(d) Each stationary source which is not otherwise required to obtain an operating permit but which is subject to any air quality regulatory emission limitation or standard shall obtain a class III operating permit in accordance with the provisions of K.A.R. 28-19-575. However, a stationary source shall not be required to obtain a class III operating permit pursuant to the terms of this subsection if the only emission limitations or standards applicable to the source are one or more of the following:

(1) K.A.R. 28-19-20 through K.A.R. 28-19-26, processing operation emissions;

(2) K.A.R. 28-19-30 through K.A.R. 28-19-32, indirect heating equipment emissions;

(3) K.A.R. 28-19-50, opacity requirements;

(4) K.A.R. 28-19-69, cutback asphalt;

(5) K.A.R. 28-19-70, leaks from gasoline delivery vessels and vapor collection systems;

(6) K.A.R. 28-19-72, gasoline dispensing facilities;

(7) 40 CFR part 60, subpart AAA, standards of performance for new residential wood heaters;

(8) 40 CFR 61.145, national emissions standard for asbestos, standard for demolition and renovation; or

(9) K.A.R. 28-19-750, hazardous air pollutants, if the source is an area source.

(e) Class I, II, and III permits.

(1) For purposes of the Kansas air quality act, a class I operating permit is a permit to operate an air contaminant emission stationary source.

(2) For purposes of the Kansas air quality act, a class II operating permit or a class III operating permit is an approval, rather than a permit, to operate an air contaminant emission stationary source.

(f) After the date an application for a class I, class II or class III operating permit is due, a person shall not operate an air emissions unit or stationary source for which the operating permit is required unless:

(1) an appropriate, valid operating permit has been issued for the air emissions unit or stationary source; or

(2) a complete application, including any required fee, for the appropriate operating permit is pending with the agency.

(g) An application for an operating permit for an emissions unit or stationary source may be submitted and processed simultaneously with the application for a construction permit or construction approval filed pursuant to K.A.R. 28-19-300 *et seq.* for that emissions unit or stationary source.

(h) Unless otherwise required by an applicable requirement, a stationary source which is not a major source, but which would be required to obtain a class I operating permit solely because of the provisions of paragraph (a)(4) or (a)(5) of this regulation, or both, is exempt from the requirement to obtain a class I operating permit until otherwise required by the department. Nothing in these regulations shall be interpreted to preclude any such air emission source from applying for and operating under the terms of a class I operating permit.

(i) Until such time as a stationary source is required to apply for a class I, class II, or class III operating permit, the stationary source shall be considered in compliance with this regulation if the source has a valid construction permit or approval or valid operating permit issued pursuant to the requirements of K.A.R. 28-19-300 *et seq.*, or its predecessor K.A.R. 28-19-14. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-501. Operating permits; emissions limitations and pollution control equipment for class I and class II operating permits; conditions. (a) The owner or operator of an emissions unit or stationary source may request an operational permit restriction or a permit condition requiring the use of air pollution control equipment, or both, which reduce the potential-to-emit of an emissions unit or stationary source.

(b) Operational restrictions specified in an operating permit shall reduce the potential-to-emit of an emissions unit or stationary source if:

(1) all restrictions imposed in the operating permit are at least as stringent as any other applicable limitations or restrictions contained in the state implementation plan;

(2) the restrictions do not waive, or make less stringent, any limitations, restrictions or requirements contained in or issued pursuant to the state implementation plan or that are otherwise federally enforceable; and

(3) the restrictions are permanent, quantifiable and otherwise enforceable as a practical matter.

(c) The owner or operator of an emissions unit or stationary source which is subject to operational restrictions set forth in a class I or class II operating permit, except as otherwise specifically required, shall maintain at the stationary source records demonstrating that the operational restrictions imposed have not been exceeded. Records shall be updated monthly, no later than the last day of the following calendar month.

(1) If, at the end of any calendar quarter, the monitored operational parameters demonstrate that actual operations have exceeded 85% of the operational restrictions for the past four calendar quarters, including the most recently completed calendar quarter, the owner or operator shall report the actual operations to the department for that period of time. The actual operations shall be reported in the same units as the operational restrictions specified in the operating permit. The report shall be submitted to the department within 45 days of the last day of the month following the conclusion of the calendar quarter.

(2) Exceeding operational restrictions.

(A) If, at any time, the actual operations of the emissions unit or stationary source exceed the operational restrictions specified in the operating permit, the owner or operator shall notify the department in writing, the notice to be mailed or delivered the first working day following discovery of exceeding any operating permit operational restriction.

(B) Within 60 days of discovery of exceeding the operational restrictions, the owner or operator of the stationary source shall submit to the department a compliance plan, signed by a responsible official, stating those actions being taken by the owner or operator to assure future compliance with the operational restrictions or to otherwise bring the stationary source into compliance with the permit or the Kansas air quality statutes and regulations.

(C) If appropriate, the owner or operator shall also file the appropriate application for a permit modification or a class I operating permit within 180 days of discovery of exceeding any operating permit operational restriction.

(D) Compliance with the requirements of subsection (c)(2) of this regulation does not shield the owner or operator from enforcement action for exceeding any operating permit operational restriction or for other violations of the Kansas air quality act or regulations.

(d) Except as otherwise authorized by the Kansas air quality regulations or the operating permit

issued to the source, air pollution control equipment identified in an operating permit shall reduce the potential-to-emit of an emissions unit or stationary source, either alone or in conjunction with an operational restriction, if the owner or operator of the emission unit or stationary source:

(1) continuously operates the air pollution control equipment while operating the associated emissions unit or units;

(2) develops, implements and maintains on-site a written maintenance plan to assure proper operation of the air pollution control equipment; and

(3) maintains a log showing the date of all routine or other maintenance, malfunction or repair of the air pollution control equipment, the nature of the action taken on such date, and any corrective action or preventative measures taken.

(e) Except in the case of a permit-by-rule issued pursuant to K.A.R. 28-19-542, when calculating the potential-to-emit, reductions in emissions due to operational restrictions or to air pollution control equipment shall reduce the potential-to-emit only if:

(1) the provisions of K.A.R. 28-19-204 have been satisfied;

(2) notice soliciting comments on the proposed restrictions is:

(A) given to the USEPA;

(B) placed in the *Kansas Register*; and

(C) except in the case of a general permit, placed in a newspaper of general circulation in the area in which the emissions unit or stationary source is, or will be, located, at least 30 days prior to issuance of the operating permit; and

(3) the USEPA is provided, in a timely manner, with a copy of the proposed and final class II operating permit. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-502. Operating permits; identical procedural requirements. (a) Upon the written request of the applicant and as approved by the department, procedural requirements for the issuance of an initial operating permit or modification of an operating permit which are identical to procedural requirements for the issuance of the construction permit for the new stationary source or the relevant modification, may be considered satisfied if accomplished during the construction permit issuance process.

(b) This regulation shall not be interpreted to relieve an applicant from the requirement to

timely file a complete application, appropriate application fee or any other information required by the department, when applying for an operating permit or modification to an operating permit. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

CLASS I OPERATING PERMITS

28-19-510. Class I operating permits; application timetable. A complete application, including any applicable application fee, shall be submitted to the department by the owner or operator of any stationary source specified in subsection (a) of K.A.R. 28-19-500, within the following time schedules:

(a) on or before the date specified by the department as published in the *Kansas Register* for any source which is existing on such date except as specified at subsection (b) of this regulation;

(b) for initial phase II acid rain permits as addressed in title IV, acid deposition control, of the federal clean air act, by January 1, 1996 for sulfur dioxide, and by January 1, 1998 for nitrogen oxides;

(c) on or before the date specified at K.A.R. 28-19-541(a) when applicable to any stationary source operating under a class II operating permit;

(d) within one year of the initial startup of any modification to an existing source that is not required to operate under a class I or class II operating permit if the modification increases the potential-to-emit of the stationary source above any major source threshold or if the modification would otherwise require the source to obtain a class I operating permit;

(e) within one year of the initial startup of any other stationary source which is required to obtain a class I operating permit;

(f) within one year after commencing operation for any stationary source required to meet the requirements of section 112(g) of the federal clean air act or for any stationary source required to have a construction permit pursuant to a requirement of the state implementation plan submitted to fulfill the requirements of part C or part D of title I of the federal clean air act. If an existing class I operating permit prohibits such construction or change in operation, a permit revision to the class I operating permit shall be issued before commencing such operation. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-511. Class I operating permits; application contents. (a) Applications for class I operating permits and renewals of class I operating permits shall be submitted in writing on forms provided or approved by the department.

(1) The original and two copies of the application, including all supporting documentation, shall be submitted to the department.

(2) An additional copy shall be submitted for each affected state.

(b) Except as provided in paragraph (h) of this regulation, an application for a class I operating permit shall include, but is not limited to, the following information:

(1) identifying information, including:

(A) company name and address or plant name and address if different from the company name;

(B) the owner's name and agent;

(C) the name and address of the responsible official; and

(D) the telephone number and names of plant site manager or contact person;

(2) a description of the stationary source's processes and products, by standard industrial classification code, including any associated with each alternate scenario identified by the applicant;

(3) all emissions, including fugitive emissions, of pollutants for which the source is major and all emissions, including fugitive emissions, of regulated pollutants.

(A) A permit application shall describe all emissions of regulated pollutants emitted from any emissions unit, except for insignificant activities, a list of which shall be maintained by the department, or insignificant emission levels.

(B) For insignificant activities which are exempt because of size or production rate, a list of such insignificant activities shall be included in the application.

(C) Information regarding an insignificant activity or emission shall not be omitted if the information is necessary to determine whether an applicable requirement applies or should be imposed.

(D) Additional information related to the emissions of air pollutants sufficient to verify which requirements are applicable to the source may be required by the department.

(E) For purposes of this subsection, insignificant emission levels include those from emissions units which do not have a potential-to-emit in excess of the following and for which no applicable requirement exists:

(i) the de minimis level for any hazardous air pollutant;

(ii) one hundred tons per year of carbon monoxide;

(iii) forty tons per year of nitrogen oxides;

(iv) forty tons per year of sulfur dioxide;

(v) twenty-five tons per year of particulate matter emissions;

(vi) fifteen tons per year of PM10 emissions;

(vii) forty tons per year of volatile organic compounds; or

(viii) 0.6 tons per year of lead;

(4) identification and description of all points of emissions described in paragraph (b)(3) of this regulation in sufficient detail to establish the applicability of requirements of the Kansas air quality act;

(5) emissions rates stated in tons per year and in such terms as are necessary to establish compliance consistent with any applicable standard reference test methods;

(6) the following information to the extent it is needed to determine or regulate emissions:

(A) fuels;

(B) fuel use;

(C) raw materials;

(D) production rates; and

(E) operating schedules;

(7) identification and description of air pollution control equipment and compliance monitoring devices or activities;

(8) limitations on source operations affecting emissions or any work practice standards, where applicable, for all regulated pollutants at the emissions unit or stationary source;

(9) any other information required by any applicable requirement, including information related to stack height limitations developed pursuant to K.A.R. 28-19-18 through 28-19-18f;

(10) calculations on which the information in paragraphs (b)(3) through (b)(9) of this regulation is based;

(11) the citation and a description of all applicable requirements and a description of or reference to any applicable test method for determining compliance with each applicable requirement;

(12) other specific information that may be necessary to implement and enforce other applicable requirements or to determine the applicability of such requirements;

(13) an explanation of any proposed exemptions from otherwise applicable requirements;

(14) additional information as determined to be necessary by the department to define alternative

operating scenarios identified by the applicant or to define other permit terms and conditions;

(15) a statement of whether the stationary source is obligated to register and submit a risk management plan pursuant to section 112(r) of the federal clean air act and, if so, whether the required submittal has been prepared and submitted to the appropriate authorities;

(16) a compliance plan for all emissions units or stationary sources. These compliance plan content requirements shall also be applicable to affected sources under title IV, acid deposition control, of the federal clean air act unless specifically superseded by statute or regulation. A compliance plan shall contain all of the following:

(A) a description of the compliance status of the emissions unit or stationary source with respect to all applicable requirements;

(B) a description as follows:

(i) for applicable requirements with which the emissions unit or stationary source is in compliance, a statement that the emissions unit or stationary source will continue to comply with such requirements;

(ii) for applicable requirements that will become effective during the permit term, a statement that the emissions unit or stationary source will meet such requirements on a timely basis;

(iii) for requirements for which the emissions unit or stationary source is not in compliance at the time of permit issuance, a narrative description of how the emissions unit or stationary source will achieve compliance with such requirements;

(iv) for any source that fails to verify in its application pursuant to K.A.R. 28-19-511(b)(15) that it has submitted a risk management plan in accordance with section 112(r) of the federal clean air act, a statement that the source will submit the required plan by a date specified in the permit;

(C) a compliance schedule as follows:

(i) for applicable requirements with which the emissions unit or stationary source is in compliance, a statement that the emissions unit or stationary source will continue to comply with such requirements;

(ii) for applicable requirements that will become effective during the permit term, a statement that the emissions unit or stationary source will meet such requirements on a timely basis. A statement that the emissions unit or stationary source will comply in a timely manner with any applicable requirements that become effective during the

permit term shall satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement;

(iii) a schedule of compliance for emissions units or stationary sources that are not in compliance with all applicable requirements at the time of permit issuance. The schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the emissions unit or stationary source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the emissions unit or stationary source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements on which it is based;

(D) a schedule for submission of certified progress reports no less frequently than every 6 months for emissions units or stationary sources required to have a schedule of compliance to remedy a violation; and

(E) a statement that failure to comply with any term of a compliance plan or compliance schedule shall be considered a violation of this regulation; and

(17) requirements for compliance certification, including the following:

(A) a certification of compliance with all applicable requirements by a responsible official consistent with paragraph (e) of this regulation and K.S.A. 65-3008(b) and amendments thereto;

(B) a statement of methods used for determining compliance, including a description of monitoring, recordkeeping, and reporting requirements and test methods;

(C) a schedule for submission of compliance certifications during the permit term, to be submitted no less frequently than annually, or more frequently if specified by the underlying applicable requirement or the department;

(D) a statement indicating the compliance status of the emission unit or stationary source with any applicable enhanced monitoring requirements and applicable compliance certification requirements; and

(E) a statement indicating that the stationary source is properly implementing any required risk management plan in accordance with section 112(r) of the federal clean air act.

(c) The owner or operator of the stationary source shall provide additional information requested by the department.

(d) The owner or operator of the stationary source may apply for restrictions of operating hours or restrictions on the type or amount of material combusted, stored or processed. The restrictions may be incorporated into the class I operating permit. The calculation of the potential-to-emit of the stationary source shall take into consideration such operational restrictions if the procedures set out at K.A.R. 28-19-501 were followed during the issuance of the construction or class I operating permit.

(e) Any application form, report, or compliance certification submitted pursuant to these regulations shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under the Kansas air quality act, and regulations promulgated thereunder, shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

(f) Any person who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as necessary to address any requirements that become applicable to the stationary source after the date a complete application was filed but prior to the solicitation of public comments regarding the proposed permit.

(g) Failure to comply with any term of a compliance plan or compliance schedule shall be considered a violation of this regulation.

(h) For any non-major or area source required to obtain a class I operating permit, an application shall address only the applicable requirements applicable to emission units that cause the source to require a class I operating permit. These non-major or area sources shall be subject to an application fee of \$50.00 in lieu of the requirements of K.A.R. 28-19-516. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3008; effective Jan. 23, 1995; amended Dec. 8, 1995.)

28-19-512. Class I operating permits; permit content. (a) The owner or operator of a stationary source which is authorized to operate

pursuant to a class I operating permit shall assure that the stationary source operates in compliance with the terms and conditions of the class I operating permit, which shall include, but are not limited to:

(1) emission limitations and standards, including those operational requirements and limitations that assure compliance with all applicable requirements at the time of permit issuance;

(2) all applicable requirements for all relevant emissions units for a major source;

(3) all applicable requirements applicable to emissions units that cause a non-major source to require a class I operating permit;

(4) a description of fugitive emissions in the same manner as stack emissions, regardless of whether the source is a federally designated fugitive emissions source;

(5) specification and reference to the origin of and authority for each term or condition, identifying any difference in form as compared to the applicable requirement upon which the term or condition is based;

(6) where an applicable requirement of any other title of the federal clean air act is more stringent than an applicable requirement of regulations promulgated under title IV, acid deposition control, of the federal clean air act, both provisions;

(7) where a permit contains an emission limitation which is authorized by the state implementation plan and is an alternative to an emission limitation contained in the state implementation plan, provisions to ensure that any resulting emissions limitation has been demonstrated to be quantifiable, enforceable, and based on replicable procedures;

(8) specification of a fixed term of the class I operating permit determined pursuant to K.A.R. 28-19-514;

(9) emissions monitoring and related record-keeping and reporting requirements, including:

(A) all emissions monitoring and analysis procedures or test methods required under the applicable requirements, including any procedures and methods adopted to comply with the requirements of section 504(b), permit requirements and conditions, or section 114(a)(3), enhanced monitoring and compliance certifications, of the federal clean air act;

(B) periodic monitoring sufficient to yield reliable data from the relevant time period that are representative of the source's compliance with the permit, as reported pursuant to paragraph (a)(8)

of this regulation where the applicable requirement does not require periodic testing or instrumental or non-instrumental monitoring, which may consist of recordkeeping designed to serve as monitoring. The monitoring requirements shall assure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the applicable requirement; and

(C) as necessary, requirements concerning the use, maintenance, and, where appropriate, installation of monitoring equipment or methods;

(10) applicable recordkeeping requirements and required monitoring information, including:

(A) the date, place as defined in the permit, and time of sampling or measurements of required monitoring information;

(B) the date or dates analyses were performed;

(C) the company or entity that performed the analyses;

(D) the analytical techniques or methods used;

(E) the results of such analyses;

(F) the operating conditions as existing at the time of sampling or measurement; and

(G) the retention of records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, report, or application. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit;

(11) applicable reporting requirements, including:

(A) submittal of reports of any required monitoring at least every 6 months. All instances of deviations from permit requirements shall be clearly identified in such reports. All required reports shall be certified by a responsible official consistent with K.A.R. 28-19-511(e); and

(B) as specified in the permit, prompt reporting of deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of such deviations, and any corrective actions or preventive measures taken;

(12) conditions prohibiting emissions exceeding any allowances that the emissions unit or stationary source lawfully holds under title IV, acid deposition control, of the federal clean air act or the regulations promulgated thereunder.

(A) A permit revision shall not be required for increases in emissions that are authorized by al-

lowances acquired pursuant to title IV, acid deposition control, of the federal clean air act, provided that such increases do not require a permit revision under any other applicable requirement.

(B) A limit shall not be placed on the number of allowances held by the emissions unit or stationary source. The emissions unit or stationary source shall not, however, use allowances as a defense to noncompliance with any other applicable requirement.

(C) Any allowance shall be accounted for according to the procedures established in regulations promulgated under title IV, acid deposition control, of the federal clean air act;

(13) a severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portion of the permit;

(14) provisions stating that:

(A) the permittee must comply with all conditions of the permit. Any permit noncompliance shall constitute a violation of the Kansas air quality act and shall be grounds for enforcement action, for permit revocation or amendment, or for denial of a permit renewal application;

(B) it shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit;

(C) the permit may be modified, revoked, reopened and reissued, or terminated for cause. An action for a permit modification or amendment, or of a notification of planned changes or anticipated noncompliance shall not stay any permit condition;

(D) the permit shall not convey any property rights of any sort, or any exclusive privilege; and

(E) the permittee shall furnish to the department, within a reasonable time, any information that the department may request in writing to determine whether cause exists for amending or revoking the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the department copies of records required to be kept by the permit;

(15) a provision to ensure that the owner or operator of a permitted emissions unit or stationary source pays fees to the permitting authority consistent with the fee schedule set out in these regulations;

(16) a provision stating that no permit revision shall be required under any approved economic incentives, pollution prevention incentives, mar-

ketable permits, emissions trading and other similar programs or processes for changes that are provided for in the permit;

(17) terms and conditions for reasonably anticipated operating scenarios identified by the owner or operator of the emissions unit or stationary source in its application as approved by the department. The terms and conditions:

(A) shall require the source, contemporaneously with making a change from one operating scenario to another, to record in a log at the permitted facility a record of the scenario under which it is operating;

(B) may extend the permit shield described in paragraph (b) of this regulation to all terms and conditions under each such operating scenario; and

(C) shall ensure that the terms and conditions of each such alternative scenario meet all applicable requirements and the requirements of this part;

(18) terms and conditions, if the permit applicant requests them, for the trading of emissions increases and decreases in the permitted facility, to the extent that the applicable requirements provide for such trading without a case-by-case approval of each emissions trade. The source shall provide the department and the USEPA with written notice at least seven days in advance of any proposed change within the source stating when the change will occur, the changes in emissions that will result, and how the emissions decreases or increases will comply with the terms and conditions of the permit. The terms and conditions:

(A) shall include all terms required under subsection (a) of this regulation to determine compliance;

(B) may extend the permit shield described in paragraph (b) of this regulation to all terms and conditions that allow such increases and decreases in emissions; and

(C) shall meet all applicable requirements and requirements of the Kansas air quality regulations;

(19) provisions that designate as not being federally enforceable under the federal clean air act any terms and conditions included in the permit that are not required under the federal clean air act or under any of its applicable requirements;

(20) a statement of all federally enforceable permit restrictions;

(21) consistent with other relevant subsections of this regulation, certification, testing, monitoring, reporting, and recordkeeping requirements sufficient to assure compliance with the terms and

conditions of the permit. Any document, including reports, required by the permit shall contain a certification by a responsible official that meets the requirements of K.A.R. 28-19-511(e);

(22) inspection and entry requirements that require that, upon presentation of credentials and other documents as may be required by law, the permittee shall allow the department or an authorized representative to:

(A) enter upon the permittee's premises where the emissions unit or stationary source is located or emissions-related activity is conducted, or where records shall be kept under the conditions of the permit;

(B) have access to and copy, at reasonable times, any records that shall be kept under the conditions of the permit;

(C) inspect at reasonable times any facilities, equipment including monitoring and air pollution control equipment, practices, or operations regulated or required under the permit; and

(D) as authorized by the Kansas air quality act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements;

(23) a schedule of compliance consistent with the requirements of K.A.R. 28-19-511(b)(16)(C);

(24) progress reports consistent with any applicable schedule of compliance established pursuant to K.A.R. 28-19-511(b)(16)(D) to be submitted at least semiannually, or at a more frequent period if specified in the applicable requirement or by the permitting authority. The progress reports shall contain the following:

(A) dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

(B) an explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted;

(25) requirements for compliance certification with the terms and conditions contained in the permit, including:

(A) emission limitations, standards or work practices, and risk management plan implementation; and

(B) a means of monitoring the compliance of the emissions unit or stationary source with its emissions limitations, standards, and work practices in accordance with the relevant provisions of this regulation;

(26) requirements to submit compliance certifications annually or more frequently as specified in the applicable requirement or by the department, which shall include the following:

(A) the identification of each term or condition of the permit that is the basis of the certification;

(B) the compliance status;

(C) whether compliance was continuous or intermittent;

(D) the method or methods used for determining the compliance status of the emissions unit or stationary source, currently and over the reporting period, consistent with relevant provisions of this regulation; and

(E) other facts as the department may require to determine the compliance status of the source;

(27) a requirement that all compliance certifications be submitted to the USEPA as well as to the department;

(28) a requirement for additional monitoring as may be required by the federal clean air act; and

(29) other provisions as the department deems necessary to accomplish the purposes of the Kansas air quality act.

(b) Permit shield.

(1) Except as otherwise provided in the air quality regulations, the department may expressly include in a class I operating permit a permit shield stating that compliance with the conditions of the permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that:

(A) the applicable requirements are included and are specifically identified in the permit; or

(B) the department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the emissions unit or stationary source, and the permit includes the determination or a concise summary thereof.

(2) A permit that does not expressly state that a permit shield exists shall be presumed not to provide a shield.

(3) Nothing in this regulation or in any permit shall alter or affect the following:

(A) the provisions of section 303, emergency orders, of the federal clean air act, including the authority of the administrator of the USEPA under that section or the air pollution emergency provisions of the Kansas air quality regulations, K.A.R. 28-19-55 through 28-19-58;

(B) the liability of an owner or operator of an emissions unit or stationary source for any viola-

tion of applicable requirements prior to or at the time of permit issuance;

(C) the applicable requirements of title IV, acid deposition control, of the federal clean air act, consistent with section 408(a) of the federal clean air act; or

(D) the ability of the USEPA to obtain information from a source pursuant to section 114, inspections, monitoring and entry, of the federal clean air act.

(c) Portable sources. A permit for a portable emissions unit or stationary source may authorize similar operations by the same source owner or operator at multiple temporary locations. The operation shall be temporary and involve at least one change of location during the term of the permit. An affected source shall not be permitted as a portable source. Permits for portable sources shall include the following:

(1) conditions that will assure compliance with all applicable requirements at all authorized locations:

(2) requirements that the owner or operator notify the permitting authority at least 10 days in advance of each change in location; and

(3) conditions that assure compliance with all other provisions of the Kansas air quality regulations.

(d) Emergencies.

(1) An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

(2) An emergency shall constitute an affirmative defense to an action brought for noncompliance with such technology-based emission limitations if the conditions of paragraph (d)(3) of this regulation are met.

(3) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:

(A) an emergency occurred and that the permittee can identify the cause or causes of the emergency;

(B) the permitted facility was at the time being properly operated;

(C) during the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in the permit; and

(D) the permittee submitted notice of the emergency to the department within two working days of the time when emission limitations were exceeded due to the emergency. This notice shall fulfill the requirement of paragraph (a)(11)(B) of this regulation. This notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.

(4) In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency shall have the burden of proof.

(5) This provision shall be in addition to any emergency or upset provision contained in any applicable requirement. Whenever the provisions of this regulation regarding emergencies conflict with the provisions of K.A.R. 28-19-11, the provisions of this regulation shall control. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3008; effective Jan. 23, 1995; amended Dec. 8, 1995.)

28-19-513. Class I operating permits; permit amendment, modification or reopening and changes not requiring a permit action.

(a) The provisions of this subsection shall apply to administrative permit amendments.

(1) An "administrative permit amendment" is a permit revision that:

(A) corrects typographical errors;

(B) identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;

(C) requires more frequent monitoring or reporting by the permittee;

(D) allows for a change in ownership or operational control of a source where the department determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the department; or

(E) incorporates into the class I operating permit the requirements from a preconstruction review permit authorized under K.A.R. 28-19-300 *et seq.*, construction permits and approvals, pro-

vided that the preconstruction review procedural requirements are substantially equivalent to the requirements applicable to a permit modification, and compliance requirements substantially equivalent to those contained in K.A.R. 28-19-512.

(2) Administrative permit amendments for purposes of the acid rain portion of the permit shall be governed by regulations promulgated under title IV, acid deposition control, of the federal clean air act.

(3) Any other revision to a permit shall be considered a permit modification or reopening.

(4) An administrative permit amendment may be made by the department without providing notice to the public or affected states provided that it designates any such permit amendment as having been made pursuant to this subsection (a).

(5) The emissions unit or stationary source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.

(6) The department may, upon taking final action granting a request for an administrative permit amendment, allow coverage by the permit shield in K.A.R. 28-19-513(b) for administrative permit amendments made pursuant to paragraph (a)(1)(E) of this regulation which meet the relevant requirements pertaining to permit requirements, permit amendment, modification, reopening or change, or review by the USEPA and affected states for significant permit modifications.

(b)(1) Any revision to a permit that is not accomplished as an administrative permit amendment or reopening shall be considered a permit modification.

(A) A permit modification may be either minor or significant.

(B) A permit modification for purposes of the acid rain portion of the permit shall be governed by regulations promulgated under title IV, acid deposition control, of the federal clean air act.

(2) A permit modification may be issued only if all of the following conditions have been met:

(A) Except for modifications qualifying for minor permit modification procedures, compliance with the requirements for public participation pursuant to K.A.R. 28-19-515(a);

(B) compliance with the requirements for affected state participation pursuant to K.A.R. 28-19-515(b);

(C) the permit, as modified, provides for compliance with all applicable requirements and the requirements of the Kansas air quality regulations; and

(D) compliance with the requirements for USEPA participation pursuant to K.A.R. 28-19-515(c) and K.S.A. 1993 Supp. 65-3008b(7)(g).

(c) The provisions of this subsection shall apply to minor permit modifications.

(1) Minor permit modification procedures shall only be used for those permit modifications that:

(A) do not violate any applicable requirement;

(B) do not involve significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit;

(C) do not require or change a case-by-case determination of an emission limitation or other standard, a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;

(D) do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. The terms and conditions shall include:

(i) a federally enforceable emissions cap assumed to avoid classification as a modification under any provision of title I, air pollution prevention and control, of the federal clean air act; and

(ii) an alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5), early reductions, of the federal clean air act;

(E) are not modifications under any provision of title I, air pollution prevention and control, of the federal clean air act; and

(F) are not required to be processed as a significant modification.

(2) Minor permit modification procedures may also be used for permit modifications involving the use of economic incentives, marketable permits, pollution prevention incentives, emissions trading, and other similar approaches, to the extent that such minor permit modification procedures are explicitly provided for in the state implementation plan.

(3) An application requesting the use of minor permit modification procedures shall meet the requirements of K.A.R. 28-19-511 and shall include the following:

(A) a description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;

(B) the suggested draft permit for the emissions unit or stationary source;

(C) certification by a responsible official, consistent with K.A.R. 28-19-511(d), that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used; and

(D) completed forms for the department to use to notify the administrator of the USEPA and any affected states.

(4) The emissions unit or stationary source may make the change proposed in its minor permit modification application immediately after it files such application with the department. After the emissions unit or stationary source makes that change, and until the department takes any action in regard to the minor permit modification application, the emissions unit or stationary source shall comply with both the applicable requirements governing the change and the proposed permit terms and conditions. During this time period, the emissions unit or stationary source shall not be required to comply with the existing permit terms and conditions it seeks to modify. However, if the emissions unit or stationary source fails to comply with its proposed permit terms and conditions during this time period, the existing permit terms and conditions it seeks to modify may be enforced against it. This subsection shall also apply to modifications eligible for group processing.

(5) The permit shield provisions of K.A.R. 28-19-512(b) shall not extend to minor permit modifications.

(6) The procedure outlined in paragraph (c)(3) of this regulation may be modified by the department to process groups of an emission unit's or stationary source's applications for certain modifications eligible for minor permit modification processing. Group processing of modifications shall only be used for those permit modifications that meet the criteria for minor permit modification procedures and that are collectively below whichever of the following amounts is the least:

(A) 10 percent of the emissions allowed by the permit for the emissions unit for which the change is requested;

(B) 20 percent of the applicable definition of major source in 40 CFR §70.2, as in effect July 1, 1993; or

(C) 5 tons per year.

(7) Each application requesting the use of group processing procedures shall meet the requirements of K.A.R. 28-19-511(b) and shall include the following:

(A) a description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;

(B) the suggested draft permit of the emission unit or stationary source;

(C) certification by a responsible official, consistent with K.A.R. 28-19-511(e), that the proposed modification meets the criteria for use of group processing procedures and a request that such procedures be used;

(D) a list of any other pending applications of that emission unit or stationary source that are awaiting group processing and a determination of whether the requested modification, aggregated with these other applications, equals or exceeds the threshold;

(E) certification, consistent with the requirements of K.A.R. 28-19-511(e), that the source has notified the USEPA of the proposed modification. The notification shall only be required to contain a brief description of the requested modification; and

(F) completed forms for the department to use to notify the administrator of the USEPA and affected states.

(8) The permit shield shall not apply to modifications eligible for group processing.

(9) An application for a minor permit modification shall be acted upon within 90 days of receipt by the department. An application for group processing of minor permit modifications shall be acted upon within 180 days of receipt by the department.

(d) The provisions of this subsection shall apply to significant permit modifications.

(1) Significant permit modification procedures shall be used for each application requesting any permit modification that does not qualify as a minor permit modification, an administrative amendment or a reopening.

(2) Significant permit modifications shall include, but shall not be limited to, every significant change in existing monitoring permit terms or conditions and every relaxation of reporting or recordkeeping permit terms or conditions. Nothing herein shall be construed to preclude the permittee from making changes consistent with this article that would render existing permit compliance terms and conditions irrelevant.

(3) Each significant permit modification application shall be subject to the provisions of K.A.R. 28-19-511.

(4) Each significant permit modification shall meet all requirements of the Kansas air quality

regulations, including those for applications, public participation, review by affected states, and review by EPA, as they apply to class I operating permit issuance and permit renewal.

(e) The provisions of this subsection shall apply to reopening of a permit.

(1) Each issued permit shall be subject to provisions specifying the conditions under which the permit will be reopened prior to the expiration of the permit. A permit shall be reopened and revised under any of the following circumstances:

(A) additional applicable requirements under the federal clean air act become applicable to an emissions unit or stationary source with a remaining permit term of 3 or more years. A reopening shall not be required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended;

(B) additional requirements, including excess emissions requirements, become applicable to an affected source under title IV, acid deposition control, of the federal clean air act. Upon approval by the administrator of the USEPA, excess emissions offset plans shall be deemed to be incorporated into the permit;

(C) it is determined by the department that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit;

(D) it is determined by the department that it is necessary to revise or revoke a permit in order to assure compliance with the applicable requirements.

(2) Proceedings to reopen and issue a permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of the permit for which cause to reopen exists.

(3) Reopenings under this subsection (e) shall not be initiated before a notice of intent to reopen is provided to the owner or operator of the emissions unit or stationary source by the department at least 30 days in advance of the date that the permit is to be reopened, except that the department may provide a shorter time period in the case of an emergency.

(f)(1) A source which is operating pursuant to a class I operating permit may, without making application for a permit amendment or modification, make changes within the facility that:

(A) are not modifications under any provision of title I, air pollution prevention and control, of the federal clean air act;

(B) do not cause emissions in excess of any emissions limit stated in the class I operating permit; and

(C) do not alter conditions of the permit that address requirements for:

- (i) monitoring (including test methods);
- (ii) record-keeping;
- (iii) reporting; or
- (iv) compliance certification requirements.

(2) Prior to making a change pursuant to the preceding paragraph, the facility shall provide the department and the USEPA written notification at least seven days in advance of implementing the proposed change.

(A) The stationary source, the department and the USEPA shall attach the notice to their copy of the relevant permit.

(B) For each such change, the written notification required above shall include:

- (i) a brief description of the change within the permitted facility;
- (ii) the date on which the change will occur;
- (iii) any change in emissions;
- (iv) and any permit term or condition that is no longer applicable as a result of the change.

(3) The permit shield provisions of K.A.R. 28-19-512(b) shall not apply to any change made under the provisions of subsection (f) of this regulation.

(g)(1) A stationary source which is operating pursuant to a class I operating permit may, without a permit modification, make changes to the stationary source if the changes are either:

(A) not subject to any requirement under any provision of title IV of the federal clean air act, acid deposition control; or

(B) not modifications under any provision of title I of the federal clean air act, air pollution prevention and control.

(2) Each change made at the stationary source without a permit modification pursuant to this subsection shall be subject to the following provisions.

(A) The change shall meet all applicable requirements and shall not violate any existing permit term or condition.

(B) The owner or operator shall provide contemporaneous written notice to the department and the USEPA of the change, except for changes that qualify as insignificant under the provisions of K.A.R. 28-19-511(b)(3). The written notice shall describe the change, including the date of the change, all regulated pollutants emitted, any

change in emissions, and any applicable requirement that would apply as a result of the change.

(3) The change shall not qualify for the permit shield under K.A.R. 28-19-512(b).

(4) The owner or operator shall keep a record describing changes made at the stationary source that result in emissions of a regulated pollutant subject to an applicable requirement that are not otherwise regulated under the permit, and the emissions resulting from those changes. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-514. Class I operating permits; permit term; renewal. (a) Permit term. Each class I operating permit shall specify the expiration date of the permit.

(1) Class I operating permits issued to solid waste incineration units combusting municipal waste subject to standards under section 129(e) of the federal clean air act, shall have a maximum term of 12 years from the date of issuance and shall be reviewed by the department every five years.

(2) Class I operating permits issued to affected sources shall have a term of five years.

(3) All other class I operating permits shall have a maximum term of five years from the date of issuance.

(b) The class I operating permit shall not expire on the expiration date if a complete application, as defined at K.A.R. 28-19-518, for renewal of the current permit, including any applicable application fee, has been submitted to the department not less than six months and not more than eighteen months before the expiration date of the permit. In such case, the class I operating permit shall expire on the earliest of the following dates:

- (1) any date the application is determined incomplete subsequent to the expiration date;
- (2) the date the permit is renewed;
- (3) the effective date of any new operating permit if a different class of operating permit is issued for the stationary source;

(4) the date the department determines the stationary source does not require an operating permit; or

(5) if the department's action on the application is unfavorable, the last day for seeking judicial review of the department's action.

(c) The application for renewal of a class I operating permit shall be in writing and made on forms provided or approved by the department.

(d) An application for renewal of a class I operating permit shall be consistent with the requirements of K.A.R. 28-19-511. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-515. Class I operating permits; public participation, affected state participation, and USEPA participation. (a) Except for administrative permit amendments or modifications qualifying for minor permit modification procedures, all permit proceedings, including initial permit issuance, significant modifications, and renewals, shall provide adequate procedures for public notice including offering an opportunity for public comment and an opportunity for a public hearing on the proposed permit. In addition to procedures specified at K.A.R. 28-19-204, the procedures shall include the following requirements.

(1) Notice shall be given to persons on a mailing list developed by the department, including those who request in writing to be on the list and by other means if necessary to assure adequate notice to the affected public.

(2) The notice shall identify the emissions change involved in any permit modification.

(3) The notice shall state that prior to the issuance of the permit, permit modification, or permit renewal, the USEPA has the right to object to issuance of the permit. The notice shall further state that if the USEPA fails to object to issuance of the permit within 45 days of receipt of the permit which the department proposes to issue, a person may petition the administrator of the USEPA to review the permit by filing a petition with the administrator of the USEPA within 60 days of the expiration of the USEPA's 45 day review period.

(4) Notice and opportunity for participation by affected states shall be provided pursuant to subsection (b) of this regulation.

(5) A record of the commenters and of the issues raised during the public participation process shall be made so that the USEPA may fulfill its obligation under section 505(b)(2) of the federal clean air act to determine whether a citizen petition may be granted, and such records shall be available to the public.

(b)(1) Notice of each proposed permit, permit renewal, or permit modification shall be provided to any affected state on or before the time that notice is provided to the public under subsection (a)

of this regulation, except to the extent minor permit modification procedures or group processing of minor permit modification procedures require the timing of the notice to be different.

(2) As part of the submittal of the proposed permit to the USEPA, or as soon as possible after the submittal for minor permit modification procedures allowed under K.A.R. 28-19-513(c), the USEPA and any affected state shall be notified by the department in writing of any refusal to accept all recommendations for the proposed permit that the affected state submitted during the public or affected state review period.

(A) The notice shall include the reasons for not accepting any such recommendation.

(B) The department shall not be required to accept recommendations that are not based on applicable requirements, the requirements of 40 CFR part 70, or the requirements of the Kansas air quality regulations.

(c) Unless waived by the USEPA, the USEPA shall be provided a copy of each permit application including any application for permit modification, each proposed permit, and each final class I operating permit. The applicant may be required by the department to submit a copy of the permit application, including the compliance plan, directly to the USEPA.

(d) Any person may request a copy of the statement developed by the department and submitted to the USEPA that sets forth the legal and factual basis for the proposed permit conditions, including references to the applicable statutory or regulatory provisions.

(e) Copies of the proposed permit, the application, all relevant supporting materials, including any compliance plan and compliance certification, and all other materials available to the department that are relevant to the permit decision shall, upon request, be furnished without charge to the USEPA and any affected state. Any other person requesting copies of such documentation shall pay a fee equal to that regularly charged by the department for copying of documents. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-516. Class I operating permits; application fees. (a) Each of the following class I operating permit applications shall be accompanied by the fee specified in this subsection:

(1) For an initial application submitted under K.A.R. 28-19-510, \$3,000.00;

(2) for a renewal application submitted under K.A.R. 28-19-514, \$3,000.00;

(3) for an application for a significant permit modification submitted under K.A.R. 28-19-513, \$1,500.00;

(4) for a general permit petition submitted under K.A.R. 28-19-401, \$2,250.00; and

(5) for a general permit application submitted under K.A.R. 28-19-403, \$750.00.

(b) Each application fee shall be remitted in the form of a check, bank draft, credit card payment, or money order made payable to the Kansas department of health and environment. All application fees shall be nonrefundable. (Authorized by K.S.A. 2017 Supp. 65-3005; implementing K.S.A. 2017 Supp. 65-3008; effective Jan. 23, 1995; amended Jan. 5, 2018.)

28-19-517. Class I operating permits; annual emissions inventory and fees. The owner or operator of each stationary source that is required to apply for a class I operating permit shall comply with this regulation.

(a) Annual emissions inventory.

(1) Each owner or operator shall submit to the department an annual emissions inventory for each stationary source for the year preceding the calendar year in which the source is required to apply for an operating permit and each year thereafter.

(2) Each annual emissions inventory shall be submitted for any regulated pollutant deemed necessary by the secretary from each emission unit, as defined in K.A.R. 28-19-200, and shall include the following:

(A) All operating information;

(B) actual emissions, including fugitive emissions, calculated pursuant to K.A.R. 28-19-210;

(C) any quantity of emissions regardless of operating hours, including sources that did not operate; and

(D) emissions from each source only while operating in Kansas, if the source operates both in Kansas and out of state.

(b) Annual emissions fee.

(1) Each owner or operator shall submit to the department an annual emissions fee based on the annual emissions inventory determined under subsection (a). Annual emissions fees shall be the greater of the following:

(A) \$1,000.00; or

(B) \$53.00 per ton of emissions multiplied by the total number of tons of emissions, with a maximum

of 4,000 tons of each of the following pollutants rounded to the nearest ton:

(i) Sulfur dioxide;

(ii) nitrogen oxides;

(iii) PM10;

(iv) volatile organic compounds (VOCs); and

(v) hazardous air pollutants (HAPs), excluding HAPs already accounted for as VOCs or PM10.

(2) Each owner or operator shall make annual emissions fee payments by check, bank draft, credit card, or money order payable to the Kansas department of health and environment.

(c) Submittal.

(1) Each annual emissions inventory determined under subsection (a) and each annual emissions fee determined under subsection (b) shall be submitted on forms provided by the department, using either of the following:

(A) An electronic inventory submission; or

(B) a paper inventory submission, including a fee of \$250.00 for each paper inventory submittal and \$10.00 for each single-sided page.

(2) Each submission shall be signed by a responsible official, as defined in K.A.R. 28-19-200, and shall be due on or before April 1 of each year or, if April 1 is a Saturday or Sunday, on or before the next business day following April 1.

(3) If there is a change in the owner or operator of the stationary source, the owner or operator at the time the submission is due shall be responsible for submitting the annual emissions inventory and fee payment. For purposes of determining the annual emissions inventory required by subsection (a) for any period in which there was any other owner or operator of the stationary source, the owner or operator may assume current operating and emission information if the owner or operator is unable to obtain actual information from any previous owner or operator.

(d) Late fee and refund.

(1) Each owner or operator who fails to submit the annual emissions inventory and pay the annual emissions fee by the due date specified in subsection (c) shall pay a late fee. The late fee shall be \$200.00 per day or 0.10 percent of the annual emissions fee per day, whichever is greater.

(2) Any overpayment of \$100.00 or more made by the owner or operator of a stationary source may be refunded. Overpayments in any amount less than \$100.00 shall not be refunded. (Authorized by K.S.A. 2017 Supp. 65-3005 and 65-3024; implementing K.S.A. 65-3007 and K.S.A. 2017 Supp. 65-3024; effective Jan. 23, 1995; amended

Feb. 20, 1998; amended Sept. 23, 2005; amended Nov. 5, 2010; amended Jan. 5, 2018.)

28-19-518. Class I operating permits; complete applications. (a) An application for the issuance, renewal or significant modification of a class I operating permit that is timely filed and deemed complete shall have the effect of allowing the emissions unit or stationary source to continue to operate in the same legal capacity as on the date the application is deemed complete until such time as final agency action is taken on the application or until such time as the application is subsequently deemed incomplete.

(b) An application for a class I or class II operating permit shall be deemed complete as of the date the application was submitted to the department if:

(1) the department determines that the information submitted by the applicant substantially complies with the requirements of K.A.R. 28-19-511 and notifies the applicant, in writing within 60 days after the application was submitted, that the application has been deemed complete;

(2) after an application has been deemed complete, the applicant submits additional information requested in writing by the department within the time-frame specified by the department or within 60 days of the date of the request if no time-frame is specified by the department; or

(3) the department fails to notify the applicant that the application is not complete within the time-frames specified in paragraphs (b)(1) and (b)(2) of this regulation.

(c) The department may request additional information from the applicant even though the department has previously deemed the application to be complete. Failure of the applicant to submit any additional information the department has requested in writing within the time-frame specified in the request, or within 60 days of the date of the request if no time-frame is specified, shall result in the application being deemed incomplete as of the date the requested information was to be submitted, even though the application may have been deemed complete prior to the date the additional information was to be submitted to the department.

(d) For purposes of this regulation, a document shall be considered submitted to the department on the day it is physically delivered to the department or the date of the post mark if the document is mailed to the department.

(e) Any person who fails to submit any relevant facts or who has submitted incorrect information in an application for the issuance, renewal or significant modification of a class I operating permit shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, the owner or operator shall submit to the department such additional information as is necessary to address any requirements that become applicable to the emissions unit or stationary source after the date a complete application was filed but prior to the date the permit is placed on public notice. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3008; effective Jan. 23, 1995; amended Dec. 8, 1995.)

CLASS II OPERATING PERMITS

28-19-540. Class II operating permits; applicability. The owner or operator of a stationary source which would otherwise require a class I operating permit may submit an application for a class II operating permit for the stationary source requesting the potential-to-emit of the stationary source be limited below the major source threshold. The potential-to-emit of the stationary source may be limited:

(a) through:

(1) the reduction of emissions by restricting operating hours or the type or amount of material combusted, stored or processed in accordance with K.A.R. 28-19-501;

(2) a permit restriction pursuant to K.A.R. 28-19-300, or its predecessor K.A.R. 28-19-14;

(3) the reduction of emissions by air pollution control equipment maintained in accordance with the requirements of K.A.R. 28-19-501; or

(4) any combination of operational restrictions and air pollution control equipment;

(b) for those source categories identified at K.A.R. 28-19-561 through K.A.R. 28-19-563, by operating the stationary source in accordance with the applicable restrictions contained in those regulations and in K.A.R. 28-19-542, and in accordance with all other requirements for class II operating permits, unless any requirements for class II operating permits are identified in these rules as inapplicable to class II operating permits by rule; or

(c) by operating the source in compliance with a general class II operating permit issued pursuant to K.A.R. 28-19-400. (Authorized by K.S.A. 1993

Supp. 65-3005; implementing K.S.A. 65-3008; effective Jan. 23, 1995.)

28-19-541. Class II operating permits; application timetable and contents. (a) Any stationary source that has been issued a construction permit with federally enforceable permit restrictions pursuant to K.A.R. 28-19-302(b), shall file a complete initial application for a class II operating permit in accordance with K.A.R. 28-19-518 subsections (b) through (e), within one year of commencing operations or within one year of the effective date of this regulation, whichever is later. Any other stationary source that seeks a class II operating permit or a class II operating permit-by-rule shall file a complete initial application in accordance with K.A.R. 28-19-518 no later than 180 days before the date by which the applicant seeks issuance of the permit.

(b) The initial application for any class II operating permit, including a permit-by-rule pursuant to K.A.R. 28-19-542, shall be in writing and on forms provided or approved by the department. Until the department issues a class II operating permit to the source, the potential-to-emit of that source shall not be considered to be reduced.

(c) An application for a class II operating permit, other than an application for a permit-by-rule pursuant to K.A.R. 28-19-542, shall be accompanied by:

(1) sufficient information for the department to determine the potential-to-emit of the stationary source;

(2) any air pollution control equipment maintenance plan required by the provisions of K.A.R. 28-19-501;

(3) any proposed operational restrictions which would reduce the potential-to-emit of the stationary source, including:

(A) specification of any proposed operating restrictions;

(B) proposed methods for quantifying such restrictions;

(C) proposed methods for monitoring such restrictions; and

(4) the appropriate application fee.

(d) The owner or operator of the source shall provide any additional information requested by the department.

(e) The application shall be certified by a responsible official.

(f) Any person who fails to submit any relevant facts or who has submitted incorrect informa-

tion in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as necessary to address any requirements that become applicable to the stationary source after the date a complete application was filed but prior to the solicitation of public comments regarding the proposed permit.

(g) A stationary source to which a class I operating permit has been issued shall not be eligible for a class II operating permit until the class I operating permit has expired. A stationary source that holds a class I operating permit and seeks a class II operating permit shall submit an application for a class II operating permit no later than 180 days prior to expiration of the class I permit. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-542. Class II operating permits; permit-by-rule. (a) Any owner or operator of any stationary source that is within a source category specified in K.A.R. 28-19-561 through K.A.R. 28-19-564 may submit an application to the department for an operating permit-by-rule.

(b) Each application for a permit-by-rule shall be submitted on forms provided by the department or approved by the secretary and shall contain information sufficient for the secretary to determine the applicability of the requirements of K.A.R. 28-19-561 through K.A.R. 28-19-564 to the stationary source and the eligibility of the source to obtain a permit-by-rule. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3008; effective Jan. 23, 1995; amended Sept. 23, 2005.)

28-19-543. Class II operating permits; permit term and content; operational compliance. A class II operating permit shall remain valid until modified, revoked or otherwise determined invalid. A stationary source for which a class II operating permit has been issued shall comply with all applicable air quality regulations, whether or not addressed in the class II operating permit, unless specific provision is made within the class II operating permit specifying the stationary source is not required to comply with an otherwise applicable regulation. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-544. Class II operating permits; modification of source or operations. (a) Any

stationary source operating pursuant to a class II operating permit shall not modify the stationary source in any manner which increases the potential-to-emit of any pollutant included in the categories listed at K.A.R. 28-19-500 without first obtaining a written approval from the department authorizing such modification pursuant to K.A.R. 28-19-300 *et seq.*, construction permits and approvals.

(b) The owner or operator of a stationary source shall submit to the department a complete application for modification of a class II operating permit, including any applicable application fee, within 180 days of the initial startup of any modification if the modification increases the potential-to-emit of the stationary source.

(c) The application for modification shall be in writing and made on forms provided or approved by the department.

(d) An application for modification of a class II operating permit shall be accompanied by:

(1) sufficient information for the department to determine the potential-to-emit of the stationary source;

(2) any air pollution control equipment maintenance plan required by the provisions of K.A.R. 28-19-501;

(3) any proposed operational restrictions which would reduce the potential-to-emit of the stationary source, including:

(A) specification of any proposed operating restrictions;

(B) proposed methods for quantifying such restrictions; and

(C) proposed methods for monitoring such restrictions; and

(4) the appropriate application fee.

(e) The owner or operator of the source shall provide any additional information requested by the department.

(f) The application shall be certified by a responsible official. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-545. Class II operating permits; application fee. (a) An application pertaining to a class II operating permit shall not be deemed complete unless accompanied by the appropriate fee.

(b) Fees.

(1) The fee for an initial application for a class II operating permit other than a general permit or a permit-by-rule shall be \$200.00.

(2) The fee for a class II operating permit modification application shall be \$100.00.

(3) The fee for a class II general operating permit petition shall be \$750.00.

(4) The fee for a class II general operating permit application shall be \$50.00.

(5) The fee for a class II operating permit-by-rule application shall be \$50.00. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

28-19-546. Class II operating permits; annual emission inventory. Except as may be otherwise specifically required, each owner or operator of a stationary source that is required by these regulations to apply for a class II operating permit shall, on or before April 1 of each year, submit to the department all operating information and any other relevant information deemed necessary by the secretary to estimate the actual air emissions from the stationary source for the preceding year. If April 1 falls on a Saturday, Sunday, or holiday, then the submissions shall be due on or before the next business day following April 1. The timeliness of the submissions shall be determined by the postmark if submitted by mail. This information shall be submitted on forms provided by the department or approved by the secretary. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007; effective Jan. 23, 1995; amended Feb. 20, 1998; amended Sept. 23, 2005.)

CLASS II OPERATING PERMITS; PERMIT-BY-RULE

28-19-561. Class II operating permits; permit-by-rule; reciprocating engines. (a) Definition. For purposes of this regulation, "reciprocating engine stationary source" shall mean a source with one or more stationary reciprocating engines of any design or fuel type that does not contain other emission units that, alone or in combination with the reciprocating engines, would require the owner or operator of the source to obtain a class I operating permit solely because of its potential-to-emit. For purposes of this regulation, each reciprocating engine stationary source shall be presumed to operate without emission controls.

(b) Applicability; presumption. The requirements of this regulation shall apply to each reciprocating engine stationary source with a capacity equal to or greater than 730 horsepower, 550 kilowatts, or 5.1 million Btu per hour fuel input. Each reciprocating engine stationary source with a ca-

capacity of less than 730 horsepower, 550 kilowatts, or 5.1 million Btu per hour fuel input shall be presumed to have a potential-to-emit of less than 100 tons of each regulated pollutant per year.

(c) Operating conditions. In lieu of obtaining a class I permit under K.A.R. 28-19-500 or a class II permit under K.A.R. 28-19-540, each owner or operator of a reciprocating engine stationary source who elects to operate the source pursuant to this regulation and K.A.R. 28-19-542 shall meet the following requirements:

(1) Limit the operations of the source during each consecutive 12-month period to 5,800,000 horsepower hours, 4,300,000 kilowatt hours, or 40,000 million Btu fuel input;

(2) maintain records demonstrating that the operating restrictions specified in this regulation have not been exceeded;

(3) update the required records monthly, not later than the last day of the month following the month to which the records relate;

(4) retain the required records on-site for at least two years following the date of record, unless an alternative record storage location is authorized by the secretary in writing; and

(5) submit an annual emission report to the department as required in K.A.R. 28-19-546.

(d) Reporting required.

(1) If at the end of any calendar quarter, a source has operated during the previous four consecutive calendar quarters at a level exceeding 85% of the restrictions specified in paragraph (c)(1) of this regulation, the owner or operator of this source shall report in writing to the department the actual operations for the past four quarters.

(2) The actual operations shall be reported in the same units as those in the operating restrictions specified in this regulation.

(3) The report shall be submitted to the department within 45 days of the last day of the last calendar quarter that is the subject of the reporting requirements of this subsection.

(e) Notice of exceedance required.

(1) If at any time a reciprocating engine stationary source that the owner or operator has elected to operate pursuant to this regulation exceeds the operational limitations of paragraph (c)(1) of this regulation, the owner or operator shall notify the department in writing by mailing or delivering the notice on or before the first working day following discovery of the exceedance.

(2) Within 60 days of the discovery of the exceedance of any limitations of paragraph (c)(1) of

this regulation, the owner or operator shall submit to the department a written compliance plan identifying those actions being taken and to be taken by the owner or operator to ensure future compliance with the applicable requirements or to otherwise bring the source into compliance with this regulation, any other applicable Kansas air quality regulations, and the Kansas air quality statutes.

(3) The owner or operator shall file an application for any required operating permit within 180 days of discovery of an exceedance of the provisions of paragraph (c)(1) of this regulation.

(4) Compliance with the requirements of this subsection shall not shield the owner or operator from any enforcement action for exceeding any applicable requirement or for other violations of the Kansas air quality act or regulations.

(5) The timeliness of the required notifications, compliance plan submittals, and applications shall be determined by the postmark, if submitted by mail.

(f) Other applicable requirements. Each source that the owner or operator elects to operate in accordance with this regulation shall continue to be subject to all other applicable requirements of the Kansas air quality statutes and regulations. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007 and 65-3008; effective Jan. 23, 1995; amended Feb. 20, 1998; amended Sept. 23, 2005.)

28-19-562. Class II operating permits; permit-by-rule; organic solvent evaporative sources. (a) Definition. For the purposes of this regulation, “organic solvent evaporative source” shall mean each stationary source that meets both of the following conditions:

(1) The owner or operator of the stationary source purchases or uses materials that contain volatile organic compounds, hazardous air pollutants, or both, that are used in cleaning solvents, printing operations, adhesives, or surface coatings.

(2) The stationary source does not contain emission units, other than organic solvent evaporative sources, that, alone or in combination with all organic solvent evaporative sources, would require the owner or operator of the source to obtain a class I operating permit solely because of the source’s potential-to-emit.

(b) Applicability. The requirements of this regulation shall apply to each organic solvent evaporative source for which the owner or operator elects to limit the source’s purchase or use of materials

during any consecutive 12-month period to meet all of the following criteria:

(1) The materials contain less than a total of 90 tons of volatile organic compounds.

(2) The materials contain less than a total of 22.5 tons of any combination of hazardous air pollutants.

(3) The materials contain less than a total of nine tons of each single hazardous air pollutant.

(c) Presumption. Each organic solvent evaporative source that uses, or for which the owner or operator purchases, in any consecutive 12-month period materials that contain less than a total of nine tons of volatile organic compounds or hazardous air pollutants, or both, shall be presumed to have a potential-to-emit of less than 100 tons of volatile organic compounds per year, less than 25 tons of any combination of hazardous air pollutants per year, and less than 10 tons of a single hazardous air pollutant per year.

(d) Operating conditions. In lieu of obtaining a class I permit under K.A.R. 28-19-500 or a class II permit under K.A.R. 28-19-540, each owner or operator of any organic solvent evaporative source who elects to operate pursuant to this regulation and K.A.R. 28-19-542 shall meet all of the following requirements:

(1) Limit the purchase or use of materials that contain volatile organic compounds, hazardous air pollutants, or both, to the amounts specified in subsection (b) of this regulation;

(2) maintain records of the materials containing volatile organic compounds or hazardous air pollutants, or both, that were either purchased or used by the source, to demonstrate that the restrictions specified in subsection (b) of this regulation have not been exceeded;

(3) update the required records monthly, not later than the last day of the month following the month to which the records relate;

(4) retain the required records on-site for at least two years from the date of record, unless an alternative record storage location is authorized by the secretary in writing; and

(5) submit an annual emission report to the department as required in K.A.R. 28-19-546.

(e) Reporting required.

(1) Each owner or operator of an organic solvent evaporative source who has purchased or used materials containing volatile organic compounds or hazardous air pollutants, or both, shall report in writing to the department the amount of materials purchased or used during the previous four

consecutive calendar quarters if, at the end of any calendar quarter, the actual amount of materials purchased or used by the source contain volatile organic compounds and hazardous air pollutants exceeding any of the following levels:

(A) A total of 76.5 or more tons of volatile organic compounds;

(B) a total of 19.1 or more tons of any combination of hazardous air pollutants; or

(C) a total of 7.7 or more tons of each single hazardous air pollutant.

(2) The actual amount purchased or used shall be reported in the units specified in subsection (b) of this regulation.

(3) The report shall be submitted to the department within 45 days of the last day of the last calendar quarter that is the subject of the reporting requirements of this subsection.

(f) Notice of exceedance required.

(1) If at any time an organic solvent evaporative source that the owner or operator has elected to operate pursuant to this regulation exceeds the operational limitations specified in subsection (b) of this regulation, the owner or operator shall notify the department in writing by mailing or delivering the notice on or before the first working day following discovery of the exceedance.

(2) Within 60 days of the discovery of the exceedance of any limitations of subsection (b) of this regulation, the owner or operator shall submit to the department a written compliance plan identifying those actions being taken and to be taken by the owner or operator to ensure future compliance with the applicable requirements or to otherwise bring the source into compliance with this regulation, any other applicable Kansas air quality regulations, and the Kansas air quality statutes.

(3) The owner or operator shall file an application for any required operating permit within 180 days of discovery of an exceedance of the provisions of subsection (b) of this regulation.

(4) Compliance with the requirements of this subsection shall not shield the owner or operator from any enforcement action for exceeding any applicable requirement or for other violations of the Kansas air quality act or regulations.

(5) The timeliness of the required notifications, compliance plan submittals, and applications shall be determined by the postmark, if submitted by mail.

(g) Other applicable requirements. Each source that the owner or operator elects to operate in accordance with this regulation shall continue to be

subject to all other applicable requirements of the Kansas air quality statutes and regulations. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007 and 65-3008; effective Jan. 23, 1995; amended Feb. 20, 1998; amended Sept. 23, 2005.)

28-19-563. Class II operating permits; permit-by-rule; hot mix asphalt facilities.

(a) Definition. For purposes of this regulation, "hot mix asphalt facility" shall mean a facility that meets both of the following conditions:

(1) The facility is used to manufacture hot mix asphalt by heating and drying aggregate and mixing the aggregate with asphalt cement.

(2) The facility does not contain other emission sources that, alone or in combination with the hot mix asphalt facility, would require the owner or operator of the source to obtain a class I operating permit solely because of the facility's potential-to-emit.

(b) Applicability. The requirements of this regulation shall apply to each hot mix asphalt facility that uses venturi scrubbers, a baghouse, or equivalent particulate emission controls to limit particulate emissions to no more than 0.04 grains per dry standard cubic foot of exhaust gas.

(c) Operating conditions. In lieu of obtaining a class I permit under K.A.R. 28-19-500 or a class II permit under K.A.R. 28-19-540, each owner or operator of a hot mix asphalt facility who elects to operate pursuant to this regulation and K.A.R. 28-19-542 shall meet all of the following requirements:

(1) Limit production at the facility to not more than 250,000 tons of hot mix asphalt during any consecutive 12-month period;

(2) maintain records demonstrating that the production restrictions and particulate emission limits specified in this regulation have not been exceeded;

(3) update the records monthly, not later than the last day of the month following the month to which the records relate;

(4) retain the records on-site for at least two years following the date of record, unless an alternative record storage location is authorized by the secretary in writing; and

(5) submit an annual emission report to the department as required by K.A.R. 28-19-546.

(d) Reporting required.

(1) If at the end of any calendar quarter, a facility has produced hot mix asphalt during the previous four consecutive calendar quarters in an

amount that exceeds 85% of any production restriction specified in paragraph (c)(1) of this regulation, the owner or operator of the facility shall report in writing to the department the actual production during the previous four consecutive calendar quarters.

(2) The actual production shall be reported in the units specified in paragraph (c)(1) of this regulation.

(3) The report shall be submitted to the department within 45 days of the last day of the last calendar quarter that is the subject of the reporting requirements of this subsection.

(e) Notice of exceedance required.

(1) If at any time a hot mix asphalt facility that the owner or operator has elected to operate pursuant to this regulation exceeds the operational limitations of paragraph (c)(1) of this regulation, the owner or operator shall notify the department in writing by mailing or delivering the notice on or before the first working day following discovery of the exceedance.

(2) Within 60 days of the discovery of the exceedance of any limitations of paragraph (c)(1) of this regulation, the owner or operator shall submit to the department a written compliance plan identifying those actions being taken and to be taken by the owner or operator to ensure future compliance with applicable requirements or to otherwise bring the source into compliance with this regulation, any other applicable Kansas air quality regulations, and the Kansas air quality statutes.

(3) The owner or operator shall also file an application for any required operating permit within 180 days of discovery of an exceedance of the provisions of paragraph (c)(1) of this regulation.

(4) Compliance with the requirements of this subsection shall not shield the owner or operator from enforcement action for exceeding any applicable requirement or for other violations of the Kansas air quality act or regulations.

(5) The timeliness of the required notifications, compliance plan submittals, and applications shall be determined by the postmark, if submitted by mail.

(f) Other applicable requirements. Each source that the owner or operator elects to operate in accordance with this regulation shall continue to be subject to all other applicable requirements of the Kansas air quality statutes and regulations. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007 and 65-3008; effective Jan. 23, 1995; amended Feb. 20, 1998; amended Sept. 23, 2005.)

28-19-564. Class II operating permits; permits-by-rule; sources with actual emissions less than 50 percent of major source thresholds.

(a) Any stationary source, or group of stationary sources, that would be classified as a major source based on its potential-to-emit may operate according to this regulation in lieu of obtaining an individual class I or class II operating permit, if the source is operated in compliance with subsections (d), (e), (f), and (g) of this regulation, and with either subsection (b) or (c) of this regulation. Sources that are required to obtain a class I or class II permit based on criteria other than potential-to-emit shall not be eligible to operate under this regulation.

(b) Any stationary source or group of stationary sources that has actual emissions not exceeding 25 percent of the major source threshold, as defined in K.A.R. 28-19-200, may operate according to this subsection, if the source meets all of the following conditions:

(1) The stationary source is not otherwise required to obtain a class I operating permit.

(2) The owner or operator of the stationary source notifies the department, in writing, that it elects to operate the source under this regulation.

(3) The actual emissions of each regulated pollutant, for every consecutive 12-month period during which the stationary source is operated under this regulation, do not exceed 25 percent of the major source threshold.

(4) The owner or operator of the stationary source maintains records, as specified in subsection (h) of this regulation, that demonstrate compliance with the 25 percent actual emissions limitation.

(5) The owner or operator updates the records required by paragraph (b)(4) of this regulation at least monthly and maintains the records on-site for at least two years from the date of record.

(c) Any stationary source or group of stationary sources with actual emissions not exceeding 50 percent of the major source threshold, as defined in K.A.R. 28-19-200, may operate according to this subsection if the source meets all of the following conditions:

(1) The stationary source is not otherwise required to obtain a class I operating permit.

(2) The owner or operator of the stationary source has submitted to the department an application to operate under the terms of this regulation, with the appropriate fee, as defined in K.A.R. 28-19-545.

(3) The owner or operator of the stationary source has received notice from the secretary that the application submitted for the source has been approved.

(4) The actual emissions from the stationary source, for every consecutive 12-month period during which the stationary source is operated under this regulation, do not exceed 50 percent of the major source threshold.

(5) The owner or operator of the stationary source maintains records, as specified in subsection (h) of this regulation, that demonstrate compliance with the 50 percent actual emissions limitation.

(6) The owner or operator updates the records required by paragraph (c)(5) of this regulation at least monthly and maintains the records on-site for at least two years.

(d)(1) If at any time a stationary source operating according to this regulation exceeds the emissions level of either paragraph (b)(3) or (c)(4) of this regulation, whichever is applicable to the source based on its election to operate according to this regulation, the owner or operator shall notify the secretary in writing.

(2) The owner or operator shall mail or deliver the notice to the secretary on the first working day after the discovery of the failure to comply.

(3) Within 60 days of the discovery of a failure to comply with an applicable requirement of this regulation, the owner or operator shall submit to the secretary an interim compliance plan and schedule identifying those actions being taken by the owner or operator to ensure compliance with applicable requirements until the appropriate class I or class II operating permit is issued according to paragraph (d)(5) of this regulation.

(4) Submittal of and compliance with the compliance plan and schedule shall not shield the owner or operator from enforcement action by the department.

(5) The owner or operator shall also file an application for the appropriate class I or class II operating permit within 180 days of discovery of the exceedance of the limits of either paragraph (b)(3) or (c)(4) of this regulation, whichever is applicable to the source based on its election to operate according to this regulation, unless otherwise exempt.

(e) Each owner or operator of a stationary source shall submit to the department, by February 15 of each year, a summary of the monthly records required by paragraph (b)(4) or (c)(5) of

this regulation, whichever is applicable, for the previous calendar year in lieu of submitting an annual emissions inventory for the stationary source as otherwise required by K.A.R. 28-19-546(a).

(f) Compliance with this regulation shall not shield the owner or operator from enforcement action for exceeding any applicable restrictions, or for any other violations of the Kansas air quality act or the Kansas air quality regulations.

(g) Each owner or operator of a stationary source operated according to this regulation shall continue to be subject to all other applicable requirements of the Kansas air quality act and the Kansas air quality regulations.

(h)(1) The following records specified in this subsection shall be presumed to be sufficient to determine compliance with the recordkeeping requirements of this regulation:

(A) For coating and solvent emission units, the following:

(i) A current list of all coatings, solvents, inks, and adhesives in use, including VOC and hazardous air pollutant content;

(ii) a description of any equipment used for coating or solvent application, including type, make, and model, and maximum design process rate or throughput;

(iii) a monthly log of the consumption of each coating, ink, adhesive, and solvent, including solvents used in cleanup and surface preparation; and

(iv) purchase orders, invoices, and other documents to support information in the monthly log;

(B) for organic liquid storage units, the following:

(i) A monthly log identifying the liquid stored and monthly throughput; and

(ii) information on the tank design and specifications, including emissions control equipment;

(C) for combustion emission units, the following:

(i) Information on equipment type, make, and model; maximum design process rate or maximum power input and output; minimum operating temperature for thermal oxidizers; capacity; and all source test information; and

(ii) a monthly log of fuel type, fuel usage, fuel heating value, and percent sulfur for fuel oil and coal;

(D) for any emission control device for which emission reductions are being claimed, the following:

(i) Information on the control device type, including description, make, and model, and emission units served by the control device;

(ii) information on the control device design including, if applicable, the pollutant or pollutants being controlled, control device efficiency and capture efficiency, maximum design or rated capacity, and other design data as appropriate, including any available source test information; and

(iii) a monthly log of hours of operation, including notation of any control equipment breakdowns, upsets, repairs, maintenance, and any other deviations from design parameters; and

(E) for other emission units, the following:

(i) Information on the process and equipment, including equipment type, description, make, model;

(ii) maximum design process rate or throughput;

(iii) a monthly log of operating hours and each raw material used and its amount; and

(iv) purchase orders, invoices, or other documents to support the information in the monthly log.

(2) Each owner or operator relying on other documentation to demonstrate compliance with this regulation shall establish that the documentation relied upon demonstrates compliance with the recordkeeping requirements of this regulation.

(i) During the first 12 months of operation under this permit-by-rule, each owner or operator of the processes affected by this permit-by-rule shall operate in a manner that will not exceed any of the permit limitation requirements contained within this regulation at any time during the initial 12-month period.

(j) Within six months of EPA's approval of this regulation into the Kansas state implementation plan, any entity operating under the "general class II air emission source air operating permit for facilities that have actual emissions below 50 percent of major source thresholds" shall apply to operate under this regulation or other applicable operating permit. (Authorized by K.S.A. 2001 Supp. 65-3005; implementing K.S.A. 2001 Supp. 65-3008; effective May 15, 1998; amended Oct. 4, 2002.)

28-19-575. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Sept. 23, 2005.)

28-19-576. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Sept. 23, 2005.)

28-19-577. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Sept. 23, 2005.)

28-19-578. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Sept. 23, 2005.)

OPEN BURNING RESTRICTIONS

28-19-645. Open burning prohibited. A person shall not cause or permit the open burning of any wastes, structures, vegetation, or any other materials on any premises except as authorized by K.A.R. 28-19-647 and K.A.R. 28-19-648. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3005, K.S.A. 65-3010; effective March 1, 1996.)

28-19-645a. Restrictions on open burning operations for certain counties during the month of April. This regulation shall supersede K.A.R. 28-19-645 during the month of April for the counties listed in subsection (a) below.

(a) A person shall not cause or permit open burning operations of any waste, including vegetation and wood waste, structures, or any other materials on any premises during the month of April in Butler, Chase, Chautauqua, Cowley, Elk, Geary, Greenwood, Johnson, Lyon, Marion, Morris, Pottawatomie, Riley, Sedgwick, Wabaunsee, and Wyandotte counties, except as authorized by subsections (b) through (d).

(b) The following activities shall be exempt from the prohibition in subsection (a):

(1) Open burning operations for the purpose of range or pasture management and conservation reserve program (CRP) burning activities meeting the requirements in K.A.R. 28-19-648 (a)(1) through (a)(4); and

(2) open burning operations listed in K.A.R. 28-19-647 (a)(1) and (a)(2).

(c) A person may obtain approval by the secretary to conduct an open burning operation that is not otherwise exempt if the conditions and requirements of the following are met:

- (1) K.A.R. 28-19-647 (b)(1) through (b)(3); and
- (2) K.A.R. 28-19-647 (d) and (e).

(d) Open burning operations that shall require approval by the secretary and are deemed necessary and in the public interest shall include the open burning operations listed in K.A.R. 28-19-

647 (c)(1) through (c)(3).

(e) In Johnson, Wyandotte, and Sedgwick counties, the open burning operations listed in K.A.R. 28-19-647 (c)(4) and (c)(5) shall require approval by the local authority.

(f) Nothing in this regulation shall restrict the authority of local jurisdictions to adopt more restrictive ordinances or resolutions governing agricultural open burning operations. (Authorized by K.S.A. 2010 Supp. 65-3005; implementing K.S.A. 2010 Supp. 65-3005 and K.S.A. 65-3010; effective, T-28-3-1-11, March 1, 2011; effective Sept. 9, 2011.)

28-19-646. Responsibility for open burning. It shall be prima facie evidence that the person who owns or controls property on which open burning occurs has caused or permitted the open burning. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3005, K.S.A. 65-3010; effective March 1, 1996.)

28-19-647. Exceptions to prohibition on open burning. (a) The following open burning operations shall be exempt from the prohibition on the open burning of any materials imposed by K.A.R. 28-19-645:

(1) open burning carried out on a residential premise containing five or less dwelling units and incidental to the normal habitation of the dwelling units, unless prohibited by any local authority with jurisdiction over the premises;

(2) open burning for cooking or ceremonial purposes, on public or private lands regularly used for recreational purposes;

(3) open burning for the purpose of crop, range, pasture, wildlife or watershed management in accordance with K.A.R. 28-19-648; or

(4) open burning approved by the department pursuant to paragraph (b).

(b) A person may obtain an approval from the department to conduct an open burning operation that is not otherwise exempt from the prohibition imposed by K.A.R. 28-19-645 if it is demonstrated that the open burning is:

(1) necessary, which in the case of burning for the purpose of disposal of any materials, shall mean that there is no other practical means of disposal;

(2) in the public interest; and

(3) is not prohibited by any local government or local fire authority.

(c) Open burning operations for which an ap-

approval is required but which are deemed to be necessary and in the public interest include the following:

- (1) the use of safety flares for disposal of flammable gases;
- (2) fires related to the training of government or industrial personnel in fire fighting procedures;
- (3) fires set for the removal of dangerous or hazardous liquid materials;
- (4) open burning of trees and brush from non-agricultural land clearing operations; and
- (5) open burning of clean wood waste from construction projects carried out at the construction site.

(d) Each person seeking an approval to conduct an open burning operation pursuant to this regulation shall submit a written request to the department containing the following information:

- (1) the location of the proposed open burning and the name, address and telephone number of the person responsible for the open burning;
- (2) a description of the open burning including:
 - (A) the estimated amount and nature of material to be burned;
 - (B) the proposed frequency, duration and schedule of the burning;
 - (C) the size of the area to which the burning will be confined;
 - (D) the method of igniting the material;
 - (E) the location of any public roadways within 1,000 feet of the proposed burn;
 - (F) the number of occupied dwellings within 1,000 feet of the proposed burn; and
 - (G) evidence that the open burning has been approved by appropriate fire control authority having jurisdiction over the area; and
- (3) the reason why the proposed open burning is necessary and in the public interest if the activity is not listed in subsection (c) of this regulation.

(e) Each open burning operation for which the department issues an approval pursuant to paragraph (b) shall be subject to the following conditions, except as provided in paragraph (f):

- (1) The person conducting the burning shall stockpile the material to be burned, dry it to the extent possible before it is burned, and assure that it is free of matter that will inhibit good combustion.
- (2) A person shall not burn heavy smoke-producing materials including heavy oils, tires, and tarpaper.
- (3) A person shall not initiate burning during the nighttime, which for the purposes of this reg-

ulation is defined as the period from two hours before sunset until one hour after sunrise. A person shall not add material to a fire after two hours before sunset.

(4) A person shall not burn during inclement or foggy conditions or on very cloudy days, which are defined as days with more than 0.7 cloud cover and with a ceiling of less than 2,000 feet.

(5) A person shall not burn during periods when surface wind speed is less than 5 mph or more than 15 mph.

(6) A person shall not burn within 1,000 feet of any occupied dwelling, unless the occupant of that dwelling has been notified before the burn.

(7) A person shall not conduct a burn that creates a traffic or other safety hazard. If burning is to take place within 1,000 feet of a roadway, the person conducting the burn shall notify the highway patrol, sheriff's office, or other appropriate state or local traffic authority before the burning begins. If burning is to take place within one mile of an airport, the person conducting the burn shall notify the airport authority before the burning begins.

(8) The person conducting the burn shall insure that the burning is supervised until the fire is extinguished.

(9) The department may revoke any approval upon 30 days notice.

(10) A person shall conduct an open burning operation under such additional conditions as the department may deem necessary to prevent emissions which:

- (A) may be injurious to human health, animal or plant life, or property; or
- (B) may unreasonably interfere with the enjoyment of life or property.

(f) The department may issue an approval for an open burning operation that does not meet the conditions set forth in subsection (e) upon a clear demonstration that the proposed burning:

- (1) is necessary and in the public interest;
- (2) can be conducted in a manner that will not result in emissions which:
 - (A) may be injurious to human health, animal or plant life, or property; or
 - (B) may unreasonably interfere with the enjoyment of life or property; and
- (3) will be conducted in accordance with such conditions as the department deems necessary. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3005, K.S.A. 65-3010; effective March 1, 1996.)

28-19-648. Agricultural open burning.

(a) Open burning of vegetation such as grass, woody species, crop residue, and other dry plant growth for the purpose of crop, range, pasture, wildlife or watershed management shall be exempt from the prohibition on the open burning of any materials imposed by K.A.R. 28-19-645, provided that the following conditions are met:

(1) the person conducting the burn shall notify the local fire control authority with jurisdiction over the area before the burning begins, unless the appropriate local governing body has established a policy that notification is not required;

(2) a person shall not conduct a burn that creates a traffic safety hazard. If conditions exist that may result in smoke blowing toward a public roadway, the person conducting the burn shall give adequate notification to the highway patrol, sheriff's office or other appropriate state or local traffic control authorities before burning;

(3) a person shall not conduct a burn that creates an airport safety hazard. If smoke may affect visibility at an airport, the person conducting the burn shall give adequate notification to the appropriate airport authorities before burning; and

(4) the person conducting the burn shall insure that the burning is supervised until the fire is extinguished.

(b) Nothing in this regulation shall restrict the authority of local jurisdictions to adopt more restrictive ordinances or resolutions governing agricultural open burning operations. (Authorized by K.S.A. 1994 Supp. 65-3005; implementing K.S.A. 1994 Supp. 65-3005, K.S.A. 65-3010; effective March 1, 1996.)

OPACITY RESTRICTIONS

28-19-650. Emissions opacity limits. (a) Except as otherwise provided in K.A.R. 28-19-9, K.A.R. 28-19-11, or K.A.R. 28-19-31, in subsections (b) and (c) of this regulation, or in other applicable air quality regulations, opacity of visible air emissions from any emission unit shall not exceed the following limits:

(1) 40 percent opacity for any portable source existing on or before January 1, 1971;

(2) 40 percent opacity for any emission unit, other than a portable source, that existed on or before January 1, 1971 and that has not been relocated after January 1, 1971; and

(3) 20 percent opacity for any other emission unit.

(b) Special opacity limits, Wyandotte county. Air emissions within Wyandotte county from

any processing of materials or other uses of the premises within the county shall not exceed 20 percent opacity.

(c) Exceptions. Air emissions opacity levels that exceed the specified limits in subsections (a) and (b) of this regulation shall not be considered a violation of this regulation if the owner or operator of the emission unit demonstrates to the satisfaction of the department that the opacity exceedance is due solely to the presence of uncombined water in the plume.

(d) Method. The determination of opacity of air emissions shall be made either by 40 C.F.R. Part 60, appendix A, method 9, as adopted in K.A.R. 28-19-720, or by another method approved in advance by the department. (Authorized by K.S.A. 1997 Supp. 65-3005 and K.S.A. 1997 Supp. 65-3007; implementing K.S.A. 1997 Supp. 65-3005, K.S.A. 65-3006, and 65-3010; effective Jan. 29, 1999.)

IDLE REDUCTION

28-19-712. Definitions. The following terms shall apply to K.A.R. 28-19-712 through K.A.R. 28-19-712d.

(a) "Auxiliary power unit" means an integrated system that provides heat, air conditioning, engine warming, or electricity to components of a heavy-duty diesel vehicle and is certified by the administrator of the USEPA under 40 C.F.R. part 89 as meeting applicable emission standards.

(b) "Commercial vehicle" means any motor vehicle, other than a passenger vehicle, and any trailer, semitrailer, or pole trailer drawn by the motor vehicle that is designed, used, and maintained for the transportation of persons or property for hire, compensation, or profit or in the furtherance of a commercial enterprise.

(c) "Gross vehicle weight rating" means the weight specified by the manufacturer as the load-carrying weight of a single vehicle.

(d) "Heavy-duty diesel vehicle" means any motor vehicle that meets the following conditions:

(1) Has a gross vehicle weight rating of more than 14,001 pounds;

(2) is powered by a diesel engine; and

(3) is designed primarily for transporting persons or property on a public street or highway.

(e) "Idling" means the operation of an engine in the operating mode during either of the following situations:

(1) When the engine is not in gear; or

(2) when the engine operates at the revolutions per minute specified by the engine or vehicle

manufacturer, the accelerator is fully released, and there is no load on the engine.

(f) "Institutional vehicle" means any motor vehicle, other than a passenger vehicle, and any trailer, semitrailer, or pole trailer drawn by the motor vehicle that is designed, used, and maintained for the transportation of persons or property for an organization, establishment, foundation, or society.

(g) "Load or unload location" means any site where a driver idles a heavy-duty diesel vehicle while waiting to load or unload. This term shall include the following:

- (1) Distribution centers;
- (2) warehouses;
- (3) retail stores;
- (4) railroad facilities; and
- (5) ports.

(h) "Passenger vehicle" means any motor vehicle designed for carrying not more than 10 passengers and used for the transportation of persons.

