the following:

(A) Large motor and small motor development, which may include running, climbing, jumping, grasping objects, drawing, buttoning, and tying;

(B) creative expression, which may include dramatic play, music, and art;

(C) math and science skills, which may include sorting, matching, counting, and measuring; and

(D) language development and literacy, which may include reading, singing, finger plays, writing, and stories.

(4) Each child shall be given the opportunity for at least one hour of physical activity daily, either outdoors as described in paragraph (a)(7) or indoors.

(5) Each applicant with a temporary permit and each licensee shall ensure that the following requirements are met if the daily activities include any media viewing:

(A) Each program shall be age-appropriate and, if rated, shall have a rating appropriate for the ages and developmental levels of the children who view the program.

(B) No child shall be required to participate in media viewing. Each child not engaged in media viewing shall be offered a choice of at least one other activity for that time period.

(6) Toys and other items used by children shall meet the following requirements:

(A) Be clean, of safe construction, and in good repair;

(B) be washed and sanitized daily when used by children under 18 months of age; and

(C) be washed and sanitized before being used by another child, if contaminated by saliva or other bodily fluids.

(7) Unless prohibited by the child's medical condition or extreme weather conditions, each child in care shall be taken outdoors daily. Each child 12 months of age or older shall have the opportunity for at least one hour of outdoor play daily.

(b) Self-help and personal care. Each provider shall ensure that each child is assisted as needed with hand washing, toileting, dressing, and other personal care.

(c) Hand washing. Hands shall be washed using soap and warm running water and dried with a paper towel or a single-use towel. When soap and running water are not readily available, an alcohol-based hand sanitizer may be used only by adults and, under adult supervision, by children two years of age and older.

(1) Each provider shall wash that provider's hands as needed when hands are soiled and when each of the following occurs:

(A) At the start of the hours of operation or when first arriving at the facility;

(B) returning from being outdoors;

(C) after toileting, diapering, assisting a child with toileting, or handling any bodily fluids;

(D) before preparing each snack and each meal and before and after eating each snack and each meal;

(E) before and after administering any medication; and

(F) after feeding or handling any pet.

(2) Each child shall wash that child's hands or be assisted in washing that child's hands as needed when hands are soiled and when each of the following occurs:

(A) First arriving at the facility;

(B) returning from being outdoors;

(C) after toileting;

(D) before and after eating each snack and each meal; and

(E) after feeding or handling any pet.

(d) Smoking prohibited. No provider shall smoke while providing direct physical care to children. Smoking in any room, enclosed area, or other enclosed space on the premises shall be prohibited when children are in care pursuant to K.S.A. 65-530, and amendments thereto.

(e) Nutrition and food service. Each applicant with a temporary permit and each licensee shall develop and implement menu plans for meals and snacks that contain a variety of healthful foods, including fresh fruits, fresh vegetables, whole grains, lean meats, and low-fat dairy products.

(1) If children under 18 months of age are in care, the following requirements shall be met:

(A) Each child shall be held when bottle-fed until the child can hold the child's own bottle.

(B) No child shall be allowed to sleep with a bottle in the mouth.

(C) Each bottle that contains prepared formula or breast milk shall be stored in the refrigerator with the nipple covered. The bottle shall be labeled with the child's name, the contents, and the date received and shall be used within 24 hours of the date on the label.

(D) If a child does not finish a bottle, the contents of the bottle shall be discarded.

(E) No formula or breast milk shall be heated in a microwave oven.

(F) Solid foods shall be offered when the provider and the parent or legal guardian of the child determine that the child is ready for solid foods. Opened containers of solid foods shall be labeled with the child's name, the contents, and the date opened. Containers shall be covered and stored in the refrigerator.

(2) Each applicant with a temporary permit and each licensee shall serve nutritious meals and snacks based on the amount of time a child is in care.

(A) Each child who is in care at least 2½ hours but under four hours shall be served at least one snack.

(B) Each child who is in care at least four hours but under eight hours shall be served at least one snack and at least one meal.

(C) Each child who is in care at least eight hours but under 10 hours shall be served at least two snacks and one meal or at least one snack and two meals.

(D) Each child who is in care for 10 or more hours shall be served at least two meals and at least two snacks.

(3) Each applicant with a temporary permit and each licensee shall include the following items in meals and snacks:

(A) Breakfast shall include the following:

(i) A fruit, vegetable, full-strength fruit juice, or full-strength vegetable juice;

(ii) bread or grain product; and

(iii) milk.

(B) Noon and evening meals shall include one item from each of the following:

(i) Meat or a meat alternative;

(ii) two vegetables or two fruits, or one vegetable and one fruit;

(iii) bread or a grain product; and

(iv) milk.

(C) Midmorning and midafternoon snacks shall include at least two of the following:

(i) Milk;

(ii) fruit, vegetable, full-strength fruit juice, or full-strength vegetable juice;

(iii) meat or a meat alternative; or

(iv) bread or grain product.

(D) For snacks, juice shall not be served when milk is served as the only other item.

(4) A sufficient quantity of food shall be prepared for each meal to allow each child to have a second portion of bread, milk, and either vegetables or fruits.

(5) Drinking water shall be available to each child at all times when the child is in care.

(6) Only pasteurized milk products shall be served.

(7) Milk served to any child who is two years of age or older shall have a fat content of one percent or less, unless a medical reason is documented in writing by a licensed physician.

(8) If a fruit juice or a vegetable juice is served, the juice shall be pasteurized and full-strength.

(9) If any child has a food allergy or special dietary need, the provider and the parent or legal guardian of the child shall make arrangements for the provision of alternative foods or beverages.

(10) Meals and snacks shall be served to each child using individual tableware that is appropriate for the food or beverage being served. Food shall be served on tableware appropriate for that food and shall not be served directly on a bare surface, including a tabletop.

(11) Tableware shall be washed, rinsed and air-dried or placed in a dishwasher after each meal.

(12) Sanitary methods of food handling and storage shall be followed.

(13) A washable or disposable individual cup, towel, and washcloth shall be provided for each child.

(f) Recordkeeping. Each applicant with a temporary permit and each licensee shall ensure that a file is maintained for each child, including each child enrolled for emergency care. Each file shall include the following information:

(1) The full name, home and business addresses, and telephone numbers of the child's parent or

parents or legal guardian and the name, address, and telephone number of the individual to notify in case of emergency;

(2) the full name and telephone number of each individual authorized to pick up the child and to provide transportation to and from the facility;

(3) a medical record as required by K.A.R. 28-4-117(a), except that each child enrolled for emergency care shall be exempt from K.A.R. 28-4-117(a)(2); and

(4) written permission from the parent or legal guardian for emergency medical care and for the child to go off the premises as required by K.A.R. 28-4-124 and 28-4-127(b)(1)(A). (Authorized by K.S.A. 2010 Supp. 65-508; implementing K.S.A. 65-507 and K.S.A. 2010 Supp. 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1985; amended May 1, 1987; amended Feb. 26, 1990; amended Feb. 3, 2012.)

28-4-116a. Napping and sleeping. (a) Rest period. Each child shall have a daily, supervised rest period as needed. Each child who does not nap or sleep shall be given the opportunity for quiet play.

(b) Safe sleep practices for children in care.

(1) Each applicant with a temporary permit and each licensee shall develop and implement safe sleep practices for children in care who are napping or sleeping.

(2) Each applicant with a temporary permit and each licensee shall ensure that the safe sleep practices are discussed with the parent or legal guardian of each child before the first day of care.

(3) Each provider shall follow the safe sleep practices of the facility.

(4) Each child who is 12 months of age or older shall nap or sleep on a bed, a cot, the lower bunk of a bunk bed, or a pad over a carpet or area rug on the floor.

(5) Each applicant with a temporary permit and each licensee shall ensure that all of the following requirements are met for each child in care who is under 12 months of age.

(A) The child shall nap or sleep in a crib or a playpen. Stacking cribs or bassinets shall not be used. Cribs with water-bed mattresses shall not be used.

(B) If the child falls asleep on a surface other than a crib or playpen, the child shall be moved to a crib or playpen.

(C) The child shall not nap or sleep in the same

crib or playpen as that occupied by another child at the same time.

(D) The child shall be placed on the child's back to nap or sleep.

(E) When the child is able to turn over independently, the child shall be placed on the child's back but then shall be allowed to remain in a position preferred by the child. Wedges or infant positioners shall not be used.

(F) The child shall sleep in a crib or a playpen that is free of any soft items, which may include pillows, quilts, heavy blankets, bumpers, and toys.

(G) If a lightweight blanket is used, the blanket shall be tucked along the sides and foot of the mattress. The blanket shall not be placed higher than the child's chest. The head of the child shall remain uncovered. The child may nap or sleep in sleep clothing, including sleepers and sleep sacks, in place of a lightweight blanket.

(c) Napping or sleeping surfaces. Each applicant with a temporary permit and each licensee shall ensure that the following requirements are met for all napping or sleeping surfaces:

(1) Clean, individual bedding shall be provided for each child.

(2) Each surface used for napping or sleeping shall be kept clean, of safe construction, and maintained in good repair.

(3) Each crib and each playpen shall be used only for children who meet the manufacturer's recommendations for use, including any age, height, or weight limitations. The manufacturer's instructions for use, including any recommendations for use, shall be kept on file at the facility.

(4) Each crib and each playpen shall have a firm, tightfitting mattress and a fitted sheet. The mattress shall be set at its lowest point when any child using the crib or playpen becomes able either to sit up or to pull up to a standing position inside the crib or playpen, whichever occurs first, to ensure that the child cannot climb out of the crib or playpen.

(5) If a crib or playpen is slatted, the slats shall be spaced not more than $2\frac{3}{8}$ inches apart.

(6) On and after December 28, 2012, each applicant, each applicant with a temporary permit, and each licensee shall ensure that no crib purchased before June 28, 2011 is in use in the facility.

(7) Each pad used for napping or sleeping shall be at least $\frac{1}{2}$ inch thick, washable or enclosed in a washable cover, and long enough so that the child's head and feet rest on the pad. Clean, in-

dividual bedding, including a bottom and a top cover, shall be provided for each child.

(8) Cribs, cots, playpens, and pads, when in use for napping or sleeping, shall be separated by at least 24 inches in all directions except when bordering on the wall.

(9) When not in use, cribs, cots, playpens, pads, and bedding shall be stored in a clean and sanitary manner.

(d) Consumer warning or recall. Each applicant with a temporary permit and each licensee shall make any necessary changes to follow the recommendations of any consumer warning or recall of a crib or a playpen as soon as the warning or recall is known.

(e) Transition from crib or playpen. The determination of when a child who is 12 months of age or older is ready to transition from a crib or a playpen to another napping or sleeping surface shall be made by the parent or guardian of the child and by either the applicant with a temporary permit or the licensee. The requirements of paragraphs (c) (3) and (4) for a child using a crib or playpen shall apply. (Authorized by and implementing K.S.A. 2010 Supp. 65-508; effective Feb. 3, 2012.)

28-4-117. Health care requirements for children under 16 years of age. (a)(1) A completed medical record on the form provided by the department shall be on file for each child under 11 years of age enrolled for care and for each child under 16 years of age living in the child care facility.

(2) Each medical record shall include the results of a health assessment conducted by a nurse trained to perform health assessments or a licensed physician, within six months before the child's initial enrollment in a child care facility.

(3) Each medical record shall include a medical history obtained from the parent.

(b) A child under 16 years of age shall not be required to have routine tuberculin tests.

(c) Immunizations for each child, including each child of the provider under 16 years of age, shall be current as medically appropriate and shall be maintained current for protection from the diseases specified in K.A.R. 28-1-20(d). A record of each child's immunizations shall be maintained on the child's medical record.

(d) Exceptions to the requirements for immunizations shall be permitted as specified in K.S.A. 65-508, and amendments thereto. Documentation of each exception shall be maintained on file at the child care facility.

(e) If an infant who has not been immunized against measles, mumps, rubella, and varicella because of the age of that child is enrolled and there are children in care who have not had measles, mumps, rubella, and varicella immunizations due to exemption, including the children of the provider, the parents of the infant at risk shall sign a statement that the parents have been informed of the risk to their child. This statement shall be in the infant's file at the day care or group day care home.

(f) If a child is moved to a different child care provider, a new health assessment shall not be required if the previous medical record is available.

(g) Each licensee shall provide information to parents of children in the licensee's program about the benefits of annual well-child health assessments for children under the age of six years and biennial health assessments for children six years of age and older. Each licensee shall also provide information about the importance of seeking medical advice when children exhibit health problems. This information may be given on a form provided by the department to the parent when the child is enrolled or be posted in a conspicuous place, with copies of the form available to parents on request. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended, T-83-27, Sept. 22, 1982; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1986; amended Feb. 26, 1990; amended July 11, 2008.)

28-4-118. Medication administration and reporting suspected child abuse or neglect.

(a) Medication administration.

(1) Each applicant with a temporary permit and each licensee shall designate at least one provider to administer medications to children.

(2) If nonprescription medication is to be administered to a child, each designated provider shall meet the following requirements:

(A) Obtain written permission from each child's parent or legal guardian before administering medication to that child;

(B) require that each medication supplied by a parent or legal guardian for the child be in the original container;

(C) ensure that the container is labeled with the first and last name of the child for whom the medication is intended; and

(D) administer each medication according to the instructions on the label.

(3) If prescription medication is administered to a child, each designated provider shall meet the following requirements:

(A) Obtain written permission from each child's parent or legal guardian before administering medication to that child;

(B) keep each medication in the original container labeled by a pharmacist, with the following information:

(i) The child's first and last name;

(ii) the name of the licensed physician, physician assistant (PA), or advanced practice registered nurse (APRN) who ordered the medication;

(iii) the date the prescription was filled;

(iv) the expiration date of the medication; and

(v) specific, legible instructions for administration and storage of the medication;

(C) consider the instructions on each label to be the order from the licensed physician, PA, or APRN;

(D) administer the medication only to the child designated on the prescription label; and

(E) administer the medication in accordance with the instructions on the label.

(4) Documentation of each medication administered shall be kept on a form provided by the department and maintained in each child's file.

(5) A copy of the documentation of each medication administered shall be made available to the parent or legal guardian of the child.

(b) Reporting suspected child abuse or neglect. Each provider shall report to the Kansas department for children and families or to law enforcement any suspected child abuse or neglect within 24 hours. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1986; amended Feb. 26, 1990; amended May 12, 2017.)

28-4-119. (Implementing K.S.A. 1979 Supp. 65-503 and 65-508; authorized by K.S.A. 65-503 and 65-508; effective, E-80-18, Oct. 17, 1979; effective May 1, 1980; amended May 1, 1981; amended May 1, 1983; revoked May 1, 1984.)

28-4-119a. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1984; amended May 1, 1985; revoked May 1, 1986.)

28-4-119b. Compliance with regulations.

(a) An exception to a regulation may be allowed by the department if:

(1) The applicant requests an exception from the department on a form supplied by the department; and

(2) The secretary determines the exception to be in the best interests of the day care child or children and their families.

(b) Written notice from the Kansas department of health and environment stating the nature of the exception and its duration shall be posted with the license. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1984; amended Feb. 26, 1990.)

**REGISTERED FAMILY DAY
CARE HOMES FOR CHILDREN**

28-4-120. (Authorized by K.S.A. 65-522; implementing K.S.A. 65-519 and 65-521; effective May 1, 1981; amended May 1, 1986; amended Feb. 26, 1990; amended July 11, 2008; revoked Feb. 3, 2012.)

28-4-121. (Authorized by K.S.A. 65-522; implementing K.S.A. 65-519; effective July 11, 2008; revoked Feb. 3, 2012.)

**GENERAL REGULATIONS FOR
CATEGORIES OF CHILD CARE**

28-4-122. General regulations for family day care homes and child care facilities. K.A.R. 28-4-123 through 28-4-132 shall apply to the following:

(a) Family day care home as defined in K.S.A. 65-517, and amendments thereto;

(b) day care home and group day care home as defined in K.A.R. 28-4-113;

(c) preschool and child care center as defined in K.A.R. 28-4-420; and

(d) residential center and group boarding home as defined in K.A.R. 28-4-268. (Authorized by and implementing K.S.A. 65-508 and 65-522; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986; amended March 28, 2008.)

28-4-123. Parental access to child care facilities. Each parent or guardian of a child enrolled in a day care facility or preschool as defined in K.S.A. 65-517, K.A.R. 28-4-113 or K.A.R. 28-4-420 shall have access to the premises during all hours of operation. Each residential facility as defined in K.A.R. 28-4-311 and K.A.R. 28-4-268 shall develop a plan for parental visitation in coop-

eration with the legal custodian if different from the parent. (Authorized by and implementing K.S.A. 65-508 and K.S.A. 65-522; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986.)

28-4-124. Parental permission for children to go off-premises. Each day care facility as defined in K.A.R. 28-4-113, K.A.R. 28-4-420 and K.S.A. 65-517, and any amendments to it shall obtain a signed parental permission for each location to which children go off of the premises on a form supplied by the department of health and environment. The destination, the time children leave the child care facility, the adults responsible for the children while off premises, and the estimated time of return shall be posted in a place accessible to parents. (Authorized by and implementing K.S.A. 65-508 and 65-522; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986; amended Feb. 26, 1990.)

28-4-125. Background checks. Each applicant, applicant with a temporary permit, and licensee shall meet the following requirements:

(a) Submit to the department the identifying information necessary to complete background checks for each individual who works or regularly volunteers in the facility, each individual at least 10 years of age who resides in the facility, and any other individual in the facility whose activities involve either supervised or unsupervised access to children. The identifying information shall be submitted as follows:

- (1) When submitting an application for a license;
- (2) when submitting an application to renew a license; and
- (3) before allowing any individual to work, regularly volunteer, or reside in the facility and before allowing any individual whose activities involve either supervised or unsupervised access to children to be in the facility;

(b) ensure that fingerprint-based background checks are completed for each of the following:

- (1) The applicant;
- (2) the applicant with a temporary permit;
- (3) the licensee;
- (4) each provider in a day care home or group day care home;
- (5) each individual at least 18 years of age who resides in a day care home or group day care home;
- (6) each employee in a preschool or child care center;

(7) each volunteer counted in the staff-child ratio; and

(8) any other individual regularly in the facility if the individual's activities involve unsupervised access to children;

(c) ensure that the information submitted for each individual specified in subsection (b) includes the required information for background checks from each state of residence throughout the five-year period before allowing the individual to work, regularly volunteer, or reside in the facility;

(d) ensure that name-based background checks by the Kansas bureau of investigation and the Kansas department for children and families are completed for each of the following:

(1) Each individual at least 10 years of age who resides in a day care home or group day care home;

(2) each volunteer who is not counted in the staff-child ratio and whose activities do not involve unsupervised access to children;

(3) each student of an accredited secondary or postsecondary school who is at least 16 years of age and who is participating in an educational experience arranged by the school, if the student is not counted in the staff-child ratio and does not have unsupervised access to children; and

(4) any other individual regularly in the facility whose activities do not involve unsupervised access to children; and

(e) ensure that no individual works, regularly volunteers, or resides in the facility until the results of the individual's background checks verify that the individual is not prohibited from working, regularly volunteering, or residing in a facility pursuant to K.S.A. 65-516, and amendments thereto. (Authorized by K.S.A. 2017 Supp. 65-508; implementing K.S.A. 2017 Supp. 65-508 and 65-516; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986; amended Feb. 26, 1990; amended June 7, 2018.)

28-4-126. Health of persons 16 years or older in child care facilities. (a)(1) Each person caring for children shall be free from physical, mental or emotional handicaps as necessary to protect the health, safety and welfare of the children, and shall be qualified by temperament, emotional maturity, sound judgment, and an understanding of children.

(2) Persons in contact with children shall not be in a state of impaired ability due to the use of alcohol or drugs.

(b)(1) Each person regularly caring for children shall have a health assessment conducted by a licensed physician or by a nurse trained to perform health assessments. The health assessment shall be conducted no earlier than one year before the date of employment or initial application for a license or certificate of registration, or not later than 30 days after the date of employment or initial application.

(2) Each substitute in a day care facility as defined in K.A.R. 28-4-113 or K.S.A. 65-517 shall be exempt from K.A.R. 28-4-126(b)(1).

(c) Tuberculin testing.

(1) Each person living, working or regularly volunteering in the facility shall have a record of a negative tuberculin test or x-ray obtained not more than two years before the employment or initial application for a license or certificate of registration or not later than 30 days after the date of employment or initial application.

(2) Additional tuberculin testing shall be required if significant exposure to an active case of tuberculosis occurs, or symptoms compatible with tuberculosis develop. Proper treatment or prophylaxis shall be instituted, and results of the follow-up shall be recorded on the person's health record. The Kansas department of health and environment shall be informed of each case described within this paragraph.

(d) Results of the health assessment and tuberculin test shall be recorded on forms supplied by the Kansas department of health and environment and kept on file at the facility. Health assessment records may be transferred to a new place of employment if the transfer occurs within one year of previous employment.

(e) Each resident 16 years or older in a residential facility as defined in K.A.R. 28-4-268 shall meet the requirements in K.A.R. 28-4-126(b), (c) and (d). (Authorized by and implementing K.S.A. 65-508 and K.S.A. 65-522; effective May 1, 1986; amended Feb. 26, 1990.)

28-4-127. Emergencies. (a) A working telephone shall be on the premises. Emergency telephone numbers shall be posted next to the telephone for the police, fire department, ambulance, hospital or hospitals, and poison control center.

(b) Emergency medical treatment.

(1) Each facility shall have on file at the facility for each child:

(A) written permission of the parent, guardian, or legal custodian for emergency medical treat-

ment on a form that meets the requirements of the hospital or clinic where emergency medical care will be given; and

(B) the name, address and telephone number of a physician to be called in case of emergency.

(2) Residential facilities providing emergency care shall be exempt from K.A.R. 28-4-127 (b)(1)(A).

(3) Provisions shall be made at a hospital or clinic for emergency treatment for children.

(c) Health assessment forms and emergency release forms shall be taken to the emergency room with the child.

(d) When a staff member accompanies a child to the source of emergency care, that person shall remain with the child unless or until a parent or parent's designee assumes responsibility for the child. Such an arrangement shall not compromise the supervision of the other children in the facility.

(e) Reporting illnesses and injuries:

(1)(A) Residential facilities shall have on file at the facility written policies on reporting of illnesses and injuries of adults and children.

(B) The policies shall be approved by the licensing agency.

(2) Day care facilities shall report immediately to the parent or guardian each illness or injury of a child which requires medical attention.

(3) Communicable diseases shall be reported to the county health department by the next working day.

(f) Any injury or illness which results in the death of a child in care shall be reported by the next working day to the county health department or the Kansas department of health and environment. (Authorized by and implementing K.S.A. 65-508 and 65-522; effective May 1, 1986; amended May 1, 1987; amended Feb. 26, 1990.)

28-4-128. Safety procedures. (a) Each facility shall develop an emergency plan to provide for the safety of children and staff in emergencies such as fire, tornadoes, storms, floods, and serious injury.

(b) Each emergency plan shall be posted in a conspicuous place in the facility. Staff in day care facilities shall review the plan with parents of children enrolled.

(c) Each person responsible for the children, including each substitute, shall be informed of and shall follow the emergency plans.

(d) A fire drill shall be conducted monthly and scheduled to allow participation by each child. Each date and time shall be recorded.

(e) A tornado drill shall be conducted monthly, April through September, and scheduled to allow participation by each child. Each date and time shall be recorded.

(f) Each person regularly caring for children shall have first-aid training. Documentation of the training shall be on file at the facility. (Authorized by and implementing K.S.A. 65-508 and K.S.A. 65-522; effective May 1, 1986; amended Feb. 26, 1990.)

28-4-129. Swimming and wading activities. (a) Swimming and wading pools on the premises.

(1) If swimming pools with water over 24 inches deep, wading pools, or hot tubs are on the premises, they shall be constructed, maintained, and used in such a manner as to safeguard the lives and health of the children.

(2) The number and ages of children using either swimming or wading pools shall be limited to allow appropriate supervision by adult staff members.

(3) Required staff/child ratios shall be maintained at all times that children are involved in swimming or wading activities.

(4) Legible safety rules for the use of swimming pools shall be posted in a conspicuous location, and shall be read and reviewed weekly by each staff member responsible for the supervision of children.

(b) Swimming pools on the premises.

(1) Below-ground swimming pools shall be enclosed by a fence not less than five feet high to prevent chance access by children.

(2) Above-ground swimming pools shall be four feet high, or shall be enclosed with a fence not less than five feet high. Steps shall be removed from the pool when the pool is not in use.

(3) Sensors shall not be used in lieu of a fence.

(4) Water in the swimming pool shall be maintained between pH 7.2 and pH 8.2. Available free chlorine content shall be between 0.4 and 3.0 parts per million. The pool shall be cleaned daily, and the chlorine level and pH level shall be tested daily. The results of these tests shall be recorded and available.

(5) A person with a life saving certificate or a person with training in CPR who can swim shall be in attendance when children are using a swimming pool.

(6) Each swimming pool more than six feet in width, length, or diameter shall be provided with a ring buoy and rope or shepherd's hook. Such

equipment shall be of sufficient length to reach the center of the pool from its edge.

(c) Wading pools on the premises.

(1) Children shall never be permitted to play without supervision in areas where there is a wading pool containing water.

(2) Water in wading pools shall be emptied daily.

(d) Hot tubs or spas on the premises.

(1) Each hot tub or spa shall be covered with an insulated cover secured by straps or locks.

(2) Children in day care facilities shall not be permitted to use hot tubs. Children in residential facilities shall be permitted to use hot tubs when medically indicated.

(e) Ponds and lakes may be used only for children over six years of age, and shall be approved for swimming by the county health department or Kansas department of health and environment or like departments in other states. Required staff/child ratios shall be maintained at all times, and a certified life guard shall be on duty. (Authorized by and implementing K.S.A. 65-508 and 65-522; effective May 1, 1986; amended Feb. 26, 1990.)

28-4-130. Transportation. (a) Facility-owned or leased vehicles.

(1) When a vehicle used for transportation of children is owned or leased by the facility, the driver shall be 18 years of age or older, and shall hold an operator's license of a type appropriate for the vehicle being used. Trailers pulled by another vehicle, camper shells or truck beds shall not be used for transportation of children.

(2)(A) Each transporting vehicle shall be maintained in safe operating condition.

(B) The transporting vehicle shall have a yearly mechanical safety check of tires, lights, windshield, wipers, horn, signal lights, steering, suspension, glass, brakes, tail lights, exhaust system, and outside mirror. A record of the date of the annual safety check and corrections made shall be kept on file at the facility.

(3) The vehicle shall be covered by accident and liability insurance in amount of not less than \$100,000 for personal injury or death in any one accident, \$300,000 for injury or death to two or more persons in any one accident; and \$50,000 for loss to property of others.

(4)(A) Emergency release forms and health assessment records shall be in the vehicle when children are transported. Residential facilities shall be exempt from K.A.R. 28-4-130(a)(4)(A) unless children are being transported more than

60 miles from the facility, or if children are in emergency care.

(B) A first-aid kit shall be in the transporting vehicle and shall include band-aids of all sizes; adhesive tape; a roll of gauze; scissors; one package of 4X4 inch gauze squares; a cleansing agent; and one elastic bandage.

(5) Each vehicle shall be equipped with an individual restraint for each child as follows:

(A) An infant unable to sit up without support shall be provided with an infant car carrier which faces the rear.

(B) A child able to sit up without support shall be provided with one of the following restraints:

- (i) A shield-type device;
- (ii) a car seat facing the front that is designed to hold a child weighing up to 40 pounds; or
- (iii) a safety harness.

(C) A child four years of age or older, or weighing 40 pounds or more, shall have a lap belt. Shoulder straps shall be used if they do not cross the child's neck or face.

(D) Not more than one child shall be restrained in each lap belt.

(E) Buses of the type used by schools shall not be required to be equipped with individual restraints if the buses are used to transport only school-age children.

(6) The safety of the children riding in the vehicle shall be protected as follows:

(A) All doors except the front door on the driver's side shall be locked while the vehicle is in motion.

(B) Discipline shall be maintained at all times.

(C) All parts of the child's body shall remain inside the vehicle at all times.

(D) Children shall neither enter nor exit the vehicle into a lane of traffic.

(E) Children under 10 years of age shall not be left in a vehicle unattended by an adult. When the vehicle is vacated, the driver shall make certain no child is left in the vehicle.

(F) Smoking in the vehicle shall be prohibited while children are being transported.

(G)(i) Day care facilities defined by K.S.A. 65-517, K.A.R. 28-4-113 and K.A.R. 28-4-420 shall maintain applicable staff/child ratios.

(ii) Residential facilities as defined by K.A.R. 28-4-268 and K.A.R. 28-4-311 shall maintain applicable staff/child ratios when children under six are being transported.

(H) The driver shall transport the child to the intended location, person, agency or institution as

designated by the child's parent or legal guardian, or by the agency person in charge.

(b) Vehicles owned by staff or volunteers.

(1) When a vehicle used for transportation of children is owned by staff or volunteers the vehicle shall be covered by accident and liability insurance required by K.S.A. 40-3104 and 40-3118 and any amendments to it.

(2) Each such vehicle shall meet the requirements of K.A.R. 28-4-130(a)(1); (a)(2)(A); (a)(4)(A); (a)(5); and (a)(6)(A) through (H).

(c)(1) Each driver shall be informed of the provisions of K.A.R. 28-4-130.

(2) Paragraphs (A) through (H) of subsection (a) (6) of K.A.R. 28-4-130 shall be posted in the vehicle or given to the driver. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986; amended May 1, 1987; amended Feb. 26, 1990.)

28-4-131. Animals, birds, or fish. (a) When animals, birds, or fish are kept on the premises, the pet area shall be maintained in a sanitary manner. No animal or bird shall be in the kitchen while food is being prepared. Parents shall be informed whenever children have access to pets in the child care facility.

(b) Dogs and cats shall have current immunizations as recommended by a veterinarian. A record of immunizations shall be kept on file in the facility.

(c) When animals that represent a hazard to children are on the premises, children shall be protected from them. Pit bulldogs shall be prohibited. If animals are displayed as part of an animal exhibit, they shall be supervised by appropriate animal care personnel. (Authorized by and implementing K.S.A. 65-508 and 65-522; effective May 1, 1986; amended Feb. 26, 1990.)

28-4-132. Child care practices. (a) Supervision. Each child in day care shall be under the supervision of a person 16 years of age or older who is responsible for the child's health, safety and well-being.

(b) Discipline.

(1) There shall be a written discipline policy indicating methods of guidance appropriate to the age of the children enrolled. Parents shall be informed of the policy.

(2) Prohibited punishment. Punishment which is humiliating, frightening or physically harmful to the child shall be prohibited. Prohibited methods of punishment include:

(A) corporal punishment such as spanking with the hand or any implement, slapping, swatting, pulling hair, yanking the arm, or any similar activity;

(B) verbal abuse, threats, or derogatory remarks about the child or the child's family;

(C) binding or tying to restrict movement, or enclosing in a confined space such as a closet, locked room, box, or similar cubicle;

(D) withholding or forcing foods; and

(E) placing substances which sting or burn on the child's mouth or tongue or other parts of the body.

(3) If isolation is used in residential facilities as defined in K.A.R. 28-4-268, the isolation policies shall be approved by the department of social and rehabilitation services before implementation.

(4) Each staff member and care provider's discipline practices shall comply with K.A.R. 28-4-132.

(c) Diapering and toileting.

(1) Each child's clothing or bedding shall be changed whenever wet or soiled.

(2) Each child under three years of age shall have at least one complete change of clothing at the facility.

(3)(A) Handwashing facilities shall be in or readily accessible to the diaper-changing area.

(B) Each person caring for children shall wash hands with soap and water after changing diapers or soiled clothing.

(4) Children shall be diapered in their own cribs or playpens, on a clean pad on the floor, or on a changing table. Each unit in a child care center as defined by K.A.R. 28-4-420 shall have a changing table.

(5) Changing tables and pads shall have a waterproof, undamaged surface. Tables shall be sturdy, and shall be equipped with railing or safety straps. Children shall not be left unattended on the changing table.

(6) Changing tables and pads shall be sanitized after each use by washing with a disinfectant solution of ¼ cup of chlorine bleach to one gallon of water, or an appropriate commercial disinfectant.

(7) The following procedures shall be followed when washable diapers or training pants are used:

(A) Day care facilities. Washable diapers or training pants shall not be rinsed out. They shall be stored in a labeled covered container or plastic bag and returned home with the parents.

(B) Residential facilities. Sanitary laundering procedures which promote infection control shall be followed.

(8) Disposable diapers shall be placed in a covered container or plastic bag which shall be emptied daily, or more frequently as necessary for odor control.

(9)(A) Potty chairs when used shall be left in the toilet room. The wastes shall be disposed of immediately in a flush toilet. The container shall be sanitized after each use and shall be washed with soap and water daily.

(B) There shall be one potty chair or child-sized toilet for every five toddlers in a child care center as defined by K.A.R. 28-4-420. Potty chairs shall not be counted as toilets.

(10) Diapering procedures recommended by the U.S. Department of Health and Human Services, Public Health Service, December, 1984, shall be followed in all child care facilities caring for infants and toddlers. Diapering and toileting procedures shall be posted in child care centers, group boarding homes, residential centers and group day care homes serving children under 2½ years of age. (Authorized by and implementing K.S.A. 65-508 and K.S.A. 65-522; effective Feb. 26, 1990.)

28-4-133. Reporting critical incidents.

This regulation shall apply to all day care homes, group day care homes, preschools, and child care centers.

(a) Reports to parents and legal guardians. In addition to meeting the reporting requirements in K.A.R. 28-4-127, each primary care provider and each program director shall ensure that each of the following critical incidents is immediately reported to the parent or legal guardian of any child affected by the critical incident:

(1) Fire damage or other damage to the facility, or any damage to the property that affects the structure of the facility or the safety of the children in care;

(2) a vehicle collision involving any child in care;

(3) a missing child;

(4) an injury to a child that requires treatment by a health care professional;

(5) the death of any of the following:

(A) A child;

(B) a provider in a day care home or group day care home;

(C) an employee in a preschool or child care center; or

(D) a volunteer in a day care home, group day care home, preschool, or child care center; and

(6) any other occurrence that jeopardizes the safety of any child in care.

(b) Written reports to the department. Each primary care provider and each program director shall ensure that a written report of any critical incident specified in subsection (a) is submitted by the next working day to the department. The report shall be submitted on a form provided by the department. A copy of each critical incident report shall be kept on file at the facility for at least one year from the date of the critical incident. (Authorized by and implementing K.S.A. 65-508; effective Dec. 27, 2019.)

GROUP BOARDING HOMES

28-4-135. (Authorized by K.S.A. 65-503, K.S.A. 1975 Supp. 65-504, 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-136. (Authorized by K.S.A. 65-510, K.S.A. 1975 Supp. 65-504, 65-506, 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-137. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-138. (Authorized by K.S.A. 17-1706, K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-139. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-140. (Authorized by K.S.A. 65-503; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-141. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-142. (Authorized by K.S.A. 65-510, K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-143. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-144. (Authorized by K.S.A. 1975 Supp. 65-506, 65-507, 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-145. (Authorized by K.S.A. 65-510, K.S.A. 1975 Supp. 65-507, 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-146. (Authorized by K.S.A. 1975 Supp. 65-507, 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-147. (Authorized by K.S.A. 65-510, K.S.A. 1975 Supp. 65-501, 65-504, 65-506, 65-508, 65-512, 65-513, 65-514, 65-515; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

28-4-148. (Authorized by K.S.A. 1975 Supp. 65-508; effective Jan. 1, 1972; revoked, E-76-36, July 14, 1975; revoked May 1, 1976.)

CHILD PLACEMENT AGENCIES

28-4-160 to 28-4-169. (Authorized by K.S.A. 65-503, 65-508; effective Jan. 1, 1972; revoked May 1, 1982.)

28-4-170. Definitions. (a) “Child placing agency” or “agency” means an association, organization, or corporation receiving, caring for, or finding homes for orphans or deprived children who are under 16 years of age.

(b) “Division” means the division of health of the department of health and environment.

(c) “License” means a document issued by the secretary granting authority to an association, organization, or corporation to operate and maintain a child placing agency.

(d) “Secretary” means the secretary of the health and environment. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-171. Licensing procedures. (a) Any association, organization, or corporation desiring to conduct a child placing agency shall apply for a license on forms provided by the Kansas department of health and environment.

(b) A full license shall be issued if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 *et seq.* and amendments thereof and the rules and regulations promulgated pursuant thereto and has made full payment of the license fee required by the provisions of K.S.A. 65-505 and amendments thereof. The license and any written exceptions granted by the secretary under K.A.R. 28-4-171(c) shall be posted as required by K.S.A. 65-504.

(c) Exceptions. (1) An exception to a regulation may be allowed by the Kansas department of health and environment if:

(A) The applicant requests an exception from the Kansas department of health and environment; and

(B) The secretary determines the exception to be in the best interests of families and children served by the agency.

(2) Written notice from the Kansas department of health and environment stating the nature of the exception and its duration shall be posted with the license.

(d) A copy of the "regulations for licensing child placing agencies" shall be kept on the premises at all times.

(e) The applicant or licensee shall notify the Kansas department of health and environment when service is discontinued. Resumption of agency services shall require a new application for license.

(f) An applicant or licensee receiving notice of denial or revocation of license shall be notified of the right to an administrative hearing by the Kansas department of health and environment and subsequently to the right to appeal the denial or revocation to the district court. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-172. Administration and personnel.

(a) The agency shall develop a written statement of philosophy, purpose, program orientation, and policy of operation including the agency's position on disciplinary methods to be used by staff. Corporal punishment shall be prohibited. The statement shall contain long and short term goals and shall be available to the secretary or a designee of the secretary, and to the public. The agency, at the time of making initial application for a license, shall furnish the division the following:

(1) Evidence of a need for services to a particular group of children;

(2) A definition of the services to be provided in sufficient detail as to indicate the agency has an understanding of each particular service;

(3) A description of the geographical area it serves or intends to serve; and

(4) Evidence that its services will be used by referral sources.

(b) A child placing agency shall have a governing body which shall exercise authority over and have responsibility for the operation, policy, and prac-

tices of the child placing agency. The governing body shall select and employ a qualified executive director, who shall be responsible for the administration and operation of the child placing agency. The governing body shall have among its officers a secretary responsible for documenting its activities and for keeping attendance records and minutes of its meetings. These records and minutes shall be available for inspection by the division.

(c) The child placing agency shall prepare an annual report of the agency's activities. The report shall include fiscal and statistical sections indicating the levels of income and expenditures, the size and types of staff and the number of clients serviced by each service program.

(d) The child placing agency shall demonstrate financial solvency to carry out its program for the licensing period. Agencies which have not operated shall have capital necessary for at least a 6 month period of operation. The agency shall prepare an annual budget. Books shall be audited annually by a certified public accountant. A copy of the accountant's statement of income and disbursements shall accompany the licensing application.

(e) The applicant or licensee shall maintain a current organizational table showing the administrative structure of the agency, including the lines of authority, responsibility, communications, and staff assignments. The table shall be provided to all staff members as a part of the orientation procedure and, on request, to the division, clients, or referral sources.

(f) Child placing agencies shall have written personnel policies and procedures and shall make them available to all staff members, persons seeking employment, and the division. Personnel policies and practices shall be developed by the agency, with input from the staff. These policies and procedures shall be reviewed annually, and revised when necessary. The child placing agency shall make the policies and procedures available to staff in a personnel policy manual.

(g) Each child placing agency shall provide the qualified staff necessary to ensure proper services to children in the agency's care, to biological and adoptive parents, and to foster parents. The child placing agency shall verify the personal qualifications of all employees through character references. Signed statements shall be made a condition of employment for prospective employees. These statements shall list any past or current police records, mental or physical actions, conditions, or addictions of the applicant that would adversely

affect their capacity to work with children. The agency shall hire qualified professional staff, as follows:

(1) The executive director of a child placing agency, who shall have:

(A) A degree from an accredited college or university;

(B) Education and experience in administering a child placement or related program commensurate with the size and complexity of the agency;

(C) A thorough understanding of the philosophy, purpose, and policy of the agency; and

(D) The capacity to provide direction and leadership for the agency.

(2) Social service supervisory staff members responsible for the direct supervision of the social workers involved in child placement service, who shall have:

(A) A master's degree from an accredited college or university and be licensed as a social worker by the state of Kansas or shall have a graduate degree in a related area of human services;

(B) Two years of experience in child placement services;

(C) Ability to assume professional responsibility for reviewing the placement of children in out-of-home care when these placements are made by a person with lesser qualifications. There shall be written documentation of specific services provided by this person and the frequency of these services.

(3) Social workers performing intake services, direct services to foster children, homefinding, and assessment related to foster home and adoptive services, who shall have:

(A) A master's degree from an accredited college or university and be licensed as a social worker by the state of Kansas; or

(B) A bachelor's degree from an accredited college or university and be licensed as a social worker by the state of Kansas; or

(C) A bachelor's degree in behavioral sciences from an accredited college or university and 2 years of experience in child placement under direct supervision of a person meeting the supervisory requirements in subsection (g)(2).

(h) The child placing agency shall provide enough qualified personnel to assure that:

(1) Supervisors shall not supervise more than six social workers;

(2) In-service training related to child placement is made available to supplement supervision; and

(3) Casework staff carries caseloads which are sufficiently controlled to allow for all the necessary contacts with the family, children, foster families, adoptive families, and collateral parties.

(i) The agency shall, if it makes use of volunteers, develop a written plan for their orientation, training and use. The agency shall assign professional staff to supervise volunteers.

(j) The child placing agency shall have a personnel file for each employee which shall contain:

(1) The application for employment, resume, or both;

(2) Reference letters from former employer(s);

(3) Any required medical information;

(4) Applicable professional credentials or certifications;

(5) Periodical performance evaluations;

(6) Personnel actions, other appropriate materials, reports, and notes relating to the individual's employment with the agency; and

(7) Employee's starting and termination dates. The staff member shall have reasonable access to his or her file and shall be allowed to add any written statement he or she wishes to make to the file at any time. A child placing agency shall maintain the personnel file of an employee who leaves the agency for a period of 3 years. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-173. Facility. (a) Convenience of location. The agency shall be easily accessible to the clientele, staff, and community and shall have adequate parking available.

(b) Space requirements. The child placing agency shall provide suitable space for the following purposes:

(1) Office, reception areas, and visitation areas which insure comfort, privacy, and convenience of clients and staff and which are appropriately equipped for their intended use;

(2) Storage area for records which provides for systematic controlled access and retrieval, and which insures confidentiality.

(c) Equipment. Suitable equipment shall be maintained in good working condition. Telephones shall be conveniently located and sufficient in number. Equipment and furnishings shall be clean and designed for efficiency, safety, and varied use. When transportation is provided by the agency, it shall be in well-maintained vehicles. Car seats and car restraints shall be provided when the agency transports children. (Authorized

by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-174. Social services related to child placing. (a) Intake requirements. A child placing agency shall have a written description of services offered and the criteria for service eligibility which shall include who is eligible for the services and what fees, if any, are charged. The statement of services and criteria shall be available in individual copies for distribution to clients and to the public. A child placing agency shall document that social services to preserve the family unit have been provided to the family and child and alternatives to placement have been explored with them. The agency shall keep a record of all applications for services and the reasons for denial of services. The agency shall provide referral assistance to persons seeking services not provided by the agency.

(b) Intake procedures and practices. Upon referral or application, the agency shall assess the child's social and family history, the child's legal status, the strengths, resources, and needs of the child and his or her family, the role the child's parent or parents and other persons are to have during placement, and the identification of the specific needs of the child and family that warrant placement.

(c) Initial case plan. Upon completion of the intake assessment and before placement, except in cases of emergency, the agency shall develop a written service plan. The plan shall include:

(1) Selection and description of the type of placement appropriate to meet the child's needs;

(2) Projected duration of the placement;

(3) Preplacement activities with child and family;

(4) Specific treatment goals for child and family;

(5) Specific steps to accommodate each goal;

(6) Specific time frames for goals;

(7) Designation of responsibility for carrying out steps with child, parents, foster parent, adoptive parent(s), and court (when involved) including frequency of contacts;

(8) Date for first review of progress on steps and goals; and

(9) Description of the conditions under which the child shall be returned home or when proceedings for termination of parental rights should be initiated.

(d) Case plan development. The parents or other significant persons to the child as well as the child, appropriate to his or her age and understanding, shall participate in developing the placement plan and participate in service con-

tracts or agreements. Before accepting a child for placement from a parent or custodian, the agency shall secure written authority to provide care and written authority for medical care. In emergency situations necessitating immediate placement, the agency shall initiate assessment and initial case plan within one week of placement, which shall be completed within six weeks of placement.

(e) Supervision and review of the case plan. The agency shall specify in writing the worker or workers who have the ongoing responsibility for the child, the biological, foster and adoptive families, and the casework plan. When a child is placed with another agency or division or whenever more than one worker or division are involved with the same family, the roles shall be clearly delineated for the workers and the family members and the specific responsibilities necessary to carry out the plan shall be in writing in the case records. The case plan shall specify the frequency of social worker visits with the child, the child's family and the foster family, but these visits shall not be made less than once each month. The agency shall complete a quarterly review and assessment of the case plan and progress toward goal achievement. The agency shall have a periodic individual case review, either administrative or with outside agency personnel to ascertain whether children are being served in a prompt manner and whether return to home, continual placement, or adoption efforts are appropriate on the child's behalf.

(f) Placement services to parents. The agency's services shall be accessible and available to the parents of children in care and to an expectant parent or parents requesting services. The choice to use an agency's services shall be the parent's decision except when the choice has been taken from the parents by court order. The agency shall have as a goal helping the parents achieve positive self image and to carry out their parental roles and responsibilities while the child is in care. The agency shall have personal contacts with the parents when possible. It shall promote constructive contact by the parent or parents with the child after placement. The agency shall help the family have access to the services necessary to accomplish the case plan goals. While the child is in care, the agency shall counsel the parents relative to the problems and needs that brought about the circumstances of placement. Expectant parents considering placement shall receive assistance in the decision making process before the child is born and immediately thereafter.

(g) Selection of placement. The agency shall select the most appropriate form of placement for the child consistent with the needs of the child's family, including foster family care, residential group care or adoption. In choosing the appropriate placement for the child, the agency shall provide for any specialized services the child may need in the least restrictive setting and in the closest available program to the child's home, and shall take into consideration and preserve the child's racial, cultural, ethnic, and religious heritage to the extent possible without jeopardizing the child's right to care. The agency shall consider the child's treatment plan steps and goals and select a placement that has the capacity to assist in their achievement. The agency shall, in accordance with the case plan, provide the child with a continuity of relationships for the anticipated duration of care when selecting the placement.

(h) Preplacement preparation. The caseworker for the child shall become acquainted with the child before placement. The child's worker shall help the child understand the reasons for the placement plan, preparing him or her for a new environment. The worker shall plan and participate in at least one preplacement visit. The agency shall arrange a general medical examination by a physician for each child within a week of admission into care unless the child has received an examination within 30 days before admission. The results of this examination shall be recorded on forms supplied by the Kansas department of health and environment. The agency shall ensure that each child has had a dental examination by a dentist within 60 days of admission unless the child has been examined within 6 months before admission. Results of the examination shall be recorded on forms supplied by the Kansas department of health and environment.

(i) Services during care. The agency shall supervise the child in care and shall coordinate the planning and services to child and family as outlined in the case plan. The supervising worker shall see the child a minimum of biweekly in the first three months of placement and monthly thereafter. Parents and children shall be provided the opportunity to meet on a regular basis with the agency worker regarding their progress on resolving problems that may be precipitated by placement, their progress in coping with problems through the use of substitute care, the parent and child's relationship difficulties arising from separation, and case goals. The placing agency shall have a

written agreement with the parents regarding visits to the child and shall facilitate and promote visitation while the child is in care. If the parents require services that the agency does not offer, referral shall be made to appropriate services. Communication between the two agencies shall be on a regular planned basis. The agency shall provide for the child's specialized services as outlined in the case plan. The agency shall have documentation of maintaining clear working agreements with other community resources, confidential referrals and providing access to services necessary to meet goals in the case plan.

(j) Aftercare services. The agency shall provide for continuing services for children and families following an adoption or a child's return to the family from the placement. In the case of the disruption of an adoptive placement, the agency shall make plans, either through purchase of service or provision of foster care services, for continued care of the child until a permanent home has been secured. The agency shall offer supportive help to a family receiving a child into placement or giving up a child for placement for a minimum period of 6 months after the placement or relinquishment of the child. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982; amended May 1, 1983.)

28-4-175. Services in family foster home care. (a) Foster home finding. The agency shall have a recruitment process with designated staff and funding to reach out and inform the community about children needing foster homes. The agency shall provide information to prospective foster parents about foster care, the agency, the requirements for foster parents, the children needing foster care, licensing regulations, the licensing process and the reimbursement rates. The agency shall recruit foster parents who can respond to the agency's need to place specific children and be able to adjust their recruitment techniques as the kinds of children needing placement change.

(b) Application and study process. At the time of inquiry, the potential applicant(s) shall be provided the opportunity to state their own plan for child care. Before formal application, the agency's foster care program and the value and necessity of having a license shall be discussed. It shall be explained that a licensed agency or the Kansas department of social and rehabilitation services shall complete a study and make recom-

recommendations concerning the home's eligibility for licensure to the Kansas department of health and environment. If after discussion of the potential applicant(s) plan and the general requirements for licensing, the potential applicant(s) wishes to proceed, the application forms shall be completed. The agency shall provide to prospective foster parents a copy of "regulations for licensing family foster homes" and an application form, both furnished by the Kansas department of health and environment. The application shall be completed, checked for accuracy, and counter-signed by an agency representative.

(c) Social study. The agency shall, as a further part of the application process, conduct a social study of the foster family in their home. In conducting the study, the agency shall include at least one face-to-face interview with each member of the foster family. The agency shall assess the following areas and record the information in the foster parent(s) record:

- (1) Motivation for foster care;
- (2) Family's attitude toward foster children;
- (3) Family's attitude toward natural parent(s);
- (4) Adjustment of own children including school reports;
- (5) Child caring skills;
- (6) Strengths and weaknesses of each member of the household;
- (7) Type of children desired;
- (8) Type of children for whom placement with the family would not be appropriate; and
- (9) Recommendation for number, age, sex, characteristics, and special needs children best served by the family. Copies of the social study are to be made available to the applicant and to licensing representative(s) of the Kansas department of social and rehabilitation services. The placement of children shall be consistent with the assessment and recommendations of the social study, including assessment of subsequent placements.

(d) Services to foster parent(s).

(1) Orientation. The agency shall provide orientation to foster parents to acquaint them with the agency's policies and practices.

(2) Training. There shall be a training plan for all foster parents to receive not less than 6 hours of training yearly. Such training shall provide opportunities for the foster families to increase their skills and parenting ability particularly with respect to the differences they may encounter in raising children not their own. Training opportunities should be chosen from the following topics:

(A) Developmental needs of the child to be placed;

(B) Roles and relationships in foster care between the agency, foster parent, natural parent, and child;

(C) Child management and discipline techniques;

(D) Separation and the importance of the child's family;

(E) Importance of the child's continued communication and contact with his or her family;

(F) Supportive services available to the children and foster families from the community;

(G) Communication skills;

(H) Constructive problem solving;

(I) First aid and home safety; and

(J) Human sexuality.

(e) Agreement. The agency shall have a written agreement with each foster family which clearly delineates the responsibility of the foster family and the child placing agency.

(f) Annual evaluations. The agency shall schedule an annual on-site evaluation of the foster home to make an assessment of the care and progress of each foster child in the home. The results of the evaluation shall be on file in written form at the agency and a copy submitted to the foster parents.

(g) Foster care payments. The agency shall have a system by which reimbursement is made to foster parents for expenditures or fees for service that is timely and equitable. If either services or care is to be provided by a foster family as a donation to the agency, a written agreement between the agency and the family shall specify services which shall be provided free and services or costs to be assumed by the agency. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-176. Adoptive services. (a) Recruitment. The agency shall have a written recruitment plan which includes the methods of recruitment, sources to be used, time-related goals for applicant recruitment, and the designated staff and budget to carry it out. Recruitment shall be a continual process in the agency to meet the particular needs of the children available for adoption. The agency shall provide orientation to prospective adoptive parents to acquaint them with the agency's policies and practices and the approximate time the assessment will take, eligibility standards, types of children available and the availability of subsidy. The orientation shall also include a realistic assessment of the agency's need for adoptive homes.

(b) Application. The agency shall require prospective adoptive parents to submit an application before proceeding with adoption. The application form shall be designed to obtain information declaring their intent to become adoptive parents and basic data about their family, their home, their financial status, and references to initiate a home study. The agency shall, as a further part of the application, conduct a social study with the family in their home.

(c) Adoptive home study. The study process shall include a face-to-face interview with each member of the household. The agency shall have on file a written assessment of the adoptive home. The narrative shall assess the following areas of concern:

- (1) Motivation for adoption;
- (2) Family's attitude toward accepting an adoptive child, and plan for discussing adoption with the child;
- (3) Emotional stability, physical health, and compatibility of adoptive parents;
- (4) Ability to cope with problems, stress, frustrations, crises, and loss;
- (5) Information on medical or health conditions which would effect the applicant's ability to parent a child;
- (6) Record of convictions other than minor traffic violations;
- (7) Ability to provide for child's physical and emotional needs;
- (8) Adjustment of own children, if any, including school reports;
- (9) Positive feelings about parenting an adoptive child;
- (10) Capacity to give and receive affection;
- (11) Types of children desired and kinds of handicaps accepted;
- (12) Types of children who would not be appropriate for the placement with this family;
- (13) References; and
- (14) Recommendations for number, age, sex, characteristics, and special needs children best served by this family.

(d) Services to adoptive parents. The agency shall provide services to adoptive applicants individually or in groups to enable them to make an informed decision as to whether they can meet the specific needs of children awaiting adoption through participation in the adoptive study and evaluation of their potential for meeting the needs of the children available for adoption. The agency shall discuss potential children with the adopting

family and shall prepare the adoptive family for the placement of a particular child by anticipating the adjustments and problems that may arise during and after placement. The agency worker shall establish a time schedule for visits to the adoptive family after the placement of a child in order to be able to make clear recommendations for the finalization of the adoption. The agency services shall be available to the adoptive family after finalization of the adoption. The agency shall inform applicants when it has been decided that a child cannot be placed in their home. Services shall be offered to the applicants to assist them to adjust to this decision.

(e) Services to adoptees. Adoptive records shall be maintained by the agency after finalization. Records shall contain sufficient information to maintain the agency's capability to provide to adult adoptees information concerning the circumstances of their origins and their adoption. Copies of court documents shall be maintained indefinitely. In providing information to adult adoptees served by the agency, confidentiality of information obtained from biological families shall be respected. This information may be released only in compliance with state law and orders of a court of competent jurisdiction. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-177. Services in residential group care. (a) Selection of the appropriate group care facility. The agency shall place a child, or refer a child for placement, only in a licensed group care facility. The selection of the most appropriate facility for a child shall be based upon the following considerations:

- (1) The child's particular level of development, and the child's social and emotional problems that can be benefited through group living experiences;
- (2) The child's relationship to parents and the family situation in relation to location and willingness to participate; and
- (3) The particular treatment plan and team approach that the licensed group care facility can make available. A statement of why a particular selection was made, which discusses these factors, shall be in the case record.

(b) Placement agreement. There shall be a clearly written agreement between the placing agency and the residential group care facility, if separate agencies, which clarifies the following:

(1) The amount and frequency of contact the agency shall have with the child and the residential facility for supervision purposes;

(2) The extent to which the agency is to participate in ongoing evaluation of the child's needs and progress;

(3) How the agency is to work with the child's parents;

(4) When the agency will have access to information on the child's care and development;

(5) Visiting plans for child's parents and family members;

(6) Parental participation in case planning;

(7) Reporting mechanisms to be used between the agency and the residential facility while the child is in care;

(8) The financial plan in regard to cost of care;

(9) The conditions under which the child will be discharged from the program; and

(10) Designation of responsibility for aftercare services. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-178. Services to young parents.

(a) Admission. The agency shall describe the services it makes available to parent(s) who are under 18 years of age and who are interested in placing their child. The statement of services and criteria for service eligibility shall be made available to the public.

(b) Services to parents. The agency shall offer counseling to the parents of young parents applying to the agency for services.

(c) Medical services. The agency shall assist in procuring the medical services needed by the pregnant young woman. Medical services and care shall be coordinated by the agency; shall be based on the inter-relationship of physical, social, environmental, and spiritual factors; and shall insure confidentiality for the parent(s) if requested or required. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-179. Case records. (a) The agency shall maintain case records in a manner that is uniform, detailed, well written, and organized. Records shall be current and be made available for inspection by the division. The agency shall show in their case records the following:

(1) Continuity of service plan;

(2) Documentation of the work of the agency; and

(3) Summaries and assessments of changes affecting the client and changes in the service delivery process.

(b) Foster home records. The agency shall keep separate records for each foster home. The record shall be started at the time of application. The foster home record shall contain:

(1) The application;

(2) Home study;

(3) Medical reports;

(4) Summary narrative containing the dates as well as the content material from the worker's contacts;

(5) References;

(6) Yearly evaluation of strengths and weaknesses of the foster family and assessment of the best way to maximize the foster care experience for the foster family and the children placed with them. This evaluation shall be reviewed with the foster family;

(7) Yearly relicensing recommendation study and forms connected with it; and

(8) Placement history of the foster home, children placed, dates admitted and discharged, and pertinent narrative information about the interaction and relationships within the foster family.

(c) Adoptive home records. The agency shall keep separate records for each prospective and actual adoptive family. The adoptive home record shall contain:

(1) The application;

(2) The adoptive home study;

(3) Medical reports;

(4) References;

(5) A copy of the information given to the parents concerning the child;

(6) All legal documents pertaining to the adoption;

(7) Summary narrative on the pre-placement and post-placement contacts with the family and the adopted child;

(8) A narrative which clearly indicates the reason(s) a family was not accepted or did not have a child placed; and

(9) After placement, a statement of plans for follow-up services to the child in placement and to the adoptive family.

(d) Child's records upon placement. The agency shall maintain individual records for each child placed in a foster or adoptive home which shall include:

(1) The name, sex, race, birth date, and birth place of the child;

(2) Name, address, telephone number, and marital status of parent or guardian of the child;

(3) All legal documents and court status;

(4) Medical history, cumulative health record, and psychological and psychiatric reports;

(5) Social history of the family and parent background clearly and fully stated to provide an informational tool for all subsequent workers;

(6) Summary narrative which reflects the dates of contact, initial assessments and case plan, and contact material of worker's visits;

(7) The circumstances precipitating the decision to place a child, the agency's involvement with the parents, including services offered, delivered or rejected. If placement is court ordered, the case record shall contain the court papers, summaries, and required court reports during placement;

(8) Educational records and reports;

(9) Summary of case review conference which reflects the contacts with and status of all family members in relation to the placement plan as well as the achievements or changes in the goals;

(10) Summary of the administrative or outside case review on the progress of each child toward determined goals;

(11) Summary and narrative regarding the child's contacts with the family. The material should reflect the quality of the relationships as well as the way the child is coping with them; and

(12) Copy of interstate compact forms, if applicable.

(e) Child's records upon discharge. Upon discharge, the following shall be placed in the child's case record:

(1) Date of discharge, reason for discharge, and the name, telephone number, address, and relationship of the person or agency to whom the child was discharged;

(2) A discharge summary containing services provided during care, growth and accomplishments and assessed needs which remain to be met with the service possibilities which might meet those needs; and

(3) Aftercare plans.

(f) Reports to the division. The agency shall provide written notification to the division of change of address of legal office. The agency shall provide statistical data to the division when requested for public information, research, or planning purposes. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

CHILD CARE RESOURCE AND REFERRAL AGENCIES

28-4-185. Definitions. (a) "Day care referral agency" means an association, organization, individual, or corporation receiving, caring for, and finding homes for children needing day care who are under 16 years of age.

(b) "Division" means the division of health of the department of health and environment.

(c) "License" means a document issued by the secretary granting authority to an association, organization, individual, or corporation to operate and maintain a day care referral agency.

(d) "Secretary" means the secretary of the health and environment. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-186. Licensing procedures. (a) Any association, organization, individual, or corporation desiring to conduct a day care referral service shall apply for a day care referral agency license on forms provided by the Kansas department of health and environment.

(b) A full license shall be issued if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 *et seq.* and amendments thereof and the rules and regulations promulgated pursuant thereto and has made full payment of the license fee required by the provisions of K.S.A. 65-505 and amendments thereof. The license and any written exceptions granted by the secretary under K.A.R. 28-4-171(c) shall be posted as required by K.S.A. 65-504.

(c) Exceptions. (1) An exception to a regulation may be allowed by the Kansas department of health and environment if:

(A) The applicant requests an exception from the Kansas department of health and environment; and

(B) The secretary determines the exception to be in the best interests of families and children served by the agency.

(2) Written notice from the Kansas department of health and environment stating the nature of the exception and its duration shall be posted with the license.

(d) A copy of the "regulations for licensing day care referral services" shall be kept on the premises at all times.

(e) The applicant or licensee shall notify the division when service is discontinued. Resumption of referral services shall require a new application for license.

(f) An applicant or licensee receiving notice of denial or revocation of license shall be notified of the right to an administrative hearing by the Kansas department of health and environment and subsequently to the right to appeal the denial or revocation to the district court. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-187. Administration. (a) Organization. Each day care referral agency shall have a clearly designated individual or governing body which shall exercise authority over and have responsibility for the operation, policies, and practices of the day care referral agency.

(b) Insurance. Each day care referral agency shall carry liability insurance and accident insurance of not less than \$100,000 per occurrence.

(c) Services.

(1) Each day care referral agency shall have a written description of the day care referral services to be offered to children and their families. The statement of services shall be available in individual copies for distribution to clients and to the public.

(2) Any advertisements shall conform to the written statement of services.

(3) Each day care referral agency shall notify the division of any changes in the designated authority or services offered:

(4) Referrals shall be made only to child care facilities which have a temporary permit, a license, or a certificate of registration issued by the secretary of the department of health and environment.

(5) The following referral records shall be maintained for a period of one year and shall be available for review by licensing staff:

(A) Date of inquiry;

(B) name of person requesting referral; and

(C) disposition of request.

(d) Personnel.

(1) Staffing patterns.

(A) Each day care referral agency that operates child care facilities shall maintain a separate direct child care staff.

(B) Day care referral staff shall not be counted in determining child/staff ratios in any other licensed or registered child care facility.

(2) Records. A personnel record shall be maintained for each day care referral service staff member. The record shall include: job descriptions, medical records, and a record of training and experience. Each staff member shall have reasonable

access to that staff member's file and shall be allowed to add any written statement that staff member wishes to make to the file at any time.

(3) Staff qualifications. Day care referral agencies shall have at least one staff member who meets the following requirements:

(A) Knowledge of the needs of young children;

(B) Human relations skills to relate to the providers, parents and community; and

(C) Training or experience in administrative skills such as budgeting, bookkeeping, and record-keeping.

(4) Volunteers. The agency shall, if it makes use of volunteers, develop a written plan for their orientation, training, and use. The agency shall assign a staff person to supervise volunteers.

(5) Substitute care.

(A) Day care referral agencies shall not move children from one child care provider to another or knowingly assist in the relocation of children without establishing, with the provider, a means of informing each child's parent or parents.

(B) If the need for substitute care is known in advance, parents shall be given notification of names, addresses, and telephone numbers of substitute providers and shall make their own substitute care arrangements.

(C) Emergency permission forms and health assessment forms shall accompany the child to the substitute care.

(D) The agency shall report to the department the name, address and birthdate of each new staff person hired, each new person living in the facility, and each new volunteer recruited during the license year. This report shall be filed within two weeks of the time the person begins to reside, work or volunteer in the facility. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1982; amended May 1, 1984; amended May 1, 1985; amended May 1, 1987.)

28-4-188. Health policies for staff. (a) Before employment, all staff who have contact with the children shall submit, on a form supplied by the division, a certificate of health signed by a licensed physician or nurse approved to perform health assessments. The certificate shall include certification that the person is free from tuberculosis as established by a chest x-ray or negative tuberculin skin test administered within 2 years of the date of employment.

(b) Substitutes and volunteers, before participating in any program operated by the day care

referral agency, shall present a written statement of freedom from active tuberculosis signed by a licensed physician or nurse approved to perform health assessments. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982.)

28-4-189. Transportation. Any day care referral agency that provides transportation as a part of the day care referral service shall meet the following requirements:

(a) When children are transported, the driver shall be 18 years of age or older, and shall hold an operator's license of a type appropriate for the vehicle being used.

(b) Each transporting vehicle shall be in safe operating condition. The transporting vehicle shall have a yearly mechanical safety check of tires, lights, windshield wipers, horn, signal lights, steering, suspension, glass, brakes, and tail-lights. A record of the date of the annual safety checks and corrections made shall be kept on file at the facility or in the vehicle.

(c) Children shall not be transported in campers, vehicle-drawn recreation vehicles or in the back of a truck.

(d) Each vehicle shall be covered by accident and liability insurance as required by K.S.A. 40-3104 and 40-3118 and any amendments thereof.

(e) Emergency release forms and health assessment records, as specified in K.A.R. 28-4-118(a) and 28-4-119(c), shall be carried in the vehicle when children are transported. A first aid kit shall be available.

(f) The safety of the children riding in the vehicle shall be protected as follows:

(1) Each vehicle shall be equipped with an individual restraint for each child as follows:

(A) An infant unable to sit up without support shall be provided with an infant car carrier which faces the rear.

(B) A child able to sit up without support shall be provided with one of the following restraints:

(i) a shield-type device;

(ii) a car seat facing the front that is designed to hold a child weighing up to 40 pounds; or

(iii) a safety harness.

(C) A child four years of age or older, or weighing 40 pounds or more, shall have a lap belt. Shoulder straps shall be used if they do not cross the child's neck or face.

(D) Not more than one child shall be restrained in each lap belt.

(E) School-type buses transporting school-age children shall not be required to be equipped with individual restraints.

(2) All doors shall be locked while the vehicle is in motion.

(3) Discipline shall be maintained at all times.

(4) All parts of the child's body shall remain inside the vehicle at all times.

(5) Children shall not enter or exit from the vehicle into a lane of traffic.

(6) Children shall not be left in a vehicle unattended by an adult. When the vehicle is vacated, the provider shall make certain no child is left in the vehicle.

(7) Smoking in the vehicle shall be prohibited while children are being transported. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-508; effective May 1, 1982; amended May 1, 1984; amended May 1, 1985.)

CHILD CARE CENTERS FOR CHILDREN

28-4-200. (Authorized by and implementing K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; amended, T-83-24, Aug. 25, 1982; revoked May 1, 1983.)

28-4-201 and 28-4-202. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; revoked May 1, 1983.)

28-4-203. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-504, 65-505, 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; amended, T-83-24, Aug. 25, 1982; revoked May 1, 1983.)

28-4-204. (Authorized by K.S.A. 65-501, 65-504; effective Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1983.)

28-4-205 to 28-4-208. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; revoked May 1, 1983.)

28-4-209. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; revoked May 1, 1983.)

28-4-210. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-504, 65-505, 65-508; effective Jan. 1, 1973; amended May

1, 1975; amended Feb. 15, 1977; amended May 1, 1979; amended, T-83-24, Aug. 25, 1982; revoked May 1, 1983.)

28-4-211. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1983.)

28-4-212. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; modified, HCR No. 5019, May 1, 1981; revoked May 1, 1983.)

28-4-213. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; amended, T-83-27, Sept. 22, 1982; revoked May 1, 1983.)

28-4-214 to 28-4-216. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1983.)

28-4-217. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; amended May 1, 1979; revoked May 1, 1983.)

28-4-218. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1983.)

28-4-219 and 28-4-220. (Authorized by K.S.A. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; revoked May 1, 1983.)

28-4-221. (Authorized by K.S.A. 1978 Supp. 65-508; effective Jan. 1, 1973; amended May 1, 1975; amended Feb. 15, 1977; revoked May 1, 1979.)

GROUP BOARDING HOMES FOR CHILDREN AND YOUTH

28-4-250. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; T-86-46, Dec. 18, 1985; revoked May 1, 1986.)

28-4-251. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-508, K.S.A. 1982 Supp. 65-504, 65-505; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended, T-83-24, Aug. 25, 1982; amended May 1, 1983; revoked May 1, 1986.)

28-4-252. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-253. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-254 and 28-4-255. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-256 and 28-4-257. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-258 to 28-4-261. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-262. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-263. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-264. (Authorized by K.S.A. 1978 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended May 1, 1979; revoked May 1, 1986.)

28-4-265 and 28-4-266. (Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked May 1, 1986.)

28-4-267. Revocation of present regulations. The following present regulations as published in the Kansas administrative regulations are being replaced, so are hereby revoked:

General regulations 28-4-1 through 28-4-7.

Regulations for group boarding homes for children 28-4-135 through 28-4-148.

Regulations for maternity homes and clinics 28-4-56 through 28-4-71.

(Authorized by K.S.A. 1975 Supp. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976.)

GROUP BOARDING HOMES AND RESIDENTIAL CENTERS FOR CHILDREN AND YOUTH

28-4-268. Definitions. (a) “Basement” means each area with a floor level more than 30 inches below ground level on all four sides.

(b) “Child” means each individual under 16 years of age.

(c) “Corporal punishment” means each activity directed toward modifying a child’s behavior by means of adverse physical contact such as spanking with the hand or an implement, slapping, swatting, pulling hair, or any similar activity.

(d) “Developmental disability” means any physical, emotional, or mental disability which constitutes a substantial handicap to the individual as defined in public law 91-517.

(e) “Discipline” means the on-going process of helping children develop inner control so that they can manage their own behavior in a socially-approved manner.

(f) “Emergency care” means residential care not to exceed 30 days.

(g) “Emergency shelter” means residential care and protection not to exceed 30 days.

(h) “Facility” means a group boarding home or residential center that provides residential care.

(i) “Group boarding home” means a non-secure facility providing residential care for not less than five nor more than ten persons unrelated to the caregivers, and includes emergency shelters and maternity homes.

(j) “Isolation” means removal of a resident from other residents to a separate locked room or quarters.

(k) “License” means a document issued by the Kansas department of health and environment which authorizes a licensee to operate and maintain a group boarding home or residential center.

(l) “Living unit” means a group of residents living together as an established unit within a residential center.

(m) “Maternity care” means residential care which includes services to women during pregnancy.

(n) “Maternity home” means a facility whose primary function is to provide services to women during pregnancy.

(o) “Non-secure facility” means a facility which provides the resident access to the surrounding community.

(p) “Placing agent” means the person, social agency or court possessing the legal right to place a child.

(q) “Program” means the comprehensive and coordinated sets of activities and services providing for the care, protection and development of the residents.

(r) “Resident” means any child, youth or pregnant woman accepted for care in the residential facility.

(s) “Residential care” means 24-hour care.

(t) “Residential center” means a non-secure facility which provides residential care for more than 10 residents unrelated to the caregivers, and includes emergency shelters and maternity homes.

(u) “Temporary care” means residential care not to exceed 90 days. (Authorized by and implementing K.S.A. 65-508; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986.)

28-4-269. Licensing procedures. (a) A person shall not conduct a group boarding home or residential center for children under 16 years of age unless a license is issued by the secretary.

(b) Each person desiring to conduct a group boarding home or residential center shall submit the following:

(1) An application for a license, which shall be submitted on forms supplied by the department; and

(2) the license fee as specified in K.S.A. 65-505, and amendments thereto.

(c) A license shall not be issued until all of the following information is submitted:

(1) A written proposal that details the following:

(A) The purpose of the facility;

(B) the administration plan for the program, including an organizational chart;

(C) the financing plan for the program;

(D) staffing for the program, including job descriptions;

(E) the services to be offered, including the number, age range, and sex of residents to be served; and

(F) admission criteria and a description of the level of care to be provided to the residents through either of the following:

(i) Direct services; or

(ii) agreements with specified community resources;

(2) a copy of the written notification provided to the school district where the facility is located, including the following:

(A) The anticipated opening date;

(B) the number, age range, and anticipated special education needs of the residents to be served; and

(C) a request for educational services or a request for approval of proposed alternative formal schooling to be provided by the facility as required by K.A.R. 28-4-274(d);

(3) documentation that the notification required by paragraph (c)(2) was received by the school district at least 90 days before the planned opening date;

(4) floor plans for each building to be used as a group boarding home or residential center; and

(5) documentation of the state fire marshal's approval.

(d) The proposal required by paragraph (c)(1) shall be approved by the secretary before a license is issued.

(e) A license shall be issued by the secretary if the applicant is in compliance with the requirements of K.S.A. 65-501 through 65-516, and amendments thereto, and the regulations promulgated pursuant to those statutes, and has made full payment of the license fee.

(f) Each licensee shall notify the secretary and obtain written approval from the secretary before making any change in any of the following:

(1) The admission criteria;

(2) the use of the buildings; or

(3) the program, including the level of care provided through either of the following:

(A) Direct services; or

(B) agreements with specified community resources.

(g) The notification of a proposed change in the program, the admission criteria, or the level of care of the residents shall include the following:

(1) A copy of the written notification of the proposed change that was submitted to the school district where the facility is located; and

(2) documentation that the notification required in paragraph (g)(1) was received by the school district at least 90 days before the anticipated date of any proposed change.

(h) Renewals. Each licensee who wishes to renew the license shall apply for renewal of the license annually on forms supplied by the department and shall submit the fee as specified in K.S.A. 65-505, and amendments thereto.

(i) Request to withdraw an application or terminate a license.

(1) Each applicant shall inform the department if the applicant desires to withdraw the application. The withdrawal of the application shall be acknowledged by the department in writing. A new application and a new fee shall be required

before opening a facility. No applicant shall admit a child before the applicant receives a license.

(2) Each licensee shall inform the department if the licensee desires to terminate the license. The licensee shall return the license to the department with the request to terminate the license. The request and the license shall be accepted by the department. The licensee and other appropriate agencies shall be notified by the department that the license is terminated and that the facility is considered closed. The former licensee shall submit a new application and fee to the department if that person desires to obtain a new license. That person shall not reopen the facility or admit any child before receiving a new license.

(j) A new application and fee shall be submitted for each change of ownership, sponsorship, or location.

(k) Grievance procedures.

(1) Each applicant or licensee receiving notice of denial or revocation of license shall be notified of the right to request an administrative hearing by the secretary and subsequently of the right of appeal to the district court.

(2) If an applicant or licensee disagrees with a notice documenting any finding of noncompliance with licensing statutes or regulations, the applicant or licensee may request an explanation of the finding from the secretary's designee. If the explanation is not satisfactory to the applicant or licensee, the applicant or licensee may submit a written request to the secretary for reconsideration of the finding. The written request shall identify the finding in question and explain why the applicant or licensee believes that the finding should be changed. This request shall be made to the secretary within 10 days after receiving the explanation.

(1) Exceptions.

(1) An applicant or a licensee may submit a written request for an exception to a regulation to the secretary. An exception may be granted if the secretary determines the exception to be in the best interest of a child or children and their families, and if statutory requirements are not violated.

(2) Each licensee shall post with the license the written notice from the secretary stating the nature and duration of the exception.

(m) Amended license.

(1) Each licensee shall submit a request for an amended license and a \$35.00 fee to the secretary if the licensee desires to make any change in any of the following:

(A) The license capacity;

- (B) the age of children to be served; or
- (C) the living units.

(2) Each request for a change in the license capacity or the age range of children to be served shall include the following:

(A) A copy of the written notification of the proposed change that was submitted to the school district where the facility is located; and

(B) documentation that the notification required by paragraph (m)(2)(A) was received by the school district at least 90 days before the anticipated date of any proposed change.

(3) The licensee shall make no change unless permission is granted, in writing, by the secretary. If granted, the licensee shall post the amended license, and the prior license shall no longer be in effect.

(n) Waiver of 90-day notification to the local school district. The 90-day notification to the local school district may be waived by the secretary upon receipt of a written agreement by the local school district.

This regulation shall be effective on and after July 30, 2002. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-501, 65-504, 65-505, 65-506, and 65-508; effective May 1, 1986; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987; amended, T-28-4-1-02, April 1, 2002; amended July 30, 2002.)

28-4-270. Terms of license. (a) The maximum number and age range of residents who may be cared for in each facility shall be specified on the license.

(b) Each facility license issued shall be valid only for the firm, corporation or association and the address appearing on the license.

(c) The license does not give permission for placement of children.

(d) Activities which would interfere with the care of the residents shall not be carried out in the facility by child care personnel.

(e) Advertisements shall conform to the statement of services as given on the application. Claims for specialized services shall not be made unless the facility is staffed and equipped to offer the services, or arrangements have been made for services as outlined in K.A.R. 28-4-271(e)(4). A general claim of "state approval" shall not be made unless the facility has obtained a license issued by the Kansas department of health and environment. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-271. Administration. (a) Organization. The facility shall have plans and policies of organization and administration clearly defining legal responsibility, administrative authority and responsibility for comprehensive services. Changes in policies shall be submitted to the appropriate agency for licensing approval.

(b) Finances.

(1) The facility shall have sound and sufficient finances to insure licensing compliance and effective services. A license for an additional facility operated by a licensee shall not be issued until all existing facilities operated by the licensee are in compliance with licensing regulations.

(2) The facility shall be covered by liability and casualty insurance.

(3) Residents' personal money shall be kept separate from the facility's funds and individual accounts shall be kept.

(4) Residents shall not be exploited in campaigns or publicity efforts to raise funds.

(5) Solicitation of funds by charitable organizations shall be made in Kansas only after compliance with K.S.A. 17-1740.

(c) Personnel policies.

(1) The facility shall have written personnel policies and operating practices which shall be made available to its staff members. The various services of the facility and the duties and responsibilities of each staff member shall be clearly defined and followed.

(2) A personnel record shall be maintained on each staff member and made available to the staff member on request.

(d) Child care personnel.

(1) The facility shall have an administrator whose responsibility is administration of the program.

(2) There shall be adequate staff 18 years of age and older to supervise the residents at all times, and to provide for their physical, social, emotional and educational needs. There shall be an additional adult available in case of emergency.

(3) Each facility shall have a minimum of one child care staff member on duty and available for every seven residents during waking hours and a minimum of one for every ten during sleeping hours. When residents are on the premises at least one staff member shall be physically present. Children of the staff shall be included in the ratio if living in the facility.

(4) Child care personnel shall be provided for the relief of regular staff.

(5) Substitute staff shall be available to work in case of illness or emergency of regular or relief staff.

(e) Staff qualifications.

(1) Administrator. The administrator shall have previous administrative experience and shall have a working knowledge of child development principles.

(A) Each administrator of a residential center shall have at least a bachelor's degree.

(B) Each administrator of a group boarding home shall have at least a high school diploma, or its equivalent.

(C) Each administrator shall be familiar with statutes and regulations governing group boarding homes or residential centers.

(2) Child care staff.

(A) Child care staff with direct responsibility for the residents shall have at least a high school diploma or its equivalent.

(B) Child care staff shall practice accepted methods of child care.

(C) Child care staff shall have a working knowledge of all agency policies and procedures and of the current status of residents.

(3) Relief staff.

(A) Relief staff shall practice accepted methods of child care.

(B) Relief staff with direct responsibility for the residents shall have at least a high school diploma or its equivalent.

(4) Substitute staff shall practice accepted methods of child care.

(5) Child care personnel including substitute staff, shall have a working knowledge of policies and procedures relative to discipline, child abuse reporting and health.

(6) Child care personnel, excluding substitute staff, shall attend a minimum of 18 hours of training annually, to improve their knowledge, understanding and practice of child development principles.

(7) Food service staff shall:

(A) Have a knowledge of nutritional needs of children and youth;

(B) understand quantity food preparation and service;

(C) practice sanitary methods of food handling and storage;

(D) be sensitive to individual, cultural and religious food preferences of the residents; and

(E) be willing to work with the administrator in planning learning experiences for the residents relative to nutrition.

(8) Consultant services. The facility shall arrange for consultation by social workers, physicians, psychologists, psychiatrists, teachers, nurses, speech therapists and other consultants as required to meet the needs of the residents served. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986; amended May 1, 1987.)

28-4-272. Records. (a) Resident's records.

(1) A report of residents in care shall be submitted quarterly to the Kansas department of social and rehabilitation services on forms supplied by the Kansas department of health and environment.

(2) An individual record shall be kept on each resident. Each record shall include:

(A) Date of admission and discharge;

(B) a health assessment record, an immunization record and a dental record on forms supplied by the Kansas department of health and environment;

(C) consent for emergency medical treatment signed by a parent or legal guardian or other person authorized by statute to consent as custodian; and

(D) each accident report.

(3) Each facility providing treatment or social service programs shall have a social service record for each resident. The record shall include a treatment plan and progress report made every three months.

(4) There shall not be disclosure of confidential records or information regarding the resident.

(5) Each facility providing emergency care shall be exempt from K.A.R. 28-4-272(a)(2) and (3).

(b) Staff records. A file shall be kept at the administrative office for each employee. Duplicate health certificates shall be on file at the facility. The file shall include:

(1) Terms of employment;

(2) education and experience;

(3) health certificates;

(4) work references; and

(5) a statement signed by the employee that the employee has read the following documents and agrees to abide by them:

(A) Discipline policies;

(B) child abuse reporting policies; and

(C) health policies. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-273. Admission policies. (a) Written admission policies shall be prepared by the applicant in accordance with goals and purposes of the

facility. The policies shall include a nondiscrimination statement.

(b) Children under three years of age shall be given care in a residential facility only as follows:

(1) To provide emergency care for not more than 30 days; or

(2) To keep siblings together for a maximum of 90 days.

(c) Any facility not specifically designed to serve developmentally disabled persons shall admit residents with special problems only as follows:

(1) Any person with mild development disabilities shall be enrolled at the discretion of the licensee.

(2) Any person showing significant developmental disabilities, including severe mental retardation, emotional disturbance or physical handicap, shall be enrolled at the discretion of the licensee following a developmental evaluation of the person and approval from the Kansas department of health and environment and the Kansas state department of social and rehabilitation services.

(d) Any child or youth who requires long term nursing care shall not be kept in the facility.

(e) Placement agreements between placing agent and facility.

(1) The goal of residential placement shall be to return the resident to the resident's home when such a placement is in the resident's best interest.

(2) There shall be a written policy regarding the facility's responsibility to the resident's family while the resident is in placement.

(3) There shall be a written agreement at the time of placement between the placing agent and the facility setting forth the terms of placement and removal with the understanding that the person or agency having custody shall retain the right to withdraw the resident. Parental rights and responsibilities shall be clearly defined.

(4) Written visitation and communication policies shall be available to all residents, parents, legal guardians, and legal representatives.

(5) The placing agency or other person responsible under the law for the care and custody of each resident shall make arrangements at the time of placement for the financial responsibility for services of the facility and for necessary specialized services.

(6) Acceptance of out-of-state residents shall be made according to Kansas laws and interstate compact procedures.

(7) Any facility shall not accept legal guardianship of a child unless the facility is licensed as a

child placing agency. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-274. Services. (a) Services shall be provided in accordance with the stated purpose and goals of the facility.

(b) Social services. Treatment and social service facilities shall have a specific plan for the provision of social services for each resident in care. These services shall be provided by a private or public social agency or through a licensed social worker on the facility staff.

(c) Discipline.

(1) Each resident shall be treated as a member of the group during the period of care, sharing privileges and duties of the household according to age and capacity, and receiving care and training according to special abilities and limitations.

(2) There shall be a written discipline policy outlining methods of guidance appropriate to the ages of the residents. Residents shall not be permitted to discipline other residents.

(3) Prohibited punishment. Punishment or a threat of punishment which is humiliating, frightening or physically harmful to the resident shall be prohibited. Prohibited methods of punishment include:

(A) Corporal punishment;

(B) verbal abuse or derogatory remarks about the child or the child's family;

(C) binding or tying to restrict movement, or enclosing in a confined space such as a closet, locked room, box, or similar cubicle;

(D) withholding or forcing foods; or

(E) isolation.

(4) Facilities with isolation policies approved by the department of social and rehabilitation services shall be exempt from K.A.R. 28-4-274(c)(3)(E).

(d) Education. Each resident shall be helped to secure the maximum amount of education of which they are capable and be provided the optimum conditions under which they can receive the greatest benefit from the school experience. Alternative formal schooling provided by the facility shall have received approval by the local school district or the Kansas state department of education.

(e) Religion. Each resident shall be allowed to participate in religious worship.

(f) Work experiences.

(1) Whenever possible, residents shall have an opportunity to earn and manage money by working either at the facility or in the community. They shall not be used as substitutes for regular staff.

(2) Vacation, after school, and other jobs shall be permitted with the administrator's approval.

(3) Hazardous work experiences shall not be allowed. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-275. Health care. (a) General health policies.

(1) Smoking shall be confined to designated smoking areas in the facility.

(2) Alcohol or non-prescribed controlled substances, as defined in K.S.A. 65-4101 and any amendments to it, shall not be consumed by any resident, by any staff person while on duty, or by any staff person in the presence of residents.

(b)(1) The licensee, in consultation with a physician or community health nurse, shall develop written policies for implementing the health program in the following areas:

(A) Health examination for residents and staff;

(B) continuing health care;

(C) dental examination and follow-up dental care;

(D) corrections of medical problems;

(E) special examinations such as vision, hearing and neurological exams;

(F) care of minor illness including use of non-prescription drugs; and

(G) consultation for the individual child when indicated.

(2)(A) Use of sharp or dangerous instruments and tools by residents shall be supervised by staff.

(B) Firearms and ammunition, and household poisons and other hazardous substances shall be in locked storage.

(C) Internal and external medications shall be in separate locked storage in a supervised location.

(3) Each prescription medicine shall have the name of the individual recipient and the physician, and shall show the dosage and time. A record shall be kept in the resident's file as to who gave the medication and when it was given. Each unused or expired medication shall be safely discarded.

(4) Medications requiring refrigeration shall be labeled and kept in locked storage in the refrigerator.

(c) Physical health of residents and children of staff.

(1) Physical health.

(A) A health assessment for each resident and for each child of a staff member shall be obtained within six months prior to or not more than 30 days

after admission of the resident or employment of the parent. The assessment shall be conducted by a licensed physician or by a nurse approved by the Kansas department of health and environment to conduct the assessment.

(B) Health assessments shall be required annually for residents to age six and every three years for residents over the age of six. Results of the health assessment shall be recorded on forms supplied by the Kansas department of health and environment.

(C) Each person under 16 years of age who lives in the facility shall have current immunizations according to the schedule recommended by the center for disease control.

(2) Health care.

(A) A current health record shall be kept for each resident. The record shall include pertinent information about health status, developmental progress, and special needs, with appropriate plans to meet these needs.

(B) The staff shall update the health information as determined by the program's specific health policies and use the information as a basis for review and evaluation of the resident's health status.

(3) Residents in emergency care shall be exempt from K.A.R. 28-4-275(c)(1) and (2).

(4) Each child care staff member shall be trained in observation of symptoms of illness, in elementary principles of first aid, and accident prevention.

(5) The staff of the facility shall obtain immediate medical treatment for any resident who is seriously injured or ill, and shall notify the placing agent, the parent, as dictated by the care plan, and the local health department of the injury or illness as soon as possible.

(6) Staff members, as required by law, shall report any evidence of suspected child abuse or neglect of residents to the Kansas state department of social and rehabilitation services, or the appropriate law enforcement agency when Kansas state department of social and rehabilitation services offices are closed.

(d) Dental health of residents.

(1) A pre-admission dental examination obtained within a year prior to or within 60 days after admission shall be required for each resident except residents in emergency care.

(2) Follow-up dental correction shall be provided, and shall be noted in the resident's file.

(3) The facility staff shall develop plans for dental health education and supervise the residents in

the practice of good oral hygiene. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986; amended May 1, 1987.)

28-4-276. Mental health policies. (a) The residential program shall supplement and support the family-child relationship.

(b) The views of the parents, the resident, and the placing agency, concerning factors important to them in the emotional development of the resident, shall be considered by the staff in the services provided.

(c) The cultural heritage of the resident shall be recognized and respected.

(d) Mental health concepts, as an integral aspect of total child development, shall be included in staff training and in parent-child conferences. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-277. Environmental standards. (a) General requirements.

(1) Community resources, such as schools, churches, recreational and health services, police protection and fire protection from an organized fire department, shall be available to the facility.

(2) The building shall meet the legal requirements of the community as to building codes, zoning, and fire protection. Where local fire regulations do not exist, fire safety approval shall be obtained from the state fire marshal.

(3) Plans for constructing a proposed building or for any major addition or alteration shall be the responsibility of a licensed architect.

(A) New buildings. Preliminary plans and outline specifications including plot plans shall be submitted to the Kansas department of health and environment for review prior to commencing construction.

(B) Additions or alterations. A written statement defining the proposed use of the construction shall accompany the plans and specifications. The statement shall be submitted to the Kansas department of health and environment for review prior to beginning construction.

(4) If construction is not commenced within the year, plans and proposals shall be resubmitted to the department before proposed construction begins.

(b) Premises.

(1) There shall be sufficient outside play space available as determined by the number and ages of residents.

(2) The outdoor play area shall be free of physical hazards including bodies of water, ravines, and drainage ditches.

(3) Playground equipment, such as climbing apparatus, slides and swings, shall be provided as appropriate for the age of residents, and shall be firmly anchored. A hard-surfaced area or gravel shall not be used under anchored play equipment.

(4) Each facility shall develop a written maintenance policy which shall be followed. The facility and outside area shall be maintained in good condition and shall be clean at all times, free from accumulated dirt, trash, vermin and rodent infestation. Garbage and outdoor trash containers shall be covered. Contents of outdoor containers shall be removed at least weekly.

(5) The structure of the facility shall be large enough to house the number of residents for which the facility was planned, the staff, substitute staff and children of the staff who are to live in it.

(6) Living rooms and indoor play space shall have proper heating, cooling, lighting and ventilation. There shall be adequate space for recreation and study.

(7) All quarters occupied by the residents shall have lighting of a minimum of 20 foot candles in all parts of the room. There shall be lighting of a minimum of 35 foot candles in areas used for reading, study or other close work.

(8) There shall be a telephone located in each facility and readily available.

(9) Windows and doors shall be screened as needed unless areas are air conditioned.

(10) Low windows and glass doors which present a hazard to children shall be effectively screened and guarded.

(11) All stairs shall be provided with sturdy handrails.

(12) The facility shall contain adequate central storage for household supplies, bedding, linen, out-of-season clothing, luggage and play equipment in addition to adequate closet and storage space in bedrooms for the residents and child care staff.

(13)(A) Asbestos shall not be used in new or remodeling construction.

(B) If friable asbestos is present, it shall be covered and sealed so as to provide a protective barrier between the asbestos and the occupants of the building.

(14) Floors shall be smooth, free from cracks, and easily cleanable. They shall not be slippery. Floor covering for living quarters shall be required over concrete slabs in contact with the ground.

(15) Walls shall be smooth, easily cleanable and in sound condition.

(16) Electrical outlets within the reach of children under six years shall be covered with safety devices.

(17) Appropriate physical facilities, equipment and furnishings shall be provided.

(18) Care for children with handicapping conditions. Care for non-ambulatory children shall be provided on the ground floor. All exits and steps shall have ramps properly equipped with cross-treads. Each ramp shall have an incline of no more than two inches to the foot.

(c) Sleeping facilities.

(1) Sleeping facilities shall be limited to first and second floors. The minimum square footage of floor space exclusive of built in furniture, storage space or closets shall be 80 square feet per person in single rooms and an average of not less than 60 square feet per person in rooms accommodating more than one person. Minimum ceiling height shall be 7' 8" over 90% of the room area.

(2) Each sleeping room shall be an outside room with operable windows, and shall be well-ventilated, adequately lighted, and appropriately heated or cooled.

(3) A separate bed with level flat mattress in good condition and adequate bedding shall be provided for each resident.

(4) Children of staff who reside in the center shall have separate sleeping areas if sex or age is different from that of residents.

(d) Water supply.

(1) The water supply shall be from a source approved and certified by the county health officer and shall be under pressure. Water coming into the premises shall come from a public or municipal source, or from a private water supply which has been investigated and approved by the responsible health authorities. The plumbing shall have been installed according to local or state plumbing codes.

(2) Sanitary drinking facilities shall be provided for the residents. The following methods are acceptable:

(A) Disposable cups and an appropriate water dispenser which is available to the residents;

(B) a fountain of approved design with water under pressure so that the stream is not less than three inches high; or

(C) a glass washed after each use.

(e) Toilet and lavatory facilities.

(1) All plumbing fixtures and building sewers

shall be connected to public sewers if the public sewer line is within 50 yards of the building.

(2) Where a public sewer is not available, a private sewage disposal system meeting requirements of the health authority and installed and connected to all plumbing fixtures and building sewers shall be used.

(3) Toilet and bathing facilities shall be convenient to sleeping quarters, living and recreation rooms.

(4) Cold water and hot water not exceeding 120°F., shall be supplied under pressure to lavatory and bathtub or shower.

(5) For each five or fewer residents of each sex there shall be at least one toilet, one lavatory and a bathtub or shower.

(6) Separate bathroom facilities shall be provided for live-in staff.

(7) Each bathroom shall be ventilated. An inside bathroom shall have a mechanical system to the outdoors with a minimum of four air changes per hour.

(8) Facilities serving non-ambulatory children shall have toilets and washbasins designed to accommodate them.

(f) Laundry facilities.

(1) If laundry is done at the facility, laundry fixtures shall be located in an area separate from food preparation areas and shall be installed and used in a manner that safeguards the health and safety of the residents.

(2) If needed, the type of diapers and diaper service shall be determined by the facility director with approval of the health nurse.

(3) Soiled linen shall be kept in areas separate from clean linen. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987.)

28-4-278. Food service. (a) Food preparation and storage.

(1) The major food preparation area shall be adequately equipped for the sanitary preparation and storage of food and washing of dishes and utensils. Food shall be prepared and served in a sanitary manner. Kitchens which serve 25 or more persons shall provide separate handwashing facilities in the kitchen. Personnel shall wash their hands before handling food.

(2) Dishes shall have hard-glazed surfaces and shall be entirely free of cracks or chips.

(3) Dishes, kitchen utensils and feeding equip-

ment shall be maintained in a sanitary condition using one of the following methods:

(A) A three-compartment sink supplied with hot and cold running water to each compartment and a drain board for washing, sanitizing, and air-drying;

(B) a domestic-type dishwasher for groups of 24 or fewer persons;

(C) a commercial-type dishwasher with a 12-second rinse with 180°F. water, for groups of 25 persons or more; or

(D) disposable plates, cups, and plastic utensils of food-grade medium weight. Disposable table service shall be used only one time and then destroyed.

(4) Tables shall be washed before and after meals, and floors shall be swept after meals.

(5) Poisonous or toxic materials shall not be stored with, under, or over food.

(6) All perishables and potentially hazardous foods shall be continuously maintained at 45°F. or lower in the refrigerator, or 10°F. or lower in the freezer, with 0°F. recommended. Each cold storage facility shall be provided with a clearly visible, accurate thermometer.

(8) All foods stored in the refrigerator shall be covered.

(9) All foods not requiring refrigeration shall be stored at least six inches above the floor in clean, dry, well-ventilated storerooms or other approved areas with no overhead drain nor sewer lines.

(10) Dry bulk food which is not in an original, unopened container shall be stored in metal, glass or food-grade plastic containers with tight-fitting covers and shall be labeled.

(b) Food safety.

(1) All dairy products shall be pasteurized. Dry milk shall be used only for cooking.

(2) Beef, pork and poultry shall be obtained from government-inspected sources.

(3) Commercially canned food from dented, rusted, bulging or leaking cans, or food from cans without labels, shall not be used. Home-canned foods, other than jams and jellies, shall not be used.

(c) Nutrition.

(1) Meals and snacks shall meet the nutrient needs of the residents according to recommended dietary allowances for age and sex.

(2) Special diets shall be provided for residents as ordered by attending physicians. Efforts shall be made to accommodate religious practices.

(3) Copies of menus served for one month shall be kept on file and available for inspection. (Au-

thorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

28-4-279. Maternity care. (a) Any facility may provide care for a pregnant resident if the requirements of this regulation are met, and the plan is approved by the department. If the facility does not meet the maternity care regulations or does not plan to maintain the resident through the pregnancy, the resident's child placing agent shall be notified within seven days of the determination of pregnancy and the resident shall be moved within 30 days thereafter.

(b) Any facility which provides maternity care shall meet the following additional requirements:

(1) Each resident shall receive the services of a licensed physician on a regular and continuing basis throughout pregnancy, delivery and post-delivery checkup.

(2) The facility shall consult with a board-certified obstetrician who is available in case of emergency or complication.

(3) There shall be a written plan for all deliveries to take place in a licensed hospital or maternity center. The plan shall state the name and location of the facility and of an alternate hospital for use if services are unavailable at the primary hospital or maternity center.

(4) The facility shall be within 30 minutes of the licensed hospital or maternity center providing maternity services.

(5) Complaints of alleged inadequate or improper care by a physician or hospital shall be reported in writing immediately to the Kansas department of health and environment.

(6) Ambulance service shall be readily available for emergencies.

(7) Special arrangements shall be available for bed and nursing care for each resident who develops complications during pregnancy but who does not require hospitalization.

(8) Each resident's medical record shall include the medical consent form, the name of her physician, a schedule of appointments, the expected date of delivery and any special needs or problems.

(9) The facility shall contract for the services of a registered nurse to provide at least weekly instruction to the pregnant residents regarding childbirth preparation, nutrition, general health and hygiene, post-partum care, post-natal care, contraception and venereal disease, and the psychology and physiology of pregnancy. The resi-

dents shall be given a tour of the hospital where delivery is planned. The nurse shall also serve as a consultant to the staff regarding the development of general health policies.

(10) Special nutrition policies for pregnant residents shall be developed in consultation with a physician, nutritionist or nurse. Residents shall be referred to the WIC program when appropriate and available.

(11) Specific policies shall be developed for support to the mother during labor and delivery and for the care of any new mother who returns to the facility following delivery.

(12) Upon dismissal from the facility, each resident shall be given written information regarding her post-partum care. A referral shall be made to the appropriate community resource for follow-up services.

(13) Casework services shall be provided by an approved social agency in the community or the facility's own professional staff.

(A) If the facility's professional staff provides casework services, the following requirements shall be met:

(i) There shall be at least one social worker for each fourteen residents.

(ii) Casework services shall be provided to each pregnant resident immediately upon admission to the facility.

(iii) Casework interviews shall be regularly scheduled with reasonable frequency based on the service plan.

(iv) Casework service shall include help in adjustment to pregnancy, to separation from the resident's natural environment and to group living. Casework services shall include psychological and psychiatric help as needed to facilitate diagnosis and treatment.

(v) The caseworker shall be responsible for providing help in formulating a long-term plan for the mother and baby.

(vi) Each resident shall have the right to make the decision as to whether to keep or relinquish her infant. This decision shall be made without undue pressure or influence.

(vii) The caseworker, at the request of the pregnant resident, shall arrange for referral to a licensed child placing agency for any baby needing adoptive placement or other foster care.

(B) If casework services are provided by a community social agency, K.A.R. 28-4-279(b) (13)(A)(iii)(iv)(v)(vi) and (vii) requirements shall be met.

(14) The maternity care staff, board, or any other person connected with the facility shall not directly or indirectly place or arrange for placement of children for adoption or foster care. Such an action shall result in immediate revocation or denial of license. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-502, 65-506, 65-507 and L. 1984, Chapter 224, Section 1; effective May 1, 1986.)

28-4-280. Residential services to mothers and infants. Each maternity home or residential facility which provides residential services to mothers and infants after delivery shall meet the following requirements:

(a) Physical plant.

(1) A maximum of five mothers and infants shall be served.

(2) The mother/infant unit shall be separate from units serving pregnant and nonpregnant residents.

(3) A nursery shall be provided.

(A) The nursery shall have adequate space and equipment for the number and age of infants in care.

(B) Age-appropriate toys and play equipment shall be available.

(4) Rooming-in may be allowed if it is determined to be in the best interest of the newborn as documented in the resident's social service plan.

(5) A quiet area shall be provided for infant feeding.

(6) Laundry facilities shall be readily available.

(7) There shall be facilities for the safe preparation and storage of formula.

(8) The environment shall be free of substances potentially hazardous to mother and infant.

(b) Parenting education.

(1) Techniques of care of the newborn shall be taught on an individual basis.

(2) Residents shall be provided instruction in child development and child care, infant development and stimulation, first aid, and infant nutrition by the agency or through community resources.

(c) Policies.

(1) There shall be written policies which specify:
(A) The length of time the mother may remain in the unit;

(B) prohibition against the assumption of child care responsibilities by any resident other than the mother of the newborn; and

(C) substitute child care arrangements when the mother is ill or otherwise away from her newborn.

(d) Services.

(1) The facility shall contract with a pediatrician to supervise the health care of the infants in the unit.

(2) There shall be casework services as outlined in KAR 28-4-279(a)(14).

(3) Staff shall be trained in the use of monitors and infant CPR.

(e) Records. The following records shall be maintained for each mother/infant:

(1) Medical consent;

(2) health care instructions; and

(3) infant medical record. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1986.)

ATTENDANT CARE FACILITIES FOR CHILDREN AND YOUTH

28-4-285. Definitions. (a) "Attendant" means a staff person or volunteer who provides direct supervision of a juvenile.

(b) "Attendant care" means one-on-one direct supervision of a juvenile who has been taken into custody. Attendant care shall not exceed 24 hours exclusive of weekends and court holidays.

(c) "Attendant care facility," herein after referred to as the facility, means a boarding home for children at which attendant care is provided.

(d) "Corporal punishment" means activity directed toward modifying a juvenile's behavior by means of physical contact such as hitting with the hand or any implement, slapping, swatting, pulling hair, yanking the arm, or any similar activity.

(e) "Juvenile" means a person between the ages of 10 and 18 years of age.

(f) "License" means a document issued by the Kansas department of health and environment which authorizes a licensee to operate and maintain an attendant care facility.

(g) "Non-secure facility" means a facility not characterized by the use of physically restricting construction, hardware and procedures.

(h) "Public agency" means any branch of city, county, or state government. (Authorized by K.S.A. 65-508; and implementing K.S.A. 65-501, 65-503, and 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-286. Licensing procedures. (a) Any person, corporation, firm, association or other organization who desires to conduct an attendant care facility shall apply for a license on forms provided by the Kansas department of health and environment. The application shall include a KBI/

SRS child abuse registry form supplied by the Kansas department of health and environment.

(b) A license shall be issued if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 *et seq.* and amendments of them and the regulations adopted as required by those statutes, and has made full payment of the license fee required by the provisions of K.S.A. 65-505 and amendments of it.

(c) The Kansas department of health and environment shall revoke a license or deny any application in any case in which there is a failure to comply with the provisions of the regulations for attendant care.

(d) A copy of "regulations for licensing attendant care facilities," provided by the Kansas department of health and environment shall be kept on the premises at all times. (Authorized by K.S.A. 65-508; and implementing K.S.A. 65-501, 65-503, and 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-287. Terms of license. (a) The maximum number and age range of juveniles who may be cared for in each living unit shall be specified on the license.

(b) Each facility license shall be valid only for the licensee and the address appearing on the license. A new application shall be required for each change of ownership, sponsor, or address of the facility.

(c) Each license shall not give the attendant care facility permission to place children.

(d) Claims as to specialized services shall not be made unless the facility is staffed and equipped to offer such services.

(e) Each applicant or licensee shall inform the licensing authority when the application is to be withdrawn or the license is not to be renewed. The Kansas department of health and environment shall notify the applicant or licensee and other appropriate agencies that the facility is considered closed and the license terminated.

(f)(1) Any applicant or licensee may submit a written request for an exception to a regulation to the Kansas department of health and environment. An exception shall be granted if the secretary determines the exception to be in the best interest of a juvenile, and if statutory requirements are not violated.

(2) Written notice from the Kansas department of health and environment stating the nature of the exception and its duration shall be posted with

the license. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-288. Administration, personnel and records. (a) Organization. If the facility is operated by a private corporation, the corporation shall be authorized to do business in the state of Kansas.

(b) Administrative policies.

(1) Each facility shall have an organizational chart, and written policies and procedures defining operations and legal responsibilities.

(2) Each policy and procedure shall be distributed to staff members as appropriate.

(3) A KBI/SRS child abuse registry form shall be completed and submitted to the Kansas department of health and environment within two weeks of the time each new person over 10 years of age resides, works or regularly volunteers in the facility, excluding juveniles placed in care.

(c) Finances.

(1) The facility shall have sufficient finances to ensure licensing compliance and effective services.

(2) Juveniles shall not be exploited in campaigns or publicity efforts to raise funds.

(3) Insurance. The facility shall be covered by liability and casualty insurance.

(d) Personnel policies.

(1) Each facility shall have written personnel policies including job descriptions that are approved and reviewed annually by licensing staff.

(2) A personnel record shall be maintained for each attendant and made available to the attendant on written request.

(3) No attendant shall be on duty for more than eight hours.

(e) Staffing.

(1) There shall be an attendant for each juvenile.

(2) Each attendant shall be the same sex as the juvenile.

(3) Exceptions to this regulation may be requested pursuant to K.A.R. 28-4-287.

(f) Staff qualifications.

(1) Attendants shall be qualified by temperament, emotional maturity, sound judgment and an understanding of children.

(2) Each attendant shall:

(A) Be 19 years of age or over;

(B) have a high school diploma or its equivalent; and

(C) have completed a state-approved training program.

(g) The following individual personnel records shall be kept on each attendant:

(1) Job application, including:

(A) Identifying information;

(B) qualifications; and

(C) character and employment references;

(2) record of negative TB test;

(3) a statement signed by attendant that discipline policies have been reviewed and will be followed; and

(4) documentation of state-approved training.

(h) Juvenile records.

(1) A register shall be kept of all juveniles with name, birthdate, reason for custody, dates of admission and release, and names and addresses of parents, legal guardian or legal custodian.

(2) An admission and release form shall be submitted to the Kansas bureau of investigation upon release of a juvenile, on forms supplied by the bureau.

(3) A record shall be kept on each juvenile which shall include:

(A) Identifying information;

(B) arrest record;

(C) record of money and personal property, signed by the juvenile and the attendant;

(D) statement signed by the juvenile that the rules and regulations of the facility have been reviewed; and

(E) health history checklist.

(4) A daily log of each juvenile's behavior shall be maintained with notations regarding special problems while in custody and response of staff to problems.

(5) Each improper disclosure of records or information regarding juveniles shall be grounds for revocation or suspension of the license. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-289. Admission policies and procedures. (a) Written admission criteria shall be clearly defined.

(b) Intake policies.

(1) Identifying information shall be obtained to initiate each juvenile's record. This information shall include a description of behavior and obvious physical problems of each juvenile.

(2) An arrest record shall accompany each juvenile to the facility. A detention hearing shall be held as designated in the juvenile code.

(3) If it is known that the juvenile's parents, guardian or other custodians have not been no-

tified, the facility's staff shall notify such persons of custody.

(4) Prior to admission, each juvenile shall be searched and items removed that might be used to injure self or others.

(5) Upon admission, if a juvenile surrenders money and personal property, a record of each of these properties shall be signed by both the juvenile and the attendant and placed in the juvenile's record. Each refusal to sign shall be documented.

(6) A health history checklist shall be completed for each juvenile at the time of admission. Each checklist shall be completed by the person who admits the juvenile, using forms supplied by the Kansas department of health and environment.

(7) Each juvenile shall not be admitted if he or she shows evidence of being seriously ill or injured until examined by a physician.

(8) Upon admission, rules and regulations of the facility shall be discussed with each juvenile, and the juvenile shall sign a statement that the rules and regulations have been reviewed.

(c) Release policies.

(1) Each release shall be approved by the court of jurisdiction or other designated authority.

(2) The facility shall provide release forms to be signed by the person to whom the juvenile is released. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-290. Program. (a) A written plan and daily routine shall be maintained for all juveniles that shall include supervision, meals, rest and sleep, personal hygiene, physical exercise, work, recreation, visitation and communication.

(b) Supervision.

(1) Each juvenile shall be supervised at all times.

(2) Activities that would interfere with the care of a juvenile shall not be carried out by an attendant while on duty.

(3) Alcohol or non-prescribed controlled substances as defined in K.S.A. 65-4101 and any amendments of it shall not be consumed by any juvenile or attendant while on duty.

(4) Smoking shall be confined to designated smoking areas in the facility.

(c) Food service.

(1) Each juvenile shall receive nutritious meals and snacks at customary times.

(2) Food prepared off premises:

(A) Shall be obtained from sources licensed by the Kansas department of health and environment;

(B) shall be transported in covered containers; and

(C) shall not be allowed to stand.

(3) Food prepared on the premises shall be prepared, served and stored in a sanitary manner.

(4) Only pasteurized milk and government-inspected meat and fowl shall be used. Powdered milk shall be used for cooking only.

(5) Home-canned foods shall not be served in the facility.

(d) Personal hygiene.

(1) Each juvenile shall be allowed to bathe and perform bodily functions as necessary.

(2) Each juvenile shall be provided soap, toothbrush, toothpaste, other personal care items, and clean, individual bath and face towels.

(4) Clothing, if provided, shall be clean and in good condition.

(e) Each juvenile shall have the opportunity for physical exercise. This activity shall be in an area free of hazards, and outdoors if possible.

(f) Work.

(1) Work assignments shall not be used as a substitute for recreation.

(2) Each juvenile shall be prohibited from performing duties including, but not limited to:

(A) Personal services for staff;

(B) cleaning or maintaining areas away from the attendant care facility;

(C) substituting for staff; or

(D) any work defined as hazardous by the Kansas department of human resources governing child labor.

(g) Art and craft supplies, books, current magazines, games and other indoor recreational materials and equipment shall be provided for leisure time activities.

(h) Visitation and communication.

(1) Each facility shall provide juveniles with the opportunity for telephone and visitation contact with parents, legal guardians, and legal representatives.

(2) Written visitation policies shall be available to each juvenile, parent, legal guardian and legal representative.

(3) Each juvenile shall not be denied the right to contact the juvenile's attorney or court counselor.

(i) Discipline.

(1) There shall be a written discipline policy.

(2) Punishment that is humiliating, frightening or physically harmful to the juvenile shall not be

used at any time. The juvenile shall be protected against all forms of neglect, exploitation or degrading forms of punishment.

(3) Prohibited forms of punishment shall include:

- (A) Corporal punishment;
 - (B) verbal abuse, threats, or derogatory remarks about the juvenile or the juvenile's family;
 - (C) binding or tying to restrict movement, or enclosing in a confined space such as a closet, locked room, box, or similar cubicle; or
 - (D) deprivation of meals.
- (4) Juveniles shall be permitted to be appropriately clothed at all times. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-291. (a) Health care policies.

(1) Each facility, in consultation with a physician or community health nurse, and using the Kansas department of health and environment health care guidelines as a resource, shall develop written health care guidelines covering the following areas:

- (A) Care of minor illness, including the use of nonprescription drugs;
- (B) care of juveniles under the influence of alcohol and drugs; and
- (C) consultation regarding individual juveniles when indicated.

(2) Each attendant caring for juveniles shall have first aid training.

(b) Health care of juveniles.

(1) A health checklist provided by the Kansas department of health and environment shall serve as a guide to determine if a juvenile is in need of medical care.

(2) A physician shall be contacted for any juvenile taking a prescribed medication to prevent interruption of treatment.

(C) A physician shall be contacted for a juvenile who has acute symptoms of illness or who has a chronic illness. Reportable communicable diseases shall be reported immediately to the county health officer.

(c) Health of attendants.

(1) Each attendant shall be free of communicable disease and shall be in such a state of health and freedom from physical or emotional handicaps as is necessary to work with children.

(2) Each attendant shall present written proof of freedom from active tuberculosis before serving in the facility. (Authorized by and implement-

ing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-292. Safety procedures. (a) Plans shall be developed for the care of juveniles in disasters such as fires, tornadoes, storms, floods, and civil disorders, as well as occurrences of serious illness or injury to staff or juveniles.

(b) Each disaster plan shall be posted and followed in an emergency.

(c) Each incident resulting in the death of or serious injury to any staff member of the facility or juvenile admitted to the facility shall be reported to the Kansas department of health and environment. Each incident involving any juvenile shall be reported to the parent or guardian. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-293. Physical plant. (a) Each facility shall be clean and free from safety hazards.

(b) (1) Any facility may be located in a non-secure area at a sheriff's office, state police post, detoxification center, community mental health center, local hospital or similar facility which meets all applicable codes.

(2) Community resources including but not limited to health services, police protection, and fire protection shall be available to the attendant care facility.

(c) Inside area.

(1) Each wall and floor shall be in sound condition and easily cleanable. Floor covering shall be required over concrete slab in contact with the ground. The floors shall not be slippery.

(2) Each facility shall be limited to ground level and above except basements may be used with fire safety approval. Each room with a floor level more than 30 inches below ground level shall be considered a basement.

(3) The minimum square footage of free floor space shall be 120 square feet including activity and sleeping areas. Minimum ceiling height shall be 7 ft. 8 inches over 90% of the room.

(4) Each room occupied by a juvenile shall have a source of natural light.

(5) Each area used for reading shall have a minimum of 35 foot candles of light.

(6) Each facility shall have adequate storage space for supplies and equipment.

(7) A separate bed with a level, flat mattress in good condition and adequate, clean bedding shall be provided for each juvenile.

(8) Medicines, poisons and firearms shall be inaccessible to juveniles.

(9) A telephone and emergency telephone numbers shall be readily accessible to the attendant.

(10) The water supply, whether public or private, shall be from a source approved by the local health department or the Kansas department of health and environment.

(11) There shall be one toilet, one lavatory and one bathtub or shower available to the facility.

(12) Cold and hot water shall be supplied to each lavatory, bathtub and shower. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

28-4-294. Transportation. Each facility that provides transportation for juveniles shall meet the following requirements:

(a) Each driver of the vehicle shall hold an operator's license of a type appropriate for the vehicle being used.

(b) Each transporting vehicle shall be maintained in safe operating condition.

(c) Each transporting vehicle shall be equipped with an individual seat belt for the driver, each juvenile passenger and each additional passenger. The driver, each juvenile passenger and each additional passenger shall use the seat belts. (Authorized by and implementing K.S.A. 65-508; effective, T-28-7-29-88, July 29, 1988; effective Dec. 12, 1988.)

FAMILY FOSTER HOMES FOR CHILDREN AND YOUTH

28-4-300. (Authorized by K.S.A. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; amended, E-78-7, Feb. 17, 1977; revoked, E-81-22, Aug. 27, 1980; revoked May 1, 1981.)

28-4-301 to 28-4-310. (Authorized by K.S.A. 65-508; effective, E-76-36, July 14, 1975; effective May 1, 1976; revoked, E-81-22, Aug. 27, 1980; revoked May 1, 1981.)

28-4-311. Definition. "Family foster home" means a child care facility that is a private residence, including any adjacent grounds, in which a licensee provides care for 24 hours a day for one or more children in foster care and for which a license is required by K.A.R. 28-4-801. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503 and 65-508; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; amended March 28, 2008.)

28-4-312. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-508, K.S.A. 1982 Supp. 65-504, 65-505; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; amended, T-83-24, Aug. 25, 1982; amended May 1, 1983; revoked March 28, 2008.)

28-4-313. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-508; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; revoked March 28, 2008.)

28-4-314. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; revoked March 28, 2008.)

28-4-315. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-508; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; revoked March 28, 2008.)

28-4-316. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, 65-508, 65-510; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; amended, T-84-28, Oct. 19, 1983; amended May 1, 1984; amended May 1, 1986; revoked March 28, 2008.)

28-4-317. (Authorized by and implementing K.S.A. 65-508; effective, E-81-22, Aug. 27, 1980; effective May 1, 1981; amended May 1, 1986; revoked March 28, 2008.)

SECURE TREATMENT FACILITIES

28-4-330. Definitions. (a) "Administrator" means a person employed by a secure residential treatment facility who is responsible for the overall administration of the facility.

(b) "Basement" means each area with a floor level more than 30 inches below ground level on all four sides.

(c) "Clinical director" means a person who is employed by the secure residential treatment facility, who is responsible for the overall treatment program, and who is approved by the Kansas behavioral sciences regulatory board, Kansas board of nursing, or Kansas board of healing arts to diagnose and treat mental and behavioral disorders.

(d) "Corporal punishment" means an activity directed toward modifying a youth's behavior by means of adverse physical contact, including spanking with the hand or an implement, slapping, swatting, pulling hair, or any similar activity.

(e) “Department” means the Kansas department of health and environment.

(f) “Discipline” means the ongoing process of helping youth develop inner control so that they can manage their own behavior in a socially approved manner.

(g) “Individual plan of care” means a written, goal-oriented treatment plan to enable a youth to function in a less restrictive environment, including the planned programs, therapies, and activities designed to move the individual to a level of functioning consistent with living in a community setting.

(h) “Involuntary seclusion” means the removal of a youth from other youths to a separate locked room or quarters.

(i) “License” means a document issued by the Kansas department of health and environment that authorizes a licensee to operate and maintain a secure residential treatment facility.

(j) “Program” means the comprehensive and coordinated activities and services providing for the care, protection, and treatment of youth.

(k) “Program director” means the staff person responsible for the oversight and implementation of the program.

(l) “Restraint” means the application of any devices, other than human force alone, to any part of the body of a youth in care for the purpose of preventing the youth from causing injury to oneself or others.

(m) “Secretary” means the secretary of the Kansas department of health and environment.

(n) “Secure facility” means a child care facility that is operated or structured to ensure that the entrances and exits from the facility are under the exclusive control of the staff.

(o) “Secure residential treatment facility” means a secure facility operated or structured to provide a therapeutic residential care alternative to psychiatric hospitalization for five or more youth with a diagnosis of a severe emotional, behavioral, or psychiatric condition.

(p) “Treatment” means comprehensive, individualized, goal-directed, therapeutic services provided to youth.

(q) “Treatment team” means the secure residential treatment facility’s interdisciplinary personnel responsible for the development, implementation, and evaluation of each youth’s individualized plan of care.

(r) “Youth” means a person or persons who are admitted to a secure residential treatment facility for treatment.

(s) “Youth care staff” means the persons employed by the secure residential treatment facility to supervise the youth.

(t) “Youth record” means any electronic or written document concerning a youth admitted to a secure residential treatment facility that is created or obtained by an employee of the secure residential treatment facility. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-331. Licensing procedures. (a) A person shall not operate a secure residential treatment facility that provides treatment to youth under 16 years of age, unless issued a license by the department.

(b) Each person desiring to operate a secure residential treatment facility that provides treatment to youth under 16 years of age shall submit the following:

(1) An application for a license on forms provided by the department; and

(2) the license fee as specified in K.S.A. 65-505, and amendments thereto.

(c) In addition to the application for a license, each applicant shall submit the following:

(1) A written proposal that details the following:

(A) The purpose of the facility;

(B) the administration plan for the program, including an organizational chart;

(C) the financing plan for the program;

(D) staffing for the program, including job descriptions; and

(E) services and treatment to be offered, including the number, age range, and sex of youth to be served;

(2) a copy of the written notification that was submitted to the school district where the facility is located, including the following:

(A) The planned opening date;

(B) the number, age range, and anticipated special education needs of the residents to be served; and

(C) a request for on-site educational services or a request for approval of proposed alternative formal schooling to be provided by the licensee as specified in K.A.R. 28-4-336; and

(3) documentation that the notification required by paragraph (c)(2) was received by the school district at least 90 days before the planned opening date.

(d) Each applicant shall submit a report, on forms provided by the department, containing

the identifying information that is necessary to complete criminal history and child abuse registry background checks for all persons 10 years of age and older residing, working, or regularly volunteering in the secure residential treatment facility.

(1) The identifying information shall be submitted on a report as follows:

(A) At the time of application for an original license;

(B) at the time of application for renewal of a license; and

(C) before each new person resides, works, or regularly volunteers in the secure residential treatment facility.

(2) A copy of each report shall be kept on file at the facility.

Youth admitted into a secure residential treatment facility for care and treatment shall not be considered to be residing in the secure residential treatment facility for the purposes of criminal history or child abuse background checks.

(e) Each applicant shall submit to the department plans for each building that will be used as a secure residential treatment facility. Each plan shall state whether or not the secure residential treatment facility will rely on locked entrances and exits to secure the facility.

(f) Each applicant shall submit a code footprint for each building to be used as a secure residential treatment facility to the Kansas state fire marshal's office for approval. Each applicant shall provide to the department a copy of the approval of the Kansas state fire marshal's office before a license is issued.

(g) Each applicant shall be issued a license if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 through 65-516, and amendments thereto, and the regulations promulgated pursuant to these statutes and if the license fee required by K.S.A. 65-505, and amendments thereto, is submitted. Each license shall be prominently displayed within the facility.

(h) Each licensee who wishes to renew the license shall apply for renewal of the license annually on forms supplied by the department and shall submit the fee as specified in K.S.A. 65-505, and amendments thereto.

(i) Request to withdraw an application or terminate a license.

(1) Each applicant shall inform the department if the applicant desires to withdraw the application. The withdrawal of the application shall be acknowledged by the department in writing. A

new application and a new fee shall be required before opening a facility. No applicant shall admit a child before the applicant receives a license.

(2) Each licensee shall inform the department if the licensee desires to terminate the license. The licensee shall return the license to the department with the request to terminate the license. The request and the license shall be accepted by the department. The licensee and other appropriate agencies shall be notified by the department that the license is terminated and that the facility is considered closed. The former licensee shall submit a new application and fee to the department if that person desires to obtain a new license. That person shall not reopen the facility or admit any child before receiving a new license.

(j) A new application and fee shall be submitted for each change of ownership, sponsorship, or location.

(k) Grievance procedures.

(1) Each applicant or licensee receiving notice of the denial or revocation of a license shall be notified of the right to request an administrative hearing by the secretary, and subsequently of the right of appeal to the district court.

(2) If an applicant or licensee disagrees with a notice documenting any finding of noncompliance with licensing statutes or regulations, the applicant or licensee may request an explanation of the finding from the secretary's designee. If the explanation is not satisfactory to the applicant or licensee, the applicant or licensee may submit a written request to the secretary for reconsideration of the finding. The written request shall identify the finding in question and explain why the applicant or licensee believes that the finding should be changed. The request shall be made to the secretary within 10 days after receiving the explanation.

(l) Exceptions.

(1) Any applicant or licensee may submit to the department a written request for an exception to a regulation. An exception may be granted if the secretary or the secretary's designee determines the exception to be in the best interest of a youth or the youth's family, and if the exception does not violate statutory requirements.

(2) Written notice of each request for an exception that is approved by the secretary shall be provided to the applicant or licensee by the secretary or the secretary's designee. Each written notice shall state the nature and duration of the exception. This notice shall be posted with the license.

(m) Each licensee shall notify the secretary and obtain written approval from the secretary before making any change in any of the following:

(1) The use of the buildings; or
 (2) the program, provided through either of the following:

(A) Direct services; or
 (B) agreements with specified community resources.

(n) The notification of a proposed change in the program shall include the following:

(1) A copy of the written notification of the proposed change that was submitted to the school district where the facility is located; and

(2) documentation that the notification required by paragraph (n)(1) was received by the school district at least 90 days before the anticipated date of any proposed change.

(o) Amended license.

(1) Each licensee shall submit a request for an amended license and a \$35.00 fee to the secretary if the licensee desires to make any change in any of the following:

(A) The license capacity;
 (B) the age of the children to be served; or
 (C) the living units.

(2) Each request for a change in license capacity or the age range of children to be served shall include the following:

(A) A copy of the written notification of the proposed change that was submitted to the school district where the facility is located; and

(B) documentation that the notification required in paragraph (o)(2)(A) was received by the school district at least 90 days before the anticipated date of any proposed change.

(3) The licensee shall make no change unless permission is granted, in writing, by the secretary. If granted, the licensee shall post the amended license, and the prior license shall no longer be in effect.

(p) Waiver of 90-day notification to the local school district. The 90-day notification to the local school district may be waived by the secretary upon receipt of a written agreement by the local school district.

This regulation shall be effective on and after July 30, 2002. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-501, 65-504, 65-505, 65-506, 65-508, and 65-516; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999; amended, T-28-4-1-02, April 1, 2002; amended July 30, 2002.)

28-4-332. Terms of license. (a) The maximum number of youth and the age range of youth who may be treated in each secure residential treatment facility shall be specified on the facility's license. No youth less than 10 years of age shall be admitted to a secure residential treatment facility. No youth more than 18 years of age shall be admitted to a secure residential treatment facility, but any person admitted for treatment may continue to receive treatment until that person is 21 years of age.

(b) Each license issued by the department shall be valid only for the firm, corporation, or association appearing on the license and for the address listed on the license.

(c) Advertising for each secure residential treatment facility shall conform to the statement of services as given on the application. A claim for specialized services shall not be made unless the secure residential treatment facility is staffed and equipped to offer those services. (Authorized by K.S.A. 1998 Supp. 65-508; implementing K.S.A. 1998 Supp. 65-501, 65-504, 65-508, and 65-510; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-333. Administration. (a) Organization.

(1) Each secure residential treatment facility shall be governed by one of the following entities:

(A) A public agency, who shall employ an administrator for the secure residential treatment facility; or

(B) a private entity with a governing board that is legally responsible for the operation, policies, finances, and general management of the secure residential treatment facility. The private entity shall employ an administrator for the secure residential treatment facility. The administrator shall not be a voting member of the governing board.

(2) If the licensee is a private corporation, it shall be a corporation qualified in the state of Kansas and shall operate in accordance with established by-laws. The licensee shall furnish a copy of the articles of incorporation and by-laws to the department before a license is issued. One of these documents shall include a nondiscrimination statement that complies with state and federal civil rights laws.

(b) Administrative policies.

(1) A copy of these regulations for secure residential treatment facilities for youth shall be kept on the premises at all times and shall be made available to all staff members.

(2) Each licensee shall develop and implement a quality assurance program to ensure consistent compliance with these regulations. The quality assurance program shall provide for review of the facility's policies, procedures and practices, including their consistency with licensure requirements.

(3) Each licensee shall establish written plans and policies of organization and administration clearly defining legal responsibility, administrative authority, and responsibility for comprehensive services, including an organizational chart approved by the licensee.

(4) Personnel and administrative policies shall be distributed to staff members.

(c) Finances.

(1) Funding.

(A) Each secure residential treatment facility shall have sound and sufficient finances to ensure effective services. The licensee shall be responsible for financing plans. The licensee shall provide the financial resources necessary to maintain compliance with the regulations.

(B) If the licensee is a charitable organization, all solicitation of funds conducted in Kansas shall be in compliance with K.S.A. 17-1759 et seq., and amendments thereto.

(C) Youth shall not be used in any fund-raising efforts.

(2) Financial records.

(A) Each secure residential treatment facility shall maintain financial records that are sufficient to verify resources and expenditures. Each secure residential treatment facility shall account for major expenditures on behalf of the youth for whom payment is received.

(B) Each youth's personal money shall be kept separate from the facility funds. Each secure residential treatment facility shall maintain financial records of each youth's personal money.

(C) A yearly audit by an independent accountant shall be conducted, and a copy of the audit shall be available at the secure residential treatment facility for review by the staff of the Kansas department of social and rehabilitation services, the juvenile justice authority, and the department.

(D) Each secure residential treatment facility shall have an annual financial statement verifying assets and liabilities. The licensee shall make the annual financial statement available to the Kansas department of social and rehabilitation services, the juvenile justice authority, and the department.

(3) Insurance.

(A) Each secure residential treatment facility shall maintain the following insurance:

(i) Professional and civil liability insurance for all employees; and

(ii) liability insurance for injury or personal property damage.

(B) Each licensee shall purchase one or more motor vehicle liability insurance policies covering each vehicle owned or operated by the facility. Each policy shall contain the following limits of liability, exclusive of interest and costs:

(i) Not less than \$100,000 for personal injury or death in any one accident;

(ii) not less than \$300,000 for personal injury to, or the death of, two or more persons in any one accident; and

(iii) not less than \$50,000 for harm to, or destruction of, property of others in any one accident.

(d) Personnel policies.

(1) Each secure residential treatment facility shall have written personnel policies, which shall be approved and reviewed annually by the governing body. The personnel policies shall be provided to each staff member upon employment. The personnel policies shall include the following:

(A) Hiring practices;

(B) job descriptions, including qualifications, duties, and responsibilities for each staff position;

(C) policies regarding hours of work;

(D) sick and vacation leave policies;

(E) grievance procedures; and

(F) a description of salaries, benefits, and staff development practices.

(2) A personnel record shall be maintained for each employee and shall be made available to the employee upon written request.

(e) Staffing.

(1) The governing body of each secure residential treatment facility shall designate an administrator whose responsibility is the overall administration of the facility.

(2) A written daily staff schedule shall be developed and followed. The staff schedule shall meet all of the following requirements:

(A) The schedule shall provide for adequate staff on the living unit to directly supervise and interact with the youth at all times, to implement each youth's individual plan for care, and to provide for each youth's physical, social, emotional, and educational needs.

(B) The schedule shall provide for a minimum ratio of one youth care staff member on active

duty to seven youth during waking hours and one youth care staff member on active duty to 10 youth during sleeping hours.

(C) At least one youth care staff member of the same sex as the youth shall be present, awake, and available to the youth at all times. If both male and female youth are present in the secure residential treatment facility, at least one male and one female youth care staff member shall be present, awake, and available.

(3) At no time shall there be fewer than two youth care staff members present on the living unit when one or more youth are in care.

(4) Youth shall not be left in a room unattended except that, during sleeping hours, the minimum ratio of youth care staff shall be immediately available in a connecting area to the sleeping rooms. Supervision of youth in involuntary seclusion shall comply with K.A.R. 28-4-338(c).

(5) Alternate qualified youth care staff members shall be provided for the relief of the regular staff members on a one-to-one basis and in compliance with the staffing pattern required in paragraph (e) (2) of this regulation.

(6) Electronic supervision shall not replace the youth care staffing requirements.

(7) Auxiliary staff members shall be available as needed. The auxiliary staff shall include food service, clerical, and maintenance personnel. Auxiliary staff members shall not be included in meeting the minimum ratio of youth care staff to youth.

(8) Professional consultant services shall be available, to the extent necessary, to meet the needs of the youth served. Professional consultants shall include physicians, dentists, nurses, clergy, social workers, psychologists, psychiatrists, teachers, and dieticians.

(9) A volunteer shall not be used as a substitute for a youth care staff member, but shall augment the services provided by the staff.

(10) A staff person designated to be in charge of the secure residential treatment facility shall be on-site at all times when a youth is in care. Procedures shall be in place to ensure that all staff members know who is in charge.

(f) Community and volunteer involvement.

(1) Each secure residential treatment facility shall establish written policies and procedures that provide for securing community and volunteer involvement in facility programs. The policies and procedures shall specify a screening and selection process for volunteers and shall encourage

recruitment from all cultural and socioeconomic segments of the community.

(2) Written policies and procedures for volunteers shall include the following:

(A) A description of the lines and scope of authority, responsibility, and accountability for volunteers;

(B) orientation and training requirements for each volunteer; and

(C) a requirement that each volunteer who provides professional services must meet the same requirements as would be expected of a paid professional staff member providing the same services.

(3) Each volunteer shall agree, in writing, to abide by all secure residential treatment facility policies, specifically including those relating to security, confidentiality of information, and mandatory reporting laws pertaining to suspected abuse, neglect, and exploitation of youth.

(4) Each volunteer in contact with youth shall have a health assessment, including a screen for tuberculosis. (Authorized by K.S.A. 1998 Supp. 65-508; implementing K.S.A. 1998 Supp. 65-508 and 65-516; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-334. Staff development. (a) Each person having contact with youth shall demonstrate emotional maturity, sound judgment, and a sound knowledge of the developmental needs of youth.

(b) Administrator qualifications.

(1) Each administrator shall demonstrate the following:

(A) Knowledge of the principles, practices, methods, and techniques of administration and management;

(B) ability to train, supervise, plan, direct, and evaluate the work of others, as documented by experience, training, or a combination of both;

(C) ability to establish and maintain effective working relationships with others;

(D) ability to establish and maintain effective working relationships with governmental agencies, schools, other treatment facilities, and community organizations;

(E) knowledge of the methods and techniques used in dealing with youth in a residential setting; and

(F) knowledge of principles and techniques of behavioral and mental health treatment and care of youth and of the growth, development, needs, and unique problems of youth.

(2) Each administrator shall have a master's degree in social work or a related field, or a bachelor's degree in social work, human development and family life, psychology, or education. Each administrator shall have a minimum of three years of supervisory experience within a child care facility providing treatment to youth.

(c) Each secure residential treatment facility shall have a program director who is responsible for oversight and implementation of the secure residential treatment facility's program. Each program director shall have a master's degree in social work, psychology, nursing, or a related field, and shall have a minimum of one year of supervisory experience in a treatment facility serving youth. In secure residential treatment facilities with more than 20 youth, the program director shall not be the administrator.

(d) All youth care staff and alternate youth care staff shall meet the following requirements:

- (1) Be 21 years of age or older;
- (2) have a high school diploma or its equivalent; and
- (3) have completed one or more of one of the following:

(A) Three semester hours of college-level study in adolescent development, psychology, or a related subject;

(B) 45 clock hours of training in child care or child development; or

(C) one year of experience as a child care worker or house parent in a facility serving youth.

(e) Professional staff and consultants shall meet all Kansas qualification and licensing requirements for their profession.

(f) Each food service employee shall meet all of the following requirements:

(1) Comply with the Kansas health standards established in K.A.R. 28-36-22;

(2) possess knowledge of the nutritional needs of children and youth;

(3) understand quantity food preparation and service concepts; and

(4) practice sanitary food handling and storage methods.

(g) Staff professional development. Each secure residential treatment facility shall provide and monitor professional development programs, which shall consist of activities designed to achieve specific learning objectives. Professional development may occur through workshops, seminars, or staff meetings, or through closely supervised, on-the-job training.

(1) Each secure residential treatment facility shall have written policies and procedures governing orientation and in-service training. Each employee shall receive orientation training before being assigned an independent job duty.

(2) Each youth care staff member shall receive a minimum of eight hours of orientation training before assuming any responsibility for supervising youth and an additional 32 clock hours of orientation training before assuming independent responsibility for supervision of youth. Orientation training shall include all of the following topics:

(A) Accident and injury prevention;

(B) child abuse, neglect, and exploitation reporting requirements;

(C) crisis management and intervention;

(D) emergency and safety procedures to follow in the event of an emergency, bomb threat, fire, tornado, riot, or flood;

(E) facility policies and procedures;

(F) first aid, including rescue breathing;

(G) health, sanitation, and safety measures;

(H) job duties and responsibilities;

(I) the rights of the youth;

(J) observation of symptoms of illness and communicable diseases;

(K) policies regarding behavior management, use of restraints, and involuntary seclusion;

(L) problem solving methods;

(M) report writing methods;

(N) security procedures; and

(O) suicide prevention.

(3) Each program director and each person having contact with youth shall complete a minimum of 40 clock hours of in-service training per year. In-service training shall include the following topics:

(A) Accident and injury prevention;

(B) child abuse symptoms and reporting requirements;

(C) child care practices;

(D) child psychosocial growth and development;

(E) first aid, including rescue breathing;

(F) the rights of the youth;

(G) licensing regulations;

(H) observations of symptoms of illness and communicable diseases;

(I) suicide prevention;

(J) use of restraints and seclusion; and

(K) crisis management.

(4) Each program director shall attend a minimum of one training event per year away from

the facility, in addition to the in-service training conducted at the facility.

(5) Each person's in-service training shall be documented in that person's personnel file. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-335. Admission and release policies.

(a) Before admission, each youth shall be evaluated by a person approved by the Kansas behavioral sciences regulatory board, Kansas board of nursing, or Kansas board of healing arts to diagnose and treat mental and behavioral disorders, or by a qualified mental health professional as defined in K.S.A. 59-2946(j) and amendments thereto, to determine all of the following:

(1) Whether or not the youth is a danger to self or others;

(2) whether or not secure treatment is clinically indicated; and

(3) whether or not there are other less restrictive facilities that could meet the youth's needs.

(b) Any youth may be admitted to the secure residential treatment facility if the preadmission evaluation of the youth indicates all of the following:

(1) The youth is a danger to self or others.

(2) The youth requires treatment in a secure setting.

(3) Less restrictive care is not available to meet the youth's needs.

(c) All written admission policies and procedures of the facility shall conform with the goals and purposes of the facility.

(d) Admission procedures and practice shall include provisions for the following:

(1) Collecting identifying information;

(2) completing a health history checklist, which shall be completed on a form approved by the department and which shall include a description of bruises, abrasions, symptoms of illness, and current medications;

(3) assessing the youth's suicide risk potential, assault potential, and escape risk;

(4) conducting an intake interview;

(5) providing an orientation to the secure residential treatment facility in a manner that is understandable to the youth. Completion of the orientation and receipt of all written orientation materials shall be documented by a signed statement from the youth;

(6) completing an inventory that documents the youth's clothing and personal possessions and

their disposition. Each inventory shall include a written list of all money and personal property of the youth, shall be signed by the youth and the admitting staff member, and shall be kept with the youth's record. If the youth refuses to sign the inventory, the refusal shall be documented in the youth's record;

(7) distributing personal hygiene items;

(8) providing for a shower and hair care;

(9) issuing clean, laundered clothing, if necessary; and

(10) assigning the youth to a sleeping room.

(e) No youth shall be admitted who shows evidence of being seriously physically ill, injured, or under the influence of alcohol or drugs until the youth is examined and approved for admission by a physician licensed to practice in Kansas.

(f) A licensee or employee of a secure residential treatment facility shall not accept permanent legal guardianship of a youth.

(g) Release policies.

(1) All releases shall be authorized by the treatment team or the legal custodian.

(2) Temporary releases for court attendance, medical appointments, placement visits, or other necessary purposes shall be permitted when authorized by the parent or legal guardian or the court.

(3) The secure residential treatment facility shall provide release forms to be signed by the person to whom the youth is released and by the staff person releasing the youth.

(4) Procedures and practices for the discharge of youth shall include provisions for the following:

(A) Verification of identity of the youth and the person to whom the youth is released;

(B) completion of any pending action, including any grievance or claim for damages or lost possessions;

(C) transportation arrangements;

(D) instructions for forwarding mail; and

(E) return of money and personal property to the youth. A receipt for all money and personal property shall be signed by the youth.

(h) Length of treatment.

(1) Each youth shall be released or transferred within six months of the youth's admission date.

(2) A secure residential treatment facility may request that a youth remain in the facility longer than six months, if the treatment team determines that continued treatment in a secure residential treatment facility is necessary and the department approves an extension of treatment.

(3) Each written request for an extension shall be submitted to the department before the end of the six-month period. The request shall include the following information:

- (A) The name of the youth;
 - (B) the reason why the extension is needed; and
 - (C) the length of time of the requested extension.
- (4) If it is determined to be in the best interest of the youth and the youth's family, the request shall be approved by the department. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-336. Program and services. (a) Each secure residential treatment facility shall keep documentation of each youth's preadmission evaluation in the youth's file.

(b) An interdisciplinary treatment team shall develop an individualized plan of care for each youth admitted to the secure residential treatment facility. The team shall review the treatment plan every 30 days and shall update the treatment plan as necessary. Each review shall be documented and signed by the clinical director or the clinical director's designee.

(c) The treatment team shall be headed by the clinical director or the clinical director's designee.

(d) Each facility shall maintain a written plan and daily routine for all youth, which shall include the following:

- (1) Meals;
- (2) rest and sleep;
- (3) personal hygiene;
- (4) physical exercise;
- (5) recreation;
- (6) mental health services;
- (7) education; and
- (8) social services.

(e) Classroom instruction shall be provided on-site by teachers holding appropriate certification from the Kansas board of education.

(1) The staff of the secure residential treatment facility shall coordinate education services with the local school district. During the local school year, each youth shall receive a minimum of six hours of instruction per day, excluding weekends and holidays.

(2) For each youth currently enrolled in a Kansas public school, the staff of the secure residential treatment facility shall maintain contact with the youth's home school district to ensure the continuity of each youth's education.

(3) The staff of the facility shall provide a regular schedule of instruction and related educational services appropriate to the needs of each youth.

(4) Youth care staff shall be stationed in proximity to the classroom, with frequent, direct, physical observation of the classroom activity at least every 15 minutes, to provide immediate support to the teacher.

(f) Library services.

(1) Each secure residential treatment facility shall have written policies and procedures that govern the facility's library program, including acquisition of materials, hours of availability, and staffing.

(2) Library services shall be available to all youth.

(A) Reading and other library materials may be provided for use during non-library hours.

(B) Library materials shall be appropriate for various levels of competency.

(C) Reading material shall reflect a variety of interests.

(g) Recreation.

(1) Each secure residential treatment facility shall provide indoor and outdoor recreational areas and equipment where security and visual supervision can be easily maintained. Unless restricted for health reasons, all youth shall be allowed to engage in supervised indoor and outdoor recreation on a daily basis.

(2) Art and craft supplies, books, current magazines, games, and other indoor recreational materials shall be provided for leisure time activities.

(h) Work.

(1) Work assignments shall not be used as a substitute for recreation.

(2) Youth shall be prohibited from performing the following duties:

(A) Personal services for the staff;

(B) cleaning or maintaining areas away from the facility;

(C) replacing employed staff; or

(D) any work experience defined as hazardous by the Kansas department of human resources regulations governing child labor.

(3) After receiving the required youth care staff orientation and training, auxiliary staff may supervise work activities. Youth care staff shall be within visual and auditory distance to provide immediate support, if necessary.

(i) Visitation and communication.

(1) Each secure residential treatment facility shall provide telephone and contact visitation

rights for parents, legal guardians, legal representatives, and other visitors approved by personnel designated by the administrator. Private telephone conversation and visitation shall be allowed, except when a need to protect the youth is clinically indicated, as documented in the youth's individual plan for care.

(2) The facility shall make written policies and procedures regarding telephone use and visitation available to all youth, parents, legal guardians, and legal representatives.

(3) A youth shall not be denied the right to contact an attorney or court counselor. No court counselor or attorney shall be refused visitation with a youth to whom the counselor or attorney is assigned.

(4) Staff of the secure residential treatment facility shall not censor mail or written communication, except to check for contraband, unless there is sufficient reason to believe that the security of the facility is at risk. Suspect mail shall be opened by staff in the presence of the addressee. If mail is to be read, the youth shall be informed in advance and shall be present when the mail is opened. The reason for each occasion of censorship shall be documented and kept in the youth's record.

(5) Writing materials and postage for the purposes of correspondence shall be available to youth. Materials and postage for at least two letters per week shall be provided for each youth.

(6) First-class letters and packages shall be forwarded after the transfer or release of each youth.

(j) Transportation. Each secure residential treatment facility shall establish and implement written policies and procedures for transporting youth.

(1) The transportation policies and procedures shall include all of the following information:

(A) A list of the persons authorized to transport youth for the secure residential treatment facility;

(B) a description of precautions to prevent escape during transfer;

(C) documentation of a current and appropriate license for each secure residential treatment facility driver for the type of vehicle in use;

(D) provisions for maintaining documentation of current insurance in the transporting vehicle if the licensee is a private entity; and

(E) procedures to be followed in case of accident, injury, or other critical incident, including notification procedures.

(2) Each transporting vehicle owned or leased by the secure residential treatment facility shall have a yearly safety check. A record of the year-

ly safety check and all repairs or improvements made shall be kept on file at the secure residential treatment facility. When youth are transported in a privately owned vehicle, the vehicle shall be in good working condition.

(3) Each vehicle used by the secure residential treatment facility to transport youth shall be equipped with an individual seat belt for the driver, each youth passenger, and each additional passenger. The driver, each youth passenger, and each additional passenger shall be required to use the seat belts at all times.

(4) Smoking in the transporting vehicle shall be prohibited while youth are being transported.

(5) Youth shall be delivered to the designated destination by the most direct route.

(6) Youth shall not be shackled or confined with mechanical restraints when being transported by staff. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-337. Records. (a) Personnel records. Each secure residential treatment facility shall maintain individual personnel records for each staff member, which shall include the following information:

(1) The staff member's job application, including all of the following:

(A) Identifying information;

(B) the staff member's qualifications; and

(C) character and employment references;

(2) a description of the staff member's terms of employment and a copy of the staff member's job description;

(3) documentation of the staff member's employment dates and a copy of each of the staff member's annual performance reviews;

(4) the staff member's health certificates, including a record of the results of a health assessment and tuberculin test, documented on forms supplied or approved by the department;

(5) documentation of orientation, in-service training, and continuing education completed by the staff member;

(6) documentation of the report submitted to the department for the purpose of a background check for criminal and child abuse histories, to determine compliance with K.S.A. 65-516, and amendments thereto;

(7) documentation that the staff member has read, understands, and agrees to all of the following:

(A) The statutes and regulations regarding man-

datory reporting of suspected child abuse, neglect, and exploitation;

(B) the regulations for licensing secure residential treatment facilities for youth;

(C) the secure residential treatment facility's policies and procedures, including personnel, administrative, daily, and behavior management policies and procedures; and

(D) policies providing for a drug-free workplace; and

(8) a copy of each grievance and incident report regarding the specific staff member, including documentation regarding the means of resolution of each report.

(b) Volunteer records. Each secure residential treatment facility shall maintain individual volunteer records documenting the facility-related activities of each volunteer. The records shall include the following:

(1) The volunteer's identifying information;

(2) a copy of the volunteer's job description;

(3) documentation of the volunteer's dates of service and a copy of each of the volunteer's performance reviews;

(4) documentation of orientation provided to the volunteer regarding the secure residential treatment facility and specific assignments given to the volunteer;

(5) documentation that the volunteer has read, understands, and agrees to follow the policies and procedures of the secure residential treatment facility, including those related to security, confidentiality of information, and mandatory reporting of suspected child abuse and neglect;

(6) documentation of freedom from active tuberculosis;

(7) documentation of the report submitted to the department for the purpose of a background check for criminal and child abuse histories, to determine compliance with K.S.A. 65-516, and amendments thereto; and

(8) a copy of the health assessment as required in K.A.R. 28-4-333(f)(4).

(c) Youth records.

(1) Each secure residential treatment facility shall establish and implement written policies and procedures governing management of youth records. These policies and procedures shall include provisions for the following:

(A) Establishment, utilization, content, privacy, security, and preservation of records;

(B) a schedule for the retirement and destruction of inactive case records; and

(C) a review of the youth record policies and procedures at least annually and revision as needed.

(2) Each secure residential treatment facility shall keep a register of all youth in care. The register shall include the following information for each youth:

(A) Name;

(B) date of birth;

(C) the name and address of each parent or legal guardian;

(D) the name and address of the legal custodian, if not the parent or legal guardian;

(E) the name and address of the closest living relative, if other than a parent or guardian;

(F) the reason for admission; and

(G) the dates of admission and release.

(3) Each facility shall keep individual records for each youth, which shall include the following:

(A) The youth's identifying information;

(B) a description of the youth's legal status;

(C) the name of the youth's legal custodian;

(D) medical and dental permission forms, signed by a parent or legal guardian. The permission form used shall be one that is acceptable to the vendor who will provide the service; and

(E) a written inventory of all money and personal property of the youth signed by the youth and the admitting staff member as required by K.A.R. 28-4-335(d).

(4) Each facility shall keep a daily log of each youth's behavior in the youth's individual record file, with notations regarding any special problems and the response of the staff to any problems. Each entry shall be initialed by the staff member making the entry.

(5) A list of all youth receiving treatment shall be submitted on forms provided by the department upon request.

(6) Information from a youth's record shall not be released without written permission from the youth's parent or legal guardian. Improper disclosure of records or information regarding a youth shall be grounds for revocation or suspension of the secure residential treatment facility's license or denial of a facility's application for licensure.

(7) The written policies, procedures, and practices regarding youth records shall provide for the transfer of a youth's record upon release of a youth to a residential care facility. Each secure residential treatment facility shall ensure that each youth's record precedes or accompanies the youth. The case file information shall include the following:

(A) Identifying information;

- (B) medical records;
 - (C) immunization records;
 - (D) insurance information;
 - (E) the youth's medical card, when applicable;
 - (F) school placement information, including present courses of study; and
 - (G) the name and address of each parent or legal guardian.
- (8) Additional case file information to be transferred shall accompany the youth or be transferred within 72 hours. (Authorized by K.S.A. 1998 Supp. 65-508; implementing K.S.A. 1998 Supp. 65-508 and 65-516; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-338. Behavior management. (a) Policies.

(1) Each secure residential treatment facility shall establish and implement written policy providing for a behavior management system that assists youth to develop inner control and manage their own behavior in a socially acceptable manner. The policy shall provide the following:

(A) Expectations that are age appropriate and that allow for special abilities and limitations; and

(B) positive and negative consequences related to each expectation.

(2) Each facility shall establish written rules of youth conduct that define expected behaviors and related consequences.

(A) A rule book containing expected behaviors, ranges of consequences, and disciplinary procedures shall be given to each youth and youth care staff member.

(B) An acknowledgment of receipt of the rule book shall be signed by each youth and kept in each youth's record.

(C) If a literacy or language problem prevents a youth from understanding the rule book, a staff member or translator shall assist the youth in understanding the rules.

(3) Each staff member who has direct contact with youth shall be thoroughly familiar with the rules of youth conduct, the rationale for the rules, and the intervention options available.

(b) Discipline.

(1) Discipline that is humiliating, frightening, or physically harmful to the youth shall not be used at any time. Each youth shall be protected against all forms of neglect, exploitation, or degrading forms of discipline. No youth shall be isolated or confined in any dark space. Electronic monitoring or an audio communication system shall not re-

place the required presence of a youth care staff member.

(2) Corporal punishment shall not be used.

(3) Under no circumstances shall any youth be deprived of meals, clothing, sleep, medical services, exercise, correspondence, parental contact, or legal assistance for disciplinary purposes. If a youth is in involuntary seclusion during normal school hours, school work shall be provided to the youth.

(4) Under no circumstances shall any youth be allowed to supervise or to administer discipline to another youth.

(c) Involuntary seclusion.

(1) Involuntary seclusion shall be permitted within a secure residential treatment facility only when a youth is out of control, continually refuses to obey reasonable and lawful requests, or behaves in a way that presents a threat to self or others.

(2) Each secure residential treatment facility shall establish and implement written policies and procedures that govern the use of involuntary seclusion. The policies and procedures shall include provisions that meet the following conditions and requirements:

(A) Permit the use of involuntary seclusion if all other less restrictive methods to prevent immediate, substantial bodily injury to the youth or others have been attempted and have failed to prevent immediate and substantial bodily injury to the youth or others and if all alternative measures to prevent injury are not sufficient to accomplish this purpose;

(B) require a written order by the program director of the secure residential treatment facility, physician, psychologist, or other approved staff member each time a youth is placed in or released from involuntary seclusion;

(C) ensure that no more than one youth is placed in an involuntary seclusion room at any one time;

(D) provide for a search of each youth and removal of any items that may be used to injure oneself or others before admission to the involuntary seclusion room;

(E) ensure that each youth is provided appropriate clothing at all times;

(F) ensure that each youth in involuntary seclusion is provided with a mattress on a clean, level surface above floor level;

(G) ensure that each youth receives all meals and snacks normally served and is allowed time to exercise and perform necessary bodily functions;

(H) ensure that each youth has prompt access to drinking water and washroom facilities;

(I) ensure that the designated staff member on duty makes appropriate entries in the youth's records regarding the use of involuntary seclusion;

(J) ensure that at least one youth care staff member is in the proximity of each youth in involuntary seclusion at all times, with direct, physical observation at least every 15 minutes. At the time of each observation, all of the following activities shall occur:

(i) Interactive intervention shall be attempted, unless the youth is sleeping;

(ii) the result of the intervention shall be recorded; and

(iii) the condition of the youth shall be recorded;

(K) ensure constant supervision if a youth is considered suicidal; and

(L) provide for an assessment of the need for continued involuntary seclusion at each shift change and for documentation of the reasons that involuntary seclusion is continued.

(3) Electronic or auditory devices shall not be used to replace staff supervision of youth in involuntary seclusion.

(4) A youth shall not remain in involuntary seclusion for more than 24 hours without written approval of the program director or the program director's designee. No staff person who was involved in the incident leading to involuntary seclusion shall be permitted to approve an extension of the involuntary seclusion.

(5) The program director or designee who approved the extended involuntary seclusion shall visit with each isolated youth at least once within each eight-hour period after the first 24 hours.

(6) Written approval of the program director or program director's designee shall be required for each eight-hour period that involuntary seclusion is extended, beyond the first 24 hours.

(7) Involuntary seclusion shall not exceed 48 hours for any reason unless the youth continues to behave in a way that presents a threat to oneself or others.

(8) If a youth requires more than 48 consecutive hours of involuntary seclusion or more than 72 cumulative hours of involuntary seclusion within any seven-day period, or is placed on suicide watch, an emergency staff meeting shall be held to discuss the appropriateness of the youth's individual plan of care.

(A) Participants in the emergency staff meeting shall include the following:

(i) The youth, if behavior permits;

(ii) the program director or the program director's designee;

(iii) a physician, clinical psychologist, or clinical social worker who has assessed the youth; and

(iv) any other appropriate staff member.

(B) The youth's parents or legal guardian shall be notified of the emergency staff meeting and invited to participate. Documentation of notifications shall be kept in the youth's record.

(C) The results of the emergency staff meeting shall be recorded and maintained on file.

(9) All youth care staff and program personnel shall be informed at all times of the current status of each youth in involuntary seclusion.

(d) Restraint.

(1) Each facility shall establish and implement written policies and procedures that govern the use of restraint.

(2) These policies and procedures shall include the following:

(A) Limitations on the use of physical restraint to instances of justifiable self-defense, protection of the youth or others, or the protection of property;

(B) permission to use physical restraint only if all other less restrictive methods of controlling the youth's dangerous behavior were attempted and failed;

(C) a statement that chemical agents are not to be used by secure residential treatment facility personnel;

(D) a statement that psychotropic medications are not to be used for disciplinary reasons; and

(E) a statement that psychotropic medications are to be administered only when medically necessary upon order of the youth's physician.

(3) The restraints selected shall be the least restrictive measure necessary to prevent injury to the youth or others.

(4) Restraint or involuntary seclusion shall never be used for punishment or for the convenience of staff. Restraint or involuntary seclusion shall not be used for more than three consecutive hours without medical reevaluation of its necessity, except between the hours of 12:00 midnight and 8:00 a.m., unless necessary for the safety and well-being of the youth.

(5) Each secure residential treatment facility that uses restraint shall develop and insure implementation of a comprehensive policy on the use of each restraint. The policy shall identify the following:

(A) The forms of restraint in use at the secure residential treatment facility, clearly demonstrat-

ing that each specified form of restraint is required to appropriately serve youth;

(B) specific criteria for the use of each form of restraint;

(C) the staff members authorized to approve the use of each form of restraint;

(D) the staff members authorized and qualified to administer or apply each form of restraint;

(E) the approved procedures for application or administration of each form of restraint;

(F) the procedures for monitoring any youth placed in each form of restraint;

(G) any limitations on the use of each form of restraint, including time limitations;

(H) the procedures for immediate, continual review of restraint placements for each form of restraint, except passive physical restraint; and

(I) procedures for comprehensive record keeping concerning all incidents involving the use of restraint, including incidents of passive physical restraint if it is used in conjunction with or leads to the use of any other form of restraint. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-339. Rights of youth. (a) The rights of youth while in the licensee's care or control shall not be diminished or denied for disciplinary reasons.

(b) Each secure residential treatment facility shall establish and implement written policies and procedures concerning the rights of the youth. These policies and procedures shall provide that youth are assured of their rights, except if it is necessary to maintain order and security in the secure residential treatment facility or if it is contrary to a youth's approved treatment plan. These policies and procedures shall ensure the following:

(1) Freedom from personal abuse, corporal or unusual punishment, excessive use of force, humiliation, harassment, mental abuse, or punitive interference with the daily functions of living, including eating or sleeping;

(2) freedom from discrimination based on race, color, ancestry, religion, national origin, sex, or disability;

(3) equal access to programs and services for both male and female youth in coed facilities;

(4) receipt and explanation of written rules and grievance procedures of the facility, in a language that the youth can understand;

(5) opportunity for physical exercise on a daily basis, including outdoor exercise if weather permits;

(6) participation in religious worship and religious counseling on a voluntary basis, subject only to the limitations necessary to maintain order and security;

(7) reasonable religious diets;

(8) the right to wear personal clothing consistent with secure residential treatment facility guidelines. If the facility provides clothing, it shall be of proper size and shall be approved by the department;

(9) access to the courts and confidential contact with attorneys, judges, parents, social workers, and other professionals, including telephone conversations, visits, and correspondence;

(10) medical treatment and emergency dental care, a medically proper diet, and the right to know what and why medications are being prescribed;

(11) the right to send and receive uncensored mail in accordance with K.A.R. 28-4-336(i)(4);

(12) the right to receive visitors and communication in accordance with the facility's visitation policies;

(13) the right to determine the length and style of hair, except when a physician determines that a haircut is medically necessary; and

(14) the right to keep facial hair, if desired, except when a licensed physician determines that removal is medically necessary for health and safety. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-340. Emergency, safety, security, and control. (a) Each secure residential treatment facility shall develop a disaster plan to provide for the safety of youth in emergencies. The licensee shall review the plan at least annually and update as needed. The plan and any subsequent updates shall be approved by the state fire marshal or the fire marshal's designee.

(1) The disaster plan shall contain provisions for the care of youth in disasters, including fires, tornadoes, storms, floods, and civil disorders, as well as occurrences of serious illness or injury to staff members and youth.

(2) All of the staff in the secure residential treatment facility shall be informed of the disaster plans, and the plans shall be posted in a prominent location.

(3) Each secure residential treatment facility shall have first aid supplies, including the following:

(A) Assorted adhesive strip bandages;

- (B) adhesive tape;
- (C) a roll of gauze;
- (D) scissors;
- (E) a package of gauze squares;
- (F) pump soap;
- (G) an elastic bandage;
- (H) tweezers; and
- (I) rubbing alcohol.

(4) Each secure residential treatment facility that uses involuntary seclusion shall have a policy and procedure to evacuate each youth in seclusion in the event of a fire or other emergency.

(b) The secure residential treatment facility shall conduct a minimum of one fire drill and one tornado drill per shift per quarter.

(c) Security and control. Each secure residential treatment facility shall use a combination of supervision, inspection, accountability, and clearly defined policies and procedures on the use of security to promote safe and orderly operations.

(1) All written policies and procedures for security and control shall be available to all staff members. The licensee shall review the policies and procedures at least annually and update as needed, and shall include all of the following requirements:

(A) The licensee shall ensure that a daily report on youth population movement is completed and kept on file.

(B) Written operational shift assignments shall state the duties and responsibilities for each assigned position in the secure residential treatment facility.

(C) Supervisory staff shall maintain a permanent log and prepare shift reports that record routine and emergency situations.

(D) The licensee shall ensure that security devices are regularly inspected and maintained, with any corrective action completed as necessary and recorded.

(E) No weapons shall be permitted in the facility.

(F) The licensee shall ensure that guidelines for the control and use of keys, tools, and medical and culinary equipment are implemented.

(G) No youth or group of youth shall exercise control or authority over another youth, have access to the records of another youth, or have access to or use of keys that control security.

(H) The licensee shall ensure that procedures are developed and implemented for handling escapes, runaways, and unauthorized absences.

(I) The licensee shall ensure that safety and se-

curity precautions are developed and implemented pertaining to facility and staff vehicles.

(2) The licensee shall ensure that policies and procedures are developed for the prosecution of any illegal act committed while the youth is in care.

(3) The licensee shall ensure that policies and procedures are developed and implemented to prohibit the use of chemical agents, including mace, pepper mace, or tear gas, by facility staff.

(4) Poisons and all flammable materials shall be kept in locked storage.

(5) The licensee shall ensure that policies and procedures are developed that govern documentation of all special incidents, including the taking of hostages and the use of restraint. The policies and procedures shall require submission of a written report of all special incidents to the program director or the program director's designee. Each report shall be submitted no later than the conclusion of that shift. A copy of the report shall be kept in the youth's record. A copy of the report of any incident that involves the taking of hostages, the death or injury of a youth, or criminal charges against a youth or staff member shall be submitted to the department and the placing agent.

(6) The licensee shall ensure that each incident of disaster is reported to the department within 24 hours, excluding weekends and holidays. Each incident of fire shall also be reported to the state fire marshal within 24 hours, excluding weekends and holidays.

(7) A written plan shall provide for continuing operations in the event of a work stoppage. Copies of this plan shall be available to all staff. The licensee shall ensure that each incident of work stoppage is reported to the department within 24 hours, excluding weekends and holidays. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-341. Health care policies. (a) Health services for youth.

(1) Each secure residential treatment facility, in consultation with a physician, shall develop written health care policies that cover the following:

(A) A health history checklist and review for each youth upon admission, as documented on forms approved by the department;

(B) follow-up health care, including a health examination and referrals, for concerns identified in the health history checklist and review;

(C) dental screening upon admission and follow-up emergency dental care as needed;

(D) preventive dental care for youth;

(E) chronic care, convalescent care, and preventive care, if medically indicated;

(F) care for minor illness, including the use and administration of prescription and nonprescription drugs;

(G) care for youth under the influence of alcohol or other drugs;

(H) consultation regarding individual youth, if indicated;

(I) infection control measures and universal precautions to prevent the spread of blood-borne infectious diseases;

(J) maternity care as defined in K.A.R. 28-4-279; and

(K) medically indicated seclusion.

(2) Each facility shall designate as a medical consultant a physician licensed to practice in Kansas.

(3) Each facility shall obtain written consent from each youth's parent or legal guardian for medical and dental care.

(4) The medicine cabinet shall be located in an accessible, supervised area. The cabinet shall be kept locked. Medications taken internally shall be kept separate from other medications. All unused medication shall be safely discarded.

(5) All medications shall be administered by a designated staff member qualified to administer medications. Prescription medication shall be given from a pharmacy container labeled with the following:

(A) The youth's name;

(B) the name of the medication;

(C) the dosage and the dosage intervals;

(D) the name of the prescribing physician; and

(E) the date the prescription was filled.

Any changes of prescription or directions for administering a prescription medication shall be authorized, in writing, by a physician with documentation placed in the youth's record.

(6) All medication, including nonprescription medication, shall be given only in accordance with label directions, unless ordered differently by a physician. A record shall be kept in the youth's record documenting the following:

(A) The name of the person who gave the medication;

(B) the name of the medication;

(C) the dosage; and

(D) the date and time it was given.

(7) Each licensee shall make the following arrangements for emergency care:

(A) The secure residential treatment facility shall have a written record of the name, address, and telephone number of a physician licensed in Kansas to be called in case of emergency.

(B) Policies and procedures shall ensure the continuous care of youth who require emergency medical treatment.

(C) If a staff member accompanies a youth to the source of emergency care, the staff member shall remain with the youth for the duration of the emergency.

(D) Supervision of the other youth in the secure residential treatment facility shall not be compromised.

(E) The health history checklist and health assessment shall be taken to the emergency room with the youth.

(8) The licensee shall report each instance of suspected abuse or neglect and each incident resulting in the death of or in a serious injury to any staff member or youth that requires treatment at a hospital. The report shall be made within 24 hours, excluding weekends and holidays, to the department and the county health department in which the secure residential treatment facility is located. The licensee shall submit each written incident report to the department within five working days. If an injured youth is taken to a hospital or seen by a physician, the licensee shall ensure that the parent or legal guardian or custodian is notified as soon as possible. If suspected abuse or neglect of a youth occurs, the licensee shall ensure that the Kansas department of social and rehabilitation services is notified.

(9) The licensee shall ensure that any injury to a youth or staff member that is a result of suspected criminal action is reported immediately to the local law enforcement officials.

(10) The licensee shall ensure that any death of staff or a youth within the secure residential treatment facility is reported to the local law enforcement officials.

(b) Physical health of youth.

(1) The licensee shall ensure that a health history checklist is completed for each youth at the time of admission. This checklist shall be completed by the person who admits the youth, using forms supplied or approved by the department.

(A) The health checklist shall serve as a guide to determine if a youth is in need of immediate medical care.

(B) The licensee shall ensure that the secure residential treatment facility's physician is contacted for any youth who is taking a prescribed medication at the time of admission so that treatment is not interrupted.

(C) The licensee shall ensure that a physician is contacted for any youth who has acute symptoms of illness or who has a chronic illness. Communicable diseases shall be reported to the local county health department within 24 hours, excluding weekends and holidays.

(2) Within 72 hours of admission, a physician or a nurse certified by the department to conduct screening and health assessments shall review the health history checklist. Based upon health indicators derived from the checklist or in the absence of documentation of a screening within the past 24 months, the physician or certified nurse shall determine whether or not a full screening and health assessment are necessary.

(A) If necessary, the screening and health assessment shall be conducted by a licensed physician or by a nurse certified by the department to conduct these examinations.

(i) The screening and health assessment shall be completed within 10 days of admission.

(ii) The screening shall be based upon health assessment and screening guidelines provided or approved by the department.

(B) Medical and dental records shall be kept on forms provided or approved by the department and shall be kept current.

(C) The licensee shall ensure that each youth receives a tuberculin skin test. A chest x-ray shall be taken of all positive tuberculin reactors and those with a history of positive reaction. The proper treatment or prophylaxis shall be instituted. The results of this follow-up shall be recorded in the youth's record, and the county health department shall be informed of the results.

(D) Each licensee shall maintain a current health record that includes the following for each youth:

- (i) The youth's current immunization record;
- (ii) a health history checklist;
- (iii) documentation of the review of the health history checklist;
- (iv) documentation of the decision regarding the need for screening and health assessment;
- (v) the tuberculin skin test result;
- (vi) a list of medical contacts; and
- (vii) entries regarding the youth's health care plan.

(E) The health record shall accompany the youth when transferred. A copy of the health record shall be kept in the youth's record at the secure residential treatment facility.

(3) The licensee's written policies and procedures shall prohibit the use of tobacco in any form by youth while in care.

(c) Dental health of youth.

(1) Each licensee shall make emergency dental care available for all youth. Each youth's record shall include a report of a dental examination obtained within one year before or 60 days after admission.

(2) The secure residential treatment facility staff shall develop plans for dental health education and shall supervise the youth in the practice of good dental hygiene.

(d) Personal health of staff members and volunteers.

(1) Each person caring for youth shall meet the following requirements:

(A) Be free from communicable disease;

(B) be free from physical, mental, or emotional handicaps to the extent necessary to fulfill the responsibilities listed in the job description, and protect the health, safety, and welfare of the youth; and

(C) be free from impaired ability due to the use of alcohol or other drugs.

(2) Each staff member who may have contact with any youth shall receive a health examination within one year before employment. This examination shall be conducted by a licensed physician or a nurse authorized to conduct these examinations.

(3) Results of the health examination shall be recorded on forms supplied or approved by the department and kept on file. Health assessment records may be transferred from a previous place of employment, if the transfer occurs within one year of the examination date.

(4) The initial health examination shall include a tuberculin skin test. If there is a positive reaction to the tuberculin skin test or a history of previous positive reaction, a chest x-ray shall be required. Proof of proper treatment or prophylaxis shall be required. Documentation of the test, x-ray, and treatment results shall be kept on file in the person's health record.

(5) A tuberculin skin test or a chest x-ray shall be required if significant exposure to an active case of tuberculosis occurs or if symptoms compatible with tuberculosis develop. If there is a positive reaction to the diagnostic procedure, proof of

proper treatment or prophylaxis shall be required. The results of this follow-up shall be recorded in the person's health record. The licensee shall inform the department of each case described in this paragraph.

(6) Each licensee shall require all volunteers to present written proof of freedom from active tuberculosis before serving in the facility.

(7) Smoking shall not be permitted in the facility.

(e) Personal hygiene.

(1) The licensee shall ensure that each youth bathes upon admission and that each youth is given the opportunity to bathe daily.

(2) The licensee shall give all youth the opportunity to brush their teeth after each meal.

(3) The licensee shall furnish each youth with toothpaste and a toothbrush. Pump soap shall be available at all community sinks and showers.

(4) Each licensee shall make facilities for shaves and haircuts available.

(5) Each youth's washable clothing shall be changed and laundered at least twice a week. The licensee shall ensure that clean underwear and socks are available to each youth on a daily basis.

(6) Each female youth shall be provided personal hygiene supplies with regard to her menstrual cycle.

(7) The licensee shall ensure that clean, individual bath and face towels are issued to each youth at least twice a week. Bed linen shall be changed at least once a week.

(8) The licensee shall allow each youth to have at least eight hours of sleep each day. Fourteen hours of activity shall be provided. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-342. Mental health policies. (a) The treatment and activities provided by the secure residential treatment facility for youth shall supplement and support the family-child relationship.

(b) The views of the parents, the youth, and the placing agent concerning factors important to them in the emotional development of the youth shall be considered by the staff in the services provided.

(c) The licensee shall assess the need for mental health services for each youth. The youth's plan of care shall include the need for mental health services and shall be developed to address the need for mental health services through a goal-directed process.

(d) Mental health concepts, as an integral aspect of total child development, shall be included in staff training and in parent-youth conferences. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

28-4-343. Environmental standards. (a) General building requirements.

(1) Each secure residential treatment facility shall use public water and sewage systems, or shall have private water and sewage systems approved pursuant to K.S.A. 65-163 and K.S.A. 65-165, and amendments thereto.

(2) A licensed architect shall be responsible for the plans for any newly constructed building or for any major addition or alteration to an existing building.

(A) In the case of a new building, preliminary plans and outline specifications, including plot plans, shall be submitted to the department for review before commencing the final working drawings and specifications. The licensee shall submit the final working drawings, construction specifications, and plot plans to the department for review and written approval before the letting of contracts.

(B) In the case of an addition or alteration to an existing building, the licensee shall submit a written statement defining the proposed use of the construction and detailing the plans and specifications to the department for review and written approval before commencing construction.

(3) If construction is not commenced within one year of submitting a proposal for a new building or an addition or alteration to an existing building, the licensee shall resubmit the plans and proposal to the department before proposed construction begins.

(b) Location and grounds requirements.

(1) Community resources, including health services, police protection, and fire protection from an organized fire department, shall be available.

(2) There shall be at least 100 square feet of outside activity space available per youth allowed to utilize each area at any one time.

(3) The outside activity area shall be free of physical hazards.

(4) Sufficient space for visitor and staff parking at each secure residential treatment facility shall be provided.

(c) The water supply to each secure residential treatment facility shall be from a source approved

and certified by the department. Any privately owned water supply shall be approved by the county health officer or the department.

(d) Structural requirements.

(1) Facility construction shall provide for the removal of architectural barriers to disabled persons. All parts of each secure residential treatment facility shall be accessible to and usable by disabled persons.

(2) Each secure residential treatment facility's structural design shall facilitate personal contact and interaction between staff members and youth.

(3) Floors shall be smooth and free from cracks, easily cleanable, and not slippery. Floor covering for living quarters shall be required. All floor covering shall be kept clean and be maintained in good repair.

(4) Walls shall be smooth, easily cleanable, and sound. Lead-free paint shall be used on all painted surfaces.

(5) No youth's room shall be in a basement. The minimum square footage of floor space shall be 80 square feet in single rooms, and an average of no fewer than 60 square feet of floor space per person in rooms accommodating more than one person. At least one dimension of the usable floor space unencumbered by furnishings or fixtures shall be no fewer than seven feet. The minimum ceiling height shall be seven feet, eight inches over 90% of the room area. An even temperature of between 68°Fahrenheit and 78°Fahrenheit shall be maintained, with an air exchange of at least four times per hour.

(6) Bedrooms occupied by youth shall have a window source of natural light. Access to a drinking water source and toilet facilities shall be available 24 hours a day.

(7) Separate beds with level, flat mattresses in good condition shall be provided for each youth. Beds shall be above the floor level.

(8) Adequate, clean bedding shall be provided for each youth.

(9) All quarters utilized by youth shall have minimum lighting of 20 foot-candles in all parts of the room. There shall be minimum lighting of 35 foot-candles in areas used for reading, study, or other close work.