(i) "Public vehicle" means any motor vehicle, other than a passenger vehicle, and any trailer, semitrailer, or pole trailer drawn by the motor vehicle that is designed, used, and maintained for the transportation of persons or property at the public expense and under public control. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-712a. Applicability. K.A.R. 28-19-712 through K.A.R. 28-19-712d shall apply only in Johnson and Wyandotte counties to any person who owns or operates either of the following:

(a) Any heavy-duty diesel vehicle that is also a commercial vehicle, institutional vehicle, or public vehicle; or

(b) any load or unload location. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-712b. General requirement for heavy-duty diesel vehicles. No person who owns or operates a heavy-duty diesel vehicle specified in K.A.R. 28-19-712a(a) shall cause that vehicle to idle for more than five minutes in any 60-minute period, except as provided in K.A.R. 28-19-712c and K.A.R. 28-19-712d. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-712c. General requirement for load or unload locations. No person who owns or operates a load or unload location for freight

shall cause any heavy-duty diesel vehicle that is also a commercial vehicle to idle for a period longer than 30 minutes in any 60-minute period while waiting to load or unload at that location. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-712d. Exemptions. K.A.R. 28-19-712b shall not apply to the following:

(a) Any heavy-duty diesel vehicle specified in K.A.R. 28-19-712a(a) that idles in any of the following conditions:

(1) While forced to remain motionless because of road traffic or an official traffic control device or signal or at the direction of a law enforcement official;

(2) when operating defrosters, heaters, air conditioners, safety lights, or other equipment solely for safety or health reasons and not as part of a rest period;

(3) during a state or federal inspection to verify that all equipment is in good working order, if idling is required as part of the inspection; or

(4) during mechanical difficulties over which the driver has no control;

(b) a police, fire, ambulance, military, utility, emergency, or law enforcement vehicle or any vehicle being used in an emergency capacity that idles while in an emergency or training mode and not for the convenience of the vehicle operator;

(c) an armored vehicle that idles when a person remains inside the vehicle to guard the contents or while the vehicle is being loaded or unloaded;

(d) an occupied vehicle with a sleeper berth compartment that idles for purposes of air conditioning or heating during government-mandated rest periods;

(e) a vehicle that is used exclusively for agricultural operations and only incidentally operated or moved upon the highway;

(f) a primary propulsion engine that idles for maintenance, servicing, repairing, or diagnostic purposes if idling is necessary for the activity;

(g) a primary propulsion engine that idles when necessary to power mechanical or electrical operations other than propulsion, including mixing, refrigerating, or processing cargo, or the operation of a hydraulic lift. This exemption shall not apply when idling for cabin comfort or operating nonessential onboard equipment;

(h) an auxiliary power unit or generator that is operated as an alternative to idling the main engine; and

(i) a bus that is also a commercial vehicle, institutional vehicle, or public vehicle that idles a maximum of 15 minutes in any 60-minute period to maintain passenger comfort while nondriver passengers are on board. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

NITROGEN OXIDES EMISSIONS REDUCTION

28-19-713. Applicability. K.A.R. 28-19-713 through K.A.R. 28-19-713d shall apply to the owner or operator of each stationary source located in Wyandotte or Johnson county that annually emits at least 1,000 tons of nitrogen oxides from the entire facility, based on an average of the total emissions for the 2005, 2006, and 2007 calendar years. The total emissions shall be the sum of the actual emissions and the potential-to-emit emissions for each calendar year. The actual emissions shall be calculated pursuant to K.A.R. 28-19-210. If the actual emissions are more than 1,000 tons of nitrogen oxides for each calendar year, the potential-to-emit emissions may be excluded from the total emissions calculation. The potential-to-emit emissions shall be used for periods exceeding two weeks of operational inactivity due to maintenance, construction, or modification. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-713a. Emission limitation requirements. No owner or operator subject to K.A.R. 28-19-713 shall allow any emission unit to emit nitrogen oxides in excess of the following emission limitations based on a 30-day rolling average:

(a) From electric generating units, for the purposes of K.A.R. 28-19-713 through K.A.R. 28-19-713d, the following:

(1) 0.26 pounds per million British thermal units (lbs/MMBtu) for unit 1, a turbo wall-fired Riley Stoker boiler located at the Nearman Creek power station in Kansas City, Kansas; and

(2) 0.20 lbs/MMBtu for unit 2, a wall-fired Riley Stoker boiler located at the Quindaro power station in Kansas City, Kansas; and

(b) from flat glass furnaces, 7.0 pounds per ton of glass produced. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-713b. Alternate emissions limit. Each owner or operator of an emission unit subject to an emissions limit for nitrogen oxides specified

in K.A.R. 28-19-713a(a) that is also subject to a more stringent Kansas or USEPA emissions limit for nitrogen oxides shall comply with the more stringent emissions limit for that emission unit. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-713c. Control measures and equipment. Each owner or operator of any emission unit subject to an emissions limit specified in K.A.R. 28-19-713a or K.A.R. 28-19-713b shall implement control measures and install, operate, and maintain equipment necessary to achieve these limits no later than 18 months after the effective date of this regulation. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

28-19-713d. Compliance demonstration, monitoring, and reporting requirements. No later than 24 months after the effective date of this regulation, each owner or operator of any emission unit subject to the nitrogen oxide emission limits specified in K.A.R. 28-19-713a or K.A.R. 28-19-713b shall meet the following requirements:

(a) Demonstrate compliance with the applicable emissions limit by performing an emissions test in accordance with 40 C.F.R. 60.8, as adopted by reference in K.A.R. 28-19-720, and either of the following:

(1) Test method 7, 7A, 7C, 7D, or 7E in appendix A-4 to 40 C.F.R. part 60, as adopted by reference in K.A.R. 28-19-720; or

(2) any other USEPA test method approved by the department;

(b) ensure continuous compliance with the applicable emissions limit by installing, calibrating, maintaining, and operating a continuous emission monitoring system (CEMS) for nitrogen oxides that meets the requirements of 40 C.F.R. 60.13 and performance specification 2 in appendix B to 40 C.F.R. part 60, as adopted by reference in K.A.R. 28-19-720;

(c) certify the CEMS at least three months before the compliance demonstration required by subsection (a) pursuant to either of the following:

(1) The quality assurance procedures in appendix F to 40 C.F.R. part 60, as adopted by reference in K.A.R. 28-19-720; or

(2) an equivalent quality assurance procedure approved by the department; and

(d) document compliance by continuously monitoring and maintaining records of nitrogen oxide

emissions. (Authorized by K.S.A. 2009 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 25, 2010.)

VOLATILE ORGANIC COMPOUND EMISSIONS

28-19-714. Solvent metal cleaning. (a) The provisions of this regulation shall apply to cold cleaning, open-top vapor degreasing, and conveyorized degreasing operations located in Johnson and Wyandotte counties, and to the sale of cold cleaner solvents for use within either Johnson or Wyandotte county, or both.

(b) Definitions. The following terms, when used in this regulation, shall have the following meanings:

(1) "Airless cleaning system" means a degreasing system that operates automatically and that seals at a differential pressure not greater than 0.475 pounds per square inch gauge (psig) before the introduction of solvent vapor into the cleaning chamber and maintains a differential pressure under vacuum during all cleaning and drying cycles.

(2) "Airtight cleaning system" means a degreasing system that is operated automatically and that seals at a differential pressure not greater than 0.5 psig during all cleaning and drying cycles.

(3) "Aqueous solvent" means a solvent that consists of 60 percent or more by volume of water with a flashpoint greater than 199°Fahrenheit (F) and that is miscible with water.

(4) "Electronic component" means any portion of an electronic assembly, including circuit board assemblies, printed wire assemblies, printed circuit boards, soldered joints, grounded wires, bus bars, and associated electronic component manufacturing equipment, including screens and filters.

(5) "Medical device" means any instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar article, including any component or accessory that meets one of the following conditions:

(A) It is intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease.

(B) It is intended to affect the structure or any function of the body.

(C) It is defined in the "national formulary" or the "United States pharmacopoeia," or any supplement to them.

(c) Except as specified in paragraph (c)(13) of this regulation, the owner or operator of each affected cold cleaning operation shall assure that the following requirements are met.

(1) After August 31, 2002 and through April 30, 2003, one of the following requirements shall be met:

(A) Except as otherwise required in paragraph (c)(1)(B), only cold cleaning solvents with a vapor pressure less than 2.0 millimeters of mercury (mm Hg) at 68°F shall be used.

(B) Only cold cleaning solvents with a vapor pressure less than 7.0 mm Hg at 68°F shall be used for each cold cleaning operation that is used for cleaning carburetors.

(2) Beginning on May 1, 2003, one of the following requirements shall be met:

(A) Except as otherwise required in paragraph (c)(2)(B), only cold cleaning solvents with a vapor pressure less than 1.0 mm Hg at 68°F shall be used.

(B) Only cold cleaning solvents with a vapor pressure less than 5.0 mm Hg at 68°F shall be used for each cold cleaning operation that is used for cleaning carburetors.

(3) An alternate method for reducing cold cleaning emissions may be used if the owner or operator demonstrates to the satisfaction of the department that the level of emission control is equivalent to or greater than the applicable requirements in paragraphs (c)(1) and (c)(2).

(4) Each cold solvent cleaner shall be equipped with a cover to minimize evaporation of the solvent while in the closed position, or with an enclosed reservoir to limit the escape of solvent vapors from the solvent bath if parts are not being processed in the cleaner.

(5) If one or more of the following conditions exist, the solvent cleaner cover required in paragraph (c)(4) shall be designed to be operated with one hand so that minimal displacement of the solvent vapors occurs:

(A) The solvent vapor pressure is greater than 15.5 mm Hg when measured at 100°F.

(B) The solvent is agitated.

(C) The solvent is heated.

For solvent cleaner covers larger than 10 square feet, either mechanical or power-assisted systems shall be used to aid in the operation of the cover.

(6) The cover of the cold solvent cleaner shall be closed whenever parts are not being handled in the cleaner.

(7) Each cold solvent cleaner shall be equipped with either of the following:

(A) An internal drainage facility that enables the cleaned parts to be enclosed under the cover while the cleaned parts are draining; or

(B) if the internal drainage facility cannot fit into the cleaning system and the solvent volatility is less than 31.0 mm Hg at 100°F, an external drainage system that allows the solvent to drain from the cleaned parts to an enclosed solvent reservoir.

(8) Cleaned parts shall be drained for at least 15 seconds or until dripping ceases.

(9) One of the following control methods shall be applied if the solvent vapor pressure is greater than 31.0 mm Hg measured at 100°F or if the solvent is heated above 120°F:

(A) Maintaining a freeboard height that gives a freeboard ratio greater than or equal to 0.75;

(B) using a water cover for solvents that are insoluble in, and heavier than, water; or

(C) using other systems of control, including a refrigerated chiller or carbon adsorption with a VOC emissions reduction efficiency demonstrated to the satisfaction of the department to be 65 percent or greater.

(10) A permanent, conspicuous label shall be attached to the cleaner near the operator's position summarizing the operating requirements of the equipment.

(11) Waste solvent shall be stored in covered containers and shall not be disposed of or transferred to another party in a manner that allows waste solvent to evaporate into the atmosphere.

(12) If a solvent spray is used, the spray shall be a solid fluid stream with an operating pressure of 10 psig or less and shall not be an atomized or shower-type spray.

(13) The following activities and uses shall be exempt from the provisions of paragraphs (c)(1), (c)(2), and (c)(3):

(A) Janitorial and institutional cleaning;

(B) the cleaning of electronic components;

(C) cold solvent cleaning operations that meet the emission control requirements of K.A.R. 28-19-63, 28-19-71, 28-19-73, or 28-19-76;

(D) cold solvent cleaners using aqueous solvents;

(E) cold solvent cleaners using solvents regulated under any federal national emission standard for hazardous air pollutants according to K.A.R. 28-19-735 and K.A.R. 28-19-750;

(F) any cold solvent cleaner with a liquid surface area of one square foot or less or with a maximum capacity of one gallon or less;

(G) the cleaning of medical devices;

(H) airtight or airless cleaning systems, if all of the following requirements are met:

(i) The equipment shall be operated in accordance with the manufacturer's specifications and

operated with a door or other pressure-sealing apparatus that is in place during all cleaning and drying cycles;

(ii) all waste solvents shall be stored in properly identified and sealed containers and, if applicable, shall be managed in compliance with article 31 of these regulations, the Kansas hazardous waste management standards and regulations. The associated pressure relief devices shall not allow liquid solvents to drain out;

(iii) spills that occur during solvent transfer shall be cleaned up immediately and, if applicable, shall be managed in compliance with article 31 of these regulations, the Kansas hazardous waste management standards and regulations. The used absorbent material shall be stored in closed containers; and

(iv) a differential pressure gauge shall be installed to indicate the sealed chamber pressure; and

(I) paint spray gun and nozzle cleaning if the cold solvent cleaner container or container system does not exceed 16 gallons in size and is kept tightly covered at all times except when access to the container is required.

(d) Except as specified in paragraph (d)(5) of this regulation, the suppliers of cold cleaning solvents for use in affected cold cleaners located in Johnson and Wyandotte counties shall meet the following requirements.

(1) Except as required in paragraph (d)(2), after August 31, 2002 and through April 30, 2003, each supplier of cold cleaning solvents shall sell or offer for sale only cold cleaning solvents with a vapor pressure less than 2.0 mm Hg at 68°F.

(2) After August 31, 2002 and through April 30, 2003, each supplier of cold cleaning solvents shall sell or offer for sale for the purpose of carburetor cleaning only cold cleaning solvents with a vapor pressure less than 7.0 mm Hg at 68°F.

(3) Except as required in paragraph (d)(4), beginning on May 1, 2003, each supplier of cold cleaning solvents shall sell or offer for sale only cold cleaning solvents with a vapor pressure less than 1.0 mm Hg at 68°F.

(4) Beginning on May 1, 2003, each supplier of cold cleaning solvents shall sell or offer for sale for the purpose of carburetor cleaning only cold cleaning solvents with a vapor pressure less than 5.0 mm Hg at 68°F.

(5) Sales of cold cleaning solvents in quantities of five gallons or less shall be exempt from the requirements of paragraphs (d)(1), (d)(2), (d)(3), and (d)(4).

(e) The owner or operator of an open-top vapor degreaser shall assure that all of the following requirements are met:

(1) The vapor degreaser shall be equipped with a cover that can be opened and closed easily without disturbing the vapor zone.

(2) The following safety switches and devices shall be provided:

(A) A condenser coolant flow and high level thermostat switch that shuts off the pump heat if the condenser coolant either is not circulating or is too warm;

(B) a spray safety switch that shuts off the spray pump if the vapor level drops more than four inches;

(C) a solvent level control;

(D) a sump thermostat; and

(E) a vapor level control thermostat that shuts off the pump heat when the vapor level rises above the recommended level.

(3) One of the following devices or systems shall be provided to control VOC emissions:

(A) A powered cover, if the freeboard ratio is greater than or equal to 0.75 and the degreaser opening is greater than 10.75 square feet;

(B) a refrigerated chiller;

(C) an enclosed design in which the cover or door opens only when the dry part is actually entering or exiting the degreaser;

(D) a carbon adsorption system, providing ventilation greater than or equal to 50 cubic feet per minute per square foot of degreaser opening during degreaser operation and exhausting less than 25 parts per million by volume of solvent when averaged over one complete adsorption cycle; or

(E) a vapor processing system, demonstrated to the satisfaction of the department to have an overall emissions control reduction efficiency of 65 percent or greater.

(4) The cover shall be kept closed at all times except when processing workloads through the degreaser.

(5) Solvent carryout shall be minimized by all of the following practices:

(A) Racking parts to allow complete drainage;

(B) moving parts in and out of the degreaser at less than 11 feet per minute;

(C) holding the parts in the vapor zone at least 30 seconds or until condensation ceases;

(D) draining any pools of solvent on the cleaned parts before removal from the vapor zone; and

(E) allowing parts to dry within the degreaser for at least 15 seconds or until visually dry.

(6) Porous or absorbent materials, including cloth, leather, wood, and rope, shall not be degreased.

(7) More than half of the degreaser's open-top area shall not be occupied with workload.

(8) The degreaser shall not be loaded to the point at which the solvent level would drop more than four inches when the workload is removed from the vapor zone.

(9) Spray shall always be below the vapor level.

(10) Solvent leaks shall be repaired immediately, or the degreaser shall be shut down until repairs are made.

(11) Waste solvent shall be stored in covered containers, and waste solvent shall not be disposed of or transferred to another party in a manner allowing the waste solvent to evaporate into the atmosphere.

(12) The cleaner shall not be operated so as to allow water to be visually detectable in solvent exiting the water separator.

(13) Ventilation fans shall not be used near the degreaser opening, nor shall exhaust ventilation exceed 65 cubic feet per minute per square foot of degreaser open area, unless necessary to meet OSHA regulations.

(14) A permanent, conspicuous label summarizing the operating procedures described in paragraphs (e)(4) through (e)(12) of this regulation shall be attached to the cleaner near the operator's position.

(f) Except as specified in paragraph (f)(12) of this regulation, the owner or operator of each conveyORIZED degreaser shall assure that all of the following requirements are met:

(1) Workplace fans shall not be used near the degreaser opening, nor shall exhaust ventilation exceed 65 cubic feet per minute per square foot of degreaser opening, unless the owner or operator documents that this ventilation is necessary to meet OSHA regulations.

(2) One of the following control devices or systems shall be installed:

(A) A refrigerated chiller;

(B) a carbon adsorption system, providing ventilation greater than or equal to 50 cubic feet per minute per square foot of air-vapor area during operation of degreaser and exhausting less than 25 parts per million of solvent by volume when averaged over a complete adsorption cycle; or

(C) a vapor processing system demonstrated to have an overall VOC emissions control reduction efficiency demonstrated to the satisfaction of the department to be 65 percent or greater.

(3) The cleaner shall be equipped with equipment, including a drying tunnel or a rotating or tumbling basket, that prevents cleaned parts from carrying out solvent liquid or vapor.

(4) The following safety switches and devices shall be provided:

(A) A condenser coolant flow and high-level thermostat switch that shuts off the pump heat if the condenser coolant either is not circulating or is above the recommended posted temperature;

(B) a spray safety switch that shuts off the spray pump or the conveyor if the vapor level drops more than four inches;

(C) a vapor level control thermostat that shuts off the pump heat when the vapor level rises above the recommended level;

(D) solvent level control; and

(E) sump thermostat.

(5) Openings during operation shall be minimized so that entrances and exits silhouette workloads with an average clearance between the parts and the edge of the degreaser opening of less than four inches or less than 10 percent of the width of the opening.

(6) Covers for closing off the entrance and exit during non-degreasing operations shall be installed and operated.

(7) Carryout emissions shall be minimized by the following:

(A) Racking parts for best drainage; and

(B) maintaining the conveyor speed at less than 11 feet per minute.

(8) Waste solvent shall be stored in covered containers, and waste solvent shall not be disposed of or transferred to another party in a manner allowing the waste solvent to evaporate into the atmosphere.

(9) Solvent leaks shall be repaired immediately, or the degreaser shall be shut down until these repairs are made.

(10) The cleaner shall not be operated so as to allow water to be visually detectable in solvent leaving the water separator.

(11) Covers shall be installed over entrances and exits of conveyorized degreasers, and the covers shall be closed when degreasing is not being conducted.

(12) The requirements of paragraph (f)(2) shall not apply to each affected degreaser that has less than 21.75 square feet of air vapor interface.

(g) Records of the following information shall be maintained. These records shall be kept on-site for a minimum of two years from the date of record:

(1) Each owner or operator of each solvent metal cleaning operation subject to this regulation shall keep the following records for affected degreasers:

(A) The amount and type of solvents used per month in affected degreasers; and

(B) all records pertaining to the maintenance of the affected degreasers and any associated emission control equipment.

(2) After August 31, 2002, each owner or operator of a facility subject to the requirements of paragraphs (c)(1) and (c)(2) of this regulation shall keep the following additional records for affected degreasers:

(A) The name and address of the solvent supplier;

(B) the date of each solvent purchase for affected degreasers; and

(C) the quantity and vapor pressure of each affected solvent purchased in units of mm Hg at 68°F.

(3) After August 31, 2002, each solvent supplier subject to the provisions of subsection (d) of this regulation shall keep the following records regarding the sale of each cold cleaning solvent subject to this regulation:

(A) The name and address of the solvent purchaser;

(B) the date of the solvent sale;

(C) the total volume of solvent sold; and

(D) the vapor pressure of each solvent sold in units of mm Hg at 68°F.

(4) Further recordkeeping may be required by the director, if necessary to adequately demonstrate compliance with this regulation.

(h) A stationary source subject to this regulation shall not be required to obtain a class III operating permit according to the terms of K.A.R. 28-19-500(d) if the only emission limitations or standards applicable to the source are the requirements of this regulation.

(i) This regulation shall be effective on and after September 1, 2002. (Authorized by K.S.A. 2001 Supp. 65-3005; implementing K.S.A. 65-3010; effective Sept. 1, 2002.)

28-19-717. Control of volatile organic compound (VOC) emissions from commercial bakery ovens in Johnson and Wyandotte counties. (a) Definitions. The following terms shall have the meanings provided below for the purposes of this regulation.

(1) "Baker's percent" means, for a given ingredi-

ent, the weight of that ingredient per 100 pounds of flour, expressed as a percentage.

(2) "Commercial bakery oven facility" means an establishment that is primarily engaged in the manufacture, for sale at wholesale or retail, of fresh or frozen bread, bread-type rolls, or dry bakery products, including biscuits, crackers, or cookies, in which the products are made using yeast leavening.

(3) "Spike yeast" means any yeast added to the dough beyond the initial yeast added to the dough.

(4) "Spiking time" means the elapsed time between the addition of the spike yeast to the dough and the placement of the dough into the oven.

(5) "Yeast action time" means the elapsed time between the initial addition of the yeast and the placement of the dough into the oven.

(b) Applicability. This regulation shall apply to each new, modified, or existing commercial bakery oven facility that meets these conditions:

(1) Is operating in either Johnson or Wyandotte county, or both; and

(2) has bakery ovens with a total potential-to-emit for volatile organic compounds (VOCs) equal to or greater than 100 tons per year.

(c) (1) Determination of commercial bakery oven facility potential-to-emit. The owner or operator of each commercial bakery oven facility operating in, or proposed for construction or modification in, the area defined in paragraph (1) of subsection (b) shall calculate the facility's total potential-to-emit (PTE) for VOCs in tons per year, using either the following equation and the presumptions in paragraph (2) of this subsection, or an EPA administrator-approved alternative method if the use of that alternative method is approved in writing by the department for this purpose:

$$PTE_{\text{Facility}} \text{ (in tons/year)} = \text{Sum of } PTE_{\text{VOC}} \text{ for all ovens (in tons/year)}$$

Where: $PTE_{\text{VOC}} = P_A \times EF_{\text{VOC}}$ (in pounds of VOC/ton of baked bread \times 1 ton/2000 pounds)

P_A = maximum annual production rate for the yeast-leavened finished bakery product (in tons/year)

EF_{VOC} = VOC emission factor for the yeast-leavened finished bakery product having the highest emission potential (in pounds of VOC/ton of baked bread)

$$EF_{\text{VOC}} = 0.95Y_i + 0.195t_i - 0.51S - 0.86t_s + 1.90$$

Where: Y_i = initial baker's percent of yeast to the nearest tenth of a percent;

t_i = total yeast action time in hours to the nearest tenth of an hour;

S = final (spike) baker's percent of yeast to the nearest tenth of a percent; and

t_s = spiking time in hours to the nearest tenth of an hour.

(2) The owner or operator shall presume for purposes of calculating the potential-to-emit that both of the following conditions apply:

(A) Each facility production line is operating 8,760 hours per year at maximum capacity.

(B) Each facility production line is producing the product with the highest level of VOC emissions of those products that it may produce.

(d) Control requirements. Each commercial bakery oven facility subject to this regulation shall install and operate VOC emissions control devices for each bakery oven to achieve at least an 80% total removal efficiency on the combined VOC emissions of all baking ovens, calculated as the capture efficiency times the control device efficiency.

(e) Time for compliance testing.

(1) The owner or operator of each existing bakery oven facility subject to this regulation shall demonstrate compliance with this regulation within one year from the effective date of this regulation by testing in accordance with the methods and procedures specified in subsection (f) of this regulation.

(2) Each new or modified bakery oven facility subject to this regulation shall demonstrate compliance with this regulation within 180 days of start-up by the testing of control equipment in accordance with the methods and procedures specified in subsection (f) of this regulation.

(3) Additional testing of the control equipment may be required by the department to demonstrate continued compliance in accordance with the methods and procedures specified in subsection (f) of this regulation.

(f) Testing requirements. The testing required under subsection (e) of this regulation shall be conducted in accordance with the following requirements:

(1) The testing shall be conducted at the owner's or operator's expense.

(2) The testing shall be conducted in accordance with a test plan submitted by the owner or operator to the department and approved by the department before the scheduled test date.

(3) The test plan shall specify the following elements of the test:

(A) The name of the entity performing the testing;

(B) the testing dates;

(C) the sampling location or locations;

(D) the sampling equipment to be used;

(E) the sampling procedures to be followed;

(F) the sample recovery methods; and

(G) any other information requested by the department pertaining to the facility and the test procedure.

(4) Testing procedures shall be conducted in accordance with the following requirements:

(A) For the purpose of determining control device efficiency, the owner or operator shall use USEPA test methods 18, 25, or 25A at 40 C.F.R. Part 60, as adopted by reference in K.A.R. 28-19-720.

(B) For the purpose of determining the capture efficiency of the air pollution control device, the owner or operator shall use the methods specified by the USEPA's February 7, 1995 memorandum titled "revised capture efficiency guidance for control of volatile organic compound emissions," and USEPA's technical document titled "guidelines for determining capture efficiency," dated January 9, 1994, both of which documents are hereby adopted by reference.

(C) Each owner or operator who demonstrates that the bakery oven or ovens are totally enclosed and operate under negative pressure with all venting through the air pollution control device may preclude, upon approval by the department, the need for the capture efficiency determination for those ovens so operated. The owner or operator seeking to demonstrate that the ovens operate under negative pressure shall do so by using the protocol titled "negative pressure enclosure qualitative test method for bakery ovens," as approved by EPA by letter of March 20, 1997, which protocol is hereby adopted by reference.

(D) Methods 204, 204A, 204B, 204C, 204D, 204E, and 204F of Appendix M of 40 C.F.R. Part 51, as in effect on July 1, 1999, are hereby adopted by reference.

(g) Compliance plan.

(1) Each owner or operator of an existing commercial bakery oven facility subject to this regulation shall submit a compliance plan to the department within three months of the effective date of this regulation.

(2) The compliance plan shall include the following information:

(A) The control device description;

(B) the testing methods and procedures; and

(C) the operating and maintenance plan for the control devices.

(3) The compliance plan shall identify the steps and processes to be taken to assure that the facility is in compliance by the date required for compliance.

(4) Each owner or operator of a new or modified commercial bakery oven facility subject to this regulation shall submit to the department an operation and maintenance plan for control devices before start-up.

(h) Monitoring and inspection.

(1) The owner or operator of each commercial bakery oven facility subject to this regulation shall continuously monitor and record data, as provided in paragraph (2) of this subsection, for emissions control devices and for operational parameters while the bakery oven is in operation.

(2) Each owner or operator required to monitor under paragraph (1) of this subsection shall continuously monitor and record the following parameters:

(A) The exhaust temperatures of all combustion devices, if used;

(B) the temperature rise across a catalytic oxidation bed, if used;

(C) the exit stream temperature on all condensers, if used;

(D) the volumetric flow rate; and

(E) any other monitoring parameter that the department may require the owner or operator to monitor.

(3) While operating the facility, the owner or operator of the facility shall maintain the parameters listed in paragraphs (2)(A) through (E) of this subsection within the baseline operational data established during the initial compliance test.

(4) (A) The owner or operator shall inspect control devices and monitoring equipment to assure that the control equipment is operating properly in accordance with the operating and maintenance plan prepared under either paragraph (g)(2)(C) or (g)(4) of this regulation, and that no leaks or malfunctions have occurred or are occurring.

(B) Inspections shall be made at the frequency defined by the equipment manufacturer, or as otherwise appropriate for each unit, component, or operation, but not less than monthly.

(C) The owner or operator shall record the results of each inspection in a permanent log to be retained on-site, and shall make the log available for inspection by a department representative upon request.

(i) Recordkeeping.

(1) The owner or operator of each commercial bakery oven facility subject to this regulation shall keep the records required by this regulation on-site for at least five years following the date of record.

(2) The owner or operator of each commercial bakery facility shall make the records required by this regulation available for inspection by a department representative upon request.

(3) Daily records of the following operational data shall be kept:

- (A) The amount of raw product processed;
- (B) the baker's percent of yeast used;
- (C) the fermentation time;
- (D) the type of product baked;
- (E) the amount of product baked;
- (F) the monitoring and inspection records specified in subsection (h) of this regulation; and
- (G) any other information that the department may determine to be necessary for determining that the facility is operated in continuous compliance with this regulation.

(4) The owner or operator shall calculate monthly emissions and shall record the emission factor used for each product, including citation of the source of the emission factor and the results of the calculations for the facility's ovens. (Authorized by K.S.A. 1999 Supp. 65-3005; implementing K.S.A. 1999 Supp. 65-3005, K.S.A. 1999 Supp. 65-3007, and K.S.A. 65-3010; effective Dec. 22, 2000.)

(5) The owner or operator shall calculate monthly emissions and shall record the emission factor used for each product, including citation of the source of the emission factor and the results of the calculations for the facility's ovens. (Authorized by K.S.A. 1999 Supp. 65-3005; implementing K.S.A. 65-3010; effective April 27, 2001; revoked Dec. 11, 2020.)

28-19-719. (Authorized by K.S.A. 1999 Supp. 65-3005; implementing K.S.A. 65-3010; effective April 27, 2001; revoked Dec. 11, 2020.)

NEW SOURCE PERFORMANCE STANDARDS

28-19-720. New source performance standards. (a) 40 C.F.R. part 60 and its appendices, as revised on July 1, 2017, are hereby adopted by reference except for the following:

(1) Provisions that are not delegable by the USEPA to the state or for which only the USEPA administrator retains authority, including the subparts, sections, and paragraphs containing any of the following:

- (A) Alternative methods of compliance approvable only by the USEPA administrator;
- (B) emission guidelines;
- (C) delegation of authority;
- (D) hearing and appeal procedures;
- (E) requirements regulating any stationary source located outside of Kansas; or

(F) requirements regulating any geographic area located outside of Kansas; and

(2) provisions no longer in effect on the effective date of this regulation.

(b) The definitions adopted by reference in subsection (a) shall apply only to this regulation. Unless the context clearly indicates otherwise, the following meanings shall be given to these terms as they appear in the portions of 40 C.F.R. part 60 adopted by reference in subsection (a):

(1) The term "administrator" shall mean the secretary or the secretary's authorized representative.

(2) The term "United States environmental protection agency" and any term referring to the United States environmental protection agency shall mean the department.

(3) The term "state" shall mean the state of Kansas.

(c) The owner or operator of each source that is subject to this regulation shall submit to the department any required annual reports specified in 40 C.F.R. part 60 within 180 days of the last day of the year for which the report is required, unless the owner or operator is required in this article of the department's regulations to submit annual reports on a different schedule. (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3008 and K.S.A. 65-3010; effective Jan. 23, 1995; amended June 6, 1997; amended June 11, 1999; amended Dec. 3, 2004; amended June 15, 2007; amended Nov. 5, 2010; amended Nov. 14, 2014; amended Dec. 11, 2020.)

EMISSIONS GUIDELINES FOR EXISTING SOURCES

28-19-721. Existing municipal solid waste landfills; definitions. (a) The definitions at 40 CFR §60.751, as in effect on July 1, 1996, are adopted by reference for the purposes of K.A.R. 28-19-721 through 28-19-727.

(b) The definition of "municipal solid waste landfill" or "MSW landfill" is as defined in K.A.R. 28-19-200.

(c) Unless the context clearly indicates otherwise, the following meanings shall be given to these terms as they appear in 40 CFR part 60.

(1) The term "administrator" shall mean the secretary or the secretary's authorized representative.

(2) The term "United States environmental protection agency" or any term referring to the United States environmental protection agency shall mean the department.

(3) The term "state" shall mean the state of Kansas. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-722. Existing municipal solid waste landfills; applicability, permits. (a) Except as otherwise provided in subsection (b) of this regulation, the provisions of K.A.R. 28-19-721 through 28-19-727 apply to each existing municipal solid waste landfill that meets all of the following criteria.

(1) Construction, reconstruction, or modification of the MSW landfill commenced before May 30, 1991.

(2) The MSW landfill has accepted waste at any time since November 8, 1987, or has additional design capacity available for future waste deposition.

(3) The MSW landfill has a design capacity greater than or equal to 2.5 million megagrams or 2.5 million cubic meters as determined using the methods provided in 40 CFR §60.754(a)(1), as in effect on July 1, 1996, which is adopted by reference for the purposes of K.A.R. 28-19-721 through 28-19-727.

(b) The provisions of K.A.R. 28-19-721 through 28-19-727 shall not apply to any existing MSW landfill that has accepted fewer than 20 tons of municipal solid waste per day and that has received certification of closure from the department before the effective date of this regulation.

(c) In applying the criteria of subsection (a) of this regulation, physical changes or operational changes made to an existing MSW landfill solely to comply with an emission guideline shall not be considered a modification or reconstruction and shall not subject an existing MSW landfill to the requirements of the new source performance standards for MSW landfills, 40 CFR part 60, subpart WWW, as adopted by K.A.R. 28-19-720.

(d) The owner or operator of each existing MSW landfill that meets the criteria of K.A.R. 28-19-722(a) shall be subject to the operating permit requirements at K.A.R. 28-19-510 et seq. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-723. Existing municipal solid waste landfills; initial and periodic reporting.

(a) The owner or operator of an existing MSW landfill that meets the criteria of K.A.R. 28-19-722(a) shall prepare and submit to the department an

initial design capacity report within 90 days of the effective date of this regulation. The report shall be prepared in accordance with the requirements of 40 CFR §60.757(a)(2), as in effect on July 1, 1996, which is hereby adopted by reference.

(b) The owner or operator of an existing MSW landfill that meets the criteria of K.A.R. 28-19-722(a) shall prepare and submit to the department amended design capacity reports in accordance with the requirements of 40 CFR §60.757(a)(3), as in effect on July 1, 1996, which is hereby adopted by reference.

(c) In meeting the requirements of this regulation, the owner or operator may calculate design capacity as required in subsections (a) and (b) of this regulation in either megagrams or cubic meters for comparison with the corresponding exemption values. Any density conversions and any assumptions made shall be documented and submitted with the initial design capacity report.

(d) If the landfill is permanently closed, a closure notification shall be submitted to the department as provided for in 40 CFR §60.757(d), as adopted by K.A.R. 28-19-726. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-724. Existing municipal solid waste landfills; NMOC test methods and procedures.

(a) The owner or operator of an existing MSW landfill that meets the criteria of K.A.R. 28-19-722(a) shall calculate the nonmethane organic compound (NMOC) emissions from the landfill using the test methods and procedures contained in 40 CFR §60.754(a)(1), as adopted by K.A.R. 28-19-722.

(b) If the initial calculated NMOC emission rate is less than 50 megagrams per year, the owner or operator shall meet these requirements:

(1) recalculate the emission rate annually using the procedures specified in 40 CFR §60.754(a)(1) as adopted by K.A.R. 28-19-722, until such time as the calculated NMOC emission rate is equal to or greater than 50 megagrams per year, or the landfill is closed; and

(2) submit an annual emission report to the department, except as provided for in 40 CFR §60.757(b)(1)(ii), as adopted by K.A.R. 28-19-726.

(c) If the recalculated emission rate conducted pursuant to paragraph (b)(1) of this regulation is greater than or equal to 50 megagrams per year, the owner or operator shall comply with the provisions of 40 CFR §60.754(a)(2) through (d), as in effect on July 1, 1996, which is hereby adopted by reference.

(d) The owner or operator of an existing MSW landfill that meets the criteria of K.A.R. 28-19-722(a) and has NMOC emissions greater than or equal to 50 megagrams per year calculated in accordance with the provisions of subsection (a) of this regulation shall comply with the requirements of 40 CFR §60.754(a)(2) through (d), as adopted by K.A.R. 28-19-724. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-725. Existing municipal solid waste landfills; collection and control systems. (a) Gas collection and control. The owner or operator of an existing MSW landfill required to install gas collection and control equipment based on the determination made pursuant to K.A.R. 28-19-724 shall be required to meet these provisions:

(1) submit to the department a collection and control system design plan that meets the requirements of 40 CFR § 60.752(b)(2)(i), as in effect on July 1, 1996, which is hereby adopted by reference;

(2) install a collection and control system that meets the requirements of 40 CFR §60.752(b)(2)(ii), as in effect on July 1, 1996, which is hereby adopted by reference;

(3) route all collected gas to a control system that complies with the requirements of 40 CFR §60.752(b)(2)(iii), as in effect on July 1, 1996, which is hereby adopted by reference; and

(4) comply with the collection and control system capping and removal requirements of 40 CFR §60.752(b)(2)(v), as in effect on July 1, 1996, which is hereby adopted by reference.

(b) Operational standards. Each existing MSW landfill shall operate the MSW landfill collection and control system in accordance with the provisions of 40 CFR §60.753, as in effect on July 1, 1996, which is hereby adopted by reference.

(c) Compliance. The owner or operator of each existing MSW landfill with a collection and control system shall determine whether or not the gas collection system complies with the requirements of these regulations according to the provisions of 40 CFR §60.755, as in effect on July 1, 1996, which is hereby adopted by reference.

(d) Monitoring. The owner or operator of each existing MSW landfill with a collection and control system shall monitor operations in accordance with the requirements of 40 CFR §60.756, as in effect on July 1, 1996, which is hereby adopted by reference.

(e) Active gas collection. Any active gas collection system installed to meet the requirements of these regulations shall meet the active collection systems standards for the systems contained in 40 CFR 60.759, as in effect on July 1, 1996, which is hereby adopted by reference. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-726. Existing MSW landfills; record-keeping and reporting. (a) The owner or operator of an existing municipal solid waste landfill subject to the requirements of K.A.R. 28-19-721 through 28-19-727 shall comply with the record-keeping requirements contained in 40 CFR § 60.758, as in effect on July 1, 1996, which is hereby adopted by reference.

(b) Each owner or operator of an existing municipal solid waste landfill subject to the requirements of K.A.R. 28-19-722(a) shall comply with the reporting requirements of 40 CFR §60.757 (b) through (g), as in effect on July 1, 1996, which is hereby adopted by reference. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

28-19-727. Existing MSW landfills; time for compliance. (a) Except as provided in subsection (b) of this regulation, the planning, awarding of contracts, and installation of MSW landfill air emissions collection and control systems shall be accomplished within 30 months of the effective date of these regulations.

(b) Each existing landfill that meets the criteria of K.A.R. 28-19-722(a), but that has an NMOC emission rate of fewer than 50 megagrams per year on the effective date of these municipal solid waste landfill air emissions regulations shall accomplish the planning, awarding of contracts, and installation of collection and control equipment within 30 months of the date when the criterion of an NMOC emissions rate greater than or equal to 50 megagrams per year is first met. This determination shall be made pursuant to the requirements of K.A.R. 28-19-724. (Authorized by K.S.A. 1996 Supp. 65-3005; implementing K.S.A. 1996 Supp. 65-3008; effective Nov. 14, 1997.)

MERCURY

28-19-728 through 28-19-728e. (Authorized by K.S.A. 2006 Supp. 65-3005; implementing K.S.A. 65-3010; effective June 15, 2007; revoked Nov. 5, 2010.)

28-19-728f. (Authorized by K.S.A. 2006 Supp. 65-3005 and K.S.A. 65-3007; implementing K.S.A. 65-3007 and 65-3010; effective June 15, 2007; revoked Nov. 5, 2010.)

**STANDARDS FOR HOSPITAL/MEDICAL/
INFECTIOUS WASTE INCINERATORS**

28-19-729. Standards for “hospital/medical/infectious waste incinerators.” (a) Applicability. Except as otherwise provided in subsection (b) of this regulation, the requirements of the “hospital/medical/infectious waste incinerators” regulations, K.A.R. 28-19-729 through K.A.R. 28-19-729h, shall apply to each individual “hospital/medical/infectious waste incinerator,” or “HMIWI,” as defined in K.A.R. 28-19-729a, for which construction commenced on or before June 20, 1996.

(b) Exceptions.

(1) The requirements of K.A.R. 28-19-729 through 28-19-729h shall not apply to HMIWI during periods when the HMIWI is burning only pathological waste, low-level radioactive waste, or chemotherapeutic wastes, as defined in K.A.R. 28-19-729a, or any combination of only these waste types, under all of the following conditions:

(A) The owner or operator of the HMIWI notifies the department in writing of an exemption claim under this subsection.

(B) The owner or operator of the HMIWI keeps records, on a calendar quarter basis, of the times, including start and ending times, when only pathological, low-level radioactive, or chemotherapeutic wastes, or a combination of only these wastes, are burned.

(C) The owner or operator of the HMIWI maintains the records for agency inspections in accordance with the provisions of K.A.R. 28-19-729h.

(2) A co-fired combustor, as defined in K.A.R. 28-19-729a, shall not be subject to these regulations if the owner or operator of the combustor does the following:

(A) Notifies the department of the exemption claim;

(B) provides to the department an estimate of the relative weights of “hospital or medical/infectious wastes,” fuels, and other wastes to be burned; and

(C) keeps records on a calendar quarter basis of the weight of the “hospital or medical/infectious wastes” and the weight of all other fuels and wastes burned in the device.

(3) Pyrolysis units, as defined in K.A.R. 28-19-729a, and cement kilns burning “hospital or med-

ical/infectious wastes” shall not be subject to the requirements of these regulations.

(4) Incinerators, boilers, or industrial furnaces subject to the hazardous waste facility permitting requirements of section 3005 of the federal solid waste disposal act, 42 U.S.C. §6925, shall not be subject to these regulations.

(5) Incinerators subject to 40 C.F.R. Part 60, Subparts Cb, Ea, or Eb for municipal waste combustors shall not be subject to these HMIWI regulations.

(c) Incinerators subject to the requirements of K.A.R. 28-19-729 through 28-19-729h shall not be subject to the requirements of K.A.R. 28-19-40 through 28-19-43. (Authorized by K.S.A. 1998 Supp. 65-3005; implementing K.S.A. 1998 Supp. 65-3005, K.S.A. 1998 Supp. 65-3007, and K.S.A. 65-3010; effective May 5, 2000.)

28-19-729a. “Hospital/medical/infectious waste incinerators”; definitions. (a) The definitions in 40 C.F.R. 60.51c, as in effect on July 1, 1998, are adopted by reference.

(b) “HMIWI” or “hospital/medical/infectious waste incinerator” is defined in 40 C.F.R. 60.51c.

(c) “Small rural hospital/medical/infectious waste incinerator” means a small HMIWI, as defined in 40 C.F.R. 60.51c, that burns less than 2,000 pounds of “hospital or medical/infectious waste” per week and is located more than 50 miles from the boundary of the nearest standard metropolitan statistical area (SMSA).

(d) “Standard metropolitan statistical area” (SMSA) means, for the purposes of these HMIWI regulations, the following:

(1) In Kansas:

(A) The Topeka SMSA comprised of Shawnee county;

(B) the Lawrence SMSA comprised of Douglas county;

(C) the Wichita SMSA comprised of Butler, Harvey, and Sedgwick counties; and

(D) the Kansas City SMSA comprised of Johnson, Leavenworth, Miami, and Wyandotte counties;

(2) in Missouri:

(A) The Joplin SMSA comprised of Jasper county; and

(B) the St. Joseph SMSA comprised of Buchanan county;

(3) in Oklahoma:

(A) The Enid SMSA comprised of Garfield county; and

(B) the Tulsa SMSA comprised of Creek, Osage,

Rogers, Tulsa, and Wagoner counties in Oklahoma; and

(4) the Lincoln SMSA comprised of Lancaster county in Nebraska. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

28-19-729b. “Hospital/medical/infectious waste incinerators”; emission standards. (a)

(1) The owner or operator of a “hospital/medical/infectious waste incinerator,” or HMIWI, subject to these HMIWI regulations shall not cause or permit emissions from the HMIWI to exceed a visible contaminant emission greater than 10 percent opacity during a six-minute block average, measured as specified in 40 C.F.R. 60.56c as adopted in K.A.R. 28-19-729g.

(2) The owner or operator of any HMIWI subject to these regulations shall not cause or permit emissions from the HMIWI of any pollutants to exceed the emission limits listed in Table 1 of this regulation, measured as specified in 40 C.F.R. 60.56c, as adopted in K.A.R. 28-19-729g.

(b) Exceptions. Air emissions opacity levels that exceed the specified limits in paragraph (a) (1) of this regulation shall not be considered a violation of this regulation if the owner or operator of the emission unit demonstrates to the satisfaction of the department that the opacity exceedence is due solely to the presence of uncombined water in the plume. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

**Table 1
Emission Limits for HMIWI**

Pollutant	Units	Emission Limits (7% oxygen, dry basis)			
		HMIWI Size			
		Small Rural	Small	Medium	Large
Particulate Matter (PM)	Milligrams per dry standard cubic meter (mg/dscm)	197	115	69	34
Carbon Monoxide (CO)	Parts per million by volume (ppmv)	40	40	40	40
Dioxins/furans	Nanograms per dscm total dioxins/furans, or Nanograms per dscm TEQ*	800 total 15 TEQ	125 total 2.3 TEQ	125 total 2.3 TEQ	125 total 2.3 TEQ
Hydrogen Chloride (HCl)	ppmv, or percent (%) reduction	3,100 ppmv	100 ppmv 93%	100 ppmv 93%	100 ppmv 93%
Sulfur Dioxide (SO ₂)	ppmv	55	55	55	55
Nitrogen Oxides (NO _x)	ppmv	250	250	250	250
Lead (Pb)	mg/dscm, or percent (%) reduction	10 mg/dscm	1.2 mg/dscm 70%	1.2 mg/dscm 70%	1.2 mg/dscm 70%
Cadmium (Cd)	mg/dscm, or percent (%) reduction	4 mg/dscm	0.16 mg/dscm 65%	0.16 mg/dscm 65%	0.16 mg/dscm 65%
Mercury (Hg)	mg/dscm, or percent (%) reduction	7.5 mg/dscm	0.55 mg/dscm 85%	0.55 mg/dscm 85%	0.55 mg/dscm 85%

* TEQ is used to abbreviate “Toxic Equivalent.” See 40 CFR 60.51c as adopted in K.A.R. 28-19-729a.

28-19-729c. Standards for “hospital/medical/infectious waste incinerators”; compliance schedule. (a) Except as otherwise provided in subsection (b) of this regulation, the owner or operator of each HMIWI subject to the emission limits in K.A.R. 28-19-729b shall comply with all of the applicable requirements of K.A.R. 28-19-729 through 28-19-729h on or before the

date one year after the effective date of EPA’s approval of the state’s HMIWI plan.

(b) (1) The owner or operator of an HMIWI may petition the department for an extension to the compliance date specified in subsection (a) of this regulation. This petition shall be prepared in accordance with the provisions of subsection (c) of this regulation.

(2) The compliance date for each HMIWI for which a compliance date extension petition is approved shall be no later than September 15, 2002.

(c) Each petition for a compliance date extension shall be submitted to the department within 180 days after the effective date of EPA's approval of the state's HMIWI emission guidelines implementation plan, and shall include the following components:

(1) Documentation and analysis to support the need for an extension, including an evaluation of the option to transport the waste off-site to a commercial medical waste treatment and disposal facility on a temporary or permanent basis;

(2) submittal of an emissions control plan, describing the air pollution controls or process modifications, or both, that are to be used to comply with the emission limits in K.A.R. 28-19-729b;

(3) a compliance schedule, with dates, for the following steps:

(i) The awarding of contracts for air pollution control systems, process modifications, or orders for purchase of components;

(ii) the initiation of on-site construction or installation of air pollution control equipment, process modifications, or both;

(iii) the completion of on-site construction or installation of air pollution control equipment, process modifications, or both; and

(iv) the conduct of performance testing, and final compliance with the applicable requirements of K.A.R. 28-19-729b through 28-19-729h.

(d) The owner or operator of an HMIWI for which a timely and complete compliance date extension petition has been submitted to the department may continue to operate the HMIWI until the petition has been approved or disapproved, if the owner or operator adheres to the compliance schedule outlined in the submitted petition. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

28-19-729d. "Hospital/medical/infectious waste incinerators"; operation, operator training, and qualification standards. (a)(1) For the purposes of these regulations, a "trained and qualified HMIWI operator" or "HMIWI operator" means a person who has completed the requirements of subsections (b) and (c) of this regulation, and who maintains the qualifications in accordance with the requirements of subsection (e) as required.

(2) A trained and qualified HMIWI operator either shall be at the HMIWI facility at all times

or shall be generally able to reach the facility within one hour at all times the incinerator is in operation.

(3) Any HMIWI subject to these regulations shall be operated only by a trained and qualified HMIWI operator, or by a person or persons working under the direct supervision of a trained and qualified HMIWI operator.

(b) The HMIWI operator training shall be obtained by completing an HMIWI operator training course that includes, at a minimum, the following elements:

(1) Training on the following subjects:

(A) Environmental concerns, including pathogen destruction and types of emissions;

(B) basic combustion principles, including products of combustion;

(C) operation of the type of incinerator to be used by the operator, including proper startup, waste charging, and shutdown procedures;

(D) combustion controls and monitoring;

(E) operation of air pollution control equipment and factors affecting performance, if applicable;

(F) methods to monitor pollutants, including continuous emission monitoring systems and monitoring of HMIWI and air pollution control device operating parameters, and equipment calibration procedures, where applicable;

(G) inspection and maintenance of the HMIWI, air pollution control devices, and continuous emission monitoring systems;

(H) actions to correct malfunctions or conditions that may lead to malfunction;

(I) bottom and fly ash characteristics and handling procedures;

(J) applicable federal, state, and local regulations;

(K) work safety procedures;

(L) pre-startup inspections; and

(M) recordkeeping requirements;

(2) an examination designed and administered by the instructor of the training course; and

(3) reference material distributed to the attendees covering the course topics.

(c) HMIWI operator qualification shall be obtained by the following:

(1) Completion of a training course that satisfies the criteria listed in paragraph (b)(1) of this regulation; and

(2) six months of experience as an HMIWI operator, six months of experience as a direct supervisor of an HMIWI operator, or completion of at least two burn cycles under the observation of a qualified HMIWI operator.

(d) HMIWI operator qualification shall be valid from the date on which the examination is passed or the completion of the required experience, whichever is later.

(e) To maintain qualification, the trained and qualified HMIWI operator shall complete an annual review or refresher course covering the following:

- (1) Update of regulations;
- (2) incinerator operation, including startup and shutdown procedures;
- (3) inspection and maintenance;
- (4) responses to malfunctions or conditions that may lead to malfunction; and
- (5) discussion of operating problems encountered by attendees.

(f) A lapsed qualification shall be renewed by one of the following procedures:

(1) For a lapse of less than three years, the HMIWI operator shall complete and pass a standard annual refresher course described in subsection (e) of this regulation.

(2) For a lapse of three years or more, the HMIWI operator shall complete and pass a training course with the minimum criteria described in paragraph (b)(1) of this regulation.

(g) The owner or operator of an HMIWI subject to these regulations shall maintain documentation at the facility that addresses the following:

- (1) A summary of the applicable standards under this regulation;
- (2) a description of basic combustion theory applicable to HMIWI;
- (3) procedures for receiving, handling, and charging waste;
- (4) HMIWI startup, shutdown, and malfunction procedures;
- (5) procedures for maintaining proper combustion air supply levels;
- (6) procedures for operating the HMIWI and associated air pollution control systems within the standards established under this regulation;
- (7) procedures for responding to periodic malfunction or conditions that may lead to malfunction;
- (8) procedures for monitoring HMIWI emissions;
- (9) reporting and recordkeeping procedures; and
- (10) procedures for handling ash.

(h) The owner or operator of a HMIWI subject to these regulations shall review with each HMIWI operator the information listed in subsection (g) of this regulation.

(1) The initial review of the information listed in subsection (g) of this regulation shall be conducted within one year of the date of EPA approval of the state's HMIWI plan, or before the assumption of responsibilities affecting HMIWI operation, whichever date is later.

(2) Subsequent reviews of the information listed in subsection (g) of this regulation shall be conducted annually. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

28-19-729e. "Hospital/medical/infectious waste incinerators"; waste management plan. The owner or operator of the HMIWI facility shall prepare a waste management plan in accordance with 40 C.F.R. 60.55c, as in effect on July 1, 1998, which is hereby adopted by reference. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

28-19-729f. "Hospital/medical/infectious waste incinerators"; inspections. (a) The owner or operator of each small rural HMIWI subject to this regulation, as defined in K.A.R. 28-19-729a(c), shall conduct an initial equipment inspection of the HMIWI within one year from the date the department receives EPA approval of the state's HMIWI plan.

(b) At a minimum, the owner or operator shall perform the following:

- (1) Inspect all burners, pilot assemblies, and pilot sensing devices for proper operation, and clean the pilot flame sensor, as necessary;
- (2) ensure proper adjustment of primary and secondary chamber combustion air, and adjust as necessary;
- (3) inspect hinges and door latches, and lubricate as necessary;
- (4) inspect dampers, fans, and blowers for proper operation;
- (5) inspect HMIWI door and door gaskets for proper sealing;
- (6) inspect motors for proper operation;
- (7) inspect primary chamber refractory lining, and clean and repair or replace the lining as necessary;
- (8) inspect the incinerator shell for corrosion and hot spots;
- (9) inspect the secondary and tertiary chambers and stack, and clean as necessary;
- (10) inspect the mechanical loader, including limit switches, for proper operation, if applicable;

(11) visually inspect the waste bed grates, and repair or seal, or both, as appropriate;

(12) for the burn cycle that follows the inspection, document that the incinerator is operating properly and make any necessary adjustments;

(13) inspect air pollution control devices for proper operation, if applicable;

(14) inspect waste heat boiler systems to ensure proper operation, if applicable;

(15) inspect bypass stack components;

(16) ensure proper calibration of thermocouples, sorbent feed systems, and any other monitoring equipment; and

(17) generally observe that the equipment is maintained in good operating condition.

(c)(1) Within 10 operating days following an equipment inspection, all necessary repairs shall be completed, unless the owner or operator obtains a written approval from the department, extending the time allowed for the necessary repairs.

(2) All approvals for time extensions to this requirement shall establish the date by which all necessary repairs are to be completed.

(d) Each small rural HMIWI subject to the emission limits specified in K.A.R. 28-19-729b shall undergo an equipment inspection annually, no later than 12 months following the previous annual equipment inspection, which shall include the inspection elements in subsections (b) and (c) of this regulation. (Authorized by and implementing K.S.A. 1998 Supp. 65-3005; effective May 5, 2000.)

28-19-729g. “Hospital/medical/infectious waste incinerators”; compliance, performance testing, and monitoring guidelines.

(a) (1) Except as provided in subsection (b) of this regulation, each individual HMIWI subject to these regulations shall meet the compliance and performance testing requirements in 40 C.F.R. 60.56c, as in effect on July 1, 1998, which is adopted by reference except for the fugitive emissions testing requirements in 40 C.F.R. 60.56c(b)(12) and (c)(3).

(2) To meet the testing requirements of paragraph (a)(1) of this regulation, the operator or owner of each HMIWI shall use the appropriate test methods listed in 40 C.F.R. 60.56c and adopted in K.A.R. 28-19-720.

(b) Each small rural HMIWI subject to these regulations, as defined in K.A.R. 28-19-729a(c), shall meet the following compliance and performance testing requirements:

(1) (A) The owner or operator of the small rural HMIWI shall conduct the performance testing in accordance with the requirements in 40 C.F.R. 60.56c(a), (b)(1) through (b)(9), (b)(11) for mercury (Hg) only, and (c)(1).

(B) The 2,000 pounds per week limitation in K.A.R. 28-19-729a(c) shall not apply during these performance tests.

(2) The owner or operator of the small rural HMIWI shall establish a maximum charge rate and minimum secondary chamber temperature as site-specific operating parameters during the initial performance test to determine compliance with applicable emission limits.

(3) (A) Following the date on which the initial performance test is completed, the owner or operator of the small rural HMIWI shall ensure that the HMIWI does not operate above the maximum charge rate or below the minimum secondary chamber temperature, measured as three-hour rolling averages, calculated each hour as the average of the previous three hours, or as the average of the burn cycle if the burn cycle is less than three hours, at all times except during periods of startup, shutdown, and malfunction.

(B) Operating parameter limits shall not apply during performance tests.

(C) Operation either above the maximum charge rate or below the minimum secondary chamber temperature shall constitute a violation of the established operating parameters.

(4) Except as provided in paragraph (b)(5) of this regulation, operation of the HMIWI above the maximum charge rate and below the minimum secondary chamber temperature, each measured on a three-hour rolling average or as the average of the burn cycle if the burn cycle is less than three hours, simultaneously shall constitute a violation of the particulate matter, carbon monoxide, and “dioxin/furan” emission limits.

(5) (A) The owner or operator of the small rural HMIWI may conduct a repeat performance test within 30 days of violation of an applicable operating parameter to demonstrate that the designated facility is not in violation of the applicable emission limit.

(B) Repeat performance tests conducted pursuant to this subsection shall be conducted under operating parameters equivalent to the operating conditions that indicated a violation under paragraph (b)(4) of this regulation.

(c) Except as specified in subsection (d) of this regulation, each HMIWI subject to these regu-

lations shall meet the monitoring requirements of 40 C.F.R. 60.57c, as in effect on July 1, 1998, which is hereby adopted by reference.

(d) The owner or operator of each small rural HMIWI subject to these regulations, as defined in K.A.R. 28-19-729a, shall meet the following monitoring requirements:

(1) Install, calibrate to the manufacturer's specifications, maintain, and operate a device for measuring and recording the temperature of the secondary chamber on a continuous basis, the output of which shall be recorded, at a minimum frequency of once every minute throughout operation.

(2) The owner or operator of the small rural HMIWI shall install, calibrate to the manufacturer's specifications, maintain, and operate a device that automatically measures and records the date, time, and weight of each charge of waste fed to the HMIWI.

(3) (A) The owner or operator of a small rural HMIWI subject to these regulations shall obtain the monitoring data required by paragraphs (d)(1) and (d)(2) of this regulation at all times during HMIWI operation, except during periods of monitoring equipment malfunction, calibration, or repair.

(B) The owner or operator shall obtain and record valid monitoring data for not less than 75 percent of the operating hours per day, and for not less than 90 percent of the operating hours per calendar quarter that the HMIWI is combusting "hospital or medical/infectious waste." (Authorized by K.S.A. 1999 Supp. 65-3005; implementing K.S.A. 1999 Supp. 65-3005 and K.S.A. 1999 Supp. 65-3007; effective May 5, 2000.)

28-19-729h. "Hospital/medical/infectious waste incinerators"; reporting and recordkeeping. (a) Except as otherwise provided in subsection (b) of this regulation, the owner or operator of an HMIWI that is subject to these regulations shall meet the reporting and recordkeeping requirements listed in 40 C.F.R. 60.58c(b), (c), (d), (e), and (f), as in effect on July 1, 1998 and hereby adopted by reference, excluding 40 C.F.R. 60.58c(b)(2)(ii), fugitive emissions, and (b)(7), siting.

(b) The owner or operator of each small rural HMIWI subject to the emission limits in K.A.R. 28-19-729b shall comply with the following reporting and recordkeeping requirements:

(1) The owner or operator of the small rural HMIWI shall maintain records of the an-

nual equipment inspections, any required maintenance, and any repairs not completed within 10 days of an inspection or the time frame established by the department pursuant to K.A.R. 28-19-729f(c).

(2) The owner or operator of the small rural HMIWI shall submit an annual report, signed by the facility manager, containing information recorded in accordance with paragraph (b)(1) of this regulation no later than March 1 following the calendar year in which data were collected.

(3) The owner or operator shall send subsequent annual reports no later than 12 calendar months following the previous report.

(4) Once the unit is subject to the department's class I air operating permit program, the owner or operator shall submit these reports semiannually. (Authorized by K.S.A. 1998 Supp. 65-3005; implementing K.S.A. 1998 Supp. 65-3005 and K.S.A. 1998 Supp. 65-3007; effective May 5, 2000.)

NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS (NESHAP)

28-19-735. National emission standards for hazardous air pollutants. (a) 40 C.F.R. part 61 and its appendices, as in effect on July 1, 2010, are adopted by reference except for the following:

(1) The following sections in subpart A:

- (A) 61.04;
- (B) 61.16; and
- (C) 61.17;
- (2) subpart B;
- (3) subpart H;
- (4) subpart I;
- (5) subpart K;
- (6) subpart Q;
- (7) subpart R;
- (8) subpart T; and
- (9) subpart W.

(b) Unless the context clearly indicates otherwise, the following meanings shall be given to these terms as they appear in 40 C.F.R. part 61:

(1) The term "administrator" shall mean the secretary or the secretary's authorized representative.

(2) The term "United States environmental protection agency" and any term referring to the United States environmental protection agency shall mean the department.

(3) The term "state" shall mean the state of Kansas. (Authorized by K.S.A. 2011 Supp. 65-3005; implementing K.S.A. 65-3008 and 65-3010; effective Jan. 23, 1995; amended June 6, 1997;

amended June 11, 1999; amended Dec. 3, 2004; amended June 15, 2007; amended Nov. 5, 2010; amended Dec. 28, 2012.)

**NATIONAL EMISSION STANDARDS FOR
HAZARDOUS AIR POLLUTANTS (MACT)**

28-19-750. Hazardous air pollutants; maximum achievable control technology. (a) 40 C.F.R. part 63 and its appendices, as in effect on July 1, 2010, are adopted by reference, except for the following:

- (1) The following sections in subpart A:
 - (A) 63.6(f)(1), (g), (h)(1), and (h)(9);
 - (B) 63.7(e)(2)(ii) and (f);
 - (C) 63.8(f);
 - (D) 63.10(f);
 - (E) 63.12;
 - (F) 63.13;
 - (G) in 63.14(b)(27), the phrase “and table 5 to subpart DDDDD of this part”;
 - (H) 63.14(b)(35), (39) through (53), and (55) through (62);
 - (I) in 63.14(i)(1), the phrase “table 5 to subpart DDDDD of this part”; and
 - (J) 63.15;
 - (2) subpart B;
 - (3) subpart C;
 - (4) subpart D;
 - (5) subpart E;
 - (6) subpart ZZZZ;
 - (7) subpart DDDDD;
 - (8) subpart JJJJJ;
 - (9) subpart KKKKK.
- (b) 40 C.F.R. part 63, subpart ZZZZ, as in effect on July 1, 2012 and as amended by 78 fed. reg. 6700-6724 (2013) and 78 fed. reg. 14457 (2013), is adopted by reference.

(c) Unless the context clearly indicates otherwise, the following meanings shall be given to these terms as they appear in the portions of 40 C.F.R. part 63 adopted by reference in this regulation:

(1) The term “administrator” shall mean the secretary or the secretary’s authorized representative.

(2) The term “United States environmental protection agency” and any term referring to the United States environmental protection agency shall mean the department.

(3) The term “state” shall mean the state of Kansas. (Authorized by K.S.A. 2014 Supp. 65-3005; implementing K.S.A. 2014 Supp. 65-3008 and K.S.A. 65-3010; effective Jan. 23, 1995; amended June 6, 1997; amended June 11, 1999; amended

Dec. 3, 2004; amended June 15, 2007; amended Nov. 5, 2010; amended Dec. 28, 2012; amended Nov. 14, 2014.)

28-19-750a. Consolidated federal air regulations; synthetic organic chemical manufacturing industry. (a) 40 C.F.R. part 65 and its appendices, as in effect on July 1, 2010, are adopted by reference except for the following sections in subpart A:

- (1) 65.9;
 - (2) 65.10; and
 - (3) 65.14.
- (b) Unless the context clearly indicates otherwise, the following meanings shall be given to these terms as they appear in 40 C.F.R. part 65:

(1) The term “administrator” shall mean the secretary or the secretary’s authorized representative.

(2) The term “United States environmental protection agency” and any term referring to the United States environmental protection agency shall mean the department.

(3) The term “state” shall mean the state of Kansas. (Authorized by K.S.A. 2011 Supp. 65-3005; implementing K.S.A. 65-3008 and 65-3010; effective Dec. 3, 2004; amended Nov. 5, 2010; amended Dec. 28, 2012.)

28-19-751. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Aug. 13, 1999.)

28-19-752. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995; revoked Aug. 13, 1999.)

28-19-752a. Hazardous air pollutants; limitations applicable to construction of new major sources or reconstruction of existing major sources. (a) Applicability.

(1) For the purposes of this regulation, 40 C.F.R. §63.40, as in effect as of July 1, 1997 is adopted by reference.

(2) Except as otherwise provided by 40 C.F.R. §63.40(c), (e), and (f), this regulation shall apply to the owner or operator of each proposed new major source of hazardous air pollutants (HAPs) and the owner or operator of each existing major source of hazardous air pollutants for which reconstruction is proposed.

(b) Definitions.

(1) For the purposes of this regulation, 40 C.F.R. §63.41, as in effect as of July 1, 1997, is adopted by reference.

(2) “Case-by-case MACT determination” means a determination pursuant to the provisions of subsection (d) of this regulation so that emissions of HAPs from the constructed or reconstructed source will be controlled to a level no less stringent than the maximum achievable control technology, or “MACT”, emission limitation for new sources.

(c) Prohibition. After the effective date of this regulation, the owner or operator shall not begin actual construction or reconstruction of a major source of HAP unless the conditions of both paragraphs (1) and (2) of this subsection are met:

(1) The owner or operator has fully complied with all requirements of the construction permit program, K.A.R. 28-19-300, et seq. for preconstruction review, including applicable requirements of section (d) of this regulation, and of subpart A of 40 C.F.R. part 63 as adopted by K.A.R. 28-19-750.

(2) (A) The major source category has been specifically regulated or exempted from regulation under a standard issued in 40 C.F.R. part 63 pursuant to 42 U.S.C. §7412(d), 42 U.S.C. §7412(h), or 42 U.S.C. §7412(j); or

(B) The owner or operator of the source has applied to the department through the preconstruction review process of K.A.R. 28-19-300, et seq., as required by paragraph (1) of this subsection for, and received from the department a final and effective case-by-case MACT determination pursuant to the provisions of subsection (d) of this regulation so that emissions of HAPs from the constructed or reconstructed source will be controlled to a level no less stringent than the maximum achievable control technology emission limitation for new sources.

(d) Requirements. The owner or operator of a source subject to this regulation shall apply for the construction permit under 28-19-300, et seq. and comply with the provisions of 40 C.F.R. §63.43, as in effect as of July 1, 1997, which are adopted by reference, except for the following subsections of 40 C.F.R. §63.43:

- (1) 40 C.F.R. §63.43(h)(1); and
- (2) 40 C.F.R. §63.43(i).

(e) Requirements for constructed or reconstructed major sources subject to subsequently adopted MACT standard or MACT requirement. The owner or operator of each major source sub-

ject to this regulation shall comply with the applicable provisions of 40 C.F.R. §63.44, in effect as of July 1, 1997, which is adopted by reference. (Authorized by K.S.A. 1998 Supp. 65-3005; implementing K.S.A. 1998 Supp. 65-3008; effective Aug. 13, 1999.)

28-19-753. Hazardous air pollutants; limitations applicable to sources for which the USEPA fails to meet certain deadlines.

(a) This regulation shall be applicable to a source only if the USEPA fails to promulgate an emission standard for the category or subcategory applicable to the source within the time-frame scheduled by the USEPA at 58 FR 63941, December 3, 1993.

(b) Within 18 months after the date the emission limitation was to be promulgated by the USEPA, the owner or operator of a major source to which the emission limitation would apply, shall file with the department an application to modify the operating permit of the major source. As part of the application to modify the operating permit, the owner or operator shall:

- (1) determine the applicable emission limitation for the source pursuant to subsection (c) of this regulation;
- (2) specify how the applicable emission limitation was determined;
- (3) specify the manner in which the emissions unit or stationary source will meet the applicable emission limitation; and
- (4) commit to test methods and procedures to demonstrate compliance with the applicable emission limitation.

(c) The applicable emission limitation shall be either:

(1) for stationary sources within a category or subcategory listed at 57 FR 31576, July 16, 1992, with 30 or more sources. The average emission limitation achieved by the best performing 12 percent of the existing sources, for which the administrator of the USEPA has emissions information, in such category or subcategory; or

(2) for stationary sources within a category or subcategory listed at 57 FR 31576, July 16, 1992, with fewer than 30 sources, the average emission limitation achieved by the best performing 5 sources, for which the administrator of the USEPA has or could reasonably obtain emissions information, in such category or subcategory.

(d) If the USEPA promulgates an emission standard pursuant to section 112(d) of the federal

clean air act that is applicable to the major source prior to the date on which a permit application is approved, the emission limitation in the operating permit shall reflect the promulgated standard rather than the emission limitation proposed in the application, provided that the source shall have the compliance period provided at section 112(i) of the federal clean air act.

(e) If, after a permit is issued approving the application to modify the major source filed pursuant to this regulation, the USEPA promulgates an emissions standard pursuant to section 112(d) of the federal clean air act that would be applicable to the major source in lieu of the emission limitation established in the permit, the operating permit of the major source shall be revised upon the next renewal to reflect the standard promulgated by the USEPA. The renewed permit shall also provide the owner or operator of the major source a reasonable time to comply with the applicable standard promulgated by the USEPA, which shall be no longer than eight years after such standard is promulgated or eight years after the date on which the source is first required to comply with the emissions limitations established under this regulation, whichever is earlier.

(f) Each application for a permit modification under this regulation shall be:

- (1) subject to the provisions of K.A.R. 28-19-518;
- (2) submitted on forms provided or approved by the department; and
- (3) considered significant permit modifications subject to the provisions of K.A.R. 28-19-513. (Authorized by K.S.A. 1993 Supp. 65-3005; implementing K.S.A. 1993 Supp. 65-3008; effective Jan. 23, 1995.)

TRANSPORTATION CONFORMITY

28-19-800. General conformity of federal actions. (a) 40 CFR part 93, subpart B, as promulgated on November 30, 1993, is adopted by reference, except for 40 CFR 93.151 and 40 CFR 93.160(f) which are deleted.

(b) Unless the context clearly indicates otherwise:

- (1) the term "state" shall mean the state of Kansas; and
- (2) the terms "applicable implementation plan" or "applicable SIP" shall refer to the Kansas state air implementation plan. (Authorized by and implementing K.S.A. 1995 Supp. 65-3005; effective March 15, 1996.)

28-19-801. Transportation conformity.

(a) The provisions of this regulation shall apply:

(1) to areas of the state which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of section 107(d) of the federal clean air act, 42 U.S.C. §7407, as promulgated at 40 CFR part 81, as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,202, July 11, 1986; and

(2) with respect to emissions of ozone precursors.

(b) Applicable provisions of the federal transportation conformity rule.

(1) The following sections of 40 CFR part 93, subpart A, entitled "Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Act," promulgated by the U.S. environmental protection agency on November 24, 1993, are adopted by reference: §§93.100, 93.103, 93.104, 93.106, 93.107, 93.108, 93.109, 93.110, 93.111, 93.113, 93.114, 93.115, 93.118, 93.119, 93.120, 93.122, 93.123, 93.124, 93.129, 93.132, 93.134, and 93.135.

(2) 40 CFR §93.102, as promulgated on November 24, 1993, is adopted by reference except that subparagraphs (b)(1), (b)(2), (b)(3)(ii) and (b)(3)(iii) are deleted.

(3) 40 CFR §93.128, as promulgated on November 24, 1993, is adopted by reference, except that subparagraph (e)(2) is deleted.

(4) 40 CFR §93.130, as promulgated on November 24, 1993, is adopted by reference with the following modifications:

(A) subparagraph (b)(5) of 40 CFR §93.130 is renumbered as subparagraph (a)(6);

(B) the reference in subparagraph (b) of 40 CFR 93.130 to "paragraphs (b)(1) through (5) of this section" shall read "paragraphs (b)(1) through (4) of this section";

(C) references in subparagraph (c)(1) of 40 CFR §93.130 to "paragraph (a) of this section" shall read "paragraph (b) of this section";

(D) any references made to 40 CFR §93.130 in any of the sections of 40 CFR part 93, subpart A, adopted by reference pursuant to subparagraph (b)(1) of this regulation shall be deemed to refer to this subparagraph (b)(4);

(E) any references in 40 CFR §93.130 to 40 CFR §93.127 are deleted; and

(F) subparagraph (e) of 40 CFR §93.130 is deleted.

(5) 40 CFR §93.136, as promulgated on November 24, 1993, is adopted by reference except that:

(A) subparagraphs (a)(1), (a)(6), and (a)(7) are deleted; and

(B) any reference made to 40 CFR §93.136 in any of the sections of 40 CFR, part 93, subpart A, adopted by reference pursuant to subparagraph (b)(1) of this regulation, shall be deemed to refer to this subparagraph (b)(5).

(6) The following is adopted in lieu of adoption by reference of 40 CFR §93.133, as promulgated on November 24, 1993, parts of which are inapplicable to the areas of the state identified in paragraph (a) of this regulation:

(A) Before a conformity determination is made, enforceable written commitments must be obtained from project sponsors for any project-level mitigation or control measures which are either:

(i) conditions of the conformity determination for a transportation plan or transportation improvement program; or

(ii) included in the project design concept and scope that is used in the regional emissions analysis required by 40 CFR §93.118 through §93.120 and 40 CFR §93.122 through §93.124.

(B) During the control strategy and maintenance periods, if the metropolitan planning organization or project sponsor believes the mitigation or control measures are no longer necessary for conformity, the project sponsor or operator may be relieved of its obligation to implement the mitigation or control measures if:

(i) it can demonstrate that the requirements of 40 CFR §93.118 and 40 CFR §93.119 are satisfied without the mitigation or control measures; and

(ii) it so notifies the agencies involved in the interagency consultation process required under paragraph (d) of this regulation. The metropolitan planning organization and the U.S. department of transportation shall confirm that the transportation plan and transportation improvement program still satisfy the requirements of 40 CFR §93.118 and 40 CFR §93.119 and that the conformity determinations for the transportation plan, transportation improvement program, and project are still valid without implementation of the mitigation or control measures.

(C) The reference to 40 CFR §93.133(a) in 40 CFR §93.115, which is adopted by reference pursuant to subparagraph (b)(1) of this regulation, shall be deemed to refer to this subparagraph (b)(6).

(7) Any reference to federal regulations in 23 CFR part 450 in any of the sections of 40 CFR part 93 adopted by reference pursuant to this regulation, is to 23 CFR part 450 as in effect on the date of adoption of this regulation.

(8) Any reference to 40 CFR §93.105, consultation, in any of the sections of 40 CFR part 93 adopted by reference, shall be deemed to refer to paragraph (d) of this regulation.

(c) Definitions.

(1) 40 CFR §93.101, definitions, as promulgated on November 24, 1993, is adopted by reference.

(2) For the purposes of this rule the term “Kansas consulting agencies” shall mean:

(A) the Kansas department of health and environment;

(B) the Kansas department of transportation;

(C) the Wyandotte county health department; and

(D) the Johnson county environmental department.

(d) Interagency consultation requirements.

(1) Consultation pursuant to this section shall take place during all periods identified in 40 CFR § 93.109, which is adopted by reference pursuant to paragraph (b) of this regulation.

(2) The Kansas consulting agencies shall participate in a consultation process with representatives of:

(A) the Missouri department of natural resources, division of environmental quality, and Missouri local air agencies that elect to participate in the consultation process;

(B) the Missouri department of transportation and Missouri local transportation agencies;

(C) the federal highway administration of the U.S. department of transportation, the federal transit administration of the U.S. department of transportation, and the U.S. environmental protection agency; and

(D) the Mid-America regional council, in its capacity as the lead planning agency for the Kansas City air quality region certified by the state of Kansas under section 174 of the federal clean air act, 42 U.S.C. §7504, and in its capacity as the metropolitan planning organization for the Kansas City metropolitan area, designated by the governor of the state of Kansas as responsible for transportation planning under section 134 of Title 23 U.S.C.

(3) Consultation shall be required for:

(A) any conformity determination pertaining to transportation plan, programs, and projects required pursuant to section 176(c)(4) of the federal

clean air act, 42 U.S.C. §7506(c)(4), and 40 CFR part 93, subpart A, as promulgated on November 24, 1993; and

(B) all matters listed at 40 CFR §93.105(c), as promulgated on November 24, 1993, which is hereby adopted by reference, with the following modifications:

(i) subparagraph (1)(v) of 40 CFR §93.105(c) is deleted; and

(ii) the reference in subparagraph (5) of 40 CFR §93.105(c) to 40 CFR §93.130 shall be deemed to refer to subparagraph (b)(4) of this regulation. (Authorized by and implementing K.S.A. 1995 Supp. 65-3005; effective March 15, 1996.)

E. FRUIT BUTTERS, JELLIES AND PRESERVES

28-21-60. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-60a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

28-21-61. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-61a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

28-21-62. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-62a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

28-21-63 and 28-21-64. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

F. DRESSINGS FOR FOODS

28-21-70. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-70a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

28-21-71. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-71a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

28-21-72. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-72a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked June 4, 2010.)

G. HAMBURGER AND PORK SAUSAGE

28-21-80. Authorized by K.S.A. 65-663, K.S.A. 1972 Supp. 65-673; effective Jan. 1, 1966; revoked Jan. 1, 1973.)

28-21-81. (Authorized by K.S.A. 65-663, K.S.A. 1972 Supp. 65-673; effective Jan. 1, 1966; revoked Jan. 1, 1973.)

28-21-82 through 28-21-85. (Authorized by K.S.A. 65-663, K.S.A. 1972 Supp. 65-673; effective Jan. 1, 1973; revoked June 4, 2010.)

H. MILK AND MILK PRODUCTS

28-21-90. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-90a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-91. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-91a to 28-21-91b. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-92. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-92a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-93. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-93a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-94. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-94a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-95 and 28-21-96. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-96a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-97 and 28-21-98. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-98a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-99. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-99a. (Authorized by K.S.A. 1979 Supp. 65-663; effective May 1, 1980; revoked May 10, 1996.)

28-21-100 and 28-21-101. (Authorized by K.S.A. 1979 Supp. 65-663, 65-673; effective Jan. 1, 1966; revoked May 1, 1980.)

28-21-102 to 28-21-107. (Authorized by K.S.A. 65-663, K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966; revoked May 10, 1996.)

28-21-108. (Authorized by K.S.A. 1968 Supp. 65-673; effective Jan. 1, 1969; revoked May 10, 1996.)

28-21-109 to 28-21-111. (Authorized by K.S.A. 1968 Supp. 65-673; effective Jan. 1, 1969; revoked May 10, 1996.)

28-21-112. (Authorized by K.S.A. 1968 Supp. 65-673; effective Jan. 1, 1969; revoked May 10, 1996.)

I. DRUGS AND THERAPEUTIC DEVICES

28-21-200. Drugs; name. (a) The name by which a drug is designated shall be clearly distinguishing and differentiating from any name recognized in an official compendium unless such drug complies in identity with the identity prescribed in an official compendium under such recognized name.

(b) The term "drug defined in an official compendium" means a drug having the identity prescribed for a drug in an official compendium.

(c) A statement that a drug defined in an official compendium differs in strength, quality, or purity from the standard of strength, quality, or purity set forth for such drug in an official compendium shall show all the respects in which such drug so differs, and the extent of each such difference. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-201. Drugs and devices; labeling, misbranding. (a) Among representations in the labeling of a drug or device which render such drug or device misbranded is a false or misleading representation with respect to another drug or device or a food or cosmetic.

(b) The labeling of a drug which contains two or more ingredients may be misleading by reason (among other reasons) of the designation of such drug in such labeling by a name which includes or suggests the name of one or more but not all such ingredients, even though the names of all such ingredients are stated elsewhere in the labeling. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-202. Drugs and devices; labeling requirements. (a) If a drug or device is not manufactured by the person whose name appears on the label, the name shall be qualified by a phrase which reveals the connection such person has with such drug or device, such as "Manufactured for and Packed by _____," "Distributed by _____," or other similar phrase which expresses the facts.

(b) The statement of the place of business shall include the street address, if any, of such place, unless such street address is shown in a current city directory or telephone directory.

(c) Where a person manufactures, packs, or distributes a drug or device at a place other than his principal place of business, the label may state the principal place of business in lieu of the actual place where each package of such drug or device was manufactured or packed or is to be distributed, if such statement is not misleading in any particular.

(d) The requirement that the label shall contain the name and place of business of the manufacturer, packer, or distributor shall not be considered to relieve any drug or device from the requirement that its label shall not be misleading in any particular.

(e)(1) The statement of the quantity of the contents of a package of a drug shall reveal the quantity of such drug in the package, exclusive of wrappers and other material packed with such drug.

(2) The statement shall be expressed in the terms of weight, measure, numerical count, or a combination of numerical count and weight or measure, which are generally used by consumers and users of such drug to express quantity thereof and which give accurate information as to such

quantity. But if no general usage in expressing accurate information as to the quantity of such drug exists among consumers and users thereof, the statement of the quantity of a drug which is not in tablet, capsule, ampul, or other unit form shall be in terms of weight if the drug is solid, semisolid, or viscous, or in terms of measure if the drug is liquid; the statement of the quantity of a drug which is in such unit form shall be in terms of the numerical count of such units, supplemented, when necessary to give accurate information as to the quantity of such drug in the package, by such statement (in such terms, manner, and form as are not misleading) of the weight or measure of such units, or of the quantity of each active ingredient in each such unit, as will give such information.

(3) The statement of the quantity of a device shall be expressed in terms of numerical count.

(f) A statement of weight shall be in terms of the avoirdupois pound, ounce, and grain, or of the kilogram, gram, and milligram. A statement of liquid measure shall be in terms of the United States gallon of 231 cubic inches and quart, pint, fluid ounce, and fluid dram subdivisions thereof, or of the liter, milliliter, or cubic centimeter, and shall express the volume at 68°Fahrenheit (20°Centigrade).

(g) Statements of the quantity of a drug shall contain only such fractions as are generally used in expressing the quantity of such drug. A common fraction shall be reduced to its lowest terms; a decimal fraction shall not be carried out to more than three places, except in the case of a statement of the quantity of an active ingredient in a unit of a drug.

(h)(1) Unless made in accordance with the provisions of subparagraph (2) of this paragraph, a statement of the quantity of a drug, in the terms of weight or measure applicable to such drug under the provisions of paragraph (e)(2) of this section, shall express the number of the largest unit specified in paragraph (f) of this section which is contained in the package (for example, the statement of the label of a package which contains one pint of a drug shall be "1 pint," and not "16 fluid ounces"). Where such number is a whole number and a fraction, there may be substituted for the fraction its equivalent in smaller units, if any smaller is specified in such paragraph (f) (for example, 1¼ pounds may be expressed as "1 pound 4 ounces"). The stated number of any unit which is smaller than the largest unit (specified in such paragraph (f)) contained in the package shall not equal or ex-

ceed the number of such smaller units in the next larger unit so specified (for example, instead of "1 quart 16 fluid ounces" the statement shall be "1½ quarts" or "1 quart 1 pint").

(2) In the case of a drug with respect to which there exists an established custom of stating the quantity of the contents as a fraction of a unit, which unit is larger than the quantity contained in the package, or as units smaller than the largest unit contained therein, the statement may be made in accordance with such custom if it is informative to consumers.

(i) The statement of the quantity of a drug or device shall express the minimum quantity, or the average quantity, of the contents of the packages. If the statement is not so qualified as to show definitely that the quantity expressed is the minimum quantity, the statement, except in the case of ampuls, shall be considered to express the average quantity. The statement of the quantity of a drug in ampuls shall be considered to express the minimum quantity.

(j) Where the statement expresses the minimum quantity, no variation below the stated minimum shall be permitted except variations below the stated weight or measure of a drug caused by ordinary and customary exposure, after such drug is introduced into commerce, to conditions which normally occur in good distribution practice and which unavoidably result in decreased weight or measure. Variations above the stated minimum shall not be unreasonably large. In the case of a liquid drug in ampuls the variation above the stated measure shall comply with the excess volume prescribed by the national formulary for filling of ampuls.

(k) Where the statement does not express the minimum quantity:

(1) Variations from the stated weight or measure of a drug shall be permitted when caused by ordinary and customary exposure, after such drug is introduced into commerce, to conditions which normally occur in good distribution practice and which unavoidably result in change of weight or measure;

(2) Variations from the stated weight, measure, or numerical count of a drug or device shall be permitted when caused by unavoidable deviations in weighing, measuring, or counting the contents of individual packages which occur in good packing practice. But under subparagraph (2) of this paragraph variations shall not be permitted to such extent that the average of the quantities in

the packages comprising a shipment or other delivery of the drug or device is below the quantity stated and no unreasonable shortage in any package shall be permitted, even though overages in other packages in the same shipment or delivery compensate for such shortage.

(l) The extent of variations from the stated quantity of the contents permissible under paragraphs (j) and (k) of this regulation in the case of each shipment or under delivery shall be determined by the facts in such case.

(m) A drug or device shall be exempt from compliance with the requirements of clause (2) of K.S.A. 65-669(b):

(1) The statement of the quantity of the contents, as expressed in terms applicable to such drug or device under the provisions of paragraph (e)(2) of this section, together with all other words, statements, and information required by or under authority of the act to appear on the label of such drug or device, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of K.S.A. 65-669(c) and regulations promulgated thereunder, or

(2) The quantity of the contents of the package, as expressed in terms of the numerical count in compliance with paragraph (e)(2) or (3) of this section, is less than six units, and such units can be easily counted without opening the package, or

(3) It is an ointment, is labeled "Sample" or "Physician's Sample," or with a substantially similar statement, and the contents of the package do not weigh more than 8 grams. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-203. Drugs and devices; forms of making required statements. (a) A word, statement, or other information required by or under authority of the Act to appear on the label may lack that prominence and conspicuousness required by K.S.A. 65-669(c) by reason (among other reasons) of:

(1) The failure of such word, statement, or information to appear on the part or panel of the label which is presented or displayed under customary conditions of purchase;

(2) The failure of such word, statement, or information to appear on two or more parts or panels of the label, each of which has sufficient space therefor, and each of which is so designed as to render it likely to be, under customary conditions of purchase, the part or panel displayed;

(3) The failure of the label to extend over the area of the container or package available for such extension, so as to provide sufficient label space for the prominent placing of such word, statement, or information;

(4) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(5) Insufficiency of label space (for the prominent placing of such word, statement, or information) resulting from the use of label space to give materially greater conspicuousness to any other word, statement, or information, or to any design or device; or

(6) Smallness or style of type in which such word, statement, or information appears, insufficient background contrast, obscuring designs or vignettes, or crowding with other written, printed, or graphic matter.

(b) No exemption depending on insufficiency of label space, as prescribed in regulations promulgated under K.S.A. 65-669(b) or (e) shall apply if such insufficiency is caused by:

(1) The use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label;

(2) The use of label space to give greater conspicuousness to any word, statement, or other information than is required by K.S.A. 65-669(c); or

(3) The use of label space for any representation in a foreign language.

(c)(1) All words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear thereon in the English language.

(2) If the label contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label shall appear thereon in the foreign language.

(3) If the labeling contains any representation in a foreign language, all words, statements, and other information required by or under authority of the act to appear on the label or labeling shall appear on the labeling in the foreign language. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-204. Habit-forming drugs; label requirements. (a)(1) The name of a substance

or derivative required to be borne on the label of a drug by K.S.A. 65-669(d) shall be the common or usual name of such substance or derivative, unless it is designated solely by a name recognized in an official compendium and such designation complies with the provisions of K.S.A. 65-669(c).

(2) A statement on the label of a drug of the name of a constituent, which constituent is a chemical derivative of a substance named in K.S.A. 65-669(d), shall show the substance from which such constituent is derived and that such constituent is a derivative thereof.

(b) If the drug is in tablet, capsule, ampul, or other unit form, the statement of the quantity or proportion of such substance or derivative contained therein shall express the weight or measure of such substance or derivative in each such unit. If the drug is not in such unit form the statement shall express the weight or measure of such substance or derivative in a specified unit of weight or measure of the drug. Such statement shall be in terms which are informative to the ordinary consumer and user of the drug.

(c) The names and quantities or proportions of all such substances and derivatives, and the statement "Warning—May be habit forming," shall immediately follow (without intervening written, printed, or graphic matter) the name by which such drug is titled in the part or panel of the label thereof which is presented or displayed under customary conditions of purchase.

(d) A drug shall not be considered to be misbranded by reason of failure of its label to bear the statement "Warning—May be habit forming":

(1) If such drug is not suitable for internal use, and is distributed and sold exclusively for such external use as involves no possibility of habit formation; or

(2) If the only substance or derivative subject to K.S.A. 65-669(d) contained in such drug is chlorobutanol, which is present solely as a preservative and in a quantity not more than 0.5 percent by weight, and such drug is for parenteral use only; or

(3) If the only substance or derivative subject to K.S.A. 65-669 (d) contained in such drug is chlorobutanol, which is present as an analgesic or as an analgesic and a preservative in a quantity not more than 3.0 percent, and such drug contains one or more other active ingredients and is for parenteral use only. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-205. Drugs; statement of ingredients and proportion.

(a)(1) The name of an ingredient, substance, derivative, or preparation required by K.S.A. 65-669(e)(1)(ii) to be borne on the label of a drug shall be the name thereof, which is listed in K.S.A. 65-669(e)(1)(ii), or, if not so listed, shall be a specific name and not a collective name. But if an ingredient is an article the name of which is recognized in an official compendium and such article complies with the specifications set forth therefor in such compendium, such ingredient may be designated on the label of such drug by the common or usual name under which such specifications are so set forth.

(2) Where an ingredient contains a substance the quantity or proportion of which is required by K.S.A. 65-669(e)(1)(ii) to appear on the label, and such ingredient is not a derivative or preparation of such substance as defined in paragraph (b)(1) of this section, the label shall bear, in conjunction with the name of the ingredient, a statement of the quantity or proportion of such substance in such drug.

(3) An abbreviation or chemical formula shall not be considered to be a common or usual name. The name "acetophenetidin" shall be considered to be the same as the name "acetphenetidn," "aminopyrine" the same as "amidopyrine." The name "alcohol" without qualification, means ethyl alcohol.

(b)(1) A derivative or preparation of a substance named in K.S.A. 65-669(e)(1)(ii) is an article which is derived or prepared from such substance by any method, including actual or theoretical chemical action.

(2) A statement on the label of a drug of the name of an ingredient thereof, which ingredient is a derivative or preparation of a substance named in K.S.A. 65-669(e)(1)(ii), shall show the substance from which such ingredient is derived or prepared and that such ingredient is a derivative or preparation thereof.

(c)(1) If the drug is in tablet, capsule, ampul, or other unit form, the statement of the quantity or proportion of a substance, derivative, or preparation contained therein shall express the weight or measure of such substance, derivative, or preparation in each such unit. If the drug is not in such unit form the statement shall express the weight or measure of such substance, derivative, or preparation in a specified unit of weight or measure of the drug, or the percentage of such substance, derivative, or preparation in such drug. Such statement

shall be in terms which are informative to the ordinary consumer and user of the drug.

(2) A statement of the percentage of alcohol shall express the percentage of absolute alcohol at 60° Fahrenheit (15.56° Centigrade). A statement of the percentage of a substance, derivative, or preparation other than alcohol shall express the percentage by weight; except that if both the substance, derivative, or preparation and the drug containing it are liquid, the statement may express the percentage by volume at 68° Fahrenheit (20° Centigrade), but in such case the statement shall be so qualified as to show definitely that the percentage is expressed by volume.

(d) In case a statement of the quantity or proportion of a derivative or preparation in a drug is not as informative, to consumers or users of such drug, of the activity or consequences of use thereof as a statement of the quantity or proportion of the substance from which such derivative or preparation is derived or prepared, the quantity or proportion of such substance shall also be stated on the label of such drug.

(e) A label of a drug may be misleading by reason (among other reasons) of:

(1) The order in which the names of ingredients, substances, derivatives, or preparations appear thereon, or the relative prominence otherwise given such names; or

(2) Its failure to reveal the proportion of, or other fact with respect to, an ingredient, substance, derivative, or preparation, when such proportion or other fact is material in the light of the representation that such ingredient, substance, derivative, or preparation is a constituent of such drug.

(f)(1) A drug shall be exempt from the requirements of clause (1)(ii) of K.S.A. 65-669 (e) if all words, statements, and other information required by or under authority of the act to appear on the label of such drug, cannot, because of insufficient label space, be so placed on the label as to comply with the requirements of K.S.A. 65-669(c) and regulations promulgated thereunder. But such exemption shall be on the condition that, if the omission from the label of the statement of the quantity of the contents affords sufficient space to state legibly thereon all the information required by such clause (1)(ii), such statement of the quantity of the contents shall be omitted as authorized by paragraph (m) of regulation 28-21-202 and the information required by such clause (1)(ii) shall be so stated as prominently as practicable even though the statement is not of such conspicuousness as to render it

likely to be read by the ordinary individual under customary conditions of purchase.

(2) A drug shall be exempt from the requirements of clause (1)(ii) of K.S.A. 65-669(e) with respect to the alkaloids atropine, hyoscyne or hyoscyamine contained in such drug, if such alkaloid is contained therein as a constituent of belladonna, hyoscyamus, scopolia, stramonium, or other plant material, or any preparation thereof, which was used as an ingredient of such drug, and no practical and accurate method of analysis exists for the quantitative determination of each such alkaloid in such ingredient. But such exemptions shall be on the condition that the label of such drug shall state the quantity or proportion of total alkaloids contained therein as constituents of such ingredient. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

28-21-206. Drugs and devices; directions for use. (a) *Adequate directions for use.* "Adequate directions for use" means directions under which the layman can use a drug or device safely and for the purposes for which it is intended. Directions for use may be inadequate because (among other reasons) of omission, in whole or in part, or incorrect specifications of:

(1) Statements of all conditions, purposes, or uses for which such drug or device is intended, including conditions, purposes, or uses for which it is prescribed, recommended, or suggested in its oral, written, printed, or graphic advertising, and conditions, purposes, or uses for which the drug or device is commonly used; except that such statements shall not refer to conditions, uses, or purposes for which the drug or device can be safely used only under the supervision of a practitioner licensed by law and for which it is advertised solely to such practitioner.

(2) Quantity of dose (including usual quantities for each of the uses for which it is intended and usual quantities for persons of different ages and different physical conditions).

(3) Frequency of administration or application.

(4) Duration of administration or application.

(5) Time of administration or application (in relation to time of meals, time of onset of symptoms, or other time factors).

(6) Route or method of administration or application.

(7) Preparation for use (shaking, dilution, adjustment of temperature, or other manipulation or process).

(b) *Exemption for prescription drugs.* A drug subject to the requirements of K.S.A. 65-669(q) shall be exempt from K.S.A. 65-669(f)(1) if all the following conditions are met:

(1) The drug is: (I) in the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage, or wholesale distribution of prescription drugs; or (II) in the possession of a retail, hospital, or clinic pharmacy, or a public health agency, regularly and lawfully engaged in dispensing prescription drugs; and is to be dispensed in accordance with K.S.A. 65-669(q).

(2) The label of the drug bears: (I) The statement "Caution: Federal law prohibits dispensing without prescription;" and (II) the recommended or usual dosage; and (III) the route of administration, if it is not for oral use; and (IV) if it is fabricated from two or more ingredients and is not designated conspicuously by a name recognized in an official compendium, the quantity or proportion of each active ingredient, and if it is not for oral use the names of all other ingredients. *Provided, however,* That the information referred to in subdivisions (II), (III), and (IV) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed, and, in the case of ampuls too small or otherwise unable to accommodate a label but which are packaged in a container from which they are withdrawn for dispensing or use, the information referred to in subdivision (I) of this subparagraph may be placed on the outside container only.

(3) The labeling of the drug (which may include brochures readily available to licensed practitioners) bears information as to the use of the drug by practitioners licensed by law to administer it: *Provided, however,* That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among practitioners licensed by law to administer the drug.

(c) *Exemption for veterinary drugs.* A drug intended solely for veterinary use which, because of toxicity or other potentiality for harmful effect, or the method of its use, is not safe for animal use except under the supervision of a licensed veterinarian, and hence for which "adequate directions for use" cannot be prepared, shall be exempt from K.S.A. 65-669 (f)(1) if all the following conditions are met:

(1) The drug is in the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage,

or wholesale or retail distribution of veterinary drugs and is to be sold only to or on the prescription or other order of a licensed veterinarian for use in the course of his professional practice.

(2) The label of a drug bears: (I) The statement "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian"; and (II) the recommended or usual dosage; and (III) the route of administration, if it is not for oral use; and (IV) the quantity or proportion of each active ingredient if it is fabricated from two or more ingredients and is not designated conspicuously by a name recognized in an official compendium. *Provided, however,* That the information referred to in subdivisions (II), (III), and (IV) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed.

(3) The labeling of the drug (which may include brochures readily available to licensed veterinarians) bears information as to use of the drug by licensed veterinarians: *Provided, however,* That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among veterinarians licensed by law to administer such drug.

(d) *Exemption for prescription devices.* A device which, because of any potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, is not safe except under the supervision of a practitioner licensed by law to direct the use of such device, and hence for which "adequate directions for use" cannot be prepared, shall be exempt from K.S.A. 65-669(f) (1) if all the following conditions are met:

(1) The device is in the possession of a person (or his agents or employees) regularly and lawfully engaged in the manufacture, transportation, storage, or wholesale or retail distribution of such device and is to be sold only to or on the prescription or other order of such practitioner for use in the course of his professional practice.

(2) The label of the device (other than surgical instruments) bears: (I) The statement "Caution: Federal law restricts this device to sale by or on the order of a _____," the blank to be filled with the word "physician," "dentist," "veterinarian," or with the descriptive designation of any other practitioner licensed by the law of Kansas; and (II) the method of its application or use.

(3) The labeling of the device (which may include brochures readily available to licensed practitioners) bears information as to the use of the device by practitioners licensed by law to use it

or direct its use: *Provided, however*, That such information may be omitted from the labeling if it is contained in scientific literature widely disseminated among practitioners licensed by law to use or order the use of such device.

(e) *Exemptions for drugs and devices shipped directly to licensed practitioners, hospitals, clinics, or public-health agencies for professional use.* Except as provided in paragraph (g) of this section, a drug or device shipped directly to or in the possession of a practitioner licensed by law to administer the drug or to use or direct the use of the device, or shipped directly to or in the possession of a hospital, clinic, or public-health agency, for use in the course of the professional practice of such a licensed practitioner, shall be exempt from K.S.A. 65-669(f)(1) if it meets the conditions of paragraphs (b)(2) and (3), (c)(2) and (3), or (d)(2) and (3) of this section.

(f) *Retail exemption for veterinary drug and prescription devices.* A drug or device subject to paragraph (c) or (d) of this section shall be exempt at the time of delivery to the ultimate purchaser or user from K.S.A. 65-669(f)(1) if it is delivered by a licensed practitioner in the course of his professional practice or upon a prescription or other order lawfully issued in the course of his professional practice, with labeling bearing the name and address of such licensed practitioner and the directions for use and cautionary statements, if any, contained in such order.

(g) *Exemption for new drugs.* A new drug shall be exempt from K.S.A. 65-669(f)(1):

(1) To the extent to which such exemption is claimed in an effective application with respect to such drug under section 505 of the federal act; or

(2) If no application under section 505 of the federal act is effective with respect to such drug but it complies with section 505 (i) and regulations thereunder.

No exemption shall apply to any other drug which would be a new drug if its labeling bore representations for its intended uses.

(h) *Exemption for drugs or devices when directions are commonly known.* A drug or device shall be exempt from K.S.A. 65-669(f)(1) insofar as adequate directions for common uses thereof are known to the ordinary individual.

(i) *Exemptions for inactive ingredients.* A harmless drug that is ordinarily used as an inactive ingredient, such as a coloring, emulsifier, excipient, flavoring, lubricant, preservative, or solvent, in the preparation of other drugs shall be exempt from

K.S.A. 65-669(f)(1). This exemption shall not apply to any substance intended for a use which results in the preparation of a new drug, unless an effective new-drug application provides for such use.

(j) *Exemption for diagnostic reagents.* A drug intended solely for use in the professional diagnosis of disease and which is generally recognized by qualified experts as useful for that purpose shall be exempt from K.S.A. 65-669(f)(1) if its label bears the statement “diagnostic reagent—for professional use only.”

(k) *Exemption for prescription chemicals and other prescription components.* A drug prepared, packaged, and primarily sold as a prescription chemical or other component for use by registered pharmacists in compounding prescriptions or for dispensing in dosage unit form upon prescriptions shall be exempt from K.S.A. 65-669 (f)(1) if all the following conditions are met:

(1) The drug is an official liquid acid or official liquid alkali, or is not a liquid solution, emulsion, suspension, tablet, capsule, or other dosage unit form; and

(2) The label of the drug bears: (I) The statement “for prescription compounding;” and (II) if in substantially all dosage forms in which it may be dispensed it is subject to K.S.A. 65-669(q)(A), the statement “Caution: Federal law prohibits dispensing without prescription;” or (III) if it is not subject to K.S.A. 65-669(q)(A) and is by custom among retail pharmacists sold in or from the package for use by consumers, “adequate directions for use” in the conditions for which it is so sold. *Provided, however*, That the information referred to in subdivision (III) of this subparagraph may be contained in the labeling on or within the package from which it is to be dispensed.

(3) This exemption shall not apply to any substance intended for use in compounding which results in a new drug, unless an effective new-drug application covers such use of the drug in compounding prescriptions.

(l) *Exemption for processing, repacking, or manufacture.* A drug in a bulk package (except tablets, capsules, or other dosage unit forms) or a device intended for processing, repacking, or use in the manufacture of another drug or device shall be exempt from K.S.A. 65-669(f)(1) if its label bears the statement “Caution: For manufacturing, processing, or repacking;” and, if in substantially all dosage forms in which it may be dispensed it is subject to section 15(k)(1) of the act, the statement “Caution: Federal law prohib-

its dispensing without prescription.” This exemption and the exemption under paragraph (k) of this section may be claimed for the same article. But the exemption shall not apply to a substance intended for a use in manufacture, processing, or repacking which causes the finished article to be a new drug, unless:

(1) An effective new-drug application held by the person preparing the dosage form or drug for dispensing covers the production and delivery to him of such substance; or

(2) If no application is effective with respect to such new drug, the label statement “Caution: For manufacturing, processing, or repacking” is immediately supplemented by the words “in the preparation of a new drug limited by federal law to investigational use,” and the delivery is made for use only in the manufacture of such new drug limited to investigational use as provided in federal regulation 1.114.

(m) *Exemption for drugs and devices for use in teaching, research, and analysis.* A drug or device subject to paragraph (b), (c), or (d) of this section shall be exempt from K.S.A. 65-669(f)(1) if shipped or sold to, or in the possession of, persons regularly and lawfully engaged in instruction in pharmacy, chemistry, or medicine not involving clinical use, or engaged in research not involving clinical use, or in chemical analysis, or physical testing, and is to be used only for such instruction, research, analysis, or testing.

(n) *Expiration of exemptions.* (1) If a shipment or delivery, or any part thereof, of a drug or device which is exempt under the regulations in this section is made to a person in whose possession the article is not exempt, or is made for any purpose other than those specified, such exemption shall expire, with respect to such shipment or delivery or part thereof, at the beginning of that shipment or delivery. The causing of an exemption to expire shall be considered an act which results in such drug or device being misbranded unless it is disposed of under circumstances in which it ceases to be a drug or device.

(2) The exemptions conferred by paragraphs (i), (j), (k), (l), and (m) of this section shall continue until the drugs or devices are used for the purposes for which they are exempted, or until they are relabeled to comply with K.S.A. 65-669 (f)(1). If, however, the drug is converted, compounded, or manufactured into a dosage form limited to prescription dispensing, no exemption shall thereafter apply to the article unless the dosage form is

labeled as required by K.S.A. 65-669 (q) and paragraph (b), (c), or (d) of this section.

(o) *Intended uses.* The words “intended uses” or words of similar import in paragraphs (a), (g), (i), (j), and (l) of this section refer to the objective intent of the persons legally responsible for the labeling of drugs and devices. The intent is determined by such persons’ expressions or may be shown by the circumstances surrounding the distribution of the article. This objective intent may, for example, be shown by labeling claims, advertising matter, or oral or written statements by such persons or their representatives. It may be shown by the circumstance that the article is, with the knowledge of such persons or their representatives, offered and used for a purpose for which it is neither labeled nor advertised. The intended uses of an article may change after it has been introduced into commerce by its manufacturer. If, for example, a packer, distributor, or seller intends an article for different uses than those intended by the person from whom he received the drug or device, such packer, distributor, or seller is required to supply adequate labeling in accordance with the new intended uses. But if a manufacturer knows, or has knowledge of facts that would give him notice, that a drug or device introduced into commerce by him is to be used for conditions, purposes, or uses other than the ones for which he offers it, he is required to provide adequate labeling for such a drug or device which accords with such other uses to which the article is to be put. (Authorized by K.S.A. 1965 Supp. 65-673; effective Jan. 1, 1966.)

J. MANUFACTURE AND USE OF LAETRILE

28-21-250. Definitions. (a) The term “laetrile” (with a small l) is a generic term which is used interchangeably with “Laetrile,” “nitriloxide,” “amygdalin,” “vitamin B-17” and related compounds of unknown number. The term is also used to include a number of these compounds, in which case it may appear as “laetriles.”

(b) “Laetrile” (with a capital L) is a specific chemical entity with a specific chemical formula of 1-mandelonitrile-beta-glucuronic acid. This is a registered trade name.

(c) “Amygdalin” is a specific chemical entity having a specific chemical formula of D-mandelonitrile-beta-D-glucoside-6-beta-D-glucoside. Mandelonitrile is a chemical in which cyanide is combined with benzaldehyde. Amygdalin is a laetrile compound but is not “Laetrile.” Only amygdalin (la-

etrile) has been authorized to be manufactured and used in the state of Kansas and is hereafter referred to in these regulations.

(d) The term "component" means any ingredient intended for use in the manufacture of amygdalin (laetrile) in dosage form, including those that may not appear in the finished product.

(e) The term "batch" means a specific quantity of amygdalin (laetrile) that has uniform character and quality, within specified limits, and is produced according to a single manufacturing order during the same cycle of manufacture.

(f) The term "lot" means a batch or any portion of a batch of amygdalin (laetrile) or, in the case of amygdalin (laetrile) produced by a continuous process, an amount of the substance produced in a unit of time or quantity in a manner that assures its uniformity, and in either case which is identified by a distinctive lot number and has uniform character and quality within specified limits.

(g) The terms "lot number" or "control number" means any distinctive combination of letters, or numbers, or both, from which the complete history of the manufacture, control, packaging, and distribution of a batch or lot of amygdalin (laetrile) can be determined.

(h) The term "active ingredient" means any component which is intended to furnish pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease or to affect the structure or any function of the body of man or other animals. The term shall include those components which may undergo chemical change in the manufacture of amygdalin (laetrile) and be present in the finished product in a modified form intended to furnish the specified activity or effect.

(i) The term "inactive ingredient" means any component other than an "active ingredient" present in the product.

(j) The term "materials approval unit" means any organizational element having the authority and responsibility to approve or reject components, in-process materials, packaging components, and final products.

(k) The term "strength" means the concentration of the amygdalin (laetrile).

(l) The term "potency" means the therapeutic activity of amygdalin (laetrile) as indicated by appropriate laboratory tests or by adequately developed and controlled clinical data. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-251. Manufacturing practice. (a) The criteria in each section of this regulation shall apply in determining whether the methods used in, or the facilities or controls used for, the manufacture, processing, packing, or holding of the product conform to or are operated or administered in conformity with current good manufacturing practice to assure that the product meets the requirements as to safety and has the identity and strength and meets the quality and purity characteristics which it purports or is represented to possess.

(b) The regulations in this part permit the use of precision automatic, mechanical, or electronic equipment in the production and control of amygdalin (laetrile) when adequate inspection and checking procedures are used to assure proper performance. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-252. Personnel. (a) The personnel responsible for directing the manufacture and control of amygdalin (laetrile) shall be adequate in number and background of education, training and experience, or combination thereof, to assure that the product has the safety, identity, strength, quality, and purity that it purports to possess. All personnel shall have capabilities commensurate with their assigned functions, a thorough understanding of the manufacturing or control operations they perform, the necessary training or experience, and adequate information concerning the reason for application of pertinent provisions of this part to their respective functions.

(b) Any person shown at any time (either by medical examination or supervisory observation) to have an apparent illness or open lesions that may adversely affect the safety or quality of the product shall be excluded from direct contact with the product until the condition is corrected. All employees shall be instructed to report to supervisory personnel any condition that may have such an adverse effect on the product. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-253. Buildings or facilities. (a) Buildings shall be maintained in a clean and orderly manner and shall be of suitable size, construction, and location to facilitate adequate cleaning, maintenance, and proper operations in the manufacturing, processing, packing, labeling, or holding of amygdalin (laetrile). The buildings shall: (1) Provide adequate space for: (A) Orderly placement of equipment and materials to mini-

mize any risk of mixups between different drugs, drug components, in-process materials, packaging materials, or labeling, and to minimize the possibility of contamination.

(B) The receipt, storage, and withholding from use of components pending sampling, identification, and testing prior to release by the materials approval unit for manufacturing or packaging.

(C) The holdings of rejected components prior to disposition to preclude the possibility of their use in manufacturing or packaging procedures for which they are unsuitable.

(D) The storage of components, containers, packaging materials, and labeling.

(E) Any manufacturing and processing operations performed.

(F) Any packaging or labeling operations.

(G) Storage of finished products.

(H) Control and production-laboratory operations.

(2) Provide adequate lighting, ventilation, and screening and, when necessary for the intended production or control purposes, provide facilities for adequate air-pressure, micro-biological, dust, humidity, and temperature controls to: (A) Minimize contamination of products by extraneous adulterants, including cross-contamination of one product by dust or particles of ingredients arising from the manufacture, storage, or handling of another product.

(B) Minimize dissemination of micro-organisms from one (1) area to another.

(C) Provide suitable storage conditions for drug components, in-process materials, and finished product in conformance with adequate stability.

(3) Provide adequate locker facilities and hot and cold water washing facilities, including soap or detergent, air drier or single service towels, and clean toilet facilities near working areas.

(4) Provide an adequate supply of potable water under continuous positive pressure in a plumbing system free of defects that could cause or contribute to contamination of product. Drains shall be of adequate size and, where connected directly to a sewer, shall be equipped with traps to prevent back-siphonage.

(5) Provide suitable housing and space for care of all laboratory animals.

(6) Provide for safe and sanitary disposal of sewage, trash, and other refuse within and from the buildings and immediate premises. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-254. Equipment. (a) Equipment used for the manufacture, processing, packing, labeling, holding, testing, or control of amygdalin (laetrile) shall be maintained in a clean and orderly manner and shall be of suitable design, size, construction, and location to facilitate cleaning, maintenance, and operation for its intended purpose. The equipment shall: (1) Be so constructed that all surfaces that come into contact with the product shall not be reactive, additive, or absorptive so as to alter the safety, identity, strength, quality, or purity of amygdalin (laetrile) or its components beyond the official or other established requirements.

(2) Be so constructed that any substances required for operation of the equipment, such as lubricants or coolants, do not contact the product so as to alter the safety, identity, strength, quality, or purity of the substance or its components beyond the official or other established requirements.

(3) Be constructed and installed to facilitate adjustment, disassembly, cleaning and maintenance to assure the reliability of control procedures, uniformity of production, and exclusion from the product of contaminants from previous and current operations that might affect the safety, identity, strength, quality, or purity of amygdalin (laetrile) beyond the official or other established requirements. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-255. Production and control procedures. (a) Production and control procedures shall include all reasonable precautions, including the following, to assure that the amygdalin (laetrile) produced has the safety, identity, strength, quality, and purity it purports to possess:

(1) Each significant step in the process, such as the selection, weighing, and measuring of components, the addition of ingredients during the process, weighing and measuring during various stages of the processing, and the determination of the finished yield, shall be performed by a competent and responsible individual and checked by a second competent and responsible individual; or if such steps in the processing are controlled by precision automatic, mechanical, or electronic equipment, their proper performance is adequately checked by one (1) or more competent individuals. The written record of the significant steps in the process shall be identified by the individual performing these tests and by the individual charged with checking these steps. Such

identifications shall be recorded immediately following completion of such steps.

(2) All containers and equipment used during the production of a batch of amygdalin (laetrile) shall be properly identified at all times to accurately and completely indicate their contents and, when necessary, the stage of processing of the batch.

(3) To minimize contamination and prevent mixups, equipment, utensils, and containers shall be thoroughly and appropriately cleaned and properly stored and have previous batch identification removed or obliterated between batches or at suitable intervals in continuous production operations.

(4) Appropriate precautions shall be taken to minimize microbiological and other contamination in the production of amygdalin (laetrile) purporting to be sterile or which by virtue of its intended use should be free from objectionable microorganisms.

(5) Appropriate procedures shall be established to minimize the hazard of cross-contamination of the product while being manufactured or stored.

(6) To assure the uniformity and integrity of the product, there shall be adequate in-process controls, such as checking the weights and disintegration times of tablets, the adequacy of mixing, the homogeneity of suspensions, and the clarity of solutions. In-process sampling shall be done at appropriate intervals using suitable equipment.

(7) Representative samples of all dosage forms of amygdalin (laetrile) shall be tested to determine their conformance with the specifications for the product before distribution.

(8) Procedures shall be instituted whereby review and approval of all production and control records, including packaging and labeling, shall be made prior to the release or distribution of a batch. A thorough investigation of any unexplained discrepancy or the failure of a batch to meet any of its specifications shall be undertaken whether or not the batch has already been distributed. This investigation shall be undertaken by a competent and responsible individual and shall extend to other batches of the same product and other ingredients that may have been associated with the specific failure. A written record of the investigation shall be made and shall include the conclusions and followup.

(9) Returned goods shall be identified as such and held. If the conditions under which returned goods have been held, stored, or shipped prior to

or during their return, or the condition of the product, its container, carton, or labeling as a result of storage or shipping, cast doubt on the safety, identity, strength, quality, or purity of the amygdalin (laetrile), the returned goods shall be destroyed or subjected to adequate examination or testing to assure that the material meets all appropriate standards or specifications before being returned to stock for warehouse distribution or repacking. If the product is neither destroyed nor returned to stock, it may be reprocessed provided the final product meets all its standards and specifications. Records of returned goods shall be maintained and shall indicate the quantity returned, date, and actual disposition of the product. If the reason for returned goods implicates associated batches, an appropriate investigation shall be made with the requirements of paragraph (8) of this section.

(10) Filters used in the manufacture, processing, or packaging of components of amygdalin (laetrile) for parenteral injection in humans shall not release fibers into such products. No asbestos-containing or other fiber-releasing filter may be used in the manufacture, processing, or packaging of such products. Filtration, as needed, shall be through a non-fiber-releasing filter. For the purpose of this regulation a non-fiber-releasing filter is defined as non-asbestos filter that, after any appropriate pre-treatment such as washing or flushing, will not continue to release fibers into the drug product or component that is being filtered. A fiber is defined as any particle with length at least three (3) times greater than its width. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-256. Components. (a) All components and other materials used in the manufacture, processing, and packaging of amygdalin (laetrile), and materials necessary for building and equipment maintenance, upon receipt shall be stored and handled in a safe, sanitary, and orderly manner. Adequate measures shall be taken to prevent mixups and cross-contamination affecting the components and final product. Components shall be withheld from use until they have been identified, sampled, and tested for conformance with established specifications and are released by a materials approval unit. Control of components shall include the following: (1) Each container of component shall be examined visually for damage or contamination prior to use, including examination for breakage of seals when indicated.

(2) An adequate number of samples shall be taken from a representative number of component containers from each lot and shall be subjected to one (1) or more tests to establish the specific identity.

(3) Representative samples of components liable to contamination with filth, insect infestation, or other extraneous contaminants shall be appropriately examined.

(4) Representative samples of all components intended for use as active ingredients shall be tested to determine their strength in order to assure conformance with appropriate specifications.

(5) Representative samples of components liable to microbiological contamination shall be subjected to microbiological tests prior to use. Such components shall not contain microorganisms that are objectionable in view of their intended use.

(6) Approved components shall be appropriately identified and retested as necessary to assure that they conform to appropriate specifications of identity, strength, quality, and purity at time of use. This requires the following: (A) Approved components shall be handled and stored to guard against contaminating or being contaminated by other drugs or components.

(B) Approved components shall be rotated in such a manner that the oldest stock is used first.

(C) Rejected components shall be identified and held to preclude their use in manufacturing or processing procedures for which they are unsuitable.

(7) Appropriate records shall be maintained, including the following:

(A) The identity and quantity of the component, the name of the supplier, the supplier's lot number, and the date of receipt.

(B) Examinations and tests performed and rejected components and their disposition.

(C) An individual inventory and record for each component used in each batch of amygdalin (laetrile) manufactured or processed.

(8) An appropriately identified reserve sample of all active ingredients consisting of at least twice the quantity necessary for all required tests, except those for sterility and determination of the presence of pyrogens, shall be retained for at least two (2) years after distribution of the last lot incorporating the component has been completed or one (1) year after the expiration date of this last lot, whichever is longer. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-257. Product containers and their packaging materials. (a) Suitable specifications, test methods, cleaning procedures, and, when indicated, sterilization procedures shall be used to assure that containers, closures, and other component parts of packages are suitable for their intended use. Product containers for amygdalin (laetrile) shall be cleansed with water which has been filtered through a non-fiber-releasing filter. Product containers and their components shall not be reactive, additive, or absorptive so as to alter the safety, identity, strength, quality, or purity of the product or its components beyond the official or established requirements and shall provide adequate protection against external factors that can cause deterioration or contamination of the product. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-258. Laboratory controls. (a) Laboratory controls shall include the establishment of scientifically sound and appropriate specifications, standards, and test procedures to assure that components, in-processed drugs, and finished products conform to appropriate standards of identity, strength, quality and purity. Laboratory controls shall include:

(1) The establishment of master records containing appropriate specifications for the acceptance of each lot of the components, product containers, and their components used in the production and packaging and description of the sampling and testing procedures used for them. Said samples shall be representative and adequately identified. Such record shall also provide for appropriate retesting of the components, product containers, and their components subject to deterioration.

(2) A reserve sample of all active ingredients is required.

(3) The establishment of master records, when needed, containing specifications and a description of sampling and testing procedures for in-process amygdalin (laetrile) preparations. Such samples shall be adequately representative and properly identified.

(4) The establishment of master records containing a description of sampling procedures and appropriate specifications for finished products. Such shall be adequately representative and properly identified.

(5) Adequate provisions for checking the identity and strength of amygdalin (laetrile) for all active ingredients and for assuring:

(A) Sterility of amygdalin (laetrile) purported to be sterile and freedom from objectionable micro-organisms for those products which should be so by virtue of their intended use.

(B) The absence of pyrogens for those products purporting to be pyrogen-free.

(C) That the release pattern of sustained release products is tested by laboratory methods to assure conformance to the release specifications.

(6) Adequate provision for auditing the reliability, accuracy, precision, and performance of laboratory test procedures and laboratory instruments used.

(7) A properly identified reserve sample of the finished product (stored in the same immediate container-closure system in which the product is marketed) consisting of at least twice the quantity necessary to perform all the required tests, except those for sterility and determination of the absence of pyrogens, and stored under conditions consistent with product labeling shall be retained for at least two (2) years after distribution has been completed or one (1) year after the product's expiration date, whichever is longer.

(8) Provision for retaining complete records of all laboratory data relating to each batch or lot of amygdalin (laetrile) to which they apply. Such records shall be retained for at least two (2) years after distribution has been completed or one (1) year after the product's expiration date, whichever is longer.

(9) Provision that animals shall be maintained and controlled in a manner that assures suitability for their intended use. They shall be identified and appropriate records maintained to determine the history of use.

(10) Provision that firms which manufacture non-penicillin products (including certifiable antibiotic products) on the same premises or use the same equipment as that used for manufacturing penicillin products, or that operate under any circumstances that may reasonably be regarded as conducive to contamination of other products by penicillin, shall test such non-penicillin products to determine whether any have become cross-contaminated by penicillin. Such products shall not be marketed if intended for use in man and the product is contaminated with an amount of penicillin equivalent to 0.05 (five one hundredths) unit or more of penicillin G per maximum single dose recommended in the labeling of a product intended for parenteral administration, or an amount of penicillin equivalent to 0.5 (five one tenth) unit

or more of penicillin G per maximum single dose recommended in the labeling of a product intended for oral use. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-259. Stability. (a) There shall be assurance of the stability of finished amygdalin (laetrile) products. This stability shall be:

(1) Determined by reliable, meaningful, and specific test methods.

(2) Determined on products in the same container-closure system in which they are marketed.

(3) Determined on any dry drug product that is to be reconstituted at the time of dispensing (as directed in its labeling), as well as on the reconstituted product.

(4) Recorded and maintained in such manner that the stability data may be utilized in establishing product expiration dates. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-260. Expiration dating. (a) To assure that amygdalin (laetrile) products liable to deterioration meet appropriate standards of identity, strength, quality, and purity at the time of use, the label of all such products shall have suitable expiration dates which relate to stability tests performed on them.

(1) Expiration dates appearing on the labeling shall be justified by readily available data from stability studies.

(2) Expiration dates shall be related to appropriate storage conditions stated on the labeling wherever the expiration date appears.

(3) When amygdalin (laetrile) is marketed in the dry state, for use in preparing a liquid product, the labeling shall bear expiration information for the reconstituted product as well as an expiration date for the dry product. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-261. Packaging and labeling. (a) Packaging and labeling operations shall be adequately controlled, to assure that only those products that have met the standards and specifications established in their master production and control records shall be distributed; to prevent mixups between products during filling, packaging, and labeling operations; to assure that correct labels and labeling are employed for the product; and to identify the finished product with a lot or control

number that permits determination of the history of the manufacture and control of the batch. An hour, day, or shift code is appropriate as a lot or control number for all products manufactured or processed in continuous production equipment. Packaging and labeling operations shall: (1) Be separated (physically or spatially) from operations on other drugs in a manner adequate to avoid mixups and minimize cross-contamination. Two (2) or more packaging or labeling operations having amygdalin (laetrile) and other drugs, containers, or labeling similar in appearance shall not be in process simultaneously on adjacent or nearby lines unless these operations are separated either physically or spatially.

(2) Provide for an inspection of the facilities prior to use to assure that all drugs and previously used packaging and labeling materials have been removed.

(3) Include the following labeling controls: (A) The holding of labels and package labeling upon receipt pending review and proofing against an approved final copy by a competent and responsible individual to assure that they are accurate regarding identity, content, and conformity with the approved copy before release to inventory.

(B) The maintenance and storage of each type of label and package labeling representing different products, strength, dosage forms, or quantity of contents in such manner as to prevent mixups and provide proper identification.

(C) A suitable system for assuring that only current labels and package labeling are retained and that stocks of obsolete labels and package labeling are destroyed.

(D) Restriction of access to labels and package labeling to authorized personnel.

(E) Avoidance of gang printing of cut labels, cartons, or inserts when the labels, cartons, or inserts are for different products or different strengths of the same products or are of the same size and have identical or similar format or color schemes. If gang printing is employed, packaging and labeling operations shall provide for added control procedures. These added controls should consider sheet layout, stacking, cutting, and handling during and after printing.

(4) Provide strict control of the package labeling issued for use with amygdalin (laetrile). Such issue shall be carefully checked by a competent and responsible person for identity and conformity to the labeling specified in the batch production record. Said record shall identify the labeling and

the quantities issued and used and shall reasonably reconcile any discrepancy between the quantity of amygdalin (laetrile) finished and the quantities of labeling issued. All excess package labeling bearing lot or control numbers shall be destroyed. In event of any significant unexplained discrepancy, an investigation should be carried out.

(5) Provide for adequate examination or laboratory testing of representative samples of finished products after packaging and labeling to safeguard against any errors in the finishing operations and to prevent distribution of any batch until all specified tests have been met. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-262. Master production and control records. (a) Batch production and control records. (1) To assure uniformity from batch to batch, a master production and control record for each drug product and each batch size of amygdalin (laetrile) shall be prepared, dated, and signed or initialed by a competent and responsible individual and shall be independently checked, reconciled, dated, and signed or initialed by a second competent and responsible individual. The master production and control record shall include:

(A) The name of the product, description of the dosage form, and a specimen or copy of each label and all other labeling associated with the retail or bulk unit, including copies of such labeling signed or initialed and dated by the person or persons responsible for approval of such labeling.

(B) The name and weight or measure of each active ingredient per dosage unit or per unit of weight or measure of the finished product and a statement of the total weight or measure of any dosage unit.

(C) A complete list of ingredients designated by names or codes sufficiently specific to indicate any special quality characteristic; an accurate statement of the weight or measure of each ingredient regardless of whether it appears in the finished product, except that reasonable variations may be permitted in the amount of components necessary in the preparation in dosage form provided that provisions for such variations are included in the master production and control record; an appropriate statement concerning any calculated excess of an ingredient; an appropriate statement of theoretical weight or measure at various stages of processing; and a statement of the theoretical yield.

(D) A description of the containers, closures, and packaging and finishing materials.

(E) Manufacturing and control instructions, procedures, specifications, special notations, and precautions to be followed.

(2) The batch production and control record shall be prepared for each batch of amygdalin (laetrile) produced and shall include complete information relating to the production and control of each batch. These records shall be retained for at least two (2) years after the batch distribution is complete, or at least one (1) year after the batch expiration date, whichever is longer. These records shall identify the specific labeling and lot or control numbers used on the batch and shall be readily available during such retention period. The batch record shall include: (A) An accurate reproduction of the appropriate master formula checked, dated, and signed or initialed by a competent and responsible individual.

(B) A record of each significant step in the manufacturing, processing, packaging, labeling, testing, and controlling of the batch, including: Dates; individual major equipment and lines employed; specific identification of each batch of components used; weights and measures of components and products used in the course of processing; in-process and laboratory control results; and identifications of the individual(s) actively performing and the individual(s) directly supervising or checking each significant step in the operation.

(C) A batch number that identified all the production and control documents relating to the history of the batch and all lot or control numbers associated with the batch.

(D) A record of any investigation made. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-263. Distribution records. (a) Finished goods warehouse control and distribution procedures shall include a system by which the distribution of each lot of amygdalin (laetrile) can be readily determined to facilitate its recall if necessary. Records within the system shall contain the name and address of the consignee, date and quantity shipped, and lot or control number of the product. Records shall be retained for at least two (2) years after the distribution of the product has been completed or one (1) year after the expiration date of the product, whichever is longer.

(b) To assure the quality of the product, finished goods warehouse control shall also include a sys-

tem whereby the oldest approved stock is distributed whenever possible. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-264. Complaint files. Records shall be maintained of all written and oral complaints regarding each product. An investigation of each complaint shall be made. The record of each investigation shall be maintained for at least two (2) years after distribution of the product has been completed or one (1) year after the expiration date of the product, whichever is longer. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-265. Reference laboratory control. (a) Manufacturers of amygdalin (laetrile) shall submit to the state department of health and environmental laboratories, prior to release of any lot number of amygdalin (laetrile) to wholesalers or physicians, 10 (ten) ampules or vials of injectable amygdalin (laetrile) and 25 (twenty-five) tablets and capsules of each dosage size produced from each lot number of amygdalin (laetrile) produced.

(b) Manufacturers of amygdalin (laetrile) shall certify in writing which shall accompany control samples of each lot number submitted to the state department of health and environmental laboratories that the product is free of bacterial and fungal contamination, pyrogenic agents, and all adulterants including but not limited to isopropyl and methyl alcohols. Autoclaving which causes stereochemical inversion of the mandelonitrile portion of amygdalin shall not be permitted.

(c) Any lot number of amygdalin (laetrile) found to contain impurities, microbial or fungal contamination, pyrogens, or other toxic substances shall be destroyed immediately. No lot number of amygdalin (laetrile) shall be released for distribution and use until approved and certified by the secretary of health and environment. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-266. Special packaging requirements. Each vial or ampule of injectable amygdalin and each vial or container of tablets or capsules shall contain a package insert with complete description of the product including potency, adverse reactions, contra-indications, dosage recommendations, mode of administration, and other information as may be required. In packag-

ing amygdalin (laetrile) for direct patient usage, a patient package insert must also be enclosed which summarizes the potential risks of the product. All tablets or capsules shall be packaged in child-proof containers. A precautionary label shall be attached to all packaging of injectable amygdalin (laetrile) warning patients against taking the parenteral preparation by mouth, since the high concentration can be rapidly fatal. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-267. Registration and renewal of registration. (a) Any pharmaceutical firm desiring to manufacture amygdalin (laetrile) in the state of Kansas shall file an application for a permit with the secretary of health and environment. Such application shall be accompanied by a fee of \$2,500 (two thousand five hundred dollars) for the purpose of paying for the costs involved in administering this program. The permit shall be effective for one (1) year after the date of its issuance and may be renewed annually by the permit holder for a fee of \$1,000 (one thousand dollars). No permits or renewal of permits shall be issued unless such fees have been collected. In addition to the permit fee the manufacturer shall be responsible for all costs incurred by the state department of health and environment for laboratory analysis and testing of each lot number of amygdalin (laetrile) submitted to the department for its approval and certification by the secretary of health and environment.

(b) The secretary of health and environment, after giving notice and holding a hearing, may revoke, suspend, or refuse to renew the permit of any person who violates any rule or regulation adopted by the secretary of health and environment or who is subject to applicable civil or criminal sanctions under the federal food, drug, and cosmetic act.

(c) No person, other than a physician, may sell, offer for sale, distribute, or dispense to the public within this state amygdalin (laetrile) unless said person is currently licensed to dispense by the Kansas board of pharmacy and first obtains a permit from the secretary of health and environment authorizing the permit holder to sell, offer for sale, distribute, or dispense amygdalin (laetrile) to the public. Selling, offering for sale, or distributing amygdalin (laetrile) to the public without a valid prescription of a physician to do so shall constitute a class B misdemeanor.

(d) Application for a permit to sell, offer for sale, or dispense amygdalin (laetrile) to the public must be filed with the secretary of health and environment and shall be accompanied by a fee of \$10 (ten dollars) for the purpose of paying for the costs in administering this program. The permit shall be effective for one (1) year after the date of its issuance and may be renewed annually by the permit holder for a fee of \$10 (ten dollars). No permits or renewal of permits shall be issued unless such fees have been collected.

(e) Any person who sells, dispenses, or administers amygdalin (laetrile) to the public shall maintain complete records of same on forms provided by the secretary of health and environment. (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

28-21-268. Price and fee control. (a) The maximum reasonable price at which amygdalin (laetrile) may be sold to a pharmacist or direct to a physician licensed in the state of Kansas shall be based on cost of production for the product plus 25% (twenty-five percent). A cost of production analysis report which has been approved by a certified public accountant shall be submitted to the secretary of health and environment prior to establishment of the wholesale cost of the product.

(b) No increase over and above the wholesale or retail cost of amygdalin (laetrile) may be made by a physician who administers or prescribes this product. The physician may charge a fee only for his professional services in prescribing or administering amygdalin (laetrile). (Authorized by K.S.A. 1978 Supp. 65-6b06 and 65-6b07; effective May 1, 1979.)

Article 22.—ENRICHMENT OF FLOUR AND BREAD

28-22-1. Enriched flour labeling. All enriched flour shall be labeled as “enriched flour.” (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-2. Labeling of flour limited. When any reference is made on the labeling of flour to the kinds and amounts of enriching ingredients which have been added, such reference shall be limited to show the proportion of the average adult's daily requirements of such substances. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-3. Labeling of flour to contain no claims for effects. Enriched flour labels shall not contain claims regarding physiological or therapeutic effects of enriching ingredients nor information concerning other minerals or vitamins. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-4. Certificate of intent. A certificate of intent as provided for in section 2 of the enrichment law shall be in one of the two following forms:

(a) A continuing certificate covering all purchases for any time which shall be in the following general form:

CERTIFICATE OF INTENT

In compliance with the provisions of section 2 of the Kansas enrichment law, it is hereby certified by

(Purchaser)
that all unenriched flour purchased from

(Seller)
after _____ will be used only in the manufacture,
(Date)

mixing, or compounding of white bread or rolls enriched to meet the requirements of the Kansas enrichment act or of products other than flour, white bread, or rolls.

This certificate shall be cancelled only by written notice by the purchaser.

Date Agent of purchaser

(b) A certificate covering a single purchase order, in which case the certificate shall specify the exact quantity of flour covered by the certificate, the trade or brand names or other identifying marks on the flour containers, and any other information needed to identify the flour covered by the certificate. This type of certificate may be made a part of any regular purchase order form used by either the purchaser or seller, provided that the certificate of intent is placed on the face of the purchase order and the order is signed by an authorized agent of the purchaser. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-5. Certificate of intent available. A copy of each certificate of intent shall be retained by the purchaser and one copy kept by the seller. These certificates shall be available for examination of the duly qualified officers of the Kansas state board of health at any reasonable time. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-6. Enriched bread, labeling. All enriched bread when wrapped shall be labeled "enriched bread." (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-7. Labeling of bread limited. When any reference is made on the labeling of bread to the kinds and amounts of enriching ingredients which have been added, such reference shall be limited to show the proportion of the average adult's daily requirements of such substance. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

28-22-8. Labeling of bread to contain no claims for effects. Enriched bread labels shall not bear claims regarding physiological or therapeutic effects of enriching ingredients nor information concerning other minerals or vitamins. (Authorized by K.S.A. 1965 Supp. 65-2305; effective Jan. 1, 1966.)

Article 23.—SANITATION; FOOD AND DRUG ESTABLISHMENTS

A. GENERAL PROVISIONS

28-23-1 through 28-23-3. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked Feb. 8, 2013.)

28-23-4. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-5. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-6. (Authorized by K.S.A. 65-625, K.S.A. 1979 Supp. 65-626; effective Jan. 1, 1966; amended May 1, 1980; revoked Feb. 8, 2013.)

28-23-7. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked Feb. 8, 2013.)

28-23-8. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-9. (Authorized by K.S.A. 65-625, K.S.A. 1979 Supp. 65-626; effective Jan. 1, 1966; amended May 1, 1980; revoked June 4, 2010.)

28-23-10. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-11 through 28-23-13. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked Feb. 8, 2013.)

28-23-14 to 28-23-15. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-16. (Authorized by K.S.A. 65-626; effective, E-68-9, March 11, 1968; effective Jan. 1, 1969; amended Jan. 1, 1970; revoked Feb. 29, 2008.)

B. BAKERIES

28-23-20 through 28-23-24. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-25. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-26 through 28-23-32. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-33. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-34 through 28-23-36. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

C. MANUFACTURE AND HANDLING; SODA WATER

28-23-40. (Authorized by K.S.A. 1968 Supp. 65-626; effective Jan. 1, 1966; revoked Jan. 1, 1969.)

28-23-41. (Authorized by K.S.A. 65-663, K.S.A. 1968 Supp. 65-673; effective Jan. 1, 1969; revoked June 4, 2010.)

28-23-42 through 28-23-55. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

D. FOOD AND DRINK STANDS; FAIRS AND PUBLIC GATHERINGS

28-23-60 to 28-23-66. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-67 and 28-23-68. (Authorized by K.S.A. 1979 Supp. 65-626; effective Jan. 1, 1966; revoked May 1, 1980.)

28-23-69. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

E. FROZEN FOOD LOCKER PLANTS

28-23-70 and 28-23-71. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-72. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-73. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-74. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-75. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-76 to 28-23-77. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked May 10, 1996.)

28-23-78 through 28-23-80. (Authorized by K.S.A. 1965 Supp. 65-626; effective Jan. 1, 1966; revoked June 4, 2010.)

28-23-81. (Authorized by K.S.A. 65-626; implementing K.S.A. 1984 Supp. 65-673; effective May 1, 1986; revoked Aug. 13, 1999.)

28-23-82. (Authorized by K.S.A. 65-626; implementing K.S.A. 65-673; effective May 1, 1986; amended Aug. 23, 1993; revoked Aug. 13, 1999.)

28-23-83. (Authorized by K.S.A. 65-626; implementing K.S.A. 1984 Supp. 65-673; effective May 1, 1986; revoked Aug. 13, 1999.)

28-23-84 to 28-23-87. (Authorized by K.S.A. 65-626; implementing K.S.A. 1984 Supp. 65-673; effective May 1, 1986; revoked Aug. 13, 1999.)

28-23-88. (Authorized by K.S.A. 65-626; implementing K.S.A. 65-673; effective May 1, 1986; amended, T-87-36, Nov. 19, 1986; amended May 1, 1987; revoked Aug. 13, 1999.)

28-23-89. (Authorized by K.S.A. 65-626; implementing K.S.A. 1984 Supp. 65-673; effective May 1, 1986; revoked Aug. 13, 1999.)

F. SERVING OF MILK

28-23-90 and 28-23-91. (Authorized by K.S.A. 1979 Supp. 65-626; effective Jan. 1, 1966; revoked May 1, 1980.)

**Article 24.—SANITARY REGULATIONS
FOR THE PRACTICE OF
COSMETOLOGY, NAIL TECHNOLOGY,
ELECTROLOGY, OR ESTHETICS**

28-24-1. Definitions. As used in this article of the department's regulations, each of the following terms shall have the meaning specified in this regulation:

(a) "Bleach solution" means chlorine bleach used for disinfection purposes. Bleach solution shall be mixed, stored, and used according to manufacturer's instructions.

(b) "Board" means the Kansas board of cosmetology.

(c) "Clean" means free of visible or surface debris through washing with soap and water or with detergent and water. Clean shall not mean disinfected.

(d) "Communicable disease or condition" means a disease or condition that is diagnosed by a licensed health care professional as being contagious or transmissible and that can be transmitted during the practice of cosmetology, nail technology, electrology, or esthetics.

(e) "Consumer" means any individual who receives cosmetology, electrology, nail technology, or esthetic services.

(f) "Disinfect" means to use a disinfectant on a clean, nonporous item or surface to kill bacteria, viruses, and fungi.

(g) "Disinfectant" means an EPA-registered disinfecting solution that is bactericidal, virucidal, and fungicidal. Disinfectants can be in the form of a liquid concentrate, wipe, spray, or foam.

(h) "EPA" means the United States environmental protection agency.

(i) "Establishment" means any place where cosmetology, nail technology, electrology, or esthetics is practiced, other than a school.

(j) "FDA" means the food and drug administration of the United States department of health and human services.

(k) "Mobile establishment" means a self-contained, enclosed mobile unit licensed for the practice of one or more of the following:

(1) Cosmetology;

(2) nail technology;

(3) esthetics; or

(4) electrology.

(l) "Noninvasive," when used to describe procedures or services, means the procedures or services confined to the nonliving cells of the epidermis found in the stratum corneum layer of the skin. The practice of cosmetology, nail technology, or esthetics shall not alter, cut, or damage any living cells.

(m) "Practitioner" means an individual who practices cosmetology, nail technology, electrology, or esthetics.

(n) "Product" means any substance used on a consumer in the practice of cosmetology, electrology, nail technology, or esthetics.

(o) "Protective gloves" means single-use gloves made of nitrile, vinyl, or latex.

(p) "Safety data sheet" and "SDS" mean written or printed material concerning a hazardous chemical that is prepared in accordance with 29 C.F.R. 1910.1200(g).

(q) "School" means any place where cosmetology, esthetics, nail technology, or electrology is taught.

(r) "Single-use," when used to describe an item used in the practice of cosmetology, nail technology, electrology, or esthetics, means that the item is porous and cannot be disinfected, regardless of manufacturer designation.

(s) "Sterilization" means the process used to render an instrument free of all forms of living microorganisms by use of a steam autoclave sterilizer or dry-heat sterilizer. The use of ultraviolet light shall not be an acceptable form of sterilization. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-2. Personal cleanliness. Each practitioner shall clean that individual's hands or use an alcohol-based hand sanitizer before and after each consumer service. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Jan. 2, 1998; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-3. Communicable diseases or conditions. (a) No practitioner shall provide either of the following:

(1) Any service to a consumer who has pediculosis, open sores, inflamed tissue suggesting a communicable disease or condition, fungus, lice,

including head, body, or pubic, or ringworm, until the consumer furnishes to the practitioner a statement signed by a licensed physician stating that the communicable disease or condition is not in an infectious, contagious, or communicable stage; or

(2) any service while having pediculosis, open sores, or inflamed tissue suggesting a communicable disease or condition, fungus, lice, including head, body, or pubic, or ringworm, until the practitioner obtains a statement signed by a licensed physician stating that the communicable disease or condition is not in an infectious, contagious, or communicable stage.

(b) If a service has been started and a practitioner discovers that a consumer has pediculosis, open sores, inflamed tissue suggesting a communicable disease or condition, fungus, lice, including head, body, or pubic, or ringworm, the practitioner shall perform the following:

(1) Stop services immediately in a safe manner;
 (2) inform the consumer why the service was stopped; and

(3) clean and disinfect all affected tools, work areas, and waiting areas.

(c) If there is a likelihood of exposure to blood or body fluids while practicing cosmetology, nail technology, esthetics, or electrolysis, the practitioner shall wear single-use protective gloves, and each contaminated single-use item shall be double-bagged, sealed, and disposed of in a closed waste receptacle.

(d) If a blood exposure occurs, the practitioner shall perform all of the following procedures:

(1) Stop service immediately;
 (2) put on protective gloves;
 (3) clean the injured area with an antiseptic solution and cover the wound with a sterile bandage to prevent further blood exposure;

(4) clean and disinfect all equipment, instruments, and surfaces that came in contact with blood; and

(5) double-bag all contaminated items, including gloves, and dispose of the contaminated items in a closed waste receptacle. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-4. Linens and capes. (a) After each service, each practitioner shall place all used linens, including towels, robes, and sheets, in a closed and labeled container or an enclosed stor-

age area, including closets and cabinets. The practitioner shall not use these linens again until each item has been cleaned in a washing machine with detergent and hot water. After being cleaned, the linens shall be dried until no moisture remains in the fabric.

(b) Each cape shall be cleaned or disinfected after each service.

(c) All clean linens and capes shall be stored in a closed and labeled container or an enclosed storage area. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Jan. 2, 1998; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-5. Surfaces and treatment tables.

(a) Each practitioner shall daily disinfect any surface that came into contact with a consumer during services, including shampoo bowls, chairs, headrests, and treatment tables.

(b) Each treatment table shall be covered with a clean sheet of examination paper, paper towels, or linen before providing services to each consumer. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-6. Products and containers. (a) All products shall be kept in labeled and closed containers. Each container shall be kept clean so that the label is legible. Each container shall be closed when not in use.

(b) If only a portion of a product is to be used on a consumer, each practitioner shall remove the product from its container in a way that does not contaminate the unused portion in the container. Each practitioner shall discard any remaining portion that was removed from the container but was not used during that consumer's service in a covered waste receptacle immediately after use. If cosmetic pencils are used, each pencil shall be sharpened before each use and the sharpener shall be cleaned and disinfected before being used again. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-7. Waxing. (a) Each practitioner shall maintain all wax and sugar paste at a temperature specified by the manufacturer's instructions.

(b) No applicators shall be left standing in the wax or sugar paste at any time.

(c) Each roll-on wax cartridge shall be considered a single-use item and shall be disposed of in

a covered waste receptacle after the service. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-8. Single-use items. (a) Each practitioner shall store all single-use items separately in a clean, labeled, and covered container or in the manufacturer's original packaging.

(b) Each practitioner shall dispose of any used single-use item in a covered waste receptacle immediately after use. All razors and other sharp items shall be disposed of in a sharps container following the service.

(c) Each sanding band used on an electric file shall be a single-use item. Each practitioner shall dispose of each sanding band in a covered waste receptacle immediately after the sanding band is used. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-9. Pedicure equipment. For the purposes of this regulation, the term "pedicure equipment" shall mean any apparatus that holds water for the purpose of pedicure service.

(a) Each practitioner shall perform the following immediately after each pedicure service:

(1) Drain the pedicure equipment of all water, remove all debris from the equipment, and remove all removable parts;

(2) if a pedicure liner was used during the pedicure service, dispose of the pedicure liner in a covered waste receptacle;

(3) clean all removable parts and the surfaces and walls of the pedicure equipment, including the inlet and all debris trapped behind any removable parts, with soap or detergent, rinse with warm potable water, and disinfect with a liquid disinfectant used according to the manufacturer's instructions;

(4) replace all clean removable parts;

(5) if a pedicure liner was not used during the pedicure service, perform one of the following:

(A) If the pedicure equipment is circulating, fill the pedicure equipment with potable water and circulate a bleach solution or a liquid disinfectant used according to the manufacturer's instructions through the pedicure equipment for 10 minutes and then drain and rinse the pedicure equipment with potable water; or

(B) if the pedicure equipment is noncirculating, allow the bleach solution or liquid disinfectant to

stand for 10 minutes and then drain and rinse the pedicure equipment with potable water; and

(6) wipe the pedicure equipment dry with a clean towel.

(b) Each practitioner shall ensure that all pedicure equipment remains in a clean and disinfected condition, even if the pedicure equipment is not in service or not able to be used in a service. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-10. Cleaning and disinfecting non-electrical instruments and equipment. (a) Each practitioner shall perform the following after each service as applicable:

(1) Clean each nonelectrical instrument or non-electrical piece of equipment;

(2) rinse the instrument or equipment with potable water; and

(3) use one of the following disinfection methods:

(A) For instruments and equipment other than shears and makeup brushes, perform one of the following:

(i) Totally immerse the instrument or equipment in a disinfectant and disinfect according to the manufacturer's instructions and then rinse the instrument or equipment with potable water; or

(ii) totally immerse the instrument or equipment in bleach solution for 10 minutes and then rinse the instrument or equipment with potable water;

(B) for shears, use a concentrate, spray, wipe, or foam disinfectant according to the manufacturer's instructions; and

(C) for makeup brushes, use a concentrate, spray, or foam disinfectant according to the manufacturer's instructions.

(b) Each practitioner shall ensure that the disinfectant or bleach solution specified in subsection (a) is prepared, available for use, and covered at all times. Disinfectants and bleach solutions shall be changed daily or more often if the disinfectant or bleach solution becomes visibly cloudy or dirty.

(c) For each disinfectant used as specified in subsection (a), the following shall be available at all times in the establishment or school and shall be provided upon request to the board or the board's designee:

(1) The SDS; and

(2) the manufacturer-labeled container with sufficient disinfectant or bleach solution to ensure safe services.

(d) Each nonelectrical instrument and each nonelectrical piece of equipment that has been used on a consumer or soiled in any manner shall be placed in a labeled, covered container until the instrument or piece of equipment is cleaned and disinfected.

(e) All disinfected nonelectrical instruments and all disinfected nonelectrical pieces of equipment shall be stored in a labeled and clean, enclosed cabinet, drawer, or covered container reserved for clean instruments only.

(f) The electrolysis instruments and pieces of equipment that are sterilized in accordance with K.A.R. 28-24-12 shall not be subject to the requirements of this regulation. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Jan. 2, 1998; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-11. Disinfecting electrical instruments. (a) Each practitioner shall disinfect each electrical instrument after each service, as follows:

(1) Remove all debris from the electrical instrument; and

(2) completely saturate the portion of the electrical instrument that came in contact with the consumer with a bleach solution or with a disinfectant used according to the manufacturer's instructions.

(b) Each disinfected electrical instrument shall be stored in a clean area on a stand or hook or on a clean towel, covered by a clean towel or in a labeled, clean, closed container or drawer reserved for clean instruments only.

(c) At the end of each day, all towels remaining in a towel warmer shall be removed. The towels shall not be reused until properly laundered. Each towel warmer shall be disinfected daily according to the manufacturer's instructions.

(d) Each practitioner shall clean and disinfect each metal bit and mandrel for an electric file after each use on a consumer and then shall store the bit and mandrel in a clean, closed, and labeled container until the next use. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-12. Electrolysis instruments, equipment, and practices. Each practitioner shall use only single-use electrolysis instruments or sterilized electrolysis equipment on a consumer.

(a) Each practitioner shall immerse non-single-use electrolysis instruments in an ultrasonic unit

that is operated in accordance with the manufacturer's instructions and that contains potable water and an enzyme detergent after each use and before sterilization.

(b) Each practitioner shall ensure that all electrolysis instruments and equipment are sterilized as follows:

(1) By placing electrolysis instruments in glass test tubes or sterilization bags with color strip indicators and then placing the test tubes or bags in a steam autoclave sterilizer or a dry-heat sterilizer that is approved and listed by the FDA and that is used, cleaned, and maintained according to the manufacturer's directions; or

(2) by using single-use, prepackaged, sterilized instruments or equipment obtained from suppliers or manufacturers.

(c) Each steam autoclave sterilizer and each dry-heat sterilizer shall meet the following requirements:

(1) Be approved by the FDA;

(2) contain visible physical indicators, including a thermometer and a timer, necessary to ensure that the steam autoclave sterilizer is functioning properly during sterilization cycles;

(3) be used with chemical indicators that change color after exposure to the sterilization process, to ensure that all sterilization requirements are met; and

(4) be cleaned, used, and maintained according to the manufacturer's instructions.

(d) Each cleaned electrolysis instrument or piece of equipment shall be sterilized in accordance with the manufacturer's instructions for each specific sterilizer and by utilizing one of the following:

(1) Steam autoclave sterilizer. If a steam autoclave sterilizer is used, the instruments or equipment shall be sterilized for 15 to 20 minutes at 250 degrees Fahrenheit, and the pressure shall consist of 15 to 20 pounds per square inch (psi).

(2) Dry-heat sterilizer. If a dry-heat sterilizer is used, the instruments and equipment shall be sterilized for either 60 minutes at 340 degrees Fahrenheit or 120 minutes at 320 degrees Fahrenheit.

(e) The owner of each establishment shall use a sterilization-monitoring service or laboratory using commercially prepared spores at least monthly to ensure that all microorganisms have been destroyed and sterilization has been achieved.

(1) The owner of each establishment shall maintain a log at the establishment with the date and results of each monthly test for at least three years

and shall make the records available for review at any time by the board or the board's designee.

(2) A copy of the manufacturer's procedural manual for operation of the steam autoclave sterilizer or dry-heat sterilizer shall be available for inspection by the board or the board's designee.

(f) Each practitioner shall place only the single-use instrument or sterilized equipment to be used for each consumer on a clean nonporous surface and shall replace the clean surface with a new clean surface after each service.

(g) Each practitioner shall dispose of all needles and any other sharp items in a sharps container following the service.

(h) The surface of each counter, each treatment table, and each piece of equipment in each area where a consumer is served shall be made of smooth, nonporous materials. Each practitioner shall disinfect all nonporous surfaces, including counters, treatment tables, and pieces of equipment, after each service by using either a disinfectant according to the manufacturer's instructions or a bleach solution. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-13. Physical facilities. Each owner of a school, an establishment, or a mobile establishment shall ensure that the applicable requirements of this regulation are met.

(a) Each school or establishment shall be well lit and well ventilated by natural or mechanical methods that remove or exhaust fumes, vapor, or dust to prevent hazardous conditions from occurring and to allow the free flow of air in a room in proportion to the size and the capacity of the room. The floors, walls, ceilings, furniture, and fixtures shall be clean and in good repair at all times.

(b)(1) If a room used for residential purposes is adjacent to a room used for the practice of cosmetology, nail technology, esthetics, or electrology, a solid partition shall separate the portion of the premises used for residential purposes from the licensed area. The partition may contain a door if it remains closed, except for entering and leaving.

(2) Each establishment that has an initial license issued on or after December 31, 2007 and that is located in a residence shall have a separate, outside entrance to the establishment.

(c) If a room used for nonlicensed business purposes is also used for or is adjacent to a room used for the practice of cosmetology, nail technology,

esthetics, or electrology and if the board, upon consultation with the secretary of health and environment, determines that the proximity of the licensed or nonlicensed activities poses a possible threat to the health of the employees, the consumers, or the public, the owner of the school or establishment shall mitigate the risk as directed by the board, including by meeting one or both of the following requirements:

(1) A solid partition shall separate the portion of the premises used for nonlicensed business purposes from the licensed area. The partition may contain a door if it remains closed, except for entering and leaving.

(2) A separate, outside entrance shall be provided for the school or establishment.

(d) Each school or establishment shall have plumbing that provides hot and cold running, potable water at all times and that provides for the disposal of used water.

(e)(1) Each establishment shall have at least one restroom. Each school shall have at least two restrooms. Each restroom shall be in the building in which the establishment or school is located.

(2) Each restroom shall include at least one working toilet and one hand-washing sink with hot and cold running water, a liquid soap dispenser, and either disposable towels or an air dryer. Each restroom shall be kept in a sanitary condition.

(3) A restroom sink shall not be used for services or for cleaning instruments or equipment.

(f)(1) Each establishment that provides cosmetology services shall have a shampoo bowl with a sprayer and hot and cold running water that is separate from the restroom.

(2) Each establishment that provides nail technology, esthetics, or electrology services shall have a hand-washing sink with hot and cold running water that is separate from the restroom.

(g) The following requirements shall apply to each mobile establishment:

(1) All equipment shall be securely anchored to the mobile establishment.

(2) No services shall be performed while the mobile establishment is in motion.

(3) Each mobile establishment shall have the following:

(A) A hand-washing sink that has hot and cold running water;

(B) a self-contained supply of potable water. The water tank shall have a capacity of at least 20 gallons, and the holding tanks shall have at least the same capacity; and

(C) one or more self-contained, recirculating, flush chemical toilets with a holding tank. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Jan. 2, 1998; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-14. Prohibitions. (a) The following shall be prohibited in each establishment or school:

(1) Smoking or preparing food in the service area;

(2) using neck dusters and nail dusters;

(3) possessing any animal. This prohibition shall not apply to any assistance dog, as defined in K.S.A. 39-1113 and amendments thereto;

(4) using razor-type devices to remove calluses or skin blemishes;

(5) using invasive skin-removal techniques, products, and practices that remove viable cells that are deeper than the stratum corneum;

(6) placing waste in open waste receptacles;

(7) possessing methyl methacrylate monomer (MMA); and

(8) using any product banned or restricted by the board for use in cosmetology, nail technology, esthetics, or electrology.

(b) No practitioner shall carry any instrument or supplies in or on a garment or uniform, including an instrument belt and an instrument organizer.

(c) The owner of a school or establishment shall not permit excessive amounts of waste, refuse, or any other items that could cause a hazard to accumulate on the premises of the school or establishment. (Authorized by and implementing K.S.A. 65-1,148; effective Jan. 4, 1993; amended Jan. 2, 1998; amended Oct. 5, 2007; amended April 10, 2020.)

28-24-15. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Jan. 4, 1993; revoked Oct. 5, 2007.)

28-24-16. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Jan. 4, 1993; revoked Oct. 5, 2007.)

Article 24a.—SANITARY REGULATIONS FOR TANNING FACILITIES

28-24a-1. Definitions. (a) “Consumer” has the meaning specified in K.A.R. 69-12-1.

(b) “EPA” means the United States environmental protection agency.

(c) “FDA” means the United States food and drug administration.

(d) “Person” means an individual, association, corporation, or other legal entity.

(e) “Protective eyewear” means any device designed to be worn by users to reduce exposure of the eyes to the radiation emitted by the tanning device.

(f) “Tanning device operator” means an individual who controls operation of a tanning device and instructs and assists the consumer in the proper operation of the tanning device.

(g) “Tanning facility operator” means the person who is licensed to operate a tanning facility. (Authorized by and implementing K.S.A. 65-1,148 and 65-1925; effective Oct. 5, 2007.)

28-24a-2. Facility standards and practices. (a) After each use of a tanning device, a tanning device operator shall disinfect the tanning device using an EPA-registered disinfectant with demonstrated bactericidal, fungicidal, tuberculocidal, and virucidal activity when used according to the manufacturer’s instructions.

(b) Each tanning device operator shall ensure that each towel distributed to a consumer or any other individual is, upon its return, deposited in a closed receptacle and not used again until laundered and sanitized.

(c) Each tanning facility operator shall ensure that the tanning facility is well lighted, well ventilated, and sanitary. (Authorized by and implementing K.S.A. 65-1,148 and 65-1925; effective Oct. 5, 2007.)

28-24a-3. Protective eyewear. Each tanning device operator shall disinfect the protective eyewear before each use. If single-use protective eyewear is used, the eyewear shall be disposed of in a covered waste receptacle immediately after use. (Authorized by and implementing K.S.A. 65-1,148 and 65-1925; effective Oct. 5, 2007.)

Article 25.—SANITARY REGULATIONS FOR BARBERS

28-25-1. Definitions. (a) “EPA” means the United States environmental protection agency.

(b) “Shop” means any place where barbering is practiced, other than a barbering school.

(c) “Licensee” means any person licensed as a barber.

(d) “School” means any place licensed by the board of barbering for the training of barbers.

(e) “Student” means a person receiving training in a school. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-2. Personal cleanliness. (a) The person and the uniform or attire worn by an individual serving a patron shall at all times be clean.

(b) Each person shall thoroughly wash his or her hands with soap and water or any equally effective cleansing solution before serving each patron. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-3. Infectious disease. (a) No person afflicted with an infectious or communicable disease, which may be transmitted during the performance of the acts of barbering shall be permitted to work or train in a school or shop.

(b) No school or shop shall require or permit a student or licensee, knowingly, to work upon a person suffering from any infectious or communicable disease which may be transmitted during the performance of the acts of barbering. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-4. Towels. (a) After a towel has once been used, it shall be deposited in a closed receptacle, and shall not again be used until properly laundered and sanitized.

(b) Used towels shall be laundered either by regular commercial laundering or by a noncommercial laundering process which includes immersion in water at 140 degrees F for not less than fifteen minutes during the washing or rinsing operation.

(c) All clean towels are to be stored in a closed cabinet or container. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-5. Headrests and shampoo bowls. (a) Clean cloth or clean tissue shall be placed on headrests before serving each patron. When the headrest is not in use, it shall be kept in a clean place, free from dust and dirt.

(b) A shampoo bowl or sink with hot and cold running water shall be near each station at which a barber is working. The water shall be supplied from an approved public water supply, with drain connected to an approved sewer system.

(c) A soap dispenser and disposable towels shall be provided near each sink or shampoo bowl.

(d) The shampoo bowl or sink shall be kept in good repair and in a clean and sanitary condition at all times. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-6. Bottles and containers. All bottles and containers in use shall be distinctly and correctly labeled to disclose their contents. All bottles containing poisonous or caustic substances shall be additionally and distinctly marked as such. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-7. Liquids, creams, powders and other preparations. (a) All liquids, creams, and other preparations shall be kept in properly labeled, clean and closed containers. Powders shall be kept in a clean shaker.

(b) When only a portion of a preparation is to be used on a patron, it shall be removed from the container in such a way as not to contaminate the remaining portion. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-8. Neck strips. The hair cloth shall never be permitted to come in direct contact with the neck of the patron. Sanitary neck strips or towels must be used at all times to prevent such contacts. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-9. Instruments and supplies. (a) All supplies and instruments which come in direct contact with a patron and cannot be disinfected shall be disposed of in a covered waste receptacle immediately after use.

(b) No person training or working in a school or establishment shall be permitted to carry any instrument or supplies in or on a garment or uniform. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-10. Disinfecting non-electrical instruments and equipment. (a) Before use upon a patron, all non-electrical instruments and equipment shall be disinfected in the following manner: clean with soap or detergent and water and then totally immerse in either an EPA-registered product that contains one of the following terms on its label: sterilant; or bactericide, fungicide and virucide; or disinfectant, fungicide and virucide; or germicide, fungicide and virucide used according to manufacturer's instructions or 70% isopropyl alcohol for at least ten minutes.

(b) The disinfectant solutions specified in section (a) shall remain covered at all times and shall be changed at least once per week and/or whenever visibly cloudy or dirty.

(c) All non-disinfected instruments that have been used on a patron or soiled in any manner shall be placed in a properly labeled covered receptacle.

(d) All disinfected instruments shall be stored in a clean enclosed cabinet or covered container reserved for instruments only. (Authorized by and implementing K.S.A. 65-1,148; effective Aug. 23, 1993.)

28-25-11. Disinfecting electrical instruments. (a) Clippers, vibrators, and other electrical instruments shall be disinfected prior to each use by:

(1) First removing all foreign matter; and

(2) Disinfecting with an EPA-registered product that contains one of the following terms on its label: sterilant; or bactericide, fungicide and virucide; or disinfectant, fungicide and virucide; or germicide, fungicide and virucide used according to manufacturer's instructions.

(b) All disinfected electrical instruments shall be stored in a clean, covered place. (Authorized by and implementing K.S.A. 65-1,148; effective Aug. 23, 1993.)

28-25-12. Physical facilities. (a) The school or shop shall be kept well lighted, well ventilated, and in a sanitary condition. Floors, walls, ceilings, furniture and other fixtures and apparatus and all other exposed surfaces in each school or shop shall be kept clean, free from dust, hair and other debris, and in good repair at all time. All curtains shall be kept carefully laundered or chemically cleaned.

(b) If a room or rooms used for residential or non-barbering business purposes are in the same room or adjacent to a room used for the practice of barbering, then a solid partition shall separate the premises used for residential or business purposes from the barbering area. The partition may contain a door, provided it remains closed except for entering and leaving.

(c) A separate outside entrance shall be provided for the school or shop.

(d) All schools or shops shall be supplied with sanitary drinking water facilities. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-13. Prohibitions. (a) The use of cuspidors or other receptacles for sputum is prohibited. No person shall expectorate in any shop or school.

(b) The use of shaving mugs and lather brushes is prohibited.

(c) The use of lump alum, styptic sticks or pencils, powder puffs, and sponge, finger or towel bowls is prohibited.

(d) Neck dusters are prohibited.

(e) No person shall bring any animal into, or permit any animal to be brought into, or permit any animal to remain in a school or shop. Trained animals accompanying sightless or hearing impaired persons shall be exempt from this section.

(f) No school or shop shall permit an accumulation of waste or refuse.

(g) All open waste containers are prohibited. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-14. Rules and licenses posted. (a) Each school or shop shall keep a copy of the sanitation regulations adopted by the Kansas department of health and environment, the inspection report for the school or shop, and the license of the school or shop posted in a conspicuous place.

(b) Each employee or student shall post their personal license at their work station. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

28-25-15. Enforcement. (a) The holder or holders of a shop or school license and the person in charge of any such shop or school shall be liable for implementing and maintaining all applicable sanitary regulations individually and jointly with all persons employed by or working in or on the premises. All students and licensees shall be held individually liable for implementation and maintenance of all applicable sanitary regulations.

(b) Refusal to permit, or interference with, an inspection by an authorized representative of the board of barbering during any time the instruction or practice of barbering is being conducted shall constitute a cause for disciplinary action. (Authorized by and implementing K.S.A. 1991 Supp. 65-1,148; effective Aug. 23, 1993.)

Article 26.—MEAT AND POULTRY

A. SLAUGHTERHOUSES; PACKING, SAUSAGE AND OTHER PROCESSING PLANTS

28-26-1 to 28-26-19. (Authorized by K.S.A. 65-6a03; effective Jan. 1, 1966; revoked May 1, 1980.)

B. POULTRY DRESSING AND PACKING PLANTS

28-26-30 to 28-26-49. (Authorized by K.S.A. 65-6a03; effective Jan. 1, 1966; revoked May 1, 1980.)

C. STATE INSPECTION; MEAT AND POULTRY

28-26-60 to 28-26-70. (Authorized by K.S.A. 65-6a03, 65-6a07; effective Jan. 1, 1966; revoked May 1, 1980.)

D. LABELING IMPORTED MEAT AND POULTRY

28-26-80 to 28-26-87. (Authorized by K.S.A. 1965 Supp. 65-6a15; effective Jan. 1, 1966; revoked May 10, 1996.)

E. LUNGS IN FOOD PRODUCTS

28-26-90. (Authorized by K.S.A. 65-603, 65-6a03; effective Jan. 1, 1966; revoked May 1, 1980.)

28-26-90a. (Authorized by K.S.A. 1979 Supp. 65-673; effective May 1, 1980; revoked May 10, 1996.)

Article 27.—HAZARDOUS HOUSEHOLD ARTICLES

A. GENERAL REGULATIONS

28-27-1. Definitions. (a) The term “hazardous substance” as used in these regulations shall mean any substance or mixture of substances which:

- (1) is toxic,
- (2) is corrosive,
- (3) is an irritant,
- (4) is flammable,
- (5) is radioactive, or
- (6) generates pressure through decomposition, heat or other means, if such substance may cause substantial personal injury or illness during any customary or reasonably anticipated handling or use.

(b) The term “toxic” shall apply to any substance which has the inherent capacity to produce bodily injury through ingestion, inhalation, or absorption through the skin.

(c) (1) The term “poison” means any toxic substance which falls within any of the following categories:

(A) produces death within forty-eight hours in half or more than half of a group of ten or more laboratory white rats each weighing between two hundred and three hundred grams, at a single dose of fifty milligrams or less per kilogram of body weight, when orally administered; or

(B) produces death within forty-eight hours in half or more than half of a group of ten or more laboratory white rats each weighing between two hundred and three hundred grams, when inhaled continuously for a period of one hour or less at an atmospheric concentration of two milligrams or less per liter of gas, vapor, mist, or dust: *Provided*, Such concentration is likely to be encountered by man when the substance is used in any reasonably foreseeable manner; or

(C) produces death within forty-eight hours in half or more than half of a group of ten or more rabbits tested in a dosage of two hundred milligrams or less per kilogram of body weight, when administered by continuous contact with the bare skin for twenty-four hours or less.

(2) If available data on experience with either mature or immature humans with any substance in the above named concentrations indicate results different from those obtained on animals, the human data shall take precedence.

(d) The term “corrosive” means any substance which in contact with living tissue will cause substantial destruction of tissue by chemical action; but shall not refer to action on inanimate surfaces.

(e) The term “irritant” means any substance, not corrosive within the meaning of subsection (d) of this section, which in contact with normal living tissue will induce a severe local tissue reaction.

(f) The term “flammable” shall apply to any substance which has a flash point of eighty degrees Fahrenheit, or below, as determined by the Tagliabue open cup tester.

(g) The term “radioactive” shall apply to any substance which as a result of disintegration of unstable atomic nuclei emits energy.

(h) The term “label” means a display of written, printed, or graphic matter upon the immediate container of any substance; and a requirement, made by or under authority of this act, that any word, statement, or other information appear on the label, shall not be considered to be complied with unless such word, statement, or other information also appears on the outside container or wrapper, if any there be, of the retail package of such substance, or is easily legible through the outside container or wrapper. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-2. Labeling. Every retail package of a hazardous substance intended for household use which is offered for sale in this state, except those for which specific regulations are hereinafter pro-

vided, shall bear a label containing the following information:

(a) The name and place of business of the manufacturer, packer or distributor;

(b) The common or usual name, or the chemical name (if there be no common or usual name), or the recognized generic name (not trade name only) of the hazardous substance or of each component which contributes substantially to its hazard;

(c) One of the following signal words: "Danger," "warning," or "caution;"

(d) When necessary, an affirmative statement of the principal hazard or hazards, such as, "flammable," "vapor harmful," "causes burns," "absorbed through skin," or similar wording descriptive of the hazard.