(10) There shall be adequate space for study and recreation.

(11) Each living unit shall contain the following:

(A) Furnishings that provide sufficient seating for the maximum number of youth expected to use the area at any one time;

(B) writing surfaces that provide sufficient space for the maximum number of youth expected to use the area at any one time;

(C) furnishings that are consistent with the security needs of the assigned youth; and

(D) adequate central storage for household supplies, bedding, linen, and recreational equipment.

(12) If the secure residential treatment facility is on the same premises as another child care facility, the living unit of the secure residential treatment facility shall be maintained in a separate, self-contained unit. Youth of the secure residential treatment facility shall not use space shared with other child care facilities at the same time.

(13) If a secure residential treatment facility has day rooms, the day rooms shall provide space for varied youth activities. Day rooms shall be situated immediately adjacent to the youth sleeping rooms, but separated from them by a floor-to-ceiling wall. Each day room shall provide at least 35 square feet per person, exclusive of lavatories, showers, and toilets, for the maximum number of youth expected to use the day room area at any one time.

(14) There shall be a working telephone readily accessible to staff members in all areas of the building. Emergency numbers, including fire, police, hospital, physician, poison control facility, and ambulance, shall be posted by each phone.

(15) The inside program and activity areas, excluding the sleeping rooms, day room, and classrooms, shall provide floor space equivalent to a minimum of 100 square feet per youth.

(16) Sufficient space shall be provided for contact visiting. There shall be adequately designed space to permit the screening and search of both youth and visitors. Storage space shall be provided for the secure storage of visitors' coats, handbags, and other personal items not allowed into the visiting area.

(17) Each room used for involuntary seclusion shall meet the following requirements for an individual bedroom:

(A) The walls of each room used for involuntary seclusion shall be completely free of objects.

(B) The door of each room used for involuntary seclusion shall be equipped with a window mounted in a manner that allows inspection of the entire room. The glass in this window shall be impact-resistant and shatterproof.

(C) The locking system for a room used for involuntary seclusion shall be approved by the state fire marshal or the fire marshal's designee.

(18) A service sink and storage area for cleaning supplies shall be provided in a well-ventilated room separate from kitchen and living areas.

(e) Food services.

(1) Food storage, preparation, and service shall comply with the departmental regulations governing food and lodging services.

(2) All foods not requiring refrigeration shall be stored at least six inches above the floor in clean, dry, well-ventilated storerooms or other approved areas with no overhead drain or sewer lines.

(3) Dry bulk food that is not in an original, unopened container shall be stored in metal, glass, or food-grade plastic containers with tightly fitting covers and shall be labeled.

(4) Poisonous or toxic materials shall not be stored with or over food. If medication requiring refrigeration is stored with refrigerated food, the medication shall be stored in a locked medicine box under all food items in the refrigerator.

(5) All perishables and potentially hazardous foods shall be continuously maintained at 45°Fahrenheit or lower in the refrigerator, or 10°Fahrenheit or lower in the freezer.

(A) Each cold storage facility shall be provided with a clearly visible, accurate thermometer.

(B) All foods stored in the refrigerator shall be covered.

(C) Food not stored in the original container shall be labeled with the contents and date.

(D) Raw meat shall be stored under all other food items in the refrigerator before cooking.

(E) Adequate facilities to maintain food temperatures required in this regulation shall be available.

(6) All dense, hot foods shall be stored in containers four or fewer inches deep.

(7) Food preparation and service.

(A) Each food preparation area shall be adequately equipped for the sanitary preparation and storage of food and washing of dishes and utensils. Food shall be prepared and served in a sanitary manner.

(B) Cooking equipment shall be kept clean and in good condition.

(C) Dishes shall have hard-glazed surfaces and shall be free of cracks and chips.

(D) Dishes, kitchen utensils, and serving equipment shall be maintained in a sanitary condition using one of the following methods:

(i) A three-compartment sink supplied with hot and cold running water to each compartment and a drain board for washing, rinsing, sanitizing, and

air drying, with an appropriate chemical test kit for testing the sanitizing solution;

(ii) a domestic-type dishwasher for groups of 24 or fewer persons;

(iii) a commercial-type dishwasher providing a 12-second rinse with 180°Fahrenheit water, for groups of 25 persons or more;

(iv) other methods of sanitizing by manual or mechanical cleaning in accordance with K.A.R. 28-36-24(a) (3) and (4); or

(v) the use of disposable plates, cups, and plastic utensils of food-grade medium weight. Disposable table service shall be used only one time and then destroyed.

(E) Tables shall be in good condition and shall be washed before and after each meal. Floors shall be swept after meals.

(F) Meat shall be thawed using one of the following methods:

(i) Removing the meat from the freezer in advance and putting it in the refrigerator to thaw;

(ii) placing the meat under running, tepid water 72°Fahrenheit until thawed; or

(iii) thawing in the microwave as part of the cooking process.

(8) Sanitary conditions.

(A) Only authorized persons shall be in the kitchen.

(B) Each kitchen shall be equipped with separate hand-washing facilities. Personnel shall wash their hands before handling food and after working with raw meat.

(C) Hair shall be restrained.

(D) No staff member with any open wounds or infections shall be involved in food preparation or service.

(E) Clean and soiled linen shall be properly stored in the kitchen area.

(F) All trash cans in the restroom used by the kitchen staff shall be covered.

(9) Food safety.

(A) All dairy products shall be pasteurized. Dry milk shall be used for cooking only.

(B) Home-canned foods, other than jams and jellies, and home-frozen foods shall not be served.

(C) Commercially canned food from dented, rusted, bulging, or leaking cans, and food from cans without labels shall not be used.

(10) Nutrition.

(A) Meals and snacks shall meet the nutritional needs of the youth in accordance with recommended dietary allowances. A sufficient quantity of food shall be prepared for each meal to allow

each youth second portions of vegetables, fruit, bread, and milk.

(B) Special diets shall be provided for youth, if medically indicated, or to accommodate religious practice, as indicated by a religious consultant.

(C) Menus shall be planned one week in advance. Copies of the menus for the preceding month shall be kept on file and available for inspection.

(11) If meals are catered, the following requirements shall be met:

(A) The meals shall be obtained from sources licensed by the department.

(B) Food shall be transported in covered and temperature-controlled containers. Hot foods shall be maintained at not less than 140° Fahrenheit, and cold foods shall be maintained at 45° Fahrenheit or less.

(f) Toilets and lavatories.

(1) For each eight or fewer youth of each sex, there shall be at least one toilet, one lavatory, and either a bathtub or a shower. All toilets shall be above floor level.

(2) Each bathroom shall be ventilated. Each inside bathroom shall have a mechanical ventilating system to the outside, with a minimum of 10 air changes per hour.

(3) Toilet and bathing facilities and drinking water shall be convenient to sleeping quarters and living and recreation rooms.

(4) Cold and hot water, not exceeding 120° Fahrenheit, shall be supplied to lavatories, bathtubs, and showers.

(5) Toilet facilities and drinking water shall be convenient to the reception and admission areas.

(6) Locked sleeping rooms shall be equipped with a drinking fountain, lavatory, and toilet, unless a communication system or procedure is in effect to give the resident immediate access to a lavatory, toilet, and drinking water.

(g) Laundry.

(1) If laundry is done at the secure residential treatment facility, laundry fixtures shall be located in an area separate from food preparation areas and shall be installed and used in a manner that safeguards the health and safety of the youth.

(2) Soiled linen shall be stored separately from clean linen.

(3) Blankets shall be laundered or sanitized before reissue.

(4) Blankets, when used with sheets, shall be laundered at least once each month.

(5) Mattresses shall be water-repellent and washed down and sprayed with disinfectant be-

fore reissue. Mattress materials and treatments shall meet state fire marshal regulations.

(6) Adequate space shall be allocated for the storage of clean and dirty linen and clothing. If an in-house laundry service is provided, adequate space shall be allocated for the laundry room and the storage of laundry supplies, including locked storage for chemical agents used in the laundry area.

(h) Building maintenance standards.

(1) Each building shall be clean at all times and free from accumulated dirt, vermin, and rodent infestation.

(2) Floors and walking surfaces shall be kept free of hazardous substances at all times.

(3) A schedule for cleaning each building shall be established and maintained.

(4) Floors shall be swept and mopped daily.

(5) Washing aids, including brushes, dish mops, and other hand aids used in dishwashing activities, shall be clean and used for no other purpose.

(6) Mops and other cleaning tools shall be cleaned and dried after each use and stored in a well-ventilated place on adequate racks.

(7) Insecticides, rodent killers, and other poisons shall be used under careful supervision. These and other poisons shall be stored in a locked area.

(8) Toilets, lavatories, sinks, and other such facilities in the living quarters shall be cleaned thoroughly each day. (Authorized by and implementing K.S.A. 1998 Supp. 65-508; effective, T-28-7-8-99, July 8, 1999; effective Nov. 5, 1999.)

DETENTION CENTERS AND SECURE CARE CENTERS FOR CHILDREN AND YOUTH

28-4-350. Definitions. The following words and terms shall have the following meanings, unless the context clearly indicates otherwise.

(a) "Center" means a detention center or a secure care center. It may be owned and operated by public or private entities and includes the staff and services as well as the buildings and grounds.

(b) "Corporal punishment" means any method of physical discipline which inflicts pain.

(c) "Detention" means the temporary care of alleged or adjudicated children in need of care or alleged or adjudicated juvenile offenders who require secure custody pursuant to the Kansas code for the care of children, K.S.A. 38-1501 et seq. and amendments thereto, or the Kansas juvenile offender code, K.S.A. 38-1601 et seq. and amendments thereto.

(d) "Detention center" means a juvenile detention facility as defined in K.S.A. 38-1502(i) and K.S.A. 38-1602(f) and which requires a license pursuant to K.S.A. 65-501 et seq. Detention centers shall meet the requirements for licensure included in K.A.R. 28-4-351 through 360, unless specifically exempted.

(e) "Director" means the person responsible for the overall planning, organization, operation and fiscal management of the center. This person is directly responsible to the governing body.

(f) "Direct supervision" means physical presence of youth care staff in close proximity to allow for interaction and direct eye contact with juveniles.

(g) "Discipline" means the on-going process of helping children develop inner control so that they can manage their own behavior in a socially-approved manner.

(h) "Facility manager" means the person responsible for overseeing the daily operation of the center, including staff scheduling, food service, purchasing, housekeeping and maintenance.

(i) "Governing body" means the governing board of a private corporation or the designated policy-making committee of a public agency.

(j) "Intervention" means the use of certain skills or techniques for problem or conflict resolution or diffusion of anger.

(k) "Isolation" means removal of a juvenile from other juveniles to a separate locked room or quarters.

(l) "Juvenile" means a child or youth who is accepted for care in a detention or secure care center.

(m) "License" means a document issued by the Kansas department of health and environment which authorizes a public agency, person, corporation, firm, association or other organization to operate and maintain a detention center or a secure care center.

(n) "Non-secure facility" means a facility not characterized by the use of physically restricting construction, hardware and procedures and which provides the juveniles access to the surrounding community with minimal supervision.

(o) "Placing agent" means the person, social agency or court possessing the legal right to place a child.

(p) "Program" means the comprehensive and coordinated set of activities and social services providing for care, protection and development of juveniles while in the care of the center.

(q) "Program manager" means the person who is responsible for the overall development and implementation of the program and staff development.

(r) "Program personnel" means all persons directly involved with the development and implementation of the program.

(s) "Residential care" means 24 hour care.

(t) "Secure care center" means a secure youth residential facility, other than a juvenile detention center, used to provide care and treatment for alleged or adjudicated children in need of care pursuant to the Kansas code for the care of children. Secure care centers shall meet the requirements for licensure included in K.A.R. 28-4-351 through 360, unless specifically exempted.

(u) "Secure facility" means a facility which is operated or structured to ensure that all entrances and exits from such facility are under the exclusive control of the staff, whether or not the juveniles have freedom of movement within the perimeters of the facility, or which relies on locked rooms and buildings, fences or physical restraint in order to control the behavior of the residents. No secure facility, other than a juvenile detention center, shall be attached to or on the grounds of an adult jail or lockup.

(v) "Staffing" means a special client-centered meeting regarding specific issues.

(w) "Temporary care" means residential care not to exceed 90 days.

(x) "Volunteer" means a person or community group that has an interest in providing supportive services to juveniles and offers to provide specific services without remuneration.

(y) "Youth care staff" means the program personnel whose primary responsibility is to implement the program on a daily basis, including direct supervision, interaction and protection of the juveniles. (Authorized by K.S.A. 65-508, and implementing K.S.A. 65-503; effective May 1, 1979; amended Feb. 26, 1990; amended Aug. 23, 1993.)

28-4-351. Licensing procedures. (a) A person shall not conduct a center for children under 16 years of age, unless the person has been issued a license to do so by the department.

(b) Any person desiring to conduct a center shall apply for a license on forms provided by the department and submit the license fee as specified in K.S.A. 65-505, and amendments thereto.

(c) Centers operated by or receiving support

from county or municipal governments shall meet the same requirements for licensure as those for facilities operated by nongovernmental entities.

(d) Each application for a license shall be accompanied by the following:

- (1) A written proposal that details the following:
 - (A) The purpose of the center;
 - (B) the administration plan for the program, including an organizational chart;
 - (C) the financing plan for the program;
 - (D) staffing for the program, including job descriptions; and
 - (E) the program to be offered, including the number, age range, and sex of the juveniles to be served;

(2) a copy of the written notification that was submitted to the school district where the facility is located, including the following:

- (A) The planned opening date;
- (B) the number, age range, and anticipated special education needs of the residents to be served; and

(C) a request for on-site educational services or a request for approval of proposed alternative formal schooling to be provided by the licensee, as required by K.A.R. 28-4-355;

(3) documentation that the notification required by paragraph (d)(2) was received by the school district at least 90 days before the planned opening date;

(4) the floor plans for each building to be used as a center; and

(5) documentation of the state fire marshal's approval.

(e) Plans for all buildings to be used as a center shall be submitted to the department before submitting an application for a license.

(f) A license shall be issued if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 through 65-516, and amendments thereto, and the regulations promulgated pursuant to those statutes and if the applicant has made payment of the license fee required by K.S.A. 65-505, and amendments thereto.

(g) Each applicant shall submit a report, on forms provided by the department, containing the identifying information that is necessary to complete the criminal history and child abuse registry background check for each person who resides, works, or regularly volunteers in the center, excluding children placed in care.

(1) Each center shall submit a current report as follows:

(A) Annually with a notice of intent to continue licensure; and

(B) within one week of the date any new person resides, works, or regularly volunteers in the center, excluding children placed in care.

(2) A copy of each report shall be kept on file at the facility.

(h) Each center shall notify the department of its intent to continue licensure on forms supplied by the department. Each licensee who wishes to continue licensure shall submit, within 30 days of the department's request, the notice of intent to continue licensure and the fee as specified in K.S.A. 65-505, and amendments thereto. Documentation of the fire safety inspection and approval provided by the state fire marshal or the state fire marshal's designee shall be required annually.

(i) Each licensee shall notify the secretary and obtain written approval from the secretary before making any change in any of the following:

- (1) The use of the buildings; or
- (2) the program, provided through either of the following:

- (A) Direct services; or
- (B) agreements with specified community resources.

(j) The notification of any proposed change in the program shall include the following:

(1) A copy of the written notification of the proposed change that was submitted to the school district where the facility is located; and

(2) documentation that the notification required by paragraph (j)(1) was received by the school district at least 90 days before the anticipated date of any proposed change.

(k) Waiver of 90-day notification to the local school district. The 90-day notification to the local school district may be waived by the secretary upon receipt of a written agreement by the local school district.

(l) Request to withdraw an application or terminate a license.

(1) Each applicant shall inform the department if the applicant desires to withdraw the application. The withdrawal of the application shall be acknowledged by the department in writing. A new application and fee shall be required before opening a center. No applicant shall admit a child before the applicant receives a license.

(2) Each licensee shall inform the department if the licensee desires to terminate the license. The licensee shall return the license to the department with the request to terminate the license. The

request and the license shall be accepted by the department. The licensee and other appropriate agencies shall be notified by the department that the license is terminated and that the center is considered closed. The former licensee shall submit a new application and fee to the department if that person desires to obtain a new license. That person shall not reopen the center or admit any child before receiving a new license.

This regulation shall be effective on and after July 30, 2002. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-501, 65-504, 65-505, 65-506, 65-508, and 65-516; effective May 1, 1979; amended, T-83-24, Aug. 25, 1982; amended May 1, 1983; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987; amended Aug. 23, 1993; amended, T-28-4-1-02, April 1, 2002; amended July 30, 2002.)

28-4-352. Terms of license. (a) The maximum number and age range of juveniles who may be cared for in each living unit shall be specified on each license.

(b) Any license issued shall not be transferable and shall be valid only for the original licensee at the address appearing on the license. A new application shall be submitted for each change of ownership, sponsor, or address of the center.

(c) The license shall not be construed to permit placement of children.

(d) No activities which would interfere with the care of the juveniles shall be carried out in the center.

(e) Advertisements shall conform to the statement of services provided on the application. Under no circumstances shall claims regarding specialized services be made unless the center is staffed and equipped to offer the services or has made arrangements for the services as outlined in K.A.R. 28-4-355. No general claim regarding "state approval" shall be made unless the center has obtained a full license issued by the Kansas department of health and environment.

A license for an additional facility operated by a licensee shall not be issued until all existing facilities operated by the licensee are in compliance with licensing regulations. (Authorized by K.S.A. 65-508 and implementing K.S.A. 65-504 and K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-353. Administration. (a) Organization.

(1) The center shall be administered by:

(A) A public agency; or

(B) A private entity with a governing board which is legally responsible for the operation, policies, finances and general management of the center. The director shall not be a voting member of the governing board.

(2) If the sponsor is a private corporation, it shall be a corporation qualified in the state of Kansas, and shall operate in accordance with an established constitution and by-laws. A copy of the articles of incorporation and by-laws shall be furnished to the Kansas department of health and environment. It shall include a non-discrimination statement which complies with state and federal civil rights laws.

(b) Administrative policies.

(1) Each center shall have written plans and policies of organization and administration clearly defining legal responsibility, administrative authority and responsibility for comprehensive services, including an organizational chart as approved by the governing body. Changes in policies shall be submitted to the Kansas department of health and environment for licensing approval.

(2) Center personnel and administrative policies shall be distributed to staff members.

(c) Finances.

(1) Funding.

(A) Each center shall have sound and sufficient finances to ensure effective services. Financing plans shall be a responsibility of the governing body. It shall be the responsibility of the licensee to provide the financial resources necessary to maintain compliance with licensing regulations.

(B) Solicitation of funds by charitable organizations shall be made in Kansas in compliance with K.S.A. 17-1759 et seq.

(C) Juveniles shall not be exploited in any fund-raising efforts.

(2) Financial records.

(A) Each center shall maintain financial records sufficient to verify resources and expenditures. Each center shall account for major expenditures on behalf of the juveniles for whom payment is received.

(B) Each juvenile's personal money shall be kept separate from the center funds in an individual account, in accordance with accepted accounting procedures.

(C) A yearly audit by an independent accountant shall be conducted, and a copy of the audit shall be available at the center for review by the staff of the Kansas department of social and reha-

bilitation services and the Kansas department of health and environment.

(D) The licensee shall make available to the Kansas department of social and rehabilitation services and the Kansas department of health and environment an annual financial statement verifying assets and liabilities.

(3) Insurance.

(A) Each center shall maintain at a minimum the following insurance:

(i) Professional and civil liability for employees; and

(ii) Liability for injury or personal property damage.

(B) Public agencies and private entities shall purchase motor vehicle liability insurance policies containing limits of liability with respect to each vehicle, exclusive of interest and costs:

(i) not less than \$100,000 for personal injury or death in any one accident;

(ii) not less than \$300,000 for personal injury to, or death of, two or more persons in any one accident; and

(iii) not less than \$50,000 for harm to or destruction of property of others in any one accident.

(d) Personnel policies.

(1) Each center shall have written personnel policies, approved and reviewed annually by the governing body. Written personnel policies shall be provided to each staff member upon employment. The policies shall include:

(A) hiring practices;

(B) job descriptions, including qualifications, duties and responsibilities for each staff position;

(C) hours;

(D) sick and vacation leave;

(E) grievance procedures;

(F) salaries, benefits and staff development.

(2) A personnel record shall be maintained for each employee and made available to the employee upon written request.

(e) Staffing.

(1) The governing body of the center shall designate a director whose responsibility is the overall administration of the center.

(2) A written daily staff schedule shall be developed and followed. There shall be:

(A) Adequate male and female staff to directly supervise and interact with the juveniles at all times and provide for their physical, social, emotional and educational needs;

(B) one youth care staff member on active duty for each seven juveniles during waking hours and

one youth care staff member on active duty for each 11 juveniles during sleeping hours;

(C) at least one male and one female youth care staff member present, awake and available to the juveniles at all times.

(3) At no time shall there be less than two youth care staff members on active duty when a juvenile is in care.

(4) At no time shall any one youth care staff member directly supervise more than 11 juveniles. Juveniles shall not be left in a room unattended except that, during sleeping hours, there shall be a minimum of one youth care staff member immediately available to every 11 juveniles in a connecting area to the sleeping rooms. Supervision of juveniles in locked isolation shall comply with K.A.R. 28-4-355b (c)(4)(J) and (K).

(5) Alternate youth care staff members shall be provided for the relief of the regular staff members on a one-to-one basis in compliance with the staffing pattern required in K.A.R. 28-4-353(e)(4).

(6) Electronic supervision shall not replace the youth care staffing requirements.

(7) Auxiliary staff members shall be available as needed. The auxiliary staff shall include food service, clerical and maintenance personnel. Auxiliary staff members shall not be included in meeting youth care staff requirements.

(8) Professional consultant services shall be available as required to meet the needs of the juveniles served. Professional consultants shall include physicians, dentists, nurses, clergy, social workers, psychologists, psychiatrists and teachers.

(9) A volunteer shall not be used as a substitute for an essential program or operating staff member but shall augment the services provided by the staff.

(10) There shall be a designated staff person on site and in charge of the facility at all times when a juvenile is in care. Procedures shall be in place to ensure that all staff members know who is in charge.

(f) Community and volunteer involvement.

(1) Written policies and procedures shall provide for securing community and volunteer involvement in programs. The policies and procedures shall specify a screening and selection process and shall encourage recruitment from all cultural and socio-economic segments of the community.

(2) Written policies and procedures shall govern the volunteer program, specifying the lines and scope of authority, responsibility and accountability. The policies and procedures shall include:

- (A) Screening, selection and termination;
- (B) orientation and training requirements for each respective volunteer assignment;
- (C) a requirement that each volunteer who provides professional services shall meet the same requirements as would be expected of a paid professional staff member providing those services;
- (D) supervision;
- (E) identification of the volunteer while in the facility; and
- (F) provision for a background check as required by K.A.R. 28-4-351(g).

(3) Each volunteer shall agree in writing to abide by all center policies, particularly those relating to security, confidentiality of information and mandatory reporting laws pertaining to suspected abuse, neglect and exploitation of juveniles.

(4) Each volunteer who will have contact with juveniles shall have a health assessment, including a screen for tuberculosis.

(5) Written policies and procedures shall provide that the director may curtail, postpone or discontinue the services of a volunteer or volunteer organization when there are substantial reasons for so doing. (Authorized by K.S.A. 65-508 and implementing K.S.A. 65-508 and 65-516; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-353a. Staff development. (a) Each person having contact with juveniles shall demonstrate emotional maturity, sound judgment, and a sound knowledge of the developmental needs of children.

(b) Center director qualifications.

(1) Each center director shall demonstrate the following skills and abilities:

(A) Thorough knowledge of the Kansas code for the care of children and the Kansas juvenile offender code;

(B) considerable knowledge of principles and techniques applicable to the care and rehabilitation of juveniles and to the growth, development, needs and unique problems of children;

(C) considerable knowledge of the principles, practices, methods and techniques of administration and management;

(D) ability to train, supervise, plan, direct and evaluate the work of others, as documented by experience, training or a combination of both;

(E) ability to establish and maintain effective working relationships with others; and

(F) ability to establish and maintain effective working relationships with the courts, law en-

forcement agencies, schools and community organizations.

(2) Each detention center director shall have at least a bachelor's degree in social work, human development and family life, psychology, education or criminal justice, with a minimum of 15 semester hours in courses related to child or adolescent development or juvenile delinquency, and shall have a minimum of three years of administrative or supervisory experience within a child care or juvenile justice agency.

(3) Each detention center director shall demonstrate thorough knowledge of the methods and techniques used in dealing with juvenile offenders in an institutional or detention setting.

(4) Each secure care center director shall have at least a master's degree in social work or a related field, or shall have a bachelor's degree in social work, human development and family life, psychology or education and a minimum of three years of supervisory experience within a child care agency.

(5) Each secure care center director shall demonstrate thorough knowledge of the methods and techniques used in dealing with juveniles in a residential setting;

(c) Each facility manager shall have at least a bachelor's degree and have three years of supervisory experience in a child care or juvenile justice agency serving youth of the same age and shall demonstrate thorough knowledge of the methods and techniques used in dealing with juvenile offenders in an institutional or detention setting. The facility manager may be the same person as the program manager if the qualifications for program manager required by K.A.R. 28-4-353a(d) are met.

(d) Each program manager shall have at least a bachelor's degree in social work or human development and family life, and shall have one year of supervisory experience in a child care or juvenile justice agency serving youth of the same age. The program manager may be the same person as the facility manager.

(e) Youth care staff and alternate youth care staff shall, before employment:

(1) Be twenty-one years of age or older;

(2) have a high school diploma or its equivalent; and

(3) have a minimum of:

(A) Three semester hours of college-level study in adolescent development, psychology or a related subject;

(B) forty-five clock hours in documented training in child care or child development; or

(C) one year of experience as a child care worker or house parent in a facility serving youth of the same age.

(f) Professional staff and consultants shall meet all Kansas qualification and licensing requirements for their profession.

(g) Food service staff shall:

(1) Comply with Kansas health standards as enumerated in K.A.R. 28-36-22;

(2) have knowledge of the nutritional needs of children and youth;

(3) understand quantity food preparation and service; and

(4) practice sanitary food handling and storage methods.

(h) Staff professional development. Professional development shall consist of organized, evaluated activity designed to achieve specific learning objectives. Professional development may occur through workshops, seminars, staff meetings or through closely supervised on-the-job training.

(1) Each center shall have written policies and procedures governing orientation and ongoing inservice training. Each employee shall receive orientation training before being independently assigned a particular job.

(2) Each youth care staff member shall receive at least eight hours of orientation training before assuming supervisory responsibility of juveniles and an additional 32 hours of orientation training before assuming independent responsibility for supervision of juveniles. There shall be written documentation of orientation training. Orientation training shall include, but not be limited to:

(A) Accident and injury prevention;

(B) child abuse, neglect and exploitation reporting;

(C) crisis management and intervention;

(D) emergency and safety procedures to follow in the event of an emergency, bomb threat, fire, tornado, riot or flood;

(E) facility policies and procedures;

(F) first aid including rescue breathing;

(G) health, sanitation and safety measures;

(H) job duties and responsibilities;

(I) juvenile rights;

(J) observation of symptoms of illness and communicable diseases;

(K) policies regarding behavior management, use of restraints and crises intervention.

(L) problem solving;

(M) report writing;

(N) security procedures; and

(O) suicide prevention.

(3) Each director, facility manager, program manager and each person having contact with juveniles shall complete a minimum of 40 clock hours of inservice training per year. Inservice training shall include, but not be limited to:

(A) Accident and injury prevention;

(B) child abuse symptoms and reporting;

(C) child care practices;

(D) child psychosocial growth and development;

(E) first aid including rescue breathing;

(F) juvenile court process;

(G) licensing regulations;

(H) observations of symptoms of illness and communicable diseases;

(I) suicide prevention; and

(J) use of restraints.

(4) Each program manager shall attend at least one training event per year away from the center in addition to the inservice training conducted at the center. (Authorized by and implementing K.S.A. 65-508; effective Aug. 23, 1993.)

28-4-353b. Records. (a) Personnel records. Individual records shall be kept for each staff member which shall include the staff member's:

(1) Job application, including all:

(A) Identifying information;

(B) qualifications including documentation and verification; and

(C) character and employment references.

(2) terms of employment and job description;

(3) employment dates and annual performance reviews;

(4) health certificates, including a record of the results of a health assessment and tuberculin test, documented on forms supplied or approved by the Kansas department of health and environment;

(5) documentation of orientation and inservice training and continuing education;

(6) documentation of the report submitted to the Kansas department of health and environment for purpose of a background check for criminal and child abuse histories in accordance with K.A.R. 28-4-351(g).

(7) documentation that the employee has read, understands and agrees to follow:

(A) the statutes and regulations regarding mandatory reporting of suspected child abuse, neglect and exploitation;

(B) the regulations for licensing detention centers and secure care centers for children and youth;

(C) the facility's policies and procedures, including personnel, administrative, daily and behavior management policies and procedures; and

(D) policies providing for a drug free workplace; and

(8) grievance and incident reports regarding the specific employee, including the means of resolution of each report.

(b) Volunteer records. Individual records shall be kept on the center-related activities of each volunteer. These records shall include the volunteer's:

(1) Identifying information;

(2) job description;

(3) dates of service and performance reviews;

(4) documentation of orientation to the facility and specific assignment;

(5) documentation that the volunteer has read, understands and agrees to follow center policies and procedures, particularly those related to security, confidentiality of information and mandatory reporting of suspected child abuse and neglect;

(6) documentation of freedom from active tuberculosis;

(7) documentation of the report submitted to the Kansas department of health and environment for purpose of a background check for criminal and child abuse histories in accordance with K.A.R. 28-4-351(g).

(8) a copy of the health assessment required in K.A.R. 28-4-353(f)(4).

(c) Juvenile records.

(1) Written policies and procedures shall govern record management and shall include, but not be limited to:

(A) The establishment, utilization, content, privacy, security and preservation of records.

(B) the schedule for the retirement and destruction of inactive case records; and

(C) a provision for review of policies and procedures at least annually and revision as needed.

(2) A register of all juveniles in care shall be kept by each center. The register shall include the following information for each juvenile:

(A) Name;

(B) date of birth;

(C) the name and address of each parent or legal guardian, person with whom juvenile resides at time of admission;

(D) the name and address of the legal custodian, if not the parent or legal guardian;

(E) the name and address of closest living relative if other than parent or guardian;

(F) the reason for admission; and

(G) the dates of admission and release.

(3) Upon the release of each juvenile from a detention center, a completed admission and release form, supplied by the Kansas bureau of investigation, shall be submitted to the bureau.

(4) Individual records shall be kept for each juvenile which shall include the juvenile's:

(A) Identifying information;

(B) legal status;

(C) legal custodian;

(D) arrest record;

(E) court order or journal entry for any juvenile in care longer than 48 hours;

(F) medical and dental permission forms, signed by a parent or legal guardian. The permission form used shall be one which is acceptable to the vendor who will provide the service; and

(G) a written inventory of all money and personal property of the juvenile signed by the juvenile and the admitting staff member.

(5) A daily log of each juvenile's behavior, with notations regarding any special problems during detention and the response of the staff to any problems shall be kept in each juvenile's individual record file. Each entry shall be initialed by the staff member making the entry.

(6) A list of all juveniles receiving care shall be submitted upon request to the Kansas department of health and environment on forms provided or approved by the department.

(7) Information from a juvenile's records shall not be released without written permission from the juvenile's parent or legal guardian. When the parent or legal guardian is not available to provide written permission, an order of the court having valid jurisdiction shall be acceptable. Improper disclosure of records or information regarding a juvenile shall be grounds for revocation or suspension of the center's license or permit in force, or the denial of a center's application for licensure.

(8) Written policy, procedure and practice shall provide for the transfer of specific juvenile case file information upon release of a juvenile to another center or other residential care. Specific case file information shall precede or accompany the juvenile and shall include:

(A) Identifying information;

(B) medical records;

(C) immunization records;

(D) insurance information;

- (E) medical card, when applicable;
 - (F) school placement information, including present courses of study; and
 - (G) the name and address of each parent or legal guardian.
- (9) Additional case file information to be transferred shall accompany the juvenile or be transferred within 72 hours. (Authorized by and implementing K.S.A. 65-508; effective Aug. 23, 1993.)

28-4-354. Admission and release policies.

(a) Written admission policies and procedures of the center shall be approved by the governing body in accordance with goals and purposes of the center and Kansas statutes.

(b) Admission procedures and practice shall include but not be limited to:

- (1) Collecting identifying information;
- (2) verifying the legal authority to detain;
- (3) completing a health history checklist. This checklist shall be completed by the admitting staff person, using a form approved by the Kansas department of health and environment. A description of bruises, abrasions, symptoms of illness and current medications shall be documented on this form;
- (4) assessing the juvenile's suicide risk potential;
- (5) documenting the notification of the juvenile's parents or legal guardian and legal custodian, if not the parent or legal guardian, in accordance with Kansas juvenile code.
- (6) assisting the juvenile in contacting the juvenile's family at the time of admission.
- (7) conducting an intake interview. Designated staff members shall conduct each intake interview;
- (8) providing an orientation to the center in a manner which is understandable to the juvenile. Completion of the orientation and receipt of all written orientation materials shall be documented by a signed statement from the juvenile;
- (9) notifying the appropriate intake officer;
- (10) searching the juvenile and the juvenile's possessions;
- (11) documenting the juvenile's clothing and personal possessions and disposition. A written inventory of all money and personal property of the juvenile shall be signed by the juvenile and the admitting staff member and kept with the juvenile's record. If the juvenile refuses to sign the inventory, the refusal shall be documented in the juvenile's record;
- (12) distributing personal hygiene items;

- (13) providing for a shower and hair care;
- (14) issuing clean, laundered clothing, if necessary; and

(15) assigning the juvenile to a sleeping room.

(c) No juvenile shall be admitted to:

(1) A detention center, except as authorized by K.S.A. 38-1528 subsections (a) or (b) or by K.S.A. 38-1640 and any amendments thereto; or

(2) a secure care center, except as authorized by K.S.A. 38-1502(a)(10) or by K.S.A. 38-1568 and any amendments thereto.

(d) No juvenile shall be admitted who shows evidence of being seriously ill, injured, intoxicated or physically or mentally impaired until the juvenile is examined and approved for admission by a physician licensed to practice in Kansas.

(e) A center shall not accept permanent legal guardianship of a juvenile.

(f) Release policies.

(1) All releases shall be approved by the court of jurisdiction or the designated authority.

(2) The center shall provide release forms to be signed by the person to whom the juvenile is released and by the staff person releasing the juvenile.

(3) Temporary releases for court attendance, medical appointments or placement visits, or other necessary purposes shall be permitted when authorized by the court or its designated official.

(4) Procedures and practice for release of juveniles shall include:

(A) Verification of identity.

(B) completion of any pending action, including any grievance or claim for damages or lost possessions;

(C) transportation arrangements;

(D) instructions for forwarding mail; and

(E) return of money and personal property to the juvenile. A receipt for all money and personal property shall be signed by the juvenile.

(5) Juvenile records shall be transferred in accordance with Kansas statutes and regulations and with center policies.

(g) The length of stay for each juvenile admitted for care in a detention center shall not exceed 90 days unless an exception is granted by the Kansas department of health and environment. Each request for an exception shall be received by the department prior to the ninetieth day of the juvenile's stay. Each exception request shall be in writing and provide:

(1) Identification of the juvenile for whom an exception is requested;

(2) the specific reason why an exception is requested;

(3) the projected release date; and

(4) the total number of service days requested. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-355. Program and services. (a) A written plan and daily routine shall be maintained for all juveniles which shall include: meals, rest and sleep, personal hygiene, physical exercise, recreation, counseling, education and social services.

(b) Classroom instruction shall be provided on-site by teachers holding appropriate certification from the Kansas board of education.

(1) Education services shall be coordinated with the local school district. During the local school year, each juvenile shall receive a minimum of six hours of instruction per day, excluding weekends and holidays.

(2) For each juvenile currently enrolled in a Kansas public school, contact shall be maintained with the juvenile's home school district to ensure the continuity of each juvenile's education.

(3) A regular schedule of instruction and related educational services appropriate to the needs of each juvenile shall be provided.

(4) Youth care staff shall be stationed in proximity to the classroom, with frequent, direct, physical observation of the classroom activity at least every 15 minutes, to provide immediate support to the teacher.

(c) Library services.

(1) Each center shall have written policies and procedures which govern the center's library program, including acquisition of materials, hours of availability and staffing.

(2) Library services shall be available to all juveniles.

(A) Reading and other library materials may be provided for use during non-library hours.

(B) Library materials shall be appropriate for various levels of competency.

(C) Reading material shall reflect racial and ethnic interests.

(d) Recreation.

(1) All centers shall provide indoor and outdoor recreational areas and equipment where security and visual supervision can be easily maintained, and unless restricted for health reasons, all juveniles shall be allowed to engage in supervised indoor and outdoor recreation on a daily basis.

(2) Art and craft supplies, books, current magazines, games and other indoor recreational materials shall be provided for leisure time activities.

(e) Work.

(1) Work assignments shall not be used as a substitute for recreation.

(2) Juveniles shall be prohibited from performing such duties as:

(A) Personal services for the staff;

(B) cleaning or maintaining areas away from the center;

(C) replacing employed staff;

(D) any work experience defined as hazardous by the Kansas department of human resources regulations governing child labor.

(3) After receiving the required youth care staff orientation and training, auxiliary staff may supervise work activities. Youth care staff shall be within visual and auditory distance to provide immediate support, if necessary.

(f) Visitation and communication.

(1) All facilities shall provide telephone and contact visitation rights for parents, legal guardians, legal representatives and other visitors approved by personnel designated by the director or the governing body. Private telephone conversation and visitation shall be allowed, except when a documented need to protect the juvenile or the security of the facility dictates otherwise.

(2) Written telephone and contact visitation policies and procedures shall be made available to all juveniles, parents, legal guardians and legal representatives.

(3) A juvenile shall not be denied the right to contact his or her attorney or court counselor. No court counselor or attorney shall be refused visitation of a juvenile to whom the counselor or attorney has been assigned.

(4) There shall be no censorship of mail or written communication, except to check for contraband, unless there is sufficient reason to believe that the security of the center is at risk. Suspect mail shall be opened by center staff in the presence of the addressee. If mail is to be read, the juvenile is to be informed in advance and present when the mail is opened. The reason for each occasion of censorship shall be documented and kept in the juvenile's record.

(5) Writing materials and postage for the purposes of correspondence shall be available to juveniles. Materials and postage for at least two letters per week shall be provided for each juvenile.

(6) Juveniles shall be provided access to the telephone to make and receive personal calls.

(7) First class letters and packages shall be forwarded after transfer or release of each juvenile.

(g) Transportation. Written policies and procedures shall govern the transportation of juveniles outside the center and from one jurisdiction to another.

(1) Transportation procedures and practice shall include, but not be limited to:

(A) Precautions to prevent escape during transfer; and

(B) documentation of current, appropriate licensure for each center driver.

(2) When the center is transporting juveniles, each transporting vehicle shall be center owned or leased and shall have a yearly safety check. A record of the yearly safety check and all repairs or improvements made shall be kept on file at the center.

(3) Each transporting vehicle operated by the center shall be equipped with an individual seat belt for the driver, each juvenile passenger and each additional passenger. The driver, each juvenile passenger and each additional passenger shall use the seat belts at all times.

(4) Smoking in the transporting vehicle shall be prohibited while juveniles are being transported.

(5) Juveniles shall be delivered to the designated destination by the most direct route. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-355a. Rights of juveniles. (a) The rights of juveniles while in detention or secure care shall not be diminished or denied for disciplinary reasons.

(b) Written policies and procedures shall provide that juveniles are assured their rights subject only to the limitations necessary to maintain order and security in the center. Procedures and practice shall ensure the following:

(1) Freedom from personal abuse, corporal or unusual punishment, excessive use of force, humiliation, harassment, mental abuse or punitive interference with the daily functions of living, such as eating or sleeping;

(2) freedom from discrimination based on race, culture, religion, national origin, sex or disability;

(3) equal access to programs and services for both male and female juveniles in co-ed facilities;

(4) receipt and explanation of written rules and grievance procedures of the center, in a language which the juvenile can understand;

(5) opportunity for a variety of physical exercise, including outdoor exercise when weather permits;

(6) participation in religious worship and religious counseling on a voluntary basis, subject only to the limitations necessary to maintain facility order and security;

(7) reasonable religious diets;

(8) the right to wear personal clothing consistent with center guidelines. If the center provides clothing, it shall be of proper size and contemporary style;

(9) access to the courts and confidential contact with attorneys, judges, parents, social workers and other professionals, including telephone conversations, visits and correspondence;

(10) medical treatment and emergency dental care, a medically proper diet and the right to know what and why medications have been prescribed;

(11) the right to send and receive uncensored mail in accordance with K.A.R. 28-4-355 (f)(4);

(12) the right to receive visitors and communication in accordance with the center's visitation policies;

(13) the right to determine the length and style of hair, except when a physician determines that a haircut is medically necessary; and

(14) the right to keep facial hair, if desired, except when a licensed physician determines that removal is medically necessary for health and safety. (Authorized by and implementing K.S.A. 65-508; effective Aug. 23, 1993.)

28-4-355b. Behavior management. (a) Rules.

(1) Written policies shall provide for a behavior management system that assists juveniles to develop inner control so that they can manage their own behavior in a socially acceptable manner. Procedures and practice shall provide:

(A) Expectations which are age appropriate and which allow for special abilities and limitations; and

(B) positive and negative consequences related to each expectation.

(2) Written rules of juvenile conduct shall define expected behaviors and related consequences.

(A) A rulebook containing expected behaviors, ranges of consequences and disciplinary procedures shall be given to each juvenile and youth care staff member.

(B) An acknowledgement of receipt of the rulebook shall be signed by each juvenile and kept in each juvenile's file.

(C) When a literacy or language problem prevents a juvenile from understanding the rulebook, a staff member or translator shall assist the juvenile in understanding the rules.

(D) The rulebook shall be translated into any language spoken by a significant number of persons in the jurisdiction.

(3) All staff members who have direct contact with juveniles shall be thoroughly familiar with the rules of juvenile conduct, the rationale for the rules and the intervention options available.

(b) Discipline.

(1) Discipline which is humiliating, frightening or physically harmful to the juvenile shall not be used at any time. The resident shall be protected against all forms of neglect, exploitation or degrading forms of discipline. No juvenile shall be isolated without a youth care staff member within visual and auditory distance or confined in any dark space. Electronic monitoring or an audio communication system shall not replace the required presence of a youth care staff member.

(2) Corporal punishment shall not be used.

(3) Under no circumstances shall any juvenile be deprived of meals, clothing, sleep, medical services, exercise, correspondence, parental contact or legal assistance for disciplinary purposes. If a juvenile is in locked isolation during normal school hours, school work shall be provided to the juvenile.

(4) Under no circumstances shall any juvenile be allowed to supervise or to administer discipline to other juveniles.

(c) Isolation.

(1) Routine nighttime lock-up during sleeping hours is permitted in detention centers for the purpose of security during sleeping hours. A detention center which uses nighttime lockup shall not be required to comply with the special requirements concerning locked isolation for routine lockup of juveniles during sleeping hours. Written policies and procedures shall govern the use of routine nighttime lockup. Procedure and practice shall provide for:

(A) Direct, irregularly scheduled, physical observation of juveniles at least every 15 minutes by a youth care staff member; and

(B) written reports of periodic observation of the juveniles. The reports shall be kept on file at the center.

(2) Electronic monitoring shall not replace periodic observation of juveniles by a youth care staff member during nighttime lock-up.

(3) Locked isolation shall be permitted within a detention center only when a juvenile is out of control, continually refuses to obey reasonable and lawful requests or behaves in a way that presents a threat to self or others. Within a secure care center, locked isolation shall be permitted only when a juvenile's behavior presents a threat to self or others.

(4) Each center shall have written policies and procedures which govern the use of locked isolation. Procedures and practice shall:

(A) Permit the use of locked isolation only when all other less restrictive methods of controlling the juvenile's dangerous behavior have been attempted and have failed;

(B) require a written order by a designated staff member each time a juvenile is placed in or released from isolation;

(C) ensure that no more than one juvenile is placed in an isolation room at any one time;

(D) provide for a search of each juvenile and removal of any items that may be used to injure self or others before admission to the isolation room;

(E) ensure that each juvenile is provided appropriate clothing at all times;

(F) ensure that each juvenile in isolation is provided a mattress with linens on a clean, level surface above floor level;

(G) ensure that each juvenile receives all meals and snacks normally served and is allowed time to exercise and perform necessary bodily functions;

(H) ensure that each juvenile has prompt access to drinking water and washroom facilities;

(I) ensure that the designated staff member on duty makes appropriate entries in the case records regarding the juvenile's use of the isolation room;

(J) ensure that at least one youth care staff member is in the proximity of each juvenile in isolation at all times, with direct, physical observation at least every 15 minutes. At the time of each observation, the following shall occur:

(i) Interactive intervention shall be attempted, unless the juvenile is sleeping;

(ii) the result of the intervention shall be recorded; and

(iii) the condition of the juvenile shall be recorded;

(K) ensure constant supervision when a juvenile is considered suicidal; and

(L) provide for an assessment of the need for continued isolation at each shift change and for documentation of the reasons isolation is continued.

(4) If a juvenile is in locked disciplinary isolation before routine nighttime lock-up occurs, the hours of nighttime lock-up shall be counted as time in locked disciplinary isolation for that juvenile.

(5) A juvenile shall not remain in isolation for more than 24 hours without written approval of the director or the director's designee who is not involved in the incident.

(A) The director or designated staff member who is not involved in the incident shall visit with each isolated juvenile at least once within each eight-hour period after the first 24 hours.

(B) Written approval of the director or director's designee shall be required for each eight hour period isolation is extended, beyond the first 24 hours.

(6) Isolation shall not exceed 48 hours for any offense unless the juvenile continues to behave in a way that presents a threat to self or others.

(7) If a juvenile requires more than 48 hours of consecutive isolation or more than 72 cumulative hours of isolation within any seven day period, or is placed on suicide watch, an emergency staffing shall be held to discuss the appropriateness of the juvenile's continued placement at the center and to develop an emergency plan for the juvenile.

(A) Participants in the emergency staffing shall include:

- (i) the juvenile if behavior permits;
- (ii) the director or the director's designee;
- (iii) a physician, clinical psychologist, or clinical social worker who has assessed the juvenile; and
- (iv) appropriate staff members.

(B) The placing agent or representative and the juvenile's parents or legal guardian shall be notified of the emergency staffing and invited to participate. Documentation of notifications shall be kept on file at the center.

(C) The results of the emergency staffing shall be recorded and maintained on file at the center.

(8) All youth care staff and program personnel shall be informed at all times of the current status of each resident in isolation.

(d) Restraint. Each center shall have written policies and procedures which govern the use of restraint.

(1) Procedure and practice shall:

(A) Limit the use of physical restraint to instances of justifiable self-defense, protection of the juvenile or others, protection of property or prevention of escape;

(B) permit the use of physical restraint only when all other less restrictive methods of controlling the

juvenile's dangerous behavior were either attempted and failed or diagnostically eliminated;

(C) prohibit the use of physical restraint as punishment.

(D) ensure that mechanical restraints are used within the secure parameters of the center only when required to move a juvenile to locked isolation. The use of mechanical restraints shall not exceed 30 minutes in duration;

(E) ensure that chemical agents are not used by center personnel; and

(F) provide that psychotropic medications are not used for disciplinary reasons. Psychotropic medications shall be administered only when medically necessary, upon order of the juvenile's physician.

(2) A center which uses any form of restraint shall develop and ensure the practice of a comprehensive written policy on the use of each restraint. The policy shall identify:

(A) The forms of restraint in use at the center, clearly demonstrating that each specified form of restraint is required to appropriately serve juveniles;

(B) specific criteria for the use of each form of restraint;

(C) the staff members authorized to approve the use of each form of restraint;

(D) the staff members authorized and qualified to administer or apply each form of restraint;

(E) the approved procedures for application or administration of each form of restraint;

(F) the procedures for monitoring any juvenile placed in each form of restraint;

(G) any limitations on the use of each form of restraint, including time limitations;

(H) the procedures for immediate, continual review of restraint placements for each form of restraint, except passive physical restraint; and

(I) procedures for comprehensive recordkeeping on all incidents of the use of restraint, including incidents of passive physical restraint where it is used in conjunction with or leads to the use of any other form of restraint.

(3) If a juvenile requires the use of mechanical restraints more than four times in any 30 day period, an emergency staffing shall be held to discuss the appropriateness of the juvenile's continued placement at the center and to develop an emergency plan for the juvenile.

(A) Participants in this emergency staffing shall include:

- (i) the juvenile if behavior permits;
- (ii) the director or the director's designee;

(iii) a physician, clinical psychologist or clinical social worker who has assessed the juvenile; and

(iv) appropriate staff members.

(B) The placing agent or representative and the juvenile's parents or legal guardian shall be notified of the emergency staffing and invited to participate. Documentation of notifications shall be kept on file at the center.

(C) The results of the emergency staffing shall be recorded and maintained on file at the center.

(4) Any juvenile or staff member injured in an incident involving the use of physical restraint shall receive immediate medical examination and treatment. (Authorized by and implementing K.S.A. 65-508; effective Aug. 23, 1993.)

28-4-356. Health care policies. (a) Health services for juveniles.

(1) Each center, in consultation with a physician or community health nurse, shall develop written health care policies which cover:

(A) Health history checklist and review for each juvenile upon admission, as documented on forms approved by Kansas department of health and environment;

(B) follow-up health care, including health examination and referrals, for concerns identified in the health history checklist and review.

(C) dental screening upon admission and follow-up emergency dental care as needed;

(D) preventive dental care for juveniles in secure care;

(E) chronic care, convalescent care and preventive care when medically indicated;

(F) care for minor illness, including the use and administration of prescription and nonprescription drugs;

(G) care for juveniles under the influence of alcohol or other drugs;

(H) consultation regarding individual juveniles when indicated;

(I) infection control measures and universal precautions to prevent the spread of bloodborne infectious diseases recommended in "Update: Universal Precautions for Prevention of Human Immunodeficiency Virus, Hepatitis B Virus, and Other Bloodborne Pathogens in Health-Care Settings" as published in the *Morbidity and Mortality Weekly Report*, June 24, 1988, Vol. 37 No. 24 which are hereby adopted by reference;

(J) maternity care as defined in K.A.R. 28-4-279; and

(K) medically indicated isolation.

(2) Each center shall have a physician licensed to practice in Kansas designated as the medical consultant to the health program.

(3) Each center shall obtain a written consent from each juvenile's parent or legal guardian for medical and dental care.

(4) The medicine cabinet shall be located in an accessible, supervised area. The cabinet shall be kept locked. Internal and external medicines shall be kept in separate sections of the cabinet. All unused medication shall be safely discarded.

(A) Prescription medication shall be administered by a designated staff member, from a pharmacy container labeled with the juvenile's name, the name of the medication, the dosage, the dosage intervals, the name of the physician and the date the prescription was filled. Any changes of prescription or directions for administering a prescription medication shall be authorized in writing by a physician, with documentation in the juvenile's file.

(B) All medication, including non-prescription medication, shall be given only in accordance with label directions, unless ordered differently by a licensed physician. A record shall be kept in the juvenile's file documenting the name of the person who gave the medication, the name of the medication, the dosage and the date and time it was given.

(5) Arrangements for emergency care shall be made as follows.

(A) The center shall have a written statement of the name, address and telephone number of a physician licensed in Kansas to be called in case of emergency.

(B) Policy and procedures shall ensure continuous care of juveniles who require emergency medical treatment.

(C) When a staff member accompanies a juvenile to the source of emergency care, the staff member shall remain with the juvenile for the duration of the emergency. Supervision of the other juveniles in the center shall not be compromised. The health history checklist and health assessment shall be taken to the emergency room with the juvenile.

(6) Any incident resulting in death or serious injury to any staff member or juvenile, or any instance of suspected abuse or neglect, shall be reported immediately to the Kansas department of health and environment bureau of adult and child care, and the county health department. A written incident report shall be submitted to the

bureau within five working days. Each parent or legal guardian shall be immediately notified when serious injury to, death or hospitalization of a juvenile occurs. When suspected abuse or neglect of a juvenile occurs, the Kansas department of social and rehabilitation services shall be notified in accordance with statutory requirements.

(7) Any injury to a juvenile or staff member that is a result of suspected criminal action, shall be reported immediately to the local law enforcement officials and district attorney's office for their disposition.

(8) Any death of staff within the center or of a juvenile shall be reported to the local law enforcement officials and district attorney's office for appropriate action.

(b) Physical health of juveniles.

(1) A health history checklist shall be completed for each juvenile at the time of admission. This checklist shall be completed by the person who admits the juvenile, using forms supplied or approved by the Kansas department of health and environment.

(A) The health checklist shall serve as a guide to determine if a juvenile is in need of immediate medical care.

(B) The center's physician shall be contacted for any juvenile who is taking a prescribed medication at the time of admission so that treatment is not interrupted.

(C) The center's physician shall be contacted for any juvenile who has acute symptoms of illness or who has a chronic illness. Communicable diseases shall be reported within 24 hours or by next working day to the local county health department.

(2) Within 72 hours of admission, juveniles shall have a review of the health history checklist by a physician or nurse. Based upon health indicators derived from the checklist or in the absence of documentation of a screening within the past 24 months, the physician or nurse shall determine whether a full screening and health assessment are necessary.

(A) When necessary, the screening and health assessment shall be conducted by a licensed physician or by a nurse certified by the Kansas department of health and environment to conduct such examinations.

(i) The screening and health assessment shall be completed within 10 days of admission.

(ii) The screening shall be based upon health assessment and screening guidelines provided or approved by the Kansas department of health and environment.

(B) Medical and dental records shall be kept on forms provided or approved by the Kansas department of health and environment and shall be kept current.

(C) Each juvenile shall receive a tuberculin skin test. A chest x-ray shall be taken of all positive tuberculin reactors and those with a history of previous positive reaction. The proper treatment or prophylaxis shall be instituted. The results of this follow-up shall be recorded in the juvenile's record and the county health department shall be kept informed of the results.

(D) A current health record shall be kept for each juvenile which includes the juvenile's current immunization record, health history checklist, documentation of the review of the health history checklist and the decision regarding the need for screening and health assessment, tuberculin skin test report, medical contacts and entries regarding the juvenile's health care plan.

(E) The health record shall accompany the juvenile when transferred to another facility. A copy of the health record shall be kept in the juvenile's file at the center.

(3) Written policy and procedures shall prohibit the use of tobacco in any form by juveniles while in care.

(c) Dental health of juveniles.

(1) Emergency dental care shall be available for all juveniles. Each secure care center juvenile record shall include a report of a dental examination obtained within one year before or 60 days after admission.

(2) The center staff shall develop plans for dental health education and shall supervise the juveniles in the practice of good dental hygiene.

(d) Personal health of staff members and volunteers.

(1) Each person caring for juveniles shall be:

(A) Free from communicable disease;

(B) Free from physical, mental or emotional handicaps as is necessary to fulfill the responsibilities listed in the job description and protect the health, safety and welfare of the juveniles; and

(C) Free from impaired ability due to the use of alcohol or other drugs.

(2) Each staff member who will have contact with the juveniles shall receive a health examination within one year before employment. This examination shall be conducted by a licensed physician or a nurse authorized to conduct such examinations.

(3) Results of the health examination shall be recorded on forms supplied or approved by the

Kansas department of health and environment and kept on file at the center. Health assessment records may be transferred from a previous place of employment if the transfer occurs within one year of the examination date.

(4) The initial health examination shall include a tuberculin skin test. If there is a positive reaction to the tuberculin skin test or a history of previous positive reaction, a chest x-ray shall be required. Proof of proper treatment or prophylaxis, according to current Kansas department of health and environment guidelines, shall be required. Documentation of test, x-ray and treatment results shall be kept on file in the person's health record.

(5) A tuberculin skin test or a chest x-ray shall be required if significant exposure to an active case of tuberculosis occurs or if symptoms compatible with tuberculosis develop. If there is a positive reaction to the diagnostic procedure, proof of proper treatment or prophylaxis, according to Kansas department of health and environment guidelines, shall be required. The results of this follow-up shall be recorded in the person's health record. The Kansas department of health and environment shall be informed of each case described within this paragraph.

(6) Volunteers shall present written proof of freedom from active tuberculosis before serving in the center.

(7) Smoking shall not be permitted in the facility.

(e) Personal hygiene.

(1) Each juvenile shall bathe upon admission and be given the opportunity to bathe daily.

(2) Each juvenile shall be given the opportunity to brush their teeth after each meal.

(3) Each juvenile shall be furnished with toothpaste and a toothbrush. Pump soap shall be available at all community sinks and showers.

(4) Facilities for shaves and haircuts shall be made available. No juveniles shall be required to have a hair cut unless a physician determines that a hair cut is medically necessary.

(5) Each juvenile's washable clothing shall be changed and laundered at least twice a week. Underwear and socks shall be changed and laundered daily. Clean and serviceable footwear of appropriate size shall be issued to each juvenile.

(6) Each female juvenile shall be provided personal hygiene supplies with regard to her menstrual cycle.

(7) Clean, individual bath and face towels shall be issued to each juvenile at least twice a week. Bed linen shall be changed at least once a week.

(8) Each juvenile shall be allowed to have at least eight hours of sleep each day. Fourteen hours of activity shall be provided. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended May 1, 1985; amended Aug. 23, 1993.)

28-4-357. Emergency, safety, security and control. (a) Each center shall develop a disaster plan to provide for the safety of juveniles in emergencies. The plan shall be reviewed at least annually and updated as needed. The plan and subsequent updates, if any, shall be approved by the state fire marshal or the marshal's designee.

(1) The plan shall include provisions for the care of juveniles in disasters such as fires, tornadoes, storms, floods, and civil disorders, as well as occurrences of serious illness or injury to staff members and juveniles.

(2) The personnel in the center shall be informed of the disaster plans and the plans shall be posted in a prominent location and practiced.

(3) Each center shall have first aid supplies: assorted adhesive strip bandages, adhesive tape, roll of gauze, scissors, package of gauze squares, pump soap, elastic bandage, tweezers and rubbing alcohol.

(4) Each center which uses locked isolation shall have an effective policy and procedure to evacuate an isolated juvenile in the event of a fire or other emergency.

(b) The center shall have one fire drill and one tornado drill per each shift per quarter.

(c) Security and control. Each center shall use a combination of supervision, inspection, accountability and clearly defined policies and procedures on the use of security to promote safe and orderly operations.

(1) Written policies and procedures for center security and control shall be available to all staff members. The policies and procedures shall be reviewed at least annually and updated as needed. The following rules and requirements shall be included:

(A) A daily report on juvenile population movement shall be completed and kept on file at the center.

(B) Written operational shift assignments shall state the duties and responsibilities for each assigned position in the center.

(C) Supervisory staff shall maintain a permanent log and prepare shift reports that record routine and emergency situations.

(D) Regular inspection and maintenance of security devices. Any corrective action shall be completed as necessary and recorded.

(E) No weapons shall be permitted in the center. Secure weapons lockers shall be provided for storage of any weapons carried by visiting law enforcement officers.

(F) Guidelines for the control and use of keys, tools and medical and culinary equipment shall be implemented.

(G) No juvenile or group of juveniles shall exercise control or authority over other juveniles, have access to the records of other juveniles or have access to or use of keys that control center security.

(H) Procedures for handling escapes, runaways and unauthorized absences shall be developed and adhered to.

(I) Safety and security precautions pertaining to facility and staff vehicles shall be developed and adhered to.

(2) Policies and procedures for the prosecution of any illegal act committed while the juvenile is in care shall be developed.

(3) Policies and procedures to ensure that chemical agents such as mace, pepper mace or tear gas are never used by center staff shall be developed and adhered to.

(4) Poisons and all flammable materials shall be kept in locked storage.

(5) Written policies and procedures governing control of contraband shall be developed and adhered to. The procedures shall:

(A) Provide for searches of facilities and juveniles;

(B) provide that strip searches are conducted only at admission or when there is reasonable belief that the juvenile is carrying contraband or other prohibited material. The inspection shall be conducted in private by a trained staff member of the same sex as the juvenile. A second staff person shall observe the staff member conducting the search to verify that the search was conducted in accordance with agency policies. If necessary, a body cavity inspection shall be conducted only by a physician or nurse who is trained to conduct body cavity inspections; and

(C) require documentation of the incident, including the reason for the search, the identities of staff persons involved and the result. The documentation shall be kept on file at the center.

(6) Policies and procedures shall govern documentation of all special incidents, including but not limited to the taking of hostages and the use of re-

straint other than for routine transport. Procedure and practice shall require submission of a written report of all special incidents to the director or the director's designee. The report is to be submitted no later than the conclusion of the shift. A copy of the report shall be kept in the file of the juvenile concerned. A copy of the report of any incident which involves the taking of hostages, the death or injury of a juvenile, or criminal charges against a juvenile or staff member shall be submitted to the Kansas department of health and environment, the placing agent and other persons as appropriate.

(7) Any incident of disaster as enumerated in K.A.R. 28-4-357 (a)(1) shall be reported to the Kansas department of health and environment within 24 hours excluding weekends and holidays. Any incident of fire shall also be reported to the state fire marshal within the same time frame.

(8) A written plan shall provide for continuing operations in the event of a work stoppage. Copies of this plan shall be available to all supervisory personnel who shall familiarize themselves with it. The Kansas department of health and environment shall be notified immediately of incidents of work stoppage. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-358. Policies relating to animals at the center. (a) If animals or pets are kept at the center, written policies shall be developed for their care. These policies shall be approved by the Kansas department of health and environment.

(b) Animals shall have current immunizations as recommended by a veterinarian. A record of immunizations shall be kept on file at the center.

(c) Animals that represent a hazard to juveniles shall be excluded from the center. Hazardous animals shall include, but not be limited to snapping turtles, pit bulldogs, and poisonous snakes and insects.

(d) The pet area of each center shall be maintained in a clean and sanitary manner. No animal or bird shall be in the kitchen while food is being prepared. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

28-4-359. Environmental standards. (a) General building requirements.

(1) Each building shall meet the legal requirements of the community as to building code,

zoning, fire protection, water supply and sewage disposal. Each center shall use public water and sewage systems, or shall have private water and sewage systems having approval and permits as required by K.S.A. 65-163 and K.S.A. 65-165 and amendments thereto. Where local fire regulations do not exist, construction shall be in compliance with the Kansas fire prevention code. When local and state regulations differ, the more stringent requirement shall prevail.

(2) A licensed architect shall be responsible for the plans for any newly constructed building or for any major addition or alteration to an existing building.

(A) In the case of a new building, preliminary plans and outline specifications, including plot plans, shall be submitted to the Kansas department of health and environment for review prior to commencing the final working drawings and specifications. The final working drawings, construction specifications and plot plans shall be submitted to the department for review and written approval prior to the letting of contracts.

(B) In the case of an addition or alteration to an existing building, a written statement defining the proposed use of the construction and the plans and specifications shall be submitted to the Kansas department of health and environment for review and written approval prior to commencing construction.

(3) If construction is not commenced within one year of the submittal of proposal for a new building or the addition or alteration to an existing building, the plans and proposal shall be resubmitted to the Kansas department of health and environment before proposed construction begins.

(b) Location and grounds requirements.

(1) Community resources such as health services, police protection, and fire protection from an organized fire department shall be available to the center.

(2) There shall be at least 100 square feet of outside activity space available per juvenile expected to utilize each area at any one time.

(3) The outside activity area shall be free of physical hazards.

(4) If the center is on the same grounds as any other type facility, the center shall be a separate, self-contained unit. No secure facility, other than a juvenile detention center, shall be attached to or on the grounds of an adult jail or lockup. When a juvenile detention facility is in the same building

or on the same grounds as an adult jail or lockup, there shall be:

(A) Total separation of the juvenile and adult facility spatial areas such that there could be no haphazard or accidental contact between juvenile and adult residents in the respective facilities;

(B) total separation in all juvenile and adult program activities within the facilities, including recreation, education, counseling, health care, dining, sleeping and general living activities; and

(C) separate juvenile and adult staffs, including management, security staff and direct care staff such as recreational, educational and counseling staff members.

(5) There shall be sufficient space for visitor and staff parking at each center.

(c) The water supply to each center shall be from a source approved and certified by the health authority.

(1) Plumbing shall be installed and maintained in compliance with local and state plumbing codes.

(2) Any privately owned water supply shall be approved by the county health officer or the Kansas department of health and environment.

(d) Structural requirements.

(1) Center construction shall provide for the removal of architectural barriers to disabled persons in accordance with state and federal statutes. All parts of each center shall be accessible to and usable by disabled persons.

(2) Each center's structural design shall facilitate personal contact and interaction between staff members and juveniles.

(3) Asbestos shall not be used in new or remodeling construction. Before any remodeling construction is started, any friable asbestos shall be covered and sealed in a manner that provides a protective barrier between the asbestos and the occupants of the building. The method of handling shall be in compliance with K.A.R. 28-50-1 through 28-50-14, the Kansas department of health and environment regulations governing asbestos control.

(4) Floors shall be smooth and free from cracks, easily cleanable and shall not be slippery. Floor covering for living quarters shall be required. All floor covering shall meet fire safety regulations, be kept clean and be maintained in good repair.

(5) Walls shall be smooth, easily cleanable and in sound condition. Paneling shall meet any applicable fire safety regulations. Lead-free paint shall be used on all painted surfaces.

(6) Juveniles' rooms shall be limited to the ground level and above. Any room with floor level more than 30 inches below ground level shall be considered a basement. The minimum square footage of floor space shall be 80 square feet in single rooms, and an average of not less than 60 square feet of floor space per person in rooms accommodating more than one person. At least one dimension of the usable floor space unencumbered by furnishings or fixtures shall be no less than seven feet. The minimum ceiling height shall be seven feet eight inches over 90% of the room area. An even temperature of between 68°Fahrenheit and 78°Fahrenheit shall be maintained with an air exchange of at least four times per hour.

(7) Bedrooms occupied by juveniles shall have a window source of natural light. Access to a drinking water source and toilet facilities shall be available 24 hours a day. Locking systems shall be approved by the state fire marshal or the marshal's designee.

(8) Separate beds with level, flat mattresses in good condition, shall be provided for each juvenile. Beds shall be above the floor level.

(9) Adequate, clean bedding shall be provided for each juvenile.

(10) All quarters utilized by juveniles shall have minimum lighting of 20 foot candles in all parts of the room. There shall be minimum lighting of 35 foot candles in areas used for reading, study or other close work.

(11) There shall be adequate space for study and recreation.

(12) Each living unit shall contain:

(A) Furnishings that provide sufficient seating for the maximum number of juveniles expected to use the area at any one time;

(B) writing surfaces that provide sufficient space for the maximum number of juveniles expected to use the area at any one time;

(C) furnishings that are consistent with the security needs of the assigned juveniles; and

(D) adequate central storage for household supplies, bedding, linen and recreational equipment.

(13) If a center has dayrooms, they shall provide space for varied juvenile activities. Dayrooms shall be situated immediately adjacent to the juvenile sleeping rooms but separated from them by a floor-to-ceiling wall. Each dayroom shall provide at least 35 square feet per person, exclusive of lavatories, showers and toilets, for the maximum number of juveniles expected to use the dayroom area at any one time.

(14) There shall be a working telephone readily accessible to staff members in all areas of the building. Emergency numbers such as fire, police, hospital, physician, poison control center and ambulance shall be posted by each phone.

(15) The inside program and activity areas, excluding the sleeping rooms, day room and class rooms, shall provide floor space equivalent to a minimum of 100 square feet per juvenile.

(16) Sufficient space shall be provided for contact visiting. There shall be adequately designed space to permit screening and search of both juveniles and visitors. Storage space shall be provided for the secure storage of visitors' coats, handbags and other personal items not allowed into the visiting area.

(17) Each room used for locked isolation shall meet the requirements for an individual bedroom.

(A) The walls of each room used for locked isolation shall be completely free of objects.

(B) The door of each room used for locked isolation shall be equipped with a window mounted in a manner which allows inspection of the entire room. Glass in this window shall be impact-resistant and shatterproof.

(C) The locking system shall be approved by the state fire marshal or the marshal's designee.

(18) A service sink and storage area for cleaning supplies shall be provided in a well ventilated room separate from kitchen and living areas.

(e) Food services.

(1) Food storage, preparation and service shall comply with K.A.R. 28-36-20 through 28-36-29, the Kansas department of health and environment regulations governing food and lodging services.

(2) All foods not requiring refrigeration shall be stored at least six inches above the floor in clean, dry, well-ventilated storerooms or other approved areas with no overhead drain or sewer lines.

(3) Dry bulk food which is not in an original, unopened container shall be stored in metal, glass or food-grade plastic containers with tight-fitting covers and shall be labeled.

(4) Poisonous or toxic materials shall not be stored with or over food. If medication requiring refrigeration is stored with refrigerated food, the medication shall be stored in a locked medicine box under all food items in the refrigerator.

(5) All perishables and potentially hazardous foods shall be continuously maintained at 45°Fahrenheit or lower in the refrigerator, or 10°Fahrenheit or lower in the freezer, with 0°Fahrenheit recommended.

(A) Each cold storage facility shall be provided with a clearly visible, accurate thermometer.

(B) All foods stored in the refrigerator shall be covered.

(C) Food not stored in the original container shall be labeled with the contents and date.

(D) Raw meat shall be stored under all other food items in the refrigerator before cooking.

(E) Adequate facilities to maintain product temperatures shall be available.

(6) All dense hot foods shall be stored in containers four inches or less deep.

(7) Food preparation and service.

(A) Each food preparation area shall be adequately equipped for the sanitary preparation and storage of food and washing of dishes and utensils. Food shall be prepared and served in a sanitary manner.

(B) Cooking equipment shall be kept clean and in good condition.

(C) Dishes shall have hard-glazed surfaces and shall be free of cracks and chips.

(D) Dishes, kitchen utensils and serving equipment shall be maintained in a sanitary condition using one of the following methods:

(i) A three-compartment sink supplied with hot and cold running water to each compartment and a drain board for washing, rinsing, sanitizing and air drying, with appropriate chemical test kit for testing the sanitizing solution;

(ii) a domestic-type dishwasher for groups of 24 or fewer persons;

(iii) a commercial-type dishwasher providing a 12 second rinse with 180° Fahrenheit water, for groups of 25 persons or more;

(iv) other methods of sanitizing by manual or mechanical cleaning in accordance with K.A.R. 28-36-24 (3) and (4); or

(v) the use of disposable plates, cups, and plastic utensils of food-grade medium weight. Disposable table service shall be used only one time and then destroyed.

(E) Tables shall be in good condition and shall be washed before and after each meal. Floors shall be swept after meals.

(F) Meat shall be thawed using one of the following methods:

(i) Removing the meat from the freezer in advance and putting it in the refrigerator to thaw;

(ii) placing the meat under running, tepid water 72° Fahrenheit; or

(iii) in the microwave as part of the cooking process.

(8) Sanitary conditions.

(A) Only authorized persons shall be in the kitchen.

(B) Each kitchen shall be equipped with separate hand washing facilities. Personnel shall wash their hands before handling food and after working with raw meat.

(C) Hair shall be restrained.

(D) No staff member with any open wounds or infections shall cook.

(E) Clean and soiled linen shall be properly stored in the kitchen area.

(F) A covered trash can shall be used in the restroom used by the kitchen staff.

(9) Food safety.

(A) All dairy products shall be pasteurized. Dry milk shall be used for cooking only.

(B) Meat products shall be obtained from government-approved sources.

(C) Home canned foods, other than jams and jellies, and home frozen foods shall not be served in the center.

(D) Commercially canned food from dented, rusted, bulging or leaking cans, and food from cans without labels shall not be used.

(10) Nutrition.

(A) Meals and snacks shall meet the nutrient needs of the juveniles in accordance with recommended dietary allowances. A sufficient quantity of food shall be prepared for each meal to allow each juvenile second portions of vegetables, fruit, bread and milk.

(B) Special diets shall be provided for juveniles, if medically indicated, or to accommodate religious practice, as indicated by a religious consultant.

(C) Menus shall be planned one week in advance. Copies of the menus for the preceding month shall be kept on file and available for inspection.

(11) If meals are catered:

(A) The meals shall be obtained from sources licensed by the Kansas department of health and environment.

(B) Food shall be transported in covered and temperature-controlled containers and shall not be allowed to stand. Hot foods shall be maintained at not less than 140° Fahrenheit, and cold foods shall be maintained at 45° Fahrenheit or less.

(f) Toilets and lavatories.

(1) For each eight or fewer juveniles of each sex, there shall be at least one toilet, one lavatory and a bathtub or shower. All toilets shall be above floor level.

(2) Each bathroom shall be ventilated. Each inside bathroom shall have a mechanical ventilating system to the outside with a minimum of ten air changes per hour.

(3) Toilet and bathing facilities and drinking water shall be convenient to sleeping quarters, living and recreation rooms.

(4) Cold and hot water, not exceeding 120° Fahrenheit, shall be supplied to lavatories, bathtubs and showers.

(5) Toilet facilities and drinking water shall be convenient to reception and admission areas.

(6) Locked sleeping rooms shall be equipped with a drinking fountain, lavatory and toilet, unless a communication system or procedure is in effect to give the resident immediate access to a lavatory, toilet and drinking water.

(g) Laundry.

(1) If laundry is done at the center, laundry fixtures shall be located in an area separate from food preparation areas and shall be installed and used in such manner as to safeguard the health and safety of the juveniles.

(2) Soiled linen shall be stored separately from clean linen. In centers constructed after January 1, 1974, separate hand washing facilities shall be provided in each laundry room which serves 25 or more persons.

(3) Blankets shall be laundered or sanitized before reissue.

(4) Blankets, when used with sheets, shall be laundered at least once each month.

(5) Mattresses shall be water repellent and washed down and sprayed with disinfectant before reissue. Mattress materials and treatments shall meet state fire marshal regulations.

(6) Adequate space shall be allocated for storage of clean and dirty linen and clothing. If in-house laundry service is provided, adequate space shall be allocated for the laundry room and storage of laundry supplies, including locked storage for chemical agents used in the laundry area.

(h) Building maintenance standards.

(1) Each building shall be clean at all times and free from accumulated dirt, vermin and rodent infestation.

(2) Floors and walking surfaces shall be kept free of hazardous substances at all times.

(3) A schedule for cleaning each building shall be established and maintained.

(4) Floors shall be swept and mopped daily.

(5) Washing aids, such as brushes, dishmops

and other hand aids used in dishwashing activities, shall be clean and used for no other purpose.

(6) Mops and other cleaning tools shall be cleaned and dried after each use and stored in a well-ventilated place on adequate racks.

(7) Insecticides, rodent killers and other poisons shall be used under careful supervision. These poisons shall be stored in a locked area.

(8) Toilets, lavatories, sinks and other such facilities in the living quarters shall be cleaned thoroughly each day. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1979; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987; amended Aug. 23, 1993.)

28-4-360. Compliance with regulations.

(a) Center licenses shall be prominently displayed.

(b) A copy of these regulations shall be kept on the premises at all times. A copy of the regulations for licensing of detention centers and secure care centers for children and youth shall be available to all staff members.

(c) Centers licensed January 1, 1993 or later shall be required to meet structural requirements as stated in K.A.R. 28-4-359(d). Centers licensed before January 1, 1993 which are in compliance with the regulations for licensing detention centers and secure care centers for children and youth that became effective May 1, 1979 and were amended November 19, 1986, May 1, 1987 and February 26, 1990 shall continue to comply with those rules and regulations applicable to physical plant requirements regardless of the minimums established under current regulations. Each existing center which makes any structural addition or alteration, shall come into compliance with current structural requirements.

(d) Each applicant or licensee may submit a written request for an exception to a regulation to the Kansas department of health and environment. An exception may be granted if the secretary determines that the exception would not diminish the current level of juvenile care and if statutory requirements are not violated. The nature of the exception, the conditions, and the duration of the exception shall be in writing. Written notification shall be given to the licensee.

(e) Each center shall develop and implement a quality assurance program to ensure consistent compliance with these regulations. The quality assurance program shall provide for:

(1) Review of policies, procedures and practice; and

(2) reconciliation with licensure requirements.

(f) The county health department representative or the contracted surveyor who evaluates the center for licensing purposes shall be used as a consultant with regard to compliance with licensing regulations.

(g) The Kansas department of health and environment shall revoke a license or deny any application in any case in which there is a failure of compliance with the provisions of these regulations. (Authorized by K.S.A. 65-508 and implementing K.S.A. 65-504 and K.S.A. 65-508; effective May 1, 1979; amended Aug. 23, 1993.)

MATERNITY CENTERS

28-4-370. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-502, 65-504, 65-508; effective May 1, 1981; revoked July 9, 2010.)

28-4-371. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-503, 65-508, K.S.A. 1982 Supp. 65-504, 65-505; effective May 1, 1981; amended, T-83-24, Aug. 25, 1982; amended May 1, 1983; revoked July 9, 2010.)

28-4-372. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-502, 65-504, 65-509, 65-510, 65-511; effective May 1, 1981; revoked July 9, 2010.)

28-4-373. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-502, 65-504, 65-507, 65-508; effective May 1, 1981; revoked July 9, 2010.)

28-4-374. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, 65-508; effective May 1, 1981; amended May 1, 1985; revoked July 9, 2010.)

28-4-375. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, 65-508; effective May 1, 1981; amended May 1, 1985; revoked July 9, 2010.)

28-4-376. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, 65-508, 65-510; effective May 1, 1981; amended May 1, 1985; revoked July 9, 2010.)

28-4-377. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1981; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987; revoked July 9, 2010.)

28-4-378 and 28-4-379. (Authorized by

and implementing K.S.A. 65-508; effective May 1, 1981; revoked July 9, 2010.)

CHILDREN WITH SPECIAL HEALTH CARE NEEDS PROGRAM

28-4-400. Definitions. (a) “Cash assets” means money, savings accounts, saving certificates, checking accounts, and stocks and bonds.

(b) “Diagnostic service” means an evaluation to identify a handicapping disease or disease process.

(c) “Emergency” means an unanticipated, urgent event requiring immediate medical treatment.

(d) Family.

(1) “Family,” for an eligible person who resides with the person’s parents, stepparents or legal guardian or who is considered to be a dependent of that person’s parents, stepparents or legal guardian for income tax purposes, means the eligible person, person’s parents, stepparents or legal guardian and all other persons who reside in the same home as that of the person. Family shall not include persons who lease or rent a portion of the residence.

(2) “Family,” for an eligible person who has established a separate residence and is no longer considered a dependent of the person’s parents, stepparents or legal guardian for income tax purposes, means the eligible person, the person’s spouse and children, and all other relatives and persons who reside in the same home as that person. Family shall not include persons who lease or rent a portion of the residence.

(e) “Family income” means the total income received by all adult members of the family, based upon one or more of the following, with the addition of non-taxable benefits from whatever source:

(1) the total amount of adjusted gross income reported for federal income tax purposes on the most recent federal income tax return;

(2) three months of pay stubs; or

(3) a letter of anticipated earnings from the employer when the most recent federal income tax return does not reflect current income.

(f) “Family living allowance” means the amount established by the secretary as specified in K.A.R. 28-4-403(b).

(g) “Health care plan” means documents prepared by the secretary that state a plan of treatment, describe the authorized services, and identify the approved providers of service, the time frame for provision of services, and the party responsible for payment for services.

(h) “Prior authorization” means the approval of

a request to provide a specific service before the provision of the service, or in an emergency, within two working days after the emergency occurs.

(i) “Managed care” means coordination, direction, and provision of health services to an identified group of individuals by providers, agencies or organizations.

(j) “Medicaid” means the title xix of the social security act.

(k) “Medical treatment” means any medical or surgical service and any medical equipment, device or supply provided to a person who is eligible for assistance under the services for children with special health care needs program.

(l) “Resident” means a person who is living in the state with the intention of making a permanent home in the state.

(m) “Secretary” means the secretary of the department of health and environment or the secretary’s designee. (Authorized by and implementing K.S.A. 65-5a08; effective, E-82-10, April 27, 1981; effective May 1, 1982; amended May 1, 1983; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-401. Responsibilities of individuals who apply for or who receive services. (a) Each applicant shall fulfill the following requirements:

(1) Supply financial, insurance, and family information essential to the establishment of eligibility within 30 days of the request for service, on forms prescribed by the secretary;

(2) submit written permission, on forms prescribed by the secretary, for release of information needed to determine medical and financial eligibility; and

(3) report to the secretary changes in any of the following circumstances:

(A) the eligible person’s address;

(B) the number of persons living in the home;

(C) marital status of eligible person, parents, or legal guardians;

(D) custody of the eligible person;

(E) medical insurance coverage for the eligible person;

(F) medicaid eligibility or supplemental security income eligibility for the eligible person;

(G) family income or cash assets of more than \$500.00 per year; or

(H) other circumstances that affect the special health care needs of the eligible person.

(b) Each eligible person who is enrolled in the

department of social and rehabilitation services managed care arrangements shall report, within 10 working days of enrolling, the following information:

(1) The eligible person’s medicaid number;

(2) the name of the managed care provider; and

(3) the name of the eligible person’s primary care network physician at the time of application to the managed care provider or at the time of subsequent enrollment or change in enrollment in the managed care provider arrangement.

(c) Each eligible person enrolled in medicaid shall participate in the kan-be-healthy program.

(d) Each eligible person enrolled in a managed care arrangement under the medicaid program or an insurance policy shall obtain referrals for care as required by the managed care provider.

(e) Each eligible person shall perform the following actions:

(1) Obtain prior authorization for services;

(2) apply for insurance, medicaid coverage, supplemental security income, or benefits from other sources, when requested;

(3) assign the insurance benefits to hospitals and other providers of service for any medical treatment;

(4) apply the benefits of any non-assignable insurance by making payments to hospitals or other providers of service for items ordered by the attending physician;

(5) reimburse the secretary for any insurance proceeds sent directly to the recipient if the insurance payment is made for medical treatment provided by the services for children with special health care needs program; and

(6) submit any bills received for prior-authorized services to the secretary within six months of the date of service. (Authorized by and implementing K.S.A. 65-5a08; effective, E-82-10, April 27, 1981; effective May 1, 1982; amended May 1, 1983; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended, T-87-47, Dec. 19, 1986; amended May 1, 1987; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-402. (Authorized by and implementing K.S.A. 1984 Supp. 65-5a08; effective, E-82-10, April 27, 1981; effective May 1, 1982; amended May 1, 1983; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; revoked May 1, 1987.)

28-4-403. Financial eligibility. (a) (1) The uniform standard for determining eligibility shall be the annual margin as calculated in paragraph (a)(2). If the annual margin is zero or below, the person shall be eligible for financial assistance for medical treatment. If the annual margin is above zero, the person shall not be eligible for financial assistance, except as provided in subsections (d) and (e). The factors to be used in calculating the annual margin shall be the following items:

- (A) family income;
- (B) cash assets;
- (C) family living allowance;
- (D) anticipated specialized health care expenditures for the eligible person and other family members; and
- (E) the health benefits available under insurance coverage for the eligible person.

(2) The annual margin shall be calculated by the following method:

(A) Add the amount of the family income to the amount of cash assets above the maximum allowed under subsection (c); and

(B) subtract from the total of paragraph (a)(2) (A) the following:

- (i) the family living allowance as determined in subsection (b); and
- (ii) the amount of the anticipated health care expenditures for the person that will not be paid by the person's health insurance coverage.

(b) The family living allowance shall be 185 percent of the poverty guidelines updated annually in the federal register by the U.S. department of health and human services under the authority of section 673(2) of the omnibus budget reconciliation act of 1981 effective July 1, following the publication.

(c) The maximum cash assets allowed a family shall be 15 percent of the family living allowance.

(d) If within 12 months after application the family spends down the annual margin to zero or below per subsection (e) through the family's actual or obligated expenditures for medical care for any family member, the person shall be, at that time, financially eligible for assistance for the remainder of the 12-month period. These expenditures shall be in addition to any expenditure or reimbursement made by a health insurance carrier or other third party payor.

(e) In order to spend the annual margin down to zero, the family shall agree to pay the following expenses:

- (1) medical expenses and travel expenses re-

lated to medical treatment or health support services, supplies or equipment; or

(2) a portion of actual or anticipated medical expenses, and travel expense related to medical treatment or a portion of health support services, supplies or equipment as documented in the health care plan. (Authorized by K.S.A. 65-5a08; implementing K.S.A. 65-5a12; effective, E-82-10, April 27, 1981; effective May 1, 1982; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-404. Services. (a) Diagnostic services shall be made available to each eligible person who is a resident of this state and who is believed to have a severe handicap, disability, or chronic disease.

(b) Diagnostic services shall be authorized before the services are rendered and shall be provided in facilities and by providers approved by the secretary.

(c) Medical treatment services shall be provided to individuals meeting the medical and financial eligibility criteria found in K.A.R. 28-4-403 and K.A.R. 28-4-406, respectively.

(d) Medical treatment services related to the eligible medical diagnosis shall be provided as recommended by an approved provider. The medical treatment services shall be within the parameters of standard medical practice, shall not include experimental or investigational treatments, organ transplants or acupuncture, and shall be approved by the secretary.

(e) Medical treatment services shall be authorized before the services are rendered and shall be provided in facilities and by providers approved by the secretary. (Authorized by K.S.A. 65-5a08; implementing K.S.A. 65-5a10; effective May 1, 1982; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended Sept. 12, 1997.)

28-4-405. Providers of service. (a) Application. Each person or corporation desiring to supply services or sell prosthetic devices, equipment, appliances or supplies shall file an application with the secretary. Each application shall be approved or disapproved by the secretary, interested parties shall be notified of the action taken, and a list of approved providers of service shall be maintained.

(b) Designation of hospitals. Each hospital approved to provide medical and surgical services for the care and treatment of eligible persons, except for those out-of-state hospitals authorized by K.A.R. 28-4-408, shall meet the following requirements:

(1) For inpatient services, the hospital shall meet these standards:

(A) be licensed as a hospital in Kansas;

(B) be certified by the joint commission on accreditation of health care organizations;

(C) have staff physicians certified by specialty boards in the specialty appropriate for the needs of the eligible person;

(D) have available consultation in other specialty areas for the cases being treated;

(E) have appropriate operating facilities for the specialty for which the hospital is approved;

(F) have other facilities appropriate for the application of plaster or other cast material for eligible persons;

(G) have regularly scheduled inservice programs relating to children and pediatric conditions; and

(H) provide the following services for children:

(i) qualified professional nurses assigned to care of children;

(ii) at least one pediatrician on the hospital staff, with a designated chief of pediatrics; and

(iii) nonrestrictive visiting hours for parents and suitable recreational facilities for children.

(2) For outpatient services the hospital shall comply with the following standards:

(A) Be licensed as a hospital in Kansas;

(B) have an x-ray department with facilities and qualified personnel to treat children;

(C) have a physical therapy department with qualified personnel to treat children;

(D) have an occupational therapy department with qualified personnel to treat children;

(E) have a respiratory therapy department with qualified personnel to treat children;

(F) have regularly scheduled inservice programs for all health-care staff relating to children and pediatric conditions;

(G) have a laboratory department with facilities and qualified personnel for hematology, chemistry, microbiology, and serology testing; and

(H) have persons qualified to give anesthesia.

(c) Designation of laboratory facilities. Each laboratory facility approved to provide services for the care and treatment of eligible persons, except for those laboratory facilities authorized by K.A.R.

28-4-408, shall maintain a valid clinical laboratory improvement certificate appropriate for the type and complexity of the services performed.

(d) Designation of radiology and nuclear medicine facilities. Each x-ray facility approved to provide services for the care and treatment of eligible persons, except for those x-ray facilities authorized by K.A.R. 28-4-408, shall meet the following standards:

(1) Maintain compliance with K.A.R. 28-35-133 through 28-35-338, as authorized by K.S.A. 48-1607;

(2) have on staff a radiologist supervising the facility and all patient services;

(3) have on staff technical personnel who are qualified for the type of services being provided;

(4) have written medical policies and procedures that are developed and maintained under the direction of the radiologist responsible for patient services, including policies and procedures related to interpretation of all radiologic exams, preparation and provision of written reports, and emergency situations; and

(5) have regularly scheduled inservice programs for all staff relating to children and pediatric conditions.

(e) Designation of ambulatory surgical facilities. Each ambulatory surgical facility approved to provide services for the care and treatment of eligible persons, except for those ambulatory surgical facilities authorized by K.A.R. 28-4-408, shall fulfill these requirements:

(1) Be licensed as an ambulatory surgical facility by the secretary;

(2) have qualified pediatric nurses regularly assigned to care for the pediatric clients;

(3) have physicians performing the surgeries who are certified by specialty boards in the specialty appropriate for the needs of the child and for which the facility is approved;

(4) have dentists who are qualified to perform the procedures for which the facility is approved;

(5) have qualified personnel to give anesthesia to pediatric clients;

(6) have a separate area for children with provisions made for parents who wish to remain with their child during preparation for surgery and the post-operative period, including the recovery from anesthesia;

(7) have facilities to isolate clients with conditions requiring isolation or separation;

(8) have operating facilities appropriate for the type of procedures conducted at the facility;

(9) have a laboratory department with facilities and qualified personnel for hematology, chemistry, microbiology, and serology testing as appropriate for the type of procedures conducted at the facility;

(10) have a radiology department with facilities and qualified personnel to treat children for conditions related to the type of procedures conducted at the facility;

(11) have other facilities appropriate for the type of procedures conducted at the facility;

(12) have regularly scheduled inservice programs for all health-care staff relating to children and pediatric conditions;

(13) have written protocols which state the conditions under which a client would be transferred to a hospital to receive services not available within the ambulatory surgical facility;

(14) have written protocols which state the method of transfer of a client to the hospital, when necessary; and

(15) have a written agreement with a hospital to accept a patient transferring from the ambulatory surgical facility in an emergency situation.

(f) Designation of prosthetics and orthotics appliance facilities. Each prosthetics and orthotics appliance facility approved to provide services for the care and treatment of eligible persons shall have employees certified by the American board for certification in orthotics and prosthetics, in accordance with the "practitioner certification book of rules," effective October 1996, and "technician registration book of rules," revised June 1994.

(g) Designation of pharmacies. Each pharmacy approved to provide services for the care and treatment of eligible persons shall be registered as a pharmacy by the Kansas state board of pharmacy.

(h) Designation of home health agencies. Each home health agency approved to provide services for the care and treatment of eligible persons shall be licensed as a home health agency by the secretary.

(i) Designation of other providers. Other providers approved to provide medical, surgical, and other services for the care and treatment of eligible persons, except for out-of-state providers authorized by K.A.R. 28-4-408, shall meet the following standards.

(1) Each audiologist shall be licensed as an audiologist by the secretary.

(2) Each dentist shall be licensed by the Kansas dental board, and each dental specialist shall be

licensed to practice that specialty by the Kansas dental board.

(3) Each hearing aid dealer shall be licensed by the Kansas board of hearing aid examiners to fit and dispense hearing aids.

(4) Each nurse shall be licensed as a registered professional nurse by the Kansas state board of nursing.

(5) Each nutritionist shall be licensed as a dietitian by the secretary.

(6) Each ophthalmologist shall be certified by the national examining board of ophthalmologists, in accordance with the "certification, registration and recertification," effective 1995.

(7) Each occupational therapist shall be licensed as an occupational therapist by the Kansas state board of healing arts.

(8) Each optometrist shall be licensed by the Kansas board of examiners in optometry.

(9) Each oral surgeon shall be licensed as an oral surgeon by the Kansas dental board.

(10) Each orthodontist shall hold an orthodontist's license issued by the Kansas dental board.

(11) Each physical therapist shall be licensed as a physical therapist by the Kansas state board of healing arts.

(12) Each physician shall be licensed by the Kansas state board of healing arts. Physicians providing medical specialty services shall be certified by the appropriate specialty board within three years of being accepted as a provider for the services for children with special health care needs program.

(13) Each respiratory therapist shall be licensed by the state board of healing arts.

(14) Each social worker shall have a master's degree in social work and shall be licensed by the Kansas behavioral sciences regulatory board.

(15) Each speech therapist shall be licensed as a speech therapist by the secretary.

(j) Responsibilities. Each provider of service shall agree that race, color, religion, national origin or ancestry shall not be a basis for refusing to provide service. In addition, each provider shall agree to comply with the following requirements:

(1) Submit reports requested by the services for children with special health care needs program;

(2) accept responsibility for the care and treatment provided to persons under the services for children with special health care needs program;

(3) be a medicaid provider;

(4) accept and bill insurance and medicaid, when available;

(5) accept as payment in full, payment from medicaid for medicaid-eligible services, without receiving a supplement from the services for children with special health care needs program;

(6) accept as payment in full, payments from an insurance carrier for services covered under a policy, supplemented to equal the services for children with special health care needs allowable rate, when applicable;

(7) accept as payment in full the fees established by the secretary and shall not bill families for any service covered by the services for children with special health care needs program without permission of the secretary; and

(8) notify the secretary of withdrawal from the services for children with special health care needs program. (Authorized by and implementing K.S.A. 65-5a08; effective May 1, 1982; amended May 1, 1983; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 26, 1989; amended April 15, 1991; amended Sept. 12, 1997.)

28-4-405a. Payment. (a) Each provider shall submit a claim to the secretary for payment for a prior-authorized medical treatment within six months of the date of service.

(b) Each claim submitted for payment shall provide the following information:

- (1) the eligible person's name and address;
- (2) the date the medical treatment was provided;
- (3) the appropriate procedure code; and
- (4) the insurance or medicaid status of the eligible person or both insurance and medicaid status, when applicable.

(c) Each provider shall submit to the secretary the explanation of benefits from the insurance carrier or the remittance advice from medicaid, as applicable, for final adjudication of each claim.

(d) Claims by individuals or hospitals who do not meet the requirements of subsections (a) to (j), inclusive, of K.A.R. 28-4-405, as amended, may be allowed by the secretary if the individual or hospital provides emergency medical treatment for an eligible person, or with the prior authorization of the secretary, provides specialized medical treatment for an eligible person. (Authorized by and implementing K.S.A. 65-5a08; effective, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-405b. Termination. (a) Any provider may be terminated by the secretary from participation in the services for children with special health care needs program for one or more of the following reasons:

(1) Voluntary withdrawal of the provider from participation in the program;

(2) suspension or termination of a required professional license or certificate; or

(3)(A) non-compliance with applicable state laws or regulations; or

(B) unethical or unprofessional conduct.

(b) Any provider may request a hearing before termination of a provider's participation in the services for children with special health care needs program for either of the reasons listed in paragraph (a)(3). (Authorized by K.S.A. 65-5a08; implementing K.S.A. 65-6a09; effective, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-406. Conditions eligible for treatment. For a person to be eligible for financial assistance under the services for children with special health care needs program, the person shall be diagnosed with one or more of the following conditions:

(a) Myelomeningocele;

(b) Cleft palate, cleft lip, and related problems;

(c) Cardiovascular conditions, except for high blood pressure;

(d) Neurosurgical conditions, limited to permanent spinal cord injury that results in paralysis, or hydrocephalus;

(e) Orthopedic conditions, including the following:

(1) Congenital anomalies leading to physical limitations or functional disabilities which interfere with performance of age-appropriate activities;

(2) Acquired conditions leading to physical handicaps, excluding non-vitamin D resistant rickets;

(3) Fractures in which there is a complication in healing;

(4) Developmental problems requiring surgical correction; or

(5) Muscle problems that are of a disabling nature, limited to muscular dystrophies, myositis ossificans progressiva or poliomyelitis;

(f) Juvenile rheumatoid arthritis;

(g) Specified genetic and metabolic conditions, limited to phenylketonuria, cystic fibrosis, congenital hypothyroid, galactosemia, and sickle cell disease;

(h) Hearing problems that lead to or that present a high risk for permanent hearing loss;

(i) Congenital gastrointestinal problems requiring surgical correction;

(j) Genitourinary problems, limited to exstrophy of bladder or urethral valves which require surgery;

(k) Burns requiring surgical or compression garment treatment;

(l) Seizures, limited to outpatient services;

(m) Craniofacial anomalies; or

(n) Vision problems, limited to glaucoma, congenital cataracts or cataracts resulting from metabolic disease, retinal detachment with retinal defect, retinoblastoma, or retinal disorders excluding retinopathy of prematurity. (Authorized by and implementing K.S.A. 65-5a14; effective May 1, 1982; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-407. System of priorities. Persons with the diagnosis specified in subsection (a) of K.A.R. 28-4-406 shall have priority assistance, with subsequent priorities for assistance established in descending order for the diagnoses listed in subsections (b) through (n), inclusive. Persons with the diagnoses specified in subsection (n) of K.A.R. 28-4-406 shall be assigned the lowest priority for assistance. (Authorized by and implementing K.S.A. 65-5a14; effective May 1, 1982; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; amended, T-86-46, Dec. 18, 1985; amended May 1, 1986; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-408. Out-of-state service provision. (a) Treatment services may be provided out of state on an individual basis under any of the following conditions.

(1) The medical specialty is not practiced in Kansas.

(2) The medical treatment is not available in Kansas, and two approved medical specialists recommend out-of-state treatment.

(3) Kansas facilities have no hospital beds available for the client.

(4) The eligible person, traveling outside of Kansas but within the United States and its terri-

tories, requires emergency treatment for the eligible condition, if Kansas residency is not severed through action or intent.

(b) Treatment services may be provided out of state for eligible children with specific conditions if there is a written agreement between the secretary and the service provider establishing a treatment site for ongoing care.

(c) When treatment services are provided out of state, the eligible family shall be responsible for the costs of the following:

(1) treatment that is greater than approved charges under the services for children with special health care needs program;

(2) travel for the eligible child and family; and

(3) maintenance of the family during the treatment.

(d) Initial diagnostic services out of state shall not be authorized. (Authorized by and implementing K.S.A. 65-5a08; effective, T-86-46, Dec. 18, 1985; effective May 1, 1986; amended May 1, 1987; amended Dec. 26, 1989; amended Sept. 12, 1997.)

HEMOPHILIA PROGRAM

28-4-410. Definitions. (a) "Blood bank" means a licensed facility that supplies blood or clotting factor.

(b) "Clotting factor" means a substance derived from human blood or prepared by recombinant deoxyribonucleic acid technology.

(c) "Cash assets" means money, savings accounts, savings certificates, checking accounts, and stocks and bonds.

(d) "Comprehensive centers" means those facilities that provide services to individuals with hemophilia, and meet the standards established by the national hemophilia foundation medical and scientific advisory council in "standards and criteria: for the care of persons with congenital bleeding disorders," approved on July 10, 1994.

(e) "Emergency" means an unanticipated, urgent event requiring immediate medical treatment.

(f) Family.

(1) "Family," for an eligible person who resides with the person's parents, stepparents or legal guardian or who is considered to be a dependent of that person's parents, stepparents or legal guardian for income tax purposes, means the eligible person who has hemophilia, that person's parents, stepparents or legal guardian and all other persons who reside in the same home as that of

the person who has hemophilia. Family shall not include persons who lease or rent a portion of the residence.

(2) "Family," for an eligible person who has established a separate residence and is no longer considered a dependent of that person's parents, stepparents or legal guardian for income tax purposes, means the eligible person who has hemophilia, that person's spouse and children, and all other relatives and persons who reside in the same home as that of the person who has hemophilia. Family shall not include persons who lease or rent a portion of the residence.

(g) "Family income" means the total income received by all adult members of the family based upon one or more of the following, with the addition of non-taxable benefits from whatever source:

(1) the total amount of adjusted gross income reported for federal income tax purposes on the most recent federal income tax return filed by each adult member of the family; or

(2) three months of pay stubs or a letter of anticipated earning from the employer of each adult member of the family when the most recent federal income tax does not reflect current income.

(h) "Family living allowance" means the amount established by the secretary as specified in K.A.R. 28-4-413.

(i) "Hemophilia" means a bleeding tendency that results from a genetically determined deficiency factor in the blood.

(j) "Hemophilia program" means services that are provided for the care and treatment of persons with hemophilia and that are administered by the secretary.

(k) "Home therapy" or "self therapy" means the administration of transfusions of blood concentrates or blood derivatives in a home setting.

(l) "Health care plan" means documents prepared by the secretary that state a plan of treatment, describe the authorized services, and identify the approved providers of service, the time frame for provision of services and the party responsible for payment for services.

(m) "Infusion" means therapeutic introduction of a fluid into a vein.

(n) "Infusion supplies" means syringes, needles and hemophilia infusion sets.

(o) "Prior authorization" means the approval of a request to obtain blood products and other efficacious agents or educational services pertaining to hemophilia before the provision of the service,

or in an emergency, within two working days after the emergency occurs.

(p) "Secretary" means the secretary of the department of health and environment or the secretary's designee. (Authorized by K.S.A. 65-1,134; implementing K.S.A. 65-1,132, 65-1,133; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-411. Responsibilities of individuals who apply for or who receive assistance. (a) Each applicant shall fulfill these requirements:

(1) supply financial, insurance and family information essential to the establishment of eligibility within 30 days of the request for service, on forms approved by the secretary;

(2) submit written permission on forms prescribed by the secretary for release of information needed to determine medical and financial eligibility; and

(3) report to the secretary changes in any of the following circumstances:

(A) eligible person's address;

(B) the number of persons living in the home;

(C) marital status of the eligible person, parents, or legal guardians;

(D) custody of the eligible person;

(E) medical insurance coverage for the eligible person;

(F) medicaid eligibility or supplemental security income eligibility for the eligible person;

(G) family income or cash assets of more than \$500.00 per year; or

(H) other circumstances that affect the special health care needs of the eligible person.

(b) Each eligible person who is enrolled in the department of social and rehabilitation services' managed care arrangements shall, within 10 working days of enrolling, report the following information:

(1) the eligible person's medical number;

(2) the name of the managed care provider; and

(3) the name of the eligible person's primary care network physician at the time of application or subsequent enrollment in the managed care arrangement.

(c) Each eligible person under 21 years of age enrolled in medicaid shall participate in the kan-be-healthy program.

(d) Each eligible person enrolled in a managed care arrangement under the medicaid program or an insurance policy shall obtain referrals for care as required by the managed care provider.

(e) Each eligible person shall fulfill these requirements:

(1) obtain prior authorization for services;
 (2) apply for insurance, medicaid coverage, supplemental security income or benefits from other sources, when requested;

(3) assign the insurance benefits to hospitals and other providers of service for any medical treatment;

(4) apply the benefits of any non-assignable insurance by making payments to hospitals or other providers of service for items ordered by the attending physician; and

(5) reimburse the secretary for any insurance proceeds sent directly to the recipient if the insurance payment is made for medical treatment provided by the hemophilia program.

(f) Each eligible person shall obtain from one of the comprehensive centers initial and annual evaluations of medical eligibility for the hemophilia program.

(g) Each eligible person shall submit any bills received for prior authorized services to the secretary within six months of the date of service.

(h) Each eligible person shall obtain from one of the comprehensive centers a written prescription for blood products or other efficacious agents and shall provide a copy of the current prescription to the secretary. (Authorized by and implementing K.S.A. 65-1,132; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-412. (Authorized by and implementing K.S.A. 1984 Supp. 65-1,132; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; revoked Dec. 26, 1989.)

28-4-413. Financial eligibility. (a)(1) The uniform standard for determining eligibility shall be the annual margin as calculated in paragraph (2). If the annual margin is zero or below, the person shall be eligible for financial assistance under the hemophilia program. If the annual margin is above zero, the person shall not be eligible for financial assistance, except as provided in subsections (d) and (e). The factors to be utilized in calculating the annual margin shall be the following items:

- (A) the family income;
- (B) cash assets;
- (C) family living allowance;
- (D) anticipated specialized health care expenditures

for the eligible person and other family members; and

(E) the benefits available under health insurance coverage for the eligible person.

(2) The annual margin shall be calculated by the following method:

(A) add the amount of the family income to the amount of cash assets above the maximum allowed under subsection (c); and

(B) subtract from the total of paragraph (a)(2) (A) the following:

(i) The family living allowance as determined in subsection (b); and

(ii) the amount of the anticipated health care expenditures for the person that will not be paid by the person's health insurance coverage.

(b) The family living allowance shall be 185 percent of the poverty guidelines updated annually in the federal register by the U.S. department of health and human services under the authority of section 673(2) of the omnibus reconciliation act of 1981, effective July 1 following the publication.

(c) The maximum cash assets allowed for a family shall be 15 percent of the family living allowance.

(d) If within 12 months after application the family spends down the annual margin to zero or below per subsection (e) through the family's actual or obligated expenditures for medical care for any family member, the person shall be, at that time, financially eligible for assistance for the remainder of the 12-month period. These expenditures shall be in addition to any expenditure or reimbursement made by a health insurance carrier or other third-party payor.

(e) In order to spend the annual margin down to zero, the family shall agree to pay the following expenses:

(1) medical expenses and travel expenses related to medical treatment, or health support services, supplies or equipment; or

(2) a portion of actual or anticipated medical expenses, and travel expenses related to medical treatment or a portion of health support services, supplies or equipment as documented in the health care plan. (Authorized by and implementing K.S.A. 65-1,132; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Dec. 26, 1989; amended Sept. 12, 1997.)

28-4-414. Payment. (a) Each provider shall submit a claim to the secretary for payment for a prior-authorized clotting factor or service within six months of the date of service.

(b) Each claim submitted for payment shall provide the following information:

- (1) the eligible person's name and address;
- (2) the date the service was provided;
- (3) the appropriate procedure code;
- (4) the insurance or medicaid status, or both, of the eligible person, when applicable.

(c) Each provider shall submit to the secretary the explanation of benefits from insurance carriers or the remittance advice from medicaid, as applicable, for final adjudication of each claim. (Authorized by K.S.A. 65-1,134; implementing K.S.A. 65-1,133; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Sept. 12, 1997.)

28-4-415. Conditions eligible for treatment. Each person who is eligible for financial assistance under the hemophilia program shall meet one or more of the following conditions. (a) The person requires continuing home therapy, under the direction of a comprehensive center, with clotting factor to avoid extensive hospitalization and other disabling effects associated with this chronic bleeding condition.

(b) The person requires education concerning the administration and management of home therapy for hemophilia. (Authorized by K.S.A. 65-1,134; implementing K.S.A. 65-1,132, 65-1,133; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Sept. 12, 1997.)

28-4-416. System of priorities. Provision of clotting factor and infusion supplies for home therapy shall be the highest priority for assistance, education for persons who have hemophilia and for families of persons who have hemophilia shall be the second-highest priority for assistance, and education for physicians, dentists, nurses and other professionals who assist persons with hemophilia shall be the lowest priority for assistance. (Authorized by K.S.A. 65-1,134; implementing K.S.A. 65-1,132, 65-1,133; effective, T-85-41, Dec. 19, 1984; effective May 1, 1985; amended Sept. 12, 1997.)

CHILD CARE CENTERS AND PRESCHOOLS

28-4-420. Definitions. (a) "Administrator" means the staff member of a child care center or preschool who is responsible for the general and fiscal management of the facility.

(b) "Attendance" means the number of children present at any one time.

(c) "Basement" means an area in which all four

outside walls are more than two-thirds below ground level.

(d) "Child care center" means a facility:

(1) which provides care and educational activities for 13 or more children two weeks to 16 years of age for more than three hours and less than 24 hours per day including day time, evening, and nighttime care; or

(2) which provides before and after school care for school-age children. A facility may have fewer than 13 children and be licensed as a center if the program and building meet child care center regulations.

(e) "Child with handicaps" means a child in care who does not function according to age-appropriate expectations to such an extent that the child requires special help, program adjustment, and support services on a regular basis.

(f) "Corporal punishment" means activity directed toward modifying a child's behavior by means of physical contact such as spanking with the hand or any implement, slapping, swatting, pulling hair, yanking the arm, or any similar activity.

(g) "Discipline" means the on-going process of helping children develop inner control so that they can manage their own behavior in a socially-approved manner.

(h) "Enrollment" means the total number of children for whom services are available.

(i) "Evening care" means care provided between 6 o'clock p.m. and midnight of the same day.

(j) "Fire inspector" means a person approved by the state fire marshal to conduct fire safety inspections.

(k) "Infant" means a child who is between two weeks and 12 months of age, or a child over 12 months who has not learned to walk.

(l) "In-service training" means job-related training provided for employed staff and volunteers.

(m) "Integrated unit" means a center or preschool program serving both handicapped and non-handicapped children, in which not less than $\frac{1}{3}$ and not more than $\frac{2}{3}$ of the children are handicapped.

(n) "License" means a document issued by the Kansas department of health and environment which authorizes a licensee to operate and maintain a child care center or preschool.

(o) "License capacity" means the maximum number of children that is allowed to attend at any one time.

(p) "Licensed physician" means a person licensed to practice medicine and surgery in Kan-

sas as set forth in K.S.A. 65-2869 and 65-2870, and any amendments thereto.

(q) "Licensee" means a person, corporation, firm, association, educational group or other organization which operates or maintains a child care center or preschool.

(r) "Mother's day out" means a program operating more than five consecutive hours or more than one day per week and in which any one child is enrolled for not more than one session per week.

(s) "Nighttime care" means care provided after six o'clock p.m. and continuing until after midnight.

(t) "Preschool" means a facility:

(1) which provides learning experiences for children who have not attained the age of eligibility to enter kindergarten as prescribed in K.S.A. 72-1107(c) and any amendments thereto, and who are 30 months of age or older;

(2) which conducts sessions not exceeding three hours per session;

(3) which does not enroll any child more than one session per day; and

(4) which does not serve a meal. The term "preschool" shall include educational preschools, Montessori schools, nursery schools, church-sponsored preschools, and cooperatives. A facility may have fewer than 13 children and be licensed as a preschool if the program and facility meet preschool regulations.

(u) "Preschool age" means a child who is between 30 months of age and the age of eligibility to enter kindergarten as prescribed in K.S.A. 72-1107(c) and any amendments thereto.

(v) "Program" means a comprehensive and coordinated plan of activities providing for the education, care, protection, and development of children who attend a preschool or a child care center.

(w) "Program director" means the staff member of a child care center or preschool who meets the requirements specified in K.A.R. 28-4-429(b), (c), (d) or (e) and who is responsible for implementing and supervising the program.

(x) "School-age" means a child who will attain the age of six years on or before the first day of September of any school year, but who is not 16 years of age or older.

(y) "Self-contained unit" means an area separated by walls or partitions not less than five feet high which contains indoor learning materials for the maximum number of children permitted in one group as specified in K.A.R. 28-4-428(a).

(z) "Sick child" means a child who has a contagious disease or shows other signs or symptoms of an acute illness.

(aa) "Special purpose unit" means a program in which more than two-thirds of the children enrolled have severe or mild handicaps.

(bb) "Summer program for school-age children" means a program in which school-age children are enrolled for more than three hours daily for more than two consecutive weeks, and shall include summer camps.

(cc) "Swimming pool" means an enclosed body of water more than 12 inches deep.

(dd) "Toddler" means a child who has learned to walk and who is between 12 and 30 months of age.

(ee) "Unit" means the number of children that may be present in one group, as specified in K.A.R. 28-4-428(a). (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1987.)

28-4-421. Terms of license. (a) License capacity shall be specified on the license.

(1) License capacity shall be determined by age of children, available space, program director qualifications, and number of self-contained units per facility.

(2) Permission for a change of license capacity, age of children to be enrolled or number of units shall be requested on forms prescribed by the Kansas department of health and environment. No change shall be made unless permission is granted in writing by Kansas department of health and environment. If granted, permission shall be posted.

(3) Permission for an overlap period of attendance to accommodate lunch time and shift changes shall be requested from the Kansas department of health and environment, and if granted, shall be posted.

(4) Children enrolled on an irregular basis shall not cause the center or preschool to exceed its license capacity.

(5) Each license shall be valid only for the licensee and the address appearing on the license.

(b) A copy of "regulations for licensing child care centers and preschools," provided by the Kansas department of health and environment shall be kept on the premises at all times. (Authorized by K.S.A. 65-508; implementing K.S.A. 1983 Supp. 65-504 and K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984.)

28-4-422. Procedures. (a) General.

(1) Any person, corporation, firm, association, or other organization desiring to conduct a child care center or preschool which will operate for more than five consecutive hours or more than one day per week shall apply for a license on forms supplied by the Kansas department of health and environment.

(2) In lieu of being licensed, preschools operated on the premises of private schools providing kindergarten through grade six shall be governed by Kansas statutes applicable to private schools.

(3) Each application for a license or an application for renewal of license shall be accompanied by the license fee which shall not be refundable.

(4) Children shall not be in attendance at the center or preschool until a license has been issued by the Kansas department of health and environment.

(5) Applicants shall be 18 years of age or older at time of application.

(6) A license shall be issued if the secretary finds that the applicant is in compliance with the requirements of K.S.A. 65-501 *et seq.* and amendments thereof, and the rules and regulations promulgated pursuant to those statutes, and that the applicant has made full payment of the license fee required by the provisions of K.S.A. 65-505 and amendments thereof.

(A) A license for an additional facility operated by a licensee shall not be issued until all existing facilities operated by the licensee are in compliance with licensing regulations.

(B) It shall be the responsibility of the licensee to provide the financial resources necessary to maintain compliance with licensing regulations.

(b) Statement of services offered. When making application to the Kansas department of health and environment for a license to conduct a child care center or preschool, the applicant shall state what services will be provided. Advertisements shall conform to the written statement of services. No claims as to specialized services shall be made unless the facility is staffed and equipped to offer those services. No general claim as to "state approval" shall be made unless the facility has obtained a license issued by the Kansas department of health and environment. The licensing agency shall be notified of any change in the position of program director or any change in program which effects licensure.

(c) Initial application.

(1) Site approval.

(A) The proposed site shall be approved by the Kansas department of health and environment, the local building inspector when required, and a fire safety inspector. Inspection reports shall accompany the application for license.

(B) When a building is to be constructed or an existing building is to be remodeled, construction or remodeling plans shall be submitted to the Kansas department of health and environment.

(C) When additional space in an existing building is to be used, prior approval shall be obtained from the Kansas department of health and environment.

(2) A working telephone shall be on the premises and available at all times for use by staff.

(d) Renewals.

(1) Before an existing license expires, the licensee shall apply for renewal of the license on forms supplied by the Kansas department of health and environment.

(2) Any application may be withdrawn at any time upon request by the applicant. The applicant shall submit a new application to the Kansas department of health and environment prior to re-opening a facility.

(3) A new application and fee shall be submitted for each change of ownership, sponsorship or location.

(e) Grievance procedures.

(1) Each applicant or licensee receiving notice of denial or revocation of license shall be notified of the right to an administrative hearing by the Kansas department of health and environment and subsequently of the right of appeal to the district court.

(2) Each applicant or licensee aggrieved by a licensing evaluation or by licensing procedures may appeal in writing to the Kansas department of health and environment.

(f) Exceptions.

(1) Any applicant or licensee may submit a written request for an exception to a regulation to the Kansas department of health and environment. An exception shall be granted if the secretary determines the exception to be in the best interest of a child or children and their families, and if statutory requirements are not violated.

(2) Written notice from the Kansas department of health and environment stating the nature of the exception and its duration shall be posted with the license. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-504, 65-505 and 65-508; effective May 1, 1983; amended May 1,

1984; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987.)

28-4-423. Physical plant. (a) Premises.

(1) The building shall meet the legal requirements of the community as to fire protection, water supply, and sewage disposal.

(2) The designated area for children's activities shall contain a minimum of thirty-five square feet of floor space per child, exclusive of kitchen, passageways, storage areas, and bathrooms.

(3) The building shall have two exits approved by a fire inspector. One exit shall lead directly to the outside.

(4) Second floors approved by a fire inspector may be used for children 2½ years or over. Second-floor windows shall be guarded.

(5) Finished basements approved by a fire inspector may be used for children 2½ years or older. Basements shall be dry and well-ventilated, heated and cooled as specified in paragraph (a)(20) of this regulation, and lighted as specified in paragraph (a)(18) of this regulation.

(6) When mobile classroom units are used, they shall be securely anchored to the ground and shall meet all requirements for permanent structures.

(7) All stairs which have more than two steps shall be provided with sturdy handrails. When balusters are more than four inches apart, provisions shall be made to prevent a child's head or body from falling through.

(8) Landings or gates shall be provided beyond each exterior door, and any door opening onto a full-length stairway.

(9) Ceiling height shall be not less than seven feet, six inches.

(10) Windows and doors.

(A) Each window and glass door shall be screened or guarded.

(B) Each window and door opened for ventilation shall be screened.

(11) Floors shall be smooth and not slippery, free from cracks, clean and in good condition. A floor covering shall be required over concrete.

(12) Carpeting shall be clean and in good repair. Newly-installed carpeting shall meet fire safety requirements of the state fire marshal.

(13) Walls shall be clean and free of cracks.

(14) All surfaces shall be free of toxic materials.

(15) Electrical outlets within the reach of children under five years of age shall be provided with receptacle covers when not in use.

(16) Extension cords shall not be used.

(17) Each room occupied by children shall have a minimum of 20 foot candles of light in all parts of the room. Each sleeping room shall be lighted to allow freedom of movement.

(18) The premises shall be maintained in good condition and shall be clean at all times, free from accumulated dirt and trash, and any evidence of vermin or rodent infestation. Each outdoor trash and garbage container shall be covered, and the contents shall be removed at least weekly.

(19) Each room occupied by the children shall be heated, ventilated and cooled. The temperature in each room shall not be less than 65°F. nor more than 90°F. Each area occupied by children shall be free of drafts.

(20) Each electric fan if used, shall be mounted high on the wall or shall be guarded.

(21) When a gas heater is used, it shall be approved by a fire inspector before use. Open-faced heaters shall be prohibited.

(22) All heating elements, including hot water pipes, shall be insulated or installed in such a way that children cannot come in contact with them. Asbestos insulation shall not be used. Fireplaces shall not be used when children are present.

(23) Medicines, household poisons, and other dangerous substances and instruments shall be in locked storage.

(24) Storage of firearms in any area used for children's activities shall be prohibited. Firearms stored in any other area of the premises shall be in locked storage, or shall be equipped with trigger locks.

(b) Water supply.

(1) The water supply shall be from a source approved by a health department, or by the Kansas department of health and environment.

(2) Sanitary drinking facilities shall be available to children while indoors or outdoors. One of the following methods shall be used:

(A) Individual disposable cups and a water dispenser;

(B) individually-marked glasses or cups which shall be washed daily; or

(C) a fountain designed so that a child can get a drink of water without assistance.

(3) Drinking fountains shall not be plumbed to sinks.

(4) Water from drinking fountains shall be under pressure so that the stream is not less than three inches high.

(5) Cold water and hot water not exceeding 110°F. shall be supplied to lavatory fixtures accessible to children.

(c) Toilet and lavatory facilities.

(1) All plumbing fixtures and building sewers shall be connected to public sewers where available.

(2) When a public sewer is not available, a private sewage disposal system meeting requirements of the county health department or the Kansas department of health and environment shall be installed and connected to all plumbing fixtures.

(3) Plumbing shall be installed and maintained according to local and state plumbing codes.

(4) Bathroom facilities shall be readily accessible to the children, and shall be placed low or be provided with safety steps.

(5) There shall be one toilet and one washbasin for each fifteen children.

(6) Bathroom facilities shall be planned to assure privacy for staff.

(7) Soap, individual cloth towels or paper towels, and toilet paper shall be provided. The use of common towels and wash cloths shall be prohibited. When cloth towels and wash cloths are used, they shall be labeled with the child's name, and laundered at least weekly. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1985.)

28-4-424. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1985; revoked May 1, 1986.)

28-4-425. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended, T-85-41, Dec. 19, 1984; amended May 1, 1985; revoked May 1, 1986.)

28-4-426. Administration. (a) Line of authority. There shall be a written delegation of administrative authority designating the person in charge in the facility for all hours of operation.

(b) Admission policy.

(1) Arrangements for the admission of children shall be made prior to the admission date to the center or preschool.

(2) Each admission policy shall be non-discriminatory in regard to race, color, religion, national origin, ancestry, physical handicap, or sex, in accordance with K.S.A. 44-1009. A copy of the admission policy shall be available for review.

(3) Each parent shall be informed of services offered.

(4) Each parent shall be informed when religious training is included in the program.

(c) Insurance.

(1) Accident insurance shall be carried on children.

(2) Liability insurance shall be carried by the center or preschool to provide recourse to parents of children enrolled in the event of negligence.

(3) Documentation of insurance coverage shall be on file, including the name of the insurance company or companies, policy number or numbers and dates of coverage.

(d) Staff records. The following records shall be maintained for each staff person:

(1) A record of education and experience;

(2) date of employment;

(3) a record of scheduled hours;

(4) a record of in-service training;

(5) a health certificate; and

(6) work references.

(e) Children's records.

(1) A daily attendance record shall be maintained and kept on file at the facility.

(2) The following emergency information shall be readily accessible to and near the telephone:

(A) Name, date of birth, and sex of child;

(B) name, home and business address, and phone numbers of parents or legal guardian;

(C) name, address, and telephone number of physician, hospital, and person to notify in case of emergency; and

(D) persons authorized to call for the child.

(3) A file shall be maintained for each child which includes:

(A) The application for enrollment, including beginning date and date of termination;

(B) a record of scheduled hours and days of attendance;

(C) a health assessment and immunization record;

(D) each accident report; and

(E) signed parental permission for field trips, transfer of records, and when applicable, walking to and from activities away from the facility.

(4) Children's records shall be confidential. Staff shall not disclose nor discuss personal information regarding children and their relatives with any unauthorized person.

(5) Each child's records and reports shall be made available to the child's parents on request. Children's health records shall be returned to the parents when the children are no longer enrolled. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1985; amended May 1, 1986.)

28-4-427. Program. (a) Programs shall be conducted in self-contained units with staff and children designated for each unit. Centers or pre-schools which cannot develop self-contained units shall present a plan for space use to the Kansas department of health and environment for approval.

(b) Equipment.

(1) Low, open shelves shall be provided for play equipment and materials so that they are readily accessible to the children.

(2) Equipment shall be scaled to the size of the children.

(3) Equipment shall be of sound construction with no sharp, rough, loose, nor pointed edges, and in good operating condition.

(4) Equipment shall be placed to avoid danger of accident or collision, and to permit freedom of movement.

(5) Equipment shall be provided in a sufficient quantity so that each child has a choice of at least three activities when all children are using equipment at the same time.

(6) Storage space located conveniently for the staff shall be provided for supplies and equipment not in use.

(7) Each child shall have individual space for the child's garments, clothing, and possessions during the session attended.

(c) Learning experiences.

(1) There shall be a written program plan which includes daily learning experiences appropriate to the developmental level of the children. Experiences shall be designed to develop:

- (A) Self-esteem and positive self-image;
- (B) social interaction skills;
- (C) self-expression and communication skills;
- (D) creative expression;
- (E) large and small muscle skills; and
- (F) intellectual growth.

(2) The program schedule shall be planned to provide a balance of active, quiet, individual and group activities.

(3) A written program plan shall be posted in each unit.

(d) Discipline.

(1) There shall be a written discipline policy outlining methods of guidance appropriate to the ages of the children enrolled. This policy shall be made available to staff and parents.

(2) Prohibited punishment. Punishment which is humiliating, frightening or physically harmful to the child shall be prohibited. Prohibited methods of punishment include:

(A) Corporal punishment;

(B) verbal abuse, threats, or derogatory remarks about the child or the child's family;

(C) binding or tying to restrict movement, or enclosing in a confined space such as a closet, locked room, box, or similar cubicle; and

(D) withholding or forcing foods. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983.)

28-4-428. Staff requirements. Each licensee shall ensure that all of the following requirements are met:

(a) Minimum staff-child ratio.

(1) The ratio between staff members and children shall be determined by the ages of the children and the type of care provided.

(2) The minimum staff-child ratio and the maximum number of children per unit shall be the following, at all times:

Age of children	Minimum staff-child ratio	Maximum number of children per unit
Infants	1 to 3	9
Infants and other children under the age of 6	1 to 4 (including not more than 2 infants)	8 (including not more than 4 infants)
Toddlers	1 to 5	10
Children at least 2 years of age but under the age of 3	1 to 7	14
Children at least 2½ years of age but under school-age	1 to 10	20
Children at least 3 years of age but under school-age	1 to 12	24
Kindergarten enrollees	1 to 14	28
School-age	1 to 16	32

(3) No child shall be left unsupervised.

(b) Substitute staff. Each preschool and each child care center shall have two additional adults who are available to work in case of illness or emergency. These adults' names and phone numbers shall be posted and these individuals' health certificates shall be on file at the preschool or child care center.

(c) Volunteers. Each volunteer shall be at least 14 years of age. Any volunteer may be counted in the staff-child ratio if the individual is at least 16 years of age, completes the education and training requirements for a volunteer specified in K.A.R. 28-4-428a, and is supervised at all times by a staff member who is not a volunteer.

(d) Program director.

(1) Each preschool and each child care center shall have a program director who is employed full time.

(2) Each preschool and each child care center licensed for more than 60 children shall employ a program director who has no other assigned responsibilities.

(3) Each preschool and each child care center licensed for more than 60 children shall have an administrator, who may also be the program director.

(e) References. Each staff member shall provide work references to the licensee at the time of application for employment. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1986; amended May 12, 2017.)

28-4-428a. Education and training requirements. (a) Orientation.

(1) Each person shall, before applying for a license, complete an orientation program on the requirements for operating a preschool or a child care center. If the person is not an individual, the person shall designate an individual to meet this requirement. The orientation shall be provided by the county health department or the secretary's designee that serves the county in which the preschool or child care center will be located.

(2) Each licensee shall provide orientation to each program director not later than seven calendar days after the date of employment and before the program director is given sole responsibility for implementing and supervising the program.

(3) Each licensee shall ensure that orientation is completed by each staff member who will be counted in the staff-child ratio and by each volunteer who will be counted in the staff-child ratio. Each staff member and each volunteer shall complete the orientation within seven calendar days after the date of employment or volunteering. Each staff member shall complete the orientation before being given sole responsibility for the care and supervision of children.

(4) Each licensee shall ensure that the orientation for each program director, staff member, and volunteer is related to work duties and responsibilities and includes the following:

(A) Licensing regulations;

(B) the policies and practices of the preschool or child care center, including emergency procedures, behavior management, and discipline;

(C) the schedule of daily activities;

(D) care and supervision of children in care, including any special needs and known allergies;

(E) health and safety practices; and

(F) confidentiality.

(b) Health and safety training.

(1) Each staff member who is counted in the staff-child ratio, each volunteer who is counted in the staff-child ratio, and each program director shall complete health and safety training either before employment or volunteering or not later than 30 calendar days after the date of employment or volunteering. Each staff member shall complete the training before being given sole responsibility for the care and supervision of children.

(2) The health and safety training shall be approved by the secretary and shall include the following subject areas:

(A) Recognizing the signs of child abuse or neglect, including prevention of shaken baby syndrome and abusive head trauma, and the reporting of suspected child abuse or neglect;

(B) basic child development, including supervision of children;

(C) safe sleep practices and sudden infant death syndrome if the individual will be caring for children under 12 months of age;

(D) prevention and control of infectious diseases, including immunizations;

(E) prevention of and response to emergencies due to food and allergic reactions;

(F) building and premises safety, including identification of and protection from hazards that could cause bodily injury, including electrical hazards, bodies of water, and vehicular traffic;

(G) emergency preparedness and response planning for emergencies resulting from a natural disaster or a human-caused event, including violence at a facility;

(H) handling and storage of hazardous materials and the appropriate disposal of bio-contaminants, including blood and other bodily fluids or waste; and

(I) precautions when transporting children, if transportation is provided.

(3) Each staff member counted in the staff-child ratio, each volunteer counted in the staff-child ratio, and each program director who was employed at the facility before July 1, 2017 and who has completed the training in the subject areas specified in paragraphs (b)(2)(A), (B), and (C) shall be exempt from training in the subject areas specified in paragraphs (b)(2)(D) through (I).

(c) Pediatric first aid and cardiopulmonary resuscitation (CPR) certifications.

(1) Each staff member counted in the staff-child ratio, each volunteer counted in the staff-child ratio, and each program director shall obtain certification in pediatric first aid and in pediatric CPR as specified in this subsection either before the date of employment or volunteering or not later than 30 calendar days after the date of employment or volunteering.

(2) Each individual who is required to obtain the certifications shall maintain current certifications.

(3) Each licensee shall ensure that, for each unit in a preschool or child care center, at least one staff member or volunteer counted in the staff-child ratio who has current certification in pediatric first aid and current certification in pediatric CPR is present at all times.

(d) Medication administration training. Each program director and each staff member designated to administer medications shall complete the training in medication administration as specified in this subsection.

(1) The training shall be approved by the secretary.

(2) Each program director and each staff member designated to administer medications who was employed at the facility before July 1, 2017 shall complete the training not later than December 31, 2017. The program director or the staff member designated to administer medications shall not administer medications after December 31, 2017 unless the individual has completed the training.

(3) Each program director and each staff member designated to administer medications who is employed at the facility on or after July 1, 2017 shall complete the training before administering medication to any child.

(e) Education requirements. Each program director shall be a high school graduate or the equivalent. For each unit in a preschool or child care center, there shall be present at all times at least one staff member who has a high school diploma or the equivalent, as required in K.A.R. 28-4-429.

(f) Annual in-service training requirements.

(1) For purposes of this subsection, "licensure year" shall mean the period beginning on the effective date and ending on the expiration date of a license.

(2) In each licensure year, each program director shall assess the training needs of each staff

member and each volunteer and shall provide or arrange for annual in-service training as needed.

(3) In each licensure year, each program director shall complete in-service training as follows:

(A) For each licensure year ending during the 2017 calendar year, five clock-hours;

(B) for each licensure year ending during the 2018 calendar year, five clock-hours;

(C) for each licensure year ending during the 2019 calendar year, 12 clock-hours; and

(D) for each licensure year ending during the 2020 calendar year, and for each subsequent licensure year, 16 clock-hours.

(4) In each licensure year, each staff member counted in the staff-child ratio and each volunteer counted in the staff-child ratio shall complete in-service training as follows, based on the staff member's or volunteer's job responsibilities and the training needs identified by the program director:

(A) For each licensure year ending during the 2017 calendar year, 10 clock-hours;

(B) for each licensure year ending during the 2018 calendar year, 10 clock-hours;

(C) for each licensure year ending during the 2019 calendar year, 12 clock hours; and

(D) for each licensure year ending during the 2020 calendar year, and for each subsequent licensure year, 16 clock-hours.

(5) The training shall be approved by the secretary.

(g) Documentation. Each licensee shall ensure that documentation of all orientation, training, certifications, and education requirements is kept in each individual's file in the preschool or child care center. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective Feb. 3, 2012; amended May 12, 2017.)

28-4-429. Staff qualifications. (a) Program directors shall be 18 years of age or older and shall meet the training requirements for the license capacity of the facility.

(b) Facilities with fewer than 13 children shall have a program director who meets the training requirements by one of the following options:

(1) Option 1: Six months' teaching experience in licensed facilities with children of the same age as enrolled in present facility.

(2) Option 2: (A) Five sessions of observation for not less than 2½ consecutive hours per observation in licensed facilities with children of the same age as enrolled in present facility; and

(B) 10 clock hours of workshops approved by the state licensing staff;

(3) Option 3: (A) A minimum of three semester hours of academic credit or equivalent training in child development, early childhood education, and curriculum resources; and

(B) supervised observation in high school or college or three months' work experience with children of the same age as enrolled in present facility; or

(4) Option 4: A child development associate credential.

(c) Facilities licensed for not less than 13 and not more than 24 children shall have a program director who meets the training requirements by one of the following options:

(1) Option 1: (A) Five sessions of observation for not less than 2½ consecutive hours per observation in licensed preschools or child care centers. Child care center staff shall plan their observations so that daily activities during morning, lunch, nap time and late afternoon can be observed; and

(B) one year of teaching experience in licensed centers or preschools, or one year of supervised practicum in licensed centers or preschools; or

(2) Option 2: (A) Seven to nine semester hours of academic credit or equivalent training in child development or early childhood education; and

(B) three months' teaching experience in licensed centers or preschools, or one year of supervised practicum in licensed centers or preschools; or

(3) Option 3: A child development associate credential.

(d) Facilities licensed for more than 24 children shall have a program director who meets the training requirements by one of the following options:

(1) Option 1: (A) Twelve semester hours of academic study or equivalent training in child development, early childhood education, curriculum resources, nutrition, child guidance, parent education, supervised practicum, and administration of early childhood programs; and

(B) six months' teaching experience in licensed centers or preschools;

(2) Option 2: A child development associate credential and one year of teaching experience in licensed centers or preschools, or supervised practicum in licensed centers or preschools;

(3) Option 3: (A) An associate of arts degree or a two-year certificate in child development; and

(B) one year of teaching experience in licensed

centers or preschools, or a supervised practicum in licensed centers or preschools;

(4) Option 4: (A) An A.B. or B.S. degree in child development or early childhood education, including a supervised practicum; and

(B) three months' teaching experience in licensed centers or preschools; or

(5) Option 5: (A) An A.B. or B.S. degree in a related academic discipline, and 12 hours of academic study or equivalent training in child development, early childhood education, curriculum resources, nutrition, child guidance, parent education, supervised practicum, and administration of early childhood programs; and

(B) six months teaching experience in licensed centers or preschools.

(e) Facilities licensed for more than one hundred children shall have a program director who meets the following requirements:

(1)(A) A degree in child development or early childhood education; or

(B) an A.B. or B.S. degree in a related academic discipline and 12 hours of academic study or equivalent training in child development, early childhood education, curriculum resources, nutrition, child guidance, parent education, supervisor practicum, and administration of early childhood programs; and

(2) one year of experience as a program director in a center licensed for more than 24 children, or one year of experience as an assistant program director in a center licensed for more than 100 children.

(f) Facilities licensed for more than 100 children shall have an assistant program director who meets the requirements for program director specified in 28-4-429(d).

(g) Facilities licensed for more than 160 children shall have an assistant program director who meets the requirements for program director specified in 28-4-429(d), and who has no other assigned responsibilities.

(h) Each unit shall have one staff person who is at least 18 years of age and who has a high school diploma or its equivalent. Units enrolling fewer than 13 children shall have a staff person who meets the training requirements specified in subsection (b) of this rule and regulation. Units enrolling 13 to 24 children shall have a staff person who meets the training requirements specified in subsection (c) of this rule and regulation. Units enrolling more than 24 school-age children shall have a staff person who meets the require-

ments specified in subsection (d) of this rule and regulation.

(i) Assistant teachers shall be at least 16 years of age and shall participate in staff orientation at time of employment. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1987.)

28-4-430. Health practices; illness and abuse; general health requirements for staff.

(a) Children's health assessments.

(1) A preentrance health assessment conducted within six months before enrollment shall be required for each child. The assessment shall be conducted by a licensed physician or by a nurse approved to perform health assessments.

(2) The results of the health assessment shall be kept on file at the child care facility.

(3) Children transferring from one child care facility to another shall not be required to obtain a new health assessment if the previous assessment record is available.

(4) Tuberculin testing shall be required only if the child comes in contact with a new active or reactivated case of tuberculosis. The results of the examination shall become a part of the child's health record.

(5) Immunizations for each child in care shall be current as medically appropriate and shall be maintained current for protection from the diseases specified in K.A.R. 28-1-20(d). A record of each child's immunizations shall be maintained on the child's medical record form.

(6) Exceptions to the requirement for immunizations shall be permitted as specified in K.S.A. 65-508, and amendments thereto. Documentation of each exception shall be maintained on file at the child care facility.

(7) Each licensee shall provide information to the parents of children in care about the benefits of annual, well-child health assessments for children under six years of age, and biennial health assessments for children six years of age and older. Each licensee shall also provide information about the importance of seeking medical advice when a child exhibits health problems. This information may be either given on a form provided by the Kansas department of health and environment to the parent at the time the child is enrolled or posted in a conspicuous place, with copies of the form available to parents on request.

(b) Health practices.

(1) Each child's hands shall be washed with

soap and water before and after eating and after toileting.

(2) Children shall be allowed to go to the bathroom individually as needed.

(c) Illness and abuse.

(1) If a child is absent due to a communicable disease, staff shall inform all parents of the nature of the illness.

(2) Each communicable disease shall be reported to the county health department.

(3) Each staff member shall be trained to observe symptoms of illness, neglect, and child abuse and shall observe each child's physical condition daily.

(4) Symptoms of illness shall be reported upon discovery to parents.

(5) All evidence of neglect or unusual injuries, including bruises, contusions, lacerations, and burns, shall be noted on the child's record and shall be reported upon discovery to the program director or, in the absence of the program director, the person designated in charge of the child care facility.

(6) The program director or, in the absence of the program director, the person designated in charge of the child care facility shall report within 24 hours to the Kansas department of social and rehabilitation services any evidence of suspected child abuse or neglect. When the local offices of the department of social and rehabilitation services are not open, reports shall be made to local law enforcement agencies.

(7) If care of sick children is to be provided, written plans regarding the needs of a sick child and the care of a sick child shall be prepared in consultation with the public health nurse and shall be presented to the parents at the time of enrollment. The requirements for the infectious and contagious diseases specified in K.A.R. 28-1-2 and for the isolation and quarantine of individuals with the infectious and contagious diseases specified in K.A.R. 28-1-6 shall be met.

(8) A quiet area shall be provided for any sick child. Each sick child shall be supervised by an adult.

(9) Non-prescription medications shall not be administered to any child except on written order of the parent or guardian. Each order shall be renewed yearly. Each non-prescription medication shall be administered by a designated staff member.

(10) Each prescription medication shall be administered by a designated staff member, from a pharmacy container labeled with the child's name,

the name of the medication, the dosage and dosage intervals, the name of the physician, and the date the prescription was filled. The label shall be considered the order from the physician.

(11) A record of the name of the designated staff member who administered the medication and the date and time the medication was given to the child shall be kept in the child's file.

(d) Staff.

(1) Smoking shall be prohibited in the child care center or preschool.

(2) Alcohol, as defined in K.S.A. 41-102 and amendments thereto, and non-prescribed controlled substances, as defined in K.S.A. 65-4101 and amendments thereto, shall not be consumed on the premises during the hours of operation and shall not be consumed while children are present.

(3) Each child residing in the same location as that of a child care center or preschool shall meet the requirements specified in subsection (a). (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1986; amended July 11, 2008.)

28-4-431. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1986; revoked May 10, 1996.)

28-4-432. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; revoked May 1, 1986.)

28-4-433. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1985; revoked May 1, 1986.)

28-4-434. Preschools. (a) Inside area. Any building used as a residence shall be licensed as a preschool only if there is a room or rooms designated exclusively for preschool use.

(b) Nutrition.

(1) A nutritious snack shall be provided daily and shall include at least one of the following foods:

- (A) Milk, milk product, or food made with milk;
- (B) fruit, vegetable, or full-strength fruit or vegetable juice;
- (C) meat;
- (D) peanut butter; or
- (E) bread or cereal product.

(2) Fluid dairy products shall be Grade A pasteurized. Solid dairy products shall be pasteurized.

(3) Refrigeration shall be provided for perishable foods.

(4) If reusable table service is used for snacks, appropriate dishwashing methods shall be followed as specified in K.A.R. 28-4-439(k).

(5) Appropriate table service shall be used for serving snacks. Children's food shall not be placed on the bare table.

(c) Outdoor play. Outdoor play space shall not be required. If outdoor play is included in the preschool program, the requirements of K.A.R. 28-4-437 shall be met. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984.)

28-4-435. Programs serving children with handicapping conditions. (a) Records. Written parental permission shall be on file for evaluation and placement of children.

(b) Physical plant.

(1) Programs which include non-ambulatory children shall be conducted on the ground floor. All exits and steps shall have ramps approved by a fire inspector.

(2) Facilities enrolling children who use walkers or wheelchairs shall have 50 square feet of space for each physically handicapped child.

(3) When physically handicapped children are enrolled, toilets and washbasins shall be designed to accommodate them.

(c) Transportation. A second adult shall ride in the rear seat of the vehicle when three or more handicapped children are being transported.

(d) Staff requirements. Facilities shall have staff who meet the qualifications listed in K.A.R. 28-4-429. The following additional requirements shall be met:

(1) The parent of a child enrolled in the unit shall not be a teacher in that unit.

(2) Each unit shall have a staff person who has a minimum of six hours of academic credits or equivalent clock hours in understanding the needs of handicapped children, and in developing individual program plans.

(3) Consultants shall meet the educational requirements of their profession.

(e) Minimum staff/child ratios. If fewer than one-third of the children enrolled have handicapping conditions, the minimum staff/child ratios shall be those as specified in K.A.R. 28-4-428. If one-third or more of the children enrolled have handicapping conditions, the following minimum staff/child ratios shall be maintained:

Age of children	Integrated unit or center		Special purpose unit or center	
	Adult/child	Max. unit	Adult/child	Max. unit
Under 2½ years	1 to 3	9	1 to 2	6
2 years to 3 years	1 to 4	12	1 to 3	9
2½ years and above	1 to 6	18	1 to 4	12

(f) In-service training. All staff shall have 10 clock-hours of annual in-service training specific to handicapping conditions.

(g) Program. A written individual program plan shall be on file for each handicapped child enrolled, and in consultation with the parents, shall be reviewed and revised annually. The plan shall assign responsibility for the delivery of services, and shall indicate the anticipated change in the child's behavior, and how these changes will be measured. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983.)

28-4-436. Child care centers: physical plant. (a) Inside area. A building used as a residence shall be licensed as a child care center only if there is a room or rooms designated exclusively for child care use.

(b) Napping and sleeping.

(1) Children remaining at the center more than four hours shall be encouraged to nap or rest according to their individual needs. Children who do not sleep shall be permitted to have a quiet time through the use of equipment or activities which will not disturb other children.

(2) Centers shall have a crib, cot or pad for each child. Pads shall be enclosed in washable covers and shall be used only over carpet. When pads are used, they shall be long enough so that the child's head does not rest on the carpet. Bunk beds shall be prohibited.

(3) Each crib or cot shall be equipped with individually-labeled bottom sheet. Every child shall have a cover. Children shall not share bedding.

(4) There shall be a complete change of bedding after each five uses, immediately when wet or soiled, and always upon a change in occupancy. Blankets shall be laundered monthly.

(5) Cribs, cots, or pads, when in use, shall be separated from each other by at least two feet in all directions except when bordering on the wall. When not in use, they shall be stored in a clean and sanitary manner.

(6) Nighttime care.

(A) Movable screens shall be available to insure privacy as needed.

(B) Separate sleeping areas shall be provided for boys and girls over six years of age.

(C) A center in which children sleep for more than three consecutive hours shall be provided with a smoke detector installed in consultation with a fire inspector.

(c) Laundry facilities.

(1) If laundry is done at the center, laundry fixtures shall be located in an area separate from food preparation areas and shall be installed and used in such a manner as to safeguard the health and safety of the children.

(2) Separate areas shall be provided for soiled and clean items. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983.)

28-4-437. Child care centers: outside area. (a) There shall be at least 75 square feet of outdoor play space on the premises for each child using the space at a given time. The total outdoor space shall accommodate not less than one-half of the licensed capacity, or shall include a minimum of 750 square feet, whichever is greater.

(b) The boundaries of outdoor play space shall be enclosed with a fence not less than four feet high.

(c) The outdoor play space shall be located to provide both sunshine and shade. A hard-surfaced area or gravel shall not be used under anchored play equipment.

(d) The outdoor play space shall be well drained and free of hazards.

(e) Outdoor play equipment shall be safely constructed and in good repair. Climbing equipment and swings shall be anchored in the ground with metal straps or pins, or set in cement. Swings shall be safely located and shall have canvas or soft rubber seats. Teeter-totters and merry-go-rounds designed for school-age children shall not be used for children under six years.

(f) Sandboxes shall be maintained in a safe and sanitary condition.

(g) A rooftop used as a play area shall be enclosed with a flat board fence or a chainlink fence angled toward the play area. The fence shall not be less than six feet high. An approved fire escape shall lead from the roof to the ground.

(h) The play area shall be arranged so that staff can provide close supervision at all times.

(i) Outdoor equipment shall be provided in sufficient quantity so that each child has access to

at least one activity appropriate to the child's age level.

(j) There shall be bathroom facilities accessible to the play area. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984.)

28-4-438. Child care centers: program.

(a) The program shall provide regularity in routines such as eating and napping, and protection from excess fatigue and overstimulation.

(b) Unless extreme weather conditions prevail, children shall have a daily period of outdoor play under the supervision of an adult. Children spending more than four consecutive hours at the center shall play outdoors for at least one hour daily.

(c) Routines such as toileting and eating, and intervals between activities shall be planned so that children do not have to wait in lines, or assemble in large groups.

(d) If television is on the premises, its use shall be limited to children's programs.

(e) Activities shall be available for children during the entire time they are in attendance, including early morning and late afternoon. (Authorized by and implementing K.S.A 65-508; effective May 1, 1983.)

28-4-439. Child care centers: food service. (a) Single or multi-unit centers serving a meal prepared at the center to 13 or more children shall employ a staff person who:

- (1) Has knowledge of nutritional needs of children;
- (2) understands quantity food preparation and service;
- (3) practices sanitary methods of food handling and storage;
- (4) is sensitive to individual and cultural food tastes of children; and
- (5) is willing to work with the program director in planning learning experiences for children relative to nutrition.

(b) Centers shall serve meals and snacks as follows:

Length of Time at Center	Food Served
2½ to 4 hours	1 snack
4 to 8 hours	1 snack & 1 meal
8 to 10 hours	2 snacks & 1 meal or 1 snack & 2 meals
10 hours or more	2 meals & 2 or 3 snacks

(c) Meals and snacks.

(1) Breakfasts shall include:
(A) A fruit, vegetable, or full-strength fruit or vegetable juice;

(B) bread, a bread product or cereal; and

(C) milk.

(2) Noon or evening meals shall include one item from each of the following:

(A) Meat, poultry, fish, egg, cheese, cooked, dried peas or beans, or peanut butter;

(B) two vegetables, 2 fruits, or one vegetable and one fruit;

(C) bread, bread product or cereal; and

(D) milk.

(3) Mid-morning and mid-afternoon snacks shall include at least two of the following:

(A) Milk, milk product or food made with milk;

(B) fruit, vegetable, or full-strength fruit or vegetable juice;

(C) meat or a meat alternate; or

(D) bread, bread product or cereal.

(d) A sufficient quantity of food shall be prepared for each meal to allow the children second portions of vegetables or fruit, bread, and milk.

(e) Food allergies or special dietary needs of specific children shall be known to cooks, staff members, child care workers, and substitutes.

(f) Menus shall be posted where parents can see them. Copies of menus served the previous month shall be kept on file.

(g) Staff shall sit at the table with the children, and socialization shall be encouraged. Children shall be encouraged to serve themselves. Spoons and forks shall be provided for each child's use. Appropriate service shall be used for meals and snacks.

(h) Children's food shall not be placed on a bare table.

(i) Toothbrushes shall be provided for each child's use. They shall be used daily after meals, and shall be stored in a sanitary manner out of children's reach.

(j) When meals are prepared on the premises, the kitchen shall be separate from the eating, play, and bathroom areas, and shall not be used as a passageway while food is being prepared.

(k) Food shall be stored as follows:

(1) Poisonous or toxic materials shall not be stored with food. Medications requiring refrigeration shall be labeled and kept in locked storage in the refrigerator.

(2) All perishables and potentially hazardous foods shall be continuously maintained at 45°F or lower in the refrigerator, or 10°F or lower in the

freezer, with 0°F recommended. Each cold storage facility shall be provided with a clearly visible, accurate thermometer.

(3) All foods stored in the refrigerator shall be covered.

(4) Foods not requiring refrigeration shall be stored at least six inches above the floor in clean, dry, well-ventilated storerooms or other areas.

(5) Dry, bulk foods which are not in their original, unopened containers shall be stored in metal, glass or food-grade plastic containers with tight-fitting covers, and shall be labeled.

(1) Table service shall be maintained in sanitary condition using one of the following methods:

(1) Disposable plates and cups, and plastic utensils of food grade, medium weight; or

(2) a three-compartment sink supplied with hot and cold running water and a drainboard for washing, rinsing, sanitizing, and air-drying; or

(3) a mechanical dishwasher.

(m) Dishes shall have smooth, hard-glazed surfaces, and shall be entirely free from cracks or chips.

(n) Tables shall be washed before and after meals, and floors shall be swept after meals.

(o) If meals are catered:

(1) Food shall be obtained from sources licensed by the Kansas department of health and environment.

(2) Food shall be transported in covered and temperature-controlled containers, and shall not be allowed to stand. Hot foods shall be maintained at not less than 140°F, and cold foods shall be maintained at 45°F or less.

(p) Fluid dairy products shall be Grade A pasteurized. Solid dairy products shall be pasteurized. Dry milk shall be used only for cooking.

(q) Meat shall be from government-inspected sources.

(r) Home-canned food, food from dented, rusted, bulging, or leaking cans, or food from cans without labels shall not be used.

(s) Garbage shall be placed in covered containers inaccessible to children, and shall be removed from the kitchen daily. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985.)

INFANT AND TODDLER PROGRAM

28-4-440. Infant and toddler programs.

(a) Infant and toddler programs shall be conducted on the ground floor only.

(b) Each unit of infants and each unit of toddlers shall be separate from each unit of older children.

(c) Floor furnaces shall be prohibited.

(d) A sleeping area separate from the play area shall be provided for infants.

(e) A crib or playpen shall be provided for each infant in care at any one time. Cribs and playpens shall be maintained in good condition. Clean individual bedding shall be provided.

(f) Each licensee shall ensure that the following requirements are met:

(1) The use of stacking cribs, cribs with water mattresses, or bassinets shall be prohibited.

(2) Cribs and playpens shall have slats not more than 2 $\frac{3}{8}$ inches apart.

(3) All sides of each crib or playpen shall be up while the crib or playpen is in use.

(4) On and after December 28, 2012, each licensee shall ensure that no crib purchased before June 28, 2011 is in use in the facility.

(g) Each licensee shall make any necessary changes to follow the recommendations of any consumer warning or recall of a crib or a playpen as soon as the warning or recall is known.

(h) Each licensee shall develop and implement safe sleep policies and practices for infants and toddlers and shall ensure that the policies and practices are discussed with the parent or legal guardian of each child before the first day of care. The safe sleep policies and practices shall include the following requirements:

(1) Each staff member who cares for children and each volunteer who cares for children shall follow the safe sleep policies and practices of the child care center.

(2) Each staff member who cares for infants and each volunteer who cares for infants shall ensure that all of the following requirements are met:

(A) Each infant shall nap or sleep in a crib or a playpen.

(B) An infant shall not nap or sleep in the same crib or playpen as that occupied by another infant or child at the same time.

(C) If an infant falls asleep on a surface other than a crib or playpen, the infant shall be moved to a crib or playpen.

(D) Each infant shall be placed on the infant's back to nap or sleep.

(E) When an infant is able to turn over independently, the infant shall be placed on the infant's back but then shall be allowed to remain in a position preferred by the infant. Wedges or infant positioners shall not be used.

(F) Each infant shall sleep in a crib or a playpen that is free of any soft items, which may include pillows, quilts, heavy blankets, bumpers, and toys.

(G) If a lightweight blanket is used, the blanket shall be tucked along the sides and foot of the mattress. The blanket shall not be placed higher than the infant's chest. The head of the infant shall remain uncovered. Any infant may nap or sleep in sleep clothing, including sleepers and sleep sacks, in place of a lightweight blanket.

(i) When children are awake, they shall not be left unattended in cribs or other confinement for more than 30 minutes.

(j) An adult-size rocking chair shall be provided for each unit of infants.

(k) Children not held for feeding shall have low chairs and tables, infant seats with trays, or high chairs with a wide base and a safety strap.

(l) Either individually labeled towels and washcloths or disposable products shall be provided.

(m) Items that children can place in their mouths shall be washed and sanitized daily and shall be washed and sanitized before being used by another child, if contaminated by saliva or other bodily fluids.

(n) Each licensee shall ensure that at least one staff member who meets one of the following staff requirements is present for each unit of infants and each unit of toddlers:

(1) Option 1: An individual who meets the qualifications of K.A.R. 28-4-429(b) and has at least three months' experience caring for infants and toddlers;

(2) option 2: a licensed L.P.N. or R.N. with three months' experience in pediatrics or in licensed child care centers enrolling infants and toddlers; or

(3) option 3: a child development associate credential in infant and toddler care.

(o) Each licensee shall ensure that the following program requirements are met:

(1) Daily activities shall contribute to the following:

(A) Gross and fine motor development;

(B) visual-motor coordination;

(C) language stimulation; and

(D) social and personal growth.

(2) Infants and toddlers shall spend time outdoors daily unless extreme weather conditions prevail.

(p) Each licensee shall ensure that the following food service requirements are met:

(1) The nitrate content of water for children under one year of age shall not exceed 10 milligrams per liter (10 mg/l) as nitrogen.

(2) Drinking water shall be available to each child at all times when the child is in care.

(3) Infants shall be held when bottle-fed until they can hold their own bottles.

(4) Infants and toddlers shall not be allowed to sleep with bottles in their mouths.

(5) Each bottle that contains prepared formula or breast milk shall be refrigerated with the nipple covered. The bottle shall be labeled with the child's name, the contents, and the date received and shall be used within 24 hours of the date on the label. If a child does not finish a bottle, the contents of the bottle shall be discarded. No formula or breast milk shall be heated in a microwave oven.

(6) Solid foods shall be offered when the program director and the parent or legal guardian of a child determine that the child is ready for solid foods. Opened containers of solid foods shall be labeled with child's name, the contents, and the date opened. Containers shall be covered and refrigerated. The food shall be used within three calendar days of the date opened. Food in previously opened containers shall be reheated only once and shall not be served to another child.

(q) Each licensee shall ensure that the following toileting requirements are met:

(1) Children's clothing shall be changed whenever wet or soiled.

(2) Each child shall have at least two complete changes of clothing.

(3) Handwashing facilities shall be in or adjacent to the diaper-changing area.

(4) A changing table shall be provided for each unit of infants and each unit of toddlers.

(5) Each changing table shall have an impervious, undamaged surface. Each table shall be sturdy and shall be equipped with railings or safety straps.

(6) Changing tables shall be sanitized after each use by washing with a disinfectant solution of ¼ cup of chlorine bleach to one gallon of water or with an appropriate commercial disinfectant.

(7) Wet or soiled washable diapers or training pants shall be stored in a labeled, covered container or plastic bag and shall be returned home with the parent.

(8) Wet or soiled disposable diapers shall be placed in a covered container or plastic bag, which shall be emptied daily.

(9) There shall be one potty chair or child-sized toilet for every five toddlers. When a potty chair is used, the following requirements shall be met:

(A) Potty chairs shall be left in the toilet room.

(B) The wastes shall be disposed of immediately in a flush toilet.

(C) The container shall be sanitized after each use and shall be washed with soap and water daily.

(D) Potty chairs shall not be counted as toilets.

(10) Each individual shall wash that individual's hands after diapering, assisting a child with toileting, or changing a child's wet or soiled clothing.

(11) Changing and toileting procedures shall be posted.

(r) There shall be daily communication between the parent, parents, or legal guardian and the staff about each child's behavior and development. (Authorized by and implementing K.S.A. 2010 Supp. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1986; amended, T-87-34, Nov. 19, 1986; amended May 1, 1987; amended Feb. 3, 2012.)

28-4-441. Programs for school-age children. (a) Physical plant. Centers shall have a minimum of 35 foot candles of light in each area used for reading, study, and other close work.

(b) Staffing. (1) Single or multi-unit centers shall employ teaching staff who meet the requirements under one of the following options:

Option 1: As specified in K.A.R. 28-4-429; or

Option 2: An A.B. or B.S. degree in elementary education, physical education, child development or a related academic discipline, and three months' experience with school-age children.

(2) Each unit for school-age children shall be separate from units for younger children, except for periods not to exceed two hours before and after school. Staff/child ratios and unit size shall conform to the provisions of K.A.R. 28-4-428 and shall be based on the age of the youngest child in the group.

(c) Program.

(1) Educational and recreational activities shall meet the individual needs of the children.

(2) Children shall be provided the opportunity to plan activities appropriate to their age.

(3) Activities shall include arts, crafts, music, reading, table games, and sports.

(4) Program plans shall be written and posted.

(5) Written parental permission shall be obtained for children to participate in activities away from the center.

(d) Summer programs for school-age children.

(1) License applications or application renewals for summer programs shall be submitted to the Kansas department of health and environment not later than April 15.

(2) Summer programs shall be based in facilities which meet license requirements.

(3) Sack lunches may be served. Sack lunches and beverages shall be refrigerated. (Authorized by and implementing K.S.A. 65-508; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended May 1, 1986.)

28-4-442. (a) Definitions.

(1) "Adult" means a person 18 years of age or older.

(2) "Child" means a person as defined in K.A.R. 28-4-420(u), (x) and (dd).

(3) "Infant" means a person as defined in K.A.R. 28-4-420(k).

(b) When adults are cared for in the same premises as children, adults shall have space, staff and equipment separate from the children. Intergenerational activities shall be permitted when the facility is in compliance with K.A.R. 28-4-442.

(c) Each adult shall sign a consent form indicating willingness to participate in intergenerational activities.

(d) Written parental permission shall be on file for each child participating in intergenerational activities.

(e) No infant shall participate in intergenerational activities.

(f) There shall be an intergenerational activities program coordinator.

(g) There shall be a written activity plan which includes program objectives, space to be used and staffing patterns. Special needs of both adults and children shall be addressed.

(h) A weekly schedule of activities and participants shall be posted in both adult and child care facilities.

(i) A staff person from the adult care unit shall be in attendance while adults are with children.

(j) Adults from the intergenerational program who volunteer in the child care center shall not be counted in the child/staff ratio. (Authorized by and implementing K.S.A. 1988 Supp. 65-510; effective Feb. 26, 1990.)

SCREENING OF NEWBORN INFANTS

28-4-501. Definitions. (a) "Applicable income" means the total monies received by all adult members of the family based on any of the follow-

ing, with the addition of nontaxable benefits from any private, state, and federal funding sources:

(1) The total amount of adjusted gross income reported on one of the federal income tax forms 1040, 1040A, or 1040EZ, including a copy of all W-2 forms filed by each adult member of the family;

(2) the six most recent pay stubs; or

(3) a letter of anticipated earnings from the employer of each adult member of the family if the most recent federal income tax form does not reflect current income.

(b) "Birth attendant" means the person assisting with an out-of-institution delivery of the infant, in the absence of a physician.

(c) "Borderline hypothyroid" means an abnormally low level of thyroxine and a higher than normal level of thyroid-stimulating hormone in the blood, the combination of which is not usually indicative of hypothyroidism.

(d) "Cash assets" means accessible money, including savings accounts, certificates of deposit, checking accounts, stocks, and bonds. This term shall not include individual retirement accounts and retirement plans.

(e) "Department" means the Kansas department of health and environment.

(f) "Eligible person" means an individual who qualifies for any necessary treatment products or medically necessary food treatment products, or both.

(g) "Family," for the purposes of these regulations, means an eligible person who meets one of the following conditions and all other persons who reside in the home with the eligible person;

(1) Resides with and is considered to be a dependent of the person's parents, stepparents, or legal guardian for income tax purposes; or

(2) establishes a separate residence and is no longer considered a dependent of the person's parents, stepparents, or legal guardian for income tax purposes.

The term "family" shall not include any person who leases or rents a portion of the residence or who lives with the other persons who are not responsible for the financial support of the eligible person.

(h) "Galactosemia" means the disease of genetic origin due to galactose uridyl transferase enzyme deficiency in which the individual is completely or partially incapable of normal metabolism of galactose, which results in an abnormal increase in the concentration of galactose in the blood.

(i) "Hemoglobin disease" means the presence of abnormal hemoglobin and the absence of adult hemoglobin, the combination of which is indicative of disease and requires ongoing medical treatment.

(j) "Hemoglobin trait" means the presence of abnormal hemoglobin, which is not indicative of disease and does not usually require ongoing medical treatment.

(k) "Hypothyroidism" means a congenital disease in which the individual is unable to produce thyroxine normally, which may be detected by an abnormally low serum level of thyroxine and abnormally high serum level of thyroid-stimulating hormone in the blood. For purposes of these newborn screening regulations, this term shall exclude diseases referred to as secondary hypothyroidism.

(l) "Institution" means a hospital or other organized agency providing obstetrical services.

(m) "Kit" means the multiple-page laboratory requisition with the attached filter paper to be used for blood collection and with a place for identifying the infant, physician, and sending agency data. The kits shall be provided by the department.

(n) "Laboratory" means the division of health and environmental laboratories, Kansas department of health and environment.

(o) "Maple syrup urine disease" and "MSUD" mean an inherited disease of amino acid metabolism that causes acidosis, central nervous system symptoms, and urine that can smell sweet like maple syrup.

(p) "Medical specialist" means a medical doctor who has training in the treatment of a specific disease entity and who has a contract with the department to serve as a consultant and to provide or direct diagnosis and treatment services.

(q) "Medically necessary food treatment product" means a specifically formulated product that has less than one gram of protein per serving and is intended to be used under the direction of a physician for the dietary treatment of any inherited metabolic disease. This term shall not include any foods that are naturally low in protein.

(r) "Necessary treatment product" means a medical protein source used under the direction of a physician to treat specific metabolic diseases in order to prevent, delay, or reduce medical complications.

(s) "Newborn screening coordinator" means the designee in the department providing the follow-up program activities.

(t) “Other genetic disease” means any condition inherited in a recognized pattern that can be detected in a filter paper blood specimen and that the secretary has designated as part of the newborn screening battery of tests.

(u) “Phenylketonuria” and “PKU” mean any disease, usually due to a single enzyme deficiency of genetic origin, in which the individual is completely or partially incapable of normal metabolism of phenylalanine, which results in an abnormal increase in the concentration of phenylalanine in the blood.

(v) “Presumptive positive” means a screening test result that indicates the possible presence of a disease, requiring further testing to confirm or not confirm the diagnosis.

(w) “Secretary” means the secretary of the Kansas department of health and environment.

(x) “Sending agency” means the agency or person identified on the kit to be the recipient of the report.

(y) “Specimen” means the saturated blood spots on the filter paper and the laboratory requisition with complete identifying data on the infant, physician, and sending agency. (Authorized by K.S.A. 65-101 and 65-180, as amended by 2006 SB 579, Sec. 1; implementing K.S.A. 65-180, as amended by 2006 SB 579, Sec. 1, and 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended April 14, 2000; amended, T-28-7-5-06, July 5, 2006; amended Oct. 20, 2006.)

28-4-502. Responsibility to obtain specimen. (a) The administrative officer or other person in charge of each institution or the attending physician are responsible for obtaining an adequate initial specimen for newborn screening on infants born in that institution.

(b) The attending physician or other birth attendant is responsible for obtaining an adequate specimen for newborn screening on infants born outside of an institution.

(c) The attending physician or other birth attendant is responsible for obtaining repeat specimens when needed to complete the screening process. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987.)

28-4-503. Timing of specimen collections. (a) The initial specimen from each infant born in an institution shall be obtained as follows:

(1) (A) When the infant is at least 24 hours of age but less than 48 hours of age; or

(B) if the infant is discharged from the institution of birth before 24 hours of age, before the infant is discharged;

(2) before the infant is transferred from the institution of birth to another institution; and

(3) before the infant receives any blood transfusion.

(b) The initial specimen from each infant born outside of an institution shall be obtained as follows:

(1) When the infant is at least 24 hours of age but less than 48 hours of age; and

(2) before the infant receives any blood transfusion.

(c) A repeat specimen shall be obtained from each infant born in an institution or outside of an institution under any of the following conditions:

(1) The specimen is unsatisfactory as specified in K.A.R. 28-4-505.

(2) Follow-up recommendations have been issued by the department.

(3) The infant is less than 24 hours old when the initial specimen is taken. (Authorized by K.S.A. 65-101 and K.S.A. 65-180; implementing K.S.A. 65-180 and K.S.A. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended April 14, 2000; amended Dec. 3, 2010; amended Dec. 7, 2018.)

28-4-504. Methods of specimen collection. (a) The specimen shall be collected using kits provided by the department.

(b) The form provided with the kit shall be completed before collection of the blood specimen.

(c) The outlined circles on the filter paper portion of the kit shall be saturated with blood in the manner specified on the filter paper.

(d) The specimen shall be delivered by carrier or mailed first-class to the laboratory after the blood has dried and not later than 24 hours from time of collection. (Authorized by K.S.A. 65-101; implementing K.S.A. 1998 Supp. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended April 14, 2000.)

28-4-505. Unsatisfactory specimens. (a) Each unsatisfactory specimen shall be retained by the department. The sending agency or facility shall be notified that the specimen is unsatisfactory. The physician or birth attendant shall be notified that the specimen is unsatisfactory with a request to submit another specimen.

(b) A specimen shall be labeled unsatisfactory if one of the following criteria is met:

(1) Identifying information is missing.

(2) More than 10 days have elapsed since the date of collection.

(3) The specimen is of unacceptable quality or quantity for analysis. (Authorized by K.S.A. 65-101 and K.S.A. 2009 Supp. 65-180; implementing K.S.A. 2009 Supp. 65-180 and K.S.A. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended April 14, 2000; amended Dec. 3, 2010.)

28-4-506. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-180; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; revoked May 10, 1996.)

28-4-507. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; revoked May 10, 1996.)

28-4-508. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-181; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; revoked May 10, 1996.)

28-4-509. Registry. (a) The registry shall be a computerized data system that includes the diagnosed individuals' name, birth-date, unique identification number, diagnosis, address including telephone number, parental names and addresses, guardian, nuclear family size and health status.

(b) Persons or guardians of minor children with a confirmed diagnosis of phenylketonuria, hypothyroidism or galactosemia shall forward to the newborn screening coordinator any address and health status changes within three months of the change. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-180; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987.)

28-4-510. Diagnosis and monitoring. (a) Each person with a confirmed diagnosis of any of the diseases specified in K.S.A. 65-180, and amendments thereto shall be eligible to receive medical specialist monitoring upon the department's annual receipt of the person's current address, insurance data, and documentation of continued medical need from a medical specialist.

(b) Each medical specialist shall meet the following requirements:

(1) Provide consultation and diagnosis; and

(2) provide and coordinate ongoing monitoring. (Authorized by K.S.A. 65-101; implement-

ing K.S.A. 65-180, as amended by 2006 SB 579, Sec. 1; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended, T-28-7-5-06, July 5, 2006; amended Oct. 20, 2006.)

28-4-511. Test refusal. Refusal to take part in the testing procedure shall be documented in the child's record at the institution or physician's office or both. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-182; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987.)

28-4-512. Parental education. (a) Providers of prenatal health care shall discuss and distribute written material describing the newborn screening program as a component of the prenatal care to pregnant women.

(b) Prior to obtaining the specimen for newborn screening, the person responsible for obtaining the specimen shall inform the parent or parents about the newborn screening program, including how the test can be refused. (Authorized by K.S.A. 65-101; implementing K.S.A. 65-182; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987.)

28-4-513. Professional education. (a) Consultation with medical specialists shall be available without charge to primary care providers and others involved in the care of persons at risk for or diagnosed with phenylketonuria, congenital hypothyroidism, galactosemia, or hemoglobin diseases and traits.

(b) Notification letters and telephone calls reporting abnormal test results to the physicians shall contain information including interpretation of data and recommendations for follow-up.

(c) Upon request, workshops and other educational presentations concerning newborn screening shall be provided by the department when a specific need is identified.

(d) The newborn screening coordinator and personnel in the newborn screening section of the laboratory shall respond to telephone and written inquiries concerning specimens within five working days of receipt. (Authorized by K.S.A. 65-101; implementing K.S.A. 1998 Supp. 65-180; effective, T-87-48, Dec. 19, 1986; effective May 1, 1987; amended April 14, 2000.)

28-4-514. MSUD and PKU; financial assistance availability for certain related expenses. (a)(1) The following factors shall be used to determine each family's eligibility for fi-

financial assistance for necessary treatment products or medically necessary food treatment products, or both:

(A) Applicable income; and

(B) cash assets in excess of 15 percent of the applicable income.

(2) If a family seeking financial assistance under this regulation has more than one family member with MSUD or PKU, the family shall be considered eligible for financial assistance at a level that is 100 percent less than the eligibility level for a family with one family member.

(b) Each individual who applies for or who receives financial assistance under this regulation shall also meet the requirements in K.A.R. 28-4-401.

(c) The following eligibility requirements shall apply to each family:

(1) Each family with applicable income and cash assets less than or equal to 185 percent of the federal poverty level shall be eligible to receive 100 percent of the cost of necessary treatment products. This family shall be eligible each year for up to \$1,000 of medically necessary food treatment products for family members who are 18 years of age and younger.

(2) Each family with applicable income and cash assets more than 185 percent but not more than 285 percent of the federal poverty level shall be eligible to receive 50 percent of the cost of necessary treatment products.

(3) Each family with applicable income and cash assets more than 285 percent but not more than 385 percent of the federal poverty level shall be eligible to receive 25 percent of the cost of necessary treatment products.

(4) No family with applicable income and cash assets over 385 percent of the federal poverty level shall be eligible to receive any of the cost of necessary treatment products.

(d) If a family's health insurance covers a portion of the cost of necessary treatment products, the family's financial responsibility for this cost shall be determined pursuant to subsection (c).

(e) If the department orders any necessary treatment products for a family that is responsible for part of the cost, that family shall receive a statement indicating the amount to be reimbursed to the department. If reimbursement is not received from the family within 60 days of the statement date, the placement of any future orders for necessary treatment products for that family shall no longer be processed by the department. (Authorized by K.S.A. 65-101 and K.S.A. 2009 Supp.

65-180; implementing K.S.A. 2009 Supp. 65-180; effective, T-28-7-5-06, July 5, 2006; effective Oct. 20, 2006; amended Dec. 3, 2010.)

28-4-520. Definitions. In addition to the definitions in K.S.A. 65-1,241 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation:

(a) "Abnormal condition" means any condition established at conception or acquired in utero that results in a morphologic, metabolic, functional, or behavioral disorder requiring medical or other intervention.

(b) "Birth defects information system" means the Kansas birth defects reporting system, which collects, maintains, analyzes, and disseminates information regarding abnormal conditions, birth defects, and congenital anomalies of each stillbirth and of each child from birth to five years of age with a birth defect.

(c) "Congenital anomaly" means an error of morphogenesis that is established at conception or acquired during intrauterine life, which is also referred to as a birth defect.

(d) "ICD-9-CM" means the clinical modification of the "international classification of diseases," ninth revision, published by Ingenix inc., which is used to code and classify morbidity data from inpatient and outpatient records, physician offices, and most surveys from the national center for health statistics. The following portions of volume one of this document are hereby adopted by reference:

(1) "Genetic and metabolic conditions," codes 243 through 279.2 on pages 49 through 60;

(2) "sickle cell anemia and other hemoglobinopathies," codes 282.4 through 282.7 on pages 61 and 62;

(3) "congenital anomalies," codes 740 through 759 on pages 227 through 240; and

(4) "fetal alcohol syndrome," code 760.71 on page 241.

(e) "Primary diagnosis" means the principal disease or condition assigned to an infant by a licensed physician based on the history of the disease process, signs and symptoms, laboratory data, and special tests. (Authorized by and implementing K.S.A. 2009 Supp. 65-1,245; effective Dec. 3, 2010.)

28-4-521. Reporting abnormal conditions and congenital anomalies. (a) Reporting requirements. Each physician, hospital, and free-

standing birthing center shall report to the birth defects information system, pursuant to K.S.A. 65-1,241 and amendments thereto, the abnormal conditions and congenital anomalies listed in the portions of ICD-9-CM adopted by reference in K.A.R. 28-4-520.

(b) Method of reporting. Each abnormal condition and congenital anomaly that is required to be reported under this regulation shall be reported to the birth defects information system on a form approved by the secretary.

(c) Removal of reported information. Any parent or legal guardian may request the removal of reported information from the birth defects information system by using the removal form in accordance with K.S.A. 65-1,244, and amendments thereto. (Authorized by K.S.A. 2009 Supp. 65-1,245; implementing K.S.A. 2009 Supp. 65-1,241, 65-1,244, and 65-1,245; effective Dec. 3, 2010.)