(e) Precautionary measures describing the appropriate action to be followed or avoided;

(f) Instructions, when necessary, for first aid treatment in case of contact or exposure if the substance is hazardous through contact or exposure;

(g) The word "poison" for any substance which is defined as poisonous in these regulations;

(h) Instructions for handling and storage of packages which require special care in handling or storage;

(i) The statement "keep out of the reach of children," or its practical equivalent. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-3. Prominence of required information. All statements required in these regulations to appear on the labels of household products shall be located prominently thereon and shall be printed in English in legible type in contrast by typography, layout, or color with other printed material on the label. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-4. Small package exemptions. On labels of packages where the size of the container makes it impractical to include all of the subject matter required by 28-27-2, the statement of precautionary measures describing action to be followed or avoided may be abbreviated and the instructions for handling and storage of package may be deleted. In other cases, including substances presenting only minor hazards, application to vary from the prescribed labeling requirements in 28-27-2 shall be made to the Kansas state board of health. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-5. Practical equivalent of wording permitted. Use of language on labels which is the practical equivalent of that suggested in 28-27-2 shall constitute compliance with these regulations, except that no words shall be regarded as the practical equivalent of the word "POISON" or "POISONOUS." (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

B. PAINTS, VARNISHES AND SIMILAR PRODUCTS

28-27-10. Articles containing toxic metal compounds. Paints, varnishes and similar products containing not more than one percent of lead as metal (Pb), and not containing compounds of antimony, arsenic, cadmium, mercury, selenium, or barium (when soluble by stirring for 10 minutes with 5 percent hydrochloric acid at room temperature) introduced as such in the formulation of these products, and flashing below 150°F., shall bear the following cautionary labeling printed in type of sufficient size and prominence and in such contrast as to be easily readable under the normal conditions of sale and use:

(a) For products with a flash point above 80°F., and which are toxic by inhalation, ingestion or skin contact:

CAUTION! COMBUSTIBLE

Keep away from heat and open flame. Use with adequate ventilation. Avoid prolonged or repeated contact with skin. Avoid prolonged breathing of vapor or spray mist. Keep container closed when not in use.

(b) For products with a flash point above 20°F. and not higher than 80°F., and which are toxic by inhalation, ingestion or skin contact:

WARNING! FLAMMABLE

Keep away from heat, sparks, and open flame. Use with adequate ventilation. Avoid prolonged or repeated contact with skin. Avoid prolonged breathing of vapor or spray mist. Keep container closed when not in use.

(c) For products with flash point of 20°F. or lower, and which are toxic by inhalation, ingestion or skin contact:

DANGER! EXTREMELY FLAMMABLE

Keep away from heat, sparks, and open flame. Use with adequate ventilation. Avoid prolonged or repeated contact with skin. Avoid prolonged breathing of vapor or spray mist. Keep container closed when not in use.

(Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-11. Articles marked "do not take internally." The words "do not take internally" may be omitted from the labeling of articles de-

scribed in 28-27-10 except in the case of clear liquids, such as thinners. Regardless of flash point, these clear liquids shall bear appropriate labeling as indicated in 28-27-10 plus the warning "do not take internally." (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-12. Flash point, definition. "Flash point" shall mean, for the purposes of these regulations, the flash point as determined by the Tagliabue open cup method, as specified in the American society for testing materials method D1310-55T. The percentage of lead shall be determined as lead metal (Pb) based on the total solids of the product. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-13. Odorless solvents. Products described in 28-27-10 which contain "odorless" solvents shall be labeled with appropriate cautionary statements specified in 28-27-10, but the words "use with adequate ventilation" shall be in type two points larger than the type used for the rest of the cautionary labeling. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-14. Articles containing toxic metal compounds. Paints, varnishes, and similar products containing more than one percent of lead as metal (Pb) in compound, or containing a compound of antimony, arsenic, cadmium, mercury, selenium or barium (when soluble by stirring for 10 minutes with 5 percent hydrochloric acid at room temperature) introduced as such in the formulation of the products, and a solvent flashing below 150°F., shall bear the following cautionary labeling printed in type of sufficient size and prominence and in such contrast as to be easily readable under the normal conditions of sale and use.

(a) For products with flash point above 80°F.:

CAUTION! COMBUSTIBLE

Keep Away From Heat and Open Flame
CONTAINS LEAD OR OTHER
COMPOUNDS HARMFUL IF EATEN

Do not apply to toys, furniture or interior surfaces which might be chewed by children. Use with adequate ventilation. Avoid breathing vapor or spray mist. Avoid prolonged contact with skin. Wash thoroughly after handling and before eating or smoking. Keep container closed when not in use.

(b) For products with flash point above 20°F. and not higher than 80°F.:

WARNING! FLAMMABLE

Keep Away From Heat, Sparks, and Open Flame

CONTAINS LEAD OR OTHER
COMPOUNDS HARMFUL IF EATEN

Do not apply to toys, furniture or interior surfaces which might be chewed by children. Use with adequate ventilation. Avoid breathing vapor or spray mist. Avoid prolonged contact with skin. Wash thoroughly after handling and before eating or smoking. Keep container closed when not in use.

(c) For products with flash point below 20°F.:

DANGER! EXTREMELY FLAMMABLE

Keep Away From Heat, Sparks, and Open Flame
CONTAINS LEAD OR OTHER
COMPOUNDS HARMFUL IF EATEN

Do not apply to toys, furniture or interior surfaces which might be chewed by children. Use with adequate ventilation. Avoid breathing vapor or spray mist. Avoid prolonged contact with skin. Wash thoroughly after handling and before eating or smoking. Keep container closed when not in use.

(Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-15. Articles containing lead; labeling. When more than one percent of lead is the only harmful compound used in a product described in 28-27-14 the words "contains lead or other compounds harmful if eaten" may be changed to "contains more than one percent lead (Pb) harmful if eaten." (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-16. Articles containing harmful solvents. Paints, varnishes, paint removers and similar products, not described in 28-27-14 containing significant amounts of materials or solvents which may be harmful shall bear cautionary statements warning the user of hazards existing in their use. Manufacturers shall be guided in the labeling of this class of products by the principles set forth in manufacturing chemists association manual L-1 warning labels applying to the specific hazardous chemicals involved. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

C. TOYS

28-27-20. Toys bearing toxic paints prohibited. The sale of any toy is prohibited if it is coated with paints and lacquers containing compounds of lead of which the lead content (calculated as Pb), is in excess of 1 percent of the total weight of the contained solids (including pigments and drier), or soluble compounds of antimony, arsenic, cadmium, mercury, selenium or barium, introduced as such. Compounds are considered soluble if quantities in excess of 0.1 percent are

dissolved by 5 percent hydrochloric acid after stirring for 10 minutes at room temperature. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-21. Toys made of toxic plastics prohibited. The sale of any toy made in whole or in part of a plastic containing leachable toxic constituents is prohibited. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-22. Toys filled with toxic fluids prohibited. The sale of any toy filled with any toxic fluid which might be injurious upon breakage or leakage is prohibited. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-23. Bubble forming materials to be non-toxic. Materials intended for blowing bubbles, whether aqueous or plastic, shall be composed only of materials which are non-toxic by ingestion, inhalation, absorption through the skin or through the eyes. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-24. Fuels for toys and models, labeling. Fuels for use in toys or models shall bear all the labeling information required under 28-27-2. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

28-27-25. Pigments, solvents or bodies in certain toys to be non-toxic. Pigments, solvents or bodies used in such toys as crayons, chalks, modeling clays, doughs, etc. shall be non-toxic. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

D. INSECTICIDE VAPORIZING DEVICES

28-27-30. Devices for vaporizing chlorinated hydrocarbons prohibited. No person, corporate or natural, shall advertise or label any device, intended for household use which is designed and intended to vaporize by heat any chlorinated hydrocarbon insecticide, in such a manner as to suggest, imply, or recommend that the device is to be used while any person occupies the premises where such use takes place, nor shall any person advertise or label such device so as to suggest, imply, or recommend that it be used in living quarters for any period in excess of eight (8) hours or more frequently than at fourteen (14) day intervals.

The term "label" as used in this regulation refers to any written, printed or graphic matter appearing on or accompanying the retail wrapper

or package of the devices described herein. The term "advertise" refers to the making of any representation, disseminated in any manner or by any means other than by a label, for the purpose of inducing, or which is likely to induce directly or indirectly, the purchase of insecticide vaporizing devices.

The sale, offering for sale or holding for sale of any vaporizing devices which are advertised or labeled in violation of this regulation is prohibited; *Provided, however,* That no person shall be held in violation for advertising unless he shall in some way have disseminated or aided in dissemination of such advertising. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

E. CYANIDE METAL POLISHES; PROHIBITED

28-27-31. Metal polishes containing cyanides prohibited. The sale, offering for sale, or holding for sale in Kansas of any metal polish intended for household use which contains any cyanides or substances which may react to produce the cyanide radical (CN) is prohibited. (Authorized by K.S.A. 1965 Supp. 65-2703; effective Jan. 1, 1966.)

Article 28.—HYPNOTIC, SOMNIFACIENT OR STIMULATING DRUGS

28-28-1 to 28-28-2. (Authorized by K.S.A. 65-2606; effective Jan. 1, 1967; revoked May 10, 1996.)

Article 29.—SOLID WASTE MANAGEMENT

PART 1. DEFINITIONS AND ADMINISTRATION PROCEDURES

28-29-1. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended May 1, 1982; revoked May 10, 1996.)

28-29-1a. Modification of obsolete references and text. The following modifications shall be made to article 29:

(a) In K.A.R. 28-29-23(t), "K.A.R. 28-31-3" shall be replaced with "K.A.R. 28-31-261."

(b) In K.A.R. 28-29-23a(c)(8), the phrase "K.A.R. 28-31-3 and K.A.R. 28-29-4" shall be replaced with "K.A.R. 28-31-261."

(c) In K.A.R. 28-29-27(g)(3), "K.A.R. 28-31-9" shall be replaced with "K.A.R. 28-31-270."

(d) In K.A.R. 28-29-102, the following modifications shall be made:

(1) In paragraph (1)(2)(A), “K.A.R. 28-15-11” shall be replaced with “K.A.R. 28-16-28b(fff).”

(2) In paragraph (1)(2)(B), “K.A.R. 28-15-11” shall be replaced with “K.S.A. 65-162a, and amendments thereto.”

(e) In K.A.R. 28-29-108, the following modifications shall be made:

(1) In subsection (a), the phrase “K.A.R. 28-31-3 and K.A.R. 28-31-4” shall be replaced with “K.A.R. 28-31-261.”

(2) In paragraph (h)(1), “K.A.R. 28-19-47” shall be replaced with “K.A.R. 28-19-647.”

(f) In K.A.R. 28-29-109(b)(6) and (7)(B)(i), “K.A.R. 28-31-3” shall be replaced with “K.A.R. 28-31-261.”

(g) In K.A.R. 28-29-300(a)(5), “K.A.R. 28-31-4” shall be replaced with “K.A.R. 28-31-261.”

(h) In K.A.R. 28-29-1100, the following modifications shall be made:

(1) In paragraph (b)(1), “K.A.R. 28-31-4 (b)” shall be replaced with “K.A.R. 28-31-261.”

(2) In paragraph (b)(3), the following modifications shall be made:

(A) “ ‘Small quantity generator’ ” shall be replaced with “ ‘Conditionally exempt small quantity generator.’ ”

(B) “K.A.R. 28-31-2” shall be replaced with “K.A.R. 28-31-260a.”

(3) In paragraph (b)(4), the phrase “defined by the United States department of transportation and adopted by reference in K.A.R. 28-31-4 (e)” shall be replaced with “as listed in 49 CFR 173.2, as in effect on October 1, 2009, which is hereby adopted by reference.”

(4) In subsection (c), each occurrence of the term “K.A.R. 28-31-16” shall be replaced with “K.A.R. 28-31-279 and K.A.R. 28-31-279a.”

(5) In subsection (d), “[s]mall quantity generator” shall be replaced with “Conditionally exempt small quantity generator.”

(6) In subsections (d) and (e), each occurrence of the term “SQG” shall be replaced with “CESQG.”

(i) In K.A.R. 28-29-1102, the following modifications shall be made:

(1) Paragraphs (b)(2)(C), (b)(2)(C)(i), and (b)(2)(C)(ii) shall be replaced with the following text: “All HHW that is transferred for treatment, storage, or disposal shall be manifested as hazardous waste. All applicable hazardous waste codes for each waste shall be listed on the manifest, using

all available information. HHW facilities shall not be required to submit samples for laboratory testing in order to determine hazardous waste codes.”

(2) In paragraph (b)(2)(D), “K.A.R. 28-31-14” shall be replaced with “K.A.R. 28-31-268.”

(3) Paragraph (b)(2)(E) shall be replaced with the following text: “All HHW that is transferred for treatment, storage, or disposal shall be prepared for transportation off-site as hazardous waste.”

(4) In paragraph (b)(2)(F)(i), “K.A.R. 28-31-15” shall be replaced with “K.A.R. 28-31-273.”

(j) In K.A.R. 28-29-1103(c), the phrase “meeting the USDOT manufacturing and testing specifications for transportation of hazardous materials, as adopted by reference in K.A.R. 28-31-4 (e)” shall be replaced with “that are compatible with the waste.”

(k) In K.A.R. 28-29-1107(a)(2)(D), “small quantity generator” shall be replaced with “conditionally exempt small quantity generator.” (Authorized by and implementing K.S.A. 65-3406; effective Nov. 28, 2011.)

28-29-2. Variances. (a) General Procedure. If exceptional circumstances make strict conformity with these regulations impractical or not feasible, a person may submit a written request for a variance from these regulations. The department may grant a variance from these regulations and stipulate conditions and time limitations as necessary to comply with the intent of all applicable state and federal laws. The department shall review the variance request and notify the person within ninety (90) days of receipt that the application is approved, denied, or requires modification.

(b) *Experimental operations.* Variances may be granted to facilitate experimental operations intended to develop new methods or technology. Variances for experimental operations shall be considered only where significant health, safety, environmental hazards, or nuisances will not be created, and when a detailed proposal is submitted and accepted which sets forth the objectives, procedures, controls, monitoring, reporting, time frame, and other data regarding the experiment.

(c) *Restrictions.* Variances for experimental operations shall be limited to a maximum of two (2) years; however, the department may renew the variance for one or more additional two-year periods upon a showing by the person that the need for a variance continues to be valid. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406;

effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-3. Definitions. (a) "Active area" means any solid waste disposal area that has received solid waste and has fewer than 12 inches of soil cover.

(b) "Agricultural waste" means solid waste resulting from the production of farm or agricultural products.

(c) "Air pollution" means the presence in the outdoor atmosphere of one or more air contaminants in such quantities and duration as is, or tends significantly to be injurious to human health or welfare, animal or plant life, or property, or would unreasonably interfere with the enjoyment of life or property.

(d) "Aquifer" means saturated soils and geologic materials that are capable of recharging a well within 24 hours and whose boundaries can be identified and mapped from hydrogeologic data. This term shall include all hydraulically connected aquifers.

(e) "Backyard composting" means a composting operation that does not distribute the finished compost for use off-site and that meets one of the following conditions:

(1) The materials are all compostable and are generated by no more than four single residences, or the equivalent of four single residences.

(2) The material being composted consists entirely of yard waste, and the volume of material being composted is less than 10 cubic yards.

(f) "Bulky waste" means items of refuse too large to be placed in refuse storage containers, including appliances, furniture, tires, large auto parts, motor vehicles, trees, branches, and stumps.

(g) "By-product" means a material produced without separate commercial intent during the manufacture or processing of other materials or mixtures.

(h) "Commercial waste" means all solid waste emanating from establishments engaged in business, including solid waste originating in stores, markets, office buildings, restaurants, shopping centers, and theaters.

(i) "Composting" means a controlled process of microbial degradation of organic material into a stable, nuisance-free, humus-like product. This term shall not include the following:

(1) Manure storage piles, whether turned to stabilize or not turned; and

(2) yard waste directly applied to agricultural land.

(j) "Composting area" means the area used for receiving, processing, curing, and storing compostable materials and compost.

(k) "Design period" means the period consisting of the operating life of the solid waste landfill facility and the postclosure care period.

(l) "Detection monitoring system" means a network of wells established to detect any releases of contaminants from a landfill unit.

(m) "Director" means the director of the division of environment, Kansas department of health and environment.

(n) "Discarded material" means one of the following:

(1) Material that has been abandoned or disposed of; or

(2) a by-product or residual, when it is either in treatment or in storage or when it is used in a manner that constitutes disposal.

(o) "Disease vector" means rodents, flies, mosquitos, or other pests capable of transmitting disease to humans.

(p) "Disturbed area" means those areas within a facility that have been physically altered during waste disposal operations or during the construction of any part of the facility.

(q) "Existing unit" means a municipal solid waste disposal unit that is completely constructed and receiving waste before the appropriate date specified in K.A.R. 28-29-100.

(r) "Facility" means a site and all equipment and fixtures on a site used to process or dispose of solid waste. A facility consists of the entire solid waste processing or disposal operation. All structures used in connection with the waste processing or disposal operation, including any structures used to facilitate the processing or disposal, shall be considered a part of the facility, including the following:

(1) Solid waste disposal units;

(2) buildings;

(3) treatment systems;

(4) processing and storage operations; and

(5) monitoring stations.

(s) "Garbage" means the animal and vegetable waste resulting from the handling, processing, storage, packaging, preparation, sale, cooking, or serving of meat, produce, or other foods and shall include unclean containers.

(t) "Gas collection system" means a system of wells, trenches, pipes, and other related ancillary

structures, including manholes, compressor housings, and monitoring installations, that collect and transport the gas produced in a solid waste landfill to one or more gas processing points. The flow of gas through such a system can be produced by naturally occurring gas pressure gradients or can be aided by an induced draft generated by mechanical means.

(u) "Gas venting system" means a system of wells, trenches, pipes, and other related structures that vents the gas produced in a solid waste landfill to the atmosphere.

(v) "Geomembrane" means a membrane with a very low permeability, which means approximately 1×10^{-12} cm/sec, that is used with a foundation of soil, rock, earth, or any other geotechnical, engineering-related material as an integral part of a human-made structure or system designed to limit the movement of liquid or gas in the system.

(w) "Geotextile" means any permeable textile used with soil, rock, earth, or any other geotechnical, engineering-related material as an integral part of a human-made structure or system designed to perform functions including any of the following:

- (1) Provide planar flow for drainage;
- (2) filter particulates from a liquid; or
- (3) serve as a cushion to protect geomembranes.

(x) "Groundwater" means that part of subsurface water in the ground that is in the zone of saturation.

(y) "Incineration" means the controlled process of burning solid, liquid, and gaseous combustible wastes for volume and weight reduction in facilities designed for that use.

(z) "Incinerator" means any device or structure used for the destruction or volume reduction of solid waste by combustion pursuant to disposal or salvaging operations.

(aa) "Land surveyor" means a person who has received a license to practice land surveying from the state board of technical professions pursuant to K.S.A. 74-7001 et seq., and amendments thereto.

(bb) "Leachate" means liquid that has been or is in direct contact with solid waste or the active area of a solid waste disposal unit.

(cc) "Licensed geologist" means a person who has received a license to practice geology from the Kansas state board of technical professions pursuant to K.S.A. 74-7001 et seq., and amendments thereto.

(dd) "Lift" means an accumulation of waste that is compacted into a unit and over which daily cover material is normally placed.

(ee) "Long-term care" means the maintenance of all appurtenances and systems installed or used in the containment of solid wastes and the maintenance of the effective performance of leachate or gas collection, treatment, and disposal systems installed for use during the postclosure care period at a solid waste disposal area or a solid waste processing facility.

(ff) "Mixed refuse" means a mixture of solid wastes containing both putrescible and nonputrescible materials.

(gg) "Monofill" means a landfill in which 90 percent or more of the waste disposed is restricted to one specified waste.

(1) All other waste disposed of in a monofill shall meet both of the following requirements:

(A) The waste shall be associated with the process that produced the specified waste.

(B) The waste shall have characteristics similar to those of the specified waste and shall have similar and limited potential hazards to human health and the environment.

(2) Clean rubble, as defined in K.S.A. 65-3402 and amendments thereto, may be disposed of in any monofill and shall not be considered in calculating the percentage of specified waste in the monofill.

(hh) "National pollutant discharge elimination system" and "NPDES" shall have the meaning specified in K.A.R. 28-16-58.

(ii) "New facility" and "new unit" mean a municipal solid waste landfill (MSWLF), as defined in K.S.A. 65-3402 and amendments thereto, or a unit at a facility for which either of the following conditions applies:

(1) The MSWLF or unit is a permitted or unpermitted MSWLF or unit that has not accepted any waste before October 9, 1993.

(2) The MSWLF or unit is an existing MSWLF or unit whose lateral boundaries are increased after the effective date specified in K.A.R. 28-29-100.

(jj) "Nuisance" means either of the following situations, if caused by or a result of the management of solid wastes in violation of the solid waste statutes in chapter 65, article 34, or the solid waste regulations in article 29 of these regulations:

(1) A situation that is injurious to health or offensive to the senses or that obstructs the free use of property in a manner that interferes with the comfortable enjoyment of life or property; or

(2) a situation that adversely affects the entire community or neighborhood, or any substantial number of persons, even though the extent of the

annoyance or damage inflicted on individuals is unequal.

(kk) "Official plan" means a comprehensive plan submitted to and approved by the secretary as provided in K.S.A. 65-3405, and amendments thereto.

(ll) "100-year, 24-hour storm" means a precipitation event of 24-hour duration with a one percent probability of occurring in any given year.

(mm) "On-site" means on the premises where solid waste generation occurs, including two or more pieces of property that are divided only by public or private rights-of-way and that are otherwise contiguous.

(nn) "Open burning" means the burning of any materials without all of the following characteristics:

(1) Control of combustion air to maintain adequate temperature for efficient combustion;

(2) containment of the combustion reaction in an enclosed device to provide sufficient residence time and mixing for complete combustion; and

(3) control of emission of the gaseous combustion products.

(oo) "Operating record" means a compilation of reports, plans, specifications, monitoring data, and other information concerning facility operations. The operating record shall be kept on-site or at an alternate, secure location specified in the operating plan, in accordance with these regulations.

(pp) "Operator" means the person or persons responsible for the operation and maintenance of a facility or part of a facility.

(qq) "Owner" means the person or persons who own a facility or part of a facility.

(rr) "Permit" means a written permit issued by the secretary that by its conditions may authorize the permittee to construct, install, modify, or operate a specified solid waste disposal area or solid waste processing facility.

(ss) "Permit area" and "permitted area" mean the entire approved horizontal and vertical area occupied by a permitted solid waste processing or disposal facility.

(tt) "Point of compliance" means a specified horizontal distance from the edge of a disposal unit's planned design. The point of compliance shall be the point at which an owner or operator demonstrates compliance with the liner performance standard, if applicable, and with the groundwater protection standard.

(uu) "Processing of wastes" means the extraction of materials, transfer, volume reduction,

conversion to energy, or other separation and preparation of solid waste for reuse or disposal.

(vv) "Professional engineer" means a person who has registered with and obtained a license to practice engineering from the state board of technical professions pursuant to K.S.A. 74-7001 et seq., and amendments thereto.

(ww) "Publicly owned treatment works (POTW)" means a treatment works that is owned by the United States of America, the state of Kansas, or a unit of local government. This definition shall include any devices and systems used in the storage, treatment, recycling, and reclamation of municipal sewage or industrial wastewater. The definition shall include sewers, pipes, and other conveyances only if they convey wastewater to a POTW.

(xx) "Putrescible wastes" means solid waste that contains organic matter capable of being decomposed by microorganisms and that is capable of attracting or providing food for birds and disease vectors.

(yy) "Qualified groundwater scientist" means a licensed geologist or professional engineer who has sufficient training and experience in groundwater hydrology and related fields. Sufficient training may be demonstrated by a professional certification or by the completion of an accredited university program that enables the individual to make sound professional judgments regarding groundwater monitoring, contaminant fate and transport, and corrective action.

(zz) "Resource recovery" means the recovery of material or energy from solid waste.

(aaa) "Run-off" means water resulting from precipitation that flows overland from any part of a facility, except active areas, before the water enters a defined stream channel, and any portion of the overland flow that infiltrates into the ground before the water reaches the stream channel.

(bbb) "Run-on" means any rainwater or surface water that flows onto any part of a facility.

(ccc) "Salvaging" means the controlled removal of reusable materials from solid waste.

(ddd) "Sanitary landfill" means a method of disposing of solid wastes on land without creating nuisances or hazards to the public health or safety or the environment at a permitted solid waste disposal area that meets the standards specified in K.A.R. 28-29-23.

(eee) "Scavenging" means the removal of materials from a facility or unit that is not salvaging.

(fff) "Significant modifications" means substantial alterations, changes, additions, or de-

letions to a facility, facility operations, facility ownership, or facility financial status that occur after permit issuance.

(ggg) “Small landfill” and “small arid landfill” mean a municipal solid waste landfill that has been granted an exemption from the design requirements in K.A.R. 28-29-104, in accordance with K.A.R. 28-29-103.

(hhh) “Source-separated organic waste” means organic material that has been separated from noncompostable material at the point of generation and shall include the following wastes:

- (1) Vegetative food waste;
- (2) soiled or unrecyclable paper;
- (3) sewage sludge;
- (4) other wastes with similar properties, as determined by the department; and
- (5) yard waste in combination with these materials.

(iii) “Special waste” means any solid waste that, because of physical, chemical, or biological characteristics, requires special management standards due to concerns for owner or operator safety regarding handling, management, or disposal.

(jjj) “Static safety factor” means the ratio between resisting forces or moments in a slope and the driving forces or moments that can cause a massive slope failure.

(kkk) “Storage” means the containment of solid wastes in a manner that shall not constitute disposal or processing, under one of the following conditions:

(1) Precollection. Storage by the generator, on or adjacent to the premises, before initial collection. Under these regulations, precollection storage shall not require a processing facility permit.

(2) Postcollection. Storage by the processor or a collector, while the waste is awaiting processing or transfer to a disposal or recovery facility. Under these regulations, postcollection storage shall require a processing facility permit.

(lll) “Surface impoundment” means a natural topographic depression, a man-made excavation, or a diked area into which flowing wastes, including liquid wastes and wastes containing free liquids, are placed. For the purposes of these solid waste regulations, a surface impoundment shall not be considered a landfill.

(mmm) “25-year, 24-hour storm” means a precipitation event of 24-hour duration with a four percent probability of occurring in any given year.

(nnn) “Unit” and “disposal unit” mean a discrete area at a permitted landfill that is used for

the final disposal of solid waste. These terms shall include the following means of disposal:

- (1) Trench;
- (2) area fill; and
- (3) cut and cover.

(ooo) “Uppermost aquifer” means the first aquifer likely to be impacted by contamination from the facility. This term shall include the migration pathway to the aquifer and shall extend to the first demonstrated aquiclude. This term shall also include perched water tables, which are locally elevated water tables above a discontinuous low-permeability layer that is within a relatively higher-permeability layer.

(ppp) “Vegetative food waste” means food waste and food processing waste from materials including fruits, vegetables, and grains. Vegetative food waste shall not refer to animal products or by-products, including dairy products, animal fat, bones, and meat.

(qqq) “Vertical expansion” means an increase in the design capacity of an existing unit by increasing the final elevation limit of the unit.

(rrr) “Water pollution” means contamination or alteration of the physical, chemical, or biological properties of any waters of the state that creates a nuisance or that renders these waters harmful to public health, safety, or welfare; harmful to the plant, animal, or aquatic life of the state; or unsuitable for beneficial uses.

(sss) “Working face” means any part of a solid waste disposal area where waste is being disposed of.

(ttt) “Yard waste” means vegetative waste generated from ordinary yard maintenance, including grass clippings, leaves, branches less than 0.5 inches in diameter, wood chips and ground wood less than 0.5 inches in diameter, and garden wastes. (Authorized by and implementing K.S.A. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982; amended Oct. 1, 1999; amended May 30, 2003.)

28-29-4. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-5. (Authorized by K.S.A. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-6. Permits and engineering plans.

(a) *Application for permits.* Every person desiring to obtain a permit shall file an application for a permit for the proposed solid waste disposal area or processing facility with the department at least thirty (30) days before the date the person wishes to start construction, alteration, or operation of the disposal area or processing facility. The application shall be on forms furnished by the department.

(b) *Design plans and engineering reports.*

(1) Design and closure plans and engineering reports required under these regulations shall bear the seal and signature of a professional engineer licensed to practice in Kansas.

(2) *Waiver.* Plans, designs, and relevant data for the construction of the following solid waste disposal areas and processing facilities, need not be prepared by a professional engineer provided that a review of these plans is conducted by a professional engineer licensed to practice in Kansas:

(A) Solid waste processing facilities when the equipment is originally manufactured for those purposes and installation is supervised by the vendor, or when the equipment requires only fencing, buildings, and connection to utility lines to be operational;

(B) Construction and demolition landfills; and

(C) Solid waste disposal areas considered by the department to be located in secure geological formations, which are a part of a solid waste management system established pursuant to K.S.A. 65-3401 *et seq.*, and which are expected to receive less than one hundred (100) tons of solid waste annually.

(c) *Permit considerations.* Any permit issued by the secretary shall, where appropriate, be reviewed with respect to all responsibilities within the department.

(d) *Transfer of permits.* Before any assignment, sale, conveyance, or transfer of all or any part of the property upon which a solid waste processing facility, or solid waste disposal area is or has been located, and before any change in the responsibility of operating a processing facility or disposal area is made, the permittee shall notify the department, in writing, of the intent to transfer title or operating responsibility, at least thirty (30) days in advance of the date of transfer. The person to whom the transfer is to be made shall not operate the solid waste processing facility or disposal area until the secretary issues a permit to that person. The person to whom the transfer is to be made shall submit the following:

(1) A permit application and plans, maps, and data as required by subsection (a) of this regulation;

(2) Plans satisfactory to the department for correcting any existing permit violations; and

(3) Substantiation in writing that the applicant has copies of all approved maps, plans, and specifications relating to the solid waste processing facility or disposal area.

(e) *Conformity with official plan.* Permits shall not be issued by the secretary until the applicant has secured, from the board of county commissioners or from the mayor of an incorporated city having an official plan, certification that the proposed facility is consistent with the official plan. This approval shall not be required when the official plan does not provide for management of the solid waste(s) to be processed or disposed.

(f) *Reopening closed sites or facilities.* Any person proposing to reopen, excavate, disrupt, or remove any solid waste from any solid waste disposal area where operations have been terminated shall secure a new permit as specified in paragraph (a) of this regulation. Applications for a permit shall include, where applicable, an operational plan stating the area involved, lines and grades defining limits of excavation, estimated number of cubic yards of material to be excavated, location where excavated solid waste is to be deposited, the estimated time required for excavation, and a plan for restoring the site.

(g) *Emergency provisions.* In emergency situations involving solid waste which requires storage, transportation, or disposal on a one-time basis or other special cases where strict adherence to these regulations would result in undue hardships or unnecessary delays, the department can prescribe on a case-by-case basis, the procedures and conditions necessary for the safe and effective management of the wastes. The generator shall not take action in these cases except as immediately necessary for the protection of human health or the environment, until the action is approved by the department. (Authorized by K.S.A. 1981 Supp. 65-3406; implementing K.S.A. 1981 Supp. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-6a. Public notice of permit actions, public comment period, and public hearings.

(a) Public notice and comment period.

(1) Scope and timing. A public notice shall be given by the department when a municipal solid

waste landfill permit action has been proposed under K.A.R. 28-29-6 or when a public hearing has been scheduled pursuant to subsection (b) of this regulation.

(A) Public notice shall be required for a draft permit or any proposed significant modifications to a permit by the department.

(B) Public notice shall be required for any public hearing on a permit action.

(C) A public notice shall not be required when suspension, denial or revocation, or non-significant modification of a permit is proposed by the department.

(D) A public notice may describe more than one permit action or hearing.

(E) Each public notice shall be published not less than 30 days prior to the hearing or proposed action.

(2) Procedures.

(A) Each public notice shall be published in the Kansas register.

(B) Where a proposed action or hearing may generate significant local interest, a public notice shall also be published in a newspaper having major circulation in the vicinity of the proposed action or hearing.

(3) Contents of public notice. Each public notice issued under this regulation shall contain the following information:

(A) The name and address of the office processing the permit action for which notice is being given;

(B) the name and location of the facility for which the permit action is proposed;

(C) a map of the facility for which the permit action is proposed;

(D) a brief description of the activity to be conducted at the facility for which the permit action is proposed;

(E) the name, address, and telephone number of the person from whom interested persons may obtain or review additional information;

(F) the time and place of any hearing that will be held; and

(G) a brief description of the comment procedures outlined in subsections (b) and (c) of this regulation.

(b) Public comments. During the public comment period provided in subsection (a) of this regulation, any interested person may submit written comments. All comments, except those concerning determinations by local government units that the proposed permit action conforms with the

official plan, shall become a part of the permit record and shall be considered in making a final decision on the proposed permit action.

(c) Public hearings. If the department determines there is sufficient local interest in a proposed permit action, a public hearing may be scheduled. All written and verbal comments received during a public hearing provided in subsection (a) of this regulation shall become a part of the permit record and be considered in making a final decision on the proposed permit action.

(d) Response to comments. A response to comments shall be issued at the time any final permit decision is issued. The response shall be available to the public and shall:

(1) Specify what, if any, changes were made to the proposed action as a result of public comment; and

(2) briefly respond to any significant comments received during the public comment period. (Authorized by K.S.A. 65-3406; amended by L. 1993, Ch. 274, Sec. 2; implementing K.S.A. 65-3401; effective March 21, 1994.)

28-29-7. Conditions of permits. (a) When granting a permit, the secretary shall consider and stipulate: the types of solid wastes which may be accepted or disposed, special operating conditions, procedures, and changes necessary to comply with these and other state or federal laws and regulations.

(b) When the department determines that a solid waste has or may have value as a recoverable resource, a permit may require or may be modified to require segregation of the materials, processing, separate disposal, and marking to allow future retrieval of the materials.

(c) The department may specify conditions or a date upon which each permit will expire. (Authorized by K.S.A. 1981 Supp. 65-3406; implementing K.S.A. 1981 Supp. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-8. Modifications of permits. (a) The permittee shall notify the department in writing at least thirty (30) days before any proposed modification of operation or construction from that described in the plan of operation or permit. The permittee shall not proceed with the modification until the department provides written approval.

(b) The department may at any time modify a permit or any term or condition of a permit to in-

clude: special conditions required to comply with the requirements of these regulations; to avoid hazards to public health or the environment or to abate a public nuisance; or to include modifications proposed by the permittee and approved by the department. Permits may be modified when:

(1) The permittee is not able to comply with the terms or conditions of the permit due to an act of God, a strike against someone other than the permittee, material shortage, or other conditions over which the permittee has little or no control; or

(2) New technology that can provide significantly better protection for health and environmental resources of the state becomes available.

(c) The permittee shall take prompt action to comply with the new special conditions, or within fifteen (15) days of receipt of notification of the new special conditions, request a hearing before the secretary in accordance with K.S.A. 65-3412. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-9. Suspension of permits. (a) A permit shall be suspended by the department when in the opinion of the secretary this action is necessary to protect the public health or welfare, or the environment. The secretary shall notify the permittee of the suspension and the effective date. At the time of giving this notice, the secretary shall identify items of noncompliance with the requirements of these regulations or with conditions of the permit and shall specify deficiencies which the permittee shall correct, actions which the permittee shall perform, and the date or dates by which the permittee shall submit a plan detailing corrective action taken or to be taken in order to achieve compliance.

(b) The suspension shall remain in effect until the deficiencies are corrected to the satisfaction of the secretary or until the secretary makes a final determination based on the outcome of a hearing requested by the permittee under the provision of K.S.A. 65-3412 or amendments of that statute. The determination may result in termination of the suspension, continuation of the suspension, or modification or revocation of the permit.

(c) Permits shall be suspended for failure to pay the permit fee required by K.S.A. 65-3407 or amendments of that statute. (Authorized by K.S.A. 1981 Supp. 65-3406; implementing K.S.A. 1981 Supp. 65-3406, 65-3407; effective, E-79-22,

Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-10. Denial or revocation of permits. (a) A permit may be denied or revoked for any of the following reasons:

(1) Misrepresentation or omission of a significant fact by the permittee either in the application for the permit or in information subsequently reported to the department;

(2) Improper functioning or operation of the processing facility or the disposal area that causes pollution or degradation of the environment or the creation of a public health hazard or a nuisance;

(3) Violation of any provision of K.S.A. 65-3401 *et seq.* or these rules and regulations or other restrictions set forth in the permit or in a variance;

(4) Failure to comply with the official plan; or

(5) Failure to comply with an order or a modification to a permit issued by the secretary.

(b) Any person aggrieved by the denial or revocation of a permit may request a hearing under the provision of K.S.A. 65-3412 or amendments of that statute. (Authorized by K.S.A. 1981 Supp. 65-3406; implementing K.S.A. 1981 Supp. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-11. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-12. Notification of closure, closure plans, and long-term care. (a) Notification of closure. All permittees shall notify the department in writing at least 60 days before closure.

(b) Closure plans. Persons desiring to obtain a permit shall file a site closure plan at the time a permit application is submitted. The closure plan shall delineate the finished construction of the processing facility or disposal area after closure. Closure plans for disposal areas shall also provide for long-term care when wastes are to remain at the area after closure. The plan shall be updated at the time of permit renewal or at the time notice of modification is submitted in accordance with K.A.R. 28-29-8(a), or at the time the notice of closure is submitted.

(c) If wastes are to remain at the disposal area after closure, the closure plan may be required by the department to be prepared by a professional engineer licensed to practice in Kansas.

Upon completion of all the procedures provided for in the closure plan, the engineer shall certify that the disposal area was closed in accordance with the plan.

(d) Closure plan contents. The closure plan shall include the following when determined applicable by the secretary:

(1) Plans for the final contours, type and depth of cover material, landscaping, and access control;

(2) final surface water drainage patterns and runoff retention basins;

(3) plans for the construction of liners, leachate collection and treatment systems, gas migration barriers or other gas controls;

(4) cross sections of the site that delineate the disposal or storage locations of wastes. The cross sections shall depict liners, leachate collection systems, the waste cover, and other applicable details;

(5) plans for the post-closure operation and maintenance of liners, leachate and gas collection and treatment systems, cover material, runoff retention basins, landscaping, and access control;

(6) removal of all solid wastes from processing facilities;

(7) plans for monitoring and surveillance activities after closure;

(8) recording of a detailed site description, including a plot plan, with the department. The plot plan shall include the summaries of the logs or ledgers of waste in each cell, depth of fill in each cell, and existing conditions;

(9) a financial plan for utilization of the surety bond or cash bond required by K.S.A. 65-3407; and

(10) an estimate of the annual post-closure and maintenance costs.

(e) Long-term care. The owner of a solid waste disposal area, where the wastes are not removed as a part of the closure plan, shall provide long-term care for a period of at least 30 years following approval by the department of completion of the procedures specified in the closure plan. At the time of application for, or at the time of closure of, a solid waste disposal area permit, additional periods of long-term care may be specified by the secretary as the secretary deems necessary to protect public health or welfare, or the environment. (Authorized by K.S.A. 1996 Supp. 65-3406, as amended by L. 1997, Ch. 139, Sec. 1; implementing K.S.A. 1996 Supp. 65-3406, as amended by L. 1997, Ch. 139, Sec. 1, and 65-3407, as amended by L. 1997, Ch. 140, Sec. 4; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended,

E-82-8, April 10, 1981; amended May 1, 1982; amended July 10, 1998.)

28-29-13. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-14. (Authorized by K.S.A. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-15. (Authorized by K.S.A. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-16. Inspections. (a) The secretary or any duly authorized representative of the secretary, at any reasonable hour of the day, having identified themselves and giving notice of their purpose, may:

(1) Enter a factory, plant, construction site, solid waste disposal area, solid waste processing facility, or any environment where solid wastes are generated, stored, handled, processed, or disposed, and inspect the premises and gather information of existing conditions and procedures;

(2) Obtain samples of solid waste from any person or from the property of any person, including samples from any vehicle in which solid wastes are being transported;

(3) Drill test wells on the affected property of any person holding a permit or liable for a permit under K.S.A. 65-3407 or amendments of that statute and obtain samples from the wells;

(4) Conduct tests, analyses, and evaluations of solid waste to determine whether the requirements of these regulations are otherwise applicable to, or violated by, the situation observed during the inspection;

(5) Obtain samples of any containers or labels; and

(6) Inspect and copy any records, reports, information, or test results relating to wastes generated, stored, transported, processed, or disposed.

(b) If during the inspection, unidentified or unpermitted waste storage or handling procedures are discovered, the department's representative may instruct the operator of the facility to retain and properly store solid or hazardous wastes, pertinent records, samples, and other items. These materials shall be retained by the operator until

the identification and handling of the waste is approved by the department.

(c) When obtaining samples, the department's representative shall allow the facility operator to collect duplicate samples for separate analysis. Analytical data that might reveal trade secrets shall be treated as confidential by the department, when requested by the owner. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-17. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-17a. This regulation shall be revoked on and after February 24, 2000. (Authorized by K.S.A. 1983 Supp. 65-3406; implementing K.S.A. 1983 Supp. 65-3406, 65-3407; effective, E-82-8, April 10, 1981; effective May 1, 1982; amended, T-84-41, Dec. 21, 1983; amended May 1, 1984; revoked Feb. 24, 2000.)

28-29-17b. This regulation shall be revoked on and after February 24, 2000. (Authorized by K.S.A. 1983 Supp. 65-3406; implementing K.S.A. 1983 Supp. 65-3406, 65-3407; effective May 1, 1982; amended, T-84-41, Dec. 21, 1983; amended May 1, 1984; revoked Feb. 24, 2000.)

28-29-18. (Authorized by K.S.A. 1983 Supp. 65-3406; implementing K.S.A. 1983 Supp. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982; amended, T-84-41, Dec. 21, 1983; amended May 1, 1984; revoked March 22, 2002.)

28-29-19. Monitoring required. As a condition for issuing a permit, the secretary may require the approval, installation, and operation of environmental quality monitoring systems before the acceptance of solid wastes for storage, processing, or disposal. Approval of the monitoring system(s) will be based on the following:

(a) The location of monitoring wells, air monitoring stations, and other required sampling points;

(b) Plans and specifications for the construction of the monitoring systems;

(c) Frequency of sampling; and

(d) Analyses to be performed. (Authorized by K.S.A. 1981 Supp. 65-3406; implementing K.S.A.

1981 Supp. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-20. Restrictive covenants and easements.

(a) Permitted solid waste disposal areas. Each owner of a solid waste disposal area that is required to have a permit and where wastes will remain at the solid waste disposal area after closure may be required by the secretary to execute a restrictive covenant or easement, or both. The restrictive covenant with the register of deeds' stamp or the easement, or both, shall be submitted to the department before the permit is issued.

(b) Solid waste disposal areas without a permit. Each owner of a solid waste disposal area approved by the secretary under K.S.A. 65-3407c, and amendments thereto, may be required by the secretary to execute a restrictive covenant.

(c) Restrictive covenant. If required, the owner shall execute and file with the county register of deeds a restrictive covenant to run with the land that fulfills the following requirements:

(1) Covers all areas that have been or will be used for waste disposal;

(2) specifies the location of the solid waste disposal area. Acceptable methods to determine the location shall include the following:

(A) Obtaining a legal description by measuring from the property boundaries;

(B) obtaining a legal description by measuring from a permanent survey marker or benchmark; and

(C) obtaining the latitude and longitude, accurate to within five meters, using a global positioning system;

(3) specifies the uses that may be made of the solid waste disposal area after closure;

(4) requires that use of the property after closure be conducted in a manner that preserves the integrity of waste containment systems designed, installed, and used during operation of the solid waste disposal areas, or installed or used during the postclosure maintenance period;

(5) requires the owner or tenant to preserve and protect all permanent survey markers and benchmarks installed at the solid waste disposal area;

(6) requires the owner or tenant to preserve and protect all environmental monitoring stations installed at the solid waste disposal area;

(7) requires subsequent property owners or tenants to consult with the department during planning of any improvement to the site and to re-

ceive approval from the department before commencing any of the following:

- (A) Excavation or construction of permanent structures;
- (B) construction of drainage ditches;
- (C) alteration of contours;
- (D) removal of waste materials stored on the site;
- (E) changes in vegetation grown on areas used for waste disposal;
- (F) production, use, or sale of food chain crops grown on land used for waste disposal; or
- (G) removal of security fencing, signs, or other devices installed or used to restrict public access to waste storage or solid waste disposal areas; and
- (8) provides terms whereby modifications to the restrictive covenant or other land uses may be initiated or proposed by property owners.

(d) Easement. If required, the owner shall execute an easement allowing the secretary, or the secretary's designee, to enter the premises to perform any of the following:

- (1) Complete items of work specified in the site closure plan;
- (2) perform any item of work necessary to maintain or monitor the area during the postclosure period; or
- (3) sample, repair, or reconstruct environmental monitoring stations constructed as part of the site operating or postclosure requirements.

(e) Conveyance of easement, title, or other interest to real estate. Each offer or contract for the conveyance of easement, title, or other interest to real estate used for the long-term storage or disposal of solid waste shall contain a complete disclosure of all terms, conditions, and provisions for long-term care and subsequent land uses that are imposed by these solid waste regulations or the solid waste disposal area permit. The conveyance of title, easement, or other interest in the property shall not be consummated without adequate and complete provisions for the continued maintenance of waste containment and monitoring systems.

(f) Permanence. All covenants, easements, and other documents related to this regulation shall be permanent, unless extinguished by agreement between the property owner and the secretary.

(g) Fees. All document-recording fees shall be paid by the property owner.

(h) Federal government applicants and owners.

(1) For federal government applicants and owners, the term "restrictive covenant" shall be

replaced with "notice of restrictions" throughout this regulation.

(2) The restrictions shall be recorded in the base master plans or similar documents.

(3) If property that is owned by the federal government and that has a notice of restrictions filed according to this regulation is transferred to an entity other than the federal government, at the time of transfer the owner shall file a restrictive covenant that meets the requirements of this regulation. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982; amended May 30, 2003.)

28-29-20a. Laboratory certification. All monitoring analyses required under K.A.R. 28-29-19, and amendments to it, shall be conducted by a laboratory certified or approved by the department to perform these analyses. Laboratories desiring to be certified to perform these analyses shall comply with all conditions, procedures, standards, and fee requirements specified in K.A.R. 28-15-35 and 28-15-37, and amendments to them. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective, E-82-8, April 10, 1981; effective May 1, 1982.)

PART 2. STANDARDS FOR MANAGEMENT OF SOLID WASTES/COMPOSTING

28-29-21. Storage of solid wastes. (a) *General.* The owner or occupant or both of any premise, business establishment, or industrial plant shall provide sanitary storage for all solid waste not classified as hazardous wastes produced on his or her property which meets standards set forth in these regulations and the official plan for the area. All solid waste shall be stored so that it: does not attract disease vectors; does not provide shelter or a breeding place for disease vectors; does not create a health or safety hazard; is not unsightly; and the production of offensive odors is minimized. Each premise shall be provided with a sufficient number of acceptable containers to accommodate all solid waste materials other than bulky wastes that accumulate on the premises between scheduled removals of these materials. On premises where the quantity of solid wastes generated is sufficient to make the use of individual storage containers impractical, bulk containers may be used for storage of refuse. The bulk container may be equipped with compaction equip-

ment and shall be a size, design, and capacity compatible with the collection equipment. Containers shall be constructed of durable metal or plastic material, be easily cleaned, and be equipped with tight-fitting lids or doors that can be easily closed and opened.

(b) *Specific storage standards.*

(1) Garbage and putrescible wastes shall be stored in:

(A) Rigid containers that are durable, rust resistant, nonabsorbent, water tight, and rodent proof. The container shall be easily cleaned, fixed with close-fitting lids, fly-tight covers, and provided with suitable handles or bails to facilitate handling;

(B) Rigid containers equipped with disposable liners made of reinforced kraft paper or polyethylene or other similar material designed for storage of garbage;

(C) Nonrigid disposable bags designed for storage of garbage. The bag shall be provided with a wallhung or free standing holder which supports and seals the bag; prevents insects, rodents, and animals from access to the contents; and prevents rain and snow from falling into the bag; or

(D) Other types of containers meeting the requirements of 16 Code of Federal Regulations Chapter II Subchapter B, part 1301 in effect June 13, 1977, and paragraph (a) of this regulation and that are acceptable to the collection agency.

(2) Mixed refuse. When putrescible wastes and nonputrescible refuse are stored together, the container shall meet the standards and requirements of paragraph (b)(1) of this regulation.

(3) Nonputrescible bulky wastes. The wastes shall be stored temporarily in any manner that does not create a health hazard, fire hazard, rodent harborage, or permit any unsightly conditions to develop, and is in accordance with any locally adopted regulations. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-22. Standards for collection and transportation of solid wastes.

(a) Frequency of collection. Solid waste, excluding bulky wastes, shall be removed from the storage containers on residential premises and places of public gathering in accordance with these regulations at least once each week. Garbage and putrescible materials shall be removed from commercial or industrial properties as often as necessary to prevent nuisance conditions but at least once a week. Trash and other combustible materials, free of putrescible material, shall be removed from commercial and industrial properties as often as is necessary to prevent overfilling of the storage facilities or the creation of fire hazards. Bulky wastes, free of putrescible wastes, shall be removed from properties as often as necessary to prevent nuisance conditions from occurring.

(b) Collection equipment. All vehicles and equipment used for collection and transportation of solid waste shall be designed, constructed, maintained, and operated in a manner that will prevent the escape of any solid, semi-liquid, or liquid wastes from the vehicle or container. Collection vehicles shall be maintained and serviced periodically, and should receive periodic safety checks. Safety defects in a vehicle shall be repaired before the vehicle is used.

(c) Solid waste shall not be stored after collection in a collection vehicle for more than 12 hours unless the vehicle is parked in an area in which the land use is predominately industrial or light industrial. Solid wastes shall not be stored overnight in a collection vehicle parked in an area in which the land use is predominately residential.

(d) Solid wastes shall not be unloaded from any collection vehicle unless the collection vehicle is a satellite vehicle unloading into a larger vehicle or the unloading point is a permitted processing facility, transfer station or disposal area, except the unloading may be done to facilitate repairs, to extinguish a fire, or for other emergency. When a vehicle is unloaded due to an emergency situation solid waste shall be reloaded and removed promptly, after the emergency no longer exists.

(e) The person operating the collection system shall provide for prompt cleanup of all spillages caused by the collection operation.

(f) The person operating the collection system shall provide for prompt collection of any waste materials lost from the collection vehicles along the route to a disposal area or processing facility. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-23. Standards for solid waste processing facilities and disposal areas. All solid waste disposal areas and solid waste processing facilities shall be located, designed, operated, and maintained in conformity with the following stan-

dards: (a) *Acceptable methods of disposal*. Non-hazardous solid wastes, industrial solid wastes, and residues from solid waste processing facilities shall be disposed of in a sanitary landfill. Nonputrescible rubble and demolition waste material, such as brick, mortar, broken concrete, and similar materials produced in connection with the construction or demolition of buildings or other structures, may be disposed of at a construction and demolition landfill.

(b) *Acceptable methods for processing*. Combustible solid wastes may be burned in incinerators that conform with the provisions of the air quality control act, K.S.A. 65-3001 *et seq.* and the regulations adopted under those statutes. Solid wastes may be shredded, separated, and consolidated at shredding, separation, and transfer stations for which a permit has been issued by the secretary. Animal manures, sludges, and solid wastes with high organic content may be processed into compost at an approved composting plant for which a permit has been issued by the secretary.

(c) *Planning and design*. Planning, design, and operation of any solid waste processing facility or disposal area, including, but not limited to, sanitary landfills, incinerators, compost plants, transfer stations, and other solid waste disposal areas or processing facilities, shall conform with appropriate design and operation standards of the department.

(d) *Location*. Location of all solid waste disposal areas and solid waste processing facilities shall conform to applicable state laws, and county or city zoning regulations and ordinances. All locations for solid waste disposal areas and processing facilities shall be reviewed and approved by the department before any site development is started. Solid waste disposal areas or processing facilities shall not result in the destruction or adverse modification of the critical habitat of endangered or threatened species or cause or contribute to the taking of any endangered or threatened species as defined by K.S.A. 35-501 *et seq.* and K.A.R. 23-17-2. Sites disposing of putrescible wastes shall not be located in areas where the attraction of birds can cause a significant bird hazard to low flying aircraft. A minimum separation of twenty-five (25) feet shall be maintained between a disposal operation and any pipeline, underground utility, or electrical transmission line easement. Sanitary landfills shall not be located within the one hundred (100) year frequency floodplain unless protected by flood control levees and other ap-

purtenances designed to prevent washout of solid waste from the site.

(e) *Access roads*. Access roads to the disposal area or processing facility shall be of all-weather construction and negotiable at all times by trucks and other vehicles. Load limits on bridges and access roads shall be sufficient to support all traffic loads which will be generated by use of the area or facility.

(f) *Reports required*. Operators of all solid waste disposal areas and processing facilities shall maintain suitable records of volumes or tonnage of solid wastes received, land area used, population served, area served, and any other information required by the conditions of the permit. All information shall be summarized and reported to the department on forms furnished by the department.

(g) *Air quality*. The operator of every solid waste disposal area or solid waste processing facility shall conform to all applicable provisions of K.S.A. 65-3001 *et seq.*, any regulations adopted under those statutes, and any local regulations pertaining to air quality.

(h) *Communication*. Two-way communications shall be available to all solid waste processing facilities or disposal areas.

(i) *Fire protection*. Arrangements shall be made for fire protection services when a fire protection district or other public fire protection service is available. When this service is not available, practical alternate arrangements shall be provided at all sites. In case of accidental fires at the site, the operator shall be responsible for initiating and continuing appropriate fire fighting methods until all smoldering, smoking, and burning ceases. All disruption of finished grades, or covered or completed surfaces, shall be covered and regraded upon completion of fire fighting activities.

(j) *Limited access*. Access to a solid waste disposal area or processing facility shall be limited to hours when an attendant or operating personnel are at the site. A gate or barrier and fencing approved by the department shall be erected to prevent access to the solid waste disposal area or processing facility during hours when the area or facility is closed. Access by unauthorized vehicles or pedestrians shall be prohibited.

(k) *Hours of operation*. Hours of operation and other limitations shall be prominently posted at the entrance of the disposal area or processing facility.

(l) *Salvage*. Salvage or reclamation of materials shall be permitted only when facilities specifically designed for salvaging or processing solid wastes

are provided, and when the salvage materials are controlled to prevent interference with prompt, sanitary disposal of solid wastes. All salvage operations shall be conducted in a manner that will not create a nuisance.

(m) *Safety.* An operational safety program approved by the department shall be provided for employees at solid waste processing facilities and disposal areas.

(n) *Disease vector control.* Solid waste processing facilities and disposal areas shall be operated in a manner which will prevent the harborage or breeding of insects or rodents. Whenever supplemental disease vector control measures are necessary, these measures shall be promptly carried out.

(o) *Aesthetics.* Odors and particulates, including dust and litter, shall be controlled by daily application of cover material, sight screening or other means to prevent damage or nuisance. Construction and demolition landfills or other solid waste disposal areas receiving only nonputrescible waste materials may apply cover material at a less frequent rate if approved by the department.

(p) *Gas control.* The concentration of explosive gasses generated by the decomposition of solid waste disposed of on the site shall not exceed 25 percent of the lower explosive limit in on site structures (excluding gas control or recovery system components) or at facility property line. As used in this section "lower explosive limit" means the lowest percent by volume of a mixture of methane which will propagate a flame in air at 25°C and atmospheric pressure. Toxic or asphyxiating gases in concentrations harmful to humans, animals, or plant life shall not be allowed to migrate off site or accumulate in facility structures.

(q) *Water pollution.* Solid waste processing facilities and disposal areas, which include a point source of discharge of pollutants or solid wastes to off-site surface waters, shall comply with the terms of a permit issued under K.S.A. 65-164 *et seq.* Facilities shall be designed to prevent non-point source pollution discharges violating applicable legal requirements implementing the Kansas statewide water quality management plan in effect on November 1, 1981 approved under section 208 of Public Law 92-500 (the Clean Water Act) as amended. Solid waste disposal areas and processing facilities shall be designed and operated so as to prevent a discharge of dredge or fill material that is in violation of section 404 of PL 92-500 (the clean water act), as in effect on November 1, 1981. Solid waste shall not be placed

in unconfined waters which are subject to free movement on the surface, in the ground or within a larger body of water. If ground water which passes beneath a disposal facility is currently used as a public drinking water supply or is designated by the state of Kansas for future use as a drinking water supply, the naturally occurring ground water quality beyond the disposal site property boundary shall not be degraded. If ground water which passes beneath a disposal area or processing facility is currently used or designated by the state for purposes other than as a drinking water supply, the ground water beyond the disposal area property boundary shall be maintained at a quality as specified in the disposal area permit.

(r) *Maps required.* The operator shall maintain a log of commercial or industrial solid wastes received including sludges, liquids, or barreled wastes. The log shall indicate the source and quantity of waste and the disposal location. The areas used for disposal of these wastes and other large quantities of bulk wastes shall be clearly shown on a map and referenced to the boundaries of the tract or other permanent markings.

(s) *Disposal of sewage and industrial liquids or sludges.* Sewage or industrial solid waste liquids or sludges shall not be disposed in a sanitary landfill designed for the disposal of mixed refuse until the department has been notified and specific arrangements for handling the wastes have been approved by the department.

(t) *Disposal of hazardous waste.* Hazardous waste shall not be disposed of in a sanitary landfill. For the purposes of this subsection, "hazardous waste" means any waste determined by the secretary, under section 1 of chapter 251 of the 1981 session laws of Kansas, to be a hazardous waste and listed by the secretary as a hazardous waste in K.A.R. 28-31-3.

(u) The provisions of 40 Code of Federal Regulations Part 257.3-5 (application to land used for food chain crops), as in effect on September 23, 1981, and part 257.3-6 (disease), as in effect on September 23, 1981, are incorporated by reference. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-23a. Standards for solid waste transfer stations. (a) *Applicability.* Each solid waste transfer station shall be subject to the requirements of this regulation.

- (b) Design requirements.
- (1) Each solid waste transfer station processing, tipping, sorting, storage and compaction area shall be subject to the following design requirements, unless an alternate design is approved by the director.
- (A) Each processing, tipping, sorting, storage and compaction area shall be located in an enclosed building or covered area.
- (B) Each unloading area shall be of adequate size and design to allow for:
- (i) efficient unloading from collection vehicles; and
 - (ii) unobstructed movement of vehicles.
- (C) Each unloading and loading area shall be constructed of concrete or asphalt paving material.
- (D) Each solid waste transfer station shall have sufficient capacity to store two days worth of solid waste in the event of an interruption in transportation or disposal service. The capacity of any trailer parked within the boundaries of the permitted site may be included as a part of the two day capacity.
- (E) Each solid waste transfer station shall be large enough to segregate special wastes, including medical waste and asbestos, if special wastes will be managed at the transfer station.
- (2) Each solid waste transfer station structure shall be subject to the following design requirements, unless an alternate design is approved by the director.
- (A) Each enclosed structure shall be equipped with an exhaust system capable of removing accumulations of noxious or flammable gases.
- (B) Each structure shall be constructed of materials that will not absorb odors or liquids from the waste.
- (C) Each structure shall have a main doorway and roof of sufficient height to allow trucks that will routinely utilize the transfer station to unload.
- (3) Each solid waste transfer station access road shall be subject to the following requirements.
- (A) Each access road shall be designed to accommodate expected traffic flow in a safe and efficient manner.
- (B) Each access road shall be constructed with a road base that is capable of withstanding expected loads.
- (C) Each on-site road shall be passable by loaded collection and transfer vehicles in all weather conditions.
- (4) Each solid waste transfer station shall be subject to the following general requirements.
- (A) The design of each transfer station shall minimize wind-blown litter.
- (B) Control of stormwater shall be provided.
- (C) Weighing or measuring capabilities shall be provided for all solid waste processed at the facility.
- (D) Each owner or operator of a solid waste transfer station shall evaluate the feasibility of constructing an area at the transfer station site so that the following activities could be conducted:
- (i) storage of white goods;
 - (ii) separation of materials for recycling;
 - (iii) separation of materials for composting; or
 - (iv) other solid waste management activities.
- (E) Water shall be provided in sufficient quantity and pressure to wash down the unloading, loading, and storage areas of the transfer station.
- (F) Collection of washdown water and stormwater contacting solid waste shall be provided.
- (G) The following amenities shall be provided for transfer station workers:
- (i) sanitary facilities;
 - (ii) drinking water; and
 - (iii) handwashing water.
- (c) Operating requirements. Each solid waste transfer station owner or operator shall comply with the following operating requirements.
- (1) Wastes accepted at the solid waste transfer station shall consist of residential waste and commercial waste.
- (2) The following wastes shall not be accepted at any solid waste transfer station unless handling plans have been specifically approved by the department:
- (A) medical waste;
 - (B) asbestos waste; or
 - (C) other special wastes.
- (3) Any solid waste passing through a solid waste transfer station shall be ultimately treated or disposed of at:
- (A) a solid waste management facility authorized by the department if the facility is located in Kansas; or
 - (B) a solid waste management facility authorized by the appropriate governmental agency if the facility is located in another state.
- (4) Each access point to a solid waste transfer station shall have a sign posted that states:
- (A) the hours of operation of the transfer station;
 - (B) the types of solid waste that shall be accepted at the transfer station;
 - (C) the types of wastes that shall not be accepted at the transfer station;

(D) the name, address and telephone number of the transfer station owner and operator; and

(E) the telephone number of an emergency contact person available during non-operating hours.

(5) Each time the solid waste transfer station is open, an attendant shall be on duty.

(6) Provisions shall be made to prevent vehicles from backing into the receiving pits while unloading.

(7) Access to the facility by unauthorized persons shall be limited each time the station is closed.

(8) Procedures for preventing unauthorized receipt of regulated hazardous wastes as defined pursuant to K.A.R. 28-31-3 and K.A.R. 28-29-4, polychlorinated biphenyl (PCB) wastes as defined in 40 CFR part 761 as in effect July 1, 1992, or other wastes not addressed in the transfer station operating plan shall be developed and implemented.

(9) Blowing litter at the solid waste transfer station shall be controlled.

(10) Vectors at the solid waste transfer station shall be controlled.

(11) Each solid waste transfer station shall be cleaned as necessary to:

- (A) minimize odors;
- (B) minimize vectors; and
- (C) provide a safe working environment.

(12) All drainage from wet cleaning of any solid waste transfer station shall be:

- (A) discharged to a sanitary sewer; or
- (B) managed by another method approved by the director.

(13) Each day that waste is received at any solid waste transfer station, the transfer station shall be cleaned by an appropriate method to minimize odors and nuisance conditions.

(14) All on-site roads at a solid waste transfer station site shall be maintained to minimize dust.

(15) Any solid waste received at a solid waste transfer station shall be loaded into a transfer vehicle by the next day of operation at the transfer station.

(16) Each transfer vehicle shall be removed from the transfer station site within 48 hours after being filled to capacity. Each transfer vehicle not filled to capacity in any seven day period shall be removed from the transfer station site before the end of the seven day period, unless weather, or other abnormal conditions prevent transportation of the transfer vehicle.

(17) Each solid waste transfer station shall be equipped with fire protection equipment that is:

- (A) available at all times; and
- (B) capable of extinguishing fire resulting from:
 - (i) hot ashes;
 - (ii) oxidizers; or
 - (iii) other fire sources.

(18) An on-site operating record shall be maintained by the transfer station owner or operator. Each record shall be maintained for a minimum of three years. The operating record shall contain the following information:

- (A) a daily log of the quantity of solid waste received;
- (B) a daily log of the quantity of solid waste transported;
- (C) a daily log of the destination of the solid waste transported;
- (D) a daily log of any special waste received;
- (E) a daily log of any special waste transported;
- (F) a copy of each special waste disposal authorization written to the transfer station owner or operator;
- (G) a copy of transfer station employee training records; and
- (H) a copy of the current facility permit, including the following:

- (i) all facility design plans; and
- (ii) the facility operating plan.

(19) Each owner or operator shall prepare and submit an annual report to the department by March 1 of each year. The report shall contain:

- (A) the weight or volume of solid waste received;
- (B) the destination of the solid waste transferred;
- (C) the weight or volume of each type of material recovered at the transfer station; and
- (D) any changes in the operation that have occurred in the previous year.

(20) Each owner or operator shall develop a contingency plan for the solid waste transfer station. The contingency plan shall:

- (A) specify any procedures that shall be initiated if the solid waste transfer station experiences:
 - (i) an equipment breakdown;
 - (ii) a fire;
 - (iii) a receipt of hazardous material;
 - (iv) a release of a regulated quantity of any waste; or
 - (v) any other incident that may cause an emergency or suspend operations at the transfer station; and

(B) be available at any time at the transfer station.

(21) Employee training.

(A) The owner or operator of each solid waste transfer station shall provide training to each transfer station employee on the contents of the contingency plan identified in paragraph (c)(20) of this regulation, and the facility operating plan.

(B) A record of employee training required in paragraph (c)(21)(A) of this regulation shall be maintained in the operating record identified in paragraph (c)(18) of this regulation. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Feb. 20, 1995.)

28-29-24. Construction and demolition landfills. (a) A permit to construct or operate a construction and demolition landfill shall not be required for a construction and demolition landfill operated on the same tract as, and in conjunction with, a permitted sanitary landfill.

(b) If a city or a county, by ordinance or resolution, has established standards equivalent to, or more stringent than, those of the department to control construction and demolition landfills, and demonstrates that it has an enforcing agency to ensure those standards are adhered to, the department will issue a permit to the person operating the site upon certification by the enforcement division of the city or county to the department that those standards will be followed. (Authorized by and implementing K.S.A. 1981 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-25. Standards for solid waste processing facilities. (a) Incinerators. All incinerators used for combustion of solid wastes shall be designed and operated in conformity with K.S.A. 65-3001 *et seq.* and rules and regulations adopted under those statutes. All emission control devices, disposal of incinerator residues, and treatment of wastewater shall be approved by the department.

(b) Other methods of solid waste handling, processing, and disposal. Before any disposal area or processing facility, or any method of solid waste handling, processing, or disposal, not provided for in these regulations, is practiced or placed into operation, complete plans, specifications, design data, land-use plans, and proposed operation procedures shall be submitted to the department for review and permit issuance in accordance with K.A.R. 28-29-6. (Authorized by and implement-

ing K.S.A. 1981 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; amended May 1, 1982.)

28-29-25a. Small yard waste composting sites. This regulation shall apply to each yard waste composting site that has a composting area of one-half acre or less, but this regulation shall not apply to backyard composting. Hay, straw, and manure may be added to yard waste only for the purpose of adjusting the carbon-to-nitrogen ratio of the compost mix. The additives shall not exceed 10 percent by volume of the total mixture without the written approval of the department. Other materials may be added to the yard waste only with the written approval of the department.

(a) Site design. The owner or operator of each yard waste composting site shall design and construct the composting site to meet all of the following requirements.

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The operation shall not cause a discharge of pollutants into waters of the state, in accordance with K.S.A. 65-164, and amendments thereto.

(2) Site access.

(A) At each site that composts yard waste that is brought in from off-site, the following information shall be posted on one or more signs:

(i) Site name;

(ii) site hours;

(iii) a list of the materials appropriate for composting; and

(iv) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(b) Site operations. The owner or operator of each yard waste composting site shall perform the following:

(1) Minimize odors;

(2) control disease vectors, dust, litter, and noise; and

(3) remove all finished compost within 18 months of the completion of the composting process.

(c) Site closure. The owner or operator of each yard waste composting site shall perform the following:

(1) Notify the department, in writing, at least 60 days before closure; and

(2) remove all materials from the site within six months of the last receipt of compostable material.

(d) Registration. Each owner or operator of a small yard waste composting site shall submit registration information to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department. (Authorized by and implementing K.S.A. 1998 Supp. 65-3406; effective Oct. 1, 1999.)

28-29-25b. Yard waste composting facilities. This regulation shall apply to each facility that composts yard waste and has a composting area larger than one-half acre. Hay, straw, and manure may be added to yard waste only for the purpose of adjusting the carbon-to-nitrogen ratio of the compost mix. The additives shall not exceed 10 percent by volume of the total mixture without the written approval of the department. Other materials may be added to the yard waste only with the written approval of the department.

(a) Facility design. The owner or operator of each yard waste composting facility shall design and construct the facility to meet the following requirements.

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The facility shall not cause a discharge of pollutants into waters of the state, in accordance with K.S.A. 65-164, and amendments thereto.

(C) The composting area shall be graded to prevent ponding of liquids.

(D) The surface of the composting area shall be capable of supporting all equipment used.

(2) Facility access.

(A) At each facility that composts yard waste that is brought in from off-site, the following information shall be posted on one or more signs:

- (i) Facility name;
- (ii) permit number;
- (iii) site hours;
- (iv) traffic flow;

(v) a list of the materials appropriate for composting; and

(vi) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(C) Facility roads shall be constructed to allow access for managing the composting operation. Yard waste composting facilities shall be exempt from the all-weather access road requirement prescribed in K.A.R. 28-29-23(e).

(3) Capacity and storage. The composting facility shall have the capacity to store the following materials:

(A) Incoming materials waiting to be processed;

(B) the materials being processed; and

(C) the finished compost, not to exceed 18 months' production.

(b) Facility operations. The owner or operator of each yard waste composting facility shall be exempt from K.A.R. 28-29-23(j) and shall perform the following:

(1) Minimize odors;

(2) control disease vectors, dust, litter, and noise;

(3) segregate incoming waste from finished compost;

(4) inform the public of disposal sites for waste not acceptable for composting at the facility;

(5) begin processing incoming waste within one week of receipt; and

(6) remove all finished compost within 18 months of the completion of the composting process.

(c) Facility closure. The owner or operator of each yard waste composting facility shall perform the following:

(1) Notify the department, in writing, at least 60 days before closure; and

(2) remove all materials from the facility within six months of the last receipt of compostable material.

(d) Permit applications. The owner or operator of each yard waste composting facility shall submit a permit application to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department. The applicant shall include the following items with the permit application.

(1) Facility design plan. This design plan shall not be required to bear the seal and signature of a professional engineer. The facility design plan shall contain all of the following items:

(A) A 7.5 minute topographic map of the area, as typically available from the U.S. geological survey, indicating the facility boundary and the property boundary;

(B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services;

(C) a 100-year floodplain map of the area, as typically available from the federal emergency management agency; and

(D) a detailed drawing of the facility that indicates the location of all of the following features:

- (i) Roads;
- (ii) the existing and final grades and contours;
- (iii) storm water control;
- (iv) buildings and equipment to be installed;
- (v) utilities; and
- (vi) access control.

(2) Operations plan. The operations plan shall contain the following information:

(A) Job descriptions of persons responsible for operation, control, and maintenance of the facility;

(B) the anticipated annual quantity of waste to be received, and the seasonal variations of the quantity of waste to be received;

(C) the methods to control traffic and to expedite unloading;

(D) the methods for measuring incoming waste;

(E) the methods to control the types of waste received;

(F) the methods for removing noncompostable wastes from the incoming waste stream, including procedures for storage and disposal of these wastes;

(G) the location of disposal sites for noncompostable wastes;

(H) the method of composting;

(I) a list of equipment to be used;

(J) a description of any additives used in the process;

(K) a quality assurance and quality control plan that outlines the monitoring, sampling, and analysis plans for testing the compost process and product;

(L) the proposed end-use of the compost;

(M) the methods to minimize, manage, and monitor odors;

(N) disease vector, dust, litter, and noise control measures;

(O) leachate and storm water control measures; and

(P) a fire protection and control plan.

(3) Closure plan. The closure plan shall not be required to bear the seal and signature of a professional engineer. This plan shall include the following information:

(A) The steps necessary to close the facility;

(B) the final surface contours; and

(C) a closure cost estimate based on the third-party cost for removing and disposing of the maximum amount of wastes that may be con-

tained at the facility. (Authorized by and implementing K.S.A. 1998 Supp. 65-3406; effective Oct. 1, 1999.)

28-29-25c. Manure composting. For the purposes of this regulation, subsections (a), (b), (c), and (d) shall apply to each facility that composts manure and has a composting area of one-half acre or less. Subsections (a), (b), (c), and (e) of this regulation shall apply to each facility that composts manure and has a composting area larger than one-half acre. On-site storage of manure shall not be considered composting.

(a) Facility design. The owner or operator of each facility that composts manure shall design and construct the facility to meet the following requirements:

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The facility shall not cause a discharge of pollutants into waters of the state, in accordance with K.S.A. 65-164, and amendments thereto.

(C) Leachate control shall be provided wherever leachate is generated.

(D) The composting area shall be graded to prevent ponding of liquids.

(E) The surface of the composting area shall be capable of supporting all equipment used.

(2) Facility access.

(A) At each facility that composts manure that is brought in from off-site, the following information shall be posted on one or more signs:

(i) Facility name;

(ii) permit number;

(iii) site hours;

(iv) traffic flow;

(v) a list of the materials appropriate for composting; and

(vi) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(C) Facility roads shall be constructed to allow access for managing the composting operation. Manure composting facilities shall be exempt from the all-weather access road requirement prescribed in K.A.R. 28-29-23(e).

(3) Capacity and storage. The facility shall have the capacity to store the following materials:

(A) Incoming materials waiting to be processed;

(B) the materials being processed; and

(C) the finished compost, not to exceed 18 months' production.

(4) Separation distances. For the purposes of this regulation, "animal unit," "habitable structure," and "wildlife refuge" have the same meaning as set forth in K.S.A. 65-171d, and amendments thereto.

(A) Each facility that composts livestock manure, other than swine manure, shall meet or exceed the following separation distances from any habitable structure in existence when the facility begins operations:

(i) 1,320 feet for facilities composting manure from 300 to 999 animal units; and

(ii) 4,000 feet for facilities composting manure from 1,000 or more animal units.

(B) Each facility that composts swine manure shall meet or exceed the following separation distances from any habitable structure or city, county, state, or federal park in existence when the facility begins operations:

(i) 1,320 feet for facilities composting manure from 300 to 999 animal units;

(ii) 4,000 feet for facilities composting manure from 1,000 to 3,724 animal units; and

(iii) 5,000 feet for facilities composting manure from 3,725 or more animal units.

(C) Each facility that composts swine manure shall meet or exceed the following separation distances from any wildlife refuge:

(i) 10,000 feet for facilities composting manure from 1,000 to 3,724 animal units; and

(ii) 16,000 feet for facilities composting manure from 3,725 or more animal units.

(D) For each manure composting operation located at a confined feeding facility, the separation distances as set forth in K.S.A. 65-171d and amendments thereto shall apply.

(5) Exceptions to the separation distances.

(A) The separation distance requirements of paragraphs (a)(4)(A) and (B) of this regulation shall not apply if the owner or operator obtains written agreement from all owners of habitable structures that are within the separation distance, stating that the owners of the habitable structures are aware of the operation and have no objections to the operation. The written agreement shall be filed in the office of the register of deeds of the county in which the habitable structure is located.

(B) The separation distance requirements of paragraph (a)(4)(A) of this regulation may be re-

duced by the secretary if one of the following conditions applies:

(i) No substantial objection from owners of habitable structures within the separation distance is received in response to public notice.

(ii) The board of county commissioners of the county where the composting operation is located submits a written request seeking a reduction of the separation distances.

(C) The separation distance requirements of paragraphs (4)(B)(i) and (ii) of this regulation may be reduced by the secretary if one of the following conditions applies:

(i) No substantial objection is received in response to notice given by certified mail, return response requested, to owners of all habitable structures within the separation distance.

(ii) The board of county commissioners of the county where the composting operation is located submits a written request seeking a reduction of separation distances.

(iii) The secretary determines that technology exists that meets or exceeds the effect of the required separation distance and the composting operation will be using the technology.

(D) The separation distance requirements of paragraph (4)(B)(iii) of this regulation may be reduced by the secretary if one of the following conditions applies:

(i) No substantial objection is received in response to notice given by certified mail, return response requested, to owners of all habitable structures within the separation distance.

(ii) The secretary determines that technology exists that meets or exceeds the effect of the required separation distance and the composting operation will be using the technology.

(E) For each manure composting operation located at a confined feeding facility, exceptions to the separation distances as set forth in K.S.A. 65-171d and amendments thereto shall apply.

(b) Facility operations. The owner or operator of each facility that composts manure shall perform the following:

(1) Minimize odors;

(2) control disease vectors, dust, litter, and noise;

(3) segregate incoming waste from finished compost;

(4) limit public access to hours when an attendant or any operating personnel are at the facility;

(5) begin processing incoming waste by the end of the working day; and

(6) remove all finished compost within 18 months of the completion of the composting process.

(c) Facility closure. The owner or operator of each facility that composts manure shall perform the following:

(1) Notify the department, in writing, at least 60 days before closure; and

(2) remove all materials from the facility within six months of the last receipt of compostable material.

(d) Registration. Each owner or operator of a facility that composts manure and has a composting area of one-half acre or less shall submit registration information to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department.

(e) Permit applications. The owner or operator of each facility that composts manure and has a composting area larger than one-half acre shall submit a permit application to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department. The applicant shall include the following items with the permit application:

(1) Facility design plan. The facility design plan shall contain all of the following items:

(A) A 7.5 minute topographic map of the area, as typically available from the U.S. geological survey indicating the facility boundary and the property boundary;

(B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services;

(C) a 100-year floodplain map of the area, as typically available from the federal emergency management agency; and

(D) a detailed drawing of the facility that indicates the location of the following features:

- (i) Roads;
- (ii) the existing and final grades and contours;
- (iii) storm water control;
- (iv) buildings and equipment to be installed;
- (v) utilities;
- (vi) access control; and
- (vii) all other structures.

(2) Operations plan. The operations plan shall contain the following information:

(A) Job descriptions of persons responsible for operation, control, and maintenance of the facility;

(B) the anticipated annual quantity of waste to be received, and the seasonal variations of the quantity of waste to be received;

(C) the sources of waste to be received;

(D) the methods to control traffic and to expedite unloading;

(E) the methods for measuring incoming waste;

(F) the methods to control the types of waste received;

(G) the methods for removing noncompostable wastes from the incoming waste stream, including procedures for storage and disposal of these wastes;

(H) the location of disposal sites for noncompostable wastes;

(I) the method of composting;

(J) a list of equipment to be used;

(K) a description of additives used in the process;

(L) a quality assurance and quality control plan that outlines the monitoring, sampling, and analysis plans for testing the compost process and product;

(M) the proposed end use of product;

(N) the methods to minimize, manage, and monitor odors;

(O) disease vector, dust, litter, and noise control measures;

(P) leachate and national pollutant discharge elimination system storm water control measures;

(Q) the plans for operations during wind, heavy rain, snow, freezing temperatures, or other inclement weather conditions;

(R) a contingency plan for events including equipment failure, power outages, natural disasters, receipt of prohibited materials, or other similar interruptions of normal activities; and

(S) a fire protection and control plan.

(3) Closure plan. The closure plan shall include the following information:

(A) The steps necessary to close the facility;

(B) the final surface contours; and

(C) a closure cost estimate based on the third-party cost of removing and disposing of the maximum amount of wastes that may be contained at the facility. (Authorized by and implementing K.S.A. 1998 Supp. 65-3406; effective Oct. 1, 1999.)

28-29-25d. Livestock composting. For the purposes of this regulation, subsections (a), (b), (c), and (d) shall apply to each facility that composts livestock, including chickens and turkeys, and has a composting area of one-half acre or less. Subsections (a), (b), (c), and (e) of this reg-

ulation shall apply to each facility that composts livestock, including chickens and turkeys, and has a composting area larger than one-half acre.

(a) The owner or operator of each facility that composts livestock shall design and construct the facility to meet the following requirements.

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The facility shall not cause a discharge of pollutants into waters of the state, in accordance with K.S.A. 65-164, and amendments thereto.

(C) Leachate control shall be provided wherever leachate is generated.

(D) The composting area shall be graded to prevent ponding of liquids.

(E) The surface of the composting area shall be capable of supporting all equipment used.

(F) The facility shall be constructed with either a floor or a roof that meets one of the following requirements:

(i) The floor shall be composed of a layer of material that is at least one foot thick and has a hydraulic conductivity no greater than 10^{-7} cm/sec, or the facility shall be designed to provide the same level of protection to the groundwater; or

(ii) the receiving, processing, and curing areas shall be covered by a roof, or the facility shall be designed to provide the same level of protection from the weather.

(2) Facility access.

(A) At each facility that composts livestock that is brought in from off-site, the following information shall be posted on one or more signs:

(i) Facility name;

(ii) permit number;

(iii) site hours;

(iv) traffic flow;

(v) a list of the materials appropriate for composting; and

(vi) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(C) Facility roads shall be constructed to allow adequate access for managing the composting operation. Facilities that compost livestock shall be exempt from the all-weather access road requirement prescribed in K.A.R. 28-29-23(e).

(3) Capacity and storage. The facility shall have the capacity to store the following materials:

(A) Incoming materials waiting to be processed;

(B) the materials being processed; and

(C) the finished compost, not to exceed 18 months' production.

(4) Separation distances. For the purposes of this regulation, "animal unit," "animal unit capacity," "habitable structure," and "wildlife refuge" have the same meaning as set forth in K.S.A. 65-171d, and amendments thereto.

(A) Each facility that composts livestock from one or more confined feeding facilities, other than confined feeding facilities for swine, shall meet or exceed the following separation distances from any habitable structure in existence when the facility begins operations:

(i) 1,320 feet for facilities composting livestock from one or more confined feeding facilities with a combined animal unit capacity of 300 to 999; and

(ii) 4,000 feet for facilities composting livestock from one or more confined feeding facilities with a combined animal unit capacity of 1,000 or more.

(B) Each facility that composts livestock from one or more confined feeding facilities for swine shall meet or exceed the following separation distances from any habitable structure or city, county, state, or federal park in existence when the facility begins operations:

(i) 1,320 feet for facilities composting swine from one or more confined feeding facilities with a combined animal unit capacity of 300 to 999;

(ii) 4,000 feet for facilities composting swine from one or more confined feeding facilities with a combined animal unit capacity of 1,000 to 3,724; and

(iii) 5,000 feet for facilities composting swine from one or more confined feeding facilities with a combined animal unit capacity of 3,725 or more.

(C) Each facility that composts livestock from one or more confined feeding facilities for swine shall meet or exceed the following separation distances from any wildlife refuge:

(i) 10,000 feet for facilities composting swine from one or more confined feeding facilities with a combined animal unit capacity of 1,000 to 3,724; and

(ii) 16,000 feet for facilities composting swine from one or more confined feeding facilities with a combined animal unit capacity of 3,725 or more.

(D) Exceptions to the separation distances set forth in K.S.A. 65-171d, and amendments thereto, shall apply.