28-4-525. (Authorized by and implementing L. 1987, Ch. 229, Sec. 7; effective, T-88-56, Dec. 16, 1987; effective May 1, 1988; revoked Aug. 7, 1998.)

28-4-526. (Authorized by L. 1987, Ch. 229, Sec. 7; implementing L. 1987, Ch. 229, Sec. 2; effective, T-88-56, Dec. 16, 1987; effective May 1, 1988; revoked Aug. 7, 1998.)

28-4-527 to 28-4-528. (Authorized by L. 1987, Ch. 229, Sec. 7; implementing L. 1987; Ch. 229, Sec. 4; effective, T-88-56, Dec. 16, 1987; effective May 1, 1988; revoked Aug. 7, 1998.)

28-4-529. (Authorized by and implementing L. 1987, Ch. 229, Sec. 7; effective, T-88-56, Dec. 16, 1987; effective May 1, 1988; revoked Aug. 7, 1998.)

28-4-530. (Authorized by and implementing K.S.A. 1990 Supp. 65-1,150; effective Oct. 7, 1991; revoked April 14, 2000.)

28-4-531. (Authorized by and implementing K.S.A. 1990 Supp. 65-1,150, 65-1,151, 65-1,152; effective Oct. 7, 1991; revoked April 14, 2000.)

INFANT TODDLER SERVICES—I.D.E.A.

28-4-550. Definitions. (a) “Assessment” means the initial and ongoing procedures used by qualified personnel to identify early intervention services.

(b) “Child find” means a public awareness program provided by community and state agencies

that prepares information on the availability of early intervention services, disseminates information given to parents of infants and toddlers with disabilities to all primary referral sources, and adopts procedures for assisting the primary referral sources for the purpose of identifying the potential need for early intervention services.

(c) “Collaboration” means the establishment and maintenance of open communication and cooperative working relationships among service providers and other caregivers and the family when identifying goals and delivering care to children.

(d) “Community” means an interacting population of various kinds of individuals in a common location.

(e) “Community-based,” when used to describe a place, means a place where small groups of infants and toddlers without disabilities are typically found, including child care centers and day care facilities.

(f) “Continuing education experience” means either of the following:

(1) College and university coursework completed after an individual receives a professional credential; or

(2) an inservice, workshop, or conference that offers professional continuing education credit.

(g) “Developmental delay” means any of the following conclusions obtained using evidence-based instruments and procedures in one or more areas of development, including cognitive, physical, communication, social or emotional, or adaptive development:

(1) There is a discrepancy of 25 percent or more between chronological age, after correction for prematurity, and developmental age in any one area.

(2) There are delays of at least 20 percent in two or more areas.

(3) The informed clinical opinion of a multidisciplinary team concludes that a developmental delay exists when specific tests are not available or when testing does not reflect the child’s actual performance.

(h) “Early intervention records” means reports, letters, and educational and medical records that are collected, maintained, or used by the local lead agency in the screening, evaluation, and development of an IFSP or in the delivery of services, or both.

(i) “Eligible,” when used to describe a child, means a child from birth through two years who has one of the following:

(1) A developmental delay or a known condition leading to a developmental delay; or

(2) an established risk for developmental delay. The developmental delay does not have to be exhibited at the time of diagnosis, but the common history of the condition indicates the need for early intervention services.

(j) "Evaluation" means the procedures used by qualified personnel to determine a child's eligibility for early intervention services.

(k) "Family" means the individuals identified by the parent or parents of an infant or a toddler with special needs to be involved in developing the IFSP and early intervention services.

(l) "Family service coordinator" means a person who is responsible for coordinating all early intervention services required under part C across agency lines and for serving as the single point of contact for carrying out these early intervention services.

(m) "Family service coordination services" means the services provided by a family service coordinator.

(n) "Home-based," when used to describe a site, means a site identified by a family as the home where individualized services for a child and family are delivered.

(o) "IDEA" means the individuals with disabilities education act, as specified in 20 U.S.C. 1400 et seq.

(p) "Individualized family service plan" and "IFSP" mean a written plan for providing early intervention services to an eligible child and the child's family.

(q) "Local community" means a geographic service area with various boundaries, including cities, counties, parts of counties, and multicounty regions, as defined by a local council.

(r) "Local fiscal agency" means a legal entity designated by a local council and approved by the secretary that ensures compliance with part C of IDEA grant award and maintains an accounting system that meets the state and federal requirements under IDEA for generally accepted accounting principles for recording receipts, obligations, and disbursements of grant funds.

(s) "Local lead agency" means a legal entity designated by the local council and approved by the secretary that ensures compliance with part C of IDEA.

(t) "Local tiny-k program" means the part C early intervention services network, as determined by the local council, that serves a specific geographic area.

(u) "Local tiny-k program coordinator" means the person designated by the local lead agency to be the central contact for the local tiny-k program.

(v) "Mediation" means the process by which parties, together with the assistance of an impartial individual, move toward resolution or resolve a dispute through discussion of options, alternatives, and negotiation.

(w) "Multidisciplinary IFSP team" means a parent and two or more individuals from separate professions who determine the early intervention services needed.

(x) "Multidisciplinary evaluation and assessment team" means individuals from two or more professions, which may include one individual who is qualified in more than one profession, who complete an assessment and an evaluation.

(y) "Parent" means any of the following:

(1) A biological or adoptive parent of a child;

(2) a foster parent, unless state law or a contractual obligation with a state or local entity prohibits the foster parent from acting as a parent;

(3) a guardian authorized to act as a child's parent or authorized to make decisions regarding early intervention services, education, health, or development for a child;

(4) an individual acting in the place of a biological or adoptive parent; or

(5) a child advocate, as specified in K.A.R. 28-4-568.

(z) "Part C" means the portion of IDEA that governs the grant program for states to develop a statewide, comprehensive, coordinated, multidisciplinary, interagency system to provide early intervention services for infants and toddlers with disabilities and their families.

(aa) "Party," when used in K.A.R. 28-4-569 to identify any participant in a complaint proceeding, means the lead agency, any local tiny-k program, any provider of early intervention services, or any person that files a complaint with the lead agency.

(bb) "Payor of last resort" means the federal program that makes part C funds available to pay for early intervention services for an eligible child that are not paid from other public or private sources.

(cc) "Person," when used in this regulation and in K.A.R. 28-4-569 to identify any participant in a complaint proceeding, means a parent, an individual, or an organization.

(dd) "Potentially eligible," when used to describe a child, means that the child receives early intervention services at least 90 days before that

child's third birthday or that the child is identified as eligible for part C at least 45 days before that child's third birthday.

(ee) "Primary referral source" means any of the following:

- (1) A hospital;
- (2) a physician;
- (3) a parent;
- (4) a child care program;
- (5) an early learning program;
- (6) a local educational agency;
- (7) a school;
- (8) a public health facility;
- (9) a public health agency;
- (10) a social service agency;
- (11) a clinic;
- (12) a health care provider;
- (13) a public agency in the child welfare system;
- (14) a homeless family shelter; or
- (15) a domestic violence shelter.

(ff) "Referral to the local tiny-k program" means a transfer of information by a primary referral source to determine eligibility for part C or to initiate or continue early intervention services.

(gg) "Screening process" means the clinical observation of or the use of a developmentally appropriate screening tool by a local tiny-k program to determine the need for evaluation.

(hh) "Secretary" means secretary of the Kansas department of health and environment. (Authorized by and implementing K.S.A. 75-5649; effective Jan. 30, 1995; amended Aug. 15, 1997; amended March 7, 2014.)

28-4-551. (Authorized by and implementing K.S.A. 1993 Supp. 75-5649; effective Jan. 30, 1995; revoked Aug. 15, 1997.)

28-4-552. (Authorized by and implementing K.S.A. 1996 Supp. 75-5649; effective Jan. 30, 1995; amended Aug. 15, 1997; revoked March 7, 2014.)

28-4-553 to 28-4-555. (Authorized by and implementing K.S.A. 1993 Supp. 75-5649; effective Jan. 30, 1995; revoked Aug. 15, 1997.)

28-4-556. (Authorized by and implementing K.S.A. 1996 Supp. 75-5649; effective Jan. 30, 1995; amended Aug. 15, 1997; revoked March 7, 2014.)

28-4-557. (Authorized by and implementing K.S.A. 1993 Supp. 75-5649; effective Jan. 30, 1995; revoked Aug. 15, 1997.)

28-4-558 to 28-4-563. (Authorized by and implementing K.S.A. 1994 Supp. 75-5649; effective Jan. 30, 1995; amended May 3, 1996; revoked Aug. 15, 1997.)

28-4-564. Personnel requirements. (a) Early intervention services shall be provided by qualified personnel.

(b) Qualified personnel shall meet state-approved or state-recognized certification, licensing, registration, or other comparable requirements that apply to the area in which the individual is providing early intervention services.

(1) Each audiologist shall be licensed by the Kansas department for aging and disability services.

(2) Each clinical professional counselor shall be licensed by the Kansas behavioral sciences regulatory board.

(3) Each marriage and family therapist shall be licensed by the Kansas behavioral sciences regulatory board.

(4) Each nurse shall be licensed as a registered professional nurse by the Kansas board of nursing.

(5) Each nutritionist shall be a dietitian licensed by the Kansas department for aging and disability services.

(6) Each occupational therapist shall be licensed by the Kansas board of healing arts.

(7) Each orientation and mobility specialist shall meet the following requirements:

(A) (i) Have at least a bachelor's degree with an orientation and mobility endorsement, from an accredited university or college; or

(ii) have a bachelor's degree from an accredited university or college in any field of study and verification of orientation and mobility certification from an accredited university or college; and

(B) have completed 350 hours of supervised practice as an orientation and mobility specialist that includes direct service hours, related telephone calls, meetings, observations, and report writing. The practice shall be supervised by a certified orientation and mobility specialist.

(8) Each physician, including each pediatrician, shall be licensed by the Kansas board of healing arts and board-certified in the specialty area.

(9) Each physical therapist shall be licensed by the Kansas board of healing arts.

(10) Each psychologist shall be licensed by the Kansas behavioral sciences regulatory board or licensed as a school psychologist by the Kansas state board of education.

(11) Each family service coordinator shall have a bachelor's degree in education, health studies, nutrition, social welfare, or the human services field and have at least six months of experience in early childhood development. Each individual working as a family service coordinator before June 1, 2013 shall be deemed to have met the education and experience requirements of this paragraph.

(12) Each social worker shall be licensed by the Kansas behavioral sciences regulatory board.

(13) Each special educator and each special instruction provider shall be licensed by the Kansas state board of education in early childhood special education or in early childhood unified education.

(14) Each speech-language pathologist shall be licensed by the Kansas department for aging and disability services.

(15) Each teacher of the hearing-impaired shall be licensed as a teacher of the hearing-impaired by the Kansas state board of education.

(16) Each teacher of the blind and visually impaired shall be licensed as a teacher of the blind and visually impaired by the Kansas state board of education.

(c) The continuing education requirements for licensure, registration, or certification for personnel providing early intervention services shall be determined by the regulatory body governing each profession.

(1) Continuing education shall include discipline or cross-discipline information clearly related to the enhancement of the practice, value, skills, and knowledge of working with children with special needs, from birth through age two, and their families.

(2) If continuing education is a requirement for licensure, certification, or registration renewal, at least one-third of the required number of credits, units, points, or hours shall focus on the content specified in paragraph (c)(1).

(3) If continuing education is not a requirement for licensure, certification, or registration renewal, 24 continuing education hours that focus on the content specified in paragraph (c)(1) and are obtained in a three-year period shall be required.

(d) Aides, assistants, and paraeducators in local tiny-k programs shall work under the supervision of a professional in that discipline according to the standards of that profession. (Authorized by and implementing K.S.A. 75-5649; effective Jan. 30, 1995; amended March 7, 2014.)

28-4-565. Local tiny-k program responsibilities. (a) Each local tiny-k program shall have a local council that has as one of its purposes the coordination of part C for infants and toddlers with disabilities and their families.

(1) The local council shall consist of members who reflect the community, including at least the following:

(A) A parent of a child who has received part C services;

(B) a representative of a health or medical agency;

(C) a representative of an educational agency;

(D) a representative of a social service agency; and

(E) a representative of the local tiny-k program.

(2) The names of local council members shall be submitted to and acknowledged by the lead agency.

(3) The chair of the local council shall be elected by the local council. The name of the local council chair shall be provided to the lead agency. A local council chair shall not be a local tiny-k program coordinator.

(4) The responsibilities of the local council shall include the following:

(A) Identifying local service providers who can provide early intervention services to infants and toddlers with disabilities and their families;

(B) advising and assisting local service providers; and

(C) communicating, combining, cooperating, and collaborating with other local councils on issues of concern.

(b) Each local tiny-k program coordinator, in collaboration with the local council, shall develop a plan describing the system for coordinating part C. The plan shall include the following:

(1) Identification of a local lead agency, which shall be acknowledged by the secretary of the lead agency;

(2) identification of a local fiscal agency, which shall be acknowledged by the secretary of the lead agency. The local lead agency and local fiscal agency may be the same agency, if the local lead agency is a legal entity;

(3) a description of identified community needs and resources;

(4) a description of written interagency agreements or memoranda of understanding and the way those agreements or memoranda are used in the development of an IFSP for eligible children and their families;

(5) a public awareness program that informs community members about child find, the central point of contact for the community, and the availability of early intervention services;

(6) a provision that part C shall be at no cost to eligible infants and toddlers and their families; and

(7) an assurance that the information regarding the plan is available in the community.

(c) Each local tiny-k program coordinator and local council requesting part C and state funds shall submit an annual grant application to the lead agency, which shall meet the following requirements:

(1) Include the plan for part C, as described in subsection (b); and

(2) be in compliance with the grant application materials provided by the lead agency.

(d) Each local tiny-k program shall be required to utilize multiple funding sources with part C funds utilized as the payor of last resort. (Authorized by and implementing K.S.A. 75-5649; effective Jan. 30, 1995; amended Aug. 15, 1997; amended March 7, 2014.)

28-4-566. (Authorized by and implementing K.S.A. 1993 Supp. 75-5649; effective Jan. 30, 1995; revoked Aug. 15, 1997.)

28-4-567. (Authorized by and implementing K.S.A. 1994 Supp. 75-5649; effective Jan. 30, 1995; amended May 3, 1996; revoked Aug. 15, 1997.)

28-4-568. Child advocates. (a) Each local tiny-k program coordinator, with the assistance of the secretary, if needed, shall determine the legal relationship between a parent and a child before evaluation and assessment.

(b) The lead agency shall assign a child advocate to a child if at least one of the following conditions is met:

(1) No parent can be identified.

(2) A local tiny-k program, after reasonable efforts, cannot locate a parent.

(3) The child is in the custody of the state under the laws of Kansas, and parental rights have been severed.

(c) The method used for assigning a child advocate shall be as follows:

(1) Each local tiny-k program shall inform the lead agency or its contracting agency upon determining that a child needs a child advocate.

(2) Each local tiny-k program shall be assisted in locating an appropriate child advocate by the secretary. A child advocate shall be assigned under the authority of the lead agency or, if the child

is in the custody of the state, appointed by the district court having jurisdiction over the custody proceedings for the child.

(d) Each child advocate shall be selected from a list of individuals who have completed training in advocacy for individuals or have demonstrated knowledge of the power, duties, and functions necessary to provide adequate representation of a child. This list shall be maintained by the lead agency or its contracting agency.

(e) The lead agency or its contracting agency shall ensure that each individual selected as a child advocate meets the following conditions:

(1) Has no interest that conflicts with the interests of the child;

(2) has knowledge and skills that ensure representation of the child; and

(3) is not an employee of the lead agency or any agency involved in the provision of early intervention services or any other services to the child.

(f) A child advocate shall not be considered an employee of the lead agency or any agency involved in the provision of early intervention services or any other services to the child solely because the individual is paid by a public agency to serve as a child advocate.

(g) Each child advocate shall have the same rights as those of a parent under part C.

(h) The contracting agency shall make reasonable efforts to ensure that a child advocate is assigned to a child less than 30 days after it is determined that the child needs a child advocate. (Authorized by and implementing K.S.A. 75-5649; effective Jan. 30, 1995; amended March 7, 2014.)

28-4-569. Resolution of complaints. (a) Complaints. Any person believing that there has been any violation of part C may file a complaint with the lead agency. A complaint may allege any violation of part C that occurred no more than one year before the lead agency received the complaint.

(b) Complaint proceedings. Any person who files a complaint may participate in the resolution of the complaint through one or more of the proceedings specified in subsections (c), (d), and (e), which may occur individually or simultaneously. Each person shall be responsible for that person's legal fees.

(c) Formal complaint. Any person may file a formal complaint against the lead agency, any local tiny-k program, or any provider of early intervention services, or any combination of these.

(1) Each formal complaint shall be submitted on a form provided by the lead agency or shall be submitted as a written and signed statement that includes the following information:

(A) Any alleged violations of part C requirements;

(B) the alleged circumstances on which the formal complaint is based;

(C) the contact information of the person filing the formal complaint; and

(D) a proposed resolution to the extent known and available to the person.

(2) If the formal complaint alleges any violation regarding a specific child, the formal complaint shall include the following additional information:

(A) The child's name and address;

(B) the name of the local tiny-k program providing early intervention services for the child;

(C) a description of any alleged violations regarding the child; and

(D) a proposed resolution of the problem, to the extent known and available to the person.

(3) Any person may submit additional written information about the allegations in the formal complaint within five days after filing the formal complaint.

(d) Mediation. A mediation may be requested by any party.

(1) A mediation shall be conducted if it meets the following requirements:

(A) Is voluntary by each party;

(B) does not deny or delay a parent's right to a due process hearing or any other rights under part C; and

(C) is conducted by an impartial mediator trained in mediation techniques.

(2) Each mediator appointed by the lead agency shall meet the following requirements:

(A) Be selected on a random or impartial basis by the lead agency;

(B) have knowledge of the laws and regulations relating to early intervention services;

(C) not be an employee of the lead agency or the provider of early intervention services; and

(D) be impartial and not have a private or professional interest in the outcome of the mediation.

(3) Each mediation shall be scheduled by agreement of each party and shall be held in a location convenient to each party.

(4) Each mediator shall perform the following duties:

(A) Listen to the presentation of each party to determine facts and issues;

(B) assist in the development of creative alternatives to resolve the complaint; and

(C) facilitate negotiation and decision making.

(5) If the parties resolve a dispute through mediation, the parties shall execute a legally binding mediation agreement.

(6) All discussions that occur during a mediation shall remain confidential.

(e) Due process hearing. Each due process hearing shall be conducted by a hearing officer who has knowledge of part C and early intervention services.

(1) Each due process hearing shall be conducted at a time and place convenient to the parents.

(2) Each hearing officer shall meet the requirements for impartiality specified in paragraph (d) (2), except that the hearing officer shall be selected by the office of administrative hearings.

(3) The hearing officer shall perform the following duties:

(A) Schedule the hearing;

(B) listen to each party's presentation;

(C) examine the information presented by each party;

(D) issue a written decision and provide the written decision to each party within 30 days after the lead agency receives the due process complaint; and

(E) provide a written or electronic verbatim transcription of the hearing.

(4) Each parent involved in a due process hearing shall have the following rights:

(A) To be accompanied and advised by counsel and by individuals with special knowledge or training with respect to early intervention services;

(B) to present evidence and testimony from witnesses;

(C) to prohibit the introduction of any evidence that has not been disclosed to the parent at least five days before the hearing; and

(D) to be provided with the written decision of the hearing officer and the verbatim transcription of the hearing at no cost.

(f) Each local lead agency and each local fiscal agency shall be responsible for the costs of remediation of part C complaints through formal complaint, mediation, or due process hearing proceedings, except legal fees. (Authorized by and implementing K.S.A. 75-5649; effective Jan. 30, 1995; amended Aug. 15, 1997; amended March 7, 2014.)

28-4-570. (Authorized by and implementing K.S.A. 1994 Supp. 75-5649; effective Jan. 30, 1995; amended May 3, 1996; revoked Aug. 15, 1997.)

28-4-571 to 28-4-572. (Authorized by and implementing K.S.A. 1993 Supp. 75-5649; effective Jan. 30, 1995; revoked Aug. 15, 1997.)

28-4-573. System of payments. (a) Part C funds shall be available at no cost to a family even if that family provides consent to bill third-party sources, including private insurance.

(b) Funds under part C may be used only for early intervention services that infants and toddlers with disabilities need if the early intervention services are not paid for by any other federal source or any Kansas, local, or private source, in accordance with 34 C.F.R. 303.520. (Authorized by and implementing K.S.A. 75-5649; effective March 7, 2014.)

SCHOOL-AGE PROGRAMS

28-4-576. Definitions. (a) “Academic credit hour” means credit earned for coursework through an accredited postsecondary educational institution.

(b) “Administrative order” means an order that is issued by the secretary as specified in K.S.A. 65-501 et seq., and amendments thereto, and that is subject to the Kansas administrative procedures act.

(c) “Administrator” means the staff member who is responsible for the general and fiscal management of the program.

(d) “Adult responsible for a child or youth” means any of the following adults who is other than the child’s or youth’s legal parent and who is responsible for the care and upbringing of the child or youth:

- (1) A stepparent;
- (2) a grandparent;
- (3) another relative; or
- (4) a foster parent.

(e) “Animal” means any living creature, other than a human being, that has the ability to move voluntarily and shall include mammals, rodents, fish, reptiles, insects, spiders, and birds.

(f) “Annual renewal date” means the date assigned to each licensee for the submission of the documents required to renew the license and payment of the annual license fee.

(g) “Applicant” means any person who has submitted an initial application for a license to oper-

ate a school-age program but has not received a temporary permit or license.

(h) “Available space for activities” means the indoor and outdoor space on the premises that is used by children and youth during the hours of operation in carrying out the program of activities. The following shall not be counted as available space for activities:

- (1) Kitchens;
- (2) rest rooms;
- (3) hallways and passageways;
- (4) storage areas;
- (5) offices;
- (6) teacher or employee lounges and work-rooms; and
- (7) any other space not used by the children or youth for activities.

(i) “Basement” means an area with a floor level more than 30 inches below ground level on all four sides.

(j) “Building” means a structure used for shelter that has a roof and is enclosed by walls on all sides.

(k) “Child or youth with special needs” means a child or youth who requires specialized programs, services, interventions, or technologies while attending the program, due to any of the following conditions:

- (1) A developmental disability;
- (2) mental retardation;
- (3) mental illness;
- (4) an emotional or behavioral difficulty;
- (5) sensory or motor impairment; or
- (6) a chronic illness.

(l) “Day reporting program” means a program that provides specialized services designed to enable juvenile offenders 10 years of age and older to remain offense-free while living in the community.

(m) “Department” means the Kansas department of health and environment.

(n) “Drop-in program” means a child care facility as defined in K.A.R. 28-4-700(e).

(o) “Group” means a limited number of children or youth assigned to a staff member or team of staff members.

(p) “High-risk sport or recreational activity” means a sport or recreational activity that poses a significant risk of injury to the participant. Safe participation in the activity shall require specialized instruction and may require protective safety gear.

(q) “Individualized program plan” and “IPP” mean a written, goal-oriented plan of specialized services for each child or youth with special needs

or for each juvenile offender attending a day reporting program. Each operator shall ensure that the IPP assigns responsibility for the delivery of the specialized services.

(r) “Job-related experience” means experience approved by the secretary that includes teaching, working, and volunteering with school-age children and youth.

(s) “Kindergarten-age child” means a child who is attending kindergarten or who has completed kindergarten and has not entered first grade.

(t) “License” means the document issued by the secretary that authorizes a person to operate a school-age program.

(u) “License capacity” means the maximum number of children or youth, or both, authorized by the temporary permit or license to attend the program at any one time.

(v) “Meal” means breakfast, lunch, or dinner.

(w) “Mobile summer program” means a program that operates only during the summer months. Children and youth meet at a designated pick-up and drop-off site, and are transported daily to locations off the premises for program activities.

(x) “Notice of survey findings” means a written record documenting the results of an inspection or investigation conducted by the secretary’s designee to determine compliance with applicable statutes and regulations.

(y) “Operator” means a person who holds a temporary permit or license to conduct a school-age program.

(z) “Outdoor summer camp” means a program that operates only during the summer months and is conducted at an outdoor location for the duration of the program, but does not include any summer instructional camps as defined in K.S.A. 65-501, and amendments thereto.

(aa) “Premises” means the location, including the building or buildings and adjoining grounds, for which the operator has a temporary permit or license to conduct a school-age program.

(bb) “Professional development training” means training approved by the secretary that is related to working with school-age children and youth.

(cc) “Program director” means the staff member who is approved by the secretary as meeting the qualifications specified in K.A.R. 28-4-587 and who is responsible for implementing and supervising the program of activities.

(dd) “Program director designee” means the staff member whom the operator designates to

conduct the program in the temporary absence of the program director for a period not to exceed two consecutive weeks, or at the beginning and end of any day that exceeds eight hours.

(ee) “Program of activities” means a comprehensive and coordinated plan of activities that meets the following criteria:

(1) Promotes cognitive, emotional, social, and physical development;

(2) supports the well-being of each child or youth; and

(3) protects the safety of each child and youth in attendance.

(ff) “Public recreation center” means any building used by a political or taxing subdivision of this state, or by an agency of a state subdivision, for recreation programs that serve children and youth.

(gg) “Regularly volunteering” means working in a program on a recurring basis and without compensation. This term shall not apply to guest speakers and to persons who make one or more presentations on a specific subject.

(hh) “School-age child” and “child” mean an individual who is of kindergarten age through the academic year in which the child is in the sixth grade and who is attending the program. Each school-age child shall be included in the license capacity.

(ii) “School-age program” and “program” mean a child care facility that serves exclusively school-age children and youth, but shall not include a drop-in program as defined in this regulation.

(jj) “School-age youth” and “youth” mean an individual who meets the following conditions:

(1) Has completed sixth grade or is 12 years of age or older;

(2) is less than 18 years of age;

(3) is attending the program; and

(4) is not a volunteer or employee.

Each school-age youth shall be included in the license capacity.

(kk) “Secretary” means the secretary of the Kansas department of health and environment.

(ll) “Secretary’s designee” means the person designated by the secretary to assess compliance with program regulations.

(mm) “Snack” means supplemental food served between meals.

(nn) “Specialized services” means additional services provided by the program to meet the special needs identified in the IPP for a specific child or youth.

(oo) “Staff member” means both of the following:

(1) All personnel, including employees, substitutes, and volunteers, who provide administrative or direct services to children and youth; and

(2) auxiliary personnel, including cooks, drivers, office workers, and housekeeping staff, who provide indirect services.

(pp) "Supervisory ratio" means the ratio consisting of the number of staff members required to provide direct services and supervision to a specified number of children or youth.

(qq) "Temporary permit" means the document issued pursuant to K.S.A. 65-504, and amendments thereto, that authorizes a person to operate a school-age program before receiving a license as required by K.S.A. 65-501, and amendments thereto.

(rr) "Time-out area" means a designated, supervised space in the activity area that is used to separate a child or youth from the group for a limited period of time, to allow the child or youth to regain self-control.

(ss) "Use zone" means the surface under and around a piece of equipment onto which a child or youth falling from or exiting the equipment would be expected to land. (Authorized by and implementing K.S.A. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-577. Terms of temporary permit or license. (a) License capacity.

(1) Building-based programs. The license capacity of each building-based program shall be determined by the combined indoor and outdoor available space for activities. For each child or youth counted in the license capacity, each operator shall provide 35 square feet of indoor available space for activities. If outdoor space is used, the license capacity may be increased by one child or youth for each 75 square feet of outdoor available space for activities, with the total license capacity not to exceed 175% of the license capacity based on the indoor space.

(2) Outdoor summer camps. The license capacity of each outdoor summer camp shall be determined by the available space for activities. For each child or youth counted in the license capacity, the operator shall provide 75 square feet of available space for activities.

(3) Mobile summer programs. The license capacity of each mobile summer program shall be determined by the available space for activities at the drop-off and pick-up site. Each operator shall

provide 20 square feet of available space for activities at the site for each child and youth.

(b) Posting temporary permit or license. Each operator shall post each temporary permit or license in a conspicuous place on the premises that is visible to parents.

(c) License capacity not to be exceeded. Each operator shall limit the number of children and youth attending the program at any one time within the license capacity specified on the license.

(d) Provisions for issuing license. No license shall be issued by the secretary until all the applicable provisions of the following have been met:

(1) K.S.A. 65-501 through K.S.A. 65-516, and amendments thereto;

(2) K.S.A. 65-523 through K.S.A. 65-529, and amendments thereto;

(3) K.S.A. 65-531, and amendments thereto; and

(4) all applicable regulations.

(e) Validity of temporary permit or license.

(1) Each temporary permit or license shall be valid only for the person and the address specified on the temporary permit or license.

(2) When an initial or amended license becomes effective, all temporary permits, licenses, or certificates of registration previously issued to the operator at the same address shall become invalid.

(f) Withdrawal of application. Any applicant or operator may, at any time, submit a request to withdraw the application for a license or a license renewal. If an application for license or license renewal is withdrawn, each temporary permit or license issued to the operator based on that application shall become invalid. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-578. Licensure; amended license; exceptions; notification; renewal. Each person shall have a temporary permit or license to operate a school-age program before children or youth are in attendance.

(a) Temporary permit or license required. Each person desiring to operate a school-age program that meets one or more of the following criteria shall obtain a temporary permit or license from the secretary to operate a child care facility as specified in K.S.A. 65-503, and amendments thereto:

(1) The program is designed to allow two or more school-age children on a drop-in or enrolled basis to attend 12 hours a week or more for more

than two consecutive weeks, and is not an instructional class or activity as specified in paragraph (b) (3) of this regulation.

(2) The public agency providing funding to the program requires the program to be licensed as a child care facility.

(3) The program is a day reporting program for children 10 years of age or older and youth.

(4) The program is a specialized treatment, therapeutic, correctional, or rehabilitative program for school-age children or youth that children or youth attend 12 hours a week or more for more than two consecutive weeks.

(b) Exclusions. The following shall not be considered child care facilities:

(1) An "extraordinary school program," as defined in K.S.A. 72-8238, and amendments thereto, or a similar extended school day program that is conducted on the premises of an accredited non-public school, is attended only by pupils enrolled in the school in which the program is being conducted, and is staffed by certified elementary school teachers;

(2) a "summer program," as defined in K.S.A. 72-8237, and amendments thereto;

(3) an instructional class or activity in which a child or youth is enrolled for the purpose of participating in only one specific subject or skill-building area, including religious instruction in a specific doctrine or tenet, academic or remedial instruction, a basketball clinic, a baseball league, dance or drama class, or a class in martial arts;

(4) a program of activities that serves exclusively school-age youth and that is not required to be licensed as specified in subsection (a) of this regulation;

(5) a program of activities that serves exclusively youth who are 16 years of age and older; and

(6) a program that is operated by a local unit of government or school district and that operates for no more than four consecutive hours per day or for no more than two consecutive weeks.

(c) New temporary permit or license required. Each operator shall submit a new application, the required forms, and the license fee, and shall obtain a new temporary permit or license from the secretary, as follows:

(1) Before a program that has been closed is reopened;

(2) if there is a change in the location of the program; or

(3) if there is a change of ownership of the program.

(d) Amended temporary permit or license.

(1) Each operator who intends to change the terms of the temporary permit or license, including the license capacity or the age of children and youth served, shall submit an application for an amended temporary permit or license on a form supplied by the department, and a nonrefundable \$35 amendment fee. An amendment fee shall not be required if the request to change the terms of license is made at the time of the annual review of the program.

(2) The operator shall not consider the amendment granted until the amended temporary permit or license is issued by the secretary.

(e) Exceptions.

(1) Any operator may submit a written request for an exception to a school-age program regulation on a form supplied by the department.

(2) An exception may be granted if the secretary determines that the exception is in the best interest of a child's or youth's health, safety, or well-being, serves the needs of the child's or youth's family, and does not violate statutory requirements.

(3) If an exception is granted, each operator shall receive written notice of the approval of the exception and its duration. The approval shall be posted with the temporary permit or license. The exception shall not be considered granted until written approval is given by the secretary.

(f) Notification requirements. Each applicant or operator shall notify the secretary in writing before withdrawing the application, closing the program, or changing any of the following:

(1) High-risk sports or recreational activities offered by the program;

(2) the program director;

(3) the physical structure of the program site due to new construction or substantial remodeling that affects the license capacity; or

(4) the use of any part of the premises that affects the license capacity.

(g) Annual renewal.

(1) Before the annual renewal date, each licensee wishing to renew the license shall submit the annual nonrefundable license fee and shall complete and submit the following to the secretary on forms supplied by the department:

(A) An application to renew the license;

(B) the program director's annual report; and

(C) a request to conduct a criminal history and child abuse registry background check.

(2) Failure to submit the annual renewal documents and fee as required by paragraph (g)(1) of

this regulation shall result in an assessment of a \$10.00 late renewal fee payable to the secretary and may result in suspension of the license. Each late renewal fee assessed shall be paid upon request. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-504, 65-505, and 65-516; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-579. Applicant requirements. (a) Each individual submitting an application for a license shall be 21 years of age or older at the time of application.

(b) Each corporation applying for a license shall be in good standing with the Kansas secretary of state. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-504 and 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-580. Application procedures; advertising. (a) Application procedures.

(1) Each person wishing to conduct a school-age program shall submit a complete application on forms supplied by the department. The application shall be submitted at least 90 calendar days before the planned opening date of the program and shall include the following:

(A) A description of the program of activities and services to be offered, including the following:

(i) A statement of the program's purpose and goals;

(ii) the number and ages of children and youth for whom the program is designed; and

(iii) the anticipated opening date and the projected hours and months of operation;

(B) a request for a criminal history and child abuse registry background check as specified in K.A.R. 28-4-584; and

(C) a nonrefundable license fee of \$20.00.

(2) If an existing building is to be used, the applicant shall submit a floor plan describing all of the following:

(A) The intended use of the space;

(B) the location of each activity area within the building;

(C) the measurements for each room used by children and youth for activities;

(D) the location of each rest room designated for use, including the number of toilets, urinals, and hand sinks; and

(E) the location of entrances and exits.

(3) If new construction or remodeling is planned, the applicant shall submit a building and site plan to the secretary at least 45 calendar days before the construction or remodeling is scheduled to begin. Each building and site plan shall include all of the information listed in paragraph (a)(2) of this regulation. Each applicant shall obtain approval of the plan from the secretary before beginning construction or remodeling. If changes are made to the building or site plan following the secretary's approval, the applicant shall submit a description of the proposed changes to the secretary for approval before construction or remodeling begins.

(4) If outdoor activities are conducted on the premises, the applicant shall include a diagram of the outside activity area for approval by the secretary. The diagram shall include the following:

(A) Measurements of the space to be used;

(B) the location relative to the building;

(C) the means of access to the area from the building;

(D) the placement of anchored equipment; and

(E) the location of any hazards adjacent to the outside activity area, including heavily traveled streets, railroad tracks, and bodies of water.

(5) Each applicant for a license to conduct an outdoor summer camp shall submit documentation of site approval as specified in K.A.R. 28-4-586.

(b) Advertising. If an applicant advertises the availability of the program, the advertisement shall not contradict the written description of the program of activities and services submitted with the application. The applicant shall not make a claim of "state approval" until the secretary issues a temporary permit or license. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-505 and 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-581. Inspections; surveys; investigations; posting administrative order.

(a) Entry and access. Each applicant and each operator shall give the secretary or the secretary's designee immediate entry and access to the premises and to any records required to be kept, to determine compliance with applicable statutes and school-age program regulations. To ensure access, the applicant or operator shall authorize the program director or program director's designee to grant to the secretary, or the secretary's designee, immediate entry and access to the premises and required records.

(b) Notification of noncompliance.

(1) Applicant. If an applicant is notified in writing that the applicant is not in compliance with statutes or regulations governing school-age programs, the applicant shall make any changes or alterations identified in the notice before a temporary permit or license is issued by the secretary.

(2) Operator. If, following an inspection or complaint investigation, the operator is notified in writing that the program is not being conducted in compliance with statutes or regulations governing school-age programs, the operator shall make any changes or alterations identified in the notice necessary to achieve and maintain compliance.

(3) Explanation of findings. If an applicant or operator disagrees with a notice documenting any finding of noncompliance with licensing statutes or regulations, the applicant or operator may request an explanation of the finding from the secretary's designee. If the explanation is not satisfactory to the applicant or operator, the applicant or operator may submit a written request to the department for reconsideration of the finding. The written request shall identify the finding in question and explain why the applicant or operator believes that the finding should be changed. This request shall be made to the department within 10 calendar days after receiving the explanation.

(c) Posting of an administrative order. Each applicant or operator receiving an administrative order from the secretary shall post the order in a conspicuous place on the premises that is accessible to parents or potential users of the program. Each order shall be posted for 90 calendar days following the date the order becomes final. (Authorized by K.S.A. 2001 Supp. 65-508 and 65-513; implementing K.S.A. 2001 Supp. 65-504, 65-508, and 65-512; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-582. Administration; training; recordkeeping. (a) Building compliance. Before receiving a temporary permit or license, each applicant shall obtain documentation that the building complies with applicable building codes, fire safety requirements, and zoning codes. This documentation shall be on file on the premises or at a designated central office location that is accessible for review by the secretary's designee.

(b) Financial resources. Each operator shall have the financial resources necessary to maintain the program in compliance with licensing regulations.

(c) Lines of authority. Each operator shall define in writing the lines of authority governing the operation of the program.

(d) Delegation of authority. Each operator shall delegate administrative authority so that each program has a program director or a program director designee in charge during all hours of operation.

(e) Children and youth records.

(1) Each operator shall obtain the following information for each child or youth before or on the first day of attending the program:

(A) The first and last name, date of birth, and gender;

(B) a health history as specified in K.A.R. 28-4-590(d);

(C) the anticipated schedule of hours and days of attendance or a notation that attendance is on a drop-in basis; and

(D) the name, address, and telephone number of each parent or other adult responsible for the child or youth, the names of any other persons authorized to pick up the child or youth, and emergency contact information.

(2) Each operator shall obtain written authorization for emergency medical care, signed by the parent or legal guardian of each child or youth, before attending the program or within the first week of attendance.

(3) Except as specified in paragraph (4) of this subsection, each operator shall obtain written permission signed by the parent or other adult responsible for the child or youth before participating in the activity that will allow each child or youth to participate in the following activities, as applicable:

(A) Swimming and water activities;

(B) high-risk sports and recreational activities, as specified in K.A.R. 28-4-588;

(C) transportation provided by the program; and

(D) off-premises activities.

(4) If an operator is unable to obtain written information and records required for the child's or youth's participation in the program, the operator shall document that a reasonable effort has been made to obtain the necessary information and records. The operator shall develop and implement a plan, approved by the secretary, that provides the following information:

(A) Reasonable assurance that medical treatment can be obtained for each child or youth in case of emergency;

(B) reasonable assurance that each child or youth has permission to participate in the program of activities as specified in paragraph (e)(3) of this regulation; and

(C) reasonable assurance that each child or youth has current immunizations and has no allergies or other health conditions that would interfere with participation in program activities.

(5) Each health history and parental or other adult permission, as specified in this subsection, shall be recorded on forms provided by the department or approved by the secretary.

(6) Each child's or youth's record shall be confidential. Each operator shall have a written confidentiality policy, which shall be shared with each staff member and each parent or other adult responsible for the child or youth and which shall be followed. Nothing in this regulation shall limit access to confidential records by the secretary, the secretary's designee, the secretary of social and rehabilitation services, or law enforcement personnel.

(f) Staff records. Each operator shall have the following information on file on the premises or at a designated central office location that is accessible for review by the secretary's designee:

(1) If applicable, documentation of the required health information as specified in K.A.R. 28-4-590, and the date of participation in program orientation for each staff member as specified in K.A.R. 28-4-587;

(2) a copy of the identifying information submitted to the secretary for the completion of the criminal history and child abuse registry background check as specified in K.A.R. 28-4-584;

(3) a copy of current certification for first aid and certification for CPR as specified in K.A.R. 28-4-592; and

(4) if applicable, a copy of the program director's approval letter and documentation of professional development training for each director as specified in K.A.R. 28-4-587.

(g) Attendance of children and youth.

(1) Each operator shall maintain a daily attendance record that shall include each child's or youth's name, daily arrival time, and daily departure time. This record may be completed by a staff member or by each child or youth when arriving at or departing the premises. Each attendance record shall be kept on file for one year on the premises or at a designated central office location and shall be accessible for review by the secretary's designee.

(2) No operator shall allow any child or youth to attend the program for more than 16 hours in a 24-hour period, unless the program of activities includes overnight activities. The operator shall ensure that children and youth do not attend more than two consecutive weeks of overnight activities.

(h) Each operator shall make the records and reports of the child or youth available to the parent or other adult responsible for the child or youth, on request. (Authorized by K.S.A. 2001 Supp. 65-508; implementing K.S.A. 2001 Supp. 65-507 and 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-583. Access to the premises; safety of off-premises activities. (a) Access to the premises. Each operator shall give each custodial parent or other adult responsible for a child or youth attending the program immediate access to the premises during all hours of operation.

(b) Arrivals and departures. Each operator of a program in which children and youth attend on a regular basis shall meet the following requirements:

(1) Each operator shall develop and implement a policy regarding the hours of operation, the times for arrival and departure of each child and youth, and supervision during arrival and departure. The operator shall define in the policy the supervisory and notification responsibilities of each staff member if a child or youth does not arrive at the established time or if a parent or other authorized individual is late picking up the child or youth.

(2) Each operator shall inform each parent or other adult responsible for a child or youth of the policy specified in paragraph (b)(1) and shall ensure that each staff member complies with the policy.

(c) Program-sponsored off-premises activities.

(1) Each operator shall obtain prior written permission, as specified in K.A.R. 28-4-582, for each child or youth to go off the premises for program-sponsored activities.

(2) Each off-premises location and activity shall be related directly to the program of activities and the goals and purpose of the program. Each location shall be used with strict regard for the health and safety of each child or youth, shall be age-appropriate, and shall have sufficient space and equipment for the activities being conducted at that location.

(3) Each operator shall maintain on the premises a record of the following information:

- (A) Each destination;
- (B) the time at which the children or youth leave the premises;
- (C) the name of each adult supervising the children or youth while the children or youth are off the premises;
- (D) a telephone number for reaching an adult supervising the children or youth, in case of emergency; and
- (E) the estimated time of return.

(4) Each operator shall ensure that a method is in place for notifying each parent or other adult responsible for the child or youth before each off-premises activity occurs. These methods for notification may consist of any of the following:

- (A) Posting the notification in a place accessible to the parent or other adult responsible for each child or youth;
- (B) providing a calendar of scheduled off-premises activities to the parent or other adult responsible for each child or youth; or
- (C) providing a written notification to the parent or other adult responsible for each child or youth before each off-premises activity.

(5) Each operator and each staff member shall have a method of accounting for each child or youth while off the premises to ensure that no child or youth is forgotten or left behind. (Authorized by and implementing K.S.A. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-584. Background checks. Each applicant and each operator shall meet the following requirements:

(a) Submit to the department the identifying information necessary to complete background checks for each individual at least 14 years of age who works or regularly volunteers in the program and any other individual in the program whose activities involve either supervised or unsupervised access to children. The identifying information shall be submitted as follows:

- (1) When submitting an application for a license;
- (2) when submitting an application to renew a license; and
- (3) before allowing any individual to work or regularly volunteer in the program and before allowing any individual whose activities involve

either supervised or unsupervised access to children to be in the program;

(b) ensure that fingerprint-based background checks are completed for each of the following individuals:

- (1) The applicant;
- (2) the operator;
- (3) each program director;
- (4) each program director designee;
- (5) each staff member;
- (6) each volunteer counted in the supervisory ratio; and

(7) any other individual regularly in the program whose activities involve unsupervised access to children;

(c) ensure that the information submitted for each individual specified in subsection (b) includes the required information for background checks from each state of residence throughout

the five-year period before allowing the individual to work or regularly volunteer in the program;

(d) ensure that name-based background checks by the Kansas bureau of investigation and the Kansas department for children and families are completed for each of the following individuals:

(1) Each volunteer who is not counted in the supervisory ratio and who does not have unsupervised access to children;

(2) each student of an accredited secondary or postsecondary school who is at least 16 years of age and who is participating in an educational experience arranged by the school, if the student is not counted in the supervisory ratio and does not have unsupervised access to children; and

(3) any other individual regularly in the program whose activities do not involve unsupervised access to children; and

(e) ensure that no individual works or regularly volunteers in the program until the results of the individual's background checks verify that the individual is not prohibited from working, regularly volunteering, or residing in a facility pursuant to K.S.A. 65-516, and amendments thereto. (Authorized by K.S.A. 2017 Supp. 65-508; implementing K.S.A. 2017 Supp. 65-516; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended June 7, 2018.)

28-4-585. Building and outdoor premises. (a) Safety and maintenance of each building.

(1) Each operator shall ensure that the program is located in a building that meets the requirements specified in K.S.A. 65-508 and amend-

ments thereto, the applicable building code, and any applicable local ordinances. Each operator shall ensure that no child or youth is knowingly exposed to environmental hazards, including asbestos, lead paint, and pesticides.

(2) Hot and cold running water shall be supplied to hand sinks except as specified in this paragraph. The hot water temperature shall not exceed 120°F. Outdoor summer camps and mobile summer programs shall be exempt from the requirement to provide hot running water to hand sinks.

(3)(A) Each operator shall ensure that each building shall have a minimum of one working flush toilet and one working hand sink for each 30 children or youth in the license capacity. One urinal may be substituted for each additional toilet in the boys' rest room.

(B) Each operator shall designate the rest rooms to be used by the program. A separate rest room shall be provided for each gender unless the rest room is designated for single occupancy.

(C) Each rest room shall be located to allow for the following:

- (i) Supervision of children and youth;
- (ii) immediate access to the rest room facilities by children, youth, and adults; and
- (iii) privacy while using the toilet.

(D) If the rest rooms are also used by non-program participants during the hours of operation of the program, the operator shall develop and implement policies for rest room use for the protection of children and youth attending the program.

(E) Toilet paper, soap, and either paper towels or hand dryers shall be available in each rest room.

(4) Each operator shall provide adequately for the health, safety, and comfort of each child, youth, and adult by maintaining the space used by the program according to the following requirements:

(A) The space shall be uncluttered and free from accumulated dirt, trash, vermin, and rodent infestation.

(B) Each indoor trash container shall be emptied daily or more often if the contents are overflowing or the removal is needed to control odor.

(C) Floors shall not be slippery or cracked.

(D) Each rug or carpet used as a floor covering shall be slip-resistant and free from tripping hazards. A floor covering, paint, or sealant shall be required over concrete floors for all buildings.

(E) Each exit shall be marked. No exit shall be blocked at any time.

(5) Heating appliances shall be vented, used as intended, safely located, and maintained in operating condition. Power strips, if used, shall have a UL rating.

(6) Each operator shall safely store toxic substances and materials, including cleaning supplies, pesticides, and poisons, in a locked janitor's closet, locked room, or other locked area. No child or youth shall have unsupervised access to toxic substances and materials.

(b) Public and accredited non-public school buildings.

(1) Inside premises. If a program is located in a public or accredited non-public school building, the operator shall ensure that the building complies with subsection (a) of this regulation and with fire safety and building code requirements applicable to schools as required by K.S.A. 65-527, and amendments thereto.

(2) Outside premises.

(A) Each existing outside playground or activity area and equipment acceptable for use by students of the same age during the academic day may be used by children and youth in the program if the equipment is in sound condition.

(B) Additional impact-absorbent surfacing material shall not be required under anchored climbing equipment, slides, and swings if the equipment is acceptable for use by students of the same age during the academic day.

(c) Public recreation center buildings. If the program is located in a public recreation center, the operator shall ensure that the building complies with subsection (a) of this regulation and with fire safety and building code requirements applicable to public recreation centers as specified in K.S.A. 65-527, and amendments thereto.

(d) Buildings that are not public or accredited non-public school buildings or public recreation centers.

(1) If the program is located in a building that is not a public or accredited non-public school or a public recreation center, the operator shall ensure that the following requirements are met for the building used:

(A) The building shall meet the requirements in subsection (a) of this regulation.

(B) The building shall not be a residence or a single-family dwelling.

(C) Each stairway with more than two steps shall be railed.

(D) If windows and doors are left open, they shall be screened, with each screen in good con-

dition to prevent insects from entering the premises.

(2) If a program uses a non-public source for the water supply, the water shall be safe for drinking and shall be tested annually by a department-certified laboratory. The well shall be approved by the local environmental protection program (LEPP).

(e) Outside premises of public recreation centers and of other programs, including outdoor summer camps, that are not conducted in public schools or accredited non-public schools.

(1) General requirements.

(A) Each operator shall ensure that the outdoor activity area meets the following requirements:

(i) The area shall be located and arranged to reduce the risk of injury and to enable staff to provide close visual supervision at all times.

(ii) Each area shall be well drained and free of known health and environmental hazards.

(iii) There shall be no tall weeds or grass, untrimmed shrubbery, or trash in the activity area.

(iv) Each outdoor trash and garbage container shall be covered, and the contents shall be removed weekly.

(B) If the outdoor activity area is accessible to the public, each operator shall define boundaries for the children and youth attending the program and, to the extent possible, use space reserved exclusively for the program.

(2) Safety of outdoor equipment and the activity area. Each operator shall comply with the following safety requirements in the outside activity area:

(A) Equipment shall be safely located, age-appropriate, and in good repair. Equipment that is broken, hazardous, or unsafe or that does not have adequate impact-absorbent surfacing material in the use zone as specified in this regulation shall not be used.

(B) Impact-absorbent surfacing material shall be installed in each use zone under and around anchored play or recreational equipment over four feet in height, including climbing equipment, slides, and swings. Impact-absorbent surfacing material shall consist of any loose fill material specified in paragraph (e)(2)(G) of this regulation, unitary surfacing material, or synthetic impact material. Before any equipment over 11 feet in height is used, the operator shall meet the requirements specified in K.A.R. 28-4-588(e).

(C) Each use zone shall be at least six feet from all sides of the structure. However, the side of

some equipment, including a swing, shall not be required to have impact-absorbent surfacing material on each side if the potential for a fall to the side is minimal.

(D) Hard-surfacing materials, including asphalt, concrete, and hard-packed dirt, shall not be used in any use zone under and around climbing equipment, slides, and swings. This requirement shall apply regardless of the height of the climbing equipment, slides, and swings.

(E) If unitary surfacing material or synthetic impact material, including rubber mats, rubber tiles, and poured-in-place material, is installed in the use zone, the material shall be used and maintained according to the manufacturer's recommendations. The manufacturer's recommendations shall be on file on the premises or at a designated central office location and shall be accessible for review by the secretary's designee.

(F) Surfaces made of loose materials shall be maintained by replacing, leveling, or raking the material.

(G) If loose fill material is installed in the use zone, the material shall be specifically developed for playground use, and the type and depth of material used shall conform to the following chart:

Required depth of impact-absorbent surfacing material for the height of equipment

Maximum height of equipment	Type of material	Minimum depth of material
6 feet 10 feet 11 feet	shredded bark mulch	6 inches 9 inches 12 inches
7 feet 10 feet 11 feet	wood chips	6 inches 9 inches 12 inches
6 feet 9 feet	fine sand	6 inches 12 inches
7 feet 10 feet	fine gravel	9 inches 12 inches
10 feet or less	shredded rubber	6 inches

(3) Protection from environmental hazards. Each operator shall ensure that each child or youth is protected from environmental hazards as follows:

(A) If a small fish pond or decorative pool with water 24 inches deep or less is on the premises, no child shall have unsupervised access to it.

(B) Each outdoor activity area shall have a fence, partial fence, or other barrier to reduce the safety risk to children and youth, and to prevent chance access to any adjacent hazard, including the following:

(i) A busy street;
 (ii) railroad tracks; or
 (iii) a water hazard, including a ditch, irrigation ditch, pond, lake, and any standing water over 24 inches deep. Each public recreation center shall be exempt from paragraph (e)(3) of this regulation. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-508 and K.S.A. 65-527; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-586. Outdoor summer camps and mobile summer programs. (a)(1) Each operator conducting an outdoor summer camp or mobile summer program shall meet the requirements specified in this regulation and the requirements in K.A.R. 28-4-577 through K.A.R. 28-4-584, K.A.R. 28-4-587 through K.A.R. 28-4-590, and K.A.R. 28-4-592.

(2) Each operator shall meet the following requirements if the secretary determines that they are applicable to the program and services:

- (A) K.A.R. 28-4-576;
 - (B) K.A.R. 28-4-585;
 - (C) K.A.R. 28-4-591; and
 - (D) K.A.R. 28-4-593 through K.A.R. 28-4-596.
- (b) Outdoor summer camps.
- (1) Premises.

(A) Each outdoor summer camp shall be held in a city or county park or park-like setting that has at least 75 square feet of available space for each child or youth for the program of activities. Each operator shall use the premises according to its intended purpose, with strict regard for the health, safety, and well-being of each child or youth who attends the outdoor summer camp. No child or youth shall be exposed to environmental hazards, including asbestos, lead paint, and pesticides.

(B) If a lake, pond, river, or other large body of water is located within 100 yards of the premises, each operator shall ensure that the water hazard is physically separated from the activity area to prevent access by each child or youth, or shall submit to the secretary a plan for protecting each child and youth from unsupervised access. The plan, which shall be approved by the secretary before the premises are used for an outdoor summer camp, shall include the following:

- (i) A description of any natural barriers separating the activity area from the water;
- (ii) the approximate distance from the activity area to the water; and

(iii) a plan for increased supervision.

(C) Each outdoor summer camp shall have access to the following:

(i) A shelter or permanent building for protection from inclement weather and for dining purposes, as needed, that is large enough to accommodate the number of children and youth in attendance and for each child and youth to be comfortably sheltered without being crowded; and

(ii) rest room and hand-washing facilities as specified in K.A.R. 28-4-585.

(D) Rest room facilities shall be located in visual proximity to each program activity area.

(E) Each shelter structure shall be in sound condition and good repair and shall be free from accumulated dirt and trash.

(F) If a building is used, the operator shall ensure that the building meets the requirements specified in K.A.R. 28-4-585. A shelter house that has a roof and is enclosed by walls on all sides shall be considered a building and shall be included in determining the license capacity based on 35 square feet of available space for each child or youth.

(G) Each outdoor summer camp shall have facilities for sanitary dish washing available as specified in K.A.R. 28-4-591. If hot water is not available to the sink or if the dish-washing facilities do not meet the requirements specified in K.A.R. 28-4-591, each operator shall obtain approval from the secretary's designee for the use of alternate methods for sanitary dish washing.

(H) Each operator of an outdoor summer camp shall conduct a daily safety assessment of the premises to ensure that the premises are maintained to protect the health, safety, and well-being of each child and youth.

(2) Policies. Each operator of an outdoor summer camp shall develop and implement policies for the following:

(A) The protection and shelter of children and youth in case of inclement weather; and

(B) the use and maintenance of the shelter and rest room facilities, including policies for use and maintenance if the shelter and rest room facilities are owned and operated by another entity.

(3) Transportation. If the operator transports children and youth to and from the outdoor summer camp premises to a designated pick-up and drop-off location, the operator shall meet the requirements specified in K.A.R. 28-4-583, K.A.R. 28-4-593, and paragraphs (c)(4) and (5) of this regulation.

(c) Mobile summer programs.

(1) Each license for a mobile summer program shall be issued for the address of the designated drop-off and pick-up site. Each operator shall submit a new application for each change of location in the drop-off and pick-up site, and for any change in the license capacity.

(2) Each drop-off and pick-up site shall contain a shelter or a permanent building that provides adequate protection from inclement weather for each child or youth.

(3) Each operator shall ensure that no child or youth waits at the drop-off or pick-up site for more than one hour at the beginning of the program day or for more than one and one-half hours at the end of the program day.

(4) Each operator shall ensure that children or youth do not board the transporting vehicle until immediately before it is time to leave.

(5) Each operator of a mobile summer program shall ensure that the program has exclusive use of the licensed area during the entire time that children or youth involved in the program are present.

(6) Each operator of a mobile summer program shall meet the transportation requirements specified in K.A.R. 28-4-593 and the requirements for off-premises activities specified in K.A.R. 28-4-583.

(d) Staff records. Any operator of an outdoor summer camp or a mobile summer program may keep the staff records specified in K.A.R. 28-4-582 at a designated central office location. Each operator shall make these records available to the secretary or the secretary's designee upon request. Each operator shall keep health records and contact information for emergency notification immediately available in case of emergency.

(e) Children and youth records. Any operator may keep children and youth records as specified in K.A.R. 28-4-582 on file at a designated central office location. Each operator shall make these records available to the secretary or the secretary's designee upon request. Each operator shall ensure that the following records for each child or youth are immediately available in case of emergency:

- (1) Health history;
- (2) authorization for emergency medical care; and
- (3) emergency contact information. (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-587. Staff member qualifications; professional development training; staffing requirements. (a) Staff qualifications. Each operator and each staff member shall demonstrate an understanding of children and youth and shall act with reasonable care and judgment.

(b) Program director.

(1) Each operator shall hire a program director who meets the following qualifications:

(A) Is at least 18 years of age and is at least three years older than the oldest youth in the program;

(B) demonstrates the following:

(i) Knowledge of child and youth development;

(ii) knowledge of the licensing regulations governing school-age programs;

(iii) administrative and supervisory skills;

(iv) the ability to communicate clearly; and

(v) the competence to manage the program in compliance with the program policies, the program plan, and the licensing regulations governing school-age programs; and

(C) holds either a high school diploma or a general educational development (GED) credential.

(2) In addition to meeting the requirements specified in paragraph (b)(1), each program director shall meet one of the following qualifications, based on the license capacity:

(A) For a license capacity of 30 or fewer children or youth, has been approved as a program director as specified in K.A.R. 28-4-429(b) or (c), or has at least three months of job-related experience;

(B) for a license capacity of 31 through 60 children or youth, meets one of the following requirements:

(i) Has been approved as a program director as specified in K.A.R. 28-4-429(d) or (e);

(ii) has 15 academic credit hours; or

(iii) has six months of job-related experience;

(C) for a license capacity of 61 through 120 children or youth, meets one of the following requirements:

(i) Has been approved as a program director as specified in K.A.R. 28-4-429(e);

(ii) has 60 academic credit hours;

(iii) has 12 months of job-related experience; or

(iv) has a combination of 30 academic credit hours and six months of job-related experience; or

(D) for a license capacity of 121 or more children or youth, holds at least a bachelor's degree from an accredited college or university and has job-related experience.

(3) Within 10 calendar days after hiring each

program director, each operator shall comply with one of the following:

(A) Obtain from the program director a copy of the approval letter issued by the secretary to document that the program director is qualified for the license capacity; or

(B) submit a request to the secretary for approval of the program director who has been hired.

(4) Each program director designee shall meet the requirements specified in paragraphs (b)(1) and (2)(A).

(c) Administrator. Each operator of a program that has a license capacity of 91 or more children or youth shall employ an administrator who meets the following qualifications:

(1) Is not the program director or a group leader;

(2) is at least 18 years of age;

(3) holds either a high school diploma or a GED credential; and

(4) possesses administrative ability, knowledge of the licensing regulations governing school-age programs, and the skill to supervise the business operation of the program.

(d) Group leader.

(1) Each individual designated as group leader shall meet the following qualifications:

(A) Is at least 18 years of age and is at least three years older than the oldest youth in the group;

(B) holds either a high school diploma or a GED credential; and

(C) has job-related experience working with school-age children or school-age youth.

(2) Each group leader shall possess the following:

(A) Knowledge of child and youth development;

(B) knowledge of the licensing regulations governing school-age programs;

(C) an understanding of age-appropriate activities;

(D) the ability to communicate clearly;

(E) skills and abilities to implement the program of activities; and

(F) the ability to foster positive, healthy relationships with children or youth.

(3) Each group leader shall meet the following requirements:

(A) Provide supervision and direction to the children and youth assigned to the group;

(B) supervise group activities during all hours children and youth are present; and

(C) provide supervision and direction to an assistant group leader.

(e) Assistant group leader.

(1) Each individual designated as assistant group leader shall meet the following qualifications:

(A) Is at least 16 years of age and is at least three years older than the oldest youth in attendance in the group; and

(B) possesses the following:

(i) The ability to provide supervision and guidance to a group of children or youth under the direction of a group leader;

(ii) the skill and ability to carry out the program of activities; and

(iii) the ability to foster positive, healthy relationships with children and youth.

(2) Each assistant group leader shall be under the supervision and direction of a group leader.

(f) Substitute staff members.

(1) Each operator shall ensure that substitutes are available to work if there is an emergency or a staff member absence.

(2) Each substitute shall meet the requirements for the staff member whom the substitute is temporarily replacing.

(3) The name and telephone number of each substitute shall be available to the program director or the program director's designee.

(g) Volunteers.

(1) Each volunteer shall be at least 14 years of age and, if working directly with the children and youth, shall be at least three years older than the oldest youth in the group.

(2) No volunteer shall be counted in the supervisory ratio unless the volunteer meets all the requirements of a group leader or assistant group leader and is designated as a group leader or assistant group leader by the program director.

(h) Documentation of qualifications. In addition to meeting the staff record requirements in K.A.R. 28-4-582, each operator shall have on file an application form completed by each staff member, including documentation of the staff member's qualifications. The documentation shall be on file on the premises or at a designated central office location that is accessible for review by the secretary's designee.

(i) Professional development training.

(1) Orientation training. Each operator shall provide orientation training to each program director and each staff member who is counted in the supervisory ratio. The training shall be provided before or within the first week the program director or staff member works with children or youth. Each staff member shall complete the training before being given sole responsibility

for the care and supervision of children or youth. The training shall be related to work duties and responsibilities and shall include the following subject areas:

- (A) the mission and goals of the program;
- (B) the licensing regulations governing school-age programs;
- (C) the program policies and practices, including security and behavior management;
- (D) the program of activities;
- (E) supervision of children and youth, including any special needs and known allergies;
- (F) confidentiality;
- (G) recognizing and reporting symptoms of illness, child abuse, child neglect, and critical incidents as specified in K.A.R. 28-4-592;
- (H) prevention of and response to emergencies due to food and allergic reactions;
- (I) prevention and control of infectious diseases, including immunizations;
- (J) premises safety, including identification of and protection from hazards that could cause bodily injury, including electrical hazards, bodies of water, and vehicular traffic;
- (K) emergency preparedness and response planning for emergencies resulting from a natural disaster or a human-caused event, including violence at a premises;
- (L) handling and storage of hazardous materials and the appropriate disposal of bio-contaminants, including blood and other bodily fluids or waste; and
- (M) precautions when transporting children and youth, if transportation is provided.

(2) Ongoing professional development training.

(A) For purposes of this subsection, "licensure year" shall mean the period beginning on the effective date and ending on the expiration date of a license.

(B) In each licensure year, each program director shall complete professional development training as follows:

- (i) For each licensure year ending during the 2017 calendar year, 15 clock-hours;
- (ii) for each licensure year ending during the 2018 calendar year, 15 clock-hours; and
- (iii) for each licensure year ending during the 2019 calendar year, and for each subsequent licensure year, 16 clock-hours.

(C) In each licensure year, each operator or program director shall assess the training needs of the staff members and shall provide or arrange for staff training as needed to maintain the program

in compliance with the licensing regulations governing school-age programs.

(D) In each calendar year, each staff member shall complete professional development training as follows, based on the staff member's job responsibilities and the training needs identified by the operator or the program director:

- (i) For each licensure year ending during the 2019 calendar year, 12 clock-hours; and
- (ii) for each licensure year ending during the 2020 calendar year, and for each subsequent licensure year, 16 clock-hours.

(E) Each operator shall ensure that documentation of training is kept in each staff member's file on the premises or at a designated central office location that is accessible for review by the secretary's designee.

(j) Staffing requirements.

(1) Staff coverage. Each operator shall have a sufficient number of staff members on duty to supervise the children and youth during all hours of operation and to provide for their health, safety, and well-being. Each operator shall provide staff coverage if there is an emergency or a staff member absence.

(2) Supervision.

(A) Each operator shall ensure that the program has a qualified group leader for each 30 children or youth attending the program, except as specified in K.A.R. 28-4-596.

(B) Each operator shall maintain additional qualified staff to ensure that the supervisory ratio of one staff member for each 15 children and youth is not exceeded.

(C) Each staff member counted in the supervisory ratio shall be assigned responsibility for the supervision of children and youth and shall meet the following requirements:

- (i) Meet the applicable qualifications for a group leader or assistant group leader; and
- (ii) be physically present with the children or youth.

(3) Groups. Except as specified in K.A.R. 28-4-596, the number of children and youth in a group shall be limited by the following:

- (A) The available space for activities; and
- (B) the type of activity.

(4) Supervision of children and youth. Each staff member working with children and youth shall provide supervision to protect the health, safety, and welfare of the children and youth, and to reduce the risk of injury, illness, or abuse.

(5) Positive relationships. Each staff mem-

ber shall encourage the development of positive adult-to-child and adult-to-youth relationships and shall be actively engaged with the children or youth under the staff member's supervision.

(6) Location of each child and each youth. Each group leader or assistant group leader shall know the location of each child and each youth under the supervision of that group leader or assistant group leader at all times.

(7) Unescorted child or youth. Any group leader or assistant group leader may, based on the policy of the program and the age and responsibility level of the child or youth, give a child or youth permission to walk unescorted from one supervised activity area to another supervised activity area or to the rest room. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004; amended June 23, 2017.)

28-4-588. Program plan, program of activities, and use of space. (a) Program plan. Each operator shall develop and implement a written program plan that includes a program of activities, services, and schedules in keeping with the overall mission, goals, and purpose of the program and the developmental needs and interests of the children and youth.

(b) Program of activities.

(1) Each operator shall ensure that each activity is adapted to the number of children and youth participating in the activity and the space available. Whenever possible, each operator shall encourage each child and youth to participate in planning the program of activities.

(2) Each operator shall ensure that each activity meets the following conditions:

(A) Is developmentally appropriate and age-appropriate;

(B) helps each child or youth develop useful skills, a positive self-concept, a sense of independence, and positive relationships;

(C) provides a variety of structured, unstructured, and self-directed activities in keeping with the goals and purpose of the program and the hours of operation; and

(D) is scheduled to allow adequate time to transition from one activity to another.

(3) Each operator shall ensure that television programs, videos, and movies are limited to those with age-appropriate content and are shown only for special occasions or educational instruction.

(c) Use of available space for activities.

(1) If activities that are not part of the school-age program are conducted on the same premises as those for the school-age program, each operator shall designate space for exclusive use by the program during the hours of operation.

(2) Each operator shall provide sufficient space in each area for children and youth to engage comfortably in the activity without being crowded.

(d) Materials, equipment, and furnishings.

(1) Each operator shall provide a sufficient quantity of program materials, equipment, furnishings, and supplies to keep each child and youth engaged and to carry out the program of activities.

(2) Each operator shall ensure compliance with the following safety requirements:

(A) Equipment, furnishings, and supplies shall be used as intended and shall be safely stored to prevent injury or misuse.

(B) Equipment shall be maintained in good repair.

(C) If bedding is used, it shall be stored in a sanitary manner.

(3) Each operator shall ensure that there are no firearms, ammunition, hunting knives, and other weapons on the premises. Archery equipment and air-powered guns, including BB guns and pellet guns, shall be prohibited unless both of the following conditions are met:

(A) The equipment and guns are used as part of an instructional activity that meets the requirements for high-risk sports and recreational activities specified in subsection (e) of this regulation.

(B) The equipment and guns are kept in locked storage, and no child or youth has unsupervised access to the equipment and guns.

(e) High-risk sports and recreational activities.

(1) Before any high-risk sport or recreational activity is included in the program, each operator shall submit a description of the sport or activity to the secretary for written approval. Each description shall include the following information:

(A) The required qualifications for the instructor of the sport or activity;

(B) the goals of the instruction;

(C) the protective measures that will be followed to conduct the sport or activity safely;

(D) the plans for increased staff supervision;

(E) the type of protective gear, if required for the sport or activity;

(F) the operator's written assurance that each sport or activity will be age-appropriate; and

(G) any special procedures to be followed in conducting the sport or activity.

(2) Each operator shall keep the written approval from the secretary on file on the premises or at a designated central office location. This approval shall be accessible for review by the secretary's designee.

(3) Only an instructor who meets the qualifications for conducting a high risk sport or recreational activity shall instruct and supervise the children and youth engaged in that sport or activity.

(4) Before participating in a high-risk sport or recreational activity, each child or youth shall have written permission, as specified in K.A.R. 28-4-582, on file on the premises or at a designated central office location. Each written permission shall be accessible for review by the secretary's designee.

(f) Children or youth with special needs.

(1) If the operator and the parent or other adult responsible for a child or youth agree that the child or youth will be provided with specialized services while attending the program, an IPP shall be developed and implemented by the following individuals:

(A) The program director and each staff member of the program who is responsible for implementing the IPP;

(B) the parent or other adult responsible for the child or youth;

(C) a professional who is licensed or credentialed and who is qualified to work with the child or youth regarding the child's or youth's special need; and

(D) the child or youth, as appropriate.

(2) Each IPP shall contain the following information:

(A) The date each IPP is developed and updated;

(B) each special need identified as requiring specialized services;

(C) each specialized service to be provided while the child or youth is attending the program and the name of the person who will provide each service;

(D) the anticipated goal of each specialized service; and

(E) the name and position of each person participating in the development of the IPP.

(3) Each operator shall ensure that each IPP is reviewed and updated annually to meet the special needs of the child or youth.

(4) Each operator shall provide a copy of each

IPP and each updated IPP to the participants who developed the IPP. The operator shall keep a copy in the child's or youth's file.

(5) Each program operating concurrently under a school-age program license issued by the secretary and a license issued by the secretary of social and rehabilitation services as specified in K.S.A. 75-3307b, and amendments thereto, shall be exempt from the following regulations if the program is in compliance with the licensing requirements of the secretary of social and rehabilitation services:

(A) K.A.R. 28-4-587;

(B) subsection (b), subsection (e), and paragraphs (f)(1) through (4) of this regulation; and

(C) any IPP requirements specified in K.A.R. 28-4-589(d). (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-589. Behavior management. (a) Behavior management practices.

(1) Behavior management practices shall be consistent with the goals and purposes of the program and appropriate to the age and developmental level of the child or youth.

(2) Each staff member shall practice methods of behavior management that are designed to help each child or youth develop inner controls and manage the child's or youth's own behavior in a socially acceptable manner.

(b) Time-out. If time-out is used to manage behavior, the child or youth shall remain in time-out only long enough to regain self-control. Each child or youth in time-out shall be kept under visual staff supervision. If a separate room is used, the door shall remain open, or the staff member responsible for providing supervision shall remain in the room with the child or youth.

(c) Prohibited punishment.

(1) No operator or any staff member shall use any of the following methods of punishment:

(A) Punishment that is humiliating, frightening, or physically harmful to the child or youth;

(B) corporal punishment, including spanking with the hand or any implement, slapping, swatting, pulling hair, yanking the arm, excessive exercise, exposure to extreme temperatures, and any other measure that produces physical pain or threatens the child's or youth's health or safety;

(C) verbal abuse, threats, or derogatory remarks about the child or youth or the child's or youth's family;

(D) enclosing the child or youth in a confined space, including any closet, box, and locked room;

(E) withholding or forcing foods or liquids; and

(F) placing soap, or other substances that sting, burn, or have a bitter taste, in the child's or youth's mouth or on the tongue, or placing substances that sting or burn on other parts of the child's or youth's body.

(2) Each operator and each staff member shall be prohibited from giving medications, herbal or folk remedies, and drugs to control or manage behavior except as prescribed by the child's or youth's licensed physician or licensed nurse practitioner.

(3) Each operator and each staff member shall be prohibited from using physical restraint to manage behavior unless all of the requirements of subsection (d) of this regulation are met.

(d) Physical restraint.

(1) Before physical restraint is used, de-escalation methods shall be attempted. If de-escalation methods fail and the behavior of a child or youth makes physical restraint necessary for the child's or youth's own protection or the protection of others, the child or youth shall be held as gently as possible to manage the behavior. If physical restraint is used, two staff members shall be present and shall remain with the child or youth until physical restraint is no longer necessary.

(2) The child or youth shall be restrained no longer than necessary for the child or youth to regain self-control. No bonds, ties, or straps shall be used to restrict movement.

(3) Each staff member using physical restraint shall have a current certificate on file documenting training in de-escalation methods and specific restraint procedures or techniques. The physical restraint training curriculum shall be approved by the secretary before the curriculum is used to train the staff members.

(4) Each child or youth whose behavior cannot be managed by other less intrusive methods and whose behavior requires the use of ongoing physical restraint for the child's or youth's protection or the protection of others shall have on file an IPP authorizing the use of physical restraint.

(e) Notification requirements. Each operator shall inform the parent or other adult responsible for a child or youth each time that physical restraint is used. The operator shall document each use of physical restraint on a critical incident report form supplied by the department. (Autho-

rized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-590. Health-related requirements.

(a) Tobacco use prohibited. Each operator shall ensure that tobacco products are not used during the hours of operation of the program and while children or youth are in attendance.

(b) Health of individuals working or volunteering in the program.

(1) Each operator and each staff member shall be free from physical, mental, and emotional handicaps as necessary to protect the health, safety, and welfare of the children or youth.

(2) No individual working or volunteering in a program shall be under the influence of alcohol or illegal substances, or impaired due to the use of prescription or nonprescription drugs.

(3) Each individual working or volunteering in the program shall be free from any infectious or contagious disease, as specified in K.A.R. 28-1-6.

(4) Each operator and each staff member who has regular, ongoing contact with children or youth shall attest to that individual's health status on a form supplied by the department or approved by the secretary. The health status form shall indicate if the individual has been exposed to an active case of tuberculosis or has been diagnosed with suspect or confirmed active tuberculosis. Each individual shall update the health status form annually or more often if there is a change in the health status or if the individual has been exposed to an active case of tuberculosis.

(5) If an operator or staff member in contact with children or youth experiences significant changes in physical, mental, or emotional health or if the individual has been exposed to an active case of tuberculosis, an assessment of the individual's current health status may be required by the secretary. A licensed health care provider qualified to diagnose and treat the condition shall conduct the health assessment. Each assessment shall be kept in the individual's file and shall be submitted to the secretary on request.

(c) Tuberculin testing.

(1) If an operator, program director, staff member, child, or youth is exposed to an active case of tuberculosis or if the location of the program is in an area identified by the local health department or the secretary as a high-risk area for tuberculosis exposure, that individual shall obtain a Mantoux test or a chest x-ray.

(2) Each individual diagnosed with suspected or confirmed active tuberculosis shall be excluded from the program until the operator receives authorization from the secretary for the individual to return.

(3) Each operator shall notify the secretary if any individual identified in paragraph (c)(1) of this regulation indicates exposure to an active case of tuberculosis, has a diagnosis of suspected or confirmed active tuberculosis, or has a positive Mantoux test or positive chest x-ray indicating active disease.

(d) Health of children and youth.

(1) Each operator shall obtain a health history for each child or youth, on a form supplied by the department or approved by the secretary. Each health history shall be maintained in the child's or youth's file on the premises.

(2) Each operator shall require that each child or youth attending the program has current immunizations as specified in K.A.R. 28-1-20 or has an exemption for religious or medical reasons.

(3) An exemption from immunization requirements shall be granted if one of the following is obtained:

(A) A written statement, submitted on a form supplied by the department and signed by a parent of the child or youth, that the parent is an adherent of a religious denomination whose teachings are opposed to health assessments or immunizations; or

(B) a certification from a licensed physician that the physical condition of the child or youth is such that immunizations would endanger the child's or youth's life or health.

(4) Children or youth who are currently attending or who had attended in the preceding school year a public or accredited non-public school in Kansas, Missouri, or Oklahoma shall not be required to provide documentation of current immunizations or exemptions from immunizations.

(e) Administration of medication.

(1) Nonprescription medication. If nonprescription medication is to be administered during the time children or youth are attending the program, each operator shall ensure compliance with the following procedures:

(A) Obtain written permission from the child's or youth's parent or other adult responsible for the child or youth before administering nonprescription medication to that child or youth;

(B) administer each medication from the original container and according to instructions on the label; and

(C) require that each nonprescription medication supplied by a parent or other adult responsible for the child or youth be in the original container that is labeled with the first and last name of the child or youth for whom the medication is intended.

(2) Prescription medication. If prescription medication is administered during the time children or youth are attending the program, each operator shall ensure compliance with the following procedures:

(A) Obtain written permission from the child's or youth's parent or other adult responsible for the child or youth before administering prescription medication to that child or youth;

(B) administer medication ordered by a licensed physician or licensed nurse practitioner only to the designated child or youth and in the dosage recommended;

(C) keep each prescription medication in the original container labeled by a pharmacist with the following information:

(i) The first and last name of the child or youth;

(ii) the date the prescription was filled;

(iii) the name of the licensed physician or licensed nurse practitioner who wrote the prescription;

(iv) the expiration date of the medication; and

(v) specific, legible instructions for administration and storage of the medication;

(D) consider the instructions on each label to be the order from the licensed physician or licensed nurse practitioner; and

(E) administer the medication in accordance with the instructions on the label.

(3) Requirements for administering medication.

(A) If nonprescription or prescription medication is administered, each operator shall designate staff members to administer the medication. Before administering medication, each designated staff member shall receive training in medication administration approved by the secretary.

(B) Each operator shall record in the file of each child or youth who is scheduled to receive medication the following identifying information, on forms supplied by the department:

(i) The name of each staff member who administered each medication;

(ii) the date and time the medication was given;

(iii) any change in the child's or youth's behavior, response to the medication, or adverse reaction; and

(iv) any change in the administration of the

medication from the instructions on the label or a notation about each missed dose.

(C) Each record shall be signed by the individual who was responsible for administering the medication, and a copy of the record shall be made available to the parent or other adult responsible for the child or youth.

(4) Storage of medication. Each operator shall keep each medication at the recommended temperature and, except as specified in paragraph (e)(5) (D) of this regulation, in locked storage. Each medication container shall have a child-protective cap.

(5) Self-administration of medication.

(A) Any operator may permit each child or youth with a chronic illness, a condition requiring prescription medication on a regular basis, or a condition requiring the use of an inhaler to administer the medication under staff supervision. The operator shall obtain written permission for the child or youth to self-administer medication from the child's or youth's parent or other adult responsible for the child or youth, and from the licensed physician or nurse practitioner treating the condition of the child or youth.

(B) Written permission for self-administration of medication shall be kept in the child's or youth's file.

(C) Self-administration of each medication shall follow the procedures specified in paragraphs (e) (2)(B), (C), (D), and (E) of this regulation.

(D) Each child or youth who is authorized to self-administer medication shall have immediate access to that child's or youth's medication for administration purposes. Each operator shall safely store each medication to prevent unauthorized access by others.

(E) Each operator shall record the date and time each medication was self-administered.

(f) Health care practices.

(1) Hand washing.

(A) Each operator shall encourage each child and youth to wash the hands with soap and water before and after eating and after toileting.

(B) Each staff member shall wash the hands with soap and water before and after eating and after toileting.

(C) Waterless sanitizing cleanser or sanitizing wipes shall not be used as a substitute for soap and running water. Individuals shall not share towels or washcloths.

(2) Each staff member shall be sensitive to the health status of each child or youth and shall take precautions to prevent the following:

(A) Dehydration;

(B) heat exhaustion;

(C) sunburn;

(D) frostbite;

(E) allergic reactions; and

(F) other preventable conditions hazardous to a child's or youth's health. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-591. Food preparation, service, safety, and nutrition. (a) If meals or snacks are served in the program, the operator shall ensure that the following requirements are met:

(1) Sanitary practices.

(A) Each individual engaged in food preparation and food service shall know and use sanitary methods of food handling, food service, and storage.

(B) No individual shall be in the food preparation area who is vomiting, has diarrhea, or has other signs, symptoms, or positive laboratory tests indicative of an infectious illness that can be transmitted through food handling.

(C) No individual shall handle or serve food until the individual is no longer infectious as required by K.A.R. 28-1-6.

(D) Each individual involved in food handling shall comply with all of the following requirements:

(i) Hands shall be washed with soap and running water in a designated hand-washing sink immediately before the individual engages in food preparation and before the individual serves food.

(ii) If the food preparation sink is used for hand washing, the sink shall be sanitized before using it for food preparation.

(iii) Individual towels, disposable paper towels, or air dryers shall be used to dry hands.

(iv) Each individual serving food shall use utensils or single-use gloves.

(v) Each individual with infectious skin sores or with open or infected injuries on the hands or forearms shall cover the sores or injuries with a bandage when handling or serving food.

(2) Food service and preparation area. If food is prepared on the premises, each operator shall provide a food preparation area that is separate from the eating area, activity area, laundry area, and rest rooms and that is not used as a passageway during the hours of food preparation and cleanup.

(A) Surfaces used for food preparation and dining shall be made of smooth, nonporous material and shall be cleaned and sanitized before and after use.

(B) The floors shall be swept daily and mopped when spills occur.

(C) Garbage shall be disposed of in a garbage disposal or in a covered container. If a container is used, the container shall be removed at the end of the day or more often as needed to prevent overflowing or to control odor.

(3) Food storage and refrigeration.

(A) Food shall be stored at least six inches above the floor in a clean, dry, well-ventilated area that is free from vermin and rodent infestation. Dry bulk foods that are not in their original, unopened containers shall be stored in metal, glass, or food-grade plastic containers with tightly fitting covers and shall be labeled.

(B) Food shall not be stored with poisonous or toxic materials. If cleaning agents cannot be stored in a room separate from food storage areas, the cleaning agents shall be clearly labeled and kept in locked cabinets not used for the storage of food.

(C) Each refrigerator and freezer used by the operator for food storage and refrigeration shall be kept clean inside and out and shall have an interior thermometer. The temperature shall be maintained at 40°F or lower in the refrigerator, and food stored in the freezer shall be maintained frozen.

(D) Hot foods that are to be refrigerated and stored shall be transferred to shallow containers in food layers less than three inches deep and shall not be covered until cool.

(E) All food stored in the refrigerator shall be covered, wrapped, or otherwise protected from contamination. Unserved, leftover perishable foods shall be dated, refrigerated immediately after service, and eaten within three days.

(F) Ready-to-eat commercially processed foods, including luncheon meats, cream cheese, and cottage cheese, shall be eaten within five days after opening the package.

(G) Hot foods shall be maintained at temperatures of at least 140°F.

(H) Cold foods shall be maintained at temperatures of 40°F or less.

(b) Table service.

(1) Each operator shall provide clean forks, spoons, and knives as appropriate for the food being served and shall provide one of the following:

(A) Clean cups and dishes that have smooth, hard-glazed surfaces and are free from cracks or chips; or

(B) disposable, single-use table service that is of food grade, medium weight, and disposed of after each use.

(2) If nondisposable table service and cooking utensils are used, each operator shall use one of the following methods to clean them:

(A) A commercial dishwasher for programs serving more than 30 children, or a domestic dishwasher for programs with 30 or fewer children;

(B) a three-compartment sink; or

(C) a two-compartment sink and a basin for sanitizing the table service and cooking utensils.

(c) Meals or snacks prepared on the premises.

(1) Food safety requirements. Each operator shall comply with the following requirements:

(A) Dairy products shall be pasteurized.

(B) Meat shall be from government-inspected sources.

(C) Raw fruits and vegetables shall be washed thoroughly before being eaten or used for cooking.

(D) Frozen foods shall be defrosted in the refrigerator, under cold running water, in a microwave oven using the defrost setting, or during the cooking process. Frozen foods shall not be defrosted by leaving them at room temperature or in standing water.

(2) Each operator shall ensure that the following foods are prohibited:

(A) Home-canned food;

(B) food from dented, rusted, bulging, or leaking cans; and

(C) food from cans without labels.

(d) Meals or snacks not prepared on the premises.

(1) If the operator serves a meal or snack that is not prepared on the premises, the meal shall be obtained from a food service establishment, summer feeding program, or catering service licensed by the secretary. If perishable food is transported to the premises, each operator shall serve only food that has been transported promptly in temperature-controlled, clean, covered containers.

(2)(A) Any operator may permit parents or other adults responsible for a child or youth to provide snacks and sack lunches.

(B) If sack lunches are provided either by the operator or by the parent or other adult responsible for each child or youth, each operator shall ensure that all of the following requirements are met:

(i) Each sack lunch shall be labeled with the name of the child or youth, and sack lunches shall not be shared.

(ii) Perishable foods and drinks shall be kept at the temperatures specified in paragraph (a)(3)(H) through the use of insulated sacks and either a coolant or refrigeration.

(iii) Each sack lunch shall be positioned so that neither ice nor water causes the food in the sack to become wet or contaminated.

(iv) Ice that will be ingested shall be kept wrapped and shall not come in contact with sack lunches, food, cans, or other substances.

(e) Nutrition.

(1) Each operator shall ensure that safe drinking water is readily available at all times to each individual participating in the program.

(2) Each operator shall ensure that meals and snacks are available to each child or youth according to the following schedule:

Length of time at the program	Food served
at least 2½ hours but fewer than 4 hours	1 snack
at least 4 hours but fewer than 8 hours	1 snack and 1 meal
at least 8 hours but fewer than 10 hours	2 snacks and 1 meal or 1 snack and 2 meals
10 hours or more	2 meals and 2 snacks

(3) Each operator of a school-age program that meets after school during the school year shall ensure that at least one snack is served daily to each child or youth who attends the program after school. (Authorized by and implementing K.S.A. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended, T-28-3-19-04, March 19, 2004; amended Sept. 10, 2004.)

28-4-592. Safety and emergency procedures; reporting requirements. (a) Telephone.

(1) Each operator shall ensure that there is a working telephone readily available to the operator and staff members to receive all incoming calls and make outgoing calls during all hours of operation.

(2) Each operator shall post emergency telephone numbers for the police, fire department, ambulance, hospital or hospitals, and poison control center next to the telephone, or shall have the numbers immediately accessible to staff members.

(b) Emergency plan; drills.

(1) Each operator shall develop and implement an emergency plan to provide for the safety of children, youth, and staff members in emergen-

cies. The emergency plan shall include the following information:

(A) The types of emergencies likely to occur on or near the premises, including a fire, a weather-related event, a missing or runaway child or youth, a chemical release, a utility failure, an intruder, an act of terrorism, and an unscheduled closing;

(B) a designated shelter-in-place area and a designated off-premises relocation site and evacuation routes for each area and for each site;

(C) procedures to meet the needs of individual children and youth, including each child or youth with special needs;

(D) procedures for notifying each parent or adult responsible for a child or youth of any off-premises relocation;

(E) procedures for reuniting each child and each youth with the parent or adult responsible for the child or youth; and

(F) procedures designating the tasks to be followed by each staff member in an emergency, including the following:

(i) As appropriate, contacting 911 or other emergency response entities;

(ii) assisting the children and youth, including children and youth with special needs, to move to a designated shelter-in-place area and to a designated off-premises relocation site; and

(iii) ensuring that emergency supplies are readily available.

(2) Each emergency plan shall be kept on file on the premises.

(3) Each operator shall ensure that the emergency plan is provided to the parent or adult responsible for the child or youth before the first day the child or youth begins attending the program.

(4) Each staff member shall follow the emergency plan.

(5) Each operator shall review the emergency plan at least annually and update it as needed.

(6) Each operator shall ensure that each staff member practices, at least annually, the procedures for assisting the children and youth to move to a designated shelter-in-place area and to a designated off-premises relocation site. The date and time of each practice and a list of all participating staff members shall be recorded and kept on file on the premises.

(7) Each operator shall ensure that each staff member, child, and youth participates in the following drills:

(A) Fire drills shall be conducted monthly. A record of the date and time of each fire drill and

a record of each evacuation time shall be kept on file on the premises for one year.

(B) Tornado drills shall be conducted monthly. A record of the date and time of each tornado drill and a record of each evacuation time shall be kept on file on the premises for one year.

(c) First aid and cardiopulmonary resuscitation (CPR).

(1) Each operator shall ensure that there is at least one staff member on the premises who is readily available to each child or youth at all times and who has a current certification in first aid and a current certification in CPR appropriate to the age of children and youth attending the program.

(2) Each operator shall maintain first-aid supplies in a first-aid kit, carrying case, box, or other container. The first-aid supplies shall include the following:

- (A) First-aid manual;
 - (B) single-use gloves;
 - (C) adhesive bandages of assorted sizes;
 - (D) adhesive tape;
 - (E) a roll of sterile gauze;
 - (F) sharp scissors;
 - (G) sterile gauze squares at least four inches by four inches in size;
 - (H) a cleansing agent or liquid soap;
 - (I) an elastic bandage;
 - (J) tweezers; and
 - (K) a bottle of water for washing and cleansing.
- (d) Standard precautions for handling blood and other bodily fluids or waste. Each operator shall ensure that each staff member complies with the following standard precautions when handling blood and other bodily fluids or waste:

(1) Each staff member shall avoid coming into direct contact with blood and other bodily fluids or waste.

(2) Each staff member shall wear single-use gloves in the following situations:

- (A) When cleaning contaminated surfaces or areas;
- (B) before dressing a cut or sore that is leaking body fluids; and
- (C) when cleaning up each spill, including urine, feces, blood, saliva, vomit, and tissue discharge.

(3) Each contaminated surface or area on which a spill occurs shall be cleaned by removing any visible spill from the surface or area with a water-saturated disposable paper towel or wipe. After the surface or area has been cleaned, the surface or area shall be sanitized by wetting the entire surface or area with a disinfectant solution of chlo-

rine bleach mixed according to the directions on the label, or an appropriate commercial disinfectant used according to the directions on the label.

(4) Each mop used to clean up a contaminated area shall be cleaned and rinsed in a disinfecting solution, wrung as dry as possible, and hung to dry.

(5) Each paper towel, sponge, or other material used for cleaning up a contaminated area shall be placed in a plastic bag with a secure tie and thrown away in a covered container.

(e) Emergency medical care.

(1) If a child or youth needs emergency medical care and is taken to an emergency care source, each operator shall ensure that the parent or adult responsible for the child or youth is notified immediately and shall make the following documents and information immediately available to emergency care personnel:

- (A) The child's or youth's health history;
- (B) the name, address, and telephone number of the following individuals:
 - (i) The parent or adult responsible for the child or youth;
 - (ii) a designated emergency contact; and
 - (iii) the physician designated by the parent or adult responsible for the child or youth to be called in case of emergency; and
- (C) authorization for emergency medical care.

(2) If the operator has been unable to obtain the necessary documents as specified in K.A.R. 28-4-582, the operator shall follow the plan approved by the secretary.

(3) A staff member shall accompany a child or youth to the source of emergency care and shall remain with the child or youth until a parent or other responsible adult assumes responsibility for the child or youth. When a staff member goes to the source of emergency care with a child or youth, the operator shall ensure that there is an adequate number of staff members available to supervise the remaining children and youth in the program.

(f) Reporting illnesses.

(1) If a child or youth becomes ill while attending the program, the operator shall immediately notify the parent or adult responsible for the child or youth.

(2) If an operator, staff member, child, or youth in a program contracts a reportable infectious or contagious disease listed in K.A.R. 28-1-2, the operator shall report the disease to the secretary's designee by the next working day.

(3) The operator shall follow the protocol recommended by the county health department and

shall cooperate fully with any investigation, disease control, or surveillance procedures initiated by the county health department or the department.

(g) Reporting critical incidents.

(1) Each operator shall report the following critical incidents immediately to each parent or adult responsible for a child or youth affected by the critical incident, on a form provided by the department:

(A) Fire damage or other damage to the building, or damage to the property that affects the structure of the building or safety of the children and youth;

(B) a vehicle collision involving children or youth;

(C) a missing child or youth;

(D) physical restraint of a child or youth by staff members;

(E) the injury of a child or youth that requires medical attention;

(F) the death of a child, youth, or staff member; and

(G) any other incident that jeopardizes the safety of any child or youth.

(2) Each operator shall report each critical incident specified in paragraph (g)(1) to the secretary's designee by the next working day, on a form provided by the department. A copy of each critical incident report shall be kept on file for not less than one year on the premises or at a designated central office location.

(3) Each operator shall ensure that a report is made to the secretary's designee of all known facts concerning the time, place, manner, and circumstances of the death of a child or a youth attending the program when submitting a critical incident report as specified in paragraph (g)(1).

(h) Reporting suspected child abuse or neglect. Each operator and each staff member shall report to the Kansas department for children and families or to law enforcement any suspected child abuse or child neglect within 24 hours. (Authorized by and implementing K.S.A. 2016 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003; amended June 23, 2017.)

28-4-593. Program-sponsored transportation. (a) If the operator provides or arranges for transportation for children and youth to and from the premises or for program-sponsored activities, the operator shall ensure that prior written permission is obtained for each child or youth to be transported as specified in K.A.R. 28-4-582. The operator shall ensure that the authorization for emergency medical care for each child or youth

is in the vehicle in which the children or youth are being transported or is immediately available to emergency personnel. If the operator is unable to obtain written permission or authorization for emergency medical care, the operator shall follow the plan approved by the secretary as specified in K.A.R. 28-4-582.

(b) Transportation safety.

(1) Each operator shall ensure that the following transportation safety requirements are met when transporting children or youth:

(A) No child or youth under 13 years of age shall be seated in the front seat of a vehicle that is equipped with a passenger air bag.

(B) No child or youth shall be transported in a trailer pulled by another vehicle, a camper shell, or a truck bed.

(C) Each vehicle that is owned or leased by the operator and is used to transport children or youth shall be maintained in safe operating condition and shall contain a first-aid kit.

(2) Each driver shall comply with the following safety requirements:

(A) Be 18 years of age or older, hold an operator's license of the type appropriate for the vehicle being used, and observe all traffic laws;

(B) not allow the capacity of the transporting vehicle to be exceeded;

(C) remove accumulated trash from the transporting vehicle daily;

(D) lock or have under control each vehicle door while the vehicle is in motion;

(E) maintain order in the vehicle and ensure that all parts of each passenger's body remain inside the vehicle at all times;

(F) not permit any child or youth to enter the vehicle from or exit the vehicle into a traffic lane;

(G) leave no child or youth unattended in the vehicle at any time and, when the vehicle is vacated, ensure that no child or youth is left in the vehicle;

(H) prohibit smoking in the vehicle while children or youth are in the vehicle;

(I) not use a cellular phone while the vehicle is in motion; and

(J) transport each child or youth directly to the location designated by the operator and make no unauthorized stops along the way except in an emergency.

(d) Vehicle seat belt restraints.

(1) Except as specified in paragraph (d)(2), each operator shall ensure that each driver and each child or youth uses an individual seat belt restraint

and that no more than one child or youth is restrained in each seat belt.

(2) If buses of the type used by schools are used to transport children and youth and are not equipped with individual restraints, no operator shall be required to install individual restraints. (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-594. Swimming, wading, and water activities. (a) General.

(1) Each operator shall have written permission on file as specified in K.A.R. 28-4-582 for each child or youth participating in water activities.

(2) Each operator shall ensure that an individual who can swim and who has a current certificate in first aid and a current certificate in CPR appropriate to the age of the children and youth attending the program is in attendance if children or youth are participating in water activities.

(3) Each activity shall be conducted with strict regard for the life and safety of each child and youth.

(4) Each staff member responsible for the supervision of children or youth who are participating in swimming, wading or water activities shall review the safety rules with each child or youth before the child or youth participates in the activity.

(5) Each operator shall ensure that no child or youth is permitted to dive from a diving board unless the requirements governing high-risk sports and recreational activities as specified in K.A.R. 28-4-588 are met.

(b) Swimming pools on the premises.

(1) Safety and maintenance. Each operator shall ensure that the following requirements for safety and maintenance are met:

(A) The water in each swimming pool shall be maintained between pH 7.2 and pH 7.6. The available free chlorine content shall be between 1.0 and 3.0 parts per million.

(B) Each swimming pool shall be cleaned daily, and the chlorine level and pH level shall be tested daily during the swimming season. The results of these tests shall be recorded and kept on file at the premises.

(C) Each swimming pool more than six feet in width, length, or diameter shall be provided with a ring buoy and rope or with a shepherd's hook. This equipment shall be long enough to reach the center of the pool from the edge of the pool.

(D) A sensor or a remote monitor shall not be used in lieu of a fence around each swimming pool.

(E) During the months a swimming pool is not in use, the pool shall be covered with a safety cover.

(F) If a swimming pool on the premises is to be used by children or youth enrolled in the program, the operator shall ensure that legible safety rules for the use of the pool are posted in a conspicuous location.

(2) In-ground swimming pools. Each operator shall ensure that the following requirements are met:

(A) Each in-ground swimming pool located outdoors shall be enclosed by a five-foot fence on all four sides to prevent chance access by children and youth. The fence shall have a gate that has a self-closing latch with a locking device.

(B) If an in-ground swimming pool is within a building, the building shall be designed to prevent unsupervised access to the pool by each child and youth.

(C) Each in-ground swimming pool shall be surrounded by a nonskid surface that is at least four feet wide, is in good repair, and is free of tears, breaks, and splinters.

(3) Aboveground swimming pools. Each operator shall ensure that the following requirements are met:

(A) Each aboveground swimming pool shall have sides at least five feet high or shall be enclosed by a five-foot fence. Side extenders may be installed to increase the height of the sides of the swimming pool.

(B) Ladders shall be removed when the aboveground pool is not in use.

(4) Swimming pools operated by governmental entity. Each swimming pool operated by a governmental entity for public use shall be governed by the entity's policies and regulations on pool safety and maintenance and shall meet the regulations applicable to swimming pools included in this regulation, with the exception of paragraphs (b)(1)(A) and (B).

(c) Wading pools. The water in each wading pool shall be emptied immediately after use.

(d) Spas and hot tubs. Each spa or hot tub shall be covered with an insulated cover, which shall be secured by locks when the spa or hot tub is not in use.

(e) Ponds, rivers, and lakes on or off the premises. If a pond, river, or lake is used for swimming, the operator shall ensure that the body of water is approved for swimming by one of the following:

(1) The local health department of the county in which the swimming site is located, if the swimming site is in Kansas;

(2) the secretary; or

(3) the designated authority in the state in which the swimming site is located, if the swimming site is not in Kansas. (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-595. Animals on the premises. (a)(1) If animals are kept on the premises, each operator shall ensure that each area in which an animal is permitted is maintained in a clean and sanitary manner, with no evidence of flea, tick, or worm infestation in the area.

(2) Each operator shall prohibit poisonous animals, pit bulls, and other animals that present a health or safety hazard to children and youth on the premises, unless the animals are displayed as part of an animal exhibit and are supervised at all times by trained animal care personnel.

(b) Each operator shall ensure that animals are not present in the following areas:

(1) The kitchen while food is being prepared;

(2) the dining area while children or youth are eating; and

(3) each food storage area.

(c) Each staff member and each child or youth shall wash that individual's hands with soap and water after handling animals, animal food, and animal wastes.

(d) Each operator shall ensure that each domesticated cat, dog, or ferret on the premises has a current rabies vaccination. A record of each vaccination shall be kept on file on the premises or at a designated central office location and shall be available for review by the secretary's designee.

(e) Each operator shall ensure that each child or youth is taught safe procedures to follow when handling animals. The operator or staff member supervising the activity shall separate a child or youth from an animal immediately if either of the following occurs:

(1) The animal shows signs of distress or aggression.

(2) The child or youth shows signs of treating the animal inappropriately.

(f) If a child or youth is injured by an animal, the operator shall immediately notify the parent or other adult responsible for the child or youth about the injury. The operator shall submit a critical incident report about the injury to the sec-

retary's designee by the next working day. The operator shall keep a copy of the incident report in the child's or youth's file. (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

28-4-596. Day reporting program. (a)(1) Each operator conducting a day reporting program shall comply with the requirements specified in this regulation and the requirements in K.A.R. 28-4-577 through K.A.R. 28-4-584, K.A.R. 28-4-587, and K.A.R. 28-4-589 through K.A.R. 28-4-592.

(2) Each operator shall meet the following requirements if the secretary determines that they are applicable to the program and services:

(A) K.A.R. 28-4-576;

(B) K.A.R. 28-4-585 or K.A.R. 28-4-586; and

(C) K.A.R. 28-4-593 through K.A.R. 28-4-595.

(3) If the requirements of this regulation appear to conflict with any other regulation governing school-age programs, the more stringent regulation shall apply.

(b)(1) Each operator shall ensure that the program is administered by an individual with job-related experience working with juvenile offenders, and a knowledge of laws and standards governing programs for juvenile offenders.

(2) Each operator shall ensure that each child or youth who attends the program is 10 years of age or older and meets one of the following criteria:

(A) The child or youth is in the custody of the juvenile justice authority.

(B) The child or youth is court-ordered to attend.

(C) The child or youth is required to attend as a condition of diversion, probation, or release from a juvenile correctional facility, or diverted by the court from direct commitment to a juvenile correctional program.

(c) Each operator conducting a day reporting program shall develop and implement an IPP for each child or youth, which shall include any combination of the following:

(1) Assistance to each child or youth in organizing a daily schedule of activities;

(2) monitoring the child's or youth's court orders;

(3) situational counseling and referrals, if needed;

(4) conflict resolution and crisis intervention;

(5) contact with each child's or youth's parent or other adult responsible for the child or youth;

(6) drug testing and substance abuse education;

(7) pregnancy prevention and human sexuality education;

(8) assistance with educational and vocational needs;

(9) employment training, as appropriate; and

(10) community service work.

(d) Each operator shall keep the following in the child's or youth's file:

(1) The information required by K.A.R. 28-4-582;

(2) the child's or youth's legal status as specified in paragraph (b)(2);

(3) the date the child or youth was admitted to the program;

(4) intake information for each child or youth gathered at the time of admission;

(5) a summary of the child's or youth's daily activities;

(6) the IPP, progress reports, and any changes made in the plan;

(7) the discharge summary; and

(8) any critical incident reports.

(e)(1) Each operator shall establish written rules of child and youth conduct that define expected behaviors and related consequences. Each operator shall give each child or youth attending the program a rule book specifying the expected behaviors, ranges of consequences, and disciplinary procedures.

(2) Each operator shall obtain a signed acknowledgment from each child or youth that the child or youth has received a copy of the rule book and understands it. The signed acknowledgment shall be kept in the child's or youth's file.

(f) Each operator shall ensure that child and youth services are coordinated with the referring agency or the court, the local mental health center, the local school district, and the local health department, as necessary to implement the day reporting program.

(g) The supervisory ratio shall be one staff member for every 10 children and youth attending the day reporting program. The maximum group size shall not exceed 20 children or youth.

(1) Each operator shall ensure that each group has a program director who meets the following qualifications:

(A) Is 21 years of age or older;

(B) meets the staff qualifications for a program director for the licensed capacity of the program, as specified in K.A.R. 28-4-587; and

(C) has knowledge and experience working with juvenile offenders, high-risk children and youth,

community youth programs, or social service programs serving children and youth.

(2) Each operator shall ensure that each group has a group leader who meets the following qualifications:

(A) Is 21 years of age or older;

(B) meets the staff qualifications for group leader as specified in K.A.R. 28-4-587; and

(C) has knowledge and experience working with juvenile offenders, high-risk children and youth, community youth programs, or social service programs serving children and youth.

(3) Each operator shall ensure that each group has an assistant group leader who meets the following qualifications:

(A) Is 18 years of age or older and at least three years older than the oldest child and youth in the group to which the assistant group leader is assigned;

(B) meets the qualifications for an assistant group leader as specified in K.A.R. 28-4-587; and

(C) has experience working with children and youth. (Authorized by and implementing K.S.A. 2001 Supp. 65-508; effective, T-28-4-1-02, April 1, 2002; effective Jan. 10, 2003.)

NEWBORN INFANT HEARING SCREENING ACT

28-4-600. Definitions. (a) "Accepted medical practices" means the following:

(1) Physiologic hearing screening of all newborns;

(2) follow-up hearing assessment before three months of age for those newborns and infants who did not pass the hearing screening;

(3) follow-up medical evaluation for those newborns and infants with confirmed hearing loss; and

(4) follow-up early intervention services to meet the needs of each newborn and infant with hearing loss and each parent before the child reaches six months of age.

(b) "Audiologic assessment" means the physiological tests required to evaluate and describe hearing status.

(c) "Audiologist" has the meaning specified in K.S.A. 65-6501, and amendments thereto.

(d) "Auditory brainstem response" and "ABR" mean an objective, electrophysiologic measurement of the brainstem's response to acoustic stimulation of the ear.

(e) "Automated auditory brainstem response" and "AABR" mean an objective, electrophysiologic measurement of the brainstem's response to acoustic stimulation of the ear, obtained with

equipment that automatically indicates whether the child has passed the hearing screening.

(f) “Automated otoacoustic emissions” and “AOAE” mean an objective, physiologic response from the cochlea, obtained with equipment that automatically indicates whether the child has passed the hearing screening.

(g) “Department” means the Kansas department of health and environment.

(h) “Discharge” means a newborn’s or infant’s release from the premises of a medical care facility and into the care of the parent of the newborn or infant. This term shall not include transporting the newborn or infant between medical care facilities.

(i) “Early intervention services” has the meaning specified in K.S.A. 75-5648, and amendments thereto.

(j) “Follow-up” means the following:

(1) Referring newborns and infants for further hearing testing if these children either missed or did not pass the initial hearing screening;

(2) referring newborns and infants with confirmed hearing loss for ongoing audiologic services to monitor hearing;

(3) referring newborns and infants with confirmed hearing loss for speech, language, and aural habilitation services; and

(4) referring newborns and infants with confirmed hearing loss for other early intervention services, as needed by these children and their parents.

(k) “Hearing screening” means the following:

(1) The completion of an objective, physiologic test or battery of tests on newborns and infants by using instrumentation and procedures specified by the department; and

(2) for other than pass results, referring the newborn or infant to an audiologist for audiologic assessment.

(l) “Hearing screening state program coordinator” means the audiologist in the department who is designated to coordinate the statewide “sound beginnings” activities.

(m) “Infant” means a child from 30 days through 12 months of age.

(n) “Initial hearing screening” means the procedure or procedures employed for the purpose of screening hearing before discharge.

(o) “Medical care facility” means a hospital, birthing center, or other licensed facility that provides obstetrical and newborn services.

(p) “Newborn” means a child through 29 days of age.

(q) “Otoacoustic emissions” and “OAE” mean an objective, physiologic response from the cochlea. This term may include transient evoked otoacoustic emissions and distortion product otoacoustic emissions.

(r) “Parent” means a natural parent, adoptive parent, stepparent, foster parent, legal guardian, or other legal custodian of a child.

(s) “Primary medical care provider” means the physician or health care agent who provides the newborn’s or infant’s routine medical care in the locale where the child resides after discharge.

(t) “Protocol” means the guidelines followed to conduct hearing screening.

(u) “Receiving agency” means the facility that agrees to provide hearing screening for sending agencies.

(v) “Risk indicator” means a factor known to place a newborn or an infant at risk for being born with or developing a hearing loss.

(w) “Sending agency” means a hospital with fewer than 75 births averaged over three years that chooses not to do hearing screening. Each sending agency shall arrange for hearing screening to be performed at another facility.

(x) “Sound beginnings” means the Kansas program consisting of hearing screening, tracking, and follow-up for newborns and infants.

(y) “Tracking” means using information about the newborn’s or infant’s hearing screening status to ensure that the newborn or infant receives timely and appropriate services to complete the screening and referral process. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-601. Initial hearing screening test: technology and protocol.

(a) Trained personnel at each medical care facility shall provide initial hearing screening using ABR, AABR, OAE, and AOAE, in combination or alone, which objectively assesses the physiologic status of the ear and which has no greater than a 30-40 dB HL (decibel hearing level) criterion for a pass result or a referral for additional screening.

(b) Trained personnel at each medical care facility shall follow an initial hearing screening protocol that has been approved by the hearing screening state program coordinator.

(c) The initial hearing screening protocol shall include the following:

(1) The type of screening equipment to be used;

(2) the time frame for the first screening and, if needed, the second screening, before discharge;

(3) the plan for providing the results to the parent, the newborn's or infant's primary medical care provider, and the department;

(4) the methods and materials to be used to inform the parent of the following:

(A) The purpose, benefits, and limitations of hearing screening for newborns and infants;

(B) the procedures used for hearing screening;

(C) the risk indicators for delayed-onset, progressive, and acquired hearing loss;

(D) the factors that could result in a referral for further hearing screening, including debris in the ear canal and fluid in the middle ear;

(E) the effects of hearing loss on infant development, including speech and language development;

(F) the importance of follow-up hearing assessment;

(G) the benefits of early identification and intervention;

(H) the timelines for maximizing early intervention; and

(I) a list of facilities that provide audiologic assessment for newborns and for infants younger than five months of age; and

(5) the referral plan to be used if the hearing screening results are incomplete or if the newborn or infant does not pass the hearing screening. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-602. Location of hearing screening for newborns and infants. (a) Except as specified in K.A.R. 28-4-609(a), the hearing of each newborn or infant shall be screened in both ears before discharge.

(b)(1) Except as specified in paragraph (b)(2), hearing screening shall be carried out in one of the following:

(A) The medical care facility where the newborn is born;

(B) if the newborn is transferred to one or more medical care facilities before being discharged, in the last medical care facility to which the child is transferred; or

(C) if the medical care facility averages fewer than 75 births per year over a three-year period, that medical care facility or, by contract or written agreement, another facility that provides hearing screening in compliance with this article.

(2) If the newborn is born outside of a medical care facility, the newborn's primary medical care provider shall arrange for the hearing screening in compliance with this article and before the

newborn is one month of age, unless a different time period is medically indicated. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-603. Responsibilities of medical care facility's administrator. (a) Each medical care facility administrator shall be responsible for the following:

(1) Designating a hearing screening manager or coordinator to be responsible for overseeing the facility's hearing screening program and ensuring compliance with the applicable statutes and regulations;

(2) designating a physician to be responsible for overseeing the medical aspects of the facility's hearing screening program;

(3) designating an audiologist on staff or a consulting audiologist to be responsible for overseeing the audiologic aspects of the facility's hearing screening program, including screening, tracking, referral for evaluation, and personnel training; and

(4) budgeting for personnel, equipment, and supplies needed to carry out the program.

(b) If the medical care facility administrator determines that the facility is a sending agency as defined in K.A.R. 28-4-600, the administrator shall ensure that the results of the hearing screening are obtained from the receiving agency for the newborn's medical record. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-604. Responsibilities of medical care facility's hearing screening manager or coordinator. Each manager or coordinator shall be responsible for the following:

(a) Writing and implementing a medical care facility policy for the newborn hearing screening program in consultation with the facility's medical director, staff audiologist or consulting audiologist, obstetrics nurse manager, and nursery nurse manager, and with the hearing screening state program coordinator;

(b) providing for the maintenance and accurate operation of the hearing screening equipment;

(c) developing a back-up hearing screening plan to ensure continuation of hearing screening if the equipment malfunctions or when there is a change in personnel administering the hearing screening;

(d) ensuring that the hearing screening is performed by appropriately trained and supervised personnel, as specified in K.A.R. 28-4-608;

(e) overseeing data management and reporting to the department, as specified in K.A.R. 28-4-605; and

(f) ensuring that the following requirements of the hearing screening program are met:

(1) Coordinating the supervision of or supervising the personnel who provide hearing screening, including the ongoing monitoring of their competency and retraining;

(2) monitoring the results of the screening program, including the number of newborns discharged before screening and the referral rates;

(3) before the newborn's or infant's discharge, informing the parent of the results of the hearing screening and providing a copy of the results;

(4) before or upon discharge of any newborn or infant who has passed the hearing screening, providing the child's parent with written information describing the following:

(A) The purpose, benefits, and limitations of hearing screening;

(B) the procedures used for hearing screening;

(C) the risk indicators for delayed-onset, progressive, and acquired hearing loss; and

(D) normal infant developmental milestones regarding hearing, speech, and language;

(5) before or upon discharge of any newborn or infant who has not passed the hearing screening, providing the child's parent with written information describing the following:

(A) The purpose, benefits, and limitations of hearing screening;

(B) the procedures used for hearing screening;

(C) the factors that could result in a referral for further hearing screening, including debris in the ear canal and fluid in the middle ear;

(D) the effects of hearing loss on infant development, including speech and language development;

(E) the risk indicators for delayed-onset, progressive, and acquired hearing loss;

(F) the recommendation for follow-up hearing screening;

(G) a list of options of personnel or sites that provide follow-up hearing screening; and

(H) a timeline for follow-up hearing screening in accordance with accepted medical practices;

(6) before or upon discharge, informing the newborn's or infant's primary medical care provider of the results of the hearing screening and the recommendations made to the child's parent;

(7) retaining the hearing screening results in the newborn's or infant's medical record; and

(8) if a newborn or infant is discharged before hearing screening or if a newborn or infant needs additional procedures to complete the hearing screening, ensuring that the following requirements are met:

(A) Informing the parent of the need for hearing screening;

(B) providing a mechanism by which hearing screening can occur at no additional cost to the family;

(C) making a reasonable effort to ensure that the newborn has a hearing screening before the child is 30 days old. To be considered a reasonable effort, the manager or coordinator shall document at least two attempts to contact the newborn's parent by mail or phone. If necessary, the manager or coordinator shall use information available from the facility's own records, the newborn's primary medical care provider, the local public health office, or other agencies; and

(D) notifying the newborn's primary medical care provider after two unsuccessful attempts to contact the newborn's parent. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-605. Reporting to the department.

Each manager or coordinator of the hearing screening program at each medical care facility shall report to the department the following:

(a) The program's protocol, policies, types of equipment, and personnel, which shall be reported annually;

(b) any changes in protocol, policies, and types of equipment, which shall be reported within 30 days of the change;

(c) the data for each newborn and infant, which shall be reported within seven days after the hearing screening;

(d) all cumulative data, which shall be reported annually; and

(e) the qualifications and training of the hearing screening administrative and support personnel, as defined in K.A.R. 28-4-608, which shall be reported annually. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-606. Responsibilities of the staff audiologist or consulting audiologist.

Each staff audiologist or consulting audiologist shall meet the following requirements:

(a) Be licensed to practice audiology in Kansas;

(b) have experience in using hearing screening technology options to screen the hearing of newborns and infants;

(c) have experience or training in developing and maintaining a hearing screening program;

(d) recommend hearing screening equipment and a protocol to the manager or coordinator; and

(e) work with the manager or coordinator to develop policy and procedures for the medical care facility, including the following:

- (1) Conducting the hearing screening program;
- (2) documenting results;
- (3) making referrals;
- (4) providing the screening results to the parent and the primary medical care provider;
- (5) providing data on hearing screening and follow-up to the department;
- (6) outlining a process for the periodic review of each screener's competency;
- (7) monitoring the performance of the screening program, including referral rates and the competency of screening personnel; and
- (8) providing information, training, and technical assistance to the medical care facility, as needed. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-607. Responsibilities of support personnel. (a) Each person who screens the hearing of newborns and infants shall meet the following criteria:

- (1) Meet the minimum qualifications specified in K.A.R. 28-4-608;
- (2) periodically demonstrate the competency-based skills necessary to perform the specific tasks assigned by the medical care facility;
- (3) follow the policies and procedures of the medical care facility; and
- (4) successfully complete the training specified in K.A.R. 28-4-608.

(b) Support personnel shall not perform the following:

- (1) Interpret screening results and other clinical data; and
- (2) refer a newborn's or infant's parent to any other professional or agency without a specific policy established by the medical care facility. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-608. Qualifications and training of support personnel. (a) Each person who screens

the hearing of newborns and infants and who is not licensed in Kansas for hearing screening shall meet the following criteria:

- (1) Be 18 years of age or older;
 - (2) have a high school diploma or its equivalent;
 - (3) be current with the immunizations required by the medical care facility and be free of infectious diseases transmittable to newborns and infants; and
 - (4) complete the required training as specified in subsection (c).
- (b) A training program for the support personnel at each medical care facility shall be established under the direction of the staff audiologist, consulting audiologist, or physician as identified in K.A.R. 28-4-603(a)(2) and (3).

(c) The training program shall include the following:

- (1) Instruction in the following:
 - (A) The operation of the screening equipment;
 - (B) the anatomy and physiology of the ear;
 - (C) the nature of the responses being measured;
 - (D) patient and non-patient factors that influence responses;
 - (E) the hearing screening procedures, including documentation of results;
 - (F) the confidentiality requirements;
 - (G) the communication skills necessary to provide accurate and appropriate information;
 - (H) safety and infection control procedures, including universal precautions for blood-borne pathogens and tuberculosis, according to the medical care facility's guidelines;
- (2) the medical care facility's emergency procedures; and
- (J) risk management and incident-reporting procedures; and

(2) supervised practice and individual observation and assessment to determine the ability of the support person to perform the duties associated with hearing screening, which shall include the following:

- (A) Working independently, accurately, and consistently;
 - (B) meeting the physical demands of the hearing screening process, including applying small objects safely to each newborn's and infant's ears and head; and
 - (C) following the precise sequence of instructions for the hearing screening protocol.
- (d) All support personnel shall receive ongoing assessment of proficiency and shall receive retraining, as specified in K.A.R. 28-4-604(f)(1).

(Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-609. Exceptions: parental right to refuse, medical care facility, medically fragile newborns, and home births. (a) If the newborn's or infant's parent objects to the mandatory screening for the detection of hearing loss, the parent's objection shall be documented in the child's medical record.

(b) If the medical care facility meets the definition of sending agency as specified in K.A.R. 28-4-600, that sending agency shall meet the following requirements:

(1) Have a contract or written agreement with a receiving agency that defines the responsibilities of each agency, including which agency is responsible for tracking and follow-up and for submitting the required data to the department;

(2) have the written agreement on file with the department;

(3) before each newborn's or infant's discharge, meet the following requirements:

(A) Schedule the hearing screening for the child at the receiving agency;

(B) provide the parent with the following information:

(i) The importance of early detection of hearing loss;

(ii) the normal infant developmental milestones regarding hearing, speech, and language;

(iii) the purpose, benefits, and limitations of newborn hearing screening;

(iv) the procedures used for newborn hearing screening; and

(v) the risk indicators for delayed-onset, progressive, and acquired hearing loss; and

(C) obtain a signed consent form from the parent to permit the receiving agency to share the results of the hearing screening; and

(4) obtain the hearing screening results and place them in the newborn's medical record.

(c) If a medically fragile newborn is transferred immediately after birth to a neonatal intensive care unit and has not had the hearing screened before the transfer, the medical care facility that releases the child to the home shall be responsible for the following:

(1) Screening the child's hearing before discharge; and

(2) meeting the responsibilities specified in K.A.R. 28-4-603 through K.A.R. 28-4-605.

(d)(1) For home births at which a primary med-

ical care provider is in attendance, the primary medical care provider shall be responsible for the following:

(A) Coordination and referral of the newborn to a licensed audiologist or medical care facility providing hearing screening; and

(B) assisting the parent to obtain hearing screening for the newborn before the child is 30 days old.

(2) For home births at which a primary medical care provider is not in attendance, the newborn's primary medical care provider shall be responsible for the coordination and referral for hearing screening following accepted medical practices. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-610. Responsibilities of the primary medical care provider. Each primary medical care provider shall be responsible for the following:

(a) Ensuring that the medical care facility implements hearing screening for the provider's patients according to accepted medical practices;

(b) ensuring that the hearing screening results are discussed with the parent;

(c) ensuring that the parent receives written information about risk indicators for hearing loss;

(d) monitoring for delayed-onset, progressive, and acquired hearing loss during the infant's routine medical care;

(e) assisting the parent of a newborn or infant who does not pass the hearing screening to obtain audiologic and other appropriate medical consultation, follow-up, and diagnosis for the child before the child is three months old;

(f) assisting the parent of a newborn or infant with confirmed hearing loss to obtain appropriate intervention services for the child before the child is six months old; and

(g) working with other health care professionals and with the newborn's or infant's parent in the coordination of care for a child with confirmed hearing loss. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-611. Responsibilities of persons providing hearing screening after discharge. (a) Hearing screening conducted after discharge shall be completed before the newborn is 30 days old, unless a different time period is medically indicated.

(b) Each person providing hearing screening after discharge shall be responsible for the following:

(1) Following the hearing screening protocol, as specified in K.A.R. 28-4-601;

(2) providing the screening results to the following:

(A) The newborn's or infant's parent;

(B) the newborn's or infant's primary medical care provider;

(C) the department, as specified in K.A.R. 28-4-605; and

(D) with parental consent, the medical care facility or facilities where the newborn was delivered and discharged;

(3) providing information to the parent about normal hearing, speech, and language development;

(4) providing information to the parent about delayed-onset, progressive, and acquired hearing loss;

(5) providing information to the parent about follow-up audiologic assessment if the newborn or infant does not pass the hearing screening; and

(6) providing a list of audiologic assessment provider sites for infants younger than five months of age.

(c) For missed appointments, each person providing hearing screening after discharge shall make a reasonable effort to contact the parent to reschedule the hearing screening.

To be considered a reasonable effort, the person shall document at least two attempts to contact the newborn's or infant's parent by mail or phone. If necessary, the person shall use information available from the referring agency, the newborn's or infant's primary medical care provider, the local public health office, or other agencies.

(d) Each person providing hearing screening after discharge shall notify the newborn's or infant's primary medical care provider after two unsuccessful attempts to contact the child's parent. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-612. Responsibilities of persons providing audiologic assessment after discharge. Each person who determines that a newborn or infant has a hearing loss shall be responsible for the following:

(a) Being licensed to practice audiology in Kansas;

(b) providing the test results to the parent, the child's primary medical care provider, and the medical care facility where the child was born;

(c) reporting the test results to the department;

(d) providing information to the parent regarding the following topics:

(1) Normal hearing, speech, and language development;

(2) progressive and acquired hearing loss;

(3) the importance of medical evaluation and diagnosis;

(4) the importance of early intervention;

(5) amplification options;

(6) assistive device options;

(7) local early intervention services and educational programs; and

(8) the availability and importance of parent-to-parent support;

(e) in consultation with the newborn's or infant's primary care physician, referring the child and parent to an otolaryngologist for medical assessment;

(f) discussing referral for additional specialty evaluations, including genetics, ophthalmology, and child development, with the parent and the child's primary care physician;

(g) if appropriate, ensuring that medical clearance for amplification has been obtained and initiating the amplification process;

(h) providing information and referral for funding assistance, if necessary; and

(i) with the permission of the parent, referring the parent and the newborn or infant to early intervention services and working with the parent and providers of early intervention services in developing a service plan. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

28-4-613. Inability to pay. No newborn or infant shall be refused hearing screening because of the parent's inability to pay for the procedure or in the absence of a third-party payor. (Authorized by and implementing K.S.A. 65-1,157a; effective July 2, 2004.)

DROP-IN PROGRAMS

28-4-700. Definitions. (a) "Adult responsible for a child or youth" means any of the following adults who is other than the child's or youth's legal parent and who is responsible for the care and upbringing of the child or youth:

(1) A stepparent;

(2) a grandparent;

(3) another relative; or

(4) a foster parent.

(b) "Annual renewal date" means the date assigned to each licensee for the submission of the documents required to renew the license and payment of the annual license fee.

(c) “Applicant” means any person who has submitted an initial application for a license to operate a drop-in program but has not received a temporary permit or a license.

(d) “Department” means the Kansas department of health and environment.

(e) “Drop-in program” means a child care facility that is not located in an individual’s residence, that serves exclusively school-age children and youth, and in which the operator permits children and youth to arrive at and depart from the program at their own volition and at unscheduled times. This term shall not include a program, instructional class, or activity as specified in K.A.R. 28-4-578(b).

(f) “Kindergarten-age child” means a child who is attending kindergarten or who has completed kindergarten and has not entered first grade.

(g) “License” means the document issued by the secretary that authorizes a person to operate a drop-in program.

(h) “Operator” means a person who holds a temporary permit or a license to conduct a drop-in program.

(i) “Premises” means the location, including each building and the adjoining grounds, for which the operator has a temporary permit or a license to conduct a drop-in program.

(j) “School-age child” and “child” mean an individual who is of kindergarten age through the academic year in which the child is in the sixth grade and who is attending the drop-in program.

(k) “School-age youth” and “youth” mean an individual who meets the following conditions:

(1) Has completed sixth grade or is 12 years of age or older;

(2) is less than 18 years of age;

(3) is attending the program; and

(4) is not a volunteer or employee.

(l) “Secretary” means the secretary of the Kansas department of health and environment.

(m) “Secretary’s designee” means the person designated by the secretary to assess compliance with drop-in program regulations.

(n) “Staff member” means both of the following:

(1) All personnel, including employees’ substitutes and volunteers, who provide administrative or direct services to children and youth; and

(2) auxiliary personnel, including cooks, drivers, office workers, and housekeeping staff, who provide indirect services.

(o) “Temporary permit” means the document issued pursuant to K.S.A. 65-504, and amendments thereto, that authorizes a person to oper-

ate a drop-in program before receiving a license as required by K.S.A. 65-501, and amendments thereto. (Authorized by and implementing K.S.A. 65-508; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004.)

28-4-701. Licensure; application; renewal. (a) Each person shall have a temporary permit or a license to operate a drop-in program before children or youth are in attendance.

(b) Each operator shall submit a new application, the required forms, and the license fee, and shall obtain a new temporary permit or a new license from the secretary, as follows:

(1) Before a drop-in program that has been closed is reopened;

(2) if there is a change in the location of the drop-in program; or

(3) if there is a change of ownership of the drop-in program.

(c) Each person wishing to conduct a drop-in program shall submit a complete application on forms supplied by the department. The application shall be submitted at least 90 calendar days before the planned opening date of the drop-in program and shall include the following:

(1) A description of activities and services to be offered;

(2) a request for a criminal history and child abuse registry background check as specified in K.A.R. 28-4-705; and

(3) a nonrefundable license fee of \$20.00.

(d) Each individual applying for a license shall be 21 years of age or older at the time of application, and shall comply with K.A.R. 28-4-587(b)(2) (A), (B), (C), or (D).

(e) Each corporation applying for a license shall be in good standing with the Kansas secretary of state.

(f)(1) Before the annual renewal date, each licensee wishing to renew the license shall submit the annual nonrefundable license fee and shall complete and submit the following to the secretary, on forms supplied by the department:

(A) An application to renew the license; and

(B) a request to conduct a criminal history and child abuse registry background check.

(2) Each failure to submit the annual renewal documents and fee as required by paragraph (f) (1) of this regulation shall result in an assessment of a \$10.00 late fee payable to the secretary and may result in suspension of the license. Each late renewal fee assessed shall be paid upon request. (Authorized by K.S.A. 65-508; implementing

K.S.A. 65-501, 65-504, 65-505, and 65-516; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004.)

28-4-702. Inspections; investigations. Each applicant and each operator shall give the secretary or the secretary's designee immediate entry and access to the premises and to any records kept, to determine compliance with applicable statutes and with the drop-in program regulations. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-512; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004.)

28-4-703. Recordkeeping. (a) Each operator shall obtain the following information for each child or youth before or on the first day of attending the drop-in program:

- (1) The first and last name and date of birth; and
- (2) the name, address, and telephone number of each parent or other adult responsible for the child or youth, the names of any other persons authorized to pick up the child or youth, and emergency contact information.

(b) Each operator shall obtain written authorization for emergency medical care, signed by the parent or legal guardian of each child or youth, before the child or youth attends the program or within the second week of attendance. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004.)

28-4-704. Attendance policy; supervision. (a) Each operator of a drop-in program shall meet the following requirements:

- (1) Each operator shall develop and implement an attendance policy that allows children and youth to arrive at and depart the premises unsupervised, at unscheduled times and at their own volition.

- (2) The operator shall inform the parent or other adult responsible for each child or youth of the policy specified in paragraph (a)(1). The parent or guardian of each child or youth utilizing the drop-in program shall receive a written disclosure describing the activities in which the child or youth can participate and the level of supervision provided.

- (3) Each operator shall immediately notify the parent or guardian when a child or youth either is injured and requires medical attention or dies.

(b) Each staff member working with children and youth shall provide attentive supervision to

protect the health, safety, and welfare of the children and youth, and to reduce the risk of injury, illness, and abuse. (Authorized by and implementing K.S.A. 65-508; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004.)

28-4-705. Background checks. Each applicant and each operator shall meet the following requirements:

(a) Submit to the department the identifying information necessary to complete background checks for each individual who works or regularly volunteers in the drop-in program and any other individual in the drop-in program whose activities involve either supervised or unsupervised access to children. The identifying information shall be submitted as follows:

- (1) When submitting an application for a license;

- (2) when submitting an application to renew a license; and

- (3) before allowing any individual to work or regularly volunteer in the drop-in program and before allowing any individual whose activities involve either supervised or unsupervised access to children to be in the drop-in program;

(b) ensure that fingerprint-based background checks are completed for each of the following:

- (1) The applicant;

- (2) the operator;

- (3) each staff member;

- (4) each volunteer providing supervision to children; and

- (5) any other individual regularly in the drop-in program whose activities involve unsupervised access to children;

(c) ensure that the information submitted for each individual specified in subsection (b) includes the required information for background checks from each state of residence throughout the five-year period before allowing the individual to work or regularly volunteer in the drop-in program;

(d) ensure that name-based background checks by the Kansas bureau of investigation and the Kansas department for children and families are completed for each of the following individuals:

- (1) Each volunteer who does not have unsupervised access to children;

- (2) each student of an accredited secondary or postsecondary school who is at least 16 years of age and who is participating in an educational experience arranged by the school, if the student

does not have unsupervised access to children; and

(3) any other individual regularly in the drop-in program if the individual's activities do not involve unsupervised access to children; and

(e) ensure that no individual works or regularly volunteers in the drop-in program until the results of the individual's background checks verify that the individual is not prohibited from working, regularly volunteering, or residing in a facility pursuant to K.S.A. 65-516, and amendments thereto. (Authorized by K.S.A. 2017 Supp. 65-508; implementing K.S.A. 2017 Supp. 65-516; effective, T-28-3-19-04, March 19, 2004; effective Sept. 10, 2004; amended June 7, 2018.)

LICENSING FAMILY FOSTER HOMES FOR CHILDREN

28-4-800. Definitions. For the purposes of K.A.R. 28-4-800 through K.A.R. 28-4-825, the following definitions shall apply:

(a) "Age-mates" means children whose difference in age does not exceed three years.

(b) "Applicant" means an individual who has applied for a license but who has not yet been granted a license to operate a family foster home. This term shall include an applicant who has been granted a temporary permit to operate a family foster home.

(c) "Basement" means the lowest level or story of a family foster home that has its floor below ground level on all sides.

(d) "Caregiver" means any individual who provides care to a child in foster care in or away from the family foster home, including the following:

(1) An applicant who has been granted a temporary permit to operate a family foster home or a licensee;

(2) a substitute caregiver;

(3) an adult member of a family providing informal visitation;

(4) an individual who comes into the family foster home to provide care when the licensee is present; and

(5) any respite care provider.

(e) "Case plan" means the comprehensive written plan of care developed for each child in foster care by the child's child-placing agent.

(f) "Child in foster care" means either of the following:

(1) Any individual under 16 years of age who is placed for care in a family foster home; or

(2) any individual who is at least 16 years of age

but not yet 23 years of age and who is in the custody of the state of Kansas and is placed for care in a family foster home.

(g) "Child-placing agent" means a person that possesses the legal right to place a child into a family foster home. This term shall include the child's parent, legal guardian, a public or private child-placing agency, and the court.

(h) "De-escalation methods" means types of intervention used to help reduce a child's level of anxiety or anger. This term shall include physical restraint.

(i) "Department" means the Kansas department of health and environment.

(j) "Discipline" means positive methods of child behavior management, including instruction, re-direction, and de-escalation methods.

(k) "Exception" means a waiver of compliance with a specific family foster home regulation or any portion of a specific family foster home regulation that is granted by the secretary to an applicant or a licensee.

(l) "Exotic animal" means either of the following:

(1) Any non-human mammal that is not one of the following:

(A) A domesticated dog, a domesticated cat, a feral cat, or a domesticated ferret;

(B) a hoofed animal, including a cow, sheep, goat, pig, and llama, that is kept for farming or ranching purposes;

(C) a horse;

(D) a pet rabbit;

(E) a pet rodent, including a mouse, rat, hamster, gerbil, guinea pig, and chinchilla; or

(F) a potbellied pig; or

(2) any animal that typically lives in the wild and is determined by the secretary to be a substantial threat to the health and safety of a child in foster care.

(m) "Family foster home" means a type of child care facility as defined in K.A.R. 28-4-311.

(n) "Foster family" means all of the individuals living in a family foster home other than the child in foster care.

(o) "High-risk sport or recreational activity" means any sport or recreational activity, including watercraft activities and motorized activities, that poses a significant risk of injury to the participant. Safe participation in the activity shall require specialized instruction and may require protective safety gear.

(p) "Informal visitation" means visitation by a child in foster care in the home of an extended

family member of the licensee that is for 48 hours or less each month and that is for the purpose of normal socialization for the child in foster care.

(q) “Licensee” means an individual who has been granted a license to operate a family foster home.

(r) “Living space” means the rooms in a family foster home that are used for family activities, including the living room, dining room, family room, game or television room, and sleeping rooms. This term shall not include bathrooms, laundry rooms, and garages.

(s) “Long-term respite care” means respite care that is provided to a child in foster care for 24 hours or more each week.

(t) “Physical restraint” means the bodily holding of a child in foster care by a caregiver as a means to help the child regain self-control when the child is behaving in a manner that presents a danger to self or others.

(u) “Respite care” means the temporary care of a child in foster care in a family foster home other than the family foster home in which the child is placed. This term shall not include any activity that is solely for the purpose of socialization of a child in foster care.

(v) “Secretary” means the secretary of the Kansas department of health and environment.

(w) “Short-term respite care” means respite care that is provided to a child in foster care for less than 24 hours each week.

(x) “Sleepover” means an overnight social event with age-mates, away from the family foster home, that does not exceed a 24-hour period.

(y) “Smoking” means being in possession of a lighted cigarette, cigar, pipe, or burning tobacco in any device.

(z) “Sponsoring child-placing agency” means the public or private child-placing agency responsible for sponsoring the family foster home, including providing assessment, training, support, inspection, and monitoring for the licensee’s compliance with the regulations governing family foster homes.

(aa) “Substitute caregiver” means an individual who provides care and supervision in the family foster home for a child in foster care in the absence of the licensee.

(bb) “Water hazard” means a body of water at least 24 inches deep that is not a swimming pool, wading pool, or hot tub. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-503, 65-504, and 65-508; effective March 28, 2008.)

28-4-801. License required. (a) An individual shall obtain a license to operate a family foster home when providing 24-hour care to one or more children under 16 years of age who are unrelated to the individual, in the absence of the child’s parent or guardian.

(b) No individual shall be required to obtain a license to operate a family foster home under any of the following circumstances:

(1) All of the following conditions are met:

(A) The individual provides 24-hour care for one or more children less than 16 years of age.

(B) The total number of days the individual provides care does not exceed 90 calendar days during a calendar year.

(C) The individual does not receive payment or other compensation for providing care.

(D) The individual does not provide care for any children who are in the custody of the state of Kansas.

(E) The individual does not provide care for any children placed in Kansas from other states through the interstate compact for the placement of children (ICPC) or any successor compact.

(2) The individual provides care solely for the purpose of enabling the child to participate in a social activity that is normal for the child’s age and development.

(3) The individual provides informal visitation as defined in K.A.R. 28-4-800. (Authorized by K.S.A. 2012 Supp. 65-508; implementing K.S.A. 2012 Supp. 65-504 and K.S.A. 2012 Supp. 65-508; effective March 28, 2008; amended Sept. 6, 2013.)

28-4-802. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504 and 65-508; effective March 28, 2008; revoked Sept. 8, 2017.)

28-4-803. Licensing procedure. The granting of a license to any applicant may be refused by the secretary if the applicant is not in compliance with the requirements of the following:

(a) K.S.A. 65-501 through 65-516, and amendments thereto;

(b) K.S.A. 65-523 through 65-529, and amendments thereto;

(c) K.S.A. 65-531, and amendments thereto; and

(d) all regulations governing family foster homes. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504 and 65-508; effective March 28, 2008.)

28-4-804. Terms of license; validity of temporary permit or license; renewal of license; amendments; exceptions; withdrawal of application or request to close. (a) Terms of license.

(1) A temporary permit or a license may be granted to an applicant for a maximum of four children in foster care, with a maximum total of six children in the home, including the applicant's or licensee's own children under 16 years of age. There shall be no more than two children in the home under 18 months of age.

(2) Each child in foster care shall be at least five years younger than the youngest applicant or licensee.

(3) The maximum number of children and the age range authorized by the temporary permit or license shall not be exceeded and shall be limited by the following:

(A) The number of sleeping rooms that meet the requirements of these regulations;

(B) the assessment and recommendation of the sponsoring child-placing agency; and

(C) the ability of the applicant or licensee to maintain compliance with the statutes and regulations governing family foster homes.

(4) A license to maintain a family foster home shall not be granted or held in conjunction with any license or certificate authorizing another form of child care in a family foster home.

(5) An applicant or a licensee shall not provide care in the family foster home to any adult unrelated to the applicant or licensee.

(b) Validity of temporary permit or license.

(1) Each temporary permit or license shall be valid only for the individual or individuals and the address specified on the temporary permit or license.

(2) Each temporary permit or license shall be posted conspicuously in the family foster home.

(3) When an initial or amended license becomes effective, all temporary permits or licenses previously granted to the applicant or licensee at the same address shall become void.

(c) Renewal of license. Before each renewal date, the licensee shall complete and submit an application for renewal on forms provided by the department, including requests for the background checks specified in K.A.R. 28-4-805.

(d) Amendments. Each licensee who intends to change the terms of the license, including the maximum number or the age of children served, shall submit a request for an amendment on a form supplied by the department.

(e) Exceptions.

(1) Any applicant or licensee may request an exception from the secretary. Any request for an exception may be granted if the secretary determines that the exception is in the best interest of a child in foster care and the exception does not violate statutory requirements.

(2) Written notice from the secretary stating the nature of the exception and its duration shall be kept on file in the family foster home and shall be readily accessible to the department, the child-placing agent, the sponsoring child-placing agency, the Kansas department of social and rehabilitation services, and the Kansas juvenile justice authority.

(f) Withdrawal of application or request to close. Any applicant may withdraw the application for a license. Any licensee may submit, at any time, a request to close the family foster home operated by the licensee. If an application is withdrawn or a family foster home is closed, the current temporary permit or license granted to the applicant or licensee for that family foster home shall become void. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504, 65-505, and 65-508; effective March 28, 2008.)

28-4-805. Background checks. (a) With each initial application or renewal application, the applicant or licensee shall submit a request to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department of social and rehabilitation services in order to comply with the provisions of K.S.A. 65-516, and amendments thereto. Each request shall be submitted to the department on a form provided by the department. The request shall list the required information for the following:

(1) Each individual 10 years of age and older who resides, works, or regularly volunteers in the family foster home, excluding children placed in foster care;

(2) each caregiver 14 years of age and older; and

(3) each resident of a home in which informal visitation occurs who is at least 10 years of age.

(b) Each licensee shall submit a request to the department to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department of social and rehabilitation services before any of the following occurs:

(1) A new individual at least 10 years of age begins residing, working, or regularly volunteer-

ing in the family foster home, excluding children placed in foster care.

(2) A new caregiver at least 14 years of age begins caring for the child in foster care in the family foster home.

(3) A new individual at least 10 years of age begins residing in a home in which informal visitation occurs.

(c) Each individual submitting an initial application for a family foster home license shall obtain the following:

(1) For each individual 18 years of age and older residing in the home, a child abuse and neglect background check from each previous state of residence throughout the five-year period before the date of application; and

(2) for each applicant or licensee, a fingerprint-based background check from the national crime identification databases (NCID).

(d) Each individual who received a family foster home license on or after July 1, 2007 shall obtain the following:

(1) For each individual 18 years of age and older residing in the home, a child abuse and neglect background check from each previous state of residence throughout the five-year period before the date of application; and

(2) for each licensee, a fingerprint-based background check from the national crime identification databases (NCID).

(e) Each licensee shall obtain background checks on any additional individual at least 10 years of age who resides, works, or regularly volunteers in the family foster home if requested by the department or the sponsoring child-placing agency.

(f) Background checks shall be obtained following the procedures of the department.

(g) All fees associated with obtaining child abuse and neglect background checks from other states and NCID checks shall be the responsibility of the applicant or the licensee. (Authorized by K.S.A. 65-508; implementing K.S.A. 2007 Supp. 65-516; effective March 28, 2008.)

28-4-806. Training. (a) Prelicensure training. Before a license is issued, each applicant shall participate in and successfully complete the following:

(1) A face-to-face, instructor-led family foster home preparatory program approved by the department;

(2) a face-to-face, instructor-led first aid training course that lasts at least three clock-hours;

(3) training in universal precautions; and

(4) medication administration training.

(b) In-service training. Each licensee shall obtain at least eight clock-hours of training in each licensing year, including at least two clock-hours obtained through participation in group training, including workshops, conferences, and academic coursework. The training topics shall provide the opportunity to develop competency in two or more of the following areas:

(1) Attachment issues and disorders;

(2) behavior and guidance, including managing aggressive behavior and de-escalation methods, including the use of time-out;

(3) child development;

(4) communicating with the families of children in foster care;

(5) constructive problem solving;

(6) health;

(7) home safety;

(8) human sexuality;

(9) interactions with children;

(10) regulations governing family foster homes;

(11) medication administration;

(12) post-traumatic stress disorder;

(13) separation issues; and

(14) specific topics related to children with special needs.

(c) Additional training requirements.

(1) Each licensee shall participate in any additional or alternative training required by the sponsoring child-placing agency.

(2) Each caregiver using physical restraint shall have a current certificate documenting completion of physical restraint and de-escalation training approved by the secretary.

(d) Failure to meet training requirements.

(1) Each licensee who fails to meet training requirements for any licensing year shall complete a corrective action plan developed with the sponsoring child-placing agency to comply with prior licensing year requirements. The training hours obtained under the corrective action plan shall apply only to the prior licensing year. Failure to successfully complete the corrective action plan within 30 days after the initiation of the corrective action plan may result in an enforcement action.

(2) Each corrective action plan shall include the licensee's plan for maintaining compliance with this regulation.

(3) A licensee shall not accept any new child for placement until the sponsoring child-placing agency documents that the corrective action plan

has been successfully completed by the licensee and the training obtained by the licensee that meets the requirements of subsection (b). (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-807. Reporting requirements for infectious or contagious disease; positive tuberculin test; critical incidents; abuse and neglect. (a) Reporting infectious or contagious disease. Each licensee shall be responsible for reporting if any resident of the family foster home, including a child in foster care, contracts a reportable infectious or contagious disease specified in K.A.R. 28-1-2 as follows:

(1) Each licensee shall report the disease to the local county health department by the next working day. Each licensee shall follow the protocol recommended by the county health department and shall cooperate with any investigation, disease control, or surveillance procedures initiated by the county health department or the department.

(2) Each licensee shall notify the sponsoring child-placing agency of the incident for each child in foster care.

(b) Hospitalization or emergency room care. If a child in foster care requires hospitalization or emergency room care, the licensee shall notify the sponsoring child-placing agency in accordance with the sponsoring child-placing agency's policies and procedures.

(c) Positive tuberculin test. If any individual residing, working, or volunteering in the family foster home who is required to have tuberculin testing has a positive tuberculin test, each licensee shall report the results to the department's TB control program by the next working day.

(d) Reporting critical incidents.

(1) Each licensee shall report any of the following critical incidents immediately to the child's child-placing agent and the sponsoring child-placing agency:

(A) Fire damage or other damage to the dwelling or damage to the property that affects the structure of the dwelling or the safety of the child in foster care;

(B) a vehicle accident involving any child in foster care;

(C) a missing or runaway child in foster care;

(D) the physical restraint of a child in foster care;

(E) the injury of a child in foster care that requires medical attention;

(F) the death of a child or any other resident of the family foster home;

(G) the arrest of a child in foster care;

(H) any incident involving the presence of law enforcement;

(I) all complaint investigations by the department or the Kansas department of social and rehabilitation services; and

(J) any other incident that jeopardizes the safety of a child in foster care.

(2) Each licensee shall submit a written report for each critical incident specified in paragraph (d)(1) to the sponsoring child-placing agency by the next working day. This report shall contain the following information:

(A) The child's name and birth date;

(B) the date and time of the incident;

(C) a factual summary of the incident, including the name of each individual involved;

(D) a factual summary of the immediate action taken, including the name of each individual involved;

(E) the signature of the licensee; and

(F) the date of the report.

(3) Each licensee shall ensure that a report is submitted to the department by the next working day. The report shall contain all known facts concerning the time, place, manner, and circumstances of the death of a child in foster care or any individual living in the family foster home.

(4) A copy of each critical incident report shall be kept on file at the family foster home.

(e) Reporting abuse and neglect.

(1) For the purposes of this subsection, "neglect," "physical, mental, or emotional abuse," and "sexual abuse" shall have the meanings specified in K.S.A. 38-2202, and amendments thereto.

(2) Each caregiver shall report any suspected neglect, physical, mental, or emotional abuse, and sexual abuse of a child in foster care within 24 hours of discovery, by telephone or in writing, to the secretary of the Kansas department of social and rehabilitation services or to the local law enforcement agency.

(3) Each licensee shall notify the sponsoring child-placing agency of suspected neglect, physical, mental, or emotional abuse, and sexual abuse of a child in foster care within 24 hours of discovery, by telephone or in writing. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-808. Recordkeeping requirements; confidentiality. Each licensee shall ensure that all records pertaining to the licensure and operation of the family foster home, including the records specified within this regulation, are kept at the family foster home and are accessible to the secretary and the sponsoring child-placing agency.

(a) Family foster home records. Each licensee shall keep the following documents in the family foster home:

(1) The sponsoring child-placing agency's approval for any of the following, if applicable:

(A) Approval for the licensee to provide respite care;

(B) approval for use of informal visitation; and

(C) an approved outdoor safety plan;

(2) a copy of the safety rules for the use of the swimming, wading pools, or hot tubs posted as specified in K.A.R. 28-4-824;

(3) any exceptions that have been granted;

(4) a copy of the regulations governing family foster homes;

(5) documentation of the information submitted for background checks as specified in K.A.R. 28-4-805;

(6) a copy of the licensee's documentation of each critical incident for each child in foster care as specified in K.A.R. 28-4-807;

(7) a copy of the record of each rabies vaccination for each domesticated dog and each domesticated cat owned by any occupant of the family foster home; and

(8) documentation of accident and liability insurance for each vehicle used to transport children in foster care.

(b) Caregiver records. A file that contains the following information shall be kept for each caregiver:

(1) Documentation of the training specified in K.A.R. 28-4-806;

(2) a health assessment that meets the requirements in K.A.R. 28-4-819 and documentation of a negative tuberculosis test or chest X-ray;

(3) a copy of a valid driver's license, if applicable. A copy of the license shall also be provided to the sponsoring child-placing agency; and

(4) all information for the extended family members identified for informal visitation, as specified in K.A.R. 28-4-814.

(c) Foster family members 16 years of age and older. The record for each child 16 years of age and older, excluding children placed in foster care, shall include the following information:

(1) A health assessment that meets the requirements specified in K.A.R. 28-4-819 and documentation of any negative tuberculosis test or chest X-ray;

(2) a current immunization record; and

(3) a copy of a valid driver's license, if transporting any child in foster care. A copy of the license shall also be provided to the sponsoring child-placing agency.

(d) Foster family members less than 16 years of age. The records for each child less than 16 years of age who was born to, or adopted by, the licensee shall include a health assessment that meets the requirements in K.A.R. 28-4-819 and documentation of immunizations as specified in K.A.R. 28-4-819.

(e) Child in foster care. Each licensee shall keep a file for each child in foster care that contains the following information:

(1) All required placement information specified in K.A.R. 28-4-809;

(2) authorization, if any, regarding disclosure of confidential information for the child in foster care;

(3) documentation, if applicable, of a case plan authorizing the use of physical restraint;

(4) documentation, if applicable, of each use of physical restraint on a physical restraint report form as specified in K.A.R. 28-4-815;

(5) medical and surgical consent forms;

(6) the name, address, and telephone number of a physician to be called in case of emergency; and

(7) the medical information record specified in K.A.R. 28-4-819.

(f) Confidentiality of records of each child in foster care. Each licensee shall keep each child's recorded information confidential. The records shall be kept on file at the family foster home in a manner that ensures confidentiality. Nothing in this regulation shall prevent access to the child's records by the child's child-placing agent, the sponsoring child-placing agency, the department, law enforcement, or the court. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective March 28, 2008.)

28-4-809. Basic placement information; other required placement information; departure requirements. (a) Basic placement information. Any licensee may accept a child in foster care for placement if the following information is received before or at the time of placement:

(1) The approval of the sponsoring child-placing agency;

(2) signed medical and surgical consent forms or, in the case of an after-hours emergency placement, a provision for obtaining medical and surgical consent forms;

(3) a completed placement agreement or a completed emergency placement form;

(4) a description of the circumstances leading to the current placement and, if known, the reason the child in foster care came into custody;

(5) a description of the child's recent circumstances, including any medical problems, mental health concerns, and safety concerns, including any assaultive behavior and victimization concerns, if known;

(6) information about the child's medication and dietary needs, and the name of each of the child's current health care providers, if known;

(7) any allergies from which the child suffers, if known; and

(8) the name, address, and telephone number of the contact individual for the last educational program the child attended.

(b) Other required placement information.

(1) No later than 14 calendar days after placement, each licensee shall review the following information:

(A) A copy of the court order or other document authorizing the child-placing agent to place the child in foster care;

(B) a designation of the race or cultural heritage of the child, including tribal affiliation, if any;

(C) a completed and signed placement agreement, including emergency contact information, if not received at the time of placement;

(D) signed medical and surgical consent forms, if not received at the time of placement;

(E) the name, address, and telephone number of the child's parents or legal guardian;

(F) the spiritual or religious affiliation of the child and the child's family;

(G) the child's placement history summary, including the name, address, and telephone number of any advocates;

(H) a description of positive attributes and characteristics of the child and, if available, any related information from the child, the child's family including siblings, and concerned individuals in the child's life;

(I) the name, address, telephone number, and, if applicable, the e-mail address of the child-placing agent who is responsible for supervising the child's placement; and

(J) a copy of the current case plan, if completed. If this plan has not been completed, the licensee shall obtain a copy within 14 calendar days of the completion of the plan.

(2) If the licensee does not have the information specified in paragraph (b)(1), the licensee shall request the information from the sponsoring child-placing agency and shall document the request.

(c) Departure requirements. When any child in foster care moves from the family foster home, the licensee shall send the following with the child:

(1) All possessions brought with the child in foster care to the family foster home that are usable or that have special significance to the child;

(2) all savings from gifts, allowances, and earnings;

(3) all usable clothing, school supplies, recreational equipment, gifts, and any other items purchased specifically for and given to the child during placement in the family foster home, including items provided by the foster parents; and

(4) the child's life book, which may include birth family history, placement history, pictures, school information, and a record of personal achievements. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-810. Case plan. (a) Each licensee shall be an active participant on the case-planning team with each child's child-placing agent, the sponsoring child-placing agency, and other appropriate parties to develop and implement the child's case plan.

(b) The licensee's participation shall include the following:

(1) Identifying and sharing information, as appropriate, with individuals who are directly involved in the child's case plan, including any treatment outcomes the child achieves while in the family foster home and the attainment of developmentally appropriate life skills that the child needs to become functional in the community;

(2) reporting the child's behaviors and other important information to the child's child-placing agent, the sponsoring child-placing agency, and others as indicated in the child's case plan;

(3) recommending changes in the child's case plan to the child's child-placing agent, if needed, including any approval needed for special activities or privileges, and participating in the case-planning conferences for the child; and

(4) giving the child-placing agent additional significant information about the child in foster care as it becomes known.

(c) A licensee shall not disclose medical or social information relating to any child in foster care without authorization from the child's child-placing agent, unless the disclosure is directly related to obtaining necessary services for the child or to ensuring safe involvement in age-appropriate activities.

(d) In order to meet the needs of each child placed in the home, each licensee shall implement the provisions assigned to the licensee in the case plan and shall follow the policies of the sponsoring child-placing agency for the care of the child.

(e) Each licensee shall seek consultation and direction from the child's child-placing agent or the sponsoring child-placing agency if issues arise that cannot be resolved between the licensee and the child in foster care. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-811. Caregiver qualifications; supervision. (a) Caregiver qualifications. Each caregiver shall be qualified by the temperament, emotional maturity, judgment, and the understanding of children necessary to maintain the health, comfort, safety, and welfare of children in foster care pursuant to K.S.A. 65-504 and 65-508, and amendments thereto.

(b) General supervision. Each licensee shall ensure that each child in foster care is supervised in accordance with the child's age, maturity, risk factors, and developmental level. Additional supervision shall be provided for any child in foster care of any age in any of the following situations:

(1) The child has mental health issues that place the child at higher concern for risk-taking behaviors that could result in unintentional injury or drowning.

(2) The child would be a danger to self or others.

(3) The child functions below the child's chronological age level.

(4) The child is unable to engage in self-care.

(c) Substitute care and supervision. Each licensee shall ensure that substitute care and supervision are provided in each of the following situations:

(1) During the absence of the licensee between the hours of six a.m. and midnight, the following requirements shall apply:

(A) For an absence of less than four hours, the substitute caregiver shall be at least 14 years of age and at least three years older than the oldest child in foster care; and

(B) for an absence of four to 10 hours, the substitute caregiver shall be at least 16 years of age and at least three years older than the oldest child in foster care.

(2) In the absence of the licensee for more than 10 hours or for any period between the hours of midnight and six a.m., the substitute caregiver shall be at least 18 years of age and at least three years older than the oldest child in foster care.

(d) Self-care. Any child in foster care at least 12 years of age may be permitted to stay at home without adult supervision for certain periods of time between the hours of six a.m. and midnight if all of the following requirements and conditions are met:

(1) The potential for self-care is identified and written approval is included in the child's case plan.

(2) Each child in foster care's specific risk factors, including age, maturity level, behavior disorders, suicidal tendencies, developmental delays, thrill-seeking behavior, and difficulty with anger control, shall be considered in developing the self-care plan.

(3) Each licensee has established a written self-care plan for the care and supervision for each child in foster care in the home in the absence of the licensee. The written self-care plan shall take into consideration the number of children in the home, the behavior, emotional stability, and maturity level of the children in the home, and any neighborhood safety issues. The self-care plan shall be approved by the sponsoring child-placing agency and the child's child-placing agent.

(4) Only children residing in the home may be present during self-care.

(5) The following minimum age and maximum time limits for self-care for each child in foster care shall apply:

(A) Any child who is at least 12 years of age may be in self-care for a maximum of two consecutive hours, for no more than four hours each day.

(B) Any child who is at least 14 years of age may be in self-care for no more than four hours each day.

(C) Any child who is at least 16 years of age may be in self-care for no more than 10 hours each day. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-812. Respite care. (a) Requirements. Respite care may be provided for a child placed in another foster home if both of the following requirements are met:

(1) The respite care provider shall be in compliance with all regulations governing family foster homes.

(2) The sponsoring child-placing agency shall have approved the family foster home to provide respite care and the written approval is on file in the family foster home.

(b) Short-term respite care. The number and age range authorized by the temporary permit or the license may be exceeded by a maximum of two additional children in foster care or a sibling group of any size. If short-term respite care is provided during sleeping hours, an individual bed shall be available for each child.

(c) Long-term respite care. Long-term respite care may be provided if the addition of the child in foster care to be receiving long-term respite care does not cause the license capacity for the family foster home in which respite care will be provided to be exceeded. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-813. Child growth and development. (a) Social development. Each licensee shall provide for the growth and development of each child in foster care by providing the following:

(1) Contact with the family of the child in foster care in accordance with the case plan prepared by the child's child-placing agent;

(2) access to individual, school, and community recreational activities according to the child's age and interest; and

(3) privacy.

(b) Culture and religion. Each licensee shall meet the cultural and religious needs of each child in foster care placed in the family foster home.

(c) Recreational development. Each licensee shall provide an adequate supply of play equipment, materials, and books that meet the following requirements:

(1) Are suitable to the developmental needs and interests of each child in foster care; and

(2) are safe, clean, and in good repair.

(d) Education and basic skills. Each licensee shall provide the following to each child in foster care:

(1) Facilitation of the child's timely enrollment and school attendance in a local school district or, when appropriate, the child's district of residence and facilitation of the child's regular attendance at school or any other place of instruction in accordance with the child's individual education plan; and

(2) assistance to each child in learning basic life skills that allow the opportunity to improve self-concept and strengthen identity in preparation for life after foster care. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-814. Family life. (a) Family activities. Taking into consideration the age, needs, and case plan of each child in foster care, each licensee shall provide the following opportunities for each child in foster care:

(1) Inclusion of the child in foster care in the daily life of the family, including eating meals with the family and participating in recreational activities;

(2) ensuring that each child in foster care is provided with the same opportunities that are provided to the other children residing in the home; and

(3) ensuring that each child in foster care is provided access to schools, church, recreational and health facilities, and other community resources.

(b) Daily routine. Each licensee shall provide a daily routine in accordance with the age and needs of each child in foster care that includes the following:

(1) Active and quiet play, both indoors and outdoors, weather permitting;

(2) rest and sleep; and

(3) nutritious meals and snacks.

(c) Essential and special items.

(1) Each licensee shall ensure that each child in foster care is provided with essential items to meet each child's needs, including the following:

(A) Food and shelter;

(B) nonprescription medical needs;

(C) clothing and shoes;

(D) toiletries and personal hygiene products; and

(E) birthday and holiday gifts.

(2) Each licensee shall notify the sponsoring child-placing agency and the child's child-placing agent when a licensee identifies a need for additional resources to provide a special item for a child in foster care. Special items may include the following:

(A) Clothing and fees for instructional or extracurricular activities;

(B) school pictures;

(C) athletic and band instrument fees; and

(D) cap and gown rental and prom clothing.

(d) Allowance. Each licensee shall provide an allowance to each child in foster care equal to that of any other children of similar age in the family foster home who receive an allowance.

(e) Work opportunity. Each child in foster care shall have the opportunity to earn spending money at tasks or jobs according to the child's age, ability, and case plan. The money shall be the child's, and the child shall not be forced to provide for needs that otherwise would be provided by the licensee.

(f) Routine tasks. Each licensee shall permit each child in foster care to perform only those routine tasks that are within the child's ability, are reasonable, and are similar to the routine tasks expected of other members of the household of similar age and ability.

(g) Informal visitation. Any licensee may identify extended family members 18 years of age and older as resources for informal visitation.

(1) For each extended family member identified as a resource, each licensee shall meet the following requirements:

(A) Describe the relationship of the individual to the licensee;

(B) submit a request for background checks as specified in K.A.R. 28-4-805;

(C) obtain a copy of the current driver's license for each individual who could provide transportation during visitation;

(D) provide to the sponsoring child-placing agency documentation that each individual has read and agrees to follow the confidentiality policy and the discipline policy of the sponsoring child-placing agency;

(E) ensure that each individual has emergency contact numbers and a crisis plan in case of emergency; and

(F) ensure that either an original or a copy of each medical consent form and each health assessment is provided for each child in foster care participating in informal visitation.

(2) Each licensee shall obtain the sponsoring child-placing agency's approval of the informal visitation plan before using informal visitation.

(3) Each licensee shall provide the sponsoring child-placing agency with the information specified in paragraphs (g)(1)(A) through (F) and shall keep a copy on file in the family foster home.

(4) Each licensee shall report the following to the sponsoring child-placing agency:

(A) The date on which each informal visitation occurs; and

(B) the identified extended family member's name and address.

(5) Each licensee shall ensure that both of the following conditions are met:

(A) Each identified extended family member 18

years of age and older is informed of the content of the regulations governing family foster homes.

(B) Supervision that ensures the health, safety, and welfare of each child in foster care is provided by an individual 18 years of age and older.

(h) Sleepovers. Any licensee may permit a child in foster care to participate in sleepovers in unlicensed homes if all of the following conditions are met:

(1) The purpose of the stay is to allow the child to participate in a social event that is normal for the child's age and development.

(2) Participation in sleepovers is not precluded in the child's case plan.

(3) The licensee confirms the invitation with the parent of the child to be visited and determines that supervision will be provided by an individual 18 years of age and older to ensure the health, safety, and welfare of the child.

(i) High-risk sport or recreational activity. Any licensee may permit a child in foster care to engage in any high-risk sport or recreational activity if all of the following conditions are met:

(1) Written permission for the specific activity is obtained from the parent, legal guardian, or legal custodian of the child in foster care and from the child's child-placing agent.

(2) The licensee assesses the individual child-specific risk factors before giving permission. These factors shall include the age and maturity level of the child, behavior disorders, suicidal tendencies, developmental delays, thrill-seeking behavior, and difficulty with anger control.

(3) Protective safety gear is used, if required for the sport or activity.

(4) A safety plan is developed and followed. This plan shall include instruction on the activity and compliance with any manufacturer's specifications and general safety guidelines.

(5) Direct supervision by an individual 18 years of age and older is provided to ensure safe participation.

(j) The use of trampolines in home settings shall be prohibited for children in foster care. (Authorized by and implementing K.S.A. 2012 Supp. 65-508; effective March 28, 2008; amended Sept. 6, 2013.)

28-4-815. Behavior management practices; prohibited punishment; physical restraint; notification requirements. (a) Behavior management practices.

(1) Each licensee shall ensure that positive methods are used for behavior management that

are appropriate to the age and developmental level of the child in foster care and encourage cooperation, self-direction, and independence.

(2) Each caregiver shall use methods of behavior management that are designed to help each child in foster care develop inner controls and manage the child's own behavior in a socially acceptable manner.

(3) If time-out is used to manage behavior, the child in foster care shall remain in time-out in accordance with the child's age and developmental level and only long enough to regain self-control.

(4) For each child in foster care who is not able to develop self-control or self-management, behavior management techniques shall be approved, in writing, by the case planning team.

(b) Prohibited punishment.

(1) No individual shall use any of the following means or methods of punishment of a child:

(A) Punishment that is humiliating, frightening, or physically harmful to the child;

(B) corporal punishment, including hitting with the hand or any object, yanking arms or pulling hair, excessive exercise, exposure to extreme temperatures, or any other measure that produces physical pain or threatens the child's health or safety;

(C) restricting movement by tying or binding;

(D) confining a child in a closet, box, or locked area;

(E) forcing or withholding food, rest, or toilet use;

(F) refusing a child access to the family foster home;

(G) mental and emotional cruelty, including verbal abuse, derogatory remarks about a child in foster care or the child's family, statements intended to shame, threaten, humiliate, or frighten the child, or threats to expel a child from the home; and

(H) placing soap, or any other substance that stings, burns, or has a bitter taste, in the child's mouth or on the tongue or any other part of the child's body.

(2) Each caregiver shall be prohibited from giving medications, herbal or folk remedies, and drugs to control or manage behavior, except as prescribed by the licensed physician or licensed nurse practitioner of the child in foster care.

(3) No child in foster care shall be forced to participate in publicity or promotional activities.

(4) Each caregiver shall be prohibited from publicly identifying any child in foster care to the embarrassment of the child.

(5) No child in foster care shall be forced to acknowledge dependency on the family foster home or to express gratitude to the licensee.

(6) Each caregiver shall be prohibited from using physical restraint to manage behavior unless all of the requirements of subsection (c) are met.

(c) Physical restraint.

(1) Each caregiver shall ensure that before using physical restraint, other de-escalation methods are used. If other de-escalation methods fail and the behavior of the child in foster care makes physical restraint necessary for the child's own protection or the protection of others, the child shall be held as gently as possible to manage the child's behavior.

(2) No bonds, ties, or straps shall be used to restrict movement. The child in foster care shall be held only until one of the following is achieved:

(A) The child regains behavioral control.

(B) The child is no longer a threat to self or others.

(C) The restraint has lasted 20 minutes with no improvement in the child's behavior.

(3) Each caregiver using physical restraint in any situation other than an emergency shall have a current certificate on file documenting the training in de-escalation methods and physical restraint procedures and techniques specified in K.A.R. 28-4-806.

(4) The licensee shall have on file a case plan authorizing the use of physical restraint for each child in foster care whose behavior cannot be managed by other less intrusive methods and whose behavior requires the use of ongoing physical restraint on a recurring basis for the child's protection or the protection of others.

(d) Notification requirements. Each caregiver shall inform the child's child-placing agent and the sponsoring child-placing agency each time physical restraint is used.

(1) The licensee shall document each use of physical restraint on a form that contains the following:

(A) The child's name and birth date;

(B) the date and the start and end times of the physical restraint;

(C) a description of the other de-escalation methods attempted before the use of physical restraint;

(D) a description of the child's behaviors and condition and the incidents that led to the use of physical restraint;

(E) a description of the child's behavior during and following the physical restraint;

(F) a description of any follow-up actions taken;
 (G) the name of the individual who used physical restraint on the child; and

(H) the name of the licensee completing the report and the date completed.

(2) Each licensee shall file the report with the sponsoring child-placing agency no later than the next working day following the use of physical restraint. The use of physical restraint as an emergency intervention shall be reported to the sponsoring child-placing agency at the conclusion of the intervention when the child is no longer a danger to self or others. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-816. Transportation. Each licensee shall ensure that all of the following requirements are met: (a) If a vehicle used for transportation of a child in foster care is owned or leased by a foster family member or is driven by a child in foster care, the following requirements shall be met:

(1) Trailers pulled by another vehicle, camper shells, and truck beds shall not be used for the transportation of children in foster care.

(2) The transporting vehicle shall be maintained in a safe operating condition.

(3) The transporting vehicle shall be covered by accident and liability insurance as required by the state of Kansas.

(4) A first-aid kit shall be in the transporting vehicle and shall include disposable nonporous gloves, a cleansing agent, scissors, bandages of assorted sizes, adhesive tape, a roll of gauze, one package of gauze squares at least four inches by four inches in size, and one elastic bandage.

(b) Each driver of any vehicle that is used to transport any child in foster care shall hold a valid driver's license appropriate for the type of vehicle being used.

(c) The use of seat belts and child safety seats shall include the following:

(1) Each individual shall be secured by the use of a seat belt or a child safety seat when the vehicle is in motion.

(2) No more than one individual shall be secured in any seat belt or child safety seat.

(3) Each seat belt shall be properly anchored to the vehicle.

(4) When a child safety seat, including booster seat, is required, the seat shall meet the following requirements:

(A) Have current federal approval;

(B) be installed according to the manufacturer's instructions and vehicle owner's manual;

(C) be appropriate to the height, weight, and physical condition of the child, according to the manufacturer's instructions and Kansas statutes and regulations;

(D) be maintained in a safe operating condition at all times;

(E) have a label with the date of manufacture and model number, for use in case of a product recall; and

(F) have no missing parts or cracks in the frame and have not been in a crash.

(d) The health and safety of the children riding in the vehicle shall be protected as follows:

(1) All passenger doors shall be locked while the vehicle is in motion.

(2) Order shall be maintained at all times. The driver shall be responsible for ensuring that the vehicle is not in motion if the behavior of the occupants prevents safe operation of the vehicle.

(3) All parts of each child's body shall remain inside the vehicle at all times.

(4) Children shall neither enter nor exit from the vehicle from or into a lane of traffic.

(5) Children less than 10 years of age shall not be left in a vehicle unattended by an adult. When the vehicle is vacated, the driver shall make certain that no child is left in the vehicle.

(6) Smoking in the vehicle shall be prohibited when a child in foster care is in placement in a family foster home, whether or not the child in foster care is physically present in the vehicle.

(7) Medical and surgical consent forms and health assessment records shall be in the vehicle when a child in foster care is transported 60 miles or more from the family foster home.

(e) Before a child in foster care is allowed to drive, all of the following requirements shall be met:

(1) The licensee, child-placing agent, or sponsoring child-placing agency shall obtain permission from the parent or legal guardian.

(2) The privilege of driving shall be included in the child's case plan.

(3) The child shall possess a valid driver's license and shall meet the requirements of the Kansas motor vehicle drivers' license act, K.S.A. 8-234a et seq. and amendments thereto.

(f) Any resident of the home who is at least 16 years of age but not yet 18 years of age may transport a child in foster care who attends middle school or junior high school to and from school

without an accompanying adult if all of the following conditions are met:

(1) All of the requirements of subsections (a) through (e) are met.

(2) The driver has a valid driver's license and meets the requirements of the Kansas motor vehicle drivers' license act, K.S.A. 8-234a et seq. and amendments thereto.

(3) The parent or legal guardian of the child in foster care and the child's child-placing agent give their written approval.

(g) Any child in foster care who attends high school may be transported to and from school, work, or social activities without an accompanying adult by a driver who is at least 16 years of age but not yet 18 years of age if both of the following conditions are met:

(1) The driver has a valid driver's license and meets the requirements of the Kansas motor vehicle drivers' license act, K.S.A. 8-234a et seq. and amendments thereto.

(2) The parent or legal guardian of the child in foster care and the child's child-placing agent give their written approval.

(h) Any child in foster care who is a parent and who meets the requirements of subsections (a) through (e) may transport any child of that parent. (Authorized by and implementing K.S.A. 2012 Supp. 65-508; effective March 28, 2008; amended Sept. 6, 2013.)

28-4-817. Nutrition; food handling and storage. (a) Each licensee shall ensure that, for each child in foster care, all of the following requirements are met:

(1) Each child less than 12 months of age shall be held when bottle-fed until the child can hold the child's own bottle.

(2) No child shall be allowed to sleep with a bottle in the child's mouth.

(3) Prepared formula and juice shall be refrigerated until used. Leftover formula and juice shall be refrigerated with the nipple covered and shall be used within 24 hours.

(4) For each child less than 12 months of age, solid foods shall be introduced in consultation with the child's health care provider.

(b) Nutritious meals and snacks shall be planned and shall be served in accordance with the food and drug administration's recommended daily allowances.

(c) A sufficient quantity of food shall be available to allow each child in foster care to have sec-

ond servings of bread, milk, and either vegetables or fruit.

(d) Only pasteurized milk products shall be served.

(e) Food allergies and special dietary needs of each child in foster care shall be accommodated.

(f) Dishes shall be either washed, rinsed, and stacked or placed in a dishwasher after each meal, but no later than the next day.

(g) Sanitary methods of food handling and storage shall be followed.

(1) Each individual engaged in food preparation and food service shall use sanitary methods of food handling, food service, and storage.

(2) Each individual involved in food handling shall wash the individual's hands with soap and running water immediately before engaging in food preparation and service. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-818. Storage and administration of medication. (a) Storage of medication. Each licensee shall ensure that all prescription and nonprescription medication is kept in the original container at the recommended temperature in accordance with the instructions on the label and, except as specified in paragraph (e)(4), in locked storage and inaccessible to children.

(b) Nonprescription medication.

(1) When nonprescription medication is administered to any child in foster care, each caregiver shall administer the medication from the original container and according to instructions on the label.

(2) Substances including herbal supplements, folk remedies, natural medicines, and vitamin supplements other than a daily multivitamin shall be administered only with documented approval by a licensed medical practitioner.

(c) Prescription medication. When prescription medication is administered to a child in foster care, each licensee shall ensure compliance with the following requirements:

(1) Prescription medication shall be administered only to the designated child and in accordance with instructions on the label.

(2) Each prescription medication shall be kept in the original container labeled by a pharmacist with the following information:

(A) The first and last name of the child;

(B) the date the prescription was filled;

(C) the name of the licensed physician who wrote or approved the prescription;

(D) the expiration date of the medication; and
 (E) specific, legible instructions for administration and storage of the medication.

(3) The instructions on each label shall be considered the order from the licensed physician.

(4) If a daily or weekly medication container is used for a child in foster care, all of the following requirements shall be met:

(A) The medication container shall be labeled with the child's name.

(B) The medication container shall be used only for medications that are not affected by exposure to air or light and that can touch other medications without affecting the efficacy of any of the medications.

(C) The medications shall be placed in the medication container by the licensee.

(D) Each dose shall be placed in the medication container according to the correct time of day.

(E) The medication container shall be kept in locked storage.