(b) Facility operations. The owner or operator of each facility that composts livestock shall perform the following:

- (1) Minimize odors;
- (2) control disease vectors, dust, litter, and noise;
- (3) ensure that dead animals are not visible from municipal roads or habitable structures;
- (4) protect the facility from scavenging by animals;
- (5) segregate incoming waste from finished compost;
- (6) begin processing incoming waste by the end of the working day;
- (7) limit public access to hours when an attendant or any operating personnel are at the facility; and
- (8) remove all finished compost within 18 months of the completion of the composting process.

(c) Facility closure. The owner or operator of each facility that composts livestock shall perform the following:

- (1) Notify the department, in writing, at least 60 days before closure;
- (2) remove all material from the facility within 10 days of ceasing operation; and
- (3) clean all containers, equipment, machines, floors, and site surfaces that have been in contact with dead animals or solid waste.

(d) Registration. Each owner or operator of a facility that composts livestock and has a composting area of one-half acre or less shall submit registration information to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department.

(e) Permit applications. The owner or operator of each facility that composts livestock and has a composting area larger than one-half acre shall submit a permit application to the department on a form provided by the department, unless the composting operation is located at a confined feeding facility that has a valid permit issued by the department. The applicant shall include the following items with the permit application:

- (1) Facility design plan. The facility design plan shall contain the following items:
 - (A) A 7.5 minute topographic map of the area, as typically available from the U.S. geological survey, indicating the facility boundary and the property boundary;
 - (B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services;

- (C) a 100-year floodplain map of the area, as typically available from the federal emergency management agency;

- (D) plan and profile views of the facility indicating the following features:

- (i) Roads;
- (ii) the existing and final grades and contours;
- (iii) storm water control;
- (iv) buildings and equipment to be installed;
- (v) utilities;
- (vi) access control; and
- (vii) all other structures; and

- (E) information on the permeability of the floor structure.

- (2) Operations plan. The operations plan shall contain the following information:

- (A) Job descriptions of persons responsible for operation, control, and maintenance of the facility;

- (B) the anticipated annual quantity of waste to be received, and the seasonal variations of the quantity of waste to be received;

- (C) the sources of waste to be received;

- (D) the methods to control traffic and to expedite unloading;

- (E) the methods for measuring incoming waste;

- (F) the methods to control the types of waste received;

- (G) the methods for removing non-compostable wastes from the incoming waste stream, including procedures for storage and disposal of these wastes;

- (H) the location of disposal sites for non-compostable wastes;

- (I) the method of composting;

- (J) a list of equipment to be used;

- (K) a description of any additives used in the process;

- (L) a quality assurance and quality control plan that outlines the monitoring, sampling, and analysis plans for testing the compost process and product;

- (M) the proposed end-use of compost;

- (N) the methods to minimize, manage, and monitor odors;

- (O) disease vector, dust, litter, and noise control measures;

- (P) leachate and national pollutant discharge elimination system storm water control measures;

- (Q) the plans for operations during wind, heavy rain, snow, freezing temperatures, or other inclement weather conditions;

- (R) a contingency plan for events including

equipment failure, power outages, natural disasters, fire, receipt of prohibited materials, or similar interruptions of normal activities; and

(S) a fire protection and control plan.

(3) Closure plan. The closure plan shall include the following information:

(A) The steps necessary to close the facility;

(B) the final surface contours; and

(C) a closure cost estimate based on the third-party cost of removing and disposing of the maximum amount of wastes that may be contained at the facility. (Authorized by and implementing K.S.A. 1997 Supp. 65-3406 and L. 1998, ch. 143, sec. 37; effective Jan. 8, 1999.)

28-29-25e. Source-separated organic waste composting. For the purposes of this regulation, subsections (a), (b), (c), and (d) shall apply to each facility that composts source-separated organic waste and has a composting area of one-half acre or less. Subsections (a), (b), (c), and (e) of this regulation shall apply to each facility that composts source-separated organic waste and has a composting area larger than one-half acre.

(a) Facility design. The owner or operator of each facility that composts source-separated organic waste shall design and construct the facility to meet the following requirements:

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The facility shall not cause a discharge of pollutants into waters of the state in accordance with K.S.A. 65-164, and amendments thereto.

(C) Leachate control shall be provided wherever leachate is generated.

(D) The composting area shall be graded to prevent ponding of liquids.

(E) The surface of the composting area shall be capable of supporting the equipment used.

(2) Facility access.

(A) At each facility that composts source-separated organic waste that is brought in from off-site, the following information shall be posted on one or more signs:

(i) Facility name;

(ii) permit number;

(iii) site hours;

(iv) traffic flow;

(v) a list of the materials appropriate for composting; and

(vi) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(C) Access roads shall be of all-weather construction and shall be negotiable at all times. Load limits on bridges and access roads shall be sufficient to support all traffic loads generated by the use of the facility.

(3) Capacity and storage. The facility shall have the capacity to store the following materials:

(A) Incoming materials waiting to be processed;

(B) the materials being processed; and

(C) the finished compost, not to exceed 18 months' production.

(b) Facility operations. The owner or operator of each facility that composts source-separated organic waste shall perform the following:

(1) Minimize odors;

(2) control disease vectors, dust, litter, and noise;

(3) protect the facility from scavenging by animals;

(4) segregate incoming waste from finished compost;

(5) inform the public of disposal sites for waste not acceptable for composting at the facility;

(6) limit public access to hours when an attendant or any operating personnel are at the facility;

(7) begin processing incoming waste within 24 hours of receipt;

(8) if sewage sludge is composted, comply with 40 CFR Part 503, as in effect on February 19, 1993; and

(9) remove all finished compost within 18 months of the completion of the composting process.

(c) Facility closure. The owner or operator of each facility that composts source-separated organic waste shall perform the following:

(1) Notify the department, in writing, at least 60 days before closure;

(2) remove all material from the facility within 10 days of ceasing operation; and

(3) clean all containers, equipment, machines, floors, and site surfaces that have been in contact with source-separated organic waste or solid waste.

(d) Registration. Each owner or operator of a facility that composts source-separated organic waste and has a composting area of one-half acre or less shall submit registration information to the department on a form provided by the department.

(e) Permit applications. The owner or operator of each facility that composts source-separated organic waste and has a composting area larger than one-half acre shall submit a permit application to the department on a form provided by the department. The applicant shall include the following items with the permit application:

(1) Facility design plan. The facility design plan shall contain the following items:

(A) A 7.5 minute topographic map of the area, as typically available from the U.S. geological survey, indicating the facility boundary and the property boundary;

(B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services;

(C) a 100-year floodplain map of the area, as typically available from the federal emergency management agency; and

(D) plan and profile views of the facility indicating the following features:

- (i) Roads;
- (ii) the existing and final grades and contours;
- (iii) storm water control;
- (iv) buildings and equipment to be installed;
- (v) utilities;
- (vi) access control; and
- (vii) all other structures.

(2) Operations plan. The operations plan shall contain the following information:

(A) Job descriptions of persons responsible for operation, control, and maintenance of the facility;

(B) the anticipated annual quantity of waste to be received, and the seasonal variations of the quantity of waste to be received;

(C) the sources of waste to be received;

(D) the methods to control traffic and to expedite unloading;

(E) the methods for measuring incoming waste;

(F) the methods to control the types of waste received;

(G) the methods for removing noncompostable wastes from the incoming waste stream, including procedures for storage and disposal of these wastes;

(H) the location of disposal site for noncompostable wastes;

(I) the method of composting;

(J) a description of equipment proposed to be used in composting, including equipment specifications and manufacturer's performance standards. The proposed equipment shall be com-

patible with the proposed process and throughput;

(K) a description of any additives used in the process;

(L) the methods for managing biological conditions;

(M) a quality assurance and quality control plan that outlines the monitoring, sampling, and analysis plans for testing the compost process and product;

(N) the proposed end use of compost;

(O) the methods to minimize, manage, and monitor odors;

(P) disease vector, dust, litter, and noise control measures;

(Q) leachate and national pollutant discharge elimination system storm water control measures;

(R) the plans for operations during wind, heavy rain, snow, freezing temperatures, or other inclement weather conditions;

(S) a contingency plan for events including equipment failure, power outages, natural disasters, fire, receipt of prohibited materials, or similar interruptions of normal activities; and

(T) a fire protection and control plan.

(3) Closure plan. The closure plan shall include the following information:

(A) The steps necessary to close the facility;

(B) the final surface contours; and

(C) a closure cost estimate based on the third-party cost of removing and disposing of the maximum amount of wastes that may be contained at the facility. (Authorized by and implementing K.S.A. 1998 Supp. 65-3406; effective Oct. 1, 1999.)

28-29-25f. Solid waste composting. For the purposes of this regulation, subsections (a), (b), (c), and (d) shall apply to each facility that composts solid waste and has a composting area of one-half acre or less, except facilities that compost only yard waste, manure, dead animals, source-separated organic waste, or any combination of yard waste, manure, dead animals, and source-separated organic waste. Subsections (a), (b), (c), and (e) of this regulation shall apply to each facility that composts solid waste and has a composting area larger than one-half acre, except facilities that compost only yard waste, manure, dead animals, source-separated organic waste, or any combination of yard waste, manure, dead animals, and source-separated organic waste.

(a) Facility design. The owner or operator of each solid waste composting facility shall design

and construct the facility to meet the following requirements:

(1) Composting surface and drainage.

(A) Storm water run-on shall be prevented from entering the receiving, processing, curing, or storage areas by the use of berms or other physical barriers.

(B) The facility shall not cause a discharge of pollutants into waters of the state, in accordance with K.S.A. 65-164, and amendments thereto.

(C) Leachate control shall be provided wherever leachate is generated.

(D) The composting area shall be graded to prevent ponding of liquids.

(E) The surface of the composting area shall be capable of supporting the equipment used.

(F) The floor shall be composed of a layer of material that is at least one foot thick and has a hydraulic conductivity no greater than 10^{-7} cm/sec, or the facility shall be designed to provide the same level of protection to the groundwater.

(G) The receiving, processing, and curing areas shall be covered by a roof, or the facility shall be designed to provide the same level of protection from the weather.

(2) Facility access.

(A) At each facility that composts solid waste that is brought in from off-site, the following information shall be posted on one or more signs:

- (i) Facility name;
- (ii) permit number;
- (iii) site hours;
- (iv) traffic flow;

(v) a list of the materials appropriate for composting; and

(vi) the name and telephone number of an emergency contact person.

(B) Unauthorized dumping shall be discouraged by access control.

(C) Access roads shall be of all-weather construction and shall be negotiable at all times. Load limits on bridges and access roads shall be sufficient to support all traffic loads generated by the use of the facility.

(3) Capacity and storage. The facility shall have the capacity to store the following materials:

- (A) Incoming materials waiting to be processed;
- (B) the materials being processed; and
- (C) the finished compost, not to exceed 18 months' production.

(b) Facility operations. The owner or operator of each solid waste composting facility shall perform the following:

- (1) Minimize odors;
- (2) control disease vectors, dust, litter, and noise;
- (3) protect the facility from scavenging by animals;

(4) segregate incoming waste from finished compost;

(5) inform the public of disposal sites for waste not acceptable for composting at the facility;

(6) limit public access to hours when an attendant or any operating personnel are at the facility;

(7) begin processing incoming waste within 24 hours of receipt;

(8) use one of the following processes to further reduce pathogens (PFRP):

(A) Windrow composting method. When using this method, the following conditions shall be met:

(i) Aerobic conditions shall be maintained within the windrow;

(ii) the waste shall attain a temperature of 55°C, 131°F, or greater for at least 15 days during the composting period; and

(iii) the windrow shall be turned a minimum of five times during the high temperature period;

(B) Aerated static pile composting method. When using this method, the waste shall be covered with six to 12 inches of insulating material and maintained at a temperature of 55°C, 131°F, or greater for a minimum of three consecutive days;

(C) Enclosed-vessel composting method. When using this method, the waste shall be maintained at a temperature of 55°C, 131°F, or greater for a minimum of three consecutive days; or

(D) any other method approved by the department;

(9) record the following information:

(A) The temperature and moisture content of materials during the composting process, in accordance with the operating plan;

(B) the daily volume or weight of waste received;

(C) the source of waste;

(D) all laboratory analyses required by the permit; and

(E) the volume of recovered materials; and

(10) remove all finished compost within 18 months of the completion of the composting process.

(c) Facility closure. The owner or operator of each facility that composts solid waste shall perform the following:

(1) Notify the department, in writing, at least 60 days before closure;

(2) remove all material from the facility within 10 days of ceasing operation; and

(3) clean all containers, equipment, machines, floors, and site surfaces that have been in contact with solid waste.

(d) Registration. Each owner or operator of a facility that composts solid waste and has a composting area of one-half acre or less shall submit registration information to the department on a form provided by the department.

(e) Permit applications. The owner or operator of each facility that composts solid waste and has a composting area larger than one-half acre shall submit a permit application to the department on a form provided by the department. The applicant shall include the following items with the permit application:

(1) Facility design plan. The facility design plan shall contain the following items:

(A) A 7.5 minute topographic map of the area, as typically available from the U.S. geological survey, indicating the facility boundary and the property boundary;

(B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services;

(C) a 100-year floodplain map of the area, as typically available from the federal emergency management agency;

(D) plan and profile views of the facility indicating the following features:

- (i) Roads;
- (ii) the existing and final grades and contours;
- (iii) storm water control;
- (iv) buildings and equipment to be installed;
- (v) utilities;
- (vi) access control; and
- (vii) all other structures;

(E) information on the permeability of the floor structure; and

(F) a flow diagram of the proposed processing steps involved in recovering recyclable materials and mixed organic material from solid waste, including a total mass balance.

(2) Operations plan. The operations plan shall contain the following information:

(A) Job descriptions of persons responsible for operation, control, and maintenance of the facility;

(B) the anticipated annual quantity of waste to be received, and the seasonal variations of the quantity of waste to be received;

(C) the sources of waste to be received;

(D) the methods to control traffic and to expedite unloading;

(E) the methods for measuring incoming waste;

(F) the methods to control the types of waste received;

(G) the methods for removing noncompostable wastes from the incoming waste stream, including procedures for storage and disposal of these wastes;

(H) the location of disposal sites for noncompostable wastes;

(I) the method of composting;

(J) a description of equipment proposed to be used in composting, including equipment specifications and manufacturer's performance standards. The proposed equipment shall be compatible with the proposed process and throughput;

(K) a description of any additives used in the process;

(L) the methods for managing biological conditions;

(M) a quality assurance and quality control plan that outlines the monitoring, sampling, and analysis plans for testing the compost process and product;

(N) the proposed end use of compost;

(O) the methods to minimize, manage, and monitor odors;

(P) disease vector, dust, litter, and noise control measures;

(Q) leachate and national pollutant discharge elimination system storm water control measures;

(R) the plans for operations during wind, heavy rain, snow, freezing temperatures, or other inclement weather conditions;

(S) a contingency plan for events including equipment failure, power outages, natural disasters, fire, receipt of prohibited materials, or similar interruptions of normal activities; and

(T) a fire protection and control plan.

(3) Closure plan. The closure plan shall include the following information:

(A) The steps necessary to close the facility;

(B) the final surface contours; and

(C) a closure cost estimate based on the third-party cost of removing and disposing of the maximum amount of wastes that may be contained at the facility. (Authorized by and implementing K.S.A. 1998 Supp. 65-3406; effective Oct. 1, 1999.)

28-29-26. (Authorized by and implementing K.S.A. 1983 Supp. 65-3406; effective May 1, 1982; amended, T-84-41, Dec. 21, 1983; amended May 1, 1984; revoked June 4, 1999.)

28-29-27. Medical services waste. (a) "Medical services waste" means those solid waste

materials that are potentially capable of causing disease or injury and are generated in connection with human or animal care through inpatient and outpatient services. Medical services waste shall not include any solid waste that has been classified by the secretary as a hazardous waste under K.S.A. 1996 Supp. 65-3431 and any amendments thereto, or that is radioactive treatment material licensed under K.S.A. 48-1607 and regulations adopted under that statute.

(b) Segregation. All medical services waste shall be segregated from other solid wastes at the point of origin.

(c) Storage. All medical services waste shall be stored in a manner and in a container that will prevent the transmission of disease or the causing of injury. Hypodermic needles and syringes, scalpel blades, suture needles, or other sharp objects shall be stored only in a rigid, puncture-resistant container that has been closed to prevent the escape of any material, including liquids or aerosols. All reusable containers used to store infectious waste shall be cleaned and disinfected before each use.

(d) Collection. Medical services wastes shall be collected at least daily from the point of origin for transport to a storage or disposal area or a processing facility. Personnel shall take precautions to prevent accidental contact with the waste during transfer.

(e) Transportation. All medical services wastes transported off-site shall be transported in a manner that will prevent the spread of disease or the causing of injury to persons.

(1) The waste transporter or disposal firm shall be notified of the types of waste.

(2) Containers of medical services waste transported off-site shall be labeled or color coded in accordance with 29 CFR 1910.1030(g)(1)(i), as in effect on July 1, 1996.

(f) Processing. In all processing of medical services waste, dispersal of aerosols and liquids shall be prevented through the use of proper coverings, seals, and ventilation. Personnel shall be protected against contact with the waste through the use of protective clothing and equipment. Medical services waste that has been processed may be combined with other solid waste. Where feasible, all medical services wastes shall be processed before transportation off-site by using either of the following methods:

(1) Sterilizing infectious wastes by autoclaving or chemical treatment, to destroy the disease-transmission potential; or

(2) grinding, melting, or pulverizing sharp objects to destroy the injury-producing potential.

(g) Disposal. Medical services waste shall be disposed of in a manner that minimizes the risk to health, safety, or the environment. The following shall be considered acceptable disposal methods:

(1) Discharge of liquids to a sanitary sewer connected to a secondary sewage treatment plant;

(2) incineration of combustible solids, followed by disposal of the ash in a sanitary landfill;

(3) disposal in a hazardous waste disposal facility that has a permit issued under K.A.R. 28-31-9; or

(4) disposal in a sanitary landfill in accordance with the provisions of K.A.R. 28-29-109. (Authorized by and implementing K.S.A. 1996 Supp. 65-3406, as amended by L. 1997, Ch. 139, Sec. 1; effective May 1, 1982; amended, T-84-41, Dec. 21, 1983; effective May 1, 1984; amended July 10, 1998.)

PART 3. STANDARDS FOR WASTE TIRE MANAGEMENT

28-29-28. Definitions. For the purposes of these regulations, the following terms shall be defined as follows.

(a) "Contaminated waste tire" shall have the meaning specified in K.S.A. 65-3424 and amendments thereto. A waste tire shall be deemed "substantially unsuitable for processing" if the volume of material with which the tire is coated or filled is estimated to be equal to or greater than 50% of the combined volume of the waste tire and contaminant. The determination that a waste tire is a contaminated waste tire shall be based on an inspection by the secretary or the secretary's designee.

(b) "Financial assurance" means a bond or other instrument that meets the requirements of K.A.R. 28-29-2101 through K.A.R. 28-29-2113.

(c) "Passenger tire equivalent" means 20 pounds of tires or processed waste tires.

(d) "Retreader" means a person engaged in the business of recapping tire casings to produce recapped tires for sale to the public.

(e) "Rick" means to stack tires securely by overlapping so that the center of a tire is offset from the center of the tire below it.

(f) "Waste tire monofill" means a permitted solid waste landfill or landfill cell in which only processed waste tires are placed.

(g) "Waste tire transporter" means a person who transports waste tires from a location in Kansas or to a location in Kansas. "Waste tire transporter"

shall not mean a person transporting waste tires through Kansas, if both the origin and the destination of the waste tires are outside of Kansas. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-28a. Establishing value of used tires. (a) Used tires at a waste tire collection center shall be considered to have value if the owner of the used tires demonstrates to the department, through sales and inventory records, that the used tires are being sold at a rate equal to or greater than 75% of the daily used tire inventory per year.

(b) Each owner of used tires at a waste tire collection center shall choose one of the following methods to determine the daily used tire inventory.

(1) The owner of the used tires shall count the used tires on the day of inspection by the department and shall use that number as the daily used tire inventory for the purpose of establishing the value of the used tires.

(2) The owner of the used tires shall inventory all the used tires at the waste tire collection center at least once every month and shall use the average (mean) of these monthly inventories to calculate the daily used tire inventory for the purpose of establishing the value of the used tires. The owner of the used tires shall maintain a record of each monthly inventory for at least 12 months after the monthly inventory and shall provide the department with the monthly inventory records on request.

(c) Each owner of used tires at a waste tire collection center shall maintain used tire sales records for at least 12 months after the sale and shall provide the department with the sales records on request.

(d) Any owner of used tires at a waste tire collection center who has fewer than 12 months of sales records available may use the following equation to calculate the sales rate, in terms of percent of the daily used tire inventory sold per year, as described in subsection (a) of this regulation:

$$\left(\frac{(\text{number of used tires sold within } x \text{ months}) \left(\frac{12}{x} \right)}{\text{daily used tire inventory}} \right) 100 = \%$$

“x” means the number of months for which sales records are available. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 1996 Supp. 65-3424b; effective Sept. 12, 1997.)

28-29-29. Waste tire processing and disposal standards. (a) Any person may dispose of waste tires by landfilling, if the waste tires meet the criteria specified for the landfill disposal of waste tires in K.S.A. 65-3424a, and amendments thereto.

(b) The processing of waste tires for landfill disposal, as required by K.S.A. 65-3424a and amendments thereto, shall be accomplished by any of the following means:

- (1) Shredding;
- (2) cutting in half along the circumference;
- (3) cutting into at least four parts, with no part being greater than $\frac{1}{3}$ of the original tire size;
- (4) chipping;
- (5) crumbing;
- (6) baling in a manner that reduces the volume of the waste tires by at least 50%; or
- (7) using an equivalent volume-reduction process that has received prior approval, in writing, from the secretary.

(c) Any person may process waste tires by burning, incineration, or other combustion process, including use as an alternative fuel, if the person performs all of the following:

- (1) Obtains a waste tire processing facility permit or a mobile waste tire processor permit from the secretary;
- (2) conducts the burning, incineration, or other combustion process in compliance with the Kansas air quality act, K.S.A. 65-3001 et seq. and amendments thereto, and its implementing regulations in article 19; and
- (3) handles all residue from the burning, incineration, or other combustion process by either or both of the following means:

(A) Disposal at a landfill permitted for disposal of the residue; or

(B) recycling. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424a; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended March 22, 2002; amended Oct. 26, 2007.)

28-29-29a. Beneficial use of waste tires. “Beneficial use” shall have the meaning specified in K.S.A. 65-3424, and amendments thereto.

(a) Approved beneficial use.

(1) Any person may use or store waste tires for a beneficial use if all of the following requirements are met:

(A) The use or storage is listed in the definition of “beneficial use” in K.S.A. 65-3424, and amendments thereto.

(B) The use or storage is conducted in accordance with subsections (b) and (c).

(C) The use or storage has no adverse impact on public health and safety and the environment.

(2) Each person that plans to use or store waste tires for a beneficial use that is not listed in the definition of "beneficial use" in K.S.A. 65-3424, and amendments thereto, shall submit an application for approval to the department, on a form provided by the department. The use or storage may be approved by the secretary if the use or storage meets the criteria specified in K.S.A. 65-3424, and amendments thereto.

(b) Management standards for all beneficial uses. The owner of the waste tires shall manage the waste tires in a manner that meets these requirements:

(1) Controls mosquitoes and other disease vectors, as specified in K.A.R. 28-29-29b; and

(2) minimizes the risk and impact of fire.

(c) Management standards for specific beneficial uses. The owner of waste tires used for any of the following beneficial uses shall meet the following requirements for that use:

(1) Windbreaks constructed of baled tires. The owner shall comply with the following requirements:

(A) Construct and maintain a stable base for the windbreak;

(B) construct the windbreak to be 200 feet or less in length;

(C) construct the windbreak to be three bales or less in height;

(D) repair all broken wires on the bales; and

(E) follow the fire control standards for the outdoor storage of tires specified in K.A.R. 28-29-31.

(2) Windbreaks constructed of waste tires that are not baled. The owner shall comply with the following requirements:

(A) Construct the windbreak to be 200 feet or less in length;

(B) construct the windbreak to be eight feet or less in height;

(C) place poles, either in the center of the waste tire stacks or next to the waste tire stacks, to stabilize the waste tires;

(D) fill each stack of waste tires with sand or soil; and

(E) follow the fire control standards for the outdoor storage of tires specified in K.A.R. 28-29-31.

(3) Erosion control on the face of an earthen dam. The owner shall comply with the following requirements:

(A) Place the waste tires in a secure manner that ensures the longevity of the project;

(B) fill each tire with rock or mortar that will not be washed out by wave action;

(C) offset the rows of waste tires for stability; and

(D) place the tires to extend below the normal water level.

(4) Stabilization of soil or sand blowouts caused by wind. The owner shall perform the following:

(A) Place the waste tires in a random pattern or in rows perpendicular to the prevailing wind direction;

(B) confine the tires to an area of one-half acre or less; and

(C) after a vegetative cover has been established, remove each waste tire from the site if both of the following conditions are met:

(i) Less than one-half of the tire is covered by sand; and

(ii) removing the tire will not damage the vegetative cover.

(d) Cessation of beneficial use. The owner shall manage all waste tires that have ceased to be of beneficial use in accordance with K.S.A. 65-3424 et seq., and amendments thereto, and the implementing regulations in article 29. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424; effective Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-29b. Pest control requirements for the storage of new tires, used tires, waste tires, and processed waste tires.

(a) Pest control requirements. The owner or operator of each site that contains an accumulation of new tires, used tires, waste tires, or processed waste tires, or any combination of these, shall operate and maintain the accumulation in a manner that controls mosquito breeding and other disease vectors. The determination that mosquitoes are breeding shall be based on the presence of mosquito larvae in the tires or processed waste tires.

(b) Pesticide application. Each person that applies pesticides shall comply with the Kansas pesticide act, K.S.A. 2-2438a et seq. and amendments thereto. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective Oct. 26, 2007.)

28-29-30. Waste tire processing facility, waste tire collection center, and mobile waste tire processor permits.

(a) Submission

of application. Each person required to obtain a waste tire processing facility permit, a waste tire collection center permit, or a mobile waste tire processor permit, as specified in K.S.A. 65-3424b and amendments thereto, shall submit an application to the department.

(1) Each application shall be submitted on forms provided by the department.

(2) Each application shall be submitted to the department at least 90 days before operations are planned to begin.

(b) Waste tire processing facility and waste tire collection center permit applications. Each applicant for a waste tire processing facility or waste tire collection center permit shall include the following items in the application:

(1) Proof of consistency with zoning or land use requirements;

(2) a description of the land use within a radius of one-half mile of the facility, identifying all buildings and surface waters;

(3) the following maps:

(A) A site location map showing section, township, range, and site boundaries;

(B) a site layout drawing showing the size and location of all pertinent artificial and natural features of the site, including roads, fire lanes, ditches, berms, waste tire storage areas, structures, wetlands, floodways, and surface waters; and

(C) a topographic map that has a scale of no less than one inch equals 2,000 feet, and that has a contour interval of 10 feet or less;

(4) a design plan, including equipment placement and a process flow diagram;

(5) an operations plan for the processing facility or collection center that includes the following information:

(A) The storage capacity for waste tires and processed waste tires, in passenger tire equivalents;

(B) the procedures that the facility owner or operator proposes to use to meet the mosquito and rodent control requirements of K.A.R. 28-29-29b;

(C) for waste tire collection centers, the proposed methods and schedule for storage of the waste tires before removal from the site; and

(D) for waste tire processing facilities, the following information:

(i) The proposed methods and schedule for the processing or disposal of waste tires;

(ii) the procedures that the facility owner or operator proposes to use to meet the waste tire processing standards in K.A.R. 28-29-29; and

(iii) a description of all equipment to be used in the waste tire processing operation;

(6) a contingency plan to minimize damage from fire and other emergencies at the site, including procedures for the following:

(A) Minimizing the occurrence or spread of fires;

(B) reporting all environmental problems, including fires, to the department;

(C) remediating the site;

(D) operating the facility when equipment fails; and

(E) operating the facility during inclement weather;

(7) proof that the applicant owns the site or has a lease for the site that runs at least one year. The permit shall be valid only for the location specified on the permit application;

(8) a closure plan that includes the following information:

(A) A description of when and why the operator would suspend the receipt of waste tires at the facility;

(B) a description of how all waste tires and processed waste tires will be removed from the site or otherwise properly disposed of upon closure;

(C) a time schedule for completing the closure procedures; and

(D) a plan for site rehabilitation and remediation;

(9) a closure cost estimate based on the cost to close the facility following the requirements of K.A.R. 28-29-31 and K.A.R. 28-29-31a. The cost of removing processed waste tires from the site shall not be required to be included in the closure cost estimate if the permittee demonstrates to the department that the processed waste tires have a positive market value;

(10) documentation of financial assurance issued in favor of the department that meets the requirements of K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(11) the applicable application fee specified in K.A.R. 28-29-2011.

(c) Mobile waste tire processor permit applications. Each applicant for a mobile waste tire processor permit shall include the following items in the application:

(1) A description of all equipment to be used in the mobile waste tire processing operation;

(2) documentation of financial assurance issued in favor of the department that meets the requirements of K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(3) the application fee specified in K.A.R. 28-29-2011.

(d) Permit renewal. As specified in K.S.A. 65-3424b and amendments thereto, each waste tire processing facility permit, waste tire collection center permit, and mobile waste tire processor permit shall be issued for a one-year period. Any permittee may apply to the secretary for permit renewal by submitting the renewal application to the department at least 30 days before the permit expiration date. Each renewal application shall be submitted on forms provided by the department and shall include the following items:

(1) For each waste tire processing facility permit and each waste tire collection center permit, the following items:

(A) An annual operations report that summarizes the information required in K.A.R. 28-29-31a(c);

(B) an updated closure cost estimate;

(C) documentation of updated financial assurance that meets the financial assurance requirements in K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(D) the applicable permit renewal fee specified in K.A.R. 28-29-2011; and

(2) for each mobile waste tire processor permit, the following items:

(A) An annual operations report that summarizes the information required in K.A.R. 28-29-31a(c);

(B) documentation of financial assurance that meets the financial assurance requirements in K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(C) the permit renewal fee specified in K.A.R. 28-29-2011.

(e) Permit modifications. Any waste tire processing facility, waste tire collection center, or mobile waste tire processor permittee may request from the secretary a permit modification to modify the operations authorized in an unexpired permit. The procedure for modifying permits specified in K.A.R. 28-29-8 shall apply.

(f) Transfers of ownership. The permittee shall provide notice of plans to transfer ownership of any facility or business permitted under these regulations to the department at least 60 days before the transfer. Each permit shall be issued only for the person or persons and the premises or business named in the permit. As specified in K.S.A. 65-3424k and amendments thereto, permits shall not be transferable. (Authorized by K.S.A.

65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-31. Requirements for storage of waste tires, used tires, and processed waste tires. (a) Outdoor storage of waste tires, used tires, or both.

(1) The requirements in this regulation for outdoor storage of tires shall not apply to tires stored in trailers or covered containers.

(2) Each person storing the tires shall meet the pest control standards specified in K.A.R. 28-29-29b.

(b) Outdoor storage of more than 500 used tires, 500 waste tires, or 500 used and waste tires. Each person storing the tires shall meet the following requirements:

(1) Locate the tires outside all wetlands;

(2) store tires that have been or will be stored for more than 30 days by one or more of the following means:

(A) Ricking;

(B) storing in racks; or

(C) storing on tread; and

(3) limit the size of each storage area to less than the following dimensions:

(A) 50 feet in width;

(B) 5,000 square feet in area; and

(C) 10 feet in height.

(c) Outdoor storage of 1,500 or more used tires, waste tires, or used and waste tires. Each person storing the tires shall meet the requirements of subsection (b) of this regulation and the following requirements:

(1) Locate each storage area at least 60 feet from each building;

(2) provide access to each storage area for fire-fighting equipment by either of the following means:

(A) Developing a 50-foot wide fire lane around the perimeter of each storage area. The person storing the tires shall maintain the fire lane and an approach and access road to each storage area, which shall be passable for any fire-fighting vehicle at all times; or

(B) obtaining certification from the local fire department stating that there is adequate access to each storage area for fire-fighting equipment;

(3) prohibit all activities involving the use of open flames, smoking materials, and other ignition sources within 25 feet of each storage area;

(4) maintain all vegetation within 100 feet of each storage area in a manner that minimizes fire hazard.

(d) Outdoor storage of processed waste tires. The requirements in this regulation for the outdoor storage of processed waste tires shall not apply to processed waste tires stored in trailers or covered containers.

(1) Each person storing processed waste tires in an amount equal to or greater than the amount derived from 500 passenger tire equivalents shall store the processed waste tires according to the requirements in paragraphs (b)(1) and (b)(3) of this regulation, replacing the term "tire" with "processed waste tires."

(2) Each person storing processed waste tires in an amount equal to or greater than the amount derived from 1,500 passenger tire equivalents shall store the processed waste tires according to the requirements in paragraph (d)(1) and in paragraphs (c)(1) through (c)(4) of this regulation, replacing the term "tire" with "processed waste tires."

(e) Removal of contamination. If pyrolytic oil from a tire fire is released into the environment, each person storing the tires or the processed waste tires shall remove the oil and contaminated soil in accordance with the solid and hazardous waste regulations in articles 29 and 31 governing the removal, transportation, and disposal of the material.

(f) Closure of storage sites. When a storage site for waste tires, used tires, or processed waste tires closes, each person storing the tires or processed waste tires shall perform the following:

(1) Remove all waste tires and processed waste tires in accordance with the tire management standards of K.S.A. 65-3424 et seq., and amendments thereto, and the requirements of K.A.R. 28-29-28 through K.A.R. 28-29-33; and

(2) remove all other solid waste to a permitted solid waste disposal area. (Authorized by K.S.A. 65-3406 and 65-3424h; implementing K.S.A. 65-3406 and K.S.A. 2006 Supp. 65-3424b; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-31a. Requirements for permitted waste tire processing facilities, waste tire collection centers, and mobile waste tire processors. (a) Access for fire-fighting equipment. Each permittee that obtains certification from the local fire department, as specified in K.A.R. 28-

29-31, shall submit a copy of the certification to the department.

(b) Site access. The permittee of each waste tire collection center and each waste tire processing facility shall perform the following:

(1) Control access to the site;

(2) post a sign at the entrance of the site stating the following information:

(A) The name of the site;

(B) the permit number;

(C) the site's telephone number, if there is one;

(D) the 24-hour emergency telephone number; and

(E) if the site is open to the public, the hours of operation; and

(3) have an attendant present at all times when the waste tire processing facility or waste tire collection center is open for business.

(c) Recordkeeping. Each permittee shall retain the records required by this subsection at the facility or business for a minimum of three years. All quantities of tires and processed waste tires shall be recorded in passenger tire equivalents.

(1) Mobile waste tire processors. The permittee shall maintain records of the following information for each site at which waste tires were processed:

(A) The address or legal description;

(B) the landowner's name and address;

(C) the dates of arrival and departure of the mobile waste tire processor; and

(D) the quantity of waste tires processed.

(2) Waste tire processing facilities and waste tire collection centers. The permittee shall maintain monthly records of the following information:

(A) The quantity of waste tires received;

(B) for waste tire processing facilities, the quantity of waste tires processed;

(C) the quantity of waste tires and processed waste tires removed from the site; and

(D) each location to which waste tires or processed waste tires have been taken for use or disposal.

(d) Closure of waste tire processing facilities and waste tire collection centers.

(1) The permittee of each waste tire processing facility and each waste tire collection center shall cease to accept waste tires and shall close the waste tire processing facility or waste tire collection center in compliance with these regulations and with any special closure conditions established in the facility permit, if any of the following conditions is met:

(A) The permittee informs the secretary that the site is closed.

(B) A departmental order to cease operations is issued.

(C) A permit compliance schedule specifying closure is to begin.

(D) The owner fails to renew the permit.

(E) The permit is revoked.

(2) If the waste tire processing facility or waste tire collection center closes, the permittee shall perform the following:

(A) Close public access to the waste tire site;

(B) post a notice at the site entrance indicating to the public that the site is closed and, if the site had accepted waste tires from the public, indicating the nearest site where waste tires can be lawfully deposited;

(C) notify the department and the local government having jurisdiction over the site of the closing of the permitted waste tire processing facility or waste tire collection center; and

(D) submit certification to the department that the closure has been completed in compliance with the closure plan.

(3) All financial assurance not needed for the closure or for other purposes under this subsection shall be released to the permittee by the secretary. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective Oct. 26, 2007.)

28-29-32. Waste tire transporter permits. (a) Submission of application. Each person required to obtain a waste tire transporter permit, as specified in K.S.A. 65-3424b and amendments thereto, shall submit an application to the department. Each application shall be submitted on forms provided by the department.

(b) Waste tire transporter application. Each applicant for a waste tire transporter permit shall include the following items in the application:

(1) The address or legal description of each location where the waste tires will be transported for storage, processing, or disposal;

(2) an estimate of the number of tires that will be transported each month;

(3) a list of equipment that will be used;

(4) documentation of financial assurance issued in favor of the department that meets the requirements in K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(5) the application fee listed in K.A.R. 28-29-2011.

(c) Permit renewal. Each waste tire transporter permit shall be issued for a one-year period. Any permitted waste tire transporter may apply to the secretary for permit renewal by submitting the renewal application to the department at least 30 days before the permit expiration date. Each permit renewal application shall be submitted on a form provided by the department and shall include the following items:

(1) An annual operations report that summarizes the information required in K.A.R. 28-29-33(b);

(2) an updated equipment list;

(3) documentation of updated financial assurance that meets the financial assurance requirements in K.A.R. 28-29-2101 through K.A.R. 28-29-2113; and

(4) the permit renewal fee listed in K.A.R. 28-29-2011.

(d) Multiple business locations. Any corporation that has more than one separate business location may submit one waste tire transporter permit application that provides for services to all of the corporation's locations.

(e) Permits that are no longer active. If a waste tire transporter permit is not renewed, or is revoked or suspended, the former permittee shall remove all copies of the waste tire transporter permit from its vehicles.

(1) The former permittee shall remove all copies of the waste tire transporter permit either on the renewal date or on the day on which the former permittee receives notification that the waste tire transporter permit is no longer active, whichever occurs first.

(2) Within 14 days after revocation, suspension, or the renewal date, the former permittee shall surrender the original permit to the department and notify the department, in writing, that all copies of the waste tire transporter permit have been removed from all vehicles. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-33. Requirements for permitted waste tire transporters. Each person required to obtain a waste tire transporter permit shall perform the following:

(a) Display a copy of the person's current waste tire transporter permit in each vehicle that transports waste tires;

(b) record and maintain for three years the following information regarding activities for each month of operation:

- (1) The number of waste tires transported;
- (2) the name of the previous owner of the waste tires and the address or legal description of the location from which the waste tires were collected; and
- (3) the name of the subsequent owner of the waste tires and the address or legal description of the location at which the waste tires were deposited; and

(c) transport waste tires only to a person or landfill authorized to receive waste tires, pursuant to K.S.A. 65-3424a and amendments thereto. (Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; amended Sept. 12, 1997; amended Oct. 26, 2007.)

28-29-34 to 28-29-36. (Authorized by K.S.A. 1991 Supp. 65-3424h; implementing K.S.A. 1991 Supp. 65-3424f; effective, T-28-4-27-92, April 27, 1992; effective June 8, 1992; revoked Sept. 12, 1997.)

PART 4. STANDARDS FOR MANAGEMENT OF HAZARDOUS WASTES

28-29-37 to 28-29-44. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

28-29-45. (Authorized by K.S.A. 65-3406, 65-3407; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-46. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

28-29-47. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-48 and 28-29-49. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

28-29-50. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-51 to 28-29-53. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

28-29-54 to 28-29-56. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked, E-82-8, April 10, 1981; revoked May 1, 1982.)

28-29-57 to 28-29-63. (Authorized by K.S.A. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; amended, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

28-29-64. (Authorized by K.S.A. 65-3406; effective, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981.)

28-29-65. (Authorized by K.S.A. 65-3406; effective, E-82-8, April 10, 1981; revoked, E-82-20, Nov. 4, 1981; revoked May 1, 1982.)

PART 5. SOLID WASTE MANAGEMENT PLANS

28-29-75. Solid waste management (SWM) plans and committees; general provisions. (a) Each county shall prepare, adopt, and submit to the secretary an SWM plan as specified in K.S.A. 65-3405, and amendments thereto, and K.A.R. 28-29-75 through K.A.R. 28-29-82.

(b) Each county or group of counties shall establish an SWM committee, as specified in K.S.A. 65-3405 and amendments thereto. (Authorized by K.S.A. 65-3405 and K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-76. The solid waste management (SWM) committee. Each county commission for counties planning individually, or the SWM committee on behalf of the county commissions of each county participating in a regional SWM plan, shall submit the following information to the department within the deadlines specified:

(a) Within 60 days after the SWM committee is formed, a list of the SWM committee members. The list, and each update to the list, shall include

the following information for each SWM committee member:

- (1) The name;
- (2) the political entity, business, or organization that the committee member represents; and
- (3) the address, telephone number, and if available, the e-mail address; and
- (b) within 60 days of the event, each change in the designation of the chairperson or the contact person of the SWM committee. (Authorized by K.S.A. 65-3405 and K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-77. The SWM plan. (a) Each SWM committee shall establish an SWM plan that meets the requirements of K.S.A. 65-3405, and amendments thereto, and provides the following:

(1) Access for each person in the county or region to service providing for the disposal of all nonhazardous residential, commercial, and industrial solid waste; and

(2) a process for the orderly and systematic elimination of nuisances and pollution sources associated with the following solid waste management activities:

- (A) Storage;
- (B) collection;
- (C) transportation;
- (D) processing; and
- (E) disposal.

(b) Each SWM committee shall include in the SWM plan information, if available, from federal, state, and local sources pertaining to the following topics:

- (1) Present and projected population and densities;
- (2) present and anticipated industries;
- (3) utilities;
- (4) solid waste collection, transportation, processing, and disposal facilities;
- (5) present and anticipated land, air, and water usage;
- (6) present and projected transportation patterns;
- (7) present and projected sources of solid wastes;
- (8) assessed property values and the ability to fund the SWM system;
- (9) types of soil, geology, and hydrology;
- (10) air pollution, sewage, water resources, and public water supply; and

(11) local and regional land-use and development plans.

(c) Each SWM committee shall include in the SWM plan all information required by K.S.A. 65-3405, and amendments thereto, and the following information:

(1) A description of all sources of solid waste within the county or region or coming into the county or region;

(2) an estimate of solid waste storage, collection, transportation, processing, and disposal requirements for the area covered by the SWM plan for the next 10 years;

(3) a description of the projected demands and obstacles that could be caused by the existing solid waste storage, collection, transportation, processing, and disposal system;

(4) a description of the selected SWM system, including the following:

(A) Collection, transportation, processing, storage, and disposal methods;

(B) locations for disposal sites or processing facilities, or both; and

(C) plans for management of the wastes listed in K.S.A. 65-3405, and amendments thereto, and the following wastes:

- (i) Tires;
- (ii) industrial wastes;
- (iii) agricultural wastes;
- (iv) abandoned automobiles; and
- (v) other wastes that could require special handling, transportation, processing, or disposal;

(5) a description of options for development and implementation of recycling, composting, source reduction, and volume-based pricing in relationship to the selected SWM system;

(6) a 10-year timetable for the completion of all necessary steps required to implement the selected SWM system;

(7) a description of local provisions for regulation of storage, collection, transportation, disposal, and other SWM activities;

(8) a description of the responsibilities and actions required by each individual unit of government involved; and

(9) a method for financing each element of the selected SWM system based on cost estimates. Revenue financing, general obligation financing, and other financing methods may be analyzed individually or in combination.

(d) Each county that withdraws from a regional SWM plan shall prepare and submit to the department a new SWM plan meeting the requirements

of K.S.A. 65-3405, and amendments thereto, and this regulation.

(1) The county shall submit the new SWM plan to the department on or before the date of the next annual review or the date by which the five-year update of the regional plan is required to be submitted to the department, whichever is first.

(2) The county shall be subject to the conditions of the regional SWM plan until the new SWM plan for the county is approved by the secretary.

(e) A copy of the SWM plan shall be maintained in each county participating in the plan in a place accessible to the public. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-78. Review and adoption of a new SWM plan. (a) Each SWM committee shall develop a new SWM plan in accordance with the requirements of this regulation if any of the following occurs:

- (1) The dissolution of a region;
- (2) a change in the member counties of a region;
- (3) the withdrawal from a region of a county that elects to plan individually;
- (4) the formation of a new region; or
- (5) the transfer of planning responsibility either to or from a designated city.

(b) The SWM committee shall submit the new SWM plan for review to each official land-use planning agency and each official comprehensive planning agency within the area covered by the new SWM plan. The SWM committee may revise the new SWM plan based on comments received from one or more planning agencies.

(c) The SWM committee shall submit the new SWM plan for adoption to the county commission of each county or to the governing body of the designated city participating in the plan. All supporting information required by K.S.A. 65-3405, and amendments thereto, and by K.A.R. 28-29-77, including planning agency reviews, shall be submitted with the new SWM plan.

(d) Before adopting the new SWM plan, the county commission or governing body of a designated city shall hold a minimum of one public hearing on the plan. A notice of the public hearing, which shall specify the place and time of the hearing, shall be published at least once in the official newspaper of each county participating in the plan. The hearing shall be held at least 15 days and not more than 30 days after publication of the notice.

(e) The county commission or governing body of a designated city shall inform the SWM committee of the adoption of the plan. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-79. Approval of the SWM plan by the secretary. (a) After adoption of the SWM plan, the county commission, the governing body of the designated city, or the SWM committee shall submit the SWM plan to the secretary for consideration for approval as specified in K.S.A. 65-3405, and amendments thereto.

(b) The following documents shall accompany the SWM plan:

(1) A review from each official land-use planning agency and each official comprehensive planning agency within the area covered by the SWM plan; and

(2) a certification of adoption from the county commission of each county covered by the SWM plan.

(c) If an SWM plan is disapproved by the secretary, the county commission, governing body of the designated city, or SWM committee may revise and submit the SWM plan to the secretary. The revisions shall be made according to K.A.R. 28-29-82. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-80. Annual reviews of the SWM plan. (a) Review.

(1) Each SWM committee, except as specified in K.S.A. 65-3405 and amendments thereto, shall conduct an annual review of the SWM plan.

(2) The review shall identify all changes made to the SWM system of the county or region since adoption and approval of the SWM plan, the last annual update, or the last five-year review, whichever is most recent.

(b) Revision. If a revision of the SWM plan is required, the SWM committee, except as specified in K.S.A. 65-3405 and amendments thereto, shall follow the procedures specified in K.A.R. 28-29-82.

(c) Adoption. The county commission or governing body of the designated city shall inform the SWM committee of the adoption of the review.

(d) Submission.

(1) The results of the annual review shall be submitted to the secretary on or before the anniversary date of approval of the SWM plan or the last five-year review, whichever is more recent.

(2) One of the following groups shall submit the results of the annual review to the department:

(A) For individual county SWM plans without a designated city, the county commission;

(B) for SWM plans with a designated city, the governing body of the designated city; or

(C) for regional SWM plans, the SWM committee.

(3) The following documents shall be submitted to the department with the results of the annual review:

(A) A list of the current SWM committee members, as specified in K.A.R. 28-29-76; and

(B) a certification of adoption from the county commission of each county participating in the SWM plan. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-81. Five-year reviews of the SWM plan. (a) Review and revision. Each SWM committee shall review and revise the SWM plan within five years of the original SWM plan approval date or within five years of the previous five-year review approval date, whichever is more recent.

(1) The revision shall include, at a minimum, updates of the 10-year projections for SWM practices and needs and shall contain any changes in the SWM system according to the requirements specified in K.A.R. 28-29-77.

(2) The SWM committee shall revise the SWM plan according to the procedures specified in K.A.R. 28-29-82.

(b) Public hearing. One of the county commissions participating in the plan or the governing body of the designated city shall hold a public hearing in accordance with K.S.A. 65-3405 and amendments thereto.

(1) A notice of the public hearing, specifying the place and time of the hearing, shall be published at least once in the official newspaper of each designated city and each county participating in the plan.

(2) The hearing shall be held at least 15 days and not more than 30 days after publication of the notice.

(3) Any county commission or governing body of the designated city participating in the plan may hold additional public hearings.

(c) Submission of the SWM plan. Pursuant to K.S.A. 65-3405 and amendments thereto, one of the following shall submit the revised SWM plan to the secretary on or before the five-year anniversary date of approval of the SWM plan or the last five-year review, whichever is more recent:

(1) The county commission;

(2) the governing body of the designated city; or

(3) the SWM committee. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-82. Revisions to the SWM plan. (a) Each SWM committee shall revise the SWM plan if any of the following conditions is met:

(1) A waste management activity that is specifically required or precluded under the current SWM plan is proposed to be changed.

(2) Any of the following waste management activities has occurred:

(A) The availability of waste collection services within the planning area has been reduced or expanded for some or all waste generators.

(B) A solid waste facility that is subject to permitting requirements under K.S.A. 65-3407, and amendments thereto, has been added or eliminated.

(C) Non-permitted recycling services have been added or eliminated.

(3) One or more counties have been added to the plan.

(4) One or more counties have withdrawn from the plan.

(5) A change to the implementation schedule or financing methods specified in the SWM plan has occurred or will occur.

(6) Revisions are required as part of the five-year review to extend the planning horizon to 10 years.

(b) If the approved SWM plan does not meet the requirements of the solid waste management statutes or regulations, or both, a revision of the approved SWM plan may be required by the secretary. If a revision is required, written notice shall be provided by the secretary to each county commission, or the governing body of the designated city, covered by the SWM plan.

(c) Each revised SWM plan shall be reviewed by the official land-use planning agency and each official comprehensive planning agency within the area covered by the SWM plan.

(d) Each revised SWM plan shall be adopted according to the procedures specified in K.A.R. 28-29-78(b) and (d), except for regional SWM plans revised at unscheduled intervals, which shall be adopted in accordance with K.S.A. 65-3405 and amendments thereto. Adoption of the revised SWM plan by the county commission or commissions shall be conducted in an open meeting and shall provide an opportunity for public input.

(e) The county commission, the governing body of the designated city, or the SWM committee shall submit the revised SWM plan to the secretary for consideration for approval in accordance with K.A.R. 28-29-79.

(f) The county commission, or the governing body of the designated city, shall ensure that approved revisions of the SWM plan are incorporated in public copies of the plan maintained in accordance with K.A.R. 28-29-77. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3405; effective Jan. 1, 1972; amended, E-79-22, Sept. 1, 1978; amended May 1, 1979; amended March 5, 2004.)

28-29-83. (Authorized by K.S.A. 1978 Supp. 65-3406; effective, E-79-22, Sept. 1, 1978; effective May 1, 1979; revoked May 10, 1996.)

PART 6. FINANCIAL REQUIREMENTS

28-29-84. Permit renewal; solid waste permit fees. (a) General provisions. Each permit issued by the department for any solid waste disposal facility or area, processing facility, incinerator, transfer station, composting plant or area and reclamation facility may be renewed on or before the anniversary date of the permit each year in the following manner.

(1) Each solid waste facility operating in Kansas pursuant to a valid existing permit shall submit to the department, on or before the anniversary date of the permit, a report of the permitted activities on forms provided by the department.

(2) The annual permit renewal fee shall accompany the report. Action to approve the renewals of the permit shall not begin until such time as a properly completed report and the appropriate annual permit renewal fee are received by the department.

(b) Failure to submit. Failure to submit a complete annual report and the annual permit renewal fee on or before the anniversary date of the permit each year may subject the permit holder to denial, revocation, or suspension of the permit.

(c) Fee schedule. The fee for a permit to oper-

ate a solid waste disposal area or facility shall be as follows.

(1) The fee for an application for a proposed facility for which no permit has previously been issued by the department, or for reapplication due to loss of the permit resulting from departmental action, including revocation, denial or suspension shall be:

Incinerator	\$5,000.00
Industrial solid waste disposal area	\$3,000.00
Municipal solid waste disposal area	\$5,000.00
Processing facility	\$2,000.00
Reclamation facility	\$2,000.00
Solid waste compost facility.....	\$250.00
Transfer station	\$1,000.00

(2) Each facility or disposal area operating pursuant to a valid, current permit issued by the department shall be required to pay an annual permit renewal fee. The annual permit renewal fees shall be:

Incinerator	\$1,000.00
Industrial solid waste disposal area	\$1,000.00
Municipal solid waste disposal area	\$2,000.00
Processing facility	\$1,000.00
Reclamation facility	\$1,000.00
Solid waste compost facility.....	\$250.00
Transfer station	\$500.00

(d) Construction and demolition landfills.

(1) The fee for an application for a proposed construction and demolition disposal facility for which no permit has previously been issued by the department or as otherwise set forth in these regulations shall be as follows:

(A) each facility whose permit application projects receipt of less than 1,000 tons annually: \$250.00;

(B) each facility whose permit application projects receipt of more than 1,000 and less than 10,000 tons annually: \$500.00; and

(C) each facility whose permit application projects receipt of more than 10,000 tons annually: \$1,000.00.

(2) Each facility operating pursuant to a valid, current permit issued by the department shall be required to pay an annual permit renewal fee. The annual permit renewal fee shall be as follows:

(A) for each facility receiving less than 1,000 tons annually: \$125.00;

(B) for each facility receiving more than 1,000 and less than 10,000 tons annually: \$250.00; and

(C) for each facility receiving more than 10,000 tons annually: \$500.00.

(3) Fees for each facility reapplying for a permit due to loss of the permit resulting from depart-

mental action, including revocation, denial or suspension shall be determined in accordance with paragraph (d)(1) of this regulation based on the tonnage received the 12 months prior to the revocation, denial or suspension of the permit.

(4) To determine the annual fee due, the construction and demolition disposal facility may determine the volume of waste received during the previous year and convert this volume to an equivalent weight basis using the following conversion factor: 1 cubic yard = 1,250 pounds.

(e) Multiple activities. Any person conducting more than one of the activities listed in K.A.R. 28-29-84(c)(1) at one location shall pay a single fee. This fee shall be in the amount specified for the activity having the highest fee of those conducted. (Authorized by K.S.A. 1993 Supp. 65-3406, as amended by L. 1994, Ch. 283, sec. 2; implementing K.S.A. 1993 Supp. 65-3407, as amended by L. 1994, Ch. 283, sec. 3; effective, T-28-3-15-93, March 15, 1993; effective May 17, 1993; amended Aug. 28, 1995.)

28-29-85. State solid waste tonnage fees.

(a) General provisions. The operator of each solid waste disposal area in Kansas shall pay to the department a tonnage fee for each ton or equivalent volume of solid waste received and disposed of at the facility during the preceding reporting period. The fee shall be paid each reporting period until the facility no longer receives waste and begins departmentally approved closure activities. Municipal solid waste disposal areas receiving 50,000 tons or more of solid waste annually shall file the reports required by subsection (b) of this regulation and pay their tonnage fee monthly, on or before the last day of the following month. Municipal solid waste disposal areas receiving less than 50,000 tons of solid waste annually, and all other solid waste disposal areas shall file reports and pay their tonnage fee quarterly, on or before the last day of April, July, October and January.

(b) Certification and late fees. The operator of each solid waste disposal area shall certify, on a form provided by the department, the amount, source and type of solid waste received, processed, recycled, and disposed of during the preceding reporting period. Any operator failing to remit the appropriate tonnage fee and submit the report within 45 days after each reporting period shall pay a late processing fee of one and one-half percent per month on the unpaid balance from the date the fee was due until paid.

(c) Determination of waste tonnages.

(1) Operator estimates. The operator of each municipal solid waste disposal area that receives 50,000 tons or more of solid waste annually shall use actual weight records. The operator of each municipal solid waste disposal area that receives less than 50,000 tons of solid waste annually shall, subject to department approval, use one of the following methods for determining the number of tons of waste disposed of at the solid waste disposal area.

(A) The operator may use actual weight records.

(B) The operator may use actual volume records based upon direct aerial and field survey techniques, using the conversion factor of 1,000 pounds per cubic yard less a department approved deduction for cover material.

(C) The operator may use actual volume records based upon daily logs which record the source, type and measurement or estimate of each load using the conversion factors as specified in subsection (d) of this regulation.

(D) The operator of a landfill serving one county or an identifiable population of less than 20,000 may use a per capita waste generation rate charge equivalent of .8 ton per person per year. This generation rate may only be used during calendar year 1993. This method may be used after December 31, 1993, only with specific departmental approval.

(2) Other disposal site estimates. All other solid waste disposal sites shall, subject to departmental approval, use one of the methods provided in paragraph (c)(1)(A), (c)(1)(B) or (c)(1)(C) of this regulation.

(3) Departmental estimates. The department may estimate the number of tons received at a solid waste disposal area. The estimate may be based upon the number of tons received and reported for the previous reporting period, or any other recognized method.

(d) Payment calculation. The solid waste tonnage fee of \$1.50 per ton shall be calculated on department forms. If volume records are used, the following volume to weight factors shall be used to calculate tonnage unless the operator demonstrates to the department that a different conversion factor is appropriate.

Municipal solid waste (as delivered)	
Residential/commercial	
loose	325 pounds/cubic yard
compacted	650 pounds/cubic yard
Industrial	
general	330 pounds/cubic yard
liquids/sludges	8.3 pounds/gallon
Construction demolition	1,250 pounds/cubic yard

(e) Exemptions. The state solid waste tonnage fee shall not apply to non-hazardous waste that is received at a solid waste disposal area, and recycled, reclaimed or reused. Such items include scrap and composted wastes. (Authorized by K.S.A. 1993 Supp. 65-3406, as amended by L. 1994, Ch. 283, sec. 2; implementing K.S.A. 1993 Supp. 65-3415b; effective, T-28-3-15-93, March 15, 1993; effective May 17, 1993; amended Aug. 28, 1995.)

28-29-98. This regulation shall be revoked on and after February 24, 2000. (Authorized by K.S.A. 1997 Supp. 65-3406; implementing K.S.A. 1997 Supp. 65-3401; effective, T-28-9-30-93, Sept. 30, 1993; effective Nov. 22, 1993; amended May 16, 1994; amended Aug. 22, 1994; amended April 9, 1996; amended April 9, 1997; amended July 24, 1998; revoked Feb. 24, 2000.)

28-29-99. (Authorized by K.S.A. 65-3406; amended by L. 1993, Ch. 274, Sec. 2; implementing K.S.A. 65-3401; effective, T-28-9-30-93, Sept. 30, 1993; effective Nov. 22, 1993; revoked May 16, 1994; revoked Aug. 22, 1994.)

PART 7. MUNICIPAL SOLID WASTE LANDFILLS

28-29-100. Applicability. (a) The provisions of K.A.R. 28-29-100 through K.A.R. 28-29-121 shall apply to all municipal landfills receiving waste on or after October 9, 1991. Facilities receiving waste after October 9, 1991, but that stop receiving waste before October 9, 1993 shall only be subject to the final cover requirements in K.A.R. 28-29-121.

(b) Each existing unit or lateral expansion receiving flood-related waste from federally-designated areas within the major disaster areas declared by the president during the summer of 1993 pursuant to 42 U.S.C. 5121 *et seq.*, shall be designated by the director of the division of environment in accordance with the following:

(1) If it is determined by the director of the division of environment that a unit is needed to receive flood-related waste from a federally-designated disaster area, as specified in this regulation, that unit may continue to accept waste prior to April 9, 1994 without being subject to the requirements of K.A.R. 28-29-100 through K.A.R. 28-29-121, except as provided in subsection (a) of this regulation.

(2) Any unit that receives an extension in accordance with paragraph (b)(1) of this regulation

may continue to accept waste for a maximum of six additional months beyond April 9, 1994 without being subject to the requirements of K.A.R. 28-29-101 through K.A.R. 28-29-121, except as provided in subsection (a) of this regulation, if it is determined by the director of the division of environment that the unit is still needed to receive flood-related waste from a federally-designated disaster area as specified in this regulation.

(3) Any unit receiving an extension under paragraphs (b)(1) or (b)(2) of this regulation which accepts waste under any circumstances on or after October 9, 1994 shall be subject to K.A.R. 28-29-101 through K.A.R. 28-29-121.

(c) Any unit that meets the small landfill requirements of K.A.R. 28-29-103 may accept waste on or before October 9, 1997 without being subject to the requirements of K.A.R. 28-29-100 through K.A.R. 28-29-121, except as provided in subsection (a) of this regulation.

(d) Any portions of K.A.R. 28-29-101 through 28-29-121 which contain requirements different from those contained in K.A.R. 28-29-23 shall supersede the requirements of K.A.R. 28-29-23. (Authorized by K.S.A. 1995 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994; amended Dec. 13, 1996.)

28-29-101. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994; revoked May 30, 2003.)

28-29-102. Location restrictions. (a) Airport safety.

(1) Each owner or operator of a new MSWLF unit and existing MSWLF unit which is located within 10,000 feet (3,048 meters) of any airport runway end used by turbojet aircraft or within 5,000 feet (1,524 meters) of any airport runway end used by only piston-type aircraft, shall demonstrate to the department that the unit is designed and operated so that the unit does not pose a bird hazard to aircraft.

(2) Each owner or operator proposing to site a new unit within a five-mile radius of any airport runway end used by turbojet or piston-type aircraft shall notify the affected airport and the federal aviation administration (FAA).

(3) The owner or operator shall place a copy of the demonstration in the operating record.

(4) For purposes of this subsection:

(A) "Airport" means public-use airport open to the public without prior permission and without

restrictions within the physical capacities of available facilities.

(B) "Bird hazard" means an increase in the likelihood of bird and aircraft collisions that may cause damage to the aircraft or injury to its occupants.

(b) Floodplains.

(1) Owners or operators of new MSWLF units and existing MSWLF units located in 100-year floodplains must demonstrate to the department that the unit will not restrict the flow of the 100-year flood, reduce the temporary water storage capacity of the floodplain, or result in washout of solid waste so as to pose a hazard to human health and the environment.

(2) The owner or operator shall place a copy of the demonstration in the operating record.

(3) For purposes of this subsection:

(A) "Floodplain" means the lowland and relatively flat areas adjoining inland waters, including flood-prone areas that are inundated by the 100-year flood.

(B) "100-year flood" means a flood that has a 1% or greater chance of recurring in any given year or a flood of a magnitude equalled or exceeded once in 100 years on the average over a significantly long period.

(C) "Washout" means the carrying away of solid waste by waters of the base flood.

(c) Wetlands.

(1) New MSWLF units shall not be located in wetlands, unless the owner or operator demonstrates to the department that:

(A) there is no practicable alternative to the proposed MSWLF that does not also involve wetlands;

(B) the construction and operation of the unit will not:

(i) cause or contribute to violations of any applicable Kansas water quality standard;

(ii) violate any applicable toxic effluent standard or prohibition under section 307 of the clean water act, 33 U.S.C. 1317;

(iii) jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of a critical habitat, protected under the endangered species act of 1973; and

(iv) violate any requirement under the marine protection, research, and sanctuaries act of 1972 for the protection of a marine sanctuary;

(C) the unit will not cause or contribute to significant degradation of wetlands. The owner or

operator shall demonstrate the integrity of the unit and its ability to protect ecological resources by addressing the following factors:

(i) erosion, stability, and migration potential of native wetland soils, muds and deposits used to support the unit;

(ii) erosion, stability, and migration potential of dredged and fill materials used to support the unit;

(iii) the volume and chemical nature of the waste managed in the unit;

(iv) impacts on fish, wildlife, and other aquatic resources and their habitat from release of the solid waste;

(v) the potential effects of catastrophic release of waste to the wetland and the resulting impacts on the environment; and

(vi) any additional factors, as necessary, to demonstrate that ecological resources in the wetland are sufficiently protected;

(D) steps have been taken to attempt to achieve no net loss of wetlands, as defined by acreage and function, by first avoiding impacts to wetlands to the maximum extent practicable, then minimizing unavoidable impacts to the maximum extent practicable, and finally offsetting remaining unavoidable wetland impacts through all appropriate and practicable compensatory mitigation actions, including restoration of existing degraded wetlands or creation of man-made wetlands; and

(E) sufficient information is available to make a reasonable determination with respect to these demonstrations.

(2) The owner or operator shall place a copy of the demonstration in the operating record.

(3) For purposes of this subsection, "wetlands" means those areas that meet the definition provided in the "Corps of Engineers Wetlands Delineation Manual - Technical Report Y-87-1," as published January, 1987 by the Department of the Army Waterways Experiment Station, Corps of Engineers.

(d) Fault areas.

(1) New MSWLF units shall not be located within 60 meters (200 feet) of a fault that has had displacement in holocene time unless the owner or operator demonstrates to the department that an alternative setback distance of less than 60 meters (200 feet) will prevent damage to the structural integrity of the unit and will be protective of human health and the environment.

(2) The owner or operator shall place a copy of the demonstration in the operating record.

(3) For the purposes of this subsection:

(A) "Fault" means a fracture or a zone of fractures in any material along which strata on one side have been displaced with respect to that on the other side.

(B) "Displacement" means the relative movement of any two sides of a fault measured in any direction.

(C) "Holocene" means the most recent epoch of the quaternary period, extending from the end of the pleistocene epoch to the present.

(e) Seismic impact zones.

(1) New MSWLF units shall not be located in seismic impact zones, unless the owner or operator demonstrates to the department that all containment structures, including liners, leachate collection systems, and surface water control systems, are designed to resist the maximum horizontal acceleration in lithified earth material for the site.

(2) The owner or operator shall place a copy of the demonstration in the operating record.

(3) For the purpose of this subsection the following definitions shall apply:

(A) "Seismic impact zone" means an area with a 10% or greater probability that the maximum horizontal acceleration in lithified earth material, expressed as a percentage of the earth's gravitational pull (g), will exceed 0.10g in 250 years.

(B) "Maximum horizontal acceleration in lithified earth material" means the maximum expected horizontal acceleration depicted on a seismic hazard map, with a 90% or greater probability that the acceleration will not be exceeded in 250 years, or the maximum expected horizontal acceleration based on a site-specific seismic risk assessment.

(C) "Lithified earth material" means all rock, including all naturally occurring and naturally formed aggregates or masses of minerals or small particles of older rock that formed by crystallization of magma or by induration of loose sediments. This term shall not include human-made materials, including fill, concrete, and asphalt, or unconsolidated earth materials, soil, or regolith lying at or near the earth surface.

(f) Unstable areas.

(1) Owners or operators of new MSWLF units and existing units located in an unstable area shall demonstrate to the department that engineering measures have been incorporated into the unit's design to ensure that the integrity of the structural components of the MSWLF unit will not be disrupted. The owner or operator shall consider the

following factors, at a minimum, when determining whether an area is unstable:

(A) on-site or local soil conditions that may result in significant differential settling;

(B) on-site or local geologic or geomorphologic features; and

(C) on-site or local human-made features or events both surface and subsurface.

(2) The owner or operator shall place a copy of the demonstration in the operating record.

(3) For purposes of this subsection:

(A) "Unstable area" means a location that is susceptible to natural or human-induced events or forces capable of impairing the integrity of some or all of the MSWLF structural components responsible for preventing releases from a landfill. Unstable areas may include poor foundation conditions, areas susceptible to mass movements, and karst terranes.

(B) "Structural components" means liners, leachate collection systems, final covers, run-on systems, run-off systems, and any other component used in the construction and operation of the MSWLF that is necessary for protection of human health and the environment.

(C) "Poor foundation conditions" means those areas where features exist which indicate that a natural or human-induced event may result in inadequate foundation support for the structural components of an MSWLF unit.

(D) "Areas susceptible to mass movement" means those areas of influence including areas characterized as having an active or substantial possibility of mass movement, where the movement of earth material at, beneath, or adjacent to the MSWLF unit, because of natural or man-induced events, results in the downslope transport of soil and rock material by means of gravitational influence. Areas of mass movement may include:

(i) landslides;

(ii) avalanches;

(iii) debris slides and flows;

(iv) soil fluction;

(v) block sliding; and

(vi) rock fall.

(E) "Karst terranes" means areas where karst topography, with its characteristic surface and subterranean features, is developed as the result of dissolution of limestone, dolomite, or other soluble rock. Characteristic physiographic features present in karst terranes may include:

(i) sinkholes;

(ii) sinking streams;

- (iii) caves;
- (iv) large springs; and
- (v) blind valleys.

(g) Closure of existing MSWLF units.

(1) Existing units that cannot make the demonstration pertaining to airports, floodplains, or unstable areas, shall close by October 9, 1996, in accordance with K.A.R. 28-29-121 and conduct post-closure activities in accordance with K.A.R. 28-29-121.

(2) The deadline for closure required by subsection (g)(1) may be extended up to two years if the owner or operator demonstrates to the department that there is no:

(A) available alternative disposal capacity; and

(B) immediate threat to human health and the environment.

(h) Kansas historic preservation act. Each new MSWLF unit shall be located so as not to pose a threat of harm or destruction to the essential features of an irreplaceable historic or archaeological site that is listed pursuant to the Kansas historic preservation act, K.S.A. 75-2716 and 75-2724.

(i) Endangered species conservation act. Each new MSWLF unit shall be located so as not to:

(1) jeopardize the continued existence of any designated endangered species;

(2) result in the destruction or adverse modification of the critical habitat listed for such species; or

(3) cause or contribute to the taking of any endangered or threatened species of plant, fish or wildlife listed pursuant to the endangered species act 16 U.S.C. 1531 *et seq.*, or Kansas non-game and endangered species conservation act, K.S.A. 32-957 *et seq.* and K.S.A. 32-1009, *et seq.*

(j) Buffer zones.

(1) No part of a newly permitted MSWLF unit shall be located closer than 152 meters (500 feet) from an occupied dwelling, school, or hospital that was occupied on the date when the owner or operator first applied for a permit to develop the unit or the facility containing the unit, unless the owner of such dwelling, school, or hospital consents in writing.

(2) All newly permitted MSWLF units shall maintain a minimum 46 meters (150 feet) buffer from the edge of the planned MSWLF unit to the owner's or operator's property line.

(3) The owner or operator may petition the director for a reduction in the buffer zone distances, provided the county commission of the county in which the landfill is located approves the request.

(k) Navigable streams.

(1) A new MSWLF unit shall not be located within one-half mile of a navigable stream used for interstate commerce.

(2) For purposes of this subsection, "navigable stream" means any water defined as navigable water of the United States under 33 CFR Part 329 as in effect on July 1, 1993.

(3) The provisions of this subsection shall not apply to:

(A) lateral expansion onto land contiguous to a permitted MSWLF in operation on July 1, 1991; or

(B) renewal of an existing permit for a permitted MSWLF on July 1, 1991.

(l) Public drinking water supplies.

(1) No new MSWLF shall be located within one mile of a surface water intake source for a public water supply system.

(2) For purposes of this subsection:

(A) "Surface water" means any water defined under K.A.R. 28-15-11.

(B) "Public water supply system" means any system defined under K.A.R. 28-15-11. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-103. Small landfills. (a) Any owner or operator of a new or existing municipal landfill may request an exemption from the design requirements in K.A.R. 28-29-104, as amended, if these conditions are met:

(1) the MSWLF receives and disposes of less than 20 tons of municipal solid waste daily, based on an annual average;

(2) there is no evidence of groundwater contamination from the MSWLF;

(3) the MSWLF is in an area that annually receives less than or equal to 25 inches of precipitation; and

(4) the community or communities utilizing the MSWLF have no practicable waste management alternative.

(b) Each owner or operator requesting the small landfill exemption shall demonstrate compliance with the conditions in subsection (a) by submitting the following documentation to the department for review and approval:

(1) actual records of past operations or estimates of the amount of solid waste disposed on a daily basis to demonstrate that the MSWLF meets the condition in paragraph (a)(1);

(2) site-specific data demonstrating that the MSWLF meets the condition in paragraph (a)(2);

(3) climatic data obtained for a minimum 30-year averaging period demonstrating that the MSWLF meets the condition in paragraph (a)(3); and

(4) one of the following statements to demonstrate that the MSWLF meets the condition in paragraph (a)(4):

(A) a statement containing data showing to the department that the closest MSWLF is more than 75 miles away; or

(B) written certification, from the board of county commissioners in the county where the landfill is located, that a landfill located less than 75 miles away is not a practicable alternative.

(c) The owner or operator of each small landfill meeting the exemption criteria shall comply with the location restrictions, the operating standards, the closure and post-closure standards, and the financial assurance standards for municipal solid waste landfills.

(1) Each "existing small landfill" for the purposes of K.A.R. 28-29-103, as amended, means any area permitted for municipal solid waste disposal on or before October 9, 1993 and any area permitted for municipal solid waste disposal through a permit amendment prior to October 9, 1997 and contiguous to the area permitted before October 9, 1993.

(2) Each "new small landfill" means any area not permitted for municipal solid waste disposal prior to October 9, 1993 or not incorporated into an existing permit by amendment prior to October 9, 1997.

(d) Each existing small landfill meeting the exemption criteria in subsection (a) and receiving waste on or after October 9, 1997 shall comply with subsection (f), (g) or (h) of this regulation in order to demonstrate that naturally occurring geological conditions provide sufficient protection against groundwater contamination.

(e) Each new small landfill meeting the exemption criteria in subsection (a) shall comply with subsection (f) of this regulation and shall be constructed with the following:

(1) a liner consisting of the following:

(A) a minimum of two feet of compacted clay with a hydraulic conductivity of no more than 1×10^{-6} cm/sec; and

(B) a leachate collection system; or

(2) *in situ* material or an alternate, approved constructed liner meeting the demonstration standards for groundwater modeling prescribed in subsection (g) or the liner performance standard

prescribed in subsection (h) of this regulation. Alternate constructed liners shall be considered for approval by the department when these conditions are met:

(A) the technology or material has been successfully utilized in at least one application similar to the proposed application;

(B) methods for ensuring quality control during the manufacture and construction of the liner can be implemented; and

(C) the owner or operator can provide documentation in the operating record that the provisions set forth in this subsection have been satisfied.

(f) Groundwater monitoring, sampling, and analysis.

(1) The owner or operator of each landfill meeting the exemption criteria shall install a groundwater monitoring system developed by a qualified groundwater scientist as defined in K.A.R. 28-29-111 and approved by the department. The groundwater monitoring system shall fulfill these requirements:

(A) have monitoring wells located on the property permitted for solid waste disposal, and yield groundwater samples from the uppermost aquifer representing the quality of groundwater passing the point of compliance as defined by K.A.R. 28-29-101(aa), as amended;

(B) consist of a sufficient number of wells to accurately determine the groundwater flow gradient, including a minimum of two down gradient wells;

(C) have monitoring wells located at a distance no greater than 150 meters or 492 feet from the planned edge of the unit; and

(D) have monitoring wells located at least 50 feet from the property boundary for all new small landfills. The "upper most aquifer," for the purposes of K.A.R. 28-29-103, as amended, means the first saturated zone able to fully recharge within 24 hours after one well volume is removed.

(2) The owner or operator of each small landfill meeting the exemption criteria shall maintain and operate the monitoring system in accordance with K.A.R. 28-29-111, paragraphs (f)(2) and (f)(3), as amended.

(3) The owner or operator of each small landfill meeting the exemption criteria shall perform the following:

(A) sample each down gradient monitoring well semiannually during the active site life and post-closure period to ensure that contaminant

levels are within the parameters listed in Table 1 of this regulation;

(B) measure the water depth in all monitoring wells during the semiannual sampling to verify the groundwater flow gradient; and

(C) submit the results of analytical testing and verification of the groundwater flow gradient to the department within 45 days of receipt of the test results.

TABLE 1
Monitoring Constituents for
Exempt Small Landfills

Constituent	Maximum Contaminant Level (MCL) (in milligrams per liter mg/l)
VOLATILE ORGANIC COMPOUNDS	
Benzene	0.005
1,2-Dichloroethane	0.005
1,1-Dichloroethene	0.007
1,2-Dichloropropane	0.005
Ethylbenzene	0.7
Styrene	0.1
Tetrachloroethene	0.005
Toluene	1.0
1,1,1-Trichloroethane	0.2
Trichloroethene	0.005
Vinyl Chloride	0.002
Total Xylenes	10.0
METALS (dissolved)	
Cadmium	0.005
Chromium (total)	0.05

(4) If the owner or operator of any existing small landfill demonstrates that naturally occurring geological conditions provide sufficient protection against groundwater contamination by compliance with subsection (g) or subsection (h) of this regulation, the owner or operator may reduce the sampling frequency established in paragraph (f) (3) from semiannual samples to annual samples.

(5) The groundwater monitoring program shall include consistent sampling and analysis procedures in accordance with K.A.R. 28-29-112, subsections (a), (b)(1) through (b)(4), (c), and (d), as amended.

(6) If any monitoring well exceeds the maximum contaminant level of any constituent listed in Table 1 in subsection (f) of this regulation, the owner or operator shall sample the well again, within 30 calendar days of the finding. If the second sample confirms that contamination levels exceed the maximum contaminant level of any constituent

listed in Table 1, the exempt status of the landfill shall be revoked, and the owner or operator shall comply with K.A.R. 28-29-104 and K.A.R. 28-29-110 through 28-29-114, as amended.

(7) The groundwater sampling and analysis requirements of subsection (f) of this regulation may be suspended by the department at existing small landfills if the owner or operator demonstrates the following:

(A) naturally occurring geological conditions provide sufficient protection against groundwater contamination as evidenced by compliance with subsection (g) or (h) of this regulation;

(B) the uppermost aquifer does not exist within a depth of 150 feet below the lowest depth of the municipal solid waste; and

(C) no potential for migration of hazardous constituents exists from that MSWLF unit to the uppermost aquifer during the active life of the unit and the post-closure care period. This demonstration shall be certified by a qualified groundwater scientist and approved by the department.

(8) The groundwater monitoring, sampling, and analysis required in subsection (f) of this regulation may be reduced or suspended by the department based on site-specific data.

(g) Groundwater modeling.

(1) Each owner or operator of a small landfill meeting the exemption criteria shall demonstrate that a constructed liner at the site or naturally occurring strata prohibit contaminants from exceeding the concentration values listed in Table 1 of K.A.R. 28-29-104, subsection (e), as amended, in the uppermost aquifer at the point of compliance based on fate and transport modeling of predicted landfill leachate. The point of compliance shall be located as follows:

(A) within 150 meters or 492 feet of the edge of the planned unit boundary; and

(B) on the owner's or operator's property.

(2) When approving modeling demonstrations, the following factors may be considered by the department:

(A) the hydrogeologic characteristics of the facility and surrounding land;

(B) the climatic factors of the area; and

(C) the volume and physical and chemical characteristics of the leachate. The expected performance of the design shall be evaluated at maximum annual leachate flow conditions.

(3) Each model demonstration developed pursuant to subsection (g)(1) of this regulation shall be certified by a qualified groundwater scientist.

(4) Each owner or operator of a small landfill performing the groundwater modeling demonstration shall comply with the groundwater monitoring, sampling, and analysis requirements prescribed in subsection (f).

(h) Liner performance standard.

(1) Each owner or operator shall demonstrate that *in situ* material meets the liner performance standard by submitting the following information for each small landfill unit:

(A) certification from a professional engineer licensed in Kansas that the *in situ* material immediately below the bottom of the municipal solid waste layer but prior to encountering groundwater meets these conditions:

(i) has a permeability equivalent to two feet of 1×10^{-6} cm/sec material; and

(ii) within the equivalently permeable layer, has no soil layer or stratum with a permeability greater than 1×10^{-4} cm/sec and with sufficient continuity and thickness to allow groundwater to flow laterally off the owner's property; and

(iii) shows consistency in all boring data.

(B) data from a minimum of one centrally located boring that provides a soil profile to a depth of the following:

(i) the water table;

(ii) 46 meters or 150 feet; or

(iii) a point where a minimum of 10 feet of 1×10^{-9} cm/sec material is encountered;

(C) data from a minimum of four additional borings of sufficient depths to provide data supporting the certification in paragraph (h)(1)(A) of this regulation;

(D) laboratory soil or field permeability data sufficient to provide data supporting the certification in paragraph (h)(1)(A) of this regulation; and

(E) evidence that the highest water table of any underlying groundwater is a minimum of 1.5 meters or five feet below the bottom of the material used to make the demonstration that the *in situ* material meets the liner performance standard.

(2) When approving a liner demonstration for compliance with this subsection, the following minimum factors shall be considered by the department:

(A) the hydrogeologic characteristics of the facility and surrounding land;

(B) the climatic characteristics of the area; and

(C) the volume and physical and chemical characteristics of the leachate.

(3) Each owner or operator demonstrating the liner performance standard shall comply with the

groundwater monitoring, sampling, and analysis requirements prescribed in subsection (f).

(i) Each owner or operator shall document in the operating record that the small landfill unit meets the requirements in subsections (f), (g) or (h) of this regulation. (Authorized by K.S.A. 1995 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994; amended Dec. 13, 1996.)

28-29-104. Design standards. (a) General design standards.

(1) Existing units. Any portion of a trench or area of an existing unit not filled to its permitted design capacity by October 9, 1996, shall be considered a vertical expansion subject to the standards in K.A.R. 28-29-104(a)(2), or a new unit subject to the standards in K.A.R. 28-29-104(a)(3).

(2) Vertical expansions.

(A) Any proposed vertical expansion shall be considered a significant modification to the facility and subject to permit modification procedural requirements.

(B) Any proposed vertical expansion shall meet the following requirements, in addition to any other applicable MSWLF regulations.

(i) A hydrogeologic site assessment shall be conducted in compliance with K.A.R. 28-29-104(b).

(ii) A groundwater monitoring well system shall be in place, pursuant to K.A.R. 28-29-111.

(iii) The owner or operator shall operate the landfill in a manner that minimizes leachate generation.

(iv) If groundwater contamination is detected, the owner or operator of the proposed vertical expansion shall initiate an assessment of corrective measures, pursuant to K.A.R. 28-29-114(a)(1).

(v) The final cover design shall meet the requirements of K.A.R. 28-29-121(e)(1).

(vi) Local planning and zoning approval shall be obtained from the appropriate jurisdictional body.

(vii) The owner or operator shall secure certification from the board of county commissioners that the vertical expansion is in conformance with the official county or regional solid waste management plan.

(C) A vertical expansion over a closed unit which has received final cover shall be classified as a new unit, and therefore subject to the design standards for new units.

(D) In evaluating a proposed vertical expansion, the department shall consider the following factors:

(i) The impact of the proposed vertical expansion

sion on human health and the environment rather than other alternatives, including a new unit;

(ii) the capacity needs of the community or communities and the region using the landfill;

(iii) the proposed operating life of the vertical expansion; and

(iv) the inclusion or exclusion of the landfill in a regional solid waste management plan.

(E) The expiration date for a permit modified to allow for a vertical expansion shall not exceed five years from the date the modified permit is issued. At the end of the initial five year period, and any subsequent five year period, the owner may submit a request for an additional five-year permit. The request shall include an assessment of the environmental impact of the vertical expansion. Based on an evaluation of the environmental impact, the permit shall either be denied, or renewed for a period not to exceed five additional years by the director.

(3) New units.

(A) All new units shall be equipped with a leachate drainage and collection system and liner designed as an integrated system in compliance with the requirements of this section.

(B) The design period for new municipal landfills shall be the estimated operating life plus 30 years of post-closure care.

(b) Hydrogeologic site investigations.