(F) The remainder of each of the child's medications shall be stored in the respective original container until the prescription is completed or discontinued.

(G) If any child in foster care is required to receive medication during a visit or during any absence from the foster home, all medication sent for the child shall be in containers that meet the requirements of paragraph (c)(2) and shall be given to the individual taking responsibility for the child.

(H) When a child in foster care moves from the family foster home, all current medications shall be in the individual original containers and shall be given to the individual taking responsibility for the child.

(I) At no time shall any medication be in the possession of a child in foster care, except as specified in paragraph (e)(4).

(d) Requirements for administering prescription and nonprescription medication.

(1) Before administering medication, each licensee shall receive training in medication administration as specified in K.A.R. 28-4-806. Each licensee shall ensure that each individual administering medication knows the purpose, side effects, and possible contraindications of each medication.

(2)(A) For prescription medications, each caregiver shall record on each child's medication record the following information:

(i) The name of the individual who administered each medication;

(ii) the date and time the medication was given;

(iii) any change in the child's behavior, any response to the medication, or any adverse reaction;

(iv) any change in the administration of the medication from the instructions on the label or a notation about each missed dose; and

(v) any direction from the physician to change the order as written on the label.

(B) Each medication record shall be signed by the caregiver and shall be made a part of the child's medical record.

(e) Self-administration of medication.

(1) Any licensee may permit each child in foster care with a condition requiring prescription medication on a regular basis to self-administer the medication under adult supervision. Each licensee shall obtain written permission for the child to self-administer medication from the licensed physician, licensed physician's assistant, or advanced registered nurse practitioner treating the child's condition.

(2) Written permission for self-administration of medication shall be kept in the child's file at the family foster home.

(3) Self-administration of each medication shall follow the procedures specified in paragraph (b)(2).

(4) Each child in foster care who is authorized to self-administer medication shall have access to the child's medication for self-administration purposes. The child shall have immediate access to medication prescribed for a condition for which timely treatment is a life-preserving requirement. Each child with asthma, allergies, or any other life-threatening condition shall have immediate access to that child's own medication for emergency purposes. Each licensee shall ensure the safe storage of self-administered medication to prevent unauthorized access by others.

(5) The date and time that each medication was self-administered shall be recorded on the child's medication record. Any noted adverse reactions shall be documented. Each licensee shall review the record for accuracy and shall check the medication remaining in the container against the expected remaining doses. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-819. Health care. (a) Infectious or contagious disease. Each individual residing in the family foster home shall be free from any infectious or contagious disease specified in K.A.R. 28-1-6.

(b) Health of caregivers.

(1) Each caregiver shall be in a state of physical, mental, and emotional health, as necessary to protect the health, safety, and welfare of the children in foster care.

(2) No caregiver shall be in a state of impaired ability due to the use of alcohol or other chemicals, including prescription and nonprescription drugs.

(3) Each individual regularly caring for a child in foster care in the family foster home shall have a health assessment conducted by a physician with a current license to practice in Kansas or by a nurse with a current license to practice in Kansas who is approved to perform health assessments. Each health assessment shall be conducted no earlier than one year before the date of the initial application for a license, employment, or volunteering and no later than 30 days after the date of the initial application, employment, or volunteering. The results of each assessment shall be recorded on a form provided by the department.

(4) If a caregiver experiences a significant change in the caregiver's physical, mental, or emotional health, including indications of substance abuse, an assessment of the caregiver's current health status may be requested by the secretary or by the sponsoring child-placing agency.

(A) The assessment or evaluation shall be performed at the expense of the licensee or other caregiver and by a practitioner who is licensed or certified in Kansas to diagnose and treat the specific condition that is the basis for the assessment or evaluation.

(B) Each licensee shall ensure that at least one potential practitioner has been approved by the requesting department or the sponsoring child-placing agency in order to have the assessment or evaluation accepted by the requesting department or child-placing agency.

(C) Each licensee shall provide the requesting department or sponsoring child-placing agency with an executed release of medical information to enable the department or the child-placing agency to obtain information directly from the practitioner.

(c) Health of the foster family members.

(1) Each individual living in the family foster home, other than the child in foster care, shall have a health assessment conducted by a physician with a current license to practice in Kansas or by a nurse with a current license to practice in Kansas who is approved to perform health as-

sessments. Each assessment shall be conducted within one year before the date of application or the individual residing in the home and no later than 30 days after the date of the licensee's initial application or the individual becoming a resident of the home. The results of the health assessment shall be recorded on forms provided by the department.

(2) Each child born to or adopted by the licensee who is less than 16 years of age and is living in the home shall have current immunizations. An exemption from this requirement shall be permitted only with one of the following:

(A) A written certification from a physician with a current license to practice in Kansas stating that the physical condition of the child is such that the immunization would endanger the child's life or health; or

(B) a written statement from the child's parent or legal guardian that the child is an adherent of a religious denomination whose teachings are opposed to immunizations.

(d) Medical and dental health of each child in foster care.

(1) Each licensee shall ensure that emergency and ongoing medical and dental care is obtained for each child in foster care by providing timely access to basic, emergency, and specialized medical, mental health, and dental care and treatment services provided by qualified practitioners.

(2) Each licensee shall ensure that, at the time of the initial placement, each child in foster care has had a health assessment conducted within the past year by a physician with a current license to practice in Kansas or by a nurse with a current license to practice in Kansas who is approved to conduct assessments.

(3) A health assessment shall be obtained annually for each child in foster care who is less than six years of age and every two years for each child in foster care who is six years of age and older.

(4) Each health assessment required in paragraphs (d)(2) and (3) shall be on file at the family foster home within 30 days after the child's placement in the home.

(5) The immunizations for each child in foster care less than 16 years of age shall be current or in process at the time the license is issued. An exemption from this requirement shall be permitted only with one of the following:

(A) A written certification from a physician with a license to practice in Kansas stating that the physical condition of the child is such that the

immunization would endanger the child's life or health; or

(B) a written statement from the child's parent or legal guardian that the child is an adherent of a religious denomination whose teachings are opposed to immunizations.

(6) An annual dental examination shall be obtained for each child in foster care who is three years of age or older. Follow-up care shall be provided. The child's dental record shall be recorded on forms provided by the department and shall be kept current.

(7) The medical information record for each child in foster care shall be kept current and shall document each illness, the action taken by the licensee, and the date of the child's medical, psychological, or dental care. When the child leaves the family foster home, the licensee shall ensure that the record, including the health assessments, dental records, medication administration record, immunization record, medical and surgical consent forms, and emergency medical treatment authorization, is given to the child's child-placing agent.

(e) Tuberculin testing.

(1) Each individual 16 years of age and older living, working, or regularly volunteering in the family foster home and each child in foster care 16 years of age and older shall be required to have a record of a negative tuberculin test or X-ray obtained not more than two years before the employment or initial application for a license or shall obtain the required record no later than 30 days after the date of employment, initial application, or becoming a resident of or volunteer in the home.

(2) Additional tuberculin testing shall be required if significant exposure to an active case of tuberculosis occurs or if symptoms compatible with tuberculosis develop. Proper treatment or prophylaxis shall be instituted, and the results of the follow-up shall be recorded on the individual's health record. The department shall be informed of each occurrence described within this paragraph.

(3) The results of each tuberculin test shall be recorded on, or attached to, the health assessment form and kept on file at the family foster home. Each licensee shall report any positive tuberculin skin test to the department's TB control program by the next working day.

(4) A child in foster care less than 16 years of age shall not be required to have tuberculin tests unless the child has been recently exposed to tu-

berculosis or exhibits symptoms compatible with tuberculosis.

(f) Tobacco use limitations.

(1) To prevent exposure of a child in foster care to secondhand smoke, each licensee shall ensure that both of the following conditions are met:

(A) Smoking is prohibited inside the family foster home when a child in foster care is in placement, whether the child is physically present on the premises or not.

(B) Smoking by any member of the foster family is prohibited outside the family foster home within 10 feet of a child in foster care.

(2) Each licensee shall prohibit smoking and the use of any other tobacco product by a child in foster care less than 18 years of age.

(g) Handwashing.

(1) Each caregiver shall wash the caregiver's hands with soap and water before preparing food, before eating, after toileting, after petting animals, and after diapering or changing soiled clothing.

(2) Each caregiver shall encourage each child in the family foster home to wash the child's hands with soap and water before and after eating, after petting an animal, and after toileting. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective March 28, 2008.)

28-4-820. General environmental requirements. Each licensee shall ensure that all of the requirements in this regulation are met.

(a) Local requirements. Each family foster home shall meet the legal requirements of the community as to zoning, fire protection, water supply, and sewage disposal.

(b) Sewage disposal. If a private sewage disposal system is used, the system shall meet the requirements specified in K.A.R. 28-4-55.

(c) Use of private water supply. If a private water system is used, the system shall meet the requirements specified in K.A.R. 28-4-50. The water supply shall be safe for human consumption. Testing of the water supply shall be completed at the time of initial licensing and annually thereafter to document the nitrate and bacteria levels. Additional testing may be required if there is a change in environmental conditions that could affect the integrity of the water supply. If children less than 12 months of age receive care in a family foster home that uses private well water, then commercially bottled drinking water shall be used for these children until a laboratory test confirms

that the nitrate content is not more than 10 milligrams per liter (10 mg/l) as nitrogen.

(d) Family foster home structural and furnishing requirements. The family foster home shall be constructed, arranged, and maintained to provide for the health, safety, and welfare of all occupants and shall meet the following requirements:

(1) The home shall contain sufficient furnishings and equipment to accommodate both the foster family and each child in foster care.

(2) The floors shall be covered, painted, or sealed in all living areas of the home, kept clean, and maintained in good repair.

(3) The interior finish of all ceilings, stairs, and hallways shall meet generally accepted standards of building, including safety requirements.

(4) Each closet door shall be designed to be opened from the inside and shall be readily opened by a child.

(5) Each stairway with two or more stairs and a landing shall have a handrail and be guarded on each side if there is a drop-off of more than 21 inches from the stairs or landing to the floor or ground.

(6) If any stairway is guarded by balusters and the family foster home is or is intended to be licensed for children in foster care less than six years of age, the space between balusters shall not exceed four inches, except as specified in this paragraph. If the space between balusters exceeds four inches, the licensee shall make provisions necessary to prevent a child's head from becoming entrapped in the balusters or a child's body from falling through the balusters or becoming entrapped in them.

(7) When a child in foster care less than three years of age is present, each stairway with two or more stairs and a landing shall be gated to prevent unsupervised access by the child. Each gate shall have a latching device that an adult can open readily in an emergency. Accordion gates shall be prohibited throughout the premises, and pressure gates shall be prohibited for use at the top of any stairway.

(8) If the family foster home is or is intended to be licensed for children in foster care less than six years of age, each electrical outlet shall be covered.

(9) At least one bathroom in the family foster home shall have at least one sink, one flush toilet, and one tub or shower. All fixtures shall be working at all times.

(10) Each bathroom shall have a solid door that affords privacy to the occupant and that can be

opened from each side without the use of a key in case of an emergency.

(11) A working telephone shall be on the premises and available for use at all times. Emergency telephone numbers shall be readily accessible or be posted next to the telephone for the police, fire department, ambulance, hospital or hospitals, and poison control center. The name, address, and telephone number of the primary care physician used for each child in foster care shall be posted next to the telephone or readily accessible in case of an emergency.

(12) A working smoke detector shall be centrally installed on each level of the home and in each room used for sleeping by a child in foster care and by the licensee.

(13) One working carbon monoxide detector shall be installed according to the manufacturer's instructions in an area adjacent to each room used for sleeping by a child in foster care and by the licensee.

(e) Cleanliness. The interior of the family foster home shall be free from accumulation of visible dirt, any evidence of vermin infestation, and any objects or materials that could cause injury to children in foster care.

(f) Lighting and ventilation.

(1) All rooms used for living space shall be lighted, vented, heated, and plumbed pursuant to K.S.A. 65-508, and amendments thereto.

(2) Each window and door used for ventilation shall be screened to minimize the entry of insects.

(3) The family foster home shall have lighting of at least 10 foot-candles in all parts of each room, within each living area of the home. There shall be lighting of at least 30 foot-candles in each area used for reading, study, or other close work.

(g) Firearms and other weapons.

(1) No child in the home shall have unsupervised access to any of the following:

(A) Firearms, ammunition, and other weapons;

(B) air-powered guns, including BB guns, pellet guns, and paint ball guns;

(C) hunting and fishing knives; and

(D) any archery and martial arts equipment.

(2) All firearms, including air-powered guns, BB guns, pellet guns, and paint ball guns, shall be stored unloaded in a locked container, closet, or cabinet. If the locked container, closet, or cabinet is constructed in whole or in part of glass or plexiglass, each firearm shall be additionally secured with a hammer lock, barrel lock, or trigger guard.

(3) Ammunition shall be kept in a separate locked storage container or locked compartment designed for that purpose.

(4) All archery equipment, hunting and fishing knives, and other weapons shall be kept in a locked storage compartment.

(5) Each key to a locked storage container, closet, or compartment of guns, ammunition, and other weapons, and to gun locks shall be in the control of a licensee at all times.

(h) Storage of household chemicals, personal care products, tools, and sharp instruments. The following requirements shall apply when a child in foster care is in placement in the family foster home:

(1) All household cleaning supplies and all personal care products that have warning labels advising the consumer to keep those supplies and products out of reach of children or that contain alcohol shall be kept in locked storage or stored out of reach of children less than six years of age.

(2) All chemicals and household supplies with warning labels advising the consumer to keep those chemicals and supplies out of reach of children shall be kept in locked storage or stored out of reach of children less than 10 years of age.

(3) Sharp instruments shall be stored in drawers equipped with childproof devices to prevent access by children or stored out of reach of children less than six years of age.

(4) Tobacco, tobacco products, cigarette lighters, and matches shall be inaccessible to individuals less than 18 years of age.

(5) Tools shall be inaccessible to each child in foster care when the tools are not in use and shall be used by a child in foster care only with supervision by an individual 18 years of age and older.

(i) Heating appliances.

(1) Each heating appliance using combustible fuel, including a wood-burning stove or a fireplace, shall be vented to the outside.

(2) Each fireplace and each freestanding heating appliance using combustible fuel, including a wood-burning stove, shall stand on a noncombustible material according to the manufacturer's specifications, Kansas statutes and regulations, and local ordinances.

(3) Each heating appliance designed by the manufacturer to be unvented shall be used according to the manufacturer's specifications, Kansas statutes and regulations, and local ordinances.

(4) If a child in foster care less than three years of age is in placement in the family foster home, a

protective barrier shall be provided for each fireplace and each freestanding heating appliance as necessary to protect from burns.

(5) If a propane heater is used, the heater shall be installed in accordance with the manufacturer's recommendations, Kansas statutes and regulations, and local ordinances.

(6) Each flue or chimney of any heating appliance that uses combustible fuel shall be checked annually and cleaned as recommended by a qualified chimney sweep.

(j) Clothes dryers. Each clothes dryer shall be vented to the outside or to a venting device installed and used according to the manufacturer's specifications, Kansas statutes and regulations, and local ordinances.

(k) Play space. Each family foster home shall have a space for indoor play and access to an outdoor play space.

(l) Mobile home requirements. In addition to requirements specified in this regulation, if the family foster home is a mobile home, both of the following requirements shall be met:

(1) The mobile home shall have two exits that are located at least 20 feet apart, with one exit within 35 feet of each bedroom door.

(2) Each mobile home shall be skirted with latticed or solid skirting and securely anchored by cable to the ground.

(m) Special inspections. A special inspection of the family foster home by a fire, health, sanitation, or safety official may be required by the secretary or the sponsoring child-placing agency to assist in making a decision about the safety of the home for a child in foster care. (Authorized by and implementing K.S.A. 2012 Supp. 65-508; effective March 28, 2008; amended Sept. 6, 2013.)

28-4-821. Sleeping arrangements. (a) Each licensee shall ensure that sufficient space for sleeping is provided to accommodate the number of foster family members and each child in foster care. Sleeping space shall not include any of the following places:

(1) An unfinished attic;

(2) an unfinished basement;

(3) a hall;

(4) a closet;

(5) a laundry room;

(6) a garage;

(7) any living space that is normally used for other than sleeping arrangements; or

(8) any room that provides routine passage to a

common use room, to another bedroom, or to the outdoors.

(b) Each licensee shall ensure that each bedroom used for sleeping by a child in foster care meets the following requirements:

(1) Each bedroom shall have at least 70 square feet.

(2) Each bedroom shall have at least 45 square feet for each individual sharing the room.

(3) The exit path from each bed to each outside exit shall have a minimum ceiling height of six feet eight inches.

(4) Each bedroom shall have a solid door to ensure privacy.

(5) Each bedroom shall have at least two means of escape. Each means of escape shall be easily opened from the inside.

(A) At least one means of escape shall be an unobstructed pathway leading to an exit door to the outside.

(B) The second means of escape shall give direct access to the outside and shall be an unobstructed door or window that is able to be opened from the inside without the use of tools.

(C) For each window used as a means of escape, all of the following requirements shall be met:

(i) The window shall have a width of at least 20 inches and a height of at least 24 inches.

(ii) The window shall be within 44 inches of the floor or shall have permanent steps or another immovable fixture that brings the window to within 44 inches of the top of the steps or fixture.

(iii) If the window is screened, the screen shall be easily removed from the inside.

(iv) The licensee shall ensure that each occupant of the bedroom can easily exit through the window.

(D) If one means of escape is a sliding glass door, the door shall be easily opened from the inside.

(6) All false ceilings, curtains, drapes, or fabric used in decoration for ceilings or walls in each room used for sleeping shall be made of fire-rated materials.

(c) Privacy for the occupants of all bedrooms shall be ensured.

(d) Each child in foster care shall have a separate bed or crib that meets the following requirements:

(1) Is intact, fully functional, and in good repair to prevent injury or entrapment of the child;

(2) is of sufficient size to accommodate the size and weight of the child;

(3) has a mattress that is clean and has a waterproof covering, if needed; and

(4) has bedding adequate to the season and appropriate to the age of the child.

(e) Each bed that requires bed springs shall have springs in good condition.

(f) If a bunk bed is used by any child in foster care, the following requirements shall be met:

(1) The upper bunk shall be protected on all sides with rails. Headboards and footboards may substitute for rails on the ends of the bed.

(2) Each child in foster care using the upper bunk shall be at least six years of age.

(g) No rollaway bed, hideaway bed, or other temporary bed shall be used, except when children in foster care are visiting in the family foster home for a social event or for short-term respite care.

(h) Each child in foster care less than 12 months of age shall sleep in a crib. For the purposes of a nap, the child may sleep in a playpen. Each crib and each playpen shall meet the following requirements:

(1) If a crib or playpen is slatted, the slats shall be spaced no more than $2\frac{3}{8}$ inches apart.

(2) Each crib shall have a firm mattress fitted so that no more than two fingers can fit between the mattress and the crib side when the mattress is set in the lowest position.

(3) The crib corner post extensions shall not exceed $1\frac{1}{16}$ inch.

(4) When the crib is in use, the drop side of the crib shall be secured in the up position.

(5) No pillow, quilt, comforter, blanket, bumpers, or other soft product that could cause suffocation shall be used in the crib or the playpen when a child who is less than 12 months of age is sleeping in the crib or playpen.

(i) Each child in foster care who is less than 12 months of age shall be put to sleep on the child's back unless ordered otherwise by the child's physician. If the child in foster care is able to turn over independently, that child shall be placed on the child's back but then shall be allowed to remain in a position preferred by the child.

(j) Each child in foster care 12 months and older may sleep in a crib until that child is 18 months of age or until the child is of such height that the upper rail of the crib is at the child's breast level when the child is standing and the crib mattress is at the lowest level.

(k) Each child in foster care 18 months but not yet 30 months of age may sleep in a crib when prescribed by that child's physician.

(l) At night each caregiver shall sleep within hearing distance of the child in foster care.

(m) When any child in foster care five years of age or older shares a room, the following requirements shall be met:

(1) The child shall share the room only with children of the same sex.

(2) The children sharing the room shall be age-mates, unless the following requirements have been met:

(A) The licensee shall notify the family foster home's sponsoring child-placing agency of the proposed sleeping arrangement.

(B) The licensee shall request that the sponsoring child-placing agency and the child's placing agent determine if the proposed sleeping arrangement is appropriate.

(C) The licensee shall maintain documentation of the approval of the sponsoring child-placing agency for the sleeping arrangement.

(3) A child who is known to be a sexual perpetrator or a sexual abuse victim shall not share a room until the following conditions are met:

(A) The potential roommate arrangements are assessed by the child's placing agent, the home's sponsoring child-placing agency, and the licensee; and

(B) based on the assessment, a determination is made by the child's placing agency that it is unlikely that further sexual abuse will result from the child sharing a room.

(n) If any child in foster care under five years of age shares a room with any other child, all of the children sharing the room shall be age-mates or shall be under five years of age. The children sharing the room may be of the opposite sex if all of the children are under five years of age.

(o) A child in foster care who is a parent may share a room with the parent's own child or children. The room shall meet the requirements in paragraph (b)(2).

(p) A child in foster care may sleep in the bedroom of the licensee under any of the following circumstances:

(1) The child in foster care is less than 12 months of age.

(2) The child in foster care is ill.

(3) The child in foster care has special developmental or medical needs requiring close supervision as documented by a physician.

(q) If a child in foster care sleeps in the licensee's bedroom, the bedroom shall have at least 130 square feet.

(r) Each licensee shall ensure that separate and accessible drawer space for personal belongings and closet space for clothing are available for each child in foster care. (Authorized by and implementing K.S.A. 2012 Supp. 65-508; effective March 28, 2008; amended Sept. 6, 2013.)

28-4-822. Safety procedures; emergency plan; drills. (a) Each licensee shall make the following preparations for emergencies:

(1) Each licensee shall ensure that a telephone and emergency information are available as specified in K.A.R. 28-4-820.

(2) Each licensee shall develop an emergency plan for the family foster home to provide for the safety of all residents of the home in emergencies including fires, tornadoes, storms, floods, and serious injuries.

(3) Each emergency plan shall be posted in a conspicuous place in the family foster home.

(4) Each licensee and each individual providing care in the family foster home shall be informed of and shall follow the emergency plan.

(b) Each licensee shall ensure that prior arrangements are made at a hospital or clinic for emergency treatment for each child in foster care and shall ensure that all medical and surgical consent forms are acceptable to the hospital or clinic.

(c) If the child in foster care is taken to the hospital or clinic for emergency treatment, each licensee shall ensure that the child's health assessment forms and the medical and surgical consent forms are taken to the hospital or clinic.

(d) If a caregiver accompanies a child in foster care to the source of emergency care, that caregiver shall remain with the child. Each licensee shall ensure that an arrangement is made and followed to ensure supervision of the other children in the family foster home if a child requires emergency care.

(e) Each licensee shall ensure that a fire drill is conducted monthly and that the drills are scheduled to allow participation by each family member and child in foster care. The date and time of each drill shall be recorded and kept on file in the family foster home.

(f) Each licensee shall ensure that a tornado drill is conducted monthly during April through September and that the drill is scheduled to allow participation by each resident of the family foster home. The date and time of each drill shall be recorded and kept on file in the family foster home. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-823. Outside premises. Each licensee shall ensure that all of the following requirements are met:

(a) General safety.

(1) The outside premises of the home shall be free from any objects, materials, and conditions that constitute a danger to the health or safety of each child in foster care.

(2) No child less than six years of age shall have unsupervised access to either of the following:

(A) A fish pond or a decorative pool containing water 24 inches deep or less; or

(B) any safety hazard specified in subsection (d).

(b) Outdoor play area.

(1) The play area shall be located, arranged, and maintained to allow for supervision by the caregiver and to reduce the risk of injury.

(2) The play area shall be well drained and free of known health, safety, and environmental hazards.

(3) Play equipment shall be located in an area free from hazards, be age-appropriate, and be in good repair. The play equipment shall be placed far enough away from potential hazards, including trees, structures, fences, and power lines, to minimize the risk of injury while the play equipment is in use. Equipment that is broken, hazardous, or unsafe shall not be used. Swings and climbing equipment shall be anchored and shall not be used over hard-surfaced materials, including asphalt, concrete, and bare, hard-packed dirt.

(c) Trampolines. Trampolines shall be prohibited on the premises of the family foster home.

(d) Protection from safety hazards.

(1) Each licensee shall ensure that each child in foster care is protected from all safety hazards adjacent to or within 50 yards of the house, as follows:

(A) A busy street;

(B) railroad tracks; or

(C) a water hazard, including a ditch, a pond, a lake, and any standing water over 24 inches deep.

(2) The licensee shall develop and follow a written outdoor safety plan before a child in foster care is allowed to be outdoors in an unfenced area of the family foster home. The plan shall be approved by the sponsoring child-placing agency and shall include all of the following:

(A) A description of any safety hazard and of any natural or man-made barrier separating the area from the safety hazard;

(B) the approximate distance from the unfenced area to each safety hazard;

(C) a description of the provisions made for increased supervision; and

(D) a requirement for a caregiver to be outdoors with each child in foster care less than six years of age. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-824. Swimming pools, wading pools, and hot tubs; off-premises swimming and wading activities. (a) General safety on the premises of the family foster home.

(1) If any swimming pool or wading pool with water over 12 inches deep or any hot tub is on the premises, the pool or tub shall be constructed, maintained, and used in such a manner that safeguards the lives and health of the children in foster care.

(2) If children in foster care have access to a swimming pool, wading pool, or hot tub, at least one adult shall be physically present and shall directly supervise the children. A minimum ratio of one adult to six children, including children in foster care, shall be maintained.

(3) Each licensee shall post legible safety rules for the use of a swimming pool or hot tub in a conspicuous location. If the pool or hot tub is available for use, the licensee shall read and review the safety rules weekly with each child in foster care.

(b) Swimming pools on the premises.

(1) Each in-ground swimming pool shall be enclosed by a fence at least five feet high. Each gate in the fence shall be kept locked and shall be self-locking. The wall of a house or other building containing a window designed to open or a door shall not be used in lieu of a fence.

(2) Each aboveground swimming pool shall be at least four feet high or shall be enclosed by a fence at least five feet high with a gate that is kept closed and is self-locking. Steps shall be removed and stored away from the pool when the pool is not in use. Each aboveground pool with a deck or berm that provides a ground-level entry on any side shall be treated as an in-ground pool.

(3) Sensors or pool covers shall not be used in lieu of a fence.

(4) The pH of the water in the swimming pool shall be maintained between 7.2 and 8.2. The available chlorine content shall be between 0.4 and 3.0 parts per million. The pool shall be cleaned daily, and the chlorine level and pH level shall be tested before each use. The results of these tests shall be recorded and available if requested.

(5) An individual with a life-saving certificate or an individual with training in CPR who can swim shall be in attendance while any child in foster care is using a swimming pool.

(6) Each swimming pool more than six feet in width, length, or diameter shall be provided with a ring buoy and rope or with a shepherd's hook. The equipment shall be of sufficient length to reach the center of the pool from each edge of the pool.

(c) Wading pools on the premises.

(1) No child in foster care shall be permitted to play without adult supervision in any area where there is a wading pool containing water.

(2) The water in each wading pool shall be emptied daily.

(d) Hot tubs on the premises.

(1) Each hot tub shall be covered when not in use with an insulated, rigid cover secured by locks or surrounded by a fence that meets the requirements of paragraph (b)(1).

(2) The chlorine and pH levels shall be tested and maintained as required by the manufacturer's specifications for use.

(3) Each licensee shall ensure that no child in foster care less than four years of age uses a hot tub. Each licensee shall ensure that each child in foster care four years of age and older is permitted to use the hot tub only in accordance with the manufacturer's specifications and recommendations for use.

(e) General safety off the premises of the family foster home. Any child in foster care who knows how to swim and who is at least six years of age may be permitted to swim in ponds, lakes, rivers, and other natural bodies of water that are approved for swimming by the county health department, the Kansas department of health and environment, or the designated authority in the state in which the swimming site is located.

(1) Each licensee shall ensure that each child in foster care while wading, swimming, or involved in other activities near, in, or on a pond, lake, river, or other natural body of water is directly supervised by a designated adult.

(2) Each child in foster care who is a nonswimmer or who is less than six years of age shall wear a safety vest certified by the manufacturer as appropriate for the child's age and weight specifications, when wading or playing near a pond, lake, river, or other natural body of water or when boating.

(3) Each caregiver shall review boating and

swimming safety rules with each child in foster care before the activity and shall be responsible for enforcing the safety rules.

(4) If a certified lifeguard is not on duty, an individual with a life-saving certificate or training in CPR who can swim shall be in attendance. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

28-4-825. Animals. (a) Each licensee shall ensure that when any animal is kept on the premises, the pet area is kept clean, with no evidence of flea, tick, or worm infestation in the area.

(b) Each licensee shall ensure that each animal that is in contact with any child in foster care meets the following requirements:

(1) Is in good health, with no evidence of disease; and

(2) is friendly and poses no threat to the health, safety, and well-being of children.

(c) Each domesticated dog and each domesticated cat shall have a current rabies vaccination that is given by a veterinarian or given under the direct supervision of a veterinarian.

(d) A record of each current rabies vaccination shall be kept on file in the family foster home, and a copy shall be supplied to the sponsoring child-placing agency.

(e) If any animal that represents a hazard to children is on the premises, each child in foster care shall be protected from that animal.

(f) Pit bulls, exotic animals, and venomous or constricting reptiles shall not be kept or brought on to the family foster home premises. (Authorized by and implementing K.S.A. 65-508; effective March 28, 2008.)

PSYCHIATRIC RESIDENTIAL TREATMENT FACILITIES (PRTF)

28-4-1200. Definitions. For the purposes of K.A.R. 28-4-1200 through K.A.R. 28-4-1218, the following definitions shall apply: (a) "Administrator" means a person employed by a PRTF who is responsible for the overall administration of the PRTF.

(b) "Applicant" means a person who has applied for a license but who has not yet been granted a license to operate a PRTF. This term shall include an applicant who has been granted a temporary permit to operate a PRTF.

(c) "Basement" means each area in a building with a floor level more than 30 inches below ground level on all sides.

(d) “Department” means the Kansas department of health and environment.

(e) “Direct care staff” means the staff members employed by the PRTF to supervise the residents.

(f) “Exception” means a waiver of compliance with a specific PRTF regulation or any portion of a specific PRTF regulation that is granted by the secretary to an applicant or a licensee.

(g) “Individual plan of care” means a written, goal-oriented treatment plan and therapeutic activities designed to move the resident to a level of functioning consistent with living in a community setting.

(h) “Licensee” means a person who has been granted a license to operate a PRTF.

(i) “Program” means the comprehensive and coordinated activities and services providing for the care and treatment of residents.

(j) “Program director” means the staff person responsible for the oversight and implementation of the program.

(k) “Psychiatric residential treatment facility” and “PRTF” mean a residential facility for which the applicant or licensee meets the requirements of K.A.R. 28-4-1201.

(l) “Resident” means an individual who is at least six years of age but not yet 22 years of age and who is accepted for care and treatment in a PRTF.

(m) “Resident record” means any electronic or written document concerning a resident admitted to a PRTF that is created or obtained by an employee of the PRTF.

(n) “Restraint” means the application of physical force or any mechanical devices or the administration of any drugs for the purpose of restricting the free movement of a resident’s body.

(o) “Seclusion” means the involuntary confinement of a resident in a separate or locked room or an area from which the resident is physically prevented from leaving.

(p) “Secretary” means the secretary of the Kansas department of health and environment.

(q) “Treatment” means comprehensive, individualized, goal-directed, therapeutic services provided to residents. (Authorized by K.S.A. 65-508 and 65-510; implementing K.S.A. 65-503 and 65-508; effective Oct. 9, 2009.)

28-4-1201. License requirements. (a) Each applicant and each licensee shall meet all of the following requirements in order to obtain and maintain a license to operate a PRTF:

(1) The state and federal participation requirements for medicaid reimbursement;

(2) receipt of accreditation of the PRTF by one of the following accrediting organizations:

(A) Council on accreditation of rehabilitation facilities (CARF);

(B) council on accreditation of child and family agencies (COA);

(C) the joint commission or the joint commission on accreditation of healthcare organizations (JCAHO); or

(D) an accrediting body approved by the Kansas health policy authority (KHPA), the Kansas department of social and rehabilitation services (SRS), and the Kansas juvenile justice authority (JJA); and

(3) receipt of approval of the PRTF by the Kansas department of social and rehabilitation services as meeting the state requirements.

(b) Each applicant and each licensee, if a corporation, shall be in good standing with the Kansas secretary of state.

(c) Each applicant and each licensee shall maintain documentation of compliance with all applicable building codes, fire safety requirements, and zoning codes. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504 and 65-508; effective Oct. 9, 2009.)

28-4-1202. Application procedures. (a) Each person, in order to obtain a license, shall submit a complete application on forms provided by the department. The application shall be submitted at least 90 calendar days before the planned opening date of the PRTF and shall include the following:

(1) A description of the program and services to be offered, including the following:

(A) A statement of the PRTF’s purpose and goals; and

(B) the number, ages, and gender of residents for whom the PRTF is designed;

(2) the anticipated opening date;

(3) a request for the background checks for staff members and volunteers specified in K.A.R. 28-4-1205;

(4) documentation of compliance with the license requirements in K.A.R. 28-4-1201; and

(5) the license fee specified in K.A.R. 28-4-92.

(b) Each applicant shall notify the school district where the PRTF is to be located of the following:

(1) The planned opening date and the number,

age range, gender, and anticipated special education needs of the residents to be served;

(2) a statement indicating whether the residents will attend public school or will receive educational services on-site at the PRTF; and

(3) documentation that the notification was received by the school district at least 90 days before the planned opening date.

The 90-day notification to the local school district may be waived by the secretary upon receipt of a written agreement by the local school district.

(c) Each applicant shall submit to the department floor plans for each building that will be used as a PRTF. Each floor plan shall state whether or not any building will rely on locked entrances and exits or on delayed-exit mechanisms to secure the PRTF. Each applicant wanting to use delayed-exit mechanisms or to use hardware to lock or otherwise secure the exits shall obtain and shall submit to the department prior written approval from the Kansas state fire marshal, the Kansas department of social and rehabilitation services, the Kansas juvenile justice authority, and the Kansas health policy authority.

(d) Each applicant shall provide the department with a copy of the approval of the Kansas state fire marshal's office for the floor plan and the use of any delayed-exit mechanism or hardware to lock or otherwise secure the exits before a license is issued.

(e) The granting of a license to any applicant may be refused by the secretary if the applicant is not in compliance with the requirements of the following:

(1) K.S.A. 65-504 through 65-508 and amendments thereto;

(2) K.S.A. 65-512 and 65-513 and amendments thereto;

(3) K.S.A. 65-516 and amendments thereto;

(4) K.S.A. 65-531 and amendments thereto; and

(5) all regulations governing psychiatric residential treatment facilities. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-504, 65-505, and 65-508 and K.S.A. 2008 Supp. 65-516; effective Oct. 9, 2009.)

28-4-1203. Capacity; posting requirements; validity of temporary permit or license; new application required; advertising; closure.

(a) Capacity. The maximum number, the age range, and the gender of residents authorized by the temporary permit or license shall not be exceeded.

(b) Posting requirements. The current temporary permit or the current license shall be posted conspicuously within the PRTF.

(c) Validity of temporary permit or license. Each temporary permit or license shall be valid only for the applicant or licensee and for the address specified on the temporary permit or the license. When an initial or amended license becomes effective, all temporary permits or licenses previously granted to the applicant or licensee at the same address shall become void.

(d) New application required. A new application and the fee specified in K.A.R. 28-4-92 shall be submitted for each change of ownership or location at least 90 calendar days before the planned change.

(e) Advertising. The advertising for each PRTF shall conform to the statement of services as given on the application. A claim for specialized services shall not be made unless the PRTF is staffed and equipped to offer those services.

(f) Closure. Any applicant may withdraw the application for a license. Any licensee may submit, at any time, a request to close the PRTF operated by the licensee. If an application is withdrawn or a PRTF is closed, the current temporary permit or license granted to the applicant or licensee for that PRTF shall become void. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504, 65-505, and 65-508; effective Oct. 9, 2009.)

28-4-1204. Licensure; renewal; notifications; exceptions; amendments. (a) No person shall operate a PRTF unless issued a temporary permit or a license by the secretary.

(b) No earlier than 90 days before the renewal date but no later than the renewal date, each licensee who wishes to renew the license shall complete and submit an application for renewal on forms provided by the department, including the requests for background checks specified in K.A.R. 28-4-1205, and shall submit the fee specified in K.A.R. 28-4-92.

(c) Failure to submit the renewal application and fee as required by subsection (b) shall result in an assessment of a late renewal fee pursuant to K.S.A. 65-505, and amendments thereto, and may result in closure of the PRTF.

(d) Each licensee shall notify the department within 24 hours of any change in approval or accreditation required in K.A.R. 28-4-1201.

(e) Any applicant or licensee may request an exception from the secretary.

(1) Any request for an exception may be granted if the secretary determines that the exception is in the best interest of one or more residents or the

family of a resident and the exception does not violate statutory requirements.

(2) Written notice from the secretary stating the nature of each exception and its duration shall be kept on file at the PRTF and shall be readily accessible to the department, SRS, and JJA.

(f) Each licensee shall obtain the secretary's written approval before making any change in any of the following:

(1) The use or proposed use of the buildings;

(2) any changes to the physical structure of any building, including the following:

(A) An addition or alteration as specified in K.A.R. 28-4-1215;

(B) any change in the use of locked entrances or exits; and

(C) any change in any delayed-exit mechanisms;

(3) the addition or removal of a locking system for any room used for seclusion, as specified in K.A.R. 28-4-1212; or

(4) the program, provided through either of the following:

(A) Direct services; or

(B) agreements with specified community resources.

(g) Any licensee may submit a written request for an amended license.

(1) Each licensee who intends to change the terms of the license, including the maximum number, the age range, or the gender of residents to be served, shall submit a request for an amendment on a form provided by the department and a nonrefundable amendment fee of \$35. An amendment fee shall not be required if the request to change the terms of the license is made at the time of the renewal.

(2) Each request for a change in the maximum number, the age range, or the gender of residents to be served shall include written documentation of the notification to the school district where the PRTF is located, as specified in K.A.R. 28-4-1202.

(3) The licensee shall make no change to the terms of the license, including the maximum number of residents, the age range of residents to be served, the gender of residents, and the type of license, until an amendment is granted, in writing, by the secretary. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504, 65-505, and 65-508 and K.S.A. 2008 Supp. 65-516; effective Oct. 9, 2009.)

28-4-1205. Background checks. (a) With each initial application or renewal application, each applicant or licensee shall submit a request

to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department of social and rehabilitation services in order to comply with the provisions of K.S.A. 65-516, and amendments thereto. Each request shall be submitted on a form provided by the department. The request shall list the required information for each individual 10 years of age and older who will be residing, working, or regularly volunteering in the PRTF.

(b) Each licensee shall submit a request to the department to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department of social and rehabilitation services before each new individual begins residing, working, or regularly volunteering in the PRTF.

(c) A copy of each request for a background check shall be kept on file at the PRTF.

(d) Residents admitted into a PRTF for care and treatment shall not be considered to be residing in the PRTF for the purposes of background checks. (Authorized by K.S.A. 65-508; implementing K.S.A. 2008 Supp. 65-516; effective Oct. 9, 2009.)

28-4-1206. Administration. (a) Each PRTF shall be governed by one of the following entities:

(1) A public agency, which shall employ an administrator for the PRTF; or

(2) a private entity with a governing board that is legally responsible for the operation, policies, finances, and general management of the PRTF. The private entity shall employ an administrator for the PRTF. The administrator shall not be a voting member of the governing board.

(b) Each licensee shall develop and implement written policies and procedures for the operation of the PRTF that shall include detailed descriptions of the roles and the responsibilities for staff and volunteers. The staff practices shall conform to the written policies and procedures and to all regulations governing PRTFs.

(c) A licensee or a staff member of a PRTF shall not accept permanent legal guardianship of any individual before the individual is admitted to the PRTF or while the individual is in treatment at the PRTF.

(d) A copy of the regulations governing PRTFs shall be kept on the premises at all times and shall be made available to all staff members.

(e) Each licensee shall make available to the department all reports and findings of on-site surveys, periodic performance reviews, monitoring

visits, and accreditation reports by the PRTF's accrediting body.

(f) Each licensee shall have sufficient finances to ensure the provision of program activities and services to each resident. Each licensee shall provide the financial resources necessary to maintain compliance with these regulations.

(g) Each resident's personal money shall be kept separate from the PRTF's funds. Each licensee shall maintain financial records of each resident's personal money. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1207. Staff requirements. (a) Each individual working or volunteering in a PRTF shall be qualified by temperament, emotional maturity, judgment, and understanding of residents necessary to maintain the health, comfort, safety, and welfare of individuals placed in psychiatric residential treatment facilities.

(b) Each food service staff member shall demonstrate compliance with all of the following requirements through ongoing job performance:

(1) Knowledge of the nutritional needs of residents;

(2) understanding of quantity food preparation and service;

(3) sanitary food handling and storage methods;

(4) willingness to consider individual, cultural, and religious food preferences of the residents; and

(5) willingness to work with the program director in planning learning experiences for residents about nutrition. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1208. Records. Each licensee shall develop and implement written policies and procedures that address PRTF recordkeeping requirements, including resident records, personnel records, and general records. (a) Resident records. Each licensee shall maintain an individual record for each resident, which shall include the following information:

(1) A health record that meets the requirements in K.A.R. 28-4-1211;

(2) a copy of each written report of any incidents involving the resident and specified in K.A.R. 28-4-1209 and K.A.R. 28-4-1214;

(3) documentation of each use of seclusion for the resident; and

(4) a financial record of the resident's personal money as specified in K.A.R. 28-4-1206.

(b) Personnel records. Each licensee shall maintain an individual personnel record for each staff member, which shall include the following information:

(1) A health record that meets the requirements in K.A.R. 28-4-1211, including a record of the results of any health examinations and tuberculin tests;

(2) the staff member's current job responsibilities;

(3) documentation that the staff member has read, understands, and agrees to all of the following:

(A) The statutes and regulations regarding the mandatory reporting of suspected child abuse, neglect, and exploitation;

(B) all regulations governing PRTFs; and

(C) the PRTF's policies and procedures applicable to the job responsibilities of the staff member; and

(4) a copy of a valid driver's license of a type appropriate for the vehicle being used, for any staff member who transports any resident.

(c) Volunteer records. Each licensee shall maintain an individual record for each volunteer of the PRTF, which shall include the following information:

(1) A health record that meets the requirements in K.A.R. 28-4-1211, including a record of the results of any health examinations and tuberculin tests, for each volunteer in contact with residents; and

(2) a copy of a valid driver's license of a type appropriate for the vehicle being used, for any volunteer who transports any resident.

(d) General records. Each licensee shall ensure that general records are completed and maintained, which shall include the following:

(1) Documentation of the requests submitted to the department for the purpose of background checks for each staff member and volunteer in order to comply with the provisions of K.S.A. 65-516, and amendments thereto;

(2) documentation of notification to the school district;

(3) documentation of each approval granted by the secretary for any change, exception, or amendment as specified in K.A.R. 28-4-1204 and K.A.R. 28-4-1215;

(4) the policies and procedures of the PRTF;

(5) all reports and findings of on-site visits, periodic performance reviews, monitoring visits to determine compliance with PRTF regulations

and standards, and any accreditation reports by the PRTF's accrediting body;

(6) all written reports of the following:

(A) All incidents or events specified in K.A.R. 28-4-1209 and K.A.R. 28-4-1214; and

(B) the use of restraint or seclusion;

(7) all documentation specified in K.A.R. 28-4-1218 for transporting residents;

(8) all documentation specified in K.A.R. 28-4-1212 for the locking systems for the door of each room used for seclusion, including documentation of the state fire marshal's approval;

(9) all documentation specified in K.A.R. 28-4-1214 for emergency plans, fire and tornado drills, and written policies and procedures on the security and control of the residents;

(10) all documentation specified in K.A.R. 28-4-1214 for the inspection and the maintenance of security devices, including locking mechanisms and any delayed-exit mechanisms on doors;

(11) documentation of approval of any private water or sewage systems as specified in K.A.R. 28-4-1215; and

(12) documentation of vehicle and liability insurance for each vehicle used by the PRTF to transport residents as specified in K.A.R. 28-4-1218. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508 and K.S.A. 2008 Supp. 65-516; effective Oct. 9, 2009.)

28-4-1209. Notification and reporting requirements. (a) Each licensee shall ensure that the following notifications are submitted verbally or in writing upon discovery of the incident or event, but no later than 24 hours after the discovery:

(1) Each instance of suspected abuse or neglect of a resident shall be reported to the Kansas department of social and rehabilitation services or to law enforcement.

(2) Each incident resulting in the death of any resident shall be reported to the following:

(A) Law enforcement;

(B) the department;

(C) the parent or guardian of the resident;

(D) the resident's placing agent;

(E) the state medicaid agency;

(F) the Kansas department of social and rehabilitation services; and

(G) the state-designated protection and advocacy entity.

(3) Each incident resulting in the death of a staff member while on duty at the PRTF shall be

reported to the department and to any other entities according to the policies of the PRTF.

(4) Each incident resulting in a serious injury to any resident, including burns, lacerations, bone fractures, substantial hematomas, and injuries to internal organs, shall be reported to the following:

(A) The department;

(B) the county health department in which the PRTF is located;

(C) the parent or legal guardian of any resident involved in the incident;

(D) the placing agent of any resident involved in the incident;

(E) the state medicaid agency;

(F) the Kansas department of social and rehabilitation services; and

(G) the state-designated protection and advocacy entity.

(5) Each incident of suspected sexual assault involving a resident as a victim or as a perpetrator shall be reported to the following:

(A) Law enforcement;

(B) the Kansas department of social and rehabilitation services;

(C) the parent or legal guardian of the resident;

(D) the resident's placing agent; and

(E) the department.

(6) Each suicide attempt by a resident shall be reported to the following:

(A) The department;

(B) the resident's placing agent;

(C) the parent or guardian of the resident;

(D) the state medicaid agency;

(E) the Kansas department of social and rehabilitation services; and

(F) the state-designated protection and advocacy entity.

(7) Each natural disaster shall be reported to the department.

(8) Each instance of work stoppage shall be reported to the department.

(9) Each incident that involves a riot or the taking of hostages shall be reported to the department.

(10) Each fire shall be reported to the department and to the state fire marshal.

(11) Each incident that involves any suspected illegal act committed by a resident while in the PRTF or by a staff member while on duty at the PRTF shall be reported to law enforcement in accordance with the policies of the PRTF.

(12) If any resident, staff member, or volunteer of the PRTF contracts a reportable infectious or

contagious disease specified in K.A.R. 28-1-2, the licensee shall ensure that a report is submitted to the local county health department within 24 hours, excluding weekends and holidays.

(b) Each licensee shall complete a written report within five calendar days of the discovery of any incident or event identified in subsection (a). (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1210. Admission requirements. (a) No individual less than six years of age shall be admitted to a PRTF. No individual 21 years of age or older shall be admitted to a PRTF as a new resident, but any current resident may continue to receive treatment until that resident reaches 22 years of age.

(b) Each individual who shows evidence of being physically ill, injured, or under the influence of alcohol or drugs shall be assessed in accordance with the PRTF's policies and procedures to determine the appropriateness of admission and any need for immediate medical care. (Authorized by and implementing K.S.A. 65-508 and 65-510; effective Oct. 9, 2009.)

28-4-1211. Health care. (a) Policies for resident health care. Each licensee, in consultation with a physician, shall develop written policies that include provisions for the following:

(1) A health checklist and review for each resident upon admission, including the following:

(A) Current physical, including oral, health status;

(B) any allergies, including medication, food, and plant;

(C) any current pain, including cause, onset, duration, and location;

(D) preexisting medical conditions;

(E) current mood and affect;

(F) any current suicidal thoughts and history of suicide attempts;

(G) any infectious or contagious diseases;

(H) documentation of current immunizations or documentation of an exemption for medical or religious reasons as specified in K.A.R. 28-1-20;

(I) any drug or alcohol use;

(J) any current medications;

(K) any physical disabilities;

(L) menstrual history, if applicable;

(M) any sexually transmitted disease; and

(N) any history of pregnancy;

(2) follow-up health care, including a health as-

essment and referrals for any concerns identified in the health checklist and review;

(3) if medically indicated, chronic care, convalescent care, and preventive care;

(4) care for minor illness, including the use and administration of prescription and nonprescription drugs;

(5) care for residents under the influence of alcohol or other drugs;

(6) consultation regarding each individual resident, if indicated;

(7) infection control measures and universal precautions to prevent the spread of blood-borne infectious diseases, including medically indicated isolation; and

(8) maternity care as required by K.A.R. 28-4-279.

(b) Physical health of residents at admission and throughout placement. Each licensee shall maintain a health record for each resident to document the provision of health services, including dental services.

(1) Each licensee shall ensure that a health checklist is completed for each resident at the time of admission by the individual who admits the resident. The health checklist shall serve as a guide to determine if a resident is in need of medical or dental care and to determine if the resident is using any prescribed medications.

(2) Each licensee shall ensure that the PRTF's physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or an advanced registered nurse practitioner (ARNP) operating under a written protocol as authorized by a responsible physician and operating under the ARNP's scope of practice is contacted for any resident who is taking a prescribed medication at the time of admission, to assess the need for continuation of the medication.

(3) Each change of prescription or directions for administering a prescription medication shall be ordered by the authorized medical practitioner with documentation placed in the resident's record. Prescription medications shall be administered only to the designated resident as ordered by the authorized medical practitioner.

(4) Each licensee shall ensure that a physician, a physician's assistant operating under a written protocol as authorized by the responsible physician, or an ARNP operating under a written protocol as authorized by a responsible physician and operating within the ARNP's scope of practice is contacted for any resident who has acute symptoms of illness or who has a chronic illness.

(5) Within 72 hours of admission, a physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or a nurse approved to conduct screening and health assessments shall review the health checklist. Based upon health indicators derived from the checklist or in the absence of documentation of a screening within the past 24 months, the reviewing physician, physician's assistant, or nurse shall determine whether or not a full screening and health assessment are necessary. If a full screening and health assessment are necessary, the following requirements shall be met:

(A) The screening and health assessment shall be conducted by a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or a nurse approved to conduct these examinations.

(B) The screening and health assessment shall be completed within 10 days of admission.

(6) Each licensee shall ensure that each resident receives a screening for symptoms of tuberculosis. A Mantoux test, a tuberculin blood assay test, or a chest X-ray shall be required if any of the following occurs:

(A) The resident has a health history or shows symptoms compatible with tuberculosis.

(B) The location of the PRTF is in an area identified by the local health department or the secretary as a high-risk area for tuberculosis exposure.

(C) Significant exposure to an active case of tuberculosis occurs, or symptoms compatible with tuberculosis develop.

(D) If there is a positive reaction to the diagnostic procedures, proof of proper treatment or prophylaxis shall be required. Documentation of the test, X-ray, or treatment results shall be kept on file in the resident's health record, and the county health department shall be informed of the results.

(7) Each licensee shall ensure that written policies and procedures prohibit the use of tobacco in any form by any resident while in care.

(c) Oral health of residents. Each licensee shall ensure that the following requirements are met:

(1) Dental care shall be available for all residents.

(2) Each resident who has not had a dental examination within the year before admission to the PRTF shall have a dental examination no later than 60 days after admission.

(3) Each resident shall receive emergency dental care as needed.

(4) Each licensee shall develop and implement a plan for oral health education and staff supervision of residents in the practice of good oral hygiene.

(d) Health record. Each licensee shall maintain a health record for each resident to document the provision of health services required in subsections (a), (b), and (c).

(e) Personal health and hygiene of residents.

(1) Each resident shall have access to drinking water, a lavatory, and a toilet.

(2) Each licensee shall ensure that each resident is given the opportunity to bathe upon admission and daily.

(3) Each licensee shall furnish each resident with toothpaste and a toothbrush.

(4) Each licensee shall ensure that each resident is given the opportunity to brush the resident's teeth after each meal.

(5) Each licensee shall make opportunities available to the residents for daily shaving and regular haircuts.

(6) Each resident's washable clothing shall be changed and laundered at least twice a week. Each licensee shall ensure that clean underwear and socks are available to each resident on a daily basis.

(7) Each female resident shall be provided personal hygiene supplies for use during her menstrual cycle.

(8) Each licensee shall ensure that clean, individual washcloths and bath towels are issued to each resident at least twice each week.

(9) Each licensee shall allow each resident to have at least eight hours of sleep each day.

(f) Personal health of staff members and volunteers of the PRTF.

(1) Each individual shall meet the following requirements:

(A) Be free from any infectious or contagious disease requiring isolation or quarantine as specified in K.A.R. 28-1-6;

(B) be free of any physical, mental, or emotional health conditions that would adversely affect the individual's ability to fulfill the responsibilities listed in the individual's job description and to protect the health, safety, and welfare of the residents; and

(C) be free from impaired ability due to the use of alcohol, prescription or nonprescription drugs, or other chemicals.

(2) Each individual who has contact with any resident or who is involved in food preparation

or service shall have received a health assessment within one year before employment. This assessment shall be conducted by a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or a nurse authorized to conduct these assessments.

(3) The results of each health assessment shall be recorded on forms provided by the department and shall be kept on file.

(4) A health assessment record may be transferred from a previous place of employment if the assessment occurred within one year before the individual's employment at the PRTF and if the assessment was recorded on the form provided by the department.

(5) The initial health examination shall include a screening for symptoms of tuberculosis. A Mantoux test, a tuberculin blood assay test, or a chest X-ray shall be required if any of the following occurs:

(A) The individual has a health history or shows symptoms compatible with tuberculosis.

(B) The PRTF is located in an area identified by the local health department or the secretary as a high-risk area for tuberculosis exposure.

(C) Significant exposure to an active case of tuberculosis occurs, or symptoms compatible with tuberculosis develop.

(D) If there is a positive reaction to any of the diagnostic procedures, proof of proper treatment or prophylaxis shall be required. Documentation of the test, X-ray, and treatment results shall be kept on file in the individual's health record, and the county health department shall be informed of the results.

(6) If an individual experiences a significant change in physical, mental, or emotional health, including any indication of substance abuse, an assessment of the individual's current health status may be required by the licensee or the secretary. A licensed health care provider qualified to diagnose and treat the condition shall conduct the health assessment. A written report of the assessment shall be kept in the individual's personnel record and shall be submitted to the secretary on request.

(g) Tobacco products shall not be used inside the PRTF. Tobacco products shall not be used by staff members or volunteers of the PRTF in the presence of residents. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective Oct. 9, 2009.)

28-4-1212. Health and safety requirements for the use of seclusion rooms. (a) Each licensee shall ensure that the following requirements are met for each room used for seclusion:

(1) The locking system shall be approved by the state fire marshal.

(2) No room used for seclusion shall be in a basement.

(3) Each door shall be equipped with a window mounted in a manner that allows inspection of the entire room.

(4) Each window in a room used for seclusion shall be impact-resistant and shatterproof.

(5) The walls shall be completely free of objects.

(6) A mattress shall be available, if needed. If a mattress is used, the mattress shall be clean and in good repair.

(b) No more than one resident shall be placed in a room used for seclusion at the same time.

(c) Before any resident is admitted to a room used for seclusion, all items that could be used to injure oneself or others shall be removed from the resident.

(d) Each resident shall be permitted to wear clothing necessary to maintain modesty and comfort at all times. Paper clothing may be substituted if a resident uses clothing for self-harm. Sheets, towels, blankets, and similar items shall not be substituted for clothing.

(e) Each resident shall receive all meals and snacks normally served and shall be allowed time to exercise and perform necessary bodily functions.

(f) Each resident shall have ready access to drinking water and bathroom facilities upon request. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1213. Library; recreation; work. (a) Library.

(1) Each licensee shall have written policies and procedures that govern the PRTF's library program, including acquisition of materials, hours of availability, and staffing.

(2) Library services shall be available to all residents.

(A) Reading and other library materials may be provided for use during non-library hours.

(B) The reading and library materials shall be age-appropriate and suitable for various levels of reading competency and shall reflect a variety of interests.

(b) Recreation.

(1) Each licensee shall ensure that indoor and outdoor recreational areas and equipment are provided where security and visual supervision can be maintained at all times. Unless restricted for health reasons or for inclement weather, all residents shall be allowed to engage in supervised indoor and outdoor recreation on a daily basis.

(2) Each licensee shall ensure that art and craft supplies, books, current magazines, games, and other indoor recreational materials are provided for leisure activities.

(c) Work.

(1) Work assignments shall not be used as a substitute for recreation.

(2) Residents shall be prohibited from performing any of the following duties:

(A) Personal services for the staff members;

(B) cleaning or maintaining areas away from the PRTF;

(C) replacing employed staff members; or

(D) any work experience classified as hazardous by the Kansas department of labor regulations governing child labor.

(d) Auxiliary staff members may supervise library, recreation, or work activities. Direct care staff shall be within visual and auditory distance to provide immediate support, if necessary. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1214. Emergency plan; drills; facility security and control of residents; storage and use of hazardous substances and unsafe items.

(a) Emergency plan. Each licensee shall develop an emergency plan to provide for the safety of all residents in emergencies, including fires, tornadoes, storms, floods, and serious injuries. The licensee shall review the plan at least annually and update it as needed.

(1) The emergency plan shall contain provisions for the care of residents in emergencies.

(2) Each licensee that permits the use of seclusion shall have a policy and procedure to evacuate each resident in seclusion if an emergency occurs.

(3) All of the staff members in the PRTF shall be informed of the emergency plan, which shall be posted in a prominent location.

(b) Fire and tornado drills. The PRTF staff shall conduct at least one fire drill and one tornado drill during each shift during each quarter. Drills shall be planned to allow participation by the residents in at least one fire drill and at least one tornado drill during each quarter.

(c) Facility security and control of residents. Each licensee shall develop and implement written policies and procedures that include the use of a combination of supervision, inspection, and accountability to promote safe and orderly operations. The policies and procedures shall prohibit the use of mace, pepper spray, and other chemical agents.

(1) All written policies and procedures for facility security and the control of residents shall be available to all staff members. Each licensee shall review the policies and procedures at least annually, update them as needed, and ensure that all of the requirements are met. These policies and procedures shall include all of the following requirements:

(A) Written operational shift assignments shall state the duties and responsibilities for each assigned position in the PRTF.

(B) Supervisory staff shall maintain a permanent log and prepare shift reports that record routine and emergency situations.

(C) All security devices, including locking mechanisms on doors and any delayed-exit mechanisms on doors, shall have current written approval from the state fire marshal and shall be regularly inspected and maintained, with any corrective action completed as necessary and recorded.

(D) No resident shall have access to any ammunition or weapons, including firearms and air-powered guns. If a licensee prohibits carrying a concealed weapon on the premises of the PRTF, the licensee shall post notice pursuant to K.S.A. 75-7c11, and amendments thereto.

(E) Procedures shall be developed and implemented for the control and use of keys, tools, medical supplies, and culinary equipment.

(F) No resident or group of residents shall exercise control or authority over another resident, have access to the records of another resident, or have access to or the use of keys that control security.

(G) Procedures shall be developed and implemented for knowing the whereabouts of all residents at all times and for handling runaways and unauthorized absences.

(H) Safety and security precautions pertaining to the PRTF and any staff vehicles used to transport residents shall be developed and implemented.

(2) Each licensee shall ensure the development of policies and procedures that govern documentation of all incidents, including riots, the taking of hostages, and the use of restraint.

(A) The policies and procedures shall require submission of a written report of all incidents to the program director no later than the conclusion of that shift. A copy of the report shall be kept in the record of each resident involved in the incident.

(B) Reports of incidents shall be made to document compliance with K.A.R. 28-4-1209.

(3) A written plan shall provide for continuing operations if a work stoppage occurs. A copy of this plan shall be available to each staff member.

(d) Storage and use of hazardous substances and unsafe items.

(1) No resident shall have unsupervised access to poisons, hazardous substances, or flammable materials. These items shall be kept in locked storage when not in use.

(2) Each licensee shall develop and implement policies and procedures for the safe and sanitary storage and distribution of personal care and hygiene items. The following items shall be stored in an area that is either locked or under the control of staff:

- (A) Aerosols;
- (B) alcohol-based products;
- (C) any products in glass containers; and
- (D) razors, blades, and any other sharp items.

(3) Each licensee shall develop and implement policies and procedures for the safe storage and disposal of prescription and nonprescription medications. All prescription and nonprescription medications shall be stored in a locked cabinet located in a designated staff-accessible and supervised area. All refrigerated medications shall be stored under all food items in a locked refrigerator, in a refrigerator in a locked room, or in a locked medicine box in a refrigerator. Medications taken internally shall be kept separate from other medications. All unused medications shall be accounted for and disposed of in a safe manner, including being returned to the pharmacy, transferred with the resident, or safely discarded.

(4) Each PRTF shall have first-aid supplies, which shall be stored in a locked cabinet located in a staff-accessible and supervised area. First-aid supplies shall include the following:

- (A) Assorted adhesive strip bandages;
- (B) adhesive tape;
- (C) a roll of gauze;
- (D) scissors;
- (E) a package of gauze squares;
- (F) liquid soap;
- (G) an elastic bandage;

(H) tweezers;

(I) rubbing alcohol; and

(J) disposable nonporous gloves in assorted sizes. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1215. Environmental standards. (a) General building requirements.

(1) Each licensee shall ensure that public water and sewage systems, where available, are used. If public water and sewage systems are not available, each licensee shall maintain approval by the appropriate health authorities for any private water and sewage systems that are used.

(2) A licensed architect shall be responsible for the plans for any newly constructed building or for any major addition or major alteration to an existing building.

(A) For a new building, preliminary plans and outline specifications, including plot plans, shall be submitted to the department for review before commencing the final working drawings and specifications. Each licensee shall submit the final working drawings, construction specifications, and plot plans to the department for review and written approval before the letting of contracts.

(B) For an addition or alteration to an existing building, each licensee shall submit a written statement defining the proposed use of the construction and detailing the plans and specifications to the department for review and written approval before commencing construction.

(3) If construction is not commenced within one year of submitting a proposal for a new building or an addition or alteration to an existing building, each licensee shall resubmit the plans and proposal to the department before proposed construction begins.

(b) Location and grounds requirements.

(1) Community resources, including health services, police protection, and fire protection from an organized fire department, shall be available.

(2) There shall be at least 100 square feet of outside activity space available for each resident allowed to utilize each outdoor area at any one time.

(3) The outside activity area shall be free of physical hazards.

(4) Sufficient space for visitor and staff parking at each PRTF shall be provided.

(c) Structural requirements and use of space. Each licensee shall ensure that the PRTF design, structure, interior and exterior environment, and

furnishings promote a safe, comfortable, and therapeutic environment for the residents.

(1) Each PRTF shall be accessible to and usable by persons with disabilities.

(2) Each PRTF's structural design shall facilitate personal contact and interaction between staff members and residents.

(3) Each sleeping room shall meet the following requirements:

(A) No resident's room shall be in a basement.

(B) The minimum square footage of floor space shall be 80 square feet in each room occupied by one resident. Each room occupied by more than one resident shall have at least 60 square feet of floor space for each resident. At least one dimension of the usable floor space unencumbered by furnishings or fixtures shall be at least seven feet.

(C) The minimum ceiling height shall be seven feet eight inches over at least 90 percent of the room area.

(D) An even temperature of between 68 degrees Fahrenheit and 78 degrees Fahrenheit shall be maintained, with an air exchange of at least four times each hour.

(E) Sleeping rooms occupied by residents shall have a window source of natural light. Access to a drinking water source and toilet facilities shall be available 24 hours a day.

(F) Separate beds with level, flat mattresses in good condition shall be provided for each resident. All beds shall be above the floor level.

(G) Clean bedding, adequate for the season, shall be provided for each resident. Bed linen shall be changed at least once a week or more frequently when soiled.

(4) Each sleeping room, day room, and classroom utilized by residents shall have lighting of at least 20 foot-candles in all parts of the room. There shall be lighting of at least 35 foot-candles in areas used for reading, study, or other close work.

(5) Adequate space for study and recreation shall be provided.

(6) Each living unit shall contain the following:

(A) Furnishings that provide sufficient seating for the maximum number of residents expected to use the area at any one time;

(B) writing surfaces that provide sufficient space for the maximum number of residents expected to use the area at any one time; and

(C) furnishings that are consistent with the needs of the residents.

(7) Each PRTF shall have adequate central

storage for household supplies, bedding, linen, and recreational equipment.

(8) If the PRTF is on the same premises as that of another licensed facility, the living unit of the PRTF shall be maintained in a separate, self-contained unit. Residents of the PRTF shall not use space shared with another licensed facility at the same time unless the plan for the use of space is approved, in writing, by the secretary and by SRS.

(9) If a PRTF has one or more day rooms, each day room shall provide space for a variety of resident activities. Day rooms shall be situated immediately adjacent to the residents' sleeping rooms, but separated from the sleeping rooms by a floor-to-ceiling wall. Each day room shall provide at least 35 square feet for each resident, exclusive of lavatories, showers, and toilets, for the maximum number of residents expected to use the day room area at any one time.

(10) Each room used for sports and other physical activities shall provide floor space equivalent to at least 100 square feet for each resident utilizing the room for those purposes at any one time.

(11) Sufficient space shall be provided for visitation between residents and nonresidents. The PRTF shall have space for the screening and search of both residents and visitors, if screening and search are included in the PRTF's policies and procedures. Private space shall be available for searches as needed. Storage space shall be provided for the secure storage of visitors' coats, handbags, and other personal items not allowed into the visitation area.

(12) A working telephone shall be accessible to staff members in all areas of the building. Emergency numbers, including those for the fire department, the police, a hospital, a physician, the poison control center, and an ambulance, shall be posted by each phone.

(13) A service sink and a locked storage area for cleaning supplies shall be provided in a room or closet that is well ventilated and separate from kitchen and living areas.

(d) Bathroom facilities.

(1) For each eight or fewer residents of each sex, at least one toilet, one lavatory, and either a bathtub or a shower shall be provided. All toilets shall be above floor level.

(2) Each bathroom shall be ventilated to the outdoors by means of either a window or a mechanical ventilating system, with a minimum of 10 air changes each hour.

(3) Toilet and bathing accommodations and drinking water shall be in a location accessible to sleeping rooms and living and recreation rooms.

(4) Drinking water and at least one bathroom shall be accessible to the reception and admission areas.

(5) Cold water and hot water not exceeding 120 degrees Fahrenheit shall be supplied to lavatories, bathtubs, and showers.

(6) Liquid soap, toilet paper, and paper towels shall be available in all bathroom facilities.

(e) Building maintenance standards.

(1) Each building shall be clean at all times and free from vermin infestation.

(2) The walls shall be smooth, easily cleanable, and sound. Lead-free paint shall be used on all painted surfaces.

(3) The floors and walking surfaces shall be kept free of hazardous substances at all times.

(4) The floors shall not be slippery or cracked.

(5) Each rug or carpet used as a floor covering shall be slip-resistant and free from tripping hazards. A floor covering, paint, or sealant shall be required over concrete floors for all buildings used by the residents.

(6) All bare floors shall be swept and mopped daily.

(7) A schedule for cleaning each building shall be established and maintained.

(8) Washing aids, including brushes, dish mops, and other hand aids used in dishwashing activities, shall be clean and used for no other purpose.

(9) Mops and other cleaning tools shall be cleaned and dried after each use and shall be hung on racks in a well-ventilated place.

(10) Pesticides and any other poisons shall be used in accordance with the product instructions. These substances and all other poisons shall be stored in a locked area.

(11) Toilets, lavatories, sinks, and other such accommodations in the living areas shall be cleaned each day. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1216. Food services. Each licensee shall ensure that food preparation, service, safety, and nutrition meet the requirements of this regulation. For purposes of this regulation, "food" shall include beverages.

(a) Sanitary practices. Each individual engaged in food preparation and food service shall use sanitary methods of food handling, food service, and storage.

(1) Only authorized individuals shall be in the food preparation area.

(2) Each individual who has any symptoms of an illness, including fever, vomiting, or diarrhea, shall be excluded from the food preparation area and shall remain excluded from the food preparation area until the time at which the individual has been asymptomatic for at least 24 hours or provides the PRTF with written documentation from a health care provider stating that the symptoms are from a noninfectious condition.

(3) Each individual who has contracted an infectious or contagious disease specified in K.A.R. 28-1-6 shall be excluded from the food preparation area and shall remain excluded from the food preparation area for the time period required for that disease.

(4) Each individual with an open cut or abrasion on the hand or forearm or with a skin sore shall cover the sore, cut, or abrasion with a bandage before handling or serving food.

(5) The hair of each individual shall be restrained when the individual is handling food.

(6) Each individual handling or serving food shall comply with each of the following requirements for handwashing:

(A) Each individual shall wash that individual's hands and exposed portions of the individual's arms before working with food, after using the toilet, and as often as necessary to keep the individual's hands clean and to minimize the risk of contamination.

(B) Each individual shall use an individual towel, disposable paper towels, or an air dryer to dry that individual's hands.

(7) Each individual preparing or handling food shall minimize bare hand and bare arm contact with exposed food that is not in a ready-to-eat form.

(8) Except when washing fruits and vegetables, no individual handling or serving food may contact exposed, ready-to-eat food with the individual's bare hands.

(9) Each individual shall use single-use gloves, food-grade tissue paper, dispensing equipment, or utensils, including spatulas or tongs, when handling or serving exposed ready-to-eat food.

(b) Nutrition.

(1) Meals and snacks shall meet the nutritional needs of the residents in accordance with the United States department of agriculture's recommended daily allowances. A sufficient quantity of food shall be prepared for each meal to allow each

resident second portions of bread and milk and either vegetables or fruit.

(2) Special diets shall be provided for residents for either of the following reasons:

(A) Medical indication; or

(B) accommodation of religious practice, as indicated by a religious consultant.

(3) Each meal shall be planned and the menu shall be posted at least one week in advance. A copy of the menu of each meal served for the preceding month shall be kept on file and available for inspection.

(c) Food service and preparation areas. If food is prepared on the premises, each licensee shall provide a food preparation area that is separate from the eating area, activity area, laundry area, and bathrooms and that is not used as a passageway during the hours of food preparation and cleanup.

(1) All surfaces used for food preparation and tables used for eating shall be made of smooth, nonporous material.

(2) Before and after each use, all food preparation surfaces shall be cleaned with soapy water and sanitized by use of a solution of one ounce of bleach to one gallon of water or a sanitizing solution used in accordance with the manufacturer's instructions.

(3) Before and after each use, the tables used for eating shall be cleaned by washing with soapy water.

(4) All floors shall be swept daily and mopped when spills occur.

(5) Garbage shall be disposed of in a garbage disposal or in a covered container. If a container is used, the container shall be removed at the end of each day or more often as needed to prevent overflow or to control odor.

(6) Each food preparation area shall have handwashing facilities equipped with soap and hot and cold running water and with individual towels, paper towels, or air dryers. Each sink used for handwashing shall be equipped to provide water at a temperature of at least 100 degrees Fahrenheit. The water temperature shall not exceed 120 degrees Fahrenheit.

(A) If the food preparation sink is used for handwashing, the sink shall be sanitized before using it for food preparation by use of a solution of $\frac{1}{4}$ cup of bleach to one gallon of water.

(B) Each PRTF with 25 or more residents shall be equipped with handwashing facilities that are separate from the food preparation sink.

(7) Clean linen used for food preparation or service shall be stored separately from soiled linen.

(d) Food storage and refrigeration. All food shall be stored and served in a way that protects the food from cross-contamination.

(1) Nonrefrigerated food.

(A) All food not requiring refrigeration shall be stored at least six inches above the floor in a clean, dry, well-ventilated storeroom or cabinet in an area with no overhead drain or sewer lines and no vermin infestation.

(B) Dry bulk food that has been opened shall be stored in metal, glass, or food-grade plastic containers with tightly fitting covers and shall be labeled with the contents and the date opened.

(C) Food shall not be stored with poisonous or toxic materials. If cleaning agents cannot be stored in a room separate from food storage areas, the cleaning agents shall be clearly labeled and kept in locked cabinets not used for the storage of food.

(2) Refrigerated and frozen food.

(A) All perishables and potentially hazardous foods requiring refrigeration shall be continuously maintained at 41 degrees Fahrenheit or lower in the refrigerator or 0 degrees Fahrenheit in the freezer.

(B) Each refrigerator and each freezer shall be equipped with a visible, accurate thermometer.

(C) Each refrigerator and each freezer shall be kept clean inside and out.

(D) All food stored in the refrigerator shall be covered, wrapped, or otherwise protected from contamination. Unserved, leftover perishable foods shall be dated, refrigerated immediately after service, and eaten within three days.

(E) Raw meat shall be stored in the refrigerator in a manner that prevents meat fluids from dripping on other foods.

(F) Ready-to-eat, commercially processed foods, including luncheon meats, cream cheese, and cottage cheese, shall be eaten within five days after opening the package.

(G) If medication requiring refrigeration is stored with refrigerated food, the medication shall be stored in a locked medicine box in a manner that prevents cross-contamination.

(3) Hot foods.

(A) Hot foods that are to be refrigerated shall be transferred to shallow containers in layers less than three inches deep and shall not be covered until cool.

(B) Potentially hazardous cooked foods shall be cooled in a manner to allow the food to cool with-

in two hours from 135 degrees Fahrenheit to 70 degrees Fahrenheit or within six hours from 135 degrees Fahrenheit to 41 degrees Fahrenheit.

(e) Meals or snacks prepared on the premises.

(1) Each licensee shall ensure that all of the following requirements are met:

(A) All dairy products shall be pasteurized. Dry milk shall be used for cooking only.

(B) Meat shall be obtained from government-inspected sources.

(C) Raw fruits and vegetables shall be washed thoroughly before being eaten or used for cooking.

(D) Frozen foods shall be defrosted in the refrigerator, under cold running water, in a microwave oven using the defrost setting, or during the cooking process. Frozen foods shall not be defrosted by leaving them at room temperature or in standing water.

(E) Cold foods shall be maintained and served at temperatures of 41 degrees Fahrenheit or less.

(F) Hot foods shall be maintained and served at temperatures of at least 140 degrees Fahrenheit.

(2) Each licensee shall ensure that the following foods are not served or kept:

(A) Home-canned food;

(B) food from dented, rusted, bulging, or leaking cans; and

(C) food from cans without labels.

(f) Meals or snacks catered. If the licensee serves a meal or snack that is not prepared on the premises, the snack or meal shall be obtained from a food service establishment or a catering service licensed by the secretary of the Kansas department of agriculture. If food is transported to the premises, the licensee shall ensure that only food that has been transported promptly in clean, covered containers is served to the residents.

(g) Table service and cooking utensils.

(1) Each licensee shall ensure that all of the table service, serving utensils, and food cooking or serving equipment is stored in a clean, dry location at least six inches above the floor. None of these items shall be stored under an exposed sewer line or a dripping water line or in a bathroom.

(2) Each licensee shall provide clean table service to each resident, including dishes, cups or glasses, and forks, spoons, and knives, as appropriate for the food being served.

(A) Clean cups, glasses, and dishes designed for repeat use shall be made of smooth, durable, and nonabsorbent material and shall be free from cracks or chips.

(B) Disposable, single-use table service shall

be of food grade and medium weight and shall be disposed of after each use.

(3) If nondisposable table service and cooking utensils are used, each licensee shall sanitize the table service and cooking utensils using either a manual washing method or a mechanical dishwasher.

(A) If using a manual washing method, each licensee shall meet all of the following requirements:

(i) A three-compartment sink with hot and cold running water to each compartment and a drain-board shall be used for washing, rinsing, sanitizing, and air-drying.

(ii) An appropriate chemical test kit, a thermometer, or another device shall be used for testing the sanitizing solution and the water temperature.

(B) If using a mechanical dishwasher, each licensee shall ensure that all of the following requirements are met:

(i) Each commercial dishwashing machine and each domestic-type dishwashing machine shall be installed and operated in accordance with the manufacturer's instructions and shall be maintained in good repair.

(ii) If an automatic detergent dispenser, rinsing agents dispenser, or liquid sanitizer dispenser is used, the dispenser shall be installed and maintained according to the manufacturer's instructions.

(iii) Each dishwashing machine using hot water to sanitize shall be installed and operated according to the manufacturer's specifications and shall achieve surface temperature of at least 160 degrees Fahrenheit for all items.

(iv) If a domestic-type dishwasher is used, the dishwasher shall have the capacity to complete the cleaning cycle for all items in two cycles between each meal. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1217. Laundry. (a) If laundry is done at the PRTF, the laundry sinks, appliances, and countertops or tables used for laundry shall be located in an area separate from food preparation areas and shall be installed and used in a manner that safeguards the health and safety of the residents. Adequate space shall be allocated for the laundry room and the storage of laundry supplies, including locked storage for all chemical agents used in the laundry area.

(b) Adequate space shall be allocated for the storage of clean and dirty linen and clothing. Soiled linen shall be stored separately from clean linen.

(c) Blankets shall be laundered at least once each month or, if soiled, more frequently. Blankets shall be laundered or sanitized before reissue.

(d) Each mattress shall be water-repellent and washed down and sprayed with disinfectant before reissue. Mattress materials and treatments shall meet the applicable requirements of the state fire marshal's regulations. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

28-4-1218. Transportation. Each licensee shall establish and implement written policies and procedures for transporting residents.

(a) The transportation policies and procedures shall include all of the following information:

(1) A list of the individuals authorized to transport residents for the PRTF;

(2) a description of precautions to prevent the escape of any resident during transfer;

(3) documentation of a current and appropriate license for each PRTF driver for the type of vehicle in use; and

(4) procedures to be followed in case of accident, injury, or other incident as specified in K.A.R. 28-4-1214, including notification procedures.

(b) Each transporting vehicle owned or leased by the licensee shall have a yearly safety check. A record of the yearly safety check and all repairs or improvements made shall be kept on file at the PRTF. When residents are transported in a privately owned vehicle, the vehicle shall be in safe working condition.

(c) Each vehicle used by the PRTF to transport residents shall be covered by accident and liability insurance as required by the state of Kansas.

(d) A first-aid kit shall be kept in the transporting vehicle and shall include disposable nonporous gloves in various sizes, a cleansing agent, scissors, bandages of assorted sizes, adhesive tape, a roll of gauze, one package of gauze squares at least four inches by four inches in size, and one elastic bandage.

(e) Each vehicle used to transport residents shall be equipped with an individual seat belt for the driver and an individual seat belt or child safety seat for each passenger. The driver and each passenger shall be secured by a seat belt or a child safety seat when the vehicle is in motion.

(f) Seat belts and child safety seats shall be used appropriate to the age, weight, and height of each individual and the placement of each individual in the vehicle, in accordance with state statutes

and regulations. Each child safety seat shall be installed and used according to manufacturer's instructions.

(g) Residents who are less than 13 years of age shall not be seated in the front seat of a vehicle that is equipped with a passenger air bag.

(h) Smoking in any vehicle owned or leased by the licensee shall be prohibited whether or not a resident is present in the vehicle.

(i) Residents shall be transported directly to the location designated by the licensee and shall make no unauthorized stops along the way, except in an emergency.

(j) Handcuffs or shackles shall not be used on any resident being transported by staff members.

(k) No 15-passenger vans shall be used to transport residents. Each licensee owning or leasing a 15-passenger van purchased or leased before the effective date of this regulation shall be exempt from the requirements of this subsection. (Authorized by and implementing K.S.A. 65-508; effective Oct. 9, 2009.)

STAFF SECURE FACILITIES

28-4-1250. Definitions. (a) "Administrator" means the individual employed by a facility who is responsible for the daily operation of the facility.

(b) "Applicant" means a person who has applied for a license but who has not yet been granted a temporary permit or a license to operate a facility.

(c) "Auxiliary staff member" means a type of staff member working at a facility in food services, clerical services, or maintenance. This term shall also apply to individuals working in the facility for the purpose of observation of facility entrances and exits.

(d) "Basement" means each area in a building with a floor level more than 30 inches below ground level on all sides.

(e) "Case management" means the comprehensive written goals and services developed for each resident and the provision of those services directly by the staff members or through other resources.

(f) "Case manager" means an individual who is designated by the permittee or licensee to coordinate the provision of services to residents by staff members or other individuals or agencies and who meets the requirements for a case manager in K.A.R. 28-4-1255(f).

(g) "Clinical director" means the individual at a facility who is responsible for the mental health services and who meets the requirements for a clinical director in K.A.R. 28-4-1255(d).

(h) “Department” means Kansas department of health and environment.

(i) “Direct care staff member” means an individual whose primary responsibility is to implement the program on a daily basis, including providing direct supervision of, interaction with, and protection of the residents and who meets the requirements for a direct care staff member in K.A.R. 28-4-1255(h).

(j) “Direct supervision” means the physical presence of staff members in proximity to allow for interaction and direct eye contact with residents.

(k) “In-service training” means job-related training provided for staff members and volunteers.

(l) “License capacity” means the maximum number of residents authorized to be in the facility at any one time.

(m) “Licensed physician” means an individual who is licensed to practice either medicine and surgery or osteopathy in Kansas by the Kansas state board of healing arts.

(n) “Licensee” means a person who has been granted a license to operate a facility.

(o) “Living unit” means the self-contained building or portion of a building in which the facility is operated and maintained, including the sleeping rooms, bathrooms, and areas used by residents for activities, dining, classroom instruction, library services, and indoor recreation.

(p) “Permittee” means a person who has applied for a license and has been granted a temporary permit by the secretary to operate a facility.

(q) “Placing agent” means law enforcement, a state agency, or court possessing the legal authority to place a resident in a facility.

(r) “Professional staff member” means a staff member who is one of the following:

- (1) The clinical director;
- (2) a licensed physician;
- (3) an individual licensed by the Kansas behavioral sciences regulatory board;
- (4) a teacher licensed by the Kansas state department of education;
- (5) a physician’s assistant licensed in Kansas by the Kansas state board of healing arts;
- (6) a professional nurse licensed by the Kansas state board of nursing;
- (7) an advanced practice registered nurse (APRN) licensed by the Kansas state board of nursing;
- (8) a dietician licensed by the Kansas department for aging and disability services; or
- (9) a case manager.

(s) “Program” means the comprehensive and coordinated set of activities and social services providing for the care, health, and safety of residents while in the care of the facility.

(t) “Resident” means an individual who is placed in a facility as authorized by the revised Kansas code for the care of children, K.S.A. 2013 Supp. 38-2201 et seq., and K.S.A. 2013 Supp. 65-535, and amendments thereto.

(u) “Secretary” means secretary of the Kansas department of health and environment.

(v) “Staff member” means any individual employed at a facility, including auxiliary staff members, direct care staff members, and professional staff members.

(w) “Staff secure facility” and “facility” mean a type of “child care facility,” pursuant to K.S.A. 65-503 and amendments thereto, that meets the requirements in K.S.A. 2013 Supp. 65-535, and amendments thereto.

(x) “Trauma-informed care” means the services provided to residents based on an understanding of the vulnerabilities and the emotional and behavioral responses of trauma survivors.

(y) “Trauma-specific intervention” means intervention techniques designed specifically to address the consequences of trauma in residents and to facilitate recovery, including the interrelation between presenting symptoms of trauma and each resident’s past history of trauma.

(z) “Tuberculosis test” means either the Mantoux skin test or an interferon gamma release assay (IGRA).

(aa) “Volunteer” means an individual or group that provides services to residents without compensation.

(bb) “Weapons” means any dangerous or deadly instruments, including the following:

- (1) Firearms;
- (2) ammunition;
- (3) air-powered guns, including BB guns, pellet guns, and paint ball guns;
- (4) any knives, except knives designed and used for table service;
- (5) archery equipment; and
- (6) martial arts equipment. (Authorized by K.S.A. 2013 Supp. 65-508 and 65-535; implementing K.S.A. 2013 Supp. 65-503 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1251. Applicant, permittee, and licensee requirements. (a) Each applicant shall

submit a complete application on forms provided by the department. The application shall be submitted at least 90 calendar days before the planned opening date of the facility and shall include the following:

(1) A description of the program and services to be offered, including the following:

(A) A statement of the facility's purpose and goals; and

(B) the number, ages, and gender of prospective residents;

(2) the anticipated opening date;

(3) a request for the background checks for staff members and volunteers specified in K.A.R. 28-4-1253;

(4) the facility's policies and procedures required in subsection (d); and

(5) the license fee totaling the following:

(A) \$75; and

(B) \$1 multiplied by the maximum number of residents to be authorized under the license.

(b) Each applicant shall be one of the following entities:

(1) A government or governmental subdivision, which shall employ an administrator; or

(2) a person, other than a government or governmental subdivision, with a governing board that is responsible for the operation, policies, finances, and general management of the facility. The applicant shall employ an administrator. The administrator shall not be a voting member of the governing board.

(c) Each applicant, each permittee, and each licensee, if a corporation, shall be in good standing with the Kansas secretary of state.

(d) Each applicant shall develop policies and procedures for operation of the facility to meet the requirements in these regulations and in K.S.A. 2013 Supp. 65-535, and amendments thereto.

(e) Each applicant shall submit to the department floor plans for each building that will be used as a facility. Each floor plan shall show how the facility is separated from any other child care facility. Each applicant shall obtain and submit to the department prior written approval from the Kansas state fire marshal regarding the safety of entrances and exits.

(f) Each applicant shall notify the school district where the facility is to be located at least 90 calendar days before the planned opening date. The 90-day notification to the local school district may be waived by the secretary upon receipt of a written agreement by the local school dis-

trict. The notification to the school district shall include the following:

(1) The planned opening date and the number, age range, gender, and anticipated special education needs of the residents to be served;

(2) a statement that the residents will receive educational services on-site at the facility; and

(3) documentation that the notification was received by the school district at least 90 calendar days before the planned opening date.

(g) Each applicant shall maintain documentation of completion of training required in K.A.R. 28-4-1255(k) by each staff member and each volunteer before the opening date of the facility.

(h) Each applicant, each permittee, and each licensee shall maintain documentation of compliance with all applicable building codes, fire safety requirements, and zoning codes.

(i) The granting of a license to any applicant may be refused by the secretary if the applicant is not in compliance with the requirements of all applicable statutes and regulations governing facilities. (Authorized by K.S.A. 2013 Supp. 65-508 and 65-535; implementing K.S.A. 65-501 and K.S.A. 2013 Supp. 65-504, 65-505, 65-508, 65-516, and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1252. Terms of a temporary permit or license. (a) Temporary permit or license required. No person shall operate a facility unless the person has been issued a temporary permit or a license by the secretary.

(b) Requirements. Each permittee and each licensee shall ensure that the following requirements are met:

(1) Each temporary permit or license shall be valid only for the permittee or licensee and for the address specified on the temporary permit or the license. When an initial or amended license becomes effective, all temporary permits or licenses previously granted to the permittee or licensee at the same address shall become void.

(2) The maximum number, the age range, and the gender of residents authorized by the temporary permit or the license shall not be exceeded.

(3) The current temporary permit or the current license shall be posted conspicuously within the facility.

(c) New application required. A new application and the fee specified in K.A.R. 28-4-1251(a) shall be submitted for each change of ownership or location at least 90 calendar days before the planned change.

(d) Changes. Each applicant, each permittee, and each licensee shall obtain the secretary's written approval before making any change in any of the following:

- (1) The use or proposed use of the buildings;
 - (2) the physical structure of any building, including the following:
 - (A) An addition or alteration as specified in K.A.R. 28-4-1265(a)(2)(B);
 - (B) the use of locked entrances; and
 - (C) any delayed-exit mechanisms;
 - (3) the program, provided through either direct services or agreements with specified individuals or community resources; or
 - (4) orientation topics or required in-service training.
- (e) Renewals.

(1) No earlier than 90 calendar days before the renewal date but no later than the renewal date, each licensee shall complete and submit an application for renewal on forms provided by the department, including the requests for background checks specified in K.A.R. 28-4-1253, and the fee specified in K.A.R. 28-4-1251(a).

(2) Failure to submit the renewal application and fee within 30 days after the expiration of the license shall result in an assessment of a late renewal fee pursuant to K.S.A. 65-505, and amendments thereto, and may result in closure of the facility.

(f) Exceptions. Any applicant, permittee, or licensee may request an exception to a specific facility regulation or any portion of a specific facility regulation. Each request shall be submitted to the secretary on a form provided by the department. A copy of each request shall be provided to the Kansas department for children and families and the office of the Kansas attorney general.

(1) A request for an exception may be granted if the secretary determines that the exception is not detrimental to the health, safety, and welfare of one or more residents or the family of a resident and the exception does not violate statutory requirements.

(2) Written notice from the secretary stating the nature of each exception and its duration shall be kept on file at the facility and shall be readily accessible to the department and the Kansas department for children and families.

(g) Amendments. Any licensee may submit a written request for an amended license.

(1) Each licensee who intends to change the terms of the license, including the maximum

number, the age range, or the gender of residents to be served, shall submit a request for an amendment on a form provided by the department and a nonrefundable amendment fee of \$35. An amendment fee shall not be required if the request to change the terms of the license is made at the time of license renewal.

(2) Each request for a change in the maximum number, the age range, or the gender of residents to be served shall include written documentation of the notification to the school district where the facility is located, as specified in K.A.R. 28-4-1251(f).

(3) The licensee shall make no change to the terms of the license, including the maximum number of residents, the age range of residents to be served, the gender of residents, and the type of license, unless an amendment has been granted, in writing, by the secretary.

(h) Closure. Any applicant or permittee may withdraw the application for a license. Any licensee may submit, at any time, a request to close the facility operated by the licensee. If an application is withdrawn or a facility is closed, the current temporary permit or license granted to the permittee or licensee for that facility shall become void. (Authorized by K.S.A. 2013 Supp. 65-508 and 65-535; implementing K.S.A. 2013 Supp. 65-504, 65-505, 65-508, 65-516, and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1253. Background checks. (a) With each initial application or renewal application, each applicant or licensee shall submit a request to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department for children and families in order to comply with K.S.A. 65-516, and amendments thereto. Each request shall be submitted on a form provided by the department. Each request shall list the required information for each individual 10 years of age and older who will be residing, working, or volunteering in the facility.

(b) Each applicant, each permittee, and each licensee shall submit a request to the department to conduct a background check by the Kansas bureau of investigation and a background check by the Kansas department for children and families before each individual begins residing, working, or volunteering in the facility.

(c) A background check shall not be required for any resident admitted to a facility.

(d) A copy of each request for a background check shall be kept on file at the facility. (Authorized by K.S.A. 2013 Supp. 65-508; implementing K.S.A. 2013 Supp. 65-516; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1254. Administration. (a) Each permittee and each licensee shall be responsible for the operation of the facility, including the following:

(1) Developing an organizational chart designating the lines of authority and ensuring that all staff members know which staff member is in charge at any time;

(2) developing and implementing administrative policies and procedures for the operation of the facility, which shall include sufficient staff members to supervise and provide services to residents;

(3) employing an administrator; and

(4) employing a clinical director.

(b) Each permittee and each licensee shall implement policies and procedures for the operation of the facility that shall include detailed descriptions of the roles and responsibilities for each staff member and each volunteer.

(c) Each permittee and each licensee shall ensure the confidentiality of each resident's information.

(d) Each permittee and each licensee shall ensure that the program, all services, and living units of the facility are separate from the children or youth in and the living units used by any other child care facility.

(e) Each permittee and each licensee shall ensure that each staff member and each volunteer is informed of and follows all written policies and procedures necessary to carry out that staff member's or volunteer's job duties.

(f) Each permittee and each licensee shall ensure that a copy of the regulations governing facilities is kept on the premises at all times. A copy of the regulations shall be made available to all staff members.

(g) Each licensee shall ensure that all contracts, agreements, policies, and procedures are reviewed annually and updated as needed. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1255. Staff member requirements.

(a) Staff members and volunteers. Each individual working or volunteering in a facility shall be qualified by temperament, emotional maturity, judg-

ment, and understanding of residents necessary to maintain the health, comfort, safety, and welfare of residents.

(b) Multiple duties. Each staff member performing duties of more than one position shall meet the minimum qualifications for each position held.

(c) Administrator.

(1) Each administrator shall have a bachelor's degree in social work, human development, psychology, education, nursing, counseling, or family studies or in a related field. The degree shall be from an accredited college or university with accreditation standards equivalent to those met by Kansas colleges and universities.

(2) Each administrator shall demonstrate knowledge of the principles and practices of administration and management.

(3) Each administrator shall have at least three years of supervisory experience within a child care facility providing treatment to children or youth.

(d) Clinical director. Each clinical director shall be licensed or approved by the Kansas behavioral sciences regulatory board, the Kansas board of nursing, or the Kansas board of healing arts to diagnose and treat mental and behavioral disorders.

(e) Substance abuse counselor. Each substance abuse counselor shall be responsible for the evaluation, assessment, and treatment of residents for substance abuse. The substance abuse counselor shall be licensed by the Kansas behavioral sciences regulatory board or the Kansas board of healing arts to evaluate, assess, and treat addictions or substance abuse.

(f) Case manager. Each case manager shall be licensed by the Kansas behavioral sciences regulatory board.

(g) Professional staff members. Each professional staff member shall maintain current licensure, certification, or registration for that staff member's profession.

(h) Direct care staff members. Each direct care staff member shall meet all of the following requirements:

(1) Be 21 years of age or older;

(2) have a high school diploma or equivalent; and

(3) have completed one of the following:

(A) A bachelor's degree from an accredited college or university and one year of experience supervising children or youth in a child care facility;

(B) 60 semester hours from an accredited college or university and two years of experience supervising children or youth in a child care facility; or

(C) four years of experience supervising children or youth in a child care facility.

(i) Auxiliary staff members. Each permittee and each licensee shall ensure that the following requirements are met for auxiliary staff members:

(1) Auxiliary staff members shall be available as needed for the operation of the facility and the provision of services to residents.

(2) No auxiliary staff member shall be included in meeting the minimum ratio of direct care staff members to residents. Direct care staff members shall maintain direct supervision of the residents.

(3) Each auxiliary staff member working at the facility for the purpose of observing facility entrances and exits shall meet the requirements of K.S.A. 2013 Supp. 65-535, and amendments thereto.

(4) Each auxiliary staff member working in food service shall demonstrate compliance with all of the following requirements through ongoing job performance:

(A) Knowledge of the nutritional needs of residents;

(B) understanding of quantity food preparation and service;

(C) sanitary food handling and storage methods;

(D) understanding of individual, cultural, and religious food preferences; and

(E) ability to work with the case manager in planning learning experiences for residents about nutrition.

(j) Volunteers. Each permittee and each licensee shall ensure that the following requirements are met for any volunteer who has direct contact with residents:

(1) There shall be a written plan for orientation, training, supervision, and tasks for each volunteer.

(2) Each volunteer shall submit to the administrator an application for volunteering at the facility.

(3) Each volunteer whose job description includes the provision of program services to residents shall meet the same requirements as those of a staff member in that position. No volunteer shall perform tasks for which the volunteer is not qualified or licensed.

(4) No volunteer shall be counted in the minimum ratio of direct care staff members to residents. Each volunteer shall be supervised at all times by a staff member.

(k) Staff member and volunteer training. Each permittee and each licensee shall assess the training needs of each staff member and each volunteer and shall provide orientation and in-service training. Documentation of the training shall be

kept in each staff member's and each volunteer's record and shall be accessible for review by the secretary or secretary's designee.

(1) Each staff member and each volunteer shall complete at least 10 clock-hours of orientation training within seven calendar days after the initial date of employment or volunteering. The orientation training shall include the following topics:

(A) Facility policies and procedures, including emergency procedures, behavior management, and discipline;

(B) individual job duties and responsibilities;

(C) confidentiality;

(D) security procedures;

(E) recognition of the signs and symptoms and the reporting of suspected child abuse and neglect;

(F) the signs and symptoms of infectious disease, infection control, and universal precautions;

(G) statutes and regulations governing facilities;

(H) the schedule of daily activities;

(I) principles of trauma-informed care;

(J) indicators of self-harming behaviors or suicidal tendencies; and

(K) care and supervision of residents.

(2) Each direct care staff member shall complete an additional 40 clock-hours of orientation training before assuming direct supervision and before being counted in the ratio of direct care staff members to residents. Each volunteer who has direct contact with residents shall complete the additional 40 clock-hours of training before providing services to residents. The additional training shall include the following topics:

(A) Crisis management;

(B) human trafficking and exploitation;

(C) indicators of self-harming behaviors or suicidal tendencies and knowledge of appropriate intervention measures;

(D) indicators of gang involvement;

(E) intervention techniques for problem or conflict resolution, diffusion of anger, and de-escalation methods;

(F) principles of trauma-informed care and trauma-specific intervention; and

(G) report writing and documentation methods.

(3) Each staff member shall complete at least 20 clock-hours of in-service training each year. In-service training topics shall be based on individual job duties and responsibilities, meet individual learning needs, and be designed to maintain the knowledge and skills needed to comply with facility policies and procedures and the regulations governing facilities.

(4) At least one staff member who is counted in the ratio of direct care staff members to residents and who has current certification in first aid and current certification in cardiopulmonary resuscitation shall be at the facility at all times.

(5) If nonprescription or prescription medication is administered to residents, each permittee and each licensee shall designate professional staff members or direct care staff members to administer the medication. Before administering any medication, each designated staff member shall receive training in medication administration approved by the secretary. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1256. Records. (a) Recordkeeping system. Each applicant, each permittee, and each licensee shall ensure that there is an organized recordkeeping system for the facility, which shall include the following:

(1) Provisions shall be made for the identification, security, confidentiality, control, retrieval, preservation, and retirement of all resident, staff member, volunteer, and facility records.

(2) All records shall be available at the facility for review by the department.

(b) Resident records.

(1) Each permittee and each licensee shall maintain an individual record for each resident, which shall include the following information:

(A) Documentation of the preadmission screening;

(B) the admissions form;

(C) verification of custody status of the resident;

(D) a record of the resident's personal possessions as specified in K.A.R. 28-4-1258;

(E) a health record that meets the requirements in K.A.R. 28-4-1259;

(F) a copy of each written report of any incidents involving the resident and specified in K.A.R. 28-4-1257 and K.A.R. 28-4-1264;

(G) documentation of the resident's receipt of the facility rule book; and

(H) the individualized plan of care.

(2) Provisions shall be made for the transfer of a resident's record upon release of the resident to another child care facility. The record shall precede the resident or accompany the resident to that child care facility. All information that cannot be transferred at the time of the release of the resident shall be transferred within 72 hours of the release of the resident.

(3) Information from a resident's record shall not be released without written permission from the court, the Kansas department for children and families, or the resident's parent or legal guardian.

(c) Staff member records. Each permittee and each licensee shall maintain an individual record for each staff member, which shall include the following information:

(1) The application for employment, including the staff member's qualifications, references, and dates of previous employment;

(2) a copy of each applicable current professional license, certificate, or registration;

(3) the staff member's current job responsibilities;

(4) a health record that meets the requirements in K.A.R. 28-4-1259(f), including a record of the results of each health examination and each tuberculosis test;

(5) a copy of a valid driver's license of a type appropriate for the vehicle being used, for each staff member who transports any resident;

(6) documentation of all orientation and inservice training required in K.A.R. 28-4-1255(k);

(7) documentation of training in medication administration if medication administration is included in the staff member's job duties;

(8) a copy of each grievance or incident report concerning the staff member, including documentation of the resolution of each report; and

(9) documentation that the staff member has read, understands, and agrees to all of the following:

(A) The requirements for mandatory reporting of suspected child abuse, neglect, and exploitation;

(B) all regulations governing facilities;

(C) the facility's policies and procedures that are applicable to the job responsibilities of the staff member; and

(D) the confidentiality of resident information.

(d) Volunteer records. Each permittee and each licensee shall maintain an individual record for each volunteer at the facility, which shall include the following information:

(1) The application for volunteering at the facility;

(2) the volunteer's responsibilities at the facility;

(3) a health record that meets the requirements in K.A.R. 28-4-1259(f), including a record of the results of each health examination and each tuberculosis test, for each volunteer in contact with residents;

(4) documentation of all orientation and inservice training required for volunteers in K.A.R. 28-4-1255(k);

(5) a copy of each grievance or incident report concerning the volunteer, including documentation of the resolution of each report; and

(6) documentation that the volunteer has read, understands, and agrees to all of the following:

(A) The requirements for mandatory reporting of suspected child abuse, neglect, and exploitation;

(B) all regulations governing facilities;

(C) the facility's policies and procedures that are applicable to the responsibilities of the volunteer; and

(D) the confidentiality of resident information.

(e) Facility records. Each applicant, each permittee, and each licensee shall ensure that the facility records are completed and maintained. These records shall include the following information:

(1) Documentation of the requests submitted to the department for background checks in order to meet the requirements of K.A.R. 28-4-1253;

(2) documentation of notification to the school district as specified in K.A.R. 28-4-1251(f);

(3) documentation of each approval granted by the secretary for each change, exception, or amendment;

(4) the facility's policies and procedures;

(5) all documentation specified in K.A.R. 28-4-1264 for emergency plans, fire and tornado drills, and written policies and procedures on the security and control of the residents;

(6) all documentation specified in K.A.R. 28-4-1264 for the inspection and the maintenance of security devices, including locking mechanisms and any delayed-exit mechanisms on doors;

(7) documentation of approval of any private water or sewage systems as specified in K.A.R. 28-4-1265;

(8) documentation of compliance with all applicable building codes, fire safety requirements, and zoning codes;

(9) all documentation specified in K.A.R. 28-4-1268 for transportation;

(10) documentation of vaccinations for any animal kept on the premises, as required by K.A.R. 28-4-1269(c); and

(11) a copy of each contract and each agreement. (Authorized by K.S.A. 2013 Supp. 65-508 and 65-535; implementing K.S.A. 65-507 and K.S.A. 2013 Supp. 65-508, 65-516, and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1257. Notification and reporting requirements. (a) Each permittee and each licensee shall ensure that notification of each of the following is submitted verbally or in writing upon discovery of the incident or event, but no later than 24 hours after the discovery:

(1) Each instance of suspected abuse or neglect of a resident shall be reported to the Kansas department for children and families and to law enforcement.

(2) Each incident resulting in the death of any resident shall be reported to the following:

(A) Law enforcement;

(B) the resident's parent or legal guardian;

(C) the resident's placing agent;

(D) the Kansas department for children and families; and

(E) the department.

(3) Each incident resulting in the death of a staff member or a volunteer while on duty at the facility shall be reported to the department and to any other entities in accord with the facility's policies.

(4) Each incident resulting in a serious injury to any resident, including burns, lacerations, bone fractures, substantial hematomas, and injuries to internal organs, shall be reported to the following:

(A) The parent or legal guardian of any resident involved in the incident;

(B) the placing agent of any resident involved in the incident;

(C) the Kansas department for children and families; and

(D) the department.

(5) Each incident of suspected sexual assault involving a resident as a victim or as a perpetrator shall be reported to the following:

(A) Law enforcement;

(B) the Kansas department for children and families;

(C) the resident's parent or legal guardian;

(D) the resident's placing agent; and

(E) the department.

(6) Each suicide attempt by a resident shall be reported to the following:

(A) The resident's parent or legal guardian;

(B) the resident's placing agent;

(C) the Kansas department for children and families; and

(D) the department.

(7) Each natural disaster shall be reported to the department.

(8) Each instance of work stoppage shall be reported to the department.

(9) Each incident that involves a riot or the taking of hostages shall be reported to the department.

(10) Each fire shall be reported to the department and to the state fire marshal.

(11) Each incident that involves any suspected illegal act committed by a resident while in the facility or by a staff member or a volunteer while on duty at the facility shall be reported to law enforcement and the department in accord with the facility's policies.

(12) If any resident, staff member, or volunteer contracts a reportable infectious or contagious disease specified in K.A.R. 28-1-2, the permittee or licensee shall ensure that a report is submitted to the local county health department within 24 hours, excluding weekends and holidays.

(b) Each permittee and each licensee shall complete a written report within five calendar days after the discovery of any incident or event identified in subsection (a). A copy of each written report shall be kept on file at the facility. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1258. Admission and release of residents. (a) Policies and procedures. Each permittee and each licensee shall implement policies and procedures for the admission and release of residents. These policies and procedures shall ensure that each individual is admitted unless at least one of the following conditions is met:

(1) The individual's placement is not authorized by the revised Kansas code for the care of children, K.S.A. 2013 Supp. 38-2201 et seq., or K.S.A. 2013 Supp. 65-535, and amendments thereto.

(2) The individual needs immediate medical care.

(3) Admission of the individual would cause the permittee or licensee to exceed the terms of the temporary permit or license.

(b) Authorization of admission. Each permittee and each licensee shall ensure that no individual is admitted to the facility unless the placement is authorized by the revised Kansas code for the care of children, K.S.A. 2013 Supp. 38-2201 et seq., and K.S.A. 2013 Supp. 65-535, and amendments thereto.

(c) Preadmission health screening. Each individual who shows evidence of being physically ill, injured, or under the influence of alcohol or drugs shall be assessed in accordance with the facility's policies and procedures to determine whether the individual needs immediate medical care.

(d) Admission procedures. Each permittee and each licensee shall ensure that the admission procedures include the following:

(1) Informing each resident, or the resident's legal guardian if the resident is unable to understand, of the purposes for which information is obtained and the manner in which the information will be used;

(2) completing an admission form, including verification of custody status and a life history of each resident;

(3) completing a health history checklist on a form approved by the department;

(4) completing an inventory that documents each resident's clothing and personal possessions;

(5) distributing personal hygiene items;

(6) providing for a shower and hair care;

(7) issuing clean, laundered clothing, if necessary; and

(8) assigning each resident to a sleeping room.

(e) Guardianship. No permittee, licensee, staff member, or volunteer shall accept permanent legal guardianship of a resident.

(f) Release procedures. Each permittee and each licensee shall ensure that the following procedures are followed when a resident is released from a facility:

(1) Procedures for the release of a resident shall include the following:

(A) Verification of the identification and the authority of the individual to whom the resident is being released;

(B) verification of the identity of the resident;

(C) transportation arrangements;

(D) instructions for forwarding mail; and

(E) return of personal property to the resident, including a receipt for all personal property, signed by the resident.

(2) Facility release forms shall be signed and dated by the individual to whom the resident is released and by the staff member releasing the resident. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1259. Health care. (a) Policies and procedures for resident health care. Each permittee and each licensee, in consultation with a physician, shall implement written policies and procedures that include provisions for the following:

(1) Completion of a health checklist and review for each resident upon admission, including the following:

(A) Current physical health status, including oral health;

(B) all allergies, including medication, food, and plant;

(C) all current pain, including cause, onset, duration, and location;

(D) preexisting medical conditions;

(E) current mood and affect;

(F) history and indicators of self-harming behaviors or suicidal tendencies;

(G) all infectious or contagious diseases;

(H) documentation of current immunizations specified in K.A.R. 28-1-20 or documentation of an exemption for medical or religious reasons pursuant to K.S.A. 65-508, and amendments thereto;

(I) all drug or alcohol use;

(J) all current medications;

(K) all physical disabilities;

(L) all sexually transmitted diseases; and

(M) if a female resident, menstrual history and any history of pregnancy;

(2) follow-up health care, including a health assessment and referrals for any concerns identified in the health checklist and review;

(3) if medically indicated, all required chronic care, convalescent care, and preventive care, including immunizations;

(4) care for minor illness, including the use and administration of prescription and nonprescription drugs;

(5) care for residents under the influence of alcohol or other drugs;

(6) infection-control measures and universal precautions to prevent the spread of blood-borne infectious diseases, including medically indicated isolation; and

(7) maternity care as required by K.A.R. 28-4-279.

(b) Physical health of residents. Each permittee and each licensee shall ensure that emergency and ongoing medical and dental care is obtained for each resident by providing timely access to basic, emergency, and specialized medical, mental health, and dental care and treatment services provided by qualified providers.

(1) Each permittee and each licensee shall ensure that a health checklist is completed for each resident at the time of admission by the staff member who admits the resident. The health checklist shall serve as a guide to determine if a resident is in need of medical or dental care and to determine if the resident is using any prescribed medications.

(2) Each permittee and each licensee shall ensure that a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or an APRN operating under a written protocol as authorized by a responsible physician and operating under the APRN's scope of practice is contacted for any resident who is taking a prescribed medication at the time of admission, to assess the need for continuation of the medication.

(3) Each change of prescription or directions for administering a prescription medication shall be ordered by the authorized medical practitioner with documentation placed in the resident's record. Prescription medications shall be administered only to the designated resident as ordered by the authorized medical practitioner.

(4) Nonprescription and prescription medication shall be administered only by a designated staff member who has received training on medication administration approved by the secretary. Each administration of medication shall be documented in the resident's record with the following information:

(A) The name of the staff member who administered the medication;

(B) the date and time the medication was given;

(C) each change in the resident's behavior, response to the medication, or adverse reaction;

(D) each alteration in the administration of the medication from the instructions on the medication label and documentation of the alteration; and

(E) each missed dose of medication and documentation of the reason the dose was missed.

(5) Within 72 hours of each resident's admission, a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, an APRN, or a nurse approved to conduct health assessments shall review the health checklist. Based upon health indicators derived from the checklist, the reviewing physician, physician's assistant, APRN, or nurse shall conduct a health assessment.

(6) Each permittee and each licensee shall ensure that a licensed physician, a physician's assistant operating under a written protocol as authorized by the responsible physician, or an APRN operating under a written protocol as authorized by a responsible physician and operating within the APRN's scope of practice is contacted for each resident who has acute symptoms of illness or who has a chronic illness.

(7) Each permittee and each licensee shall ensure that the following procedures are followed for providing tuberculosis tests for residents:

(A) Each resident shall receive a tuberculosis test unless the resident has had a tuberculosis test within the last 12 months.

(B) A chest X-ray shall be taken of each resident who has a positive tuberculosis test or a history of a positive tuberculosis test, unless a chest X-ray was completed within the 12 months before the current admission to the facility.

(C) The results of the tuberculosis test, X-rays, and treatment shall be recorded in the resident's record, and the county health department shall be kept informed of the results.

(D) Compliance with the department's tuberculosis prevention and control program shall be followed for the following:

(i) Tuberculosis tests;

(ii) treatment; and

(iii) a resident's exposure to active tuberculosis disease.

(8) Each permittee and each licensee shall ensure that the use of tobacco in any form by any resident while in care is prohibited.

(c) Emergency medical treatment. Each permittee and each licensee shall ensure that the following requirements are met for the emergency medical treatment of residents:

(1) The resident's medical record and health assessment forms shall be taken to the emergency room with the resident.

(2) A staff member shall accompany the resident to emergency care and shall remain with the resident while the emergency care is being provided or until the resident is admitted. This arrangement shall not compromise the direct supervision of the other residents in the facility.

(d) Oral health of residents. Each permittee and each licensee shall ensure that the following requirements are met for the oral health of residents:

(1) Dental care shall be available for all residents.

(2) Each resident who has not had a dental examination within the 12 months before admission to the facility shall have a dental examination no later than 60 calendar days after admission.

(3) Each resident shall receive emergency dental care as needed.

(4) A plan shall be developed and implemented for oral health education and staff supervision of residents in the practice of good oral hygiene.

(e) Personal health and hygiene of residents.

Each permittee and each licensee shall ensure that the following requirements are met for the personal health and hygiene of the residents:

(1) Each resident shall have access to drinking water, a lavatory, and a toilet.

(2) Each resident shall be given the opportunity to bathe upon admission and daily.

(3) Each resident shall be provided with toothpaste and an individual toothbrush.

(4) Each resident shall be given the opportunity to brush that resident's teeth after each meal.

(5) Opportunities shall be available to each resident for daily shaving and haircuts as needed.

(6) Each resident's washable clothing shall be changed and laundered at least twice a week. Clean underwear and socks shall be available to each resident on a daily basis.

(7) Each female resident shall be provided personal hygiene supplies for use during that resident's menstrual cycle.

(8) Clean, individual washcloths and bath towels shall be issued to each resident at least twice each week.

(9) Each resident shall be allowed to have at least eight hours of sleep each night.

(f) Personal health of staff members and volunteers.

(1) Each staff member and each volunteer shall meet the following requirements:

(A) Be free from all infectious or contagious disease requiring isolation or quarantine as specified in K.A.R. 28-1-6;

(B) Be free of any physical, mental, or emotional health condition that adversely affects the individual's ability to fulfill the responsibilities listed in the individual's job description and to protect the health, safety, and welfare of the residents; and

(C) be free from impaired ability due to the use of alcohol, prescription or nonprescription drugs, or other chemicals.

(2) Each staff member and each volunteer who has contact with any resident or who is involved in food preparation or service shall have received a health assessment within one year before employment. This assessment shall be conducted by a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or a nurse authorized to conduct these assessments.

(3) The results of each health assessment shall be recorded on forms provided by the department and shall be kept in the staff member's or volunteer's record.

(4) A health assessment record may be transferred from a previous place of employment if the assessment occurred within one year before the staff member's employment at the facility and if the assessment was recorded on the form provided by the department.

(5) The initial health examination of each staff member and each volunteer shall include a tuberculosis test. If there is a positive tuberculosis test or a history of a previous positive tuberculosis test, a chest X-ray shall be required unless there is documentation of a normal chest X-ray within the last 12 months. Proof of proper treatment, according to the department's tuberculosis prevention and control program's direction, shall be required. Documentation of each tuberculosis test, X-ray, and treatment results shall be kept on file in the individual's health record.

(A) Compliance with the department's tuberculosis prevention and control program shall be required following each exposure to active tuberculosis disease. The results of tuberculosis tests, X-rays, and treatment shall be recorded in the individual's health record.

(B) Each volunteer shall present documentation showing no active tuberculosis before serving in the facility.

(6) If a staff member experiences a significant change in physical, mental, or emotional health, including showing any indication of substance abuse, an assessment of the staff member's current health status may be required by the permittee, the licensee, or the secretary. A licensed health care provider who is qualified to diagnose and treat the condition shall conduct the health assessment. A written report of the assessment shall be kept in the staff member's record and shall be submitted to the secretary on request.

(g) Each permittee and each licensee shall ensure that tobacco products are not used inside the facility. Tobacco products shall not be used by staff members or volunteers in the presence of residents. (Authorized by K.S.A. 2013 Supp. 65-508 and 65-535; implementing K.S.A. 65-507, K.S.A. 2013 Supp. 65-508, and K.S.A. 2013 Supp. 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1260. Case management. Each permittee and each licensee shall ensure that case management services are provided for each resident.

(a) Each permittee and each licensee shall ensure that a case manager is assigned to provide or

coordinate the case management services for each resident.

(b) Each permittee and each licensee shall ensure that a plan of care is developed and implemented for each resident with input, as appropriate, of the resident, the placing agent, the resident's parent or legal guardian, and staff members. The plan shall list goals for the resident while at the facility and upon release and shall identify the services needed by the resident to meet the goals. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1261. Program. (a) Policies and procedures. Each permittee and each licensee shall implement policies and procedures for the program.

(b) Daily routine. Each permittee and each licensee shall maintain a written schedule and daily routine for all residents during all waking hours, which shall include the following:

- (1) Meals;
- (2) personal hygiene;
- (3) physical exercise;
- (4) recreation;
- (5) mental health services; and
- (6) education.

(c) Rest and sleep. Each permittee and each licensee shall ensure that the daily routine includes time for rest and sleep adequate for each resident.

(d) Classroom instruction. Each permittee and each licensee shall ensure that classroom instruction is provided to each resident on-site by teachers holding appropriate licensure from the Kansas department of education.

(1) The staff members shall coordinate education services with the local school district.

(2) The staff members shall provide a regular schedule of instruction and related educational services for each resident.

(3) Direct care staff members shall be stationed in proximity to the classroom, with frequent, direct, physical observation of the classroom activity at least every 15 minutes, to provide immediate support to the teacher.

(e) Library services.

(1) Reading and other library materials shall be provided to each resident.

(2) Library materials shall be appropriate for various levels of competency.

(3) Reading material shall reflect a variety of interests.

(f) Recreation.

(1) Each facility shall have indoor and outdoor equipment and recreational areas where security and visual supervision can be easily maintained. Unless restricted for health reasons, each resident shall be allowed to engage in supervised indoor or outdoor recreation on a daily basis.

(2) Art and craft supplies, books, current magazines, games, and other indoor recreational materials shall be provided for leisure time activities.

(g) Work. Each permittee and each licensee shall ensure that the following requirements are met when residents participate in work activities:

(1) Work assignments shall not be used as a substitute for recreation.

(2) Residents shall be prohibited from performing any of the following duties:

(A) Providing personal services for the staff members;

(B) cleaning or maintaining areas away from the facility;

(C) replacing staff members; or

(D) engaging in any work classified as hazardous by the Kansas department of labor's regulations governing child labor.

(h) Plan of care. Each permittee and each licensee shall ensure that the individualized plan of care for each resident is reviewed and updated based on the needs of the resident. In addition to the services required in subsections (b) through (g), the plan of care shall include the following:

(1) Mental health, substance abuse, and life skills training based on individual needs of the resident; and

(2) any restrictions on visitation, communication with others, or the resident's movement or activities that are required to ensure the health and safety of the resident or other residents or the security of the facility.

(i) Mental health services. Each permittee and each licensee shall ensure that mental health services are provided as needed to each resident, by a clinical director and appropriate staff members.

(j) Substance abuse screening and treatment. Each permittee and each licensee shall ensure that substance abuse screening and treatment services are provided as needed to each resident, by a substance abuse counselor and appropriate staff members.

(k) Life skills training. Each permittee and each licensee shall ensure that life skills training is provided as needed to each resident, by designated

staff members. The resident's plan of care shall include the following:

(1) Life skills training appropriate to the age and developmental level of the resident, including daily living tasks, money management, and self-care;

(2) direct services, including assistance with career planning and housing; and

(3) referrals for community resources, including educational opportunities.

(l) Visitation and communication. Each permittee and each licensee shall implement policies and procedures for visitation and communication by residents with individuals outside of the facility. The policies and procedures shall include the following:

(1) Private telephone conversations and visitations shall be allowed, except when a need to protect the resident is indicated as documented in the resident's individual plan of care or as specified by court order.

(2) No resident shall be denied the right to contact an attorney or court counselor. No court counselor or attorney shall be refused visitation with a resident to whom the counselor or attorney is assigned.

(3) No staff member shall open or censor mail or written communication, unless there is reason to believe that one of the following conditions exists:

(A) The mail or communication contains items or goods that are not permitted in the facility.

(B) The security of the facility is at risk.

(C) The safety or security of the resident is at risk.

(4) The conditions under which mail or communication shall be opened by staff in the presence of the resident shall be specified.

(5) If mail or communication is to be censored, the resident shall be informed in advance.

(6) The censorship of mail or written communication shall be included in the resident's plan of care.

(7) The reason for each occasion of censorship shall be documented and kept in the resident's record.

(8) Writing materials and postage for the purposes of correspondence shall be available to each resident. Materials and postage for at least two letters each week shall be provided for each resident.

(9) First-class letters and packages shall be forwarded after the transfer or release of each resident. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1262. Behavior management. (a) Policies and procedures. Each permittee and each licensee shall implement policies and procedures for the behavior management of residents.

(1) Written policies shall provide for a behavior management system that assists residents to develop inner control and manage their own behavior in a socially acceptable manner. Procedures and practice shall include expectations that are age-appropriate and allow for special abilities and limitations.

(2) Written rules of conduct shall define expected behaviors.

(A) A rule book describing the expected behaviors shall be given to each resident and each direct care staff member.

(B) An acknowledgment of receipt of the rule book shall be signed by each resident and kept in each resident's file.

(C) If a literacy or language problem prevents a resident from understanding the rule book, a staff member or translator shall assist the resident in understanding the rules.

(3) Each staff member and each volunteer who has direct contact with residents shall be informed of the rules of resident conduct, the rationale for the rules, and the intervention options available for problem or conflict resolution, diffusion of anger, and de-escalation methods.

(b) Prohibited punishment. Each permittee and each licensee shall ensure that each resident is protected against all forms of neglect, exploitation, and degrading forms of discipline.

(1) No staff member or volunteer shall use any of the following means or methods of punishment of a resident:

(A) Punishment that is humiliating, frightening, or physically harmful to the resident;

(B) corporal punishment, including hitting with the hand or any object, yanking arms or pulling hair, excessive exercise, exposure to extreme temperatures, and any other measure that produces physical pain or threatens the resident's health or safety;

(C) restricting movement by tying or binding;

(D) confining a resident in a closet, box, or locked area;

(E) forcing or withholding food, rest, or toilet use;

(F) mental and emotional cruelty, including verbal abuse, derogatory remarks about a resident or the resident's family, statements intended to shame, threaten, humiliate, or frighten the

resident, and threats to expel a resident from the facility; or

(G) placing soap, or any other substance that stings, burns, or has a bitter taste, in the resident's mouth or on the tongue or any other part of the resident's body.

(2) No staff member or volunteer shall make sexual remarks or advances toward, or engage in physical intimacies or sexual activities with, any resident.

(3) No staff member or volunteer shall exercise undue influence or duress over any resident, including promoting sales of services or goods, in a manner that would exploit the resident for the purpose of financial gain, personal gratification, or advantage of the staff member, volunteer, or a third party.

(c) Medications, remedies, and drugs. Each staff member and each volunteer shall be prohibited from using medications, herbal or folk remedies, or drugs to control or manage any resident's behavior, except as prescribed by a licensed physician, a physician's assistant operating under a written protocol as authorized by a responsible physician, or an APRN operating under a written protocol as authorized by a responsible physician and operating under the APRN's scope of practice.

(d) Publicity or promotional activities. No resident shall be forced to participate in publicity or promotional activities. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1263. Staff member schedule; supervision of residents. (a) Staff member schedule.

(1) Each permittee and each licensee shall develop and implement a written daily staff member schedule. The schedule shall meet the requirements for the staffing ratios of direct care staff members to residents at all times.

(A) The schedule shall provide for sufficient staff members on the living unit to provide direct supervision to the residents at all times and to provide for each resident's physical, social, emotional, and educational needs.

(B) The schedule shall provide for a minimum staffing ratio of one direct care staff member on active duty to four residents during waking hours and one direct care staff member on active duty to seven residents during sleeping hours.

(C) At least one direct care staff member of the same sex as the residents shall be present, awake,

and available to the residents at all times. If both male and female residents are present in the facility, at least one male and one female direct care staff member shall be present, awake, and available.

(2) At no time shall there be fewer than two direct care staff members present on the living unit when one or more residents are in care.

(3) Alternate qualified direct care staff members shall be provided for the relief of the scheduled direct care staff members on a one-to-one basis and in compliance with the staffing ratios of direct care staff members to residents.

(4) Only direct care staff members shall be counted in the required staffing ratio of direct care staff members to residents.

(b) Supervision of residents.

(1) No resident shall be left unsupervised.

(2) Electronic supervision shall not replace the ratio requirements.

(3) Staff members shall know the location of each resident at all times.

(c) Movements and activities of residents. Each permittee and each licensee shall implement policies and procedures for determining when the movements and activities of a resident could, for treatment purposes, be restricted or subject to control through increased direct supervision. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1264. Emergency plan; safety, security, and control. (a) Emergency plan. Each permittee and each licensee shall implement an emergency plan to provide for the safety of residents, staff members, volunteers, and visitors in emergencies.

(1) The emergency plan shall include the following information:

(A) Input from local emergency response entities, including the fire departments and law enforcement;

(B) the types of emergencies likely to occur in the facility or near the facility, including fire, weather-related events, missing or runaway residents, chemical releases, utility failure, intruders, and an unscheduled closing;

(C) the types of emergencies that could require evacuating the facility and the types that could require the residents, staff members, volunteers, and visitors to shelter in place;

(D) participation in community practice drills for emergencies;

(E) procedures to be followed by staff members in each type of emergency;

(F) designation of a staff member to be responsible for each of the following:

(i) Communicating with emergency response resources, including the fire department and law enforcement;

(ii) ensuring that all residents, staff members, volunteers, and visitors are accounted for;

(iii) taking the emergency contact numbers and a cell phone; and

(iv) contacting the parent, legal guardian, or placing agent of each resident;

(G) the location and means of reaching a shelter-in-place area in the facility, including safe movement of any resident, staff member, volunteer, or visitor with special health care or mobility needs; and

(H) the location and means of reaching an emergency site if evacuating the facility, including the following:

(i) Safely transporting the residents, including residents with special health care or mobility needs;

(ii) transporting emergency supplies, including water, food, clothing, blankets, and health care supplies; and

(iii) obtaining emergency medical care.

(2) The emergency plan shall be kept on file in the facility.

(3) Each staff member shall be informed of and shall follow the emergency plan.

(4) The emergency plan shall be reviewed annually and updated as needed.

(5) The location and means of reaching the shelter-in-place area or an emergency site if evacuating the facility shall be posted in a conspicuous place in the facility.

(b) Fire drills. Each permittee and each licensee shall ensure that a fire drill is conducted at least quarterly and is scheduled to allow participation by each resident. The date and time of each drill shall be recorded and kept on file at the facility for one calendar year.

(c) Tornado drills. Each permittee and each licensee shall ensure that a tornado drill is conducted at least quarterly and is scheduled to allow participation by each resident. The date and time of each drill shall be recorded and kept on file at the facility for one calendar year.

(d) Facility security and control of residents. Each permittee and each licensee shall implement policies and procedures that include the use of a combination of direct supervision, inspection, and

accountability to promote safe and orderly operations. The policies and procedures shall be developed with input from local law enforcement and shall include all of the following requirements:

(1) Written operational shift assignments shall state the duties and responsibilities for each assigned staff member.

(2) Supervisory staff shall maintain a permanent log and prepare shift reports that record routine and emergency situations.

(3) All security devices, including locking mechanisms on doors and any delayed-exit mechanisms on doors, shall have current written approval from the state fire marshal and shall be regularly inspected and maintained, with any corrective action completed as necessary and recorded.

(4) The use of mace, pepper spray, and other chemical agents shall be prohibited.

(5) No resident shall have access to any weapons.

(6) Provisions shall be made for the control and use of keys, tools, medical supplies, and culinary equipment.

(7) No resident or group of residents shall exercise control or authority over another resident, have access to the records of another resident, or have access to or the use of keys that control security.

(8) Provisions shall be made for handling run-aways and unauthorized absences of residents.

(9) Provisions shall be made for safety and security precautions pertaining to any vehicles used to transport residents.

(10) Provisions shall be made for the prosecution of any illegal act committed while the resident is in care.

(11) Provisions shall be made for documentation of all incidents, including riots and the taking of hostages.

(A) A written report of each incident shall be submitted to the administrator no later than the end of the shift during which the incident occurred. A copy of each report shall be kept in the record of each resident involved in the incident.

(B) A report of each incident shall be made as required in K.A.R. 28-4-1257.

(12) Provisions shall be made for the control of prohibited items and goods, including the screening and searches of residents and visitors and searches of rooms, spaces, and belongings.

(13) Requirements shall be included for 24-hour-a-day observation of all facility entrances and exits by an auxiliary staff member.

(e) Storage and use of hazardous substances and unsafe items. Each permittee and each licensee

shall ensure that the following requirements are met for storage and use of hazardous substances and unsafe items:

(1) No resident shall have unsupervised access to poisons, hazardous substances, or flammable materials. These items shall be kept in locked storage when not in use.

(2) Provisions shall be made for the safe and sanitary storage and distribution of personal care and hygiene items. The following items shall be stored in an area that is either locked or under the control of staff members:

(A) Aerosols;

(B) alcohol-based products;

(C) any products in glass containers; and

(D) razors, blades, and any other sharp items.

(3) Policies and procedures shall be developed and implemented for the safe storage and disposal of prescription and nonprescription medications.

(A) All prescription and nonprescription medications shall be stored in a locked cabinet located in a designated area accessible to and supervised by only staff members.

(B) All refrigerated medications shall be stored under all food items in a locked refrigerator, in a refrigerator in a locked room, or in a locked medicine box in a refrigerator.

(C) Medications taken internally shall be kept separate from other medications.

(D) All unused medications shall be accounted for and disposed of in a safe manner, including being returned to the pharmacy, transferred with the resident, or safely discarded.

(4) Each facility shall have first-aid supplies, which shall be stored in a locked cabinet located in a designated area accessible to and supervised by only staff members. First-aid supplies shall include the following supplies:

(A) Assorted adhesive strip bandages;

(B) adhesive tape;

(C) a roll of gauze;

(D) scissors;

(E) a package of gauze squares;

(F) liquid soap;

(G) an elastic bandage;

(H) tweezers;

(I) rubbing alcohol; and

(J) disposable nonporous gloves in assorted sizes. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1265. Environmental requirements.**(a) General building requirements.**

(1) Each applicant, each permittee, and each licensee shall ensure that the facility is connected to public water and sewage systems, where available. If public water and sewage systems are not available, each applicant shall obtain approval for any private water and sewage systems by the health authorities having jurisdiction over private water and sewage systems where the facility is located.

(2) A licensed architect shall be responsible for the plans for any newly constructed building or for any major addition or major alteration to an existing building.

(A) For a new building, preliminary plans and outline specifications, including plot plans, shall be submitted to the department for review before beginning the final working drawings and specifications. Each applicant, each permittee, and each licensee shall submit the final working drawings, construction specifications, and plot plans to the department for review and written approval before the letting of contracts.

(B) For an addition or alteration to an existing building, each applicant, each permittee, and each licensee shall submit a written statement defining the proposed use of the construction and detailing the plans and specifications to the department for review and written approval before beginning construction.

(C) If construction is not begun within one year of submitting a proposal for a new building or an addition or alteration to an existing building, each licensee shall resubmit the plans and proposal to the department before proposed construction begins.

(b) Location and grounds requirements. Each permittee and each licensee shall ensure that the following requirements are met for the location and grounds of the facility:

(1) Community resources, including health services, police protection, and fire protection from an organized fire department, shall be available.

(2) There shall be at least 100 square feet of outside activity space available for each resident allowed to utilize each outdoor area at any one time.

(3) The outside activity area shall be free of physical hazards.

(4) Residents of the facility shall not share space with another child care facility for any indoor or outdoor activities.

(c) Swimming pools. Each permittee and each licensee shall ensure that the following requirements are met if a swimming pool is located on the premises:

(1) The pool shall be constructed, maintained, and used in a manner that safeguards the lives and health of the residents.

(2) Legible safety rules shall be posted for the use of a swimming pool in a conspicuous location. If the pool is available for use, each permittee and each licensee shall read and review the safety rules weekly with each resident.

(3) An individual with a lifesaving certificate shall be in attendance when residents are using a swimming pool.

(4) Each inground swimming pool shall be enclosed by a fence at least five feet high. Each gate in the fence shall be kept closed and shall be self-locking. The wall of a building containing a window designed to open or a door shall not be used in place of any side of the fence.

(5) Each aboveground swimming pool shall be at least four feet high or shall be enclosed by a fence at least five feet high with a gate that is kept closed and is self-locking. Steps shall be removed and stored away from the pool when the pool is not in use. Each aboveground pool with a deck or berm that provides a ground-level entry on any side shall be treated as an in-ground pool.

(6) Sensors shall not be used in place of a fence.

(7) The water shall be maintained between pH 7.2 and pH 7.8. The water shall be disinfected by free available chlorine between 1.0 parts per million and 3.0 parts per million, by bromine between 1.0 parts per million and 6.0 parts per million, or by an equivalent agent approved by the local health department.

(8) If a stabilized chlorine compound is used, the pH shall be maintained between 7.2 and 7.7 and the free available chlorine residual shall be at least 1.50 parts per million.

(9) The pool shall be cleaned and the chlorine or equivalent disinfectant level and pH level shall be tested every two hours during periods of use.

(10) The water temperatures shall be maintained at no less than 82 degrees Fahrenheit and no more than 88 degrees Fahrenheit while the pool is in use.

(11) Each swimming pool more than six feet in width, length, or diameter shall be equipped with either a ring buoy and rope or a shepherd's hook. The equipment shall be of sufficient length to reach the center of the pool from each edge of the pool.

(d) Structural requirements and use of space. Each permittee and each licensee shall ensure that the facility design, structure, interior and exterior environment, and furnishings promote a safe, comfortable, and therapeutic environment for the residents.

(1) Each facility shall be accessible to and usable by individuals with disabilities.

(2) Each facility's structural design shall facilitate personal contact and interaction between staff members and residents.

(3) Each sleeping room shall meet the following requirements:

(A) Each room shall be assigned to and occupied by only one resident.

(B) No resident's room shall be in a basement.

(C) The minimum square footage of floor space shall be 80 square feet. At least one dimension of the usable floor space unencumbered by furnishings or fixtures shall be at least seven feet.

(D) The minimum ceiling height shall be seven feet eight inches over at least 90 percent of the room area.

(E) An even temperature of between 68 degrees Fahrenheit and 78 degrees Fahrenheit shall be maintained, with an air exchange of at least four times each hour.

(F) Each sleeping room shall have a source of natural light.

(G) Access to a drinking water source and toilet facilities shall be available 24 hours a day.

(H) A separate bed with a level, flat mattress in good condition shall be provided for each resident. All beds shall be above the floor level.

(I) Clean bedding, adequate for the season, shall be provided for each resident. Bed linen shall be changed at least once a week or, if soiled, more frequently.

(4) Adequate space for study and recreation shall be provided.

(5) Each living unit shall contain the following:

(A) Furnishings that provide sufficient seating for the maximum number of residents expected to use the area at any one time;

(B) writing surfaces that provide sufficient space for the maximum number of residents expected to use the area at any one time; and

(C) furnishings that are consistent with the needs of the residents.

(6) Each facility shall have adequate central storage for household supplies, bedding, linen, and recreational equipment.

(7) If a facility has one or more dayrooms, each

dayroom shall provide space for a variety of resident activities. Dayrooms shall be situated immediately adjacent to the residents' sleeping rooms, but separated from the sleeping rooms by a floor-to-ceiling wall. Each dayroom shall provide at least 35 square feet for each resident, exclusive of lavatories, showers, and toilets, for the maximum number of residents expected to use the dayroom area at any one time.

(8) Each room used for sports and other physical activities shall provide floor space equivalent to at least 100 square feet for each resident utilizing the room for those purposes at any one time.

(9) Sufficient space shall be provided for visitation between residents and visitors. The facility shall have space for the screening and search of residents and visitors, if screening and search are included in the facility's policies and procedures. Private space shall be available for searches as needed. Storage space shall be provided for the secure storage of visitors' coats, handbags, and other personal items not allowed into the visitation area.

(10) A working telephone shall be accessible to staff members in all areas of the building. Emergency numbers, including those for the fire department, the police, a hospital, a physician, the poison control center, and an ambulance, shall be posted by each telephone.

(11) A service sink and a locked storage area for cleaning supplies shall be provided in a room or closet that is well ventilated and separate from kitchen and living areas.

(e) Bathrooms and drinking water. Each permittee and each licensee shall ensure that the following requirements are met for bathrooms and drinking water at the facility:

(1) For each eight or fewer residents of each sex, at least one toilet, one lavatory, and either a bathtub or a shower shall be provided. All toilets shall be above floor level.

(2) Each bathroom shall be ventilated to the outdoors by means of either a window or a mechanical ventilating system.

(3) Toilet and bathing accommodations and drinking water shall be in a location accessible to sleeping rooms and living and recreation rooms.

(4) Drinking water and at least one bathroom shall be accessible to the reception and admission areas.

(5) Cold water and hot water not exceeding 120 degrees Fahrenheit shall be supplied to lavatories, bathtubs, and showers.

(6) Liquid soap, toilet paper, and paper towels shall be available in all bathrooms.

(f) Building maintenance standards. Each permittee and each licensee shall ensure that the following requirements are met for building maintenance of the facility:

(1) Each building shall be clean at all times and free from vermin infestation.

(2) The walls shall be smooth, easily cleanable, and sound. Lead-free paint shall be used on all painted surfaces.

(3) The floors and walking surfaces shall be kept free of hazardous substances at all times.

(4) The floors shall not be slippery or cracked.

(5) Each rug or carpet used as a floor covering shall be slip-resistant and free from tripping hazards. A floor covering, paint, or sealant shall be required over concrete floors for all buildings used by the residents.

(6) All bare floors shall be swept and mopped daily.

(7) A schedule for cleaning each building shall be established and maintained.

(8) Washing aids, including brushes, dish mops, and other hand aids used in dishwashing activities, shall be clean and used for no other purpose.

(9) Mops and other cleaning tools shall be cleaned and dried after each use and shall be hung on racks in a well-ventilated place.

(10) Pesticides and any other poisons shall be used in accordance with the product instructions. These substances shall be stored in a locked area.

(11) Toilets, lavatories, sinks, and other such accommodations in the living areas shall be cleaned each day. (Authorized by and implementing K.S.A. 2013 Supp. 65-508 and 65-535; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1266. Food services. Each permittee and each licensee shall ensure that food preparation, service, safety, and nutrition meet the requirements of this regulation. For purposes of this regulation, "food" shall include beverages.

(a) Sanitary practices. Each individual engaged in food preparation and food service shall use sanitary methods of food handling, food service, and storage.

(1) Only authorized individuals shall be in the food preparation area.

(2) Each individual who has any symptoms of an illness, including fever, vomiting, and diarrhea, shall be excluded from the food preparation area and shall remain excluded from the food

preparation area until the individual has been asymptomatic for at least 24 hours or provides the administrator with written documentation from a health care provider stating that the symptoms are from a noninfectious condition.

(3) Each individual who contracts any infectious or contagious disease specified in K.A.R. 28-1-6 shall be excluded from the food preparation area and shall remain excluded from the food preparation area until the isolation period required for that disease is over or until the individual provides the administrator with written documentation from a health care provider that the individual is no longer a threat to the health and safety of others when preparing or handling food.

(4) Each individual with an open cut or abrasion on the hand or forearm or with a skin sore shall cover the sore, cut, or abrasion with a bandage before handling or serving food.

(5) The hair of each individual shall be restrained when the individual is handling food.

(6) Each individual handling or serving food shall comply with both of the following requirements for handwashing:

(A) Each individual shall wash that individual's hands and exposed portions of the individual's arms before working with food, after using the toilet, and as often as necessary to keep the individual's hands clean and to minimize the risk of contamination.

(B) Each individual shall use an individual towel, disposable paper towels, or an air dryer to dry that individual's hands.

(7) Each individual preparing or handling food shall minimize bare hand and bare arm contact with exposed food that is not in a ready-to-eat form.

(8) Except when washing fruits and vegetables, no individual handling or serving food may contact exposed, ready-to-eat food with the individual's bare hands.

(9) Each individual shall use single-use gloves, food-grade tissue paper, dispensing equipment, or utensils, including spatulas and tongs, when handling or serving exposed, ready-to-eat food.

(b) Nutrition.

(1) The meals and snacks shall meet the nutritional needs of the residents. The meals and snacks shall include a variety of healthful foods, including fresh fruits, fresh vegetables, whole grains, lean meats, and low-fat dairy products. A sufficient quantity of food shall be prepared for each meal to allow each resident second portions of bread and milk and either vegetables or fruit.

(2) Special diets shall be provided for residents for either of the following reasons:

- (A) Medical indication; or
- (B) accommodation of religious practice.

(3) Each meal shall be planned and the menu shall be posted at least one week in advance. A copy of the menu of each meal served for the preceding month shall be kept on file and available for inspection.

(c) Food service and preparation areas. If food is prepared on the facility premises, the food preparation area shall be separate from the eating area, activity area, laundry area, and bathrooms and shall not be used as a passageway during the hours of food preparation and cleanup.

(1) All surfaces used for food preparation and tables used for eating shall be made of smooth, nonporous material.

(2) Before and after each use, all food preparation surfaces shall be cleaned with soapy water and sanitized by use of a solution of one ounce of bleach to one gallon of water or a sanitizing solution used in accordance with the manufacturer's instructions.

(3) Before and after each use, the tables used for eating shall be cleaned by washing with soapy water.

(4) All floors shall be swept daily and mopped when spills occur.

(5) Garbage shall be disposed of in a garbage disposal or in a covered container. If a container is used, the garbage shall be removed at the end of each day or more often as needed to prevent overflow or to control odor.

(6) Each food preparation area shall have handwashing fixtures equipped with soap and hot and cold running water and with individual towels, paper towels, or air dryers. Each sink used for handwashing shall be equipped to provide water at a temperature of at least 100 degrees Fahrenheit. The water temperature shall not exceed 120 degrees Fahrenheit.

(A) If the food preparation sink is used for handwashing, the sink shall be sanitized before using it for food preparation by use of a solution of $\frac{1}{4}$ cup of bleach to one gallon of water.

(B) Each facility with 25 or more residents shall be equipped with handwashing fixtures that are separate from the food preparation sink.

(7) Clean linen used for food preparation or service shall be stored separately from soiled linen.

(d) Food storage and refrigeration. All food shall be stored and served in a way that protects the food from cross-contamination.

(1) Nonrefrigerated food.

(A) All food not requiring refrigeration shall be stored at least six inches above the floor in a clean, dry, well-ventilated storeroom or cabinet in an area with no overhead drain or sewer lines and no vermin infestation.

(B) Dry bulk food that has been opened shall be stored in metal, glass, or food-grade plastic containers with tightly fitting covers and shall be labeled with the contents and the date opened.

(C) Food shall not be stored with poisonous or toxic materials. If cleaning agents cannot be stored in a room separate from food storage areas, the cleaning agents shall be clearly labeled and kept in locked cabinets not used for the storage of food.

(2) Refrigerated and frozen food.

(A) All perishables and potentially hazardous foods requiring refrigeration shall be continuously maintained at 41 degrees Fahrenheit or lower in the refrigerator or 0 degrees Fahrenheit in the freezer.

(B) Each refrigerator and each freezer shall be equipped with a visible, accurate thermometer.

(C) Each refrigerator and each freezer shall be kept clean inside and out.

(D) All food stored in the refrigerator shall be covered, wrapped, or otherwise protected from contamination. Unserved, leftover perishable foods shall be dated, refrigerated immediately after service, and eaten within three days.

(E) Raw meat shall be stored in the refrigerator in a manner that prevents meat fluids from dripping on other foods.

(F) Ready-to-eat, commercially processed foods, including luncheon meats, cream cheese, and cottage cheese, shall be eaten within five days after opening the package.

(3) Hot foods.

(A) Hot foods that are to be refrigerated shall be transferred to shallow containers in layers less than three inches deep and shall not be covered until cool.

(B) Potentially hazardous cooked foods shall be cooled in a manner to allow the food to cool within two hours from 135 degrees Fahrenheit to 70 degrees Fahrenheit or within six hours from 135 degrees Fahrenheit to 41 degrees Fahrenheit.

(e) Meals or snacks prepared on the premises.

(1) All of the following requirements shall be met when meals or snacks are prepared on the facility premises:

(A) All dairy products shall be pasteurized. Powdered milk shall be used for cooking only.

(B) Meat shall be obtained from government-inspected sources.

(C) Raw fruits and vegetables shall be washed thoroughly before being eaten or used for cooking.

(D) Frozen foods shall be defrosted in the refrigerator, under cold running water, in a microwave oven using the defrost setting, or during the cooking process. Frozen foods shall not be defrosted by leaving them at room temperature or in standing water.

(E) Cold foods shall be maintained and served at temperatures of 41 degrees Fahrenheit or less.

(F) Hot foods shall be maintained and served at temperatures of at least 140 degrees Fahrenheit.

(2) The following foods shall not be served or kept:

(A) Home-canned food;

(B) food from dented, rusted, bulging, or leaking cans; and

(C) food from cans without labels.

(f) Meals or snacks catered. The following requirements shall be met for each meal or snack that is not prepared on the facility premises:

(1) The snack or meal shall be obtained from a child care facility licensed by the department or from a food service establishment or a catering service licensed by the secretary of the Kansas department of agriculture.

(2) If food is transported to the facility, only food that has been transported promptly in clean, covered containers shall be served to the residents.

(g) Table service and cooking utensils.

(1) All of the table service, serving utensils, and food cooking or serving equipment shall be stored in a clean, dry location at least six inches above the floor. None of these items shall be stored under an exposed sewer line or a dripping water line or in a bathroom.

(2) Clean table service shall be provided to each resident, including dishes, cups or glasses, and forks, spoons, and knives, as appropriate for the food being served.

(A) Clean cups, glasses, and dishes designed for repeat use shall be made of smooth, durable, and nonabsorbent material and shall be free from cracks or chips.

(B) Disposable, single-use table service shall be of food grade and medium weight and shall be disposed of after each use.

(3) If nondisposable table service and cooking utensils are used, the table service and cooking utensils shall be sanitized using either a manual washing method or a mechanical dishwasher.

(A) If using a manual washing method, all of the following requirements shall be met:

(i) A three-compartment sink with hot and cold running water to each compartment and a drainboard shall be used for washing, rinsing, sanitizing, and air-drying.

(ii) An appropriate chemical test kit, a thermometer, or another device shall be used for testing the sanitizing solution and the water temperature.

(B) If using a mechanical dishwasher, the dishwasher shall be installed and operated in accordance with the manufacturer's instructions and shall be maintained in good repair. (Authorized by and implementing K.S.A. 2013 Supp. 65-508; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1267. Laundry. (a) If laundry is done at the facility, each permittee and each licensee shall ensure that the laundry sinks, the appliances, and the countertops or tables used for laundry are located in an area separate from food preparation areas and are installed and used in a manner that safeguards the health and safety of the residents. Adequate space shall be allocated for the laundry room and the storage of laundry supplies, including locked storage for all chemical agents used in the laundry area.

(b) Each permittee and each licensee shall ensure that adequate space is allocated for the storage of clean and dirty linen and clothing. Soiled linen shall be stored separately from clean linen.

(c) Each permittee and each licensee shall ensure that blankets are laundered at least once each month or, if soiled, more frequently. Blankets shall be laundered or sanitized before reissue.

(d) Each permittee and each licensee shall ensure that each mattress is water-repellent and washed down and sprayed with disinfectant before reissue. The mattress materials and treatments shall meet the applicable requirements of the state fire marshal's regulations. (Authorized by and implementing K.S.A. 2013 Supp. 65-508; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1268. Transportation. Each permittee and each licensee shall ensure that all of the following requirements are met when providing transportation for residents:

(a) Each permittee and each licensee shall implement policies and procedures for transportation of residents, including the following:

(1) Procedures to be followed in case of an accident, injury, or other incident as specified in K.A.R. 28-4-1257;

(2) a list of all staff members authorized to transport residents; and

(3) for each staff member authorized to transport residents, documentation of a valid driver's license that meets the requirements of the Kansas motor vehicle drivers' license act, K.S.A. 8-234a et seq. and amendments thereto.

(b) Each permittee and each licensee shall ensure that a safety check is performed on each transporting vehicle before being placed in service and annually. A record of each safety check and all repairs and improvements made shall be kept on file at the facility. When any resident is transported in a privately owned vehicle, the vehicle shall be in safe working condition.

(c) Each vehicle used to transport any resident shall be covered by accident and liability insurance as required by the state of Kansas.

(d) Each transporting vehicle owned or leased by the facility shall have a first-aid kit, which shall include disposable nonporous gloves, a cleansing agent, scissors, bandages of assorted sizes, adhesive tape, a roll of gauze, one package of gauze squares at least four inches by four inches in size, and one elastic bandage.

(e) Each vehicle used to transport any resident shall be equipped with an individual seat belt for the driver and an individual seat belt for each passenger. The driver and each passenger shall be secured by a seat belt when the vehicle is in motion.

(f) The health and safety of the residents riding in any vehicle shall be protected.

(1) All passenger doors shall be locked while the vehicle is in motion.

(2) Order shall be maintained at all times. The driver shall be responsible for ensuring that the vehicle is not in motion if the behavior of the occupants prevents the safe operation of the vehicle.

(3) All parts of each resident's body shall remain inside the vehicle at all times.

(4) Residents shall neither enter nor exit the vehicle from or into a lane of traffic.

(5) When the vehicle is vacated, the driver shall make certain that no resident is left in the vehicle.

(6) Smoking in the vehicle shall be prohibited.

(7) Medical and surgical consent forms and health assessment records shall be in the vehicle if a resident is transported 60 miles or more from the facility.

(g) Each resident shall be transported directly to the location designated by the permittee or the licensee. No unauthorized stops shall be made along the way, except in an emergency. (Authorized by and implementing K.S.A. 2013 Supp. 65-508; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

28-4-1269. Animals. Each permittee and each licensee shall ensure that the following requirements are met for any animals on the facility premises:

(a) If any animals are kept on the facility premises, the pet area shall be maintained in a sanitary manner, with no evidence of flea, tick, or worm infestation.

(b) No animal shall be in the food preparation area.

(c) Each domesticated dog and each domesticated cat shall have a current rabies vaccination given by a veterinarian. A record of all vaccinations shall be kept on file in the facility.

(d) Each permittee and each licensee shall ensure that each animal that is in contact with any resident meets the following conditions:

(1) Is in good health, with no evidence of disease; and

(2) is friendly and poses no threat to the health, safety, and welfare of residents. (Authorized by and implementing K.S.A. 2013 Supp. 65-508; effective, T-28-12-17-13, Dec. 17, 2013; effective March 28, 2014.)

BIRTH CENTERS

28-4-1300. Definitions. For the purposes of K.A.R. 28-4-1300 through K.A.R. 28-4-1318, the following terms shall have the meanings specified in this regulation:

(a) "Apgar scores" means a measure of a newborn's physical condition at one, five, and 10 minutes after birth.

(b) "Applicant" means a person who has applied for a license but who has not yet been granted a license to operate a birth center. This term shall include an applicant who has been granted a temporary permit to operate a birth center.

(c) "Birthing room" means a room designed, equipped, and arranged to provide for the care of a patient, a newborn, and the patient's support person or persons during and following childbirth.

(d) "Certified midwife" means an individual who is educated in the discipline of midwifery and who is currently certified by the American college

of nurse-midwives or the American midwifery certification board, inc.

(e) “Certified nurse-midwife” means an individual who meets the following requirements:

(1) Is educated in the two disciplines of nursing and midwifery;

(2) is currently certified by the American college of nurse-midwives or the American midwifery certification board, inc; and

(3) has a current nursing license in Kansas.

(f) “Certified professional midwife” means an individual who is educated in the discipline of midwifery and who is currently certified by the North American registry of midwives.

(g) “Clinical director” means an individual who is appointed by the licensee and is responsible for the direction and oversight of clinical services at a birth center as specified in K.A.R. 28-4-1305.

(h) “Clinical staff member” means an individual employed by or serving as a consultant to the birth center who is one of the following:

(1) The clinical director or acting clinical director;

(2) a licensed physician;

(3) a certified nurse-midwife;

(4) a certified professional midwife;

(5) a certified midwife; or

(6) a registered professional nurse.

(i) “Department” means Kansas department of health and environment.

(j) “Exception” means a waiver of an applicant’s or a licensee’s compliance with a specific birth center regulation or any portion of a specific birth center regulation, granted by the secretary to the applicant or licensee.

(k) “License capacity” means the maximum number of patients that can be cared for in a birth center during labor, delivery, and recovery.

(l) “Licensee” means a person who has been granted a license to operate a birth center.

(m) “Maternity center” has the meaning specified in K.S.A. 65-502, and amendments thereto, and may also be referred to as a “birth center.”

(n) “Normal, uncomplicated delivery” means a delivery that results in a vaginal birth and that does not require the use of general, spinal, or epidural anesthesia.

(o) “Normal, uncomplicated pregnancy” means a pregnancy that is initially determined to be at a low risk for a poor pregnancy outcome and that remains at a low risk throughout the pregnancy.

(p) “Patient” means a woman who has been accepted for services at a birth center during pregnancy, labor, delivery, and recovery.

(q) “Poor pregnancy outcome” means any outcome other than a live, healthy patient and newborn.

(r) “Premises” means the location, including each building and any adjoining grounds, of a birth center.

(s) “Secretary” means secretary of the Kansas department of health and environment. (Authorized by K.S.A. 65-508 and 65-510; implementing K.S.A. 65-502 and 65-508; effective July 9, 2010.)

28-4-1301. Applicant and licensee requirements. (a) Each applicant, if an individual, shall be at least 21 years of age at the time of application.

(b) Each applicant and each licensee, if a corporation, shall be in good standing with the Kansas secretary of state. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504 and 65-508; effective July 9, 2010.)

28-4-1302. Application procedures. (a) Each person, in order to obtain a license, shall submit a complete application on the form provided by the department. The application shall be submitted at least 90 calendar days before the planned opening date of the birth center and shall include all of the following:

(1) A detailed description of the services to be provided;

(2) a detailed floor plan and site plan for the premises to be licensed; and

(3) the nonrefundable license fee specified in K.A.R. 28-4-92.

(b) At the time of the initial inspection, each applicant shall have the following information on file:

(1) Written verification from the applicable local authorities showing that the premises are in compliance with all local codes and ordinances, including all building, fire, and zoning requirements;

(2) written verification from the state fire marshal showing that the premises are in compliance with all applicable fire codes and regulations;

(3) written verification from local or state authorities showing that the private water supply and sewerage systems conform to all state and local laws; and

(4) documentation of the specific arrangements that have been made for the removal of biomedical waste and human tissue from the premises.

(c) The granting of a license to any applicant may be refused by the secretary if the applicant

is not in compliance with the requirements of the following:

- (1) K.S.A. 65-504 through 65-508, and amendments thereto;
- (2) K.S.A. 65-512 and 65-513, and amendments thereto;
- (3) K.S.A. 65-531, and amendments thereto; and
- (4) all regulations governing birth centers. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-501, 65-504, 65-505, and 65-508; effective July 9, 2010.)

28-4-1303. Terms of a temporary permit or a license. (a) License capacity. The maximum number of patients authorized by a temporary permit or a license shall not be exceeded.

(b) Posting temporary permit or license. The current temporary permit or the current license shall be posted conspicuously within the birth center.

(c) Validity of temporary permit or a license. Each temporary permit or license shall be valid for the applicant or licensee and the address specified on the temporary permit or the license. When an initial or amended license becomes effective, all temporary permits or licenses previously granted to the applicant or licensee at the same address shall become invalid.

(d) Advertising. The advertising for each birth center shall conform to the statement of services included with the application. A claim for specialized services, even if specified on the application for a birth center, shall not be made unless the birth center is staffed and equipped to offer those services. No general claim of being "state-approved" shall be made until the applicant has been issued a temporary permit or a license by the secretary.

(e) Withdrawal of application or request to close. Any applicant may withdraw the application for a license. Any licensee may, at any time, request to close a birth center. If an application is withdrawn or a birth center is closed, each temporary permit or license granted for that birth center shall become invalid. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504 and 65-508; effective July 9, 2010.)

28-4-1304. Temporary permit or license; amended license; exceptions; notification; renewal. (a) Temporary permit or license required. Each person shall obtain a temporary permit or a

license from the secretary to operate a birth center before providing any birth center services.

(b) New temporary permit or license required. Each applicant or licensee shall submit a new application, the required verifications and documentation, and license fee and shall obtain a temporary permit or a license from the secretary under any of the following circumstances:

(1) Before a birth center that has been closed is reopened;

(2) if there is a change in the location of the birth center; or

(3) if there is a change of ownership of the birth center.

(c) Amended license.

(1) Any licensee may submit a request for an amended license. Each licensee who intends to change the terms of the license, including the maximum number of patients to be served, shall submit a request for an amended license on a form provided by the department and a nonrefundable amendment fee of \$35. An amendment fee shall not be required if the request to change the terms of the license is made at the time of the renewal.

(2) The licensee shall make no change to the terms of the license unless permission is granted, in writing, by the secretary. If granted, the licensee shall post the amended license, and the previous license shall no longer be in effect.

(d) Exceptions.

(1) Any applicant or licensee may request an exception from the secretary. Any request for an exception may be granted if the secretary determines that the exception is in the best interest of one or more patients or newborns and the exception does not violate statutory requirements.

(2) Written notice from the secretary stating the nature of the exception and the duration of the exception shall be kept on file at the birth center and shall be readily accessible to the department.

(e) Notification. Each applicant and each licensee shall notify the secretary, in writing, before changing any of the following:

(1) The clinical services or activities offered by the birth center;

(2) the physical structure of the birth center due to new construction or substantial remodeling; or

(3) the use of any part of the premises that affects the use of the space or affects the license capacity.

(f) Renewal. No earlier than 90 days before but no later than the renewal date, each licens-

ee wishing to renew the license shall submit the following:

(1) The nonrefundable license fee specified in K.A.R. 28-4-92; and

(2) an application to renew the license on the form provided by the department.

(g) Late renewal. Failure to submit the renewal application and fee as required by subsection (f) shall result in an assessment of a late renewal fee specified in K.S.A. 65-505, and amendments thereto, and may result in closure of the birth center.

(h) Copy of current regulations. A copy of the current Kansas administrative regulations governing birth centers shall be kept on the premises and shall be available to all employees. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-504, 65-505, and 65-508; effective July 9, 2010.)

28-4-1305. Administration. (a) Each licensee shall be responsible for the operation of the birth center, including the following:

(1) Establishing and maintaining a written organizational plan, including an organizational chart designating the lines of authority;

(2) providing employees, facilities, equipment, supplies, and services to patients, newborns, and families;

(3) developing and implementing administrative policies and procedures for the operation of the birth center;

(4) developing and implementing policies and procedures for quality assurance;

(5) appointing an administrator to oversee the operation of the birth center;

(6) appointing a clinical director and hiring employees;

(7) appointing an acting clinical director to provide direction and oversight of clinical services in the absence of the clinical director; and

(8) documenting all of the information specified in this subsection.

(b) Each licensee shall ensure that all birth center contracts, agreements, policies, and procedures are reviewed annually and updated as needed.

(c) Each licensee shall ensure the development and implementation of written policies that set out the necessary qualifications for each position and govern employee selection. A job description for each position shall be available at the birth center.

(d) Each licensee shall ensure that all employees are informed of and follow all written policies,

procedures, and clinical protocols necessary to carry out their job duties.

(e) Each administrator shall oversee the daily operation and maintenance of the birth center and implement the policies and procedures in compliance with licensing requirements for birth centers.

(f) Each clinical director shall provide direction and oversight of clinical services, including the development and implementation of policies, procedures, and signed protocols regarding all matters related to the medical management of pregnancy, birth, postpartum care, newborn care, and gynecologic health care.

(g) Each licensee shall develop and implement written policies and procedures regarding a patient's options for the disposition or taking of fetal remains if a fetal death occurs. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-508 and K.S.A. 2009 Supp. 65-67a10; effective July 9, 2010.)

28-4-1306. Clinical staff member qualifications; employee schedules; training. (a)

Clinical staff member qualifications. Each licensee shall ensure that the following requirements for the clinical staff members are met:

(1) The clinical director and the acting clinical director shall be one of the following:

(A) A physician with a current license to practice in Kansas; or

(B) a certified nurse-midwife.

(2) Each clinical staff member attending labor and delivery shall meet the following qualifications:

(A) Practice within the scope of the clinical staff member's training and experience; and

(B) hold, at a minimum, current certification in adult CPR equivalent to American heart association class C basic life support and current certification in neonatal CPR equivalent to that of the American academy of pediatrics or the American heart association.

(b) Employee schedules.

(1) Each licensee shall ensure that there are sufficient qualified employees on duty and on call for the safe maintenance and operation of the birth center and for the provision of clinical services.

(2) Each licensee shall ensure that a written work schedule is readily accessible to all employees.

(c) Training.

(1) Each licensee shall develop and provide an orientation for all new employees and ongoing in-

service training for all employees that shall meet the following requirements:

(A) Is based on individual job duties and responsibilities;

(B) is designed to meet individual employee training needs; and

(C) is designed to maintain the knowledge and skills necessary to ensure compliance with policies, procedures, and clinical protocols of the birth center.

(2) Orientation and in-service training shall include the following:

(A) Emergency clinical procedures;

(B) recognition of the signs and symptoms of infectious diseases, infection control, and universal precautions;

(C) recognition of signs and symptoms of domestic violence; and

(D) recognition of the signs and symptoms and the reporting of child abuse and neglect.

(3) The documentation of the orientation and the in-service training shall be maintained in each employee's individual record. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1307. Records. (a) Policies and procedures. Each licensee shall ensure that there is an organized recordkeeping system, with policies and procedures that provide for identification, security, confidentiality, control, retrieval, and preservation of all employee records, patient records, and birth center information. All records shall be available at the birth center for review by the secretary.

(b) Employee records. Each licensee shall ensure that an individual record is maintained at the birth center for each employee that includes the following information:

(1) A description of the terms of employment or the volunteer agreement and a copy of the job description;

(2) a copy of the job application detailing the employee's qualifications and employment dates;

(3) copies of current professional licenses, certifications, or registrations;

(4) documentation of the results of any health assessments and tuberculin tests specified in K.A.R. 28-4-1312;

(5) documentation of the orientation and the in-service training specified in K.A.R. 28-4-1306; and

(6) documentation that each employee has access to the following:

(A) The current regulations governing birth centers; and

(B) the birth center policies, procedures, and clinical protocols.

(c) Patient records.

(1) Each licensee shall ensure that a current and complete clinical record for each patient accepted for care in the birth center includes the following:

(A) Identifying information, including the patient's name, address, and telephone number;

(B) documentation of the initial history and physical examination, including laboratory findings and dates;

(C) a signed and dated informed consent form;

(D) all obstetrical risk assessments, including the dates of the assessments;

(E) documentation of instruction and education related to the childbearing process;

(F) the date and time of the onset of labor;

(G) the course of labor, including all pertinent examinations and findings;

(H) the exact date and time of birth, the presenting part of the newborn's body, the sex of the newborn, the numerical order of birth in the event of more than one newborn, and the Apgar scores;

(I) the time of expulsion and the condition of the placenta;

(J) all treatments rendered to the patient and newborn, including prescribing medications and the time, type, and dose of eye prophylaxis;

(K) documentation of metabolic and any other screening tests completed by a clinical staff member;

(L) the condition of the patient and newborn, including any complications and action taken at the birth center;

(M) all medical consultations concerning the patient and the newborn;

(N) all referrals for medical care and transfers to medical care facilities, including the reasons for each referral or transfer;

(O) the results of all examinations of the newborn and of the postpartum patient; and

(P) the written instructions given to the patient regarding postpartum care, family planning, care of the newborn, arrangements for metabolic testing, immunizations, and follow-up pediatric care.

(2) Each entry in each patient's record shall be dated and signed by the attending clinical staff member.

(3) The patient record shall be confidential and shall not be released without the written consent of the patient. Nothing in this regulation shall preclude the review of patient records by the secretary.

(4) All patient records shall be retained for at least 25 years from the date of discharge.

(d) Quality assurance documentation. Each licensee shall maintain on file for at least three calendar years all documentation required for the quality assurance findings specified in K.A.R. 28-4-1309.

(e) Inventory. Each licensee shall maintain on file an inventory of the birth center furnishings, equipment, and supplies.

(f) Drills. Each licensee shall maintain on file for at least one calendar year a record of all disaster and evacuation drills.

(g) Changes. Each applicant and each licensee shall maintain on file at the birth center the documentation of any changes specified in K.A.R. 28-4-1304 and approved by the secretary. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507 and 65-508; effective July 9, 2010.)

28-4-1308. Reporting requirements. (a) Each licensee shall ensure that the following incidents are reported to the department by the next working day, on a form provided by the department, and to any other authorities in accordance with state statute:

(1) A stillbirth or the death of a patient or a newborn;

(2) the death of an employee while on duty;

(3) any intentional or unintentional injuries sustained by any patient, newborn, or employee while on duty;

(4) any fire damage or other damage to the premises that affects the safety of any patient, newborn, or employee; and

(5) any other incident that, in the judgment of the clinical director or the acting clinical director, compromises the ability of the birth center to provide appropriate and safe care to patients and newborns.

(b) If a licensee, employee, patient, or newborn contracts a reportable infectious or contagious disease specified in K.A.R. 28-1-2, the licensee shall ensure that the disease is reported to the county health department as specified in K.A.R. 28-1-2. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1309. Quality assurance. (a) Each licensee shall develop and implement a quality assurance program to evaluate, at least annually, the quality of patient care and the appropriateness of clinical services.

(b) The quality assurance program shall include a system for the assessment of patient and newborn outcomes, clinical protocols, recordkeeping, and infection control.

(c) The quality assurance findings shall be documented and used for the ongoing assessment of clinical services, problem resolution, and plans for service improvement.

(d) All quality assurance findings shall be available at the birth center for review by the secretary. Nothing in this regulation shall preclude the review of patient records by the secretary. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, 65-508, and 65-512; effective July 9, 2010.)

28-4-1310. Clinical services and patient care. (a) Each licensee shall ensure that the clinical services provided at the birth center are limited to those services associated with a normal, uncomplicated pregnancy and a normal, uncomplicated delivery.

(b) Each licensee shall ensure that only the clinical services approved by the clinical director are performed at the birth center.

(c) Each clinical staff member providing services shall work under the direction of and in consultation with the clinical director or the acting clinical director.

(d) Each clinical staff member shall have access to patient diagnostic facilities and services, including a clinical laboratory, sonography, radiology, and electronic monitoring.

(e) Each licensee shall make available to each patient, in writing, information concerning the following:

(1) The clinical services provided by the birth center;

(2) the rights and responsibilities of the patient and the patient's family, including confidentiality, privacy, and consent;

(3) information on the qualifications of the clinical staff members;

(4) the risks and benefits of childbirth at the birth center;

(5) the possibility of patient or newborn transfer if complications arise during pregnancy, labor, or delivery and the procedures for transfer; and

(6) if a fetal death occurs, the patient's options for the taking or disposition of the fetal remains.

(f) Each licensee shall limit patients to those women who are initially determined to be at low maternity risk by a clinical staff member and who

are evaluated regularly throughout the pregnancy to ensure that each patient continues to be at low risk for a poor pregnancy outcome. Each clinical director shall establish a written maternity risk assessment, including screening criteria, which shall be a part of the approved policies.

(g) When conducting the maternity risk assessment, each clinical staff member shall assess the health status and maternity risk factors of each patient after obtaining a detailed medical history, performing a physical examination, and taking into account family circumstances and psychological factors.

(h) The screening criteria of the maternity risk assessment shall be used as a baseline on which the risk status of each potential patient or patient is determined. The screening criteria shall apply to each potential patient before acceptance for birth center services and throughout the pregnancy for continuation of services. The screening criteria shall include the specific qualifications of the clinical staff members and the availability of supplies and equipment needed to provide clinical services safely.

(i) The factors to be considered in the development of the maternity risk assessment shall include the following:

(1) Age of the patient as a possible factor in determining the potential additional risk of poor pregnancy outcome;

(2) major medical problems including any of the following:

(A) Chronic hypertension, heart disease, or pulmonary embolus;

(B) any congenital heart defect assessed as pathological by a cardiologist that places the patient or fetus at risk;

(C) a renal disease;

(D) a drug addiction or required use of anticonvulsant drugs;

(E) diabetes mellitus;

(F) thyroid disease; or

(G) a bleeding disorder or hemolytic disease;

(3) previous history of significant obstetrical complications, including any of the following:

(A) RH sensitization;

(B) a previous uterine wall surgery, including caesarean section;

(C) seven or more term pregnancies;

(D) a previous placental abruption; or

(E) a previous preterm birth; and

(4) medical indication of any of the following:

(A) Pregnancy-induced hypertension;

(B) polyhydramnios or oligohydramnios;

(C) a placental abruption;

(D) chorioamnionitis;

(E) a known fetal anomaly;

(F) multiple gestations;

(G) an intrauterine growth restriction;

(H) fetal distress;

(I) alcoholism or drug addiction;

(J) thrombophlebitis; or

(K) pyelonephritis.

(j) Each patient found to be at high obstetrical risk based on the maternity risk assessment shall be referred to a qualified physician.

(k) Each licensee shall ensure that the policies and procedures include a program of education that prepares patients and their families for childbirth, including the following:

(1) Anticipated changes during pregnancy;

(2) the need for prenatal care;

(3) nutritional requirements during pregnancy;

(4) the effects of smoking, alcohol, and substance use;

(5) the signs of preterm labor;

(6) preparation for labor and delivery, including pain management and obstetrical complications and procedures;

(7) breast-feeding and care of the newborn;

(8) signs of depression during pregnancy and after childbirth and instructions for treatment;

(9) instruction on understanding the patient and newborn health record information;

(10) sibling preparation; and

(11) preparation needed for discharge of the patient and the newborn following delivery.

(l) Each licensee shall ensure that the policies, procedures, and clinical protocols are followed for each patient during labor, delivery, and postpartum care.

(m) Each patient shall be admitted for labor and delivery by a physician, a certified nurse-midwife, a certified professional midwife, or a certified midwife.

(n) At least one clinical staff member shall be available for each patient in labor.

(o) At least two employees shall be available for each patient during delivery. One shall be a clinical staff member. The other shall be another clinical staff member or a licensed practical nurse (LPN) practicing within the scope of the LPN's training and experience and working under the direct supervision of a licensed physician, a certified nurse-midwife, or a registered professional nurse.

(p) A clinical staff member shall monitor the progress of the labor and the condition of each patient and fetus as clinically indicated to identify abnormalities or complications at the earliest possible time.

(q) The patient or newborn shall be transferred to a medical care facility if a clinical staff member determines that medical or surgical intervention is needed.

(r) The patient's family or support persons shall be instructed as needed to assist the patient during labor and delivery.

(s) The surgical procedures performed at the birth center shall be limited to the following:

- (1) Episiotomy;
- (2) repair of episiotomy or laceration; and
- (3) circumcision.

(t) Each clinical director shall develop and implement policies and procedures for the discharge of postpartum patients and their newborns, which shall be followed by all clinical staff members.

(1) An individual, written discharge plan shall be developed for each patient and newborn, including follow-up visits and needed referrals. Each patient shall receive a copy of the plan at the time of discharge.

(2) Each patient and each newborn shall be discharged no later than 24 hours after birth and in accordance with policies, procedures, and clinical protocols.

(3) Each birth or death certificate shall be completed and filed as required by state law.

(4) A follow-up visit shall be conducted by a designated clinical staff member between 24 hours and 72 hours after discharge of the patient to perform the following:

- (A) A health assessment of the patient;
- (B) a health assessment of the newborn; and
- (C) the required newborn screening tests.

(5) The policies and procedures shall include a program of postpartum education and care, including the following:

- (A) Newborn care;
- (B) postpartum examinations;
- (C) family planning; and
- (D) a plan for well-woman routine gynecologic health care. (Authorized by K.S.A. 65-508; implementing K.S.A. 65-507, K.S.A. 65-508, and K.S.A. 2009 Supp. 65-67a10; effective July 9, 2010.)

28-4-1311. Transfers. (a) Each licensee shall develop and implement policies, procedures, and clinical protocols for the transfer of patients

and newborns. Each licensee shall ensure that these policies, procedures, and clinical protocols are readily accessible and followed.

(b) The policies, procedures, and clinical protocols shall include a written plan on file designating who will be responsible for the transfer of a patient or newborn. The plan shall include the following:

(1)(A) A written agreement with an obstetrician and a pediatrician or with a group of practitioners that includes at least one obstetrician and at least one pediatrician; or

(B) a written agreement with a medical care facility providing obstetrical and neonatal services; and

(2) a plan for transporting a patient or a newborn by an emergency medical services (EMS) entity.

(c) Each licensee shall ensure that all employees attending labor and delivery have immediate access to a working telephone or another communication device and to contact information for transferring a patient or a newborn in case of an emergency. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1312. Health-related requirements.

(a) Tobacco use prohibited. Each licensee shall ensure that tobacco products are not used at any time in the birth center.

(b) Health of licensee and employees working in the birth center.

(1) Each licensee, if an individual, and each individual working at the birth center shall meet the following requirements:

(A) Be free from physical, mental, and emotional conditions to the extent necessary to protect the health, safety, and welfare of the patients and newborns;

(B) be free from the influence of alcohol or illegal substances, or impairment due to the use of prescription or nonprescription drugs; and

(C) be free from all infectious or contagious diseases, as specified in K.A.R. 28-1-6.

(2) Each licensee, if an individual, and each individual working in the birth center shall have a health assessment conducted within six months before employment or upon employment. Subsequent health assessments shall be given periodically in accordance with the policies of the birth center.

(3) The results of each health assessment shall be recorded on forms provided by the department, and a copy shall be kept in each licensee's or employee's record at the birth center.

(4) If an individual who works in the birth center experiences a significant change in physical, mental, or emotional health, including any indication of substance abuse, an assessment of the individual's current health status may be required by the secretary or the licensee. A licensed health care provider qualified to diagnose and treat the condition shall conduct the health assessment. A written report of the assessment shall be kept in the individual's employee record and shall be submitted to the secretary on request.

(c) Tuberculin testing of licensee and employees working in the birth center.

(1) Each licensee, if an individual, and each individual working in the birth center shall have a record of a tuberculin test or chest X-ray obtained not more than six months before employment or upon employment. The results of the tuberculin test or chest X-ray shall be recorded on the health assessment form.

(2) Additional tuberculin testing shall be required if any individual working in the birth center is exposed to an active case of tuberculosis or if the birth center serves an area identified by the local health department or the secretary as a high-risk area for tuberculosis exposure.

(d) Hepatitis B. Each licensee, if an individual, and each individual working in the birth center whose job duties include exposure to or the handling of blood shall be immunized against hepatitis B or shall provide written documentation of refusal of the immunization. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1313. Environmental standards. (a) Premises.

(1) Each licensee shall ensure that the birth center is connected to public water and sewerage systems where available.

(2) If a center uses a nonpublic source for the water supply, the water shall be safe for drinking and shall be tested annually by a department-certified laboratory. If a well is used, the well shall be approved by an agent of the local environmental protection program (LEPP).

(A) A copy of the test results and the approval shall be kept on file at the birth center.

(B) Each private sewerage system shall be maintained in compliance with all applicable state and local laws.

(3) Outdoor areas on the premises shall be well drained and kept free of hazards, litter, and trash.

(b) General building requirements.

(1) Each licensee shall ensure that the birth center is located in a building that meets the following criteria:

(A) Meets the requirements specified in K.S.A. 65-508 and amendments thereto, all applicable building codes, and local ordinances;

(B) is a permanent structure; and

(C) is free from known environmental hazards.

(2) Each birth center shall be accessible to and usable by individuals with disabilities.

(c) Structural requirements. Each licensee shall ensure that the following requirements are met:

(1) Space shall be provided for the services to be offered, including the following:

(A) A secure space for the storage of medical records;

(B) waiting or reception area;

(C) family area, including play space for children;

(D) designated toilet and lavatory facilities for employees, families of patients, or the public separate from designated toilet, lavatory, and bathing facilities for each patient;

(E) a birthing room or rooms;

(F) employee area;

(G) utility and work room;

(H) a designated storage area;

(I) space for the provision of laboratory services; and

(J) space for food preparation and storage.

(2) The birth center shall be heated, cooled, and ventilated for the comfort of the patients and newborns and shall be designed to maintain a minimum temperature of 68 degrees Fahrenheit and a maximum temperature of 90 degrees Fahrenheit. If natural ventilation is used, all opened windows or doors shall be screened. If mechanical ventilation or cooling systems are employed, the system shall be maintained in working order and kept clean. Intake air ducts shall be designed and installed so that dust and filters can be readily removed.

(3) Each interior door that can be locked shall be designed to permit the door to be opened from each side in case of an emergency.

(4) All floors shall be smooth and free from cracks, easily cleanable, and not slippery. All floor coverings shall be kept clean and maintained in good repair.

(5) All walls shall be smooth, easily cleanable, and sound. Lead-free paint shall be used on all painted surfaces.

(6) All areas of the birth center shall have light fixtures capable of providing at least 20 foot-candles of illumination. Additional illumination shall be available to permit observation of the patient and the newborn, cleaning, and maintenance. The light fixtures shall be maintained in working order and kept clean.

(7) Each birthing room shall have emergency lighting for use during a power outage.

(8) Each birth center shall be equipped with a scrub sink equipped with an elbow, knee, or foot control.

(9) Each birthing room shall be located on the ground level and shall provide unimpeded, rapid access to an exit of the building that will accommodate patients, newborns, emergency personnel, emergency transportation vehicles, and equipment.

(10) Each birthing room shall meet the following requirements:

(A) Have at least 180 square feet of floor space; and

(B) provide enough space for the equipment, employees, supplies, and emergency procedures necessary for the physical and emotional care of the patient and the newborn. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1314. Birth center and birthing room furnishings, equipment, and supplies.

(a) Each licensee shall provide furnishings, equipment, and other supplies in the quantity necessary to meet the needs of patients, newborns, and employees and to provide a safe, home-like environment.

(b) Each licensee shall provide the specialized furnishings, equipment, and supplies necessary for the clinical staff members to perform the clinical services offered by the birth center. No specialized clinical services shall be provided unless the birth center is equipped to allow the clinical staff members to safely perform those services.

(c) All furnishings, equipment, and supplies shall be kept clean and free from safety hazards.

(d) The furnishings shall include, at a minimum, the following:

- (1) A bed or table for delivery;
- (2) at least one chair; and
- (3) a wall clock with a second hand.

(e) The equipment and supplies shall include, at a minimum, the following:

- (1) An examination light;

- (2) a sphygmomanometer;

- (3) a stethoscope;

- (4) a doppler unit or fetoscope;

- (5) a clinical thermometer;

- (6) disposable nonporous gloves in assorted sizes;

- (7) an infant scale;

- (8) a mechanical suction device or a bulb suction device;

- (9) a tank of oxygen with a flowmeter and a mask, a cannula, or an equivalent;

- (10) all necessary emergency medications and intravenous fluids with supplies and equipment for administration;

- (11) resuscitation equipment for patients and newborns, which shall include resuscitation bags and oral airways;

- (12) a laryngoscope and a supply of endotracheal tubes of assorted sizes appropriate for a newborn;

- (13) a firm surface suitable for resuscitation;

- (14) sterilized instruments for delivery, episiotomy, and repair of an episiotomy or a laceration;

- (15) an infant warmer that provides radiant heat;

- (16) a readily accessible emergency cart or tray for the patient and for the newborn that meets the following requirements:

- (A) Is equipped for the clinical staff members to carry out the written emergency procedures of the birth center;

- (B) is securely placed; and

- (C) has a written log of routine maintenance;

- (17) clean bed linens and towels; and

- (18) emergency lighting.

- (f) All equipment, furnishings, and supplies shall be used as intended and shall be securely stored when not in use to prevent injury or misuse. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1315. Maintenance. (a) Each licensee shall ensure that the building is kept clean at all times and free from accumulated dirt and from vermin infestation.

(b) Each licensee shall develop and implement a maintenance plan to ensure that all of the following conditions are met:

- (1) A schedule for cleaning the birth center is established.

- (2) All floors and walking surfaces are kept free of hazards, maintained in good repair, and kept clean at all times.

(3) Housekeeping services are provided to maintain a sanitary environment.

(4) Each birthing room, including equipment, is cleaned after each delivery and before reuse.

(5) The toilets, lavatories, sinks, and other facilities are clean at all times.

(6) The mops and other cleaning tools are cleaned after each use and stored in a well-ventilated place on racks.

(7) All pesticides and other poisons are used in accordance with product instructions and stored in a locked area.

(8) Safe storage for cleaning and laundry supplies is provided.

(9) Each indoor trash container is emptied, as needed, to control odor and to prevent the overflowing of contents.

(10) The methods used to dispose of trash, including biomedical waste, human tissue, and sharp instruments, are safe and sanitary.

(11) Hot and cold running water is supplied to each sink and all bathing facilities.

(12) The hot water temperature does not exceed 120 degrees Fahrenheit.

(13) Toilet paper, soap, and either paper towels or hand dryers are available in each restroom and each bathroom in the birth center. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1316. Safety. (a) Each licensee shall ensure the safety of all patients, newborns, employees, and visitors according to the following requirements:

(1) Each birth center shall have a working telephone on the premises and available for use at all times. Emergency telephone numbers shall be posted by each telephone or shall be readily accessible. These telephone numbers shall include telephone numbers for the fire department, hospital, ambulance, and police.

(2) Each exit shall be marked. No exit shall be blocked at any time.

(3) All drugs, chemicals, and medications shall be kept in locked storage and secured in specifically designated and labeled cabinets, drawers, closets, storerooms, or refrigerators and shall be made accessible only to authorized employees.

(b) Each licensee shall ensure the development and implementation of a disaster plan to provide for the evacuation and safety of patients, newborns, employees, and visitors in case of fire, tornadoes, storms, floods, power outages, and other

types of emergencies specific to the geographic area in which the birth center is located.

(1) The disaster plan shall be posted in a conspicuous place in each indoor room.

(2) Each employee shall be informed of and shall follow the disaster plan.

(3) A review of the disaster plan, including fire and tornado drills, shall be conducted with the employees at least once every six months, and the date of each review shall be recorded.

(4) Fire and tornado drills shall be conducted with the employees at least quarterly, and the date of each drill shall be recorded.

(c) Heating appliances, when used, shall be used as intended, safely located, equipped with a protective barrier as needed to prevent injury, and maintained in operating condition. If combustible fuel is used, the appliance shall be vented to the outside.

(d) Each licensee shall develop and implement policies and procedures regarding the storage and handling of firearms and other weapons on the premises.

(e) Pets and any other animals shall be prohibited in the birth center, with the exception of service animals. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1317. Food service. (a) Each licensee shall ensure that the birth center has arrangements to provide patients with nutritious liquids and foods. Foods may be provided by means of any of the following:

(1) Obtained from a food service establishment or a catering service licensed by the secretary of the Kansas department of agriculture;

(2) prepared on-site by employees; or

(3) provided by any patient's family for the sole use of that patient and the patient's family.

(b) All food that is designed to be served hot and is prepared on-site by employees shall be heated, maintained, and served at a temperature of at least 140 degrees Fahrenheit. A tip-sensitive thermometer shall be used to determine whether food is cooked and held at the proper temperature.

(c) Each licensee shall ensure that the food is handled and stored in a sanitary manner, which shall include meeting all of the following requirements:

(1) All perishable foods and liquids shall be continuously maintained at 41 degrees Fahrenheit or lower in the refrigerator or 0 degrees Fahrenheit

or lower in a freezer. A clearly visible, accurate thermometer shall be provided in each refrigerator and in each freezer.

(2) At least one refrigerator shall be designated for only food storage.

(3) All food stored in the refrigerator shall be covered, wrapped, or otherwise protected from cross-contamination. Raw meat shall be stored in the refrigerator in a manner that prevents meat fluids from dripping on other foods. Unused, leftover perishable foods shall be dated, refrigerated immediately after service, and eaten within three days.

(4) Surfaces used for food preparation or eating shall be made of smooth, nonporous material.

(5) All table service designed for repeat use shall be made of smooth, durable, and nonabsorbent material and shall be free from cracks or chips.

(6) All nondisposable table service shall be sanitized using either a manual method or a mechanical dishwasher.

(A) If using a manual washing method, each licensee shall meet both of the following requirements:

(i) A three-compartment sink with hot and cold running water to each compartment and a drainboard shall be used for washing, rinsing, sanitizing, and air-drying.

(ii) An appropriate chemical test kit, a thermometer, or another device shall be used for testing the sanitizing solution and the water temperature.

(B) If using a mechanical dishwashing machine, each licensee shall ensure that the machine is installed and operated in accordance with the manufacturer's instructions and shall be maintained in good repair.

(d) Prepackaged, disposable formula units shall be used when newborns are not breast-fed. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

28-4-1318. Laundry. Each licensee shall ensure that all of the following requirements are met: (a) If laundry is done at the birth center, the laundry sinks, appliances, and countertops or tables used for laundry shall be located in an area separate from food preparation areas and shall be installed and used in a manner that safeguards the health and safety of the patients, newborns, employees, and visitors.

(b) Space shall be provided and areas shall be designated for the separation of clean and soiled clothing, linen, and towels.

(c) If laundry facilities are not available at the birth center, all laundry shall be cleaned by a commercial laundry. (Authorized by and implementing K.S.A. 65-508; effective July 9, 2010.)

SENATOR STAN CLARK PREGNANCY MAINTENANCE INITIATIVE GRANT PROGRAM

28-4-1400. Grant program application and procedures. The following portions of the document titled "Senator Stan Clark pregnancy maintenance initiative grant program application and program procedures," published by the Kansas department of health and environment and dated May 26, 2005, are hereby adopted by reference:

(a) Section one, paragraph (D), "funding, match and grant period";

(b) subparagraphs (1), (2), and (3) of section one, paragraph (E), "eligible applicants";

(c) section two, "program requirements"; and

(d) section five, "competitive application and review process." (Authorized by and implementing 2005 HB 2301, Sec. 1; effective, T-28-7-1-05, July 1, 2005; effective Oct. 14, 2005.)

Article 5.—SEWAGE AND EXCRETA DISPOSAL

28-5-1. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966; revoked, E-72-11, March 17, 1972; revoked Jan. 1, 1973.)

28-5-2. Location of wastewater disposal systems. No person, company, corporation, association, or institution shall construct, maintain, use, or permit to be constructed or maintained any wastewater disposal system into which domestic wastewater is drained, within 50 feet of any water well or spring; nor shall any such wastewater disposal system be drained or permitted to drain into any stream, ditch, or the ground surface. (Authorized by and implementing K.S.A. 1996 Supp. 65-171d; effective Jan. 1, 1966; amended, E-72-11, March 17, 1972; amended Jan. 1, 1973; amended Sept. 5, 1997.)

28-5-3. Drains. All drains carrying domestic sewage, human or animal excreta located within 50 feet of a source of water supply shall be watertight. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-5-4. Public health nuisances. The following conditions and practices are declared to be public nuisances hazardous to public health

and local boards of health are directed to order their abatement whenever they are called to their attention by the state department of health and environment or any citizen of the state.

(1) Any privy, privy vault, or other place used for the deposit of human excreta which permits animals or insects access to the excreta, which produces foul or objectionable odors, or is located so as to make pollution of a domestic water supply probable.

(2) The collection or accumulation of any organic materials such as swill, meat scraps, dead fish, shells, bones, decaying vegetables, dead carcasses, human or animal excrement, or any kind of offal that may decompose and create an attraction or breeding place for flies, mosquitoes or rodents.

(3) Any domestic animal pen that pollutes a domestic water supply, underground waterbearing formation; or stream in a manner that is hazardous to human health; or is maintained in a manner that creates a fly attraction or breeding place for flies or mosquitoes; or is a rodent harborage or breeding place. (Authorized by K.S.A. 1975 Supp. 65-101, 65-171d, 65-202; effective Jan. 1, 1966; amended, E-72-11, March 17, 1972; amended Jan. 1, 1973; amended May 1, 1976.)

28-5-5. Discharge of domestic sewage into wells, pits, or subsurface excavations prohibited. No person, company, corporation or institution shall excavate, drill, construct or use or permit to be constructed or used any well, pit, mine shaft, or subsurface excavation for the disposal of untreated or inadequately treated domestic sewage. (Authorized by K.S.A. 65-171d; effective, E-72-11, March 17, 1972; effective Jan. 1, 1973.)

28-5-6. Discharge of domestic wastes. All domestic wastes from sanitary fixtures located in any dwelling, shop, school, or other building used as a home or meeting place for humans shall be discharged into a public sewer system approved by the Kansas department of health and environment, or into a private sewer system approved by the Kansas department of health and environment or the appropriate local authority. (Authorized by and implementing K.S.A. 1996 Supp. 65-171d; effective, E-72-11, March 17, 1972; effective Jan. 1, 1973; amended Sept. 5, 1997.)

28-5-7. Private sewer systems. All private sewer systems shall be located, designed, and operated in accordance with standards set forth in

county sanitary codes approved by the Kansas department of health and environment before July 1, 1997, or in the absence of such codes, with standards set forth in the Kansas department of health and environment bulletin 4-2, "Minimum Design Standards for Onsite Wastewater Systems," revised March, 1997. (Authorized by and implementing K.S.A. 1996 Supp. 65-171d; effective, E-72-11, March 17, 1972; effective Jan. 1, 1973; amended Sept. 5, 1997.)

28-5-8. (Authorized by K.S.A. 65-171d; effective, E-72-11, March 17, 1972; effective Jan. 1, 1973; revoked May 10, 1996.)

28-5-9. Variance. (a)(1) In counties with no locally adopted sanitary code, a variance from requirements of K.A.R. 28-5-2 through K.A.R. 28-5-7 may be granted by the Kansas department of health and environment, if the following conditions are met.

(A) The features of the site for which the variance is requested are not compatible with requirements of the regulations.

(B) Alternate methods are available that will attain the objectives of the regulations.

(C) The variation from the regulations will not adversely affect public health or the environment.

(2) Any person requesting a variance from these regulations shall provide the Kansas department of health and environment with a written request for a variance. This request shall include a description of the proposed wastewater treatment system, information on the treatment effectiveness of the proposed system, and any other information that the Kansas department of health and environment deems necessary to determine the effectiveness and reliability of the proposed system. No such proposed system shall be constructed without the written approval of the Kansas department of health and environment.

(b) In counties with adopted sanitary codes containing a variance clause, the local administrative agency has the authority to grant variances from requirements of the local code.

(c) Before construction of any facility for receipt of sewage, an application for variance shall be filed with and approved by either the Kansas department of health and environment or the appropriate local authority in accordance with provisions of this regulation. (Authorized by and implementing K.S.A. 1996 Supp. 65-171d; effective Jan. 1, 1973; amended Sept. 5, 1997.)

Article 6.—COMMON DRINKING CUP; COMMON TOWEL

28-6-1 to 28-6-2. (Authorized by K.S.A. 65-101, 65-104, K.S.A. 1965 Supp. 65-128; effective Jan. 1, 1966; revoked May 10, 1996.)

Article 7.—STERILIZATION OF PUBLIC FOOD AND DRINKING UTENSILS

28-7-1 to 28-7-9. (Authorized by K.S.A. 65-101, 65-104, K.S.A. 1965 Supp. 65-128; effective Jan. 1, 1966; revoked May 10, 1996.)

Article 8.—HOME HEALTH FEE SCHEDULE

28-8-1. (Authorized by K.S.A. 1969 Supp. 65-222; effective, E-69-4, Dec. 11, 1968; effective Jan. 1, 1970; revoked May 10, 1996.)

Article 9.—CONSTRUCTION, MAINTENANCE AND USE OF MAUSOLEUMS

28-9-1. Burial structure above ground. Any person, firm or corporation desirous of constructing any burial structure which shall be wholly or in part above ground shall apply to the Kansas state department of health for a permit for such construction. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-2. Application for permits. Application for permits for such construction shall be made on forms furnished by the state department of health and shall be accompanied by detailed plans and specifications in triplicate. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-3. Secretary issue permit in triplicate. On approval of said plans and specifications for the proposed burial structure by the engineer of the department, the secretary shall issue a permit in triplicate for the construction, and shall send two copies of the permit, approved plans and specifications to the party who makes application, and retain one copy for the files of the department. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-4. Embalming of dead bodies. No dead body shall be interred or deposited in any public mausoleum or private mausoleum of more than two crypts unless the body has first been em-

balmed in compliance with recognized embalming practice. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-5. Details of burial structures. In the design of burial structures the following details must be included:

(a) The structure must be so designed that each cell or crypt shall be readily accessible for inspection by persons authorized to make such inspection before final interment.

(b) Each crypt shall be so designed that it can be sealed to prevent odors from reaching the public space or corridor of the mausoleum.

(c) In case a ventilation and drainage system is provided, the system must be one acceptable to the department. The minimum size of pipes for either ventilation or drainage shall be 1½ inches and the ventilation or drainage from one crypt shall not pass through another.

(d) In case a sealed crypt is used without pipes for drainage or ventilation the inner surface of the crypt and crypt sealing slab shall be made air and moisture proof by a protective coating of an approved paint. A paint having a bituminous base is recommended and if necessary to proper drying and bonding to the concrete surface, it shall be applied hot.

(e) No live air spaces smaller in size than will allow for thorough inspection and repairing of joints from the inside of said air spaces will be allowed, except the pipes for ventilation and drainage of crypts.

(f) Hollow walls shall be sealed so as to make the air space "dead."

(g) Any burial structure intended for public or community use shall be provided with some type of heating system acceptable to the department.

(h) In the case of public mausoleums, or those with a corridor or chapel, suitable ventilation, independent of the above, and directly connected to the outside air, shall be provided.

(i) Special attention will be given to such details as: Depth and width of foundations; size and spacing of reinforcing steel; materials and methods used in construction of roof; permanence of material used for exterior of walls as determined by these for absorption of moisture; materials used for window and door sash, grills, gates, etc.; materials and method used in anchoring or tying walls together where they are made up of two or more independent walls, materials for concrete plaster, mortar, etc. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-6. Individual mausoleums; approval of plans, specifications and testing of materials. In the case of individual mausoleums, the permits issued by the department shall be a license to manufacture. Any deviations from the approved plans and specifications must be approved in writing by the engineer for the department. Inspections will be made of the manufacturing processes and of field installations with special attention being given to all factors which affect the permanence of the structures. When necessary to determine the permanence, all or any part of one or more mausoleums, or test specimens from the mixes used, shall be delivered to a laboratory for testing. The transportation and testing shall be an expense of the manufacturer and shall be done as directed by the engineer for the department. Permanent identification of the manufacturer shall be stamped in an accessible place on the cover and the vault along with the date of manufacture. Such other records shall be kept as are found necessary by the department. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-7. Individual mausoleums; replacement of structure or parts thereof. Whenever the failure of one of these mausoleums causes offensive odors or effluvia to arise therefrom, and such failure comes to the attention of the department, the manufacturer shall be required to replace or repair the structure or the defective portion. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

28-9-8. Individual mausoleums; revocation of permit. The permit may be revoked for cause upon notice to the manufacturer by the secretary of the board. (Authorized by K.S.A. 17-1324; effective Jan. 1, 1966.)

Article 10.—SANITARY CONDITIONS AROUND RESERVOIRS

28-10-1 to 28-10-13. (Authorized by K.S.A. 1965 Supp. 65-187; effective Jan. 1, 1966; revoked Jan. 1, 1969.)

A. SANITATION ZONE BOUNDARIES

28-10-15 through 28-10-33. (Authorized by K.S.A. 1969 Supp. 65-187; effective, E-68-23, Aug. 9, 1968; effective Jan. 1, 1969; amended Jan. 1, 1970; revoked March 23, 2001.)

28-10-34 through 28-10-35. (Autho-

rized by K.S.A. 1969 Supp. 65-187; effective Jan. 1, 1969; amended Jan. 1, 1970; revoked March 23, 2001.)

28-10-36. (Authorized by K.S.A. 1969 Supp. 65-187; effective Jan. 1, 1970; revoked May 10, 1996.)

28-10-37. (Authorized by K.S.A. 1969 Supp. 65-187; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-38. (Authorized by and implementing K.S.A. 65-187; effective Jan. 1, 1973; amended, T-84-40, Dec. 21, 1983; amended May 1, 1984; revoked March 23, 2001.)

28-10-39. (Authorized by K.S.A. 1972 Supp. 65-187; effective Jan. 1, 1973; revoked March 23, 2001.)

28-10-40 to 28-10-41. (Authorized by K.S.A. 1972 Supp. 65-187; effective Jan. 1, 1973; revoked May 10, 1996.)

B. GENERAL

28-10-75. (Authorized by K.S.A. 1969 Supp. 65-187; effective, E-68-23, Aug. 9, 1968; effective, E-69-6, Jan. 8, 1969; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-76. (Authorized by K.S.A. 1969 Supp. 65-185, 65-187, 65-189e; effective, E-68-23, Aug. 9, 1968; effective, E-69-6, Jan. 8, 1969; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-77. (Authorized by K.S.A. 1969 Supp. 65-187, 65-189f; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-78. (Authorized by K.S.A. 1969 Supp. 65-187; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-79. (Authorized by K.S.A. 1969 Supp. 65-187, 65-189c; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-80. (Authorized by K.S.A. 1969 Supp. 65-187, 65-189c, 65-189d; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-81 through 28-10-83. (Authorized by K.S.A. 1969 Supp. 65-187, 65-189c; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-84. (Authorized by K.S.A. 1969 Supp.

65-187; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-85. (Authorized by K.S.A. 1969 Supp. 65-187, 65-189; effective Jan. 1, 1970; revoked March 23, 2001.)

28-10-86 through 28-10-88. (Authorized by K.S.A. 1969 Supp. 65-187; effective Jan. 1, 1970; revoked March 23, 2001.)

C. STANDARDS

28-10-100 through 28-10-108. (Authorized by K.S.A. 1969 Supp. 65-187; effective, E-68-23, Aug. 9, 1968; effective, E-69-6, Jan. 8, 1969; effective Jan. 1, 1970; revoked March 23, 2001.)

Article 11.—APPROVAL OF LABORATORIES PERFORMING EXAMINATION OF MILK

28-11-1 to 28-11-6. (Authorized by K.S.A. 65-737 (g); effective Jan. 1, 1966; revoked May 10, 1996.)

Article 12.—PATHOGENIC MICROORGANISMS

28-12-1. Distribution and use of live pathogenic microorganisms. No pathogenic microorganisms and/or vectors shall be purchased or obtained either interstate or intrastate by persons for use at the high school level (no exceptions). For this purpose the terms pathogenic microorganisms and vectors are defined as, “all cultures or collection or [of] microorganisms or their derivatives, which may introduce or disseminate any contagious or infectious disease of man or animals,” and “all animals (including poultry) such as mice, pigeons, guinea pigs, rats, ferrets, rabbits, chickens, dogs, and the like which have been inoculated with infectious organisms, or which are diseased or infected with any contagious, infectious, or communicable disease of humans, animals or poultry, or which have been exposed to any such diseases.” (Authorized by K.S.A. 65-101; effective Jan. 1, 1966.)

Article 13.—UNDERGROUND STORAGE, DISPOSAL WELLS AND SURFACE PONDS

28-13-1. Scope. This article regulates the construction and use of underground storage res-

ervoirs and the construction and use of disposal wells and surface ponds for the confinement, storage and disposal of industrial fluids including but not limited to brines, but does not include regulations pertaining to oil field activities described in L. 1965, ch. 506, section 1 (4) (p). (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-13-2. Definitions. (A) Underground storage reservoir. An underground storage reservoir is hereby defined as any naturally occurring or artificially produced subsurface cavity in which petroleum products, acids, radioactive materials, or fluid or gaseous products are stored.

(B) Surface pond. The term surface pond as used herein is defined as any constructed, excavated or naturally occurring area used for the storage, confinement or treatment of industrial waste waters, salt water or other highly mineralized waters.

(C) Disposal well. The term disposal well as used herein is defined as any well which receives industrial waste waters, both organic and inorganic, salt water or other highly mineralized waters for disposal into underground formations. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-13-3. Plans and specifications for underground reservoirs. Plans and specifications for the storage of petroleum products, acids, radioactive materials, or other fluid or gaseous products in underground reservoirs shall be submitted to the chief engineer for the board and approved prior to construction or development of the reservoir. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-4. Maintenance of certain records and reports of malfunctions required for underground reservoirs. Operators of underground reservoirs shall maintain a permanent record of the type and quantity of all products stored therein, and a continuous record of the injection pressures, and shall report immediately to the chief engineer for the board any failures or defects in the underground reservoir. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-5. Permits required for all surface ponds. The storage, confinement or disposal of industrial waste waters, salt water or other highly mineralized waters in surface ponds shall be

prohibited unless a permit for such storage or disposal shall first be obtained from the state department of health. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-6. Applications for pond permits. Applications for permits for surface ponds shall be submitted in duplicate to the chief engineer for the board on forms obtainable from his office. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-7. Approval or denial of applications. Applications for permits to use surface ponds will be approved or denied within ten days from date of receipt of the application, information and supporting plans, specifications and other required documents, by the state department of health. Failure by the department to act upon an application within ten days subsequent to such receipt shall serve as an automatic issuance of a permit. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-8. Authorized signatures. All permits and orders of revocation shall be signed by the chief engineer for the board. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-9. Removal of material from surface ponds upon abandonment or revocation of pond permit. Upon abandonment of a surface pond or the revocation of a pond permit, the operator shall dispose of the industrial waste water, salt water or other highly mineralized waters in a manner acceptable to the Kansas state department of health. (Authorized by K.S.A. 65-171d; effective Jan. 1, 1966.)

28-13-10 to 28-13-11. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966; revoked May 10, 1996.)

Article 14.—COLLECTION AND ANALYSIS OF WATER AND PUBLIC WATER SUPPLIES

28-14-1. Fees for analysis of samples from public water supply systems. All laboratory analyses conducted in the office of laboratory services of the Kansas department of health and environment shall require payment as specified in K.A.R. 28-14-2, except for analyses requested by department staff. The fee for any analysis not specified in K.A.R. 28-14-2 shall be based on the cost of the analysis as determined by the secretary. (Authorized by and implementing K.S.A. 65-156

and K.S.A. 2013 Supp. 75-5608; effective Jan. 1, 1966; amended, E-79-13, June 15, 1978; amended May 1, 1979; amended Nov. 1, 2002; amended June 6, 2014.)

28-14-2. Schedule of fees. Each public water supply system submitting any samples for analysis to the office of laboratory services of the Kansas department of health and environment shall receive a quarterly statement reflecting the cost of services rendered during the previous calendar quarter. Fees shall be paid to the Kansas department of health and environment within 30 days of the date on the statement. Failure to pay fees may result in denial of future analytical services until the public water supply system pays all outstanding fees.

The fee for each sample analysis shall be the following:

(a) Inorganic chemical analyses:	
(1) Alkalinity	\$10.00
(2) Ammonia nitrogen	\$15.00
(3) Bromate	\$10.00
(4) Bromide	\$10.00
(5) Chlorate	\$10.00
(6) Chloride	\$10.00
(7) Chlorite	\$10.00
(8) Fluoride	\$10.00
(9) Mercury	\$18.00
(10) Metals	\$9.00
(11) Nitrate	\$10.00
(12) Nitrite	\$10.00
(13) Ortho-phosphate	\$10.00
(14) pH	\$6.00
(15) Silica	\$9.00
(16) Specific conductivity	\$8.00
(17) Sulfate	\$10.00
(18) Total dissolved solids (180°C)	\$15.00
(19) Total organic carbon (TOC)	\$20.00
(20) Total phosphate	\$10.00
(21) Total suspended solids	\$15.00
(22) Turbidity	\$10.00
(b) Organic chemical analyses:	
(1) Atrazine and Alachlor	\$100.00
(2) Organochlorine pesticides and polychlorinated biphenyls screen	\$150.00
(3) Triazine pesticide screen	\$40.00
(4) Chlorinated acid pesticide screen	\$125.00
(5) Semi-volatile acid organic compound screen	\$250.00
(6) Carbamate pesticide screen	\$150.00
(7) Volatile organic compound screen including dibromochloropropane and ethylene dibromide	\$100.00

- (8) Total trihalomethanes, consisting of the sum of the concentrations of trichloromethane, bromodichloromethane, dibromochloromethane, and bromoform \$50.00
- (9) Total haloacetic acids, consisting of the sum of the concentrations of monochloroacetic acid, dichloroacetic acid, trichloroacetic acid, monobromoacetic acid, and dibromoacetic acid \$125.00
- (c) Microbiological analyses: Coliform determination \$12.00
- (d) Radiochemical analyses:
- (1) Gamma isotopic \$60.00
- (2) Gross alpha \$35.00
- (3) Gross beta \$35.00
- (4) Radium-226 \$75.00
- (5) Radium-228 \$75.00
- (6) Radon \$35.00
- (7) Tritium \$60.00
- (8) Uranium \$70.00

(Authorized by and implementing K.S.A. 65-156 and K.S.A. 2013 Supp. 75-5608; effective Jan. 1, 1966; amended, E-79-13, June 15, 1978; amended May 1, 1979; amended May 1, 1982; amended, T-88-13, May 18, 1987; amended May 1, 1988; amended Jan. 4, 1993; amended Nov. 1, 2002; amended June 6, 2014.)

28-14-3 and 28-14-4. (Authorized by K.S.A. 1978 Supp. 65-156; effective Jan. 1, 1966; revoked, E-79-13, June 15, 1978; revoked May 1, 1979.)

Article 15.—APPLICATION FOR PERMITS; DOMESTIC WATER SUPPLY

28-15-1 to 28-15-10. (Authorized by K.S.A. 65-162, 65-163; effective Jan. 1, 1966; revoked May 1, 1982.)

28-15-11. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; amended Sept. 21, 1992; amended June 21, 1993; amended Sept. 26, 1994; amended Jan. 9, 1995; revoked Oct. 1, 2004.)

28-15-12. Public water supply fee fund. On and after January 1, 1993, each public water supply shall pay a fee of \$0.002 per 1,000 gallons of water sold at retail and delivered through mains, lines or pipes.

(a) The fee shall be paid to the Kansas department of revenue on forms supplied by the direc-

tor of taxation in the same manner as the water protection fee authorized by K.S.A. 82a-954 and amendments thereto.

(b) The public water supplier may collect the fee directly from each customer to which water is sold at retail or may pay the amount owed from moneys in its operating fund or other fund available for that purpose. (Authorized by and implementing K.S.A. 1991 Supp. 65-163, as amended by L. 1992, Ch. 188, sec. 1; effective, T-28-12-31-92, Dec. 31, 1992; effective Feb. 15, 1993.)

28-15-13. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; amended Sept. 21, 1992; amended June 21, 1993; amended Sept. 26, 1994; amended Jan. 9, 1995; revoked Oct. 1, 2004.)

28-15-14. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; amended Sept. 21, 1992; amended Jan. 9, 1995; revoked Oct. 1, 2004.)

28-15-15. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; revoked Sept. 21, 1992.)

28-15-15a. (Authorized by and implementing K.S.A. 65-171m; effective Sept. 21, 1992; amended Sept. 26, 1994; amended Jan. 9, 1995; revoked Oct. 1, 2004.)

28-15-16. Permit requirements for public water supply systems. (a) Each person who operates a public water supply system shall be required to have a permit issued by the secretary.

(b) Each application for a public water supply permit shall be submitted for review and consideration for approval and shall be required to be approved before the use of a source of water supply or the construction of any of the following:

- (1) New sources;
- (2) pumping facilities;
- (3) finished water storage facilities;
- (4) water treatment plants, facilities, or systems;
- (5) distribution systems and extensions to existing distribution systems; or
- (6) chemical storage, handling, and application facilities.

(c) Each application approved for construction purposes shall be valid for a period of two years, and if construction has not been commenced by that time, a new application shall be required.

(d) In addition to meeting the requirements specified in K.S.A. 65-163(a)(1) and amendments

thereto, each person operating a public water supply system shall submit as part of the application the results of an analysis performed by a state-certified laboratory regarding the physical, bacteriological, chemical, and radiological constituents of the raw water to ensure that the proposed treatment facilities will produce potable water meeting the primary drinking water regulations established in article 15a. (Authorized by K.S.A. 65-171m; implementing K.S.A. 65-163; effective May 1, 1982; amended Jan. 9, 1995; amended Oct. 1, 2004.)

28-15-17. Siting requirements. A new or expanded facility shall not be initiated or constructed at a site which the department determines: (a) Is subject to a significant risk from earthquakes, floods, fires or other disasters which could cause a breakdown of the public water supply system or a portion of it;

(b) Except for intake structures, is within the floodplain of a one-hundred (100) year flood; and is lower than the recorded high water level where appropriate records exist; or

(c) Is adjacent to a major source of pollution, which the department determines has a potentially adverse influence on the water supply. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982.)

28-15-18. Operation and maintenance requirements. (a) Each person that operates a public water supply system shall ensure that the system is operated, maintained, and supervised by certified personnel pursuant to K.S.A. 65-4501 through 65-4517, and amendments thereto.

(b) Each person that operates a public water supply system shall immediately notify the department and responsible local officials of any situation with the water system, including a major breakdown or serious loss of water service, that presents or could present an imminent and substantial endangerment to health.

(c) Each person that operates a community water supply system shall prepare an emergency operations plan to safeguard the water supply for the protection of the public if natural or man-made disasters occur. Each emergency operations plan shall be submitted to the secretary for review and consideration for approval to ensure that the plan is protective of public health, safety, and the environment.

(d) Newly constructed or repaired water distribution mains and finished water storage facilities shall be flushed and disinfected before use.

(e) Each community water supply system shall be operated and maintained to provide a minimum positive pressure of 20 psi (140 kN/m²) throughout the entire distribution system except under extraordinary conditions including unusual peak fire flow demand and major distribution system breaks.

(f) Each person that operates a community water supply system and each person that operates a high-risk non-community system designated by the department shall have a regular program for the detection and elimination of cross-connections and prevention of backflow and backsiphonage.

(g) Each finished water reservoir shall be covered by a permanent protective material and shall be vented and screened.

(h) Public water supply system components and protective coatings in contact with water intended for public consumption, and chemicals used in the treatment of water, shall be used to ensure the protection of public health and the environment.

(i) Each person that operates a public water supply system shall respond in writing no later than 30 days after receipt of a sanitary survey report describing how and on what schedule the system will address significant deficiencies identified in the survey. (Authorized by K.S.A. 65-171m; implementing K.S.A. 65-171h; effective May 1, 1982; amended Oct. 1, 2004; amended June 7, 2018.)

28-15-19. Disinfection of drinking water.

(a) All drinking water supplied to the public from a public water supply system shall be disinfected.

(b) A sufficient amount of chlorine shall be added to the water to maintain a chlorine residual of at least 0.2 mg/l of free chlorine or 1.0 mg/l of total chlorine throughout the entire distribution system.

(1) Failure to maintain a residual as specified in this subsection in more than five percent of measurements taken each month, in any two consecutive months, shall be a violation of this regulation.

(2) Each day the public water supply system serves water to customers, the operator shall make a determination of the chlorine residual as follows:

(A) The operator shall make a daily determination to ensure that the residual levels required by this subsection are maintained. The operator shall vary sampling locations throughout the distribution system.

(B) The operator shall record and maintain data to demonstrate to the department that the public

water supply system is in compliance with the requirements of this regulation.

(3) If the chlorine residual is less than the minimum level required by this subsection, the operator shall take appropriate action to increase the chlorine residual to the level specified in this subsection. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; amended Sept. 26, 1994; amended June 7, 2018.)

28-15-20. (Authorized by and implementing K.S.A. 65-171m; effective May 1, 1982; amended Sept. 21, 1992; amended Sept. 26, 1994; revoked Oct. 1, 2004.)

28-15-21. (Authorized by and implementing K.S.A. 65-171m; effective June 21, 1993; revoked Oct. 1, 2004.)

28-15-22. (Authorized by and implementing K.S.A. 65-171m; effective Sept. 26, 1994; revoked Oct. 1, 2004.)

28-15-25. (Authorized by K.S.A. 1977 Supp. 65-171m; effective, E-78-33, Dec. 7, 1977; effective May 1, 1978; revoked, L. 1982, ch. 471.)

ENVIRONMENTAL LABORATORY ACCREDITATION

28-15-35. Conditions of accreditation. (a) Definitions. For the purposes of this article, the following definitions shall be used:

(1) "Accreditation" means the issuance of a document by the secretary attesting to the fact that a laboratory meets the minimum requirements specified in K.A.R. 28-15-35, 28-15-36, 28-15-36a, and 28-15-37. For the purposes of this article, the terms "accreditation" and "certification" are equivalent.

(A) "Primary accreditation" means the accreditation granted to a laboratory based on a review of the laboratory by the department for conformance with accreditation requirements.

(B) "Secondary accreditation" means the accreditation granted by reciprocity, which is based on primary accreditation granted by another state.

(2) "Accredited," when used to describe a laboratory, means that the laboratory meets all of the requirements for accreditation as specified in K.A.R. 28-15-35, 28-15-36, 28-15-36a, and 28-15-37.

(3) "Accrediting authority" means a territorial, state, federal, or international governmental agency that has responsibility and accountability for

environmental laboratory accreditation and that grants accreditation.

(4) "Analyst" means a person who performs the analytical methods and associated techniques and who is responsible for applying required laboratory practices and other pertinent quality controls to meet the required level of quality.

(5) "Clean water act" and "CWA" mean U.S. public law 92-500, as amended by public law 92-217, public law 95-576, public law 96-483, and public law 97-117, and 33 U.S.C. 1251 et seq., as in effect on February 4, 1987, which governs water pollution control programs.

(6) "Denial" means the department's refusal to accredit a laboratory after submission of an application.

(7) "Department" means the Kansas department of health and environment.

(8) "EPA" means the U.S. environmental protection agency.

(9)(A) "Field of accreditation" means the following:

- (i) The matrix;
- (ii) the technology or method, or both; and
- (iii) the analyte or analyte group, or both.

(B) The matrices shall include the following:

- (i) Drinking water;
- (ii) nonpotable water, including all aqueous samples that are not public drinking water;
- (iii) solid and chemical materials, including soils, sediments, other solids, and nonaqueous liquids; and
- (iv) air and emissions, including ambient air and stack emissions.

(10) "Field of proficiency testing" means studies of proficiency testing by the following:

- (A) The matrix;
- (B) the technology; and
- (C) the analyte or analyte group, or both.

(11) "Field laboratory" means any Kansas environmental laboratory performing compliance analyses limited to one or more of the following fields of accreditation:

- (A) Chlorine;
- (B) dissolved oxygen;
- (C) hydrogen ion (pH);
- (D) sulfite;
- (E) temperature; or
- (F) turbidity.

(12) "Interim accreditation" means accreditation issued for either of the following:

(A) An additional field of accreditation utilizing a technology previously inspected by the labora-

tory accreditation officer and for which the laboratory meets all other accreditation requirements including acceptable proficiency testing studies, if available; or

(B) a field laboratory before inspection.

(13) "Laboratory" means a legally identifiable facility performing environmental analyses in a controlled and scientific manner.

(14) "Laboratory accreditation officer" means any person determined by the secretary to have adequate credentials to evaluate laboratories supplemented by successful completion of the EPA drinking water laboratory accreditation officers' training course, nationally approved assessor training courses, and refresher training courses.

(15) "Laboratory technical director" means a person whose functions are to direct technical personnel and evaluate the quality of test procedures performed in the laboratory.

(16) "Proficiency testing sample" and "PT" mean a sample the composition of which is unknown to the analyst. The PT samples are used to test whether or not the laboratory can produce analytical results within specific performance limits.

(17) "Reciprocity" means the secretary's recognition of the validity of the accreditation granted by another accrediting authority, in order to issue Kansas accreditation based upon the evaluation conducted by that accrediting authority.

(18) "Resource conservation and recovery act" and "RCRA" mean 42 U.S.C. 6921, as amended by the solid waste disposal act of 1980, public law 94-482, as in effect on October 21, 1980, and as amended by the hazardous and solid waste act of 1984, public law 96-616, as in effect on November 8, 1984, which governs solid and hazardous waste programs.

(19) "Revocation" means the withdrawal of a laboratory's accreditation.

(20) "Safe drinking water act" and "SDWA" mean 42 U.S.C. §300f et seq., as in effect on August 8, 2005, formerly public law 104-182 et seq., which governs drinking water programs.

(21) "Secretary" means the secretary of the Kansas department of health and environment.

(22) "Supplemental accreditation" means accreditation based upon state-of-the-art technology for which the EPA has not given method approval and for which monitoring is required by the department.

(23) "Suspension" means the temporary removal of a laboratory's accreditation for a period of time that shall not exceed six months.

(24) "Technology" means a specific arrangement of analytical instruments, detection systems, or preparation techniques, or any combination of these.

(b) Application for accreditation. The requirements for applying for and maintaining accreditation shall be as follows:

(1) A complete application shall be submitted on forms provided by the department.

(2) Each laboratory, to maintain uninterrupted accreditation, shall file an application for renewal at least 60 calendar days before the current accreditation expires.

(3) Each applicant shall be subject to the payment of fees as specified in K.A.R. 28-15-37.

(4) When applications are submitted by accredited laboratories requesting accreditation for an additional field of accreditation, the expiration date for the additional accreditation shall be the same date indicated on the certificate currently in effect for that laboratory. Additional fees shall be assessed for each additional method for each scope of accreditation as specified in K.A.R. 28-15-37.

(c) Scope of accreditation. Laboratories may be accredited for any of the following:

(1) Drinking water (SDWA);

(2) wastewater (CWA);

(3) solid and hazardous waste (RCRA); or

(4) field laboratory. Accreditation of field laboratories shall be limited to the fields of accreditation specified in paragraph (a)(11) of this regulation.

(d) On-site assessment.

(1) Each on-site assessment of a laboratory shall be conducted by a laboratory accreditation officer at least once every two years. Each on-site assessment shall be conducted to determine whether the laboratory meets the minimum requirements for accreditation as specified in K.A.R. 28-15-35 and 28-15-36.

(2) Each on-site assessment of a field laboratory shall be conducted by a laboratory accreditation officer at least once every three years. On-site assessments shall be conducted to determine whether the laboratory meets the minimum requirements for accreditation as specified in K.A.R. 28-15-35 and 28-15-36a.

(3) Additional on-site assessments may be performed to resolve problems indicated by deficiencies from proficiency testing, deficiencies from prior on-site assessments, or changes that an accredited laboratory makes in location, personnel, or methodology. Other on-site assessments may be conducted to resolve complaints.

(4) If deficiencies are identified during the on-site assessment, a deficiency report shall be submitted to the laboratory by the department. The laboratory shall respond to the deficiency report with corrective action within 30 days of receiving the deficiency report. If corrective action is considered not acceptable by the laboratory accreditation officer, the laboratory shall have an additional 30 days after notification of nonacceptance to submit a revised plan for corrective action. Failure to comply with this requirement shall result in denial, suspension or revocation of accreditation as established in paragraphs (g)(1), (g)(3), and (g)(5) of this regulation.

(e) Proficiency testing. For initial and continuing accreditation, each laboratory, excluding field laboratories, shall participate in proficiency testing studies obtained from a nationally accredited proficiency test provider. Each laboratory shall demonstrate the successful performance of each test method for each proficiency testing field of accreditation for which the laboratory seeks or maintains accreditation. Laboratories shall be permitted to report multiple results for the same field of proficiency testing from one PT sample by using more than one method and type of technology.

(1) For initial accreditation, the laboratory shall meet the following requirements:

(A) Successfully complete two proficiency testing studies out of the three most recent rounds attempted; and

(B) schedule proficiency testing studies at least 15 days after the closing date of the previous study analyzed by the laboratory. The most recent three rounds attempted shall have occurred within 18 months of the date the laboratory submitted an application for accreditation. A result shall be considered unacceptable if the laboratory reports values for a field of proficiency testing outside of the acceptance limits.

(2)(A) For continuing accreditation, the laboratory shall meet the following requirements:

(i) Participate in a proficiency testing study twice per year. The completion dates of successive PT studies shall be approximately six months apart; and

(ii) maintain a performance history of at least two acceptable proficiency testing studies out of the three most recent studies. A result shall be considered unacceptable when either the laboratory reports values outside of the acceptance limits or the laboratory fails to participate in a study.

(B) Failure to maintain the acceptable performance history as specified in paragraph (e)(2)(A)(ii) shall result in suspension of the method related to the affected field of accreditation.

(C) A laboratory may elect to analyze a remedial proficiency testing sample after obtaining unacceptable results. The remedial sample shall be scheduled at least 15 days after the closing date of the previous study analyzed by the laboratory. The remedial sample shall be considered part of the laboratory's corrective action. The result shall count as part of the historical two-out-of-three performance criteria. If the result from the remedial sample is unacceptable, the laboratory shall be subject to suspension of the affected field of accreditation.

(3) After loss of accreditation of a field of accreditation due to nonacceptable performance, the laboratory shall complete two acceptable proficiency testing studies out of the three most recent studies attempted for the failed field of accreditation before accreditation may be reinstated. Each study shall be scheduled at least 15 days after the closing date of the previous study analyzed by the laboratory.

(4) Proficiency test providers shall report the laboratory results for proficiency test samples in the format listed in "proficiency testing electronic data formats," published April 2003 by the department and hereby adopted by reference.

(5) During participation in a proficiency testing study and before the release of the results of the study, all of the following requirements shall be met:

(A) The laboratory's management and all analysts shall ensure that all PT samples are handled, managed, analyzed, and reported utilizing the staff, methods, procedures, equipment, quality controls, facilities, and frequency of analysis that are used for routine analysis of real environmental samples.

(B) The laboratory shall not send proficiency testing samples to another laboratory for any analysis for which the laboratory seeks accreditation.

(C) The laboratory shall not knowingly accept proficiency testing samples from another laboratory for any analysis for which the sender is seeking accreditation.

(D) The laboratory personnel shall not exchange or offer information about proficiency testing sample results with personnel from another laboratory.

(E) The laboratory personnel shall not attempt to obtain the true values of any proficiency testing samples from the provider.

(f) Notification of accreditation. A certificate shall be issued by the secretary to each laboratory satisfactorily meeting all requirements of K.A.R. 28-15-35, 28-15-36, 28-15-36a, and 28-15-37. The fields of accreditation for which the laboratory is accredited shall be noted. An accreditation number shall be assigned to each accredited laboratory and shall be included on the certificate. The certificate shall be issued for a 12-month period.

(g) Denial, suspension, or revocation of accreditation.

(1) Denial of accreditation. Laboratory accreditation shall be denied in part or in total for any of the following reasons:

(A) Failure to submit a complete application;

(B) failure to meet the requirements specified in this regulation and in K.A.R. 28-15-36 and K.A.R. 28-15-36a;

(C) failure to successfully analyze and report proficiency testing samples as required in subsection (e) of this regulation;

(D) failure to demonstrate to the laboratory accreditation officer that the laboratory meets the required standards for accreditation, based upon an on-site assessment;

(E) failure to respond to the deficiency report with acceptable corrective action after an on-site assessment within the time period established in paragraph (d)(4) of this regulation;

(F) failure to implement corrective action;

(G) misrepresentation or omission of material facts;

(H) denial of entry during normal business hours for an on-site assessment;

(I) failure to pay the required fees as established in K.A.R. 28-15-37;

(J) failure to ensure that essential laboratory personnel are available for participation, as needed, for the satisfactory completion of an on-site assessment;

(K) any prior sustained charges of administrative violations of state or federal laws and regulations related to the provision of environmental laboratory services or reimbursement for these services, against the owner or owners or laboratory technical director or directors, individually or jointly, or against any laboratory owned or directed by these individuals; or

(L) conviction for a crime that is related to environmental laboratory services and involves theft or fraud.

(2) Accreditation after denial.

(A) Accreditation shall not be granted until a laboratory has demonstrated to the laboratory accreditation officer that the deficiencies that caused the denial have been corrected.

(B) If the laboratory is not successful in correcting the deficiencies that caused the denial, the laboratory shall wait six months before submitting a new application.

(C) After denial of accreditation in part, the laboratory shall reapply for accreditation of the affected fields of accreditation. After denial of accreditation in total, the laboratory shall submit a complete application to the department.

(3) Suspension of accreditation. Any accredited laboratory's accreditation may be suspended in part or in total for any of the following reasons:

(A) Failure to notify the laboratory accreditation officer in writing within 30 days of changes in ownership, laboratory personnel, laboratory location, or methods that involve a change in technology or instrumentation;

(B) failure to successfully analyze and report proficiency testing samples as required in subsection (e);

(C) failure to respond to the deficiency report with acceptable corrective action after an on-site assessment;

(D) failure to respond to the deficiency report after an on-site assessment within the time period established in paragraph (d)(4);

(E) failure to implement corrective action after an on-site assessment; or

(F) failure to maintain compliance with this regulation and with K.A.R. 28-15-36, 28-15-36a, and 28-15-37.

(4) Accreditation after suspension.

(A) Accreditation after suspension shall not be granted until a laboratory has demonstrated to the laboratory accreditation officer that the deficiencies that caused suspension have been corrected.

(B) After suspension of accreditation in part, the laboratory shall reapply for accreditation of the affected fields of accreditation. After suspension of accreditation in total, the laboratory shall submit a complete application to the department.

(C) If the laboratory does not correct the deficiencies that caused the suspension within six months, the laboratory accreditation shall be revoked in part or in total.

(5) Revocation of accreditation.

(A) An accreditation may be revoked in part or in total if it is determined that there has been any of the following:

(i) Failure to maintain compliance with K.A.R. 28-15-35, 28-15-36, 28-15-36a, and 28-15-37;

(ii) reporting, as official compliance data, any field of accreditation or analytical result for which accreditation has not been obtained;

(iii) failure to respond to the deficiency report with acceptable corrective action after an on-site assessment;

(iv) failure to respond to the deficiency report after an on-site assessment within the time period established in paragraph (d)(4); or

(v) failure to implement corrective action after an on-site assessment.

(B) An accreditation may be revoked in total if it is determined that there has been any of the following:

(i) Misrepresentation or omission of material facts;

(ii) failure to participate in proficiency testing studies as required in subsection (e);

(iii) denying entry to a laboratory accreditation officer during the laboratory's working hours;

(iv) failure to ensure that essential laboratory personnel are available for participation, as needed, for the satisfactory completion of an on-site assessment;

(v) any prior sustained charges of administrative violations of state or federal laws and regulations related to the provision of environmental laboratory services or reimbursement for such services, against the owner or owners or laboratory technical director or directors, individually or jointly, or against any laboratory owned or directed by these individuals; or

(vi) conviction for a crime that is related to environmental laboratory services and involves theft or fraud.

(6) Accreditation after revocation.

(A) After revocation, accreditation shall not be granted until a laboratory has corrected the reason for revocation and has met all the requirements of the revocation order.

(B) After revocation of accreditation in part, the laboratory shall reapply for accreditation of the affected fields of accreditation. After revocation of accreditation in total, the laboratory shall submit a complete application to the department.

(h) Analytical results obtained after an accreditation has been suspended or revoked shall not be submitted to the department as official compliance data.

(i) Reciprocity.

(1) Establishment of reciprocity for the accred-

itation of laboratories located outside of the state of Kansas. Laboratories located outside of the state of Kansas that perform laboratory services as specified in K.S.A. 65-163 through K.S.A. 65-171t and amendments thereto, this regulation, and K.A.R. 28-16-28b, K.A.R. 28-16-63, and K.A.R. 28-31-4 may be accredited by the department, if the laboratory is accredited by a national environmental laboratory accrediting authority that the secretary recognizes as having standards equivalent to those standards established in this regulation and K.A.R. 28-15-36.

(2) Each out-of-state laboratory shall submit an application to the department with a copy of the current certificate issued by the primary accrediting authority or authorities, and the accreditation fees specified in K.A.R. 28-15-37.

(3) Laboratories located outside of Kansas shall not be approved as field laboratories.

(4) The laboratory shall be accredited only for the requested fields of accreditation for which it holds accreditation from its primary accrediting authority or authorities. The laboratory shall be accredited by the department for only fields of accreditation included in the Kansas scope of accreditation.

(5) In lieu of reciprocity, any out-of-state laboratory may apply for primary accreditation from the department if all of the following criteria are met:

(A) The on-site assessment of the laboratory is conducted by a third-party assessor contracted by the department.

(B) All fees and expenses for the on-site assessment of the laboratory are paid by the laboratory directly to the third-party assessor.

(C) The laboratory meets all other requirements for accreditation as specified in this regulation and in K.A.R. 28-15-36 and 28-15-37.

(j) Laboratory withdrawal of accreditation. Any laboratory may withdraw its application for accreditation at any time during the accreditation process. Any laboratory may withdraw from accreditation at any time during the accreditation period. In both cases, each laboratory shall notify the department in writing. The fees submitted to the department up to the time of the notification shall not be refunded, as specified in K.A.R. 28-15-37.

(k) The change in legal status, ownership, or location of an accredited laboratory.

(1) Each accredited laboratory shall notify the department, in writing, of any change in legal sta-

tus, ownership or location, or any combination of these, within 30 calendar days of the change.

(2) Accreditation shall be transferred if the change in legal status or ownership of the accredited laboratory does not affect the laboratory's staff, equipment, and organization.

(3) Accreditation shall not be transferred if the change in legal status or ownership of the accredited laboratory affects the laboratory's staff, equipment, and organization. The laboratory shall be required to apply for accreditation as specified in subsection (b).

(4) Any change in the legal status, ownership, or location, or any combination of these, may require an on-site assessment of the laboratory by a laboratory accreditation officer.

(5) If a change in ownership occurs, all records and analyses that have been performed and that pertain to accreditation shall be retained for a minimum of five years and shall be subject to inspection by the department during this period without prior notification to the laboratory. (Authorized by K.S.A. 65-1,109a; implementing K.S.A. 65-171f and 65-1,109a; effective, E-79-14, June 23, 1978; effective May 1, 1979; amended May 1, 1983; amended May 1, 1986; amended May 1, 1988; amended Jan. 24, 1994; amended May 25, 2001; amended March 26, 2004; amended June 1, 2007.)

28-15-36. Requirements for accreditation of environmental laboratories other than field laboratories. (a) For the purposes of this regulation, the definitions in the "environmental laboratory accreditation glossary," published August 2006 by the department and hereby adopted by reference, shall apply.

(b) The requirements for the approval of environmental laboratories shall be those requirements listed in sections 2.1.3, 2.2.3, 4.1.1, 4.1.8, 5.4, and 5.5 and appendices C, D.1, D.2, D.3, and D.4 of chapter 5 of "2003 NELAC standard," EPA/600/R-04/003, approved at the ninth NELAC annual meeting on June 5, 2003. The sections and appendices specified in this subsection are hereby adopted by reference.

(c) Each environmental laboratory shall meet all of the following requirements for the use of NELAC accreditation:

(1) Not misrepresent its fields of accreditation, methods, or analytes or its accreditation status on any document. These documents shall include laboratory reports, catalogs, advertising,

business solicitations, proposals, quotations, and other materials;

(2) post or display its most recent accreditation certificate or its fields of accreditation in a prominent place in the laboratory facility;

(3) make accurate statements concerning its fields of accreditation and accreditation status;

(4) include at least the phrase "NELAP accredited" and the laboratory's accreditation number or other identifier if the accrediting authority's name is used on general literature, including catalogs, advertising, business solicitations, proposals, quotations, laboratory analytical reports, and any other materials; and

(5) not use its certificate, its accreditation status, the NELAC or NELAP logo, or both logos to imply endorsement by the department. (Authorized by K.S.A. 65-1,109a; implementing K.S.A. 65-171f and 65-1,109a; effective, E-79-14, June 23, 1978; effective May 1, 1979; amended May 1, 1983; amended May 1, 1986; amended May 1, 1988; amended Jan. 24, 1994; amended May 25, 2001; amended March 26, 2004; amended June 1, 2007.)

28-15-36a. Requirements for accreditation of field laboratories. (a) Accreditation of a field laboratory shall be granted only to those laboratories performing environmental analyses limited to one or more of the following fields of accreditation:

- (1) Chlorine;
- (2) dissolved oxygen;
- (3) hydrogen ion (pH);
- (4) sulfite;
- (5) temperature; or
- (6) turbidity.

(b) Personnel. Each staff member performing analytical procedures shall meet the following minimum qualifications:

- (1) A high school diploma or equivalent;
- (2) knowledge of the use of analytical equipment and support equipment used for the analysis of the fields of accreditation listed in subsection (a); and
- (3) one month's experience in performing the analyses being considered for approval.

(c) Supplies, reagents, standards, and equipment.

(1) All items necessary for the performance of the analyses shall be available.

(2) Reagents and standards shall not exceed their expiration date.

(3) Equipment shall be properly maintained and in working order.

(4) Automated on-line equipment shall be maintained and calibrated according to manufacturer's instructions. The calibration and maintenance of automated equipment shall be documented.

(d) Analytical methods. Drinking water samples shall be analyzed in accordance with methods approved by the laboratory accreditation officer as required by the safe drinking water act. Environmental water samples analyzed under the clean water act shall be analyzed in accordance with methods approved by the laboratory accreditation officer as required by the clean water act. Environmental samples analyzed under the resource conservation and recovery act shall be analyzed in accordance with methods approved by the laboratory accreditation officer as required by the resource conservation and recovery act.

(e) Sample collection and handling. All samples collected for field laboratory analysis shall be analyzed immediately after collection or on-site. The temperature of each sample shall be read and recorded at the sample site.

(f) Quality assurance.

(1) Each field laboratory shall implement and maintain a detailed, written standard operating procedure for collection, analysis, reporting, and data handling.

(2) Each instrument shall be calibrated on each day of use.

(3) Each calibration shall be verified with a quality control standard.

(4) Each aliquot of a solution used for calibration and quality control shall be used only once.

(g) Data handling.

(1) All records relating to data reported for regulatory compliance purposes shall be retained by the laboratory for at least five years. This requirement shall include the following if applicable:

(A) Calibration or standardization information, or both;

(B) quality controls, including standards and duplicates;

(C) calculations;

(D) sampling and analytical information; and

(E) reports.

(2) The sampling and analytical data to be retained shall include the following:

(A) The date, time, and location of sampling and analysis;

(B) the name of the person collecting the sample;

(C) the name of the analyst; and

(D) the type of analysis, method utilized, and results.

(h) The person in charge of each accredited field laboratory shall notify the accreditation officer, in writing, within 30 days of any changes in analytical equipment, personnel, facility location, facility name, or facility ownership. If any changes in personnel take place, the person in charge of the accredited field laboratory shall be responsible for the placement and training of individuals meeting the qualifications requirements specified in subsection (b). (Authorized by K.S.A. 65-1,109a; implementing K.S.A. 65-1711 and 65-1,109a; effective Jan. 24, 1994; amended May 25, 2001; amended June 1, 2007.)

28-15-37. Fees. (a)(1) The accreditation fees for primary accreditation for laboratories located in the state of Kansas shall be as follows:

(A)(i) \$1,000.00 for aquatic toxicity;

(ii) \$300.00 for microbiology field of accreditation for one scope of accreditation and \$500.00 for more than one scope of accreditation;

(iii) \$500.00 for metal field of accreditation for each scope of accreditation;

(iv) \$1,000.00 for organic chemistry field of accreditation for each scope of accreditation;

(v) \$500.00 for inorganic chemistry field of accreditation for each scope of accreditation; and

(vi) \$1,000.00 for radiochemistry field of accreditation for each scope of accreditation;

(B) \$200.00 for each supplemental accreditation; and

(C) \$200.00 for each laboratory operating more than one facility in different physical locations and accredited under the same certificate, in addition to any of the accreditation fees.

(2) The accreditation fee for primary accreditation for each laboratory located out of the state of Kansas shall be \$1,750.00 for each scope of accreditation. The laboratory shall be responsible for all fees and expenses for the assessment of the laboratory that are paid by the laboratory directly to a third-party assessor contracted by the department.

(3) The accreditation fee for each laboratory accredited by reciprocity shall be \$1,250.00 for each scope of accreditation.

(4) The accreditation fees for each field laboratory shall be \$200.00 for one field of accreditation and \$350.00 for more than one field of accreditation.

(b) The person in charge of each laboratory shall submit the applicable fees specified in sub-

section (a) with the application forms provided by the department.

(c) For each scope of accreditation, each laboratory shall be assessed a \$75.00 fee for each field of accreditation added within that scope of accreditation during the accreditation period.

(d) All fees shall be remitted in full before the issuance of the certificate. Fees shall not be refunded except in the case of overpayment. Payment of fees shall be made to the Kansas division of health and environmental laboratories. (Authorized by and implementing K.S.A. 65-1,109a; effective, E-79-14, June 23, 1978; effective May 1, 1979; amended May 1, 1986; amended Jan. 24, 1994; amended May 25, 2001; amended June 1, 2007.)

28-15-50. Definitions. For the purposes of these regulations, the following words and phrases are defined as follows:

(a) "Capacity" means the technical, managerial, and financial ability to comply with applicable national primary drinking water standards.

(b) "Conservation plans and practices" means conservation plans and practices approved by either the Kansas water office or the division of water resources, Kansas department of agriculture, as consistent with guidelines developed and maintained by the Kansas water office pursuant to K.S.A. 74-2608 and amendments.

(c) "Debt service coverage ratio" means the sum of net income plus interest expense plus depreciation, divided by the sum of principal and interest payments for debt service.

(d) "Department" means the Kansas department of health and environment.

(e) "Disadvantaged community" means a loan applicant or the service area of a loan applicant that meets affordability criteria established by the secretary.

(f) "Equivalency" means that portion of the Kansas water supply loan fund that is equal to the amount of capitalization grants provided by the federal government.

(g) "Equivalency project" means a project that is funded from the equivalency portion of the Kansas water supply loan fund.

(h) "Fund" means the Kansas water supply fund established by K.S.A. 1996 Supp. 65-163e et seq., and amendments, and may consist of more than one pool of money.

(i) "Intended use plan" means the plan prepared according to K.S.A. 1996 Supp. 65-163h and amendments.

(j) "Loan agreement" means an executed contract between a loan applicant and the secretary confirming the purpose of the loan, the amount and terms of the loan, the schedule of the loan payments and requirements, and any other agreed upon conditions set forth by the secretary.

(k) "Loan applicant" means one of the following:

(1) any political or taxing subdivision authorized by law to construct, operate, and maintain a public water supply system, including water districts;

(2) two or more such subdivisions jointly constructing, operating, or maintaining a public water supply system; or

(3) the Kansas rural water finance authority.

(l) "National primary drinking water standards" means a regulation that specifies either a maximum contaminant level or a treatment technique along with associated monitoring and reporting requirements for contaminants with adverse health effects on persons.

(m) "Project completion" means the initiation of operation or the ability to initiate operation.

(n) "Project" means acquisition, construction, reconstruction, improving, equipping, rehabilitation, or extension of all or any part of a public water supply system.

(o) "Public water supply system" has the meaning provided by K.S.A. 65-162a and amendments.

(p) "Secretary" means the secretary of health and environment.

(q) "Significant noncompliance" means failure to comply with any national primary drinking water standard according to criteria established by the administrator of the federal environmental protection agency.

(r) "Water transfer" has the meaning provided by K.S.A. 1996 Supp. 82a-1501 and amendments. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-51. Fund use eligibility. (a) The fund shall be used only to provide loans to loan applicants for all or any part of the following:

(1) The acquisition, construction, reconstruction, improvement, equipping, rehabilitation, or extension of all or any part of a public water supply system;

(2) costs for project planning, design, and construction inspection, if included in the loan application; and

(3) if a construction contract has been awarded on or after August 6, 1996, refinancing the acquisition, construction, improvement, equipping, rehabilitation, or extension of all or any part of a public water supply system, including costs for project planning, design, and construction inspection. Refinancing shall be allowed only from funds provided directly or indirectly, by federal appropriations for federal fiscal year 1997.

(b) Each project eligible to receive loans shall appear on the project priority list prepared by the department. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-52. Interest rate. (a) Each loan shall accrue interest for the entire life of the loan at a fixed rate set by the secretary. This fixed rate shall be calculated as specified in subsection (b). Fees for servicing the loans may also be set by the secretary.

(b) The interest rate shall be calculated as a percentage, as specified in the intended use plan, of three months' average of the bond buyer's weekly 20-bond GO (general obligation) index. The loan interest rate as calculated shall include any loan servicing fee.

(c) The interest rate and loan servicing fee may vary depending on the loan repayment period. (Authorized by K.S.A. 65-163f; implementing K.S.A. 65-163f and K.S.A. 2019 Supp. 65-163i; effective Oct. 10, 1997; amended Feb. 28, 2020.)

28-15-53. Repayment of loans. (a) All principal and interest shall be repaid in accordance with the terms of the loan agreement. Repayments shall begin no later than one year following project completion. Repayment of the loan shall not exceed a 30-year repayment period, except for a loan to a disadvantaged community. Any loan to a disadvantaged community may exceed a 30-year repayment period if both of the following conditions are met:

(1) Repayment of the loan does not exceed a 40-year repayment period.

(2) The repayment period does not exceed the expected design life of the project.

(b) Prepayment of the principal in whole or part may be made, in accordance with the terms of the loan agreement. (Authorized by K.S.A. 65-163f; implementing K.S.A. 65-163f and K.S.A. 2019

Supp. 65-163i; effective Oct. 10, 1997; amended Feb. 28, 2020.)

28-15-54. Dedicated loan repayment source. (a) Each loan recipient shall adopt one or more dedicated sources for repayment of the loan, including principal and interest. The dedicated sources of revenue may be in the form of revenue from water sales, service charges, connection fees, special assessments, property taxes, grants, or some combination of these sources. Each dedicated source of revenue shall be legally available to the loan recipient over the life of the loan and pledged to the repayment of the loan. Each dedicated source of revenue shall be approved by the secretary.

(1) Each loan recipient with general taxing authority shall commit to using that authority, if necessary, as a condition of receiving a loan. As an alternative to pledging general tax authority, any such loan recipient may purchase bond insurance.

(2) Each loan recipient without general taxing authority shall purchase bond insurance as a condition of receiving a loan. As an alternative to purchasing bond insurance, any such loan recipient shall pledge to maintain either of the following:

(A) A debt service coverage ratio of 140%; or

(B) A debt service coverage ratio of 125% combined with a 10% loan reserve account.

(b) Each loan recipient shall conduct an annual revenue source review during the entire life of the loan repayment obligation and, if necessary, shall implement new revenue rates as approved by the secretary. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-55. Failure to repay loan on schedule. (a) Upon failure of a loan recipient to pay one or more installments of the loan repayment on schedule, the governing body of the loan recipient shall be consulted by the secretary and may be required to undergo a financial and management operations review.

(b) The governing body shall correct any deficiencies noted during the review and adopt charges as set by the secretary, to be levied against users of the project. These charges shall remain in effect until the full amount of the loan, including principal and interest, has been repaid, unless

otherwise approved by the secretary. The governing body of each loan recipient shall collect any such charges and shall forward all receipts from such charges on a schedule established by the secretary. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-56. Project eligibility. (a) No assistance from the fund shall be provided for any water transfer project, or for any portion of a project involving a water transfer. No assistance from the fund shall be provided to any loan applicant who has not adopted and implemented water conservation plans and practices.

(b) No assistance shall be provided to any loan applicant in significant noncompliance with any applicable primary drinking water regulation, unless the project will return the loan applicant to compliance.

(c) No assistance shall be provided to any loan applicant lacking capacity, unless the loan applicant agrees to undertake feasible and appropriate changes in operations, including ownership, management, accounting, rates, maintenance, consolidation, alternative sources of supply, or other procedures if the secretary determines that such changes are required to demonstrate capacity.

(d) No assistance shall be provided for projects and activities deemed ineligible for participation by the U.S. environmental protection agency. Any such projects and activities shall be listed in the intended use plan. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-57. Equivalency projects. Equivalency projects shall be required to comply with federal laws and executive orders that apply to all activities receiving federal assistance. In any given year, more projects than are necessary to equal the equivalency portion of the fund may be required to comply with equivalency project requirements, for the purpose of building an equivalency credit for future federal funds. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-58. User charge system. Each loan applicant shall develop and, after the secretary's review and approval, adopt a rate system that shall produce adequate revenue for repayment of the loan principal and interest, and for operation and maintenance of the entire public water supply system, including depreciation. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-59. Project certification. Each loan recipient shall certify to the secretary whether or not the project meets its design requirements on the date one year after the initiation of operation of the project. The loan recipient shall be responsible for assuring timely correction and compliance, including recertification if the initial certification concluded that the project did not meet its design requirements. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-60. Procurement. Each loan recipient shall follow state procurement laws and regulations applicable to the recipient and procedures established by the secretary. The secretary's approval is required before awarding any contract for construction. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-61. Project documents. (a) Each loan applicant shall submit the following documents for the secretary's review and approval:

(1) A completed loan application on application forms furnished by the department;

(2) an engineering report describing the need for the project, project design parameters, and an estimate of cost; and

(3) financial statements for the previous three years.

(b) Each loan recipient shall submit the following documents for the secretary's review and approval:

(1) Complete design plans, specifications, and construction bidding documents, including detailed cost estimates for competitive bidding, and projected construction and payment schedules;

(2) a plan for providing construction inspection services;

(3) a plan of operation, including an overall project completion schedule, annual operating cost projections for a minimum of five years, a description of the financial management system, and projected revenues to operate and maintain the public water supply system. Revenue projections shall also include the loan repayment obligations; and

(4) an operations manual, which shall be submitted before 90% of the project is completed. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-62. Financial capability. As part of the loan application, the loan applicant shall demonstrate and certify to the secretary that the applicant has the financial capability to repay the loan and to cover the costs of operation and maintenance of the entire public water supply system of which the proposed project is an integral part. This financial assessment shall cover the life of the loan obligation and consider, at a minimum, changes in economic and population growth, depreciation, existing debt obligations, revenues, project costs, and effects on user charge rates. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-63. Public participation. (a) Each loan applicant shall conduct a minimum of one public hearing before execution of the loan agreement, to discuss the proposed project and receive input on alternatives. Notice of the public hearing shall be provided to the department and shall be published in one or more newspapers, as needed to cover the project service area, at least 30 calendar days before the public hearing.

(b) A record of the public hearing and proof of publication shall be submitted prior to execution of the loan agreement.

(c) The 30-day public notice requirement may be waived by the secretary for any project deemed an emergency. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-64. Environmental review. (a) The “Environmental review procedure for Kansas public water supply loan fund,” dated July 1997, is adopted by reference as the required environmental review procedure for an equivalency project.

(b) For an equivalency project, 40 CFR 6.508(a), 6.511(b), and 6.512, as in effect on July 1, 1996, are hereby adopted by reference.

(c) Those members of the public who participated in the environmental review process shall have the right to appeal the decisions made within that process. All such appeals shall be conducted pursuant to the Kansas administrative procedure act and the act for judicial review set forth in K.S.A. 77-501 et seq. and 77-601 et seq., respectively.

(d) When used in any provision adopted from 40 CFR Part 6, references to “EPA” shall be replaced with the “Kansas department of health and environment”; “grant” shall be replaced with “loan agreement”; “grantee” shall be replaced with “applicant.” (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 65-163e through 65-163u; effective Oct. 10, 1997.)

28-15-65. Project accounts. Each loan recipient shall maintain project accounts in accordance with generally accepted government accounting standards as defined in the 1994 edition of the “governmental accounting, auditing, and financial reporting” manual issued by the government finance officers association. (Authorized by K.S.A. 1996 Supp. 65-163f; implementing K.S.A. 1996 Supp. 65-163d, as amended by 1997 S.B. 40, sec. 1, and K.S.A. 1996 Supp. 65-163e through 65-163u; effective Oct. 10, 1997.)

Article 15a.—PRIMARY DRINKING WATER

28-15a-2. Definitions; replaced terms.

(a) For the purposes of this article and article 15 of the department’s regulations, the definitions in 40 C.F.R. 141.2, as in effect on July 1, 2015, are hereby adopted by reference with the following alterations:

(1)(A) The definition of “Public water system” shall be replaced with the following:

“ ‘Public water supply system’ means a system for the provision to the public of water for human consumption through pipes or, after August 5, 1998, other constructed conveyances, if the system has at least 10 service connections or regular-

ly serves an average of at least 25 individuals daily at least 60 days out of the year. This term shall include the following:

“(1) Any collection, treatment, storage, and distribution facilities under control of the operator of the system and used primarily in connection with the system; and

“(2) any collection or pretreatment storage facilities not under this control that are used primarily in connection with the system.

“This term shall not include any ‘special irrigation district.’

“Each public water supply system shall be deemed either a ‘community water supply system’ or a ‘non-community water supply system.’”

(B) The term “public water supply system” shall replace the term “public water system” wherever the latter term appears in any of the text adopted in this article.

(2) The definition of “Community water system” shall be replaced with the following: “‘Community water supply system’ means a public water supply system which has at least 10 service connections used by year-round residents or regularly serves at least 25 year-round residents.”

The term “community water supply system” shall replace the term “community water system” wherever the latter term appears in any of the text adopted in this article.

(3) The definition of “Person” shall be replaced by the following: “‘Person’ means an individual, corporation, company, institution, association, partnership, township, municipality, county, state, or federal agency that owns, administers, operates, or maintains a public water supply system that includes a community water supply system or a non-community water supply system.”

(4) The following definitions shall be added to 40 C.F.R. 141.2:

(A) “Administrator” means administrator of the environmental protection agency.

(B) “Approved laboratory” means a laboratory certified and approved by the department to analyze water samples to determine compliance with maximum contaminant levels or to perform other required analyses.

(C) “Department” and “primacy agency” mean Kansas department of health and environment.

(D) “Distribution system” means the system of conduits and appurtenances by which a water supply is distributed to customers.

(E) “Laboratory tests” means all bacteriological, chemical, physical, or radiological tests made by

either the departmental laboratory or an approved laboratory on water samples that were submitted by the operator of a public water supply system to confirm the quality of water.

(F) “Operating records and reports” means the daily record and the monthly report of data connected with the operation of the public water supply system’s facilities.

(G) “Secretary” means secretary of the Kansas department of health and environment.

(H) “Significant deficiency” means any defect in a public water supply system’s design, operation, maintenance, or administration, as well as any failure or malfunction of any system component that causes, or has the potential to cause, an unacceptable risk to health or that could affect the reliable delivery of safe drinking water.

(I) “Turbidity” means the cloudy condition of water caused by the presence of finely suspended matter, including clay, silt, plankton, and microscopic organisms, resulting in the scattering and absorption of light rays. Turbidity is measured in nephelometric turbidity units (NTU).

(b) For the purposes of this article and article 15 of the department’s regulations, the following terms and phrases appearing in the federal regulations adopted by reference in this article and article 15 of the department’s regulations shall be defined or replaced as specified in this subsection:

(1) “Must” shall be replaced by “shall.”

(2) “SDWA” means the safe drinking water act, 42 U.S.C. Sec. 300f et seq., and amendments thereto.

(3) “This part” and “part” shall be replaced by “this article” and “article.”

(4) “This subpart” and “subpart” mean that specific, named group of primary drinking water regulations in which the regulation is placed within this article. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-3. Coverage; conditions for exclusion. The provisions of 40 C.F.R. 141.3, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-4. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-6. Effective dates. For each requirement in any portion of a C.F.R. adopted by

reference in this article of the department's regulations with an expired effective date, completion date, or beginning compliance date, that expired date shall be replaced with the effective date of this regulation. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-11. Maximum contaminant levels for inorganic chemicals. The provisions of 40 C.F.R. 141.11(d), as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-21. Coliform sampling. Each person that operates a public water supply system shall comply with the following monitoring and analytical requirements for coliforms:

(a) The sampling period for microbiological compliance shall be one calendar month for all public water supply systems.

(b) If a person that operates a public water supply system collecting fewer than five routine samples per month has at least one total coliform-positive sample and the department does not invalidate any of the samples, the person shall collect at least five routine samples during the next month the person provides water to the public, unless directed otherwise by the department.

(c)(1) Each person that operates a public water supply system that uses surface water as its source of supply and serves a population of 4,100 or less shall take at least four water samples during each sampling period.

(2) Each person that operates a public water supply system that uses surface water as its source of supply and serves a population greater than 4,100 shall take water samples according to the table in subsection (d).

(3) Each person that operates a public water supply system that uses groundwater, not including groundwater under direct influence of surface water, as its source of supply and each person that operates a public water supply system that purchases water from another public water supply system shall take water samples according to the table in subsection (d).

(d) Each person that operates a public water supply system shall ensure that routine samples are collected at regular time intervals and analyzed for total coliform bacteria as specified in the following table:

Population Served	Minimum number of samples per sampling period
25 to 2,500.....	2
2,501 to 3,300.....	3
3,301 to 4,100.....	4
4,101 to 4,900.....	5
4,901 to 5,800.....	6
5,801 to 6,700.....	7
6,701 to 7,600.....	8
7,601 to 8,500.....	9
8,501 to 12,900.....	10
12,901 to 17,200.....	15
17,201 to 21,500.....	20
21,501 to 25,000.....	25
25,001 to 33,000.....	30
33,001 to 41,000.....	40
41,001 to 50,000.....	50
50,001 to 59,000.....	60
59,001 to 70,000.....	70
70,001 to 83,000.....	80
83,001 to 96,000.....	90
96,001 to 130,000.....	100
130,001 to 220,000.....	120
220,001 to 320,000.....	150
320,001 to 450,000.....	180

For each additional 150,000 in population, an additional 30 water samples shall be analyzed for each sampling period. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-23. Inorganic chemical sampling and analytical requirements. Each person that operates a public water supply system shall comply with the sampling and analytical requirements specified in 40 C.F.R. 141.23, as in effect on July 1, 2015 and hereby adopted by reference, with the addition of the following text, which shall be added at the beginning of 40 C.F.R. 141.23(c):

“Inorganic analysis for calcium, chloride, iron, magnesium, manganese, pH, potassium, silica, sodium, specific conductance, sulfate, total alkalinity, total dissolved solids, total hardness, and total phosphorus shall be required from each community water supply system with its own source of supply and from each non-transient, non-community water supply system with its own source of supply. Each person operating a groundwater system shall take one sample at each sampling point during each compliance period. Each person operating a surface water system (or combined surface water and ground-

water system) shall take one sample annually at each sampling point.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-24. Requirements for sampling and analyzing organic chemicals. The provisions of 40 C.F.R. 141.24, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-25. Analytical methods for measuring radioactivity. The provisions of 40 C.F.R. 141.25, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-26. Frequency of monitoring for radioactivity. The provisions of 40 C.F.R. 141.26, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-27. Alternate analytical techniques and testing methods. (a) The following documents are hereby adopted by reference:

(1) 40 C.F.R. 141.27, as in effect on July 1, 2015; and

(2) 40 C.F.R. part 141, subpart C, appendix A, as in effect on July 1, 2017 and as amended by 82 fed. reg. 34867-34870 (2017).

(b) In addition to the requirements of 40 C.F.R. 141.27 and appendix A to subpart C of part 141 as adopted in subsection (a), each person that operates a public water supply system shall ensure that the analyses of drinking water samples required by this article of the department’s regulations are performed in accordance with the approved methods listed in appendix A for contaminants, disinfectant residuals, and parameters.

(c) If drinking water samples are required by this article of the department’s regulations to be analyzed, each person that operates a public water supply system shall ensure that the analysis is conducted by an accredited laboratory as specified in K.A.R. 28-15-35. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-28. Approved laboratories. The provisions of 40 C.F.R. 141.28, as in effect on July 1, 2015, are hereby adopted by reference. (Autho-

rized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-29. Monitoring of consecutive public water supply systems. The provisions of 40 C.F.R. 141.29, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-31. General reporting requirements. The provisions of 40 C.F.R. 141.31, as in effect on July 1, 2015, are hereby adopted by reference, except that “subpart Q of this part” shall be replaced by “K.A.R. 28-15a-201.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-32. Electronic reporting requirements. (a) No later than six months after written notification from the department, each person that operates a public water supply system shall meet the following requirements:

(1) Submit to the department a written acknowledgment of compliance with the electronic submission requirement; and

(2) commence the submission of all required documents, including surveys, assessments, reports, monitoring, and compliance data, by only electronic means.

(b) Each electronic submission shall be made according to the department’s designated procedures. (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

28-15a-33. General record maintenance. The provisions of 40 C.F.R. 141.33, as in effect on July 1, 2015, are hereby adopted by reference, except that “subpart Q of this part” shall be replaced by “K.A.R. 28-15a-201.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-41. Special monitoring for sodium. The provisions of 40 C.F.R. 141.41, as in effect on July 1, 2015, are hereby adopted by reference, except that the last sentence of 141.41(b) shall not be adopted. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-42. Special monitoring for corrosivity characteristics. The provisions of 40 C.F.R. 141.42, as in effect on July 1, 2015, are hereby adopted by reference, except that in para-

graph (d), the text “In addition, States may require identification and reporting of other materials of construction present in distribution systems that may contribute contaminants to the drinking water, such as:” shall be replaced by the following text: “Community water supply systems shall identify whether the following construction materials are present in their distribution system and shall report to the department:”. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-43. Prohibition on use of lead pipes, solder, and flux. The provisions of 40 C.F.R. 141.43(a) and (d) as in effect on July 1, 2015, are hereby adopted by reference, except that 40 C.F.R. 141.43(d)(2) shall be replaced with the following text:

“(d)(2) When used with respect to pipes and pipe fitting refers to pipes and pipe fittings containing not more than 0.25% lead calculated across the wetted surfaces of a pipe, pipe fitting, plumbing fitting, and fixture.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-60. Effective dates for maximum contaminant levels and maximum residual disinfectant levels. The provisions of 40 C.F.R. 141.60, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-61. Maximum contaminant levels for organic contaminants. The provisions of 40 C.F.R. 141.61, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-62. Maximum contaminant levels for inorganic contaminants. The provisions of 40 C.F.R. 141.62, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-63. Maximum contaminant levels for microbiological contaminants. The provisions of 40 C.F.R. 141.63(c), (e), and (f), as in effect on July 1, 2015, are hereby adopted by reference, except that “subpart Q of this part” shall be replaced by “K.A.R. 28-15a-201” and “subpart Y of this part” shall be replaced by

“K.A.R. 28-15a-851.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-64. Maximum contaminant levels for disinfection by-products. The provisions of 40 C.F.R. 141.64, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-65. Maximum residual disinfectant levels. The provisions of 40 C.F.R. 141.65, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-66. Maximum contaminant levels for radionuclides. The provisions of 40 C.F.R. 141.66, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-70. Requirements for filtration and disinfection. The provisions of 40 C.F.R. 141.70 and 40 C.F.R. 141.72 through 40 C.F.R. 141.76, as in effect on July 1, 2015, are hereby adopted by reference with the following alterations:

(a) 40 C.F.R. 141.72(a) shall be deleted.

(b) 40 C.F.R. 141.72(b)(3)(i) shall be replaced with the following text:

“A sufficient amount of chlorine shall be added to the water to maintain a chlorine residual of at least 0.2 mg/L of free chlorine or 1.0 mg/L of total chlorine throughout the entire distribution system.

“Failure to maintain a residual as specified in 141.72(b)(3)(i) in more than five percent of measurements taken each month, in any two consecutive months, shall be a violation of this regulation and shall be reported to the department by the tenth day following the month in which the violation occurred.

“Each day the public water supply system serves water to customers, the operator shall make a measurement of the chlorine residual. The operator shall record and maintain data to demonstrate to the department that the public water supply system is in compliance with the requirements of 141.72(b)(3)(i).”

(c) 40 C.F.R. 141.74(b) and 141.75(a)(1) and (a)(2) shall be deleted.

(d) The first sentence of 40 C.F.R. 141.74(c)(3)(i) shall be deleted. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-72. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-73. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-74. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-75. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-76. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-80. Requirements for the control of lead and copper. The provisions of 40 C.F.R. 141.80 through 141.91, as in effect on July 1, 2015, are hereby adopted by reference, except that “subpart I” shall be replaced by “K.A.R. 28-15a-80.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-81. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-82. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-83. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-84. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-85. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-86. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-87. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-88. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-89. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-90. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-91. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-100. Requirements for public water supply systems using point-of-entry devices or point-of-use devices. The provisions of 40 C.F.R. 141.100, as in effect on July 1, 2015, are hereby adopted by reference with the addition of the following text:

“(f) The public water supply system shall not exceed 100 service connections. Each person that operates a public water supply system exceeding 100 service connections that wishes to install any point-of-entry devices or point-of-use devices, or both, shall submit a formal request to the department. Each person that operates a public water supply system shall not proceed with installation of these devices without written approval from the department.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-101. Use of bottled water. Each person operating a public water supply system shall ensure that the system uses bottled water only in accordance with 40 C.F.R. 141.101, as in effect on July 1, 2015 and hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-110. General requirements for treatment techniques. The provisions of 40 C.F.R. 141.110, as in effect on July 1, 2015, are hereby adopted by reference, except that “subpart K of this part” shall be replaced by “K.A.R. 28-15a-110 and K.A.R. 28-15a-111.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-111. Treatment techniques for acrylamide and epichlorohydrin. The provisions of 40 C.F.R. 141.111, as in effect on July 1, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-130. Disinfectant residuals, disinfection by-products, and disinfection by-product precursors. The provisions of 40 C.F.R. 141.130 through 141.135, as in effect on July 1, 2015, are hereby adopted by reference with the following alterations:

(a) "Appendix A to subpart C of this part" shall be replaced by "K.A.R. 28-15a-27."

(b) "Subpart Q of this part" shall be replaced by "K.A.R. 28-15a-201."

(c) "Subparts U and V of this part" shall be replaced by "K.A.R. 28-15a-600 and K.A.R. 28-15a-620." (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-131. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-132. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-133. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-134. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-135. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-151. Requirements for consumer confidence reports. The provisions of 40 C.F.R. 141.151 through 141.155 and appendix A to subpart O of part 141, as in effect on July 1, 2015, are hereby adopted by reference with the following alterations:

(a) 40 C.F.R. 141.151(f) shall be deleted.

(b) The text in 40 C.F.R. 141.153(d)(1)(i) shall be replaced with the following: "Contaminants subject to an MCL, action level, maximum residual disinfectant level, treatment technique for regulated contaminants, and those contaminants

listed in K.A.R. 28-15a-23 which are not subject to an MCL but are required to be monitored."

(c) The text in 40 C.F.R. 141.155(c) shall be replaced with the following: "No later than the date a community water supply system is required to distribute the report to its customers, that system shall submit a copy of the report to the department, including a certification of delivery that the report has been distributed to customers and that the information is correct and consistent with the compliance monitoring data contained in the report." (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-152. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-153. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-154. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-155. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-170. Enhanced filtration and disinfection requirements for subpart H systems serving 10,000 or more people. The provisions of 40 C.F.R. 141.170 and 40 C.F.R. 141.172 through 141.175, as in effect on July 1, 2015, are hereby adopted by reference, except that "this subpart P" shall be replaced by "K.A.R. 28-15a-170." (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-172. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-173. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-174. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-175. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-201. Requirements for public notification. Each person that operates a public water supply system shall comply with 40 C.F.R. 141.201 through 141.211 and appendices A, B, and C to subpart Q of part 141, as in effect on July 1, 2015 and hereby adopted by reference, except that in 40 C.F.R. 141.201, the last sentence of the introduction shall be deleted. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-202. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-203. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-204. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-205. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-206. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-207. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-208. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-209. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-210. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-400. Requirements for the groundwater rule. The provisions of 40 C.F.R. 141.400 through 141.405, as in effect on July 1, 2015, are hereby adopted by reference, except that “this subpart S” shall be replaced by “K.A.R. 28-15a-400.” (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

28-15a-500. Requirements for enhanced filtration and disinfection for subpart H sys-

tems serving fewer than 10,000 people. (a) The following sections in 40 C.F.R. part 141, as in effect on July 1, 2015, are hereby adopted by reference, except as specified in this regulation:

- (1) 141.500 through 141.502;
- (2) 141.503(a) and 141.503(c) through (g);
- (3) 141.510 and 141.511;
- (4) 141.530;

(5) 141.531, except that the last sentence shall be deleted and replaced with the following text: “An alternative TTHM and HAA5 data set may be approved by the secretary if a system demonstrates that the alternative data set is more representative of TTHM and HAA5 levels”;

- (6) 141.532 through 141.536;
- (7) 141.540 through 141.544;
- (8) 141.550 through 141.553;
- (9) 141.560 through 141.564;
- (10) 141.570; and
- (11) 141.571.

(b) In the portions of 40 C.F.R. part 141 adopted by reference in subsection (a), the phrase “subpart T” shall be replaced by “K.A.R. 28-15a-500.” (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; amended June 7, 2018.)

28-15a-501. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-502. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-503. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-530. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-531. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-532. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-533. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-534. (Authorized by and imple-

menting K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-535. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-536. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-540. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-541. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-542. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-543. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-544. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-550. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-551. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-552. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-553. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-560. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-561. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-562. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-563. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-564. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-570. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-571. (Authorized by and implementing K.S.A. 65-171m; effective Oct. 1, 2004; revoked June 7, 2018.)

28-15a-600. Initial distribution system evaluations of the stage 2 disinfection by-products rule. The provisions of 40 C.F.R. 141.600 through 141.605, as in effect on July 1, 2015, are hereby adopted by reference, with the following alterations:

(a) "Subpart U of this part" shall be replaced by "K.A.R. 28-15a-600."

(b) "Subpart V of this part" shall be replaced by "K.A.R. 28-15a-620."

(c) "Subpart L of this part" shall be replaced by "K.A.R. 28-15a-130." (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

28-15a-620. Disinfection by-products requirements of the stage 2 disinfection by-products rule. The provisions of 40 C.F.R. 141.620 through 141.629, as in effect on July 1, 2015, are hereby adopted by reference, except that "subpart V of this part" shall be replaced by "K.A.R. 28-15a-620" and "subpart L of this part" shall be replaced by "K.A.R. 28-15a-130." (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

28-15a-700. Enhanced treatment for *Cryptosporidium*. The provisions of 40 C.F.R. 141.700 through 141.711 and 40 C.F.R. 141.713 through 141.722, as in effect on July 1, 2015, are hereby adopted by reference, with the following alterations:

(a) "This subpart W" shall be replaced by "K.A.R. 28-15a-700."

(b) "Subparts H, P and T of this part" shall be replaced by "K.A.R. 28-15a-70, K.A.R. 28-15-170, and K.A.R. 28-15-500." (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

28-15a-851. Requirements for the revised total coliform rule. The provisions of 40 C.F.R. 141.851 through 141.861, as in effect on July 1, 2015, are hereby adopted by reference with the alterations specified in this regulation.

(a) Exclusions. The following portions of 40 C.F.R. 141.851 through 141.861 shall be excluded from adoption:

(1) 40 C.F.R. 141.854(a)(4), (b), (c), (d), (e), (f), (g), and (h);

(2) 40 C.F.R. 141.855(b), (c), (d), and (e);

(3) 40 C.F.R. 141.856(b) and (c);

(4) 40 C.F.R. 141.857(b), (c), and (d); and

(5) 40 C.F.R. 141.859(a)(2)(iii).

(b) Modifications.

(1)(A) In 40 C.F.R. 141.854(i)(2), the following text shall be deleted: “unless it meets the criteria in paragraphs (i)(2)(i) through (iii) of this section to be eligible for monitoring less frequently than monthly beginning April 1, 2016, except as provided under paragraph (c) of this section.”

(B) In 40 C.F.R. 141.854(i)(3), the following text shall be deleted: “except that systems that monitor less frequently than monthly must still monitor during the vulnerable period designated by the State.”

(C) In 40 C.F.R. 141.854(j), the following text shall be deleted from the first sentence: “collecting samples on a quarterly or annual frequency.”

(D) In 40 C.F.R. 141.855(f), the following text shall be deleted from the first sentence: “collecting samples on a quarterly frequency.”

(2)(A) “Appendix A to subpart C of part 141” shall be replaced by “K.A.R. 28-15a-27.”

(B) “Subpart H” shall be replaced by “K.A.R. 28-15a-70.” “Subparts H, P, T and W” shall be replaced by “K.A.R. 28-15a-70, K.A.R. 28-15a-170, K.A.R. 28-15a-500, and K.A.R. 28-15a-700.”

(C) “Subpart Q of this part” shall be replaced by “K.A.R. 28-15a-201.”

(D) “Subpart S” shall be replaced by “K.A.R. 28-15a-400.”

(E) “Subpart Y” shall be replaced by “K.A.R. 28-15a-851.” (Authorized by and implementing K.S.A. 65-171m; effective June 7, 2018.)

Article 16.—WATER POLLUTION CONTROL

SEWAGE DISCHARGE PERMITS

28-16-1. Information required. (A) Application on form furnished by the department.

(B) Plans.

(C) Specifications.

(D) Engineer’s report. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-2. Submission of information.

Plans, specifications, report and application must be submitted to the chief engineer for the board at least three weeks prior to the date on which action is desired. It is not to be inferred, however, that action will always be taken within the time mentioned. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-3. Plans. Plans for sewerage systems, sewer extensions and sewage treatment plants shall include:

(A) A general map of the municipality or sewer district, showing all proposed and existing streets and alleys, drawn to a scale not smaller than 300 feet to one inch, with all sewer lines, with sizes indicated, and the location of all manholes, clean-outs, and other appurtenances.

(B) The profiles of all sewers, with sizes of sewers, elevations of the sewer inverts of all manholes, and the grade of the sewers between each two adjacent manholes plainly stated. At the sewer outlet shall be shown the approximate elevation of the bottom of the stream, or ordinary low water, and of annual and extraordinary high water. Elevation of extraordinary high water shall be shown on profiles of sewers subject to flooding. Scales of profiles must be clearly stated. The following scale is suggested: vertical, 10 feet to 1 inch; horizontal, 100 feet to 1 inch.

(C) Detail drawings of manholes, clean-outs, inlets, catch basins, overflows, outlets, and all other appurtenances must accompany the application. Unless sewers are other than vitrified clay, detail drawing must be submitted.

(D) The plans for the treatment plant shall include:

(1) a general layout, showing areas for future extension, embankments, various parts of plant, course of outfall sewer, outlet, stream with direction of flow, and any branches in immediate neighborhood, etc.;

(2) details of longitudinal and transverse sections sufficient to make clear the construction of each unit. Details of each feature, inlet and outlet devices, baffles, valves, overflows, arrangement of automatic devices, etc., the depth and sizes of filtering media, the method of distribution and

collection of sewage on the beds, and such other information as is necessary for a complete understanding of the plans.

Each drawing shall have a legible title showing the name of the town or person for whom the drawing is made, name of engineer, scale, date, and substance of drawing. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-4. Specifications. Specifications for the construction of the work shall accompany all plans for new or original systems. Where plans are for extensions to systems, the specifications may be omitted, provided it is stated that work is to be constructed under specifications already on file. It is desired that the estimate of cost be included, but this is not compulsory. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-5. Engineer's report. A comprehensive report of the proposed work, written or approved by the consulting or designing engineer, must accompany all plans for a complete system or treatment plant, and must give all data upon which the design is based, such as information concerning sewer systems:

(A) The nature and extent of the area included with the present system of sewerage, and of the area which it is planned shall drain into this system ultimately.

(B) Population to be served, present and future, estimated for twenty-five years.

(C) The estimated daily per capita flow of sewage, and the total and per capita water consumption of the town at the present time.

(D) The allowance made for infiltration.

(E) The estimated daily flow of sewage.

(F) The character of the sewage. If domestic and trade wastes, estimate nature, and approximate quantity of each.

(G) Method of flushing or cleaning sewers.

(H) Portion to be built at present time.

(I) Minimum and maximum grade of sewers of each size.

(J) If there are sections which cannot grade into this system, the extent of such sections and the probable future disposition of sewage from these sections.

(K) Distance of houses or buildings from proposed outlet or treatment plant.

(L) Approximate maximum and minimum flow of water in stream receiving flow of sewage.

(M) Drainage area above outlet or treatment plant.

(N) Nearest water supplies taken from stream below plant or outlet; above plant or outlet. Dams in vicinity of plant or outlet. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-6. Information concerning treatment plant. In addition to that concerning sewer systems: Engineer's report should cover the following points: method of treatment and description of units; rate of loading; nature of body of water; disposal of sludge; special devices; special methods of maintenance or operation; results expected from treatment plant. Explain any reserve units in pipelines, filters, tanks, etc. Describe pumping unit if sewage is pumped, and any automatic arrangements. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-7. Deviation from plans. There shall be no deviation from plans submitted to and approved by the department, unless amended plans showing proposed changes have been submitted to and approved by the department. Copies of approved plans, specifications, application and report must be filed with the department and permit obtained before the contract for the work is let. (Authorized by K.S.A. 65-164, 65-165, 65-171d; effective Jan. 1, 1966.)

28-16-8 to 28-16-10. (Authorized by K.S.A. 65-170, 65-171d; effective Jan. 1, 1966; revoked Jan. 1, 1972.)

RIVER BASIN WATER QUALITY CRITERIA

28-16-11 to 28-16-26. (Authorized by K.S.A. 1971 Supp. 65-165 through 65-171d; effective, E-67-6, May 31, 1967; effective Jan. 1, 1968; amended, E-71-12, Feb. 1, 1971; amended Jan. 1, 1972; revoked, E-73-16, May 18, 1973; revoked Jan. 1, 1974.)

28-16-27. Emergency or accidental discharge of sewage or other detrimental material into waters; report to department of health. The owner or person responsible for the discharge of sewage or other materials detrimental to the quality of waters of the state, under conditions other than provided for by a valid permit issued by the secretary of the state board of health, shall report such discharge to the state department of health, environmental health services.

When sewage treatment facilities or portions thereof are programmed for bypassing for cause, which results in reduced treatment efficiency below acceptable levels, the owner or his representative shall notify and receive approval from the state department of health at least seven (7) days prior to such discharge.

Emergency or accidental discharge of sewage or other materials detrimental to the quality of waters of the state shall be immediately reported to the state department of health by the owner of the treatment plant or his representative. In the event the water pollution-causing material is in transit or in storage within the state, it shall be the responsibility of the owner, the carrier, or person responsible for storage, to immediately notify the state department of health that the pollutant has gained admittance or there is the potential the pollutant will gain admittance to waters of the state. (Authorized by K.S.A. 65-164, 65-169, 65-171a, 65-171f and K.S.A. 1967 Supp. 65-165, 65-166, 65-167, 65-171d and 65-171h; effective Jan. 1, 1969.)

28-16-28. (Authorized by K.S.A. 1977 Supp. 65-165 through 65-171d; effective, E-73-16, May 18, 1973; effective Jan. 1, 1974; amended, E-76-3, Jan. 1, 1975; amended May 1, 1975; amended May 1, 1978; revoked May 1, 1986.)

28-16-28a. (Authorized by K.S.A. 1977 Supp. 65-165, 65-166, 65-166a, 65-167, 65-169, 65-170, 65-171a through 65-171d; effective, E-76-15, Feb. 28, 1975; effective May 1, 1976; amended May 1, 1978; revoked May 1, 1986.)

SURFACE WATER QUALITY STANDARDS

28-16-28b. Definitions. As used in K.A.R. 28-16-28b through 28-16-28h, each of the following terms shall have the meaning specified in this regulation: (a) "Alluvial aquifer" means the sediment that is associated with and deposited by a stream and that contains water capable of being produced from a well.

(b) "Alternate low flow" means a low flow value, which is an alternate to the 7Q10 flow, that is based seasonally, hydrologically, or biologically, or a low flow determined through a water assurance district. Wherever used in this regulation in the context of mixing zones, the term shall refer to a minimum amount of streamflow occurring immediately upstream of a wastewater discharge and available, in whole or in part, for dilution and assimilation of wastewater discharges.

(c) "Antidegradation" means the regulatory actions and measures taken to prevent or minimize the lowering of water quality in surface waters of the state, including those streams, lakes, and wetlands in which existing water quality exceeds the level required for maintenance and protection of the existing uses.

(d) "Artificial sources" means sources of pollution that result from human activities and that can be abated by construction of control structures, modification of operating practices, complete restraint of activities, or any combination of these methods.

(e) "Background concentration" means the concentration of any elemental parameter listed in tables 1a, 1b, 1c, and 1d of the "Kansas surface water quality standards: tables of numeric criteria," which is adopted by reference in K.A.R. 28-16-28e, or any elemental substance meeting the definition of pollutant in this regulation, that occurs in a surface water immediately upstream of a point source or nonpoint source under consideration and is from natural sources. The list of background concentration determinations for classified waterbodies of the state is contained in table 1h of the "Kansas surface water quality standards: tables of numeric criteria."

(f) "Base flow" means that portion of a stream's flow contributed by sources of water other than precipitation runoff. Wherever used in this regulation in the context of stream classification, the term shall refer to a fair weather flow sustained primarily by springs or groundwater seepage, wastewater discharges, irrigation return flows, releases from reservoirs, or any combination of these factors.

(g) "Bioaccumulation" means the accumulation of toxic substances in plant or animal tissue through either bioconcentration or biomagnification.

(h) "Bioassessment methods and procedures" means the use of biological methods of assessing surface water quality, including field investigations of aquatic organisms and laboratory or field aquatic toxicity tests.

(i) "Bioconcentration" means the concentration and incorporation of toxic substances into body tissues from ambient sources.

(j) "Biomagnification" means the transport of toxic substances through the food chain through successive cycles of eating and being eaten and through the subsequent accumulation and concentration of these substances in higher-order consumers and predators.

(k) “Biota” means the animal and plant life and other organisms of a given geographical region.

(l) “Carcinogenic” means having the property of inducing the production of cancerous cells in organisms.

(m) “Classified surface water” means any surface water or surface water segment that supports or, in the absence of artificial sources of pollution, would support one or more of the designated uses of surface water defined in K.A.R. 28-16-28d or K.S.A. 2017 Supp. 82a-2001, and amendments thereto, and that meets the criteria for classification given in K.A.R. 28-16-28d.

(n) “Compliance schedule” means any provision in a discharge permit, license, or enforceable order issued by the department pursuant to the federal clean water act or K.S.A. 65-165 et seq., and amendments thereto, that, for the purposes of meeting water quality-based effluent limitations, technology-based limits, and effluent limitations determined by the secretary or specified in Kansas statutes and regulations, provides a specified period of time for the construction or renovation of a wastewater treatment facility and the completion of any related scientific or engineering studies, reports, plans, design specifications, or other submittals required by the department.

(o) “Condition of acute toxicity” means any concentration of a toxic substance that exceeds the applicable acute criterion for aquatic life support specified in K.A.R. 28-16-28e or, for substances not listed in K.A.R. 28-16-28e or for mixtures of toxic substances, any concentration that exceeds 0.3 acute toxic units (TU_a), where one TU_a is equal to 100 divided by the median lethal concentration (LC₅₀). The concentration at which acute toxicity exists shall be determined through laboratory toxicity tests conducted in accordance with the EPA’s “methods for measuring the acute toxicity of effluents and receiving waters to freshwater and marine organisms.”

(p) “Condition of chronic toxicity” means any concentration of a toxic substance that exceeds the applicable chronic criterion for aquatic life support specified in K.A.R. 28-16-28e or, for substances not listed in K.A.R. 28-16-28e or for mixtures of toxic substances, any concentration that exceeds 1.0 chronic toxic unit (TU_c), where one TU_c is equal to 100 divided by inhibition concentration 25 (IC₂₅). The concentration at which chronic toxicity exists shall be determined through laboratory toxicity tests conducted in accordance with the EPA’s “short-term methods for estimat-

ing the chronic toxicity of effluents and receiving waters to freshwater organisms.”

(q) “Criterion” means any numerical element or narrative provision that represents an enforceable water quality condition specified in K.A.R. 28-16-28b through 28-16-28h.

(r) “Critical low flow” means the minimum amount of streamflow immediately upstream of a point source discharge that will be used to calculate the quantity of pollutants that the point source discharge may be permitted to discharge without exceeding water quality criteria specified in K.A.R. 28-16-28b through 28-16-28h. The critical low flow may be the 7Q10 flow or the alternate low flow as defined in this regulation.

(s) “Department” means Kansas department of health and environment.

(t) “Designated use” means any of the uses specifically attributed to surface waters of the state in K.A.R. 28-16-28d or K.S.A. 2017 Supp. 82a-2001, and amendments thereto.

(u) “Digression” means an actual ambient concentration of a pollutant that does not meet the numeric criteria value for that pollutant.

(v) “Discharge” means the release of effluent, either directly or indirectly, into surface waters of the state.

(w) “Discharge design flow” means either of the following:

(1) The anticipated wastewater flow for the next permit cycle determined by the department for an industrial wastewater treatment facility, as defined in K.A.R. 28-16-56c; or

(2) the wastewater treatment capacity of a facility approved by the secretary for other wastewater treatment facilities or systems.

(x) “Discharger” means a person or facility that is responsible for the release of effluent into surface waters of the state.

(y) “Duration of digression” means the period of time over which pollutant concentrations can be averaged, including the time span during which aquatic life can be exposed to elevated levels of pollutants without harm.

(z) “Ecological integrity” means the natural or unimpaired structure and functioning of an aquatic or terrestrial ecosystem.

(aa) “Effluent” means the sewage or other wastewater discharged from an artificial source.

(bb) “EPA” means United States environmental protection agency.

(cc) “*Escherichia coli*” means a subset of the coliform group that is part of the normal intestinal

flora in humans and animals and is a direct indicator of fecal contamination in water.

(dd) “Exceptional state waters” means any of the surface waters or surface water segments that are of remarkable quality or of significant recreational or ecological value, are listed in the surface water register as defined in this regulation, and are afforded the level of water quality protection under the antidegradation provisions of K.A.R. 28-16-28c and the mixing zone provisions of K.A.R. 28-16-28c.

(ee) “Excursion from numeric criteria value” means the digression of a pollutant exceeding its numeric criteria value beyond the designated duration of digression.

(ff) “Existing use” means any of the designated uses described in K.A.R. 28-16-28d or K.S.A. 82a-2001, and amendments thereto, known to have occurred in, or to have been made of, a surface water or surface water segment on or after November 28, 1975.

(gg) “Federal clean water act” means the federal water pollution prevention and control act, 33 U.S.C. Section 1251 et seq., as in effect on January 1, 1998.

(hh) “Frequency of digression” means the number of times that an excursion from numeric criteria value can occur over time without impairing the designated uses of the water.

(ii) “General purpose waters” means any classified surface water that is not classified as an outstanding national resource water or an exceptional state water.

(jj) “Groundwater” means water located under the surface of the land that is or can be the source of supply for wells, springs, or seeps or that is held in aquifers or the soil profile.

(kk) “Highest attainable condition” and “HAC” mean the achievable goal of a variance, according to K.A.R. 28-16-28f(d)(5), that reflects the modified designated use and criterion, designated use, or criterion that is applicable throughout the term of a variance.

(ll) “Inhibition concentration 25” and “IC₂₅” mean a point estimate of the toxicant concentration that would cause a 25 percent reduction in a nonlethal biological measurement of the test organisms, including reproduction and growth.

(mm) “Interim criterion” means a temporary criterion.

(nn) “Interim designated use” means a temporary designated use.

(oo) “Kansas antidegradation policy,” dated August 6, 2001 and hereby adopted by reference,

means the department’s written policy used to prevent or minimize the lowering of water quality in surface waters of the state.

(pp) “Kansas implementation procedures: surface water quality standards,” including appendix A, dated November 29, 2017 and hereby adopted by reference, means the department’s written procedures used for carrying out specific provisions of surface water quality standards, available upon request from the department’s division of environment.

(qq) “Maximum contaminant level” means any of the enforceable standards for finished drinking water quality specified in 40 C.F.R. 141.11, 141.13, and 141.61 through 141.66, dated July 1, 2012.

(rr) “Median lethal concentration” means the concentration of a toxic substance or a mixture of toxic substances calculated to be lethal to 50 percent of the population of test organisms in an acute toxicity test.

(ss) “Microfibers per liter” and “µfibers/L” mean the number of microscopic particles with a length-to-width ratio of 3:1 or greater present in a volume of one liter.

(tt) “Microgram per liter” and “µg/L” mean the concentration of a substance at which one one-millionth of a gram (10^{-6} g) of the substance is present in a volume of one liter.

(uu) “Milligram per liter” and “mg/L” mean the concentration of a substance at which one one-thousandth of a gram (10^{-3} g) of the substance is present in a volume of one liter.

(vv) “Mixing zone” means the designated portion of a stream or lake where a discharge is incompletely mixed with the receiving surface water and where, in accordance with K.A.R. 28-16-28e, concentrations of certain pollutants may legally exceed chronic water quality criteria associated with the established designated uses that are applied in most other portions of the receiving surface water.

(ww) “Mutagenic” means having the property of directly or indirectly causing a mutation.

(xx) “Multiple-discharger variance” and “MDV” mean a term-limited variance for more than one discharger that is issued for a specified criterion or pollutant to achieve the highest attainable condition.

(yy) “Nonpoint source” means any activity that is not required to have a national pollutant discharge elimination system permit and that results in the release of pollutants to waters of the state.

This release may result from precipitation runoff, aerial drift and deposition from the air, or the release of subsurface brine or other contaminated groundwaters to surface waters of the state.

(zz) “Numeric criteria value” means any of the values listed in tables 1a, 1b, 1c, 1d, 1g, 1h, 1i, 1j, and 1k of the “Kansas surface water quality standards: tables of numeric criteria.”

(aaa) “Outstanding national resource water” means any of the surface waters or surface water segments of extraordinary recreational or ecological significance identified in the surface water register, as defined this regulation, and afforded the highest level of water quality protection under the antidegradation provisions and the mixing zone provisions of K.A.R. 28-16-28c.

(bbb) “pH” means the common logarithm of the reciprocal of the hydrogen ion concentration measured in moles per liter, expressed on a scale that ranges from zero to 14, with values less than seven being more acidic and values greater than seven being more alkaline.

(ccc) “Picocurie per liter” and “pCi/L” mean a volumetric unit of radioactivity equal to 2.22 nuclear transformations per minute per liter.

(ddd) “Point source” means any discernible, confined, and discrete conveyance from which pollutants are or could be discharged.

(eee) “Pollutant” means any physical, biological, or chemical conditions, substances, or combination of substances released into surface waters of the state that results in surface water pollution, as defined in this regulation.

(fff) “Pollutant minimization plan” and “PMP” mean a structured set of activities to improve processes and pollutant controls that prevent and reduce pollutant levels, including any cost-effective process for reducing pollutant levels, pollution prevention, treatment, best management practices, and other control mechanisms.

(ggg) “Potable water” means water that is suitable for drinking and cooking purposes in terms of both human health and aesthetic considerations.

(hhh) “Precipitation runoff” means the rainwater or the meltwater derived from snow, hail, sleet, or other forms of atmospheric precipitation that flows by gravity over the surface of the land and into streams, lakes, or wetlands.

(iii) “Presedimentation sludge” means a slurry or suspension of residual solid materials derived from an initial step in the production of potable water. This term shall include residual solids originating from the raw water supply used for industrial or

other nonpotable water purposes, before the addition of any artificial materials not typically used in the production of potable water. The solid materials shall include sand, silt, and other easily settleable particles originating from the raw water supply.

(jjj) “Private surface water” means any freshwater reservoir or pond that is both located on and completely bordered by land under common private ownership.

(kkk) “Public swimming area” means either of the following:

(1) Any classified surface water that is posted for swimming by a federal, state, or local government that has jurisdiction over the land adjacent to that particular body of water; or

(2) any privately owned or leased body of water that is open and accessible to the public and is intended for swimming.

(lll) “Reconfiguration activities” means actions that beneficially reshape, remodel, or otherwise restructure the physical setting and characteristics of a surface water of the state.

(mmm) “Seven-day, ten-year low flow” and “7Q10 flow” mean the seven-day average low flow having a recurrence frequency of once in 10 years, as statistically determined from historical flow data. Where used in this regulation in the context of mixing zones, these terms shall refer to the minimum amount of streamflow occurring immediately upstream of a wastewater discharge and available, in whole or in part, for dilution or assimilation of wastewater discharges.

(nnn) “Site-specific criterion” means any criterion applicable to a given classified surface water segment and developed for the protection of the designated uses of that segment alone.

(ooo) “Streamflow” means the volume of water moving past a stream cross-sectional plane per unit of time.

(ppp) “Surface water pollution” and “pollution” mean any of the following:

(1) Contamination or other alteration of the physical, chemical, or biological properties of the surface waters of the state, including changes in temperature, taste, odor, turbidity, or color of the waters;

(2) discharges of gaseous, liquid, solid, radioactive, microbiological, or other substances into surface waters in a manner that could create a nuisance or render these waters harmful, detrimental, or injurious to any of the following:

(A) Public health, safety, or welfare;

(B) domestic, industrial, agricultural, recreational, or other designated uses; or

(C) livestock, domestic animals, or native or naturalized plant or animal life; or

(3) any discharge that will or is likely to exceed state effluent limitations predicated upon technology-based effluent standards or water quality-based standards.

(qqq) “Surface water register” means a list of the state’s major classified surface waters, including a listing of waters recognized as outstanding national resource waters or exceptional state waters, and the surface water use designations for each classified surface water, periodically updated and published by the department pursuant to K.A.R. 28-16-28d and K.A.R. 28-16-28f. The surface water register, published as the “Kansas surface water register,” is adopted by reference in K.A.R. 28-16-28g.

(rrr) “Surface water segment” means a delineated portion of a stream, lake, or wetland.

(sss) “Surface waters” means the following:

(1) Streams, including rivers, creeks, brooks, sloughs, draws, arroyos, canals, springs, seeps, and cavern streams, and any alluvial aquifers associated with these surface waters;

(2) lakes, including oxbow lakes and other natural lakes and man-made reservoirs, lakes, and ponds; and

(3) wetlands, including swamps, marshes, bogs, and similar areas that are inundated or saturated by surface water or groundwater at a frequency and a duration that are sufficient to support, and under normal circumstances that do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.

(ttt) “Surface waters of the state” means all surface waters occurring within the borders of the state of Kansas or forming a part of the border between Kansas and one of the adjoining states.

(uuu) “Teratogenic” means having the property of causing abnormalities that originate from impairment of an event that is typical in embryonic or fetal development.

(vvv) “Thirty-day, ten-year low flow” and “30Q10 flow” mean the 30-day average low flow having a recurrence frequency of once in 10 years, as statistically determined from historical flow data. Where used in this regulation in the context of mixing zones, these terms shall refer to the minimum amount of streamflow occurring immediately upstream of a wastewater discharge and available, in whole or in part, for dilution or assimilation of wastewater discharges.

(www) “Toxic substance” means any substance

that produces deleterious physiological effects in humans, animals, or plants.

(xxx) “Turbidity” means the cloudiness of water as measured by optical methods of nephelometry and expressed in standard nephelometric units.

(yyy) “Use attainability analysis” means a study conducted or accepted by the department that is designed to determine whether or not a surface water or surface water segment supports, or is capable of supporting in the absence of artificial sources of pollution, one or more of the designated uses defined in K.S.A. 2017 Supp. 82a-2001, and amendments thereto.

(zzz) “Variance” means a time-limited designated use and criterion that reflects the highest attainable condition as an alternative to one or more of the criteria specified in K.A.R. 28-16-28e, as implemented by the department in accordance with K.A.R. 28-16-28f.

(aaaa) “Water-effect ratio” and “WER” mean the numerical toxicity, including median lethal concentration and inhibition concentration 25, of a chemical pollutant diluted in water from a given stream, lake, or wetland divided by the numerical toxicity of the same pollutant diluted in laboratory water.

(bbbb) “Water quality certification” means the department’s written finding that a proposed action that impacts water quality will comply with the terms and conditions of the Kansas surface water quality standards.

(cccc) “Whole-effluent toxicity limitation” means any restriction imposed by the department on the overall acute or chronic toxicity of an effluent discharged to a surface water.

(dddd) “Zone of initial dilution” means the region of a surface water in the immediate vicinity of a discharge where acute and chronic criteria may be exceeded. (Authorized by K.S.A. 2017 Supp. 65-171d and K.S.A. 65-171m; implementing K.S.A. 65-165, K.S.A. 2017 Supp. 65-171d, K.S.A. 65-171m, and K.S.A. 2017 Supp. 82a-2001; effective May 1, 1986; amended Aug. 29, 1994; amended July 30, 1999; amended Nov. 3, 2000; amended Aug. 31, 2001; amended Jan. 3, 2003; amended Oct. 24, 2003; amended Jan. 28, 2005; amended March 20, 2015; amended Feb. 23, 2018).

28-16-28c. General provisions. (a) Antidegradation.

(1) General purpose waters.

(A) Levels of water quality in surface waters of the state shall be maintained to protect the existing uses of those surface waters.

(B) For all surface waters of the state, if existing water quality is better than applicable water quality criteria established in K.A.R. 28-16-28b through 28-16-28g, that existing water quality shall be fully maintained and protected.

Water quality may be lowered only if the secretary finds, after full satisfaction of the intergovernmental coordination and public participation requirements on antidegradation contained in the "Kansas antidegradation policy," as adopted by reference in K.A.R. 28-16-28b, that a lowering of water quality is needed to allow for important social or economic development in the geographical area in which the waters are located.

In allowing the lowering of water quality, the maintenance and protection of existing uses shall be ensured, and the highest statutory and regulatory requirements for all new and existing point sources of pollution and all cost-effective and reasonable best management practices for nonpoint sources of pollution shall be achieved.

(2) Exceptional state waters. Wherever surface waters of the state constitute exceptional state waters, discharges shall be allowed only if existing uses and existing water quality are maintained and protected.

(3) Outstanding national resource waters. Wherever surface waters of the state constitute an outstanding national resource water, existing uses and existing water quality shall be maintained and protected. New or expanded discharges shall not be allowed into outstanding national resource waters.

(4) Threatened or endangered species. No degradation of surface water quality by artificial sources of pollution shall be allowed if the degradation will result in harmful effects on populations of any threatened or endangered species of aquatic or semiaquatic life or terrestrial wildlife or its critical habitat as determined by the secretary of the department of wildlife, parks, and tourism pursuant to K.S.A. 32-960, and amendments thereto, K.A.R. 115-15-3, or the federal endangered species act, 16 U.S.C. Section 1532 et seq., as in effect on July 1, 2012.

(5) Temporary discharges. Temporary sources of pollution meeting the requirements of subsection (d) of this regulation and K.A.R. 28-16-28e, producing only ephemeral surface water quality degradation not harmful to existing uses, may be allowed by the department.

(6) Thermal discharges. Implementation of these antidegradation provisions for thermal dis-

charges shall be consistent with the requirements of 33 U.S.C. Section 1326, as in effect on July 1, 2012.

(7) Implementation. Implementation of these antidegradation provisions shall be consistent with the "Kansas antidegradation policy," available upon request from the department.

(b) Mixing zones.

(1) General limitations. Mixing zones shall not extend across public drinking water intakes, stream tributary mouths, or swimming or boat ramp areas, nor shall mixing zones exist in locations that preclude the normal upstream or downstream movement or migration of aquatic organisms. Mixing zones associated with separate discharges shall not overlap unless a department-approved demonstration indicates that the overlapping will not result in a violation of the general water quality criteria specified in K.A.R. 28-16-28e or in an impairment of the existing uses of the receiving surface water. The zone of initial dilution for a mixing zone shall comprise, in terms of volume, not more than 10 percent of the mixing zone.

(2) Discharges into classified stream segments. No mixing zone within a classified stream segment, as defined in K.S.A. 2013 Supp. 82a-2001 and amendments thereto, shall extend beyond the middle of the nearest downstream current crossover point, where the main current flows from one bank to the opposite bank, or more than 300 meters downstream from the point of effluent discharge.

(3) Effluent-dominated streams. If the ratio of the receiving stream critical low flow to the discharge design flow is less than 3:1, then the mixing zone shall be the cross-sectional area or the volumetric flow of the stream during critical low flow conditions, as measured immediately upstream of the discharge during the critical low flow.

(4) Applications. Mixing zones shall be applied in accordance with paragraphs (b)(7) and (b)(8), based on the classification and designated uses of a stream segment for individual pollutants. For surface waters classified as outstanding national resource waters or exceptional state waters, or designated as special aquatic life use waters, mixing zones for specific discharges may be allowed by the secretary in accordance with paragraphs (b)(6), (b)(7), and (b)(8)(A). Mixing zones also may be allowed if there are no aquatic life criteria for an individual pollutant.

(5) Restrictions. The right to prohibit the use of mixing zones or to place more stringent lim-

itations on mixing zones than those stipulated in paragraphs (b)(2), (3), and (13) shall be reserved by the secretary wherever site conditions preclude the rapid dispersion and dilution of effluent within the receiving surface water or if, in the judgment of the secretary, the presence of a mixing zone would unduly jeopardize human health or any of the existing uses of the receiving surface water.

(6) Outstanding national resource waters. Mixing zones may be allowed by the secretary for existing permitted discharges in surface waters re-designated as outstanding national resource waters in the "Kansas surface water register" pursuant to K.A.R. 28-16-28g but shall be evaluated on an individual permit basis to prevent the degradation of the outstanding national resource waters.

(7) Exceptional state waters. If the ratio of the receiving stream critical low flow to the discharge design flow is equal to or greater than 3:1, the mixing zone shall not exceed 25 percent of the cross-sectional area or volumetric flow of the receiving stream during critical low flow conditions, measured immediately upstream of the discharge during the critical low flow.

(8) General purpose waters.

(A) Special aquatic life use waters. If the ratio of the receiving stream critical low flow to the discharge design flow is equal to or greater than 3:1, the mixing zone shall not exceed 25 percent of the cross-sectional area or volumetric flow of the receiving stream during critical low flow conditions, measured immediately upstream of the discharge during the critical low flow.

(B) Expected aquatic life use waters. If the ratio of the receiving stream critical low flow to the discharge design flow is equal to or greater than 3:1, the mixing zone shall not exceed 50 percent of the cross-sectional area or volumetric flow of the receiving stream during critical low flow conditions, measured immediately upstream of the discharge during the critical low flow.

(C) Restricted aquatic life use waters. If the ratio of the receiving stream critical low flow to the discharge design flow is equal to or greater than 3:1, the mixing zone shall not exceed 100 percent of the cross-sectional area or volumetric flow of the receiving stream during critical low flow conditions, measured immediately upstream of the discharge during the critical low flow.

(D) Recreational uses. Mixing zones for classified surface waters designated for recreational

uses may be allowed by the secretary on an individual permit basis in accordance with paragraph (b)(10).

(9) Alternate low flows. Alternate low flows may be utilized by the department as the critical low flow in the calculation of the mixing zone cross-sectional area or volumetric flow for specific water quality criteria.

(A) The 30Q10 flow for ammonia or the guaranteed minimum flow provided by a water assurance district, if applicable, shall be used by the department in the calculation of the mixing zone cross-sectional area or volumetric flow.

(B) Other alternate low flows, with a specific recurrence frequency and averaging period, shall be considered by the department if those flows will not result in excursions above aquatic life criteria more frequently than once every three years.

(C) Each proposed alternate low flow shall be subject to approval by the secretary.

(10) Alternate or site-specific mixing zones. Alternate mixing zones employing specific linear distances for mixing zones or alternate stream dilution volumes or cross-sectional areas, or both, may be allowed by the secretary. Site-specific mixing zones may be allowed if data generated from a site-specific study supports the use of an alternate mixing zone, but maintains a zone of passage for aquatic life.

(11) Discharges into classified lakes. Mixing zones shall not extend into any lake classified as an outstanding national resource water or exceptional state water, or designated as a special aquatic life use water according to K.A.R. 28-16-28d. Mixing zones in lakes designated as expected aquatic life use water or restricted aquatic life use waters may be allowed by the department if the mixing zones do not extend farther than 50 meters from the point of effluent discharge or do not comprise more than one percent of the total volume of the receiving lake as measured at the conservation pool.

(12) Discharges into classified ponds. Mixing zones shall not extend into any classified pond.

(13) Discharges into classified wetlands. Mixing zones shall not extend into any classified wetland.

(c) Special conditions. The following special conditions shall not remove the obligation to design, build, or use pollution control structures or methods to control point sources and nonpoint sources:

(1) Low flow. Any classified stream segment may be exempted by the secretary from the application of some or all of the numeric surface water

criteria specified in K.A.R. 28-16-28e if stream-flow is less than the critical low flow.

(2) Effluent-created flow.

(A) For any current classified stream segment in which continuous flow is sustained primarily through the discharge of treated effluent and the segment does not otherwise meet the requirements of a classified stream in K.A.R. 28-16-28d, the discharger shall provide treatment in accordance with the federal secondary treatment regulation, 40 C.F.R. 133.102, dated July 1, 2012.

(B) This discharge shall not violate the general surface water quality criteria listed in K.A.R. 28-16-28e or impair any of the existing or attained designated uses of a downstream classified stream segment.

(C) If a use attainability analysis demonstrates that the designated uses of a surface water segment are not attainable, then the new use designations for effluent-created flow shall be adopted as specified in K.A.R. 28-16-28d and approved by the EPA before serving as a basis for limitations in any new, reissued, or modified permit.

(d) Treatment requirements.

(1) All effluent shall receive appropriate minimum levels of treatment in accordance with 40 C.F.R. 122.44, dated July 1, 2012.

(2) Effluent shall receive a higher level of treatment than that stipulated in paragraph (d)(1) of this regulation, if the department determines that this higher level of treatment is needed to fully comply with the terms and conditions of subsection (a) of this regulation or K.A.R. 28-16-28e.

(e) Analytical testing. All methods of sample collection, preservation, and analysis used in applying K.A.R. 28-16-28b through 28-16-28g shall be in accordance with those methods prescribed by the department.

(f) Application of standards to privately owned reservoirs or ponds. The application of water quality standards to privately owned reservoirs or ponds shall be subject to the provisions of K.S.A. 65-171d, and amendments thereto. (Authorized by K.S.A. 2014 Supp. 65-171d, K.S.A. 2014 Supp. 82a-2010, and K.S.A. 65-171m; implementing K.S.A. 2014 Supp. 82a-2002, 82a-2003, 82a-2004, and 82a-2005; effective May 1, 1986; amended, T-87-8, May 1, 1986; amended May 1, 1987; amended Aug. 29, 1994; amended July 30, 1999; amended Aug. 31, 2001; amended Jan. 3, 2003; amended Jan. 28, 2005; amended March 20, 2015.)

28-16-28d. Surface water classification and use designation.

(a) Surface water classification. Surface waters shall be classified as follows:

(1) Classified stream segments shall be those stream segments defined in K.S.A. 2017 Supp. 82a-2001, and amendments thereto.

(2) Classified surface waters other than classified stream segments shall be defined as follows:

(A) Classified lakes shall be all lakes owned by federal, state, county, or municipal authorities and all privately owned lakes that serve as public drinking water supplies or that are open to the general public for primary or secondary contact recreation.

(B) Classified wetlands shall be the following:

(i) All wetlands owned by federal, state, county, or municipal authorities;

(ii) all privately owned wetlands open to the general public for hunting, trapping, or other forms of secondary contact recreation; and

(iii) all wetlands classified as outstanding national resource waters or exceptional state waters, or designated as special aquatic life use waters according to subsection (d).

Wetlands created for the purpose of wastewater treatment shall not be considered classified wetlands.

(C) Classified ponds shall be all ponds owned by federal, state, county, or municipal authorities and all privately owned ponds that impound water from a classified stream segment as defined in paragraph (a)(1).

(b) Designated uses of classified surface waters other than classified stream segments. The designated uses of classified surface waters other than classified stream segments shall be defined as follows:

(1) "Agricultural water supply use" means the use of classified surface waters other than classified stream segments for agricultural purposes, including the following:

(A) "Irrigation," which means the withdrawal of classified surface waters other than classified stream segments for application onto land; and

(B) "livestock watering," which means the provision of classified surface waters other than classified stream segments to livestock for consumption.

(2) "Aquatic life support use" means the use of classified surface waters other than classified stream segments for the maintenance of the ecological integrity of lakes, wetlands, and ponds, including the sustained growth and propagation of

native aquatic life; naturalized, important, recreational aquatic life; and indigenous or migratory semiaquatic or terrestrial wildlife directly or indirectly dependent on classified surface waters other than classified stream segments for survival.

(A) "Special aquatic life use waters" means either classified surface waters other than classified stream segments that contain combinations of habitat types and indigenous biota not found commonly in the state or classified surface waters other than classified stream segments that contain representative populations of threatened or endangered species.

(B) "Expected aquatic life use waters" means classified surface waters other than classified stream segments containing habitat types and indigenous biota commonly found or expected in the state.

(C) "Restricted aquatic life use waters" means classified surface waters other than classified stream segments containing indigenous biota limited in abundance or diversity by the physical quality or availability of habitat, due to natural deficiencies or artificial modifications, compared to more suitable habitats in adjacent waters.

(3) "Domestic water supply use" means the use of classified surface waters other than classified stream segments, after appropriate treatment, for the production of potable water.

(4) "Food procurement use" means the use of classified surface waters other than classified stream segments for obtaining edible forms of aquatic or semiaquatic life for human consumption.

(5) "Groundwater recharge use" means the use of classified surface waters other than classified stream segments for replenishing fresh or usable groundwater resources. This use may involve the infiltration and percolation of classified surface waters other than classified stream segments through sediments and soils or the direct injection of classified surface waters other than classified stream segments into underground aquifers.

(6) "Industrial water supply use" means the use of classified surface waters other than classified stream segments for nonpotable purposes by industry, including withdrawals for cooling or process water.

(7) "Recreational use" means the use of classified surface waters other than classified stream segments for primary contact recreation or secondary contact recreation.

(A) "Primary contact recreational use for classified surface waters other than classified stream

segments" means the use of classified surface waters other than classified stream segments for recreation on and after April 1 through October 31 of each year, during which a person is immersed to the extent that some inadvertent ingestion of water is probable. This use shall include boating, mussel harvesting, swimming, skin diving, water-skiing, and windsurfing.

(i) "Primary contact recreational use: swimming beach" shall apply to those classified surface waters other than classified stream segments that have posted public swimming areas. These waters shall present a risk of human illness that is no greater than 0.8 percent.

(ii) "Primary contact recreational use: public access" shall apply to those classified surface waters other than classified stream segments where full body contact can occur and that are, by law or written permission of the landowner, open to and accessible by the public. These waters shall present a risk of human illness that is no greater than 1.0 percent.

(iii) "Primary contact recreational use: restricted access" shall apply to those classified surface waters other than classified stream segments where full body contact can occur and that are not open to and accessible by the public under Kansas law. These waters shall present a risk of human illness that is no greater than 1.2 percent.

(B) "Secondary contact recreational use for classified surface waters other than classified stream segments" means recreation during which the ingestion of classified surface waters other than classified stream segments is not probable. This use shall include wading, fishing, trapping, and hunting.

(i) "Secondary contact recreational use: public access" shall apply to classified surface waters other than classified stream segments where the surface water is, by law or written permission of the landowner, open to and accessible by the public.

(ii) "Secondary contact recreational use: restricted access" shall apply to classified surface waters other than classified stream segments where the surface water is not open to and accessible by the public under Kansas law.

(c) Designated uses of classified stream segments. The designated uses of classified stream segments shall be those defined in K.S.A. 2017 Supp. 82a-2001, and amendments thereto.

(d) Assignment of uses to surface waters.

(1) (A) Classified surface waters shall be designated for uses based upon the results of use at-

tainability analyses conducted in accordance with K.S.A. 2017 Supp. 82a-2005, and amendments thereto. The provisions of the federal water quality standards regulation, 40 C.F.R. 131.10(g), as adopted by reference in paragraph (d)(1)(B), shall be followed.

(B) 40 C.F.R. 131.10(g), dated July 1, 2016, is hereby adopted by reference, except that the phrase “federal clean water” shall be inserted before the word “act.”

(2) Classified surface waters and their designated uses shall be identified and listed in the “Kansas surface water register,” as adopted by reference in K.A.R. 28-16-28g.

(3) The use designations for classified streams, lakes, wetlands, and ponds not listed in the surface water register shall be determined by the secretary on a case-by-case basis in accordance with paragraph (d)(1). (Authorized by K.S.A. 2017 Supp. 65-171d, 82a-2005, and 82a-2010; implementing K.S.A. 2017 Supp. 65-171d, 82a-2002, 82a-2003, 82a-2004, and 82a-2005; effective May 1, 1986; amended, T-87-8, May 1, 1986; amended May 1, 1987; amended Aug. 29, 1994; amended July 30, 1999; amended Aug. 31, 2001; amended Jan. 3, 2003; amended Jan. 23, 2004; amended Jan. 28, 2005; amended March 20, 2015; amended Feb. 23, 2018.)

28-16-28e. Surface water quality criteria.

(a) Criteria development guidance. The development of surface water quality criteria for substances not listed in these standards shall be guided by water quality criteria published by the EPA. If the department finds that the criteria listed in this regulation are underprotective or overprotective for a given surface water segment, appropriate site-specific criteria may be developed and applied by the department, in accordance with K.A.R. 28-16-28f, using bioassessment methods or other related scientific procedures, including those procedures consistent with the EPA’s “water quality standards handbook,” second edition, as published in August 1994, or other department-approved methods.

(b) General criteria for surface waters. The following criteria shall apply to all surface waters, regardless of classification:

(1) Surface waters shall be free, at all times, from the harmful effects of substances that originate from artificial sources of pollution and that produce any public health hazard, nuisance condition, or impairment of a designated use.

(2) Hazardous materials derived from artificial sources, including toxic substances, radioactive isotopes, and infectious microorganisms derived from point sources or nonpoint sources, shall not occur in surface waters at concentrations or in combinations that jeopardize the public health or the survival or well-being of livestock, domestic animals, terrestrial wildlife, or aquatic or semi-aquatic life.

(3) Surface waters shall be free of all discarded solid materials, including trash, garbage, rubbish, offal, grass clippings, discarded building or construction materials, car bodies, tires, wire, and other unwanted or discarded materials. The placement of stone and concrete rubble for bank stabilization shall be acceptable to the department if all other required permits are obtained before placement.

(4) Surface waters shall be free of floating debris, scum, foam, froth, and other floating materials directly or indirectly attributable to artificial sources of pollution.

(5) Oil and grease from artificial sources shall not cause any visible film or sheen to form upon the surface of the water or upon submerged substrate or adjoining shorelines, nor shall these materials cause a sludge or emulsion to be deposited beneath the surface of the water or upon the adjoining shorelines.

(6) Surface waters shall be free of deposits of sludge or fine solids attributable to artificial sources of pollution.

(7) Taste-producing and odor-producing substances of artificial origin shall not occur in surface waters at concentrations that interfere with the production of potable water by conventional water treatment processes, that impart an unpalatable flavor to edible aquatic or semiaquatic life or terrestrial wildlife, or that result in noticeable odors in the vicinity of surface waters.

(8) The natural appearance of surface waters shall not be altered by the addition of color-producing or turbidity-producing substances of artificial origin.

(9) In stream segments where background concentrations of naturally occurring substances, including chlorides and sulfates, exceed the water quality criteria listed in table 1a of the “Kansas surface water quality standards: tables of numeric criteria,” as adopted by reference in subsection (e), the existing water quality shall be maintained, and the newly established numeric criteria shall be the background concentration. Background

concentrations shall be established using the methods outlined in the “Kansas implementation procedures: surface water quality standards,” as adopted by reference in K.A.R. 28-16-28b, and available upon request from the department.

(c) Application of criteria for designated uses of surface waters.

(1) The numeric criteria in tables 1a, 1b, 1c, and 1d of the “Kansas surface water quality standards: tables of numeric criteria” shall not apply if the critical low flow is less than 0.03 cubic meter per second (1.0 cubic foot per second) for waters designated as expected aquatic life use waters and restricted aquatic life use waters, unless studies conducted or approved by the department show that water present during periods of no flow, or flow below critical low flow, provides important refuges for aquatic life and permits biological recolonization of intermittently flowing segments.

(2) The numeric criteria in tables 1a, 1b, 1c, and 1d of the “Kansas surface water quality standards: tables of numeric criteria” shall not apply if the critical low flow is less than 0.003 cubic meter per second (0.1 cubic foot per second) for waters designated as special aquatic life use waters, unless studies conducted or approved by the department show that water present during periods of no flow, or flow below critical low flow, provides important refuges for aquatic life and permits biological recolonization of intermittently flowing segments.

(3) Each digression shall be assessed by the secretary for the purposes of section 303(d) of the federal clean water act, with consideration of acceptable duration and frequency of the digression and representation of actual ambient conditions by environmental monitoring data, as specified in the “Kansas implementation procedures: surface water quality standards.”

(d) Criteria for designated uses of surface waters. The following criteria shall apply to all classified surface waters for the indicated designated uses:

(1) Agricultural water supply use. The water quality criteria for irrigation and livestock watering specified in table 1a of the “Kansas surface water quality standards: tables of numeric criteria” shall not be exceeded outside of mixing zones due to artificial sources of pollution.

(2) Aquatic life support use.

(A) Nutrients. The introduction of plant nutrients into streams, lakes, or wetlands from artificial sources shall be controlled to prevent the accelerated succession or replacement of aquatic biota or

the production of undesirable quantities or kinds of aquatic life.

(B) Suspended solids. Suspended solids added to surface waters by artificial sources shall not interfere with the behavior, reproduction, physical habitat, or other factors related to the survival and propagation of aquatic or semiaquatic life or terrestrial wildlife. In the application of this provision, suspended solids associated with discharges of presedimentation sludge from water treatment facilities shall be deemed noninjurious to aquatic and semiaquatic life and terrestrial wildlife if these discharges fully meet the requirements of paragraphs (b)(6) and (8) and paragraph (d)(2)(D).

(C) Temperature.

(i) Heat of artificial origin shall not be added to a surface water in excess of the amount that will raise the temperature of the water beyond the mixing zone more than 3° C above natural conditions. Additionally, a discharge to a receiving water shall not lower the temperature of the water beyond the mixing zone more than 3° C below natural conditions. The normal daily and seasonal temperature variations occurring within a surface water before the addition of heated or cooled water of artificial origin shall be maintained.

(ii) Temperature criteria applicable to industrial cooling water recycling reservoirs that meet the requirements for classification specified in K.A.R. 28-16-28d shall be established by the secretary on a case-by-case basis to protect the public health, safety, or the environment.

(D) Toxic substances.

(i) Conditions of acute toxicity shall not occur in classified surface waters outside of zones of initial dilution, nor shall conditions of chronic toxicity occur in classified surface waters outside of mixing zones.

(ii) Acute criteria for the aquatic life support use specified in tables 1a, 1b, and 1c of the “Kansas surface water quality standards: tables of numeric criteria” shall apply beyond the zone of initial dilution. Chronic criteria for the aquatic life support use specified in tables 1a, 1b, and 1d of the “Kansas surface water quality standards: tables of numeric criteria” shall apply beyond the mixing zone.

(iii) If a discharge contains a toxic substance that lacks any published criteria for the aquatic life support use, or if a discharge contains a mixture of toxic substances capable of additive or synergistic interactions, bioassessment methods and

procedures shall be specified by the department to establish whole-effluent toxicity limitations that are consistent with paragraph (d)(2)(D)(i).

(3) Domestic water supply use.

(A) Except as provided in paragraph (d)(3)(B), the criteria listed in table 1a of the “Kansas surface water quality standards: tables of numeric criteria” for domestic water supply use shall not be exceeded at any point of domestic water supply diversion.

(B) In stream segments where background concentrations of naturally occurring substances, including chlorides and sulfates, exceed the domestic water supply criteria listed in table 1a of the “Kansas surface water quality standards: tables of numeric criteria,” due to intrusion of mineralized groundwater, the existing water quality shall be maintained, and the newly established numeric criteria for domestic water supply shall be the background concentration. Background concentrations shall be established using the methods outlined in the “Kansas implementation procedures: surface water quality standards,” available upon request from the department.

(C) Any substance derived from an artificial source that, alone or in combination with other synthetic or naturally occurring substances, causes toxic, carcinogenic, teratogenic, or mutagenic effects in humans shall be limited to nonharmful concentrations in surface waters. Unless site-specific water quality conditions warrant the promulgation of more protective criteria under the provisions of subsection (a) of this regulation and K.A.R. 28-16-28f, maximum contaminant levels for toxic, carcinogenic, teratogenic, or mutagenic substances specified in 40 C.F.R. 141.11, 141.13, and 141.61 through 141.66, dated July 1, 2012, shall be deemed nonharmful.

(D) The introduction of plant nutrients into surface waters designated for domestic water supply use shall be controlled to prevent interference with the production of drinking water.

(4) Food procurement use.

(A) Criteria listed in table 1a of the “Kansas surface water quality standards: tables of numeric criteria” for food procurement use shall not be exceeded outside of a mixing zone due to any artificial source of pollution.

(B) Substances that can bioaccumulate in the tissues of edible aquatic or semiaquatic life or wildlife through bioconcentration or biomagnification shall be limited in surface waters to concentrations that result in no harm to human

consumers of these tissues. For bioaccumulative carcinogens, surface water concentrations corresponding to a cancer risk level of less than 0.000001 (10^{-6}) in human consumers of aquatic or semiaquatic life or wildlife shall be deemed nonharmful by the department and adopted as food procurement criteria. Average rates of tissue consumption and lifetime exposure shall be assumed by the department in the estimation of the cancer risk level.

(5) Groundwater recharge use. In surface waters designated for the groundwater recharge use, water quality shall be such that, at a minimum, degradation of groundwater quality does not occur. Degradation shall include any statistically significant increase in the concentration of any chemical or radiological contaminant or infectious microorganism in groundwater resulting from surface water infiltration or injection.

(6) Industrial water supply use. Surface water quality criteria for industrial water supplies shall be determined by the secretary on a case-by-case basis to protect the public health, safety, or the environment.

(7) Recreational use.

(A) General. The introduction of plant nutrients into surface waters designated for primary or secondary contact recreational use shall be controlled to prevent the development of objectionable concentrations of algae or algal by-products or nuisance growths of submersed, floating, or emergent aquatic vegetation.

(B) Primary contact recreation for classified surface waters other than classified stream segments. A single sample maximum or a geometric mean of at least five samples collected during separate 24-hour periods within a 30-day period shall not exceed the criteria in table 1j of the “Kansas surface water quality standards: tables of numeric criteria” beyond the mixing zone.

(C) Secondary contact recreational use for classified surface waters other than classified stream segments. A single sample maximum or a geometric mean of at least five samples collected during separate 24-hour periods within a 30-day period shall not exceed the criteria in table 1j of the “Kansas surface water quality standards: tables of numeric criteria” beyond the mixing zone.

(D) Primary contact recreation for classified stream segments. At least five samples shall be collected during separate 24-hour periods within a 30-day period. A geometric mean analysis of these samples shall not exceed the criteria

in table 1i of the “Kansas surface water quality standards: tables of numeric criteria” beyond the mixing zone.

(E) Secondary contact recreation for classified stream segments. The following criteria shall be in effect from January 1 through December 31 of each year:

(i) At least five samples shall be collected during separate 24-hour periods within a 30-day period.

(ii) A geometric mean analysis of the samples specified in paragraph (d)(7)(E)(i) shall not exceed the criteria in table 1i of the “Kansas surface water quality standards: tables of numeric criteria” beyond the mixing zone.

(F) Wastewater disinfection. Wastewater effluent shall be disinfected if the department determines that the discharge of nondisinfected wastewater constitutes an actual or potential threat to public health. Situations that constitute an actual or potential threat to public health shall include instances in which there is a reasonable potential for the discharge to exceed the applicable criteria supporting the assigned recreational use designation or if a water body is known or likely to be used for either of the following:

(i) Primary or secondary contact recreation; or

(ii) any domestic water supply.

(8) Multiple uses. If a classified stream segment or classified surface water other than a classified stream segment is designated for more than one designated use according to K.A.R. 28-16-28d, the water quality of the classified stream segment or classified surface water other than a classified stream segment shall meet the most stringent of the applicable water quality criteria.

(e) Tables. The numeric criteria for the designated uses of classified surface waters shall be the numeric criteria specified in the department’s “Kansas surface water quality standards: tables of numeric criteria,” dated December 15, 2017, which is hereby adopted by reference. (Authorized by K.S.A. 2017 Supp. 65-171d, K.S.A. 65-171m, and K.S.A. 2017 Supp. 82a-2010; implementing K.S.A. 2017 Supp. 65-171d, K.S.A. 65-171m, and K.S.A. 2017 Supp. 82a-2002, 82a-2003, 82a-2004, and 82a-2010; effective May 1, 1986; amended, T-87-8, May 1, 1986; amended May 1, 1987; amended Aug. 29, 1994; amended July 30, 1999; amended Nov. 3, 2000; amended Aug. 31, 2001; amended Jan. 3, 2003; amended Oct. 24, 2003; amended Jan. 28, 2005; amended March 20, 2015; amended Feb. 23, 2018.)

28-16-28f. Administration of surface water quality standards. (a) Application of modified surface water quality standards. A modification to the surface water quality standards, the surface water register, or both, shall have no effect on the requirements of any existing enforceable discharge permit issued under K.S.A. 65-165, and amendments thereto, unless the discharge fails to meet the requirements of the permit or the secretary determines that continuation of the discharge will result in a potential or actual public health hazard or in irreversible water use impairments.

(b) Water quality certification. No action identified in this subsection shall be taken unless the department has issued a water quality certification for the following:

(1) Any action requiring a federal license or permit pursuant to the federal clean water act;

(2) any action subject to the permitting provisions of K.S.A. 65-165, and amendments thereto;

(3) any water development project subject to the provisions of K.S.A. 82a-325 et seq., and amendments thereto; and

(4) any action undertaken by any Kansas state agency that has a potential water quality impact.

(c) Compliance schedules.

(1) Except as provided in paragraph (c)(2), compliance schedules contained in any discharge permit or license issued by the department pursuant to the federal clean water act or K.S.A. 65-165, and amendments thereto, shall not extend more than three years beyond the date of permit issuance.

(2) Compliance schedules of up to five years in total duration may be granted if it is demonstrated that the strict application of paragraph (c)(1) is not feasible due to construction scheduling constraints or other technical limitations.

(d) Variances.

(1) A variance establishing an interim designated use and interim criterion may be permitted and adopted into the regulations at the next systematic review or subsequent triennial review and after a public hearing consistent with 40 C.F.R. 131.20(b), dated July 1, 2016, if upon written request by any person, as defined in K.S.A. 65-170a and amendments thereto, the secretary finds that the attainment of the designated use and criterion is not feasible because one of the following conditions is met:

(A) One of the factors listed in 40 C.F.R. 131.10(g), as adopted by reference in K.A.R. 28-16-28d(d)(1)(B), exists.

(B) Actions necessary to facilitate lake, wetland, or stream restoration through dam removal or other significant reconfiguration activities preclude attainment of the designated use and criterion while the actions are being implemented.

(2) Each variance shall be issued and evaluated using methods outlined in the “Kansas implementation procedures: surface water quality standards,” as adopted in K.A.R. 28-16-28b.

(3) Adoption and implementation of each variance shall be in accordance with 40 C.F.R. 131.14, dated July 1, 2016 and hereby adopted by reference, except that 131.14(a)(2), 131.14(a)(4), 131.14(b)(1)(ii), and 131.14(b)(2)(i)(A) shall be replaced by paragraphs (d)(4) through (d)(6) of this regulation, respectively.

(4) Each variance shall have a designated term limit and reflect the highest attainable condition during the specified term. A variance may be applied to individual or multiple dischargers or surface water bodies.

(5) Each variance shall have requirements and a time limitation demonstrating the intent that progress be made toward the attainment of the underlying designated use and criterion.

(A) Each Kansas surface water quality standard not specifically addressed in a variance shall remain applicable.

(B) Each person requesting a variance shall provide evidence that a designated use and criterion, or a designated use or criterion, addressed by the variance cannot be achieved solely by the implementation of technology-based effluent limits.

(C) Each requirement shall represent the highest attainable condition of the surface water segment applicable throughout the term of the variance. A specified requirement shall not result in lowering the currently attained ambient water quality, unless a variance is necessary for physical reconfiguration activities intended for surface water segment restoration. The highest attainable condition of each affected surface water segment as a quantifiable expression shall be specified as one of the following:

- (i) The highest attainable interim criterion;
- (ii) the interim effluent condition that reflects the greatest pollutant reduction achievable; or
- (iii) the interim criterion or effluent condition that reflects the greatest pollutant reduction achievable with the pollutant control technologies installed at the time the variance is adopted.

(D) If the quantifiable expression identified in paragraph (d)(5)(C)(iii) is selected, a pollut-

ant minimization plan consistent with 40 C.F.R. 131.3(p) shall be adopted and implemented if no additional feasible pollutant control technology is identified.

(6) Each variance request shall include supporting documentation that demonstrates all of the following:

(A) Attaining the designated use and criterion is not feasible throughout the term of the variance because of one of the factors cited in paragraphs (d)(1)(A) and (B).

(B) The term of the variance is only as long as necessary to achieve the highest attainable condition.

(C) The highest attainable condition of the affected surface water segment is as defined in paragraph (d)(5)(C).

(7) A discharger that impacts water quality shall not be granted a variance from requirements of K.A.R. 28-16-28c and 28-16-28e.

(8) Specific eligibility requirements may be included in a multiple-discharger variance as an alternative to identifying the specific dischargers at the time of adoption of the variance. Each discharger shall meet the eligibility requirements in the applicable section of the “Kansas surface water quality standards variance register,” as adopted by reference in K.A.R. 28-16-28h, to participate in a multiple-discharger variance.

(e) Site-specific criteria. Site-specific criteria shall be established using the methods outlined in the “Kansas implementation procedures: surface water quality standards,” as adopted by reference in K.A.R. 28-16-28b.

(f) Enforcement. Each person deemed by the department to be responsible for a violation of the Kansas surface water quality standards caused by an artificial source of pollution shall be required by the department to initiate corrective actions that restore the designated uses of the affected surface water or surface water segment impaired by the violation and provide for the return of the original surface water quality conditions. (Authorized by K.S.A. 2017 Supp. 65-171d and K.S.A. 65-171m; implementing K.S.A. 65-164, K.S.A. 2017 Supp. 65-171d, and K.S.A. 65-171m; effective May 1, 1986; amended Aug. 29, 1994; amended July 30, 1999; amended Jan. 28, 2005; amended March 20, 2015; amended Feb. 23, 2018.)

28-16-28g. Surface water register. The classification and use designations of surface waters of the state shall be those identified in the department’s “Kansas surface water register,” dated

December 12, 2013, which is hereby adopted by reference. (Authorized by K.S.A. 2013 Supp. 82a-2005 and 82a-2010; implementing K.S.A. 2013 Supp. 82a-2001, 82a-2002, 82a-2003, 82a-2004, and 82a-2005; effective Jan. 28, 2005; amended May 20, 2005; amended Sept. 15, 2006; amended May 25, 2007; amended June 6, 2008; amended Feb. 26, 2010; amended Aug. 5, 2011; amended July 7, 2014.)

28-16-28h. Surface water variance register. The variances approved by the secretary shall be those identified in the department's "Kansas surface water quality standards variance register," dated October 31, 2017, which is hereby adopted by reference. (Authorized by K.S.A. 2017 Supp. 65-171d; implementing K.S.A. 2017 Supp. 65-171d and K.S.A. 65-171m; effective Feb. 23, 2018.)

28-16-29. (Authorized by K.S.A. 1976 Supp. 65-4512; effective, E-77-43, Sept. 23, 1976; effective Feb. 15, 1977; revoked Sept. 28, 1992.)

WATER AND WASTEWATER OPERATOR CERTIFICATION

28-16-30. Requirements for water and wastewater operator certification. (a) Each operator who desires or is required to obtain a water supply system or wastewater treatment facility operator certificate shall meet the following requirements:

(1) Each applicant shall own or be either employed by or under contract to persons having a water supply system or wastewater treatment facility and shall be engaged in the daily operation, maintenance, or both, of the system or facility.

(2) Each applicant shall submit a completed and approved examination application and the appropriate fee to the department. The application shall be received by the department at least two weeks before the test date. Late applications shall not be accepted for any test date.

(3) Each applicant shall be a high school graduate or shall have a general education development (GED) diploma.

(b) If an applicant provides false information on the application, the applicant shall not be accepted for examination and the fee shall not be returned. The applicant shall be notified of this decision and shall not be allowed to take the examination for two years.

(c) The applicant who previously held a Kansas water supply system or wastewater treatment

facility certificate that was revoked pursuant to K.S.A. 65-4507, and amendments thereto, shall not be eligible to submit an application for examination for a period of one year from the date of the final action revoking the certificate or for the period of time specified in the final action. (Authorized by and implementing K.S.A. 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-31. Eligibility for water and wastewater operator certification. (a) Each applicant for certification shall meet eligibility requirements as noted in the following table.

CERTIFICATE CLASS	POINTS	EXPERIENCE
Small System	12.5	6 months
I	13.0	1 year
II	14.0	1 year
III	16.0	2 years
IV	18.0	2 years

(1) Point totals shall be determined using the following table.

EXPERIENCE OR EDUCATION	POINTS
Each year of operating experience	1.0
High school graduation (GED or equivalent).....	12.0
Each full year of college (30 hours credit)	1.0
Each department-approved educational course (10 consecutive contact hours)	0.25
Successful completion of California state university correspondence courses (each volume)	1.0
Department-approved semester courses (60 contact hours).....	1.5
Department-approved two-year environmental technology degree	6.0

(2) Completion of an approved two-year environmental technology degree shall fulfill the one year of experience requirement for taking a Class I examination.

(b) Minimum training requirements. Each operator who holds a certificate of competency shall be required to meet minimum training requirements before certificate renewal. All Class I, II, III, and IV certified operators shall acquire at least 10 hours of approved training every two years. Small system operators shall acquire five hours of approved training every two years.

(c) Each operator who conducts approved training for water supply system operators and wastewater treatment facility operators may receive credit equal to the number of hours of training provided. Credit shall be granted for teaching a department-approved course or seminar only in its initial presentation. (Authorized by and imple-

menting K.S.A. 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-32. Operator certification examinations. (a) To be certified, each applicant shall pass the appropriate written examination. A score of 70% or higher shall be considered a passing score.

(b) Examinations shall be given at least twice each year at times and locations set by the department. Notice of examinations shall be sent to certified operators and either communities or districts having a water supply system or wastewater treatment facility, or both, at least 30 days before the date of examination.

(c) The written examinations shall be graded by the department or by a department-approved contractor, and the applicant shall be notified of the results. Examinations shall not be returned to the applicant. Upon receiving a written request, an analysis of the failed examination shall be provided to the applicant. The analysis shall indicate areas in which the applicant needs further study.

(d) Any operator meeting the requirements of K.A.R. 28-16-30 and K.A.R. 28-16-31 may take the same level of examination a maximum of three times per calendar year.

(e) Each operator earning a score of 50% or lower shall provide proof of having attained department-approved training before sitting for a subsequent examination.

(f) An applicant who commits any of the following acts on a written examination shall be deemed guilty of misconduct:

(1) Utilizes text materials, notes, computer-stored materials, or other unauthorized materials while taking an examination; or

(2) without express authorization from examination officials, undertakes any of the following:

(A) Removes or attempts to remove examination materials furnished by the department from the examination room;

(B) aids another applicant, or accepts aid from another applicant in answering examination questions during a written examination; or

(C) makes or attempts to make a manual or electronic copy of the written examination.

(g) If an applicant is guilty of misconduct on a written examination, as determined by the department, both of the following penalties shall apply:

(1) The applicant shall be denied a certificate of competency.

(2) The applicant shall be ineligible to reapply for certification in any operator classification for

a period of one year from the date on which the determination of misconduct becomes final.

(h) A hearing for each denial of a certificate of competency shall be held in accordance with the Kansas administrative procedure act upon written notice of the department's intention to deny any certificate. (Authorized by and implementing K.S.A. 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-33. Operator responsible for the operation and management of a water supply system or wastewater treatment facility, or both. (a)(1) Each system or facility shall have an individual or individuals in responsible charge at the system or facility site, or available at all times.

(2) For the purposes of this regulation, "individual or individuals in responsible charge" shall be defined as the person or persons designated by the owner to be the certified operator or operators who make decisions regarding the daily operational activities of a water supply system or wastewater treatment facility that will directly impact the quality or quantity of drinking water for human consumption or the quality of wastewater effluent.

(b) Except as provided in K.A.R. 28-16-33(f), each individual in responsible charge of a system shall be a certified operator for that class or a higher class of system.

(c) When a new operator responsible for the operation or management of a system or facility classified as small system, class I, or class II is hired, the owner of the system or facility shall, on a form provided by the department, notify the department within 30 days. The person named on the form shall be issued an operator-in-training (OIT) certificate subject to both of the following requirements:

(1) Within six months after completing one full year of operation as an OIT, the operator-in-training shall take the appropriate certification examination.

(2) If the OIT fails the initial examination, the OIT shall make additional preparation and take the examination again at the next time that the department offers the examination.

(d) An OIT certificate shall be valid for one year from the date of issuance. The OIT certificate may be renewed for up to an additional year if the operator demonstrates to the department that the operator is attending training sessions, studying correspondence courses, or otherwise preparing to pass the operator certification examination.

(e) The owner of a system or facility shall not be allowed to utilize an OIT for more than two consecutive years.

(f) An operator with an OIT certificate may be the individual in responsible charge of a system subject to the following:

(1) A written request submitted to the department by the system owner and verification by the owner that the system is unable to employ a currently certified operator; and

(2) a finding by the department that the operator has the basic knowledge necessary to operate the system. The following items shall be the basis for the department's decision:

(A) The results of any on-site inspection of the system;

(B) a review of the operational history of the system; and

(C) an examination of other available information. (Authorized by and implementing K.S.A. 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-34. Issuance and renewal of certificate of competency. (a) Upon satisfactory fulfillment of the requirements specified in K.A.R. 28-16-30, a certificate of competency shall be issued to the applicant. The certificate shall designate the class or classes of either water supply systems or wastewater treatment facilities for which the applicant has received certification to operate. The certificate shall be valid for two years from date of issuance.

(b) The certificate shall expire unless renewed as specified in this regulation before the expiration date. A renewal notice and application form shall be mailed to the last address of record approximately 45 calendar days before the expiration date of the certificate. Failure to receive the notice shall not relieve the certified operator of the responsibility to renew the certificate.

(c) In order to renew a certificate before it expires, the certified operator shall complete the following requirements before the expiration date of the certificate:

(1) Meet the training requirements specified in K.A.R. 28-16-31(b);

(2) submit an application for renewal on a form provided by the department; and

(3) submit the nonrefundable two-year renewal fee specified in K.A.R. 28-16-35 to the department.

(d) An expired certificate may be reinstated within two years of the expiration date, subject

to K.A.R. 28-16-34(c)(1) through (3) and the reinstatement fee specified in K.A.R. 28-16-35. In each case of reinstatement, the expiration date of the reinstated operator certificate shall be the same as if the renewal requirements had been met on or before the date of expiration.

(e) Each operator certificate that is expired and is not reinstated within two years after the expiration date shall not be reinstated. Each operator failing to reinstate an expired certificate within two years after the date of expiration shall meet the requirements of K.A.R. 28-16-30, apply for examination, pay all required fees, and pass the examination in order to obtain certification. (Authorized by and implementing K.S.A. 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-35. Operator certification fees. (a) Fees for certification shall be the following:

OIT (one-year certificate)	No charge
OIT (renewal for one year)	\$5.00
Examination fee	\$25.00
Two-year renewal for all classes except OIT	\$20.00
Reinstatement of lapsed certificate	
up to and including one year after renewal date..	\$15.00
between one and two years after renewal date	\$25.00
One-year reciprocity fee	\$25.00

(b) Fees from applicants who are ineligible to take the certification examination shall be returned. No other fees shall be returned. Fees for department-sponsored training sessions shall be established by the department. (Authorized by and implementing K.S.A. 65-4512 and 65-4513; effective Sept. 28, 1992; amended Aug. 31, 2001.)

28-16-36. Classification of water supply systems and wastewater treatment facilities.

(a) The owner of each water supply system and wastewater treatment facility shall designate an operator in responsible charge of the system or facility, or both, whose qualifications are commensurate with the following:

SYSTEM OR FACILITY CLASS	OPERATOR CLASS
Small System	Small System, I, II, III, or IV
I	I, II, III, or IV
II	II, III, or IV
III	III or IV
IV	IV

(b) Classification of water supply systems shall be as follows:

CLASS	POPULATION SERVED
Small System	
Distribution system only	All, no limit
or	
Chlorination of groundwater only	less than 501
Class I	
Chlorination of groundwater only	501-1,500
or	
Treatment of groundwater	less than 501
Class II	
Chlorination of groundwater only	1,501-5,000
or	
Treatment of groundwater	501-2,500
or	
Treatment of surface water	less than 2,501
Class III	
Chlorination of groundwater only	5,001-20,000
or	
Treatment of groundwater or surface water....	2,501-10,000
Class IV	
Chlorination of groundwater only	over 20,000
or	
Treatment of groundwater or surface water....	over 10,000

(c) Classification of commercial, industrial, and municipal wastewater treatment facilities shall be as follows:

CLASS	POPULATION SERVED
Small Systems	
Nonoverflowing municipal wastewater ponds.....	All, no limit
Class I	
Any secondary treatment facility	less than 1,000
or	
Overflowing wastewater ponds.....	All, no limit
Class II	
Any secondary treatment facility	1,001-5,000
Class III	
Any secondary treatment facility	5,001-25,000
or	
	less than or equal to 5,000
Advanced or specialized treatment facility.....	
Class IV	
Any secondary treatment facility	over 25,000
or	
Advanced or specialized treatment facility.....	over 5,000

(d) For purposes of this regulation, "treatment," as it applies to water supply systems, shall include the following processes:

- (1) Iron and manganese removal;
- (2) membrane filtration;
- (3) softening;
- (4) coagulation, sedimentation, and filtration;
- (5) recarbonation; and
- (6) addition of chemicals other than chlorine for improved water quality.

(e) For purposes of this regulation, "secondary treatment facility" shall be any department-permitted biological treatment facility, including the following:

- (1) Waste stabilization ponds;
- (2) trickling filter plants;
- (3) rotating biological contactor plants; and
- (4) activated sludge plants.

A secondary treatment facility may include biological, physical, or chemical disinfection.

(f) For purposes of this regulation "advanced or specialized treatment facility" shall include facilities utilizing selected biological, physical, and chemical separation processes to remove organic and inorganic substances that resist conventional treatment practices. Biological, physical, and chemical disinfection shall not be considered advanced or specialized treatment. (Authorized by K.S.A. 65-4512; implementing K.S.A. 65-4505 and 65-4512; effective Sept. 28, 1992; amended Aug. 31, 2001.)

**STATE GRANTS TO MUNICIPALITIES
FOR THE CONSTRUCTION OF WATER
POLLUTION CONTROL PROJECTS
BENEFITING FROM FEDERAL GRANTS**

28-16-50 to 28-16-54. (Authorized by K.S.A. 1971 Supp. 65-3305; effective, E-71-16, April 1, 1971; effective Jan. 1, 1972; revoked May 10, 1996.)

28-16-55. Inspection of sewerage systems during construction and prohibited connections. This regulation pertains to the inspection of all components of a sewerage system during construction including, but not limited to, treatment facilities, lift stations and force mains, outfall sewers, interceptor sewers, main and lateral sewers and their extensions, manholes, cleanouts, and building sewers.

I. *Definitions.* Where used in these regulations the following terms shall be understood to have the meaning as given below in their corresponding definitions regardless of any other meaning which may be implied by common or local usage.

(A) *Areaways.* An areaway is a sunken yard, patio, court, driveway or window well leading into a basement or crawlspace for entrance, light or ventilation.

(B) *Building.* A building is a structure built, erected, or framed of component structural parts designed for the housing, shelter, enclosure, or support of persons, animals, equipment or property of any kind.

(C) *Building drain*. The building drain is that part of the lowest piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer beginning three (3) feet outside the building wall.

(D) *Building sewer*. The building sewer is that part of the piping of a drainage system which extends from the end of the building drain and which receives the discharge of the building drain and conveys it to a public sanitary sewer, private sanitary sewer, individual sewage disposal system, or other point of disposal.

(E) *Crawlspace drain*. A crawlspace drain is a drain installed to collect drainage from the surface of any area that is entirely enclosed by foundation walls and beneath a building which area is not covered by a concrete or other form of permanent surfacing.

(F) *Garage drain*. A garage drain is a drain located in a garage or, in case of a basement garage, within ten (10) feet of garage area.

(G) *Inspector*. An inspector shall be a consulting engineer, municipal engineer, sewer district engineer, county engineer, or his authorized representative.

(H) *Roof drain*. A roof drain is a drain which is installed to collect stormwater from building roofs.

(I) *Saddle*. A saddle is a fitting attached to an existing sanitary sewer to receive a building sewer connection.

(J) *Sanitary sewer (sewer)*. A sanitary sewer (sewer) shall mean a pipe which carries sewage and insofar as practical, excludes infiltration of storm, surface and ground water.

(K) *Sewage*. Sewage is any substance that contains any of the waste products or excrementitious or other discharges from the bodies of human beings or animals, or chemical or other wastes from domestic, manufacturing or other forms of industry.

(L) *Shall*. The word "shall" is a mandatory term.

(M) *Foundation drains*. A foundation drain is a pipe with open joints and/or porous material installed either outside exterior foundation walls or inside and beneath a basement floor for the purpose of preventing the build-up of water pressure and water capillarity beneath the floor.

II. Inspection of sewerage system construction.

(A) *Treatment facilities, mains and laterals*. All sewerage construction projects shall have continuous inspections by a qualified inspector during active phases of sewerage construction to insure that they comply with plans and specifications ap-

proved by the Kansas state department of health and to insure elimination of extraneous surface and ground water. This shall include inspection of all sewers and manholes before they are covered but after the sewers are bedded.

(B) *Building sewers*. All building sewers shall be constructed of materials which are approved by the state department of health for the construction of lateral sewers. Building sewers shall be left uncovered until inspected. In the case of saddle connections, after the saddle hole has been made in the receiving pipe, the pipe thoroughly cleaned and all excavation and bracing has been completed for the encasement, the inspector shall see the saddle installed and properly anchored.

(C) *Prohibited connections*. No roof, areaway, garage, or foundation drain shall be connected with or flow into any building or sanitary sewer.

III. *Municipal regulations and fees*. These regulations do not affect the right of the municipality to adopt stricter regulations, connection fees, connection and use permits, and sewer service charges. (Authorized by K.S.A. 65-171d; effective, E-74-7, Nov. 26, 1973; effective May 1, 1975.)

28-16-56. (Authorized by K.S.A. 1975 Supp. 65-166a; effective, E-74-7, Nov. 26, 1973; effective, E-76-3, Jan. 1, 1975; effective May 1, 1975; amended, E-76-39, Aug. 1, 1975; amended May 1, 1976; revoked, T-85-30, Nov. 14, 1984; revoked May 1, 1985.)

28-16-56a. (Authorized by and implementing K.S.A. 65-166a; effective, T-85-30, Nov. 14, 1984; effective May 1, 1985; amended May 1, 1986; amended May 1, 1988; revoked Sept. 27, 1996.)

28-16-56b. (Authorized by and implementing K.S.A. 1984 65-166a; effective, T-85-30, Nov. 14, 1984; effective May 1, 1985; revoked Sept. 27, 1996.)

28-16-56c. Sewage permit fees; definitions. For the purposes of K.A.R. 28-16-56d, the following terms shall be defined as specified in this regulation:

(a) "Animal unit," for the purpose of determining permit fees, has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(b) "Animal unit capacity" means the maximum number of animal units that a confined feeding facility is designed to accommodate at any one time.

(c) "Commercial wastewater treatment facility" means a facility serving a commercial enterprise or

group or a combination of commercial enterprises, for the purpose of treating primarily domestic sewage by physical, chemical, or biological means or by a combination of these methods. This term shall include any slaughterhouse with an average slaughter rate of 50 animals or less per week.

(d) "Confined feeding facility" has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(e) "Cooling water discharge" means cooling water discharged from any system in which there is no contact with process pollutants and there is no measured chemical buildup.

(f) "Dewatering discharge" means a discharge resulting from the drainage or removal of water from a lagoon, quarry, pit, or any other holding device. This term shall not include any discharge in which there is a measured chemical buildup or to which chemicals have been added for any purpose.

(g) "Domestic sewage" means sewage originating primarily from kitchen, bathroom, and laundry sources, including waste from food preparation, dishwashing, garbage grinding, toilets, baths, showers, and sinks.

(h) "General permit" has the meaning specified in 40 CFR 122.2 and adopted by reference in K.A.R. 28-16-151.

(i) "Industrial wastewater treatment facility" means a facility treating primarily sewage or process-generated wastewater, other than domestic sewage, by physical, chemical, or biological means or by a combination of these methods.

This term shall not include any private truck-washing or trailer-washing facility for washing animal waste from not more than two trucks or trailers, or a combination of both, owned by the private truck-washing or trailer-washing facility.

(j) "Municipal wastewater treatment facility" means a facility serving a city, county, township, sewer district, or other local governmental unit, or a facility serving a state or federal agency, establishment, or institution, for the purpose of treating primarily domestic sewage by physical, chemical, or biological means or by a combination of these methods.

(k) "Point source" means any discernible, confined, and discrete conveyance from which pollutants are or can be discharged, including any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, confined animal feeding facility, landfill leachate collection system, and any vessel or other floating craft. This term

shall not include the return flows from irrigated agriculture or agricultural storm water runoff.

(l) "Pretreatment permit" means a permit that is issued to a source subject to pretreatment standards and that discharges to a municipal wastewater treatment facility not having an approved pretreatment program.

(m) "Private truck-washing facility for animal wastes" means a truck-washing facility for animal wastes that exists primarily for the purpose of washing animal wastes from trucks or trailers owned by the facility.

(n) "Sewage" has the meaning specified in K.S.A. 65-164, and amendments thereto.