(1) The owner or operator of a proposed MSWLF unit shall conduct a hydrogeologic investigation to develop information for the following purposes:

(A) providing information to determine an appropriate design for the unit; and

(B) providing information to establish a groundwater monitoring system.

(2) Prior to submitting an application to the department for a permit to develop and operate a MSWLF or to design a groundwater monitoring system, the hydrogeologic site investigation shall be conducted in a minimum of two phases, unless the department approves conducting the two phases concurrently.

(A) The purpose of the phased study shall be to allow for the consideration by the department of information gathered during phase I prior to proceeding with phase II.

(B) If the owner or operator of an existing MSWLF has already compiled sufficient data to fulfill the requirements of the hydrogeologic investigation, this information may be submitted to the department in lieu of conducting a new assessment.

(3) For the purposes of the hydrogeologic investigation set forth in paragraph (b)(1), the area to be investigated shall consist of the entire area occupied by the facility and any adjacent areas, if necessary to fully characterize the site.

(4) All borings shall be sampled continuously except where continuous sampling is impossible or where interval sampling or sampling at recognizable points of geologic variation will provide satisfactory information. Sampling intervals shall not exceed 1.52 vertical meters (5 feet).

(5) The phase I hydrogeologic investigation shall consist of the following items.

(A) A minimum of one continuously sampled boring shall be drilled on the site, as close as possible to the geographic center, to determine if available regional hydrogeologic setting information is accurate and to characterize the site-specific hydrogeology to the extent specified by this phase of the investigation. The boring shall extend to the bottom of the uppermost aquifer. This boring shall be constructed so that it will not provide a conduit for contaminant migration to a lower aquifer or formation.

(B) The following information shall be gathered by the owner or operator:

(i) climatic aspects of the study area;

(ii) the regional and study area geologic and hydrogeologic setting, including a description of the geomorphology and stratigraphy of the area and aquifer characteristics, including water table depths; and

(iii) any other information needed for the purpose of designing a phase II hydrogeologic investigation.

(C) The information from the phase I investigation shall be compiled in a report and submitted with evaluations and recommendations to the department for review and approval.

(D) The results and conclusions of the phase I report shall be certified by a qualified groundwater scientist.

(6) The phase II hydrogeologic investigation shall consist of the following items.

(A) One boring shall be located as close as possible to the topographical high point, and another shall be located as close as possible to the topographical low point of the study area.

(B) Additional borings shall be made in order to characterize the subsurface geology of the entire study area.

(C) Piezometers and groundwater monitoring wells shall be established to determine the direction and flow characteristics of the groundwater in

all strata and extending down to the bottom of the uppermost aquifer. Groundwater samples taken from the monitoring wells shall be used to develop preliminary information needed for establishing background concentrations.

(D) The owner or operator shall gather the following site-specific information, as necessary, to augment the data collected during the phase I investigation:

(i) chemical and physical properties including, but not limited to, lithology, mineralogy, and hydraulic characteristics of underlying strata including those below the uppermost aquifer;

(ii) soil characteristics, including soil types, distribution, geochemical and geophysical characteristics;

(iii) hydraulic conductivities of the uppermost aquifer and all strata above it;

(iv) vertical extent of the uppermost aquifer;

(v) direction and rate of groundwater flow; and

(vi) concentrations of chemical constituents present in the groundwater below the unit, down to the bottom of the uppermost aquifer, using a broad range of chemical analysis and detection procedures such as gas chromatographic and mass spectrometric scanning.

(E) The owner or operator shall evaluate the data gathered during the phase I and phase II investigations and prepare a report for submittal to the department that contains the following information:

(i) structural characteristics and distribution of underlying strata, including bedrock;

(ii) characterization of potential pathways for contaminant migration;

(iii) correlation of stratigraphic units between borings;

(iv) continuity of petrographic features including, but not limited to, sorting, grain size distribution, cementation and hydraulic conductivity;

(v) identification of the confining layer, if present;

(vi) characterization of the seasonal and temporal, naturally and artificially induced, variations in groundwater quality and groundwater flow;

(vii) identification of unusual or unpredicted geologic features, including fault zones, fracture traces, facies changes, solution channels, buried stream deposits, cross cutting structures and other geologic features that may affect the ability of the owner or operator to monitor the groundwater or predict the impact of the disposal facility on groundwater; and

(viii) recommendations for landfill siting and

conceptual design for the department to review and approve.

(F) The results and conclusions of the phase II report shall be certified by a qualified groundwater scientist.

(c) Foundation and mass stability analysis.

(1) The material beneath the unit shall have sufficient strength to support the weight of the unit during all phases of construction and operation. The loads and loading rate shall not cause or contribute to the failure of the liner or leachate collection system.

(2) The total settlement or swell of the foundation shall not cause or contribute to the failure of the liner or leachate collection system.

(3) The solid waste disposal unit shall be designed to achieve a safety factor during the design period against bearing capacity failure of at least 2.0 under static conditions and 1.5 under seismic loadings.

(4) The waste disposal unit shall be designed to achieve a factor of safety against slope failure during the design period of at least 1.5 for static conditions and 1.3 under seismic conditions.

(5) The liner and leachate collection system shall be stable during all phases of construction and operation. The side slopes shall achieve a minimum static safety factor of 1.5 and a minimum seismic safety factor of 1.3 at all times.

(6) In calculating factors of safety, both long term, in tens or hundreds of years, and short term, over the design period of the facility, conditions expected at the facility shall be considered.

(7) The potential for earthquake or blast-induced liquefaction, and its effect on the stability and integrity of the unit shall be considered and taken into account in the design. The potential for landslides or earthquake-induced liquefaction outside the unit shall be considered if such events could affect the unit.

(d) Foundation construction.

(1) If the *in situ* material provides insufficient strength to meet the requirements of subsection (c), then the insufficient material shall be removed and replaced with clean materials sufficient to meet the requirements of subsection (c).

(2) All trees, stumps, roots, boulders and debris shall be removed.

(3) All material shall be compacted to achieve the strength and density properties necessary to demonstrate compliance with this part.

(4) Placement of frozen soil or soil onto frozen ground shall be prohibited.

(5) The foundation shall be constructed and graded to provide a smooth, workable surface on which to construct the liner.

(e) Liner standards.

(1) New MSWLF units shall be constructed:

(A) with a composite liner and a leachate collection system that is designed and constructed in accordance with subsections (g), (h), and (i). For purposes of this regulation, "composite liner" means a system consisting of two components. The upper component shall consist of a minimum 30-mil geomembrane, the lower component shall consist of at least a two-foot layer of compacted soil with a hydraulic conductivity of no more than 1×10^{-7} cm/sec. Geomembrane components consisting of high density polyethylene (HDPE) shall be at least 60-mil thick. The geomembrane component shall be installed in direct and uniform contact with the compacted soil component in order to minimize the migration of leachate through the geomembrane should a break occur; or

(B) in accordance with an alternative design approved by the department. The design shall demonstrate that the concentration values listed in table 1 below will not be exceeded in the uppermost aquifer at the point of compliance. The point of compliance shall be within 150 meters (492 feet) of the edge of the planned unit boundary. In addition, the point of compliance shall be on the owner's or operator's property and shall be at least 15.24 meters (50 feet) from the property boundary.

(2) When approving a design that complies with paragraph (1)(B), the department shall consider at least the following factors:

(A) the hydrogeologic characteristics of the facility and surrounding land;

(B) the climatic factors of the area; and

(C) the volume and physical and chemical characteristics of the leachate. The design's performance shall be evaluated at maximum annual leachate flow conditions.

(3) Approval of alternate designs shall be considered by the department only when:

(A) the technology or material has been successfully utilized in at least one application similar to the proposed application; and

(B) methods for ensuring quality control during the manufacture and construction of the liner can be implemented.

(4) The owner or operator shall document in the operating record that the liner meets the liner standards in K.A.R. 28-29-104(e)(1)(A) or (B).

TABLE 1—MAXIMUM
CONTAMINANT LEVELS

Chemical	MCL (mg/l)
Arsenic	0.05
Barium	1.0
Benzene	0.005
Cadmium	0.005
Carbon tetrachloride	0.005
Chromium (hexavalent)	0.1

Tetrachloroethylene	0.005
Toluene	1
Toxaphene	0.005
1,1,1-Trichloromethane	0.2
Trichloroethylene	0.005
2,4,5-Trichlorophenoxy acetic acid	0.01
Vinyl Chloride	0.002
Xylenes	10

(f) Liner construction.

(1) The construction and compaction of the liner shall be carried out in accordance with the approved design to reduce void spaces and allow the liner to support the loadings imposed by the waste disposal operation without settling that causes or contributes to the failure of the leachate collection system.

(2) The liner shall be constructed from materials whose properties are not affected by contact with the constituents expected to be in leachate generated by the landfill.

(3) Geomembrane liners shall be constructed in compliance with the following requirements.

(A) The geomembrane shall be supported by a compacted base free from sharp objects. The

geomembrane shall be chemically compatible with the supporting soil materials.

(B) The geomembrane shall have sufficient strength and durability to function at the site for the design period under the maximum expected loadings imposed by the waste and equipment and stresses imposed by settlement, temperature, construction and operation.

(C) Seams shall be made in the field according to the manufacturer's specifications. All sections shall be arranged so that the use of field seams is minimized and seams are oriented in the direction subject to the least amount of stress where practical.

(D) The leachate collection system shall be designed to avoid loss of leachate through openings through the geomembrane.

(g) Leachate drainage system.

(1) The leachate drainage system shall be designed and constructed to operate for the entire design period.

(2) The system shall be designed in conjunction with the leachate collection system required by subsection (h):

(A) to maintain a maximum head of leachate 0.30 meter (one foot) above the liner; and

(B) to operate during the month when the highest average monthly precipitation occurs, and if the liner bottom is located within the saturated zone, under the condition that the groundwater table is at its seasonal high level.

(3) A drainage layer shall overlay the entire liner system. This drainage layer shall be no less than 0.30 meter (one foot) thick.

(4) The drainage layer shall be designed to maintain flow throughout the drainage layer under the conditions described in paragraph (g)(2) above.

(5) Materials used in the leachate drainage system shall be chemically resistant to the wastes and the leachate expected to be produced.

(h) Leachate collection system.

(1) The leachate collection system shall be designed and constructed to function for the entire design period. The leachate collection system shall consist of conduits including pipes, trenches, or a combination of pipes and trenches.

(2) Materials used in the leachate collection system shall be chemically resistant to the leachate expected to be produced.

(3) The leachate collection system shall be designed so that leachate drains freely from the collection conduits. If sumps are used, leachate shall be removed via gravity flow, whenever pos-

sible, before the level of leachate in the sumps rises above the invert of the collection conduits under the conditions established in paragraph (g)(2) above. If gravity flow is not possible, pumping may be utilized to remove leachate, but the use of pumps shall be minimized.

(4) Collection conduits shall be designed to capture leachate for open channel flow to convey leachate under the conditions established in paragraph (g)(2) above.

(5) Collection pipe conduits.

(A) Collection pipe shall be of a cross-sectional area that allows cleaning and at least 0.10 meter (four inches) nominal inside diameter.

(B) The collection pipe material and bedding materials as placed shall possess structural strength to support the maximum loads imposed by the overlying materials and equipment used at the facility, as well as the effects of differential settling.

(C) Collection pipes shall be constructed within a coarse gravel envelope using a graded filter or geotextile as necessary to minimize clogging.

(D) The collection pipe system shall be equipped with a sufficient number of manholes and cleanout risers to allow cleaning and maintenance of all pipes throughout the design period.

(6) Trench conduits.

(A) Trench conduits shall be designed to minimize particulate and biological clogging.

(B) Trench conduits shall be constructed to minimize movement of drainage media when a load is placed on the media.

(i) Leachate treatment and disposal system.

(1) The owner or operator shall be responsible for the operation of a leachate management system designed to handle all leachate as it is removed from the collection system. The leachate management system shall consist of any combination of storage, treatment, pretreatment, and disposal options.

(2) The leachate management system shall allow for the management and disposal of leachate during routine maintenance and repairs.

(3) Standards for leachate storage systems.

(A) The leachate storage facility shall be capable of storing a minimum of five days' worth of accumulated leachate at the maximum generation rate used in designing the leachate drainage system in accordance with subsection (g) of this regulation.

(B) Each leachate storage facility shall be equipped with secondary containment systems equivalent to the protection provided by a clay liner

0.61 meter (two feet) thick, having a permeability no greater than 1×10^{-7} centimeters per second.

(C) Each leachate storage system shall be fabricated from material compatible with the leachate expected to be generated and resistant to temperature extremes.

(D) The leachate storage system shall be designed to minimize odors.

(E) The leachate drainage and collection system shall not be used for the purpose of storing leachate.

(4) Standards for discharge to an off-site treatment works.

(A) Each owner or operator that discharges leachate to off-site facilities shall ensure that the receiving facility has all applicable permits or approvals in accordance with state and local water regulations.

(B) The owner or operator of a MSWLF may be required to obtain a permit or prior approval for conveyance to an off-site treatment facility.

(C) Pumps, meters, valves and monitoring stations that control and monitor the flow of leachate from the unit and which are under the control of the owner or operator shall be considered part of the facility and shall be accessible to the owner or operator at all times.

(5) Standards for leachate recycling systems.

(A) A leachate recycling system shall be utilized only at permitted waste disposal units that meet the following requirements.

(i) The unit shall have a liner designed, constructed and maintained to meet the minimum standards of paragraph (e)(1)(A) or (B) of this regulation.

(ii) The unit shall have a leachate collection system in place and operating in accordance with subsection (h) of this regulation.

(iii) The topography shall be such that any accidental leachate run-off can be controlled by ditches, berms or other equivalent control means.

(B) Leachate shall not be recycled during precipitation events or in volumes large enough to cause run-off or surface seeps.

(C) The amount of leachate added to the unit shall not exceed the ability of the waste and cover soils to transmit leachate flow downward. All other leachate shall be considered excess leachate, and a leachate management system capable of disposing of all excess leachate shall be available.

(D) The leachate storage and distribution system shall be designed to avoid exposure of leachate to air unless aeration or functionally equivalent devices are utilized.

(E) The distribution system shall be designed to allow leachate to be evenly distributed beneath the surface over the recycle area.

(6) Leachate monitoring.

(A) Representative samples of leachate shall be collected annually from each unit and tested in accordance with paragraph (i)(6)(B) of this regulation at a frequency of once per year while the leachate management system is in operation.

(B) Discharges of leachate from MSWLFs shall be tested for the following constituents prior to treatment or pretreatment:

(i) five-day biochemical oxygen demand (BOD₅);

(ii) total suspended solids;

(iii) total iron;

(iv) pH;

(v) each of the appendix I parameters listed in K.A.R. 28-29-113; and

(vi) any other constituents as specified by the director.

(C) If it can be shown that the removed constituents are not reasonably expected to be contained in or derived from the waste contained in the unit, the list of constituents in (i)(6)(B) of this regulation may be modified by the director.

(D) An appropriate alternative frequency for repeated sampling and analysis for the constituents listed in paragraph (i)(6)(B) of this regulation, or the alternative list approved in accordance with paragraph (i)(6)(C) of this regulation, may be specified by the director during the active life, including closure, and the post-closure care period. The alternative frequency shall be based on consideration of the following factors:

(i) leachate quantity; and

(ii) long-term trends in leachate quality.

(7) The owner or operator shall collect and dispose of leachate for a minimum of five years after closure and thereafter until it is determined by the director that treatment is no longer necessary. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-108. Operating standards. (a) Excluding the receipt of hazardous waste. Owners or operators of all MSWLF units shall implement a program at the facility for detecting and preventing the disposal of regulated hazardous wastes as defined pursuant to K.A.R. 28-31-3 and K.A.R. 28-31-4, and polychlorinated biphenyls (PCB) wastes as defined in 40 CFR part 761, as in effect

on July 1, 1996. This program shall include the following, at a minimum:

(1) random inspections of incoming loads, unless the owner or operator takes other steps to ensure that incoming loads do not contain regulated hazardous wastes or PCB wastes;

(2) records of any inspections;

(3) training of facility personnel to recognize regulated hazardous waste and PCB wastes; and

(4) notification of the department if a regulated hazardous waste or PCB waste is discovered at the facility.

(b) Daily cover.

(1) A uniform layer of at least 0.15 meter (six inches) of soil material shall be placed on all exposed waste at the end of each day of operation.

(2) Alternative materials or procedures, including the removal of daily cover before additional waste placement, may be used, if the alternative materials or procedures achieve performance equivalent to the requirements of paragraph (b)

(1) in the following areas:

(A) prevention of blowing debris;

(B) minimization of access to the waste by vectors;

(C) minimization of the threat of fires at the open face;

(D) minimization of odors; and

(E) shedding precipitation.

(3) Each owner or operator wishing to use alternative materials for daily cover shall obtain approval from the department before application.

(c) Intermediate cover.

(1) All waste that is not to be covered within 60 days of placement by another lift of waste or final cover in accordance with K.A.R. 28-29-121 shall have a cover consisting of 0.30 meter (one foot) of compacted soil material. In addition, any MSWLF unit that will not receive any waste for an entire growing season shall be seeded.

(2) All areas with intermediate cover shall be graded so as to facilitate drainage of runoff and minimize infiltration and standing water.

(3) The grade and thickness of intermediate cover shall be maintained until the placement of additional wastes or the final cover. All cracks, rills, gullies, and depressions shall be repaired to prevent access to the solid waste by vectors, to minimize infiltration and to prevent standing water.

(d) Disease vector control.

(1) Each owner or operator of a MSWLF unit shall prevent or control on-site populations of dis-

ease vectors using techniques appropriate for the protection of human health and the environment.

(2) For purposes of this subsection, "disease vectors" means any rodents, flies, mosquitoes, or other animals, including insects, capable of transmitting disease.

(e) MSWLF gas monitoring.

(1) Each owner or operator of a MSWLF unit that receives putrescible waste or industrial wastes that have the potential to generate explosive gases shall establish and conduct an explosive gases monitoring program to ensure that dangerous levels of explosive gases do not occur within facility structures or at the surface or subsurface facility boundary.

(2) The monitoring program shall ensure that these conditions are met:

(A) the concentration of methane gas generated by the facility does not exceed 25% of the lower explosive limit for methane in facility structures, excluding gas control or recovery system components;

(B) the concentration of methane gas does not exceed the lower explosive limit for methane at the facility property boundary; and

(C) potential gas migration pathways are identified.

(3) The minimum monitoring frequency for explosive gases shall be quarterly and shall be based on the following factors:

(A) soil conditions;

(B) the hydrogeologic conditions surrounding the facility;

(C) the hydraulic conditions surrounding the facility; and

(D) the location of facility structures and property boundaries.

(4) If methane gas levels exceeding the limits specified in paragraph (e)(2) are detected, the owner or operator shall perform all of the following:

(A) immediately assess the potential danger posed to human health and the environment and take all necessary steps to ensure protection of human health;

(B) within seven days of detecting a gas level exceeding the limit, notify the department and place in the operating record the methane gas levels detected and a description of the steps taken to protect human health;

(C) within 60 days of detecting a gas level exceeding the limit, develop and submit to the department a remediation plan, which provides for the installation of an active or passive gas management system; and

(D) upon approval of the department, implement the remediation plan.

(f) MSWLF gas management standards.

(1) Standards for gas venting systems.

(A) All materials used in gas venting systems shall be resistant to chemical reaction with the constituents of the gas.

(B) The gas venting system shall be capable of venting all gas down to the water table or bottom of the liner, whichever is higher.

(C) Gas venting systems shall be installed only outside the perimeter of the unit, unless it can be shown that gas venting inside the perimeter of the unit will not interfere with the liner, leachate collection system, cover, or monitoring equipment.

(2) Standards for gas collection systems.

(A) Gas collection systems may be installed either within the perimeter of the unit or outside the unit.

(B) The owner or operator shall design and operate gas collection systems so that the standards of paragraph (e)(2) are met.

(C) Gas collection systems shall transport gas to a central point or points for processing for beneficial uses or disposal, in accordance with the requirements of subsection (g) of this regulation.

(D) Gas collection systems shall be designed to function for the entire design period. The design may include changes in the system to accommodate changing gas flow rates or compositions.

(E) All materials and equipment used in the construction of gas collection systems shall be rated by the manufacturer as safe for use in hazardous or explosive environments and shall be resistant to corrosion by constituents of the MSWLF gas.

(F) Gas collection systems shall be designed and constructed to withstand all MSWLF operating conditions, including settlement.

(G) Gas collection systems and all associated equipment including compressors, flares, monitoring installations, and manholes shall be considered part of the facility.

(H) Provisions shall be made for collecting and draining gas condensate to the leachate management system or another management system approved by the department.

(I) A gas collection system shall not compromise the integrity of the liner or of the leachate collection or cover systems.

(J) The portion of each gas collection system used to convey the gas collected from one or more units for processing and disposal shall be tested to

be airtight to prevent the leaking of gas from, or entry of air into, the collection system.

(K) The gas collection system shall be operated until the waste has stabilized enough to no longer produce methane in quantities that exceed the minimum allowable concentrations set out in paragraph (e)(2) of this regulation.

(L) Each gas collection system shall be equipped with a mechanical device, capable of withdrawing gas, or shall be designed so that a mechanical device can be easily installed at a later time, if necessary, to meet the allowable concentrations set out in paragraph (e)(2).

(g) MSWLF gas processing and disposal system.

(1) Each MSWLF with a permanent gas collection system shall evaluate the feasibility of processing of MSWLF gas for use.

(2) The following MSWLF gas processing devices and disposal systems shall remain under the control of the owner or operator and shall be considered part of the facility:

(A) compressors;

(B) blowers;

(C) raw gas monitoring systems;

(D) devices used to control the flow of gas from the unit;

(E) flares;

(F) gas treatment devices; and

(G) air pollution control devices and monitoring equipment.

(3) All gas discharges and gas processing and disposal systems shall conform with all local, state, and federal air quality requirements.

(h) Air criteria.

(1) Open burning shall be prohibited, except in accordance with K.A.R. 28-19-47.

(2) Methane, non-methane organic compounds, and other regulated emissions shall conform with all local, state, and federal air quality requirements.

(i) Boundary control.

(1) Access to the open face area of the unit and all other areas within the boundaries of the facility shall be restricted at all times to prevent unauthorized entry.

(2) A permanent sign shall be posted at the entrance to the facility stating that disposal of hazardous waste is prohibited and that, unless the waste is a predetermined class of special waste as set forth in K.A.R. 28-29-109(d) and approved for disposal by the MSWLF, special wastes shall be accompanied by a disposal authorization issued by the department. The sign shall also include the following information:

- (A) solid waste disposal area permit number;
- (B) hours of operation;
- (C) penalty for unauthorized trespassing and dumping;
- (D) name and telephone number of the appropriate emergency response agencies who shall be available to deal with emergencies and other problems, if different from the owner or operator; and

(E) name, address, and telephone number of the company operating the facility.

(j) Surface water drainage.

(1) Each owner or operator of a MSWLF unit shall design, construct, and maintain the following:

(A) a run-on control system to prevent flow onto the active portion of the MSWLF during the peak discharge from a 24-hour, 25-year storm; and

(B) a runoff control system from the active portion of the MSWLF to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(2) Each surface water control structure shall be operated until the final cover is placed and erosional stability is provided by the vegetative or other cover.

(3) Diversion of runoff from undisturbed areas.

(A) Runoff from undisturbed areas shall be diverted around disturbed areas, unless the owner or operator shows that it is impractical based on site-specific conditions.

(B) Diversion facilities shall be designed to prevent runoff from the 25-year, 24-hour precipitation event from entering disturbed areas.

(C) Runoff from undisturbed areas that becomes commingled with runoff from disturbed areas shall be handled as runoff from disturbed areas and managed in accordance with paragraph (j)(1)(B) above.

(4) The facility shall not cause the discharge of a nonpoint source of pollution to waters of the United States, including wetlands, that violates any requirement of an area-wide or statewide water quality management plan that has been approved under 33 U.S.C. sections 1288 or 1329.

(5) The facility shall not cause a discharge of pollutants into waters of the United States, including wetlands, that violates any requirements of 33 U.S.C. 1251, *et seq.*, 1994 edition.

(k) Liquids restrictions.

(1) Bulk or noncontainerized liquid waste shall not be placed in MSWLF units unless either of these conditions is met:

(A) the waste is residential waste other than septic waste; or

(B) the waste is leachate or gas condensate derived from the MSWLF unit, and the MSWLF unit, whether it is a new or existing unit, is designed with a liner and leachate collection system as described in K.A.R. 28-29-103(e), or K.A.R. 28-29-104(e)(1)(A) or (B).

(2) Containers holding liquid waste shall not be placed in a MSWLF unit unless any of these conditions is met:

(A) the container is a small container similar in size to that normally found in residential waste;

(B) the container is designed to hold liquids for use other than storage; or

(C) the waste is residential waste.

(3) For purposes of this subsection, these provisions shall apply:

(A) "liquid waste" means any waste material that is determined to contain "free liquids" as defined by method 9095A, revision 1, paint filter liquids test, as described in "test methods for evaluating solid waste, physical/chemical methods," EPA Pub. No. SW-846, dated December, 1996; and

(B) "gas condensate" means the liquid generated as a result of gas collection and recovery process or processes at the MSWLF unit.

(l) Survey controls.

(1) The boundaries of all waste disposal units, property boundaries, disturbed areas, and the permit area for facilities subject to this part shall be surveyed and marked by a professional land surveyor. All stakes shall be clearly marked, inspected annually, and replaced if missing or damaged.

(2) Control monuments shall be established to check vertical elevations. The control monuments shall be established and maintained by a professional land surveyor.

(m) Compaction.

(1) All wastes shall be deposited in the smallest practical area and shall occur at the lowest part of the active face. Wastes may be deposited at locations other than the lowest part of the active face, if site conditions do not allow deposition of wastes at the lowest part of the active face, or if locations other than the lowest part of the active face are in the approved facility operational plan.

(2) All wastes shall be compacted to the highest achievable density necessary to minimize void space and settlement, unless precluded by extreme weather conditions.

(n) Phasing of operations.

(1) Waste shall be placed in a manner and at such a rate that mass stability is provided during all phases of operation. Mass stability shall mean that the mass of the waste deposited will not undergo settling or slope failure that interrupts operations at the facility or causes damage to any of the various MSWLF operations or structures, including the liner, leachate or drainage collection system, gas collection system, or monitoring system.

(2) The phasing of operations at the facility shall be designed in such a way as to allow the sequential construction, filling, and closure of discrete units or parts of units.

(3) The owner or operator shall design and sequence the waste placement operation in each discrete unit or parts of units to allow the wastes to be built up to each unit's planned final grade as quickly as possible.

(o) Size and slope of working face.

(1) The working face of the unit shall be no larger than is necessary, based on the terrain and equipment used in waste placement, to conduct operations in a safe and efficient manner.

(2) The slopes of the working face area shall be no steeper than 2:1, horizontal:vertical, unless the waste is stable at steeper slopes.

(p) Salvaging.

(1) Salvaging operations shall not cause any of the following:

(A) interfere with the operation of the waste disposal facility;

(B) result in a violation of any standard in this regulation; or

(C) delay the construction or interfere in the operation of any of the following:

(i) the liner;

(ii) leachate collection system;

(iii) daily, intermediate, or final cover; or

(iv) any monitoring devices.

(2) All salvaging operations shall be confined to an area remote from the working face of the MSWLF and be performed in a safe and sanitary manner in compliance with the requirements of this subsection.

(3) Salvageable materials may be accumulated on-site by a MSWLF owner or operator, if they are managed in a manner that will not create a nuisance, harbor vectors, cause offensive odors, or create an unsightly appearance.

(4) Scavenging at MSWLFs shall be prohibited.

(q) Recordkeeping.

(1) The owner or operator of a MSWLF unit

shall record and retain on-site for a period of five years, in an operating record, the following information as it becomes available:

(A) location restriction demonstrations required under K.A.R. 28-29-102 of this part;

(B) inspection records, training procedures, and notification procedures required under K.A.R. 28-29-108(a);

(C) gas monitoring results from monitoring and any remediation plans required by K.A.R. 28-29-108(e);

(D) MSWLF unit design documentation for placement of leachate or gas condensate in a MSWLF unit as required under K.A.R. 28-29-108(k);

(E) demonstrations, certifications, findings, monitoring, testing, or analytical data required by K.A.R. 28-29-111 through K.A.R. 28-29-114;

(F) closure and post-closure care plans and any monitoring, testing, or analytical data as required by K.A.R. 28-29-121 and K.A.R. 28-29-122;

(G) cost estimates and financial assurance documentation required by K.S.A. 1996 Supp. 65-3407(h), as amended by L. 1997, Ch. 140, Sec. 4;

(H) demonstrations for the small landfill exemption as required by K.A.R. 28-29-103;

(I) demonstrations that the liner meets the liner standards as required in K.A.R. 28-29-104 (e)(1) (A) or (B); and

(J) a copy of the current facility permit, including all approved plans and specifications.

(2) All information contained in the operating record shall be furnished upon request to the department or made available at any reasonable times for inspection by the department.

(r) Other operating standards.

(1) In order to achieve and maintain compliance with the requirements of these regulations, adequate equipment shall be available for use at the facility during all hours of operation.

(2) All utilities, including heat, lights, power and communications equipment, and sanitary facilities, necessary for operation in compliance with the requirements of this regulation shall be available at the facility at all times.

(3) The owner or operator shall maintain and operate all systems and related appurtenances and structures in a manner that facilitates proper operations in compliance with this regulation.

(4) The owner or operator shall implement methods for controlling dust to minimize wind dispersal of particulate matter.

(5) The facility shall be designed, constructed,

and maintained to minimize the level of equipment noise audible outside the facility.

(6) The owner or operator shall make arrangements for fire protection services when a fire protection district or other public fire protection service is available. When such a service is not available, the owner or operator shall institute alternate fire protection measures.

(7) The owner or operator shall patrol the facility to check for litter accumulation and take all necessary steps to minimize blowing litter, including the use of screens. All litter shall be collected and placed in the fill or in a secure, covered container for later disposal.

(8) The owner or operator shall implement a plan for litter control for all vehicles on the permitted facility site.

(9) An operational safety program shall be provided for employees at each MSWLF facility.

(10) MSWLF access roads shall be of all-weather construction and shall be negotiable at all times by trucks and other vehicles.

(11) Access to MSWLFs shall be limited to hours when an attendant or operating personnel are at the site.

(12) The owner or operator of each MSWLF shall maintain a log of commercial or industrial solid wastes received, including sludges, barreled wastes, and special wastes.

(A) The log shall indicate the source and quantity of waste and the disposal location.

(B) The areas used for disposal of these wastes and other large quantities of bulk wastes shall be clearly shown on a site map and referenced to the boundaries of the tract or other permanent markings.

(13) Sludges, industrial solid wastes, or special wastes shall not be disposed in a MSWLF until the department has been notified and has issued a disposal authorization including specific arrangements for handling of the wastes.

(s) Operating flexibility.

(1) The operator of any unit that has been granted a small landfill exemption under K.A.R. 28-29-103 may request from the director approval for alternatives to the following operating requirements:

- (A) daily cover;
- (B) MSWLF gas monitoring; and
- (C) record keeping.

(2) Each alternate requirement approved by the director shall meet the following requirements:

(A) consider the unique characteristics of small communities;

(B) take into account climatic and hydrogeologic conditions; and,

(C) be protective of human health and the environment. (Authorized by K.S.A. 1996 Supp. 65-3406, as amended by L. 1997, Ch. 139, Sec. 1; implementing K.S.A. 65-3401, as amended by L. 1997, Ch. 140, Sec. 1; effective Oct. 24, 1994; amended July 10, 1998.)

28-29-109. Special waste. (a) Disposal of special waste. Any person may dispose of special waste, as defined in K.A.R. 28-29-3, if all of the following conditions are met.

(1) The person disposes of the special waste at a permitted municipal solid waste landfill (MSWLF).

(2) A special waste disposal authorization for the special waste has been issued by the department in accordance with subsections (b) and (c).

(3) All the conditions of subsections (d) through (g) are met.

(b) Request for a special waste disposal authorization. Each person requesting a special waste disposal authorization shall provide the following information to the department:

(1) A description of the waste, including the following information:

- (A) The type of waste;
- (B) the process that produced the waste;
- (C) the physical characteristics of the waste;
- (D) the quantity of waste to be disposed of; and
- (E) the location of the waste generation site, if different from the generator's address;

(2) the following information for the generator of the waste:

- (A) The contact person's name;
- (B) the contact person's address;
- (C) the contact person's telephone number;
- (D) the contact person's electronic mail address,

if there is one; and
(E) the name of the business, if the generator is a business;

(3) the following information for the person requesting the special waste disposal authorization:

- (A) The contact person's name;
- (B) the contact person's address;
- (C) the contact person's telephone number; and
- (D) the contact person's electronic mail address,

if there is one; and
(E) the name of the business, if the request is being made on behalf of a business;

(4) the name and address of each solid waste transfer station proposed for transfer of the waste;

(5) the name and address of the MSWLF proposed for disposal of the waste;

(6) a statement, signed by the generator of the waste or an agent of the generator, that the waste is not a listed hazardous waste and is not a waste that exhibits the characteristics of a hazardous waste specified in K.A.R. 28-31-261, based on knowledge of the process generating the waste, laboratory analyses, or both; and

(7) each laboratory analysis that has been performed to determine if the waste is a listed hazardous waste or is a waste that exhibits the characteristics of a hazardous waste. The person requesting a special waste disposal authorization shall ensure that the following requirements are met:

(A) Each analysis shall be performed and reported by a laboratory that has departmental certification, if this certification is available, for that analysis;

(B) each analytical laboratory report shall include the following:

(i) Each analysis required to make a determination of hazardous waste characteristics as specified in K.A.R. 28-31-261;

(ii) all additional analyses specified by the department;

(iii) quality control data; and

(iv) a copy of the chain of custody;

(C) the generator shall provide a signed statement for each analytical laboratory report stating that the analytical results are representative of the waste; and

(D) if the waste is an unused or spilled product and the waste has not been combined with any substance other than an absorbent, the generator may submit a material safety data sheet for the waste in lieu of laboratory analyses.

(c) Issuance of special waste disposal authorizations.

(1) Not later than 10 working days after the department receives a request for a special waste disposal authorization, the person making the request shall be notified by the department of one of the following determinations:

(A) The request for a special waste disposal authorization is not complete.

(B) The waste does not require a special waste disposal authorization for disposal in an MSWLF.

(C) The waste is a special waste, and the request for a special waste disposal authorization is approved.

(D) The waste is a hazardous waste, and the request for a special waste disposal authorization is

denied. The denial notification shall include the reason for denial.

(2) If a special waste is authorized for disposal, a written special waste disposal authorization stating the terms for transportation and disposal of the special waste shall be provided by the department to all of the following persons:

(A) The person requesting the special waste disposal authorization, the generator of the waste, or both;

(B) the owner or operator of each solid waste transfer station proposed for transfer of the solid waste; and

(C) the owner or operator of the MSWLF proposed for disposal of the special waste.

(3) A special waste disposal authorization shall not obligate the owner or operator of any MSWLF or solid waste transfer station to accept the special waste.

(d) Petroleum-contaminated soil (PCS). Sampling and analysis requirements and procedures for soil, which could contain debris, contaminated with petroleum products shall include the following:

(1) The generator of the PCS shall collect at least one representative sample for analysis from the first 300 cubic yards of PCS. If the analytical data from the first sample shows that the PCS is not hazardous, the generator shall collect one representative sample for analysis from each 500 cubic yards of PCS after that first sample.

(2) The generator may be required by the secretary to collect additional samples.

(3) The generator may deviate from the required frequency of sampling schedule with written approval from the secretary. The generator shall submit a written sampling plan and an explanation for the deviation from the required sampling schedule to the secretary for review and approval.

(4) The generator shall have each sample analyzed for each the following constituents:

(A) 1,2-dichloroethane;

(B) benzene; and

(C) if required by the department, lead and any other constituent likely to be present in the PCS.

(e) Generator requirements for transfer of special wastes. Each generator of special waste or the agent of the generator shall, before transfer of the special waste, provide the transporter with a copy of the special waste disposal authorization for each load of special waste.

(f) Transporter requirements for transfer and disposal of special wastes. Before transfer or dis-

posal of special waste, each transporter of special waste shall provide notification of each load of special waste to both of the following persons:

(1) The owner or operator of each solid waste transfer station involved in the transport of the special waste; and

(2) the owner or operator of the MSWLF at which the special waste will be disposed.

(g) MSWLF requirements for acceptance and disposal of special wastes. The owner or operator of each MSWLF shall comply with each of the following requirements:

(1) If a load of special waste requires a special waste disposal authorization, check for compliance with the special waste disposal authorization;

(2) reject any special waste requiring a special waste disposal authorization if the special waste does not meet both of the following requirements:

(A) Has a special waste disposal authorization issued by the department; and

(B) meets the requirements of the special waste disposal authorization;

(3) notify the department in writing of each special waste load that is rejected at the MSWLF within one business day after the rejection;

(4) dispose of the special waste in the MSWLF only if the special waste meets one of the following requirements:

(A) Is capable of passing the paint filter liquids test specified in K.A.R. 28-29-108; or

(B) is exempt from the liquids restriction as specified in K.A.R. 28-29-108; and

(5) maintain documentation in the operating record, as specified in K.A.R. 28-29-108, of each special waste disposed of at the MSWLF, until the MSWLF is certified for closure in accordance with K.A.R. 28-29-121. (Authorized by K.S.A. 65-3406; implementing K.S.A. 65-3401; effective July 10, 1998; amended May 30, 2003; amended Aug. 16, 2013.)

28-29-111. Groundwater monitoring systems; applicability and design. (a) The requirements in this regulation shall apply to all MSWLF units, except as provided in subsection (b).

(b) Groundwater monitoring requirements may be suspended by the department for a MSWLF unit if the owner or operator demonstrates that there is no potential for migration of hazardous constituents from that MSWLF unit to the uppermost aquifer during the active life of the unit and the post-closure care period. This demonstration

shall be certified by a qualified groundwater scientist and approved by the department, and shall be based upon:

(1) site-specific field-collected measurements, sampling, and analysis of physical, chemical, and biological processes affecting contaminant fate and transport; and

(2) contaminant fate and transport predictions that maximize contaminant migration and consider impacts on human health and environment.

(3) For the purposes of K.A.R. 28-29-111 and K.A.R. 28-29-112, "hazardous constituent" means all constituents listed in appendix I and appendix II of K.A.R. 28-29-113.

(c) Each owner or operator of a MSWLF unit shall comply with the groundwater monitoring requirements of this part according to the following schedule.

(1) Each existing MSWLF unit or lateral expansion less than or equal to one mile from a drinking water intake, surface or subsurface shall be in compliance with applicable groundwater monitoring requirements in K.A.R. 28-29-111 through K.A.R. 28-29-114 by October 9, 1994.

(2) Each existing MSWLF unit or lateral expansion greater than one mile but less than or equal to two miles from a drinking water intake, surface or subsurface, shall be in compliance with applicable groundwater monitoring requirements in K.A.R. 28-29-111 through K.A.R. 28-29-114 by October 9, 1995.

(3) Each existing MSWLF unit or lateral expansion greater than two miles from a drinking water intake, surface or subsurface, shall be in compliance with the groundwater monitoring requirements in K.A.R. 28-29-111 through K.A.R. 28-29-114 by October 9, 1996.

(4) Each MSWLF unit which meets the requirements of K.A.R. 28-29-103(a) and is less than or equal to two miles from a drinking water intake, surface or subsurface, shall be in compliance with applicable groundwater monitoring requirements in K.A.R. 28-29-111 through K.A.R. 28-29-114 by October 9, 1995.

(5) Each MSWLF unit which meets the requirements of K.A.R. 28-29-103(a) and is greater than two miles from a drinking water intake, surface or subsurface, shall be in compliance with the groundwater monitoring requirements in K.A.R. 28-29-111 through K.A.R. 28-29-114 by October 9, 1996.

(6) Each new MSWLF unit except those meeting the requirements of K.A.R. 28-29-103(a), shall

be in compliance with the groundwater monitoring requirements specified in subsection (f) before waste may be placed in the unit.

(d) Once a MSWLF unit has been established, groundwater monitoring shall be conducted throughout the active life and post-closure care period of that MSWLF unit.

(e) For the purposes of K.A.R. 28-29-100 through K.A.R. 28-29-121, a "qualified groundwater scientist" means a scientist or engineer who has received a baccalaureate or post-graduate degree in the natural sciences or engineering and has sufficient training and experience in groundwater hydrology and related fields. Sufficient training may be demonstrated by state registration, professional certifications, or completion of accredited university programs that enable that individual to make sound professional judgements regarding groundwater monitoring, contaminant fate and transport, and corrective action.

(f) Groundwater monitoring systems.

(1) A groundwater monitoring system shall be installed that consists of a sufficient number of wells, installed at appropriate locations and depths, to yield groundwater samples from the uppermost aquifer that:

(A) represent the quality of background groundwater that has not been affected by leakage from a unit; and

(B) represent the quality of groundwater passing the point of compliance.

(2) The owner or operator shall maintain records that, at a minimum include the following:

(A) exact well three-dimensional location;

(B) well size;

(C) type of well;

(D) the design and construction practice used in well installation; and

(E) well and screen depths.

(3) The monitoring wells, piezometers, and other measurement, sampling, and analytical devices shall be operated and maintained so that they perform to design specifications throughout the life of the monitoring program. The owner or operator shall maintain wells to operate throughout the design period of the landfill.

(4) Standards for the location of monitoring points in the detection monitoring system.

(A) Each monitoring well shall be located in a stratigraphic horizon that could serve as a contaminant migration pathways.

(B) Lateral distance from the unit.

(i) For new units, each monitoring well shall be

established at a lateral distance not greater than 150 meters (492 feet) from the planned edge of the unit. Each well shall be located on the owner's or operator's property, and shall be at least 15.24 meters (50 feet) from the property boundary. The requirements of paragraph (f)(4)(B)(i) shall not apply to vertical expansions or existing units that are in operation on October 9, 1996.

(ii) For existing units, each monitoring well shall be established at a lateral distance not greater than 150 meters (492 feet) from the planned edge of the unit, and shall be located on the owner's or operator's property.

(C) The number, spacing, and depths of monitoring wells shall be:

(i) determined based upon site-specific technical information gathered from the hydrogeologic investigation conducted pursuant to K.A.R. 28-29-104(b); and

(ii) certified by a qualified groundwater scientist.

(D) The network of monitoring points of several potential sources of discharge within a single facility may be combined into a single monitoring network, provided that discharges from any part of all potential sources can be detected. The following information shall be provided by the owner or operator as requested by the department for use in evaluating an owner's or operator's proposal for a multi-unit monitoring system:

(i) number, spacing, and orientation of each MSWLF unit;

(ii) hydrogeologic setting;

(iii) site history;

(iv) engineering design of each MSWLF unit; and

(v) type of waste accepted at each MSWLF unit.

(5) Well construction standards.

(A) Each monitoring well shall be constructed in accordance with K.A.R. 28-30-6.

(B) Each monitoring well shall be cased with inert materials that will not affect the water sample. Casing requiring solvent-cement type couplings shall not be used.

(C) Each well shall be screened to allow sampling only at the desired interval. The slot size of the screen and filter pack shall be designed to minimize turbidity. Screens shall be fabricated from material expected to be inert with respect to the constituents of the groundwater to be sampled.

(D) Each well shall be equipped with a device to protect against tampering and damage.

(E) Each well shall be developed to allow free entry of water and minimize turbidity of the sample.

(F) The transmissivity of the zone surrounding each well screen shall be established by field-testing techniques. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-112. Groundwater monitoring systems; sampling and data analysis requirements. (a) The groundwater monitoring program shall include consistent sampling and analysis procedures to ensure that monitoring results provide data representative of groundwater quality in the zone being monitored.

(b) The owner or operator shall develop a sampling and analysis plan to submit to the department for approval that includes the following:

(1) a quality assurance and quality control program for field sampling procedures and laboratory analysis that provides:

- (A) quantitative detection limits;
 - (B) the degree of error for analysis of each chemical constituent;
 - (C) equipment decontamination procedures; and
 - (D) other field quality assurance protocols;
- (2) a sample preservation and shipment procedure that maintains the integrity of the sample collected for analysis;

(3) a chain of custody procedure to prevent tampering and contamination of the collected samples prior to completion of analysis;

(4) the sampling procedures and analytical methods that will be used, why they are appropriate for groundwater sampling and whether they accurately measure constituents in groundwater samples; and

(5) the statistical method or methods listed in subsection (h) of this regulation which will be used in evaluating monitoring data for each constituent detected.

(c) Groundwater samples shall not be field-filtered prior to laboratory analysis. The director may require field filtered samples in cases where turbidity affects the validity of the results.

(d) The owner or operator shall determine the rate and direction of groundwater flow each time groundwater is sampled. Groundwater elevations in wells that monitor the same waste-management area shall be measured within a period of time short enough to avoid temporal variations in groundwater flow that could preclude accurate determination of groundwater flow rate and direction.

(e) The owner or operator shall conduct quarterly groundwater monitoring for one year to

determine background concentrations for each of the monitoring parameters or constituents required in the detection groundwater monitoring program, set out in K.A.R. 28-29-113(a).

(f) Background groundwater quality may be established at wells that are not located hydraulically upgradient from the MSWLF unit if:

(1) hydrogeologic conditions do not allow the owner or operator to determine what wells are hydraulically upgradient; or

(2) sampling at other wells will provide an indication of background groundwater quality that is as representative or more representative than that provided by the upgradient wells.

(g) The number of samples collected shall be consistent with the appropriate statistical procedures determined pursuant to this regulation.

(h) The following methods shall be acceptable statistical methods to be utilized in evaluating groundwater monitoring data, and shall be applied separately to each constituent detected in each well:

(1) a parametric analysis of variance (ANOVA) followed by multiple comparisons procedures to identify statistically significant evidence of contamination. This method shall include an estimation and testing of the contrasts between each compliance well's mean and the background mean levels for each constituent;

(2) an analysis of variance (ANOVA) based on ranks followed by multiple comparisons procedures to identify statistically significant evidence of contamination. This method shall include an estimation and testing of the contrasts between each compliance well's median and the background median levels for each constituent;

(3) a tolerance or prediction interval procedure in which an interval for each constituent is established from the distribution of the background data, and the level of each constituent in each compliance well is compared to the upper tolerance or prediction limit;

(4) a control chart approach that gives control limits for each constituent; or

(5) another statistical test method that meets the following performance standards:

(A) The statistical method used to evaluate groundwater monitoring data shall be appropriate for the distribution of chemical parameters or hazardous constituents. If the distribution of the chemical parameters or hazardous constituents is shown by the owner or operator to be inappropriate for a normal theory test, then the data may be

transformed or a distribution-free theory test may be used. If the distributions for the constituents differ, more than one statistical method may be needed.

(B) If an individual well comparison procedure is used to compare an individual compliance well constituent concentration with background constituent concentrations or a groundwater protection standard, the test shall be done at a type I error level no less than 0.01 for each testing period. If a multiple comparisons procedure is used, the type I experiment-wise error rate for each testing period shall be no less than 0.05; however, the type I error of no less than 0.01 for individual well comparisons must be maintained. This performance standard shall not apply to tolerance intervals, prediction intervals, or control charts.

(C) If a control chart approach is used to evaluate groundwater monitoring data, the specific type of control chart and its associated parameter values shall be protective of human health and the environment. The parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(D) If a tolerance interval or a prediction interval is used to evaluate groundwater monitoring data, the levels of confidence and, for tolerance intervals, the percentage of the population that the interval shall contain, shall be protective of human health and the environment. These parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(E) The statistical method shall account for data below the limit of detection with one or more statistical procedures that are protective of human health and the environment. Any practical quantitation limit (pql) that is used in the statistical method shall be the lowest concentration level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions that are available to the facility.

(F) If necessary, the statistical method shall include procedures to control or correct for seasonal and spatial variability as well as temporal correlation in the data.

(i) Any owner or operator wishing to use an alternative statistical test shall seek the approval of the department and provide a justification for

the alternative test. The justification shall demonstrate that the alternative method meets the performance standards listed in paragraph (h)(5) above.

(j) The owner or operator shall determine whether or not there is a statistically significant increase over background values for each parameter or constituent required in the particular groundwater monitoring program that applies to the MSWLF unit.

(1) The owner or operator shall submit the statistical analyses to the department within 45 days of receipt of analytical results.

(2) If requested by the department, the results of the statistical analyses shall be provided in electronic form via computer disc or other electronic means.

(3) If requested by the department, the raw analytical data shall also be provided.

(k) In determining whether a statistically significant increase has occurred, the owner or operator shall compare the groundwater quality of each parameter or constituent at each downgradient monitoring well to the background value of that constituent, according to the statistical procedures and performance standards specified in this regulation. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-113. Groundwater monitoring systems; detection and assessment monitoring. (a) Detection monitoring program.

(1) Detection monitoring shall be required at each groundwater monitoring well as defined in K.A.R. 28-29-111. At a minimum, a detection monitoring program shall include the monitoring for the constituents listed in appendix I of this regulation. The owner or operator shall also conduct the following evaluations at each well at the time of sample collection and immediately before filtering, if applicable, and preserving samples for shipment:

(A) elevation of the water table;

(B) depth of the bottom of the well;

(C) pH of the sample;

(D) temperature of the sample;

(E) specific conductance of the sample; and

(F) observations of the physical characteristics of the sample.

(2) The monitoring frequency for each constituent listed in appendix I shall be semiannual during the active life of the facility, including closure, and

the post-closure period except that monitoring shall be quarterly for the first year. At least one sample from each well, background and down-gradient, shall be collected and analyzed. An appropriate alternative frequency for sampling and analysis may be specified by the director. However, the alternative frequency shall be no less than annually.

(3) If the owner or operator determines that there is a statistically significant increase over background for one or more of the constituents listed in appendix I at any monitoring well, the owner or operator shall:

(A) notify the director within 14 calendar days of this finding. The notification shall indicate which constituents have shown statistically significant changes from background levels; and

(B) within 30 calendar days of this finding, re-sample the wells showing the statistically significant increase to confirm the finding. If the statistically significant increase is not confirmed, the owner or operator shall return to the detection monitoring program specified in paragraph (a)(1) of this regulation.

(i) If the statistically significant increase is confirmed, the owner or operator shall conduct an assessment monitoring program meeting the requirements of subsection (b) of this regulation, and develop a release assessment plan to determine the nature and extent of the release within 90 days of confirming the statistically-significant increase.

(ii) Upon approval of the release assessment plan by the director, the owner or operator shall implement the release assessment plan, and prepare and submit a report summarizing all activities and findings according to the schedule specified in the plan and approved by the department.

(iii) In lieu of paragraph (a)(3)(B)(i) and (ii) above, the owner or operator may demonstrate to the department that a source other than a MSWLF unit caused the contamination, that the statistically significant increase resulted from a natural variation in groundwater quality, or that the statistically significant increase resulted from an error in sampling. A report documenting this demonstration shall be certified by a qualified groundwater scientist and placed in the operating record. If a successful demonstration is made to and approved by the department, the owner or operator may continue detection monitoring as specified in paragraph (a)(1) of this regulation. If after 90 days a successful demonstration is not made, the owner or operator

shall conduct assessment monitoring as required in subsection (b) of this regulation, and develop a release assessment plan to determine the nature and extent of the release.

(b) Assessment monitoring.

(1) Assessment monitoring shall be required for:

(A) new municipal solid waste landfills or units, or existing municipal solid waste landfills or units which have established background groundwater concentrations for the appendix I constituents, whenever a statistically significant increase over background has been detected for one or more of the constituents listed in appendix I; and

(B) existing municipal solid waste landfills or units that have not established background groundwater concentrations for the appendix I constituents if groundwater contamination exists that exceeds the maximum contamination limits (MCLs) for any organic constituent contained in appendix I.

(2) Within 90 days of triggering assessment monitoring, the owner or operator shall sample each downgradient well, or those wells specified by the director, and analyze the groundwater for:

(A) all constituents identified in appendix II; and

(B) the parameters listed in paragraph (a)(1) of this regulation.

(3) Within 180 days of the sampling event described in paragraph (b)(2), the owner or operator shall collect and analyze from each background and downgradient well a minimum of three independent samples to establish background concentrations for each appendix II constituent detected during paragraph (b)(2) analyses.

(4)(A) Within 90 days of the sampling event described in paragraph (b)(3), and on a semi-annual basis thereafter, the owner or operator shall sample each downgradient well, or those wells specified by the director, and conduct analysis for all constituents in appendix I and for each constituent in appendix II that is detected during paragraph (b)(2) analyses.

(B) In addition, the owner or operator shall sample each downgradient well for each appendix II constituents on an annual basis.

(C) All analytical results shall be recorded in the facility operating record.

(5) Whenever a new constituent or constituents is detected in a downgradient well as a result of the sampling described in paragraphs (b)(2) or (4), above, the owner or operator shall:

(A) notify the director within 14 days of each appendix II constituent that has been detected;

(B) collect and analyze from each background and downgradient well a minimum of four independent samples to establish background concentrations for the new constituent or constituents; and

(C) include any new constituents detected in any subsequent monitoring.

(6) If it can be shown that the removed constituents are not reasonably expected to be contained in or derived from the waste contained in the unit, appendix II monitoring for a MSWLF unit may be modified by the director.

(7) An appropriate alternate frequency for repeated sampling and analysis for the full set of appendix II constituents during the active life, including closure, and post-closure care of the unit may be specified by the director.

(8) An appropriate subset of wells to be sampled and analyzed for appendix II constituents during assessment monitoring may be specified by the director.

(9) If the concentrations of all appendix II constituents are shown to be at or below background values, using the statistical procedures in K.A.R. 28-29-112, for two consecutive sampling events, the owner or operator shall notify the department of this finding and may return to detection monitoring, if approved by the department.

(10) If the concentrations of any appendix II constituents are above background values, but all concentrations are below the groundwater protection standard established under subsection (13) using the statistical procedures in section K.A.R. 28-29-112, the owner or operator shall continue assessment monitoring in accordance with this regulation. Based on an analysis of groundwater contamination trends, it may be requested by the director that the owner or operator proceed to the assessment of corrective measures, as described in K.A.R. 28-29-114.

(11) If one or more appendix II constituents are detected at statistically-significant levels above the groundwater protection standard in any sampling event, the owner or operator shall, within 14 days of this finding, notify the department and identify each appendix II constituent that has exceeded the groundwater protection standard.

(12) If a determination is made that contamination has migrated off-site, the owner or operator shall immediately notify all appropriate local government officials and all persons who own the

land or reside on the land that directly overlies any part of the plume of contamination.

(13) A groundwater protection standard for each appendix II constituent detected in the groundwater shall be established by the department. The groundwater protection standard shall be:

(A) the maximum contaminant level (MCL) where an MCL has been promulgated under section 1412 of the safe drinking water act under 40 CFR part 141, as in effect on July 1, 1992;

(B) the background concentration for the constituent established from wells in accordance with paragraph (b)(5)(B) of this regulation; or

(C) the background concentration for the constituent established from wells in accordance with paragraph (b)(5)(B) if the background level is higher than:

(i) the MCL; or

(ii) the health-based levels identified under paragraph (b)(14).

(14) An alternative groundwater protection standard for constituents for which MCLs have not been established may be approved by the department. These groundwater protection standards shall be appropriate health-based levels that satisfy the following criteria:

(A) The level is derived in a manner consistent with environmental protection agency guidelines for assessing the health risks of environmental pollutants, 51 Federal Register 33992, 34006, 34014, 34028, dated September 24, 1986;

(B) the level is based on scientifically valid studies conducted in accordance with the toxic substances control act good laboratory practice standards, 40 CFR part 792, as in effect on July 1, 1992, or equivalent;

(C) for carcinogens, the level represents a concentration associated with an excess lifetime cancer-risk level, due to continuous lifetime exposure, within the 1×10^{-4} to 1×10^{-6} range; and

(D) for systemic toxicants, the level represents a concentration to which the human population, including sensitive subgroups, could be exposed on a daily basis which is likely to be without appreciable risk of deleterious effects during a lifetime. For purposes of this paragraph, systemic toxicants include toxic chemicals that cause effects other than cancer or mutation.

(15) A standard in lieu of paragraph (b)(13) may be designated by the director while an alternative standard is being developed pursuant to paragraph (b)(14).

(Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-114. Corrective action. (a) Assessment of corrective measures.

(1) After consideration of the results from the release assessment conducted pursuant to K.A.R. 28-29-113(a)(3)(B), the owner or operator may be asked by the director to conduct an assessment of corrective measures that includes an analysis of:

(A) performance, reliability, ease of implementation, and potential impacts of appropriate potential remedies, including safety impacts,

cross-media impacts, and control of exposure to any residual contamination;

(B) time required to begin and complete the remedy;

(C) costs of remedy implementation; and

(D) institutional requirements such as state or local permit requirements or other environmental or public health requirements that may substantially affect implementation of the remedy or remedies.

(2) The owner or operator shall continue to monitor in accordance with the assessment monitoring program as specified in K.A.R. 28-29-113(b).

(3) The owner or operator shall make a recommendation for one of the corrective measures assessed and include a rationale for the choice in the corrective measures assessment report.

(4) The owner or operator shall conduct a public hearing to discuss the range of corrective measures evaluated, the recommended corrective measures, and the rationale outlined in the assessment report.

(b) Remedy.

(1) After consideration of the results of the corrective-measures assessment and the public comments received, the owner or operator shall propose a remedy and a schedule for implementation to the department for approval. The remedy shall:

(A) be protective of human health and the environment;

(B) attain the groundwater protection standards;

(C) control the source or sources of releases so as to reduce or eliminate, to the maximum extent practicable, further releases of constituents identified in appendix II of K.A.R. 28-29-113 into the environment that may pose a threat to human health or the environment; and

(D) comply with standards for management of wastes as specified in paragraph (c)(4) of this regulation.

(2) In approving a remedy, the following evaluation factors shall be considered by the director:

(A) the long-term and short-term effectiveness and protectiveness of the potential remedy or remedies, along with the degree of certainty that the remedy will prove successful;

(B) the effectiveness of the remedy in controlling the source to reduce further releases;

(C) the ease or difficulty of implementing a potential remedy or remedies;

(D) practicable capability of the owner or operator, including a consideration of the technical and economic capability; and

(E) the degree to which community concerns are addressed by a potential remedy or remedies.

(3) A remedy other than that proposed by the owner or operator may be specified by the director.

(4) It may be determined by the director that remediation of a release of a constituent identified in appendix II of K.A.R. 28-29-113 from a MSWLF unit is not necessary if the owner or operator demonstrates to the satisfaction of the director any one of the following:

(A) the groundwater is additionally contaminated by substances that have originated from a source other than a MSWLF unit and those substances are present in concentrations such that cleanup of the release from the MSWLF unit would provide no significant reduction in risk to public health and the environment;

(B) remediation of the release or releases is technically impracticable; or

(C) remediation results in unacceptable cross-media impacts.

(5) A determination by the director that remediation is not necessary shall not affect the authority of the department to require the owner or operator to undertake source control measures or other measures that may be necessary to eliminate or minimize further releases to the groundwater, to prevent exposure to the groundwater, or to remediate the groundwater to concentrations that are technically practicable and significantly reduce threats to human health or the environment.

(6) The owner or operator may be required by the director to take any interim measures necessary to ensure the protection of human health and the environment. Interim measures shall, to the greatest extent practicable, be consistent with the objectives of and contribute to the performance of any remedy selected.

(c) Implementation of the corrective action program.

(1) Based on the schedule established under paragraph (b)(1) above, the owner or operator shall implement the corrective action remedy selected under subsection (b).

(2) An owner or operator or the director may determine, based on information developed after implementation of the remedy has begun or other information, that compliance with requirements of paragraph (b)(1) is not being achieved through the remedy selected. In such cases, the owner or operator shall implement other methods or techniques that practicably achieve compliance with the requirements.

(3) If the owner or operator or director determines that compliance with requirements under paragraph (b)(1) cannot be practically achieved with any currently available methods, the owner or operator shall:

(A) obtain certification of a qualified groundwater scientist that compliance cannot be practically achieved with any currently available methods;

(B) implement alternate measures to control exposure of humans or the environment to residual contamination, as necessary to protect human health and the environment;

(C) implement alternate measures for control of the sources of contamination, or for removal or decontamination of equipment, units, devices, or structures; and

(D) submit a report to the director justifying the alternative measures prior to implementing the alternative measures.

(4) Each solid waste that is managed pursuant to a remedy or an interim measure shall be managed in accordance with Kansas waste management standards.

(5) Remedies selected pursuant to subsection (b) shall be considered complete when:

(A) the owner or operator complies with the groundwater protection standards established under K.A.R. 28-29-113(b)(13) at the point of compliance;

(B) compliance with the groundwater protection standards has been achieved by demonstrating that concentrations of constituents identified in appendix II of K.A.R. 28-29-113 have not exceeded the groundwater protection standard or standards for a period of three consecutive years using the statistical procedures and performance standards in K.A.R. 28-29-112. An alternative length of time during which the owner or operator shall demonstrate that concentrations of constituents identified in appendix II of K.A.R. 28-29-113 have not exceeded the groundwater protection standard or standards may be specified by the director, taking into consideration the:

(i) extent and concentration of the release or releases;

(ii) behavior characteristics of the contaminants in the groundwater;

(iii) accuracy of monitoring or modeling techniques, including any seasonal, meteorological, or other environmental variabilities that may affect the accuracy; and

(iv) characteristics of the groundwater; and

(C) all actions required to complete the remedy have been satisfied.

(6) Upon completion of the remedy, the owner or operator shall submit to the director a copy of a certification that the remedy has been completed in compliance with the requirements of paragraph (b)(1) and initiate a detection monitoring plan. The certification shall be signed by the owner or operator and by a qualified groundwater scientist.

(7) Upon receipt of the certification, if the director determines that the corrective action remedy has been completed in accordance with the requirements of this section, the owner or operator shall be released from the requirements for financial assurance for corrective action under K.A.R. 28-29-122. Where appropriate and necessary, a new schedule for continued detection monitoring shall be established by the director. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

28-29-121. Closure requirements. (a) Upon ceasing to receive waste, the unit shall be covered by a final cover consisting of a low permeability layer overlaid by a final protective layer constructed in accordance with the requirements of this regulation.

(b) Not later than 30 days after placement of the final lift of solid waste, closure activities shall begin, except as provided in subsection (c) of this regulation.

(c) The deadline for construction of the final cover may be extended by the director if:

(1) the unit has remaining capacity and there is a reasonable likelihood that the MSWLF unit will receive additional wastes;

(2) leachate is to be recirculated for a period after final receipt of waste in accordance with provisions in K.A.R. 28-29-104(i)(6); or

(3) the owner or operator demonstrates to the department that initiation of closure will, of necessity, take longer than 30 days.

(d) For any unit receiving an extension of the closure deadline as provided in subsection (c), it may be required by the director that the owner or operator comply with some or all of the provisions for intermediate cover in K.A.R. 28-29-108(c).

(e) For each MSWLF receiving waste after October 9, 1993, the low permeability layer shall consist of one of the following:

(1) a geomembrane underlaid by 0.45 meters (18 inches) of compacted soil with a permeabil-

ity of 1×10^{-5} centimeters per second or less if geomembrane is used in the bottom liner system; or

(2) the lesser of:

(i) 0.45 meters (18 inches) of compacted soil with a permeability less than or equal to the bottom liner system or natural subsoils; or

(ii) 0.45 meters (18 inches) of compacted soil with a permeability of 1×10^{-5} centimeters per second or less.

(f) If a geomembrane is used in the low permeability layer, it shall be constructed in accordance with the following standards.

(1) The geomembrane shall have strength to withstand the normal stresses imposed by the waste stabilization process.

(2) The geomembrane shall be placed over a prepared base free from sharp objects and other materials that may cause damage.

(3) The effects of landfill gas below the geomembrane shall be addressed.

(4) The effect of drainage through the final protective cover onto the geomembrane shall be addressed.

(g) The final protective layer shall be constructed in accordance with the following standards.

(1) The final protective layer shall cover the entire low permeability layer.

(2) The thickness of the final protective layer shall be at least as thick as the frost penetration depth at the landfill site and shall minimize root penetration of the low permeability layer.

(3) The final protective layer shall consist of soil material capable of supporting vegetation.

(h) The final protective layer shall be placed as soon as possible after placement of the low permeability layer to prevent desiccation, cracking, freezing or other damage to the low permeability layer.

(i) The owner or operator shall prepare a written closure plan that describes the steps necessary to close each MSWLF unit at any point during its active life in accordance with the cover design requirements. The closure plan, at a minimum, shall include the following information:

(1) plans for the final contours, type and depth of cover material, landscaping, and access control;

(2) an estimate of the largest area of the MSWLF unit ever requiring a final cover at any time during the active life;

(3) an estimate of the maximum inventory of wastes ever onsite over the active life of the MSWLF facility;

(4) final surface water drainage patterns and run-off retention basins;

(5) plans for the construction of liners, leachate collection and treatment systems, gas migration barriers or other gas controls;

(6) cross-sections of the site that delineate the disposal or storage locations of wastes. The cross-sections shall depict liners, leachate collection systems, the waste cover, and other applicable details;

(7) removal of all solid wastes from processing facilities; and

(8) a schedule for completing all closure activities.

(j) The closure plan shall be prepared not later than the effective date of this part, or by the initial receipt of waste, whichever is later, and shall be submitted to the department.

(k) A minimum of 60 days prior to beginning closure of each MSWLF unit, an owner or operator shall notify the department of the intent to close a unit.

(l) The owner or operator shall complete closure activities of each unit in accordance with the closure plan within 180 days following the beginning of closure. Extensions of the closure period may be granted by the director if the owner or operator demonstrates that:

(i) closure will, of necessity, take longer than 180 days; and

(ii) all steps have been taken and will continue to be taken to prevent threats to human health and the environment from the unclosed unit.

(m) Following closure of each MSWLF unit, the owner or operator shall submit a certification to the department. The certification shall be signed by an independent registered professional engineer, or approved by the director, and shall verify that closure has been completed in accordance with the closure plan.

(n) Following closure of all MSWLF units in a facility, the owner or operator shall perform the following tasks.

(1) The owner or operator shall file a restrictive covenant with the office of register of deeds for the county in which the property is located, pursuant to the requirements of K.A.R. 28-29-20. The restrictive covenant shall, in perpetuity, notify any potential purchaser of the property that:

(A) the property has been used as a MSWLF; and

(B) the use of the property is subject to the restrictions of the post-closure plan in subsection (p) of this regulation.

(2) The owner or operator shall notify the director that a restrictive covenant has been recorded pursuant to the requirements of paragraph (1) of this subsection.

(o) The owner or operator may request permission from the director to remove the restrictive covenant if all wastes are removed from the facility.

(p) Post-closure care requirements.

(1) Following closure of each MSWLF unit, the owner or operator shall conduct post-closure care. Post-closure care shall be conducted for 30 years, except as provided under paragraph (2) of this subsection, and shall consist of at least the following activities:

(A) maintaining the integrity and effectiveness of any final cover, including making repairs to the cover as necessary to correct the effects of settlement, subsidence, erosion, or other events, and preventing run-on and run-off from eroding or otherwise damaging the final cover;

(B) maintaining and operating the leachate collection system, pursuant to K.A.R. 28-29-104(h);

(C) monitoring the groundwater in accordance with the requirements of K.A.R. 28-29-113 and maintaining the groundwater monitoring system, if applicable; and

(D) maintaining and operating the gas monitoring system in accordance with the requirements of K.A.R. 28-29-108(e).

(2) The length of the post-closure care period may be increased by the director if the director determines that the lengthened period is necessary to protect human health and the environment.

(3) The owner or operator of each MSWLF unit must prepare a written post-closure plan that includes, at a minimum, the following information:

(A) plans for the post-closure operation and maintenance of liners, leachate and gas collection and treatment systems, cover material, run-off retention basins, landscaping, and access control;

(B) plans for monitoring and surveillance activities during post-closure;

(C) name, address, and telephone number of the person or office to contact about the facility during the post-closure period; and

(D) a description of the planned uses of the property during the post-closure period.

(i) Post-closure use of the property shall not disturb the integrity of the final cover, liner or liners, or any other components of the containment system, or the function of the monitoring systems unless necessary to comply with the requirements in this regulation.

(ii) If the owner or operator demonstrates that disturbance of the final cover, liner or other component of the containment system, including any removal of waste, will not increase the potential threat to human health or the environment, the disturbance may be approved by the director.

(4) The owner or operator shall prepare a post-closure plan not later than the effective date of this regulation, or by the initial receipt of waste, whichever is later, and submit it to the director.

(5) Following completion of the post-closure care period for each MSWLF unit, the owner or operator shall submit a certification to the director. The certification shall be signed by an independent registered professional engineer, or approved by the director, and must verify that post-closure care has been completed in accordance with the post-closure plan. (Authorized by K.S.A. 1993 Supp. 65-3406; implementing K.S.A. 65-3401; effective Oct. 24, 1994.)

PART 8. CONSTRUCTION AND DEMOLITION LANDFILLS

28-29-300. Definitions. (a) For the purposes of K.A.R. 28-29-300 through K.A.R. 28-29-333, the following definitions shall apply:

(1) "C&D" means construction and demolition.

(2) "C&D contact water" means liquid, consisting primarily of precipitation, that has infiltrated through the C&D waste or has been in contact with the C&D waste for any period of time. This term shall include all runoff from the active area of the C&D landfill and all liquid derived from the C&D waste.

(3) "C&D landfill" shall have the meaning assigned to "construction and demolition landfill" in K.S.A. 65-3402, and amendments thereto.

(4) "C&D waste" shall have the meaning assigned to "construction and demolition waste" in K.S.A. 65-3402, and amendments thereto. For the purposes of this definition, the following clarifications shall apply:

(A) "Furniture and appliances" shall not include computer monitors and other computer components, televisions, videocassette recorders, stereos, and similar waste electronics.

(B) "Treated wood" shall include wood treated with any of the following:

(i) Creosote;

(ii) oil-borne preservatives, including pentachlorophenol and copper naphthenate;

(iii) waterborne preservatives, including chromated copper arsenate (CCA), ammoniacal

copper zinc arsenate (ACZA), and ammoniacal copper quaternary compound (ACQ); or

(iv) any other chemical that poses a risk to human health or safety or the environment that is similar to any of the risks posed by the chemicals specified in paragraphs (a)(4)(B)(i) through (iii).

(C) "Untreated wood" shall include the following, if the wood has not been treated with any of the chemicals listed in paragraphs (a)(4)(B)(i) through (iv):

(i) Coated wood, including wood that has been painted, stained, or varnished; and

(ii) engineered wood, including plywood, laminated wood, oriented-strand board, and particle board.

(5) "Hazardous waste" means material determined to be hazardous waste as specified in K.A.R. 28-31-261.

(6) "Household hazardous waste" shall have the meaning specified in K.A.R. 28-29-1100.

(7) "Lower explosive limit" and "LEL" mean the lowest percent volume of a mixture of explosive gases in air that will propagate a flame at 25°C and atmospheric pressure.

(8) "Non-C&D waste" means all solid waste that is not specifically defined as construction and demolition waste in K.S.A. 65-3402, and amendments thereto. Non-C&D waste shall include hazardous waste and household hazardous waste.

(b) If a requirement in K.A.R. 28-29-300 through K.A.R. 28-29-333 conflicts with a requirement of K.A.R. 28-29-12 or K.A.R. 28-29-23, the requirement in K.A.R. 28-29-300 through K.A.R. 28-29-333 shall control. (Authorized by and implementing K.S.A. 65-3406; effective March 17, 2004; amended Dec. 28, 2012.)

28-29-302. Construction and demolition (C&D) landfill location restrictions. This regulation shall apply to each new C&D landfill and to each expansion of an existing C&D landfill that requires a permit modification.

(a) Definitions. For the purposes of this regulation, the following definitions shall apply:

(1) "Application" shall mean a permit application for a new C&D landfill or a permit modification application for the expansion of an existing C&D landfill.

(2) "New C&D unit" shall mean a new C&D landfill or the expansion of an existing C&D landfill.

(b) Floodplains.

(1) Each new C&D unit shall be located outside the 100-year floodplain, unless the applicant

submits, as part of the application, one of the following:

(A) Justification that the location of the new C&D unit will not cause any of the following:

- (i) Restriction of the flow of the 100-year flood;
- (ii) reduction of the temporary water storage capacity of the floodplain; or
- (iii) washout of the C&D waste; or

(B) a statement from the U.S. army corps of engineers, if the site is under its jurisdiction, and a statement from the Kansas department of agriculture, division of water resources, indicating that neither of the following, if likely to occur as a result of the location of the new C&D unit, will adversely affect public health, safety, or the environment:

- (i) Restriction of the 100-year flood; and
- (ii) reduction of the temporary water storage capacity of the floodplain.

(2) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to the floodplain from the following agencies:

- (A) The U.S. army corps of engineers; and
- (B) the Kansas department of agriculture, division of water resources.

(c) Protection of threatened or endangered species.

(1) For the purposes of this subsection, the following definitions shall apply:

(A) "Destruction or adverse modification" means a direct or indirect alteration of critical habitat that appreciably diminishes the likelihood of the survival and recovery of threatened or endangered species using that habitat.

(B) "Endangered species" means any species listed as such pursuant to the endangered species act, as referenced in K.S.A. 32-958, and amendments thereto.

(C) "Taking" means harassing, harming, pursuing, hunting, wounding, killing, trapping, capturing, or collecting, or attempting to engage in such conduct.

(D) "Threatened species" means any species listed as such pursuant to the endangered species act, as referenced in K.S.A. 32-958, and amendments thereto.

(2) Each new C&D unit shall be located to meet both of the following requirements:

(A) The new C&D unit shall not cause or contribute to the taking of any endangered or threatened species.

(B) The new C&D unit shall not result in the

destruction or adverse modification of the critical habitat of endangered or threatened species.

(3) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to threatened or endangered species from the following agencies:

- (A) The U.S. fish and wildlife service;
- (B) the Kansas department of wildlife and parks; and
- (C) the Kansas biological survey.

(d) Surface waters.

(1) For purposes of this subsection, "surface waters" shall have the meaning specified in K.A.R. 28-16-28b.

(2) A new C&D unit shall not be located in any surface waters.

(3) A new C&D unit shall not cause or contribute to significant degradation of surface waters. As part of the application, the applicant shall provide the following information:

(A) Identification of all surface waters within one-half mile of the property boundary;

(B) the erosion, stability, and migration potential of materials used to construct the new C&D unit;

(C) the volume and characteristics of the waste to be managed in the new C&D unit;

(D) the impact on fish, wildlife, and other aquatic resources and their habitat from the release of C&D waste or C&D contact water;

(E) the potential effects of a catastrophic release of C&D waste or C&D contact water to the surface water and the resulting impact on the environment; and

(F) any additional information relative to the site that concerns the protection of ecological resources in surface waters.

(4) As part of the application, the applicant shall provide information verifying that the total area of wetlands, as defined by acreage and function, will be preserved by one or more of the following practices:

(A) Avoiding impact on the wetlands to the maximum extent practicable;

(B) minimizing impact on the wetlands to the maximum extent practicable; and

(C) offsetting unavoidable wetland impact through all appropriate and practicable compensatory mitigation actions, including the restoration of existing degraded wetlands or creation of man-made wetlands.

(5) As part of the application, the applicant shall submit an approval or exemption for the siting of

the new C&D unit with respect to surface waters from the following agencies:

- (A) The U.S. army corps of engineers;
- (B) the U.S. fish and wildlife service;
- (C) the Kansas department of agriculture, division of water resources;
- (D) the Kansas department of wildlife and parks; and
- (E) the Kansas biological survey.

(1) Each new C&D unit shall be located at least 500 feet from each dwelling, school, or hospital that was occupied on the date when the department first received the application, unless the owner of the dwelling, school, or hospital consents in writing to the siting of the C&D unit less than 500 feet from the dwelling, school, or hospital.

(2) Each new C&D unit shall be located a minimum of 150 feet from the property line.

(3) The applicant may petition the secretary for a reduction of the buffer zone distances, if the county commission of the county in which the landfill is located approves the request.

(4) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to buffer zones from the following agencies:

- (A) The Kansas state conservation commission;
 - (B) the Kansas corporation commission; and
 - (C) the Kansas water office.
- (f) Navigable streams and public drinking water supplies.

(1) Each new C&D unit shall be located according to the requirements of K.S.A. 65-3407, and amendments thereto.

(2) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to public drinking water supplies from the department's bureau of water.

(g) Vertical separation from groundwater.

(1) At each new C&D unit, there shall be a minimum vertical separation of five feet from the lowest point of the unit to the highest predicted groundwater elevation, based on historical data or site conditions, in the uppermost aquifer underlying the disposal area. The minimum vertical separation shall be provided by naturally occurring, in-situ soil or geologic material, or alternative material that ensures the protection of public health, safety, and the environment.

(2) As part of the application, the applicant shall submit one of the following:

(A) On-site groundwater elevations and a prediction, based on historical data or site conditions, of the highest groundwater elevation in the uppermost aquifer underlying the disposal area; or

(B) other evidence that the highest groundwater elevation in the vicinity is five feet or more from the lowest point of the C&D landfill.

(h) Unstable areas.

(1) For purposes of this subsection, the following definitions shall apply:

(A) "Areas susceptible to mass movement" means those areas of influence, including areas characterized as having active, or a substantial possibility of, mass movement, where the movement of earth material at, beneath, or adjacent to the C&D landfill, because of natural or human-induced events, results in the downslope transport of soil and rock material by means of gravitational influence. Mass movement shall include the following:

- (i) Landslides;
- (ii) avalanches;
- (iii) debris slides and flows;
- (iv) solifluction;
- (v) block sliding; and
- (vi) rock falls.

(B) "Karst terrain" means an area where karst topography, with its characteristic surface and subterranean features, is developed as the result of dissolution of limestone, dolomite, or other soluble rock. The physiographic features characteristic of karst terrains may include the following:

- (i) Sinkholes;
- (ii) sinking streams;
- (iii) caves;
- (iv) large springs; and
- (v) blind valleys.

(C) "Poor foundation areas" means those areas where features exist that indicate that a natural or human-induced event could result in inadequate foundation support for the structural components of a C&D landfill.

(D) "Structural components" means liners, leachate collection systems, final covers, run-on systems, runoff systems, and any other component used in the construction and operation of the C&D landfill that is necessary for protection of public health, safety, and the environment.

(E) "Unstable area" means a location that is susceptible to natural or human-induced events or forces capable of impairing the integrity of some or all of the C&D landfill structural components

used to prevent releases from a landfill. This term shall include poor foundation areas, areas susceptible to mass movements, and karst terrains.

(2) As part of the application, the applicant for each C&D landfill shall submit an assessment of the stability of the area and shall consider the following factors when determining whether or not an area is unstable:

(A) On-site or local conditions that could result in significant differential settling;

(B) on-site or local geologic or geomorphologic features; and

(C) on-site or local human-made features or events, both surface and subsurface.

(3) As part of the application, the applicant for each C&D landfill proposed to be located in an unstable area shall provide information verifying that engineering measures have been incorporated into the C&D landfill's design to ensure that the integrity of the structural components of the C&D landfill will not be compromised.

(4) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to stability from the Kansas geological survey.

(i) Cultural resources.

(1) Each new C&D unit shall be located so that the unit does not pose a threat of harm or destruction to the essential features of an irreplaceable historic or archaeological site that is listed on the Kansas state register of historic sites, pursuant to K.S.A. 75-2721 and amendments thereto.

(2) As part of the application, the applicant shall submit an approval or exemption for the siting of the new C&D unit with respect to cultural resources from the Kansas state historical society.

(j) Waivers. The requirement to submit a specific approval, exemption, or demonstration as part of the permit application may be waived by the secretary.

This regulation shall take effect 90 days after publication in the Kansas register. (Authorized by and implementing K.S.A. 65-3406; effective March 17, 2004.)

28-29-304. Construction and demolition (C&D) landfill design. The design requirements of this regulation shall apply to all C&D landfills.

(a) Facility access. The owner or operator of each C&D landfill shall provide fencing or other barriers, with one or more gates that can be locked to restrict access to the C&D landfill when the C&D landfill is not open for business.

(b) Facility signage. The owner or operator of each C&D landfill shall post permanent signage at the facility.

(1) The following information shall be posted at the entrance to the facility:

(A) The name of the facility;

(B) the landfill permit number;

(C) the facility's telephone number, if there is one;

(D) the emergency telephone number; and

(E) a statement indicating who may bring waste to the landfill for disposal and, if appropriate, the hours of operation.

(2) Information concerning the types of waste that are accepted or not accepted for disposal or recycling shall be posted at the facility's entrance or at a location prominently visible to the public inside the facility's boundaries.

(c) Facility roads.

(1) The owner or operator of each C&D landfill shall design and construct on-site roads to accommodate expected traffic flow in a safe and efficient manner.

(2) On-site facility roads shall be of all weather construction and shall be negotiable at all times.

(3) Load limits on bridges and on-site roads shall be sufficient to support all traffic loads generated by the use of the facility.

(d) Storm water control. The owner or operator of each C&D landfill shall design and construct a storm water control system.

(1) The storm water control system shall prevent flow onto the active area of the landfill of discharge resulting from the 25-year, 24-hour storm and lesser storms.

(2) The system shall consist of trenches, conduits, berms, and proper grading, as needed.

(3) The system shall control erosion of cover materials.

(4) Storm water discharge from the permitted property shall be reduced to predevelopment discharge rates and nonerosive velocities.

(e) C&D contact water control and management. The owner or operator of each C&D landfill shall design and construct C&D contact water control and management systems that meet the following requirements:

(1) The C&D contact water control system shall control storm water runoff from the active area of the C&D landfill.

(2) The C&D contact water management system shall meet one or more of the following requirements:

(A) Storage of C&D contact water.

(i) C&D contact water shall be stored in the permitted C&D waste disposal units, or in structures or ponds on the permitted C&D waste disposal site.

(ii) The storage system shall have provisions for overflow.

(iii) The storage system may be designed to allow percolation of C&D contact water through subsurface soils.

(B) On-site treatment of C&D contact water. The treatment system shall produce water of a quality adequate for the intended use or method of disposal.

(C) Beneficial reuse of C&D contact water on the permitted C&D waste disposal site. Beneficial reuse may include the following:

(i) Wetting of on-site roads or other site areas for dust control;

(ii) irrigation of vegetated areas, not including agricultural crops intended for human or animal consumption;

(iii) distribution on C&D waste, as necessary, for fire protection; or

(iv) other uses that do not adversely impact public health, safety, and the environment.

(D) Discharge or hauling of C&D contact water to an off-site treatment facility.

(i) The operator of each C&D landfill may discharge or haul C&D contact water to the off-site treatment facility only with written permission from the owner or operator of the off-site treatment facility. As part of the permit application or permit modification application, the applicant or permittee shall submit a copy of the written permission.

(ii) The off-site treatment facility shall have all required permits and approvals required for proper treatment of the C&D contact water. As part of the permit application or permit modification application, the applicant or permittee shall submit a copy of all required permits and approvals.

(iii) Discharge of C&D contact water to the off-site treatment facility shall conform with K.A.R. 28-16-1 through K.A.R. 28-16-7.

(E) Discharge of C&D contact water to surface waters. The applicant or permittee shall be required to obtain a national pollutant discharge elimination system (NPDES) permit from the secretary.