(o) "Storm water discharge" means any discharge of storm water runoff from a point source. This term may include any of the following:

(1) Storm water runoff from a municipal, industrial, or commercial facility or from a construction site;

(2) a discharge from any conveyance or system of conveyances used for collecting and conveying storm water runoff; or

(3) a system of discharges from municipal storm sewers that are separate from sanitary sewers.

(p) "Treated cooling water discharge" means cooling water discharged from any system in which there is no contact with process pollutants and there is no measured chemical buildup other than chemicals added for biological or corrosion control, or from evaporative losses.

(q) "Truck-washing facility for animal wastes" means a truck-washing facility that exists primarily for the purpose of washing animal wastes from trucks or trailers. (Authorized by and implementing K.S.A. 2003 Supp. 65-171d; effective Sept. 27, 1996; amended March 16, 2007.)

28-16-56d. Sewage permit fees; schedules. (a) Each person applying for a permit pursuant to K.S.A. 65-165, and amendments thereto, and each holder of a permit issued pursuant to K.S.A. 65-165, and amendments thereto, shall submit the appropriate fee in accordance with the following schedule:

Schedule of Fees at Annual Rate

<i>Classification</i>	<i>Unit Rates and Minimum Rates</i>
(1) Municipal or commercial wastewater treatment facility.	\$185/year/million gallons per day permitted capacity and for any portion thereof. \$185 minimum fee per year.

<i>Classification</i>	<i>Unit Rates and Minimum Rates</i>
(2) Municipal storm water system.	
(A) population less than 100,000 persons.	None
(B) population of 100,000 persons or greater.	\$2,000 per year.
(3) Industrial wastewater treatment facility.	\$320/year/million gallons per day permitted capacity and for any portion thereof. \$320 minimum fee per year.
(4) Cooling water discharge. Surface disposal:	
(A) Non-contact cooling water.	\$60 per year.
(B) treated cooling water.	\$120/year/million gallons per day permitted capacity and for any portion thereof. \$120 minimum fee per year.
(5) Dewatering discharge.	\$60 per year.
(6) Pretreatment permit.	\$320 per year.
(7) General permit.	\$60 per year.
(8) Industrial storm water discharge.	
(A) General permit.	\$60 per year.
(B) individual permit.	\$320 per year.
(9) Confined feeding facility or public livestock market required to register or obtain a permit:	
(A) Initial registration fee, regardless of animal unit capacity	\$25 one-time fee.
(B) permit fee:	
(i) Animal unit capacity of 999 or less	\$25 per year.
(ii) animal unit capacity of 1,000-4,999	\$100 per year.
(iii) animal unit capacity of 5,000-9,999	\$200 per year.
(iv) animal unit capacity of 10,000 or more.	\$400 per year.
(10) Truck-washing facility for animal wastes.	
(A) Private truck-washing facility for animal wastes with any combination of owned trailers or trucks totaling no more than two	\$25 per year.
(B) Private truck-washing facility for animal wastes with any combination of owned trailers or trucks totaling more than two	\$200 per year.
(C) all other truck-washing facilities for animal wastes.	\$320 per year.

(b)(1) Plans and specifications shall not be reviewed and processing and issuance of a permit shall not take place until the required fee is paid.

Fees shall be made payable to the “Kansas department of health and environment—water pollution control permit.”

(2) Fees paid in accordance with the schedule in subsection (a), including fees paid for facilities that are never built or that are abandoned, shall not be refunded.

(3) Each operator who is operating a facility in which two or more of the wastewaters identified in subsection (a) are discharged shall pay the appropriate fee for each type of wastewater discharged, even if only one permit has been issued for the facility.

(4) Permit fees shall be based on the minimum rate or unit rate, whichever is greater. The full unit rate shall be applied to any portion of a unit. The fee per unit shall not be prorated.

(5) A permit fee shall be paid annually in accordance with subsection (a).

(6) If ownership of the permitted facility changes during the term of a valid permit, no additional fee shall be required unless a change occurs that results in a new or expanded facility or operation.

(7) If a change occurs during the term of a valid permit that results in an expanded capacity of the facility or operation, a new application shall be required. Upon approval, the existing permit shall be amended and shall continue in effect for the remainder of the original term, unless revoked. The additional fee shall be based only on the difference between the original permitted capacity and the expanded capacity. The new annual fee for the expanded facility shall be based on the unit rate at the expanded capacity or the minimum rate, whichever is greater, for the remainder of the term of the permit. (Authorized by and implementing K.S.A. 2003 Supp. 65-166a and 65-171d; effective Sept. 27, 1996; amended March 16, 2007.)

28-16-57. (Authorized by K.S.A. 65-171d, as amended by L. 1986, Ch. 204, Sec. 3, Sec. 6 and L. 1986, Ch. 201, Sec. 22; implementing K.S.A. 65-165, 65-166; effective, E-74-32, June 14, 1974; effective May 1, 1975; amended May 1, 1987; revoked March 23, 2001.)

28-16-57a. Effluent standards. (a) Incorporation. 40 C.F.R. Parts 133, 405 through 436, 439, 440, 443, 446, 447, 454, 455, 457 through 461, 463, 465, and 469, as in effect on July 1, 1985, are adopted by reference.

(b) To the extent that the above effluent limitations are inapplicable, the limitations shall be

set on a case-by-case basis using the methodology described in 40 CFR Sections 122.44(a) and 125.3(c)(2) as in effect on July 1, 1985. (Authorized by K.S.A. 65-171d, as amended by L. 1986, Ch. 204, Sec. 3, Sec. 6 and L. 1986, Ch. 201, Sec. 22; implementing K.S.A. 65-171d as amended by L. 1986, Ch. 204, Sec. 3, Sec. 6 and L. 1986, Ch. 201, Sec. 22, effective May 1, 1987.)

28-16-58. Definitions. As used in K.A.R. 28-16-57a through 28-16-63, each of the following terms shall have the meaning specified in this regulation: (a)(1) "Administrator" means administrator of the United States environmental protection agency (EPA).

(2) "Application" means all documents required by the division of environment in the Kansas department of health and environment that are necessary for obtaining a permit.

(3) "Department" and "KDHE" mean Kansas department of health and environment.

(4) "Director" means director of the division of environment, KDHE.

(5) "Division" means division of environment, KDHE.

(6) "Draft permit" means a permit that has not been issued as a final action of the secretary.

(7) "EPA" means United States environmental protection agency.

(8) "Kansas implementation procedures: wastewater permitting" means the procedures dated July 1, 2014 and written and used by the department for the development of national pollutant discharge elimination system permit limitations, available upon request from the division.

(9) "Minimum standards of design, construction, and maintenance" means effluent standards, effluent limitations, pretreatment standards, other performance standards, and other standards of design, construction, and maintenance for wastewater control facilities published by the department in 1978 as "minimum standards of design for water pollution control facilities."

(10) "Municipal system" means a system under the jurisdiction of a city, county, township, district, or other governmental unit.

(11) "National pollutant discharge elimination system" and "NPDES" mean the national system for the issuance of permits under 33 U.S.C. Section 1342 and shall include any state or interstate program that has been approved by the administrator, in whole or in part, pursuant to 33 U.S.C. Section 1342.

(12) "Refuse act application" means an application for a permit under 33 U.S.C. Section 407, commonly known as the refuse act, of 33 U.S.C. Chapter 9, "protection of navigable waters and of harbor and river improvements generally."

(13) "Regional administrator" means the regional administrator for region VII of the EPA.

(14) "Secretary" means secretary of KDHE.

(15) "Water quality standards" means all water quality standards, as specified in K.A.R. 28-16-28b through K.A.R. 28-16-28g, to which a discharge is subject.

(16) "Waters of the state" means all surface and subsurface waters occurring within the borders of the state or forming part of the border between Kansas and one of the adjoining states.

(b) The definitions of the following terms contained in 33 U.S.C. Section 1362, as amended July 29, 2008 and hereby adopted by reference, shall be applicable to the following terms as used in K.A.R. 28-16-57a through K.A.R. 28-16-63, unless the context requires otherwise:

(1) "Biological monitoring";

(2) "effluent limitations";

(3) "municipality";

(4) "person";

(5) "state"; and

(6) "toxic pollutant." (Authorized by K.S.A. 2014 Supp. 65-171d; implementing K.S.A. 65-165, K.S.A. 65-166, and K.S.A. 2014 Supp. 65-171d; effective, E-74-32, June 14, 1974; effective May 1, 1975; amended May 1, 1987; amended Aug. 31, 2001; amended Jan. 28, 2005; amended March 20, 2015.)

28-16-59. Filing of applications. (a) Each person presently discharging or having a potential to discharge pollutants into any "waters of the state" shall file one copy of the appropriate application within 30 days of a written notification by the division.

(b) Each person proposing commencement of a discharge of pollutants after enactment of these regulations shall file a complete application:

(1) no less than 180 days in advance of the date on which the person desires to commence the discharge of pollutants; or

(2) in sufficient time prior to commencement of the discharge of pollutants to insure compliance with the requirements of state or federal law.

(c) Each application shall be considered to be complete when the appropriate fee has been paid in accordance with K.A.R. 28-16-56c and 28-16-56d and when the applicant has filed:

(1) A refuse act application and any additional information required by the director; or

(2) a complete application form, as prescribed for the type, category, or size of discharge, facility, or activity, and plans, specifications and an engineering report in accordance with K.A.R. 28-16-1 through 28-16-7 and any additional information required by the director.

(d) Notification to and approval by the director is required prior to any of the following:

(1) The connection of an industrial waste discharge to a municipal system or the addition of a new process or product by an existing industrial facility;

(2) A significant change in disposal method, including change from a land disposal to direct discharge to water, or a change in the method of treatment which would significantly alter the characteristics of the waste;

(3) A significant change in the disposal area or point of discharge, including discharging into another drainage area or into a different water body, or to a disposal area different from the existing approved area;

(4) An increase in flow beyond that specified in the issued permit or the application thereto; or

(5) Other circumstances which result in a change in character, amount or location of waste discharge.

(e) The application shall be signed and certified in accordance with the provisions of 40 CFR Section 122.22 as in effect on July 1, 1985.

(f) A permit shall not be issued on the basis of any application which the director has identified as incomplete or otherwise deficient until the director receives sufficient information to correct any deficiency. (Authorized by K.S.A. 1995 Supp. 65-171d; implementing K.S.A. 65-165, 65-166; effective, E-74-32, June 14, 1974; effective May 1, 1975; amended May 1, 1987; amended Sept. 27, 1996.)

28-16-60. Development of draft permit.

(a) Each application and any other relevant facts shall be reviewed by the director to determine one of the following:

(1) A permit shall be issued allowing the discharge.

(2) A permit shall be issued providing for no discharge.

(3) A permit shall not be issued.

(b) If the issuance of a permit is deemed advisable, the proposed permit conditions shall be

formulated by the director, including all of the following:

(1) Effluent limitations developed according to the "Kansas implementation procedures: wastewater permitting";

(2) a schedule of compliance, including any necessary interim dates;

(3) any special conditions; and

(4) a monitoring program, if appropriate. (Authorized by K.S.A. 2000 Supp. 65-171d, as amended by L. 2001, Ch. 160, Sec. 15 and L. 2001, Ch. 191, Sec. 15; implementing K.S.A. 2000 Supp. 65-165 and K.S.A. 65-166; effective, E-74-32, June 14, 1974; effective May 1, 1975; amended May 1, 1987; amended Aug. 31, 2001.)

28-16-61. Public notice of permit actions, public comment period, and public hearings.

(a) Definitions.

(1) "Clean Water Act (CWA)" means the federal water pollution control act, or federal pollution control act amendments of 1972, P.L. 92-500, as amended by P.L. 95-217, P.L. 95-576, P.L. 96-438, and P.L. 97-117; 33 U.S.C. 1251 et seq.

(2) "Draft permit" means a document prepared under K.A.R. 28-16-60 indicating the director's tentative decision to issue, reissue, deny, modify, revoke and reissue, or terminate a permit.

(3) "Facility or activity" means any NPDES point source as defined in K.A.R. 28-16-57a or any other facility or activity, including land or appurtenances thereto, that is subject to regulation under K.A.R. 28-16-57.

(4) "General permit" means a permit authorizing a category of discharges or activities under the CWA within a geographical area. For NPDES, a general permit means a permit issued under K.A.R. 28-16-150 to 154, inclusive.

(5) "Indian tribe" means any indian tribe having a federally recognized governing body carrying out substantial governmental duties and powers over a defined area.

(6) "Major facilities" are those facilities which are on a mutually agreed list as determined by EPA and the department.

(7) "Permit" means an authorization, license, or equivalent control document issued by the director to implement the requirements of K.A.R. 28-16-57. Permit does not include any document which has not yet been the subject of final agency action, such as a draft permit.

(8) "Resource Conservation and Recovery Act (RCRA)" means the solid waste disposal act of

1965, as amended in 1970, as amended by the resource conservation and recovery act of 1976, P.L. 94-580, as amended by P.L. 95-609, P.L. 98-616, and P.L. 99-499; 42 U.S.C. 6901 et seq.

(9) "UIC" means the underground injection control program under part C of the safe drinking water act, 42 U.S.C. 300f et seq.

(b) Public Notice and Comment Period.

(1) Scope and Timing. Public notice shall be given when a draft permit has been prepared under K.A.R. 28-16-60 and when a hearing has been scheduled under subsection (d) of this regulation.

(A) A public notice shall not be required when a request for permit modification, revocation and reissuance, or termination is denied under K.A.R. 28-16-62. Written notification of that denial shall be given both to the person who requests this change and to the permittee.

(B) Public notices may describe more than one permit or permit action.

(C) Public notice of the preparation of a draft permit shall allow at least 30 days for public comment.

(D) Public notice of a public hearing shall be given at least 30 days before the hearing. Public notice of the hearing may be combined with the public notice of the draft permit.

(2) Methods.

(A) Incorporation. 40 CFR sections 124.8 (a), (b)(1), (2), (4), (5), (6), (7), and (8); 124.10 (c)(1) (i), (ii), (iii), (iv), (v), and (x); (c)(2)(i); (c)(3); and (c)(4); and 124.56, as in effect on July 1, 1991, are adopted by reference.

(B) Each person who is on a mailing list maintained by the department shall also be mailed a copy of the notice. The mailing list shall include:

(i) each person who requests in writing to be placed on the list;

(ii) each person solicited for "area lists" from participants in past permit proceedings in that area; and

(iii) each person who responds to a notice, published in the Kansas Register once a year, of the opportunity to be placed on the list. The mailing list may be updated from time to time by a request from the director for a written indication of continued interest from those listed. The name of any person who fails to respond to such a request may be deleted from the list.

(3) Contents.

(A) Public notice. Each public notice issued under this regulation shall contain the following minimum information:

(i) the name and address of the office processing the permit action for which notice is being given;

(ii) the name and address of the permittee or the permit applicant, and if different, the name of the facility or activity regulated by the permit;

(iii) a brief description of the business conducted at the facility or the activity described in the permit application;

(iv) the name, address, and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit, fact sheet, and the application; and

(v) a brief description of the comment procedures established by subsections (c) and (d) of this regulation and of the time and place of any hearing that will be held. The notice shall also include a statement of procedures to request a hearing, if a hearing has not already been scheduled, and other procedures by which the public may participate in the final permit decision.

(B) Public notices for hearings. In addition to the general public notice described in paragraph (3)(A) of this subsection, each public notice of a hearing shall contain the following:

(i) reference to the date of any previous public notices relating to the permit at issue; and

(ii) a brief description of the nature and purpose of the hearing, including the applicable rules and procedures.

(C) In addition to the general public notice described in paragraph (3)(A) of this subsection, each person identified in 40 CFR 124.10(c)(1)(i), (ii), (iii), and (iv) shall be mailed a copy of the fact sheet, the permit application, if any, and the draft permit, if any.

(c) Public comments and request for public hearings. During the public comment period provided under subsection (b) of this regulation, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised during the hearing. All comments shall be considered in making the final decision and shall be answered as provided in subsection (e) of this regulation.

(d) Public hearings; incorporation. 40 CFR section 124.12(a)(1) and (2), as in effect on July 1, 1991, are adopted by reference.

(e) Response to comments. A response to comments shall be issued at the time that any final

permit decision is issued. The response to comments shall be available to the public and shall:

(1) specify which provision, if any, of the draft permit has been changed in the final permit decision, and the reasons for the change; and

(2) briefly describe and respond to all significant comments on the draft permit raised during the public comment period, or during any hearings. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-165, and K.S.A. 65-166; effective, E-74-32, June 14, 1974; effective May 1, 1975; amended May 1, 1987; amended Sept. 27, 1993.)

28-16-62. Terms and conditions of permits. (a) Prohibitions. A permit shall not be issued:

(1) By the director when the regional administrator has objected to issuance of the permit under 40 CFR Section 123.44, as in effect on July 1, 1985;

(2) when comments, if any, received from neighboring states, indicate that such discharge will violate the water quality of such states. The neighboring states shall be notified in advance, pursuant to K.A.R. 28-16-61;

(3) when, in the judgment of the secretary of the army, acting through the chief of engineers, anchorage and navigation in or on any of the waters of the United States would be substantially impaired by the discharge;

(4) for the discharge of any radiological, chemical, or biological warfare agent or high level radioactive waste;

(5) for any discharge inconsistent with a plan or plan amendment approved under 33 U.S.C. Section 1288(b); or

(6) to a new source or new discharger, if the discharge from its construction or operation will cause or contribute to the violation of water quality standards.

(b) Minimum standards of design, construction and maintenance for owners and operators of water pollution control facilities. (1) Each owner or operator of a sewage system, industrial facility, commercial establishment, or agricultural activity discharging or having a potential to discharge sewage to waters of the state shall have approved water pollution control facilities. In approving and issuing permits to each existing or proposed facility, the director shall insure that such facility conforms to published minimum standards of design, construction, and maintenance. In approving and publishing minimum standards of design, construction and maintenance, the director shall

insure that such standards are at least as stringent as the requirements of 33 U.S.C. Sections 1311, 1312, 1316, 1317, 1318, and 1343.

(2) Treatment over and above minimum standards shall be required to comply with applicable water quality standards. When minimum standards do not provide compliance with the applicable water quality standards, a waste-loading allocation shall be prepared to insure that the discharge authorized is consistent with the applicable water quality standards.

(3) Each permit shall also include a schedule of compliance for any facility which is not in full compliance with minimum standards of design, construction, and maintenance and other requirements. If the discharger fails or refuses to comply with the specified schedule of compliance, the regional administrator shall be notified by the director within 30 days of such failure or refusal. If a schedule of compliance exceeds nine months, one or more interim reporting dates shall be required. No more than nine months shall elapse between interim dates contained in a schedule of compliance.

(4) Upon request of the applicant or permittee, a schedule of compliance may be modified by the director if good and valid cause exists for such revision, and if within 30 days following receipt of notice, the regional administrator does not object in writing.

(5) No later than 14 days following each interim date, the discharger shall be required to provide the director with a written notice of progress toward compliance with interim or final permit requirements.

(A) On the last day of the months of February, May, August, and November, a list of all instances, as of 30 days prior to the date of the report, of failure or refusal of a permittee to comply with interim or final requirements or to notify the director of compliance or noncompliance with each interim or final requirement shall be transmitted to the regional administrator by the director. The list shall be available to the public for inspection and copying and shall contain at least the following information with respect to each instance of noncompliance:

(i) The name and address of each noncomplying permittee;

(ii) a short description of each instance of non-compliance;

(iii) a short description of any actions or proposed actions by the permittee or the director to

comply or enforce compliance with the interim or final requirements; and

(iv) any details which tend to explain or mitigate an instance of noncompliance with an interim or final requirement.

(B) A permit may be revoked for failure to comply with any provision of an applicable schedule of compliance in conformance with K.S.A. 65-165. Nothing in this regulation shall be construed to limit the applicability of civil or criminal penalties as provided by law.

(c) Other terms and conditions of permit.

(1) Each permit for a publicly-owned treatment facility shall contain a requirement that the operating agency must notify the director of:

(A) A sewer extension or other means whereby a new introduction of pollutants is discharged to the treatment works; or

(B) a change in the volume or character or pollutants being introduced into such works by a source introducing pollutants into such works at the time the permit was issued.

(2) Each permit shall contain a requirement that the operator of the publicly-owned treatment works insure that each industrial user:

(A) Pays a charge for the user's fair share of the operating and maintenance cost of treatment and a fair share of the federal grant portion of the cost of construction of the treatment plant in accordance with any applicable provisions of the act and the federal grant agreement; and

(B) complies with applicable toxic and pretreatment guidelines as contained in the minimum standards of design, construction and maintenance.

(3) Each permit shall contain a condition which states that the discharge of any pollutant not identified and authorized by the permit or the discharge of any pollutant in a manner or quantity which differs from that stated in the application is prohibited.

(4) Each permit shall contain a condition that the discharger shall maintain in good working order and operate as efficiently as possible any facility or control system installed by the discharger to achieve compliance with the permit.

(d) Duration of permits. Each permit shall be issued for a fixed term not to exceed five years.

(e) Modification or revocation and reissuance of permits.

When the director receives any information regarding a permittee, receives a request for modification or revocation and reissuance of a permit, or

conducts a review of the permit file, the director may determine whether or not one or more of the causes listed in paragraphs (1) or (2) of this subsection for modification or revocation and reissuance or both exist. If cause exists, the permit may be modified or revoked and reissued accordingly and an updated application may be requested, if necessary. When a permit is modified, only the conditions subject to modification are reopened. If a permit is revoked and reissued, the entire permit is reopened and subject to revision and the permit is reissued for a new term.

(1) Causes for modification. The following are causes for modification of a permit. However, these causes should not be basis for revocation and reissuance of permits except when the permittee requests or agrees to such an action.

(A) Alterations. Material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance may be the basis for modification of a permit, if those alterations or additions justify application or permit conditions that are different or absent in the existing permit.

(B) Information. If the director has received new information regarding a permittee's facility or activities, the permit may be modified during its term only if the information received was not available at the time of permit issuance and would have justified the application of different permit conditions at the time of issuance.

(C) New regulations. If the standards or regulations upon which a permit was based have been changed by promulgation of amended standards or regulations after the permit was issued, the permit may be modified during its term only when:

(i) The permit condition requested to be modified was based on a promulgated effluent limitations guideline, EPA-approved or promulgated water quality standards, or secondary treatment regulations;

(ii) EPA has revised, withdrawn, or modified that portion of the regulation or effluent limitation guideline on which the permit condition was based or has approved KDHE action with regard to a water quality standard on which the permit condition was based; and

(iii) a permittee requests modification in accordance with subsection (g) of this regulation within 90 days after notice of action on which the request is based.

(D) Judicial Decisions. Any permit may be modified if:

(i) a court of competent jurisdiction has remanded and stayed EPA-promulgated regulations or effluent limitation guidelines;

(ii) the remand and stay concern that portion of the regulations or guidelines on which the permit condition was based; and

(iii) a request is filed by the permittee in accordance with subsection (g) of this regulation within 90 days of judicial remand.

(E) Compliance Schedules. Any permit may be modified if the director determines good cause exists for modification of a compliance schedule, including such causes as an act of God, a strike, flood, or materials shortage or other events over which the permittee has little or no control and for which there is no reasonable available remedy. However, in no case may a compliance schedule be modified to extend beyond a statutory deadline.

(F) Any permit may be modified when the permittee has filed a request for a variance under 33 U.S.C. Sections 301(c), 301(g), 301(h), 301(i), 301(k), or 316(a) or for “fundamentally different factors” within the time specified in 40 CFR Section 122.21 or 125.27(a), as in effect on July 1, 1985.

(G) 33 U.S.C. Section 1317(a) toxics. Any permit may be modified when required to incorporate an applicable 33 U.S.C. Section 1317(a) toxic effluent standard or prohibition.

(H) Reopener. Any permit may be modified when required by “reopener” conditions in a permit that are established for toxic effluent limitations or pretreatment programs.

(I) Net Limits. (i) Incorporation. 40 CFR Section 122.45(h), as in effect on July 1, 1985, is adopted by reference.

(ii) Any permit may be modified upon request of a permittee who qualifies for effluent limitations on a net basis under 40 CFR Section 122.45(h), as in effect on July 1, 1985.

(iii) A permit may be modified when a discharge is no longer eligible for net limitations, as provided in 40 CFR Section 122.45(h), as in effect on July 1, 1985.

(J) Pretreatment. Any permit may be modified as necessary under the compliance schedule for development of a publicly-owned treatment works pretreatment program.

(K) Failure to notify. A permit may be modified upon failure of the department to notify another state whose waters may be affected by a discharge from this state.

(L) Non-limited pollutants. When the level of discharge of any pollutant which is not limited in the permit exceeds the level which can be achieved by technology-based treatment requirements appropriate to the permittee, the permit may be modified.

(M) Notification Level.

(i) Incorporation. 40 CFR Section 122.44(f), as in effect on July 1, 1985, is adopted by reference.

(ii) A permit may be modified to establish a “notification level” as provided in 40 CFR Section 122.44(f), as in effect on July 1, 1985.

(N) Compliance Schedule. A permit may be modified to change a schedule of compliance to reflect time lost during construction of an innovative or alternate facility.

(O) When the permittee’s effluent limitations were imposed under 33 U.S.C. Section 1342(a)(1) and the permittee demonstrates operation and maintenance costs that are totally disproportionate from the operation and maintenance costs considered in the development of a subsequently promulgated effluent limitations guideline, the permit may be modified. However, the limitations shall not be less stringent than the subsequent guideline.

(P) Any permit may be modified to correct technical mistakes, including errors in calculation or mistaken interpretations of law made in determining permit conditions.

(Q) When the discharger has installed the treatment technology considered by the permit writer in setting effluent limitations imposed under 33 U.S.C. Section 1342(a)(1) and has properly operated and maintained the facilities but nevertheless has been unable to achieve those effluent limitations, the permit may be modified. In this case, the limitations in the modified permit may reflect the level of pollutant control actually achieved, but shall not be less stringent than required by a subsequently promulgated effluent limitations guideline.

(2) Causes for modification or revocation and reissuance. Any permit may be modified, or alternatively, may be revoked and reissued when:

(A) Cause exists for termination under subsection (f) of this regulation, and the director determines that modification or revocation and reissuance is appropriate; or

(B) the director has received notification of a proposed transfer of the permit.

(f) Termination of permits.

(1) A permit may be terminated during its term or a permit may be denied for:

(A) Noncompliance by the permittee with any condition of the permit;

(B) the permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time;

(C) a determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or

(D) a change in any condition that requires either a temporary or a permanent reduction or elimination of any discharge controlled by the permit.

(2) The applicable procedures in subsection (g) of this regulation shall be followed for termination of any permit.

(g) Procedures for modifications, revocation and reissuance, or termination of permits.

(1) Any permit may be modified, revoked and reissued, or terminated either at the request of any interested person, including the permittee, or upon the director's initiative. All requests shall be in writing and shall contain facts or reasons supporting the request.

(2) If the director decides that the request is not justified, the requester shall be provided with a brief written response giving a reason for the decision. Denial of requests for modification, revocation and reissuance, or termination shall not be subject to public notice, comment, or hearings. Denials by the director may be informally appealed to the secretary by a letter briefly setting forth the relevant facts. The secretary may direct the director to begin modification, revocation and reissuance, or termination proceedings under paragraph (3) of this subsection. The appeal shall be considered denied if the secretary takes no action on the letter within 60 days after receiving it. This informal appeal shall be a prerequisite to seeking judicial review of agency action in denying a request for modification, revocation and reissuance, or termination.

(3)(A) If the director tentatively decides to modify or revoke and reissue a permit under subsection (e) of this regulation, the director shall prepare a draft permit under K.A.R. 28-16-60 incorporating the proposed changes. The director may request additional information, and in the case of a modified permit, may require the submission of an updated application. A new application for a permit shall be submitted for the reissuance of a revoked permit.

(B) In a permit modification under this regulation, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this section, the entire permit shall be reopened just as if the permit had expired and was being reissued. During any revocation and reissuance proceeding, the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.

(4) If the director tentatively decides to terminate a permit under subsection (f) of this regulation, the director shall issue a notice of intent to terminate. A notice of intent to terminate is a type of draft permit which follows the same procedures as any draft permit prepared under K.A.R. 28-16-60.

(h) Transmission to regional administrator of permits. Upon issuance of any permit, a copy of the permit shall be forwarded to the regional administrator by the director.

(i) Reissuance of permits.

(1) At least 180 days prior to expiration of a permit, a permit holder wishing to renew the permit shall file an application, as required by the director.

(2) Permits shall not be reissued unless:

(A) The discharger is in compliance with or has substantially complied with all the terms, conditions, requirements and schedules of compliance contained in the existing permit;

(B) The discharger files an application and other necessary data as required by the director; and

(C) The discharge is consistent with applicable minimum standards of design, construction, and maintenance and water quality standards.

(3) The notice and hearing procedure for reissuance shall be the same as for the issuance of new permits. (Authorized by K.S.A. 65-171d, as amended by L. 1986, Ch. 204, Sec. 3, Sec. 6 and L. 1986, Ch. 201, Sec. 22; implementing K.S.A. 65-165, 65-166; effective, E-74-32, June 14, 1974; effective May 1, 1975, amended May 1, 1987.)

28-16-63. Monitoring. I. An appropriate monitoring program shall be included in all permits. The program may require the discharger to install, use and maintain at his expense, adequate monitoring equipment or methods (including, where appropriate, biological monitoring methods).

II. Any discharge which 1) is not a minor discharge, 2) the regional administrator requests in writing to be monitored, or 3) contains a toxic

pollutant for which an effluent standard has been established shall be monitored by the discharger for at least the following:

- (A) Flow (in gallons per day);
- (B) Pollutants which are subject to reduction or elimination under the requirements, pollutants which would have a significant impact on the quality of the receiving waters, and pollutants specified by the regional administrator; and
- (C) Each effluent flow or pollutant shall be monitored at intervals sufficiently frequent to yield data which reasonably characterize the nature of the discharge. Variable effluent flows and constituent levels shall be monitored at more frequent intervals.

III. Recording.

(A) The discharger shall record the results of all monitoring and shall include for all samples:

- (1) The date, exact place, time of sampling, and who took the sample;
- (2) The dates analyses were performed and who performed the analyses;
- (3) Analytical techniques/methods used; and
- (4) The results of such analyses.

(B) The discharger shall be required to retain for a minimum of three years any records of monitoring activities and results, including all original strip chart recording and calibration and maintenance records. The period of retention shall be extended during the course of any unresolved administrative enforcement action or litigation regarding the discharge of pollutants by the discharger or when ordered by the director.

IV. Reporting.

(A) Monitoring results shall be reported on forms required by the director and forwarded to the director at specified time periods of not less than once per year.

(B) The director shall require the use of monitoring, recording, and reporting procedures which at a minimum are at least as stringent as any national monitoring, recording, and reporting requirements specified by the administrator in regulations issued pursuant to the act. (Authorized by K.S.A. 1974 Supp. 65-165, 65-166, 65-171d; effective, E-74-32, June 14, 1974; effective May 1, 1975.)

28-16-65. (Authorized by K.S.A. 12-3710 et seq.; effective, E-74-33, June 21, 1974; effective, E-76-20, May 1, 1975; effective May 1, 1976; revoked May 10, 1996.)

28-16-67. (Authorized by K.S.A. 12-3711; effective, E-78-4, Dec. 1, 1977; effective May 1, 1978; revoked May 10, 1996.)

ESTABLISHMENT AND ADMINISTRATION OF CRITICAL WATER QUALITY MANAGEMENT AREAS

28-16-69. Definitions. (a) Agricultural pollutants means sediments, organic material or microorganisms from cultivated fields, pastures or grazing land; pesticides; runoff from feedlots or other animal holding areas; fertilizers; or minerals contained in irrigation return flow.

(b) Critical water quality management area means a watershed, or a portion of a watershed, in which application of minimum state or national wastewater and water quality management practices and procedures cannot be reasonably expected to result in attainment of water quality goals, attainment of water quality standards, protection of resources of the state, prevention of excessive sediment deposition in stream beds, lakes or reservoirs, or prevention of destruction of fishery habitat; or an area in which additional treatment and control of pollutants can result in additional cost effective benefits.

(c) Critical area water quality management plan means a plan providing for the control of all pollutant sources within the critical area.

(d) Endangered species means those species of wildlife indigenous to the state whose existence is in immediate jeopardy due to a combination of natural or man-made factors.

(e) Kansas water quality management plan means the plan approved by senate concurrent resolution 1640 dated April 2, 1979.

(f) Rural clean water program means a program for the control of wastes from agricultural sources for improved water quality, promulgated in conformity with Section 208(j) (1)-(9) of the federal water pollution control act as amended, 33 U.S.C. 166, *et seq.*

(g) Rural clean water program coordinating committee means the state administrative committee, established pursuant to U.S. department of agriculture regulations, to administer the rural clean water program.

(h) Threatened species means those species of wildlife indigenous to the state whose existence may become endangered by continued deterioration due to natural or man-made forces.

(i) Water quality standards means standards found in K.A.R. 28-16-28 and 28a. (Authorized by K.S.A. 65-171a, 65-171d, 65-3301, 65-3303, 65-3304, 65-3305; effective May 1, 1981.)

28-16-70. Designation of critical water quality management area. (a) Watersheds or portions of watersheds shall be considered by the secretary for designation as critical water quality management areas because of pollutant sources which cause, or may reasonably be expected to cause, damages to resources of the state; public nuisance or health hazards; destruction of fishery habitat; excessive deposition of sediments on river bottoms, lakes or reservoirs; additional risk to threatened or endangered fish or wildlife; or violation of water quality standards.

(b) The secretary shall initiate such action on the secretary's initiative, at the request of other state or federal agencies, local governments, or through public initiative.

(c) The secretary shall give public notice of intent to consider an area for designation as a critical water quality management area. The secretary shall consider all responses to the public notice in determining whether to proceed with the evaluation of the candidate area.

(d) Any person, unit of local government, or state or federal agency proposing that an area be designated as a critical water quality management area shall submit a proposal to the secretary incorporating the following information: a map showing the boundaries of the proposed area; a brief discussion of the nature of the damages that are occurring or which may reasonably be expected to occur; a brief discussion of those pollutant sources believed to be responsible for the observed or potential damages; a brief discussion of the public support for, or likely objection to, a critical water quality management designation; and the name, title, and authority of the individual or agency submitting the proposal.

(e) Prior to the designation of a critical water quality management area the secretary shall:

(1) Evaluate all pollutant sources and the extent to which these pollutant sources are or may be reasonably expected to cause violation of water quality standards, damages to resources of the state, nuisance conditions, hazards to the public health, excessive sedimentation, destruction of fisheries habitat, or additional risk to threatened or endangered fish or wildlife species.

(2) Evaluate all data and consider public comments in determining the technical and economic feasibility of simultaneous control of all pollutant sources. When determining the technical and economic feasibility of agricultural pollutant reduction, the secretary shall consult with the state conservation commission, the affected conserva-

tion district(s), and other knowledgeable sources. In conducting the evaluation, the secretary may invite and give consideration to comments from individuals, interest groups, federal agencies, other state agencies, and affected local government.

(f) If the secretary concludes, as a result of the evaluations, that the establishment of a critical water quality management area is necessary and pollutant control is technically and economically feasible, the secretary shall prepare a proposed management plan setting forth an implementation schedule for control of each pollutant source, an analysis of the costs and benefits of the proposed management plan, and the boundaries of the proposed area.

(g) The secretary shall give public notice of the availability of the proposed management plan, make copies available for review, and hold a public hearing on the proposed designation.

(h) The secretary, on the basis of the evaluation and public hearing, may designate an area as a critical water quality management area, and give public notice of the designation through publication in a newspaper having general distribution in the county or counties in which the designated area is located. (Authorized by K.S.A. 65-171a, 65-171d, 65-3301, 65-3303, 65-3304, 65-3305; effective May 1, 1981.)

28-16-71. Administration of critical water quality management area. (a) The secretary shall establish a local advisory committee to assist in the administration of each designated area. If pollutant reduction in the area involves agricultural pollutant reduction, the area shall be submitted as a candidate project to the state rural clean water program coordinating committee for funding under the rural clean water program.

(b) All permits issued by the secretary for the control of pollutants, the establishment of waste disposal sites, the construction or expansion of water supply or sewerage systems or the establishment of sanitation zones or other measures necessary for the control of pollutants shall be consistent with the adopted plan.

(c) The secretary shall prepare an annual report for each designated area and shall make copies of the report available to residents of the area. The report shall evaluate the effectiveness of control measures, including the approximate costs, effects on water quality and resources of the state, and a brief summary of any public input related to administration of the area.

(d) The secretary may terminate designation of any designated critical water quality management area upon determination that such designation is not needed for protection of water resources, or that the controls are not technically or economically practical, or there is substantial public opposition. The secretary shall give public notice of intent and termination shall not be effective until sixty (60) days after such public notice. (Authorized by K.S.A. 65-171a, 65-171d, 65-3301, 65-3303, 65-3304, 65-3305; effective May 1, 1981.)

**DEVELOPMENT OF COUNTYWIDE
WASTEWATER MANAGEMENT PLANS**

28-16-76. (Authorized by K.S.A. 65-3301, K.S.A. 1979 Supp. 65-3303, 65-3305, 65-3308; effective May 1, 1980; revoked March 23, 2001.)

28-16-77. (Authorized by K.S.A. 65-3301, K.S.A. 1979 Supp. 65-3308, 65-3309; effective May 1, 1980; revoked March 23, 2001.)

28-16-78. (Authorized by K.S.A. 65-3301, K.S.A. 1979 Supp. 65-3308, 65-3309, 65-3310; effective May 1, 1980; revoked March 23, 2001.)

28-16-79. (Authorized by K.S.A. 65-3301, K.S.A. 1979 Supp. 65-3308, 65-3309, 65-3310; effective May 1, 1980; revoked March 23, 2001.)

28-16-80. Elements of plan. (a) Each plan shall incorporate the following elements:

(1) The projected population development of the county for a twenty-five (25) year period beginning June 30, 1980, with subprojections for each five (5) year increment;

(2) Description of each existing sewerage system including treatment plants, major pumping stations, interceptors, and areas of combined sewers, including the age, size and capacity and ownership of each major unit;

(3) An evaluation of the projected ability of existing and projected sewerage systems to meet water quality standards (K.A.R. 28-16-28 and K.A.R. 28-16-28a);

(4) The schedule whereby new sewerage systems will be constructed or existing sewerage systems expanded to provide service for new areas. The schedule shall be such that:

(A) no new permanent treatment facilities will be projected in areas where sewer systems exist unless there is reasonable evidence that the waste to be treated is incompatible or that the existing system would be overloaded;

(B) temporary wastewater treatment facilities may be provided in areas without sewer service, and in which there is a reasonable potential for the construction of new interceptors;

(C) new treatment facilities will be provided in areas where no treatment facilities exist and interceptors are not within a reasonable distance or are not economically feasible;

(D) simplicity, reliability and energy efficiency will be emphasized in the design of treatment systems;

(E) the proliferation of very small waste treatment systems will be discouraged in metropolitan areas; and,

(F) agricultural and municipal waste disposal irrigation systems will be encouraged where practicable and will take into account the maintenance of minimum flow levels in receiving waters and established water rights;

(5) A description of each community water delivery system, including sources of supply, major storage facilities, major lines, pumping stations, and treatment plants;

(6) The schedule whereby new water supply systems will be constructed or existing systems expanded to provide service for those areas in which additional population development is projected;

(7) A description of the mechanisms to be used to coordinate the provision of water delivery and sewerage services in those areas in which further population growth or industrial development is projected;

(8) A land use map indicating those areas in which on-site residential wastewater treatment facilities may be used, a description of the permit and inspection system used to regulate such developments, and the conditions imposed to assure satisfactory operation over a reasonable period of time;

(9) Copies of agreements between units of local government necessary to assure the orderly construction of new or extended sewerage or water delivery facilities;

(10) A land use map showing all significant waterways, flood plains and floodways, parks, lakes and reservoirs, recreational areas, sanitation zones, and critical water quality management areas and clearly establishing the relationship between these land uses and existing and projected water delivery and sewerage systems;

(11) Any predicted community developments which will have a major impact on the demands for water supply or sewerage service;

(12) The location of existing industrial waste treatment facilities, an assessment of potential waste loads and the relationship of these loads to those imposed by municipal discharges;

(13) The estimated costs of projected improvements for sewerage system extensions during the first five (5) year period of the twenty-five (25) year plan;

(14) An evaluation of the extent to which wastewater may be used for municipal or agricultural irrigation and the extent to which municipal wastewater may be reclaimed for industrial use;

(15) An evaluation of the extent to which urban stormwater runoff may contribute to violation of water quality standards, (K.A.R. 28-16-28 and K.A.R. 28-16-28a);

(16) Description and evaluation of current and projected sludge disposal practices and facilities;

(17) Identification of any relationships between the projected sewerage plans and county air quality maintenance plans; and

(18) A plan and schedule for review and updating of the plan at five (5) year intervals.

(b) The plan shall be based, insofar as practicable on available studies or reports and which may be incorporated by reference.

(c) Each plan shall, as appropriate, identify any water delivery or sewerage problems, the solution of which requires coordination with an adjacent county, and the mechanisms to be used to achieve this coordination.

(d) The committee shall hold one (1) or more public hearings on the plan and shall submit to the secretary a report of such hearings at the time it files the plan. (Authorized by K.S.A. 65-3301 and K.S.A. 1979 Supp. 65-3308, 65-3309, 65-3310; effective May 1, 1980.)

28-16-81. Administration of approved plan. (a) Any plan approved by the secretary will become a part of the Kansas water quality management plan. Applicants for effluent permits will be subject to section 208(e) of the federal water pollution control act, 33 U.S.C. 466, *et seq.*, and applicants for municipal construction grants will be subject to section 208(d) of the federal water pollution control act as amended.

(b) Permits issued by the secretary for the operation of sewerage facilities will be consistent with the plan.

(c) Permits issued by the secretary for new or extended sewerage systems will be consistent with the plan.

(d) Comments by the secretary on federally-funded projects pursuant to bureau of budget circular A-95 will be consistent with the plan.

(e) Comments made by the secretary on projects proposed by other state agencies will be consistent with the plan. (Authorized by K.S.A. 65-3301 and K.S.A. 1979 Supp. 65-3303, 65-3304, 65-3308, 65-3310; effective May 1, 1980.)

28-16-82. (Authorized by K.S.A. 65-3301, K.S.A. 1979 Supp. 65-3303, 65-3304, 65-3308, 65-3310, 65-3313; effective May 1, 1980; revoked March 23, 2001.)

PRETREATMENT

28-16-83. Entities regulated. The provisions of K.A.R. 28-16-84 to 28-16-98, inclusive, and any amendments to those regulations, shall apply to:

(a) pollutants from nondomestic sources which are subject to one or more pretreatment standards and which are indirectly discharged, or are otherwise introduced by any means, into any publicly owned treatment works (POTW);

(b) any POTW which receives wastewater from sources subject to one or more pretreatment standards; and

(c) any new or existing source which is subject to one or more pretreatment standards. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-84. Objectives of general pretreatment regulations. 40 CFR § 403.2, as in effect on July 1, 1986, is adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-85. Definitions. 40 CFR § 403.3, as in effect on July 1, 1986, is adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-86. Local laws not superceded. The provisions of K.A.R. 28-16-83 to 28-16-98, inclusive, shall not supercede any pretreatment requirements, including any standards or prohibitions, established by any local law as long as the local requirements are not less stringent than any set forth in the national pretreatment standards or other requirements or prohibitions established by the state or federal government. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-87. National pretreatment standards; prohibited discharges. Subsections (a) to (e), inclusive, of 40 CFR § 403.5, as in effect on July 1, 1986, are adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-88. National pretreatment standards; categorical standard. 40 CFR § 403.6, as in effect on July 1, 1986, is adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-89. Revision of categorical pretreatment standards to reflect POTW removal of pollutants. (a) 40 CFR § 403.7, as in effect on July 1, 1986, is adopted by reference, except that in lieu of § 403.7(b)(3) the following shall apply: “(3) The POTW shall analyze the samples for pollutants in accordance with the analytical techniques prescribed in 40 CFR part 136, as in effect on July 1, 1986. Where 40 CFR part 136 does not contain sampling and analytical techniques for the pollutant in question, or where the secretary determines that the part 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed using validated analytical methods or other appropriate sampling and analytical procedures approved by the secretary. Alternate sampling and analytical techniques suggested by the POTW or other persons will be considered by the secretary.”

(b) 40 CFR part 136, as in effect on July 1, 1986, is adopted by reference (see 49 FR 43234, 50 FR 690 and 51 FR 23692). (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1986; amended May 1, 1987.)

28-16-90. POTW pretreatment programs; developed by POTW. 40 CFR § 403.8, as in effect on July 1, 1986, is adopted by reference, except in lieu of paragraph (f)(1)(vii) the following shall apply: “(vii) Comply with the confidentiality requirements of the Kansas open records act.” (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-91. POTW pretreatment programs. Any municipality (POTW) with a Kansas water pollution control permit may be required to develop a local pretreatment program. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-92. POTW pretreatment programs or authorization to revise pretreatment standards; submission for approval. 40 CFR § 403.9, as in effect on July 1, 1986, is adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-93. Approval procedures for POTW pretreatment programs and POTW revision of categorical pretreatment standards. 40 CFR § 403.11, as in effect on July 1, 1986, is adopted by reference. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-94. Reporting requirements for POTW's and industrial users. (a) 40 CFR § 403.12, as in effect on July 1, 1986, is adopted by reference, except that:

(1) in lieu of § 403.12(b)(5)(vi) the following shall apply: “(vi) Sampling and analysis shall be performed in accordance with the techniques prescribed in 40 CFR part 136, as in effect on July 1, 1986. Where 40 CFR part 136 does not contain sampling and analytical techniques for the pollutant in question, or where the secretary determines that the part 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed using validated analytical methods or other appropriate sampling and analytical procedures approved by the secretary. Alternate sampling and analytical techniques suggested by the POTW or other persons will be considered by the secretary.”

(2) in lieu of § 403.12(g) the following shall apply: “(g) Monitoring and analysis to demonstrate continued compliance. The reports required in paragraphs (b)(5), (d), and (e) of this section shall contain the results of sampling and analysis of the discharge, including the flow and the nature and concentration, or production and mass where requested by the control authority, of pollutants contained therein which are limited by the applicable pretreatment standards. The frequency of monitoring shall be as prescribed in the applicable pretreatment standard. All analyses shall be performed in accordance with 40 CFR part 136, as in effect on July 1, 1986. Where 40 CFR part 136 does not include sampling or analytical techniques for the pollutants in question, or where the secretary determines that the part 136 sampling and analytical techniques are inappropriate for the

pollutant in question, sampling and analyses shall be performed using validated analytical methods or other sampling and analytical procedures approved by the secretary. Alternate sampling and analytical techniques suggested by the POTW or persons will be considered by the secretary.”

(3) in lieu of § 403.12(k) the following shall apply: “(k) Penalties for providing false information. Any person who willfully provides false information on any report required by subsections (b), (d), (e), or (h) of 40 CFR § 403.12 shall be subject to the penalties imposed under K.S.A. 65-170c, K.S.A. 65-170d and K.S.A. 1985 Supp. 21-3805, and any amendments thereto.”

(b) 40 CFR part 136, as in effect on July 1, 1986, is adopted by reference (see 49 FR 43234, 50 FR 690, and 51 FR 23692). (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1986; amended May 1, 1987.)

28-16-95. Variances from categorical pretreatment standards for fundamentally different factors. 40 CFR § 403.13, as in effect on July 1, 1986, is adopted by reference, except that: (a) in lieu of § 403.13(b), the following shall apply: “(b) A fundamentally different factors variance may be requested under this section by any interested person believing that factors relating to an industrial user are fundamentally different from the factors considered during development of a categorical pretreatment standard applicable to that user and that the existence of those factors justifies a different discharge limit than specified in the applicable categorical pretreatment standard. Such a variance request may be initiated by the secretary. A fundamentally different factors variance is not available for any toxic pollutant controlled in a categorical pretreatment standard; and”

(b) in lieu of § 403.13(c)(1)(ii), the following shall apply: “(ii) Factors relating to the discharge controlled by the categorical pretreatment standard are fundamentally different from the factors considered in establishing the standards; and.” (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1986; amended May 1, 1987.)

28-16-96. Confidentiality of information. Any information submitted to the department of health and environment shall be subject to disclosure or nondisclosure as provided in the Kansas open records act. (Authorized by and imple-

menting K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-97. Net/Gross calculations. 40 CFR § 403.15, as in effect on July 1, 1986, is adopted by reference, except that each reference to the enforcement division director, regional enforcement officer, water management division director or EPA shall be deemed to refer to the secretary. Nothing in this regulation shall relieve any person of the duty to obtain approval from the U.S. environmental protection agency. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1986; amended May 1, 1987.)

28-16-98. Upset provisions. 40 CFR § 403.16, as in effect on July 1, 1986, is adopted by reference, except that each reference to the agency shall be deemed to refer to the Kansas department of health and environment. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1985; amended May 1, 1987.)

28-16-110. Definitions. For the purposes of the regulations in this article, the following words, terms and phrases are defined as follows:

(a) “Best practicable waste treatment technology (BPWTT)” means a cost-effective technology that can treat wastewater, including combined sewer overflows and nonexcessive infiltration and inflow, to meet the applicable provisions of Kansas water supply and sewage statutes, K.S.A. 65-161 to 65-171x; water pollution control statutes, K.S.A. 65-3301 to 65-3313; and the federal clean water act as amended on or before January 1, 1989, 33 USC 1251 *et seq.*

(b) “Department” means the Kansas department of health and environment.

(c) “Equivalency” means that portion of the Kansas water pollution control revolving fund which was directly made available by the federal government.

(d) “Equivalency project” means that portion of the project cost which is funded from the equivalency portion of the Kansas water pollution control revolving fund.

(e) “Facilities planning” means the necessary plans and studies directly related to the project financed from the Kansas water pollution control revolving fund. The content of a facilities plan shall be as described in the federal register 40 CFR 35.2030(b), as in effect on January 1, 1989.

(f) “Infiltration” means water other than sewage that enters a sewerage system from the ground

through defective pipes, pipe joints, connections, or manholes.

(g) "Excessive infiltration" means the quantity of flow which is more than 120 gallons per capita per day or the quantity of infiltration which could be economically and effectively eliminated from a sewer system as determined in a cost-effectiveness analysis. Flow rates more than 120 gallons per capita per day when justified by water use records are not considered to be excessive infiltration.

(h) "Inflow" means water other than sewage that enters a sewerage system. Inflow does not include infiltration.

(i) "Excessive inflow" means a rainfall-induced flow rate in excess of 275 gallons per capita per day.

(j) "Loan applicant" means any county, city, sewer district, other public agency, or any combination thereof, created by or pursuant to Kansas statutes, filing an application for a loan pursuant to the Kansas water pollution control fund act of 1988.

(k) "Loan agreement" means an executed contract between a loan recipient and the secretary confirming the purpose of the loan, the amount and terms of the loan, the schedule of loan payments and repayments and any other agreed upon conditions set forth by the secretary.

(l) "Minority business enterprise" means a business certified as a minority business enterprise by a state or federal agency based on the authority of state or federal statutes.

(m) "Project" means the scope of work for which a loan is awarded.

(n) "Secretary" means the secretary of Kansas department of health and environment.

(o) "Sewerage" means the removal and treatment of surface water, sewage and other wastewater by sewers, a system of sewers, wastewater treatment processes or any other means such as recycling and reclamation.

(p) "Value engineering" means a cost control technique which uses a systematic approach to identify unnecessarily high costs in a project without sacrificing the reliability or efficiency of the project.

(q) "Women's business enterprise" means a business certified as a women's business enterprise by a state or federal agency based on the authority of state or federal statutes.

(r) "Wastewater treatment works" means any device, or system for the storage, treatment, recycling, and reclamation of sewage. These include:

(1) intercepting sewers, outfall sewers, sewage collection systems, pumping stations, facilities for

sewage treatment and disposal of residues resulting from treatment, power and other equipment, their appurtenances, extensions, improvements, remodeling, additions and alterations thereof; and

(2) any works, including site acquisition of the land, that will be an integral part of the treatment process or are used for ultimate disposal of residues resulting from treatment. (Authorized by and implementing K.S.A. 1988 Supp. 65-3323; effective May 29, 1989.)

28-16-112. Fund use eligibility. (a) The fund shall be used only to finance all or any part of the following activities:

(1) loans to loan applicants for the planning, design, and construction of publicly-owned wastewater treatment works; and

(2) loans to loan applicants with taxing authority for the implementation of nonpoint source pollution control management programs developed in conformance with section 319 of the federal clean water act as amended on or before January 1, 1989, 33 USC 1251 *et seq.*

(b) Each project eligible to receive loans shall appear on the project priority list prepared by the department. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-113. Interest rate. Each loan shall bear interest for the entire life of the loan at a rate set by the secretary. The secretary may also set fees for servicing the loans. The interest rate together with the servicing fee shall be an amount equal to sixty percent of the previous three months' average "bond buyers 20 bond index" as published on the first Monday of each week of the preceding three months. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3326; effective May 29, 1989.)

28-16-114. Repayment of loans. (a) All principal and interest shall be repaid in accordance with the terms and conditions of the executed loan agreement. Principal and interest payments shall begin not later than two years after receipt of the first loan installment and in no case later than one year following the completion of the project. Repayment of the loan shall not exceed a 20-year repayment period as agreed upon in the loan agreement. Project completion is defined as initiation of operation or capability to initiate operation.

(b) Prepayment of principal in whole or part may be made in accordance with the terms and

conditions of the executed loan agreement. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-115. Dedicated loan repayment source. (a) Each loan recipient shall adopt one or more dedicated sources of revenue for repayment of the loan including principal and interest. The dedicated sources of revenue may be in the form of user charges, ad valorem taxes, special tax assessments, another permanent source of revenue or some combination of these sources. Each dedicated source of revenue shall be legally available to the loan recipient over the life of the loan repayment obligation and pledged to the repayment of the loan. Each dedicated source of revenue shall be approved by the secretary.

(b) Each loan recipient shall conduct a revenue source review every fifth year following the date of the loan agreement during the entire life of the loan repayment obligation and shall implement the new revenue rates as approved by the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3326 and 65-3327; effective May 29, 1989.)

28-16-116. Failure to repay loan on schedule. Upon failure of a loan recipient to pay one or more installments of the loan repayment on schedule, the governing body of the loan recipient shall be consulted by the secretary, and thereafter the governing body shall adopt charges, as set by the secretary, to be levied against users of the project. These charges shall remain in effect until the full amount of the loan, including principal and interest, has been repaid. The governing body of each loan recipient shall collect any charges established by the secretary or required by the secretary and shall expeditiously forward the collected moneys to the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3327; effective May 29, 1989.)

28-16-117. Double benefits. (a) Projects receiving construction grants under the federal clean water act shall not be eligible to receive loans under the Kansas water pollution control revolving fund act for the nonfederal shares of the projects costs.

(b) Loans shall be made only for the publicly-owned portion of sewerage projects.

(c) If a project receives a loan for planning, preparation of design and construction docu-

ments or both, and subsequently receives a federal grant allowance for the same purposes, the loan recipient shall repay the loan to the extent of the allowance received by not later than 30 days from the receipt of the allowance. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-118. Project eligibility. (a) In order to receive a loan, each sewerage facility equivalency project shall comply or be consistent with:

(1) The best practicable waste treatment technology requirements defined in K.A.R. 28-16-110(a);

(2) The facilities planning process defined in K.A.R. 28-16-110(e);

(3) The type of projects described in K.A.R. 28-16-119;

(4) The alternative ultimate waste disposal procedure described in K.A.R. 28-16-120;

(5) The infiltration and inflow requirements described in K.A.R. 28-16-121;

(6) The alternative and innovative treatment provisions described in K.A.R. 28-16-122;

(7) The open space recreation requirement described in K.A.R. 28-16-123;

(8) The capital improvement plan described in K.A.R. 28-16-124; and

(9) The water quality management plan described in K.A.R. 28-16-125.

(b) In order to receive a loan, each nonpoint source pollution control equivalency project shall comply or be consistent with the nonpoint source pollution control management plan described in K.A.R. 28-16-126. (Authorized by and implementing K.S.A. 1988 Supp. 65-3323; effective May 29, 1989.)

28-16-119. Eligible project types. (a) An equivalency loan may be granted for:

(1) Projects providing secondary treatment, any part of secondary treatment or any cost-effective alternative to secondary treatment;

(2) Projects providing a treatment process or any part of a treatment process which is more stringent than secondary treatment or cost-effective alternatives;

(3) Other wastewater treatment works;

(4) New interceptors and their appurtenances;

(5) Excessive infiltration or inflow correction projects; or

(6) Other sewerage facility projects, and nonpoint source pollution control management plan implementation projects, and groundwater qual-

ity protection projects. These types of projects shall not exceed 20% of equivalency funds, and require the specific designation of the governor.

(b) Any sewerage project or nonpoint source pollution control project may receive a loan from the nonequivalency portion of the Kansas water pollution control revolving fund upon approval of the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and K.S.A. 1988 Supp. 65-3324; effective May 29, 1989.)

28-16-120. Alternative ultimate disposal. Each loan applicant for a sewerage facility project shall evaluate alternative methods and technologies for the reuse or ultimate disposal of treated wastewater and residue material resulting from the waste treatment process. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-121. Infiltration and inflow. Each loan applicant for a sewerage facility project shall demonstrate that: (a) the existing sewage collection systems related to the proposed project are not subject to excessive infiltration or inflow; or

(b) the loan applicant has been implementing an effective ongoing infiltration and inflow reduction program for those sewage collection systems. (Authorized by K.S.A. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-122. Alternative and innovative treatment. Each loan applicant for a wastewater treatment project shall demonstrate the consideration of cost effective alternative and innovative wastewater treatment processes and techniques during the planning, selection and design of the project. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-123. Open space recreation. Each loan applicant shall analyze and document the potential open space and recreation opportunities associated with the project. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-124. Capital improvement plan. Each loan applicant for a sewerage facility project shall submit to the secretary, with the loan application, a capital improvement financing plan for

the applicant's projected sewerage facility needs. The plans shall cover not less than a five-year period and shall be approved by the governing body of the entity. The capital improvement financing plan shall be reviewed and kept current by the governing body during the entire life of the loan repayment obligation. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-125. Water quality management plan. Each sewerage facility project eligible for a loan shall be consistent with the applicable water quality management plan, the county-wide wastewater management plan or both, and the loan applicant shall be a designated wastewater management agency within the management plan. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-126. Nonpoint source pollution control management plan. Each nonpoint pollution control or groundwater quality protection project shall be consistent with applicable nonpoint pollution source control management planning approved by the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-127. Sewer use ordinance. Each loan applicant for a sewerage facility project shall develop, and subsequent to the secretary's approval, adopt a sewer use ordinance or other legally binding document to protect the integrity of the entire wastewater works system by: (a) requiring the exclusion of excessive infiltration and inflows from the treatment works;

(b) prohibiting toxic concentrations of toxic materials in wastewater introduced into the treatment works; and

(c) prohibiting other pollutants in amounts or concentrations that:

(1) endanger public safety or the physical integrity of the treatment works; or

(2) cause violation of effluent or water quality limitations or cause residue or sludge processing or disposal problems. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-128. User charge system. Each loan applicant for a sewerage facility project shall develop, and subsequent to the secretary's review

and approval, adopt a user charge system which shall produce adequate revenues for operation and maintenance of the entire wastewater works, including minor replacement. The user charge system shall be based on either actual use of the wastewater works, ad valorem taxes or a combination of the two. An ad valorem tax may only be used if that form of dedicated user charge had been in place prior to the initiation of the proposed project. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322 and 65-3326; effective May 29, 1989.)

28-16-129. Value engineering. Each loan recipient for a sewerage project shall conduct value engineering during the design phase of the project if the total estimated project cost exceeds \$10 million. The value engineering recommendations shall be implemented to the maximum extent possible as approved by the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-130. Project certification. Each loan recipient shall certify to the secretary whether the project meets the project's performance standards on the date one year after the initiation of operations of the project. The loan recipient shall be responsible for assuring timely correction and compliance, including recertification in case the initial certification was a negative declaration. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-131. Procurement. Each loan recipient shall follow applicable state procurement laws and regulations and procedures established by the secretary. The approval of the secretary is required prior to procurement. (Authorized by and implementing K.S.A. 1988 Supp. 65-3323; effective May 29, 1989.)

28-16-132. Fair labor standards. Bidding documents for each wastewater treatment works equivalency project shall include the prevailing wage rates established for the locality by the U.S. department of labor under the federal Davis-Bacon act. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-133. Small minority and women's business enterprises. Each loan recipient for a wastewater treatment works equivalency project

shall assure that affirmative steps were taken to utilize small, minority and women's businesses as sources of supplies, construction and services. Affirmative steps shall be documented and submitted to the department. Project-specific goals may be set by the secretary. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-134. Projects documents. (a) Each loan applicant for a sewerage facility projects shall submit, for the secretary's review and approval, the following documents:

(1) A completed loan application on application forms furnished by the department;

(2) A facilities plan that establishes the need for the project;

(3) Complete design plans, specifications, and construction bidding documents, including detailed cost estimates necessary for competitive bidding, and projected construction and payment schedules;

(4) A plan of operation, including an overall project completion schedule, annual operating cost projections for a minimum of five years, a description of the financial management system, and projected revenues to operate and maintain the entire facility. Revenue projections shall also include the loan repayment obligations; and

(5) A facility operations manual, which shall be submitted before 90% of the project is completed.

(b) Each loan applicant for a nonpoint source pollution control management plan implementation or groundwater quality protection project shall submit, for the secretary's review and approval, the following documents:

(1) A completed loan application on application forms furnished by the department;

(2) Planning documents or any assessment which establishes the need for the project;

(3) Documents needed to plan the construction of the project.

(4) A plan of operation and maintenance to assure project performance for the design life of the project; and

(5) A binding assurance that adequate financial resources will be available for operation and maintenance of the project during the life of the project. (Authorized by and implementing K.S.A. 1988 Supp. 65-3323; effective May 29, 1989.)

28-16-135. Financial capability. As part of the loan application, each loan applicant shall

demonstrate and certify to the secretary that the applicant has the financial capability to repay the loan and to cover the costs of operation and maintenance of the entire system of which the proposed project is an integral part. The financial assessment shall cover the life of the loan obligations and consider, as a minimum, changes in economic and population growth, existing in debt obligations, revenues, project costs, and effects on user charge rates. (Authorized by and implementing K.S.A. 1988 Supp. 65-3323; effective May 29, 1989.)

28-16-136. Public participation. Each loan recipient shall conduct a minimum of one public meeting and one public hearing prior to execution of the loan agreement.

(a) A public meeting shall be conducted during the preparation of the facilities plan, nonpoint source pollution control management plan or groundwater quality protection plan to discuss project alternatives. Public notice shall be given not less than 15 days before the public meeting.

(b) Prior to the adoption by the governing body and submission to the secretary for approval of the facilities plan, nonpoint source pollution control management plan or groundwater quality protection plan, a public hearing shall be conducted. Public notice shall be given not less than 30 days before the public hearing. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-137. Environmental review. (a) The Kansas environmental review procedure for the Kansas water pollution control revolving loan program, dated February, 1989 is adopted by reference as the required environmental procedure for an equivalency project.

(b) For an equivalency project, 40 CFR, 6.508(a), 6.511(b) and 6.512 as in effect on July 1, 1988, are adopted by reference.

(c) Those members of the public who participate in the environmental review process shall have the right to appeal the decisions made within that process. All such appeals shall be conducted pursuant to the Kansas administrative procedures act and the act for judicial review set forth in K.S.A. 1988 Supp. 77-501 et seq. and K.S.A. 77-601 et seq., respectively.

(d) When used in any provision adopted from 40 CFR Part 6, references to "EPA" shall be replaced with the Kansas department of health and environment; "grant" shall be replaced with loan

agreement; "grantee" shall be replaced with applicant. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989; amended, T-28-10-17-89, Oct. 17, 1989; amended Dec. 26, 1989.)

28-16-138. Project accounts. Each loan recipient shall maintain project accounts in accordance with or similar to generally accepted government accounting standards defined in the 1988 edition of the Government Accounting, Auditing, and Financial Reporting manual issued by the Government Finance Officers Association. (Authorized by K.S.A. 1988 Supp. 65-3323; implementing K.S.A. 1988 Supp. 65-3322; effective May 29, 1989.)

28-16-150. Scope. The provisions of K.A.R. 28-16-150 through 28-16-154, inclusive and any amendments to those regulations, shall apply to the issuance of each general permit for water pollution control. (Authorized by K.S.A. 65-165; implementing K.S.A. 65-165 and K.S.A. 65-171d; effective Sept. 27, 1993.)

28-16-151. Definitions. 40 CFR 122.2 as in effect on July 1, 1991 is adopted by reference. (Authorized by K.S.A. 65-165; implementing K.S.A. 65-165 and K.S.A. 65-171d; effective Sept. 27, 1993.)

28-16-152. Coverage. 40 CFR 122.28(a) as in effect July 1, 1991, as amended at 57 FR 11412, April 2, 1992 is adopted by reference. (Authorized by K.S.A. 65-165; implementing K.S.A. 65-165 and K.S.A. 65-171d; effective Sept. 27, 1993.)

28-16-153. Administration. 40 CFR 122.28(b)(1), (2), and (3)(i), (iii), (iv), and (v), as in effect on July 1, 1991, as amended at 57 FR 11412, April 2, 1992 are adopted by reference, with the following modifications or exceptions. (a) The provisions of 40 CFR 122.28(b)(1) shall be modified as follows: "(1) In general. General permits may be issued, modified, revoked and reissued, or terminated in accordance with K.A.R. 28-16-59 through 28-16-62 inclusive, and K.A.R. 28-16-154."

(b) The provisions of 40 CFR 122.28(b)(2)(i) shall be modified as follows: "(i) Except as provided in paragraphs (b)(2)(v) and (b)(2)(vi) of this section, each discharger or treatment works treating domestic sewage seeking coverage under a general permit shall submit to the director a written notice of intent to be covered by the general permit. Any discharger or treatment works

treating domestic sewage who fails to submit a notice of intent in accordance with the terms of the permit shall not be authorized to discharge, (or in the case of sludge disposal permit, to engage in a sludge use or disposal practice), under the terms of the general permit unless the general permit, in accordance with paragraph (b)(2)(v) of this section, contains a provision that a notice of intent is not required or the director notifies a discharger or treatment works treating domestic sewage that it is covered by a general permit in accordance with paragraph (b)(2)(vi) of this section. A complete and timely notice of intent (NOI) to be covered in accordance with general permit requirements, fulfills the requirements for permit applications for purposes of K.A.R. 28-16-59.”

(c) The provisions of 40 CFR 122.28(b)(2)(ii) shall be modified as follows: “(ii) The contents of each notice of intent shall be specified in each general permit and shall require the submission of information necessary for adequate program implementation, including at a minimum, the legal name and address of the owner, the legal name and address of the operator if different from the owner, the facility name and address, the type of facility, the type of discharge(s), the number of discharge points, the location using the public land survey system of each discharge point, and the receiving stream(s). A general permit for storm water discharge associated with industrial activity from inactive mining, inactive oil and gas operations, or inactive landfills occurring on federal lands where an operator cannot be identified may contain alternative notice of intent requirements. Each notice of intent shall be signed in accordance with K.A.R. 28-16-59(e).”

(d) The provisions of 40 CFR 122.28(b)(3)(iii) shall be modified as follows: “(iii) Any owner or operator authorized by a general permit may request to be excluded from the coverage of the general permit by applying for an individual permit. The owner or operator shall submit an application under K.A.R. 28-16-59, with reasons supporting the request, to the director no later than 90 days after the publication of the general permit by a state in accordance with applicable state law. Each request shall be processed under applicable state procedures. The request shall be granted by issuing an individual permit if the reasons cited by the owner or operator are adequate to support the request.” (Authorized by K.S.A. 65-165; implementing K.S.A. 65-165 and K.S.A. 65-171d; effective Sept. 27, 1993.)

28-16-154. Incorporation. 40 CFR 124.10(d)(1)(i) through (v) and (vii) as in effect on July 1, 1991, are adopted by reference except that the provisions of 40 CFR 124.10(d)(1)(v) shall be modified as follows: “(v) A brief description of the comment procedures required by K.A.R. 28-16-61(c) and (d) and the time and place of any hearing that will be held, including a statement of procedures to request a hearing, unless a hearing has already been scheduled, and other procedures by which the public may participate in the final permit decision.” (Authorized by K.S.A. 65-165; implementing K.S.A. 65-165 and K.S.A. 65-171d; effective Sept. 27, 1993.)

MUNICIPAL, COMMERCIAL AND INDUSTRIAL WASTEWATER LAGOON REQUIREMENTS

28-16-160. Definitions. The following terms and abbreviations shall be applicable to K.A.R. 28-16-160 through K.A.R. 28-16-174 and shall have the meanings specified in this regulation. Terms and abbreviations not defined in this regulation shall have the meanings specified in K.S.A. 65-101 et seq. and amendments thereto; articles 5, 13, 16, and 30; or the clean water act (CWA). For K.A.R. 28-16-160 through 28-16-174, the definitions prescribed in this regulation shall control over any different definitions in any of the following: articles 5, 13, 16, and 30; federal regulations adopted by reference in articles 5, 13, 16, and 30; or the clean water act (CWA).

(a) “Change in operation” and “modification” mean any of the following:

(1) Any expansion or enlargement of a wastewater treatment system beyond the scope or boundaries established by a permit or KDHE-approved plans and specifications;

(2) any change or increase in production or wastewater-generating activities resulting in a change in the quantity or quality of the sewage or wastewater being generated; or

(3) any modification to the wastewater treatment system or an increase in the wastewater treatment system capacity beyond that addressed by the permit application, authorized by a permit, or authorized by KDHE-approved plans and specifications. As used in these regulations, a “modification” to a wastewater treatment system shall exclude routine cleaning, normal maintenance, and routine minor bank erosion repairs.

(b) “Commercial wastewater treatment system” means a wastewater treatment system serving a commercial enterprise or group of commercial

enterprises for the purpose of treating primarily domestic sewage by physical, chemical, or biological means or by a combination of those methods.

(c) “CWA” and “federal clean water act” mean the federal water pollution control act, 33 U.S.C. 1251 et seq., as in effect on November 27, 2002.

(d) “Department” and “KDHE” have the meaning specified in K.A.R. 28-16-58.

(e) “Director” has the meaning specified in K.A.R. 28-16-58.

(f) “Division” has the meaning specified in K.A.R. 28-16-58.

(g) “Domestic sewage” has the meaning specified in K.A.R. 28-16-56c.

(h) “Environmental protection agency” and “EPA” have the meaning specified in K.A.R. 28-16-58.

(i) “Equus Beds,” for the purpose of these municipal, commercial, and industrial wastewater lagoon regulations, means the aquifer underlying the sections of land listed in the following table:

County	Range	Township	Section
Harvey	01W	22S	06, 07, 18, 19, 30, 31
Harvey	01W	23S	06, 07, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34
Harvey	01W	24S	03, 04, 05, 06, 07, 08, 09, 10, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34

(j) “Groundwater,” for the purpose of these municipal, commercial, and industrial wastewater lagoon liner regulations, means water located under the surface of the land that is or can be the source of supply for wells, springs, seeps, or streams or that is held in aquifers. For the lagoon regulations, this term shall be considered capable of being a source of supply for wells if at least one of the following conditions is met:

(1) The groundwater can be produced at a rate of 10 gallons or more per hour from a borehole with a diameter of nine or fewer inches. In determining the groundwater production rate for an excavation, borehole, or existing water or monitoring well, the quantity of produced water shall be adjusted for comparison purposes to the surface area of a borehole with a diameter of nine inches.

(2) Groundwater is currently being used within ½ mile of the proposed lagoon, regardless of the rate at which the groundwater can be produced.

(3) There is evidence of past groundwater use within ½ mile of the proposed lagoon.

(k) “Groundwater separation distance,” for the purpose of these municipal, commercial, and industrial wastewater lagoon regulations, means the distance measured between the bottom of the lagoon and the top of the groundwater table. The bottom of the lagoon shall be determined by the lowest interior surface elevation, at finished grade, of the lagoon structure. The top of the groundwater shall be determined by the upper surface elevation of groundwater in an aquifer or, if the watertable fluctuates seasonally, the maximum annual surface elevation of the groundwater based on the average of the previous 10 years of groundwater data, if available.

(l) “Impermeable synthetic membrane liner” means a commercially manufactured membrane liner composed of synthetic materials commonly identified as being plastic or plastic polymer materials or other synthetic materials that, when properly installed, would provide for the more stringent of either of the following:

(1) A maximum monitored or calculated seepage rate of 1/64 inch per day; or

(2) the liner manufacturer’s criteria for the material and installation of the membrane liner expressed in units of volume per area per unit of time (gallons per square feet per day).

(m) “Industrial wastewater treatment system” means any of the following:

(1) A wastewater treatment system serving a city, county, township, sewer district, or other governmental unit;

(2) a state or federal agency, establishment, or institution;

(3) an industrial or commercial enterprise; or

(4) a group or combination of any of the entities specified in paragraphs (m)(1) through (3) treating primarily sewage or process-generated wastewater, other than domestic sewage, by physical, chemical, or biological methods or by a combination of these methods.

(n) “In existence,” when used to describe a municipal, commercial, or industrial wastewater treatment system, means that the system meets one of the following conditions:

(1) Is constructed or installed, is capable of providing wastewater treatment, and is currently covered by a valid Kansas water pollution control permit on the effective date of these regulations;

(2) received the secretary’s approval of construction plans and specifications before the effective date of these regulations and is under construction within two years after the date of approval; or

(3) is under construction, with plans and specifications approved by the secretary, on the effective date of these regulations.

(o) “Licensed geologist” means a geologist licensed to practice geology in Kansas by the Kansas board of technical professions.

(p) “Licensed professional engineer” means a professional engineer licensed to practice engineering in Kansas by the Kansas board of technical professions.

(q) “Liner” means any designed barrier in the form of in situ, layered, membrane, or blanket materials utilized or installed to reduce the potential for a significant hydrologic connection between sewage or process-generated wastewaters that are controlled or retained by wastewater treatment systems and waters of the state.

(r) “Maximum soil liner seepage rate” and “specific discharge” mean the flow rate through the soil liner, which is expressed as velocity (distance per unit of time). The maximum soil liner seepage rate shall be calculated as $v = k (h/d)$, in which “k” is the hydraulic conductivity (coefficient of per-

meability) and “(h/d)” is the hydraulic gradient. The hydraulic gradient is the maximum vertical distance “h” measured from the liquid surface to the liner bottom, divided by the thickness of the soil liner “d.” When calculating the maximum soil liner seepage rate, the maximum operating depth, not considering design freeboard, shall be utilized.

(s) “Maximum synthetic membrane liner leakage rate” means a monitored or calculated leakage rate that is the more stringent of either $1/64$ inch per day or the liner manufacturer’s criteria for the material and installation of the membrane liner expressed in units of volume per area per unit of time (gallons per square feet per day).

(t) “Minimum standards of design, construction, and maintenance” means effluent standards, effluent limitations, pretreatment requirements, other performance standards, and other standards of design, construction, and maintenance for wastewater control facilities published by the department as “minimum standards of design for water pollution control facilities” and adopted by reference in K.A.R. 28-16-58.

(u) “Monitoring” means procedures using any of the following methods:

(1) Conducting inspections of industrial process operations or the operation of municipal, commercial, or industrial wastewater treatment systems;

(2) the systematic collection and analysis of data on operational parameters of industrial process operations or the operation of municipal, commercial, or industrial wastewater treatment systems; or

(3) the systematic collection and analysis of data on the quality of the domestic sewage, process wastewater, wastewater sludge, groundwater, surface water, or soils at or in the vicinity of the wastewater lagoon or wastewater pond.

(v) “Monitoring well” and “observation well” mean a well constructed for sampling fluids or groundwater and for observing subsurface phenomena including the presence of fluids, groundwater elevations, the direction of groundwater flow, and the velocity of groundwater flow.

(w) “Municipal wastewater treatment system” means any of the following:

(1) A wastewater treatment system serving a city, county, township, sewer district, or other governmental unit;

(2) a state or federal agency, establishment, or institution treating primarily domestic sewage by physical, chemical, or biological methods or by a combination of these methods; or

(3) a wastewater treatment system operated by an entity listed in paragraph (w)(1) or (2) that receives significant quantities of domestic wastewater, process wastewater comprised primarily of conventional pollutants, non-contact cooling water, boiler blowdown, or process wastewater identified in K.A.R. 28-16-162(f) from industrial facilities if the introduction of these wastes meets the following conditions:

(A) Conforms with the EPA-promulgated pretreatment standards specified in K.A.R. 28-16-88;

(B) does not interfere or upset the operation of the wastewater treatment system;

(C) does not cause these wastes to pass through the treatment system either partially treated or untreated into the environment in unacceptable concentrations or quantities;

(D) does not cause a violation of the water pollution control permit;

(E) does not violate surface water quality standards; and

(F) does not adversely impact use of the wastewater for irrigation or adversely impact use of wastewater sludge for land application.

(x) “Oil or gas well” shall have the meaning assigned to the term “well” in K.S.A. 55-150, and amendments thereto.

(y) “Permit” and “water pollution control permit” mean an authorization, license, or equivalent control document issued by the department. A permit shall not include any document that has not yet been subject to final action by the department, including a draft or proposed permit.

(z) “Permittee” means a person who is authorized by a Kansas water pollution control permit to operate, or a person who is responsible for overseeing the operation of, a wastewater treatment system.

(aa) “Person” has the meaning specified in K.S.A. 65-170a, and amendments thereto.

(bb) “Pollution” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(cc) “Precipitation runoff” and “stormwater runoff” mean the rainwater or the meltwater that is derived from snow, hail, sleet, or other forms of atmospheric precipitation and that flows by gravity over the surface of the land.

(dd) “Secretary” has the meaning specified in K.A.R. 28-16-58.

(ee) “Sensitive groundwater areas,” for the purpose of these municipal, commercial, and industrial wastewater lagoon regulations, means aquifers generally comprised of alluvial aquifers, the area

within the boundaries of the Equus Beds groundwater management district no. 2 (GMD #2), and the Dune Sand Area located south of the great bend of the Arkansas River. A sensitive groundwater area shall be any section of land listed in "Kansas sensitive groundwater areas for wastewater lagoons," prepared by KDHE and dated January 1, 2005, which is hereby adopted by reference.

(ff) "Sewage" and "wastewater" have the meaning specified in K.S.A. 65-164, and amendments thereto.

(gg) "Variance" means the secretary's written approval authorizing an alternative action to any of the requirements of these municipal, commercial, or industrial wastewater lagoon regulations, the standards adopted by these regulations, or the "minimum standards of design for water pollution control facilities," as adopted by reference in K.A.R. 28-16-58.

(hh) "Wastewater lagoon" and "wastewater pond" mean excavated or diked structures provided or used for retaining or treating municipal, commercial, or industrial sewage, process wastewater, cooling water, or stormwater runoff.

(ii) "Wastewater treatment system" means structures or devices that collect, store, stabilize, treat, or otherwise control pollutants so that after the discharge, disposal, or land application of wastewater treatment sludge or treated wastewater, water pollution will not occur, and the public health and waters of the state will be protected. This term shall not include lagoons and earthen basins that are regulated and permitted as a solid waste processing facility or solid waste landfill pursuant to K.S.A. 65-3401 et seq., and amendments thereto, and article 29. Discharges of wastewater from lagoons or earthen basins that are regulated and permitted as a solid waste processing facility or solid waste landfill shall be prohibited unless authorized by a Kansas water pollution control permit.

(jj) "Waters of the state" has the meaning specified in K.S.A. 65-161, and amendments thereto.

(kk) "Water well" has the meaning specified in K.S.A. 82a-1203, and amendments thereto. (Authorized by K.S.A. 65-165 and K.S.A. 2004 Supp. 65-171d; implementing K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-161. Municipal and commercial lagoons: general provisions. The following general provisions shall apply to municipal and commercial wastewater treatment system la-

goons. (a) New or modified municipal or commercial wastewater treatment system lagoons shall be prohibited if the groundwater separation distance between the lagoon bottom and the groundwater table is 10 feet or less.

(b) For each new or modified lagoon, the permittee may employ a constructed soil liner if the maximum soil liner seepage rate is less than $\frac{1}{4}$ inch per day and the lagoon is not constructed over sensitive groundwater areas, including the Equus Beds.

(c) For each new or modified lagoon constructed over sensitive groundwater areas, excluding the Equus Beds, the permittee may employ a constructed soil liner if the maximum soil liner seepage rate is less than $\frac{1}{10}$ inch per day.

(d) For each new or modified lagoon constructed over the Equus Beds, the permittee shall, at a minimum, employ a single impermeable synthetic membrane liner and provide for the installation and sampling of groundwater monitoring wells as specified in K.A.R. 28-16-171. Constructed soil liners may be employed if all of the following conditions are met:

(1) The groundwater separation distance between the lagoon bottom and the groundwater table is greater than 10 feet.

(2) The hydrogeologic information developed for the site indicates that in situ soils exist in sufficient quantity to provide an effective pollution barrier to protect groundwater.

(3) A constructed soil liner will provide a maximum soil liner seepage rate of less than $\frac{1}{10}$ inch per day.

(4) The design provides for the installation and sampling of groundwater monitoring wells as specified in K.A.R. 28-16-171.

(e) For each new or modified lagoon, the permittee may utilize a single impermeable synthetic membrane liner, in lieu of a constructed soil liner.

(f) Municipal and commercial wastewater treatment system lagoons in existence on the effective date of this regulation shall not be required to be modified or retrofitted to comply with the provisions of this regulation, unless either of the following occurs:

(1) The secretary determines that environmental or public health threats result from the operation of the lagoon, or data exists showing the actual or potential soil or water pollution.

(2) The modification, replacement, or expansion of a municipal or commercial wastewater lagoon results in the lagoon being dewatered, and

the secretary orders the implementation of specific lagoon improvements to address conditions that result in noncompliance with statutory, regulatory, or permit requirements or that fail to ensure protection of public health or the environment. The permittee shall implement the specific improvements required by the secretary.

(g) For the purpose of K.A.R. 28-16-160 through K.A.R. 28-16-174, an actual or potential environmental or public health threat may be deemed to exist if physical, chemical, biological, or radiological substances, or a combination of these substances, is released into subsurface waters of the state and results in a concentration or amount of a substance in excess of the numerical criteria designated for aquatic life protection, agricultural use, or public health protection as provided in the "Kansas surface water quality standards: tables of numeric criteria," dated December 6, 2004, which is adopted by reference in K.A.R. 28-16-28e. If the background concentration of a substance is naturally occurring and is greater than the numerical criteria, the background concentration shall be considered the criteria.

(h) No person shall construct, operate, or maintain any municipal or commercial wastewater lagoon without obtaining a permit or permit modification from the department. (Authorized by K.S.A. 65-165, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-162. Industrial lagoons: general provisions. The following general provisions shall apply to industrial wastewater treatment system lagoons. (a) New or modified industrial wastewater treatment system lagoons shall be prohibited if the groundwater separation distance between the lagoon bottom and the groundwater table is 10 feet or less.

(b) For each new or modified lagoon utilized solely for the containment or treatment of domestic sewage, the permittee may employ a constructed soil liner if the maximum soil liner seepage rate is less than $\frac{1}{4}$ inch per day and the lagoon is not constructed over sensitive groundwater areas, including the Equus Beds.

(c) For each new or modified lagoon constructed over sensitive groundwater areas, excluding the Equus Beds, and utilized solely for the containment or treatment of domestic sewage, the

permittee may employ a constructed soil liner if the maximum soil liner seepage rate is less than $\frac{1}{10}$ inch per day.

(d) For each new or modified lagoon constructed over the Equus Beds and utilized solely for the containment or treatment of domestic sewage, the permittee shall, at a minimum, employ a single impermeable synthetic membrane liner and provide for the installation and sampling of groundwater monitoring wells as specified in K.A.R. 28-16-171. Constructed soil liners may be employed if all of the following conditions are met:

(1) The groundwater separation distance between the lagoon bottom and the groundwater table is greater than 10 feet.

(2) The hydrogeologic information developed for the site indicates that in situ soils exist in sufficient quantity to provide an effective pollution barrier to protect groundwater.

(3) A constructed soil liner will provide a maximum soil liner seepage rate of less than $\frac{1}{10}$ inch per day.

(4) The design provides for the installation and sampling of groundwater monitoring wells as specified in K.A.R. 28-16-171.

(e) For each new or modified lagoon utilized solely for the containment or treatment of domestic sewage, the permittee may utilize a single impermeable synthetic membrane liner, in lieu of a constructed soil liner.

(f) For each new or modified industrial wastewater lagoon, the permittee may utilize either a single impermeable synthetic membrane liner or a soil liner with a maximum soil liner seepage rate of less than $\frac{1}{4}$ inch per day if the wastewater lagoons or ponds are utilized for the containment or treatment of process-generated wastewater and are limited to the following:

(1) Sediment control and aggregate wash water ponds used at limestone quarries;

(2) sediment control ponds used at clay pit operations;

(3) sediment control ponds used for classification and washing operations associated with sand and gravel dredging;

(4) ponds receiving once-through, non-contact cooling water in which there is no chemical addition to the cooling water and where the concentration of total dissolved solids in the cooling water is not increased over the concentration of total dissolved solids in the groundwater;

(5) ponds receiving recirculated cooling water meeting any of the following conditions:

(A) The cooling water, if treated, is treated only with chlorine or bromine;

(B) the total dissolved solids and salt concentration of the cooling water in the ponds are not increased significantly above the groundwater source concentration;

(C) the total dissolved solids and salt concentration of the cooling water in the ponds do not exceed criteria that would prohibit the cooling water from being discharged in conformance with the Kansas surface water quality standards specified in K.A.R. 28-16-28b, 28-16-28c, 28-16-28d, and 28-16-28e; or

(D) the total dissolved solids and salt concentration of the cooling water in the ponds can be land-applied at agronomic application rates without the use of dilution water or freshwater application for controlling dissolved solids and salts;

(6) erosion-control sediment ponds associated with construction activities;

(7) tailwater control ponds utilized for the irrigation of wastewater from an industrial wastewater treatment system if the tailwater control pond is completely dewatered immediately at the completion of each irrigation application cycle;

(8) lime sludge storage lagoons associated with potable water-softening operations;

(9) lagoons that receive concrete washed off of, and from, concrete delivery trucks; and

(10) lagoons utilized for the containment or treatment of coal pile stormwater runoff, coal ash, and air pollution control scrubber wastes from facilities utilizing low-sulfur coal produced in the powder river basin of Wyoming.

(g) Each new industrial wastewater lagoon utilized for the containment or treatment of industrial process wastewater shall utilize an impermeable synthetic membrane liner system with a maximum synthetic membrane liner leakage rate that is less than the more stringent of either of the following:

(1) A maximum monitored or calculated seepage rate of $\frac{1}{64}$ inch per day; or

(2) the liner manufacturer's criteria for the material and installation of the synthetic membrane liner system expressed in units of volume per area per unit of time (gallons per square feet per day).

(h) Industrial wastewater treatment system lagoons in existence on the effective date of this regulation shall not be required to be modified or retrofitted to comply with the provisions of this regulation, unless either of the following occurs:

(1) The secretary determines that environmental or public health threats result from the op-

eration of the lagoon, or data exists showing the actual or potential soil or water pollution.

(2) The modification, replacement, or expansion of an industrial wastewater lagoon results in the lagoon being dewatered, and the secretary or designee orders the implementation of specific lagoon improvements to address conditions that result in noncompliance with statutory, regulatory, or permit requirements or that fail to ensure protection of public health or the environment. Only those specific improvements required by the secretary or designee shall be required to be implemented by the permittee.

(i) For the purpose of K.A.R. 28-16-160 through K.A.R. 28-16-174, an actual or potential environmental or public health threat may be deemed to exist if physical, chemical, biological, or radiological substances, or a combination of these substances, is released into subsurface waters of the state and results in a concentration or amount of a substance in excess of the numerical criteria designated for aquatic life protection, agricultural use, or public health protection as provided in the "Kansas surface water quality standards: tables of numeric criteria," dated December 6, 2004, which is adopted by reference in K.A.R. 28-16-28e. If the background concentration of a substance is naturally occurring and is greater than the numeric criteria, the background concentration shall be considered the criteria.

(j) Land-based sand and gravel pits shall be exempt from the provisions of K.A.R. 28-16-160 through 28-16-174 if the only water or wastewater directed to the dredge pit consists of the following:

(1) Dredge return flows;

(2) flows generated from aggregate classification; and

(3) flows from washing dredged aggregate if water used in creating these flows originates from and is returned to the dredge pit.

(k) No person shall construct, operate, or maintain any industrial wastewater lagoon without obtaining a permit or permit modification from the department. (Authorized by K.S.A. 2004 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-163. Required hydrogeologic information for new or modified municipal, commercial, or industrial wastewater lagoons. (a) Each hydrogeologic investigation that

is conducted by or on behalf of the permittee for new or modified wastewater lagoons shall consist of borings or excavations to a depth of at least 10 feet below the bottom of the wastewater lagoon or to impenetrable bedrock if impenetrable bedrock is encountered less than 10 feet below the lagoon bottom. The bottom of the lagoon shall be determined by the lowest interior surface elevation, at finished grade, of the lagoon structure.

(b) The permittee shall ensure that a minimum of one boring or excavation is performed for each acre of wastewater lagoon, with the area being calculated based on the interior dike dimensions measured at the top of the dike. If the wastewater lagoon is less than one acre in size, a minimum of one boring or excavation shall be required.

(c) The minimum requirements for a hydrogeologic site investigation shall consist of the following:

(1) The logging of all borings or excavations identifying the soil types encountered;

(2) recording the ground surface elevation and location of each boring or excavation. The elevation may be based upon the project datum;

(3) measuring and recording static groundwater levels after the groundwater level has stabilized following the boring or excavation. If no water is readily evident at the time of the boring or excavation, the boring or excavation shall be left open for a minimum of 24 hours. If, after 24 hours, no water is observed, a determination of "no groundwater" shall be reported. Water wells in the immediate vicinity of the proposed wastewater lagoon may be used to help document the presence or absence of groundwater and establish the groundwater elevation, in addition to the borings or excavations, for the hydrogeologic investigation if the secretary or designee agrees to accept the data as being representative of the proposed site;

(4) the collection of sufficient representative soil samples, if in situ soil materials will be employed in the construction of the compacted soil liner or the lagoon structure, for analysis in determining soil classification, compaction, and permeability for use in designing the lagoon soil liner or embankments, as appropriate; and

(5) a summary, to be submitted with or as a part of the engineering report, evaluating the hydrogeologic information obtained and an analysis of that information regarding the expected impact that the observed hydrogeologic conditions will have on the construction of lagoon embankments and, as appropriate, the expected performance of a constructed soil liner in regard

to complying with the maximum soil liner seepage rate requirement.

(d) Hydrogeologic information shall not be required for erosion-control ponds associated with construction activities.

(e) Each permit applicant or permittee, if directed by the secretary, shall notify the department a minimum of two days before performing any hydrogeologic investigation fieldwork activities to allow the opportunity for department staff to witness the activities.

(f) All hydrogeologic information shall be obtained by or under the direct supervision of either a licensed professional engineer or a licensed geologist. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-170b and K.S.A. 2003 Supp. 65-171d; effective May 20, 2005.)

28-16-164. Municipal, commercial, and industrial wastewater treatment system lagoons: soil liner design.

(a) Each permit applicant shall submit with the construction plans and specifications hydrogeologic information, soil testing data, and design calculations documenting that the proposed use of in situ soils or a constructed soil liner is capable of meeting the required maximum soil liner seepage rate.

(b) Whether in situ soils or a constructed soil liner is utilized for the wastewater lagoon, a minimum of one foot of natural soil or one foot of constructed liner shall be provided. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, and K.S.A. 2003 Supp. 65-171d; effective May 20, 2005.)

28-16-165. Municipal, commercial, and industrial soil liners: postconstruction testing.

(a) Each permit applicant or permittee proposing a new municipal, commercial, or industrial wastewater treatment lagoon that will employ a soil liner system shall, when submitting construction plans and specifications to KDHE for review and consideration for approval, also submit information addressing each method to be employed for postconstruction testing of the soil liner for compliance with the required maximum soil liner seepage rate. Each proposed test method shall provide an appropriate degree of monitoring sensitivity and accuracy in addressing the following test variables:

- (1) The maximum soil liner seepage rate;
- (2) the surface area of the lagoon being tested;
- (3) the proposed duration of the test;

(4) the time of year and general weather conditions expected during the test period;

(5) the proposed monitoring equipment;

(6) the expected magnitude of evaporation during the test period;

(7) the degree that wind and wave action will impact measurement accuracy; and

(8) the frequency of data collection during the test period.

(b) Within 45 days following the completion of construction, the permittee or applicant shall submit to the department a certification and, if requested, any supporting documentation, confirming that the wastewater lagoon and the wastewater lagoon liner system were constructed in accordance with the plans and specifications approved by the secretary.

(c) The certification specified in subsection (b) shall be signed by a licensed professional engineer who monitored the construction activities and installation of the soil liner system. The certification shall be based on actual observations by the licensed professional engineer, or designee, during construction and any field or laboratory data developed during or following construction.

The construction activities and any sample collection for field or laboratory data developed during or following construction shall be directly observed by the licensed professional engineer or designee. The monitoring of construction activities or the collection of samples or data shall be conducted by the licensed professional engineer or a designee under the licensed professional engineer's direct supervision.

(d)(1) Within eight months following approval by the secretary to initiate the filling or use of the wastewater lagoon, the permittee or permit applicant shall conduct and report, to KDHE, the results of the postconstruction testing of the soil liner for compliance with the required maximum soil liner seepage rate. This report shall meet the requirements specified in paragraph (d)(2). If the required maximum soil liner seepage rate can not be met, the report submitted to KDHE for review and consideration for approval shall provide a plan and schedule of proposed actions required to achieve compliance.

(2) The postconstruction testing specified in paragraph (d)(1) shall be conducted in conformance with the method or methods approved by the secretary to ensure the protection of public health and the environment. The postconstruction testing of the soil liner shall be conducted

by a licensed professional engineer or a designee under the licensed professional engineer's direct supervision.

The permittee or permit applicant shall provide a certification signed by the licensed professional engineer as to whether or not the soil liner meets the required maximum soil liner seepage rate.

(e) Each permit applicant, when directed by the secretary, shall notify the department a minimum of two days before performing any soil liner seepage testing to allow the opportunity for department staff to witness the test.

(f) Postconstruction testing shall not be required for erosion-control sediment ponds associated with construction activities. (Authorized by K.S.A. 2004 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 65-170b, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-166. Requirements for impermeable synthetic membrane liners in municipal or commercial wastewater treatment system lagoons. (a) The following requirements shall apply to municipal or commercial impermeable synthetic membrane liners:

(1) The liner shall be at least 30 mils (0.030 inch) in thickness.

(2) The engineer designing the wastewater lagoon shall obtain a certification from the liner manufacturer that includes the following:

(A) Confirmation that the specified liner is compatible for use with the proposed wastewater to be retained or treated;

(B) confirmation that the specified liner is resistant to UV (ultraviolet) light; and

(C) the manufacturer's estimated leakage, permeability, or transmissivity rate of the specified liner expressed in units of volume per area per time (gallons per square feet per day) for a properly installed liner. The leakage, permeability, or transmissivity rate shall reflect the expected rate of movement of fluids through a synthetic membrane liner when considering the properties of the liner material, liner thickness, normally expected manufacturing defects in the liner material, and normally expected defects associated with the seaming and installation process.

(b) Compaction of the wastewater treatment lagoon embankments and upper six inches of the interior lagoon bottom below the synthetic liner shall be a minimum of 95 percent of the maximum standard proctor density at optimum mois-

ture to optimum moisture plus three percent. The maximum thickness of the layers of material to be compacted shall not exceed six inches. The moisture content range of the soils being compacted shall be optimum moisture to optimum moisture plus three percent. The maximum size of dirt clods in the compacted soil shall be less than one inch in diameter.

(c) The liner shall be anchored at the top of the wastewater lagoon dike. The method of anchoring the liner shall conform to the manufacturer's installation instructions.

(d) The liner shall be installed in accordance with the liner manufacturer's instructions and guidance. Either the liner shall be installed by a contractor experienced in the installation of impermeable synthetic membrane liners, or the contractor shall provide for the on-site supervision of the liner installation by an individual that has experience installing liners.

(e) The construction plans and specifications shall include provisions for the use of a reliable seam-testing method that shall be used to verify the adequacy of the seaming process. The methods for destructive and non-destructive seam testing shall be specified, along with a protocol describing the number of tests per lineal foot of field seam, the size of the destructive test specimen required, and any other quality control provisions recommended by the liner manufacturer. All field seams shall be subjected to non-destructive testing.

(f) The Kansas "minimum standards of design for water pollution control facilities" shall be utilized in the design and the establishment of construction criteria for wastewater lagoons, unless different criteria are specified in K.A.R. 28-16-160 through K.A.R. 28-16-174. If there is any difference between the design and construction criteria specified in K.A.R. 28-16-160 through K.A.R. 28-16-174 and either the Kansas "minimum standards of design for water pollution control facilities" or regulations in articles 5, 13, or 30, the design and construction criteria specified in K.A.R. 28-16-160 through K.A.R. 28-16-174 shall control.

(g) A minimum of two feet of in situ or compacted soil shall be provided beneath the liner or bedding material.

(h) Each applicant or permittee shall develop and submit with the construction plans and specifications a contingency plan, for KDHE review and consideration for approval, that outlines

procedures for pond containment and operation during periods of maintenance and during periods of required dewatering if a liner fails or needs to be repaired.

(i)(1) Each permittee shall immediately cease operations or shall comply with the instructions of the secretary, if the secretary determines that an imminent threat to public health or the environment exists due to any unsafe operating condition. Considerations regarding an imminent threat or the potential for an imminent threat to public health or the environment shall include the following:

- (A) The pollutant or pollutants involved;
- (B) the integrity of the impermeable synthetic membrane liner;
- (C) the depth to groundwater;
- (D) the monitoring well or water supply well data;
- (E) the mobility of the pollutant or pollutants through soil or groundwater;
- (F) the potential exposure to the public; and
- (G) the potential for uncontrolled release into the environment.

(2) The permittee may resume operations if the secretary determines that the wastewater lagoon no longer poses a risk to public health and the environment. (Authorized by K.S.A. 2004 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-167. Requirements for impermeable synthetic membrane liners in industrial wastewater treatment system lagoons. (a) The following requirements shall apply to industrial impermeable synthetic membrane liners:

(1) The impermeable synthetic membrane liner system shall be comprised of primary and secondary impermeable synthetic membrane liners with an intermediate leak detection system provided.

(2) Each primary and secondary liner shall be at least 30 mils (0.030 inch) in thickness.

(3) The licensed professional engineer designing the wastewater lagoon shall obtain a certification from the liner manufacturer that includes the following:

(A) Confirmation that the specified liner is compatible for use with the proposed wastewater to be retained or treated;

(B) confirmation that the specified liner is resistant to UV (ultraviolet) light; and

(C) the manufacturer's estimated leakage, permeability, or transmissivity rate of the specified liners expressed in units of volume per area per time (gallons per square feet per day) for a properly installed liner. The leakage, permeability, or transmissivity rate shall reflect the expected rate of movement of fluids through a synthetic membrane liner when considering the properties of the liner material, liner thickness, normally expected manufacturing defects in the liner material, and normally expected defects associated with the seaming and installation process.

(b) A minimum of two cells shall be provided to allow for flexibility of operation and maintenance of the wastewater lagoon system. This requirement may be waived by the secretary if an approved alternative wastewater disposal option is available and the operator agrees to employ the alternative wastewater disposal option when the wastewater lagoon system is required to be dewatered. Each approved alternative wastewater disposal option shall include a means of disposal for which the required permits, licenses, or authorizations have been obtained.

(c) The primary and secondary liners shall be separated to provide a conduit to allow the movement of any fluid between the liners so that the fluid can be directed to the leak-detection monitoring location for detection and removal. Clean sand, pea gravel, geotextile fabric, and geonet-type materials may be employed to provide the required separation between the primary and secondary liners if a conduit allowing for fluid movement to the leak-detection monitoring location is provided. Alternatives may be recommended by the liner manufacturer or design engineer and shall be submitted to the secretary for review and consideration for approval.

(d) The secondary liner in the pond bottom shall have at least a 2.5 percent slope towards the leak-detection system's monitoring sump, manhole, observation pipe, or other similar leak-detection monitoring mechanism. Any piping used to collect or route fluids to the leak-detection monitoring mechanism shall have at least a one percent slope. The leak-detection system design shall ensure that the maximum travel time required for fluid penetrating the liner to reach the leak-detection monitoring location is 24 hours or less.

(e) The design of the impermeable synthetic membrane liner system shall provide for the capability to perform the following:

(1) Routinely dewater and monitor the volume of fluid removed from the intermediate space between the primary and secondary liners;

(2) pump a volume of fluid generated that is equal to 10 times the maximum synthetic membrane liner leakage rate; and

(3) collect a representative sample of fluid being pumped.

(f) Compaction of the wastewater treatment lagoon embankments and upper six inches of the interior lagoon bottom below the secondary liner shall be a minimum of 95 percent of the maximum standard proctor density at optimum moisture to optimum moisture plus three percent. The maximum thickness of the layers of material to be compacted shall not exceed six inches. The moisture content range of the soils being compacted shall be optimum moisture to optimum moisture plus three percent. The maximum size of dirt clods in the compacted soil shall be less than one inch in diameter.

(g) The primary and secondary liners shall be anchored at the top of the wastewater lagoon dike. The method of anchoring the primary and secondary liners shall conform to the manufacturer's installation instructions.

(h) The liner shall be installed in accordance with the liner manufacturer's instructions. Either the liner shall be installed by a contractor experienced in the installation of impermeable synthetic membrane liners, or the contractor shall provide for the on-site supervision of the liner installation by an individual that has experience installing liners.

(i) The construction plans and specifications shall include provisions for the use of a reliable seam-testing method that shall be used to verify the adequacy of the seaming process. The methods for destructive and non-destructive seam testing shall be specified, along with detailed procedures describing the number of tests per lineal foot of field seam, the size of the destructive test specimen required, and any other pertinent quality control provisions recommended by the liner manufacturer. All field seams shall be subjected to non-destructive testing.

(j) The Kansas "minimum standards of design for water pollution control facilities" shall be utilized in the design and the establishment of construction criteria for wastewater lagoons, unless different criteria are specified in K.A.R. 28-16-160 through K.A.R. 28-16-174. If there is any difference between the design and construction criteria specified in K.A.R. 28-16-160

through K.A.R. 28-16-174 and either the Kansas “minimum standards of design for water pollution control facilities” or regulations in articles 5, 13, or 30, the design and construction criteria specified in K.A.R. 28-16-160 through K.A.R. 28-16-174 shall control.

(k) A minimum of two feet of in situ or compacted soil shall be provided beneath the bottom of the secondary liner or liner bedding material.

(l) Each applicant or permittee shall develop and submit with the construction plans and specifications a contingency plan, for the secretary’s review and consideration for approval, that outlines procedures for pond containment and operation during periods of maintenance and periods of required dewatering if a liner fails or needs to be repaired or replaced.

(m)(1) Each permittee shall immediately cease operations or shall comply with the instructions of the secretary, if the secretary determines that an imminent threat or the potential for an imminent threat to public health or the environment exists due to any unsafe operating condition. Considerations regarding an imminent threat or the potential for an imminent threat to public health or the environment shall include the following:

- (A) The pollutant or pollutants involved;
- (B) the integrity of the impermeable synthetic membrane liner;
- (C) the depth to groundwater;
- (D) the monitoring well or water supply well data;
- (E) the mobility of the pollutant or pollutants through soil or groundwater;
- (F) the potential exposure to the public; and
- (G) the potential for uncontrolled release into the environment.

(2) The permittee may resume operations if the secretary determines that the wastewater lagoon no longer poses a risk to public health and the environment. (Authorized by K.S.A. 2004 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-168. Postconstruction testing of municipal, commercial, and industrial impermeable synthetic membrane liners. (a) Each permit applicant or permittee proposing a new municipal, commercial, or industrial wastewater treatment lagoon that will employ an impermeable synthetic membrane liner shall, when

submitting construction plans and specifications to the secretary for review and consideration for approval, also submit information addressing each method to be employed for postconstruction testing of the impermeable synthetic membrane liner to ensure that it is installed properly and for compliance with the required maximum synthetic membrane liner leakage rate. Each proposed test method shall provide an appropriate degree of monitoring sensitivity and accuracy in addressing the following test variables:

- (1) The maximum synthetic membrane liner leakage rate;
- (2) the surface area of the lagoon being tested;
- (3) the proposed duration of the test;
- (4) the time of year and general weather conditions expected during the test period;
- (5) the proposed monitoring equipment;
- (6) the expected magnitude of evaporation during the test period;
- (7) the degree that wind and wave action will impact measurement accuracy; and
- (8) the frequency of data collection during the test period.

(b) Within 45 days following the completion of construction, the permittee or applicant shall submit to the department a certification and, if requested, any supporting documentation, confirming that the wastewater lagoon and the wastewater lagoon liner system were constructed in accordance with the plans and specifications approved by the secretary.

(c) The certification shall be signed by the licensed professional engineer who monitored the construction activities and installation of the impermeable synthetic membrane liner or liner system. The licensed professional engineer’s certification shall be based on actual observations during construction and installation and any field or laboratory data developed during or following construction or installation.

The construction and installation activities and any testing or sample collection for field or laboratory data developed during or following construction and installation shall be directly observed by the licensed professional engineer or designee. The monitoring of construction and installation activities or the collection of samples or data shall be conducted by a licensed professional engineer or a designee under the licensed professional engineer’s direct supervision.

(d)(1) Within two months, or an alternative time frame proposed by the design engineer and

approved by secretary, and following approval by the secretary to initiate the filling or use of the lagoon, the permittee shall conduct and report, to KDHE, the results of the postconstruction testing of the impermeable synthetic membrane liner or liner system for compliance with the required maximum synthetic membrane liner leakage rate. This report shall meet the requirements specified in paragraph (d)(2). If the required maximum synthetic membrane liner leakage rate can not be met, the report shall provide a plan and schedule of proposed actions required to achieve compliance, for review and consideration for approval by the secretary.

(2) The postconstruction testing specified in paragraph (d)(1) shall be conducted in conformance with the method or methods approved by the secretary, pursuant to subsection (a), to ensure the protection of public health and the environment. The postconstruction monitoring or testing of the synthetic membrane liner or liner system shall be conducted by a licensed professional engineer or a designee, under the engineer's supervision.

The permittee shall provide a certification signed by the licensed professional engineer as to whether or not the synthetic membrane liner or liner system complies with the maximum synthetic membrane liner leakage rate.

(e) Each permit applicant, when directed by the secretary, shall notify the department a minimum of two days before performing any leak-detection testing, on the entire liner, to allow the opportunity for department staff to witness the test. (Authorized by K.S.A. 2004 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 65-170b, K.S.A. 2004 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-169. Minimum standards of design, construction, and maintenance. (a) The permit applicant or permittee shall design and construct municipal, commercial, and industrial wastewater treatment system lagoons to conform to effluent standards, effluent limitations, pretreatment requirements, other performance standards, and standards of design, construction, and maintenance for wastewater control facilities published by the department as "minimum standards of design for water pollution control facilities" and adopted by reference in K.A.R. 28-16-58, or the provisions of K.A.R. 28-16-160 through 28-16-174.

(b) If there is a discrepancy between K.A.R. 28-16-160 through 28-16-174 and the "minimum standards of design, construction, and maintenance" as defined in K.A.R. 28-16-160, K.A.R. 28-16-160 through 28-16-174 shall control. (Authorized by K.S.A. 2003 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2003 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-170. Water, oil, or gas wells. (a) Each permit applicant or permittee submitting construction plans for a municipal, commercial, or industrial wastewater treatment system lagoon shall identify, on the construction plans, the location of any active, abandoned, or plugged water, oil, or gas well within 600 feet of any proposed location for a wastewater lagoon.

(b) If the permit applicant or permittee is unable to confirm the exact location of any well or wells, the permit applicant or permittee shall include in the construction plans a note indicating the potential for the well or wells to be encountered in the vicinity of the proposed wastewater lagoon.

(c) Each active, abandoned, or plugged water, oil, or gas well that is encountered during construction and that was not identified or located on the construction plans shall be reported to the department within 48 hours of discovery. Construction activities that have the potential to impact the well shall be immediately terminated until the secretary or designee authorizes the construction to resume. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-165, 65-166, K.S.A. 2003 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-171. Monitoring wells. (a) The installation and sampling of groundwater monitoring wells in the vicinity of any municipal, commercial, or industrial wastewater treatment system lagoon may be required by the secretary. Equivalent technology, in lieu of requiring the installation and sampling of groundwater monitoring wells, may be required or authorized by the secretary.

(b) The location, design, and proposed construction of monitoring wells or the use of equivalent technology in lieu of monitoring wells shall be subject to approval by the secretary. Approval of the location, design, and proposed construction of monitoring well or wells or the use of

equivalent technology shall be approved by the secretary before the permit applicant or permittee initiates installation.

(c) Groundwater monitoring wells shall be constructed by KDHE-licensed water well contractors.

(d) When directed by KDHE to install any groundwater monitoring well or wells, the applicant or permittee shall submit a groundwater monitoring plan for review and approval by the secretary. Each plan shall address the following:

(1) The location of each proposed monitoring well;

(2) the monitoring well design and materials proposed for construction;

(3) a quality assurance plan addressing techniques for monitoring the static groundwater elevation, collecting samples, preserving samples, and laboratory analysis by a KDHE-certified laboratory for the parameters being analyzed. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164, 65-170b, and K.S.A. 2003 Supp. 65-171d; effective May 20, 2005.)

28-16-172. Plan and specification approval; permit issuance. (a) Neither the approval of an engineering report, hydrogeologic report, construction plans, or construction specifications nor the issuance of a permit by the secretary shall prohibit the secretary from taking any enforcement action if the municipal, commercial, or industrial wastewater lagoon fails to protect waters of the state, meet any specified effluent criteria, or comply with state surface water quality standards. In addition, an approval or permit issuance shall not constitute a defense by the permit applicant or permittee regarding the violation of any statute, regulation, permit condition, or requirement.

(b) The permit applicant or permittee shall not deviate from the plans and specifications submitted to and approved by the secretary, unless amended plans and specifications showing the proposed changes are submitted to and approved by the secretary. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164 and K.S.A. 2003 Supp. 65-171d; effective May 20, 2005.)

28-16-173. Municipal, commercial, and industrial wastewater lagoons: closure requirements. (a) Each wastewater lagoon permittee shall notify the secretary of any plans to cease operation of, close, or abandon a municipal, commercial, or industrial wastewater lagoon or lagoon system.

(b) Each permittee shall maintain and comply with a valid Kansas water pollution control permit until the secretary approves the closure of the wastewater lagoon or lagoon system.

(c) Each permit applicant or permittee shall develop and submit a wastewater lagoon closure plan for review and consideration for approval by the secretary along with the construction plans and specifications for any new, modified, or expanded wastewater lagoon or lagoon system.

(d) Each wastewater lagoon closure plan shall, at a minimum, include all of the following:

(1) The procedure for deactivating the various wastewater collection and treatment units employed at the facility;

(2) the procedures to be employed to remediate, remove, or dispose of wastewater, accumulated sludge in the wastewater lagoon or lagoons, any impermeable synthetic membrane liner, contaminated soils, and contaminated groundwater;

(3) a description regarding the proposed maintenance, deactivation, conversion, or demolition of the wastewater lagoon structure;

(4) procedures addressing the plugging of any water wells or groundwater monitoring wells associated with the facility, wastewater lagoon, or wastewater lagoon system; and

(5) an estimate of the design life of an impermeable synthetic membrane liner if this type of liner is utilized at the wastewater lagoon.

(e) Each permittee of a wastewater lagoon shall prepare or update, when directed by the secretary, a wastewater lagoon closure plan for review and consideration for approval by the secretary and shall retain the plan at the facility in a manner that is accessible for inspection by the department.

(f) The closure of a wastewater lagoon or lagoon system shall be completed within one year of authorization by the secretary to initiate closure.

(g) Each permittee requesting an extension of time for closure of a wastewater lagoon shall submit the request in writing to the secretary, and the request shall detail the reasons for the requested extension. Consideration of weather conditions and the legal change in ownership of the facility may constitute grounds for the secretary's consideration in granting an extension. (Authorized by K.S.A. 2003 Supp. 65-171d and K.S.A. 65-171h; implementing K.S.A. 65-164, K.S.A. 2003 Supp. 65-171d, and K.S.A. 65-171h; effective May 20, 2005.)

28-16-174. Variance from specific requirements. (a) Each person seeking a variance from any of the requirements in K.A.R. 28-16-160 through 28-16-173 shall submit to the secretary, in writing, a request for the variance and shall provide information and data relevant to the variance request, for the secretary's review and consideration for approval.

(b) Each variance request shall specify why the request should be considered and how the requested variance meets the provisions of K.A.R. 28-16-160 through 28-16-173 and provides for protection of public health and the environment.

(c) A variance may be granted by the secretary if the request is in keeping with the provisions of K.A.R. 28-16-160 through 28-16-173 and the secretary determines that the requested variance will protect public health and the environment. In evaluating each variance request, site-specific conditions, which may include the depth to groundwater, the quantity of groundwater present, hydrogeologic factors, alternative technical information, and alternative designs, shall be considered by the secretary. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164 and K.S.A. 2003 Supp. 65-171d; effective May 20, 2005.)

Article 17.—DIVISION OF VITAL STATISTICS

28-17-1. Definitions. (a) "Birth certificate" means a standard certificate of live birth, a delayed certificate of birth, or a foreign-born certificate.

(b) "Certification" means the action or process that attests to the authenticity of a copy or abstract of any record or certificate pertaining to any birth, adoption, legitimation, death, stillbirth, marriage, divorce, or annulment of marriage within the state of Kansas.

(c) "Delayed certificate of birth" means documentation filed six or more months after a live birth in Kansas that substantiates the birth.

(d) "Foreign-born certificate" means documentation substantiating the birth of either of the following:

(1) An individual who meets the following conditions:

(A) The individual was born outside the United States or trust territories of the United States;

(B) neither parent of the individual was a citizen of the United States; and

(C) the individual was adopted by a Kansas resident or through a Kansas court; or

(2) an individual who was born outside the United States or trust territories of the United States, whose birth has not been registered as that of a United States citizen, and who was adopted by a Kansas resident or through a Kansas court.

(e) "Heirloom certificate" means a personalized keepsake certificate.

(f) "Medical data" means data or information that describes medical and anatomical conditions or characteristics of an individual, or both.

(g) "Personal data" means nonmedical data or information that describes the legal identity or attributes of an individual.

(h) "Registrant" means the individual named on a vital record for whom the vital record was established.

(i) "Registration," as used in the definition of "vital statistics" in K.S.A. 65-2401 and amendments thereto and in these regulations, means the process of filing an original record or certificate.

(j) "Secretary" has the meaning specified in K.S.A. 65-2401, and amendments thereto.

(k) "Standard certificate of live birth" means documentation substantiating a live birth within the state of Kansas that is filed with the state registrar within six months of the date of birth as specified in K.S.A. 65-2409, and amendments thereto.

(l) "Verification" means a search of files and records maintained by the state registrar that authenticates the information on specified vital records. (Authorized by and implementing K.S.A. 65-2401, 65-2402, and K.S.A. 2003 Supp. 65-2418; effective Jan. 1, 1966; amended Oct. 22, 1990; amended, T-28-11-5-04, Nov. 5, 2004; amended Feb. 25, 2005.)

28-17-2. (Authorized by K.S.A. 65-2404; effective Jan. 1, 1966; revoked May 1, 1986.)

28-17-3. (Authorized by K.S.A. 65-2431; effective Jan. 1, 1966; revoked Oct. 22, 1990.)

28-17-4. (Authorized by K.S.A. 65-2430; implementing K.S.A. 65-2430; effective Jan. 1, 1966; amended May 1, 1983; revoked Oct. 22, 1990.)

28-17-5. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2409, as amended by L. 1990, Chap. 226; effective Jan. 1, 1966; amended Oct. 22, 1990; revoked May 10, 1996.)

28-17-6. Fees for copies, abstracts, and searches. (a)(1) Subject to the requirements of K.S.A. 65-2417 and K.S.A. 65-2418 (a)(2) and amendments thereto, certified copies or ab-

stracts of certificates or parts of certificates shall be furnished by the state registrar upon request by an authorized applicant and payment of the required fee.

(2)(A) The fees for making and certifying copies or abstracts of birth, stillbirth, marriage, and divorce certificates shall be \$15.00 for the first copy or abstract and \$15.00 for each additional copy or abstract of the same record requested at the same time.

(B) The fees for making and certifying copies or abstracts of death certificates shall be \$15.00 for the first copy or abstract and \$15.00 for each additional copy or abstract of the same record requested at the same time.

(b) For any search or verification of the files and records for birth, death, stillbirth, marriage, or divorce certificates if no certified copy or abstract is made, the fee shall be \$15.00 for each five-year period for which a search is requested, or for each fractional part of a five-year period.

(c) For any search of the files necessary for preparing an amendment to a birth, stillbirth, death, marriage, or divorce certificate or abstract already on file, the fee shall be \$15.00.

(d) For non-certified copies or abstracts of certificates or parts of certificates requested for statistical research purposes, the following fees shall be charged:

(1)(A) \$10.00 for each copy of a birth, marriage, divorce, or stillbirth certificate, if the state certificate number is provided; and

(B) \$15.00 for each copy of a birth, marriage, divorce, or stillbirth certificate, if the state certificate number is not provided; and

(2)(A) \$10.00 for each copy of a death certificate, if the state certificate number is provided; and

(B) \$15.00 for each copy of a death certificate, if the state certificate number is not provided.

(e) For each certified copy of an heirloom certificate, the fee shall not exceed \$40.00. (Authorized by K.S.A. 2008 Supp. 65-2418; implementing K.S.A. 23-110 and 65-2417 and K.S.A. 2008 Supp. 65-2418 and 65-2422d; effective Jan. 1, 1966; amended Jan. 1, 1968; amended, E-78-18, July 7, 1977; amended May 1, 1978; amended May 1, 1983; amended, T-84-13, July 1, 1983; amended May 1, 1984; amended May 1, 1988; amended Oct. 7, 1991; amended, T-28-9-25-92, Sept. 25, 1992; amended Nov. 16, 1992; amended Aug. 16, 1993; amended, T-28-7-2-01, July 2, 2001; amended Oct. 12, 2001; amended, T-28-6-27-02,

July 1, 2002; amended Oct. 18, 2002; amended, T-28-7-1-03, July 1, 2003; amended Oct. 17, 2003; amended, T-28-11-5-04, Nov. 5, 2004; amended Feb. 25, 2005; amended Jan. 15, 2010.)

28-17-7. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2422; effective Jan. 1, 1966; amended May 1, 1986; amended May 1, 1987; revoked Oct. 22, 1990.)

28-17-8. (Authorized by K.S.A. 65-2402; implementing 65-2419; effective Jan. 1, 1966; amended May 1, 1986; revoked May 10, 1996.)

28-17-9. Approval of application for delayed birth certificate. Each application for a delayed birth certificate, including completed forms, as required, and documentary evidence, shall be examined, abstracted, and filed or rejected only in the office of vital statistics of the department. (Authorized by K.S.A. 65-2402; implementing 65-2420; effective Jan. 1, 1966; amended May 1, 1986.)

28-17-10. Delayed certificate of birth.

(a) Each request for a delayed certificate of birth shall be registered with the office of vital statistics and shall meet the following requirements:

(1) Be completed with facts known at the time of birth of the registrant; and

(2) if the registrant is at least 18 years of age, be signed before a notary public or other authorized individual. If the registrant is under 18 years of age, the delayed certificate of birth shall be signed by a parent, legal guardian, or attending physician before a notary public or other authorized individual.

(b) Each request for a delayed certificate of birth for a registrant under 10 years of age shall include the following:

(1) Two original documents or certified copies of two original documents dated at least one year before the date of the request or within the first year of the registrant's life, showing the registrant's date of birth or age;

(2) one original document or a certified copy of one original document showing the mother's presence in the state at the time of birth;

(3) one original document or a certified copy of one original document with information of the registrant's birthplace as Kansas; and

(4) one original document or a certified copy of one original document with at least one parent's name.

(c) Each request for a delayed certificate of birth for a registrant 10 years of age or older shall include the following:

(1) Four original documents or a certified copy of each of four original documents dated at least 10 years before the date of the request or within three years of the registrant's date of birth, each showing the registrant's date of birth or age;

(2) one original document or a certified copy of one original document with information of the registrant's birthplace as Kansas; and

(3) one original document or a certified copy of one original document with at least one parent's name. (Authorized by K.S.A. 2015 Supp. 65-2402; implementing K.S.A. 65-2419 and 65-2420; effective Jan. 1, 1966; amended June 24, 2016.)

28-17-11. (Authorized by K.S.A. 65-2419, 65-2420; effective Jan. 1, 1966; revoked June 24, 2016.)

28-17-12. Delayed certificate of birth; filing fee. Each application for a delayed certificate of birth shall be accompanied by a fee of \$20.00 for the filing and registration of the birth certificate. A certified copy may be issued in accordance with K.A.R. 28-17-6. (Authorized by and implementing K.S.A. 65-2420; effective Jan. 1, 1966; amended Jan. 1, 1968; amended May 1, 1983; amended Oct. 22, 1990; amended Oct. 7, 1991; amended, T-28-9-25-92, Sept. 25, 1992; amended Nov. 16, 1992; amended Jan. 15, 2010.)

28-17-13. Maternity home, clinic and hospital reports. Each person in charge of a maternity home, clinic or hospital shall report to the department on or before the fifth day of each month a complete list of births and stillbirths that occurred in the institution during the preceding calendar month. The list shall include the child's name and date of birth, and the name of the attending physician and shall be submitted on a form provided by the department. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2425; effective Jan. 1, 1966; amended May 1, 1986.)

28-17-14. Required records of institutions. It shall be the duty of the state registrar, or his duly authorized agents, to inspect the records of all hospitals and other institutions, both public and private, as often as in the judgment of the state registrar it may be necessary to do so.

All hospitals and institutions shall keep a record of personal particulars and data concerning each

person admitted or confined to such hospital or other institution. This record shall include such information as required by the standard certificate of birth, death, and stillbirth forms issued under the provisions of this act. The record shall be made at the time of admission from information provided by such person, but when it cannot be so obtained, the same shall be obtained from relatives or other persons acquainted with the facts. The name and address of the person providing the information shall be a part of the record. (Authorized by K.S.A. 65-2402, 65-2425; effective Jan. 1, 1966.)

28-17-15. State registrar to prescribe forms. All paper or electronic forms used in registering, recording, and preserving the records shall be prescribed by the department. Each local registration officer shall accept and use only forms prescribed by the state registrar and shall issue out-of-state transit permits only when the proper forms are used and completed. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2415; effective Jan. 1, 1966; amended May 1, 1986; amended Oct. 22, 1990; amended, T-28-4-25-00, April 25, 2000; amended Aug. 4, 2000.)

28-17-16. Funeral directors reports. Each funeral director shall submit to the department, on or before the fifth day of each month, a report regarding each body prepared for burial by that establishment during the preceding calendar month. The report shall list:

(a) the name of the deceased;

(b) the date of death; and

(c) the place of death. (Authorized by K.S.A. 65-2402; implementing 65-2429; effective Jan. 1, 1966; amended May 1, 1986.)

28-17-17. (Authorized by K.S.A. 65-2402, 65-2426; effective Jan. 1, 1966; revoked May 1, 1983.)

28-17-18. Divorce or annulment become final. For the purpose only of determining on what date a clerk of a district court should submit a report of divorce or annulment of marriage, a divorce or annulment decree is final on the date the judgment is rendered by the district judge, unless appealed within ten (10) days from that date. (Authorized by K.S.A. 65-2402, 65-2433; effective Jan. 1, 1966.)

28-17-19. Unattended births. Additional information for each unattended birth shall be submitted to the office of vital statistics for inclusion on the original birth certificate within 90 days

of the date the birth certificate is filed with the office of vital statistics. If an unattended birth is not registered within six months of the date of birth, a delayed birth certificate shall be filed in accordance with K.S.A. 65-2419 and K.S.A. 65-2420, K.A.R. 28-17-8, K.A.R. 28-17-9, K.A.R. 28-17-10, K.A.R. 28-17-11 and K.A.R. 28-17-12. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2410, as amended by L. 1990, Chap. 226; effective Jan. 1, 1966; amended May 1, 1987; amended Oct. 22, 1990.)

28-17-20. Corrections to certificates and records. Corrections to certificates and records may be made within the time limit indicated in each subsection.

(a) Amendments within 90 days.

(1) Within 90 days of receipt of an original vital record in the office of vital statistics, the following records in which an inaccuracy or an incomplete item is apparent on the certificate may be changed to show the accurate and complete facts:

(A) Birth certificates;

(B) any part of a death certificate other than the medical section describing the cause of death;

(C) any part of a stillbirth certificate, other than the medical section describing the cause of death;

(D) marriage certificates; and

(E) divorce certificates.

(2) The changes specified in this subsection shall be made as follows:

(A) Any death or stillbirth certificate may be amended by drawing a single line through the incorrect information in the appropriate space or by inserting the correct information in the appropriate space, if left blank on the original certificate. For each amendment, the date of the amendment and the word "amended" shall be written or typed on the certificate. The process of amendment specified in this paragraph shall not be used more than one time for the same item.

(B) A new certificate shall be created if any item to be corrected is not left blank on the original certificate or if a death or stillbirth certificate item has already been amended. This process of amendment shall not be used more than one time for the same item unless accompanied by a court order, except when amending a death or stillbirth certificate.

(C) If the registrant is a minor, the birth certificate may be amended at the request of a parent by submission of an affidavit and supporting evidence to substantiate each item to be amended,

unless the item to be amended is to add the name of a parent, to correct the name of either parent or of the registrant, or to change the registrant's last name to that of either parent. Any of these amendments may be made pursuant to K.S.A. 23-2223, and amendments thereto.

(D) The process of amendment specified in paragraph (a)(2) shall be used when affidavits and supporting evidence have been furnished to and accepted by the secretary or the secretary's designee. The date of the amendment and the word "amended" shall be placed on the original certificate or the newly created certificate.

(3) An amendment fee, as specified in K.A.R. 28-17-6, shall be required, unless changes are made within the first 90 days after receipt of a death certificate or a stillbirth certificate in the office of vital statistics.

(b) Amendments after 90 days. After 90 days of receipt of the vital record in the office of vital statistics, amendments may be made as follows:

(1) Birth certificates.

(A) Any birth certificate may be amended upon the registrant's submission, or parent's submission if the registrant is a minor, of at least two documents that substantiate each item to be amended and that are executed and dated at least five years before the request for the amendment or before the tenth birthday anniversary of the registrant, except that the following items shall be corrected as specified:

(i) The item recording the registrant's sex may be amended if the amendment is substantiated with the registrant's affidavit, or a parent's affidavit if the registrant is under the age of 18, that the sex was incorrectly recorded and with medical records substantiating the registrant's sex at the time of birth.

(ii) If the registrant is a minor, any request by a parent to change an item or items by adding the name of a parent, correcting the name of either parent or of the registrant, or changing the registrant's last name to that of either parent shall be made pursuant to K.S.A. 23-2223, and amendments thereto.

(iii) Any registrant who is of legal age may amend the order of the registrant's first and middle names if the amendment is substantiated with one of the documents specified in paragraph (b)(1)(A).

(iv) Any registrant who is of legal age may place the registrant's first name or middle name, or both, on the record only if there is no first name

and no middle name on the original certificate and if the amendment is substantiated with one of the documents specified in paragraph (b)(1)(A).

(v) Any registrant who is of legal age may correct the spelling of the registrant's first name, middle name, or last name if the amendment is substantiated with one document established before the tenth birthday anniversary of the registrant. Changing the first name, middle name, or last name of the registrant shall not be considered to be correcting the spelling of the registrant's first name, middle name, or last name.

(vi) A registrant who is of legal age may correct the parents' names, if one of the required documents specified in paragraph (b)(1)(A) is the marriage license or birth certificate of the parent or parents.

(vii) The registrant's birth date on the certificate may be changed if both required documents were executed and dated before the tenth birthday anniversary and if the change is consistent with the recorded filing date.

(B) Any item that has been previously amended may be changed only pursuant to a court order.

(C) The sufficiency of affidavits and supporting evidence shall be determined by the secretary or the secretary's designee.

(D) The original certificate shall remain on file unchanged and shall be placed in a sealed file to be opened only by a court order. The new certificate shall be marked "amended" and shall indicate the date of the amendment.

(E) Each request for an amendment to a birth certificate that does not require a court order shall be submitted by the parent or legal guardian of a registrant not of legal age, or by the registrant if of legal age. The person submitting the request shall execute a notarized affidavit stating the true facts to be recorded.

(2) Death certificates: personal data.

(A) Personal data may be amended without a court order if the request is made within the first 12 months after filing the original certificate.

(B) Requests for amendments to personal data may be made by the funeral director or person who submitted the original certificate.

(C) The original certificate shall remain on file unchanged and shall be placed in a sealed file unless required to be opened only by a court order. The new certificate shall be prepared by the funeral director or person who submitted the original certificate or by the state registrar. The medical section shall again be completed, and the required

signatures shall be secured whenever possible. The signatures may be typed if the required signatures are unattainable and a written statement of the reason the signatures are unattainable is attached to the certificate. The certificate shall not be accepted if the stated reason for the typed signature is inadequate, as determined by the state registrar. Upon acceptance by the state registrar, the new certificate shall be marked "amended" and shall indicate the date of the amendment.

(3) Stillbirth certificates: personal data.

(A) Personal data may be amended upon the request of a parent and the submission of affidavits and supporting evidence to substantiate each item to be amended.

(B) Any item that was previously amended may be changed only pursuant to a court order.

(C) The sufficiency of affidavits and supporting evidence shall be determined by the secretary or the secretary's designee.

(D) The original certificate shall remain on file unchanged and shall be placed in a sealed file to be opened by a court order. The new certificate shall be marked "amended" and shall indicate the date of the amendment.

(4) Marriage certificates: personal data.

(A) Personal data may be amended upon the request of either spouse and the submission of affidavits and supporting evidence to substantiate each item to be amended.

(B) Any item that was previously amended may be changed only pursuant to a court order.

(C) The sufficiency of affidavits and supporting evidence shall be determined by the secretary or the secretary's designee.

(D) The original certificate shall remain on file unchanged and shall be placed in a sealed file to be opened by a court order. The new certificate shall be marked "amended" and shall indicate the date of the amendment.

(5) Divorce certificates: personal data.

(A) Personal data may be amended upon the request of either spouse and the submission of affidavits and supporting evidence to substantiate each item to be amended.

(B) Any item that was previously amended may be changed only pursuant to a court order.

(C) The sufficiency of affidavits and supporting evidence shall be determined by the secretary or the secretary's designee.

(D) The original certificate shall remain on file unchanged and shall be placed in a sealed file to be opened by a court order. The new certificate

shall be marked “amended” and shall indicate the date of the amendment.

(c) Amendments with no time limit.

(1) Death and stillbirth certificates: medical section data.

(A) Requests for amendments to the medical section data may be made only by the physician who signed the medical section on the original certificate or by the coroner in the jurisdiction the death or stillbirth occurred.

(B) Medical section data may be amended in either of the following ways:

(i) The original certificate shall remain on file unchanged, and the written statement or affidavit of the certifying physician or coroner shall be appended to the back of the original certificate. The original certificate shall be marked “amended” and shall indicate the date of the amendment.

(ii) A certifying physician or coroner may request the establishment of a new death certificate or stillbirth certificate. The funeral director or person who submitted the original certificate or the state registrar shall enter the personal data and forward the certificate to the certifying physician or coroner to sign the medical section. When all items have been completed, the new certificate shall be submitted to the office of vital statistics, and upon acceptance of the certificate, the certificate shall be marked “amended” and shall indicate the date of the amendment. The original death or stillbirth certificate shall be placed in a sealed file to be opened by a court order. (Authorized by K.S.A. 2015 Supp. 65-2402 and K.S.A. 65-2422c; implementing K.S.A. 65-2422c; effective Jan. 1, 1966; amended May 1, 1987; amended May 1, 1988; amended Oct. 22, 1990; amended, T-28-9-25-92, Sept. 25, 1992; amended Nov. 16, 1992; amended Aug. 16, 1993; amended, T-28-11-5-04, Nov. 5, 2004; amended Feb. 25, 2005; amended June 24, 2016.)

28-17-21. Dissemination of certain information to state and federal agencies. Certain information extracted from death records may be released to state and federal agencies in the form of a computer data tape to include name of deceased, date of death, date of birth, county of residence, and social security number. This information shall be released on an annual basis upon written request. The written request shall include: a statement as to how the information shall be used; a statement of confidentiality assuring the information shall be used for the agreed upon

purpose only; and assurance that no contact shall be made based upon information obtained. The information shall be disseminated to the requestor in a standard format to be determined by the department. The state registrar shall determine the fee to be charged for the data tape based on costs for providing those services and shall prescribe the manner in which those costs are to be paid. (Authorized by K.S.A. 65-2402; implementing K.S.A. 65-2422, as amended by L. 1987, Ch. 241, Sec. 1; effective May 1, 1988.)

28-17-22. Enforcement of uniform vital statistics act. Each violation of K.S.A. 65-2401 et seq., and amendments thereto, and these regulations shall, upon discovery of the violation, be reported to the state registrar. Each reported case involving any such violation shall then be reported by the state registrar to the county attorney, the district attorney, or the official acting in that capacity for prosecution, as specified in K.S.A. 65-2434 and amendments thereto. (Authorized by and implementing K.S.A. 65-2402, 65-2406, and 65-2434; effective, T-28-11-5-04, Nov. 5, 2004; effective Feb. 25, 2005.)

Article 18.—ANIMAL AND RELATED WASTE CONTROL

28-18-1. Definitions. Each of the following terms, as used in this article of the department’s regulations, shall have the meaning specified in this regulation: (a) “Animal unit” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(b) “Animal unit capacity” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(c) “Animal waste management system” means any land, structures, or practices utilized for the collection, containment, storage, distribution, land application, or disposal of animal or other process wastes generated by confined feeding facilities. This term shall include any of the following:

(1) Site grading to divert extraneous, uncontaminated precipitation runoff around the confined feeding facility;

(2) structures designed and constructed to collect, control the flow of, and direct animal or other process wastes;

(3) vegetation cover utilized for controlling erosion or for filtering animal or other process wastes;

(4) tanks, manure pits, or other structures de-

signed and constructed to collect or store animal or other process wastes;

(5) waste-retention lagoons or ponds;

(6) land used for the application, utilization, or disposal of animal or other process wastes; and

(7) waste treatment facilities.

(d) “Authorized representative” means either of the following:

(1) Any person employed by the department; or

(2) an entity contracted by the department to conduct inspections and the review of records required by this article of the department’s regulations.

(e) “Certification” means a document issued by the secretary in lieu of a water pollution control permit, indicating that the confined feeding facility meets the requirements of the applicable animal waste management statutes and regulations and does not represent a significant water pollution potential.

(f) “Change in operation” and “modification” mean any of the following:

(1) Expansion or enlargement of a confined feeding facility beyond the scope or boundaries established by registration, permit, certification, or approved plans and specifications;

(2) any increase in the animal unit capacity beyond that authorized by a permit or certification; or

(3) a change in construction or operation of a confined feeding facility that affects the collecting, storage, handling, treatment, utilization, or disposal of animal or other process wastes.

(g) “Clean water act” and “CWA” mean the federal water pollution control act, 33 U.S.C. 1251 et seq., as in effect on November 27, 2002.

(h) “Closure plan” means a written document that identifies the practices and procedures that the operator plans to use when closing the confined feeding facility or any part of the confined feeding facility.

(i) “Confined feeding facility” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(j) “Department” and “KDHE” mean Kansas department of health and environment.

(k) “Director” means director of the division of environment of the Kansas department of health and environment.

(l) “Division” means division of environment, Kansas department of health and environment.

(m) “Entity” means a person, individual, association, company, corporation, institution, group of individuals, joint venture, partnership, trust, or federal, state, county, or municipal agency or de-

partment legally capable of conducting business or owning real or personal property in Kansas.

(n) “Environmental protection agency” and “EPA” mean United States environmental protection agency.

(o) “Equus Beds” means an aquifer underlying the sections of land listed in the following table:

(p) “Federal permit,” “national pollutant discharge elimination system permit,” and “NPDES permit” mean an authorization, license, or equivalent control document issued by the EPA or an approved state to implement the requirements of 40 C.F.R. parts 122, 123, 124, and 412.

(q) “Food animals” means animals, fish, or fowl produced for consumption.

(r) “Fur animals” means animals raised for the skin, pelt, or fur.

(s) “Groundwater” means water located under the surface of the land that is or can be the source of supply for wells, springs, seeps, or streams, or that is held in aquifers. Groundwater shall be considered capable of being a source of supply for wells if at least one of the following conditions is met:

(1) The groundwater can be produced at a rate of 10 gallons or more per hour from a borehole with a diameter of nine or fewer inches. In determining the groundwater production rate for an excavation, borehole, or existing water or monitoring well, the quantity of produced water shall be adjusted for comparison purposes to the surface area of a borehole with a diameter of nine inches.

(2) The groundwater is currently being used within ½ mile of the proposed waste-retention lagoon or pond, regardless of the rate at which the groundwater can be produced.

(3) There is evidence of past groundwater use within ½ mile of the proposed waste-retention lagoon or pond.

(t) “Habitable structure” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(u) “Impermeable synthetic membrane liner” means a commercially manufactured membrane liner composed of synthetic materials commonly identified as being plastic, plastic polymer, or other synthetic materials that, when installed, provide for the more stringent of either of the following:

(1) A maximum monitored or calculated seepage rate of 1/64 inch per day; or

(2) the liner manufacturer’s criteria for the maximum monitored or calculated seepage rate for the installed membrane liner, expressed in units of volume per unit area per unit of time (gallons per square foot per day).

(v) “Land application” means the distribution of animal or other process wastes onto, or incorporation into, the soil mantle for the purpose of disposal or utilization by crops or vegetation.

(w) “Liner” means any designed barrier in the form of in situ, layer, membrane, or blanket materials utilized or installed to reduce the potential for a significant hydrologic connection between animal or other process wastes that are controlled or retained by animal waste management systems and waters of the state.

(x) “Maximum soil liner seepage rate” and “specific discharge” mean the flow rate of water through the liner of a waste-retention lagoon or pond and shall be expressed as velocity (distance/time). The maximum seepage rate shall be calcu-

lated as $v = k(h/d)$, in which “k” is the hydraulic conductivity (coefficient of permeability) and “(h/d)” is the hydraulic gradient. The hydraulic gradient is the maximum vertical distance “h” measured from the liquid surface to the liner bottom, divided by the thickness of the soil liner “d.” When calculating the maximum seepage rate, the maximum design depth, not including design freeboard, shall be used.

(y) “Minimum standards of design, construction, and maintenance” means the following:

- (1) Effluent standards and limitations;
- (2) other performance standards for treatment or utilization; and
- (3) other standards of design, construction, and maintenance for confined feeding facilities or animal waste management systems, published by KDHE.

(z) “Monitoring” means all procedures using any of the following methods:

- (1) Either systematic inspection or collection and analysis of data on the operational parameters of a confined feeding facility or an animal waste management system; or
- (2) the systematic collection and analysis of data on the quality of the animal or other process wastes, groundwater, surface water, or soils on or in the vicinity of the confined feeding facility or animal waste management system.

(aa) “National pollutant discharge elimination system” and “NPDES” mean the national system for the issuance of permits under 33 U.S.C. section 1342 and shall include any state or interstate program that has been approved by the EPA administrator, in whole or in part, pursuant to 33 U.S.C. section 1342.

(bb) “Nutrient management plan” means a written document that identifies the practices and procedures that an operator required to obtain a federal permit plans to use to operate and maintain the animal waste management system and to manage the handling, storage, utilization, and disposal of wastes generated by the confined feeding facility.

(cc) “Oil or gas well” has the meaning specified for the term “well” in K.S.A. 55-150, and amendments thereto.

(dd) “Operator” means an individual, association, company, corporation, municipality, group of individuals, joint venture, partnership, entity, state or federal agency or department, or any business owning, leasing, or having charge or control of one or more confined feeding facilities.

(ee) “Pleasure animals” means dogs, cats, rabbits, horses, and exotic animals.

(ff) “Point source” has the meaning specified in K.A.R. 28-16-28b.

(gg) “Pollution” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(hh) “Precipitation runoff” means the rainwater or the meltwater that is derived from snow, hail, sleet, or other forms of atmospheric precipitation and that flows by gravity over the surface of the land.

(ii)(1) “Process wastes” means any of the following:

(A) Excrement from animals, wastewater, and animal carcasses;

(B) precipitation that comes into contact with any manure, litter, bedding, or other raw, intermediate, or final material or product used in or resulting from the production of animals or direct products, including meat, milk, and eggs;

(C) spillage or overflow from animal or poultry watering systems;

(D) wastes from washing, cleaning, or flushing pens, barns, manure pits, equipment, trucks, trailers, milking parlors, milking equipment, and other associated animal facilities;

(E) wastes from washing animals or spraying animals for cooling;

(F) wastes from dust control;

(G) boiler blowdown and water softener regenerate wastes;

(H) precipitation runoff from confinement, loading, and unloading areas;

(I) spillage of feed, molasses, animal wastes, or any other process wastes described in this regulation;

(J) discharges from land application fields that occur during application;

(K) precipitation runoff from land application fields, if liquid or concentrated liquid wastes are applied during frozen, snow-covered, or saturated soil conditions without approval by the department;

(L) raw, intermediate, or finished materials associated with wastes or contaminated storm water runoff from animal waste or dead animal composting operations;

(M) silo liquors; or

(N) flows or runoff from waste storage areas.

(2) Process wastes shall not include animal wastes spilled by trucks transporting livestock on city, township, county, state, or federal streets, roads, or highways.

(jj) “Public livestock market” has the meaning specified in K.S.A. 47-1001, and amendments thereto. This term shall include public livestock markets where federal veterinary inspections are regularly conducted.

(kk) “Registration” means any required fee and the properly completed and executed documents designated by the division and any additional required documents or information necessary for determining the need for a water pollution control permit.

(ll) “Salt solution mining well” has the meaning specified in K.S.A. 55-1,120, and amendments thereto.

(mm) “Secretary” means secretary of the Kansas department of health and environment.

(nn)(1) “Sensitive groundwater areas” means aquifers generally comprised of alluvial aquifers, the area within the boundaries of the Equus Beds groundwater management district no. 2 (GMD #2), and the dune sand area located south of the great bend of the Arkansas River. A sensitive groundwater area shall be any section of land specified in the department’s “Kansas sensitive groundwater areas for wastewater lagoons,” which is adopted by reference in K.A.R. 28-16-160.

(2) Any operator proposing a new animal waste-retention lagoon or expansion of an existing animal waste-retention lagoon may request that the director make a site-specific sensitive groundwater area determination. The request shall be submitted in writing to the director. The request shall contain supporting data and information and an explanation of why the area in question should not be considered a sensitive groundwater area.

(oo) “Sewage” has the meaning specified in K.S.A. 65-164, and amendments thereto.

(pp) “Significant water pollution potential” means any of the following, as determined by the secretary:

(1) A confined feeding facility that utilizes any of the following:

(A) Structures designed and constructed to control the flow of or direct animal or other process wastes;

(B) structures designed and constructed to collect or store animal or other process wastes in tanks, manure pits, or other containment structures;

(C) waste-retention lagoons or ponds; or

(D) a waste treatment facility or facilities;

(2) lots, pens, or concentrated feeding areas with creeks, streams, intermittent waterways, or any other conveying channel or device that has

the potential to carry pollutants to waters of the state running through or proximate to the lots, pens, or concentrated feeding areas;

(3) any confined feeding facility that cannot retain or control animal or other process wastes on the confined feeding facility or property or adjacent property with the permission of the owner of the adjacent property; or

(4) a confined feeding facility that uses methods of improper collection, handling, or disposal of animal or other process wastes that have the potential to degrade or impair the quality of any waters of the state.

(qq) “Surface waters,” for water quality purposes, has the meaning specified in K.A.R. 28-16-28b.

(rr) “Truck-washing facility for animal wastes” means a truck-washing facility that exists solely for the purpose of washing animal wastes from trucks or trailers.

(ss) “Variance” means the secretary’s written approval or permit authorizing a proposed action that knowingly results in a lack of conformity with one or more provisions of the minimum standards of design, construction, and maintenance. Each variance authorized by the secretary shall be deemed to protect public health and the environment and to comply with the federal NPDES permit requirements.

(tt) “Waste management plan” means a written document that identifies the practices and procedures that an operator not required to obtain a federal permit plans to use to operate and maintain the animal waste management system and to manage the handling, storage, utilization, and disposal of wastes generated by the confined feeding facility.

(uu) “Waste-retention lagoon or pond” means excavated or diked structures or natural depressions provided for or used for the purpose of containing or detaining animal or other process wastes. Discharges from waste-retention lagoons or ponds shall not be allowed, except as authorized by a water pollution control permit.

(vv) “Waste treatment facility” means a structure or device that collects, stores, stabilizes, treats, or otherwise controls pollutants, so that after the discharge, disposal, or land application of treated wastes, water pollution is prevented and public health and the waters of the state are protected.

(ww) “Water pollution control permit” and “permit” mean an authorization, license, or equivalent control document issued by the sec-

retary. This term shall not include any document that has not yet been the subject of final action by the secretary.

(xx) "Water quality standards" means the Kansas surface water quality standards specified in K.A.R. 28-16-28b through K.A.R. 28-16-28h.

(yy) "Water well" has the meaning specified in K.S.A. 82a-1203, and amendments thereto.

(zz) "Waters of the state" has the meaning specified in K.S.A. 65-161, and amendments thereto.

(aaa) "Whole pond seepage test" means a measurement of the evaporation from, and the change in water level of, a waste-retention lagoon, pond, or structure or a swine waste-retention lagoon, pond, or structure using either of the following:

(1) Any method that meets the requirements specified in the section titled "conclusion: recommendations for a standard" on pages 9-12 in "standards for measuring seepage from anaerobic lagoons and manure storages," by Jay M. Ham, Ph.D., and Tom M. DeSutter, dated 2003. This section is hereby adopted by reference; or

(2) any equivalent method at least as protective of public health, safety, and the environment approved by the secretary. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-171a, 65-171d, and 65-171h; effective, E-67-5, May 31, 1967; effective Jan. 1, 1968; amended Jan. 15, 1999; amended March 16, 2007; amended Nov. 19, 2021.)

28-18-2. Registration and application requirements. (a) Each entity proposing the construction, modification, or expansion of an unregistered confined feeding facility, public livestock market, collection center, or transfer station and each operator of an existing, but unregistered, confined feeding facility, public livestock market, collection center, or transfer station shall submit a registration form for the facility to the secretary, if any of the following conditions is met:

(1) The proposed or existing unregistered facility has an animal unit capacity of 300 or more animal units.

(2) The proposed or existing unregistered facility presents a significant water pollution potential, as defined in K.A.R. 28-18-1.

(3) The proposed or existing unregistered facility is required by statute to obtain a permit from the secretary.

(4) The entity proposing the construction, modification, or expansion of an unregistered facility or the operator of an existing unregistered facility

elects to register the facility in order to obtain either a permit or certification, even though there is no requirement to obtain a permit or certification.

(b) Each entity or operator that submits a registration form to the department shall include the required \$25 fee.

(c) Each entity proposing the construction, modification, or expansion of a confined feeding facility, a public livestock market, a collection center, a transfer station, or a truck-washing facility for animal waste and each operator of an unpermitted confined feeding facility, public livestock market, collection center, transfer station, or truck-washing facility for animal waste shall submit to the secretary a permit application for the facility if any of the following conditions is met:

(1) The proposed facility or existing unpermitted facility presents a significant water pollution potential, as defined in K.A.R. 28-18-1.

(2) The proposed facility or existing unpermitted facility is required by statute to obtain a permit.

(3) The entity proposing the construction, modification, or expansion of the facility or the operator of an existing unpermitted facility elects to obtain a permit, even though a permit is not required.

(d) Each entity or operator that submits a permit application to the department shall include the permit fee required by K.A.R. 28-16-56d.

(e) The animal unit capacity of a confined feeding facility using an animal waste management system, for species other than those included in the definition of animal unit, shall be determined by the secretary on a case-by-case basis. The quantity or concentration of animal waste produced by the species in comparison to those species addressed in the animal unit definition shall be the factor used by the secretary in determining the animal unit capacity.

(f) Each entity or operator proposing the construction, modification, or expansion of a confined feeding facility and each operator of an unpermitted confined feeding facility required by statute or regulation to obtain a federal permit shall apply to the secretary for a federal permit.

(g) Each entity or operator that is proposing the construction, modification, or expansion of a confined feeding facility, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes and that is required to obtain a permit or certification shall obtain a permit or certification from the secretary before initiating operation of the facility. (Autho-

rized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-171h; effective, E-67-5, May 31, 1967; effective Jan. 1, 1968; amended Jan. 15, 1999; amended March 16, 2007.)

28-18-3. Separation distance requirements. (a) Separation distances between confined feeding facilities and any habitable structure shall conform to the provisions and requirements of K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and amendments thereto.

(b) The operator shall provide to the department any information required to ascertain the distance to the nearest habitable structure or determine which habitable structure is the nearest to the proposed or existing confined feeding facility.

(c) When the animal unit capacity of a confined feeding facility is comprised of swine, in addition to other animals or fowl, the swine-specific separation distance requirements related to any habitable structure, wildlife refuge, or city, county, state or federal park shall be applied only to the animal unit capacity of the swine facility operation. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective, E-67-5, May 31, 1967; effective Jan. 1, 1968; amended Jan. 15, 1999.)

28-18-4. Filing of applications and payment of fees. (a) Each entity seeking a permit shall submit the application required by K.A.R. 28-16-59.

(b) In order for the department to provide adequate public notice regarding a permit for any proposed new construction or proposed new expansion of a confined feeding facility, a public livestock market, a collection center, a transfer station, or a truck-washing facility for animal wastes, each applicant shall provide to the secretary the name and mailing address of each of the following:

(1) The United States post office or offices serving the immediate area of the confined feeding facility; and

(2) each owner of a habitable structure or any property located within one mile of the confined feeding facility.

(c) In addition to the application requirements of K.A.R. 28-16-59, for any new construction or new expansion of a confined feeding facility, each applicant shall submit the following information:

(1) A map identifying the location and layout of the confined feeding facility or the confined feeding facility perimeter;

(2) a map identifying the location of any habitable structure or city, county, state, or federal park within one mile of the confined feeding facility or the confined feeding facility perimeter;

(3) a map identifying all water wells on the confined feeding facility property;

(4) a map identifying any streams and bodies of surface water within one mile of the confined feeding facility or the confined feeding facility perimeter;

(5) for confined feeding facilities that utilize a waste-retention lagoon or pond, any information that the applicant possesses indicating the presence of any unplugged oil, gas, or salt solution mining wells located at the proposed or existing confined feeding facility;

(6) a waste management plan for any confined feeding facility whose operator is not required to obtain a federal permit;

(7) a nutrient management plan for any confined feeding facility whose operator is required to obtain a federal permit;

(8) a groundwater monitoring plan, if required by the secretary; and

(9) a closure plan for any confined feeding facility whose operator is required to obtain a federal permit and that is located over the Equus Beds.

(d)(1) If adjacent confined feeding facilities use a common animal waste management system or if two or more confined feeding facilities do not adjoin but use a common animal waste management system, the multiple confined feeding facilities shall be considered one confined feeding facility.

(2) If two or more confined feeding facilities do not adjoin and do not have a common waste management system or if two or more confined feeding facilities adjoin but do not use a common animal waste management system, the confined feeding facilities shall be considered separate confined feeding facilities.

(e) Each applicant for a confined feeding facility permit shall submit the application fee required by K.A.R. 28-16-56d.

(f) Each applicant for a confined feeding facility permit shall sign the permit application as required by 40 C.F.R. 122.22, dated July 1, 2019,

which is hereby adopted by reference. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-171d, and 65-171h; effective, E-67-5, May 31, 1967; effective Jan. 1, 1968; amended Jan. 15, 1999; amended March 16, 2007; amended Aug. 6, 2021.)

28-18-5. Transfer of a permit or certification. (a) The automatic transfer of a permit shall be prohibited. Each operator wanting to transfer a water pollution control permit of a confined feeding facility shall make application consistent with the provisions of the regulations in this article.

(b) The automatic transfer of a certification shall be prohibited. Each operator wanting to transfer a certification for a confined feeding facility shall register with the department, in accordance with this article.

(c) The existing permit or certification shall remain in effect until the department authorizes the transfer by letter or reissues the permit or certification. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18-6. Development of a draft permit. Development of each draft permit shall be consistent with the requirements of K.A.R. 28-16-60. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18-7. Public notice of permit actions and public hearings. Public notice of permit actions and public hearings shall be consistent with the requirements of K.A.R. 28-16-61. Public hearings scheduled by the department shall address only those matters for which the secretary has authority. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18-8. Permit; terms and conditions.

(a) The terms and conditions of all permits shall be consistent with the requirements of K.A.R. 28-16-62, as appropriate.

(b)(1) Animal waste management systems shall be designed, constructed, operated, and maintained in a manner that prevents pollution of waters of the state.

(2) Each operator of an animal waste management system for a confined feeding facility who is required to obtain a federal permit shall ensure that the animal waste management system is designed, constructed, operated, and maintained to prevent the discharge of animal or other process wastes to surface waters of the state. Any operator of an animal waste management system of a confined feeding facility may discharge the following to surface waters of the state, whenever precipitation events, either chronic or catastrophic, cause an overflow from an animal waste management system designed, constructed, operated, and maintained to contain all animal and other process wastes:

(A) Animal or other process wastes; and

(B) the direct precipitation and the runoff from a 25-year, 24-hour precipitation event for the location of the confined feeding facility.

(3)(A) Except as provided in paragraph (b)(3)(B), each animal waste management system for any confined feeding facility whose operator is not required to obtain a federal permit shall be designed, constructed, operated, and maintained to prevent the discharge of animal or other process wastes to surface waters of the state as required in paragraph (b)(2).

(B) Any operator of an animal waste management system for a confined feeding facility who is not required to obtain a federal permit may discharge animal or other process wastes to surface waters of the state, consistent with the requirements of K.A.R. 28-16-28b through K.A.R. 28-16-28g, K.A.R. 28-16-57a, and K.A.R. 28-16-62, as appropriate, when specifically authorized by a permit.

(c) For each emergency or accidental discharge, overflow, or unplanned release of animal or other process wastes, each operator shall report the incident to the department within two hours of discovery. Each operator shall report any emergency, spill, accidental discharge, overflow, or unplanned release associated with animal or other process wastes to the department, using the telephone numbers provided by the director. Each operator shall submit a written report to the department within three days of the incident.

(d) Each operator shall retain a copy of the current permit issued by the secretary at the site office for the facility or at a central records location.

(e) Each operator shall be responsible for advising the department within 60 days of any changes in mailing address or telephone number regarding the facility or designated facility contact.

(f) Each operator shall operate the facility in a manner that minimizes or prevents any discharge that is in violation of the permit or that has a potential to adversely affect human health or the environment.

(g) Each operator shall, at all times, properly operate and maintain the animal waste management system and any related appurtenances that are installed or utilized by the operator to achieve compliance with the conditions of the permit. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, K.S.A. 65-165, K.S.A. 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-171h; effective Jan. 15, 1999; amended March 16, 2007.)

28-18-9. Certification; terms and conditions. (a) Each operator shall comply with all conditions, requirements, limitations, and operating provisions stipulated in the certification.

(b) Operation of a confined feeding facility in violation of any conditions, requirements, limitations, and operating provisions of a certification, or in a manner that represents a significant water pollution potential, shall result in the revocation of the certification and any appropriate enforcement action. If a significant water pollution potential exists as defined in K.A.R. 28-18-1, the operator shall apply for a permit. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2003 Supp. 65-166a, K.S.A. 2003 Supp. 65-171d, and K.S.A. 65-171h; effective Jan. 15, 1999; amended March 16, 2007.)

28-18-10. Permits; monitoring and reporting. (a) Any monitoring and reporting required by the department in the terms and conditions of a permit, certification, order, directive, or consent agreement shall be conducted consistent with the provisions of K.A.R. 28-16-63, as appropriate.

(b) The emergency or accidental discharge, overflow, or unplanned release of animal or other process wastes into surface waters of the state shall be reported to the department, pursuant to K.A.R. 28-16-27, within two hours of discovery.

Each operator shall report any emergency, spill, accidental discharge, overflow, or unplanned release associated with animal or other process wastes to the department using telephone numbers as provided by the department. Each operator shall submit a written report to the department within three days of the incident.

(c) Any analysis required by a permit, certification, order, directive, or consent agreement of the department shall be performed in accordance with the provisions of 40 C.F.R. Part 136, as in effect on July 1, 1998, or as approved by the department.

(d) Each analysis shall be performed by a laboratory that has been certified by the department pursuant to K.S.A. 65-1711, and amendments thereto, or as approved by the department.

(e) 40 C.F.R. Part 136, as in effect on July 1, 1998, is adopted by reference. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18-11. Confined feeding facilities; federal requirements. For the purpose of issuing federal permits and administering NPDES program requirements, the following definitions and provisions, as in effect on July 1, 2006 and as amended by 72 fed. reg. 40250 on July 24, 2007, are hereby adopted by reference:

(a) The concentrated animal feeding operation exclusions specified in 40 C.F.R. 122.3 (e) and 40 C.F.R. 122.3 (f);

(b) the provisions addressing concentrated animal feeding operations specified in 40 C.F.R. 122.23(b), (c), and (e), and 122.42(e);

(c) the provisions addressing concentrated aquatic animal feeding operations specified in 40 C.F.R. 122.24 and appendix C to 40 C.F.R. Part 122; and

(d) except for 40 C.F.R. 412.32, 412.44, and 412.46, the provisions addressing effluent limitations for concentrated animal feeding operations specified in 40 C.F.R. Part 412. (Authorized by K.S.A. 2006 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, K.S.A. 65-166, K.S.A. 2006 Supp. 65-166a, K.S.A. 2006 Supp. 65-171d, and K.S.A. 65-171h; effective Jan. 15, 1999; amended March 16, 2007; amended Jan. 4, 2008.)

28-18-12. Design and construction of animal waste management systems. (a) If a confined feeding facility represents a significant water pollution potential or if the operator of a facility is required by statute or regulation to obtain a permit, as determined by the secretary, the operator shall provide an animal waste management system that is designed in accordance with the minimum standards of design, construction, and maintenance and is constructed and operated in accordance with construction plans, specifications, and either a waste management plan or nutrient management plan approved by the secretary. If site topography, operating procedures, experience, and other available information indicate that more than the minimum standards of design, construction, and maintenance are required to effect adequate water pollution control, additional provisions may be required. Each applicant shall ensure that any new construction or new expansion of a confined feeding facility or animal waste management system meets the requirements of the "minimum standards of design, construction, and maintenance," as defined in K.A.R. 28-18-1.

(b) The operator shall not initiate operation of the new confined feeding facility or animal waste management system or the expanded portions of any existing confined feeding facility or animal waste management system, until after issuance of the new or modified permit by the secretary. Initiation of construction before the issuance of a new or modified permit by the secretary shall be deemed to be solely at the risk of the operator.

(c) For the purpose of these regulations, each reference to a professional engineer or consultant shall be deemed to designate an individual offering a service for a fee for the design of a confined feeding facility or animal waste management system, exclusive of any nutrient utilization plan, soil or cropping consultations, hydrologic work involved in conducting hydrologic or geologic investigations, or in the siting, design, or construction of groundwater monitoring wells. Each reference to a professional engineer shall be deemed to designate an individual licensed to practice engineering in Kansas by the Kansas state board of technical professions.

(d) Consultants that prepare plans and specifications for the new construction or new expansion of confined feeding facilities that are submitted to comply with statutes and regulations shall provide KDHE with documentation that adequate general commercial liability insurance coverage address-

ing errors and omissions in the design plans and specifications has been obtained and is in effect.

(e) (1) Each operator shall initiate any proposed new construction or new expansion of a confined feeding facility that has been approved by the secretary and for which the required permit or permit modification has been issued, within two years after the date on which the permit or permit modification is effective or pursuant to the requirements of the permit issued by the secretary. Each operator shall complete any proposed new construction or new expansion of a confined feeding facility that has been approved by the secretary and for which the required permit or permit modification is issued, within three years after the date on which the permit or permit modification is effective or as required by the permit issued by the secretary.

(2) Failure to initiate the approved construction or expansion within two years and to complete the approved construction or expansion within three years after the effective date of the permit or permit modification shall void the secretary's approval of the construction plans, specifications, and other associated plans. If phased construction is proposed, the initiation and completion of construction shall conform to the schedule stipulated by the secretary.

(3) If the approval becomes void, the permit or permit modification shall remain in effect for the term of the permit, but the operator shall re-submit the construction plans, specifications, and other associated plans to the secretary for review and consideration for approval before initiating the construction or expansion of a confined feeding facility.

(f) Neither the approval of construction plans, specifications, or other required plans, nor the issuance of a permit or certification by the secretary shall prohibit the secretary from taking any enforcement action if the animal waste management system fails to protect the waters of the state, meet any specified effluent criteria, or comply with state surface water quality standards. In addition, the secretary's approval of the plans or the secretary's issuance of a permit or certification shall not constitute a defense by the operator regarding violation of any statute, regulation, permit condition, or requirement.

(g) A new confined feeding facility or animal waste management system shall not be built in any stream, river, lake, reservoir, or water bodies meeting the definition of jurisdictional wetlands

and consistent with the definition of “surface waters” in K.A.R. 28-16-28b.

(h) Each operator, when directed by the secretary, shall notify the department a minimum of two days before performing any soil sample collection activities or liner integrity testing.

(i) There shall be no deviation from plans and specifications submitted to and approved by the secretary, unless amended plans and specifications showing the proposed changes have been submitted to the department and approved by the secretary.

(j) Each construction plan shall indicate the location of any active, abandoned, or plugged water, oil, gas, or salt solution mining well within 600 feet of any planned location for a waste-retention lagoon or pond. If the operator is unable to confirm the exact location of any well or wells, the construction plan shall contain a note indicating the potential for the well or wells to be located in the vicinity of any proposed waste-retention lagoon or pond. Each active, abandoned, or plugged water, oil, gas, or salt solution mining well that is encountered during construction and that was not identified or located on the construction plan shall be reported to the department within 48 hours of discovery. Construction activities that would impact the well or wells or that would be in the immediate vicinity of the well or wells shall be immediately terminated until the secretary determines that the appropriate steps, including plugging the well, have been taken to protect public health and the environment.

(k) Following the completion of the proposed construction or proposed expansion and when requested by the secretary, each operator shall certify that the animal waste management system was constructed in accordance with the plans approved by the secretary. If the operator utilized a professional engineer or consultant to monitor the construction of the animal waste management system, then the certification shall also be signed by the professional engineer or the consultant who monitored the construction or installation of the animal waste management system, including any waste-retention lagoon or pond liner. The certification shall be based on actual observations during construction and any field or laboratory data developed during or following construction. The certification shall be maintained on-site or at a central records location and made available to the department, along with any supporting information, upon request.

(Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-171h; effective Jan. 15, 1999; amended March 16, 2007.)

28-18-13. Operation of animal waste management systems. (a) Each animal waste management system shall be designed, constructed, maintained, and operated to prevent pollution of waters of the state and to protect public health and the environment.

(b) Each animal waste management system shall be operated according to the plans approved by the secretary.

(c) When a liner is installed or constructed, the operator shall maintain the liner to comply with the minimum standards of design, construction, and maintenance. When soil liners are utilized, no trees or other deep-rooted vegetation shall be allowed to grow within 100 feet of the liner. Any mechanical or structural damage to the liner shall be reported to the department within two workdays of identification and shall be repaired in a time frame approved by the secretary and designed to protect public health and the environment.

(d) Each operator shall haul or transport animal or process wastes to land application sites in a manner that prevents loss or spillage during transport.

(e) When land application of animal or other process wastes is practiced, the application shall be conducted considering site-specific conditions to ensure the appropriate agricultural utilization of the nutrients in the animal or process wastes.

(f) Irrigation practices shall be managed to minimize ponding or puddling of animal or other process wastes at the land application site. Irrigation practices shall be managed to ensure that animal or other process wastes are not discharged from the application sites.

(g) Adequate equipment and land application areas shall be available for removal of animal or other process wastes and contaminated storm water runoff from the confined feeding facility to comply with the provisions of the permit and these regulations.

(h) (1) Unless approved in advance by the secretary, liquid waste, concentrated liquid animal waste, or other liquid process waste shall not be land-applied when the ground is frozen, snow-covered, or saturated, or during a precipitation event. Land application of animal or other process wastes

during these periods may be authorized by the secretary for use in filtering animal or other process wastes from retention structures that are properly operated and maintained and that are in imminent danger of overflow to surface waters of the state due to a chronic or catastrophic precipitation event.

(2) Solid animal or other process wastes may be applied to frozen ground only if the proposed application site and practices ensure that the wastes will be retained at the application site.

(i) (1) Each operator, as required by the facility permit issued by the secretary, shall conduct sampling and analysis of animal or process wastes or sites utilized for the application of animal or process wastes from confined animal feeding facilities, to determine nutrient and salinity levels, to confirm utilization of the animal or process wastes at agronomic rates, and to ensure that public health and the environment are protected.

(2) (A) Each operator of a confined feeding facility not required to obtain a federal permit shall sample the soil of each field identified in the waste management plan for the confined feeding facility if both of the following conditions are met:

(i) The field is identified by KDHE as located in a sensitive groundwater area or over the Equus Beds.

(ii) The field has received manure or wastewater in one or more of the previous five years.

(B) The sampling and analysis shall be conducted in accordance with the procedures approved by the secretary. The test results shall be sent to the department within 30 days of receipt of the test results.

(3) Each operator required to obtain a federal permit shall conduct soil and waste sampling and analysis in accordance with the nutrient management plan. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-171h; effective Jan. 15, 1999; amended March 16, 2007.)

28-18-14. Inspections. (a) Each operator shall provide all necessary specialized equipment, clothing, or appurtenances to enable any authorized representative to enter a confined feeding facility for inspection.

(b) Each operator that develops or modifies animal health protocols and that requests KDHE conformance with the protocols shall submit a copy of the protocols to the department within

30 days of establishing or modifying the animal health protocols.

(c) Each operator shall allow any authorized representative following animal health protocols access to any confined feeding facility to conduct an inspection of the animal waste management system.

(d) Each operator shall allow any authorized representative access to conduct periodic inspections and review records at any confined feeding facility, scheduled as follows:

(1) For any confined feeding facility identified as having uncontrolled process wastes, every six months; or

(2) for any confined feeding facility not identified as having uncontrolled process wastes, at least once every five years if the confined feeding facility has a capacity of 300 or more animal units. (Authorized by K.S.A. 65-170b and 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-170b, 65-171d, and 65-171h; effective Jan. 15, 1999; amended March 16, 2007; amended Nov. 19, 2021.)

28-18-15. Variance of specific requirements. (a) Each operator seeking a variance from the regulations in this article shall submit to the department a written request for variance from the regulations in this article and shall provide information relevant to the request.

(b) Each request shall specifically set forth why the variance should be considered and how the requested variance addresses the intent of this article.

(c) A variance may be granted by the department whenever site-specific conditions or proposals are in keeping with the purpose and intent of this article. (Authorized by and implementing K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, and K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; effective Jan. 15, 1999.)

28-18-16. Waste-retention lagoon or pond closure plan requirements. (a) Each operator shall notify the department of any intention to cease operation of, close, or abandon the waste-retention lagoon or pond.

(b) Each operator shall maintain and comply with a valid water pollution control permit for the confined feeding facility until closure of the waste-retention lagoon or pond is complete and all materials representing a threat to public health and the environment are removed.

(c) Each operator of a confined feeding facility located over the Equus Beds that is required to obtain a federal permit and proposes the new construction or expansion of a waste-retention lagoon or pond shall develop a waste-retention lagoon or pond closure plan. The operator shall submit the waste-retention lagoon or pond closure plan with the permit application to the department for consideration for approval. When submitting waste-retention lagoon or pond closure plans, each operator shall submit four paper copies or shall transmit an electronic copy of the closure plan.

(d) Each operator of a confined feeding facility required to obtain a federal permit shall develop a waste-retention lagoon or pond closure plan if all of the following conditions are met:

(1) The waste-retention lagoon or pond is located over the Equus Beds.

(2) The operator is applying for the renewal of the permit after the effective date of this regulation.

(3) The operator does not have an approved waste-retention lagoon or pond closure plan. The operator shall submit the closure plan with the permit renewal application to the department. When submitting a waste-retention lagoon or pond closure plan, the operator shall submit four paper copies or shall transmit an electronic copy of the plan.

(e) Each operator of a confined feeding facility with a waste-retention lagoon or pond shall submit a closure plan that includes the following information:

(1) A description of all animal waste management system components utilized to contain, control, or store process wastes at the facility;

(2) a description of the procedures to be employed to remove and dispose of animal or other process wastes;

(3) a description of the maintenance, deactivation, conversion, or demolition of all waste-retention lagoons or ponds or the closure of any waste-retention lagoon or pond by one of the following methods:

(A) Removing the berms and leveling and revegetating the site to provide erosion control;

(B) leaving the structure or structures in place for use as a freshwater farm pond or reservoir;

(C) retaining the structure or structures for future use as a part of an animal waste management system; or

(D) using any other method approved by the secretary that will be protective of the environ-

ment and meet all statutory and regulatory requirements; and

(4) a description of, and detailed drawings for, the plugging of any water or groundwater monitoring wells at the confined feeding facility.

(f) Each operator of a confined feeding facility required to have a waste-retention lagoon or pond closure plan shall amend and submit the amended plan to the department for approval whenever specifically directed by the secretary or whenever warranted by one or more of the following:

(1) Any significant changes in operation of the confined feeding facility;

(2) any significant change or modification in the animal waste management system; or

(3) any other significant conditions affecting the confined feeding facility or the animal waste management system.

(g) Each operator of a confined feeding facility required to develop a waste-retention lagoon or pond closure plan shall retain the current plan at the site office of the confined feeding facility or at a central records location in a manner that is accessible to inspection by any authorized representative.

(h) Within six months before the closure of a waste-retention lagoon or pond, the operator shall perform either of the following:

(1) Notification to the department of the proposed closure of the waste-retention lagoon or pond; or

(2) termination of operations for any confined feeding facility for which the operator is required to develop and implement a waste-retention lagoon or pond closure plan.

(i) Each operator seeking an extension of time for closure shall submit a written request detailing the reasons to the secretary. Only weather conditions or the legal change in ownership of the confined feeding facility shall be grounds for an extension.

(j) If the operator of a confined feeding facility is unwilling or unable to properly close the waste-retention lagoon or pond, the owner of the confined feeding facility and the property owner shall be responsible for closing the waste-retention lagoon or pond in a manner that protects the waters of the state, public health, and the environment. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-171d, and 65-171h; effective March 16, 2007; amended Nov. 19, 2021.)

28-18-17. Groundwater protection requirements for waste-retention lagoons or ponds and waste treatment facilities. (a) The provisions of this article of the department's regulations shall not apply to any permitted waste-retention lagoon or pond or waste treatment facility that was in existence on March 16, 2007 or that the secretary approved for construction before March 16, 2007, unless information becomes available showing that the waste-retention lagoon or pond or the waste treatment facility presents an imminent threat to public health or the environment.

(b)(1) The provisions of this article of the department's regulations shall not apply to any existing or proposed waste-retention lagoon or pond or waste treatment facility located at a confined feeding facility if all of the following conditions are met:

(A) The confined feeding facility existed on July 1, 1994.