(F) Discharge of C&D contact water to deep injection wells. The applicant or permittee shall be required to obtain a permit from the secretary for installation and operation of deep injection wells.

(3) The C&D contact water control and management system shall meet the following requirements:

(A) Operate for the entire design period, including the active operating and closure phases of the C&D landfill;

(B) allow for the management of C&D contact water during routine maintenance and repairs;

(C) have the capacity to handle the water generated from a 25-year, 24-hour storm and lesser storms;

(D) operate via gravity flow whenever possible; and

(E) be chemically resistant to the contact water expected to be produced.

(f) Phasing of landfill development. The owner or operator of each C&D landfill shall develop the landfill in phases, according to the operating plan.

(1) The phasing plan shall provide for the sequential construction, filling, and closure of discrete units or parts of units.

(2) In determining the size of each phase, the owner or operator shall consider seasonal differences in weather and the amount of C&D waste received.

(3) Each phase shall be completed by covering all exposed waste with intermediate cover.

(A) The intermediate cover shall consist of a minimum of one foot of soil and shall meet the following requirements:

(i) Limit air intrusion to control the risk of fire;

(ii) control litter; and

(iii) limit vector harborage.

(B) Alternative material, if approved by the secretary, may be used for intermediate cover. The alternative material shall consist of material acceptable for disposal in the C&D landfill and shall meet the requirements specified in paragraphs (f)(3)(A)(i) through (f)(3)(A)(iii) of this regulation.

(g) Final cover. Within six months after the last placement of waste in the unit, the owner or operator shall construct a final cover in accordance with the approved facility closure plan.

(1) The final cover shall include the following:

(A) A low-permeability layer consisting of a minimum of 18 inches of compacted soil having permeability equal to or less than the natural subsoils or the constructed liner, and no greater than 1×10^{-5} centimeters per second; and

(B) a protective soil layer consisting of a minimum of 12 inches of topsoil and appropriate vegetative cover.

(2) The final cover shall be graded with a minimum slope of two percent and a maximum slope of 3:1, horizontal to vertical.

This regulation shall take effect 90 days after publication in the Kansas register. (Authorized by and implementing K.S.A. 65-3406; effective March 17, 2004.)

28-29-308. Construction and demolition (C&D) landfill operations. The owner or operator of each C&D landfill shall comply with the following requirements.

(a) Aesthetics. The operator shall control odors and particulates, including dust and litter, by the application of cover material, sight screening, or other means to prevent a nuisance or damage to human health or the environment.

(b) Air quality. The owner or operator shall conform to all applicable provisions of K.S.A. 65-3001 et seq., and amendments thereto, and all regulations adopted under those statutes.

(c) Fire protection.

(1) The owner or operator shall make arrangements for fire protection services if a fire protection district or other public fire protection service is available. If this service is not available, the owner or operator shall provide practical alternate arrangements.

(2) If there is a fire at the site, the operator shall perform all of the following:

(A) Initiate and continue the use of appropriate fire fighting methods until all smoldering, smoking, and burning cease;

(B) notify the department within one business day and submit a written report to the department within one week; and

(C) upon completion of fire fighting activities, cover and regrade each disruption of finished grades, covered surfaces, or completed surfaces.

(d) Water management.

(1) The owner or operator shall construct and maintain the storm water control systems according to the approved design and operating plans.

(2) The owner or operator shall manage all storm water that becomes commingled with C&D contact water as C&D contact water.

(3) The owner or operator shall manage all C&D contact water according to the approved design and operating plans. If the contact water control and management system fails, the owner or operator shall notify the department by the end of the next business day.

(4) The owner or operator shall not cause a dis-

charge of pollutants into the waters of the state. If such a discharge occurs, the owner or operator shall immediately notify the department, as specified in K.A.R. 28-48-2.

(e) Access control.

(1) Access to each C&D landfill shall be limited to the hours when the owner or operator is at the site.

(2) The owner or operator shall keep all access-control gates locked when the owner or operator is not at the landfill.

(3) Access by unauthorized vehicles and pedestrians shall be prohibited.

(f) Waste screening. The owner or operator shall implement the waste screening program designated in the operating plan.

(1) The operator shall accept for disposal only "construction and demolition waste," as defined in K.S.A. 65-3402, and amendments thereto.

(2) The operator shall not accept for disposal any "liquid waste," as defined in K.A.R. 28-29-108.

(3) The operator may refuse to accept any material that has not been removed from the delivery vehicle. The operator may return non-C&D waste that has been removed from the delivery vehicle to the hauler. The operator shall document the refusal or return by recording the following information:

(A) The date and time of the refusal or return;

(B) the driver's name;

(C) the delivery vehicle's license plate number;

(D) the hauling company's name and address;

(E) the origin of the waste;

(F) the size of the rejected load or amount of returned waste;

(G) the reason for rejection or return; and

(H) the name of the person who inspected the waste.

(4) The operator shall remove from the landfill all non-C&D waste that has not been returned to the hauler, for disposal at a site permitted to accept the non-C&D waste. The operator shall store all non-C&D waste in a manner that does not result in a nuisance or environmental hazard.

(5) If a regulated hazardous waste, regulated polychlorinated biphenol (PCB) waste, or medical waste is brought to the facility, the owner or operator shall notify the department within one business day and shall meet the following requirements:

(A) The notification requirement shall apply to waste that has been accepted at the facility and waste that has been rejected.

(B) The notification shall include the type, amount, and source of the waste.

(C) The waste shall be managed in accordance with the hazardous waste, PCB, or medical waste regulations, as appropriate.

(6) The operator shall keep a record of each day that waste is screened at the landfill.

(7) The waste screening area shall be clearly delineated using flags, signs, or markers, and shall have an area compatible with the average daily volume of waste, as approved in the operating plan.

(8) The waste screening area shall be cleared of waste no more than 24 hours after the waste has been deposited.

(9) The operating plan may specify that waste screening may take place at the point of generation rather than at the landfill.

(g) Waste placement.

(1) At least once each day that waste has been received, the operator shall dispose of the C&D waste using the following method:

(A) Screen the waste at a location other than directly on the working face; and

(B) distribute the waste uniformly on the working face.

(2) The operator shall place the waste in a manner and at a rate that provide mass stability during all phases of operation.

(h) Waste compaction.

(1) The operator shall compact the waste daily, unless an alternate schedule has been designated in the operating plan.

(2) The operator shall compact the waste as densely as is practical.

(A) The degree of compaction may vary depending on the waste type, lift thickness, placement method, and equipment used.

(B) The method of compaction shall include at least two passes of compaction equipment over the waste at the time it is placed on the working face or, at a minimum, by the end of the day that the waste is placed on the working face.

(i) Record of waste disposed. The operator shall record and maintain the following information for each load of C&D waste placed in the landfill:

(1) The tons or volume of C&D waste;

(2) the state in which the waste was generated; and

(3) if the waste is exempt from the state solid waste tonnage fee, as specified in K.S.A. 65-3415b and amendments thereto, the reason for the exemption.

(j) Record of waste recycled. The operator shall

record and maintain the following information for all waste diverted by the landfill for recycling:

(1) The type of waste, if any waste other than C&D waste is diverted for recycling;

(2) the number of tons or the volume of each type of waste;

(3) the state in which the waste was generated; and

(4) the name and address of the facility to which the waste was sent for recycling.

(k) Cover requirements.

(1) The operator shall apply cover material over every 2,000 tons of waste disposed, with the following exceptions:

(A) Cover shall be applied at least once every 120 days.

(B) No facility shall be required under these regulations to apply cover more often than once a week.

(2) The cover shall consist of a minimum of one foot of soil and shall meet the following requirements:

(A) Limit air intrusion to control the risk of fire;

(B) control litter; and

(C) limit vector harborage.

(3) Alternative material, if approved by the secretary, may be used for cover. The alternative material shall consist of material acceptable for disposal in the C&D landfill and shall meet the requirements specified in paragraphs (k)(2)(A) through (k)(2)(C) of this regulation.

(4) The operator of the facility shall maintain a log of the dates on which cover is applied.

(l) Salvaging.

(1) The operator shall permit salvaging or reclamation of materials only if working space specifically designed for salvaging C&D wastes is provided.

(2) The salvage operation and salvaged materials shall be controlled to prevent interference with the prompt disposal of C&D wastes.

(3) All salvage operations shall be conducted in a manner that does not create a nuisance.

(m) Scavenging. The operator shall not permit any scavenging at the C&D landfill.

(n) Communication. The owner or operator shall provide two-way communications accessible to the operator working at the disposal unit.

(o) Safety. The owner or operator shall provide an operational safety program for each employee at the C&D landfill.

(p) Recordkeeping.

(1) Long-term retention of permits and plans.

The owner or operator shall retain all documents concerning the landfill permit and landfill construction for a minimum of five years after the completion of the postclosure care period. The documents shall be stored in a location designated in the facility operations plan and shall be readily accessible to the department. The documents concerning the landfill permit and landfill construction shall include the following:

- (A) The permit application and all supporting documents;
- (B) all renewal documents;
- (C) the construction quality assurance (CQA) plans and reports;
- (D) additional information as required by the conditions of the permit; and
- (E) the following documents, which shall be stored at the facility while the facility is active:
 - (i) The current permit;
 - (ii) the permit conditions;
 - (iii) the design plans;
 - (iv) the operations plan;
 - (v) a contingency plan;
 - (vi) the closure plan; and
 - (vii) the postclosure plan.

(2) Short-term retention of operating records. The owner or operator shall retain all documents concerning operations at the landfill for a minimum of five years after the event occurs. The documents shall be stored at the facility, or at another site designated in the operating plan, and shall be readily accessible to the department. The documents concerning operations at the landfill shall include the following:

- (A) The waste screening records;
- (B) the records of refused and returned waste;
- (C) the records of all waste disposed of, whether on-site or offsite;
- (D) the records of waste recycled;
- (E) employee training records;
- (F) gas monitoring results, if applicable;
- (G) groundwater monitoring results, if applicable;
- (H) documentation of postclosure inspections; and
- (I) additional information as required by the conditions of the permit.

(q) Reporting. The owner or operator shall report the following information to the department on forms provided by the department:

- (1) Disposal information, including the following:
 - (A) The number of tons or the volume of the C&D waste; and

- (B) the state in which the C&D waste was generated;

- (2) recycling information, including all of the following:

- (A) The type of waste, if any waste other than C&D waste was diverted for recycling;

- (B) the number of tons or the volume of each type of waste;

- (C) the state in which the waste was generated; and

- (D) the name and address of the facility to which the waste was sent for recycling;

- (3) information required for permit renewal; and

- (4) additional information as required by the conditions of the permit.

This regulation shall take effect 90 days after publication in the Kansas register. (Authorized by and implementing K.S.A. 65-3406; effective March 17, 2004.)

28-29-321. Construction and demolition (C&D) landfill closure and postclosure care.

This regulation shall apply to each C&D landfill that closes after the effective date of this regulation.

(a) Notification of closure. The owner or operator of each C&D landfill shall notify the department, in writing, at least 60 days before each of the following events:

- (1) The closure of each disposal unit at the landfill; and

- (2) the final closure of the C&D landfill.

- (b) Closure activities.

- (1) The owner or operator of each C&D landfill shall close the landfill according to the approved closure plan and shall install the final cover within six months of the last receipt of waste at the landfill.

- (2) The owner or operator shall notify the secretary when closure activities have been completed and shall arrange for a closure inspection by the secretary.

- (c) Postclosure care. After the secretary approves the closure of the C&D landfill, the owner or operator shall conduct postclosure care for 30 years.

- (1) During the postclosure care period, the owner or operator shall perform and document annual inspection and maintenance of the cover to ensure the integrity and effectiveness of the final cover, including the following:

- (A) Making repairs to the cover as necessary to correct the effects of settlement, subsidence, erosion, and other events; and

(B) preventing run-on and runoff from eroding or otherwise damaging the final cover.

(2) After five years of inspections, the owner or operator may submit a request to the secretary for a less frequent inspection schedule.

(d) Certification. Following completion of the postclosure care period for the C&D landfill, the owner or operator shall submit a certification to the secretary. The certification shall be signed by a professional engineer licensed in Kansas and shall verify that the postclosure care requirements have been fulfilled in accordance with the postclosure plan.

(e) Lengthened postclosure care period. The length of the postclosure care period may be increased if the secretary determines that the lengthened period is necessary to protect public health, safety, and the environment.

This regulation shall take effect 90 days after publication in the Kansas register. (Authorized by and implementing K.S.A. 65-3406; effective March 17, 2004.)

28-29-325. Construction and demolition (C&D) landfill permits. (a) Permit application. Each person that plans to establish a C&D landfill shall submit a permit application to the secretary on forms furnished by the department. The permit application shall include the following items:

(1) Design plans. The C&D landfill design plan shall include the following items:

(A) A plan showing the section, township, range, and site boundaries;

(B) a description of all adjacent properties, including the land use and the names and addresses of property owners. If the proposed site is adjacent to a public road or street, the property across the street or road shall also be described;

(C) a topographic map of the existing site with a contour interval of two feet or less;

(D) a minimum of three cross sections of the proposed C&D waste disposal units, with the water table shown;

(E) a plan showing the following information:

(i) The size and location of all pertinent human-made and natural features of the site, including roads, fire lanes, ditches, berms, culverts, structures, wetlands, floodways, and surface waters;

(ii) the projected site utilization with all site structures, including buildings, fences, gates, entrances and exits, parking areas, on-site roadways, and signs; and

(iii) the location of all water supplies;

(F) a series of phasing plans showing landfill development over the life of the landfill. Each plan shall indicate the location of all peripheral features, including support buildings, access roads, drainage ditches, sedimentation basins, all other storm water management features, and screening berms;

(G) an erosion control plan outlining management practices to control erosion from disturbed areas;

(H) a storm water control plan that includes an implementation schedule and copies of the notice of intent submitted to the department's bureau of water;

(I) a C&D contact water management plan that includes an implementation schedule; and

(J) if the landfill is located in an unstable area according to the criteria specified in K.A.R. 28-29-302, a description of the engineering measures incorporated into the landfill's design to ensure that the integrity of the structural components of the C&D landfill will not be disrupted.

(2) Maps. The applicant shall submit the following maps:

(A) A 7.5-minute series map of the area, as typically available from the U.S. geological survey, indicating the property boundary;

(B) a soil map of the area, as typically available from the U.S. department of agriculture natural resources conservation services; and

(C) a 100-year floodplain map of the area, if one has been developed for the area by the federal emergency management agency (FEMA). If a FEMA map is not available, the applicant shall submit a map showing the estimated location of the 100-year floodplain based on historical or hydrogeologic data.

(3) Operating plan. The written operating plan shall include the following information:

(A) The proposed operating hours of the facility;

(B) the origin and composition of the waste;

(C) the expected daily volume of all C&D waste to be accepted at the facility;

(D) the procedures for screening incoming waste for non-C&D waste;

(E) the procedures for storing and removing all non-C&D waste from the site for recycling or for disposal at a site permitted to accept the non-C&D waste;

(F) a description of all salvaging operations on-site;

(G) the procedures for handling appliances that will be disposed of;

- (H) the procedure for handling nonfriable asbestos;
- (I) the procedures for placing and compacting the waste;
- (J) the safety procedures for personnel and public on-site;
- (K) the cover application rate, including the thickness and frequency of application;
- (L) the procedures for dust suppression and fugitive emission control at the disposal unit and on haul roads;
- (M) a description of storm water control measures to be implemented during operation of the facility;
- (N) a description of the facility's water supply system, including the source and intended uses;
- (O) a description of all machinery and equipment to be used, including the design capacity;
- (P) a contingency plan for the following:
- (i) Emergencies, including fires and spills; and
 - (ii) any other unexpected suspension of operations, including equipment breakdown and personnel emergencies;
- (Q) a description of when and why the operator would suspend receipt of waste at the facility, including the following:
- (i) Temporary situations;
 - (ii) final closure due to conditions of the permit; and
 - (iii) attainment of final elevations;
- (R) a drawing that delineates and numerates phases in the landfill development sequence, along with a written description of the facility development approach and the waste placement progression in individual units;
- (S) the proposed capacity of the facility; and
- (T) the expected life of the facility.
- (4) Closure plan drawings. The closure plan drawings shall include the following items:
- (A) Surface drawings of the site showing the following information:
- (i) Access control;
 - (ii) final contours, with a contour interval of two feet or less;
 - (iii) seeding specifications;
 - (iv) landscaping;
 - (v) erosion control devices;
 - (vi) final surface water drainage patterns and runoff retention basins; and
 - (vii) waste disposal locations; and
- (B) cross sections of the site that depict the following:
- (i) The disposal or storage locations of wastes;
 - (ii) the type and depth of cover material;
 - (iii) the C&D contact water collection systems, if present; and
 - (iv) any other pertinent features.
- (5) Closure plan text. The closure plan text shall include the following information:
- (A) An estimate of the largest area of the C&D waste disposal unit requiring final cover at any time during the active life of the facility;
- (B) a description of the steps necessary to close each C&D waste disposal unit at any point during its active life in accordance with the cover design requirements;
- (C) a schedule for completing all closure activities; and
- (D) an estimate of the final volume of wastes disposed of at the C&D landfill facility.
- (6) Postclosure plan. The postclosure plan shall include the following:
- (A) A description of the planned uses of the property during the postclosure period. The postclosure use of the property shall not disturb the integrity of the final cover or any other components of the containment system unless either of the following conditions applies:
- (i) The disturbance is necessary to comply with the requirements in this regulation; or
 - (ii) the owner or operator submits justification that disturbance of the final cover or other components of the containment system, including removal of waste, will not increase the potential threat to public health, safety, or the environment; and
- (B) a schedule of proposed maintenance activities for the postclosure care period, including the following:
- (i) Postclosure operation and maintenance of cover material, runoff controls, retention basins, landscaping, and access control and, if present at the facility, the C&D contact water collection system;
 - (ii) the inspections during postclosure; and
 - (iii) the name, address, and telephone number of the person or office to contact about the facility during the postclosure period.
- (7) Restrictive covenant. Each applicant shall file a restrictive covenant or notice of restrictions with the county register of deeds in the county in which the landfill will be located. The restrictive covenant or notice of restrictions shall meet the requirements of K.A.R. 28-29-20.
- (8) Financial information.

(A) The applicant shall submit the following items on forms provided by the department:

- (i) A closure cost estimate for third-party costs;
- (ii) a postclosure estimate for third-party costs, unless exempted by K.A.R. 28-29-2101;
- (iii) documentation of financial assurance; and
- (iv) a business concern disclosure statement or public entity disclosure statement.

(B) The applicant shall also submit proof of liability insurance.

(9) Construction quality assurance (CQA) plan.

(A) The CQA plan shall include a detailed description of all CQA activities that will be used during construction to manage the installed quality of the facility, including the following items:

- (i) Storm water management structures;
- (ii) C&D contact water management systems;
- (iii) base elevations;
- (iv) final cover; and
- (v) any other components of the waste containment and management system.

(B) The CQA plan shall be tailored to the specific facility to be constructed and shall be completely integrated into the project's plans and specifications.

(C) The CQA plan shall include the responsibilities and qualifications of the CQA personnel.

(D) The CQA personnel and the CQA certifying professional engineer shall not be required to be employed by an organization that operates independently of the landfill contractor, owner, or permit holder.

(10) Additional items. Each applicant shall submit to the secretary the following items:

(A) All demonstrations, approvals, and exemptions required by K.A.R. 28-29-302;

(B) all information required by K.A.R. 28-29-304; and

(C) the permit application fee, unless exempted by K.S.A. 65-3407 and amendments thereto.

(b) Permit modifications.

(1) Each owner or operator shall notify the secretary, in writing, of all modifications to the approved plans. The owner or operator shall implement each modification only after the secretary has provided written approval of the modification.

(2) Each facility that has a permit issued before the effective date of this regulation shall comply with the following within no more than 90 days after the effective date of this regulation:

(A) If the facility does not have an operating plan, submit an operating plan to the department;

(B) if the facility has an operating plan that does not meet the requirements of subsection (a) of this regulation, submit an amended operating plan;

(C) if the facility does not have a design plan, submit a design plan to the department; and

(D) if the facility has a design plan that does not meet the requirements of subsection (a) of this regulation, submit an amended design plan.

(c) Engineer's seal. The following documents, if submitted as part of a permit application, as part of a permit modification, or a requirement of subsection (b) of this regulation, shall be prepared and sealed by a professional engineer licensed to practice in Kansas:

- (1) Plans;
- (2) specifications;
- (3) addendums;
- (4) as-built drawings; and
- (5) any other documents required for a permit application or permit modification that describe the design, construction, or closure of a C&D landfill, except financial documents.

(d) Permit renewal. The owner or operator of each active C&D landfill shall renew the permit annually by submitting the following information to the secretary at least 30 days before the permit renewal date:

- (1) An updated map of the land area used for past and present waste disposal;
- (2) updated third-party closure cost estimates;
- (3) updated third-party postclosure cost estimates, unless exempted by K.A.R. 28-29-2101;
- (4) documentation of updated financial assurance;
- (5) a current certificate of liability insurance; and
- (6) the renewal fee, unless exempted by K.S.A. 65-3407 and amendments thereto. (Authorized by and implementing K.S.A. 65-3406; effective Jan. 2, 2004.)

28-29-330. Control of hazardous and explosive gases at C&D landfills; applicability of additional requirements. (a) Applicability of additional design, operating, and postclosure requirements. The additional design, operating, and postclosure requirements of K.A.R. 28-29-332 shall apply to the owner or operator of each disposal unit at a C&D landfill that meets all of the following conditions:

(1) Location. Precipitation in all parts of the county in which the C&D landfill is located av-

erages more than 25 inches per year. The following counties and any county located east of these counties shall be designated as meeting this condition: Jewell, Mitchell, Lincoln, Ellsworth, Rice, Reno, Kingman, and Harper.

(2) Capacity. The disposal unit meets one of the following conditions:

(A) The construction of the disposal unit begins on or after the effective date of this regulation, and the capacity of the disposal unit is more than 50,000 cubic yards. Construction of the disposal unit shall be in accordance with a construction quality assurance plan that is specific to the disposal unit and has been approved by the secretary.

(B) The construction of the disposal unit begins on or after January 1, 2014 and the capacity of the disposal unit, in combination with all other disposal units constructed on or after January 1, 2014, is more than 50,000 cubic yards. Construction of the disposal unit shall be in accordance with a construction quality assurance plan that is specific to the disposal unit and has been approved by the secretary.

(3) Hydrogeology. The disposal unit meets one or both of the following conditions, as evaluated and documented by a professional engineer or licensed geologist:

(A) The disposal unit is located within a 100-year floodplain.

(B) The permeability of the natural soils or the constructed soil liner or the natural geologic formation under the disposal unit is 1×10^{-7} centimeters per second or less, including quarry landfills with competent shale bases, unless the owner or operator demonstrates to the department that design and operational practices ensure that C&D contact water will exit the disposal unit by gravity flow.

(b) Applicability of corrective action requirements. The corrective action requirements of K.A.R. 28-29-333 shall apply to the owner or operator of each C&D landfill during the operating and postclosure periods. (Authorized by and implementing K.S.A. 65-3406; effective Dec. 28, 2012.)

28-29-331. Control of hazardous and explosive gases at C&D landfills; documentation of conditions used to determine applicability. Each person that submits an application for a new C&D landfill and each owner or operator that proposes to construct a disposal unit at an existing C&D landfill shall submit to the depart-

ment documentation of the conditions specified in K.A.R. 28-29-330, according to the following requirements:

(a) Required documentation.

(1) If the C&D landfill meets the location conditions specified in K.A.R. 28-29-330(a)(1), the applicant or the owner or operator shall submit documentation of the capacity of the proposed disposal unit and the capacity of each disposal unit constructed on or after January 1, 2014.

(2) If the proposed disposal unit meets the location and capacity conditions specified in K.A.R. 28-29-330(a)(1) and (2), the applicant or the owner or operator shall submit documentation of the hydrogeologic conditions specified in K.A.R. 28-29-330(a)(3). For the purposes of determining the applicability of K.A.R. 28-29-332, if the disposal unit meets one of the hydrogeologic conditions listed in K.A.R. 28-29-330(a)(3), the applicant or the owner or operator shall not be required to submit documentation of the other hydrogeologic conditions.

(b) Schedule for submission of documentation.

(1) Each applicant for a new C&D landfill permit shall include the documentation specified in subsection (a) with the permit application.

(2) Each owner or operator of an existing C&D landfill that proposes to construct a disposal unit shall submit the documentation specified in subsection (a) on or before the date the construction quality assurance plan for the disposal unit is submitted. (Authorized by and implementing K.S.A. 65-3406; effective Dec. 28, 2012.)

28-29-332. Control of hazardous and explosive gases at C&D landfills; additional design, operating, and postclosure requirements. The owner or operator of each disposal unit at a C&D landfill that meets the conditions of K.A.R. 28-29-330 for determining the applicability of additional design, operating, and postclosure requirements shall comply with the following requirements:

(a) The owner or operator shall design, construct, and operate the disposal unit to prevent contact water from accumulating in the waste.

(b) The owner or operator shall perform both of the following:

(1) Demonstrate whether it will be necessary to pump contact water out of the landfill after the landfill closes in order to prevent contact water from accumulating in the waste; and

(2) include this information in the operating plan.

(c) If the operating plan states that contact water will be pumped out of the landfill after closure, the owner or operator shall obtain financial assurance for postclosure, according to the requirements of K.A.R. 28-29-2101 through 28-29-2113. (Authorized by and implementing K.S.A. 65-3406; effective Dec. 28, 2012.)

28-29-333. Control of hazardous and explosive gases at C&D landfills; response, assessment monitoring, and corrective action. The owner or operator of each C&D landfill shall comply with the following:

(a) Identification of potential problem. If the owner or operator observes or is informed of any indication of a release of landfill gas, the owner or operator shall perform the following:

(1) Immediately assess the potential danger posed to human health and safety;

(2) immediately take all the steps necessary to ensure protection of human health and safety;

(3) notify the department of the observation or information within two business days; and

(4) in consultation with the department, implement appropriate action to assess the concentrations of gas at the landfill.

(b) Action levels. The owner or operator shall comply with the requirements of subsection (c) if gas concentrations exceed any of the following levels:

(1) For methane, either of the following:

(A) 25% of the LEL (1.25% by volume) in any building on the facility property; or

(B) 100% of the LEL (5% by volume) at the facility property boundary;

(2) for hydrogen sulfide, either of the following:

(A) 1 ppm for on-site personnel; or

(B) 0.1 ppm in the ambient air at the facility boundary, based on a 15-minute time-weighted average measured when the wind speed is less than 15 mph; or

(3) for any gas other than methane or hydrogen sulfide, a level that presents a risk to human health or safety equivalent to the levels listed in paragraphs (1) and (2) of this subsection.

(c) Response and assessment monitoring. If the concentration of any gas exceeds the levels specified in subsection (b), the owner or operator shall perform the following actions:

(1) If an exceedance is found at the facility boundary, immediately notify the local government's public health, environment, and emergency management offices;

(2) notify the department within one business day;

(3) within one week and in consultation with the department, develop a gas monitoring plan;

(4) upon approval of the secretary, implement the gas monitoring plan; and

(5) if gas monitoring has continued for one month and the frequency of the exceedances is not decreasing, take long-term corrective action according to the requirements of subsection (d).

(d) Corrective action. If long-term corrective action is required, the owner or operator shall perform the following actions:

(1) Develop and submit to the department a corrective action plan, including provisions for the installation of an active or passive gas management system. The owner or operator shall submit the plan within 60 calendar days of the date the conditions requiring corrective action were met; and

(2) upon approval of the secretary, implement the corrective action plan. (Authorized by and implementing K.S.A. 65-3406; effective Dec. 28, 2012.)

28-29-501. Uncontaminated soil. For the purposes of K.S.A. 65-3402 and amendments thereto, "uncontaminated soil" shall mean soil that meets all the following conditions:

(a) The soil meets the definition of "construction and demolition waste" in K.S.A. 65-3402, and amendments thereto.

(b) The soil has not been generated at a facility that is under state or federal oversight for the investigation or cleanup of contamination, unless the state or federal project manager who is providing the oversight approves the use of the soil as clean rubble, as defined in K.S.A. 65-3402 and amendments thereto.

(c) The soil exhibits no characteristic that would be expected to create either of the following if the soil is managed as clean rubble:

(1) An odor or other nuisance that would be offensive to a reasonable person; or

(2) an obvious risk to human health or safety or the environment, due to any physical or chemical property of the soil.

(d) The soil is determined to be suitable for use as clean rubble by one of the following methods:

(1) The generator of the soil determines that there is no indication of contamination in the soil. Indication of contamination shall be based on information readily available to the generator of the soil, including the following:

- (A) The visual appearance of the soil;
- (B) the odor of the soil; and
- (C) all known past activities at the site from which the soil is being removed.

(2) The generator of the soil obtains analytical data from representative soil samples according to the requirements in subsection (e) and all of the following criteria are met:

- (A) The soil is not a hazardous waste.
- (B) Total nitrate plus ammonia is less than 40 mg/kg.

(C) The level of total petroleum hydrocarbons is less than $N = 1$, as described in section 5.0 of "risk-based standards for Kansas" ("RSK manual"), published in June 2007 by the department and hereby adopted by reference, including all appendices. The GRO tier 2 value shall be 39 mg/kg and the DRO tier 2 value shall be 2000 mg/kg.

(D) If the analyte is a chemical other than nitrate, ammonia, or a petroleum hydrocarbon, all of the following criteria are met:

(i) There is no more than one anthropogenic analyte present in the soil. For the purposes of this regulation, the term "anthropogenic analyte" shall mean a chemical or substance present in the environment due to human activity.

(ii) The anthropogenic analyte is listed in the KDHE tier 2 risk-based summary table in appendix A of the RSK manual.

(iii) The concentration of the anthropogenic analyte is less than the level listed in the KDHE tier 2 risk-based summary table for residential scenarios for the soil pathway or for the soil to ground water protection pathway, whichever is lower.

(3) The secretary determines that if the soil is used as clean rubble, the soil will not present a risk to human health or safety or the environment, based on information provided by the generator of the soil. The generator of the soil shall submit the following information to the department:

(A) Analytical reports from representative soil samples; and

(B) the following information, if requested by the department:

(i) Analytical reports indicating naturally occurring background concentrations at the site from which the soil is being removed;

(ii) the cumulative cancer risk level of all analytes;

(iii) the hazard index value, as defined in K.A.R. 28-71-1, of all analytes; and

(iv) any other information required by the department to evaluate the potential risk to human health or safety or the environment.

(e) If analytical data is used to meet the conditions of this regulation, the following requirements are met:

(1) At least one representative sample shall be collected and analyzed for each 500 cubic yards of soil.

(2) Each analysis shall be performed and reported by a laboratory that has departmental certification, if this certification is available, for that analysis.

(3) Each analytical report shall include the following information:

(A) The results of each analysis;

(B) quality control data;

(C) a copy of the chain of custody for each sample; and

(D) a statement signed by the generator that the analytical results are representative of the soil.

(4) The generator shall maintain each analytical report on file for at least three years after the report is received and shall make the report available to the department upon request. (Authorized by K.S.A. 65-3406; implementing K.S.A. 2008 Supp. 65-3402; effective Jan. 15, 2010.)

PART 9. STANDARDS FOR THE MANAGEMENT OF HOUSEHOLD HAZARDOUS WASTE

28-29-1100. Household hazardous waste. General. (a) Applicability. K.A.R. 28-29-1100 through K.A.R. 28-29-1107 shall apply to each household hazardous waste facility as defined in K.S.A. 65-3402, and amendments thereto. Subsection (f) of this regulation shall apply to collection events that take place at a site that is not a permanent household hazardous waste collection site. The standards in these regulations shall not exempt any materials from applicable state or federal regulations that are more stringent than these regulations. In each case in which the requirements of the household hazardous waste regulations K.A.R. 28-29-1100 through K.A.R. 28-29-1107 conflict with the requirements of the administrative procedure and solid waste management regulations in K.A.R. 28-29-6 through K.A.R. 28-29-23, the requirements of K.A.R. 28-29-1100 through K.A.R. 28-29-1107 shall control.

(b) Definitions. For the purposes of these regulations, the following definitions shall apply:

(1) "Household hazardous waste" or "HHW" means household waste that would be determined to be hazardous waste according to K.A.R. 28-31-4 (b) if the waste were not household waste.

(2) “Nonhazardous household waste” or “NHHW” means household waste that is not HHW.

(3) “Small quantity generator” shall have the meaning specified in K.A.R. 28-31-2.

(4) “USDOT hazard class or division” means the hazard class or division defined by the United States department of transportation and adopted by reference in K.A.R. 28-31-4 (e).

(c) Used oil. Each HHW facility that accepts used oil from household do-it-yourselfers or exempt farmers shall manage the used oil in accordance with K.A.R. 28-31-16 upon receipt of the used oil at the HHW facility’s central collection center. Each HHW facility that transports used oil from businesses shall manage the used oil in accordance with K.A.R. 28-31-16 upon receipt of the used oil at the business site.

(d) Small quantity generator (SQG) waste. Each HHW facility that is permitted to accept SQG waste shall manage all SQG waste that is not hazardous waste in the same manner as that for nonhazardous household waste and shall manage all SQG hazardous waste in the same manner as that for HHW.

(e) Other hazardous waste. Any HHW facility may accept hazardous waste from a source other than a household or an SQG in an emergency, if the facility’s operating plan contains procedures to follow in such an emergency.

(f) Temporary collection events. Each temporary collection event at a fixed site shall be conducted only under the direct supervision of a permitted HHW facility or in accordance with a plan approved by KDHE. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1101. Household hazardous waste facility design. The owner or operator of each HHW facility shall perform the following:

(a) Design and construct each access road to accommodate expected traffic flow in a safe and efficient manner;

(b) construct the floor or base of each household waste receiving area and each processing area of concrete or asphalt;

(c) design and construct each storage area for household waste, except used oil stored in tanks, with a weather-resistant, permanent roof; and

(d) provide secondary containment for all HHW stored for disposal or recycling. The secondary containment shall be capable of contain-

ing either 110 percent of the volume of the largest container or 10 percent of the total volume of all the containers, whichever is greater. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1102. Household hazardous waste facility operations. (a) Nonhazardous household waste.

(1) Each HHW facility operator shall store and manage all NHHW according to the facility’s operating plan and the following requirements:

(A) Place the NHHW in the designated area, as described in the facility operating plan, within one week after it is received;

(B) ensure that each NHHW storage container or each NHHW storage area has a label or sign designating its contents;

(C) when NHHW is present, inspect all NHHW storage areas weekly to assess waste volume and container integrity, and document these inspections in a log that is dated and either signed or initialed by the person who conducted the inspection; and

(D) store NHHW to be distributed for use in a manufacturer’s original container or, for latex paint, in a compatible container provided by the HHW facility. Each container that will be distributed for use shall be labeled, closed, and nonleaking.

(2) Each HHW facility operator shall distribute for use, recycling, or disposal all NHHW accepted by the facility according to all of the following requirements:

(A) NHHW may be distributed for use in a manner equivalent to its originally intended purpose.

(B) NHHW may be disposed of in a permitted municipal solid waste landfill. However, latex paint and all other liquids shall be disposed of in a permitted municipal solid waste landfill only if one of the following conditions is met:

(i) The paint or other liquid is solidified.

(ii) The paint or other liquid is in the original container, and the volume of the container is no greater than five gallons.

(C) NHHW may be disposed of in a sanitary sewer connected to a publicly owned treatment works with written authorization from the operators of the publicly owned treatment works.

(D) The HHW facility may choose to manage certain types of NHHW, as described in the facility’s operating plan, according to the requirements in subsection (b) of this regulation.

(b) Household hazardous waste.

(1) Each HHW facility operator shall store and manage all HHW according to the facility's operating plan and all of the following requirements:

(A) Place the HHW in the designated area, as described in the facility operating plan, within one week after it is received. Sort and segregate all HHW, except HHW that will be distributed for use, by U.S. department of transportation hazard class or division;

(B) except for HHW that will be distributed for use, mark each HHW storage container or each segregated HHW storage area according to U.S. department of transportation hazard class or division;

(C) keep all storage containers that are in direct contact with HHW closed, except when adding or removing waste;

(D) when HHW is present, inspect all HHW storage areas weekly to assess waste volume and container integrity, and document these inspections in a log that is dated and either signed or initialed by the person who conducted the inspection; and

(E) store HHW that will be distributed for use in a manufacturer's original container. Each container that will be distributed for use shall be labeled, closed, and nonleaking.

(2) Each HHW facility operator shall distribute for use, recycling, or disposal all HHW accepted by the facility according to all of the following requirements:

(A) HHW may be distributed for use in a manner equivalent to its originally intended purpose.

(B) All HHW that is transferred for treatment, storage, or disposal shall be transferred to a permitted hazardous waste treatment, storage, or disposal facility by a registered hazardous waste transporter.

(C) All HHW that is transferred for treatment, storage, or disposal shall be manifested as hazardous waste as described in K.A.R. 28-31-4 (d), with the following changes:

(i) For the purposes of paragraph (b)(2)(C) of this regulation, "Kansas or EPA generator" shall be replaced with "HHW facility operator," and "hazardous waste" shall be replaced with "HHW" in K.A.R. 28-31-4 (d).

(ii) All applicable hazardous waste codes for each waste shall be listed on the manifest, using all available information. HHW facilities shall not be required to submit samples for laboratory testing in order to determine hazardous waste codes.

(D) All HHW that is transferred for treatment, storage, or disposal shall be subject to the hazard-

ous waste land disposal requirements specified in K.A.R. 28-31-14.

(E) All HHW that is transferred for treatment, storage, or disposal shall be prepared for transportation off-site as specified in K.A.R. 28-31-4 (e). For the purposes of this paragraph, "Kansas or EPA generator" shall be replaced with "HHW facility operator," and "hazardous waste" shall be replaced with "HHW" in K.A.R. 28-31-4 (e).

(F) The requirements of paragraphs (b)(2)(B) through (b)(2)(E) of this regulation shall not apply to the following wastes:

(i) HHW that is transferred to a universal waste facility and packaged and labeled in accordance with K.A.R. 28-31-15;

(ii) antifreeze that is transferred to a commercial collector under the conditions of an agreement to recycle the antifreeze;

(iii) HHW that is disposed of in the sanitary sewer connected to a publicly owned treatment works with written authorization from the operators of the publicly owned treatment works. HHW shall not be discharged to storm sewers or septic systems;

(iv) containers that have been emptied to the fullest practical extent and are disposed of in a permitted municipal solid waste landfill;

(v) HHW that is transferred between HHW facilities; and

(vi) other waste, as approved by the department.

(c) Storage. Each HHW facility operator shall maintain the quantity of stored material at or below the facility's permitted storage capacity.

(d) Signs. Each HHW facility operator shall post a sign outside of the facility that includes the following information:

(1) The name of the facility;

(2) the hours and days of operation;

(3) the name of the permit holder;

(4) the telephone number of an emergency contact available during nonoperating hours; and

(5) the permit number.

(e) Training. All HHW facility managers, employees, and volunteers that are responsible for sorting, segregating, or processing HHW shall receive a minimum of 24 hours of classroom training related to the proper handling of hazardous materials and shall receive a minimum of eight hours of annual refresher training. Education or experience may be substituted for the required training, subject to departmental approval. No person shall sort, segregate, or process HHW without onsite supervision before

receiving this training. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1103. Mobile HHW collection units. Each permitted facility that transports HHW from a temporary collection site or from a satellite HHW facility to a permitted HHW facility shall perform the following:

(a) Clearly mark "Household hazardous waste" on both sides of the mobile collection unit;

(b) separate all HHW by USDOT hazard class or division before transport;

(c) lab pack or overpack the household waste in containers meeting the USDOT manufacturing and testing specifications for transportation of hazardous materials, as adopted by reference in K.A.R. 28-31-4 (e);

(d) label the containers with a USDOT hazard class or division label or sign;

(e) seal and secure all containers for transport; and

(f) during transportation, carry a bill of lading describing the USDOT hazard class or division and the approximate quantities of the contents of the mobile collection unit. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1104. Satellite HHW facilities. (a) "Satellite HHW facility" shall mean any permanent HHW collection site, located away from the central collection center, that is part of a permitted HHW program.

(b) Each person who owns or operates a satellite HHW facility shall meet all of the following requirements:

(1) The HHW satellite facility shall be described in the approved operating plan of the permitted HHW facility or facilities with which the satellite HHW facility is associated.

(2) The owner or operator of the satellite HHW facility shall submit an operating plan, a facility drawing, and a description of any HHW storage cabinets to the department.

(3) A copy of each bill of lading used for transporting HHW to the central collection center shall be maintained at the satellite HHW facility for a period of three years.

(c) Each person who owns or operates a satellite HHW facility using storage cabinets shall meet all of the following requirements:

(1) A minimum of two and a maximum of four

HHW storage cabinets, including at least one for flammables and one for corrosives, shall be used at each satellite HHW facility.

(2) Each HHW storage cabinet shall be designed for the HHW stored in it.

(3) Each HHW storage cabinet shall have a storage capacity of not more than 120 gallons.

(4) All HHW shall be properly segregated and stored within the appropriate storage cabinets by the end of the working day.

(5) If HHW is present, the facility owner or operator shall inspect all HHW storage areas weekly to assess waste volume and container integrity, and shall document these inspections in a log that is dated and either signed or initialed by the person who conducted the inspection.

(6) Not more than one week after the storage capacity has been reached, the owner or operator shall make arrangements to remove the HHW stored in HHW storage cabinets. HHW stored in HHW storage cabinets shall be removed at least once a year. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1105. HHW reporting and recordkeeping. (a) The owner or operator of each HHW facility shall submit an annual report to the department on a form furnished by the department.

(b) The owner or operator of each HHW facility shall maintain a copy of the approved design plan, closure plan, and all modifications to the plans, at the facility or at another location designated in the facility operating plan, until the facility closes.

(c) The owner or operator of each HHW facility shall maintain at the facility a copy of the approved operating plan and all modifications to the plan, until the facility closes.

(d) The owner or operator of each HHW facility shall maintain the following records at the facility or at another location designated in the facility operating plan, for at least three years:

(1) Copies of the annual report;

(2) training records;

(3) bills of lading;

(4) hazardous waste manifests;

(5) land disposal restriction notifications;

(6) weekly inspection records; and

(7) notification of changes to approved design, operations, and closure plans. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1106. HHW facility closure. The owner or operator of each HHW facility shall meet the following requirements:

- (a) Notify the department at least 60 days before beginning closure;
- (b) remove all household waste within 90 days after last receiving waste; and
- (c) submit to the department certification that the facility has closed in accordance with the specifications in the approved closure plan. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1107. HHW permits. (a) Each person that plans to establish an HHW facility shall submit a permit application to the department on a form supplied by the department. The applicant shall include with the permit application the following items:

- (1) Facility design plan. The facility design plan shall include all of the following information:
 - (A) The type, size, and location of the facility;
 - (B) a regional plan or a map showing the service area;
 - (C) a vicinity plan or map that depicts the following features and information:
 - (i) Residences, wells, surface waters, and access roads within 0.5 mile of the site boundaries, and any other existing or proposed man-made or natural features relating to the project;
 - (ii) adjacent zoning and land use; and
 - (iii) evidence that the facility will not be located within the 100-year floodplain;
 - (D) a topographic map showing elevation contours;
 - (E) a site plan depicting the following features:
 - (i) On-site and off-site utilities, including electricity, gas, and water;
 - (ii) storm and sanitary sewer systems;
 - (iii) right-of-ways; and
 - (iv) the location of buildings and appurtenances, fences, gates, roads, paved lots, parking areas, drainage, culverts, and signs; and
 - (F) detailed plans depicting the following features:
 - (i) Building elevation and plan view;
 - (ii) building floor plans, shelving plans, appurtenances, and necessary detail sections to include electrical and mechanical systems;
 - (iii) designated areas for activities to be conducted at the facility, including receipt, segregation, bulking, distribution, packaging, and storage of household waste; and

- (iv) entrance area gates, fencing, and signs.

(2) Operating plan. The operating plan shall contain the following information:

- (A) The activities to be conducted at the facility, including receipt, segregation, bulking, packaging, storage, and distribution of household waste;
- (B) the activities to be conducted off-site, including operation of mobile collection units, curb-side collection, and satellite storage facilities;
- (C) the procedures for handling ignitable or reactive waste;
- (D) the procedures for identifying and managing small quantity generator waste;
- (E) the duties and responsibilities of facility personnel;
- (F) the training program and requirements for the different types of facility personnel; and
- (G) the emergency response plan for events including spills, fires, equipment failure, power outages, natural disasters, receipt of prohibited materials, and other similar interruptions of normal activities.

(3) Closure plan. The closure plan shall contain the following information:

- (A) The procedure for removing and disposing of waste at closure;
- (B) the procedure for cleaning the facility;
- (C) the schedule for closure; and
- (D) the closure cost estimate on a form supplied by the department.

(b) Modifications to plans. The owner or operator shall notify the department, in writing, of all modifications to the approved plans before the implementation of modifications. Modifications submitted to the department shall be effective 28 calendar days after the date the modification notice is received by the department, unless the department notifies the owner or operator that the modification will require further review before it can be approved. Changes to approved plans shall not conflict with any provision of K.A.R. 28-29-1100 through K.A.R. 28-29-1107. (Authorized by and implementing K.S.A. 1999 Supp. 65-3406 and 65-3460; effective June 16, 2000.)

28-29-1600. Land-spreading; definitions and adoptions. (a) As used in K.A.R. 28-29-1600 through K.A.R. 28-29-1608, each of the following terms shall have the meaning specified in this regulation:

- (1) "Application" means land-spreading application. This term shall include the forms provided by the KCC and all other required submissions.

(2) “Department” means Kansas department of health and environment.

(3) “Drilling waste” means used drilling mud and cuttings generated by the drilling of oil and gas wells or related injection wells that are permitted by the KCC or by the equivalent permitting authority in the state in which the well is located. This term shall not include hydraulic fracturing fluids.

(4) “GPS” means global positioning system.

(5) “Habitable structure” means any structure that is occupied by humans or maintained in a condition that allows it to be occupied by humans. This term shall include dwellings, churches, schools, care facilities, public buildings, office buildings, commercial buildings, and industrial buildings.

(6) “KCC” means Kansas corporation commission.

(7) “Land-spreading” means the disposal of drilling waste by spreading the drilling waste on the land. This term shall not include the use of drilling waste as a product, as described in K.S.A. 65-3409 and amendments thereto, including the use of drilling waste in the construction and maintenance of roads and ponds.

(8) “Land-spreading worksheet” means the land-spreading rate calculation worksheet provided by the KCC.

(9) “NORM” means naturally occurring radioactive material.

(10) “NORM level” means the concentration of residual NORM radium-226 and radium-228 and their progeny as measured in becquerels per kilogram (Bq/kg) or picocuries per gram (pCi/g).

(11) “Operator” means operator, as defined in K.A.R. 82-3-101, of each well that generated the drilling waste.

(12) “Secretary” means secretary of health and environment.

(13) “Water-based drilling mud” means drilling mud that meets both of the following conditions:

(A) The drilling mud consists primarily of bentonite suspended in water.

(B) The liquid component of the drilling mud consists of no more than six percent oil or any oil derivative, including diesel fuel and asphalt blend oil.

(b) The following documents are hereby adopted by reference:

(1) “Standard test method for particle-size analysis of soils,” D422-63, published October 2007 by ASTM international; and

(2) section 3.2 on pages 40 through 65 of “soil survey field and laboratory methods manual,” soil

survey investigations report no. 51, version 1.0, issued in 2009 by the U.S. department of agriculture, natural resources conservation service. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1601. Land-spreading; general requirements. (a) No person may land-spread without having obtained prior written approval from the KCC. Before drilling, each operator that wants to land-spread shall submit an application to the KCC.

(b) If the proposed land-spreading disposal area is more than 160 acres, the operator shall submit two or more applications for the disposal area. Each application shall describe no more than 160 acres.

(c) The approval shall remain in effect for three years after the date on which land-spreading commenced, with the following exceptions:

(1) If land-spreading has not commenced within one year after the approval is granted, the approval shall expire.

(2) One or more one-year extensions to the approval may be granted by the director of the KCC’s conservation division based on the following:

(A) Certification from the operator that the information in the approved application has not changed; and

(B) the operator’s history of compliance with the requirements of K.A.R. 28-29-1600 through 28-29-1608.

(d) Drilling waste from multiple wells may be disposed of on the approved land-spreading site during the approved disposal period. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1602. Land-spreading; application. Each operator that submits an application shall provide the operator name and the lease name on each part of the application that is not submitted directly on the forms provided by the KCC. The operator shall include the following items in the application:

(a) A nonrefundable application fee, as specified in K.S.A. 65-3407c and amendments thereto;

(b) certification that the drilling waste or the disposal site meets each of the following conditions:

(1) The drilling mud that will be used in each well that produces the drilling waste is water-based drilling mud;

(2) the predicted NORM level of the drilling

waste meets the requirements of K.A.R. 28-29-1604. The operator shall submit an affidavit and supporting documentation as required by K.A.R. 28-29-1602(d)(7);

(3) no land-spreading has occurred at the disposal site in the past three years;

(4) the chloride concentration in the soil at the disposal site meets the requirements of K.A.R. 28-29-1604;

(5) the location of the disposal site meets the buffer zone requirements of K.A.R. 28-29-1604;

(6) the maximum slope at the site is eight percent or less;

(7) the depth of unconsolidated material at the surface is at least 24 inches;

(8) the soil at the site meets the requirements of K.A.R. 28-29-1604;

(9) based on historical data or site conditions, the groundwater elevation in the uppermost aquifer underlying the disposal site is at least 10 feet below the ground surface;

(10) if the disposal site is irrigated, the chloride concentration of the irrigation water is less than 350 ppm; and

(11) there is no chloride groundwater contamination below the disposal site, based on the chloride contamination map provided by the department;

(c) for the operator, the following information:

(1) Operator license number;

(2) name;

(3) mailing address; and

(4) the following information about the contact person for the application:

(A) Name;

(B) telephone number;

(C) facsimile number, if available; and

(D) electronic mail address, if available;

(d) for each well from which drilling waste will be generated, the following information:

(1) If the well is permitted in a state other than Kansas, the name and telephone number of the state authority that permitted the well;

(2) the location of the well, including the following:

(A) The state and county in which the well is located;

(B) the legal description of the well;

(C) the number of feet the well is located from the north or south section line and the east or west section line; and

(D) the latitude and longitude of the well, which shall be determined using GPS;

(3) the lease name;

(4) the well number;

(5) the American petroleum institute (API) number;

(6) the expected spud date, as defined in K.A.R. 82-3-101;

(7) an affidavit on a form provided by the KCC, according to the following requirements:

(A) The operator shall certify that the predicted NORM level of the drilling waste meets both of the following conditions:

(i) The maximum predicted NORM level in the drilling waste is no more than 1.5 times the highest NORM level found in drilling waste samples collected from Kansas wells. A summary of NORM levels found in drilling waste samples collected from Kansas wells shall be maintained by the department and provided to any person upon request; and

(ii) the maximum predicted NORM level in the drilling waste is no more than 370 Bq/kg (10 pCi/g);

(B) the operator shall make the certification based upon data from wells drilled through the same geological formations as those of the well identified in the land-spreading application; and

(C) the operator shall include on the affidavit the maximum predicted NORM level of the drilling waste, according to the following:

(i) If the well will be drilled through formations for which the department has summarized and provided data, the operator may use this data to determine the maximum predicted NORM level of the drilling waste;

(ii) if the well will be drilled through formations for which the department has not summarized and provided data, the operator shall submit to the KCC all information available to the operator that can be used to predict the maximum NORM level in the drilling waste; and

(iii) if the NORM level of a formation is dependent on geographic location, the operator shall use that information to determine the maximum predicted NORM level of the drilling waste;

(8) a list of the expected components of the drilling mud and a detailed list of all additives, including the product name and the constituents of each additive; and

(9) a sampling and analysis plan that meets the requirements of K.A.R. 28-29-1605 to determine the chloride concentration of the drilling waste. The plan shall describe the following:

(A) The sampling rate;

(B) the procedures that will be used to collect the samples; and

(C) the procedures that will be used to prepare the samples for analysis;

(e) for the proposed disposal site, the following information:

(1) The name and mailing address of the property owner;

(2) the size of the site, as measured in acres;

(3) the legal description of the site;

(4) a description of current land use at the site and surrounding areas;

(5) documentation of all land-use restrictions and zoning restrictions for the site;

(6) documentation of all local permits that are required for land-spreading at the site;

(7) the distance and direction from the site to the nearest habitable structure;

(8) if the site is irrigated, the chloride concentration in the irrigation water in parts per million. The concentration shall be determined by a laboratory that is accredited for chloride analysis by the secretary;

(9) the depth to the water table and a description of how the depth was determined;

(10) the direction of groundwater flow under the site, if known;

(11) an aerial map of the site. The map shall be detailed enough to locate the site or to determine directions to the site from the nearest highway and shall include the following:

(A) A north arrow and scale;

(B) the location of the site and the property boundaries; and

(C) each of the following features if that feature is located within one-half mile of the site:

(i) Habitable structures;

(ii) waters of the state;

(iii) perennial and intermittent streams;

(iv) ponds, lakes, and wetlands;

(v) domestic water wells;

(vi) municipal wells;

(vii) drainage swales, ditches, and all other physical features that channel overland flow; and

(viii) all other relevant features;

(12) a topographic map of the site that shows the slope of the ground to be used for land-spreading;

(13) a cell identification map that shows a grid dividing the site into cells. Each cell shall cover an area of no more than 10 acres. The map shall include the following information:

(A) The legal description of the site;

(B) the county in which the site is located;

(C) delineation of the boundary of the land-spreading area and each cell within the land-spreading area, based on one or both of the following:

(i) Physical references and measurements; or

(ii) GPS measurements;

(D) a unique label for each cell;

(E) the location of each soil sample that was collected to provide information for the application;

(F) the chloride concentration of the soil within each cell, as determined according to the requirements of K.A.R. 28-29-1603;

(G) the soil texture or textures of the site, as determined according to the requirements of K.A.R. 28-29-1603;

(H) the depth of unconsolidated material at the site;

(I) the areas that receive irrigation;

(J) the areas where vegetation will be established;

(K) the areas where conditions to support crops will be established;

(L) the areas where land restoration, other than establishing vegetation or conditions to support crops, is planned;

(M) the property boundaries;

(N) the ownership and use of adjacent properties; and

(O) the buffer zones required by K.A.R. 28-29-1604;

(14) documentation and analyses supporting all of the chloride concentration and soil texture information provided on the cell identification map, including laboratory chain-of-custody documents; and

(15) a copy of the United States department of agriculture's soil survey map for the site;

(f) documentation that the owner of the proposed disposal site has agreed to the land-spreading, which shall be submitted on a form provided by the KCC;

(g) a site access agreement that grants access to the proposed disposal site to the department and the KCC for the purposes of observation, inspection, and sampling, which shall be submitted on a form provided by the KCC;

(h) a description of the proposed land-spreading procedures, including descriptions of the following:

(1) The manner in which the drilling waste will be stored at the site of generation;

(2) the processes and equipment that will be used to spread the drilling waste at the land-spreading site;

(3) the manner in which the equipment will be operated to ensure that the drilling waste is spread at the approved rate. The description shall include information on the boom width, flow rate, ground speed, and all other factors that will be used to control the land-spreading rate; and

(4) if the operator is required by K.A.R. 28-29-1607 to incorporate the drilling waste into the soil, the processes and equipment that will be used to incorporate the drilling waste into the soil;

(i) a contingency plan that describes how drilling waste will be managed if land-spreading is not allowed due to either of the following:

(1) Weather restrictions; or

(2) the drilling waste exceeding the composition limitations specified in K.A.R. 28-29-1607;

(j) a plan describing how the land-spreading area will be restored after land-spreading, including establishment of vegetation or conditions to support crops. If the land-spreading area is not cropland, the plan shall include the erosion-control measures that will be implemented until vegetation is established; and

(k) any other relevant information required by the KCC to evaluate the application. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1603. Land-spreading; sampling and analysis of soils. Each operator that submits an application to the KCC shall meet all of the following requirements:

(a) Sample collection for chloride analysis. For each cell, as identified on the cell identification map submitted with the application, at least four representative core samples shall be collected according to the following requirements:

(1) Each core shall sample the top 12 inches below the surface.

(2) For each cell, all samples from that cell shall be combined and thoroughly mixed.

(3) The combined samples from each cell shall have a volume of at least one pint.

(4) The label of each sample shall match the unique label of the cell from which the sample was collected, as indicated on the cell identification map submitted with the application.

(b) Chloride analysis. The soil shall be analyzed for chloride concentration by a laboratory that meets one or both of the following conditions:

(1) The laboratory is accredited for chloride analysis by the secretary.

(2) The laboratory is a participant in the North

American proficiency testing program for chloride analysis.

(c) Sample collection for soil texture analysis. For each cell, as identified on the cell identification map submitted with the application, core samples from at least four representative sampling locations shall be collected according to the following requirements:

(1) Each core or set of cores shall sample at least the top 24 inches below the surface.

(2) Each sampling location shall be continuously sampled from the ground surface to the total depth required to provide the information for the application.

(3) Each core or set of cores shall provide a minimally disturbed profile of the soil at that sampling location.

(4) Soil samples shall not be combined with samples from other locations.

(5) Each core shall be labeled in a manner that corresponds to the unique label of the cell from which the core was collected, as indicated on the cell identification map submitted with the application.

(d) Soil texture analysis. The soil texture shall be determined by one of the following:

(1) An agronomist with at least a bachelor of science degree in agronomy or a soil scientist with at least a bachelor of science degree in soil science. The agronomist or soil scientist shall perform the following:

(A) Evaluate the site in person;

(B) determine the soil texture using the feel method described in "soil survey field and laboratory methods manual," which is adopted by reference in K.A.R. 28-29-1600; and

(C) provide documentation characterizing the site; or

(2) a laboratory, according to one or both of the following requirements:

(A) The laboratory shall analyze the soil using methods described in section 3.2 of the "soil survey field and laboratory methods manual," as adopted by reference in K.A.R. 28-29-1600, and shall be a participant in the North American proficiency testing program for those methods; or

(B) the laboratory shall analyze the soil using the method described in "standard test method for particle-size analysis of soils," as adopted by reference in K.A.R. 28-29-1600, and shall be accredited by the American association of state highway and transportation officials (AASHTO) materials reference laboratory (AMRL) proficiency sample program for that method.

(e) Soil texture classification. Each soil sample shall be classified by texture class or subclass according to the texture class table and the texture triangle on page 45 of the "soil survey field and laboratory methods manual," as adopted by reference in K.A.R. 28-29-1600. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1604. Land-spreading; conditions for disposal. Disposal of drilling waste by land-spreading shall be approved by the KCC only if the operator has certified, and provided supporting documentation if required by K.A.R. 28-29-1602, that the drilling waste and the disposal site meet all of the following conditions:

(a) Drilling waste. The drilling waste meets both of the following conditions:

(1) The drilling mud that will be used in each well that will produce the drilling waste is water-based drilling mud.

(2) The predicted NORM level, as defined in K.A.R. 28-29-1600, meets both of the following conditions:

(A) The maximum predicted NORM level is no more than 1.5 times the highest NORM level found in drilling waste samples collected from Kansas wells.

(B) The maximum predicted NORM level is no more than 370 Bq/kg (10 pCi/g).

(b) Previous land-spreading. No land-spreading has occurred at the disposal site in the past three years.

(c) Soil chloride concentration. The chloride concentration in the soil at the disposal site is less than the following:

(1) 300 parts per million (ppm) if the disposal site has previously been used for land-spreading; and

(2) 500 ppm if the disposal site has not previously been used for land-spreading.

(d) Buffer zones. The disposal site is located as follows:

(1) At least 100 feet from each of the following:

(A) Each intermittent stream; and

(B) each drainage swale, ditch, or other physical feature that channels overland flow;

(2) at least 200 feet from each of the following:

(A) The property boundary, unless the adjacent property ownership and use are the same as the property ownership and use of the disposal site;

(B) each perennial stream; and

(C) each freshwater pond, lake, and wetland;

(3) at least 500 feet from each habitable structure;

(4) at least 1,000 feet from each water well that is being used or could be used for domestic or agricultural purposes. If the applicant demonstrates to the KCC that the disposal site is hydrogeologically downgradient from the water well, this distance may be reduced to 500 feet; and

(5) one-half mile or more from each actively producing water well that is used for municipal purposes.

(e) Physical characteristics. The disposal site meets the following conditions:

(1) The maximum slope at the site is eight percent or less.

(2) The depth of unconsolidated material at the surface is at least 24 inches.

(3) Within the top six feet below the surface, there is at least one layer of soil that meets all of the following conditions:

(A) Is continuous across the site;

(B) is at least 12 inches thick;

(C) is above the shallowest consolidated layer; and

(D) consists of one or more of the following soil textures:

(i) Clay, silty clay, or sandy clay;

(ii) silt; or

(iii) loam, clay loam, silty clay loam, sandy clay loam, silt loam, fine sandy loam, or sandy loam.

(4) Based on historical data or site conditions, the groundwater elevation in the uppermost aquifer underlying the disposal site is at least 10 feet below the ground surface.

(f) Irrigation. If the disposal site is irrigated, the chloride concentration of the irrigation water is less than 350 ppm.

(g) Contamination. There is no chloride groundwater contamination below the disposal site, based on the chloride contamination map provided by the KCC. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1605. Land-spreading; sampling and analysis of drilling waste. Each operator that conducts land-spreading shall meet all of the following requirements:

(a) Samples of the drilling waste shall be collected using a procedure that ensures that the samples are representative of the waste.

(b) Samples shall be collected according to the following rates:

(1) For drilling waste stored in tanks, at least one sample from each tank;

(2) for earthen pits containing not more than 12,500 barrels of drilling waste, at least four samples, each from a different quadrant of the pit; and

(3) for earthen pits containing more than 12,500 barrels of drilling waste, at least one sample from each quadrant of the pit, plus at least one additional sample for every additional 1,000 barrels of drilling waste contained in the pit.

(c) Samples of the drilling waste shall be analyzed for chloride concentration in parts per million by one of the following methods:

(1) Sending the samples to a laboratory that meets at least one of the following conditions:

(A) The laboratory is accredited for chloride analysis by the secretary; or

(B) the laboratory is a participant in the North American proficiency testing program for chloride analysis; or

(2) performing a field analysis of the samples. For calculating land-spreading rates, each chloride concentration determined using field analysis shall be multiplied by 1.2, as specified in the land-spreading worksheet.

(d) If the drilling waste is analyzed in the field, all of the following requirements shall be met:

(1) One or more of the following methods shall be used to analyze the drilling fluid filtrate:

(A) Silver nitrate titration;

(B) mercuric nitrate titration;

(C) direct measurement using a chloride ion selective electrode;

(D) calculation of concentration based on electrical conductivity, using the equations $EC \times 0.64 = TDS$ and $TDS \times 0.61 = CC$, where EC means electrical conductivity in micromhos or microsiemens per centimeter, TDS means total dissolved solids, and CC means chloride concentration in parts per million; or

(E) an alternate field method proposed by the operator and approved in writing by the director of the KCC's conservation division.

(2) Each analysis shall be accompanied by the following information:

(A) The manufacturer's information sheet for the equipment that will be used;

(B) the calibration requirements for the equipment;

(C) the methods that will be used to prepare the sample for testing;

(D) the chloride concentration range of the method; and

(E) any limitations of the method.

(3) The operator shall ensure that each person that analyzes drilling waste in the field is qualified to perform each analysis. The operator shall maintain documentation of the qualifications, including training and experience, of each person that analyzes drilling waste in the field.

(4) All equipment that is used for analyzing drilling waste in the field shall be calibrated according to the manufacturer's instructions before the analyses are conducted. For each piece of equipment, a log documenting all calibrations shall be maintained. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1606. Land-spreading; determination of land-spreading rates. Before land-spreading may occur, each operator that plans to land-spread shall perform the following for each cell, as identified on the cell identification map, on which drilling waste will be land-spread:

(a) Analyze the drilling waste to be land-spread at the disposal site to determine the chloride concentration, as specified in K.A.R. 28-29-1605; and

(b) based on the chloride concentrations of the drilling waste and chloride concentrations of the soil in the cell, determine the maximum land-spreading rate according to the following requirements:

(1) The determination shall be based on the land-spreading worksheet; and

(2) the land-spreading rate shall ensure that, after land-spreading, both of the following requirements are met:

(A) Assuming uniform distribution of the chloride through the upper 12 inches of the soil, the total chloride concentration shall be 900 ppm or less; and

(B) the average thickness of the drilling waste across the site shall be no greater than two inches, and the drilling waste shall be distributed as uniformly as possible across the site. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1607. Land-spreading; operating and management requirements. Each operator that conducts land-spreading shall meet all of the following requirements:

(a) Storage of drilling waste. The operator shall store the drilling waste at the site of generation in pits permitted by the KCC or in tanks until the drilling waste is transported to the disposal site. The operator may store drilling waste in sealed

tanks at the disposal site for no more than 24 hours before the drilling waste is land-spread.

(b) Time frame for land-spreading. The operator shall comply with the following:

(1) Complete the land-spreading within the approval period specified in K.A.R. 28-29-1601; and

(2) notify the appropriate KCC district office at least 48 hours before land-spreading.

(c) Composition of drilling waste. The operator shall land-spread only if the composition of the drilling waste meets the following requirements:

(1) The chloride concentration of the drilling waste is less than 10,000 parts per million (ppm). The operator may blend drilling waste that has a chloride concentration greater than 10,000 ppm with drilling waste that has a chloride concentration of less than 10,000 ppm to create a combined drilling waste that has a chloride content of less than 10,000 ppm.

(2) The NORM level in the drilling waste, as identified through any subsequent sampling and analysis, remains consistent with the information submitted with the application. If the observed NORM level in the drilling waste is more than 370 Bq/kg (10 pCi/g), the operator shall immediately cease land-spreading and shall notify the KCC within two business days. The operator shall evaluate the condition of the land-spreading site to determine any potential site impact and perform all corrective measures required by the KCC or the department to protect human health or safety or the environment. The operator shall not conduct any additional land-spreading at the site unless authorized by the KCC.

(d) Weather restrictions. The operator shall not conduct land-spreading if at least one of the following conditions exists at the disposal site:

(1) Precipitation is occurring or, according to national weather service predictions, has a greater than 50 percent probability of occurring within 24 hours after the land-spreading is completed.

(2) The soil cannot readily absorb the moisture content of the drilling waste due to soil moisture content or frozen soil, or for any other reason.

(e) Land-spreading requirements. The operator shall land-spread according to all of the following requirements:

(1) The operator shall land-spread at a rate no greater than the land-spreading rate calculated using the land-spreading worksheet.

(2) The operator shall, as much as possible, land-spread so that the drilling waste has a uniform thickness over the disposal site.

(3) The operator shall limit the average thickness of the drilling waste to the calculated depth, unless the calculated depth is more than two inches. If the calculated depth is more than two inches, the operator shall limit the average thickness of the drilling waste to no more than two inches.

(4) The operator shall land-spread in a manner that prevents the drilling waste from either ponding on the disposal site or running off the disposal site or into buffer zones.

(5) The operator shall land-spread according to the methods described in the approved application. If any deviation from the approved methods occurs and the deviation could result in a chloride loading rate greater than the rate approved by the KCC, the operator shall report the deviation to the KCC by the end of the next business day.

(f) Incorporation. The operator shall incorporate the drilling waste into the soil if the precipitation in the county in which the disposal site is located averages more than 25 inches per year. The following counties and any county located east of these counties shall be designated as meeting this condition: Jewell, Mitchell, Lincoln, Ellsworth, Rice, Reno, Kingman, and Harper.

The operator shall incorporate the drilling waste into the soil using standard agricultural methods, including discing, plowing, knifing, and shallow injection. This procedure shall be performed as soon as possible and not later than 48 hours after land-spreading is completed. The operator shall incorporate the drilling waste into the soil according to the methods described in the approved application.

(g) Land restoration. The operator shall take steps to restore the land-spreading area as described in the approved application. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-1608. Land-spreading; reporting and recordkeeping. Each operator that has conducted land-spreading shall meet all of the following requirements for each land-spreading site:

(a) Within 60 days after the conclusion of land-spreading, submit a land-spreading report to the KCC. The operator shall identify each part of the report by the KCC land-spreading approval number from the approved application. The land-spreading report shall contain the following items:

(1) The following information for each well from which the drilling waste was generated, on a form provided by the KCC:

- (A) The operator name and license number;
- (B) if the well is permitted in a state other than Kansas, the name and telephone number of the state authority that permitted the well;
- (C) the location of the well, including the following:
- (i) The state and county in which the well is located;
 - (ii) the legal description of the well;
 - (iii) the number of feet the well is located from the north or south section line and the east or west section line; and
 - (iv) the latitude and longitude of the well, as determined using GPS;
- (D) the lease name;
- (E) the well number;
- (F) the American petroleum institute (API) number;
- (G) the spud date, as defined in K.A.R. 82-3-101;
- (H) verification that the drilling mud components are the same as those components identified on the approved application;
- (I) verification that the chloride concentration of the drilling waste is less than 10,000 parts per million (ppm); and
- (J) the following information about the person performing the land-spreading, if different from the operator:
- (i) The name of the individual or company;
 - (ii) the contact person's name;
 - (iii) the contact person's telephone number or cellular phone number, or both; and
 - (iv) the contact person's electronic mail address, if there is one;
- (2) for the area that was actually used for land-spreading, an updated version of the cell identification map that was submitted with the application. The updated map shall include all information on the original cell identification map and the following information:
- (A) The date or dates on which land-spreading occurred;
 - (B) the land-spreading contractor name;
 - (C) identification of each well from which the drilling waste was generated;
 - (D) for each tank and each pit that was used to store drilling waste, the area where that drilling waste was land-spread, according to the following requirements:
 - (i) The dimensions of the area used for land-spreading shall be added to the map, if the area used for land-spreading is different from the cell boundaries, and shall be based on either physical references and measurements or GPS measurements, or both; and
 - (ii) the tank and pit numbers shall correspond to the labels used in the land-spreading worksheet; and
 - (E) notation identifying the cells that were not used for land-spreading;
 - (3) a description of the procedures that were used to sample the drilling waste and the sampling rates;
 - (4) a description of the methods that were used to analyze the drilling waste;
 - (5) the results of each analysis of the drilling waste;
 - (6) the completed land-spreading worksheet;
 - (7) for each cell within the land-spreading site, the following information:
 - (A) The volume of drilling waste that was spread on the cell; and
 - (B) a description of the land-spreading procedures that were used, including the following:
 - (i) Documentation of each variation from the processes or equipment described in the approved application;
 - (ii) a description of each deviation from the operating and management requirements of K.A.R. 28-29-1607; and
 - (iii) if the drilling waste was incorporated into the soil, a statement of the maximum time period from land-spreading to incorporation; and
 - (8) if corrective measures were required by the KCC or the department at the land-spreading site, the following information:
 - (i) A description of the conditions warranting the corrective measures;
 - (ii) a copy of the sampling and analysis plan, if this plan was required;
 - (iii) the results of all sampling and analyses that relate to the corrective measures;
 - (iv) a description of the corrective measures implemented at the land-spreading site; and
 - (v) a description of all long-term site monitoring or land-use restrictions associated with the site conditions;
 - (b) within 12 months after the conclusion of land-spreading, submit to the KCC a report describing the timing and success of establishing vegetative cover or conditions suitable to support crops. If the establishment of vegetative cover or conditions suitable to support crops was unsuccessful, the operator shall submit a new plan describing how vegetative cover or conditions suitable to support crops will be established. The operator shall identify the report, plan, or both, by

the KCC land-spreading approval number from the approved application; and

(c) maintain the following documents, identified by the KCC land-spreading approval number from the approved application, for at least five years after the land-spreading occurs and make the documents available to the department and the KCC, upon request:

- (1) The results of all analyses;
- (2) a copy of each application and approval;
- (3) a copy of each land-spreading report and all required attachments; and
- (4) if any drilling waste was analyzed in the field, a copy of all calibration logs for each piece of equipment used and the qualifications of each person that performed the analyses. (Authorized by and implementing K.S.A. 2012 Supp. 65-3407c; effective Oct. 11, 2013.)

28-29-2011. Waste tire permit fees. For each permit required in K.S.A. 65-3424b and amendments thereto, the applicant or permittee shall pay the applicable fee according to the following schedules.

- (a) Permit application fees.
 - Mobile waste tire processor \$250
 - Waste tire collection center..... \$100
 - Waste tire processing facility..... \$250
 - Waste tire transporter..... \$100
- (b) Annual permit renewal fees.
 - Mobile waste tire processor \$100
 - Waste tire collection center..... \$50
 - Waste tire processing facility..... \$100
 - Waste tire transporter..... \$50

(Authorized by K.S.A. 65-3424h; implementing K.S.A. 2006 Supp. 65-3424b; effective Oct. 26, 2007.)

PART 10. FINANCIAL REQUIREMENTS

28-29-2101. Financial assurance for closure and postclosure. In K.A.R. 28-29-2101 through K.A.R. 28-29-2113, “facility” shall mean a solid waste disposal area, a solid waste processing facility, or both.

(a) Evidence of financial assurance. The owner or operator of each facility shall submit to the department evidence of financial assurance for the facility for the cost of closure, postclosure, or both, as specified in K.S.A. 65-3407, and amendments thereto. The financial assurance shall meet the following requirements:

(1) Be continuous during the active life of the facility and the required postclosure care period;

(2) be in an amount that is equal to or greater than the accepted or revised amount as specified in subsection (e) of this regulation;

(3) be available when needed; and

(4) be legally enforceable.

(b) Financial assurance methods.

(1) Allowable financial assurance methods shall consist of the following:

(A) A funded trust fund, as specified in K.A.R. 28-29-2103;

(B) a surety bond guaranteeing payment, as specified in K.A.R. 28-29-2104;

(C) a surety bond guaranteeing performance, as specified in K.A.R. 28-29-2105;

(D) an irrevocable letter of credit, as specified in K.A.R. 28-29-2106;

(E) an insurance policy, as specified in K.A.R. 28-29-2107;

(F) a corporate financial test, as specified in K.A.R. 28-29-2108;

(G) a corporate financial guarantee, as specified in K.A.R. 28-29-2109;

(H) a local government financial test, as specified in K.A.R. 28-29-2110;

(I) a local government guarantee, as specified in K.A.R. 28-29-2111;

(J) use of ad valorem taxing authority for a local government subdivision of the state that owns or operates a solid waste facility other than a municipal solid waste landfill, as specified in K.A.R. 28-29-2112; and

(K) the following simplified financial instruments, as specified in K.A.R. 28-29-2113:

(i) A simplified permit bond for facilities with a closure cost estimate of \$100,000 or less;

(ii) a simplified irrevocable letter of credit for facilities with a closure cost estimate of \$100,000 or less; and

(iii) an assigned certificate of deposit for facilities with a closure cost estimate of \$25,000 or less.

(2) Any owner or operator may use a combination of instruments or methods as specified in these regulations, except that a method using a financial instrument guaranteeing performance shall not be used in combination with an instrument guaranteeing payment. Each method used in combination shall satisfy the requirements specified in these financial assurance regulations for its use.

(3) Any board of county commissioners that has established a dedicated fee fund pursuant to K.S.A. 65-3415f, and amendments thereto, may reduce the amount of financial assurance

demonstrated by any other allowable method by the current balance accumulated in the dedicated fee fund at the time that the evidence of financial assurance is submitted.

(4) If the financial assurance is a purchased financial instrument, it shall be purchased from a financial, insurance, or surety institution meeting the quality and reliability standards suitable to institutions of that type and the standards specified in these financial assurance regulations.

(c) Calculation of financial assurance. The owner or operator of each facility shall meet the following requirements when calculating the amount of financial assurance for the current estimated cost to provide for closure, postclosure, or both.

(1) The owner or operator shall meet the following requirements to determine the area or capacity to be included in the calculation of estimated cost.

(A) For each solid waste processing facility, the amount of closure financial assurance shall be calculated as the cost of removing and disposing of the greatest volume of waste allowed by terms and conditions of the permit, and all other costs relevant to certification of final closure, including certification.

(B) For each solid waste disposal area, the amount of closure financial assurance shall be calculated as the cost to complete final closure of the largest area to lack final cover at any one time before the next annual permit renewal. The calculated cost shall include the cost to complete all closure activities in a manner consistent with the approved facility closure plan.

(C) For each solid waste disposal area, the amount of postclosure financial assurance shall be calculated as the cost to be incurred for the largest area to have waste in place before the next annual permit renewal. The calculated cost shall include the cost to conduct the following, in a manner consistent with the approved facility postclosure plan, during the postclosure period of 30 years and any extensions of the postclosure period required by the secretary:

(i) Care and maintenance of the area, including all appurtenances; and

(ii) all required environmental monitoring.

(2) The owner or operator shall calculate the amount of financial assurance required by applying third-party costs to the activities listed in the closure plan and postclosure plan. The resulting amount shall not be discounted, nor shall any off-

set for the sale of recoverable materials be subtracted. Third-party costs shall be determined from one or more of the following sources:

(A) Representative costs supplied by the department;

(B) actual invoices paid by the owner or operator for the same or similar work;

(C) written bids from professional contractors having no other financial interest in the facility or its use; or

(D) authoritative costing tables issued by publishers recognized for their research into the costs of the activities to be priced.

(3) If the calculated amount does not include a specific allowance to pay for contingent events, the owner or operator shall add an amount equal to 10% of the total cost for the purpose of determining the amount of financial assurance required.

(4) The owner or operator shall submit the cost estimates on worksheets provided by the department or on other forms that contain the same information.

(d) When submissions are required. The owner or operator of each facility shall submit evidence of financial assurance to the department at the following times:

(1) Before the facility permit is issued by the secretary, including transferred permits;

(2) before a permit modification is issued by the secretary;

(3) annually during the active life of the facility, on or before the permit renewal date; and

(4) annually during the required period of postclosure, on or before the permit renewal date that was effective during the active life of the facility.

(e) Evaluation of amount of financial assurance.

(1) Upon receipt of the closure cost estimate, postclosure cost estimate, or both, from the owner or operator, the estimate or estimates shall be evaluated by the department to determine if the estimated amount of financial assurance is acceptable, according to the following criteria:

(A) The activities planned meet the requirements of the Kansas solid waste statutes and regulations, comply with all permit conditions, and are protective of public health and safety and the environment; and

(B) the method of estimating costs for the planned activities meets the requirements of this regulation.

(2) Revisions shall be made by the department in accordance with the evaluation, if the cost estimate factors are not acceptable.

(f) Annual updates to financial assurance. The owner or operator shall update the financial assurance amount, on or before the annual renewal date of each permit during the active life of the facility and annually during the required period of postclosure care, by recalculating the cost of closure, postclosure care, or both, using current dollars, or by the addition of an inflation factor to the amount accepted by the department for the prior year.

(1) If a change to any of the following has occurred that will change the cost of closure, postclosure, or both, the owner or operator shall recalculate the affected cost or costs, consistent with the change:

(A) The closure plan, as submitted or as approved;

(B) the postclosure plan, as submitted or as approved; or

(C) the conditions at the facility.

(2) If the inflation factor is used, the financial assurance instrument or other method of demonstrating financial assurance shall be adjusted to the updated amount according to the following formula:

$$\frac{IPD_y}{IPD_{y-1}} \times FA_{y-1} = FA$$

where:

IPD_y represents the current annual implicit price deflator for the gross domestic product;

IPD_{y-1} represents the previous year's implicit price deflator for the gross domestic product;

FA_{y-1} represents the previous year's approved estimate of closure or postclosure, or both; and

FA represents the current estimated cost of closure or postclosure, or both.

(g) Failure of the financial assurance method, or an inadequate amount of financial assurance. Each owner or operator of a facility who obtains information that a financial assurance instrument or other method has failed to meet the standards established by these financial assurance regulations for its use, or that the amount of financial assurance provided has become inadequate for reasons other than general annual price inflation, shall provide alternate or increased financial assurance of the type and within the time periods specified in these financial assurance regulations, but not later than 90 days after obtaining the information.

(h) Release from the requirement to provide financial assurance. Each owner or operator shall be released from the requirement to provide fi-

ancial assurance for a facility for closure or postclosure care, or both, when the owner or operator is released by the department from further obligation to perform closure activities, postclosure activities, or both, at the facility.

(i) Exception for certain closed municipal solid waste landfills. The financial assurance requirements of subsection (a) of this regulation shall not apply to closed municipal solid waste landfills that are exempted from K.A.R. 28-29-101 through K.A.R. 28-29-120 according to the closure dates specified in K.A.R. 28-29-100.

(j) Exception to the requirement for postclosure financial assurance for facilities other than municipal solid waste landfills. Postclosure financial assurance shall not be required by the secretary for a facility that is not a municipal solid waste landfill unless the secretary determines that recurring environmental monitoring is required during the entire postclosure period.

(k) Exception to the closure plan pricing requirements for waste tire permittees. No waste tire processing facility, waste tire collection center, mobile waste tire processor, or waste tire transporter permittee shall be subject to the closure plan pricing requirements of subsections (c) and (f) of this regulation. The permittee shall determine the amount of financial assurance according to the following criteria:

(1) Waste tire processing facilities and waste tire collection centers. The amount of financial assurance shall correspond to the closure cost estimate, as specified in K.A.R. 28-29-30.

(2) Mobile waste tire processors. The amount of financial assurance shall be \$1,000.00.

(3) Waste tire transporters. The amount of financial assurance shall correspond to the average number of passenger tire equivalents (PTEs) transported per month, according to the following schedule:

PTEs transported	Financial assurance
0 through 1,000.....	\$1,000.00
1,001 through 10,000.....	\$5,000.00
more than 10,000.....	\$10,000.00

(Authorized by K.S.A. 65-3406 and 65-3424h; implementing K.S.A. 2006 Supp. 65-3407 and K.S.A. 2006 Supp. 65-3424b; effective Feb. 24, 2000; amended Oct. 26, 2007.)

28-29-2102. Financial assurance for corrective action. Reference to the "facility" in these financial assurance regulations shall mean a

solid waste disposal area or a solid waste processing facility, or both.

(a) Requirement to provide financial assurance. Each owner or operator of a facility who is required to undertake a corrective action program pursuant to the provisions of K.A.R. 28-29-114, or by order of any court of competent jurisdiction, shall provide evidence of financial responsibility for the cost of corrective action in the manner and form prescribed by these financial assurance regulations. Each owner or operator required to perform corrective action for a facility shall provide and maintain financial assurance that is continuous, adequate in amount, available when needed, and legally enforceable.

(b) Financial assurance methods. Allowable financial assurance methods shall be those specified in K.A.R. 28-29-2101(b).

(c) Provider of the financial assurance. The financial assurance for corrective action shall be supplied by one of the providers specified in K.A.R. 28-29-2101(c).

(d) Demonstration of financial assurance, when required. Each owner or operator required to undertake a program of corrective action shall provide a demonstration of financial assurance to the department at the following times:

(1) Within 120 days following whichever of the following dates is earliest:

(A) The date that the selected remedy was filed with the department by the owner or operator according to the provisions of K.A.R. 28-29-114(b); or

(B) the date that the secretary informed the facility of the amount of financial assurance required based on a probable remedial cost estimate; and

(2) annually during the corrective action period, on or before the anniversary of the date the first financial assurance demonstration was required.