(B) The operator registered the confined feeding facility with the secretary before July 1, 1996.

(C) The capacity of the existing or proposed waste-retention lagoon or pond or waste treatment facility is not greater than what was necessary to serve the confined feeding facility as described in the registration application submitted before July 1, 1996.

(D) The separation distance from the bottom of the existing or proposed waste-retention lagoon or pond or waste treatment facility to groundwater is less than 10 feet.

(2) Each operator of a confined feeding facility meeting the requirements of paragraph (b)(1) and proposing to use a waste-retention lagoon or pond or waste treatment facility shall propose site-specific groundwater protection measures for the secretary's consideration for approval.

(c) Each new or expanded portion of a waste-retention lagoon or pond or waste treatment facility other than those described in subsections (a) and (b) shall be located at least 10 feet above the static groundwater level, as measured from the lowest elevation of the finished interior grade of the waste-retention lagoon or pond or the waste treatment facility. Each operator or permit applicant for a confined feeding facility shall notify the department at least two days before performing any site investigations to determine the static groundwater level at the site.

(d) Each operator or permit applicant shall ensure that each liner for a new or expanded portion

of a waste-retention lagoon or pond or waste treatment facility meets the following requirements:

(1) If the new or expanded portion of the waste-retention lagoon or pond or waste treatment facility is not located over the Equus Beds or in a sensitive groundwater area, the materials used for the liner shall have a seepage rate of no more than $\frac{1}{4}$ inch per day.

(2) If the new or expanded portion of the waste-retention lagoon or pond or waste treatment facility is located in a sensitive groundwater area, the materials used for the liner shall have a seepage rate of no more than $\frac{1}{10}$ inch per day.

(3) If the new or expanded portion of the waste-retention lagoon or pond or waste treatment facility is located over the Equus Beds, either an impermeable synthetic membrane liner shall be used or the material used for the liner shall consist of either of the following:

(A) Two or more layers of compacted soil designed to have a seepage rate of no more than $\frac{1}{10}$ inch per day. To demonstrate that this seepage requirement is met, the soil liner seepage rate shall be determined within 12 months of placing the waste-retention lagoon or pond or waste treatment facility into operation. The test method used shall be the whole pond seepage test; or

(B) any material that has been approved through the variance process required by K.A.R. 28-18-15.

(e) Each permit applicant or operator that conducts testing to determine the seepage rate shall submit four paper copies or shall transmit an electronic copy of the test results to the department.

(f) An imminent threat to public health or the environment may be deemed to exist if physical, chemical, biological, or radiological substances or a combination of these substances is released into subsurface waters of the state and results in a concentration or amount of a substance in excess of the numerical criteria designated for aquatic life protection, agricultural use, or public health protection as provided in the "Kansas surface water quality standards: tables of numeric criteria," which is adopted by reference in K.A.R. 28-16-28e. If the background concentration of a substance is naturally occurring and is greater than the numerical criterion, the background concentration shall be considered the criterion. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-171d, and 65-171h; effective March 16, 2007; amended Nov. 19, 2021.)

Article 18a.—SWINE AND RELATED WASTE CONTROL

28-18a-1. Definitions. The following terms, and abbreviations shall have the following meanings, unless otherwise defined in an individual regulation or unless a different meaning is clear from the context in which it is used. Terms and abbreviations not provided in this article shall have the meanings specified in K.S.A. 65-101 et seq. and amendments thereto; articles 5, 16, 18, and 30; or the clean water act (CWA). If the same word is defined both in Kansas statutes or the regulations of this article and in any federal regulation adopted by reference in these regulations or in state regulations referenced in this article and the definitions are not identical, the definition prescribed in Kansas statutes or the regulations of this article shall control.

(a) “Agronomic application rates” has the meaning specified in K.S.A. 2-3302, and amendments thereto, and is regulated by the secretary of the Kansas department of agriculture.

(b) “Animal unit” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(c) “Animal unit capacity” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(d) “Best available technology for swine facilities” has the meaning specified in K.S.A. 65-1,178, and amendments thereto.

(e) “Best management practices for swine facilities” has the meaning specified in K.S.A. 65-1,178, and amendments thereto.

(f) “Certification” means a document issued by the secretary in lieu of a water pollution control permit, indicating that the facility meets applicable animal waste management statutes and regulations and does not represent a significant water pollution potential.

(g) “Change in operation” and “modification” mean any of the following:

(1) Expansion or enlargement of a facility beyond the scope or boundaries established by registration, permit, certification, or approved plans and specifications;

(2) any increase in the animal unit capacity beyond that authorized by a permit or certification; or

(3) a change in construction or operation of a swine facility that affects the collecting, storage, handling, treatment, utilization, or disposal of swine or other process wastes.

(h) “Clean water act” and “CWA” mean the federal water pollution control act, 33 U.S.C. 1251 et seq., as in effect on November 27, 2002.

(i) “Confined feeding facility” has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(j) “Dead swine handling plan” means a written document that identifies the procedures by which the operator of a swine facility shall handle dead swine, to minimize the potential for the generation of nuisance, environmental, or public health threats.

(k) “Department” and “KDHE” mean the Kansas department of health and environment.

(l) “Director” means the director of the division of environment of the Kansas department of health and environment.

(m) “Division” means the division of environment, Kansas department of health and environment.

(n) “Emergency response plan for swine” means a written document that identifies the following procedures to be implemented by the operator of a swine facility if an emergency occurs:

(1) Actions to contain or manage an unauthorized discharge, spill, or release of swine or other process wastes;

(2) notification of the department; and

(3) any actions required to mitigate the adverse effects of an emergency.

(o) “Entity,” for the purposes of these regulations, means a person, individual, association, company, corporation, institution, group of individuals, joint venture, partnership, or federal, state, county, or municipal agency or department.

(p) “Environmental protection agency” and “EPA” mean the United States environmental protection agency.

(q) “Equus Beds,” for the purposes of these regulations, means an aquifer underlying the sections of land listed in the following table:

County	Range	Township	Section
Harvey	01W	22S	06, 07, 18, 19, 30, 31
Harvey	01W	23S	06, 07, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34
Harvey	01W	24S	03, 04, 05, 06, 07, 08, 09, 10, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34

(r) “Existing swine facility” has the meaning specified in K.S.A. 65-1,178, and amendments thereto.

(s) “Federal permit,” “national pollutant discharge elimination system permit,” and “NPDES permit” mean an authorization, license, or equivalent control document issued by the EPA or an approved state to implement the requirements of 40 C.F.R. Parts 122, 123, 124, and 412.

(t) “Food animals” means swine produced for consumption.

(u) “Fur animals” means swine raised for the skin, pelt, or hair.

(v) “Groundwater,” as used in this article, means water located under the surface of the land that is or can be the source of supply for wells, springs, seeps, or streams, or that is held in aquifers. For the purposes of this article, groundwater shall be considered capable of being a source of supply for wells if at least one of the following conditions is met:

(1) The groundwater can be produced at a rate of 10 gallons or more per hour from a borehole with a diameter of nine or fewer inches. In determining the groundwater production rate for an

excavation, borehole, or existing water or monitoring well, the quantity of produced water shall be adjusted for comparison purposes to the surface area of a borehole with a diameter of nine inches.

(2) The groundwater is currently being used within ½ mile of the proposed lagoon, regardless of the rate at which water can be produced.

(3) There is evidence of past groundwater use within ½ mile of the proposed lagoon.

(w) "Habitable structure" has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(x) "Impermeable synthetic membrane liner" means a commercially manufactured membrane liner composed of synthetic materials commonly identified as being plastic, plastic polymer, or other synthetic materials that, when installed, provide for the more stringent of either of the following:

(1) A maximum monitored or calculated seepage rate of 1/64 inch per day; or

(2) the liner manufacturer's criteria for the maximum monitored or calculated seepage rate for the installed membrane liner, expressed in units of volume per unit area per unit of time (gallons per square foot per day).

(y) "Land application" means the distribution of swine or other process wastes onto, or incorporation into, the soil mantle for the purpose of disposal or utilization by crops or vegetation.

(z) "Liner" means any designed barrier in the form of in situ, layer, membrane, or blanket materials utilized or installed to reduce the potential for a significant hydrologic connection between swine or other process wastes that are controlled or retained by swine waste management systems and waters of the state.

(aa) "Manure management plan for swine" means a written document that identifies the procedures by which the operator of a swine facility shall operate, manage, and maintain a swine waste management system. This plan shall describe the methods for the handling and either disposal or utilization of all swine or other process wastes generated by the swine facility.

(bb) "Maximum soil liner seepage rate" and "specific discharge" mean the flow rate of water through the liner of a swine waste-retention lagoon or pond and shall be expressed as velocity (distance/time). The maximum seepage rate shall be calculated as $v = k(h/d)$, in which "k" is the hydraulic conductivity (coefficient of permeability) and "(h/d)" is the hydraulic gradient. The hydraulic gradient is the maximum vertical distance "h"

measured from the liquid surface to the liner bottom divided by the thickness of the soil liner "d." When calculating the maximum seepage rate, the maximum design depth, not considering design freeboard, shall be used.

(cc) "Minimum standards of design, construction, and maintenance" means the following:

(1) Effluent standards and limitations;

(2) other performance standards for treatment or utilization; and

(3) other standards of design, construction, and maintenance for confined feeding facilities or swine pollution control systems published by KDHE.

(dd) "Monitoring" means all procedures using any of the following methods:

(1) Either systematic inspection or collection and analysis of data on the operational parameters of a swine facility or swine pollution control system; or

(2) the systematic collection and analysis of data on the quality of the swine or other process wastes, groundwater, surface water, or soils on or in the vicinity of the swine facility or swine pollution control system.

(ee) "National pollutant discharge elimination system" and "NPDES" mean the national system for the issuance of permits under 33 U.S.C. section 1342, and shall include any state or interstate program that has been approved by the EPA administrator, in whole or in part, pursuant to 33 U.S.C. section 1342.

(ff) "Nutrient management plan" means a written document that identifies the practices and procedures that the operator of a swine facility that is required to obtain a federal permit plans to use to operate and maintain the swine waste management and pollution control system and to manage the handling, storage, utilization, and disposal of wastes generated by the swine facility.

(gg) "Nutrient utilization plan for swine" means a written document, on a form prescribed by the secretary of the Kansas department of agriculture, addressing site-specific conditions for the land application of manure, wastewater, and other nutrient sources from swine facilities, at agronomic application rates.

(hh) "Odor control plan for swine" means a written document for swine facilities that describes site-specific and facility-specific design considerations, operational activities and procedures, maintenance activities and procedures, and management practices to be employed to

minimize the potential for or limit odors from a swine facility, swine waste management, or swine pollution control system.

(ii) "Oil or gas well" shall have the meaning assigned to the term "well" in K.S.A. 55-150, and amendments thereto.

(jj) "Pleasure animals," as used in this article, means swine that are not produced for consumption or their skin, pelts, or hair.

(kk) "Point source" has the meaning specified in K.A.R. 28-16-28b.

(ll) "Pollution" has the meaning specified in K.S.A. 65-171d, and amendments thereto.

(mm) "Precipitation runoff" means the rainwater or the meltwater that is derived from snow, hail, sleet, or other forms of atmospheric precipitation and that flows by gravity over the surface of the land.

(nn) (1) "Process wastes" means any of the following:

(A) Excrement from swine, wastewater, or swine carcasses;

(B) precipitation that comes into contact with any manure, litter, bedding, or other material used in or resulting from the production of swine;

(C) spillage or overflow from watering systems;

(D) wastes from washing, cleaning, or flushing pens, barns, manure pits, equipment, trucks, trailers, or other associated swine facilities;

(E) wastes from washing swine or spraying swine for cooling;

(F) wastes from dust control;

(G) boiler blowdown and water softener regenerate wastes;

(H) precipitation runoff from confinement, loading, and unloading areas;

(I) spillage of feed, swine wastes, or any other process wastes described in this regulation;

(J) discharges from land application fields that occur during application;

(K) precipitation runoff from land application fields, if liquid or concentrated liquid wastes are applied during frozen, snow-covered, or saturated soil conditions without approval by the department;

(L) raw, intermediate, or finished materials associated with wastes or contaminated storm water runoff from swine waste or dead swine composting operations; or

(M) flows or runoff from waste storage areas.

(2) Process wastes shall not include swine wastes spilled by trucks transporting livestock on city, township, county, state, or federal streets, roads, or highways.

(oo) "Public livestock market" has the meaning specified in K.S.A. 47-1001, and amendments thereto. For the purposes of these regulations, this term shall include public livestock markets where federal veterinary inspections are regularly conducted.

(pp) "Registration" means any required fee and the properly completed and executed documents designated by the division and any additional required documents or information necessary for determining the need for a water pollution control permit.

(qq) "Salt solution mining well" has the meaning specified in K.S.A. 55-1,120, and amendments thereto.

(rr) "Secretary" means the secretary of the Kansas department of health and environment.

(ss)(1) "Sensitive groundwater areas," for the purpose of these regulations, means aquifers generally comprised of alluvial aquifers, the area within the boundaries of the Equus Beds groundwater management district no. 2 (GMD #2), and the dune sand area located south of the great bend of the Arkansas River. Each sensitive groundwater area shall be any section of land listed in "Kansas sensitive groundwater areas for wastewater lagoons," prepared by KDHE and dated January 1, 2005, which is adopted by reference in K.A.R. 28-16-160.

(2) Any operator proposing a new swine waste-retention lagoon or pond or expansion of an existing swine waste-retention lagoon or pond may request that the director make a site-specific sensitive groundwater area determination. The request shall be made in writing to the director. The request shall contain supporting data and information and an explanation of why the area in question should not be considered to be a sensitive groundwater area, for the purpose of these regulations.

(tt) "Sewage" has the meaning specified in K.S.A. 65-164, and amendments thereto.

(uu) "Significant water pollution potential" means any of the following, as determined by the secretary:

(1) A swine feeding operation that utilizes structures designed and constructed to collect, control the flow of, and direct swine or other process wastes, tanks, manure pits, or other structures designed and constructed to collect or store swine or other process wastes, waste-retention lagoons or ponds, waste treatment facility or facilities, or a swine waste management system;

(2) lots, pens, or concentrated feeding areas with creeks, streams, intermittent waterways, or any other conveying channel or device that has the potential to carry pollutants to waters of the state running through or proximate to the lots, pens, or concentrated feeding areas;

(3) any operation that cannot retain or control swine or other process wastes on the operator's facility or property, or adjacent property without the owner's permission; or

(4) a swine feeding operation determined to practice improper collection, handling, or disposal of swine or other process wastes that have the potential to degrade or impair the quality of any waters of the state.

(vv) "Surface waters," for water quality purposes, has the meaning specified in K.A.R. 28-16-28b.

(ww) "Suspend" and "suspension," as used in this article, mean, respectively, to abrogate temporarily and the temporary abrogation of a water pollution control permit or certification issued to a swine facility.

(xx) "Swine facility" has the meaning specified in K.S.A. 65-1,178, and amendments thereto.

(yy) "Swine facility closure plan" means a written document that identifies the practices and procedures that the operator of a swine facility is required to follow when closing the facility to protect public health and safety and the environment, and to prevent the escape of swine or other process wastes from the facility.

(zz) "Swine operator" means an individual, association, company, corporation, municipality, group of individuals, joint venture, partnership, a state or federal agency or department, or any business owning, leasing, or having charge or control of one or more swine facilities.

(aaa) "Swine pollution control system" means any land, structures, or practices utilized for the collection, containment, storage, distribution, land application, or disposal of swine or other process wastes generated by swine facility operations. This term shall include any of the following:

(1) Site grading to divert extraneous, uncontaminated precipitation runoff around the swine facility;

(2) structures designed and constructed to collect, control the flow of, and direct swine or other process wastes;

(3) vegetation cover utilized for controlling erosion or for filtering swine or other process wastes;

(4) tanks, manure pits, or other structures de-

signed and constructed to collect or store swine or other process wastes;

(5) waste-retention lagoons or ponds;

(6) land used for the application, utilization, or disposal of swine or other process wastes; and

(7) waste treatment facilities.

(bbb) "Swine waste management system" is as defined in K.S.A. 65-1,178, and amendments thereto.

(ccc) "Swine waste-retention lagoon or pond" has the meaning specified in K.S.A. 65-1,178, and amendments thereto.

(ddd) "Variance" means the secretary's written approval or permit authorizing a proposed action that knowingly results in a lack of conformity with one or more provisions of these regulations or the minimum standards of design, construction, and maintenance. Each variance authorized by the secretary shall be deemed to protect public health and the environment and to comply with the intent of these regulations and with federal NPDES permit requirements.

(eee) "Waste management plan" means a written document that identifies the practices and procedures that the operator of a swine facility not required to obtain a federal permit plans to use to operate and maintain the swine waste management and pollution control system and to manage the handling, storage, utilization, and disposal of wastes generated by the swine facility.

(fff) "Waste-retention lagoon or pond" means excavated or diked structures, or natural depressions provided for or used for the purpose of containing or detaining swine or other process wastes. Discharges from waste-retention lagoons or ponds shall not be allowed, except as authorized by a water pollution control permit.

(ggg) "Waste treatment facilities" means structures or devices that collect, store, stabilize, treat, or otherwise control pollutants, so that after the discharge, disposal, or land application of treated wastes, water pollution will not occur, and public health and the waters of the state will be protected.

(hhh) "Water pollution control permit" and "permit" mean an authorization, license, or equivalent control document issued by the secretary. This term shall not include any document that has not yet been the subject of final action by the secretary.

(iii) "Water quality standards" means the Kansas surface water quality standards as specified in K.A.R. 28-16-28b through K.A.R. 28-16-28g.

(jjj) "Water well" has the meaning specified in K.S.A. 82a-1203, and amendments thereto.

(kkk) “Waters of the state” has the meaning specified in K.S.A. 65-161, and amendments thereto.

(lll) “Whole pond seepage test” means a measurement of the evaporation from, and the change in water level of the waste-retention lagoon, pond, or structure, or swine waste-retention lagoon, pond, or structure using either of the following:

(1) Any method that meets the requirements specified in “standards for measuring seepage from anaerobic lagoons and manure storages,” which is adopted by reference in K.A.R. 28-18-1; or

(2) any equivalent method approved by the secretary.

(mmm) “Wildlife refuge” has the meaning specified in K.S.A. 65-171d, and amendments thereto. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 65-171a, K.S.A. 2005 Supp. 65-171d, K.S.A. 65-171h, 65-1,178, 65-1,179, 65-1,181, 65-1,182, 65-1,183, 65-1,184, 65-1,187, 65-1,189, 65-1,190 and 65-1,188; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-2. Registration and application requirements. (a) Each entity proposing the construction, modification, or expansion of an unregistered swine facility, public livestock market, collection center, or transfer station, and each swine operator of an existing unregistered swine facility, public livestock market, collection center, or transfer station shall submit a registration form for the facility to the secretary, if any of the following conditions is met:

(1) The proposed or existing unregistered facility has an animal unit capacity of 300 or more animal units.

(2) The proposed or existing unregistered facility presents a significant water pollution potential as defined in K.A.R. 28-18a-1.

(3) The entity or swine operator is required by statute to obtain a permit for the facility.

(4) The entity or swine operator elects to register the facility in order to obtain a permit or certification, even though there is no requirement to obtain a permit or certification.

(b) Each registration form that any entity or swine operator submits to the secretary shall be accompanied by the required \$25 fee.

(c) Each entity proposing the construction, modification, or expansion of a swine facility, public livestock market, collection center, transfer

station, or truck-washing facility for animal wastes and each swine operator of an unpermitted swine facility, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes shall submit a permit application for the facility to the secretary if any of the following conditions is met:

(1) The proposed or existing unpermitted facility presents a significant water pollution potential as defined in K.A.R. 28-18a-1.

(2) The entity or swine operator is required by statute to obtain a permit.

(3) The entity or swine operator proposing the construction, modification, or expansion of the facility or the swine operator of a facility that is not required to obtain a permit elects to obtain a permit.

(d) Each application that any entity or swine operator submits to the secretary shall be accompanied by the permit fee required pursuant to K.A.R. 28-16-56d.

(e) Each entity or swine operator proposing the construction, modification, or expansion of a swine facility and each swine operator of an unpermitted swine facility that is required by statute or regulation to obtain a federal permit shall apply to the secretary for a federal permit.

(f)(1) Each swine operator or entity proposing either the construction, modification, or expansion of a swine facility, swine waste management system, or swine pollution control system that is required to submit a registration form or apply for a permit shall not initiate construction until the swine operator or entity has obtained either of the following:

(A) The secretary’s written approval of the application, construction plans, specifications, and waste management plan, for each facility or system that the entity or swine operator proposes to be constructed, modified, or expanded; or

(B) a certification, issued by the secretary, for each facility or system that the entity or swine operator proposes to be constructed, modified, or expanded.

(2) Each swine operator or entity that is proposing the construction, modification, or expansion of a swine facility, swine waste management system, or swine pollution control system required to have a permit and that undertakes the construction, modification, or expansion before the issuance of a new or modified permit by the secretary shall be deemed to be undertaking the construction solely at the risk of the swine operator or entity.

(3) Before each swine operator or entity proposing the construction, modification, or expansion of a swine facility, swine waste management system, swine pollution control system, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes that is required to have a permit or certification begins the operation of the new, modified, or expanded portion of a swine facility, swine waste management system, swine pollution control system, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes, the swine operator or entity shall obtain a new or modified permit or certification issued by the secretary.

(4) Before each swine operator or entity proposing the construction, modification, or expansion of a swine facility, swine waste management system, swine pollution control system, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes that is required to have a permit or certification begins the stocking of a new, modified, or expanded portion of a swine facility, swine waste management system, swine pollution control system, public livestock market, collection center, transfer station, or truck-washing facility for animal wastes at levels above the capacity authorized in the current permit or certification, the swine operator or entity shall obtain a new or modified permit or certification issued by the secretary. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2003 Supp. 65-166a, K.S.A. 2003 Supp. 65-171d, and K.S.A. 65-1,179; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-3. Separation distance requirements. (a) Separation distances between confined feeding facilities and any habitable structure, wildlife refuge, or city, county, state or federal park shall conform to the provisions and requirements of K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, secs. 1,15, and 18 and amendments thereto [K.S.A. 1998 Supp. 65-1, 192 and 65-1,194 and amendments thereto].

(b) The swine operator shall provide to the department any information required to ascertain the distance to the nearest habitable structure or determine which habitable structure is the nearest to the proposed or existing confined feeding facility.

(c) The construction of a new swine facility or expansion of an existing swine facility shall comply

with the separation distance requirements related to the 100-year floodplain, surface water bodies, private drinking water wells in active use, and publicly owned drinking water wells in active use, pursuant to L. 1998, ch. 143, secs. 4 and 18, and amendments thereto [K.S.A. 1998 Supp. 65-1,180 and 65-1,194, and amendments thereto]. The reference to any freshwater reservoir or pond pursuant to L. 1998, ch. 143, sec. 2, and amendments thereto [K.S.A. 1998 Supp. 65-178, and amendments thereto], shall refer only to a freshwater reservoir or pond for which a swine operator has charge or control.

(d) Each swine facility required to have a nutrient utilization plan shall comply with the separation distance requirements related to the sites utilized for the land application of swine or other process wastes, and the presence of any habitable structure, wildlife refuge, or city, county, state or federal park, pursuant to L. 1998, ch. 143, secs. 6, 15 and 18, and amendments thereto [K.S.A. 1998 Supp. 65-1,182, 65-1,192, and 65-1,194, and amendments thereto].

(e) When the animal unit capacity of a confined feeding facility is comprised of swine, in addition to other animals or fowl, the swine-specific separation distance requirements related to any habitable structure, wildlife refuge, or city, county, state or federal park shall be applied only to the animal unit capacity of the swine facility operation. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 4, 6, 15, and 18 [K.S.A. 1998 Supp. 65-1,180, 65-1, 182, 65-1,192, and 65-1,194]; effective Jan. 15, 1999.)

28-18a-4. Filing of applications and payment of fees. (a) Each applicant for a swine facility permit shall submit the application required by K.A.R. 28-16-59 or K.S.A. 65-1,178 and amendments thereto, as applicable.

(b) In order for the department to provide adequate public notice regarding a permit for any proposed new construction or proposed new expansion of a swine facility, each applicant for a swine facility permit shall provide to the secretary the name and mailing address of each of the following:

(1) The United States post office or offices serving the immediate area of the swine facility; and

(2) each owner of a habitable structure or any property located within one mile of the swine facility perimeter, pursuant to K.S.A. 65-171d and amendments thereto.

(c) In addition to the application requirements of K.A.R. 28-16-59, for any new construction or new expansion of a swine facility, each applicant for a swine facility permit shall submit the following information:

(1) A map identifying the location and layout of the swine facility or the swine facility perimeter;

(2) a map identifying the location of any habitable structure or city, county, state, or federal park within one mile of the swine facility or the swine facility perimeter;

(3) a map identifying the location of any wildlife refuge within 16,000 feet of the swine facility or the swine facility perimeter;

(4) a map identifying all water wells on the swine facility property;

(5) a map identifying any streams and bodies of surface water within one mile of the swine facility or the swine facility perimeter;

(6) for swine facilities that utilize a swine waste-retention lagoon or pond, any information that the applicant possesses indicating the presence of any unplugged oil, gas, or salt solution mining wells located at the proposed or existing swine facility;

(7) a waste management plan for any swine facility whose operator is not required to obtain a federal permit;

(8) for swine facilities with an animal unit capacity of 1,000 animal units or more if the swine at the swine facility are not owned by the operator of the swine facility, a copy of the executed contract between the swine operator and the owner of the swine, specifying responsibility for management of the manure and wastewater generated at the swine facility; and

(9) for swine facilities with an animal unit capacity of 1,000 animal units or more, the following information:

(A) A manure management plan;

(B) a nutrient utilization plan that meets the requirements of the Kansas department of agriculture, if the swine facility applies manure or wastewater to land;

(C) an emergency response plan;

(D) an odor control plan;

(E) a dead swine handling plan;

(F) a nutrient management plan;

(G) a groundwater monitoring plan, if required;

(H) a closure plan, if required; and

(I) for swine facilities with an animal unit capacity of 3,725 animal units or more, financial assurance for closure of the swine facility and closure of the swine waste-retention lagoons or ponds.

(d)(1) If swine facilities adjoin and have a common swine waste management system or if swine facilities do not adjoin but have a common swine waste management system, the swine facilities shall be classified as one swine facility.

(2) If swine facilities do not adjoin and do not have a common swine waste management system or if swine facilities adjoin but do not have a common swine waste management system, the swine facilities shall be classified as separate swine facilities.

(e) Each applicant for a swine facility permit shall submit the application fee required by K.A.R. 28-16-56d.

(f) Each applicant shall sign the permit application as required by 40 C.F.R. 122.22, as adopted by reference in K.A.R. 28-18-4. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, 65-166a, 65-171d, 65-171h, 65-1,179, 65-1,181, 65-1,184, 65-1,187, 65-1,188, 65-1,189, and 65-1,190; effective Jan. 15, 1999; amended March 16, 2007; amended Aug. 6, 2021.)

28-18a-5. Transfer of a permit or certification. (a) The automatic transfer of a permit shall be prohibited. Each swine operator wanting to transfer a water pollution control permit of a confined feeding facility shall make application consistent with the provisions of the regulations in this article.

(b) The automatic transfer of a certification shall be prohibited. Each swine operator wanting to transfer a certification for a confined feeding facility shall register with the department, in accordance with this article.

(c) The existing permit or certification shall remain in effect until the department authorizes the transfer by letter or reissues the permit or certification. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18a-6. Development of a draft permit. Development of each draft permit shall be consistent with the requirements of K.A.R. 28-16-60. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18a-7. Public notice of permit actions and public hearings. (a) Public notice of permit actions and public hearings shall be consistent with the requirements of K.A.R. 28-16-61. Public hearings scheduled by the department shall address only those matters for which the secretary has authority.

(b) A swine operator proposing either new construction of a swine facility or new expansion of an existing swine facility shall meet the following requirements:

(1) Publish a single notice of application in the official county newspaper and in a newspaper regularly published and generally circulated serving the county and general area of the proposed or existing swine facility, notifying the public of the proposal. If the official county newspaper is regularly published and generally circulated throughout the county and general area of the proposed or existing swine facility, a single notice in the official county newspaper shall be adequate. If a proposed or existing facility site is within one mile of an adjoining county, a single notification shall also be provided in the official newspaper serving the adjoining county.

(A) Publication of the notice in the newspaper or newspapers by the swine operator shall be made before the department can place the permit on public notice in the Kansas register. The operator shall be responsible for the cost of publication in the newspaper or newspapers.

(B) The notice that the swine operator shall publish in the newspaper or newspapers shall contain the information pursuant to L. 1998, ch. 143, sec. 3, and amendments thereto [K.S.A. 1998 Supp. 65-1,179 (c), and amendments thereto].

(2) Notify the department verbally or by facsimile within two working days after the date of publication of the notice in the newspaper or newspapers to confirm that the notice has been published. Within 20 calendar days following the

date of publication, the operator shall provide the department a publisher's affidavit of publication or certified copy of the publication. The processing of the permit shall be terminated by the department until the operator provides the publisher's affidavit or certified copy of the publication.

(3) Provide a copy of the notice to be published in the newspaper or newspapers to owners of habitable structures located within the prescribed separation distance for the swine facility. The notification shall be provided before the department places the permit on public notice in the Kansas register. The notice shall be provided by certified mail. The swine operator shall provide proof of this notification to the department within 20 calendar days of the notice being mailed.

(4) Provide a copy of the notice to be published in the newspaper or newspapers to the county commission representing the county in which the swine facility is or will be located. In addition, a copy of the notice shall be directed to the mayor of each municipality whose municipal boundary is located three miles or less from the swine facility or facility perimeter. Notification shall be made by certified mail before the department places the permit on public notice in the Kansas register. The swine operator shall provide proof of this notification to the department within 20 calendar days of the date the notice is mailed.

(c) Owners of habitable structures located within the applicable separation distance pertaining to habitable structures and either a proposed new swine facility or the proposed expansion of an existing swine facility that seek a public hearing shall meet the following requirements:

(1) Request a public hearing either before or during the public comment period established in the public notice published in the Kansas register by the department;

(2) request a public hearing in conformance with the provisions set forth in the public notice and shall also include the mailing address and telephone number of the habitable structure owner; and

(3) provide proof, upon request and in a form satisfactory to the department, of ownership of the habitable structure. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 3 [K.S.A. 1998 Supp. 65-1,179]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-171d, as amended

by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, sec. 3; [K.S.A. 1998 Supp. 65-1,179] effective Jan. 15, 1999.)

28-18a-8. Permit; terms and conditions.

(a) The terms and conditions of all permits shall be consistent with the requirements of K.A.R. 28-16-62, as appropriate.

(b)(1) Swine waste management and pollution control systems shall be designed, constructed, operated, and maintained in a manner that prevents pollution of waters of the state.

(2) Each operator of a swine waste management and pollution control system for a swine facility with an animal unit capacity of 1,000 or more shall ensure that the swine waste management and pollution control system is designed, constructed, operated, and maintained to prevent the discharge of swine or other process wastes to surface waters of the state. Any operator of a swine waste management and pollution control system may discharge the following to surface waters of the state, whenever precipitation events, either chronic or catastrophic, cause an overflow from a swine waste management or pollution control system designed, constructed, operated, and maintained to contain all swine and other process wastes:

(A) Swine or other process wastes; and

(B) the direct precipitation and the runoff from a 25-year, 24-hour precipitation event for the location of the swine facility.

(3)(A) Except as provided in paragraph (b)(3)(B), each swine waste management and pollution control system for any swine facility with an animal unit capacity of 999 or less shall be designed, constructed, operated, and maintained to prevent the discharge of swine or other process wastes to surface waters of the state as required in paragraph (b)(2).

(B) Any operator of a swine waste management and pollution control system for a swine facility with an animal unit capacity of 999 or less may discharge swine waste or other process wastes to surface waters of the state, consistent with the requirements of K.A.R. 28-16-28b through K.A.R. 28-16-28g, K.A.R. 28-16-57a, and K.A.R. 28-16-62, as appropriate, when specifically authorized by a permit.

(c) For each emergency or accidental discharge, overflow, or unplanned release of swine or other process wastes, each swine operator shall report the incident to the department within two hours of discovery. Each operator shall report any emer-

gency, spill, accidental discharge, overflow, or unplanned release associated with swine or other process wastes to the director, using the telephone numbers provided by the department. Each operator shall submit a written report to the department within three days of the incident.

(d) Each swine operator shall retain a copy of the current permit issued by the secretary at the site office for the facility or at a central records location.

(e) Each swine operator shall be responsible for advising the secretary within 60 days of any changes in mailing address or telephone number regarding the facility or designated facility contact.

(f) Each swine operator shall operate the facility in a manner to minimize or prevent any discharge that is in violation of the permit or that has a potential to adversely affect human health or the environment.

(g) Each swine operator shall, at all times, properly operate and maintain the swine waste management and pollution control system and any related appurtenances that are installed or utilized by the swine operator to achieve compliance with the conditions of the permit.

(h) Each operator of a swine facility with an animal unit capacity of 1,000 or more shall notify the department whenever the swine operator does not own all the swine at the swine facility, pursuant to K.S.A. 65-1,181, and amendments thereto.

(i) Each operator of a swine facility with an animal unit capacity of 1,000 or more shall notify the department before the operator sells or gives manure or wastewater to a person that is not employed by the swine facility and whenever disposal is by means other than land application on areas covered by the approved nutrient utilization plan for the swine facility. When the approved manure management plan for the swine facility addresses the requirements in K.S.A. 65-1,181 and amendments thereto, notification to the department shall not be required.

(j) Each operator of a swine facility with an animal unit capacity of 1,000 or more who land applies manure or wastewater shall comply with the nutrient utilization plan approved by the Kansas department of agriculture, pursuant to K.S.A. 65-1,182, and amendments thereto.

(k) Each operator of a swine facility with an animal unit capacity of 1,000 or more who land applies manure or wastewater and is required to develop and to implement a nutrient utilization plan, as prescribed by the secretary of the Kansas

department of agriculture, shall file the plan and any amendments to the plan with KDHE.

(l) Each operator of a swine facility required to develop a swine facility closure plan or a swine waste-retention lagoon or pond closure plan, or both, shall comply with each plan, as approved by the secretary. The operator shall amend each plan whenever warranted by changes in the facility or in other conditions affecting the facility, pursuant to K.S.A. 65-1,189, and amendments thereto.

(m) Each swine facility that is required to be permitted by the department and that has an animal unit capacity of 1,000 or more shall be staffed by a department-certified operator or an operator in training. (Authorized by K.S.A. 2005 Supp. 65-171d, K.S.A. 65-1,181, 65-1,183, and 65-1,184; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-166a, K.S.A. 2005 Supp. 65-171d, K.S.A. 65-171h, K.S.A. 65-1,181, 65-1,182, 65-1,183, 65-1,184, 65-1,185; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-9. Certification; terms and conditions. (a) Each swine operator shall comply with all conditions, requirements, limitations, and operating provisions stipulated in the certification.

(b) Operation of a swine facility in violation of any conditions, requirements, limitations, and operating provisions of a certification, or in a manner that represents a significant water pollution potential, shall result in the revocation of the certification and any appropriate enforcement action. If a significant water pollution potential exists, as defined in K.A.R. 28-18-1, the swine operator shall apply for a permit. (Authorized by K.S.A. 2003 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, and K.S.A. 2003 Supp. 65-171d; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-10. Permits; monitoring and reporting. (a) Any monitoring and reporting required by the department in the terms and conditions of a permit, certification, order, directive, or consent agreement shall be conducted consistent with the provisions of K.A.R. 28-16-63, as appropriate.

(b) The emergency or accidental discharge, overflow, or unplanned release of swine or other process wastes into surface waters of the state shall be reported to the department, pursuant to K.A.R. 28-16-27, within two hours of discovery. Each operator shall report any emergency, spill, accidental discharge, overflow, or unplanned re-

lease associated with swine or other process wastes to the department using telephone numbers as provided by the department. Each operator shall submit a written report to the department within three days of the incident.

(c) Any analysis required by a permit, certification, order, directive, or consent agreement of the department shall be performed in accordance with the provisions of 40 C.F.R. Part 136, as in effect on July 1, 1998, or as approved by the department.

(d) Each analysis shall be performed by a laboratory that has been certified by the department pursuant to K.S.A. 65-1711, and amendments thereto, or as approved by the department.

(e) 40 C.F.R. Part 136, as in effect on July 1, 1998, is adopted by reference. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and K.S.A. 65-171h; effective Jan. 15, 1999.)

28-18a-11. Confined feeding facilities; federal requirements. For the purpose of issuing federal permits and administering NPDES program requirements, the following definitions and provisions, as in effect on July 1, 2006 and as amended by 72 fed. reg. 40250 on July 24, 2007, are hereby adopted by reference:

(a) The concentrated animal feeding operation exclusions specified in 40 C.F.R. 122.3(e) and 40 C.F.R. 122.3(f);

(b) the provisions addressing concentrated animal feeding operations specified in 40 C.F.R. 122.23(b), (c), and (e), and 122.42(e);

(c) except for 40 C.F.R. 412.32, 412.44, and 412.46, the provisions addressing effluent limitations for concentrated animal feeding operations specified in 40 C.F.R. Part 412. (Authorized by K.S.A. 2006 Supp. 65-171d; implementing K.S.A. 65-165, K.S.A. 2006 Supp. 65-166a, K.S.A. 2006 Supp. 65-171d; effective Jan. 15, 1999; amended March 16, 2007; amended Jan. 4, 2008.)

28-18a-12. Design and construction of swine waste management and swine pollution control systems. (a) If a swine facility represents a significant water pollution potential or if the swine operator of the swine facility is required by statute or regulation to obtain a permit, as de-

terminated by the secretary, the swine operator shall provide a swine waste management or pollution control system that is designed in accordance with the minimum standards of design, construction, and maintenance and is constructed and operated in accordance with construction plans, specifications, and either a waste management plan or nutrient management plan approved by the secretary. If site topography, operating procedures, experience, and other available information indicate that more than the minimum standards of design, construction, and maintenance are required to effect adequate water pollution control, additional provisions may be required. Each applicant shall ensure that any new construction or new expansion of a swine facility, swine waste management system, or swine pollution control system meets the requirements of the "minimum standard of design, construction, and maintenance," as defined in K.A.R. 28-18a-1.

(b) The swine operator shall not initiate operation of any new swine facility, new swine waste management system, or new swine pollution control system, or expanded portions of any existing swine facility, existing swine waste management system, or existing swine pollution control system, until after issuance of the new or modified permit by the secretary. Initiation of construction before the issuance of a new or modified permit by the secretary shall be deemed to be solely at the risk of the swine operator.

(c) For the purpose of these regulations, each reference to a professional engineer or consultant shall be deemed to designate an individual offering a service for a fee for the design of a swine facility, swine waste management system, or swine pollution control system, exclusive of the nutrient utilization plan, soil or cropping consultations, hydrologic work involved in conducting hydrologic or geologic investigations, or in the siting, design, or construction of groundwater monitoring wells. Each reference to a professional engineer shall be deemed to designate an individual licensed to practice engineering in Kansas by the Kansas state board of technical professions.

(d) Consultants that prepare plans and specifications for the new construction or new expansion of swine facilities that are submitted to comply with statutes and regulations shall provide KDHE with documentation that adequate general commercial liability insurance coverage addressing errors and omissions in the design plans and specifications has been obtained and is in effect.

(e) (1) Each operator shall initiate any proposed new construction or new expansion of a swine facility that has been approved by the secretary and for which the required permit or permit modification has been issued, within two years after the date on which the permit or permit modification is effective or pursuant to the requirements of the permit issued by the secretary. Each operator shall complete any proposed new construction or new expansion of a swine facility that has been approved by the secretary and for which the required permit or permit modification is issued, within three years after the date on which the permit or permit modification is effective or as required by the permit issued by the secretary.

(2) Failure to initiate the approved construction or expansion within two years and to complete the approved construction or expansion within three years after the effective date of the permit or permit modification shall void the secretary's approval of the construction plans, specifications, and other associated plans. If phased construction is proposed, the initiation and completion of construction shall conform to the schedule stipulated by the secretary.

(3) If the approval becomes void, the permit or permit modification shall remain in effect for the term of the permit, but the operator shall re-submit the construction plans, specifications, and other associated plans to the secretary for review and consideration for approval before initiating the construction or expansion of the swine facility.

(f) Neither the approval of construction plans, specifications, or other required plans, nor the issuance of a permit or certification by the secretary shall prohibit the secretary from taking any enforcement action if the swine waste management or pollution control system fails to protect the waters of the state, meet any specified effluent criteria, or comply with state surface water quality standards. In addition, the secretary's approval of the plans or the secretary's issuance of a permit or certification shall not constitute a defense by the operator regarding violation of any statute, regulation, permit condition, or requirement.

(g) A new swine facility, swine waste management system, or swine pollution control system shall not be built in any stream, river, lake, reservoir, or water bodies meeting the definition of jurisdictional wetlands and consistent with the definition of "surface waters" in K.A.R. 28-16-28b.

(h) Each operator, when directed by the secretary, shall notify the department a minimum of

two days before performing any soil sample collection activities or liner integrity testing.

(i) There shall be no deviation from plans and specifications submitted to and approved by the secretary, unless amended plans and specifications showing proposed changes have been submitted to the department and approved by the secretary.

(j) Each construction plan shall indicate the location of any active, abandoned, or plugged water, oil, gas, or salt solution mining well within 600 feet of any planned location for a swine waste-retention lagoon or pond. If the operator is unable to confirm the exact location of any well or wells, the construction plan shall contain a note indicating the potential for the well or wells to be located in the vicinity of any proposed swine waste-retention lagoon or pond. Each active, abandoned, or plugged water, oil, gas, or salt solution mining well that is encountered during construction and that was not identified or located on the construction plan shall be reported to the department within 48 hours of discovery. Construction activities that would impact the well or wells or that would be in the immediate vicinity of the well or wells shall be immediately terminated until the secretary determines that the appropriate steps, including plugging the well, have been taken to protect public health and the environment.

(k) Following the completion of the proposed construction or proposed expansion, if requested by the secretary, each swine operator shall certify that the swine waste management system or swine pollution control system, or both, were constructed in accordance with the plans approved by the secretary. If the swine operator utilized a professional engineer or consultant to monitor the construction of the swine waste management system or swine pollution control system, or both, then the certification shall also be signed by the professional engineer or the consultant who monitored the construction or installation of each system, including any swine waste-retention lagoon or pond liner. The certification shall be based on actual observations during construction and any field or laboratory data developed during or following construction. The certification shall be maintained on-site or at a central records location and shall be made available to the department, along with any supporting information, upon request. (Authorized by K.S.A. 2005 Supp. 65-171d and K.S.A. 65-1,181; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-1,181; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-13. Manure management plan for swine. (a) A manure management plan shall be developed and implemented for any proposed new swine facility, proposed expansion of an existing swine facility, or existing swine facility with an animal unit capacity of 1,000 or more, pursuant to L. 1998, ch. 143, sec. 5, and amendments thereto [K.S.A. 1998 Supp. 65-1,181 and amendments thereto]. When submitting manure management plans to the department for approval, each swine operator shall submit at least four copies of the plan.

(b) The manure management plan shall describe the methods for, and shall account for, the disposal of all swine or other process wastes generated by the swine facility. The plan shall include a description of the following:

(1) The source or sources and volume of swine or other process wastes generated by the swine facility;

(2) the method for collecting the swine or other process wastes by the swine facility;

(3) the manner in which the swine or other process wastes shall be directed to any treatment or storage system;

(4) a description of each treatment system utilized;

(5) a description of each storage system utilized;

(6) the location of any sites, including the legal description, where land application of swine or other process wastes will take place;

(7) the method of ultimate disposal or utilization of the swine or other process wastes; and

(8) the procedures to be employed and the information to be retained and provided, pursuant to L. 1998, ch. 143, sec. 5, and amendments thereto [K.S.A. 1998 Supp. 65-1,181, and amendments thereto], if swine or other process waste is to be sold or given to a person not employed by the facility and is to be disposed of by means other than land application on areas covered by the facility nutrient utilization plan.

(c) Each swine facility required to develop and implement a manure management plan shall amend the plan and submit the plan to the department for approval whenever specifically directed by the department or whenever warranted by one or more of the following:

(1) Changes in operation of the swine facility;

(2) a change or modification in the swine waste management or pollution control system; or

(3) other conditions affecting the swine facility, waste management system, or pollution control system.

(d) Whenever the operator of a swine facility required to develop a manure management plan does not own all the swine at the facility, the operator shall provide, as a part of the manure management plan, a copy of the executed contract with the owner of the swine that specifies responsibility for management of the swine or other process wastes, pursuant to L. 1998, ch. 143, sec. 5, and amendments thereto [K.S.A. 1998 Supp. 65-1,181 and amendments thereto].

(e) The manure management plan and any associated records, data, or other information shall be retained at the facility's site office, in a manner that is accessible to inspection by representatives of the department. The operator shall retain, at the facility's site office, the current and previous three years' versions of the plan and any associated records, data, or other information. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 5 and 14 [K.S.A. 1998 Supp. 65-1,181 and 65-1,191]; effective Jan. 15, 1999.)

28-18a-14. Nutrient utilization plan for swine. (a) A nutrient utilization plan shall be developed and implemented for each proposed new swine facility, proposed expansion of an existing swine facility, or existing swine facility with an animal unit capacity of 1,000 or more that applies swine or other process wastes to the land, pursuant to L. 1998, ch. 143, sec. 6, and amendments thereto [K.S.A. 1998 Supp. 65-1,182, and amendments thereto]. When submitting nutrient utilization plans to the department, each swine operator shall submit at least five copies of the plan.

(b) Each swine facility required to develop and implement a nutrient utilization plan shall amend the plan and submit the plan to the department whenever specifically directed by the department or whenever warranted by one or more of the following:

- (1) Changes in operation of the swine facility;
- (2) a change or modification in the swine waste management or pollution control system; or
- (3) other conditions affecting the swine facility, waste management system, or pollution control system.

(c) The nutrient utilization plan and any associated records, data, or other information shall be

retained at the facility's site office, in a manner that is accessible to inspection by representatives of the department. The operator shall retain, at the facility's site office, the current and previous five years' versions of the plan and any associated records, data, or other information. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 5 [K.S.A. 1998 Supp. 65-1,181]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 3, 5, 6, 9, and 14 [K.S.A. 1998 Supp. 65-1,179, 65-1,181, 65-1,182, 65-1,185, and 65-1,191]; effective Jan. 15, 1999.)

28-18a-15. Odor control plan for swine.

(a) An odor control plan shall be developed for each proposed new swine facility, proposed expansion of an existing swine facility, or existing swine facility with an animal unit capacity of 1,000 or more, pursuant to L. 1998, ch. 143, sec. 11, and amendments thereto [K.S.A. 1998 Supp. 65-1,187, and amendments thereto]. When submitting odor control plans to the department for approval, each swine operator shall submit at least four copies of the plan.

(b) Each swine facility required to develop and implement an odor control plan shall amend the plan and submit the plan to the department for approval, whenever specifically directed by the department or whenever warranted by one or more of the following:

- (1) Changes in operation of the swine facility;
- (2) a change or modification in the swine waste management or pollution control system; or
- (3) other conditions affecting the swine facility, waste management system, or pollution control system.

(c) Each operator of a swine facility shall implement the approved odor control plan consistent with any schedule of compliance established in the permit.

(d) The type and layout design of any vegetative screening utilized to minimize or control odors shall be approved by the department.

(e) The odor control plan and any associated records, data, or other information shall be retained at the facility's site office, in a manner that is accessible to inspection by representatives of the department. The operator shall retain, at the

facility's site office, the current and previous three years' versions of the plan and any associated records, data, or other information. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 11 [K.S.A. 1998 Supp. 65-1,187]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 11 and 14; [K.S.A. 1998 Supp. 65-1,187 and 65-1,191]; effective Jan. 15, 1999.)

28-18a-16. Emergency response plan for swine. (a) An emergency response plan shall be developed and implemented for each proposed new swine facility, proposed expansion for an existing swine facility, or existing swine facility with an animal unit capacity of 1,000 or more, pursuant to L. 1998, ch. 143, sec. 8, and amendments thereto [K.S.A. 1998 Supp. 65-1,184, and amendments thereto]. When submitting emergency response plans to the department for approval, each swine operator shall submit at least four copies of the plan.

(b) The emergency response plan for swine shall include, at a minimum, the following information:

(1) A description of potential sources, activities, and materials that may reasonably be expected to or could potentially result in pollution from an unauthorized discharge, spill, or release of swine or other wastes from the swine facility;

(2) a map, indicating an outline of the potential discharge area of the facility and existing structural control measures designed to contain or control any unauthorized discharge, spill, or release of swine or other process wastes from the swine facility;

(3) a spill contingency plan for swine or other process wastes;

(4) procedures for notification of the department;

(5) procedures to mitigate any adverse impacts of the emergency event; and

(6) training requirements for employees or contractors.

(c) Each swine facility required to develop and implement an emergency response plan shall amend the plan and submit the plan to the department for approval, whenever specifically directed by the department or whenever warranted by one or more of the following:

(1) Changes in operation of the swine facility;

(2) a change or modification in the animal or swine waste management system; or

(3) other conditions affecting the swine facility, waste management system, or pollution control system.

(d) The swine operator shall provide for and keep current the training of employees and contractors who are responsible for implementing the plan.

(e) The emergency response plan and any associated records, data, or other information shall be retained at the facility's site office, in a manner that is accessible to inspection by representatives of the department. The operator shall retain, at the facility's site office, the current and previous three years' versions for the plan and any associated records, data, or other information.

(f) A copy of the emergency response plan shall be maintained at the facility, in a location readily accessible to all employees or contractors responsible for implementing the plan. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 8 [K.S.A. 1998 Supp. 65-1,184]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 8 and 14 [K.S.A. 1998 Supp. 65-1,184 and 65-1,191]; effective Jan. 15, 1999.)

28-18a-17. Dead swine handling plan.

(a) A dead swine handling plan shall be developed and implemented for each proposed new swine facility, proposed expansion of an existing swine facility, or existing swine facility with an animal unit capacity of 1,000 or more, pursuant to L. 1998, ch. 143, sec. 17, and amendments thereto [K.S.A. 1998 Supp. 65-1,188, and amendments thereto]. When submitting dead swine handling plans to the department for approval, each swine operator shall submit at least four copies of the plan.

(b) The dead swine handling plan shall include, at a minimum, the following information:

(1) A description of how dead swine are to be handled before disposal, to decrease the possibility of spreading disease and preclude contamination of waters of the state. The description shall address the handling of carcasses associated with both normal mortality and a major disease outbreak or other situation that results in deaths significantly higher than normal mortality;

(2) the method of and location or locations at the facility to be utilized for temporary storage of the swine carcasses;

(3) the ultimate method or methods of disposal that will be utilized for the facility, including burial, rendering, incineration, composting or other methods as approved by the Kansas animal health department;

(4) procedures to be utilized to minimize the potential for pests and odors; and

(5) training requirements for employees and contractors.

(c) Each swine facility required to develop and implement a dead swine handling plan shall amend the plan and submit the plan to the department for approval whenever specifically directed by the department or whenever warranted by one or more of the following:

(1) Changes in operation of the swine facility;

(2) a change or modification in the swine waste management or pollution control system; or

(3) other conditions affecting the swine facility, waste management system, or pollution control system.

(d) The handling of dead swine shall be consistent with the provisions in L. 1998, ch. 143, sec. 17, and amendments thereto. [K.S.A. 1998 Supp. 65-1,188, and amendments thereto]

(e) The operator shall provide for and keep current the training of employees and contractors who are responsible for implementing the plan.

(f) The dead swine handling plan and any associated records, data, or other information shall be retained at the facility's site office, in a manner that is accessible to inspection by representatives of the department. The operator shall retain, at the facility's site office, the current and previous three years' versions of the plan and any associated records, data, or other information.

(g) A copy of the dead swine handling plan shall be maintained at the facility at a location readily accessible to all employees or contractors who are responsible for implementing the plan.

(h) The disposal of dead swine shall be conducted in conformance with the provisions of, and regulations adopted pursuant to, K.S.A. 47-1201, et seq., and amendments thereto. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 17 [K.S.A. 1998 Supp. 65-1,188]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997

Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 14 and 17 [K.S.A. 1998 Supp. 65-1,191 and 65-1,188]; effective Jan. 15, 1999.)

28-18a-18. Groundwater monitoring for swine facilities. (a) The installation and sampling of groundwater monitoring wells shall be conducted pursuant to L. 1998, ch. 143, secs. 4 and 5, and amendments thereto [K.S.A. 65-1,180 and 65-1,181, and amendments thereto].

(b) Any swine facility shall, when required by the department, provide for the installation and sampling of groundwater monitoring wells or the sampling of existing wells in the vicinity of waste-retention lagoons or ponds, waste treatment systems, land application sites, or other areas either known to be or potentially impacted by swine or other process wastes, or where warranted by groundwater, geologic, or construction conditions.

(c) Where a groundwater monitoring system is required by the department, the proposed location and design of the monitoring wells shall be approved by the department before being constructed.

(d) All water supply or groundwater monitoring wells shall be constructed by a water well contractor or driller licensed in Kansas, in conformance with regulations adopted pursuant to the Kansas groundwater exploration and protection act, K.S.A. 82a-1201 et seq., and amendments thereto.

(e) For the construction of a new swine facility, groundwater monitoring wells shall be sampled and analyzed to establish background concentrations of chemical parameters designated by the department before the facility is populated. For the installation of monitoring wells at existing facilities, each monitoring well shall be monitored within two months of installation to establish a baseline for the chemical parameters designated by the department.

(f) Background, baseline, and other data from monitoring wells shall be maintained for the life of the facility. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 65-169, 65-170, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, secs. 4 and 5 [K.S.A. 1998 Supp. 65-1,180 and 65-1,181]; effective Jan. 15, 1999.)

28-18a-19. Operation of swine waste management and swine pollution control systems.

(a) Each swine waste management system and swine pollution control system shall be designed, constructed, maintained, and operated to prevent pollution of waters of the state and to protect public health and the environment.

(b) Each swine waste management system and each swine pollution control system shall be operated according to the plans approved by the secretary.

(c) When a liner is installed or constructed, the operator shall maintain the liner to comply with the minimum standards of design, construction, and maintenance. When soil liners are utilized, no trees or other deep-rooted vegetation shall be allowed to grow within 100 feet of the liner. Any mechanical or structural damage to the liner shall be reported to the department within two workdays of identification and shall be repaired in a time frame approved by the secretary and designed to protect public health and the environment.

(d) Each operator shall haul or transport swine or process wastes to land application sites in a manner that prevents loss or spillage during transport.

(e) When land application of swine or other process wastes is practiced, the application shall be conducted at agronomic rates.

(f) Irrigation practices shall be managed to minimize ponding or puddling of swine or other process wastes at the land application site. Irrigation practices shall be managed to ensure that swine or other process wastes are not discharged from the application sites.

(g) Adequate equipment and land application areas shall be available for removal of swine or other process wastes and contaminated storm water runoff from the swine facility to comply with the provisions of the permit and these regulations.

(h) (1) Unless approved in advance by the secretary, liquid waste, concentrated liquid swine waste, or other liquid process waste shall not be land applied when the ground is frozen, snow-covered, or saturated, or during a precipitation event. Land application of swine or other process wastes during these periods may be authorized by the secretary for use in filtering swine or other process wastes from retention structures that are properly operated and maintained and that are in imminent danger of overflow to surface waters of the state due to a chronic or catastrophic precipitation event.

(2) Solid swine or other process wastes may be applied to frozen ground only if the proposed ap-

plication site and practices ensure that the wastes will be retained at the application site.

(i) (1) Each swine operator, as required by the facility permit issued by the secretary, shall conduct sampling and analysis of swine or process wastes or sites utilized for the application of swine or process wastes from confined swine feeding facilities, to determine nutrient and salinity levels, to confirm utilization of the swine or process wastes at agronomic rates, and to ensure that public health and the environment are protected.

(2) (A) Each swine operator of a swine facility with 999 animal units or less shall sample the soil of each field identified in the waste management plan for the swine facility if both of the following conditions are met:

(i) The field is identified by KDHE as located in a sensitive groundwater area or over the Equus Beds.

(ii) The field has received manure or wastewater in one or more of the previous five years.

(B) The sampling and analysis shall be conducted in accordance with the procedures approved by the secretary. The test results shall be sent to the department within 30 days of receipt of the test results.

(3) Each swine operator required to obtain a federal permit shall conduct soil and waste sampling and analysis in accordance with the nutrient management plan. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-171d, K.S.A. 65-171h, and K.S.A. 65-1,181; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-20. Denial, suspension, revocation, or termination of a permit or certification for swine facilities.

(a) A permit or certification may be denied, suspended, revoked, or terminated, pursuant to K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, L. 1998, ch. 143, sec. 16, and amendments thereto [K.S.A. 1998 Supp. 65-171d, K.S.A. 1998 Supp. 65-1,193, and amendments thereto].

(b) A permit or certification may be denied, suspended, revoked, or terminated for any of the following reasons:

(1) Misrepresentation or omission of a significant fact by the swine operator, either in the application for the permit or in information subsequently reported to the department;

(2) improper operation of the confined feeding facility, swine waste management system, or pol-

lution control system, including any land application areas that cause pollution or a public health hazard;

(3) violation of any provision of K.S.A. 65-159 et seq. and amendments thereto, any regulations of article 16 and article 18, or other restrictions set forth in the permit, certification, or waiver; or

(4) failure to comply with an order or modified permit issued by the secretary.

(c) Procedures and provisions for the denial, suspension, revocation, or termination of a permit shall be pursuant to the provisions of K.A.R. 28-16-62.

(d) Any swine operator aggrieved by the denial, suspension, revocation, or termination of a permit or certification may request a hearing in accordance with the provisions of the Kansas administrative procedure act, K.S.A. 77-501 et seq. and amendments thereto.

(e) If a confined feeding facility is required to terminate operations or reduce the number of animal units at the facility, the swine operator may be allowed by the secretary to finish feeding existing swine at the facility at the time of notification by the department, until the facility is permitted or certified, or complies with the provisions of these regulations. However, in no case shall the termination of operations or the reduction of the animal unit number exceed five months from the initial notification to terminate operations by the department. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, sec. 16 [K.S.A. 1998 Supp. 65-1,193]; effective Jan. 15, 1999.)

28-18a-21. Inspections. (a) Each swine operator shall provide all necessary specialized equipment, clothing, or appurtenances to enable a department inspector to enter the facility for inspection.

(b) Each swine operator that develops or modifies the biosecurity protocols and that requests KDHE conformance with the protocols shall submit a copy of the protocols to the department within 30 days of establishing or modifying the biosecurity protocols.

(c) If any department inspector conducting an inspection of a confined feeding facility complies

with the facility's biosecurity protocol, that inspector shall be allowed to access the animal waste management system to conduct inspections. Biosecurity protocols shall not restrict the reasonable access of any department inspector. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-1,191; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-22. Swine facility closure requirements. (a) Each swine operator of a swine facility permitted by the department shall notify the department of any plans to cease operation of, close, or abandon the swine facility.

(b) Each swine operator shall maintain and comply with a valid water pollution control permit for the swine facility until closure of the swine facility is complete and all materials representing a threat to public health and the environment are removed.

(c)(1) Each permit applicant for each proposed new swine facility or new swine waste-retention lagoon or pond, proposed expansion of an existing swine facility, or proposed expansion of an existing swine waste-retention lagoon or pond shall develop and implement a swine facility closure plan or swine waste-retention lagoon or pond closure plan if either of the following conditions is met:

(A)(i) The new swine facility or expanded swine facility is proposed to have an animal unit capacity of 1,000 or more; and

(ii) the swine facility is proposed to be located over the Equus Beds; or

(B) The new swine facility, existing swine facility, or proposed expanded swine facility will have an animal unit capacity of 3,725 or more.

(2) Each swine operator of any existing swine facility or swine waste-retention lagoon or pond without a current swine facility or swine waste-retention lagoon or pond closure plan shall develop and implement a closure plan for the swine facility or swine waste-retention lagoon or pond if both of the following conditions are met:

(A) The existing swine facility has an animal unit capacity of 1,000 or more.

(B) The existing swine facility is located over the Equus Beds. The swine facility or swine waste-retention lagoon or pond closure plan shall be developed and submitted to the department with the next application for permit renewal or modification for the existing swine facility.

(d) When submitting a swine facility or swine waste-retention lagoon or pond closure plan to

the department, each swine operator shall submit at least four copies of the plan.

(e) A swine facility or swine waste-retention lagoon or pond closure plan shall include, at a minimum, the following:

(1) A description of all swine waste management and swine pollution control system components utilized to contain, control, or store swine or other process wastes at the swine facility;

(2) a description of the procedures to be employed to remove and dispose of swine or other process wastes;

(3) a description of the maintenance, deactivation, conversion, or demolition of all swine waste-retention lagoons or ponds at the swine facility pursuant to K.S.A. 65-1,190, and amendments thereto, or the closure of any swine waste-retention lagoon or pond by one of the following methods:

(A) Removing the berms, and leveling and revegetating the site to provide erosion control;

(B) leaving the structure or structures in place for use as a freshwater farm pond or reservoir;

(C) retaining the structure or structures for future use as a part of a swine waste management or pollution control system; or

(D) using any other method approved by the secretary; and

(4) a description of, and detailed drawings for, the plugging of any water or groundwater monitoring wells at the swine facility.

(f) Each swine operator of a swine facility required to have a swine facility closure plan and a swine waste-retention lagoon or pond closure plan shall amend each plan and submit the amended plans to the department for approval whenever specifically directed by the secretary or whenever warranted by one or more of the following:

(1) Any significant changes in operation of the swine facility;

(2) any significant change or modification in the swine waste management or swine pollution control systems; or

(3) any other significant conditions affecting the swine facility, swine waste management system, or swine pollution control system.

(g) Each operator of a swine facility that is required to develop a swine facility or swine waste-retention lagoon or pond closure plan shall retain the current plan at the site office of the facility or at a central records location, in a manner that is accessible to inspection by representatives of the department.

(h) The closure of a swine facility or swine waste-retention lagoon or pond shall be completed within six months of notification to the department of the proposed closure of the facility or termination of operations.

(i) Each swine operator seeking an extension of time for closure shall submit a written request to the secretary. The request shall detail the reasons for the extension. Only weather conditions or the legal change in ownership of the swine facility shall be grounds for the secretary to consider granting an extension.

(j) If the operator of a swine facility is unwilling or unable to properly close the swine facility, the owner of swine at the swine facility and the property owner shall be responsible for closing the swine facility in accordance with these regulations and in a manner that protects the waters of the state, public health, and the environment. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, 65-165, 65-166, K.S.A. 2005 Supp. 65-171d, K.S.A. 65-1,189 and 65-1,190; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-23. Financial assurance for swine facility closure. (a) On or before July 1, 1999 and annually thereafter before January 1 of each year, each operator of a swine facility with an animal unit capacity of 3,725 or more shall provide evidence, satisfactory to the department, that the operator has the financial ability to cover the cost of closure of the swine facility, as required by the department.

(b) For new construction or new expansion of a swine facility with a proposed animal unit capacity of 3,725 or more, the swine operator shall provide evidence, satisfactory to the department, that the operator has the financial ability to cover the cost of closure of the proposed new construction or expansion at the time the application is submitted to the department for review.

(c) Each operator of a swine facility with an animal unit capacity of 3,725 or more shall submit, as a part of the evidence provided to the department, a detailed written estimate in current dollars of the cost to close the swine facility in a manner acceptable to the department. The estimate shall be prepared by a professional engineer or consultant approved by the department.

(d) Each operator shall develop an estimate of the cost to close the swine facility as follows:

(1) The estimate shall be based on the cost charged by a third party to collect and dispose

of all swine or other process wastes stored or retained at the swine facility, excluding the swine waste-retention lagoons or ponds, at a specifically identified off-site application area.

(2) All waste management and pollution control system components shall be assumed to be at maximum capacity.

(3) The costs attributable to the swine waste-retention lagoons or ponds shall be excluded from the estimate.

(e) Each swine operator shall increase the closure cost estimate and the amount of financial assurance provided if any change in the facility closure plan or in operation increases the maximum cost of closure at any time.

(f) Each swine operator shall provide continuous financial assurance coverage for closure until the department determines the facility closure to be acceptable.

(g) Mechanisms used to demonstrate financial assurance shall ensure that the funds necessary to meet the cost to close the swine facility, pursuant to K.A.R. 28-18-22 (d), are accessible to the department in a timely fashion when needed. In establishing financial assurance for the facility closure, swine operators shall utilize any of the following options:

(1) Trust fund;

(2) surety bond guaranteeing payment or performance;

(3) letter of credit;

(4) insurance;

(5) self-insurance; or

(6) use of multiple mechanisms.

(h) Each operator that utilizes a trust fund shall meet the following requirements.

(1) Provide for a trustee. The trustee shall be an entity that has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency. A copy of the trust agreement shall be provided to the department.

(2) Provide authority for the department or person authorized by the department to implement the closure to request and obtain from the trustee reimbursement for closure expenditures. Requests for reimbursement shall be granted by the trustee, to the limit of the funds in the trust fund and proper documentation of the incurred costs are provided.

(3) Maintain the trust fund. The operator shall maintain the trust fund until an alternative financial assurance mechanism is approved by the de-

partment and is in place, or shall cease operations and close out the facility before the trust fund is terminated or if the operator is no longer required to demonstrate financial responsibility.

(i) Each swine operator that utilizes a surety bond guaranteeing payment or performance shall meet all of the following requirements:

(1) Obtain a surety bond, with the penal sum of the bond in an amount at least equal to the estimated facility closure cost;

(2) provide the department with a copy of the bond;

(3) obtain the bond from a company that is licensed to issue bonds in Kansas;

(4) provide in the bond that the surety shall become liable on the bond obligation when the operator fails to perform as guaranteed by the bond;

(5) establish a standby trust fund;

(6) provide that payments made under the terms of the bond shall be deposited by the surety directly into the standby trust fund. Payments from the trust fund shall be made by the trustee to the limit of the bond amount when proper documentation of the incurred costs are provided; and

(7) obtain a bond providing that the surety may cancel the bond by sending notice of cancellation by certified mail to the operator and the department at least 120 days in advance of the cancellation. If the surety cancels the bond, the facility shall obtain alternative financial assurance before the cancellation or shall cease operations and close out the facility before the cancellation date of the bond, unless the operator is no longer required to demonstrate financial responsibility.

(j) Each swine operator that utilizes a letter of credit shall meet the following requirements:

(1) Obtain an irrevocable standby letter of credit by which the issuing institution shall be an entity that has authority to issue letters of credit and whose letter of credit operations are regulated by a federal or state agency. The letter of credit shall be in a form that constitutes an unconditional promise to pay and shall be in a form negotiable by the department;

(2) provide the department with a copy of the letter of credit. Information contained in the letter of credit or provided by the operator shall include the name, location, and permit number of the facility and the amount of funds assured;

(3) provide an irrevocable letter of credit issued for a period of at least one year in an amount at least equal to the current cost estimate for closure of the facility. The letter of

credit shall provide that the expiration date shall be automatically extended for a period of at least one year, unless the issuing institution has canceled the letter of credit by sending notice of cancellation by certified mail to the operator and department 120 days in advance of cancellation. If the letter of credit is canceled by the issuing institution, the owner shall obtain alternative financial assurance before the cancellation or shall cease operations and close out the facility before the cancellation date of the letter of credit, unless the operator is no longer required to demonstrate financial responsibility; and

(4) cancel the letter of credit only if alternative financial assurance, approved by the department, is substituted or if the operator is no longer required to demonstrate financial responsibility.

(k) Each operator that utilizes insurance shall meet all of the following requirements:

(1) Obtain insurance coverage for a period of at least one year in an amount at least equal to the current cost estimate for closure of the facility;

(2) obtain insurance from an insurer authorized to sell insurance in Kansas;

(3) provide the department with a copy of the insurance policy;

(4) ensure that the insurance policy guarantees that funds shall be available to close the facility in the event the operator is unable or unwilling to close the facility in accordance with the facility closure plan approved by the department;

(5) ensure that the insurance policy provides that the insurer is responsible for the payment of the department or person authorized to close the facility. Payments by the insurer for the policy shall be made by the insurer to the limit of the policy amount when proper documentation of the incurred costs are provided;

(6) ensure that the insurance policy provides that the insurer cannot cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy shall, at a minimum, provide the insured with the option of renewal at the face amount of the expiring policy. If there is a failure to pay the premium, the insurer may cancel the policy by sending notice of cancellation by certified mail to the operator and the department 120 days in advance of the cancellation;

(7) if the insurer cancels the policy, obtain alternative financial assurance before the cancellation, or cease operations and close out the facility before the cancellation date of the insurance pol-

icy, unless the operator is no longer required to demonstrate financial responsibility; and

(8) cancel the insurance policy only if alternative financial assurance, approved by the department, is substituted or if the operator is no longer required to demonstrate financial responsibility.

(l) To establish evidence of financial ability for self-insurance, each swine operator shall meet the following requirements:

(1) Submit a financial statement, prepared by a certified public accountant, listing tangible assets and total liabilities of the swine operator. The assets shall not include the value of the swine at the facility. The financial statement shall include a general release, by the swine operator, providing the department with authorization for verification with banks or other financial institutions; and

(2) provide an indication on the financial statement of whether or not the tangible assets, less the total liabilities, are satisfactory to cover the estimated cost of closure. The financial statement shall note the estimated cost of closure utilized.

(m) Each swine operator that utilizes multiple financial assurance mechanisms shall meet the following requirements:

(1) Use only the financial assurance mechanisms provided for in this regulation; and

(2) provide that the total coverage of all the financial mechanisms utilized provides an amount at least equal to the current cost estimate for closure of the facility. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; implementing L. 1998, ch. 143, sec. 12 [K.S.A. 1998 Supp. 65-1,189]; effective Jan. 15, 1999.)

28-18a-24. Financial assurance for swine waste-retention lagoon or pond closure.

(a) Before January 15 each year, each swine operator of a swine facility with an animal unit capacity of 3,725 or more that utilizes swine waste-retention lagoons or ponds shall provide evidence, satisfactory to the department, that the swine operator has the financial ability to cover the cost of closure of the swine waste-retention lagoons or ponds as required by the department.

(b) For new construction or new expansion of a swine facility with a proposed animal unit capacity of 3,725 or more that employs the use of swine waste-retention lagoons or ponds, the swine operator shall provide evidence, satisfactory to the department, that the swine operator has the financial ability to cover the cost of closure of the

proposed swine waste-retention lagoons or ponds at the time the application is submitted to the department for review.

(c) Each swine operator of a swine facility with an animal unit capacity of 3,725 or more shall submit, as a part of the evidence provided to the department, a detailed written estimate in current dollars of the cost to close the swine waste-retention lagoons or ponds in a manner acceptable to the department. The estimate shall be prepared by a professional engineer or consultant approved by the department.

(d) To estimate the cost to close the swine waste-retention lagoons or ponds, the swine operator shall consider the following:

(1) The cost of the swine waste-retention lagoons or ponds closure by determining the cost of a third party to collect and dispose of all swine or other process wastes stored or retained on-site in the lagoons or ponds at a specifically identified off-site application area; and

(2) all swine waste-retention lagoons or ponds to be 100 percent full, for the purpose of estimating costs.

(e) Each swine operator shall increase the closure cost estimate and the amount of financial assurance provided if changes in the swine facility closure plan addressing the swine waste-retention lagoons or ponds or a change in operation increase the maximum cost of closure at any time.

(f) Each swine operator shall provide continuous financial assurance for the cost of closure until the department determines the closure of the swine waste-retention lagoons or ponds to be acceptable.

(g) Mechanisms used to demonstrate financial assurance shall ensure that the funds necessary to meet the cost to close the swine waste-retention lagoons or ponds required by K.A.R. 28-18a-22 are accessible to the department in a timely fashion when needed. In establishing financial assurance for the swine waste-retention lagoons or ponds closure, swine operators shall utilize one or more of the following options:

(1) Trust fund;

(2) surety bond guaranteeing payment or performance;

(3) letter of credit;

(4) insurance; or

(5) self-insurance.

(h) If a swine operator utilizes a trust fund for financial assurance, the swine operator shall meet following requirements:

(1) The swine operator shall provide for a trustee that shall be an entity that has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency. A copy of the trust agreement shall be provided to the department.

(2) The swine operator shall provide authority for the department or person authorized by the department to implement the closure to request and obtain reimbursement for closure expenditures from the trustee. Requests for reimbursement shall be granted by the trustee, to the limit of the funds in the trust fund and with proper documentation of the incurred costs.

(3) The swine operator shall maintain the trust fund until an alternative financial assurance mechanism is approved by the department and is in place or shall cease operations and close the swine waste-retention lagoons or ponds before the trust fund is terminated, unless the operator is no longer required to demonstrate financial assurance.

(i) If a swine operator utilizes a surety bond guaranteeing payment or performance for financial assurance, the swine operator shall meet the following requirements:

(1) Obtain a surety bond, with the penal sum of the bond in an amount at least equal to the estimated swine waste-retention lagoons or ponds closure cost;

(2) provide the department with a copy of the bond;

(3) obtain the bond from a company that is licensed to issue bonds in Kansas;

(4) provide in the bond that the surety becomes liable on the bond obligation when the swine operator fails to perform as guaranteed by the bond;

(5) establish a standby trust fund;

(6) provide that payments made under the terms of the bond shall be deposited by the surety directly into the standby trust fund. Payments from the trust fund shall be made by the trustee to the limit of the bond amount when proper documentation of the incurred costs is provided; and

(7) obtain a bond providing that the surety may cancel the bond by sending notice of cancellation by certified mail to the swine operator and the department at least 120 days in advance of the cancellation. If the surety cancels the bond, the swine operator shall obtain alternative financial assurance before the cancellation or shall cease operations and close the swine waste-retention lagoons or ponds before the cancellation date of the bond,

unless the swine operator is no longer required to demonstrate financial assurance.

(j) If a swine operator utilizes a letter of credit for financial assurance, the swine operator shall meet the following requirements:

(1) Obtain an irrevocable standby letter of credit by which the issuing institution shall be an entity that has authority to issue letters of credit and whose letter of credit operations are regulated by a federal or state agency. The letter of credit shall be in a form that constitutes an unconditional promise to pay and shall be in a form negotiable by the department;

(2) provide the department with a copy of the letter of credit. Information contained in the letter of credit or provided by the swine operator shall include the name, location, and permit number of the swine facility and the amount of funds assured;

(3) provide an irrevocable letter of credit issued for at least one year in an amount at least equal to the current cost estimate for closure of the swine waste-retention lagoons or ponds. The letter of credit shall provide that the expiration date shall be automatically extended for at least one year unless the issuing institution has canceled the letter of credit by sending notice of cancellation by certified mail to the swine operator and department at least 120 days in advance of cancellation. If the letter of credit is canceled by the issuing institution, the swine operator shall obtain alternative financial assurance before the cancellation or shall cease operations and close the swine waste-retention lagoons or ponds before the cancellation date of the letter of credit, unless the swine operator is no longer required to demonstrate financial assurance; and

(4) cancel the letter of credit only if alternative financial assurance, approved by the secretary, is substituted or if the swine operator is no longer required to demonstrate financial assurance.

(k) If a swine operator utilizes insurance for financial assurance, the swine operator shall meet the following requirements:

(1) Obtain insurance coverage for at least one year in an amount at least equal to the current cost estimate for closure of the swine waste-retention lagoons or ponds;

(2) obtain insurance from an insurer authorized to sell insurance in Kansas;

(3) provide the department with a copy of the insurance policy;

(4) ensure that the insurance policy guarantees that funds shall be available to close the swine

waste-retention lagoons or ponds if the swine operator is unable or unwilling to close the swine waste-retention lagoons or ponds in accordance with the swine facility closure plan approved by the department;

(5) ensure that the insurance policy provides that the insurer is responsible for the payment of the department or person authorized to close the swine waste-retention lagoons or ponds. Payments by the insurer for the policy shall be made to the limit of the policy amount when proper documentation of the incurred costs is provided;

(6) ensure that the insurance policy shall provide that the insurer shall not cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy shall, at a minimum, provide the insured with the option of renewal at the face amount of the expiring policy. If there is a failure to pay the premium, the insurer may cancel the policy by sending notice of cancellation by certified mail to the swine operator and the department at least 120 days in advance of the cancellation;

(7) if the insurer cancels the policy, obtain alternative financial assurance before the cancellation or cease operations and close the swine waste-retention lagoons or ponds before the cancellation date of the insurance policy, unless the swine operator is no longer required to demonstrate financial assurance; and

(8) cancel the insurance policy only if alternative financial assurance, approved by the department, is substituted or if the swine operator is no longer required to demonstrate financial assurance.

(l) If a swine operator utilizes self-insurance for financial assurance, the swine operator shall meet the following requirements:

(1) Submit a financial statement, prepared by a certified public accountant, listing tangible assets and total liabilities of the swine operator. The assets shall not include the value of the swine at the swine facility. The financial statement shall include a general release by the swine operator, providing the department authorization for verification with banks or other financial institutions; and

(2) provide an indication on the financial statement of whether the tangible assets, less the total liabilities, are satisfactory to cover the estimated cost of closure. The financial statement shall note the estimated cost of closure utilized.

(m) Each swine operator that utilizes multiple financial assurance mechanisms shall meet both of the following requirements:

(1) Use only the financial assurance mechanisms specified in this regulation; and

(2) submit documentation to the department that confirms that the total coverage of all the financial mechanisms utilized provides an amount at least equal to the current cost estimate for closure of the swine waste-retention lagoons or ponds. (Authorized by and implementing K.S.A. 65-171d and 65-1,190; effective Jan. 15, 1999; amended Nov. 19, 2021.)

28-18a-25. Variance of specific requirements. (a) Each swine operator seeking a variance from the regulations in this article shall submit to the department a written request for variance from the regulations in this article and shall provide information relevant to the request.

(b) Each request shall specifically set forth why the variance should be considered and how the requested variance addresses the intent of this article.

(c) A variance may be granted by the department whenever site-specific conditions or proposals are in keeping with the purpose and intent of this article. (Authorized by and implementing K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, and K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1; effective Jan. 15, 1999.)

28-18a-26. Requirements for swine facility operator certification. Each operator of a swine facility with an animal unit capacity of 1,000 or more that is required to have a permit shall obtain a swine waste management and swine pollution control system operator certificate. Each swine operator that desires or is required to obtain a swine facility operator certificate shall meet the following requirements:

(a) Each applicant shall be a swine facility operator who maintains or supervises a swine waste management or swine pollution control system.

(b) Each swine facility operator shall submit a complete application and the appropriate fee to the department. The application shall be received by the department at least two weeks before the scheduled examination date. Late applications shall not be accepted for the scheduled examination date.

(c) If an applicant provides false information on an application, the applicant shall not be accepted for examination, and the fee submitted with the application shall not be returned to the applicant. The applicant shall be notified of the decision denying

acceptance for examination and shall not be allowed to take the examination for two consecutive years. (Authorized by K.S.A. 2003 Supp. 65-171d, K.S.A. 65-1,183, and K.S.A. 65-4512; implementing K.S.A. 65-1,183, 65-1,186, and 65-4512; effective Jan. 15, 1999; amended March 16, 2007.)

28-18a-27. Eligibility for swine facility operator certification. (a) Each applicant for certification shall meet the following requirements:

(1) Submit a completed application, on forms provided by the department and with the appropriate fees; and

(2) complete six hours of training, as approved by the department.

(b) Certified swine operators shall acquire a minimum of six hours of approved training every five years as a condition for renewal of the certification. (Authorized by K.S.A. 65-4512, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 7 [K.S.A. 1998 Supp. 65-1,183]; implementing L. 1998, ch. 143, secs. 7 and 10 [K.S.A. 1998 Supp. 65-1,183 and 65-1,186]; effective Jan. 15, 1999.)

28-18a-28. Swine facility operator certification examinations. (a) Each applicant for a swine facility operator certificate shall pass a written examination administered by the department or a designee.

(b) Each swine operator who seeks to obtain a swine facility operator certification and who has allowed a certificate to lapse for a period of two years or more shall submit an application and fee, receive at least six hours of approved training, and pass a written examination. (Authorized by K.S.A. 65-4512, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 7 [K.S.A. 1998 Supp. 65-1,183]; implementing L. 1998, ch. 143, secs. 7 and 10 [K.S.A. 1998 Supp. 65-1,183 and 65-1,186]; effective Jan. 15, 1999.)

28-18a-29. Noncertified operators responsible for the operation and management of swine facilities, swine waste management systems, or pollution control systems. (a) Each noncertified operator of a new or proposed swine facility with an animal unit capacity of 1,000 or more shall notify the department within 30 days of the initial start-up of the facility that the operator is the designated facility operator. The operator shall be designated as an "operator in training (OIT)." The operator shall obtain six hours of approved training and shall obtain the certification

within one year of the notification to KDHE. Each noncertified operator of a swine facility with an animal unit capacity of 1,000 or more shall notify the department within 30 days of assuming responsibility for the operation of the swine facility.

(b) The OIT designation shall be renewed only once, if it is demonstrated to the department that the operator is attending training sessions or studying correspondence courses in preparation to retake the examination. (Authorized by K.S.A. 65-4512, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 7 [K.S.A. 1998 Supp. 65-1,183]; implementing L. 1998, ch. 143, secs. 7 and 10 [K.S.A. 1998 Supp. 65-1,183 and 65-1,186]; effective Jan. 15, 1999.)

28-18a-30. Issuance of certificate of competency. (a) Upon fulfillment of the requirements in K.A.R. 28-18-26, 28-18-27, and 28-18-28, a certificate shall be issued to the applicant. The certificate shall designate that the swine operator is qualified to operate and maintain a swine facility, swine waste management system, and pollution control system. This certificate shall be effective for five years from the date of issuance.

(b) A certificate may be issued, through reciprocity, to an applicant who has been issued a swine operator, or equivalent, certification in another state when the department determines that the standards for training and certification meet or exceed the requirements of the department. The swine operator shall provide any information that the department requires to determine whether or not a certificate may be issued through reciprocity. (Authorized by K.S.A. 65-4504, K.S.A. 65-4512, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 7 [K.S.A. 1998 Supp. 65-1,183]; implementing L. 1998, ch. 143, secs. 7 and 10 [K.S.A. 1998 Supp. 65-1,183 and 65-1,186]; effective Jan. 15, 1999.)

28-18a-31. Swine operator certification fees. (a) Fees for swine operator certification shall be as follows:

- (1) Operator in training (one-year certificate)..... No charge
- (2) operator in training (renewal of one year).....\$5.00
- (3) examination fee.....\$25.00
- (4) five-year renewal of certificates.....\$50.00
- (5) reinstatement of lapsed certificate up to one year after renewal date.....\$70.00
- (6) reinstatement of lapsed certificate between one and two years after renewal date.....\$80.00
- (7) reciprocity fee.....\$65.00

(b) Fees from applicants who are ineligible to take the certification examination, for reasons other than providing false information on the application, shall be returned.

(c) Fees from applicants who fail the examination shall not be returned.

(d) Each operator required to retake an examination shall submit a new application and fee.

(e) Fees for department-sponsored training sessions shall be established by the department. (Authorized by K.S.A. 65-4504, K.S.A. 65-4512, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 7 [K.S.A. 1998 Supp. 65-1,183]; implementing L. 1998, ch. 143, secs. 7 and 10 [K.S.A. 1998 Supp. 65-1,183 and 65-1,186]; effective Jan. 15, 1999.)

28-18a-32. (Authorized by K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, and L. 1998, ch. 143, sec. 5 [K.S.A. 1998 Supp. 65-1,181]; implementing K.S.A. 1997 Supp. 65-164, K.S.A. 1997 Supp. 65-165, as amended by L. 1998, ch. 62, sec. 1, K.S.A. 65-166, K.S.A. 1997 Supp. 65-166a, K.S.A. 1997 Supp. 65-171d, as amended by L. 1998, ch. 143, sec. 1, K.S.A. 65-171h, and L. 1998, ch. 143, sec. 5 [K.S.A. 1998 Supp. 65-1,181]; effective Jan. 15, 1999; revoked March 16, 2007.)

28-18a-33. Groundwater protection requirements for swine waste-retention lagoons or ponds, swine waste management systems, and waste treatment facilities. (a) The provisions of this article shall not apply to any permitted swine waste-retention lagoon or pond or swine waste management system, or waste treatment facility that is in existence or that the secretary approved for construction before the effective date of this regulation, unless information becomes available showing that the swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility presents an imminent threat to public health or the environment.

(b)(1) The provisions of this article shall not apply to any existing or proposed swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility located at a swine facility if all of the following conditions are met:

(A) The swine facility existed on July 1, 1994 and is still in existence as defined in K.S.A. 65-1,178, and amendments thereto.

(B) The swine operator registered the swine facility with the secretary before July 1, 1996.

(C) The capacity of the existing or proposed swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility is no larger than that necessary to serve the facility as described in the registration application submitted before July 1, 1996.

(D) The separation distance from the bottom of the existing or proposed swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility to groundwater is less than 10 feet.

(2) Each operator of a swine facility meeting the requirements of paragraph (b)(1) of this regulation and proposing to use a swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility shall propose site-specific groundwater protection measures for the secretary's consideration for approval.

(c) Each new or expanded portion of a swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility other than those described in subsections (a) and (b) shall be located a minimum of 10 feet above the static groundwater level, as measured from the lowest elevation of the finished interior grade of the swine waste-retention lagoon or pond, the swine waste management system, or the waste treatment facility. Each swine operator of or permit applicant for a swine facility shall notify the department at least two days before performing any site investigations to determine the static groundwater level at the site.

(d) Each swine operator or permit applicant shall ensure that each liner for a new or expanded portion of a swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility meets the following requirements:

(1) If the new or expanded portion of the swine waste-retention lagoon or pond, swine waste management system, or waste treatment facility is not located over the Equus Beds or in a sensitive groundwater area, the materials used for the liner shall have a seepage rate of no more than 1/4 inch per day, except as required by K.S.A. 65-1,181, and amendments thereto.

(2) If the new or expanded portion of the swine waste-retention lagoon or pond, the swine waste management system, or the waste treatment facility is located in a sensitive groundwater area, the materials used for the liner shall have a seepage rate of no more than 1/10 inch per day.

(3) If the new or expanded portion of the swine waste-retention lagoon or pond, the swine waste management system, or the waste treatment facility is located over the Equus Beds, either an impermeable synthetic membrane liner shall be used or the material used for the liner shall consist of either of the following:

(A) Two or more layers of compacted soil designed to have a seepage rate of no more than 1/10 inch per day. To demonstrate that this seepage requirement is met, the soil liner seepage rate shall be determined within 12 months of placing the swine waste-retention lagoon or pond, the swine waste management system, or the waste treatment facility into operation. The test method used shall be the whole pond seepage test; or

(B) any material that has been approved through the variance process in accordance with K.A.R. 28-18a-25.

(e) Each permit applicant or operator that conducts testing to determine the seepage rate shall submit four copies of the test results to the department.

(f) For the purpose of K.A.R. 28-18a-1 through K.A.R. 28-18a-33, an imminent threat to public health or the environment may be deemed to exist if physical, chemical, biological, or radiological substances or a combination of these substances is released into subsurface waters of the state and results in a concentration or amount of a substance in excess of the numerical criteria designated for aquatic life protection, agricultural use, or public health protection as provided in the "Kansas surface water quality standards: table of numeric criteria," dated December 6, 2004, which is adopted by reference in K.A.R. 28-16-28e. If the background concentration of a substance is naturally occurring and is greater than the numerical criterion, the background concentration shall be considered the criterion. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-164, K.S.A. 2005 Supp. 65-171d, and K.S.A. 65-171h; effective March 16, 2007.)

Article 19.—AMBIENT AIR QUALITY STANDARDS AND AIR POLLUTION CONTROL

AMBIENT AIR QUALITY STANDARDS

28-19-1. (Authorized by K.S.A. 65-3001, 65-3005, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1981.)

28-19-2. (Authorized by K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1981.)

28-19-4. (Authorized by K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1981.)

GENERAL REGULATIONS

28-19-6. (Authorized by K.S.A. 65-3001, 65-3005, 65-3006, 65-3007, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1981.)

28-19-7. (Authorized by and implementing K.S.A. 1994 Supp. 65-3005; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1975; amended, T-84-39, Dec. 21, 1983; amended May 1, 1984; amended, T-85-29, Nov. 14, 1984; amended May 1, 1985; amended May 1, 1988; amended Oct. 16, 1989; amended Nov. 22, 1993; amended Jan. 23, 1995; amended Dec. 8, 1995; revoked Oct. 10, 1997.)

28-19-8. Reporting required. The references in K.A.R. 28-19-9(a) and K.A.R. 28-19-16b to reporting requirements under this regulation, the reference in K.A.R. 28-19-16b to the information required to be included in a permit application by K.A.R. 28-19-8(a), and any other reference in these regulations to the requirements of K.A.R. 28-19-8, shall be interpreted to require compliance with K.A.R. 28-19-300 through K.A.R. 28-19-304. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3007, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1975; amended, T-84-39, Dec. 21, 1983; amended May 1, 1984; amended, T-85-29, Nov. 14, 1984; amended May 1, 1985; amended May 1, 1988; amended Oct. 16, 1989; amended Jan. 23, 1995.)

28-19-9. Time schedule for compliance. Except as otherwise noted in specific emission control regulations, compliance with these regulations shall be according to the following schedules: (a) All new air contaminant emission sources or alterations to emission sources that are required to be reported under the provisions of K.A.R. 28-19-8(a) shall be in compliance with all applicable emission control regulations at the time that they go into operation. The department may authorize the operation of a new or altered emission source

for any additional specified time periods that are required to make necessary adjustments on the equipment before compliance can be demonstrated. This authorization shall be granted only at the request of the operator and under conditions that are approved by the department.

(b) Any air contaminant emission source that was operating, under construction or under purchase contract on January 1, 1971, and that has not previously been required to comply with any emission control requirement in these regulations, shall comply with that emission control requirement or those requirements within 180 days after the department notifies the owner or operator that the emission source is required to be reported under the provisions of K.A.R. 28-19-8(a).

(c) The owner or operator of any portable stationary air contaminant emission source that has been issued a permit under K.A.R. 28-19-14 and which is moved to another location within the state shall report the move to the department, in writing, at least 10 days before the source commences operation at the new location. The report shall identify the equipment being moved, describe the old and the new location, indicate the scheduled date that operation of the source at the new location is to begin, and indicate the expected operating period at this location. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1975; amended, T-84-39, Dec. 21, 1983; amended May 1, 1984.)

28-19-10. Circumvention of control regulations. (A) No person shall cause or permit the installation or use of any machine, equipment, device or other article, or alter any process in any manner which, without resulting in a reduction of the total amount of contaminants emitted, conceals or dilutes the emission of contaminants which would otherwise violate provisions of these control regulations.

(B) Exception to section A of this regulation may be granted by the department, upon request, provided that such action is intended to convert the physical and/or chemical nature of the contaminant emission and that failure to reduce total contaminant emissions results solely from the introduction of contaminants which are not deemed to be detrimental to the public interest. (Authorized by K.S.A. 1970 Supp. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971.)

28-19-11. Enforcement discretion due to startup, shutdown, malfunctions, or scheduled maintenance.

(a) An emission source having emissions that are in excess of the applicable emission limitation and standard and result from startup, shutdown, malfunctions, or scheduled maintenance of control or processing equipment and appurtenances may be exempt from enforcement action at the secretary's discretion if both of the following conditions are met:

(1) The person responsible for the operation of the emission source notifies the department of the occurrence and nature of the excess emissions resulting from startup, shutdown, malfunctions, or scheduled maintenance, in writing, within 10 days of discovery of the excess emissions.

(2) Reasonable action is taken regarding the occurrence specified in paragraph (a)(1) to initiate and complete any necessary repairs and place the equipment back in operation as quickly as possible.

(b) Emissions that are in excess of the applicable emission source emission limitation and standard and result from startup, shutdown, or malfunctions shall be evaluated by the secretary for potential enforcement action based on the frequency and severity of the excess emissions.

(c) Emissions that are in excess of the applicable emission source emission limitation and standard and result from scheduled maintenance of control or processing equipment and appurtenances shall be evaluated by the secretary for potential enforcement action based on the following:

(1) The severity of the excess emissions;

(2) any prior approval for scheduled maintenance by the secretary; and

(3) demonstration that the scheduled maintenance cannot be accomplished by maximum reasonable effort, including off-shift labor where required, during periods of shutdown of any related control or processing equipment.

(d) Any exemption granted under this regulation may be rescinded if the secretary obtains additional information and deems enforcement action necessary based upon this information.

(e) Lack of enforcement for excess emissions under this regulation shall not preclude the taking of enforcement action by USEPA or through private citizen lawsuits. (Authorized by K.S.A. 2016 Supp. 65-3005; implementing K.S.A. 65-3006 and K.S.A. 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-74-7, Jan. 1, 1974; amended May 1, 1975; amended Nov. 14, 2016.)

28-19-12. Measurement of emissions.

(A) The department may require any person responsible for the operation of an emission source to make or have tests made to determine the rate of contaminant emissions from the source whenever it has reason to believe on the basis of estimates of potential contaminant emission rates from the source and due consideration to probable efficiency of any existing control device, or visible emission determinations made by an official observer, that existing emissions exceed the limitations specified in these control regulations. Such tests may also be required pursuant to verifying that any newly installed control device meets performance specifications. If such a test demonstrates that the applicable emission requirement is met, no more than one (1) such test shall be required during any twelve (12) consecutive calendar month period. *Provided, however,* that should the department determine that the test did not represent normal operating conditions or emissions additional tests may be required. Such a requirement shall be considered as an order as provided for in K.S.A. 1970 Supp. 65-3011 and subject to all administrative and legal requirements specified therein.

Required tests shall be conducted in accordance with procedures approved by the director as being in accordance with sound analytical and sampling procedures. Such tests shall be conducted by reputable, qualified individuals, as approved by the department, and a certified written copy of the test results signed by the person conducting the test shall be provided to the department.

(B) The department may conduct tests of emissions of contaminants from any source. Upon written request from the department, the person responsible for the source to be tested shall cooperate with the department in providing all necessary test ports in stacks or ducts and such other safe and proper facilities, exclusive of instruments and sensing devices, as may be reasonably required to conduct the test with due regard being given to expenditures and possible disruption of normal operation of the source. A report concerning the findings of such tests shall be furnished to the person responsible for the source upon request.

(C) The director may require the owner or operator of any emission source which is subject to the provisions of these regulations to install, use, and maintain such stationary monitoring equipment as is required to demonstrate continuing compliance with any applicable emission limitations, and

to maintain records and make reports regarding such measured emissions to the department in a manner and on a schedule to be determined by the director. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3006, 65-3007, 65-3009, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972.)

28-19-13. Interference with enjoyment of life and property. Compliance with the provisions of these emission control regulations (including exemptions included therein) notwithstanding, should it be found after public hearing that any specific emission source is, tends to be, will be, or will tend to be significantly injurious to human health or welfare, animal or plant life, or property or is or will be unreasonably interfering with the enjoyment of life and property of any inhabitant of the state, or will interfere with the attainment or maintenance of any national ambient air quality standard an appropriate order may be issued to require such additional prevention, abatement or control of the emission involved as is necessary to effect the purposes of the enabling act. (Authorized by K.S.A. 65-3001, 65-3002, 65-3005, 65-3011; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974.)

28-19-14. Permits required. The reference in K.A.R. 28-19-19 to a permit condition under this regulation, the reference in K.A.R. 28-19-31 to a permit issued under this regulation, and any other reference in these rules to a permit under this regulation, shall be interpreted to include permits issued under K.A.R. 28-19-300 through 28-19-304 and K.A.R. 28-19-500 through 28-19-578. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3008; effective, E-78-8, Dec. 27, 1972; effective Jan. 1, 1974; amended, T-84-39, effective Dec. 21, 1983; amended May 1, 1984; amended May 1, 1986; amended May 1, 1987; amended Oct. 16, 1989; amended Jan. 24, 1994; amended Jan. 23, 1995.)

28-19-14a. (Authorized by and implementing K.S.A. 65-3005 and K.S.A. 1984 Supp. 65-3008; effective, T-84-39, Dec. 21, 1983; effective May 1, 1984; amended May 1, 1986; revoked Jan. 23, 1995.)

28-19-14b. (Authorized by and implementing K.S.A. 65-3005 and K.S.A. 1984 Supp. 65-3008; effective, T-84-39, Dec. 30, 1983; effective May 1, 1984; amended T-85-29, Nov. 14, 1984; amended May 1, 1985; revoked Jan. 24, 1994.)

28-19-15. Severability. If any clause, paragraph, subsection or section of these regulations shall be held invalid, it shall be conclusively presumed that the board would have enacted the remainder of these regulations not directly related to such clause, paragraph, subsection or section. (Authorized by K.S.A. 65-3005; effective Jan. 1, 1971.)

NONATTAINMENT AREA REQUIREMENTS

28-19-16. New source permit requirements for designated nonattainment areas. The provisions of K.A.R. 28-19-16 through K.A.R. 28-19-16m shall apply to the construction or major modification of major stationary sources of air pollution emissions located within any area that has been identified as not meeting a national ambient air quality standard for the pollutant for which the source is major, under the procedures prescribed by Section 107(d) of the federal clean air act (42 U.S.C. 7407(d)). (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982; amended May 1, 1986.)

28-19-16a. Definitions. The following words and terms when used in K.A.R. 28-19-16 through K.A.R. 28-19-16m shall have the meanings as defined in subsections (a) through (s) of this regulation.

(a) "Actual emissions" means, in regard to determining creditable emissions decreases or increases of a pollutant, the average rate, in tons per year, at which a unit actually emitted the pollutant during a two-year period that precedes the particular date of interest and that is representative of normal source operation. This shall apply unless the department allows the use of a different time period upon a determination that it is more representative of normal source operation. These emissions shall be calculated using the unit's actual operating hours, production rates, and type of materials processed, stored, or combusted during the selected time period. Where specific emission limitations have been established for an individual source under the provisions of K.A.R. 28-19-13, K.A.R. 28-19-16b, the Kansas air quality regulations adopting and implementing 40 CFR §52.21, or any permits issued before May 1, 1983 by the U.S. environmental protection agency under the provisions of federal regulation 40 CFR §52.21(i), as amended at 52 FR 24634, July 1, 1987, effective on July 31, 1987, then actual emissions may be presumed to be equal to

these limitations. For any emissions unit that has not begun normal operations on a date of interest, actual emissions shall mean the potential of the unit to emit on that date.

(b) "Allowable emissions" means the emissions rate of a stationary source calculated by using the following:

(1) the maximum rated capacity of the source, unless the source is subject to federally enforceable limits that restrict the operating rate, hours of operation, or both; and

(2) limitations imposed by this or any other applicable state, federal, or local governmental air pollution control regulation, including those with a future compliance date.

(c) "Begin actual construction" shall have the meaning as defined in K.A.R. 28-19-200(i).

(d) "Building, structure, facility, or installation" shall have the meaning as defined in K.A.R. 28-19-200(j).

(e) "Commence," as applied to construction of a major stationary source or major modification, means that the owner or operator has all necessary state, local, and federal approvals or permits, and either has:

(1) begun, or caused to begin, a continuous program of actual on-site construction of the source to be completed within a reasonable time; or

(2) entered into binding agreements or contractual obligations, which cannot be canceled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

(f) "Construction" means any physical change or change in the method of operation, including fabrication, erection, installation, demolition, or modification of an emissions unit, that would result in a change in actual emissions.

(g) "Contemporaneous emission increase or decrease" as used in K.A.R. 28-19-16a, paragraph (s) (2) means emission changes from the source that have occurred since December 21, 1976 or since the most recent permit was issued under the provisions of K.A.R. 28-19-16b, whichever date is the most recent.

(h) "Creditable emission decrease" means the amount by which the old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions. No emission decrease shall be creditable if the secretary has previously given credit for it in a permit issued under the provisions of this regu-

lation that is presently in effect or if the decrease has been previously credited by the secretary as a result of actions initiated under the provisions of other state, federal, or local governmental air pollution control regulations. Credit shall be allowed only for decreases in emissions that have approximately the same qualitative significance for public health and welfare as do those emissions that increase as a result of a particular change.

(i) "Creditable emission increase" means the amount by which a new level of actual emissions exceeds the old level of actual emissions.

(j) "Emissions unit" means any part of a stationary source that emits or would have the potential to emit any pollutant subject to the provisions of this regulation.

(k) "Federally enforceable" shall have the meaning as defined in K.A.R. 28-19-200(ee).

(l) "Fixed capital cost" means the capital needed to provide all the depreciable components.

(m) "Fugitive emissions" shall have the meaning as defined in K.A.R. 28-19-200(ff).

(n) "Implementation plan" means any documents, including state or locally adopted regulations, submitted by a state to the U.S. environmental protection agency as required by the provisions of 42 U.S.C. §7410 and any regulations promulgated by the administrator of the U.S. environmental protection agency pursuant to the provisions of that section. For the purpose of this regulation, a state plan is approved when the administrator has published the approval or conditional approval of the applicable provisions of the plan in the federal register.

(o) "Lowest achievable emission rate" means, for any source, the more stringent emission standard established by the secretary based on either of the following:

(1) the most stringent emissions limitation that is contained in the approved implementation plan of any state for that class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that these limitations are not achievable, or

(2) the most stringent emissions limitation that is achieved in practice by that class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event shall the secretary establish a lower emission rate for a proposed new or modified stationary source that is less stringent than the amount allowable

under an applicable new source standard of performance promulgated by the U.S. environmental protection agency under the provisions of 42 U.S.C. §7411.

(p) "Major modification" means any modification of a major stationary source that would result in a significant net emissions increase of any pollutant subject to the provisions of this regulation.

(q) "Modification" means any physical change in, or change in the method of operation of, a stationary source that would result in an emissions increase of any pollutant subject to the provisions of this regulation. Each net emission increase that is considered significant for volatile organic compounds shall be considered significant for ozone. A physical change or change in the method of operation shall not include:

(1) routine maintenance, repair, and replacement;

(2) use of an alternative fuel or raw material by reason of an order under section 2(a) and (b) of the federal energy supply and environmental coordination act of 1974, or any superseding legislation, or by reason of a natural gas curtailment plan pursuant to the federal power act;

(3) use of an alternative fuel by reason of an order or rule under section 125 of the federal clean air act;

(4) use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;

(5) use of an alternative fuel or raw material by a stationary source that:

(A) the source was capable of accommodating before December 21, 1976, unless the secretary determines that this change would be prohibited under any federally enforceable permit condition that was established after December 21, 1976 according to 40 CFR 52.21, as amended at 52 FR 24634, July 1, 1987, effective on July 31, 1987; or

(B) the source is approved to use under any permit issued under the provisions of this regulation;

(6) an increase in the hours of operation or in the production rate, unless the secretary determines that this change is prohibited under any federally enforceable permit condition that was established after December 21, 1976 according to 40 CFR 52.21, as amended at 52 FR 24634, July 1, 1987, effective on July 31, 1987; or

(7) any change in ownership at a stationary source.

(r) "Major stationary source" means any stationary source of air pollutants that emits, or has the potential to emit, 100 tons per year or more of any

pollutant subject to the provisions of this regulation, or any physical change that would occur at a stationary source not qualifying as a major stationary source under the previous definition, if the change would create a major stationary source by itself. A major stationary source that is considered major for volatile organic compounds shall also be considered major for ozone.

(s) "Net emissions increase" means the amount by which the sum of the following exceeds zero:

(1) any increase in actual emissions from a particular physical change or change in the method of operation at a stationary source; and

(2) any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change, and are otherwise creditable. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3005, K.S.A. 1996 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982; amended Oct. 16, 1989; amended Oct. 10, 1997.)

28-19-16b. Permit required. (a) A major stationary source shall not begin actual construction, or major modification unless the owner or operator of the source has been issued a permit approving this activity. The permit shall be signed by the secretary or an authorized representative of the secretary and shall specify the emission rate limitations allowable for the source and any special conditions to be imposed on its operation to insure regulatory compliance. Special operating conditions may include, but need not be limited to, specified periods of operation, restrictions on the amount and types of material to be combusted, stored or processed, control equipment operating and maintenance requirements, emissions monitoring requirements, and restrictions on other source operations.

(b) Application for a permit shall be submitted on forms provided by the secretary or his or her designated representative. The application shall include, in addition to that information required by K.A.R. 28-19-8(a), the information that is required by the secretary to determine the net emissions increase that will occur at the time that the permitted activity is completed. All proposed actions reported under the provisions of K.A.R. 28-19-8 shall be reviewed by the secretary to determine the possible applicability of this regulation to the proposed action and advise the source owner or operator of any need to submit a per-

mit application. The secretary or a designated representative shall advise the applicant of each deficiency in the application or accompanying information. If a deficiency exists, the receipt date of the completed application shall be the date on which the department of health and environment or its designated representative received all required information. (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982; amended May 1, 1986.)

28-19-16c. Creditable emission reductions. For the purpose of allowing credit for emissions reductions claimed in relation to the determination of reasonable further progress toward attainment of the national ambient air quality standards required under the provisions of K.A.R. 28-19-16g, the following additional requirements shall apply:

(a) If an existing fuel combustion source commits to switch, at some future date, to a fuel that emits less pollutants, emissions offset credit based upon allowable (or actual) emissions for the fuels involved shall not be allowed unless the source that has committed to the fuel switch has also committed to the use of a specified alternative control measure which would achieve the same degree of emissions reduction should the source switch back, at some later date, to a fuel that emits more pollutants. Before the offset credits are given for these proposed fuel switches, the secretary shall ensure that adequate long term supplies of the new fuel are available.

(b) Where emission reduction credits are proposed to result from a shutdown of an existing source or permanently curtailing production or operating hours below baseline levels, these reductions shall not be credited unless the work force to be affected by this action has been notified of the proposed shutdown or curtailment. Source shutdowns or curtailments in production occurring before the completed source application is received by the department of health and environment or its designated representative may not be used for the purpose of establishing offset credits unless the applicant has demonstrated that this curtailment or shutdown occurred after August 7, 1977, and the proposed new source construction, reconstruction or modification is a replacement for the shutdown or curtailment that is proposed to be used to offset the emissions from it.

(c) Emissions reduction credit shall not be allowed for replacing one volatile organic compound with another of less reactivity, except for those compounds listed in Table 1 of the "Recommended Policy on Control of Volatile Organic Compounds" as published on page 35314 of the July 8, 1977 issue of the Federal Register. (Authorized by K.S.A. 65-3005, 65-3008, 65-3010; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982.)

28-19-16d. Fugitive emission exemption.

The provisions of K.A.R. 28-19-16b shall not apply to a source or modification of a source that would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential to emit of the source or modification, except for the following source categories:

- (a) Coal cleaning plants (with thermal dryers);
- (b) kraft pulp mills;
- (c) portland cement plants;
- (d) primary zinc smelters;
- (e) iron and steel mills;
- (f) primary aluminum ore reduction plants;
- (g) primary copper smelters;
- (h) municipal incinerators capable of charging more than two hundred and fifty (250) tons of refuse per day;
 - (i) hydrofluoric, sulfuric, or nitric acid plants;
 - (j) petroleum refineries;
 - (k) lime plants;
 - (l) phosphate rock processing plants;
 - (m) coke oven batteries;
 - (n) sulfur recovery plants;
 - (o) carbon black plants (furnace process);
 - (p) primary lead smelters;
 - (q) fuel conversion plants;
 - (r) sintering plants;
 - (s) secondary metal production plants;
 - (t) chemical process plants;
 - (u) fossil-fuel boilers (or combinations thereof) totaling more than 250,000,000 British thermal units per hour heat input;
 - (v) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
 - (w) taconite ore processing plants;
 - (x) glass fiber processing plants;
 - (y) charcoal production plants;
 - (z) fossil fuel-fired steam electric plants of more than 250,000,000 British thermal units per hour heat input; and

(aa) any other stationary source category which, as of August 7, 1980, was being regulated under Section 111 or 112 of the federal Clean Air Act (42 U.S.C. 7411 and 7412). (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1986.)

28-19-16e. Relaxation of existing emission limitations. At such time as any individual source or modification becomes a major source subject to the provisions of K.A.R. 28-19-16b solely by virtue of a relaxation in any enforcement limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on the hours of operation, then the requirements of K.A.R. 28-19-16 through 28-19-16m shall become applicable to the source or modification as though construction had not yet commenced on the source or modification. (Authorized by K.S.A. 65-3005, 65-3008, 65-3010; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981.)

28-19-16f. New source emission limits. A permit for major stationary source construction or major modification shall not be issued under the provisions of K.A.R. 28-19-16b unless the emissions resulting from this permitted activity are limited to the lowest achievable emission rate that has been established for the constructed or modified source. For phased construction projects, the determination of lowest achievable emission rate shall be reviewed by the secretary, and modified as appropriate, at the latest reasonable time prior to commencement of construction of each independent phase of the proposed construction or modification. Final determination of compliance with lowest achievable emission rate requirements shall be made by the secretary. (Authorized by K.S.A. 65-3005, 65-3008, 65-3010; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982.)

28-19-16g. Attainment and maintenance of national ambient air quality standards. (a) A permit for major stationary source construction or modification, shall not be issued under the provisions of K.A.R. 28-19-16b if emissions from this source would prevent the attainment and maintenance of the national ambient air quality stan-

dards by the date specified in the approved Kansas implementation plan.

(b) Attainment and maintenance of the national ambient air quality standards shall be determined according to compliance with either of the two following requirements:

(1) Reasonable further progress toward attainment of the national ambient air quality standards shall be required. This progress shall be demonstrated when, by the time the newly permitted source is to commence operation, total allowable emissions from:

(A) other existing sources in the identified non-attainment area;

(B) other new or modified sources which are not major stationary sources; and

(C) this proposed source shall be less than the total emissions allowed from sources existing before application for the permit.

(2) Emissions resulting from the proposed new or modified major stationary source shall not cause or contribute to emissions levels which exceed the allowance permitted for the pollutant in the area for all new or modified major stationary sources in the approved plan. (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982; amended May 1, 1986.)

28-19-16h. Compliance of other sources. A permit for major stationary source construction or major modification shall not be issued under the provisions of K.A.R. 28-19-16b unless the owner or operator of this source has demonstrated to the secretary that all major stationary sources owned and operated by this person (or by an entity controlling, controlled by, or under common control of this person) in the state of Kansas are subject to emission limitations and are in compliance, or on a schedule for compliance, with all applicable emission limitations and standards under the federal clean air act and amendments thereto. (Authorized by K.S.A. 65-3005, 65-3008, 65-3010; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982.)

28-19-16i. Operating requirements. A constructed or modified major stationary source subject to the provisions of K.A.R. 28-19-16b shall not be operated, except in compliance with the requirements established by the permit issued for

the source. Each permitted physical change in a source that is intended to serve as a replacement unit, and which requires a shakedown period before it can be expected to operate at maximum efficiency, shall be considered operational only after completion of this period, provided that this period shall not exceed 180 days. (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1982; amended May 1, 1986.)

28-19-16j. Revocation and suspension of permit. Any permit issued under the provisions of K.A.R. 28-19-16b may be suspended or revoked by the secretary upon his or her findings that the owner or operator of such source has failed to comply with any requirement specified in the permit. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981.)

28-19-16k. Notification requirements. A permit shall not be issued, suspended or revoked under the provisions of K.A.R. 28-19-16b or 28-19-16j unless provision has been made for a public hearing on the matter upon the written request of any person affected by such proposed action. Such request shall be made within thirty (30) days of:

(a) publication of notice in a newspaper, having general circulation in the nonattainment area in which the source is, or will be, located, indicating the nature of the proposal and advising the public of the opportunity to either request a hearing or submit written comments directly to the secretary concerning the proposal;

(b) sending a copy of the public notice to the applicant and to state and local officials and agencies having cognizance over the location where the proposed actions will occur or emissions from it could significantly contribute to levels of air pollution in excess of the national ambient air quality standards; and

(c) sending a copy of the public notice to the regional administrator of the U.S. Environmental Protection Agency. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981.)

28-19-16l. Failure to construct. Each permit issued for the construction or major modification of a major stationary source under the provisions of K.A.R. 28-19-16b shall become

void if the construction has not commenced within 18 months after the applicant's receipt of such permit or if such construction is discontinued for 18 months or more. The secretary may extend the eighteen (18) month period upon a satisfactory showing that an extension is justified. This provision does not apply to the time period between construction of the approved phases of a phased construction project, in which case the construction shall be commenced on each phase within eighteen (18) months of the projected and approved commencement date. (Authorized by and implementing K.S.A. 65-3005, 1984 Supp. 65-3008 and K.S.A. 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981; amended May 1, 1986.)

28-19-16m. Compliance with provisions of law required. Any approval of a permit under the provisions of K.A.R. 28-19-16b shall not relieve any source owner or operator of the responsibility to comply fully with any other requirements of state, federal, or local law. (Authorized by K.S.A. 65-3005, 65-3008, 65-3010; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective, E-81-35, Nov. 12, 1980; effective May 1, 1981.)

ATTAINMENT AREA REQUIREMENTS

28-19-17. Prevention of significant deterioration of air quality; cross-reference. Each reference in this article to K.A.R. 28-19-17 through K.A.R. 28-19-17q, individually or collectively, shall be interpreted to refer to K.A.R. 28-19-350. (Authorized by and implementing K.S.A. 2001 Supp. 65-3005, 65-3008, and K.S.A. 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended June 8, 1992; amended Nov. 22, 2002.)

28-19-17a. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3008 and 65-3010; effective May 1, 1983; amended May 1, 1986; amended Oct. 16, 1989; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17b. (Authorized by K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; implementing K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; 65-3008, as amended by L. 1993, Ch. 13, Sec. 5; 65-3010; effective May 1, 1983; amended May 1, 1986; amended Oct. 16, 1989; amended June 8, 1992; amended March 21, 1994; revoked Nov. 22, 2002.)

28-19-17c. (Authorized by K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; implementing K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; 65-3008, as amended by L. 1993, Ch. 13, Sec. 5; 65-3010; effective May 1, 1983; amended Oct. 16, 1989; amended June 8, 1992; amended March 21, 1994; revoked Nov. 22, 2002.)

28-19-17d. (Authorized by and implementing K.S.A. 65-3002, 65-3008, 65-3010; effective May 1, 1983; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17e. (Authorized by and implementing K.S.A. 65-3005, 65-3008, 65-3010; effective May 1, 1983; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17f. (Authorized by and implementing K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; 65-3008, as amended by L. 1993, Ch. 13, Sec. 5; 65-3010; effective May 1, 1983; amended May 1, 1988; amended June 8, 1992; amended March 21, 1994; revoked Nov. 22, 2002.)

28-19-17g. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective May 1, 1983; amended Oct. 16, 1989; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17h. (Authorized by and implementing K.S.A. 65-3005, 65-3008, 65-3010; effective May 1, 1983; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17i. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3008, 65-3010; effective May 1, 1983; amended Oct. 16, 1989; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17j through 28-19-17l. (Authorized by and implementing K.S.A. 65-3005, 65-3008, 65-3010; effective May 1, 1983; amended June 8, 1992; revoked Nov. 22, 2002.)

28-19-17m. (Authorized by K.S.A. 65-3005, as amended by L. 1993, Ch. 13, Sec. 3; implementing K.S.A. 65-3008, as amended by L. 1993, Ch. 13, Sec. 5; 65-3010; effective June 8, 1992; amended March 21, 1994; revoked Nov. 22, 2002.)

28-19-17n through 28-19-17q. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3008, 65-3010; effective June 8, 1992; revoked Nov. 22, 2002.)

STACK HEIGHT REQUIREMENTS

28-19-18. Stack heights. (a) The degree of emission limitation required of any source for control of any air pollutant must not be affected by the portion of any source's stack height that exceeds good engineering practice or any other dispersion technique. The provision of these regulations shall not apply to stack heights in existence or dispersion techniques implemented on or before December 31, 1970, except where pollutants are being emitted from those stacks or using those dispersion techniques by sources as defined in these regulations, which were constructed or reconstructed or for which major modifications, as defined in the Kansas state implementation plan, were carried out after December 31, 1970.

(b) Good engineering practice for a stack height shall be determined in accordance with the provisions of K.A.R. 28-19-18a through 28-19-18f. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended, T-88-2, Jan. 23, 1987; amended May 1, 1988.)

28-19-18a. Stack height credit. (a) The stack height credit to be used in ambient air quality modeling that calculates the air quality impact of a source, for the purpose of meeting an applicable national ambient air quality standard or determining compliance with the provisions of K.A.R. 28-19-17e pertaining to an applicable maximum allowable increase, shall be the actual stack height unless this height exceeds the good engineering practice stack height determined by procedures prescribed by K.A.R. 28-19-18c. In this case, the allowable good engineering practice stack height value shall be used for the modeling.

(b) The requirements of this regulation shall not apply to any stack height that was in existence, or dispersion techniques implemented on or before December 31, 1970. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986.)

28-19-18b. Definitions. The following words and terms when used in K.A.R. 28-19-18 through 28-19-18f, shall have the following meanings:

(a) "Stack" means any point in a source designed to emit solids, liquids or gases into the air, including a pipe or duct but not including flares.

(b) "Stack height" is the distance from the

ground level elevation at the base of the stack to the elevation of the stack outlet.

(c) "Stack in existence" means that, before the date specified in K.A.R. 28-19-18a(b) and 28-19-18c(b)(1)(A), the owner or operator had begun or caused to begin a continuous program of physical on-site construction of the stack, to be completed within a reasonable time, or had entered into binding agreements or contractual obligations, which could not be cancelled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed within a reasonable time.

(d) "Nearby" is the distance up to five times the lesser of the height or the width dimension of a structure but not greater than 0.8 km for the purpose of applying the formula in K.A.R. 28-19-18c(b)(1)(A). For conducting demonstrations under K.A.R. 28-19-18d, nearby is a distance not greater than 0.8 km. However, a portion of a terrain feature may be considered to be nearby when it falls within a distance of up to 10 times the maximum height (HT) of the feature, not to exceed 3.2 km, if such feature achieves a height (Ht), within 0.8 km from the stack, that is at least 40 percent of the good engineering practice stack height determined by the formulas provided in K.A.R. 28-19-18c(b)(1)(B) or 26 meters, whichever is greater. The height of the structure or terrain feature shall be measured from the ground level elevation at the base of the stack.

(e) "Dispersion technique" means any technique which attempts to affect the concentration of a pollutant in the ambient air by:

- (1) Using the portion of a stack which exceeds good engineering practice stack height;
- (2) varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or
- (3) increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, combining exhaust gases from several existing stacks into one stack or other selective handling of exhaust gas streams. This shall not include:

(A) The reheating of a gas stream, following use of a pollution control system to return the gas to the temperature at which it was originally discharged from the facility generating the gas stream;

(B) the merging of exhaust gas streams where:

(i) The source owner or operator demonstrates that the facility was originally designed and constructed with such merged gas streams; or

(ii) after July 8, 1985, the merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant. The exclusion from the definition of "dispersion techniques" shall apply only to the emission limitation for the pollutant affected by this change in operation; or

(iii) before July 8, 1985, the merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, an increase in the quantity of pollutants actually emitted prior to the merging, merging shall be presumed to be motivated by an intent to gain emissions credit for greater dispersion. The department shall deny credit for the effects of this merging in calculating the allowable emissions for the source in the absence of an appropriate demonstration by the source owner or operator;

(C) smoke management in agricultural or silvicultural prescribed burning programs;

(D) episodic restrictions on residential wood burning and open burning; or

(E) techniques under K.A.R. 28-19-18b(e)(3) which increase final exhaust gas plume rise and which result in an allowable emission of sulfur dioxide from the facility that does not exceed 5,000 tons per year.

(f) "Excessive concentration," for the purpose of determining good engineering practice stack height under K.A.R. 28-19-18c(c), means:

(1) For sources seeking credit for a stack height exceeding the stack height established under K.A.R. 28-19-18c(b)(1), a maximum ground-level concentration due to emissions from a stack due in whole or part to downwash, wakes and eddy effects produced by nearby structures or nearby terrain features which individually is at least 40 percent in excess of the maximum concentration experienced in the absence of such effects and which contribute to a total concentration due to emissions from all sources that is greater than an ambient air quality standard or greater than a prevention of significant deterioration increment, for sources subject to K.A.R. 28-19-17. The allowable emission rate to use in making demonstrations under this part shall be prescribed by K.A.R. 28-19-83 et seq. unless the owner or operator demonstrates that this emission rate is infeasible.

Where such demonstrations are approved by the department, an alternative emission rate shall be established in consultation with the source owner or operator;

(2) for sources seeking credit after October 11, 1983 for increases in an existing stack height up to the height established under K.A.R. 28-19-18c(b)(1), a maximum ground-level concentration due in whole or part to downwash, wakes or eddy effects produced by nearby structures or nearby terrain features which is individually at least 40 percent in excess of the maximum concentration experienced in the absence of these effects and which contributes to a total concentration due to emissions from all sources that is greater than an ambient air quality standard or greater than a prevention of significant deterioration increment, for sources subject to K.A.R. 28-19-17. The emission rate to use in making demonstration under this part shall be either:

(A) An emission rate specified by applicable SIP (or, in the absence of such a limit, the actual emission rate); or

(B) the actual presence of a local nuisance caused by the existing stack, as determined by the department; and

(3) for sources seeking credit after January 12, 1979 for a stack height determined under K.A.R. 28-19-18c(b)(1), use of a field study or fluid modeling to verify good engineering practice stack height shall be required by the department;

(A) for sources seeking stack height credit after November 9, 1984 based on the aerodynamic influence of cooling towers; and

(B) for sources seeking stack height credit after December 31, 1970 based on the aerodynamic influences of structures not represented adequately by K.A.R. 28-19-18c(b)(1), a maximum ground-level concentration due in whole or part to downwash, wakes or eddy effects that is at 40 percent in excess of the maximum concentration experienced in the absence of these effects. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended, T-88-2, Jan. 23, 1987; amended May 1, 1988.)

28-19-18c. Methods for determining good engineering practice stack height. (a) The minimum good engineering practice stack height value allowable for any source, regardless of size or location of any structures or terrain features, shall be 65 meters.

(b)(1) Except as provided in subsection (c) of this regulation, the maximum good engineering practice stack height value allowable for any source shall be determined using one of the following mathematical formulas:

(A) for stacks that were in existence on January 12, 1979 and provided that the owner or operator presents evidence that this equation was relied upon when establishing an emission limit:

$$Hg = 2.5H$$

(B) for stacks constructed after January 12, 1979 and provided that the owner or operator, at the department's request, presents evidence through a field study or fluid modeling to verify that the height arrived at by the following formula is valid:

$$Hg = H + 1.5L$$

(2) When using formula (A) or (B), the terms and values used shall be as follows:

(A) Hg = good engineering practice stack height, measured from the ground level elevation at the base of the stack;

(B) H = height of any nearby structures measured from the ground level at the base of the stack; and

(C) L = lesser dimension of the height or projected width of any nearby structures.

(c) A source may obtain good engineering practice stack height credit in excess of that calculated by K.A.R. 28-19-18c(b)(1)(A) or K.A.R. 28-19-18c(b)(1)(B) provided that it demonstrates by fluid modeling or a field study approved by the department that the emissions from a stack do not result in excessive concentrations of any air pollutant as a result of atmospheric downwash, wakes, or eddy effects created by the source itself, nearby structures or nearby terrain features. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended, T-88-2, Jan. 23, 1987; amended May 1, 1988.)

28-19-18d. Fluid modeling. In conducting a fluid modeling study, required by K.A.R. 28-19-18c(c), the guidelines and procedures described in the following referenced publications shall be used. These publications are adopted by reference:

(a) EPA-450/4-81-003. *Guideline for use of fluid modeling to determine good engineering practice stack height*, as published in July 1981;

(b) EPA-450/4-80-023. *Guideline for determination of good engineering practice stack height*, as published in July 1981; and

(c) EPA-600/8-81-009. *Guideline for fluid modeling of atmospheric diffusion*, as published in April 1981. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983.)

28-19-18e. (Authorized by and implementing K.S.A. 65-3005, K.S.A. 65-3010; effective May 1, 1983; revoked May 1, 1986.)

28-19-18f. Notification requirements. A source shall not obtain credit for a good engineering practice stack height determined by a fluid modeling or field study or based on allowances for plume impaction, as provided for by K.A.R. 28-19-18c(c) unless:

(a) A public notice that indicates the nature of the proposal, the availability of the demonstration study, and that the public may either request a hearing or submit written comments directly to the secretary concerning the proposal is published in a newspaper, having general circulation in the area in which the source is, or will be, located;

(b) a copy of the public notice that is provided for by subsection (a) is sent to the applicant, state and local officials, and the regional administrator of U.S. environmental protection agency; and

(c) a public hearing is held on the matter upon the written request of any person affected by the proposed action. This request shall be made within 30 days of the date of notice being provided in the manner prescribed by subsections (a) and (b) of this regulation. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended, T-88-2, Jan. 23, 1987; amended May 1, 1988.)

28-19-19. Continuous emission monitoring. (a) All sources subject to the provisions of this regulation shall install, test and continuously operate a continuous emission monitoring system or systems (CEMS) and comply with data reduction requirements of the department and reporting, record keeping and quality assurance requirements established by this regulation. For any emission unit subject to this regulation, CEMS data which shows emissions in excess of an applicable emission limitation or standard shall be evidence that the emission unit is in noncompliance with the emission limitation or standard.

(b) Emission units exempt from the provisions of this regulation include:

(1) Those which have been required to install CEMS under provisions of K.A.R. 28-19-83; and

(2) fossil-fuel fired steam generators whose annual capacity factor, as reported to the federal

power commission, is limited by permit condition under K.A.R. 28-19-14 to be less than 30 percent. If, upon application by the source owner or operator, the department approves removal of the capacity factor restriction, the appropriate CEMS shall be installed and operational within six months of the date that the department approved the restriction removal.

(c) Emission units required by this regulation to operate CEMS and monitor and report emissions include:

(1) Coal-fired steam generators that have a heat input greater than 250 million British Thermal Units per hour (BTU/hr). These generators shall be monitored for opacity; and

(2) coal-fired steam generators that have a heat input greater than 250 million BTU/hr and that have installed sulfur dioxide (SO₂) emission control equipment. These generators shall be monitored for SO₂, and carbon dioxide (CO₂) or oxygen (O₂) or some combination of these emissions; and

(3) fluid-bed catalytic cracking units catalyst regenerators at petroleum refineries with greater than 20,000 barrels per day fresh feed capacity. Such regenerators shall be monitored for opacity.

(d) Each emission unit required to operate CEMS shall complete the installation and demonstrate compliance with the performance tests of such equipment by November 1, 1987.

(e) If the affected emission unit is unable to comply with the requirements of subsection (d), a compliance schedule shall be submitted by the source owner or operator to and received by the department not later than June 1, 1987. A justification for the extended compliance schedule shall be submitted. The request may be approved or denied by the department and the source owner or operator shall be informed of the department's determination and the reasons for that decision. An extension shall not be permitted beyond November 1, 1988.

(f) The owner or operator of an affected emission unit shall notify the department of the following:

(1) the anticipated date of installation of the CEMS postmarked at least 30 days prior to that date. Each CEMS shall be installed in a location approved by the department before installation begins; and

(2) the date upon which CEMS performance tests commence in accordance with this regulation. Notification shall be postmarked not less than 30 days prior to that date.

(g) The performance specifications and test procedures for opacity, SO₂, O₂, and CO₂ CEMS in 40 CFR Part 60 Appendix B, as in effect on July 1, 1986, are adopted by reference except that reference to "Administrator" in 40 CFR Part 60 Appendix B shall mean the secretary of the department of health and environment. The specification test requirements for the CEMS are as follows:

- (1) Performance Specification 1 for opacity;
- (2) Performance Specification 2 for SO₂;
- (3) Performance Specification 3 for CO₂; and
- (4) Performance Specification 3 for O₂.

(h) Each source owner or operator subject to this regulation shall maintain a file of all measurements, including CEMS, monitoring device and performance testing measurements, all CEMS performance evaluations, all CEMS or monitoring device calibration checks, adjustments and maintenance performed on these systems or devices and all other information required by this regulation that shall be recorded in a permanent form suitable for inspection by a department or U.S. environmental protection agency representative. The file shall be retained at the affected source for at least two years following the date of the measurements, maintenance, reports, and records, or if longer, during the pending of any action to enforce the requirements of this regulation.

(i) All CEMS shall be operated continuously except for system breakdowns, repairs, calibration checks and zero and span adjustments required under the quality assurance plan of this regulation.

(j) Source emission shall be monitored during all phases of operation except during periods of scheduled emissions unit outages or turnaround. Emission units not in operation are not required to monitor emissions.

(k) Owners or operators of sources subject to this regulation shall submit a written report of emissions in excess of the applicable standards in a manner prescribed by the department for each calendar quarter to the department and it must be postmarked before the 30th day following the end of each calendar quarter. The report shall provide the following information:

- (1) the total time the affected emissions unit was in operation for the quarter;
- (2) the magnitude of excess emissions, computed in accordance with this regulation, any conversion factors used, and the date and time each period of excess emissions began and ended;

(3) specific identification of each period of excess emissions that occurred during startups, shutdowns, malfunctions and any other reason. The nature and cause of the excess emissions, the corrective action taken and the preventive measures adopted shall be specified;

(4) the date and time identifying each period during which the CEMS was inoperative except for the zero and span checks. The nature and cause of the CEMS breakdown and the repairs or corrective action taken shall be identified. Proof of CEMS performance may be required by the secretary whenever system repairs or adjustments have been made;

(5) the result of each performance audit; and

(6) if no excess emissions have occurred or the CEMS have not required corrective actions, a statement verifying that fact.

(1) The information required by subsections (k)(1) through (k)(6) shall be summarized in the following manner for monitoring and reporting purposes:

(1) Measurements of opacity shall be reduced to one-minute periods. Each one-minute period shall be calculated from 10 or more data points equally spaced through each one-minute period;

(2) gaseous measurements shall be reduced to three-hour averages in units of the emission standards; and

(3) data recorded during periods of CEMS breakdowns, repairs, calibration checks and zero and span adjustments shall not be included in the data averages or the emission report. An arithmetic or integrated average may be used for those time periods. After conversion to units of the standard, the data may be rounded to the same number of significant digits used to specify the emission standard.

(4) Owners or operators of affected sources shall use Method 19 of 40 CFR Part 60, appendix A, as in effect July 1, 1989, for converting CEMS data to units of the standard.

(5) The secretary may allow data reporting or reduction procedures varying from those set forth in this regulation if the owner or operator of a source shows to the satisfaction of the secretary that the procedures are at least as accurate as those of the regulation.

(m) Not less than 30 days prior to commencement of CEMS performance tests, each source owner or operator required to operate CEMS shall develop and submit to the department a quality assurance plan that shall contain all provisions necessary to ensure that the CEMS produce con-

tinuous data with sufficient accuracy and precision to allow the department to determine whether the emissions unit is in compliance with the applicable opacity and SO₂ limitations. Plan requirements for CEMS shall include, at a minimum, the requirements and recommendations of the CEMS manufacturer. The provisions of the quality assurance plan shall be enforceable by the department as independent requirements in addition to this regulation. Additional procedures may be imposed by the department or the source owner or operator may be required to revise quality control procedures. The complete quality assurance plan shall be kept at the affected source, shall be accessible to maintenance personnel and shall include:

(1) For quality control of opacity CEMS:

(A) calibration of the CEMS including a daily zero and span check, zero compensation accumulations and window cleaning;

(B) calibration drift determination and adjustment, including daily zero and span checks, zero compensation accumulation and window cleaning;

(C) preventive maintenance procedures for all monitoring system components, including the purge air system and the data recording system; and

(D) data recording and reporting procedures that are consistent with the record-keeping and reporting requirements of this regulation, including examples of all record-keeping formats; and

(2) for quality assurance of opacity CEMS:

(A) a precision assessment which includes a daily check of zero and span compensation levels;

(B) an annual accuracy audit which includes a zero alignment with an equivalency of true zero and simulated zero check;

(C) a quarterly accuracy audit which includes procedures for conducting the audit, the selection of filter values and the certification of filter values;

(3) for corrective action of opacity CEMS:

(A) if the 24-hour zero or span drift exceeds \pm four percent opacity, a description of necessary corrective action, including necessary calibration and cleaning followed by a verification that the drift is eliminated;

(B) if zero or span drift exceeds CEMS drift limits for five consecutive span checks, a requirement that the frequency of quality assurance checks must be increased;

(C) if the zero alignment exceeds two percent opacity, a requirement that corrective action be taken and that the action must be documented in records and quarterly reports;

(D) if the performance audit calibration error exceeds \pm plus or minus three percent opacity, a requirement that corrective action must include a recalibration of the monitor, followed by a repetition of the performance audit;

(4) for quality control of SO₂, O₂ and CO₂ CEMS: Procedures for calibration, calibration drift determination and adjustment, preventive maintenance, data recording and reporting, and malfunction abatement;

(5) for quality assurance of SO₂, O₂ and CO₂ CEMS: A description of the procedures and calculations for a precision assessment, accuracy assessment procedures including relative accuracy and a cylinder gas audit, and the calculations used in relative accuracy audits and cylinder gas audits;

(6) for corrective action of SO₂, O₂ and CO₂ CEMS, a requirement that corrective action must be taken when span drift response is greater than \pm five percent of CEMS span value, and when relative accuracy audit response and CEMS system cylinder gas audit response is greater than \pm 20 percent.

(n) If the effluents from two or more affected emissions units of similar design and operating characteristics are combined before being released to the atmosphere, the secretary may allow CEMS to be installed on the combined effluent, subject to petition by the source owner or operator. If the affected emissions units are not of similar design and operating characteristics, or when the effluent from one affected emissions unit is released to atmosphere through more than one point, the source owner or operator shall install applicable CEMS on each separate effluent unless prior approval of fewer CEMS has been granted by the department.

(o) If the source owner or operator wishes to use different, but equivalent, procedures and requirements for CEMS than those specified in this regulation, the source owner or operator shall provide a demonstration of equivalency before the approval of such alternative systems will be granted by the secretary with concurrence from the region VII administrator of the U.S. environmental protection agency. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1987; amended May 1, 1988; amended June 8, 1992.)

PROCESSING OPERATIONS EMISSIONS

28-19-20. Particulate matter emission limitations. (a) Subject to the provisions of K.A.R. 28-19-9 and 28-19-11, no person shall cause, suffer, allow or permit the emission of particulate

matter from any processing machine, equipment, device or other articles, or combination thereof, excluding indirect heating equipment and incinerators, in excess of the amounts allowed in table P-1 during any one hour.

(b) For the purposes of this regulation, the following definitions shall apply:

(1) "Process weight" shall mean the total weight of all materials introduced into a source operation which may constitute, or form, a source of particulate matter emissions. In the case of direct heating operations, any solid fuel used shall be included as part of the process weight, but liquid and gaseous fuels and combustion air shall not be included.

(2) "Process weight rate" shall mean the total process weight introduced into the source operation over a specific time period divided by that time period in hours. For a cyclical or batch operation, the time period shall be that time required to complete one operation or an integral number of cycles, and for continuous or long-run steady-state operations, time period shall be the total operating time or a typical portion.

(3) "Source operation" shall mean the last operation preceding the emission of particulate matter, which results in the separation of the particulate matter emissions from the processed materials or the conversion of the processed materials into the particulate matter emissions, excluding those operations which are an integral part of the functioning of a control device.

**TABLE P-1—Process Weight Table
Maximum Allowable Emission Rate**

Process weight rate		Rate of emission		Process weight rate		Rate of emission	
lb/hr.	tons/hr.	lb/hr.	lb/hr.	tons/hr.	lb/hr.	lb/hr.	lb/hr.
100	0.05	0.551	16,000	8.00	16.5		
200	0.10	0.877	18,000	9.00	17.9		
400	0.20	1.40	20,000	10.	19.2		
600	0.30	1.83	30,000	15.	25.2		
800	0.40	2.22	40,000	20.	30.5		
1,000	0.50	2.58	50,000	25.	35.4		
1,500	0.75	3.38	60,000	30.	40.0		
2,000	1.00	4.10	70,000	35.	41.3		
2,500	1.25	4.76	80,000	40.	42.5		
3,000	1.50	5.38	90,000	45.	43.6		
3,500	1.75	5.96	100,000	50.	44.6		
4,000	2.00	6.52	120,000	60.	46.3		
5,000	2.50	7.58	140,000	70.	47.8		
6,000	3.00	8.56	160,000	80.	49.0		
7,000	3.50	9.49	200,000	100.	51.2		
8,000	4.00	10.4	1,000,000	500.	69.0		

Process weight rate		Rate of emission		Process weight rate		Rate of emission	
lb/hr.	tons/hr.	lb/hr.	lb/hr.	tons/hr.	lb/hr.	lb/hr.	lb/hr.
9,000	4.50	11.2	2,000,000	1,000.	77.6		
10,000	5.00	12.0	6,000,000	3,000.	92.7		
12,000	6.00	13.6					

Interpolation of the data in table P-1 for other process weights shall be accomplished by use of the following equations:

Process weight ≤ 30 ton/hr, E = (4.1) (P^{0.67})

Process weight > 30 ton/hr, E = (55) (P^{0.11}) - 40

Where: E = rate of emissions in lb/hr.

P = process weight in ton/hr.

Where the nature of any process or operation or design of any equipment permits more than one interpretation of these definitions, the interpretation that results in the minimum allowable emission rate shall apply. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971, amended Oct. 16, 1989.)

28-19-21. Additional emission restrictions. If particulate matter emissions, because of their chemical and/or physical nature, require emission rates lower than those provided for in K.A.R. 28-19-20, the person responsible for the emission shall be notified by the department, in writing, of the reasons for lower emission rate restrictions for an existing or proposed contaminant emission and specify an alternate emission rate that shall not be exceeded. Such notification shall be an order as provided for in K.S.A. 65-3011 and subject to administrative and legal procedures. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3011, as amended by L. 1988, Ch. 356, Sec. 201; effective Jan. 1, 1971; amended Oct. 16, 1989.)

28-19-22. (Authorized by K.S.A. 65-3005, 65-3010; effective Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; revoked Sept. 23, 2005.)

28-19-23. Hydrocarbon emissions—stationary sources. (A) No person shall place, store, or hold in any stationary tank reservoir or other container of more than 40,000 gallons capacity any gasoline or any petroleum distillate having a vapor pressure of 3.0 pounds per square inch, absolute, or greater under actual storage conditions unless such tank, reservoir, or other container is a pressure tank capable of maintaining working pressures sufficient to prevent vapor or gas loss to the atmosphere or is designed, and equipped with one of the following vapor loss control devices:

(1) A floating roof, such as a pontoon type, double deck type roof or internal floating cover, which will rest on the surface of the liquid contents and be equipped with a closure seal or seals to close the space between the roof edge and tank wall. This control equipment shall not be permitted if the gasoline or petroleum distillate has a vapor pressure of 13.0 pounds per square inch absolute or greater under actual storage conditions. All tank gauging or sampling devices shall be gas-tight except when tank gauging or sampling is taking place.

(2) A vapor recovery system, consisting of a vapor gathering system capable of collecting the volatile organic compound vapors and gases discharged and a vapor disposal system capable of processing such volatile organic vapors and gases so as to prevent their emission to the atmosphere and with all tank gauging and sampling devices gas-tight except when gauging or sampling is taking place.

(3) Other equipment or means of equal efficiency for purposes of air pollution control as may be approved by the department.

(B) No person shall emit to the atmosphere any ethylene waste gas stream of more than 50 pounds per day from any ethylene producing plant or other ethylene emission source unless the waste gas is properly burned at 1300°F for 0.3 seconds or greater in a direct-flame afterburner or equally effective device as approved by the director.

(C) No person shall emit to the atmosphere any hydrocarbon gas stream, excluding methane, of more than 50 pounds per day from a vapor blow down system unless these gases are burned by smokeless flares or an equally effective control device as approved by the director.

(D) Installations and equipment existing on January 1, 1972 shall be exempt from the provisions of this regulation. (Authorized by K.S.A. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974.)

28-19-24. Control of carbon monoxide emissions. (A) No person shall cause or permit the emission of carbon monoxide gases generated during the operation of a grey iron cupola unless they are burned at 1300°F for 0.3 seconds or greater in a direct-flame afterburner or equivalent device as approved by the director.

(B) No person shall emit carbon monoxide waste gas stream from any catalyst regeneration of a petroleum cracking system, petroleum fluid coker, or

other petroleum process into the atmosphere, unless the waste gas stream is burned at 1300°F for 0.3 seconds or greater in a direct-flame afterburner or equivalent device as approved by the director.

(C) Installations and equipment existing on January 1, 1972 shall be exempt from the provisions of this regulation. (Authorized by K.S.A. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974.)

28-19-25. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3010; effective Jan. 1, 1972; revoked, E-73-8, Dec. 27, 1972; revoked Jan. 1, 1974.)

28-19-26. Sulfuric acid mist emissions. (a) As used in this regulation, "sulfuric acid production unit" means a unit producing sulfuric acid through the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfides and mercaptans, or acid sludge. Sulfuric acid production units shall not include units in which the conversion to sulfuric acid is used primarily to prevent emissions to the atmosphere of sulfur dioxide or other sulfur compounds.

(b) No person shall cause or permit any gases which contain sulfuric acid mist (H_2SO_4) in excess of 0.5 pounds of acid mist per ton of acid produced to be released into the atmosphere from a sulfuric acid production unit. In calculating the amount of acid produced, the acid production shall be expressed as 100% H_2SO_4 .

(c) Reference Method 8 of Appendix A to 40 CFR Part 60, as in effect on August 18, 1977, is adopted by reference and shall be used for determining compliance with subsection (b) of this regulation. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005 and 65-3010; effective May 1, 1985.)

INDIRECT HEATING EQUIPMENT EMISSIONS

28-19-30. General provisions. (A) These regulations apply to installations in which fuel is burned for the primary purpose of producing steam, hot water, or hot air or other indirect heating of liquids, gases, or solids and, in the course of doing so, the products of combustion do not come into direct contact with process materials. Fuels include those such as coal, coke, lignite, coke breeze, gas, fuel oil, and wood, but do not include refuse. When any products or by-products of a manufacturing process are burned for the same purpose or in conjunction with any fuel, the same maximum emission limitations shall apply.

(B) The heat content of coal shall be determined according to ASTM method D-271-64 "laboratory sampling and analysis of coal and coke" or ASTM method D-2015-66 "gross calorific value of solid fuel by the adiabatic bomb calorimeter," their replacements or other recognized method as approved by the department. The heat content of oil shall be determined according to ASTM method D-240-64 "heat of combustion of liquid hydrocarbons by bomb calorimeter," or by its replacement, or other recognized method as approved by the department.

(C) For purposes of this regulation the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or stacks. The heat input value used shall be the equipment manufacturer's or designer's guaranteed maximum input, whichever is greater. The total heat input of all fuel burning units at a plant or on a premise shall be used for determining the maximum allowable amount of particulate matter which may be emitted. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972.)

28-19-31. Emission limitations. Subject to the provisions of regulations 28-19-9 and 28-19-11: (a) A person shall not cause or permit the emission of particulate matter exceeding the specifications in table H-1 of this regulation.

TABLE H-1—Emission Limits for Indirect Heating Equipment

Total input 10 ⁶ BTU/hr	Allowable* lb/10 ⁶ BTU	Total input 10 ⁶ BTU/hr	Allowable* lb/10 ⁶ BTU
10 or less	0.60	1,000	0.21
50.....	0.41	2,000	0.17
100.....	0.35	5,000	0.14
500.....	0.24	7,500	0.13
700.....	0.22	10,000 or more	0.12

* The allowable emission rate for equipment having intermediate heat input between 10 (10⁶) BTU/hr and 10,000 (10⁶) BTU/hr may be determined by the formula:

$$A = \frac{1.026}{I^{.233}}$$

Where: A = the allowable emission rate in lb/10⁶ BTU
I = the total heat input in 10⁶ BTU/hr.

(b) A person shall not cause or permit visible contaminant emissions from any indirect heating equipment which equals or exceeds the following opacities:

- (1) Existing equipment: 40 percent opacity;
- (2) New equipment: 20 percent opacity.

(c) A person responsible for operation of any indirect heating equipment having a heat input

of 250 million BTU/hr or greater shall not cause or permit the emission of more than 3.0 pounds of sulfur dioxide per million BTU of heat input unless an alternative sulfur dioxide emission limit applicable to such indirect heating equipment is specified in a permit issued pursuant to K.A.R. 28-19-14. The operation of any indirect heating equipment for which an alternative sulfur dioxide emission limit has been specified by permit pursuant to this subsection shall be in compliance with such alternative sulfur dioxide emission limit on and after the effective date of the permit limitation in lieu of the 3.0 pounds of sulfur dioxide per million BTU of heat input limit specified in this subsection. Any alternative sulfur dioxide emission limit specified in a permit must be adequate to protect the ambient air quality standards for sulfur dioxide, and shall not be deemed an applicable implementation plan requirement under the federal clean air act until approved pursuant to section 110 of the act (42 U.S.C. §7410).

(d) A person responsible for operation of any gas or oil-fired indirect heating equipment having a heat input of 250 million BTU/hr or greater shall not cause or permit the emission of more than 0.30 pounds of nitrogen oxides per million BTU of heat input per hour.

(e) A person responsible for operation of any coal fired indirect heating equipment having a heat input of 250 million BTU/hr or greater shall not cause or permit the emission of more than 0.90 pounds of nitrogen oxides (calculated as NO₂) per million BTU of heat input per hour. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1986; amended Nov. 8, 1993.)

28-19-32. Exemptions—indirect heating equipment. (a) Visible contaminant emissions of an opacity exceeding that allowed in K.A.R. 28-19-31(b) shall not be considered a violation of that section provided that the person responsible for operation of the indirect heating equipment demonstrates to the satisfaction of the department that this excessive opacity is solely the result of the presence of uncombined water in the plume.

(b) Indirect heating equipment which was existing on January 1, 1972, shall be exempt from the provisions of K.A.R. 28-19-31(d) and K.A.R. 28-19-31(e). (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007, 65-3010; effective Jan.

1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1981; amended May 1, 1982; amended Nov. 8, 1993.)

INCINERATOR EMISSIONS

28-19-40. General provisions. (A) These regulations shall apply to all incinerators and modified open burning operations except those situated on residential premises containing five (5) or less dwelling units and used exclusively for the disposal of waste originating from normal habitation of said dwellings.

(B) The burning capacity of an incinerator shall be the manufacturer's or designer's guaranteed maximum rate or such other rate as may be determined by the department in accordance with good engineering practice. In case of conflict, the findings of the department shall govern.

(C) No incinerator shall be used for the burning of wastes or the conducting of salvage operations unless such incinerator is a multiple chamber incinerator. For the purpose of this regulation a multiple chamber incinerator is defined as an incinerator consisting of three or more refractory lined combustion furnaces in series, physically separated by refractory walls, interconnected by gas passage ports or ducts and employing adequate design parameters necessary for maximum combustion of the material to be burned.

Existing incinerators which are not multiple chamber incinerators may be altered, modified or rebuilt as may be necessary to meet this requirement. The department may approve any other alteration or modification to an existing incinerator if such is found to be equally effective for the purpose of air pollution control as a modification or alteration which would result in a multiple chamber incinerator.

All new incinerators shall be multiple chamber incinerators, provided that the department shall approve any other kind of incinerator if it can be shown in advance of construction or installation that such other kind of incinerator is equally effective for purposes of air pollution control as an approved multiple chamber incinerator.

(D) Instructions for proper operation of each incinerator, including charging procedures, necessary air intake and damper adjustments, use of auxiliary burners, etc., shall be conspicuously posted, and maintained, at the incinerator location. In addition, all new incinerators, or incinerators remodeled to conform with these regulations

shall have a plate designating the rated capacity of the incinerator and any auxiliary burners, permanently affixed to the incinerator. (Authorized by K.S.A. 1970 Supp. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971.)

28-19-41. Restriction of emissions. Subject to the provisions of regulations 28-19-9 and 28-19-11: (A) No person may cause or permit the emission of particulate matter from any chimney stack or vent of any incinerator in excess of the following:

(1) Incinerators with a waste burning capacity of less than 200 pounds per hour: 0.3 grains of particulate matter per standard dry cubic foot of exhaust gas, corrected to twelve percent (12%) carbon dioxide.

(2) Incinerators with a waste burning capacity of 200 to 20,000 pounds of waste per hour: 0.2 grains of particulate matter per standard dry cubic foot of exhaust gas, corrected to twelve percent (12%) carbon dioxide.

(3) Incinerators with a waste burning capacity in excess of 20,000 pounds of waste per hour: 0.1 grains of particulate matter per standard dry cubic foot of exhaust gas, corrected to twelve percent (12%) carbon dioxide.

(B) No person may cause or permit the emission of visible contaminants from any incinerator of an opacity equal to or greater than 20 percent opacity. (Authorized by K.S.A. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974.)

28-19-42. Performance testing. (A) Waste burned in conjunction with the performance tests specified in this regulation shall be a representative sample of the refuse normally generated by the operation which the incinerator is intended to serve.

(B) In calculating the amount of particulate matter in stack gas, the loading shall be adjusted to twelve percent (12%) carbon dioxide in the stack gas. The exhaust gases produced in the burning of the liquid or gaseous fuel in the incinerator shall be excluded from the calculation to twelve percent (12%) carbon dioxide. Emissions shall be measured when the incinerator is operating at the burning capacity as defined in regulation 28-19-40 (B) of this regulation.

(C) A performance test to determine compliance with the opacity requirements specified in regulation 28-19-41 (B) of these regulations shall

be performed by the department on each new incinerator, and each existing incinerator modified or rebuilt to conform with this regulation.

(D) The performance test specified in section B of this regulation may be required on any incinerator. The initial performance test shall be performed at the expense of the vendor or operator by an independent testing organization or by any other qualified person subject to the approval of the department. The performance test may be observed by the department or its designated representative. (Authorized by K.S.A. 1974 Supp. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-74-7, Jan. 1, 1974; amended May 1, 1975.)

28-19-43. Exceptions. (A) Visible contaminant emissions of an opacity exceeding that allowed in regulation 28-19-41 (B) of this regulation shall not be considered a violation of that section provided that the person responsible for operation of the incinerator demonstrates to the satisfaction of the department that such failure to comply is solely the result of the presence of uncombined water in the plume. (Authorized by K.S.A. 1970 Supp. 65-3002, 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971.)

OPEN BURNING RESTRICTIONS

28-19-45. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended, T-84-39, Dec. 30, 1983; amended May 1, 1984; revoked March 1, 1996.)

28-19-46. (Authorized by K.S.A. 1970 Supp. 65-3005, 65-3010; effective Jan. 1, 1971; revoked March 1, 1996.)

28-19-47. (Authorized by K.S.A. 65-3005, 65-3006, 65-3007, 65-3010; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; revoked March 1, 1996.)

GENERAL VISIBLE EMISSION LIMITATIONS

28-19-50. (Authorized by K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; revoked Jan. 29, 1999.)

28-19-51. (Authorized by K.S.A. 1970 Supp. 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971; revoked May 1, 1982.)

28-19-52. (Authorized by K.S.A. 1970 Supp. 65-3002, 65-3005, 65-3006, 65-3010; effective Jan. 1, 1971; revoked Jan. 29, 1999.)

AIR POLLUTION EMERGENCIES

28-19-55. General provisions. (A) These episode regulations are designed to prevent the excessive buildup of air contaminants during air pollution episodes, thereby preventing the occurrence of an emergency due to the effects of these contaminants on the public health. Any other provisions of the air pollution control regulations notwithstanding, they shall apply to all emission sources and premises located in any geographic area for which an air pollution emergency status has been established by the director in accordance with regulation 28-19-56.

(B) For the purposes of this regulation the following definition will apply: Soiling index shall be presumed to mean the concentration of particulates as measured by the automatic paper-tape sampler method, "ASTM standard method of test for particulate matter in the atmosphere, optical density of filtered deposit, D-1704-61" expressed as coefficient of haze (COH) per 1000 lineal feet. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3006, 65-3010, 65-3012, 65-3013, 65-3014; effective Jan. 1, 1972.)

28-19-56. Episode criteria. (a) Conditions justifying the proclamation of an air pollution alert, air pollution warning, or air pollution emergency shall exist whenever the director determines that the accumulation of air contaminants at any sampling location has attained levels which could, if such levels are sustained or exceeded, threaten the public health. In making this determination, the following criteria shall guide the director:

(1) An air pollution forecast, which is the issuance of a weather bureau high pollution potential advisory, or equivalent indication by any local weather bureau meteorologist that a stagnant atmospheric condition will exist for 36 consecutive hours.

(2) An air pollution alert, where the average sulphur dioxide level for the previous 24 consecutive hours equals 0.3 ppm (800 ug/m³) or the PM₁₀ level for the previous 24 consecutive hours equals 350 ug/m³, or the average carbon monoxide level for the previous eight consecutive hours equals 15 ppm, or the average ozone level for the preceding one hour equals 0.1 ppm, or the average nitrogen dioxide concentration for the preceding one hour

equals 0.6 ppm, or the average nitrogen dioxide concentration for the preceding 24 consecutive hours equals 0.15 ppm, and the local meteorologist predicts no major changes in existing adverse meteorological conditions for at least an additional 12 hours.

(3) Air pollution warning, where the average sulphur dioxide level for the previous 24 consecutive hours equals 0.60 ppm, (1600 ug/m³), or the PM₁₀ level for the previous 24 consecutive hours equals 420 ug/m³, or the average carbon monoxide level for the previous eight consecutive hours equals 30 ppm, or the average ozone level for the previous one hour equals 0.4 ppm, or the average nitrogen dioxide concentration for the previous one hour equals 1.2 ppm, or the average nitrogen dioxide concentration for the previous 24 consecutive hours equals 0.3 ppm, and the local meteorologist predicts no major changes in existing adverse meteorological conditions for the next 12 hours.

(4) An air pollution emergency, where the average sulphur dioxide level for the previous 24 consecutive hours equals 0.8 ppm (2100 ug/m³), or the PM₁₀ level for the previous 24 consecutive hours equals 500 ug/m³, or the average ozone level for the previous one hour equals 0.5 ppm, or the average carbon monoxide level for the previous eight consecutive hours equals 40 ppm, or the average nitrogen dioxide concentration for the previous one hour equals 1.6 ppm, or the average nitrogen dioxide concentration for the previous 24 consecutive hours equals 0.4 ppm, and the local meteorologist predicts no major changes in existing adverse meteorological conditions for at least an additional 12 hours.

(b) Any status prescribed in subsection (a) may be declared by the director on the basis of deterioration of air quality to the criteria levels alone without the issuance of a high air pollution potential advisory or equivalent advisory from a local weather bureau meteorologist if deemed necessary to protect the public health.

(c) Once declared, any status established on the basis of this regulation shall remain in effect until the criteria for that level are no longer met. At such time the next lower status will be assumed. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3005, 65-3006, 65-3010, 65-3012; effective Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended Oct. 16, 1989.)

28-19-57. Emission reduction requirements. (A) Upon the declaration of any air pollu-

tion episode status by the director the provisions of sections B, C and D of this regulation shall be considered as an emergency order of the board issued in accordance with K.S.A. 65-3012 and subject to the provisions therein.

(B) During any time designated as an air pollution alert period no person shall operate any contaminant emission sources except in compliance with the requirements of table E-1.

(C) During any time designated as an air pollution warning period no person shall operate any contaminant emission sources except in compliance with the requirements of tables E-1 and E-2.

(D) During any time designated as an air pollution emergency period no person shall operate any contaminant emission source except in compliance with the requirements of table E-1, E-2, and E-3. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3006, 65-3010, 65-3012, 65-3013, 65-3014; effective Jan. 1, 1972.)

**TABLE E-1—Source Restrictions
Air Pollution Alert Status**

Source category	Action required
1. All private, public and commercial premises.	(a) There shall be no open burning except as required for immediate disposal of inflammable or otherwise hazardous gases or liquids. (b) The use of incinerators for the disposal of any waste materials shall be limited to the hours between 12:00 noon and 4:00 p.m. (c) Boiler lancing or soot blowing of fuel burning equipment requiring such operations shall be limited to the hours between 12:00 noon and 4:00 p.m.
2. Coal or oil-fired electric-power generating facilities.	(a) Units shall be operated on natural gas when possible. (b) Units shall be operated on the lowest sulfur and ash fuels available. (c) Substantial utilization shall be made of power generated outside of the area included in episode status declaration.
3. Other coal and oil-fired process steam generating facilities.	(a) Units shall be operated on natural gas when possible. (b) Units shall be operated on lowest sulfur and ash fuels available. (c) Steam loads shall be reduced to extent possible consistent with continuing plant operations.

Source category	Action required
4. Manufacturing industries required to submit episode plans in accordance with regulation 28-19-58.	(a) Air contaminants emissions from processing operations shall be substantially reduced by curtailing or postponing production and allied operations to extent possible without causing economic hardships.

**TABLE E-2—Source Restrictions
Air Pollution Warning Status**

Source category	Action required
1. All private, public and commercial premises.	(a) The use of incinerators for the disposal of any waste materials shall be prohibited.
2. Coal or oil-fired power generating facilities.	(a) Maximum utilization shall be made of power generated by facilities outside of the area included in the episode status declarations.
3. Other coal and oil-fired process steam generating facilities.	(a) Preparation shall be made to immediately take action required under emergency status.
4. Manufacturing industries required to submit episode plans in accordance with regulation 28-19-58.	(a) Air contaminant emissions from processing operations shall be reduced to the maximum degree possible by curtailing and postponing production and altered operations to the extent feasible with, if necessary, the assumption of reasonable economic hardships.
5. Transportation.	(a) The use of private and commercial motor vehicles should be limited by deferring unnecessary travel and utilizing car pools or mass transportation facilities where possible.

**TABLE E-3— Source Restrictions
Air Pollution Emergency Status**

Source category	Action required
1. All private, public, and commercial premises.	(a) The following places of employment shall immediately cease operations: (1) Mining and quarrying operations. (2) Construction projects except as required to avoid emergent physical harm. (3) All manufacturing operations except those operating under an approved episode plan. (4) Wholesale trade establishments. (5) Governmental units, except as required to implement the provisions of these regulations and other operations essential to immediate protection of the public welfare and safety.

Source category	Action required
1. All private, public, and commercial premises.	(6) Educational institutions. (7) Retail trade and service establishments except pharmacies, food stores and other similar operations providing for emergency needs. (8) Other commercial service operations such as those engaged in banking, insurance, real estate, advertising, etc. (9) Amusement and recreational facilities.
2. Electric power generating facilities.	Same as table E-2.
3. Process steam generating facilities.	(a) Facilities shall be shut down to the maximum extent possible consistent with preventing extensive equipment damage.
4. Manufacturing industries required to submit episode plan in accordance with regulation 28-19-58.	(a) Air contaminant emissions from processing operations shall be reduced to the maximum degree possible by ceasing or drastically curtailing all production and allied operations to the extent feasible with due regard to any immediate likelihood of resultant personal injury or substantial equipment damage.
5. Transportation.	(a) The use of motor vehicles shall be restricted to meeting private and public emergency needs.

28-19-58. Emergency episode plans.

(A) Any person responsible for the operation of a source of air contamination adjudged to be of major concern with respect to possible implementation of air pollution emergency episode control procedures either because of the nature or the quantity of its emissions shall, at the request of the department, prepare an emergency episode plan to be implemented in the event that any episode status is declared by the director. Such plans shall provide for the reduction of emissions of those contaminants for which episode criteria have been established and, consistent with good industrial practice and safe operating procedures, reflect adherence to the requirements established in tables E-1, E-2, and E-3 of regulation 28-19-57.

(B) All plans requested under the provisions of 28-19-58 (A) shall be submitted to the department in written form, within 60 days of receipt of such a request; and shall be subject to review and approval by the department. Such plans shall indicate the sources of contamination to be con-

trolled or eliminated; the manner in which such action will be accomplished; and the approximate amount of specific contaminant emissions that will be eliminated.

(C) The department after reviewing any plan submitted in accordance with this regulation shall approve or disapprove it on the basis of its consistency with the intent of regulation 28-19-57. If such a plan is disapproved the department shall state its reasons for disapproval and specify those changes needed to provide an approvable plan. Such action shall be in writing and considered to be issued under the provisions of K.S.A. 65-3011 and subject to the provisions therein.

(D) Those plans which are approved under section C of this regulation shall be maintained on the premises to which they apply and shall be implemented during those periods for which an episode status has been established. Implementation of such a plan shall be considered as an emergency order of the engineer of the board to immediately reduce or discontinue the emission of contaminants in accordance with K.S.A. 65-3012, and subject to the provisions contained therein. (Authorized by K.S.A. 1971 Supp. 65-3005, 65-3006, 65-3010, 65-3011, 65-3012, 65-3013, 65-3014; effective Jan. 1, 1972.)

VOLATILE ORGANIC COMPOUND EMISSIONS

28-19-61. Definitions. The following words, terms and abbreviations are in addition to those defined in K.A.R. 28-19-7 and shall have the following meanings, unless the context clearly indicates otherwise:

(a) "Accumulator" means the reservoir of a condensing unit receiving the condensate from the condenser.

(b) "Affected facility" means facility or emission unit subject to an applicable regulation.

(c) "Air-dried coating" means coatings which are dried by the use of air or forced warm air at temperatures up to 194°F.

(d) "Asphalt prime coat" means an application of low viscosity liquid asphalt to an absorbent surface to prepare it for the application of an asphalt concrete surface.

(e) "ASTM" means the American society for testing and materials.

(f) "Automobile" means all passenger cars or passenger car derivatives capable of seating no more than 12 passengers.

(g) "Automobile and light duty truck body" means the body section rearward of the wind-

shield and front-end sheet metal forward of the windshield of an automobile or light duty truck.

(h) "Automobile and light duty truck part" means a metal part intended to be attached to an automobile or light duty truck body for inclusion into a finished product for sale to vehicle dealers and to which surface coatings have been applied in the vehicle assembly plant.

(i) "Baseline transfer efficiency" means the transfer efficiency of coating applicators in use during the baseline period.

(1) Baseline transfer efficiencies have been established for use with volatile organic compounds (VOC) emission limits recommended in certain U.S. environmental protection agency (EPA) published control technique guidelines (CTG) documents.

(2) Baseline transfer efficiencies are:

(A) 30 percent for primer-surfacer coat and top coat operations in the automobile and light truck manufacturing industry; and

(B) 60 percent for surface coating operations in metal furniture manufacturing industries.

(3) Baseline transfer efficiency for surface coating in the metal parts and products manufacturing industry has not been established, however, the default value is 60 percent except where higher baseline transfer efficiencies are probable, as in dip or flow coating and spraying of interior surfaces. This default value will be used if the facility chooses not to test to determine a baseline transfer efficiency and insufficient information exists to determine an applicable baseline transfer efficiency.

(j) "Baseline period" means the 12-month period immediately preceding the date a facility becomes subject to applicable regulations.

(k) "Bottom filling" means the filling of a gasoline delivery vessel through an opening that is flush with the tank bottom, or filling of a stationary storage vessel through an opening near the bottom of the tank.

(l) "Bulk gasoline plant" means a gasoline storage and distribution facility with an average throughput of less than 20,000 gallons which receives gasoline from bulk terminals by trailer transport, stores it in tanks and subsequently dispenses it via account trucks to local farms, businesses and service stations.

(m) "Bulk gasoline terminal" means a gasoline storage facility which receives gasoline from refineries primarily by pipeline, ship, or barge, and delivers gasoline to bulk gasoline plants or to commercial or retail accounts primarily by delivery

vessels, and has an average daily throughput of more than 20,000 gallons of gasoline.

(n) "Carbon adsorption system" means a volatile organic compounds (VOC) emissions control device containing adsorbent material, including but not limited to activated carbon, alumina and silica gel, an inlet and outlet for exhaust gases and a system to regenerate the saturated adsorbent. The carbon adsorption system shall provide for the proper disposal or reuse of all VOC adsorbed.

(o) "Clear coat" means a transparent coating which uses the undercoat as a reflectant base or undertone color.

(p) "Coating applicator" means any device or equipment designed for the purpose of applying a coating material to a surface. The devices or equipment may include, but not be limited to, sprayers, flow coaters, dip tanks, rollers, knife coaters, extrusion coaters and gravure devices.

(q) "Coating application system" means all operations and equipment within each line which apply, convey and dry a surface coating, including spray booths, flow coaters, flash-off areas, air dryers and ovens.

(r) "Cold cleaning" means the batch process of cleaning and removing soils from metal surfaces with solvents by spraying, brushing, flushing or immersion while maintaining the solvent below its boiling point. Wipe cleaning is not included in this definition.

(s) "Condenser" means any heat transfer device used to liquefy vapors by removing their latent heat of vaporization. Such devices include shell and tube, coil, surface, or contact condensers.

(t) "Condensate" means hydrocarbon liquids which condensed due to changes in the temperature or pressure, or both, and which remain as a liquid.

(u) "Conveyorized degreasing" means the continuous process of cleaning and removing soils from metal surfaces by operating with either cold or vaporized solvents.

(v) "Crude oil" means a naturally occurring mixture which consists of hydrocarbons or any sulfur, nitrogen or oxygen derivatives of hydrocarbons, or any combination of these compounds, and which is liquid at standard conditions.

(w) "Custody transfer" means the transfer of produced crude oil or condensate, or both, after processing or treating, or both, in the producing operations, from storage tanks or automatic transfer facilities to pipelines or any other forms of transportation.

(x) "Cutback asphalt" means any asphalt cement which has been liquefied by blending with volatile organic compounds (VOC) liquid diluents.

(y) "Delivery vessel" means a tank truck or trailer that is equipped with a storage tank having a capacity greater than 1,000 gallons and that is used for transport of gasoline.

(z) "Emissions unit" means any part of a stationary facility which emits or would have the potential to emit any pollutant subject to regulation under the federal clean air act, 42 U.S.C. 7407 et seq., as amended August 7, 1977.

(aa) "Emulsified asphalt" means asphalt cement which has been liquefied by blending with water and an emulsifier containing seven percent or less by volume volatile organic compounds (VOC) as a diluent as determined by ASTM standard D-244, "Standard methods of testing emulsified asphalts," as in effect October 28, 1977.

(bb) "Exempt solvents" means those designated negligibly photochemically reactive compounds listed under definition of volatile organic compounds (VOC).

(cc) "External floating roof" means a storage vessel cover in an open-top tank consisting of a double deck or pontoon single deck which rests upon and is supported by the volatile organic compounds (VOC) liquid being contained and which is equipped with a closure seal or seals to close the space between the roof edge and tank wall.

(dd) "Extreme environmental conditions" means exposure to the weather all the time or to temperatures consistently above 203°F, or to detergents, abrasives, scouring agents, solvents, corrosive atmospheres or similar environmental conditions.

(ee) "Extreme performance coatings" means coatings designed for extreme environmental conditions.

(ff) "Facility" means any building, structure, installation, activity or all combinations thereof which contains a stationary source of air contaminants on the premises.

(gg) "Federally enforceable" means:

(1) All limitations and conditions that are enforceable by the administrator of the U.S. environmental protection agency;

(2) requirements of regulations included in the federally-approved Kansas implementation plan; and

(3) any permit requirements established pursuant to these requirements.

(hh) "Final repair" means the surface coatings applied to correct topcoat imperfections on a completely assembled vehicle.

(ii) "Firebox" means the chamber or compartment of a boiler or furnace in which fuels are burned, but does not mean the combustion chamber of an incinerator.

(jj) "Flash-off area" means the structure of an assembly line between an application area and oven where solvents applied with the coating material are evaporated.

(kk) "Flexographic printing" means a method of printing in which the image areas are raised above the non-image areas, and the image carrier is made of an elastomeric material.

(ll) "Forebay" means the primary sections of a waste water separator. Wastewater is a mixture of oil and water.

(mm) "Freeboard height" means the distance from the top of the vapor zone to the top of the degreaser tank.

(nn) "Freeboard ratio" means the freeboard height divided by the width of the degreaser.

(oo) "Gasoline" means any fuel sold in any state for use in motor vehicles and motor vehicle engines and commonly or commercially known or sold as gasoline.

(pp) "Gasoline dispensing facility" means any site where gasoline is dispensed to motor vehicle gasoline tanks from stationary storage tanks.

(qq) "Glass pull rate" means the mass of molten glass utilized in the manufacture of wood fiber-glass insulation at a single manufacturing line in a specified time period.

(rr) "Heat sensitive materials" means materials which cannot consistently be exposed to temperatures greater than 203°F.

(ss) "Hot well" means the reservoir of a condensing unit receiving the warm condensate from the condenser.

(tt) "Internal floating roof" means a cover in a fixed roof tank which rests upon or is floated upon the volatile organic compounds (VOC) liquid being contained, and which is equipped with a sliding seal or seals to close the space between the edge of the covers and the tank shell.

(uu) "Light duty truck" means any motor vehicle rated at 8,500 pounds gross weight or less which is designed primarily for purpose of transportation of property, or a derivative of such a vehicle.

(vv) "Liquid-mounted seal" means a primary seal mounted in continuous contact with the liq-

uid between the tank wall and the floating roof around the circumference of the tank.

(ww) "Loading rack" means the loading arms, pumps, meters, shut-off valves, relief valves and other piping and valves necessary to fill delivery vessels.

(xx) "Lower explosive limit (LEL)" means the concentration of a compound in air below which a flame will not propagate if the mixture is ignited.

(yy) "Low solvent coating" means a coating which contains less volatile organic compounds (VOC) solvent than the conventional solvent borne coatings used by the industry. Low solvent coating could include water-borne, higher solids and powder coatings.

(zz) "Miscellaneous metal parts and products" means those metal parts and products not otherwise specified and includes, but is not limited to: large farm machinery, small farm machinery, small appliances, commercial machinery, industrial machinery, fabricated metal products and any other industrial category which includes the coating of metal parts and products under standard industrial classification code of major groups 33 through 41 as listed in the standard industrial classification manual, 1972, U.S. office of management and budget.

(aaa) "Motor vehicle" means any self-propelled vehicle designed for transporting persons or property on a street or highway.

(bbb) "Offset lithography" means the printing process in which the image and non-image areas are on the same plate and the image is transferred from a plate to a rubber blanket cylinder before being transferred to the substrate surface to be printed.

(ccc) "Open top vapor degreasing" means the batch process of cleaning and removing soils from metal surfaces by condensing hot solvent vapor on the colder metal parts.

(ddd) "Operator or owner" means any person who owns, leases, operates, controls or supervises an affected facility or a stationary source of which an affected facility is a part.

(eee) "Organic material" means a chemical compound of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates and ammonium carbonate.

(fff) "Packaging rotogravure printing" means rotogravure printing upon paper, paper board, metal foil, plastic film and other substrates, which are, in subsequent operations, formed into packaging products and labels.

(ggg) "Petroleum liquids" means crude oil condensate, and any finished or intermediate products manufactured or extracted in a petroleum refinery.

(hhh) "Petroleum refinery" means any facility engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants or other products through distillation of crude oils, or through distillation, cracking, extraction, or reforming of unfinished petroleum derivatives.

(iii) "Primer coat" means the initial coating applied to a surface.

(jjj) "Primer-surfacer coat" means the surface coating applied over the primer coat and beneath the top coat.

(kkk) "Publication rotogravure printing" means rotogravure printing upon paper which is subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements and other types of printed materials.

(lll) "Purging" means the volatile organic compounds (VOC) cleaning material expelled from the coating applicator to maintain operating conditions or prior to using the same equipment for coating with different color or composition coatings.

(mmm) "Reasonably available control technology (RACT)" means the lowest emission limit of control technology that is reasonably available considering technological and economic feasibility.

(nnn) "Refinery fuel gas" means any gas which is generated by a petroleum refinery process unit and which is combusted, including any gaseous mixture of natural gas and fuel gas.

(ooo) "Reid vapor pressure" means the absolute vapor pressure of volatile crude oil and volatile non-viscous petroleum liquids, except liquified petroleum gases, as determined by ASTM, D-323-82, as approved August 27, 1982, unless an alternative method is specifically required by regulation.

(ppp) "Roll printing" means the application of words, designs and pictures to a substrate usually by means of a series of hard rubber or steel rolls each with only partial coverage.

(qqq) "Rotary spinning" means a process used to produce wool fiberglass insulation by forcing molten glass through numerous small orifices in the side wall of a spinner to form continuous glass fibers that are then broken into discrete lengths by high velocity air flow.

(rrr) "Rotogravure printing" means the application of words, designs and pictures to a substrate by means of a roll printing technique which involves an intaglio or recessed image areas in the form of cells.

(sss) "Solvent" means organic materials which are liquid at standard conditions and which are used as dissolvers, viscosity reducers or cleaning agents.

(ttt) "Solvent-borne" means a coating which contains five percent or less water by weight in its volatile fraction.

(uuu) "Solvent metal cleaning" means the process of cleaning soils from metal surfaces by cold cleaning, open-top vapor degreasing or conveyORIZED degreasing.

(vvv) "Standard conditions" means a temperature of 68° 4F and pressure of 760 millimeters of mercury or 29.92 inches of mercury.

(www) "Submerged filling" means the filling of a storage tank or a delivery vessel tank through a pipe or hose discharging within six inches of the tank bottom.

(xxx) "Surface coat" means a protective, decorative or functional thin film applied to the surface of an object.

(yyy) "Surface coating of metal furniture" means the coating of any metal part which will be assembled with other metal, wood, fabric, plastic or glass parts to form business, institutional or household furniture.

(zzz) "Top coat" means the coating applied to a surface for the purpose of establishing color and surface appearance which includes both base coat and clear coat in base coat/clear coat operations.

(aaaa) "Transfer efficiency" means the amount of coating solids transferred onto the surface of a part or product divided by the total amount of coating solids used.

(bbbb) "True vapor pressure" means the equilibrium partial pressure exerted by a petroleum liquid as determined in accordance with methods described in American petroleum institute bulletin 2517, "evaporation loss from floating roof tanks," 1962. This information is available from the department upon written request.

(cccc) "Turnaround" means the procedure of shutting a refinery unit down after a run, to do necessary maintenance and repair work, and putting the unit back on stream.

(dddd) "Vacuum producing system" means any reciprocating, rotary, or centrifugal blower or compressor, or any jet ejector or device that takes suction from below atmospheric pressure and discharges against atmospheric pressure.

(eeee) "Vapor balance system" means a combination of pipes or hoses which create a closed system between the vapor spaces of an unloading

tank and a receiving tank such that vapors displaced from the receiving tank are transferred to the tank being unloaded.

(ffff) "Vapor collection system" means any equipment, including but not limited to, hoods and ventilation systems, that captures or contains displaced organic compounds vapors that they may be directed to a vapor processing system.

(gggg) "Vapor processing system" means all equipment used for recovery of oxidizing organic compound vapors displaced from an affected facility and generally includes a vapor collection system.

(hhhh) "Volatile organic compounds (VOC)" means any organic compound which participates in atmospheric photochemical reactions including any organic compound other than those which the department designates as having negligible photochemical reactivity. The department has designated the following organic compounds as negligibly reactive:

- (1) methane;
- (2) ethane;
- (3) 1,1,1-trichloroethane (methyl chloroform);
- (4) methylene chloride;
- (5) trichlorofluoromethane (CFC-11);
- (6) dichloro-difluoromethane (CFC-12);
- (7) chlorodifluoromethane (CFC-22);
- (8) trifluoromethane (CFC-23);
- (9) trichlorotrifluoroethane (CFC-113);
- (10) dichlorotetrafluoroethane (CFC-114);
- (11) chloropentafluoroethane (CFC-115);
- (12) dichlorotrifluoroethane (HCFC-123);
- (13) tetrafluoroethane (HCFC-134a);
- (14) dichlorofluoroethane (HCFC-141b); and
- (15) chlorodifluoroethane (HCFC-142b).

(iiii) "Volume fraction solids" means the arithmetic value determined by dividing the volume of surface coating solids contained in specific volume of surface coating material by the volume of the surface coating material. Calculation of volume fraction solids shall be determined by method 24, 40 CFR Part 60, appendix A, as in effect July 1, 1985.

(jjjj) "Waste water separator" means any device or piece of equipment which utilizes the difference in density between oil and water to remove oil and associated chemicals from water, or any device, including but not limited to a flocculation tank, clarifier, or other similar device, which removes petroleum derived compounds from waste water.

(kkkk) "Waxy, heavy-pour crudes" means any crude oil with a pour point of 30°F or higher as

determined by ASTM standard D-97-66, "test for pour point of petroleum oils," as in effect 1966, or with a Reid vapor pressure less than two pounds per square inch absolute as determined by ASTM standard D-323-82, "standard test method for vapor pressure of petroleum products (Reid method)," as in effect August 27, 1982.

(llll) "Wool fiberglass insulation" means a thermal insulation material composed of glass fibers and made from glass produced or melted at the same facility where the manufacturing line is located.

(mmmm) "Wool fiberglass manufacturing line" means the manufacturing equipment comprising the forming section, where molten glass is fiberized and a fiberglass mat is formed; the curing section, where the binder resin in the mat is thermally "set"; and the cooling section, where the mat is cooled. (Authorized by K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1987; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended Oct. 7, 1991.)

28-19-62. Testing procedures. (a) Sampling and testing procedures required to demonstrate compliance with the volatile organic compound (VOC) emission limits shall be as described in the following referenced publications:

(1) Appropriate reference methods in 40 CFR Part 60, appendix A as in effect July 1, 1986 or alternate methods demonstrated to the satisfaction of the department to be equivalent;

(2) ASTM D 1186-06.01—Thickness of paints/related coatings dry film thickness of non-magnetic coatings applied to a ferrous base, as in effect 1981.

(3) ASTM D 1200-06.01—Standard test method for determining the viscosity of paints and related coating by the Ford viscosity cup test, as in effect 1982.

(4) ASTM D 3794-06.01—Standard test method for determining the viscosity of coil coatings by the Zahn cup method test, as in effect 1979.

(5) ASTM D 1475-60—Standard test method for determining the density of paint, varnish, lacquer and related products, as in effect 1980.

(6) ASTM D 2369-81—Standard test method for determining the volatile content of coatings using a one hour bake, as in effect 1981.

(7) ASTM D 3792-79—Standard test method for determining the water content of water reducible paint by direct injection into a gas chromatograph, as in effect 1979.

(8) ASTM D 4017-81—Standard test method for determining the water content in paints by the Karl Fischer titration method, as in effect 1981.

(9) ASTM D-244-83—Standard methods of testing emulsified asphalts, as in effect 1983.

(10) ASTM D-323-82—Vapor pressure of petroleum products (Reid method), as in effect 1982.

(11) ASTM—D-97-66—Test for pour point of petroleum oils, as in effect 1978.

(12) Reid vapor pressure of gasoline to be used as a fuel for motor vehicles shall be sampled according to the procedures in 40 CFR, Part 80, Appendix D, as in effect July 1, 1989 and amended at 55 FR 25835, June 25, 1990.

(13) Reid vapor pressure of gasoline to be used as a fuel for motor vehicles shall be tested according to the procedures in 40 CFR, Part 80, Appendix E, as in effect July 1, 1989 and amended at 55 FR 25835, June 25, 1990.

(b) The department may approve an alternate sampling or testing procedure developed or approved by the U.S. environmental protection agency as equivalent or improved procedures. (Authorized by K.S.A. 65-3005 and 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1982; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended Oct. 7, 1991.)

28-19-63. Automobile and light duty truck surface coating.

(a) The provisions of this regulation shall be applicable to each automobile or light duty truck top coat and primer surfacer surface coating operation and all other automobile or light duty truck surface coating application systems at those facilities which have a VOC potential contaminant emission rate equal to or greater than three tons per year. For the purposes of this rule, surface coating operation means the combination of all coating application systems which apply the specific class of surface coatings identified at table A of subsection (b). The VOC potential contaminant emission rate of a facility shall be determined by:

(1) the maximum hourly production rate of each coating application system; and

(2) the assumption that the facility operates 24 hours per day, 365 days per year provided that the facility's operating hours are not otherwise limited by federally enforceable permit conditions.

(b) An owner or operator of any facility subject to this regulation shall not:

(1) conduct any surface coating operation that emits VOC to the atmosphere in excess of the amount specified in table A below.

Table A
VOC Emission Limits Based on Solids Applied

Surface Coating Operation	Emission Limit (Pounds of VOC/Gal. of Solids Applied)
Top Coat	15.1
Primer surfacer	15.1

(2) operate any surface coating application system that emits VOC to the atmosphere in excess of the amount specified in table B below.

Table B

Surface Coating Application System	Coating Characteristics lb/gal coating (minus exempt VOC and water)	Compliance Date
Body primer coat	1.2	12-31-82
Body primer-surfacer coat	3.0	12-31-82
Body top coat	2.8	12-31-87
	5.8	07-01-80
	5.0	12-31-81
Body final repair coat	2.8	12-31-87
	6.5	07-01-80
	4.8	12-31-87
Miscellaneous metal parts	3.5	07-01-82

(c) Use of additional VOC shall be considered as follows:

(1) for determining the potential contaminant emission rate of the facility in accordance with subsection (a), include that added for thinning coatings and that used for purging or washing coating applicators which cannot be otherwise accounted for in a reclamation system; and

(2) for compliance with subsection (b), include that added for thinning coatings.

(d) The emission limits which will result from the use of coatings in subsection (b) shall be achieved by:

(1) application of coatings which meet or exceed the characteristics of the coatings in table B of subsection (b) per coating application system on a daily weighted average basis. For the purpose of this subsection (d)(1), "daily weighted average" is the total weight of VOC emitted from a coating application system per day, divided by the volume of coating used per day; or

(2) application of coatings to achieve equivalent emissions based on the weight of VOC emitted per gallon of solids applied as specified in table A of subsection (b). For purposes of subsection (d) (2), "daily weighted average" is the total weight

of VOC emitted from a surface coating operation per day, divided by the volume of solids applied per day as determined by procedures described in the publication referenced in (f); or

(3) application, for the capture and reduction of VOC emissions through either destruction or collection, of emission control equipment demonstrated through testing as capable of maintaining an overall VOC emission reduction necessary to meet the emission requirements of subsection (b). Use of emission control equipment shall require that continuous monitors be installed, calibrated, operated and maintained. Maintenance records of the monitors shall be kept and made available for department inspection. The monitors shall continuously measure and record the following parameters:

(A) with an accuracy of the greater of ± 0.75 percent of the temperature being measured expressed in degrees Celsius, or 2.5 degrees Celsius, the exhaust gas temperature of all VOC destruction devices and the gas temperature immediately upstream and downstream of any catalyst bed;

(B) with an accuracy of ± 2.00 percent of the amount being monitored, the cumulative amount of VOC recovered during a calendar month for all VOC recovery equipment; and

(C) any other parameters considered necessary by the department to verify proper operation of emission control equipment; or

(4) any combination of methods approved by the department which results in emissions, when calculated as pounds of VOC per gallon of solids applied per coating application system, that are no greater on a daily weighted basis than those achieved with the appropriate coatings specified in table B of subsection (b).

(e) Prior to 180 days after a facility becomes subject to the provisions of this regulation, the owner or operator of the facility shall demonstrate, at the expense of the owner or operator, initial compliance with this regulation by testing. An owner or operator proposing to conduct testing shall notify the department, in writing, of the intent to test not later than 30 days prior to the proposed date of testing. The owner or operator shall submit to the department any information about the proposed test requested by the department. The department may require, at any time necessary to determine compliance with this regulation, the owner or operator of any facility subject to this regulation to demonstrate compliance by testing, and at the expense of the owner or operator. Testing, for purposes of this regulation, shall be approved by the department and consistent with:

(1) 40 CFR Part 60, appendix A, as in effect July 1, 1989; and

(2) procedures as established by the department in approving proposed test plans consistent with subsection (e)(1).

(f) Demonstration of continual compliance per top coat and primer surfacer surface coating operations achieved by subsection (d)(2) shall be based on the procedures in the publication "protocol for determining the daily volatile organic compound emission rate of automobile and light-duty truck topcoat operations," published in EPA document no. EPA-450/3-88-018 (December 1988).

(g) Demonstration of continual compliance per coating application system not covered by subsection (f), achieved by subsection (d)(3) or (d)(4) shall be based on the finding that the results obtained by the formula in (2) are equal to or less than the results obtained by the formula in (1), both results on a daily weighted average basis.

(1) complying coating equivalent emissions expressed as:

$$\frac{\text{VOC, lbs}}{\text{gal. of solids applied}} = \frac{\text{EL}}{(\text{VS})(\text{TE})}$$

EL = the coating characteristics established by this regulation, expressed as pounds of VOC per gallon of coating, less exempt VOC and water.

VS = volume fraction of solids in EL, expressed as a decimal, where the density of coating solvents is assumed to be 7.36 pounds per gallon, less exempt VOC and water.

TE = baseline transfer efficiency as defined at K.A.R. 28-19-61, expressed as a decimal.

(2) Actual coating equivalent emissions expressed as:

$$\frac{\text{VOC, lbs}}{\text{gal. of solids applied}} = \frac{\text{AC}(1 - \text{E})}{(\text{vs})(\text{te})}$$

AC = pounds of VOC per gallon of the coating as delivered to the coating application system, less exempt VOC and water.

E = the demonstrated efficiency of installed vapor processing system determined by the actual vapor collection system efficiency multiplied by the actual VOC emission control device efficiency, expressed as a decimal.

vs = volume fraction of solids of the coating as delivered to the coating application system, expressed as a decimal. For water-borne coatings, the volume fraction of solids is determined without water.

te = the demonstrated transfer efficiency of the coating application system, expressed as a decimal.

The owner or operator shall determine AC and vs by using 40 CFR Part 60, appendix A, reference method 24, as in effect July 1, 1989, and data supplied by the coating manufacturer adjusted by the VOC used for thinning purposes; or from analysis of coatings as applied. The analysis shall be conducted by the owner or operator in accordance with reference method 24, as in effect July 1, 1989. If manufacturers formulation data is used, verification of the data may be required by reference method 24, or a department approved equivalent method, and at the expense of the owner or operator.

(h) The owner or operator of each emission unit within a facility subject to this regulation shall keep and maintain records at the facility and make available for inspection by a department representative to determine continuous compliance of the facility with this regulation.

(1) In order to demonstrate compliance for surface coating operations under table A of subsection (b), the records used to complete the calculations found in EPA document no. EPA-450/3-88-018 referenced at subsection (f) shall be kept at the facility for two years following the date of record.

(2) In order to demonstrate compliance for coating application systems under table B of subsection (b), the records shall include the following information and shall be kept at the facility for two years following the date of record:

(A) the type and amount of coatings and thinning solvents delivered daily to each coating application system. The daily record-keeping requirements of this subsection may be waived if the owner or operator:

(i) demonstrates that it uses only coatings that have been determined to be in compliance with table B of subsection (b) of this regulation; and

(ii) has received written approval from the department for a waiver from this requirement;

(B) the manufacturer's coating formulation data, and other test data, including density, weight percent volatiles (as determined using a one hour bake), weight percent water, and weight percent exempt VOC, determined by reference method 24 for each coating;

(C) the coating's solids content, as delivered to the coating application system in volume percent;

(D) the results of any testing conducted at the facility pertaining to transfer efficiencies, capture efficiencies or control equipment reduction efficiencies;

(E) the type, density and amount of solvents used each month for purge and equipment cleaning;

(F) amount and density of waste solvents reclaimed; and

(G) those records as required in subsections (d)(3)(A) through (d)(3)(C).

(i) The owner or operator of a facility shall comply with all emission limits within 180 days after the facility becomes subject to the provisions of this regulation.

(j) The provisions of this regulation shall be applicable only to affected facilities located in areas which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended Nov. 8, 1993.)

28-19-64. Bulk gasoline terminals. (a) No owner or operator of any bulk gasoline terminal (BGT) with a gasoline throughput of 20,000 gallons or greater daily shall cause or permit loading of gasoline into any gasoline delivery vessel (GDV) from any loading rack unless:

(1) the loading rack includes a vapor collection system and a vapor processing system or an equivalent vapor control system approved by the director; and

(2) the GDV driver provides documentation showing the GDV owner or operator has complied with K.A.R. 28-19-70(c)(3).

(b) The following requirements shall apply to the loading rack and vapor collection and processing system at affected BGT's:

(1) VOC emissions to atmosphere shall be limited to 0.67 pound per 1,000 gallons of gasoline loaded. Initial compliance with this emission limitation shall be demonstrated by the owner or operator within 180 days after an affected BGT becomes subject to the provisions of this regulation. Compliance demonstration shall be in accordance with 40 CFR Part 60, as in effect July 1, 1986, subsections 60.503(c), (d), (e) and (f). The department may require compliance demonstration be repeated at any time necessary to determine compliance with this regulation, and at the expense of the owner or operator.

(2) all vapors and gases from the loading rack shall be vented only to the vapor processing system; and

(3) the vapor collection and processing system shall be designed and operated to prevent gauge pressure in the GDV from exceeding 18 inches of water and prevent vacuum gauge pressure from exceeding six inches of water during the gasoline loading operation.

(c) The owner or operator of an affected BGT required to install a vapor collection and processing system to comply with this regulation shall:

(1) Within 16 weeks of the effective date of this regulation submit a control plan to the department providing for final compliance with this regulation as expeditiously as practicable but not later than the date prescribed by subsection (c)(5) of this regulation;

(2) award contracts or purchase orders for the vapor collection and processing system within 24 weeks on the effective date of this regulation;

(3) initiate on site construction or installation of the vapor collection and processing system within 48 weeks of the effective date of this regulation;

(4) complete construction or installation of the vapor collection and processing system within 100 weeks of the effective date of this regulation; and

(5) demonstrate final compliance with this regulation within two years of the effective date of this regulation.

(d) The owner or operator of an affected BGT shall submit to the director by March 31 of each year, a report of the monthly gasoline throughput for the previous calendar year.

(e) The owner or operator of an affected BGT shall inspect, at least once each calendar quarter, each loading rack and vapor collection and processing system during loading of GDV's for liquid or vapor leaks. Inspect for liquid leaks visually, vapor leaks shall be detected in accordance with 40 CFR Part 60, appendix A, reference method 21 or an alternate method as demonstrated to the satisfaction of the department to be equivalent. Combustible organic vapors shall be less than 100 percent of the lower explosive limit, measured as propane, at one inch around the perimeter of any leak source on the loading rack and vapor collection and processing system up to the point of connection with GDV. Leaks detected shall be repaired within 15 days. The owner or operator of the affected BGT shall record the following information and keep the information available for at least two years for department inspection at the

BGT or submittal to the department upon department request:

(1) date of each inspection, including corresponding number of leaks detected; and

(2) date and location of leaks detected and date and type of corrective actions taken.

(f) In addition to inspecting for leaks required in subsection (e), the owner or operator of an affected BGT shall:

(1) take precautions necessary to prevent liquid drainage from the loading rack when not in use and when disconnecting from any GDV; and

(2) notify the department, on forms supplied by the department, and before each March 2nd, that all GDV's servicing the BGT during the past calendar year complied with the requirements of K.A.R. 28-19-70(c).

(g) The provisions of this regulation shall be applicable to all affected BGT's which are located in areas which were identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-65. Volatile organic compounds (VOC) liquid storage in permanent fixed roof type tanks.

(a) No person shall place, store, or hold in any stationary tank, reservoir, or other container capable of holding more than 40,000 gallons of any VOC liquid having a true vapor pressure of one and five tenths pounds per square inch absolute (psia) or greater under actual storage conditions unless the tank, reservoir, or other container is a pressure tank capable of maintaining working pressures sufficient to prevent vapor loss to the atmosphere or is designed and equipped with one of the following vapor loss control devices:

(1) for storage of VOC liquid having a true vapor pressure of less than 11.1 psia at storage conditions, an internal floating roof meeting the following requirements:

(A) it shall have a primary seal and continuous secondary seal extending from the floating roof to the tank wall. The primary seal shall be a liquid mounted type or when the floating roof already has a primary seal, a metallic shoe seal will be in-

stalled to function as a primary seal. Replacement primary seals shall be liquid mounted or metallic shoe type; and

(B) automatic vent openings shall be closed except when the floating roof is being floated off or landing on the leg supports; or

(2) for storage of VOC liquid having a true vapor pressure of equal to or greater than 11.1 psia at storage conditions, a pressure tank sealed or vented to a vapor processing system; or

(3) a properly installed, operated and maintained vapor processing system. The vapor processing system shall consist of a vapor collection system capable of collecting the VOC vapors to prevent their emission to the atmosphere. The vapor processing system shall achieve an overall VOC emissions reduction efficiency of at least 90% by weight on a continuous basis; or

(4) equipment or means other than in (1) through (3) demonstrated to the satisfaction of the department to be equal in efficiency for purposes of air pollution control.

(b) The owner or operator shall maintain each affected storage tank so that the following conditions prevail:

(1) no visible holes, tears or other openings in the secondary seal or seal fabric;

(2) no visible gaps between the secondary seal and tank wall are apparent;

(3) VOC liquid does not accumulate on the internal floating roof; and

(4) all tank openings shall be gas tight except when tank gauging or sampling is taking place.

(c) This regulation shall not apply to tanks having a storage capacity of 420,000 gallons or less and used to store produced crude oil and condensate prior to lease custody transfer.

(d) The owner or operator of an affected facility shall:

(1) within 16 weeks after the facility becomes subject to the provisions of this regulation submit a control plan to the department providing for final compliance with this regulation as expeditiously as practicable but not later than the date prescribed by subsection (d)(5) of this regulation;

(2) award contracts or purchase orders for emissions control equipment necessary to comply with the provisions of the regulation within 24 weeks after the facility becomes subject to the provisions of this regulation;

(3) initiate construction or installation of the required emission control equipment within 48

weeks after the facility becomes subject to the provisions of this regulation.

(4) complete the construction or installation of the required emission control equipment within 100 weeks after the facility becomes subject to the provisions of this regulation;

(5) demonstrate compliance with this regulation within two years after the facility becomes subject to the provisions of this regulation.

(e) The owner or operator of each affected storage tank shall visually inspect the internal floating roof, the primary seal and secondary seal each time the storage tank is emptied and degassed. The owner or operator shall then conduct any repairs necessary to comply with (b)(1) through (b)(3) before refilling the storage tank.

(f) The owner or operator of each affected storage tank shall maintain records on a monthly basis for two years from the date of record at the facility available for department inspection for:

(1) amount and type of VOC liquids stored/turned over;

(2) inspection dates with the corresponding findings;

(3) date and description of repairs of each storage tank and floating roof or vapor processing system; and

(4) the average temperature on a monthly basis of the stored VOC liquids.

(g) The provisions of this regulation shall be applicable only to VOC liquid storage tanks operated at facilities subject to the provisions of either K.A.R. 28-19-64, 28-19-67 or 28-19-68. (Authorized by K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-66. Volatile organic compounds (VOC) liquid storage in external floating roof tanks.

(a) No person shall place, store, or hold in any stationary tank, reservoir, or other container not having a permanent fixed roof and capable of holding more than 40,000 gallons of any VOC liquid with a true vapor pressure of 1.5 pounds per square inch absolute (psia) or greater at storage conditions unless the container is equipped with an external floating roof having a primary seal system. The container shall also be equipped with a continuous secondary seal extending from the floating roof to the container wall if:

(1) the container is of welded construction with a metallic type shoe seal, a liquid mounted foam

seal, a liquid mounted liquid filled seal or any other closure device which has been demonstrated to the satisfaction of the department to be an equivalent primary seal system, and the true vapor pressure of the stored VOC liquid is four psia or greater at storage conditions;

(2) the container floating roof has a vapor mounted primary seal, unless the seal can be demonstrated to the satisfaction of the department to be equivalent to a metallic or liquid mounted seal, in which case the requirements of subsection (a)(1) apply; or

(3) the container is of riveted construction.

(b) All seal closure devices shall meet the following requirements:

(1) There shall be no visible holes, tears, or other openings in the seal or the seal fabric;

(2) they shall be intact and there shall be no visible gaps between the secondary seal and the wall of the storage tank; and

(3) when a vapor mounted seal is demonstrated to the satisfaction of the department to be an equivalent primary closure device, the accumulated area of openings exceeding one-eighth inch in width between the secondary seal and the tank wall shall not exceed one square inch per foot of tank diameter.

(c) All openings in the external floating roof, except for automatic bleeder vents, rim space vents and leg sleeves, shall provide a projection below the liquid surface. The openings shall be equipped with a cover, seal or lid. The cover, seal or lid shall be in a closed position at all times except when the roof is floated off or landed on the roof leg supports and rim vents shall be set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting. No VOC liquid shall accumulate on the floating roof. Any emergency roof drain shall be provided with a slotted membrane fabric cover or equivalent cover that covers at least 90 percent of the area of the opening.

(d) The following are specifically exempted from the requirements of this regulation:

(1) external floating roof tanks having capacities less than 10,000 barrels used to store produced crude oil and condensate prior to lease custody transfer;

(2) a metallic-type shoe seal in a welded tank which has a secondary seal from the top of the shoe seal to the tank wall;

(3) external floating roof tanks storing waxy, heavy pour crudes; and

(4) external floating roof tanks with other closures or devices demonstrated to the satisfaction of the department to be equal in efficiency for purposes of air pollution control.

(e) The owner or operator of a facility subject to the provisions of this regulation shall:

(1) within 16 weeks after the facility becomes subject to the provisions of this regulation, submit a control plan to the department providing for final compliance as expeditiously as practicable but not later than the date prescribed by subsection (e)(5) of this regulation;

(2) award contracts or purchase orders for seal systems or other equipment necessary for compliance within 24 weeks after the facility becomes subject to the provisions of this regulation;

(3) initiate on site construction or installation activities required for compliance within 48 weeks after the facility becomes subject to the provisions of this regulation;

(4) complete on site construction or installation of equipment for compliance within 100 weeks after the facility becomes subject to the provisions of this regulation; and

(5) demonstrate final compliance with applicable provisions of this regulation within two years after the facility becomes subject to the provisions of this regulation except that final compliance shall be demonstrated within one year after the facility becomes subject to the provisions of this regulation where such compliance does not require the purchase, relocation or construction of equipment items other than piping.

(f) The owner or operator of each affected storage tank shall visually inspect the floating roof primary seal each time the storage tank is emptied and degassed, but no less than once every five years. A visual inspection of the secondary seal shall be conducted semi-annually and the secondary seal gap measurements shall be conducted annually to ensure compliance with (b)(2) and (b)(3). The owner or operator shall repair any damage to the secondary seal or seal fabric within 72 hours of finding secondary seal damage and repair primary seal damage prior to refilling the storage tank.

(g) The owner or operator of each affected storage tank shall maintain records on a monthly basis for two years from the date of record at the facility available for department inspection for:

(1) amount and type of VOC liquids stored/turned over;

(2) inspection dates with the corresponding findings;

(3) date and description of repairs of each storage tank and floating roof; and

(4) the average temperature on a monthly basis of the stored VOC liquids.

(h) The provisions of this regulation shall be applicable only to VOC liquid storage tanks operated at facilities subject to the provisions of either K.A.R. 28-19-64, 28-19-67 or 28-19-68. (Authorized by K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-67. Petroleum refineries. (a) A person shall not permit the use of any vacuum producing system at a petroleum refinery unless the vapor emissions from the condensers, hot wells or accumulators of the system are reduced by:

(1) Piping the noncondensable vapors to a firebox or incinerator;

(2) compressing the vapors and adding them to the refinery fuel gas; or

(3) other equipment or means of equal efficiency for purposes of air pollution control as may be approved by the department.

(b) A person shall not permit the use of any waste water (oil and water) separator at a petroleum refinery unless covers and seals approved by the department have been provided on all separators and forebays, and all openings in covers, separators and forebays have been equipped with lids or seals so that the lids or seals are in the closed position at all times except when in actual use.

(c) A person shall not perform a process unit turnaround at a petroleum refinery unless a detailed procedure for minimization of volatile organic compound emissions during process unit turnarounds has been developed, submitted to, and approved by the department. As a minimum, the procedure shall provide for:

(1) Depressurization venting of the process unit or vessel to a fuel gas system, vapor recovery system, flare or firebox, or other equipment or means of equal efficiency for purposes of air pollution control, as approved by the department;

(2) no emission of volatile organic compounds from a process unit or vessel until its internal pressure is 19.7 pounds per square inch, absolute, or less; and

(3) submission to the department, within 30 days of placing the process unit on stream after a turnaround, the following information:

(A) The dates of the process unit shutdown and startup; and

(B) the approximate total quantity of volatile organic compounds emitted to the atmosphere.

(d) The owner or operator of any source subject to the provisions of subsections (a) and (b) of this regulation shall:

(1) Within 16 weeks of the effective date of this regulation submit a control plan providing for compliance with the provisions as expeditiously as practicable but not later than the date prescribed by subsection (e)(5) of this regulation.

(2) award contracts or purchase orders necessary to comply with the provisions within 24 weeks of the effective date of this regulation.

(3) initiate on site construction or installation activities required to comply with the provisions within 48 weeks of the effective date of this regulation.

(4) complete the construction or installation of equipment necessary to comply with the provisions within 100 weeks of the effective date of this regulation.

(5) demonstrate final compliance with the provisions within two years of the effective date of this regulation, except that final compliance shall be demonstrated within one year of the effective date of this regulation where such compliance does not require the purchase, relocation or construction of equipment items other than piping.

(e) The owner or operator of a source subject to the provisions of subsection (c) of this regulation shall develop and submit the required procedures to the department within six months of the effective date of this regulation and shall implement such procedures within three months of the date of their approval by the department.

(f) This regulation shall be applicable only to the use of vacuum producing systems and wastewater separators and turnaround operations at petroleum refineries which are located in areas which were identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act (42 U.S.C. 7407), as promulgated at 48 FR 46783 (October 14, 1983), and have a cumulative potential contaminant emission rate equal to or greater than one hundred (100) tons of volatile organic compounds per year for all emission sources subject to the provisions of this part. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986.)

28-19-68. Leaks from petroleum refinery equipment. (a) If the volatile organic compound concentration leaking from pump seals, compressor seals, seal oil degassing vents, pipeline valves, flanges, and other connections, pressure relief devices, process drains, and open ended pipes exceeds 10,000 parts per million, the leak shall be repaired within 15 days.

(b) Any leaks which cannot be repaired during the 15 day period shall be reported to the department, in writing, within the 15 day period. The report shall state the source of the leak, the reasons why repairs cannot be made during the period, and the earliest date by which the repairs can be accomplished.

(c) The monitoring of volatile organic compound leaks shall be performed by the refinery according to the following schedule: (1) Weekly: visual inspection shall be made of pump seals to detect leaks. Whenever liquid leaks are observed, the volatile organic compound concentration shall be monitored immediately.

(2) quarterly: compressor seals, pipeline valves in gas service, and atmospheric vented pressure relief valves in gas service.

(3) annually: pump seals, pipeline valves in liquid service, and process drains.

(d) The monitoring for the detection of volatile organic compound leaks other than visual inspection required by subsection (c) shall be conducted in accordance with the provisions of K.A.R. 28-19-62(a)(3).

(e) A written monitoring plan providing for compliance with the provisions of subsection (c) shall be submitted to the department by the owner or operator of any source subject to its provisions within one year of the effective date of this regulation. The plan shall contain, at a minimum, a list of the refinery units to be monitored, the calendar quarter during which they will be monitored, a copy of the leak survey log format that will be used, and the make and model of the monitoring equipment that will be used.

(f) The ends of all pipes and lines which normally contain volatile organic compounds and which terminate with a valve fitting other than a pressure relief valve shall be sealed with a second valve, a blind flange, a plug, or a cap. The seals shall be removed only when the line must be opened for the collection of samples or other purposes.

(g) This regulation shall be applicable only to pump seals, compressor seals, seal oil degassing vents, pipeline valves, flanges and other connec-

tions, pressure relief devices, process drains and open ended pipes in use at petroleum refineries which are located in areas which were identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act (42 U.S.C. 7407), as promulgated at 48 FR 46783 (October 14, 1983), and have a cumulative potential contaminant emission rate equal to or greater than 100 tons of volatile organic compounds per year for all emissions sources subject to the provisions of this part. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986.)

28-19-69. Cutback asphalt. (a) A person shall not cause, allow or permit the use or application of cutback asphalt for the purposes of paving after December 31, 1982, without the approval of the department. A person seeking approval from the department shall submit a request in writing which provides as much information as the department may require. Any approval may be subject to conditions imposed by the department which may include, but are not limited to, maintenance of records necessary to demonstrate compliance with this regulation. Emulsified asphalt shall be an acceptable substitute for cutback asphalt.

(b) The use or application of cutback asphalts may be approved where:

(1) the liquified cutback asphalt is used to produce a plant-mix for sale and use outside the areas as described in subsection (c);

(2) the liquified cutback asphalt is used in a plant-mix or road-mix which is used only for filling potholes on emergency road repair; or

(3) the cutback asphalt is used only as an asphalt prime coat or an asphalt seal coat or absorbent surfaces.

(c) This regulation shall be applicable only to the use or application of cutback asphalt within areas which were identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. 7407, as promulgated at 40 CFR Part 81 as in effect July 1, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-70. Leaks from gasoline delivery vessels and vapor collection systems. (a) No person shall load or permit the loading of gasoline from any bulk gasoline terminal (BGT) loading rack into any gasoline delivery vessel (GDV) unless the BGT loading rack is equipped with a vapor collection system that is connected to a vapor processing system and unless this person complies with the requirements of this regulation.

(b) The loading of gasoline from a BGT into a GDV shall be carried out in compliance with the following requirements.

(1) The level of combustible organic vapors shall be less than 100 percent of the lower explosive limit, measured as propane, at one inch around the perimeter of any leak source on the GDV or the connected BGT vapor collection system during the gasoline loading operation. Compliance shall be determined in accordance with 40 CFR Part 60, appendix A, reference method 21, revised as of July 1, 1986, or an alternate method demonstrated to the satisfaction of the department to be equivalent to that reference method.

(2) There shall not be any visible liquid leaks from the GDV or the BGT vapor collection and processing system during the gasoline loading operation.

(3) The vapor collection and vapor processing system provided at the BGT shall be designed and operated to prevent gauge pressure in the GDV from exceeding 18 inches of water and to prevent vacuum gauge pressure in the GDV from exceeding six inches of water during the gasoline loading operation.

(4) The GDV being loaded shall be in compliance with the requirements of subsection (c) of this regulation.

(c)(1) The owner or operator of each GDV that is operated within the area of applicability, as defined in subsection (f) of this regulation, shall demonstrate that a pressure change in the GDV of not more than three inches of water in five minutes will occur when the GDV is subjected to these conditions:

(A) pressurized to a gauge pressure of 18 inches of water; and

(B) evacuated to a gauge pressure of six inches of water. This demonstration shall be made using the testing procedures prescribed in 40 CFR Part 60, appendix A, method 27, revised as of July 1, 1986.

(2) The owner or operator of each GDV operated within the area of applicability, as defined in subsection (f) of this regulation, shall certify that

the GDV satisfies the requirements of paragraph (c)(1) of this regulation in the following manner.

(A) The owner or operator shall demonstrate compliance with the parameters in paragraph (c) (1) by the successful completion of an annual test of each GDV.

(B) The period for annual testing shall be from January 1 to May 31, inclusive, of each year.

(C) The owner or operator shall submit the result or results of GDV testing to the department, on forms approved by the department, before July 31 of the same year in which the test is completed and in which compliance is to be demonstrated.

(D) Failure to test a GDV operated within the area of applicability, as defined in subsection (f) of this regulation, before June 1 of each year, shall be a violation of this regulation.

(E) Failure to submit the results of testing for a GDV operated within the area of applicability on the department-approved forms before July 31 of the certification year shall be a violation of this regulation.

(3) Each owner or operator of a GDV subject to this regulation shall place a copy or copies of the annual successful test results in the respective GDV, which test results name the company or person performing the testing.

(4) Within 15 days after a GDV fails the required testing, the owner or operator shall either repair and then certify that the GDV passed the required testing, or discontinue use as a GDV in areas identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. §7407(d), as promulgated at 40 CFR Part 81, revised as of July 1, 1986, and amended at 51 Fed. Reg. 25,200, July 11, 1986, until it has been tested successfully.

(5) Each owner or operator of a GDV shall notify the director within 15 days of the date any liquid or vapor leaks occur at the GDV during gasoline loading and transfer operations, and shall identify the corrective measures taken to repair the GDV.

(6) Each owner or operator of a GDV shall notify the department of the first time and place after certification that the GDV transfers gasoline at a gasoline dispensing facility subject to K.A.R. 28-19-72, to provide the department with the opportunity to inspect the GDV after certification in accordance with paragraphs (1) through (4) of this subsection.

(d) Gasoline shall not be loaded into or from any GDV that has not been certified as complying with subsection (c).

(e) The provisions of this regulation shall apply only to gasoline loading operations conducted at BGTs subject to the provisions of K.A.R. 28-19-64, and to gasoline transfer operations at gasoline dispensing facilities subject to the provisions of K.A.R. 28-19-72.

(f) Each owner or operator of a GDV operating in areas that have been identified as not meeting the national ambient air quality standard for ozone in the manner as prescribed by the provisions of section 107(d) of the federal clean air act, 42 U.S.C. §7407(d), as promulgated at 40 CFR Part 81, revised as of July 1, 1986, and amended at 51 Fed. Reg. 25,200, July 11, 1986 shall meet these requirements:

(1) comply with applicable requirements of this regulation within 60 days after the GDV becomes subject to the provisions of this regulation for GDVs in service before the effective date of this regulation; and

(2) comply with applicable requirements of this regulation as of the date of entering service for GDVs entering service after the effective date of this regulation. (Authorized by K.S.A. 1996 Supp. 65-3005, K.S.A. 65-3010; implementing K.S.A. 1996 Supp. 65-3005, K.S.A. 65-3010; effective May 1, 1982; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended May 15, 1998.)

28-19-71. Printing operations. (a) The provisions of this regulation shall apply to all packaging rotogravure, publication rotogravure and flexographic printing facilities with potential contaminant emission rate of volatile organic compounds (VOC) equal to or more than 100 tons per year. The potential contaminant emission rate calculations may include federally enforceable permit restrictions.

(b) An owner or operator of an affected facility may not operate, cause, allow or permit the operation of the facility unless:

(1) the ink, as it is applied to the substrate, contains:

(A) for a water borne ink, a volatile content of 25.0 percent or less by volume VOC and 75 percent or more by volume water; and

(B) for a high solids, solvent borne ink, less water, 60.0 percent or more by volume solid fraction; or

(2) the owner or operator installs and operates a vapor processing system which uses a carbon adsorber or an incinerator as a VOC emissions control device or other types of VOC emissions control devices may be used upon department approval. A

vapor collection system, the design and operation of which shall be consistent with good engineering practice, shall be used with any vapor processing system. The vapor processing system shall provide, as demonstrated to the satisfaction of the department, an overall emissions reduction of at least:

(A) 75.0 percent where a publication rotogravure process is employed;

(B) 65.0 percent where a packaging rotogravure process is employed; or

(C) 60.0 percent where a flexographic printing process is employed.

(c) The owner or operator of an affected facility not in compliance with subsection (b) after the facility becomes subject to the provisions of this regulation shall meet the increments of progress to achieve compliance in the following schedules:

(1) For process equipment alterations and add-on vapor processing systems requiring purchase orders:

(A) Submit final plans for the vapor processing system or process alterations, or both, within 75 days after the facility becomes subject to the provisions of this regulation;

(B) award contracts or purchase orders for the vapor processing system or process alterations, or both, within 135 days after the facility becomes subject to the provisions of this regulation;

(C) initiate onsite construction or installation of the vapor processing system or process alterations, or both, within 200 days after the facility becomes subject to the provisions of this regulation;

(D) complete onsite construction or installation of the vapor processing system or process alterations, within 300 days after the facility becomes subject to the provisions of the regulation; and

(E) achieve final compliance within 365 days after the facility becomes subject to the provisions of this regulation.

(2) for process equipment alterations and vapor processing systems not requiring purchase orders:

(A) submit final plans for the vapor processing system or process alterations, or both, within 45 days after the facility becomes subject to the provisions of this regulation;

(B) award contracts for process alterations or for the vapor processing system, or both, within 90 days after the facility becomes subject to the provisions of this regulation;

(C) initiate onsite construction or installation of process alterations or vapor processing system, or both, within 120 days after the facility becomes subject to the provisions of this regulation;

(D) complete onsite construction or installation of process alterations or vapor processing system, or both, within 180 days after the facility becomes subject to the provisions of this regulation; and

(E) achieve final compliance within 200 days after the facility becomes subject to the provisions of this regulation.

(D) The owner or operator of an affected facility not in compliance with subsection (b) after the facility becomes subject to the provisions of this regulation may submit to the department, and the department may approve, a proposed alternate compliance schedule to those outlined in subsection (c), provided the following requirements are met:

(1) the proposed alternate compliance schedule shall be submitted within 45 days after the facility becomes subject to the provisions of this regulation;

(2) the owner or operator shall demonstrate to the satisfaction of the department the need for an alternate schedule;

(3) the alternate compliance schedule shall contain increments of progress;

(4) sufficient documentation and certification from appropriate suppliers, contractors, manufacturers, or fabricators shall be submitted to the department by the owner or operator of the affected facility to justify the dates proposed for the increments of progress;

(5) the owner or operator shall certify in writing to the department, within five days after the deadline for each increment of progress, that the required increment of progress has been met; and

(6) final compliance shall be achieved within 365 days after the facility becomes subject to the provisions of this regulation.

(e)(1) The owner or operator of an affected facility shall, within 365 days after the facility becomes subject to the provisions of this regulation and at other times considered necessary by the department to determine compliance with this regulation and at the owner or operator's expense, demonstrate compliance to the satisfaction of the department with subsection (b) by the test methods outlined in the following documents or alternate methods demonstrated to the satisfaction of the department to be equivalent:

(A) appropriate reference methods in 40 CFR Part 60, appendix A, as in effect July 1, 1986; and

(B) U.S. environmental protection agency guideline series document "Procedures for Certifying Quantity of Volatile Organic Compounds

Emitted by Paint, Ink and Other Coatings", EPA-450/3-84-011, as in effect December, 1984.

(2) The owner or operator shall notify the department of the intent to test not less than 30 days before the proposed initiation of any tests, and the notification shall contain the information required by, and be in a format approved by, the department.

(f) Subsequent to the initial performance test required in subsection (e), the owner or operator shall monitor compliance with subsection (b) by maintaining and analyzing the daily records required by subsection (h) using composition of the ink as applied to the substrate determined by:

(1) ink analysis conducted by the owner or operator in accordance with 40 CFR Part 60, appendix A, reference method 24A, as in effect July 1, 1986; or

(2) formulation data supplied by the ink manufacturer plus VOC added to alter ink viscosity before application to the substrate. The department may require the manufacturer's data be verified, at the expense of the owner or operator, by method 24A referenced in subsection (f)(1), if the department has reason to believe compliance with subsection (b) is not being achieved.

(g) Use of vapor processing systems shall require that continuous monitors be installed, calibrated, operated and maintained. The continuous monitors shall continuously measure and record the following parameters:

(1) with an accuracy of the greater of ± 0.75 percent of the temperature being measured, expressed in degrees celsius, of 2.5 degrees celsius, the exhaust gas temperature of all VOC destruction devices and the gas temperature immediately upstream and downstream of any catalyst bed; and

(2) with an accuracy of ± 2.00 percent of the amount being monitored, the cumulative amount of VOC recovered during a calendar month for all VOC recovery equipment; and

(3) any other parameters considered necessary by the department.

(h) The owner or operator of an affected facility shall keep and maintain at the facility, and make available for inspection by a department representative, records for each emission unit demonstrating continuous compliance with this regulation. The records shall include daily records of the following information and shall be kept at the facility for two years following the date of record:

(1) properties of inks as supplied: density in pounds per gallon, total volatile content in weight percent, total VOC content in pounds per gallon

minus water, water content in weight percent, and nonvolatiles content in weight percent;

(2) properties of dilution solvents: chemical name and density in pounds per gallon;

(3) properties of inks as applied to substrate: weighted average density in pounds per gallon and ink dilution ratio in gallons of solvent to gallons of ink as supplied;

(4) quantity of individual inks as applied to substrate;

(5) results of any testing conducted on an emissions unit at an affected facility; and

(6) maintenance records of the vapor processing systems.

(i) The provisions of this regulation shall be applicable only to the printing operations located within areas which were identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of the federal clean air act, 42 U.S.C. 7407, as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-72. Gasoline dispensing facilities.

(a) No owner or operator of a gasoline dispensing facility (GDF) or a gasoline delivery vessel (GDV) shall cause or permit the transfer of gasoline from any GDV into any stationary storage container with a capacity greater than 2000 gallons unless such container is equipped with a submerged fill pipe and a vapor balance system properly installed and in good working order.

(b) No owner or operator of a GDF or a GDV shall cause or permit the transfer of gasoline from any GDV into any stationary storage container with a capacity greater than 250 gallons, but equal to or less than 2000 gallons, unless such container is equipped with a submerged fill pipe.

(c) The transfer of gasoline from any GDV into any stationary storage container at an affected GDF shall be conducted in compliance with the following requirements:

(1) combustible organic vapors shall be less than 100 percent of the lower explosive limit, measured as propane, at one inch around the perimeter of any leak source on the GDV or the connected vapor balance system during the gasoline transfer operation. Compliance shall be determined in accordance with 40 CFR Part 60, appendix A, reference

method 21, as in effect July 1, 1986, or by a method demonstrated to the satisfaction of the department to be equivalent to reference method 21;

(2) there shall not be any visible liquid leaks from the GDV or connections to the stationary storage container during the gasoline transfer operation:

(3) the GDV shall remain closed and contain all vapors collected during the gasoline transfer operation until such time as it is refilled in accordance with K.A.R. 28-19-70 if:

(A) refilled in areas which were identified as not meeting the national ambient air quality standard for ozone as described in subsection (h) of this regulation; or

(B) refilled at bulk gasoline terminals or bulk gasoline plants located in areas meeting the national ambient air quality standard for ozone as described also in subsection (h); and

(4) an owner or operator of an affected GDF or an affected GDV shall, during all transfer operations to an affected stationary storage container, inspect the vapor balance system and GDV connections for liquid gasoline or vapor leaks. Leak detection may be by sight, sound or odor. Each detection of a leak shall be recorded and described in records maintained by the GDF owner or operator at the GDF. Transfer operations shall cease until repair of the leak is accomplished.

(d) The vapor balance system shall be constructed so as to ensure that the gas tight vapor return line is connected to the GDV before gasoline can be transferred into the stationary storage container.

(e) GDV's, including the vessel's vapor collection system, that deliver gasoline to an affected GDF shall comply with K.A.R. 28-19-70(c).

(f) The owner or operator of an affected GDF shall:

(1) maintain written records for a period of at least two consecutive years at the GDF. The records shall be available upon request or for inspection by a department representative and shall specify:

(A) the name and address of the owner or operator of the GDV for each delivery of gasoline transferred into the stationary storage container or containers;

(B) the date of delivery and quantity of gasoline transferred;

(C) identification of and the date when each GDV servicing the GDF was last tested, and determined to comply with the pressure test in K.A.R. 28-19-70(c);

(D) the date when the GDF was last tested and determined to comply with subsection (c)(1) and the name of the person performing the test;

(E) the date and extent of any repairs to the submerged fill pipe connection and vapor balance system at the GDF;

(F) the date of inspection, the description of findings and the corrective actions taken for the inspections conducted in subsection (c)(4); and

(2) notify the department, on forms supplied by the department, and before each March 2nd, that all GDV's servicing the GDF during the past calendar year complied with the requirements of K.A.R. 28-19-70(c).

(g) Each owner or operator of:

(1) an affected GDF shall comply with all requirements within 180 days after the GDF becomes subject to the provisions of this regulation;

(2) GDV's in service prior to the effective date of this regulation shall comply with applicable requirements of this regulation within 60 days after the GDV becomes subject to the provisions of this regulation; and

(3) GDV's entering service after the effective date of this regulation shall comply with applicable requirements of this regulation as of the date of entering service.

(h) This regulation shall be applicable only to affected GDF's which are located in and GDV's which operate in areas which were identified as not meeting the national ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1987; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-73. Surface coating of miscellaneous metal parts and products and metal furniture. (a) The provisions of this regulation shall be applicable to each miscellaneous metal parts and products and metal furniture coating application system at those facilities which have a VOC potential contaminant emission rate equal to or greater than three tons per year on a facility-wide basis. The VOC potential contaminant emission rate of a facility shall be determined by:

(1) the maximum hourly production rate of each coating application system; and

(2) the assumption that the facility operates 24

hours per day, 365 days per year provided that the facility's operating hours are not otherwise limited by federally enforceable permit conditions.

(b) This regulation shall not be applicable to the following manufacturing categories which have miscellaneous metal parts and products coating operations:

(1) automobiles and light duty trucks;

(2) metal cans;

(3) customized top coating of automobiles and trucks, if less than 35 vehicles per day are processed; and

(4) automobile refinishing.

Each facility subject to this regulation shall remain subject so long as this regulation remains in effect or until the facility's VOC potential contaminant emission rate is demonstrated, to the satisfaction of the department, to be always less than three tons per year.

(c) An owner or operator of any facility subject to this regulation shall not conduct any surface coating operation that emits VOC to the atmosphere in excess of that which would be emitted by using the following coatings with the VOC content specified; (1) through (5) applicable to miscellaneous metal parts and products, and (6) applicable to metal furniture.

(1) 4.3 pounds per gallon of coating, less water and exempt VOC, delivered to a coating application system that applies clear coatings;

(2) 3.5 pounds per gallon of coating, less water and exempt VOC, delivered to a coating application system that is air-dried or forced warm air-dried at temperatures up to 194°F;

(3) 3.5 pounds per gallon of coating, less water and exempt VOC, delivered to a coating application system that applies extreme performance coatings except that coatings applied to the interior of metal pails and metal drums may contain 4.3 pounds per gallon of coating, less water and exempt VOC. As used in this regulation pails shall mean any nominal cylindrical metal container of 1-12 gallon capacity, and drums shall mean any cylindrical metal container of 13 to 110 gallons capacity;

(4) 0.4 pounds per gallon of coating, less water and exempt VOC, delivered to a coating application system that applies powder coatings;

(5) 3.0 pounds per gallon of coating, less water and exempt VOC, delivered to a coating application system for any other coating; and

(6) 3.0 pounds per gallon of coating, less water and exempt VOC, delivered to a coating appli-

cation system for prime, top-coat or single coat operations.

(d) If more than one emission limitation in subsection (c) applies to a specific coating, then the least stringent emission limitation shall apply.

(e) Use of additional VOC shall be considered as follows:

(1) for determining the potential contaminant emission rate of the facility in accordance with subsection (a), include that added for thinning coatings and that used for purging or washing coating applicators which cannot be otherwise accounted for in a reclamation system; and

(2) for compliance with subsection (c), include that added for thinning coatings.

(f) The emission limits which will result from the use of coatings in subsection (c) shall be achieved by:

(1) application of coatings which meet or exceed the requirements of subsection (c) per coating application system on a daily weighted average basis; or

(2) application of coating with improved transfer efficiency demonstrated, through testing, by methods approved by the department, to achieve equivalent emissions based on the weight of VOC emitted per gallon of solids applied as would be emitted with the coatings specified in subsection (c) per coating application system on a daily weighted average basis; or

(3) application, for the capture and reduction of VOC emissions through either destruction or collection, of a VOC vapor processing system demonstrated through testing as capable of maintaining an overall VOC emission reduction of at least 90 percent. Use of a VOC vapor processing system shall require that continuous monitors be installed, calibrated, operated, and maintained. The continuous monitors shall continuously measure and record the following parameters:

(A) with an accuracy of the greater of ± 0.75 percent of the temperature being measured expressed in degrees Celsius, or 2.5 degrees Celsius, the exhaust gas temperature of all VOC destruction devices and the gas temperature immediately upstream and downstream of any catalyst bed;

(B) with an accuracy of ± 2.00 percent of the amount being monitored, the cumulative amount of VOC recovered during a calendar month for all VOC recovery equipment;

(C) any other parameters considered by the department necessary to achieve compliance with this regulation; or

(4) any combination of methods approved by the department which results in emissions, when calculated as pounds of VOC per gallon of solids applied per coating operation, that are no greater on a daily weighted average basis than those achieved with the appropriate coatings specified in subsection (c).

(5) For the purpose of this subsection the term “daily weighted average” is the total weight of VOC emitted from a coating application system per day divided by the volume of coating used or volume solids applied per day, depending on the units of the emission limitation.

(g) Prior to 180 days after a facility becomes subject to the provisions of this regulation, the owner or operator of the facility shall demonstrate, at the expense of the owner or operator, initial compliance with this regulation by testing. An owner or operator shall notify the department, in writing, of the intent to test not later than 30 days prior to the scheduled date of testing. The owner or operator shall submit to the department any information about the test requested by the department. If necessary to determine compliance with this regulation, the owner or operator of any facility subject to this regulation may be required to demonstrate compliance with this regulation by testing at the expense of the owner or operator. Testing, for purposes of this regulation, shall be approved by the department and consistent with:

(1) the test procedures found at 40 CFR Part 60, appendix A, as in effect July 1, 1989; and

(2) procedures as established by the department in approving proposed test plans consistent with subsection (g)(1).

(h) Demonstration of continual compliance per coating application system achieved by sections (f)(2) through (f)(4) shall be based on the finding that the results obtained by the formula in (2) are equal to or less than the results obtained by the formula in (1), both results on a daily weighted average basis.

(1) complying coating equivalent emissions expressed as:

$$\frac{\text{VOC, lbs}}{\text{gal of solids applied}} = \frac{(\text{EL})}{(\text{TE})(\text{VS})}$$

EL = the coating characteristics established by this regulation, expressed as pounds of VOC per gallon of coating, less water and exempt VOC;

TE = baseline transfer efficiency as defined at K.A.R. 28-19-61, expressed as a decimal;

VS = volume fraction of solids in EL, expressed as a decimal, where the density of coating solvents is assumed to be 7.36 pounds per gallon.

(2) actual coating equivalent emissions expressed as:

$$\frac{\text{VOC, lbs}}{\text{gal of solids applied}} = \frac{(\text{AC}) (1-\text{E})}{(\text{vs})(\text{te})}$$

AC = pounds of VOC per gallon of the coating as delivered to the coating application system, less exempt VOC and water;

E = the demonstrated efficiency of installed vapor processing system determined by the actual vapor collection system efficiency multiplied by the actual VOC emissions control device efficiency, expressed as a decimal;

vs = volume fraction of solids of the coating as delivered to the coating application system, expressed as a decimal. For water-borne coatings, the volume fraction of solids is determined without water;

te = the actual demonstrated transfer efficiency of the coating application system, expressed as a decimal.

(A) The owner or operator shall determine AC and vs by (1) using Reference Method 24 data supplied by the coating manufacturer, adjusted by the VOC used for thinning purposes, or (2) from an applied coating analysis conducted by the owner or operator in accordance with Reference Method 24. If manufacturer's formulation data is used, verification of the data may be required by Reference Method 24, or a department approved equivalent method, and at the expense of the owner or operator.

(i) The owner or operator of each emission unit within a facility subject to this regulation shall keep and maintain records at the facility and make available for inspection by a department representative to determine continuous compliance of the facility with this regulation. The records shall include the following information and shall be kept at the facility for two years following the date of record:

(1) the type and amount of coatings delivered daily to each coating application system. The daily record-keeping requirements of this subsection may be waived if the owner or operator:

(A) demonstrates that it uses only coatings that have been determined to be in compliance with subsection (c) of this regulation, and

(B) has received written approval from the department for a waiver from this requirement;

(2) the manufacturer's coating formulation data, and other test data, including density, weight percent volatiles (as determined using a one hour bake), weight percent water, and weight percent exempt VOC, determined by Reference Method 24 for each coating;

(3) the coating's solids content, as delivered to the coating application system, in volume percent;

(4) the results of any testing conducted at the facility pertaining to transfer efficiencies, capture efficiencies or control equipment reduction efficiencies;

(5) the type, density and amount of solvents used daily for coating thinning, purge and equipment cleaning;

(6) amount, components and density of waste solvents reclaimed daily;

(7) those records as required in subsections (f)(3)(A) through (f)(3)(C); and

(8) maintenance records of the temperature monitoring equipment.

(j) The owner or operator of a facility shall comply with all emission limits within 180 days after the facility becomes subject to the provisions of this regulation.

(k) The provisions of this regulation shall be applicable only to affected facilities located in areas which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1989. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1987; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended June 8, 1992.)

28-19-74. Wool fiberglass manufacturing.

(a) The provisions of this regulation shall be applicable to each wool fiberglass manufacturing facility which has a VOC potential contaminant emission rate equal to or greater than 100 tons per year on a facility-wide basis. A facility's VOC potential contaminant emissions rate shall be determined by:

(1) the facility owner or operator estimate of the maximum hourly production rate of each wool fiberglass manufacturing line; and

(2) assuming that the facility operates 24 hours per day, 365 days per year.

(b) No owner or operator of a wool fiberglass manufacturing line shall cause or allow VOC to be discharged into the atmosphere in excess of five pounds of VOC per ton of glass pulled.

(c) The owner or operator of the affected facility shall demonstrate that each wool fiberglass manufacturing line is in compliance with the VOC emissions rate of subsection (b) through testing as specified in subsection (d) and calculations as specified in subsection (f).

(d) Testing of each wool fiberglass manufacturing line shall be conducted:

(1) initially within 180 days after a facility becomes subject to the provisions of this regulation, if recent department approved testing has not been conducted prior to the time the facility becomes subject to the provisions of this regulation, and thereafter at other times considered by the department necessary to determine compliance with this regulation;

(2) at the expense of the owner;

(3) in accordance with a test plan approved by the department before the testing is scheduled. The plan shall include:

(A) name of testing agency;

(B) testing dates;

(C) sampling location;

(D) sampling equipment;

(E) sampling procedures;

(F) sample recovery methods; and

(G) any other information considered necessary by the department;

(4) not less than 30 days after the owner or operator submits, in writing, the proposed date of testing to the department; and

(5) in a manner consistent with:

(A) procedures established by the department in approving test plans;

(B) 40 CFR Part 60, appendix A, reference method 5E, as in effect July, 1986, with the following stipulations:

(i) the sampling time for each test run being at least two hours and the volume of gas sampled being at least 90 dry standard cubic feet;

(ii) samples collected in the impingers shall be recovered as specified in "Container No. 5" in paragraph 4.2;

(iii) samples shall be analyzed as specified for "Container No. 5" in paragraph 4.3; and

(iv) the concentration of VOC shall be calculated as specified for "Cc" in paragraphs 6.1 and 6.2; and

(C) the reference methods of 40 CFR Part 60, appendix A, as in effect July 1, 1986, for the collection of data required during the testing procedure, as follows:

(i) reference method 1 for stack or duct gas sample and velocity traverses;

(ii) reference method 2 for stack or duct gas velocity and gas volumetric flow rate;

(iii) reference method 3 for stack or duct gas dry molecular weight; and

(iv) reference method 4 for stack or duct gas moisture content.

(e) In addition to the parameters required to be recorded in subsection (d), the owner or operator

shall concurrently record the following parameters relating to baseline operating conditions at each wool fiberglass manufacturing line:

(1) the product being produced;

(2) glass pull rate, weight per unit time;

(3) binder type;

(4) binder application rate, weight per unit time;

(5) line speed where applicable, length per unit time;

(6) trimmed mat width where applicable, length;

(7) mat weight where applicable, weight per unit area;

(8) loss on ignition as determined by ASTM Standard Test Method D-2584-68, "Ignition Loss of Cured Reinforced Resin," percent; and

(9) the operating parameters of any VOC emissions control devices at least once during each eight hour work shift, such as:

(A) electrostatic precipitator electrical data and inlet temperature;

(B) wet scrubbing device water flow rate, volume per unit time;

(C) wet scrubbing device pressure drop, pressure units; and

(10) other parameters determined by the department to be necessary to establish baseline conditions of the control system.

(f) The actual VOC emissions rate, to be used in determining compliance with the VOC emissions rate of subsection (b), shall be calculated as follows:

(1) The VOC emissions rate, R, from each wool fiberglass manufacturing line being determined using the VOC concentration, Cc, determined in subsection (d)(5)(B)(iv) and the volumetric flow rate, Q, as determined in subsection (d)(5)(C)(ii), using the following equation:

$$R = CcQ$$

where:

R = weight of VOC per unit time

Cc = weight of VOC per unit volume

Q = volumetric flow rate of gas stream at testing location, actual volume per unit time;

(2) for each two hour test run, the average glass pull rate, P, for each wool fiberglass manufacturing line shall be computed from at least three glass pull rates determined at intervals of at least 30 minutes during the test run. The individual glass pull rates shall be:

(A) computed according to the following equation:

$$P = \frac{LWM(100 - LOI)}{100}$$

where:

- P = glass pull rate, weight per unit time
- L = line speed, length per unit time
- W = trimmed mat width, length
- M = mat weight, weight per unit area
- LOI = loss on ignition, percent, as determined by ASTM Standard Test Method D-2584-68, "Ignition Loss of Cured Reinforced Resins," as in effect 1979; or

(B) determined by measurements of the glass flowing from the rotary spinning process; and

(3) the emissions level, E, for purposes of determining compliance with subsection (b), being computed using the following equation:

$$E = \frac{R}{P}$$

where:

- E = emissions level, weight of VOC emissions per unit weight of product, converted to units of the emissions standard in subsection (b)
- R = emissions rate, from subsection (f)(1)
- P = average glass pull rate, from subsection (f)(2).

(g) The owner or operator of each wool fiberglass manufacturing line subject to this regulation shall keep and maintain at the facility, and make available for inspection by a department representative, records needed to determine continuous compliance of the plant with this regulation. The owner or operator shall keep the records in a form suitable for inspection and shall maintain them at the facility for two years following the date of record. The owner or operator shall maintain a record of the production parameters listed in subsection (e) and any other parameter the department may consider to be necessary to determine compliance with this regulation.

(h) The provisions of this regulation shall be applicable only to affected facilities in areas which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of Section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1987;

amended, T-88-55, Dec. 16, 1987; amended May 1, 1988.)

28-19-75. This revocation shall be effective on and after September 1, 2002. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1987; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; revoked Sept. 1, 2002.)

28-19-76. Lithography printing operations. (a) The provisions of this regulation shall apply to all offset lithography printing facilities with a potential contaminant emission rate of volatile organic compounds (VOC) equal to or more than 100 tons per year. The potential contaminant emission rate calculations may include federally enforceable permit conditions.

(b) The provisions of this regulation do not apply to:

- (1) printing on fabric, metal or plastic;
- (2) sheet fed lithographic presses with cylinder widths of 26 inches or less; or
- (3) web lithographic presses with cylinder widths of 18 inches or less.

(c) Any owner or operator of an offset lithographic printing press subject to this regulation and employing fountain solution (the solution applied to the image plate to maintain the hydrophilic properties of the non-image areas) containing VOC shall not operate, or cause or allow the operation of, such process unless:

- (1) the fountain solution shall continuously contain 10 percent by weight or less of alcohol. For purposes of this regulation, alcohol is defined as isopropanol or isopropyl alcohol;
- (2) the fountain solution is refrigerated to a temperature of 55 degrees Fahrenheit or less for alcohol based solutions;

(3) the fountain temperature at the mixing tank is capable of being determined continuously and of being recorded once per shift;

(4) the fountain solution mixing tanks are covered.

(d) Any owner or operator of an offset lithographic printing facility subject to this regulation and employing cleanup solvents containing VOC shall not operate, or cause or allow the operation of, such process unless:

(1) the cleanup solvents are kept in tightly covered tanks or containers during transport and storage; and

(2) cleaning rags used in conjunction with the cleanup solvents are placed, when not in use, in

tightly closed containers and collected for proper disposal or recycling.

(e) Any owner or operator of a heatset web-offset lithographic printing press subject to this regulation with an actual emission rate of greater than or equal to 10 tons per year of VOC and employing a dryer shall not operate or cause or allow the operation of such press unless 100 percent of the dryer exhaust is ducted to a control device which achieves 85 percent by weight or greater control efficiency for VOC's as determined by 40 CFR Part 60, Appendix A, reference method 25 or reference method 25A, as in effect July 1, 1989.

(1) The owner or operator shall keep and maintain at the facility, and make available to inspection by a department representative, records for each heatset web-offset lithographic printing press sufficient to demonstrate that control efficiency is maintained.

(2) Use of emission control equipment shall require that continuous monitors be installed, calibrated, operated and maintained. The monitors shall continuously measure the following parameters:

(A) with an accuracy of the greater of ± 0.75 percent of the temperature being measured expressed in degrees Celsius, or 2.5 degrees Celsius, the exhaust gas temperature of all VOC destruction devices and the gas temperature immediately upstream and downstream of any catalyst bed; or

(B) with an accuracy of ± 2.00 percent of the amount being monitored, the cumulative amount of VOC recovered during a calendar month for all VOC recovery equipment; and

(C) any other parameters considered necessary by the department to verify proper operation of emission control equipment.

(f) For purposes of compliance:

(1) The owner or operator of a facility which is subject to the provisions of this regulation shall provide to the department for approval a demonstration of compliance with subsections (c), (d) and (e) of this regulation:

(A) upon alteration of an existing source or upon commencement of operation of an emission source which is not in existence and operating on the effective date of this regulation and at any time thereafter if requested by the department; or

(B) within 18 months after the effective date of this regulation for all other facilities and at any time thereafter if requested by the department, except that sheet-fed lithographic presses with cylinder widths of 60 inches or more which are in existence

and operating on the effective date of this regulation shall have 36 months after the effective date of this regulation to provide, for the approval of the department, a demonstration of compliance with subsection (c)(1) of this regulation.

(2) If the demonstration of compliance will not be conducted within 12 months after an existing facility becomes subject to this regulation, a final control plan shall be submitted to the secretary by December 31, 1991 for approval. This plan shall include the following:

(A) a detailed plan for process modification; and

(B) a time schedule for compliance containing increments of progress and a final compliance date.

(g) The owner or operator of a facility subject to this regulation shall keep and maintain at the facility, and make available to inspection by a department representative, records sufficient to determine continuous compliance with this regulation. The records shall include the following information and shall be kept at the facility for two years following the date of record:

(1) properties of inks (determined by the manufacturer's formulation data) as applied, density in pounds per gallon, and total volatile content in weight percent;

(2) quantity of inks as applied to substrate in pounds on a monthly basis;

(3) quantity of alcohol added to the fountain solution of each regulated press in pounds each month;

(4) percent by weight of alcohol in fountain solution as monitored on a once per shift basis using a calibrated hydrometer, refractometer or other approved testing device;

(5) quantity of cleanup solvents used on a monthly basis;

(6) quantity of coatings used on a monthly basis and percent VOC in coating by weight on a formulation basis;

(7) results of any testing conducted on an emission unit at a regulated facility;

(8) maintenance records of any air pollution control equipment;

(9) maintenance records of any continuous air pollution monitoring equipment;

(10) the temperature of the fountain solution as recorded on a once per shift basis; and

(11) records as required by the department.

(h) For the purpose of calculating facility-wide VOC emissions the following factors may be taken into consideration unless an alternative method is

approved by the department. The facility may assume that:

(1) when properly disposing of used solvent laden rags, 50 percent of the solvent used for cleanup is retained in the rag, if the facility demonstrates, to the satisfaction of the department, that the solvents are not evaporated into the air during the waste-rag disposal process;

(2) 40 percent of the heatset ink oils stay in the paper web (substrate printed in a continuous rolled printing process);

(3) no VOC's are emitted from the inks used in sheet fed presses and non-heatset web presses; and

(4) 50 percent of the solvent from the fountain solution of a heatset web-offset lithographic printing press is emitted from the dryer.

(i) The provisions of this regulation shall be applicable only to offset lithography printing facilities located in areas which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of the federal clean air act, 42 U.S.C. 7407, as promulgated at 40 CFR Part 81, as in effect July 1, 1989. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3010; effective Oct. 7, 1991.)

28-19-77. Chemical processing facilities that operate alcohol plants or liquid detergent plants. (a) The provisions of this regulation shall apply to any facility that:

(1) Uses, produces, or stores ethanol or methanol;

(2) has a volatile organic compound (VOC) potential contaminant emission rate of 100 tons per year or greater;

(3) is located in an area which has been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81, as in effect July 1, 1989.

(b) For purposes of this regulation, the potential contaminant emission rate shall be determined as the sum of all potential VOC emissions from point and fugitive sources, including any VOC's present in the wastewater stream, 100 percent of which are presumed to be emitted to the atmosphere.

(c) VOC emission sources are:

(1) Point sources, which include process tanks, alcohol storage tanks, wastewater vents, and wastewater VOC removal devices; and

(2) fugitive sources, which include all sources of

VOC emissions other than point sources, including leaking valves, compressors, pumps, gauges, open-ended lines, sample flanges, and other sources of fugitive emissions including alcohol loading and unloading operations.

(d) The owner or operator of an affected facility shall control VOC emissions from process tanks and alcohol storage tanks by installing and operating the following, singly or in combination:

(1) Retrofitting the tanks with an internal or external floating roof. Internal and external floating roof tanks shall be designed and constructed to meet or exceed the design specifications found at 40 CFR Part 60, Subpart Kb, as in effect July 1, 1989; or

(2) retrofitting the tanks with a vapor collection system and control device to reduce VOC emissions by 95 percent, by weight or greater. Vapor collection systems and control devices installed pursuant to this regulation shall be operated at all times when emissions may be vented to them.

(e) The owner or operator of an affected facility shall reduce the VOC concentration in process wastewater by 90 percent by weight or greater, less any credit for VOC reductions achieved through pollution prevention, by:

(1) installing a wastewater VOC recovery device or devices to remove and capture VOC's contained in process wastewater streams for recovery or destruction using a control device pursuant to subsection (f); or

(2) taking credit for preventing VOC's from entering the wastewater stream through pollution prevention actions such as equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training, or inventory control.

(f) The owner or operator of an affected facility shall control VOC emissions from wastewater point sources by installing and operating a device or devices to collect and recover or destroy VOC's from wastewater point sources to reduce VOC emissions by 95 percent, by weight, or greater. For treatment purposes, emissions from wastewater point sources may be combined, in a common vapor collection system or systems, with emissions collected from process tanks and alcohol storage tanks to achieve 95 percent reduction of VOC's by weight, or greater.

(g) The owner or operator of an affected facility shall minimize VOC emissions from fugitive

sources by developing a fugitive source emission control plan which shall be submitted to the department within 12 months after the effective date of this regulation or upon commencing operation of the affected facility, whichever is later.

(1) The plan shall include a description of the control strategy and a testing program to evaluate the percent reduction of VOC emissions.

(2) The approved control strategy and testing program shall be implemented and the results of testing submitted to the department within six months of the department's approval of the plan.

(3) The fugitive source emission control plan shall be designed to achieve at least 50 percent control efficiency.

(h) During compliance demonstrations under subsections (d), (e), or (f):

(1) The averaging time for percent reduction requirements for gaseous VOC streams shall be the duration of the 40 CFR Part 60, Appendix A, reference method 25, performance test, as in effect July 1, 1989. Control equipment parameters, measured by continuous monitoring devices, shall indicate whether control equipment is properly operated and maintained; and

(2) the averaging time for percent reduction requirements for process wastewater streams shall be daily, confirmed by at least one daily sample of the process wastewater stream at both the inlet and outlet of the control device.

(i) No later than eighteen months after the effective date of this regulation or within 180 days of completion of control equipment installation, whichever date occurs first, the owner or operator of an affected facility shall conduct performance tests to demonstrate compliance with the applicable VOC control requirements found in subsections (d), (e), (f) and (g). If the performance test will not be conducted within 12 months after an existing facility becomes subject to this regulation, a final control plan shall be submitted to the secretary by December 31, 1991 for approval. This plan shall include the following:

(1) a detailed plan for process modifications; and

(2) a time schedule for compliance containing increments of progress and a final compliance date.

(j) The owner or operator of an affected facility shall conduct performance tests to demonstrate compliance with the applicable percent reduction requirements found in subsections (d) and (f) in accordance with 40 CFR Part 60, Appendix A, ref-

erence method 25 or reference method 25A, as in effect July 1, 1989, and other applicable approved EPA reference methods for gaseous streams and demonstrate compliance with the applicable percent reduction requirement found in subsection (e) by methods approved by the department for process wastewater streams. All monitoring equipment shall be installed and calibrated prior to commencement of performance tests.

(k) The owner or operator of an affected facility shall conduct an initial performance evaluation for all tanks retrofitted with an internal or external floating roof in accordance with the testing requirements found at 40 CFR 60.113b, as in effect on July 1, 1989.

(l) The owner or operator of an affected facility which addresses VOC reduction:

(1) By means of a thermal incinerator shall install, operate, maintain and calibrate a monitoring device to continuously measure and record the temperature in the firebox, accurate to within ± 1.0 percent of the temperature being measured or ± 2.5 degrees Celsius, whichever is greater;

(2) by means of a catalytic incinerator shall install, operate, maintain and calibrate a monitoring device to continuously measure and record the exhaust gas temperature immediately before and after the catalyst bed, accurate to within ± 1.0 percent of the temperature being measured or ± 2.5 degrees Celsius, whichever is greater;

(3) by means of an absorber shall install, operate, maintain and calibrate a monitoring device to continuously measure and record the scrubbing liquid temperature and specific gravity (or other parameter approved by the department to measure absorbing liquid saturation);

(4) by means of a condenser shall install, operate, maintain and calibrate a monitoring device to continuously measure and record the product side temperature, accurate to within ± 1.0 percent of the temperature being measured or ± 0.5 degrees Celsius, whichever is greater;

(5) by means of a carbon adsorption unit shall install, operate, maintain and calibrate a monitoring device to continuously measure and record the carbon bed temperature and integrated stream flow;

(6) by means of retrofitting any tank with an internal or external floating roof shall implement a visual inspection and repair program consistent with 40 CFR 60.113b;

(7) of process wastewater shall, at least once daily, collect water samples simultaneously, at the in-

let and outlet of the control device, and determine the VOC concentration in the samples. Percent reduction shall be determined as the difference between the inlet and outlet concentration divided by the inlet concentration; and

(8) by any means, including those specified in this subsection, shall measure any parameters and implement any programs which the department has notified the affected facility are necessary to verify proper operation of the emission control equipment.

(m) For the purpose of subsection (l), any monitoring required to be conducted continuously shall, at the minimum, require the monitoring system to measure the required parameter at 15 minute intervals and record the average of the measurements at least once per hour, with at least one hourly average recorded for each hour the process is operated.

(1) Monitoring equipment shall be operated during all periods, except when the VOC-generating process is completely shut down and the VOC concentration to the control device is zero.

(2) All monitoring equipment shall be installed and operated in accordance with the manufacturer's written specifications.

(n) The owner or operator of an affected facility shall maintain the following records, in a form suitable for inspection, for a minimum of two years from the date of generation:

(1) all measurements, including continuous monitoring system, monitoring device, and performance testing measurements;

(2) all continuous emission monitoring system performance evaluations;

(3) all continuous emission monitoring or monitoring device calibration checks, and adjustments and maintenance performed on these systems or devices; and

(4) any other information considered necessary by the department to verify proper operation and maintenance of emission control equipment.

(o) The owner or operator of an affected facility shall comply with the following reporting requirements:

(1) The owner or operator of any existing facility shall notify the department of the date installation of control equipment is completed. The notification shall be postmarked no later than 15 days after completion of installation.

(2) The owner or operator shall notify the department of the anticipated test dates at least 30 days,

but not more than 60 days, prior to commencement of the compliance demonstration tests.

(3) The owner or operator shall submit a copy of all performance test results within 30 days of completion of any tests. Test results shall include a summary of all monitored control equipment parameters measured during the performance evaluation. (Authorized by K.S.A. 65-3006; implementing K.S.A. 65-3010; effective Oct. 7, 1991.)

28-19-78. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3010; effective Oct. 7, 1991; revoked March 21, 1994.)

28-19-79. (Authorized by K.S.A. 1995 Supp. 65-3005; implementing K.S.A. 65-3010; effective May 2, 1997; revoked April 27, 2001.)

SOURCE MONITORING FEES

28-19-80. Power generation facility monitoring programs. (a) On or before December 31 of each year, the owner or operator of a power generation facility who, for the purpose of consideration under the provisions of K.A.R. 28-19-81, proposes to conduct any air quality or radiological environmental impact monitoring of the facility shall submit to the department of health and environment a report describing the activities proposed for the 12 month period commencing on July 1 of the following year. The report shall include, at a minimum, the following information:

(1) The types of samples to be collected;

(2) the method of collecting the samples;

(3) the types of analyses to be conducted on the samples;

(4) the number and location of the sampling sites; and

(5) the sampling schedule.

(b) Upon receipt of the report required under subsection (a) of this regulation, the Department shall require that all data obtained as the result of the monitoring activities be submitted, in writing, to the Department, in accordance with a schedule prescribed by the Department and provided to the plant owner or operator.

(c) All data required to be reported in accordance with subsection (b) of this regulation shall be subject to quality review and evaluation by the Department. Pursuant to the conduct of this quality review and evaluation, the Department may require the owner or operator of the facility to provide additional information and conduct any

additional instrumentation and analytical checks that are necessary to verify the data. (Authorized by and implementing K.S.A. 65-3022; effective, T-83-11, June 9, 1982; effective May 1, 1983.)

28-19-81. Environmental impact monitoring. (a) On or before April 1 of each year, the department of health and environment shall notify the owner or operator of each power generation facility of any environmental impact monitoring activities that the Department proposes to conduct at the facility during the 12 month period commencing on July 1 of that year. This proposal shall include the information required to be reported under the provisions of K.A.R. 28-19-80 (a) and shall reflect consideration of any proposals received by the Department under the provisions of that regulation.

(b) At the time of giving notice, as required by subsection (a) of this regulation, the Department also shall notify the owner or operator of the facility of the fee to be collected for determining and monitoring the environmental impact of the power generation facility, including any quality review and evaluation of monitoring proposed to be conducted by the owner or operator of the facility. The fee shall be computed in accordance with K.A.R. 28-19-82 on the basis of reasonable estimates of costs of the department of health and environment for the conduct of these activities during the proposed 12 month monitoring period.

(c) If, upon receipt of the notices provided for in subsections (a) and (b) of this regulation, the owner or operator of a facility who has submitted a monitoring program proposal in accordance with the provisions of subsection (a) of K.A.R. 28-19-80 believes the monitoring activities to be conducted represent an avoidable duplication of effort and expense, the owner or operator may request that the Department modify the monitoring activities to be conducted. The request shall be submitted, in writing, within 30 days of the receipt of the notices and shall identify the basis upon which duplication is alleged.

(d) Upon receipt of the notices provided for in subsections (a) and (b) of this regulation the owner or operator of a facility who has not submitted a monitoring proposal in accordance with the provisions of subsection (a) of K.A.R. 28-19-80 may submit a monitoring proposal providing the information required by that regulation and additional information indicating the proposed date by which this plan is to be fully placed into effect.

This plan shall be submitted to the Department in writing not later than 30 days after receipt of the notices. Any facility owner or operator submitting a plan in accordance with this subsection may request that the Department consider this plan and modify the proposals provided under the provisions of subsection (a) of this regulation in order to avoid any specifically identified duplication of effort and expense between monitoring activities proposed to be carried out by the Department and those proposed to be carried out under the plan. This request shall be in writing and shall be submitted with the plan.

(e) Within 30 days of receipt of a request as provided for by subsections (c) or (d), the Department shall review the request and make a final determination of the monitoring activities that it will conduct at the facility. When possible these activities shall avoid duplication of effort and expense between activities approved to be carried out by the owner or operator of the facility and those to be carried out by the Department. The Department shall notify the owner or operator of the facility, in writing, of that determination and the basis upon which it was made. If the monitoring activities to be conducted at the facility by the Department are modified due to the request, the Department shall recompute the monitoring fee and notify the owner or operator of the new fee.

(f) All fee remittances shall be made payable to the state of Kansas, power generating facility fee fund, and shall be paid annually on or before July 1.

(g) The department of health and environment shall prepare a report that describes the nature and findings of each environmental impact monitoring activity that has been conducted at any power generation facility under the provisions of this regulation. This report shall be provided for each 12 month monitoring period proposed under the provisions of subsection (a) of this regulation. A copy of this report shall be sent to the owner or operator of these facilities not more than 120 days after the end of the monitoring period.

(h) The department of health and environment shall prepare a final fiscal report that computes its actual costs for each power generating facility environmental impact monitoring activity conducted under the provisions of this regulation. This report shall cover the 12 month period reported under subsection (g) of this regulation. A copy of this report shall be sent to the owner or operator of each monitored facility at the same time that the report required by subsection (g) is sent.

(i) The department of health and environment shall determine an adjusted fee to be applicable to each facility for which environmental impact monitoring activities have been conducted. This fee shall be calculated in accordance with the provisions of K.A.R. 28-19-82 using the cost figures included in the reports required by subsection (h) of this regulation. This adjusted fee shall be compared with the fee originally paid by the owner or operator for the same period under the provisions of subsection (f). If the Department finds that the adjusted fee is more than the fee originally paid by the source owner or operator, it shall:

(1) add the difference between the adjusted fee and the original fee that is established under subsections (b) or (e) to the next annual fee for the facility, or any other facility owned or operated by the same person; or

(2) if no new monitoring fees are proposed for those facilities by the following April 1, the Department shall subsequently provide the owner or operator with written notice that an additional fee equal to this difference is to be paid by the following July 1. If the Department finds that the adjusted fee is less than the original fee paid, it shall deduct the difference between the adjusted fee and the original fee from the next annual fee that is established under subsections (b) and (e) for the facility, or any other facility owned or operated by the same person. The source owner or operator shall pay any fee determined in accordance with this subsection in the manner prescribed by subsection (f). (Authorized by and implementing K.S.A. 65-3022; effective, T-83-11, June 9, 1982; effective May 1, 1983.)

28-19-82. Fee determination basis. (a) The fee to be collected for determining and monitoring the environmental impact of a power generation facility during any 12 month period included under the provisions of K.A.R. 28-19-81(a) shall be determined upon the basis of the type of fuel used to power the facility and the generating design capacity of the facility. The maximum fee for any facility powered by coal or nuclear energy shall be based on the following formula:

$$\text{Impact Monitoring Fee} = \frac{\text{G.M.} \times \text{C.M.}_y}{\text{T.G.M.}_y} + \frac{\text{G.Q.R.} \times \text{C.Q.R.}_y}{\text{T.G.Q.R.}_y}$$

When using the formula, the following values shall be used:

1. G.M. = the generating design capacity for that particular facility which is monitored with sampling equipment operated by the department of health and environment;

2. T.G.M._y = the sum of the generating design capacities for all facilities in the state powered by the same type of fuel that are monitored with identical sampling equipment operated by the department of health and environment during the same 12 month period;

3. C.M._y = the sum of all of the costs of the department of health and environment during the same 12 month period for operating identical sampling equipment at each power generation facility powered by the same type of fuel;

4. G.Q.R. = the generating design capacity for that particular facility where monitoring activities conducted by the owner or operator are subject to quality review and evaluation by the department of health and environment;

5. T.G.Q.R._y = the sum of the generating design capacities for all facilities in the state powered by the same type of fuel where monitoring activities conducted by the owner or operator are subject to identical quality review and evaluation by the department of health and environment during the same 12 month period; and

6. C.Q.R._y = the sum of the costs of the department of health and environment during the same 12 month period for providing identical quality review and evaluation of monitoring activities conducted by the owner or operator at each power generation facility powered by the same type of fuel. (Authorized by and implementing K.S.A. 65-3022; effective, T-83-11, June 9, 1982; effective May 1, 1983.)

28-19-83. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; revoked May 10, 1996.)

28-19-84. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1988; revoked May 10, 1996.)

NEW SOURCE PERFORMANCE STANDARDS

28-19-85. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1988; revoked May 10, 1996.)

28-19-86. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-87 to 28-19-95. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 10, 1996.)

tive May 1, 1983; amended May 1, 1986; amended May 1, 1988; revoked May 10, 1996.)

28-19-96. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-97. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 1, 1986.)

28-19-98. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-98a. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-99 to 28-19-103. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-104 to 28-19-108. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-108a. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1988; revoked May 10, 1996.)

28-19-109. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-119 to 28-19-121a. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-123 to 28-19-125. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-127 to 28-19-131. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-133 to 28-19-141. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-149. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

**EMISSION STANDARDS
FOR HAZARDOUS AIR POLLUTANTS**

28-19-150 to 28-19-151. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-152. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 10, 1996.)

28-19-153 to 28-19-154. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-155. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1988; revoked May 10, 1996.)

28-19-156. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 10, 1996.)

28-19-157. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 10, 1996.)

28-19-158. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1988; revoked May 10, 1996.)

28-19-159. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; amended May 1, 1987; amended May 1, 1988; revoked May 10, 1996.)

28-19-160 to 28-19-162. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective May 1, 1983; revoked May 10, 1996.)

GENERAL REQUIREMENTS

28-19-200. General provisions; definitions. All terms and abbreviations used in the

Kansas air quality regulations shall have the following meanings, unless otherwise defined in an individual regulation or unless the context clearly requires otherwise.

(a) "Affected facility" or "facility" means any building, structure, machine, equipment, device, or installation, or combination thereof, to which an emissions limitation or standard applies.

(b) "Affected source" means a stationary source that includes one or more affected units subject to emission reduction requirements or limitations under title IV of the federal clean air act, 42 U.S.C. §7401 et seq., "acid deposition control."

(c) "Affected state" means any state:

(1) that is contiguous with Kansas and whose air quality may be affected by emissions from a stationary source or proposed stationary source in Kansas; or

(2) that is within 50 miles of a permitted stationary source located in Kansas.

(d) "Agricultural-related activity."

(1) "Agricultural-related activity" means processes used in the production of any of the following:

(A) popcorn that is packaged but not popped;

(B) ornamental floriculture and nursery products;

(C) shortening, table oils, and margarine;

(D) prepared feeds and feed ingredients for animals and fowl;

(E) molasses that is mixed or blended;

(F) cotton ginnings; and

(G) flour and other grain mill products.

(2) "Agricultural-related activity" also means sunflower oil reclaiming, seed cleaning, and operations related to alfalfa dehydrators, sun-cured alfalfa plants, soybean oil mills, and grain elevators.

(e) "Applicable requirement," for purposes of class I operating permits, means any of the following:

(1) the standards or other requirements that are part of the approved state implementation plan or part of any applicable federally promulgated implementation plan;

(2) any term or condition of a construction permit issued pursuant to:

(A) K.A.R. 28-19-16 through 16m, and amendments thereto, nonattainment area requirements;

(B) K.A.R. 28-19-17 through 17q, and amendments thereto, prevention of significant deterioration requirements;

(C) part C of title I of the federal clean air act by the USEPA; or

(D) K.A.R. 28-19-300, or its predecessor, K.A.R. 28-19-14;

(3) any standard or other requirement promulgated under 42 U.S.C. §7411 of the federal clean air act, "standards of performance for new stationary sources," including 42 U.S.C. §7411(d);

(4) any standard or other requirement promulgated under 42 U.S.C. §7412 of the federal clean air act, "hazardous air pollutants," including any requirement concerning accident prevention under 42 U.S.C. §7412(r)(7);

(5) any standard or other requirement of the acid rain program under title IV of the federal clean air act, "acid deposition control," or regulations promulgated thereunder;

(6) any requirement established pursuant to 42 U.S.C. §7661c(b) of the federal clean air act, "permit requirements and conditions, monitoring and analysis," or 7414(a)(3) of the federal clean air act, regarding inspections, monitoring and entry, enhanced monitoring, and compliance certification;

(7) any standard or other requirement governing solid waste incineration under 42 U.S.C. §7429 of the federal clean air act, "solid waste combustion";

(8) any standard or other requirement for consumer and commercial products under 42 U.S.C. §7511b of the federal clean air act, "federal ozone measures," subsection (e) "control of emissions from certain sources";

(9) any standard or other requirement for tank vessels under 42 U.S.C. §7511b(f) of the federal clean air act, "federal ozone measures," subsection (f) "tank vessel standards";

(10) any standard or other requirement of the regulations promulgated to protect stratospheric ozone under title VI of the federal clean air act, "stratospheric ozone protection," unless the USEPA has determined that such requirements need not be contained in a class I operating permit; and

(11) any national ambient air quality standard or increment or visibility requirement under part C, "prevention of significant deterioration of air quality," of title I of the federal clean air act, but only as it would apply to temporary sources permitted pursuant to requirements adopted to enable the department to administer a program developed to implement the provisions of 42 U.S.C. §7661c, "permit requirements and conditions," subsection (e), "temporary sources," of the federal clean air act.

(f) “Application” or “application form” means the application form and all supporting documentation, unless the context clearly indicates otherwise.

(g) “Area source” means a stationary source of hazardous air pollutants that is not a major source.

(h) “ASTM” means the American society for testing and materials.

(i) “Begin actual construction” means the initiation of physical on-site construction activities on an emissions unit that are of a permanent nature. These activities include, but shall not be limited to, installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures. With respect to a change in method of operation, this term refers to those on-site activities other than preparatory activities that mark the initiation of the change.

(j) “Building, structure, facility, or installation” means all of the air pollutant emitting activities that belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person or persons under common control. Air pollutant emitting activities shall be considered as part of the same industrial grouping if they have the same two-digit code as described in the “standard industrial classification manual 1987,” as published by the U.S. governing printing office, as adopted at K.A.R. 28-19-301(f)(2).

(k) “Calendar quarter” means January through March, April through June, July through September, or October through December of any calendar year.

(l) “Capture efficiency” (CE) means the amount of an air contaminant emitted from an emissions unit and directed to an air emissions control device (ce), divided by the total emissions of the air contaminant from the emissions unit (te), and expressed as a two-decimal number between 0.00 and 1.00. ($CE = ce/te$)

(m) “Class I or class II substance” means a substance subject to a standard promulgated under or established by title VI of the federal clean air act, “stratospheric ozone protection,” 42 U.S.C. § 7401 et seq.

(n) “Class I, II or III area” means a classification assigned to any area of the state under the provisions of 42 U.S.C. § 7472 and § 7474 of the federal clean air act.

(o) “Commercial or medical waste incinerator” means any incinerator used to dispose of waste

from any commercial operation or used to dispose of any medical services waste as defined at K.A.R. 28-29-27.

(p) “Construction” means any physical change or change in the method of operation, including fabrication, erection, installation, demolition, or modification of an emissions unit.

(q) “Control device” means any equipment, device, or other article that is designed, installed, or both, for the purpose of reducing or preventing the discharge of contaminant emissions to the air.

(r) “Control device efficiency (CDE)” means the amount of an air contaminant directed to an air emissions control device or devices (ce) minus the emissions of the air contaminant emitted from the air emissions control device or devices, or otherwise released into the atmosphere (re), divided by the amount of the air contaminant directed to the air emissions control device or devices (ce), expressed as a two-decimal number between 0.00 and 1.00. ($CDE = (ce - re)/ce$)

(s) “De minimis emissions” means air emissions of hazardous air pollutants for which no applicable requirements exist.

(t) “Department” means the Kansas department of health and environment or an authorized representative of the department.

(u) “Direct heating equipment” means any device in which fuel is burned in direct contact with, and for the purpose of heating, air that comes in direct contact with the material being processed.

(v) “Director” means the secretary of health and environment or a designated representative of the secretary.

(w) “Emission limitation and standard” means a requirement established pursuant to the Kansas air quality regulations.

(x) “Emission source” means any machine, equipment, device, or other article or operation that directly or indirectly releases contaminants into the outdoor atmosphere.

(y) “Emission unit” means any part or activity of a stationary source that emits or would have the potential-to-emit any regulated pollutant or any pollutant listed under 42 U.S.C. § 7412(b) of the federal clean air act.

(z) “Existing” means that a processing machine, equipment, device, or other article, or any combination of the above, or any indirect heating equipment or incinerator is completed, under construction, or under purchase contract on the effective date of any applicable regulation.

(aa) "Existing facility" means a facility that is completed, under construction, or under purchase contract at the time an emission limitation or standard becomes applicable to such facilities.

(bb) "Facility" or "affected facility" means any building, structure, machine, equipment, device, or installation, or combination thereof, to which an emissions limitation or standard applies.

(cc) "Federal clean air act" means 42 U.S.C. §7401 et seq., as in effect on January 15, 1996.

(dd) "Federally designated fugitive emissions source" means any of the following:

- (1) coal cleaning plants, with thermal dryers;
- (2) kraft pulp mills;
- (3) portland cement plants;
- (4) primary zinc smelters;
- (5) iron and steel mills;
- (6) primary aluminum ore reduction plants;
- (7) primary copper smelters;
- (8) municipal incinerators capable of charging more than 250 tons of refuse per day;
- (9) hydrofluoric, sulfuric, or nitric acid plants;
- (10) petroleum refineries;
- (11) lime plants;
- (12) phosphate rock processing plants;
- (13) coke oven batteries;
- (14) sulfur recovery plants;
- (15) carbon black plants that use a furnace process;

- (16) primary lead smelters;
- (17) fuel conversion plants;
- (18) sintering plants;
- (19) secondary metal production plants;
- (20) chemical process plants;
- (21) fossil-fuel boilers, or a combination thereof, totaling more than 250 million British thermal units per hour heat input;
- (22) petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;
- (23) taconite ore processing plants;
- (24) glass fiber processing plants;
- (25) charcoal production plants;
- (26) fossil fuel-fired steam electric plants of more than 250 million British thermal units per hour heat input; or

(27) any other stationary source categories regulated by a standard promulgated as of August 7, 1980, under 42 U.S.C. §7411, "new source performance standards," or 42 U.S.C. §7412, "hazardous air pollutants," of the federal clean air act, but only with respect to those air pollutants that have been regulated for that category.

(ee) "Federally enforceable" means:

(1) all limitations and conditions that are enforceable by the administrator of the U.S. environmental protection agency;

(2) requirements of regulations included in the federally approved state implementation plan; and

(3) any permit requirements established pursuant to these requirements.

(ff) "Fugitive emissions" means those emissions that directly result from operation of an emissions unit or stationary source but that could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(gg) "Hazardous air pollutant" shall have the meaning as defined in K.A.R. 28-19-201(a).

(hh) "Incinerator" means any device or structure used for the destruction or volume reduction of garbage, rubbish, or other liquid or solid waste materials, by combustion, for the purpose of disposal or salvage.

(ii) "Indirect heating equipment" means any device in which fuel is burned to produce heat, which heat is transferred through a heat-conducting materials barrier or by a heat storage medium to a material that is to be heated so that the material being heated is not contacted by, and adds no substance to, the products of combustion.

(jj) "Kansas air quality regulations" means those regulations at article 28-19 of the Kansas administrative regulations, as adopted by the secretary pursuant to K.S.A. 65-3001 et seq., and amendments thereto.

(kk) "Major source" means any stationary source, or any group of stationary sources that are located on one or more contiguous or adjacent properties and are under common control of the same person, or persons who are under common control, belonging to a single major industrial grouping and that are described in paragraphs (1), (2), (3) or (4) of this subsection. For the purposes of defining "major source," a stationary source or group of stationary sources shall be considered part of a single industrial grouping if all of the pollutant-emitting activities at such source or group of sources on contiguous or adjacent properties belong to the same major group with the same two-digit code as described in the "standard industrial classification manual, 1987."

(1) For pollutants other than radionuclides, major source shall include any stationary source or group of stationary sources located within a contiguous area and under common control that emits or has the potential-to-emit, in the aggregate, 10

tons per year or more of any hazardous air pollutant, 25 tpy or more of any combination of such hazardous air pollutants, or such lesser quantity as the secretary may establish by rule. Notwithstanding the preceding sentence, emissions from any oil or gas exploration or production well, with its associated equipment, and emissions from any pipeline compressor station or pump station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources.

(2) For radionuclides, major source shall have the meaning specified by the secretary by regulation.

(3) Major source shall include a major stationary source of air pollutants, as defined in 42 U.S.C. §7602 of the federal clean air act, that directly emits or has the potential-to-emit 100 tons per year or more of any air pollutant, including any major source of fugitive emissions of any such pollutant from a federally designated fugitive emissions source. The fugitive emissions of a stationary source shall not be considered in determining whether or not it is a major stationary source, unless the source is a federally designated fugitive emissions source.

(4) Major source shall include a major stationary source as defined in part D of title I of the federal clean air act.

(ll) "Modified open burning operation" means an open burning operation in which the contaminants emitted to the ambient air as a result of combustion are reduced, controlled, or both, through positive regulation of fuel-to-air ratios, air screens, or other control techniques. Combustion devices used solely for the purpose of disposing of flammable gases shall not be considered to be modified open burning operations.

(mm) "Municipal solid waste landfill" or "MSW landfill" means an entire disposal facility in a contiguous geographical space where household waste is placed in or on land. An MSW landfill may also receive other types of wastes regulated pursuant to subtitle D of the resource conservation and recovery act (RCRA), 42 U.S.C. §6901, et seq., such as commercial solid waste, nonhazardous sludge, conditionally exempt small quantity generator waste, and industrial solid waste. Portions of an MSW landfill may be separated by access roads. An MSW landfill may be publicly or privately owned. An MSW landfill may be a new MSW landfill, an existing MSW landfill, or a lateral expansion.

(nn) "National ambient air quality standard," "national primary ambient air quality standard" and "national secondary ambient air quality standard" mean those standards promulgated at 40 CFR Part 50, revised as of July 1, 1995, which are adopted by reference.

(oo) "Official observer."

(1) "Official observer" means a designated representative of the department who has been certified by the department as being trained, and qualified on the basis of actual testing, to determine the degree of opacity of visible plumes by direct visual observation. The testing procedure shall be established and published by the department. Each certified individual shall be required to be re-tested at least once every six months to maintain certification.

(2) The term "official observer" shall also include a representative of the USEPA that has been properly certified pursuant to 40 CFR Part 60, appendix A, method 9.

(pp) "Opacity" means the degree to which a contaminant emission obscures an official observer's view of transmitted light passing through that contaminant. Zero percent opacity is perfect transparency and 100 percent opacity is impenetrable to light.

(qq) "Open burning operation" means the burning of any materials in which contaminants resulting from combustion are emitted directly into the ambient air without passing through a stack or chimney from an enclosed chamber. A chamber shall be considered enclosed when only those apertures, ducts, stacks, flues or chimneys that are required to supply combustion air and to permit the escape of exhaust gases are open during the combustion process.

(rr) "Organic material" means a chemical compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.

(ss) "Owner or operator" means any person who owns, leases, operates, controls, or supervises an affected facility, emissions unit, or stationary source subject to any standard or requirement of the Kansas air quality act, K.S.A. 65-3001 et seq., or any rule and regulation promulgated thereunder.

(tt) "Particulate matter" means any airborne finely divided solid or liquid material, except uncombined water, including PM10.

(uu) "Person" means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, politi-

cal subdivision of this state, any other state or political subdivision or agency thereof, or any legal successor, representative, agent, or agency of the foregoing.

(vv) "PM₁₀" or "PM₁₀" means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers, as measured by a reference method based on appendix J of 40 CFR, Part 50 and designated in accordance with 40 CFR §53.8, or by an equivalent method designated by the administrator of the U.S. environmental protection agency on or before the effective date of this regulation in accordance with 40 CFR §53.8, revised as of July 1, 1995. Appendix J of 40 CFR, Part 50 and 40 CFR §53.8, revised as of July 1, 1995 are adopted by reference.

(ww) "Portable source" means an emissions unit or stationary source that, due to the design of the emissions unit or stationary source, is capable of being moved from one location to another and that, except for storage purposes, remains at one location no longer than 180 days during any 365-day period, unless otherwise approved in writing by the department. A mobile source shall not be considered a portable source.

(xx) "Potential contaminant emission rate" means the total weight of a contaminant that is or, in the absence of control equipment, would be emitted from an air contaminant source when that source is operating at its maximum capacity. The potential contaminant emissions rate shall be determined by:

(1) sampling in a flue or duct prior to the inlet of any control device serving the flue or duct;

(2) estimating such emissions by performing a "material balance" calculation that indicates the difference between processing input weight and output weight of materials;

(3) using potential contaminant emission factors as recognized by the department; or

(4) using any other estimating technique mutually agreeable to the department and the person responsible for operation of the source.

(yy) "Potential-to-emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally en-

forceable. Secondary emissions shall not be considered in determining the potential-to-emit of a stationary source.

(zz) "Premises" means one or more contiguous or adjacent parcels of land and any structures or equipment located on the parcels under one ownership. For the purpose of this definition, a parcel of land that is bordering another parcel divided solely by a public roadway or a railroad right of way shall be considered to be adjacent.

(aaa) "Processing" means any operation related to the handling, storage, treatment, or conversion of input materials to produce a saleable or usable end product.

(bbb) "Regulated pollutant" means:

(1) nitrogen oxides or any volatile organic compounds;

(2) any pollutant for which a national ambient air quality standard has been promulgated;

(3) any pollutant that is subject to any standard promulgated under 42 U.S.C. §7411, "standards of performance for new stationary sources," of the federal clean air act;

(4) any class I or II substance subject to a standard promulgated under or established by title VI of the federal clean air act, "stratospheric ozone protection"; or

(5) any pollutant subject to a standard or other requirements promulgated or established under 42 U.S.C. §7412 of the federal clean air act, "hazardous air pollutants," including 42 U.S.C. §7412(g), (j), and (r), including the following:

(A) any pollutant subject to requirements under 42 U.S.C. §7412(j) of the federal clean air act. If the administrator of the USEPA fails to promulgate a standard by the date established pursuant to 42 U.S.C. §7412(e) of the federal clean air act, any pollutant for which a subject source would be major shall be considered to be regulated on the date 18 months after the applicable date established pursuant to 42 U.S.C. §7412(e) of the federal clean air act; and

(B) any pollutant for which the requirements of 42 U.S.C. §7412(g)(2) of the federal clean air act have been met, but only with respect to the individual source subject to 42 U.S.C. §7412(g)(2) requirement.

(ccc) "Responsible official" means one of the following:

(1) For a corporation, a president, secretary, treasurer or vice-president in charge of a principal business function, or any other person who performs similar policy or decision-making functions

for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to permit or other relevant regulatory requirement and if either:

(A) the facilities employ more than 250 persons or have gross annual sales or expenditures exceeding \$25 million, in second quarter, 1980 dollars; or

(B) the delegation of authority to such representative is approved in advance by the department;

(2) for a partnership or sole proprietorship, a general partner or the proprietor, respectively;

(3) for a municipality, or a state, federal, or other public agency, a principal executive officer or ranking elected official. For purposes of this definition, a principal executive officer of a federal agency shall include the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency; or

(4) for affected sources, the designated representative under title IV of the federal clean air act, "acid deposition control."

(ddd) "Secondary emissions" means emissions that would occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. Secondary emissions shall include emissions from any off-site support facility that would not be constructed or increase its emissions except as a result of the construction or operation of the major stationary source or major modification. Secondary emissions shall not include any emissions that come directly from a mobile source, such as emissions from the tailpipe of a motor vehicle, from a train, or from a vessel.

(eee) "Significant" means in reference to a net emissions increase or the potential of a source to emit any of the following pollutants, a rate of emissions that would equal or exceed any of the following rates:

(1) 100 tons per year of carbon monoxide;

(2) 40 tons per year of nitrogen oxides;

(3) 40 tons per year of sulfur dioxide;

(4) 25 tons per year of particulate matter emissions;

(5) 15 tons per year of PM10 emissions;

(6) 40 tons per year of volatile organic compounds for ozone; or

(7) 0.6 tons per year of lead.

(fff) "Smoke" means particulate matter emissions, resulting from incomplete combustion, that

consist primarily of carbon, ash, and other material and that form a visible plume in the ambient atmosphere.

(ggg) "Start-up" or "startup" means the setting in operation of a stationary source for any purpose.

(hhh) "State implementation plan" means any documents, including state or locally adopted regulations, submitted by a state to, and approved by, the U.S. environmental protection agency as required by the provisions of 42 U.S.C. §7410 of the federal clean air act, and any regulations promulgated by the administrator of the U.S. environmental protection agency pursuant to the provisions of that section.

(iii) "Stationary source" or "source" means any building, structure, facility, or installation that emits or may emit any air pollutant subject to any emission limitation or standard or that is required to obtain a permit pursuant to the Kansas air quality regulations.

(jjj) "Temporary" means, in relation to the emissions from a source, that the emissions will not occur at a particular location for a period of more than two years, unless a longer time is approved by the secretary or an authorized representative of the secretary.

(kkk) "Total suspended particulate" means particulate matter as measured by the method described in appendix B of 40 CFR Part 50, revised as of July 1, 1995, which is adopted by reference.

(lll) "USEPA" means the United States environmental protection agency, or its successor.

(mmm) "Volatile organic compounds (VOC)" shall have the meaning as defined in K.A.R. 28-19-201(b).

(nnn) "Waste" means garbage, refuse and other discarded materials including, but not limited to solids, semisolids, sludges, liquids and contained gaseous waste materials resulting from industrial, commercial, agricultural and domestic activities. The term "waste" shall not include hazardous wastes as defined in K.A.R. 28-31-3. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3005; effective Oct. 10, 1997.)

28-19-200a. General provisions; definitions to implement the federal greenhouse gas tailoring rule. (a) The definition of "major source," as adopted by reference in this regulation, shall supersede the definition of "major source" in K.A.R. 28-19-200 for the purposes of the following regulations:

(1) K.A.R. 28-19-500 through K.A.R. 28-19-502;
 (2) K.A.R. 28-19-510 through K.A.R. 28-19-518;

(3) K.A.R. 28-19-540 through K.A.R. 28-19-546; and

(4) K.A.R. 28-19-561 through K.A.R. 28-19-564.

(b) "Major source," as defined in 40 C.F.R. 70.2 and as revised on July 1, 2009 and amended by 75 fed. reg. 31607 (2010), is adopted by reference.

(c) "Subject to regulation," as defined by 75 fed. reg. 31607 (2010), which amends 40 C.F.R. 70.2, is adopted by reference. This definition of "subject to regulation" shall apply only to that term as used in the definition of "major source," which is adopted by reference in subsection (b) of this regulation.

This regulation shall be effective on and after January 2, 2011. (Authorized by and implementing K.S.A. 2009 Supp. 65-3005; effective Jan. 2, 2011.)

28-19-201. General provisions; definitions; regulated compounds list. As used in this regulation, "CAS Number" means chemical abstract service number. (a) "Hazardous air pollutant" means one or more of the following chemical pollutants:

CAS Number	Chemical name
75070	Acetaldehyde
60355	Acetamide
75058	Acetonitrile
98862	Acetophenone
53963	2-Acetylaminofluorene
107028	Acrolein
79061	Acrylamide
79107	Acrylic acid
107131	Acrylonitrile
107051	Allyl chloride
92671	4-Amino biphenyl
62533	Aniline
90040	o-Anisidine
1332214	Asbestos
71432	Benzene (including benzene from gasoline)
92875	Benzidine
98077	Benzotrichloride
100447	Benzyl chloride
92524	Biphenyl
117817	Bis(2-ethylhexyl)phthalate (DEHP)
542881	Bis(chloromethyl) ether
75252	Bromoform
106990	1,3-Butadiene
	CAS Number
	Chemical name
156627	Calcium cyanamide
133062	Captan
63252	Carbaryl
75150	Carbon disulfide
56235	Carbon tetrachloride
463581	Carbonyl sulfide
120809	Catechol
133904	Chloramben
57749	Chlordane
7782505	Chlorine
79118	Chloroacetic acid
532274	2-Chloroacetophenone
108907	Chlorobenzene
510156	Chlorobenzilate
67663	Chloroform
107302	Chloromethyl methyl ether
126998	Chloroprene
1319773	Cresols/Cresylic acid (isomers and mixture)
95487	o-Cresol
108394	m-Cresol
106445	p-Cresol
98828	Cumene
94757	2,4-D, salts and esters
3547044	DDE
334883	Diazomethane
132649	Dibenzofurans
96128	1,2-Dibromo-3-chloropropane
84742	Dibutylphthalate
106467	1,4-Dichlorobenzene(p)
91941	3,3-Dichlorobenzidene
111444	Dichloroethylether(Bis(2-chlorethyl) ether)
542756	1,3-Dichloropropene
62737	Dichlorvos
111422	Diethanolamine
121697	N, N-Diethyl aniline (N,N-Dimethylaniline)
64675	Diethyl sulfate
119904	3,3-Dimethoxybenzidine
60117	Dimethyl aminoazobenzene
119937	3,3-Dimethyl benzidine
79447	Dimethyl carbamoylchloride
68122	Dimethyl formamide
57147	1,1-Dimethyl hydrazine
131113	Dimethyl phthalate
77781	Dimethyl sulfate
534521	4,6-Dinitro-o-cresol, and salts
51285	2,4-Dinitrophenol

CAS Number	Chemical name	CAS Number	Chemical name
121142	2,4-Dinitrotoluene	1634044	Methyl tert butyl ether
123911	1,4-Dioxane (1,4-Diethylene oxide)	101144	4,4-Methylene bis(2-chloroaniline)
122667	1,2-Diphenylhydrazine	75092	Methylene chloride (Dichloromethane)
106898	Epichlorohydrin (1-Chloro-2,3-epoxypropane)	101688	Methylene diphenyl diisocyanate (MDI)
106887	1,2-Epoxybutane	101779	4,4-Methylenedianiline
140885	Ethyl acrylate	91203	Naphthalene
100414	Ethyl benzene	98953	Nitrobenzene
51796	Ethyl carbamate (Urethane)	92933	4-Nitrobiphenyl
75003	Ethyl chloride (Chloroethane)	100027	4-Nitrophenol
106934	Ethylene dibromide (Dibromoethane)	79469	2-Nitropropane
107062	Ethylene dichloride (1,2-Dichloroethane)	684935	N-Nitroso-N-methylurea
107211	Ethylene glycol	62759	N-Nitrosodimethylamine
151564	Ethylene imine (Aziridine)	59892	N-Nitrosomorpholine
75218	Ethylene oxide	56382	Parathion
96457	Ethylene thiourea	82688	Pentachloronitrobenzene (Quintobenzene)
75343	Ethylidene dichloride (1,1-Dichloroethane)	87865	Pentachlorophenol
50000	Formaldehyde	108952	Phenol
76448	Heptachlor	106503	p-Phenylenediamine
118741	Hexachlorobenzene	75445	Phosgene
87683	Hexachlorobutadiene	7803512	Phosphine
77474	Hexachlorocyclopentadiene	7723140	Phosphorus
67721	Hexachloroethane	85449	Phthalic anhydride
822060	Hexamethylene-1,6-diisocyanate	1336363	Polychlorinated biphenyls (Aroclors)
680319	Hexamethylphosphoramide	1120714	1,3-Propane sultone
110543	Hexane	57578	beta-Propiolactone
302012	Hydrazine	123386	Propionaldehyde
7647010	Hydrochloric acid	114261	Propoxur (Baygon)
7664393	Hydrogen fluoride (Hydrofluoric acid)	78875	Propylene dichloride (1,2-Dichloropropane)
123319	Hydroquinone	75569	Propylene oxide
78591	Isophorone	75558	1,2-Propylenimine (2-Methyl aziridine)
58899	Lindane (all isomers)	91225	Quinoline
108316	Maleic anhydride	106514	Quinone
67561	Methanol	100425	Styrene
72435	Methoxychlor	96093	Styrene oxide
74839	Methyl bromide (Bromomethane)	1746016	2,3,7,8-Tetrachlorodibenzo-p-dioxin
74873	Methyl chloride (Chloromethane)	79345	1,1,2,2-Tetrachloroethane
71556	Methyl chloroform (1,1,1-Trichloroethane)	127184	Tetrachloroethylene (Perchloroethylene)
78933	Methyl ethyl ketone (2-Butanone)	7550450	Titanium tetrachloride
60344	Methyl hydrazine	108883	Toluene
74884	Methyl iodide (Iodomethane)	95807	2,4-Toluene diamine
108101	Methyl isobutyl ketone (Hexone)	584849	2,4-Toluene diisocyanate
624839	Methyl isocyanate	95534	o-Toluidine
80626	Methyl methacrylate	8001352	Toxaphene (chlorinated camphene)

CAS Number	Chemical name
120821	1,2,4-Trichlorobenzene
79005	1,1,2-Trichloroethane
79016	Trichloroethylene
95954	2,4,5-Trichlorophenol
88062	2,4,6-Trichlorophenol
121448	Triethylamine
1582098	Trifluralin
580841	2,2,4-Trimethylpentane
108054	Vinyl acetate
593602	Vinyl bromide
75014	Vinyl chloride
75354	Vinylidene chloride (1,1-Dichloroethylene)
1330207	Xylenes (isomers and mixture)
95476	o-Xylenes
108383	m-Xylenes
106423	p-Xylenes
0	Antimony Compounds
0	Arsenic Compounds (inorganic, including arsine)
0	Beryllium Compounds

0	Radionuclides (including radon) ⁵
0	Selenium Compounds

NOTE: For all listings above that contain the word "compounds" and for glycol ethers, the following applies: Unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical as part of that chemical's infrastructure.

¹ X'CN where X = H' or any other group where a formal dissociation may occur, for example, KCN or Ca(CN)₂.

² Includes mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol R - (OCH₂CH₂)_n -OR' where

n = 1, 2, or 3

R = alkyl or aryl groups

R' = R, H, or groups that, when removed, yield glycol ethers with the structure:

R - (OCH₂CH₂)_n -OH. Polymers are excluded from the glycol category.

³ Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral-derived fibers) of average diameter 1 micrometer or less.

⁴ Includes organic compounds with more than one benzene ring, and that have a boiling point greater than or equal to 100°C.

⁵ A type of atom that spontaneously undergoes radioactive decay.

(b) "Volatile organic compounds (VOC)" means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions including any organic compound other than those that have been designated by the department as having negligible photochemical reactivity. For purposes of programs and plans implementing the national ambient air quality standards for ozone only, the following organic compounds have been designated by the department as having negligible photochemical reactivity:

(1) methane;

(2) ethane;

(3) 1,1,1-trichloroethane (methyl chloroform);

(4) methylene chloride;

(5) trichlorofluoromethane (CFC-11);

(6) dichloro-difluoromethane (CFC-12);

(7) chlorodifluoromethane (CFC-22);

(8) trifluoromethane (CFC-23);

(9) trichlorotrifluoroethane (CFC-113);

(10) dichlorotetrafluoroethane (CFC-114);

(11) chloropentafluoroethane (CFC-115);

(12) dichlorotrifluoroethane (HCFC-123);

(13) tetrafluoroethane (HCFC-134a);

(14) dichlorofluoroethane (HCFC-141b);

(15) chlorodifluoroethane (HCFC-142b);

(16) chlorotetrafluoroethane (HCFC-124);

(17) pentafluoroethene (HCFC-125);

(18) tetrafluoroethane (HCFC-134);

(19) trifluoroethane (HCFC-143a);

(20) difluoroethane (HCFC-152a);

(21) parachlorobenzotrifluoride (PCBTF);

(22) cyclic, branched, or linear, completely methylated siloxanes;

(23) acetone;

(24) The following classes of perfluorocarbon compounds:

(A) cyclic, branched, or linear, completely fluorinated alkanes;

(B) cyclic, branched, or linear, completely fluorinated ethers with no unsaturations;

(C) cyclic, branched, or linear, completely fluorinated tertiary amines with no unsaturation; and

(D) sulfur-containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine;

(25) perchloroethylene;

(26) difluoromethane (HFC-32);

(27) ethylfluoride (HFC-161);

(28) 1,1,1,3,3,3-hexafluoropropane (HFC-236fa);

(29) 1,1,2,2,3-pentafluoropropane (HFC-245ca);

(30) 1,1,2,3,3-pentafluoropropane (HFC-245ea);

(31) 1,1,1,2,3-pentafluoropropane (HFC-245eb);

(32) 1,1,1,3,3-pentafluoropropane (HFC-245fa);

(33) 1,1,1,2,3,3-hexafluoropropane (HFC-236ea);

(34) 1,1,1,3,3-pentafluorobutane (HFC-365mfc);

(35) chlorofluoromethane (HCFC-31);

(36) 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a);

(37) 1-chloro-1-fluoroethane (HCFC-151a);

(38) 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxybutane (C₄F₉OCH₃);

(39) 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CF₂OCH₃);

(40) 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane (C₄F₉OC₂H₅);

(41) 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CF₂OC₂H₅);

(42) decafluoropentane (HFC-43-10mee);

(43) 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HFC-225ca);

(44) 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HFC-225cb); and

(45) methyl acetate (HFC 43-10mee). (Authorized by and implementing K.S.A. 1997 Supp. 65-3005; effective Oct. 10, 1997; amended Feb. 12, 1999.)

28-19-202. (Authorized by K.S.A. 2009 Supp. 65-3005 and 65-3024; implementing K.S.A. 65-3024; effective Nov. 22, 1993; amended Jan. 23, 1995; amended March 15, 1996; amended Feb. 21, 1997; amended Feb. 13, 1998; amended March 23, 2001; amended Jan. 30, 2004; amended Nov. 5, 2010; revoked Jan. 5, 2018.)

28-19-204. General provisions; permit issuance and modification; public participa-

tion. (a) The public shall be provided the opportunity to participate in the permit development or modification process prior to issuance of a construction permit for an affected facility, a class I or class II operating permit, or a significant modification of a class I or class II operating permit.

(b) Prior to the issuance of a permit or permit modification which requires public participation or prior to any public hearing held pursuant to K.S.A. 1993 Supp. 65-3008a, a notice shall be placed in the Kansas Register and a newspaper of general circulation in the area where the facility is, or will be located.

(c) The notice shall:

(1) identify the facility which is the subject matter of the permit action, except in the case of a general permit;

(2) state the name and address of the owner or operator of the facility, except in the case of a general permit;

(3) state the address of the facility, except in the case of a general permit;

(4) describe the activity or activities involved in the permit action;

(5) describe the air emissions from any proposed new facility or involved in any permit modification;

(6) state the name, address and telephone number of a person from whom interested persons may obtain additional information which is not confidential, including:

(A) copies of the proposed permit or permit modification;

(B) the application;

(C) all relevant supporting materials including any monitoring and compliance certification and compliance plan; and

(D) all other materials available to the department that are relevant to the permitting decision;

(7) state the department's name and address;

(8) include a brief description of the procedures for submitting written comments including a date which is 30 or more days after the notice is first published by which comments shall be submitted to the department; and

(9) include a statement of the procedures to request a public hearing or specify the time and place of the public hearing if a public hearing has been scheduled. If a public hearing has been scheduled, notice of the hearing shall be published at least 30 or more days in advance of the hearing.

(d) The notice shall state that a copy of the proposed permit and all supporting documentation

is available for public review at the department's central office and at the appropriate district office or local agency, and shall provide the name, address and telephone number of a contact person at the central office and at the appropriate district office or local agency.

(e) The notice may describe more than one permit action or public hearing.

(f) Written comments timely received by the department during the public comment period and written comments and oral testimony received during a public hearing shall become part of the permit record. All such written and oral comments which are relevant to the permit decision and which are within the jurisdiction established by the permit action shall be considered in making a final decision on the proposed permit action.

(g) A response to the comments shall be issued at the time any final permit decision is issued. The response to the comments shall be available to the public and shall:

(1) specify any changes made to the proposed permit as a result of any public comments; and

(2) briefly respond to any significant comments received during the public comment period or during the public hearing.

(h) Copies of the proposed permit, the application, all relevant supporting materials including any compliance plan and compliance certification, and all other materials available to the permitting authority that are relevant to the permitting decision shall, upon request, be furnished without charge to the USEPA and to any affected state. Any other person requesting copies of such documentation shall pay a fee equal to that regularly charged by the department for copying documents unless some other provision of law provides otherwise. (Authorized by K.S.A. 1993 Supp. 65-3005 and implementing K.S.A. 1993 Supp. 65-3008a; effective Jan. 23, 1995.)

28-19-210. Calculation of actual emissions. (a) Whenever required to be determined by the Kansas air quality regulations, the quantity of actual emissions from any emissions unit or stationary source shall be calculated by the owner or operator of an emissions unit or stationary source using:

(1) Data generated from continuous monitoring systems as specified in subsection (c) of this regulation;

(2) approved emission factors as specified in subsection (d) of this regulation;

(3) material balances as specified in subsection (e) of this regulation;

(4) any other method specifically approved by the department in writing, specified in a permit issued to the owner or operator by the department for the particular emission unit or stationary source using such method, or specified in the Kansas air quality regulations for the particular emissions unit or stationary source;

(5) the potential to emit if the emission unit or stationary source fails to qualify for any other method; or

(6) any combination of the above which most accurately demonstrates actual emissions from each emissions unit.

(b) Actual emissions shall be calculated in a manner which most accurately reflects the actual emissions of each emissions unit using the best available data for that emissions unit under current operating conditions. Where a specific actual emissions calculation procedure is required for any other purpose by the Kansas air quality regulations or 40 CFR part 75, as promulgated at 58 FR 3590 on January 11, 1993, that calculation procedure shall also be used to calculate actual emissions for purposes of this regulation.

(c) Data generated by continuous monitoring systems may be used to calculate actual emissions for any emissions unit if the requirements of this subsection are met.

(1) For sources subject to 40 CFR part 75, actual emissions shall be calculated as required by 40 CFR part 75.

(2) For sources not subject to 40 CFR part 75, the owner or operator shall:

(A) Obtain approval from the department prior to using data generated by a continuous monitoring system for the purpose of calculating actual emissions;

(B) develop and follow a written quality assurance procedure for the continuous monitoring system which is appropriate for purposes of this regulation as determined by the department; and

(C) submit the data to the department in a format approved by the department.

(3) For sources not subject to 40 CFR part 75, actual emissions during periods of missing data shall be calculated as follows.

(A) For periods of missing data of one hour or less, data for the hour immediately preceding the missing data and data for the hour immediately following the missing data shall be averaged and submitted to the department as actual emissions for the missing data. For purposes of this subsection, periods of operation of less than one hour

between periods of missing data shall be included as part of the period of missing data.

(B) For periods of missing data of more than one hour but equal to or less than 24 consecutive hours, actual emissions reported to the department shall be the greater of:

(i) the data determined by the method specified in subsection (c)(3)(A) of this regulation; or

(ii) the average of the actual emission data for the applicable reporting time period during which the continuous monitoring system was properly operating.

(C) For periods of missing data of more than 24 consecutive hours, actual emissions shall be determined using other appropriate calculation methods specified by this regulation.

(D) For periods during upsets, start-up, shut-down, control equipment malfunctions, and other abnormal operating conditions, actual emissions shall be determined using other appropriate calculation methods specified in this regulation.

(d) Actual emissions determined using emission factors shall be calculated using the following formula:

$$\text{Actual emissions} = \text{OR} \times \text{EF} \times (1 - (\text{CE} \times \text{CDE}))^{\circ}$$

Where:

OR = the operating rate as documented through records kept at the emissions unit or stationary source. If insufficient records are kept to determine the actual operating rate of the emissions unit or stationary source during the reporting period, the operating rate shall be determined using the maximum operating capacity during the known hours of operation. If the known hours of operation cannot be determined, the hours of operation shall be the maximum number of hours the facility is permitted to operate during the reporting period.

EF = an appropriate emission factor obtained from an approved publication listed in subsection (g) unless the permittee demonstrates to the satisfaction of the department that an alternative emission factor is applicable to the relevant emissions unit or stationary source.

CE = capture efficiency of the control device emissions collection system determined according to subsection (f) of this regulation or through performance testing.

CDE = control device efficiency determined according to subsection (f) of this regulation or through performance testing.

[°] This formula assumes a single overall control efficiency has been developed for situations where emissions are controlled by a series of air emissions control devices. If a single overall control efficiency has not been developed, actual emissions shall be calculated as follows:

$$\text{Actual emissions} = \text{OR} \times \text{EF} \times (1 - (\text{CE} \times \text{CDE}))_{\text{D1}} \times (1 - (\text{CE} \times \text{CDE}))_{\text{D2}} \times \dots \times (1 - (\text{CE} \times \text{CDE}))_{\text{Dn}}$$

where D is an emissions control device (or devices) for which an overall control efficiency is available.

Prior approval by the department shall be obtained before the development of an alternative emission factor or control device efficiency based upon performance testing of an emissions unit or stationary source.

(e) Actual emissions determined using material balances shall be calculated using one of the following formulas:

(1) For volatile organic compound emissions;

$$\text{Actual emissions} = (Q_{\text{added}} - Q_{\text{recovered}}) \times (1 - (\text{CE} \times \text{CDE}))^{\circ}$$

(2) for sulfur dioxide emissions;

$$\text{Actual emissions} = (F_{\text{burned}} \times (\%S/100) \times \text{CF}) \times (1 - (\text{CE} \times \text{CDE}))^{\circ}$$

(3) for all other emissions for which a material balance procedure is appropriate;

$$\text{Actual emissions} = (Q_{\text{added}} - Q_{\text{consumed}} - Q_{\text{recovered}}) \times (1 - (\text{CE} \times \text{CDE}))^{\circ}$$

Where:

Q_{added} = the total quantity of the regulated substance which enters the process or operation;

$Q_{\text{recovered}}$ = the total quantity of the regulated substance recovered for reuse which is not accounted for by the emission control device calculations;

Q_{consumed} = the total quantity of the regulated substance which becomes an integral part of the product;

F_{burned} = the quantity of sulfur containing fuel by weight;

%S = percent sulfur, by weight, in the sulfur containing fuel;

CE = capture efficiency of the control device emissions collection system determined according to subsection (f) of this regulation or through performance testing;

CDE = control device efficiency determined according to subsection (f) of this regulation or through performance testing; and

CF = a conversion factor of 1.95 for coal and 2.00 for natural gas, oil and other fuels.

[°] See footnote [°] at subsection (d) of this regulation.

(f) Calculation of credits for actual emissions reductions due to air emission control equipment capture efficiencies and control device efficiencies may be taken in accordance with this subsection.

(1) All emissions during startup, shut down, control equipment malfunctions or by-passes, or other periods of greater than normal emissions, shall be calculated as if the emissions unit or stationary source was being operated without air emission control equipment unless a more ac-

curate manner of calculating actual emissions is demonstrated by the owner or operator and approved by the department.

(2) Unless otherwise specifically approved in writing by the department or stated in an air quality permit issued by the department for the emissions unit or stationary source, the following air emission control equipment control device efficiencies shall be used when calculating actual emissions:

(A) Particulate matter, in the absence of information to the contrary, all particulate matter emissions from any control equipment shall be assumed to be PM₁₀.

- | | |
|--|-------|
| (i) electrostatic precipitator or baghouse | 0.90 |
| (ii) high energy wet scrubber | 0.80 |
| (iii) low energy wet scrubber | 0.70 |
| (iv) cyclonic separator | 0.50 |
| (B) Acid gases: | |
| (i) wet scrubber | 0.90 |
| (ii) dry scrubber | 0.70 |
| (C) Volatile organic compounds: | |
| (i) incinerator (operating at a temperature 1400° Fahrenheit or greater) | 0.98 |
| (ii) carbon adsorber | 0.95. |

(3) Unless otherwise specifically approved in writing by the department or stated in an air quality permit issued by the department for the emissions unit or stationary source, the following air emission control equipment control device capture efficiencies shall be used when calculating actual emissions:

(A) The capture efficiency for a totally enclosed emissions source operating under negative pressure shall be 1.00.

(B) The capture efficiency for an emissions source which is not totally enclosed or which is not operated under negative pressure shall be 0.50.

(4) Capture efficiencies and control device efficiencies for other types of air emission control equipment not listed in paragraphs (f)(2) and (f)(3) shall be determined by the department on a case by case basis based upon an appropriate demonstration by the owner or operator of the capture efficiency and control device efficiency of the air emission control equipment.

(5) Capture efficiencies and control device efficiencies alternative to those specified in paragraphs (f)(2) and (f)(3) may be approved by the department upon an appropriate demonstration by the owner or operator of capture efficiency and

control device efficiency of the air emission control equipment.

(6) Each owner or operator which uses an air emission control equipment capture efficiency or control device efficiency, or both, when calculating actual emissions shall maintain the air emission control equipment in accordance with any applicable Kansas air quality regulation, permit requirement or manufacturer's recommendation. Beginning January 1, 1994, the owner or operator shall also keep a written log recording the date and type of action taken when performing preventive or other maintenance on the air emission control equipment. Failure of the owner or operator to maintain the air emission control equipment or to keep a written record as required by this subsection shall be considered a control equipment malfunction for purposes of subsection (f)(1).

(g) Appropriate emission factors obtained from the following publications or data bases are approved for determining emissions from emission units or stationary sources:

(1) AP-42 compilation of air pollution emission factors—4th edition—September, 1985. United States environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(2) AIRS facility subsystem source classification codes (SCCs) and emission factor listing for criteria pollutants (EPA-450/4-90-003). United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(3) Locating and estimating air emissions from sources of acrylonitrile. EPA #450/4-84-007A, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(4) Locating and estimating air emissions from sources of carbon tetrachloride. EPA #450/4-84-007B, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(5) Locating and estimating air emissions from sources of chloroform. EPA #450/4-84-007C, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(6) Locating and estimating air emissions from sources of ethylene dichloride. EPA #450/4-84-

007D, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(7) Locating and estimating air emissions from sources of nickel. EPA #450/4-84-007F, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(8) Locating and estimating air emissions from sources of chromium. EPA #450/4-84-007G, March, 1984. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(9) Locating and estimating air emissions from sources of epichlorohydrin. EPA #450/4-84-007J, September, 1985. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(10) Locating and estimating air emissions from sources of vinylidene chloride. EPA #450/4-84-007K, September, 1985. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(11) Locating and estimating air emissions from sources of manganese. EPA #450/4-84-007H, September, 1985. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(12) Locating and estimating air emissions from sources of phosgene. EPA #450/4-84-007I, September, 1985. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(13) Locating and estimating air emissions from sources of ethylene oxide. EPA #450/4-84-007L, September, 1986. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(14) Locating and estimating air emissions from sources of chlorobenzenes. EPA #450/4-84-007M, September, 1986. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(15) Locating and estimating air emissions from

sources of polychlorinated biphenyls (PCB's). EPA #450/4-84-007N, May, 1987. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(16) Locating and estimating air emissions from sources of polycyclic organic matter (POM). EPA #450/4-84-007P, September, 1987. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(17) Locating and estimating air emissions from sources of benzene. EPA #450/4-84-007Q, March, 1988. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(18) Estimating air toxics emissions from organic liquid storage tanks. EPA #450/4-88-004, October, 1988. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(19) Locating and estimating air toxics emissions from municipal waste combustors. EPA #450/2-89-006, April, 1989. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(20) Locating and estimating air emissions from sources of chromium (supplement). EPA #450/2-89-002, August, 1989. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(21) Locating and estimating air emissions from sources of perchloroethylene and trichloroethylene. EPA #450/2-89-013, August, 1989. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(22) Locating and estimating air emissions from sources of 1, 3-butadiene. EPA #450/2-89-021, December, 1989. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(23) Locating and estimating air toxics emissions from sewage sludge incinerators. EPA #450/2-90-009, May, 1990. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(24) Locating and estimating air emissions from sources of formaldehyde (revised). EPA #450/4-91-012, March, 1991. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711.

(25) Locating and estimating air emissions from sources of styrene, interim report. EPA #450/4-91-029, October, 1991. United states environmental protection agency, office of air quality planning and standards, research triangle park, North Carolina 27711. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007 and L. 1993, Ch. 13; effective Nov. 22, 1993.)

28-19-212. General provisions; approved test methods and emission compliance determination procedures. (a) The following test methods shall be approved for demonstrating compliance or non-compliance with an appropriate emission standard or limitation:

(1) those test methods specified at 40 CFR part 60, appendix A, as in effect on July 1, 1993;

(2) those test methods specified at 40 CFR part 60, appendix B, as in effect on July 1, 1993;

(3) those test methods specified at 40 CFR part 60, appendix F, as in effect on July 1, 1993;

(4) those test methods specified at 40 CFR part 60, appendix J, as in effect on July 1, 1993;

(5) those test methods specified at 40 CFR part 61, appendix B, as in effect on July 1, 1993;

(6) those test methods specified at 40 CFR part 51, as in effect on July 1, 1993;

(7) those test methods specified at 40 CFR part 63, appendix A, as in effect on July 1, 1993;

(8) any alternative or miscellaneous test procedures currently approved by the USEPA and published in the federal register prior to the effective date of this regulation;

(9) ASTM D 1186-06.01—thickness of paints/related coatings dry film thickness of non-magnetic coatings applied to a ferrous base, as in effect on July 1, 1994;

(10) ASTM D 1200-06.01—standard test method for determining the viscosity of paints and related coatings by the Ford viscosity cup test, as in effect on July 1, 1994;

(11) ASTM D 3794-06.01—standard test method for determining the viscosity of coil coatings by the Zahn cup method test, as in effect on July 1, 1994;

(12) ASTM D 1475-60—standard test method for determining the density of paint, varnish, lac-

quer and related products, as in effect on July 1, 1994;

(13) ASTM D 2369-81—standard test method for determining the volatile content of coatings using a one hour bake, as in effect on July 1, 1994;

(14) ASTM D 3792-79—standard test method for determining the water content of water reducible paint by direct injection into a gas chromatograph, as in effect on July 1, 1994;

(15) ASTM D 4017-81—standard test method for determining the water content in paints by the Karl Fischer titration method, as in effect on July 1, 1994;

(16) ASTM D-244-83—standard methods of testing emulsified asphalts, as in effect on July 1, 1994;

(17) ASTM D-323-82—vapor pressure of petroleum products (Reid method), as in effect on July 1, 1994;

(18) ASTM D-97-66—test for pour point of petroleum oils, as in effect on July 1, 1994;

(19) the procedures in 40 CFR, Part 80, Appendix D, as in effect on July 1, 1993, for the sampling of reid vapor pressure of gasoline to be used as a fuel for motor vehicles;

(20) the procedures in 40 CFR, Part 80, Appendix E, as in effect on July 1, 1993, for the testing of reid vapor pressure of gasoline to be used as a fuel for motor vehicles; and

(21) an alternate sampling or testing procedure approved by the department and developed or approved by the U.S. environmental protection agency as an equivalent or improved procedure.

(b) Notwithstanding any other provision of these regulations, data from continuous emission monitoring systems may be used for purposes of determining compliance with any emission limitation or standard only if:

(1) the emissions are from an affected source and the continuous emission monitoring system is subject to, and in compliance with, the requirements of 40 CFR part 75; or

(2) the continuous emission monitoring system is not subject to 40 CFR part 75 and:

(A) a written quality assurance and quality control plan is maintained by the owner or operator of the emission source;

(B) the plan includes the more stringent of either all recommendations of the manufacturer or manufacturers of the continuous emission monitoring system components or all applicable quality assurance and quality control requirements required by any state or federal regulation or air quality permit;

(C) the owner or operator maintains records demonstrating adherence to the quality assurance and quality control plan; and

(D) the quality assurance and quality control plan is reviewed and updated annually.

Data from a continuous emission monitoring system which satisfies the requirements of this subsection and which demonstrates compliance with the relevant emission limitation or standard, shall create a rebuttable presumption of compliance with the relevant emission limitation or standard.

(c) Notwithstanding any other provisions of these regulations, data which demonstrates non-compliance with an emission limitation or standard shall create a rebuttable presumption of non-compliance if the data is from continuous emission monitoring systems or any other sampling or monitoring protocols, and the systems or protocols are required by:

- (1) any applicable requirement;
- (2) any air quality regulation;
- (3) any compliance plan;
- (4) any order or consent agreement issued pursuant to the authorities specified in the Kansas air quality act;
- (5) the provisions of any air quality construction or operating permit; or
- (6) any other provision or authority of the Kansas air quality act or air quality regulation.

(d) Notwithstanding any other provision of this regulation, any credible evidence may be used for the purpose of establishing non-compliance with an emission limitation or standard.

(e) Notwithstanding any other provision of these regulations, the owner or operator is not prohibited from using the following in addition to any specified compliance methods for the purpose of submission of compliance certifications:

- (1) an enhanced monitoring protocol approved by the department; or
- (2) any other monitoring method approved for the source incorporated into any federally enforceable operating permit. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3007; effective Jan. 23, 1995.)

ACID RAIN AND OTHER TRADING PROGRAMS

28-19-274. Nitrogen oxides; allocations.

(a)(1) For purposes of this regulation, the terms “allocate,” “allocation,” “TR NO_x annual allowance,” “TR NO_x annual trading program,” and “TR NO_x annual unit” shall have the meanings specified in 40 C.F.R. 97.402, as in effect on Octo-

ber 7, 2011. These definitions are hereby adopted by reference.

(2)(A) For purposes of this regulation, each reference to “administrator” shall mean “USEPA administrator.”

(B) For purposes of this regulation, each reference to “State” and each reference to “permitting authority” shall mean “secretary of the Kansas department of health and environment.”

(C) For purposes of this regulation, each reference to “§52.38” shall mean “40 C.F.R. 52.38.”

(b) For purposes of this regulation, Indian country new unit set-aside allowances shall be those unallocated TR NO_x annual allowances for calendar year 2017, 2018, or 2019 available for allocation in accordance with a determination by the department after completion by USEPA of the procedures under 40 C.F.R. 97.412(b)(9) and (12) for that year.

(c) Pursuant to 40 C.F.R. 52.38(a)(4) as in effect on July 1, 2015, this regulation shall replace the provisions of 40 C.F.R. 97.411(a) and (b)(1) and 97.412(a) as in effect on July 1, 2015 for the calendar years 2017, 2018, and 2019 with regard to the implementation of the TR NO_x annual trading program by the department.

(d) Each TR NO_x annual unit shall receive TR NO_x annual allowance allocations and, except as provided in subsection (e), Indian country new unit set-aside allowance allocations for 2017, 2018, and 2019 according to the department’s document titled “TR NO_x annual allowance allocations for 2017, 2018, and 2019,” dated July 17, 2015, which is hereby adopted by reference.

(e) If the total number of available Indian country new unit set-aside allowances for 2017, 2018, or 2019 is less than 31, the allocations shall be determined under this subsection instead of subsection (d), according to the following:

(1) The TR NO_x annual units listed in the department’s document titled “TR NO_x annual allowance allocations for 2017, 2018, and 2019” shall be ordered in descending order of the amounts of their Indian country new unit set-aside allowance allocations as shown in that document, with units whose allocations are the same ordered in ascending order of “ReceiveAcct” and “UnitId” as shown in that document.

(2) The TR NO_x annual units shall forfeit one allowance sequentially, starting with the first listed unit, until the total number of the revised allocations equals the total number of available Indian country new unit set-aside allowances.

(Authorized by K.S.A. 2015 Supp. 65-3005; implementing K.S.A. 2015 Supp. 65-3005 and K.S.A. 65-3010; effective Nov. 6, 2015.)

28-19-275. Special provisions; acid rain deposition. (a) The provisions of this regulation are in addition to any construction or operating permit requirements specified elsewhere in the Kansas air quality regulations. For stationary sources or emissions units subject to this regulation, the requirements of this regulation take precedence in cases of conflicts with other Kansas air quality regulations applicable to the stationary source or emissions unit.

(b) Where applicable, the terms used in the federal regulations adopted by reference herein shall have the definition specified at 40 CFR 72.2 as in effect on July 1, 1994, with the following exception. "Permitting authority" shall mean the secretary of health and environment.

(c) 40 CFR part 72 as applicable to phase II of the federal acid rain program and as in effect on July 1, 1994, is adopted by reference. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

CONSTRUCTION PERMITS AND APPROVALS

28-19-300. Construction permits and approvals; applicability. (a) Each person who proposes to construct or modify a stationary source or emission unit shall obtain a construction permit before beginning actual construction or modification if at least one of the following conditions is met:

(1) The potential-to-emit of the proposed stationary source or emission unit, or the increase in the potential-to-emit resulting from the modification, equals or exceeds any of the following:

(A) Either 25 tons of particulate matter per year or 15 tons of PM10 per year, except for any agricultural-related activity, in which case the emission level shall be 100 tons of particulate matter per year, including PM10;

(B) 40 tons of sulfur dioxide or sulfur trioxide, or a combination of these, per year;

(C) 100 tons of carbon monoxide per year;

(D) 40 tons of volatile organic compounds per year;

(E) 40 tons of oxides of nitrogen per year;

(F) 0.6 tons of lead or lead compounds per year; or

(G) 10 tons of directly emitted PM2.5 per year. For the purposes of this paragraph, "PM2.5" shall

mean particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers.

(2) For the purposes of this paragraph, the definitions in 40 C.F.R. part 63 adopted by reference in K.A.R. 28-19-750 shall apply. The construction or modification project is located at a stationary source and involves any of the following:

(A) The construction of any new major source of hazardous air pollutants;

(B) the reconstruction of any existing major source of hazardous air pollutants;

(C) the modification of any existing area source of hazardous air pollutants such that the source becomes a major source; or

(D) any activity specified in 40 C.F.R. 63.5(b)(3).

(3) The source is requesting a federally enforceable operational restriction or permit condition pursuant to K.A.R. 28-19-302(b).

(4) The emission unit or stationary source is an incinerator used to dispose of refuse by burning or pyrolysis or used for the processing of salvageable materials, except incinerators installed on residential premises that contain fewer than six dwelling units and are used to burn waste materials associated with normal habitation of those dwelling units.

(5) The emission unit or stationary source is required to apply for a construction approval pursuant to paragraph (b)(2), and the secretary determines that air emissions from the emission unit or stationary source require that the permit issuance procedures be implemented.

(b) Each person who proposes to construct or modify a stationary source or emission unit who is not required to obtain a construction permit pursuant to subsection (a) shall, before beginning actual construction or modification of the stationary source or emissions emission unit, obtain an approval from the department to begin actual construction or modification if at least one of the following conditions is met:

(1) The potential-to-emit of the proposed stationary source or emission unit, or the increase in the potential-to-emit resulting from the modification, equals or exceeds one or more of the following:

(A) Either five pounds of particulate matter per hour or two pounds of PM10 per hour, except for any agricultural-related activity, in which case the emission level shall be five pounds of particulate matter per hour, including PM10;

(B) two pounds of sulfur dioxide or sulfur trioxide, or a combination of these, per hour;

(C) 50 pounds of carbon monoxide per 24-hour period;

(D) 50 pounds of volatile organic compounds per 24-hour period, except when the stationary source or emission unit is located in an area designated as a nonattainment area in 40 C.F.R. 81.317 as in effect on July 1, 1989, in which case approval shall be required if the emission level exceeds either 15 pounds per 24-hour period or three pounds per hour;

(E) 50 pounds of oxides of nitrogen calculated as nitrogen dioxide per 24-hour period; or

(F) 0.1 pounds of lead or lead compounds per hour.

(2) The secretary determines that any other air contaminant emissions from the emission unit or stationary source could cause or contribute to air pollution within the state because of the specific chemical or physical nature of the emissions or because of the quantity discharged.

(3) The construction or modification project is located at a stationary source for which a standard has been promulgated under 40 C.F.R. part 60, as adopted by reference in K.A.R. 28-19-720, and the project involves the construction of any new source or the modification or reconstruction of any existing source subject to the standard. For the purposes of this paragraph, the definitions in 40 C.F.R. part 60 adopted by reference in K.A.R. 28-19-720 shall apply. A construction approval shall not be required for construction, reconstruction, or modification projects subject to the standards of performance for new residential wood heaters, 40 C.F.R. part 60, subpart AAA.

(4) The construction or modification project is located at a stationary source for which a standard has been promulgated under 40 C.F.R. part 61, as adopted by reference in K.A.R. 28-19-735, and the project involves the construction of any new source or the modification of any existing source subject to the standard. For the purposes of this paragraph, the definitions in 40 C.F.R. part 61 adopted by reference in K.A.R. 28-19-735 shall apply. A construction approval shall not be required for construction or modification projects subject to 40 C.F.R. 61.145.

(5) The construction or modification project is located at a stationary source for which a relevant standard has been promulgated under 40 C.F.R. part 63, as adopted by reference in K.A.R. 28-19-750, and the project involves the construction of

any new source or the reconstruction of any existing source subject to the relevant standard. For the purposes of this paragraph, the definitions in 40 C.F.R. part 63 adopted by reference in K.A.R. 28-19-750 shall apply. A construction approval shall not be required solely if the project is subject to any of the following:

(A) 40 C.F.R. part 63, subpart M;

(B) 40 C.F.R. part 63, subpart CCCCCC; or

(C) 40 C.F.R. part 63, subpart ZZZZ, if the project is located at an area source.

(6) The source is seeking an approval with operational restrictions pursuant to K.A.R. 28-19-302(c).

(c) For the purpose of this regulation, neither of the following shall be considered a modification:

(1) Routine maintenance or parts replacement; or

(2) an increase or decrease in operating hours or production rates if both of the following conditions are met:

(A) Production rate increases do not exceed the originally approved design capacity of the stationary source or emission unit; and

(B) the increased potential-to-emit resulting from the change in operating hours or production rates does not exceed any emission or operating limitations imposed as a condition to any permit issued under this article of the department's regulations. (Authorized by K.S.A. 2016 Supp. 65-3005; implementing K.S.A. 2016 Supp. 65-3008; effective Jan. 23, 1995; amended Nov. 18, 2016.)

28-19-301. Construction permits and approvals; application and issuance. (a) Application for a permit or approval to construct or modify a stationary source or emissions unit shall be made by the owner or operator on forms provided or approved by the department. The owner or operator may be required to furnish additional information to determine compliance with the Kansas air quality regulations.

(b) A construction permit shall not be issued to a source whose potential-to-emit equals or exceeds that specified at K.A.R. 28-19-500(a) or K.A.R. 28-19-500(b) without first satisfying the public participation requirements of K.A.R. 28-19-204.

(c) Each permit or approval issued for the construction or modification of a source shall become void if the construction or modification has not commenced within 18 months after permit issuance or if the activity required to complete the modification or construction has been discontinued for 18 months or more.

(d) No construction permit or approval shall be issued if the department determines that the air contaminant emissions from the source will interfere with the attainment or maintenance of any ambient air quality standard that has been established under the provisions of the federal clean air act, as amended, or under the provisions of state law.

(e) Each construction permit or approval that is issued may be conditioned upon compliance by the owner or operator with any special restrictions that are deemed necessary to insure compliance with these regulations or otherwise prevent air pollution.

(1) The restrictions may include, but need not be limited to, special requirements concerning methods of operation, emissions limitations or control procedures to be implemented.

(2) Each restriction shall be in writing as part of, or as an attachment to, the permit or approval.

(f) Each construction permit or approval that is issued may identify one or more air contaminant emission sources that are approved to be constructed, modified, used, or operated.

(1) The sources shall be located on the same premises, shall be under one ownership, and shall be considered as part of the same industrial grouping as determined by the department.

(2) The major industrial grouping shall be identified by using the industrial titles and descriptions provided in the "standard industrial classification manual 1987," as published by the U.S. government printing office, stock number 041-001-00314-2, which is adopted by reference. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-302. Construction permits and approvals; additional provisions; construction permits. (a) The owner or operator of any source which is required to obtain a construction permit pursuant to K.A.R. 28-19-16 through 28-19-16m, nonattainment area requirements, or K.A.R. 28-19-17 through 28-19-17q, prevention of significant deterioration requirements, shall comply with any applicable construction permit requirements of the regulations in addition to the requirements set forth herein.

(b) The owner or operator submitting an application for the construction of a new source or modification of an existing source may request a federally enforceable operational restriction

be included in the construction permit which, either alone or in conjunction with a federally enforceable permit condition regarding properly maintained and operated air pollution control equipment, reduces the potential-to-emit of the emissions unit or stationary source or otherwise results in avoidance of any requirement of the federal clean air act. Such permit restriction shall meet the requirements of K.A.R. 28-19-501(b) to be considered federally enforceable.

(c) Any owner or operator which would otherwise be required to submit an application for the construction of a new source may, in lieu of applying for a construction permit, request an operational restriction be included in a construction approval which, either alone or in conjunction with properly maintained and operated air pollution control equipment, reduces the potential emissions of the source below the threshold requiring a construction permit if:

(1) the potential-to-emit is less than the threshold requiring a permit pursuant to any applicable requirements of:

(A) K.A.R. 28-19-16 through 28-19-16m, nonattainment area requirements;

(B) K.A.R. 28-19-17 through 28-19-17q, prevention of significant deterioration requirements;

(C) K.A.R. 28-19-510 *et seq.*, class I operating permits; and

(D) K.A.R. 28-19-540 *et seq.*, class II operating permits;

(2) the owner or operator specifies and quantifies the operational restrictions which will reduce the potential emissions of the source and agrees to operate the source in compliance with such operational restrictions;

(3) the owner or operator specifies a procedure for maintaining records that demonstrate compliance with the operational restrictions; and

(4) the owner or operator complies with the requirements of K.A.R. 28-19-501(d) in regards to any air pollution control equipment relied upon to reduce potential emissions of the source.

(d) Any failure to comply with an operational restriction, record-keeping requirement or control equipment requirement which provided the basis for issuance of an approval pursuant to subsection (c) of this regulation shall be deemed a violation of this regulation.

(e) For purposes of the Kansas air quality act, a construction permit shall be an approval to construct or modify an air contaminant emission stationary source. (Authorized by K.S.A. 1993 Supp.

65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-303. Construction permits and approvals; additional provisions; construction approvals. (a) A construction approval shall not contain conditions that allow a source to avoid any requirement of the federal clean air act. Any person requesting an operational restriction that would result in avoidance of a federal requirement shall apply for and obtain a construction permit prior to the construction or modification of the relevant stationary source or emissions unit.

(b) If the potential-to-emit of the proposed construction or modification may cause or contribute to a violation of a national ambient air quality standard, a construction approval shall not be issued for the construction or modification of an emissions unit or stationary source. An application for a construction permit shall be required for the construction or modification.

(c) A construction approval issued pursuant to this regulation, regarding an emissions unit or stationary source which is subject to any requirement of the Kansas air quality act or the federal clean air act, shall contain provisions requiring operation of the emissions unit or stationary source in compliance with all requirements of the Kansas air quality act and the federal clean air act which are applicable to the emissions unit or stationary source.

(d) For purposes of the Kansas air quality act, an approval issued pursuant to this regulation shall be considered to be an approval to construct or modify an air contaminant emission stationary source. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-304. Construction permits and approvals; fees. An application for an approval or a permit shall not be reviewed until the department has received an application fee pursuant to the requirements of this regulation.

(a) The fee for each construction approval application shall be \$750.00.

(b) The fee for each construction permit application shall be determined according to the following source categories:

- (1) \$4,000 for each of the following:
 - (A) Aircraft manufacturing;
 - (B) cellulosic organic fiber manufacturing;
 - (C) chemical manufacturing, except ethanol manufacturing;

- (D) electric power generation with total plant-wide capacity at least 100 megawatts;

- (E) fiberglass insulation manufacturing;
- (F) foundries;
- (G) glass and glass product manufacturing;
- (H) hazardous waste and medical waste incinerators;

- (I) pesticide, fertilizer, and other agricultural chemical manufacturing;

- (J) petroleum refineries;
- (K) portland cement manufacturing;
- (L) sulfuric and nitric acid manufacturing; and
- (M) tire manufacturing;

- (2) \$2,000 for each of the following:
 - (A) Agriculture, construction, and mining machinery manufacturing;

- (B) aircraft engine or parts manufacturing;
- (C) animal slaughtering and processing;
- (D) ethanol manufacturing, including distilleries;

- (E) fabricated metal product manufacturing;
- (F) grain and oilseed milling, including oil extraction;

- (G) lime and gypsum product manufacturing;
- (H) motor vehicle manufacturing, including vehicle body, truck trailer, and camper manufacturing;

- (I) paint, coating, and adhesive manufacturing;
- (J) pipeline transportation of refined petroleum, crude oil, and natural gas;

- (K) printing and related support activities;
- (L) rubber product manufacturing, except tire manufacturing;

- (M) ship and boat building;
- (N) soap and cleaning compound manufacturing;

- (O) solid waste landfills; and
- (P) storage battery manufacturing; and
- (3) \$1,000 for each of the following:

- (A) Each source category listed in paragraph (b) (1) that is not a major source, as defined in K.A.R. 28-19-200;

- (B) air curtain combustors;
- (C) animal crematory services;
- (D) animal food manufacturing;
- (E) asphalt paving mixture and block manufacturing;

- (F) crude petroleum and natural gas extraction;
- (G) electric power generation with total plant-wide capacity less than 100 megawatts;

- (H) food manufacturing;
- (I) grain elevators;
- (J) hog and pig farming;

(K) nonmetallic mineral mining and quarrying;
 (L) plastics product manufacturing, including fiberglass products; and

(M) ready-mix concrete manufacturing.

(c) The fee for each construction permit application for any source category not listed in subsection (b) shall be \$1,000.

(d)(1) The construction permit application fees in subsections (b) and (c) shall not apply if the proposed construction or modification is also subject to review and permitting requirements under K.A.R. 28-19-16 through 28-19-16m, pertaining to nonattainment area requirements, or K.A.R. 28-19-350, pertaining to prevention of significant deterioration. Instead, the fees shall be as follows:

(A) For each application for new permit, \$10,000; or

(B) for each application for modification of an existing permit, \$10,000 if the modification includes any of the following:

(i) A new best available control technology (BACT) analysis or a modification of an existing BACT analysis;

(ii) a review of emissions or net emissions calculations; or

(iii) the addition of a new unit subject to BACT; and

(C) for each application for modification of an existing permit not specified in paragraph (d)(1)(B), \$3,000.

(2) In addition to the construction permit application fee requirements of paragraphs (d)(1)(A) and (B), the following fees shall apply:

(A) For each refined modeling analysis, \$8,000;

(B) for each revision to application, \$5,000; and

(C) for each revision to modeling, \$4,000.

(e) Each fee, which shall be nonrefundable, shall be remitted in the form of a check, draft, credit card payment, or money order made payable to the Kansas department of health and environment. Receipt of any type of payment that is not covered by sufficient funds shall be cause for the denial of the construction permit or approval. (Authorized by K.S.A. 2016 Supp. 65-3005; implementing K.S.A. 2016 Supp. 65-3008; effective Jan. 23, 1995; amended Nov. 18, 2016.)

28-19-325. Compressed air energy storage. (a) The terms “compressed air energy storage” and “CAES,” as used in this regulation, shall mean the compression and storage of air that is released and converted to energy for the production of electricity.

(b) Each person who proposes to construct, modify, or operate a CAES facility with a potential-to-emit that equals or exceeds the emissions thresholds, emissions limitations, or standards specified in K.A.R. 28-19-300 shall comply with the following upon application for a construction permit or approval:

(1) All applicable provisions of the Kansas air quality act and the Kansas air quality regulations as directed by the secretary; and

(2) for underground CAES facilities, any applicable regulations adopted by the Kansas corporation commission pursuant to K.S.A. 66-1274, and amendments thereto.

(c) Each person who proposes to construct or modify a CAES facility that includes underground storage and does not include energy production utilizing combustion shall meet the following requirements:

(1) Upon application for a construction permit or approval, the person shall comply with any applicable regulations adopted by the Kansas corporation commission pursuant to K.S.A. 66-1274, and amendments thereto.

(2) The person shall develop and submit to the department for approval, with the application for a construction permit or approval, a site emissions characterization plan that determines the types and quantities of any regulated pollutants that reasonably could be present. The site emissions characterization plan shall include the following:

(A) A list of volatile organic compounds and hazardous air pollutants, as defined in K.A.R. 28-19-201, that are or reasonably could be present in the proposed storage formation within the facility and that could be emitted as a result of the facility’s operations;

(B) the spatial characteristics of the proposed storage formation, including existing and proposed injection and withdrawal wells;

(C) a site characterization sampling plan that includes plans, either maps or diagrams, and a rationale for the following:

(i) Proposed sample types;

(ii) sampling locations;

(iii) number of samples; and

(iv) test methodologies;

(D) a quality assurance plan;

(E) the use of a laboratory approved by the secretary;

(F) any additional information that may be required by the department to fully characterize the site’s emissions;

(G) a schedule that includes a timeline for implementing the requirements prescribed in paragraph (c)(2); and

(H) existing information or knowledge about the proposed site or an adjacent site, as approved by the secretary, to complete, supplement, or take the place of any or all elements of the site emissions characterization plan prescribed in paragraph (c)(2).

(3)(A) If the site emissions characterization plan results indicate that emissions equal or exceed the emissions thresholds, emissions limitations, or standards specified in K.A.R. 28-19-300, the person proposing to construct or modify the CAES facility shall be subject to the applicable provisions of K.A.R. 28-19-300 through 28-19-350 for obtaining a construction permit or approval before commencing construction.

(B) If the person decides to proceed with the proposed CAES facility, the person shall submit the site emissions characterization plan results with an application for a construction permit or approval to the department.

(d)(1) The owner or operator of each CAES facility operating pursuant to a permit or approval issued by the department shall conduct emissions testing once every four calendar quarters in accordance with a sampling plan approved by the secretary. A certified copy of the test results signed by the person conducting the tests shall be provided to the department not later than 60 days after the end of the calendar quarter in which the emissions testing was conducted.

(2) The owner or operator may be required by the secretary to increase test frequency if emissions test results are close to or exceed an emissions limitation or an emissions threshold specified in a permit or approval issued by the secretary to the CAES facility.

(3) Upon written request by the owner or operator, decreased or suspended emissions testing may be approved by the secretary if the source demonstrates emissions test results significantly below emissions limitations or emissions thresholds specified in a permit or approval for three consecutive years.

(e)(1) The owner or operator of each CAES facility operating pursuant to a permit or approval issued by the department shall inspect the above-ground components of each CAES well and storage facility for liquid and vapor leaks at least once each calendar quarter. The owner or operator shall visually inspect for liquid leaks and shall test

for vapor leaks using test methods consistent with USEPA method 21 in 40 C.F.R. part 60, appendix A, as adopted by reference in K.A.R. 28-19-720, or an alternate method as demonstrated to the satisfaction of the secretary to be equivalent. Leak detection points to be inspected and tested shall include the following:

- (A) Valves;
- (B) flanges and other connections;
- (C) pumps and compressors;
- (D) pressure-relief devices;
- (E) process drains;
- (F) open-ended lines or valves;
- (G) seal system degassing vents and accumulator vents; and
- (H) access door seals.

(2) The owner or operator shall record the following information and keep the information available at the CAES facility for at least five years for department inspection or for submittal upon request by the department, which may include submittal with the emissions test results specified in subsection (d):

- (A) The total number and the locations of the leak detection points;
- (B) the date of each inspection;
- (C) the number of leak detection points inspected and the number of leaks detected for each inspection date;
- (D) the location of leaks detected for each inspection date; and
- (E) the date and type of each corrective action taken. (Authorized by K.S.A. 2009 Supp. 65-3005 and 66-1275; implementing K.S.A. 2009 Supp. 65-3005, K.S.A. 65-3007, 65-3008, 65-3010, and K.S.A. 2009 Supp. 66-1275; effective Nov. 29, 2010.)

28-19-350. Prevention of significant deterioration (PSD) of air quality. (a) PSD requirements. The requirements of this regulation shall apply to the construction of major stationary sources and major modifications of stationary sources as defined in 40 C.F.R. 52.21 in areas of the state designated as attainment areas or unclassified areas for any pollutant under the procedures prescribed by section 107(d) of the federal clean air act, 42 U.S.C. 7407(d).

- (b) Adoption by reference; exceptions.
 - (1) 40 C.F.R. 52.21, as revised on July 1, 2011 and as amended by 76 fed. reg. 43507 (2011) and 77 fed. reg. 65118-65119 (2012), is adopted by reference, except as specified in paragraph (b)(2).

(2) The following provisions of the federal regulation adopted in paragraph (b)(1) are excluded from adoption:

- (A) Plan disapproval, 52.21(a)(1);
- (B) stack heights, 52.21(h);
- (C) air quality analysis, 52.21(m)(1)(v);
- (D) visibility monitoring, 52.21(o)(3);
- (E) public participation, 52.21(q);
- (F) environmental impact statements, 52.21(s);
- (G) disputed permits or redesignations, 52.21(t);
- (H) delegation of authority, 52.21(u); and
- (I) permit rescission, 52.21(w).

(c) Provisions adopted by reference; term usage. When used in any provision adopted from 40 C.F.R. 52.21, each reference to “administrator” shall mean the “secretary of health and environment or an authorized representative of the secretary,” except for the following:

(1) In subsections 52.21(b)(3)(iii)(a) and 52.21(b)(48)(ii), “administrator” shall mean both the “secretary of health and environment” and the “administrator of USEPA.”

(2) In subsections 52.21(b)(17), 52.21(b)(37)(i), 52.21(b)(43), 52.21(b)(48)(ii)(c), 52.21(b)(50)(i), 52.21(b)(51), 52.21(g), 52.21(i)(6-8), 52.21(l)(2), and 52.21(m)(1)(vii -viii), “administrator” shall mean only the “administrator of USEPA.”

(d) Internal references.

The following portions of 40 C.F.R. part 51 are hereby adopted by reference:

(1) Subpart I, as revised on July 1, 2011 and as amended by 76 fed. reg. 43507 (2011) and 77 fed. reg. 65118 (2012);

(2) appendix S, as revised on July 1, 2011 and as amended by 77 fed. reg. 65118 (2012); and

(3) appendix W, as revised on July 1, 2011.

(e) Definitions. For the purposes of this regulation, the following definitions shall apply:

(1) “Act” shall mean the federal clean air act, 42 U.S.C. 7401 et seq.

(2) “Class I, II or III area” shall mean a classification assigned to any area of the state under the provisions of sections 162 and 164 of the act, 42 U.S.C. 7472 and 7474, and amendments thereto.

(3) “State” shall mean the state of Kansas, unless the context clearly indicates otherwise.

(f) Ambient air ceiling protection. In relation to ambient air ceilings, the following requirements shall apply:

(1) Except as stated in paragraph (f)(2) of this regulation, a permit shall not be issued for any new major stationary source or major modification as defined in 40 C.F.R. 52.21(b) if the source or

modification will be located in an attainment area or an unclassifiable area for any national ambient air quality standard and if the source or modification would cause or contribute to a violation of any national ambient air quality standard. A major source or major modification shall be considered to cause or contribute to a violation of a national ambient air quality standard if the air quality impact of the source or modification would exceed the following levels at any locality that does not or would not meet the applicable national standard:

Pollutant	Averaging Time				
	Annual	24hrs.	8hrs.	3hrs.	1hr.
Sulphur dioxide	1.0 µg/m ³	5 µg/m ³	-----	25 µg/m ³	-----
PM ₁₀	1.0 µg/m ³	5 µg/m ³	-----	-----	-----
PM _{2.5}	0.3 µg/m ³	1.2 µg/m ³	-----	-----	-----
Nitrogen dioxide	1.0 µg/m ³	-----	-----	-----	-----
Carbon dioxide	-----	-----	0.5 mg/m ³	-----	2 mg/m ³

(2) A permit may be granted for a major stationary source or major modification as identified in paragraph (f)(1) of this regulation if the impact of the major stationary source’s or major modification’s emissions upon air quality is reduced by a sufficient amount to compensate for any adverse impact at the location where the major source or modification would otherwise cause or contribute to a violation of any national ambient air quality standard. Subsection (f) shall not apply to a major stationary source or major modification with respect to a particular pollutant if the owner or operator demonstrates that the source is located in an area that has been identified as not meeting either the national primary or secondary ambient air quality standard for that particular pollutant.

(g) Stack height requirements. K.A.R. 28-19-18 through K.A.R. 28-19-18f, regarding stack height requirements, shall apply to the sources subject to this regulation.

(h) Application required. Each application for a PSD permit shall be submitted by the owner or operator on the forms provided or approved by the department. K.A.R. 28-19-300 through K.A.R. 28-19-304, regarding construction permit and approval requirements, shall apply to the sources subject to this regulation.

(i) Impact on federal class I areas; notification required. If the emissions from any proposed major stationary source or major modification subject to this regulation will affect any air quality-related values in any federal class I area, a copy of the permit application for the source or modification shall be transmitted by the secretary or an

authorized representative of the secretary to the administrator of USEPA through the appropriate regional office. The administrator, through the appropriate regional office, shall also be notified of every action taken concerning the application.

(j) Permit suspension or revocation. Any permit issued under this regulation may be suspended or revoked by the secretary upon a finding that the owner or operator has failed to comply with any requirement specified in the permit or with any other statutory or regulatory requirement. This subsection shall not be interpreted to preclude any other remedy provided by law to the secretary.

(k) Public participation requirements. In addition to the requirements of K.A.R. 28-19-204, the following public participation requirements shall be met before issuance of the permit:

(1) The public notice shall include the following:

(A) A statement specifying the portion of the applicable maximum allowable increment that is expected to be consumed by the source or modification; and

(B) A statement that the federal land manager of any adversely impacted federal class I area has the opportunity to provide the secretary with a demonstration that the emissions from the proposed source or modification will have an adverse impact on air quality-related values in the federal class I area.

(2) A copy of the public notice shall be mailed to the following:

(A) The applicant;

(B) the administrator of USEPA through the appropriate regional office;

(C) any state or local air pollution control agency having jurisdiction in the air quality control region in which the new or modified installation will be located;

(D) the chief executives of the city and county where the source will be located;

(E) any comprehensive regional land use planning agency having jurisdiction where the source will be located; and

(F) any state, federal land manager, or Indian governing body whose lands will be affected by emissions from the new construction or modification.

(3) In addition to those materials required to be available for public review at the appropriate district office or local agency, a summary analysis and discussion of those materials as they relate to establishing compliance with the requirements of this regulation shall be made available for public review.

(4) Copies of all comments received and the written determination of the secretary shall be made available for public inspection at the appropriate district office or local agency. (Authorized by K.S.A. 2011 Supp. 65-3005; implementing K.S.A. 2011 Supp. 65-3005 and K.S.A. 65-3008; effective Nov. 22, 2002; amended June 30, 2006; amended Oct. 23, 2009; amended Nov. 29, 2010; amended Dec. 28, 2012.)

GENERAL PERMITS

28-19-400. General permits; general requirements. (a) A general permit applicable to a similar category of emissions units or stationary sources required to obtain a permit by the Kansas air quality regulations may be adopted by the department subject to the following conditions:

(1) the department determines there are a sufficient number of potentially eligible sources to justify adoption of a general permit;

(2) the general permit requires compliance with all requirements of the Kansas air quality statutes, Kansas air quality regulations, and federal clean air act which are applicable to the category of sources covered by the general permit; and

(3) the general permit adoption process complies with all procedures and requirements applicable to the issuance of the corresponding class of construction or operating permit.

(b) A general permit shall have the same term as the corresponding class of construction or operating permit.

(c) Affected sources under title IV, acid deposition control, of the federal clean air act, shall not be eligible to operate under the terms of a general permit. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-401. General permits; adoption by the secretary. (a) Any source that is within the category of sources to which a general permit would apply may petition the secretary to adopt a general permit applicable to that category of sources.

(b) The petition for the adoption of a general permit shall be made on forms provided or approved by the department.

(c) Contents of the petition shall include, but not be limited to:

(1) all information required in the application for issuance of the class of construction or operating permit applicable to the category of sources covered by the proposed general permit;

(2) a description of the category of emissions units or stationary sources which would qualify for the general permit; and

(3) an estimate, and the basis for the estimate, of the number of stationary sources which would qualify for the general permit.

(d) The applicant shall provide such other information as is requested by the department.

(e) A general permit may be adopted by the secretary on the secretary's own motion.

(f) Filing a petition for the adoption of a general permit shall not be considered the filing of an application for the corresponding construction or operating permit in regards to any emissions unit or stationary source of the applicant.

(g) Before any person may apply to construct an emissions unit or stationary source pursuant to the terms of a general construction permit, the general construction permit shall be submitted to, and approved by, the USEPA as a modification to the state implementation plan pursuant to the requirements of section 110 of the federal clean air act. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-402. General permits; availability of copies; lists of sources to which permits issued. (a) Any person may obtain a copy of a general permit by making a request for a copy of the permit from the department.

(b) Any owner or operator who is constructing or operating an emissions unit or stationary source pursuant to the terms of a general permit shall be specified on a list maintained by the department stating:

(1) the name of the owner or operator;

(2) the category of emissions unit or stationary source operating pursuant to the general permit; and

(3) the permit number assigned by the department to the stationary source. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-403. General permits; application to construct or operate pursuant to terms of general permit. (a) Any person may apply to the department requesting authorization to construct or operate an emissions unit or stationary source pursuant to the terms of a general permit adopted by the secretary.

(b) The application shall be on forms provided or approved by the department.

(c) The application shall include, but not be limited to:

(1) information necessary to determine whether the emissions unit or stationary source qualifies for the general permit;

(2) a statement that the emissions unit or stationary source shall remain in compliance with all conditions, limitations and requirements of the general permit, and all other applicable requirements; and

(3) submission of the applicable application fee.

(d) The owner or operator of the emissions unit or stationary source shall provide such additional information as is requested by the department.

(e) The application shall be certified by a responsible official.

(f) The timely and complete submission of an application to construct or operate under the terms of a general permit adopted by the secretary shall be considered equivalent to the timely and complete filing of an application for the issuance of the appropriate construction or operating permit.

(g) The owner or operator of an emissions unit or stationary source which has been granted approval to construct or operate pursuant to a general permit shall not be shielded from enforcement action if it is subsequently determined that the emissions unit or stationary source did not qualify for the general permit.

(h) The grant or denial of an application to construct or operate under the terms of a general permit shall not be considered final agency action with regard to the terms of the general permit within the meaning of K.S.A. 77-601 through 77-627, the act for judicial review and civil enforcement of agency actions. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-404. General permits; modification; revocation. If a general permit is modified or revoked, the owner or operator of an emissions unit or stationary source which is authorized to operate pursuant to a general permit shall reapply for the general permit or submit a complete application for the appropriate permit within 12 months of the date of modification or revocation of the general permit unless a different time frame is specified by the department. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

OPERATING PERMITS

28-19-500. Operating permits; applicability. (a) A stationary source shall obtain a class I operating permit in accordance with the provisions of K.A.R. 28-19-510 if the stationary source is:

(1) a major source, except that a source is not required to obtain a permit if it would be classified as a major source solely because it has the potential-to-emit major amounts of a pollutant listed pursuant to section 112(r)(3) of the federal clean air act and is not otherwise required to obtain a permit under this regulation;

(2) an affected source;

(3) a solid waste incinerator unit required to obtain a permit pursuant to section 129(e) of the federal clean air act;

(4) subject to an emission limitation or standard under section 111 of the federal clean air act, new source performance standards, except for a stationary source which is exempt as provided in paragraph (h) of this regulation;

(5) subject to an emission limitation or standard under section 112 of the federal clean air act, hazardous air pollutants, except for a stationary source which is exempt as provided in paragraph (h) of this regulation. This provision shall not require a source to get a class I operating permit solely because it is subject to regulations or requirements under section 112(r) of the federal clean air act, prevention of accidental releases; or

(6) not a major source but is within a source category designated by the secretary as requiring a class I operating permit.

(b) A stationary source may avoid obtaining a class I operating permit by electing to reduce its potential-to-emit through any physical or operational limitation or use of pollution control equipment required by a class II operating permit. The potential-to-emit shall not be considered to be reduced until a class II permit has been issued to the source. A class II operating permit may be obtained in accordance with K.A.R. 28-19-540 by:

(1) submitting an application for a class II operating permit that contains operational restrictions or requirements for air pollution control equipment, or both;

(2) submitting an application to operate in accordance with the terms of a class II general operating permit issued pursuant to K.A.R. 28-19-400; or

(3) for those source categories identified in K.A.R. 28-19-561 through K.A.R. 28-19-563, sub-

mitting an application for a permit-by-rule in accordance with K.A.R. 28-19-542.

(c) Each commercial or medical waste incinerator which is not otherwise required to obtain an operating permit shall obtain a class III operating permit in accordance with the provisions of K.A.R. 28-19-575.