(e) Review of financial assurance demonstrations. Financial assurance demonstrations shall be reviewed by the department and either approved or disapproved. A financial assurance method that has been disapproved by the department shall be replaced with an alternate method as specified in these financial assurance regulations to maintain continuous assurance during the corrective action period. A purchased financial instrument that has been disapproved because of wording or the quality of the issuing institution, or for any other reason, shall be replaced by an instrument acceptable to the department or by another method listed in K.A.R. 28-29-2101(b)(1), to maintain continuous assurance.

(f) Calculation of required financial assurance.

(1) The financial assurance requirement shall be based upon the total cost accumulated in a detailed estimate of the cost of the corrective action plan for implementing the remedy approved or specified by the department according to K.A.R. 28-29-114(b).

(2) A probable remedial cost estimate for the financial assurance required to implement corrective measures at the facility may be developed by the secretary before a remedy is submitted by the facility and approved by the department.

(3) If a trust fund is selected to provide the financial assurance, a separate estimate shall be made of the cost to be incurred during each year of the corrective action plan.

(4) The corrective action plan shall be priced using one or more of the sources specified in K.A.R. 28-29-2101(f)(2).

(5) The total amount of the corrective action plan shall not be discounted, nor shall any offset for the sale of recoverable materials be subtracted.

(6) If the amount does not include a specific allowance to pay for contingent events, an amount equal to 10 percent of the total cost shall be added for the purpose of determining the amount of financial assurance required.

(g) Evaluation of amount of financial assurance. Upon receipt of a priced corrective action plan from the owner or operator, the plan shall be evaluated by the department to determine if the amounts calculated are sufficient for determining the amount of financial assurance required, or revisions shall be made by the department in accordance with the evaluation if the amounts are not sufficient. The adequacy of the physical actions planned and the pricing sources shall be considered in the departmental evaluation. Each owner or operator shall demonstrate financial assurance equal to the amount accepted or determined by the department.

(h) Annual updates to financial assurance. Each owner or operator shall update the financial assurance amount on or before the anniversary of the date the first financial assurance demonstration was required by this regulation. The financial assurance amount shall be updated by using one or more of the methods specified in K.A.R. 28-29-2101(h).

(i) Failure of the financial assurance method, or an inadequate amount of financial assurance. Each owner or operator required to process a corrective action plan who obtains information that a financial assurance instrument or other method

in use has failed to meet the standards established by these financial assurance regulations for its use, or that the amount of financial assurance provided has become inadequate for reasons other than general annual price inflation, shall provide alternate or increased financial assurance of the type and within the time periods specified in these financial assurance regulations, but in no event later than 90 days after obtaining the information.

(j) Release from the requirement to provide financial assurance. Each owner or operator required to provide financial assurance for corrective action shall be released from the requirement when the department or any court having jurisdiction releases the owner or operator from further obligation to perform corrective action activities at the facility.

(k) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2103. Financial assurance provided by a funded trust fund. (a) Funded trust fund. Any owner or operator of a solid waste disposal area or processing facility may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by establishing a trust fund that conforms to the requirements of this regulation and by submitting a copy of the trust agreement, with an original signature, to the department.

(1) Each owner or operator of a new facility shall submit to the department a copy of the trust agreement, with an original signature, for closure or postclosure, or both, before the permit is issued by the department.

(2) Each owner or operator required to provide financial assurance for a corrective action plan shall submit to the department a copy of the trust agreement, with an original signature, within the times specified in K.A.R. 28-29-2102(d).

(3) The trustee financial institution shall meet the following criteria:

(A) Be unrelated to the owner or operator;
 (B) have the authority to act as trustee for the facility in the state of Kansas; and
 (C) be a trust operation regulated and examined by a state or federal agency.

(b) Form of the trust agreement.

(1) The wording of the trust agreement shall be identical to the wording in the document provided by the department.

(2) The trust agreement shall establish a trust account, referred to in this regulation as "the fund," for the receipt of annual payments into the fund and receipt of the earnings on the accumulated amount.

(3) Each owner or operator shall update schedule A of the trust agreement within 60 days following a change in the amount of the current closure, postclosure, or corrective action cost estimate covered by the agreement.

(c) Payments into the fund for closure and postclosure. The owner or operator shall annually make payments into the fund for closure or postclosure, or both, over the estimated life of the facility as approved by the department. The approved facility life shall be referred to in this regulation as the "pay-in period." The pay-in period shall be changed each time a new facility life is determined by the owner or operator and approved by the department. The pay-in period shall not exceed 30 years from the date a new facility is permitted or the date these financial assurance regulations become effective, whichever is later. Payments into the fund for closure or postclosure, or both, shall be calculated as follows:

(1) The first payment into the fund for a new facility shall be made before the permit is issued by the department. The first payment shall be equal to the current, approved estimate of closure or postclosure costs, or both, divided by the number of years in the pay-in period.

(2) The owner or operator shall make subsequent payments on or before the due date for each annual permit renewal. The amount of each subsequent payment shall be calculated by the following formula:

$$\frac{CE - CV}{Y} = P$$

where:

CE represents the current cost estimate for closure or postclosure, or both;

CV represents the current value of the fund. The current value of the fund shall be the current tax cost of the fund as reported in the trustee report unless market value is lower, in which case the lower value shall be used in the formula;

Y represents the number of years remaining in the pay-in period; and

P represents the amount of the required payment.

(3) Any owner or operator may accelerate payments into the fund or may deposit the full amount

of the current estimate for closure or postclosure costs, or both, at the time the fund is established. After making the accelerated or full payments, the owner or operator shall maintain the fund at least in the amount it would have been if initial and annual payments had been made according to the requirements in paragraphs (c)(1) and (c)(2) of this regulation.

(4) If the owner or operator establishes a trust fund for closure, postclosure, or both, after having used another allowable method of providing financial assurance, the first payment into the fund shall be at least the amount that the fund would have contained if the trust fund had been used as the first method.

(5) After the pay-in period is complete, whenever the current approved cost estimate for closure or postclosure, or both, is changed, the owner or operator shall compare the new estimate with the trustee's most recent report of the current value of the fund and, if the fund is deficient, shall deposit the amount of deficiency on or before the date required by K.A.R. 28-29-2101(i).

(6) After the pay-in period is complete, if the value of the fund exceeds the current approved estimate of closure or postclosure costs, or both, or if the owner or operator substitutes another approved method of providing financial assurance, the owner or operator may submit a request to the department for return of the excess amount. The request shall be evaluated by the department. The requested amount shall be approved, changed, or denied. The trustee shall make payment from the fund in the amount determined by the department's evaluation.

(d) Reimbursement from the closure or postclosure fund. After beginning final closure, and annually during the postclosure period, the owner or operator or another authorized person may request reimbursement for the costs incurred in carrying out the actions required by the approved closure or postclosure plan, or both. The reimbursement request shall include documentation for the costs to be reimbursed from the fund. The request shall be evaluated by the department. Reimbursement may be authorized by the department to the extent that, after the reimbursement is issued by the trustee, the fund still contains the amount required to complete closure or postclosure, or both. The trustee shall make payment from the fund in the amount determined by the department's evaluation.

(e) Payments into the fund for corrective action.

Each owner or operator shall make payments into the fund for corrective action annually during the first half of the approved corrective action period. The first half of the corrective action period shall be the "pay-in period." The pay-in period shall be changed at any time that a new corrective action period is determined by the owner or operator and approved by the department. The pay-in period shall not exceed seven years beginning on the date these financial assurance regulations become effective, or 120 days after the date determined by K.A.R. 28-29-2102(d), whichever is later. Payments into the fund for corrective action shall be calculated as follows:

(1) The first payment into the fund shall be at least in the amount of half of the approved estimate of the total cost of corrective action for the entire corrective action period, divided by the number of years in the pay-in period.

(2) The amount of each subsequent payment shall be determined by the following formula:

$$\frac{RB - CV}{Y} = P$$

where:

RB represents the required balance, defined as the total amount of corrective action cost estimated to be incurred in the last half of the corrective action period;

CV represents the current value of the trust fund. The current value of the fund shall be the current tax cost of the fund as reported in the trustee report unless market value is lower, in which case market value shall be used in the formula;

Y represents the number of years remaining in the pay-in period; and

P represents the amount of the required payment.

(3) Any owner or operator may accelerate payments into the fund or may deposit the full amount of the required balance at the time the fund is established. After making the accelerated or full payments, the owner or operator shall maintain the fund at least in the amount it would have been if initial and annual payments had been made according to the requirements in paragraphs (e)(1) and (e)(2) of this regulation.

(4) If the owner or operator establishes a corrective action trust fund after having used another allowable method of providing financial assurance, the first payment into the fund shall be at least the amount that the fund would have contained if the trust fund had been used as the first method.

(5) After the pay-in period is complete, whenever the current estimated cost of corrective action for the remaining corrective action period exceeds the amount of the current value of the fund, the owner or operator shall deposit the deficiency on or before the deadline specified in K.A.R. 28-29-2102 (i).

(f) Reimbursement from the corrective action fund. After the pay-in period is complete or after the required balance of the fund is reached, the owner or operator or another authorized person may request reimbursement for the costs incurred in carrying out the actions required by the corrective action plan. The reimbursement request shall include documentation of the costs to be reimbursed from the fund. The request shall be evaluated by the department. Reimbursement may be authorized by the department to the extent that, after the reimbursement is issued by the trustee, the fund still contains the amount required to complete the corrective action plan. The trustee shall make payment from the fund in the amount determined by the department's evaluation.

(g) Termination of the trust agreement. Any owner or operator may request termination of the trust agreement and return of any monies remaining in the fund if any of the following conditions is met:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation to provide financial assurance for closure, postclosure, corrective action, or any combination of these, at the permitted facility.

(3) The owner or operator completes corrective action required by order of any court of competent jurisdiction and is released from further obligation by the court at the permitted facility.

(h) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2104. Financial assurance provided by a surety bond guaranteeing payment.

(a) Financial guarantee bond. Any owner or operator of a permitted solid waste disposal area or processing facility may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both,

by obtaining a financial guarantee bond that conforms to the requirements of this regulation and by submitting the original bond to the department.

(1) Each owner or operator of a new facility shall submit to the department the bond for closure or postclosure, or both, before the permit is issued by the department.

(2) Each owner or operator required to provide financial assurance for a corrective action plan shall submit the bond to the department within the times specified in K.A.R. 28-29-2102(d).

(3) The surety institution shall meet the following criteria:

(A) Be unrelated to the owner or operator;

(B) have the authority to issue surety bonds in Kansas; and

(C) be listed as an acceptable surety institution on federal bonds.

(b) Form of the financial guarantee bond. The wording of the financial guarantee bond shall be identical to the wording in the document provided by the department. If the penal sum of the bond is increased during the life of the bond, the owner or operator shall provide written acceptance of the new amount, indicated by a signed acceptance placed on the certificate of increase issued by the surety institution. The original signed and accepted certificate of increase shall be filed with the department.

(c) Standby trust fund. Each owner or operator who uses a financial guarantee bond to satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, shall also establish a standby trust fund. A copy of the standby trust agreement with an original signature shall be submitted to the department along with the original financial guarantee bond. Under the terms of the bond, all payments from the penal sum shall be deposited by the surety institution directly into the standby trust fund, in accordance with instructions from the department. The standby trust fund shall conform to the requirements specified in K.A.R. 28-29-2103, except that, until the trust account is funded pursuant to the requirements of this regulation, the following shall not be required:

(1) Payments into the fund as specified in K.A.R. 28-29-2103(c) or (e);

(2) updates to schedule A of the trust agreement as specified in K.A.R. 28-29-2103(b)(3);

(3) annual valuations as required by the trust agreement; and

(4) notices of nonpayment as required by the trust agreement.

(d) Provisions of the financial guarantee bond for closure and postclosure. The financial guarantee bond for closure or postclosure, or both, shall require that the owner or operator perform one of the following:

(1) Fund the standby trust fund in the amount of the penal sum of the bond before beginning final closure of the facility;

(2) fund the standby trust fund in the amount of the penal sum of the bond within 15 days after an administrative order issued by the department to begin closure becomes final, or within 15 days after an order to begin final closure is issued by any court of competent jurisdiction; or

(3) provide alternate financial assurance as specified in these financial assurance regulations and obtain the department's written approval of the assurance provided, within 90 days after receipt by both the owner or operator and the department of a notice of cancellation from the surety institution.

(e) Provisions of the financial guarantee bond for corrective action. A financial guarantee bond for corrective action shall require that the owner or operator perform one of the following:

(1) Fund the standby trust fund in the amount of the penal sum of the bond before beginning corrective action at the facility;

(2) fund the standby trust fund in the amount of the penal sum of the bond within 15 days after an administrative order issued by the department to begin corrective action becomes final, or within 15 days after an order to begin corrective action is issued by any court of competent jurisdiction; or

(3) provide alternate financial assurance as specified in these financial assurance regulations and obtain the department's written approval for the assurance provided, within 90 days after receipt by both the owner or operator and the department of a notice of cancellation from the surety institution.

(f) Liability of the surety institution. Under terms of the bond, the surety institution shall become liable on the bond obligation if the owner or operator fails to perform as guaranteed by the bond.

(g) Penal sum of the bond. The penal sum of the bond for closure, postclosure, or both, shall be at least the amount of the current cost estimate for closure, postclosure, or both. The penal sum of the bond for corrective action shall be at least the amount of the current cost estimate for corrective action for the entire corrective action period.

(h) Increase in the penal sum of the bond. Whenever the current cost of closure, postclosure, corrective action, or any combination of these, increases to an amount greater than the penal sum, the owner or operator, within 60 days after the increase, shall either cause the penal sum to be increased to the new amount and submit evidence of the increase to the department, or obtain other financial assurance as specified in these financial assurance regulations to cover the increase. Whenever the current cost of closure, postclosure, or corrective action, or any combination of these, decreases, the owner or operator may request approval from the department to decrease the penal sum of the bond. The request shall be evaluated by the department, and the amount shall be decreased consistent with the department's evaluation.

(i) Cancellation of the bond by the surety institution. Under terms of the bond, the surety institution may cancel the bond by sending notice of cancellation by certified mail to both the owner or operator and the department. Cancellation shall not occur, however, during the 120 days following the date by which the notice of cancellation has been received by both the owner or operator and the department, as evidenced by the return receipts.

(j) Cancellation of the bond by the owner or operator. The owner or operator may request cancellation of the bond from the department if any of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation for closure or postclosure, or both, at the facility.

(3) The owner or operator completes required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(k) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2105. Financial assurance provided by a surety bond guaranteeing performance. (a) Performance guarantee bond. Any owner or operator of a permitted solid waste disposal area or processing facility may satisfy the

requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by obtaining a performance guarantee bond that conforms to the requirements of this regulation and by submitting the original bond to the department.

(1) Each owner or operator of a new facility shall submit to the department the bond for closure or postclosure, or both, before the permit is issued by the department.

(2) Each owner or operator required to provide financial assurance for a corrective action plan shall submit the bond to the department within the times specified in K.A.R. 28-29-2102(d).

(3) The surety institution shall meet the following criteria:

(A) Be unrelated to the owner or operator;

(B) have the authority to issue surety bonds in Kansas; and

(C) be listed as an acceptable surety institution on federal bonds.

(b) Form of the performance guarantee bond. The wording of the performance guarantee bond shall be identical to the wording in the document provided by the department. If the penal sum of the bond is increased during the life of the bond, the owner or operator shall provide written acceptance of the new amount, indicated by a signed acceptance placed on the certificate of increase issued by the surety institution. The original signed and accepted certificate of increase shall be filed with the department.

(c) Standby trust fund. Any owner or operator who uses a performance guarantee bond to satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, shall also establish a standby trust fund. A copy of the standby trust agreement with an original signature shall be submitted to the department along with the original performance guarantee bond. Under the terms of the bond, all payments from the penal sum shall be deposited by the surety institution directly into the standby trust fund, in accordance with instructions from the department. The standby trust fund shall conform to the requirements specified in K.A.R. 28-29-2103, except that, until the trust account is funded pursuant to the requirement of this regulation, the following shall not be required:

(1) Payments into the fund as specified in K.A.R. 28-29-2103 (c) or (e);

(2) updates to schedule A of the trust agreement as specified in K.A.R. 28-29-2103 (b)(3);

(3) annual valuations as required by the trust agreement; and

(4) notices of nonpayment as required by the trust agreement.

(d) Provisions of the performance guarantee bond for closure and postclosure. The performance guarantee bond for closure or postclosure, or both, shall require that the owner or operator perform either of the following:

(1) Perform final closure or postclosure, or both, in accordance with the closure or postclosure plan, or both, and any other requirements of the permit and the department or a court of competent jurisdiction whenever required to do so; or

(2) provide alternate financial assurance as specified in these financial assurance regulations and obtain the department's written approval of the assurance provided, within 90 days after receipt by both the owner or operator and the department have received a notice of cancellation from the surety institution.

(e) Provisions of the performance guarantee bond for corrective action. A performance guarantee bond for corrective action shall require that the owner or operator perform either of the following:

(1) Perform corrective action according to the corrective action plan or according to an order from the department or any court of competent jurisdiction whenever required to do so; or

(2) provide alternate financial assurance as specified in these financial assurance regulations and obtain the department's written approval for the assurance provided, within 90 days after the date by which both the owner or operator and the department have received a notice of cancellation from the surety institution.

(f) Liability of the surety institution. Under terms of the bond, the surety institution shall become liable on the bond obligation when the owner or operator fails to perform as guaranteed by the bond.

(g) Penal sum of the bond. The penal sum of the bond for closure, postclosure, or both, shall be at least the amount of the current cost estimate for closure or postclosure, or both. The penal sum of the bond for corrective action shall be at least the amount of the current cost estimate for corrective action for the entire corrective period.

(h) Increase in the penal sum of the bond. Whenever the current cost of closure, postclosure, corrective action, or any combination of these, increases to an amount greater than the penal sum, the owner or operator, within 60 days after the increase, shall either cause the penal sum to be increased to the new amount and submit evidence

of the increase to the department, or obtain other financial assurance as specified in K.A.R. 28-29-2101(b) to cover the increase. Whenever the current cost of closure, postclosure, corrective action, or any combination of these, decreases, the owner or operator may request approval from the department to decrease the penal sum of the bond. The request shall be evaluated by the department, and the amount shall be decreased consistent with the department's evaluation.

(i) Cancellation of the bond by the surety institution. Under terms of the bond, the surety institution may cancel the bond by sending notice of cancellation by certified mail to both the owner or operator and the department. Cancellation shall not occur, however, during the 120 days following the date by which the notice of cancellation has been received by both the owner or operator and the department, as evidenced by the return receipts.

(j) Cancellation of the bond by the owner or operator. The owner or operator may request cancellation of the bond from the department if any of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation for closure or postclosure, or both, at the facility.

(3) The owner or operator completes required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(k) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2106. Financial assurance provided by an irrevocable letter of credit. (a) Letter of credit. Any owner or operator of a permitted solid waste disposal area or processing facility may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by obtaining a letter of credit that conforms to the requirements of this regulation and by submitting the original letter of credit to the department.

(1) Each owner or operator of a new facility shall submit to the department the letter of credit before the permit is issued by the department.

(2) Each owner or operator required to provide financial assurance for a corrective action plan shall submit the letter of credit to the department within the times specified in K.A.R. 28-29-2102(d).

(3) The institution issuing the letter of credit shall meet the following criteria:

(A) Be unrelated to the owner or operator;

(B) be authorized to issue letters of credit in Kansas; and

(C) conduct letter of credit activities that are regulated by an agency of the state or federal government.

(b) Form of the letter of credit. The wording of the letter of credit shall be identical to the wording in the document provided by the department. If the amount of the letter of credit is changed or the expiration date is extended, an original amendment to the letter of credit shall be filed with the department.

(c) Standby trust fund. Any owner or operator who uses a letter of credit to satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, shall also establish a standby trust fund. A copy of the standby trust agreement with an original signature shall be submitted to the department along with the original letter of credit. Under the terms of the letter of credit, all payments from the penal sum shall be deposited by the issuing institution directly into the standby trust fund, in accordance with instructions from the department. The standby trust fund shall conform to the requirements specified in K.A.R. 28-29-2103, except that, until the trust account is funded pursuant to the requirements of this regulation, the following shall not be required:

(1) Payments into the fund as specified in K.A.R. 28-29-2103 (c) or (e);

(2) updates to schedule A of the trust agreement as specified in K.A.R. 28-29-2103(b)(3);

(3) annual valuations as required by the trust agreement; and

(4) notices of nonpayment as required by the trust agreement.

(d) Provisions of the letter of credit. The letter of credit shall be irrevocable and shall be issued for a period of at least one year. The letter of credit shall require that the expiration date be automatically extended for a period of at least one year on the expiration date and on each succeeding expiration date, unless 120 days before the current expiration date the issuing institution notifies both the owner or operator and the department by cer-

tified mail of a decision not to extend the expiration date. Under terms of the letter of credit, the 120-day period shall begin on the date by which both the owner or operator and the department have received the notice, as evidenced by the return receipts.

(e) Amount of the letter of credit. The letter of credit for closure, postclosure, or both, shall be issued for at least the amount of the current cost of closure or postclosure, or both, whichever is greater. The letter of credit for corrective action shall be issued for at least the amount of the current cost estimate for corrective action during the entire corrective action period.

(f) Increases in the amount of the letter of credit. Whenever the current cost of closure, postclosure, corrective action, or any combination of these, increases to an amount greater than the amount of the letter of credit, the owner or operator, within 60 days after the increase, shall either cause the amount of the letter of credit to be increased to the new amount and submit evidence of the increase to the department, or obtain other financial assurance as specified in K.A.R. 28-29-2101(b) to cover the increase. Whenever the current cost of closure, postclosure, corrective action, or any combination of these, decreases, the owner or operator may request approval from the department to decrease the amount of the letter of credit. The request shall be evaluated by the department, and the amount shall be decreased consistent with the department's evaluation.

(g) Failure to perform closure, postclosure, and corrective action. The amount of the letter of credit, in whole or in part, shall be drawn by the department following a determination by the department of either of the following:

(1) That the owner or operator has failed to perform closure, postclosure, or corrective action, or any combination of these, in accordance with the closure, postclosure, or corrective action plan, or any combination of these, when required; or

(2) that the owner or operator has failed to perform according to the terms and conditions of the permit.

(h) Failure to supply alternate financial assurance. If the owner or operator does not establish alternate financial assurance as specified by this regulation and does not obtain written approval for its use from the department within 90 days after the date by which both the owner or operator and the department have received a notice from the issuing institution that it has decided not to

renew the letter of credit beyond the current expiration date, the amount of the letter of credit may be drawn by the department.

(i) Termination of the letter of credit by the owner or operator. The owner or operator may request termination of the letter of credit if any of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation for closure or postclosure, or both, at the facility.

(3) The owner or operator completes required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(j) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2107. Financial assurance provided by insurance. (a) Insurance policy. Any owner or operator of a permitted solid waste disposal area or processing facility may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by obtaining an insurance policy that conforms to the requirements of this regulation and by submitting to the department a copy of the insurance policy with an original signature, including all riders and endorsements, and an insurance certificate.

(1) The owner or operator of a new facility shall submit the insurance policy, riders, endorsements, and certificate to the department before the permit is issued by the department.

(2) Each owner or operator required to provide financial assurance for a corrective action plan shall submit the insurance policy, riders, endorsements, and certificate to the department within the times specified in K.A.R. 28-29-2102 (d).

(3) The insuring institution shall meet the following criteria:

(A) Be unrelated to the owner or operator;
(B) be licensed to transact the business of insurance by an agency of a state; and
(C) be listed as a surplus or excess lines carrier in Kansas.

(b) Form of the insurance certificate. The wording of the insurance certificate shall be identical

to the wording in the document provided by the department.

(c) Amount of insurance. The insurance policy shall be issued for a face amount at least equal to the current cost estimate for closure or postclosure, or both, or at least in the amount of the current cost estimate for corrective action for the entire corrective action period, exclusive of legal defense costs. The term "face amount" shall mean the total amount the insurer is obligated to pay under the policy. Actual payments under the policy by the insurer shall not change the face amount, although the future liability of the insurer shall be lowered by the amount of the payments.

(d) Provisions of the insurance policy. An insurance policy issued for closure, postclosure, corrective action, or a combination of these, shall guarantee that funds are available to pay for the actions required by the closure plan, postclosure plan, corrective action plan, or any combination of these, whenever required. The policy shall also guarantee that once final closure, postclosure, corrective action, or any combination of these, begins, the insurer will be obligated to disburse funds up to the face amount of the policy, at the direction of the department. The insurer shall not exercise discretion to determine whether the expenses incurred for closure, postclosure, corrective action, or any combination of these, are ordinary, necessary, or prudent, if disbursement is required by the department.

(e) Reimbursement of expenditures. After closure, postclosure, or corrective action, or any combination of these, has begun, an owner or operator or any other authorized person may request reimbursement of expenditures by submitting itemized statements with documentation to the department. The itemized statements shall be evaluated by the department. The expenditures listed shall be approved or disapproved by the department. After evaluating the itemized statements, payment from the insurer for approved expenditures may be authorized by the department if the remaining face amount of the insurance policy is sufficient to cover any remaining costs of closure, postclosure, corrective action, or any combination of these. If the department believes that future costs of closure, postclosure, corrective action, or any combination of these, will exceed the remaining face amount of the policy, authorization for payment may be withheld by the department.

(f) Requirement to maintain the insurance policy in force. The owner or operator shall main-

tain the insurance policy for closure, postclosure, corrective action, or any combination of these, in force until the department consents, in writing, to its termination. Failure to pay the premium when due, without substitution of alternate financial assurance as specified by K.A.R. 28-29-2101(b), shall constitute a violation of these regulations. The owner or operator shall be in violation if the department receives notice of future cancellation, termination, or failure to renew due to nonpayment of the premium, rather than on the date the policy is actually terminated.

(g) Assignment of the insurance to successive owners or operators. Each policy of insurance shall contain a provision allowing assignment of the policy to a successor owner or operator. This assignment may be conditional upon consent of the insurer, which shall not be unreasonably withheld.

(h) Cancellation of the insurance by the insurer. The policy of insurance for closure, postclosure, corrective action, or any combination of these, shall stipulate that the insurer not cancel, terminate, or fail to renew the policy except for failure to pay the premium. The automatic renewal of the policy shall, at a minimum, provide the insured with the option of renewal at the face amount of the expiring policy. If there is failure to pay the premium, the insurer may elect to cancel, terminate, or fail to renew the policy by sending notice by certified mail to both the owner or operator and the department. The cancellation, termination, or failure to renew shall not occur during the 120 days beginning with the date by which both the owner or operator and the department have received notice, as evidenced by the return receipts. Cancellation, termination, or failure to renew shall not occur, and the policy shall remain in full force and effect if, on or before the date of expiration, one or more of the following events occur:

(1) The department determines the facility has been abandoned.

(2) The facility permit is terminated or revoked by the department, or a new permit is denied.

(3) The commencement of closure, postclosure, or corrective action, or any combination of these, activities is required by the department or any court of competent jurisdiction.

(4) The owner or operator is named as a debtor in a voluntary or involuntary proceeding under any state or federal bankruptcy law.

(5) The owner or operator fails to provide alternative financial assurance in a form and amount acceptable to the department.

(6) The premium due is paid.

(i) Increased cost estimates. During the active life of the facility, whenever the current cost estimate of closure, postclosure, corrective action, or of any combination of these, increases to an amount greater than the face amount of the insurance policy, the owner or operator, within 60 days after the increase, shall either cause the face amount of the policy to be increased to an amount at least equal to the current cost estimate of closure, postclosure, corrective action, or any combination of these, and submit evidence of the increase to the department, or shall obtain other financial assurance as specified in K.A.R. 28-29-2101(b) to cover the increase. Whenever the estimated cost of closure, postclosure, corrective action, or any combination of these, decreases, the owner or operator may request approval from the department to decrease the face amount of the policy. The request shall be evaluated by the department, and a decrease in the amount shall be allowed by the department, consistent with its evaluation.

(j) Annual adjustments to the face amount of the policy. Beginning on the date that liability to make payments pursuant to a policy for postclosure begins, the insurer shall annually increase the face amount of the policy. This increase shall be based on the face amount of the policy, less any payments made exclusive of legal defense costs, multiplied by an amount equivalent to 85 percent of the most recent investment rate or 85 percent of the equivalent coupon-issue yield rate announced by the U.S. department of the treasury for 26-week treasury securities.

(k) Termination of the insurance by the owner or operator. The owner or operator may request cancellation of the insurance policy from the department if either of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department or any court of competent jurisdiction from further obligation for closure, postclosure, corrective action, or any combination of these, at the facility.

(l) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2108. Financial assurance provided by the corporate financial test. (a) Corporate financial test. Any corporate owner or operator of a permitted solid waste disposal area or processing facility may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by passing a financial test based on the current financial condition of the permitted corporation as specified in this regulation. Related corporations may not be summed or otherwise combined for the purpose of the financial test, but majority-owned subsidiary corporations of the permitted corporation may be consolidated.

(b) The financial component.

(1) The owner or operator shall satisfy one of the following three conditions:

(A) A current rating for its senior unsubordinated debt of AAA, AA, A, or BBB, as issued by Standard & Poor's, or Aaa, Aa, A, or Baa, as issued by Moody's;

(B) a ratio of less than 1.5, obtained by dividing total liabilities by net worth; or

(C) a ratio of greater than 0.10, obtained by dividing the sum of net income plus depreciation, depletion, and amortization, minus \$10 million, by total liabilities.

(2) The tangible net worth of the owner or operator shall be greater than either of the following:

(A) The sum of current closure, postclosure, and corrective action cost estimates and any other environmental obligations, including guarantees, covered by the financial test plus \$10 million; or

(B) \$10 million in net worth plus the amount of any guarantees that have not been recognized as liabilities in the financial statements, if all of the current closure, postclosure, and corrective action costs and any other environmental obligations covered by the financial test are recognized as liabilities in the owner's or operator's audited annual financial statements.

(3) The owner or operator shall have assets located in the United States amounting to at least the sum of current closure, postclosure, and corrective action cost estimates and any other environmental obligations or guarantees covered by the financial test as described in subsection (d) of this regulation.

(c) Record keeping and reporting requirements.

(1) The owner or operator shall place a copy of the following items in the facility's operating record and file the originals with the department:

(A) A letter signed by the owner's or operator's chief financial officer that is identical to the form

provided by the department and that meets the following criteria:

(i) Lists all the current cost estimates for closure, postclosure, and corrective action and any other environmental obligations or guarantees covered by any financial test under state or federal laws and regulations in any jurisdiction; and

(ii) provides evidence demonstrating that the permitted corporate entity meets the requirements of the financial component of subsection (b) of this regulation;

(B) a copy of the permitted corporate entity's most recent corporate annual financial statements containing a report of independent certified public accountants, including an unqualified opinion. An adverse opinion, disclaimer of opinion, or qualified opinion shall be cause for the department to disapprove use of the corporate financial test. A qualified opinion may be evaluated by the department. Use of the financial test may be approved or disapproved by the department based on its evaluation;

(C) a special report of independent certified public accountants based on applying agreed-upon procedures engaged in accordance with professional auditing standards and stating the following:

(i) The accountant has compared the data in the chief financial officer's letter that is specified as coming from the most recent year-end audited financial statements to the audited financial statements; and

(ii) in connection with this procedure, the accountant found the data to be in agreement; and

(D) if the chief financial officer's letter provides a demonstration that the permitted corporate entity has assured environmental obligations in the manner provided in paragraph (b)(2)(B) of this regulation, a special report of independent certified public accountants that meets the following criteria:

(i) Provides verification that all of the environmental obligations covered by the financial test have been recognized as liabilities in the most recent annual financial statements;

(ii) describes the methods used to measure and report on these obligations; and

(iii) provides verification that the tangible net worth of the permitted corporate entity is at least \$10 million plus the amount of any guarantees provided.

(2) After the initial placement of the items listed in paragraph (c)(1) of this regulation in the facility

operating record and the initial filing of the originals with the department, the owner or operator shall annually update the information in the operating record and file the updated originals with the department. The updated information shall be placed in the operating record and filed with the department within 90 days following the close of the owner's or operator's most recently completed fiscal year.

(3) The owner or operator shall no longer be required to submit the items specified in paragraph (c)(1) of this regulation or otherwise comply with the requirements of this regulation if any of the following occurs:

(A) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(B) The owner or operator is released by the department from further obligation for closure, or postclosure, or both, at the facility.

(C) The owner or operator completes required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(4) If the owner or operator determines that the permitted corporate entity no longer meets the requirements of subsection (b) of this regulation, the owner or operator shall, within 120 days following the owner's or operator's most recent fiscal year end, obtain alternate financial assurance as specified in K.A.R. 28-29-2101(b) and obtain approval from the department for its use.

(5) Based on the department's reasonable belief that the owner or operator may no longer meet the requirements of subsection (b) of this regulation, the owner or operator may be required by the department at any time to provide reports of its financial condition, including or in addition to current financial test documentation as specified in subsection (c) of this regulation, for evaluation. If the department evaluation results in a determination that the owner or operator no longer meets the requirements to use the financial test, the owner or operator shall provide alternate financial assurance as specified in K.A.R. 28-29-2101(b).

(d) Calculation of costs to be assured. Each owner or operator using the corporate financial test to provide financial assurance for closure, postclosure, and corrective action shall combine the current cost estimates for the permitted facility with all other environmental obligations or guarantees also assured by any financial test in any

local, state, federal, or foreign jurisdiction. The combined environmental cost shall then be used in the financial test calculations provided to the department by the owner or operator. The environmental obligations of consolidated subsidiary corporations that are assured by the financial test shall also be included in the combined environmental obligations covered by the test.

(e) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2109. Financial assurance provided by the corporate guarantee. (a) Corporate guarantee. Any owner or operator of a permitted solid waste disposal area or processing facility may meet the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by obtaining a written guarantee for closure, postclosure, or corrective action costs, or any combination of these as specified in this regulation.

(1) The guarantor shall comply with the following:

(A) The requirements for owners or operators using the corporate financial test as specified in K.A.R. 28-29-2108(b);

(B) the record keeping and reporting requirements in K.A.R. 28-29-2108(c); and

(C) the terms of the guarantee.

(2) The guarantor shall be one of the following:

(A) The direct or higher-tier parent corporation of the owner or operator; or

(B) a corporation having the same parent corporation as the owner or operator.

(b) Form of the corporate guarantee. The guarantor shall provide a written guarantee that is worded identically to the document provided by the department.

(c) Effective date of the guarantee. A guarantee of closure, postclosure, or both, for a new permit shall be in force before the permit is issued by the department. A guarantee for corrective action shall be in force within the times specified in K.A.R. 28-29-2102 (d).

(d) Record keeping and reporting requirements. Copies of the guarantee, with original signatures, shall be placed in the facility operating record of the owner or operator and filed with the department, accompanied by the documents specified for use by the owner or operator in K.A.R. 28-29-2108(c), that shall be completed using the financial information and reports of the guarantor

corporation. These documents shall be updated and filed annually.

(e) Consideration for the guarantee. If the guarantor's parent corporation is also the parent corporation of the owner or operator, the letter from the guarantor's chief financial officer shall describe the value received in consideration for the guarantee.

(f) Provisions of the guarantee. The terms of the written guarantee shall specify the following remedies:

(1) If the owner or operator fails to perform closure, postclosure, corrective action, or any combination of these, for the permitted facility covered by the guarantee when required by the department or any court of competent jurisdiction, the guarantor shall perform either of the following remedies:

(A) Perform or pay a third party to perform closure, postclosure, corrective action, or any combination of these, as required by the department or any court of competent jurisdiction; or

(B) establish a fully funded trust fund as specified in K.A.R. 28-29-2103, in the name of the owner or operator, in the amount of the current cost estimate for closure, postclosure, corrective action, or any combination of these, whichever is greatest.

(2) The guarantee shall remain in effect unless the guarantor sends prior notice of cancellation by certified mail to both the owner or operator and the department. Cancellation shall not occur, however, during the 120 days beginning on the date by which both the owner or operator and the department have received the notice of cancellation, as evidenced by the return receipts.

(3) If the guarantee is canceled, the owner or operator shall, within 90 days following the date by which both the owner or operator and the department have received the cancellation notice, obtain alternate financial assurance as specified in K.A.R. 28-29-2101(b) and obtain the approval of the department for its use. If the owner or operator fails to provide alternate financial assurance within the 90-day period, the guarantor shall provide the alternate financial assurance in the name of the owner or operator within 120 days following the date by which both the department and the owner or operator have received the cancellation notice.

(g) Failure of the guarantee. If the corporate guarantor no longer meets the requirements of K.A.R. 28-29-2108(b), the owner or operator shall, within 90 days, obtain alternate financial

assurance and obtain the approval of the department for its use. If the owner or operator fails to provide alternate financial assurance as specified in K.A.R. 28-29-2101(b) within the 90-day period, the guarantor shall, within the next 30 days, provide the alternate financial assurance in the name of the owner or operator.

(h) Release of the guarantee. The owner or operator shall be no longer required to meet the requirements of this regulation if any of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation for closure, postclosure, or both, at the permitted facility.

(3) The owner or operator completes required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(i) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2110. Financial assurance provided by the local government financial test.

(a) Local government financial test. Each owner or operator of a permitted solid waste disposal area or processing facility that is a local government subdivision of the state of Kansas may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, for the closure, postclosure, or corrective action costs, or any combination of these, for a municipal solid waste landfill by use of a local government financial test as specified in this regulation.

(b) Definitions. The following terms used in this regulation shall be defined as specified below:

(1) "Annual debt service" means the principal and interest due on outstanding long-term debt during a stated time period, typically the current fiscal year, and payments on capital lease obligations during the same period.

(2) "Cash plus marketable securities" means all the cash and marketable securities held by the local government on the last day of a fiscal year but shall exclude the following:

(i) Cash and marketable securities designated to satisfy past obligations; and

(ii) cash and investments held in fiduciary funds.

(3) "Current year" means the most recently completed fiscal year.

(4) "Deficit" means total annual revenues minus total annual expenditures.

(5) "Long-term debt issued in the current year" means the amount of principal borrowing actually received during the current year from the issue of obligations due more than one year from the date of issue but shall exclude the following:

(i) The amount of capital lease liability incurred during the year; and

(ii) the proceeds of any long-term borrowing in the current year that remains in the capital projects fund at year's end.

(6) "Nonroutine capital expenditures" means capital expenditures of the capital projects fund and expenditures identified as capital outlays or asset additions in the audited annual financial statements of other governmental funds and enterprise funds.

(7) "Total annual expenditures" means the total of all expenditures but shall exclude the following:

(i) Debt principal repayments;

(ii) nonroutine capital expenditures; and

(iii) the expenditures of fiduciary or other trust funds managed by a local government on behalf of specific third parties.

(8) "Total annual revenues" means revenues from all taxes, fees, investment earnings, and intergovernmental transfers but shall exclude the following:

(i) The proceeds from borrowing and asset sales; and

(ii) revenues of fiduciary or other trust funds managed by a local government on behalf of specific third parties.

(c) The financial component.

(1) If the owner or operator has outstanding general obligation bonds that are not secured by insurance, a letter of credit, or other collateral or guarantee, the bonds shall have a current bond rating of AAA, AA, A, or BBB, as issued by Standard & Poor's, or a current rating of Aaa, Aa, A, or Baa, as issued by Moody's.

(2) If the owner or operator does not have outstanding and rated general obligation bonds, the owner or operator shall meet each of the following financial ratios based on the owner's or operator's most recent audited annual financial statements:

(A) A ratio of cash plus marketable securities divided by total annual expenditures equal to or greater than 0.05, referred to as the "liquidity ratio";

(B) a ratio of annual debt service divided by total annual expenditures equal to or less than 0.20, referred to as the “debt service ratio”; and

(C) a ratio of long-term debt issued in the current year divided by nonroutine capital expenditures of the current year equal to or less than 2.00, referred to as the “use of funds ratio.”

(3) The owner or operator’s annual financial statements shall be audited by an independent certified public accountant. The financial statements shall be prepared in conformity with one of the following accounting methods:

(A) Generally accepted accounting principles for governments; or

(B) a prescribed basis of accounting that demonstrates compliance with the cash basis and budget laws of the state of Kansas.

(4) An owner or operator who prepares the annual financial statements in conformity with generally accepted accounting principles for governments and uses the financial ratio test method of financial assurance may omit the ratio test stated in paragraph (c)(2)(C) of this regulation.

(5) A local government owner or operator shall not be eligible to use the financial test to assure closure, postclosure, corrective action, or any combination of these, for a municipal solid waste landfill if any of the following conditions exists:

(A) The owner or operator is currently in default on any outstanding general obligation bonds.

(B) The owner or operator has any general obligation bonds outstanding that are rated lower than BBB, as issued by Standard & Poor’s, or Baa, as issued by Moody’s.

(C) The owner or operator operated at a deficit equal to or greater than five percent of the total annual revenue in each of the two most recently completed fiscal years.

(D) The owner or operator receives an adverse opinion, disclaimer of opinion, or qualification of opinion in the report of independent certified public accountants accompanying the audited financial statements for the most recently completed fiscal year. A qualified opinion may be evaluated by the department. Use of the financial test may be approved or disapproved by the department based on its evaluation.

(d) Public notice component. The local government owner or operator shall place a reference to the cost of closure, postclosure, corrective action, or any combination of these, that is assured by the local government financial test in its comprehen-

sive annual financial report or other audited annual financial report during each year in which the owner or operator is required to provide financial assurance by these financial assurance regulations. Disclosure shall be made in a note attached to the audited annual financial statements and shall include the following:

(1) The nature and source of the requirements to conduct closure, postclosure, corrective action, or any combination of these;

(2) the liability reported or calculated at the balance sheet date;

(3) the estimated total cost of closure, postclosure, corrective action, or any combination of these, remaining to be recognized following the reported balance sheet date;

(4) the percentage of landfill capacity on the reported balance sheet date;

(5) the estimated remaining landfill life in years, or the estimated period of corrective action remaining; and

(6) the method projected for use or the method currently in use to fund the actual costs of closure, postclosure, corrective action, or any combination of these, when required.

(e) Record keeping and reporting requirements.

(1) The owner or operator shall place a copy of the following items in the facility’s operating record and shall file the originals with the department:

(A) A letter signed by the local government’s chief financial officer that is identical to the form provided by the department and that includes the following:

(i) A list of all the current cost estimates covered by a financial test, including the municipal solid waste landfill and any other environmental obligations or guarantees assured by financial test in any jurisdiction;

(ii) a certification that the local government meets the conditions of subsection (c) of this regulation required for use of either the bond rating or the financial ratio method of the local government financial test;

(iii) a certification that the local government has satisfied the public notice component requirements of subsection (d) of this regulation; and

(iv) a certification that the local government has not exceeded the amount eligible to be assured by the financial test according to subsection (f) of this regulation;

(B) a copy of the local government’s audited comprehensive annual financial report or other audited annual financial report for the latest com-

pleted fiscal year, including the report and opinion of the auditor, who shall be an independent certified public accountant; and

(C) a special report of independent certified public accountants that is based on applying agreed-upon procedures engaged in accordance with professional auditing standards and that identifies the procedures performed and states that the independent accountant has determined all of the following:

(i) The data used to calculate the financial test ratios in paragraphs (c)(2)(A), (c)(2)(B), and (c)(2)(C) of this regulation were derived from the audited annual financial statements for the most recently completed fiscal year, and the ratios calculated from this data equal or exceed the stated requirements.

(ii) The owner or operator satisfies the requirements of paragraphs (c)(5)(C) and (f)(1) of this regulation.

(iii) The annual financial report has been prepared on a basis of accounting required by paragraph (c)(3) of this regulation and is accompanied by an auditor's opinion satisfying the requirements of paragraph (c)(5)(D) of this regulation.

(2) The items required by paragraph (e)(1) of this regulation shall be placed in the facility operating record to fulfill the requirements of K.A.R. 28-29-108(q)(1)(G) and shall be filed with the department no later than the effective date for a new permit, and also annually before the end of the latest allowable day for filing the annual audited financial report with the Kansas department of administration, director of accounts and reports, without extension, according to the provisions of K.S.A. 75-1124, and amendments thereto.

(3) The local government owner or operator shall satisfy the requirements of the local government financial test at the close of each fiscal year. If the local government no longer meets the requirements of the financial test, it shall obtain alternate financial assurance as specified in K.A.R. 28-29-2101(b) within 90 days of discovering the failure or within 210 days following the close of the most recently completed fiscal year, whichever first occurs, and shall obtain approval from the department for its use.

(4) The local government owner or operator shall no longer be required to submit the items specified in paragraph (e)(1) of this regulation or otherwise comply with the requirements of this regulation if either of the following conditions occurs:

(A) The local government substitutes an alternate method or instrument of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains the department's approval for its use.

(B) The local government is released by the department from further obligation for closure, postclosure, corrective action, or any combination of these, at the permitted facility.

(5) Additional reports of financial condition may be required by the department from the local government at any time for evaluation. If the department evaluation results in a determination that the local government no longer meets the requirements of the local government financial test, the local government shall provide alternate financial assurance as specified in K.A.R. 28-29-2101(b) within 90 days following notice to the local government from the department.

(f) Calculation of costs to be assured.

(1) The portion of closure, postclosure, and corrective action costs that an owner or operator may assure by the local government financial test shall be determined as follows:

(A) If the local government owner or operator does not assure other environmental obligations or guarantees by the financial test, it may assure closure, postclosure, and corrective action costs for the permitted facility up to an amount equaling 43 percent of total annual revenues.

(B) If the local government owner or operator assures other environmental obligations or guarantees in any jurisdiction by the financial test in addition to the closure, postclosure, and corrective action costs of the permitted facility, it shall add the current cost estimates of the additional obligations or guarantees to the closure, postclosure, and corrective action costs of the permitted facility, and the combined environmental obligations assured shall not exceed 43 percent of total annual revenues.

(2) The local government owner or operator shall provide alternate financial assurance as specified in K.A.R. 28-29-2101(b) for any environmental obligations or guarantees in excess of 43 percent of total annual revenues.

(g) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2111. Financial assurance provided by a local government guarantee. (a) Local

government guarantee. Each owner or operator of a municipal solid waste landfill may satisfy the requirements of K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both, by obtaining a written guarantee for closure, postclosure, or corrective action costs, or any combination of these, that is provided by a local government subdivision of the state of Kansas as specified in this regulation. The guarantor shall comply with the following:

(1) The requirements of the financial component for use of the local government financial test as specified in K.A.R. 28-29-2110(b);

(2) the public notice requirements of K.A.R. 28-29-2110(c);

(3) the record keeping and reporting requirements of K.A.R. 28-29-2110(d); and

(4) the terms of the guarantee.

(b) Form of the local government guarantee. The guarantor shall provide a written guarantee that is worded identically to the document provided by the department.

(c) Effective date of the guarantee. A guarantee of closure or postclosure, or both, for a new permit shall be in force before the permit is issued by the department. A guarantee for corrective action shall be in force within the times specified in K.A.R. 28-29-2102 (d).

(d) Record keeping and reporting requirements. Copies of the guarantee, with original signatures, shall be placed in the facility operating record of the owner or operator and filed with the department, with the documents specified for use by the owner or operator in K.A.R. 28-29-2110(d). The documentation shall be completed using the financial information and reports of the guarantor. These documents shall be updated and filed annually.

(e) Provisions of the guarantee. The terms of the guarantee shall stipulate the following:

(1) If the owner or operator fails to perform closure, postclosure, corrective action, or any combination of these, for the permitted facility covered by the guarantee when required to do so by the department or a court of competent jurisdiction, the guarantor shall perform either of the following:

(A) Perform or pay a third-party to perform closure, postclosure, corrective action, or any combination of these, as required by the department or any court of competent jurisdiction; or

(B) establish a fully funded trust fund as specified in K.A.R. 28-29-2103, in the name of the owner or operator, in the amount of the current cost estimate for closure, postclosure, corrective

action, or any combination of these, whichever is greatest.

(2) The guarantee shall remain in effect unless the guarantor sends notice of cancellation by certified mail to both the owner or operator and the department. Cancellation shall not occur, however, during the 120 days beginning on the date by which both the owner or operator and the department have received the notice of cancellation, as evidenced by the return receipts.

(3) If the guarantee is canceled, the owner or operator shall, within 90 days following the date by which both the owner or operator and the department have received the cancellation notice, obtain alternate financial assurance as specified in K.A.R. 28-29-2101(b) and obtain approval from the department. If the owner or operator fails to provide alternate financial assurance within the 90-day period, the guarantor shall provide the alternate financial assurance in the name of the owner or operator within the next 30 days.

(f) Failure of the guarantee. If the local government guarantor no longer meets the requirements of K.A.R. 28-29-2110(b), the owner or operator shall, within 90 days, obtain alternate financial assurance as specified in K.A.R. 28-29-2101(b) and obtain approval from the department for its use. If the owner or operator fails to provide the alternate financial assurance within the 90-day period, the guarantor shall, within the next 30 days, provide the alternate financial assurance in the name of the owner or operator.

(g) Release of the guarantee. The owner or operator shall no longer be required to meet the requirements of this regulation if any of the following occurs:

(1) The owner or operator substitutes an alternative method of financial assurance as specified in K.A.R. 28-29-2101(b) and obtains written approval for its use from the department.

(2) The owner or operator is released by the department from further obligation for closure, postclosure, or both, at the permitted facility.

(3) The owner or operator completes the required corrective action and is released from further obligation by the department or any court of competent jurisdiction.

(h) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2112. Financial assurance provided by use of ad valorem taxing authority. (a) Ad valorem taxing authority. Any owner or operator that is a local government subdivision of the state of Kansas and that is permitted to own or operate a solid waste disposal area or processing facility other than a municipal solid waste landfill may use its statutory authority to assess and collect ad valorem taxes to assure the closure, postclosure, or corrective action costs, or any combination of these, of the facility as required by K.A.R. 28-29-2101 or K.A.R. 28-29-2102, or both.

(b) Proof of ad valorem taxing authority. Whenever required to do so by the department, the local government owner or operator shall perform one of the following:

(1) Provide evidence of currently unused ad valorem taxing authority within any statutory tax limit or cap;

(2) provide analyses demonstrating that the cost of closure, postclosure, corrective action, or any combination of these, will be provided by ad valorem tax assessments within any statutory limit or cap in future budgets at the time that closure, postclosure, corrective action, or any combination of these, is required; or

(3) provide evidence demonstrating the existence and amount of a governmental or enterprise fund containing monies designated for use in providing closure, postclosure, corrective action, or any combination of these, for the permitted facility.

(c) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-3407, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2113. Financial assurance provided by a simplified financial instrument. (a) Simplified financial instrument.

(1) Any owner or operator of a permitted solid waste disposal area or processing facility with a current closure cost estimate equal to or less than \$100,000, and with financial assurance from a single provider for that facility, may provide financial assurance in a simplified form of surety bond or letter of credit, instead of by use of any other financial instrument specified in K.A.R. 28-29-2101(b). The owner or operator of the facility may, with the department's approval, use an assigned certificate of deposit or assigned escrow account to provide financial assurance if the facility closure cost estimate is \$25,000 or less.

(2) The simplified forms of financial instruments specified in this regulation shall not be used to provide financial assurance for the estimated cost of postclosure or corrective action.

(b) Form of the simplified financial instrument. The wording of the simplified surety bond or letter of credit shall be identical to the wording in the documents provided by the department.

(c) When a simplified financial instrument shall not be used. Whenever the estimate of closure cost exceeds \$100,000 for any facility for which one of the simplified financial instruments specified in subsection (a) is in use, or whenever requested by the department, the owner or operator shall substitute, for that facility, one or more alternative methods of financial assurance as specified in K.A.R. 28-29-2101(b).

(d) The provisions of this regulation shall apply on and after February 24, 2000. (Authorized by K.S.A. 1998 Supp. 65-3406; implementing K.S.A. 1998 Supp. 65-340, as amended by L. 1999, Ch. 112, Sec. 1; effective Feb. 24, 2000.)

28-29-2201. Insurance for solid waste disposal areas and processing facilities. Except as provided in subsection (d), each owner or operator of a permitted solid waste disposal area or processing facility shall secure and maintain liability insurance for claims arising from injuries to other parties, including bodily injury and property damage. (a) Amount of liability coverage.

(1) The permit application shall be reviewed by the department to determine the amount of insurance coverage that the owner or operator shall secure and maintain for each disposal area or processing facility, based on the types of waste disposed and on the location, area, and geological characteristics of the site.

(2) Each owner or operator shall maintain insurance that shall provide coverage, including completed operations coverage, in the amount determined by the department but with commercial general liability limits not less than \$1,000,000 for each occurrence and \$1,000,000 for the annual aggregate.

(3) Each owner or operator shall maintain a policy that shall provide that the deductible amount be first paid by the insurer upon establishment of the legal liability of the insured, with full right of recovery from the insured. The deductible amount shall not exceed 2.5% of the policy limit for single occurrences.

(b) Insurance provider.

(1) Each owner or operator shall maintain a liability insurance policy that shall be issued by an insurance company authorized to do business in Kansas or through a licensed insurance agent operating under the authority of K.S.A. 40-246b, and amendments thereto.

(2) Each owner's or operator's liability insurance policy shall be subject to the insurer's policy provisions filed with and approved by the commissioner of insurance pursuant to K.S.A. 40-216 and amendments thereto, except as authorized by K.S.A. 40-246b, and amendments thereto.

(c) Proof of insurance.

(1) Each owner or operator shall furnish, at the following times, a certificate or memorandum of insurance to the department for the department's approval, showing specifically the coverage and limits together with the name of the insurance company and insurance agent:

(A) Before the department issues the permit and before any development work is started; and

(B) before each annual renewal of the permit during the active life of the area or facility.

(2) If any of the coverage set forth on the certificate or memorandum of insurance is reduced, canceled, terminated, or not renewed, the owner or operator or insurance company shall furnish the department with an appropriate notice of the action no fewer than 30 days before the effective date of the reduction, cancellation, termination, or nonrenewal.

(d) Governmental entities. Any owner or operator that is a governmental entity as defined in K.S.A. 75-6102, and amendments thereto, and is subject to provisions of the Kansas tort claims act, and amendments thereto, may provide to the department a statement or other evidence of its intention to fund liability judgements in the manner provided in K.S.A. 75-6113, and amendments thereto, in lieu of providing evidence of purchased insurance covering liability for accidental occurrences.

(e) Variances. Any owner or operator may request that the department evaluate the hazard or hazards involved and may request a variance, under K.A.R. 28-29-2, from the insurance method or specific insurance coverage amounts prescribed in this regulation if all the following conditions are met:

(1) The solid waste management activity is conducted solely on the premises where the wastes are generated.

(2) The owner or operator performs the waste management activity.

(3) The owner or operator is the owner of the property where the activity is conducted.

(4) The owner or operator is able to demonstrate other financial responsibility satisfactory to the department. This demonstration shall be made by adding the required liability coverage amount to the costs of closure and postclosure care assured by the corporate financial test method as specified in K.A.R. 28-29-2108, or the corporate guarantee method as specified in K.A.R. 28-29-2109. (Authorized by K.S.A. 2001 Supp. 65-3406; implementing K.S.A. 2001 Supp. 65-3407; effective March 22, 2002.)

**Article 30.—WATER WELL
CONTRACTOR'S LICENSE;
WATER WELL CONSTRUCTION
AND ABANDONMENT**

28-30-1. (Authorized by K.S.A. 1979 Supp. 82a-1202, 82a-1205; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; revoked May 1, 1980.)

28-30-2. Definitions. In addition to the definitions in K.S.A. 82a-1203 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation:

(a) "Abandoned water well" means a water well determined by the department to meet at least one of the following conditions:

(1) Use of the water well has been permanently discontinued.

(2) Pumping equipment has been permanently removed from the water well.

(3) The water well either is in such disrepair that it cannot be used to supply water or has the potential for transmitting surface contaminants into the aquifer, or both.

(4) The water well poses potential health and safety hazards.

(5) The water well is in such a condition that it is not an active well or cannot be placed in inactive status.

(b) "Above-grade surface completion" means the termination of a water well or boring if the casing being used is at least 12 inches above the surrounding ground surface.

(c) "Active well" means a water well that is operating and is used to withdraw water or to monitor or observe groundwater conditions.

(d) "Annulus" means the space between the casing and the boring or the space between two or more strings of casing.

(e) "Aquifer" means an underground forma-

tion that contains and is capable of transmitting groundwater.

(f) “At-grade surface completion” means the termination of a monitoring well or boring if the casing is at the surrounding ground surface.

(g) “Cased test hole” means any test hole in which casing has been installed and grouted.

(h) “Confined aquifer” means an aquifer overlain and underlain by impermeable layers. Groundwater in a confined aquifer is under pressure greater than atmospheric pressure and will rise in a water well above the point at which groundwater is first encountered.

(i) “Department” means Kansas department of health and environment.

(j) “Designated person” means the individual designated by a water well contractor who is the contact person for compliance issues and who is responsible for submitting water well records and for earning the units of approved continuing education credits required by K.A.R. 28-30-3. The designated person may be the water well contractor.

(k) “Drill rig” means an apparatus operated to create a hole or shaft in the ground in which a water well is constructed.

(l) “Drill rig license number” means the numbers and letters assigned by the department that are affixed to each drill rig operated by or for a water well contractor.

(m) “Drilling fluid” means any fluid, including water, that is added during the drilling process to help increase the drilling efficiency.

(n) “Fresh groundwater” means water containing not more than 1,000 milligrams of total dissolved solids per liter and 500 milligrams of chloride per liter.

(o) “Groundwater” means the part of the subsurface water that is in the zone of saturation.

(p) “Grout” means bentonite clay grout, cement grout, neat cement grout, or other material approved by the secretary used to create a permanent impervious, watertight bond between the casing and the undisturbed formation surrounding the casing or between two or more strings of casing.

(1) “Bentonite clay grout” means a mixture of water and either commercial grouting or plugging sodium bentonite clay, including sodium bentonite clay manufactured under the trade name “volclay grout,” or an equivalent approved by the department according to the following:

(A) The mixture shall be prepared according to the manufacturer’s recommendations to achieve a

weight of at least 9.4 pounds per gallon of mix. Weighting agents may be added according to the manufacturer’s recommendations.

(B) Sodium bentonite pellets, tablets, or granular sodium bentonite may also be used if these additives or materials meet the specifications listed in paragraph (p)(1).

(C) Sodium bentonite products that are designed for drilling purposes or contain organic polymers shall not be used.

(2) “Cement grout” means a mixture of one 94-pound bag of portland cement, an equal volume of sand having a diameter no larger than two millimeters, and five to six gallons of clean water.

(3) “Neat cement grout” means a mixture of one 94-pound bag of portland cement and five to six gallons of clean water.

(q) “Grout tremie pipe” and “grout pipe” mean a steel or galvanized steel pipe or similar pipe having equivalent structural soundness that is used to pump grout to a point of selected emplacement during the grouting of a casing or plugging of an abandoned water well or test hole.

(r) “Heat pump hole” means a hole drilled to install piping for an earth-coupled water source heat pump system, also known as a vertical closed-loop system.

(s) “Inactive status” means a water well that is not presently operating but is maintained so that the water well can be put back in operation with minimum effort.

(t) “Monitoring well” means a water well used to monitor, obtain, or collect hydrologic, geologic, geophysical, chemical, or other technical data pertaining to groundwater, surface water, or other hydrologic conditions. A monitoring well is also known as an “observation well.”

(u) “Pitless well adapter or unit” means an assembly of parts installed below the frost line that permits pumped groundwater to pass through the wall of the casing or the extension of the casing and prevent the entrance of contaminants.

(v) “Public water-supply well” means a water well that meets both of the following conditions:

(1) Provides groundwater to the public for human consumption; and

(2) has at least 10 service connections or serves an average of at least 25 individuals daily for at least 60 days during a calendar year.

(w) “Pump pit” means a watertight structure that meets both of the following conditions:

(1) Is constructed as follows:

(A) At least two feet away from the water well; and

(B) below ground level to prevent the freezing of pumped groundwater; and

(2) houses the pump or pressure tank, distribution lines, electrical controls, or other appurtenances.

(x) "Reconstructed water well" means an existing water well that has been deepened or has had the casing replaced, repaired, added to, or modified in any way for the purpose of obtaining groundwater.

(y) "Sand point" has the meaning specified in K.S.A. 82a-1203, and amendments thereto.

(z) "Sanitary well seal" means a manufactured seal installed at the top of the casing that, when installed, creates an airtight and watertight seal to prevent contaminated or polluted water from gaining access to the groundwater supply.

(aa) "Static water level" means the highest point below or above ground level that the groundwater in the water well reaches naturally.

(bb) "Test hole" and "hole" mean any excavation constructed for the purpose of determining the geologic, hydrologic, and water quality characteristics of underground formations.

(cc) "Treatment" means the stimulation of the production of groundwater from a water well through the use of hydrochloric acid, muratic acid, sulfamic acid, calcium or sodium hypochlorite, polyphosphates or other chemicals, and mechanical means, to reduce or remove iron and manganese hydroxide and oxide deposits, calcium and magnesium carbonate deposits, and slime deposits associated with iron or manganese bacterial growths that inhibit the movement of groundwater into the water well.

(dd) "Uncased test hole" means any test hole from which casing has been removed or in which casing has not been installed.

(ee) "Unconfined aquifer" means an aquifer containing groundwater at atmospheric pressure. The upper surface of the groundwater in an unconfined aquifer is the water table.

(ff) "Water well" has the meaning specified in K.S.A. 82a-1203, and amendments thereto. (Authorized by K.S.A. 82a-1205 and 82a-1213; implementing K.S.A. 82a-1202, 82a-1205, and 82a-1213; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1987; amended Nov. 22, 1993; amended June 7, 2013.)

28-30-3. Licensing. (a) Eligibility. To be eligible for a water well contractor's license, each applicant shall meet the following requirements:

(1) Submit a complete license application on a form provided by the department;

(2) submit a water well contractor application fee of \$10.00;

(3) (A) Pass the water well contractor examination conducted by the department or employ a designated person who has passed the water well contractor examination; and

(B) submit a license fee of \$100.00 if the applicant or designated person passes the water well contractor examination; and

(4) submit a complete registration form on a form provided by the department for each drill rig operated by or for the applicant and a registration fee of \$25.00 for each drill rig operated by or for the applicant.

(b) License renewal.

(1) Each licensee shall submit an application for renewal of license and drill rig registrations before July 1 of each year by filing the proper renewal forms provided by the department and by meeting the following requirements:

(A) Paying the annual license fee and a drill rig registration fee for each drill rig to be operated in the state;

(B) filing all records for each water well constructed, reconstructed, or plugged by the licensee in accordance with K.A.R. 28-30-4 during the previous licensure period;

(C) filing a report, on a form approved by the department, of all approved continuing education units earned by the licensee or designated person during the previous licensure period;

(D) meeting the continuing education requirements in subsection (c); and

(E) providing any remaining outstanding information or records requested that existed before the issuance or revocation of a license.

(2) Failure to comply with the requirements of this subsection shall be grounds to revoke the existing license and terminate the license renewal process.

(c) Continuing education requirements. Each water well contractor or the contractor's designated person shall earn at least eight units of continuing education approved by the secretary. This requirement shall apply each year beginning with the first full year of licensure or the renewal period. One unit of continuing education shall equal 50 minutes of approved instruction except for trade shows and exhibitions, which shall be counted as one unit for each approved trade show or exhibition attended.

(d) Employment requirements. If the designated person who has passed the water well contractor examination under paragraph (a)(3)(A) leaves the contractor's employment, the contractor shall employ a designated person who shall take, within 90 days, and be required to pass the water well contractor examination. (Authorized by K.S.A. 82a-1205, K.S.A. 2012 Supp. 82a-1206, and K.S.A. 82a-1207; implementing K.S.A. 82a-1202, K.S.A. 82a-1205, K.S.A. 2012 Supp. 82a-1206, K.S.A. 82a-1207, K.S.A. 82a-1209, and K.S.A. 82a-1212; effective, E-74-34, July 2, 1974; effective May 1, 1975; amended May 1, 1980; amended May 1, 1983; amended May 1, 1987; amended Nov. 22, 1993; amended June 7, 2013.)

28-30-4. General operating requirements. (a) Water well record.

(1) Within 30 days after construction or reconstruction of a water well, each water well contractor shall submit a report to the department and to the landowner on the water well record form provided by the department.

(2) Each contractor shall report to the department and to the landowner on the water well record form provided by the department and attachments any polluted or other noncompliant conditions that the contractor was able to correct and any conditions that the contractor was unable to correct.

(3) Each contractor shall report to the department and to the landowner the plugging of any abandoned water well on the water well record form provided by the department.

(4) Each landowner who constructs, reconstructs, or plugs a water well that will be or was used by the landowner for farming, ranching, or agricultural purposes or is located at the landowner's residence shall submit a report to the department on the water well record form provided by the department within 30 days after the construction, reconstruction, or plugging of the water well. No fee shall be required from the landowner for the record.

(b) Artificial recharge and return. Each contractor who constructs an artificial recharge well or a freshwater return well shall comply with all regulations applicable to these wells specified in article 46.

(c) Water well tests. Results of a pumping test shall be reported on the water well record form provided by the department or a copy of the contractor's record of a pumping test shall be attached to the water well record form.

(d) Water samples. Within 30 days after the department's receipt of the water well record form provided by the department, the contractor or landowner who constructs or reconstructs any water well may be requested by the department to submit a sample of water from the water well for chemical analysis. The sample shall be submitted within 30 days after the department's request.

(e) Water well construction fee. Each contractor shall pay a \$5.00 fee to the department for each water well constructed. The construction fee shall be paid when the contractor requests a water well record form provided by the department or shall accompany the water well record form submitted as specified in this regulation.

(f) License number. Each drill rig operated by or for a contractor shall prominently display the drill rig license number assigned by the department in letters and numbers at least two inches tall. Decals, paint, or other permanent marking materials shall be used. (Authorized by K.S.A. 82a-1205; implementing K.S.A. 82a-1202, 82a-1205, 82a-1212, and 82a-1213; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1987; amended June 7, 2013.)

28-30-5. Construction regulations for public water-supply wells. All activities involving public water-supply wells shall meet the requirements of K.S.A. 65-163a, and amendments thereto, and regulations of the department, including K.A.R. 28-15-16. (Authorized by K.S.A. 82a-1205; implementing K.S.A. 82a-1202 and 82a-1205; effective, E-74-34, July 2, 1974; effective May 1, 1975; amended May 1, 1980; amended May 1, 1983; amended May 1, 1987; amended June 7, 2013.)

28-30-6. Construction regulations for all water wells not included under K.A.R. 28-30-5.

(a) Each water well shall be constructed to minimize the potential for contamination of the delivered or obtained groundwater and to protect groundwater aquifers from pollution and contamination.

(b) The following requirements for grouting shall be met:

(1) Each constructed water well and each reconstructed water well shall be sealed by grouting the annulus between the casing and the boring from ground level to at least 20 feet or to at least five feet into the first clay or shale layer if one is present, whichever is greater. If a pitless well adapter or

unit is being installed, the grouting shall start below the point at which the pitless well adapter or unit attaches to the casing and shall continue at least 20 feet below this point or to at least five feet into the first clay or shale layer, whichever is greater.

(2) The diameter of the drilled boring shall be at least three inches greater than the maximum outside diameter of the casing.

(3) Water from two or more separate aquifers shall be separated from each other in the boring by sealing the annulus between the aquifers with grout.

(c) If groundwater is encountered at a depth less than the minimum grouting requirement, the grouting requirement may be modified by the secretary to meet local conditions.

(d) A well vent shall be used and shall terminate at least one foot above the ground surface. The well vent shall be screened with brass, bronze, copper screen, or other screen materials approved by the secretary that are 16-mesh or greater and turned down in a full 180-degree return bend to prevent the entrance of contaminating materials.

(e) Before the completion of a constructed water well or a reconstructed water well, the water well shall be cleaned of mud, drill cuttings, and other foreign matter to make the water well suitable for pump installations.

(f) Casing shall meet the following requirements:

(1) Each water well shall have durable watertight casing from at least one foot above the finished ground surface to the top of the producing zone of the aquifer. The watertight casing shall extend at least 20 feet below the ground level. Exceptions to either of these requirements may be granted by the secretary if warranted by local conditions.

(2) Each water well shall be an above-grade surface completion, except that an at-grade surface completion may be used if all requirements of subsection (s) are met. Casing may be cut off below the ground surface to install a pitless well adapter or unit.

(3) No opening shall be made through the casing, except for the installation of a pitless well adapter or unit designed and fabricated to prevent soil, subsurface, and surface water from entering the water well.

(4) The casing shall meet the requirements of the department's document titled "approved water well casing: water well casing for water wells other than public water-supply wells," dated No-

vember 7, 2012, which is hereby adopted by reference. Used, reclaimed, defective, or contaminated pipe shall not be used for casing any water well.

(g) Each water well, when unattended during construction, reconstruction, treatment, or repair or during use as a cased test hole or as an observation or monitoring well, shall have the top of the casing securely capped in a watertight manner.

(h) During construction, reconstruction, treatment, or repair and before its first use, each water well producing water for human consumption or food processing shall be disinfected according to K.A.R. 28-30-10.

(i) The top of the casing shall be sealed by installing a sanitary well seal when the water well is completed.

(j) Each groundwater-producing zone that is known or suspected to contain natural or man-made pollutants shall be cased and grouted in accordance with subsection (b) during construction of any water well to prevent the movement of groundwater to either overlying or underlying fresh groundwater zones.

(k) Toxic material shall not be used in the construction, reconstruction, treatment, or plugging of a water well, unless the material is flushed from the water well before use.

(l) The pipe from the pump or pressure tank in the pump pit to the water well shall be sealed in a watertight manner where the pipe passes through the wall of the pump pit.

(m) A water well shall not be constructed in a pit, basement, garage, or crawl space. Each existing water well that is reconstructed, abandoned, or plugged in a basement shall conform to the requirements specified in this article, except that the finished grade of the basement floor shall be considered ground level.

(n) Drilling fluid used during the construction or reconstruction of each water well shall be initially disinfected by mixing sodium hypochlorite with water to produce at least 100 milligrams per liter (mg/l) of available chlorine.

(o) Natural organic or nutrient-producing material shall not be used during the construction, reconstruction, or treatment of a water well, unless this material is flushed from the water well and the groundwater aquifer or aquifers before the water well is completed. Natural organic or nutrient-producing material shall not be added to a grout mix used in the annulus to grout the water well.

(p) Each water well pump shall meet the following requirements:

(1) Each pump installed directly over the casing shall be installed to form an airtight and watertight seal between the top of the casing and the gear or pump head, pump foundation, or pump stand.

(2) A sanitary well seal shall be installed between the pump column pipe or pump suction pipe and the casing if the pump is not mounted directly over the casing and the pump column pipe or pump suction pipe emerges from the top of the casing.

(3) An airtight and watertight seal shall be provided for the cable conduit if submersible pumps are used.

(q) Each sand point constructed, replaced, or reconstructed shall meet the following requirements:

(1) Each sand point shall be constructed by drilling or boring a pilot hole at least three feet below ground surface. The pilot hole shall be at least three inches greater in diameter than the maximum outside diameter of the drive pipe or blank casing if the casing method is used.

(2) Each sand point shall be completed using one of the following methods:

(A) Casing method.

(i) Water well casing that meets the requirements of the department's document titled "approved water well casing; water well casing for water wells other than public water-supply wells," as adopted by reference in paragraph (f)(4), shall be set from at least three feet below the ground surface to at least one foot above the ground surface. The casing shall be sealed between the casing and the pilot hole with grouting material approved by the secretary from the bottom of the casing to ground surface.

(ii) The drive pipe shall be considered the pump drop pipe and shall be capped with a solid cap.

(iii) For underground discharge completions, a "T" joint shall be used.

(iv) A sanitary well seal and a well vent shall be installed on the top of the casing in accordance with subsections (d) and (i).

(B) Drive pipe method.

(i) A sand point may be installed without a casing for aboveground discharge completions only. In these completions, the drive pipe shall terminate at least one foot above finished ground level.

(ii) The annulus between the drive pipe and the pilot hole shall be sealed from the bottom of the pilot hole to ground surface with grout. The top of the drive pipe shall be sealed airtight and watertight with a solid cap of the same material as that of the drive pipe.

(iii) A well vent shall not be required.

(C) Other methods. Other methods may be approved by the secretary on a case-by-case basis using the appeal procedure specified in K.A.R. 28-30-9.

(r) Upon abandonment of a sand point, the contractor or landowner shall pull the drive pipe or leave it in place.

(1) If the drive pipe is left in place, the sand point shall be plugged from the bottom of the well to three feet below the ground surface with approved grouting material. The sand point constructed by the drive pipe method shall be cut off three feet below the ground surface, and the remaining three-foot-deep hole shall be backfilled with surface soil.

(2) If the drive pipe is completely pulled, the remaining hole shall be plugged with approved grouting material from the bottom of the remaining hole to three feet below the ground surface. The hole shall be backfilled with surface soil from three feet to ground surface.

(s) Each monitoring well shall be an above-grade surface completion, unless the monitoring well is located on a roadway, sidewalk, driveway, parking lot, or other heavily trafficked area that requires an at-grade surface completion monitoring well. The following requirements shall be met for each at-grade surface completion:

(1) The location of each monitoring well shall be identified by a unique well number marked on a scaled map that shows latitude and longitude coordinates. The water well contractor shall submit the scaled map and coordinates to the department with the water well record form provided by the department.

(2) The construction method for each monitoring well shall meet the requirements of the department's procedure document titled "flush-mount well construction detail," dated May 23, 2012, which is hereby adopted by reference. (Authorized by K.S.A. 82a-1205; implementing K.S.A. 82a-1202 and 82a-1205; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1983; amended May 1, 1987; amended June 21, 1993; amended June 7, 2013.)

28-30-7. Plugging of abandoned wells, cased and uncased test holes. (a) All water wells abandoned by the landowner on or after July 1, 1979, and all water wells that were abandoned prior to July 1, 1979 which pose a threat to groundwater supplies, shall be plugged or caused

to be plugged by the landowner. In all cases, the landowner shall perform the following as minimum requirements for plugging abandoned wells.

(1) The casing shall be cut off three feet below ground surface and removed.

(2) All wells shall be plugged from bottom to top using volumes of material equaling at least the inside volume of the well.

(3) Plugging top of well:

(A) For cased wells a grout plug shall be placed from six to three feet below ground surface.

(B) For dug wells, the lining material shall be removed to at least five feet below ground surface, and then sealed at five feet with a minimum of six inches of concrete or other materials approved by the department. Compacted surface silts and clays shall be placed over the concrete seal to ground surface.

(4) Any groundwater displaced upward inside the well casing during the plugging operation shall be removed before additional plugging materials are added.

(5) From three feet below ground level to ground level, the plugged well shall be covered over with compacted surface silts or clays.

(6) Compacted clays or grout shall be used to plug all wells from the static water level to six feet below surface.

(7) All sand and gravel used in plugging abandoned domestic or public water supply wells shall be chlorinated prior to placement into a well.

(b) Abandoned wells formerly producing groundwater from an unconfined aquifer shall be plugged in accordance with the foregoing and in addition shall have washed sand, and gravel or other material approved by the department placed from the bottom of the well to the static water level.

(c) Abandoned wells, formerly producing groundwater from confined and unconfined aquifers or in confined aquifers only, shall be plugged according to K.A.R. 28-30-7(a) and by using one of the following additional procedures:

(1) The entire well column shall be filled with grout, or other material approved by the department, by use of a grout tremie pipe.

(2) A 10 foot grout plug shall be placed opposite the impervious formation or confining layer above each confined aquifer or aquifers by use of a grout tremie pipe; and

(A) The space between plugs shall be filled with clays, silts, sand and gravel or grout and shall be placed inside the well so as to prevent bridging.

(B) A grout plug at least 20 feet in length shall be placed with a grout pipe so at least 10 feet of the plug extends below the base of the well casing and at least 10 feet of the plug extends upward inside the bottom of the well casing.

(C) A grout plug at least 10 feet in length shall be placed from at least 13 feet below ground level to the top of the cut off casing.

(3) Wells that have an open bore hole below the well casing, and where the casing was not grouted into the well bore when the well was constructed, shall be plugged by (1) or (2) above except that the top 20 feet of well casing shall be removed or perforated with a casing ripper or similar device prior to plugging. If the well is plugged according to part (2) of this subsection, the screened or perforated intervals below the well casing shall be grouted the entire length by use of a grout tremie pipe.

(d) Plugging of abandoned holes. If the hole penetrates an aquifer containing water with more than 1,000 milligrams per liter, mg/l, total dissolved solids or is in an area determined by the department to be contaminated, the entire hole shall be plugged with an approved grouting material from the bottom of the hole, up to within three feet of the ground surface using a grout tremie pipe or similar method. From three feet below ground surface to ground surface the plugged hole shall be covered over with compacted surface silts or clays; otherwise, the hole shall be plugged in accordance with the following paragraphs.

(1) Plugging of abandoned cased test holes. The casing shall be removed if possible and the abandoned test hole shall be plugged with an approved grouting material from the bottom of the hole, up to within three feet of the ground surface, using a grout tremie pipe or similar method. From three feet below ground surface to ground surface the plugged hole shall be covered over with compacted surface silts or clays. If the casing cannot be removed, in addition to plugging the hole with an approved grouting material the annular space shall also be grouted as described in K.A.R. 28-30-6 or as approved by the department.

(2) Abandoned uncased test holes, exploratory holes or any bore holes except seismic or oil field related exploratory and service holes regulated by the Kansas corporation commission under K.A.R. 82-3-115 through 82-3-117. A test hole or bore hole drilled, bored, cored or augered shall be considered an abandoned hole immediately after the completion of all testing, sampling or other operations for which the hole was originally intended.

The agency or contractor in charge of the exploratory or other operations for which the hole was originally intended is responsible for plugging the abandoned hole using the following applicable method, within three calendar days after the termination of testing or other operations.

(A) The entire hole shall be plugged with an approved grouting material from bottom of the hole, up to within three feet of the ground surface, using a grout tremie pipe or similar method.

(B) From three feet below ground surface to ground surface the plugged hole shall be covered over with compacted surface silts or clays.

(C) For bore holes of 25 feet or less, drill cuttings from the original hole may be used to plug the hole in lieu of grouting material, provided that an aquifer is not penetrated or the bore hole is not drilled in an area determined by the department to be a contaminated area.

(3) Plugging of heat pump holes drilled for closed loop heat pump systems. The entire hole shall be plugged with an approved grouting material from bottom of the hole, to the bottom of the horizontal trench, using a grout tremie pipe or similar method approved by the department.

(e) Abandoned oil field water supply wells. A water well drilled at an oil or gas drilling site to supply water for drilling activities shall be considered an abandoned well immediately after the termination of the oil or gas drilling operations. The company in charge of the drilling of the oil or gas well shall be responsible for plugging the abandoned water well, in accordance with K.A.R. 28-30-7(a), (b), and (c), within 30 calendar days after the termination of oil or gas drilling operations.

Responsibility for the water well may be conveyed back to the landowner in lieu of abandoning and plugging the well but the well must conform to the requirements for active or inactive status. The transfer must be made through a legal document, approved by the department, advising the landowner of the landowner's responsibilities and obligations to properly maintain the well, including the proper plugging of the well when it is abandoned and no longer needed for water production activities. If a transfer is to be made, the oil or gas drilling company shall provide the department with a copy of the transfer document within 30 calendar days after the termination of oil or gas drilling operations. Within 30 calendar days of the effective date of the transfer of the well the landowner shall notify the department of the intended use and whether the well is in active

status or inactive status in accordance with K.A.R. 28-30-7(f).

(f) Inactive status. Landowners may obtain the department's written approval to maintain wells in an inactive status rather than being plugged if the landowner can present evidence to the department as to the condition of the well and as to the landowner's intentions to use the well in the future. As evidence of intentions, the owner shall be responsible for properly maintaining the well in such a way that:

(1) The well and the annular space between the hole and the casing shall have no defects that will permit the entrance of surface water or vertical movement of subsurface water into the well;

(2) the well is clearly marked and is not a safety hazard;

(3) the top of the well is securely capped in a watertight manner and is adequately maintained in such a manner as to prevent easy entry by other than the landowner;

(4) the area surrounding the well shall be protected from any potential sources of contamination within a 50 foot radius;

(5) if the pump, motor or both, have been removed for repair, replacement, etc., the well shall be maintained to prevent injury to people and to prevent the entrance of any contaminant or other foreign material;

(6) the well shall not be used for disposal or injection of trash, garbage, sewage, wastewater or storm runoff; and

(7) the well shall be easily accessible to routine maintenance and periodic inspection.

The landowner shall notify the department of any change in the status of the well. All inactive wells found not to be in accordance with the criteria listed in lines one through seven above shall be considered to be abandoned and shall be plugged by the landowner in accordance with K.A.R. 28-30-7(a) through (c). (Authorized by K.S.A. 82a-1205; implementing K.S.A. 82a-1202, 82a-1205, 82a-1212, 82a-1213; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1983; amended May 1, 1987.)

28-30-8. Pollution sources. Well locations shall be approved by municipal and county governments with respect to distances from pollution sources and compliance with local regulations. The following minimum standard shall be observed.

(a) The horizontal distances between the well and the potential source of pollution or contamination such as sewer lines, pressure sewer lines, septic tanks, lateral fields, pit privy, seepage pits, fuel or fertilizer storage, pesticide storage, feed lots or barn yards shall be 50 feet or more as determined by the department.

(b) Proper drainage in the vicinity of the well shall be provided so as to prevent the accumulation and ponding of surface water within 50 feet of the well. The well shall not be located in a ravine or any other drainage area where surface water may flow into the well.

(c) When sewer lines are constructed of cast iron, plastic or other equally tight materials, the separation distance shall be 10 feet or more as determined by the department.

(d) All wells shall be 25 feet or more from the nearest property line, allowing public right-of-ways to be counted; however, a well used only for irrigation or cooling purposes may be located closer than 25 feet to an adjoining property where:

(1) such adjoining property is served by a sanitary sewer and does not contain a septic tank system, disposal well or other source of contamination or pollution; and

(2) the property to be provided with the proposed well is served by both a sanitary sewer and a public water supply. (Authorized by and implementing K.S.A. 82a-1202, 82a-1205; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1987.)

28-30-9. Appeals. (a) Requests for exception to any of the foregoing rules and regulations shall be submitted to the department in writing and shall contain all information relevant to the request.

(1) Those requests shall specifically set forth why such exception should be considered.

(2) The department may grant exceptions when geologic or hydrologic conditions warrant an exception and when such an exception is in keeping with the purposes of the Kansas groundwater exploration and protection act.

(b) Appeals from the decision of the department shall be made to the secretary, who after due consideration may affirm, reverse or modify the decision of the department. (Authorized by K.S.A. 82a-1205; implementing K.S.A. 82a-1202, 82a-1205; effective, E-74-34, July 2, 1974; effective May 1, 1975; amended May 1, 1980; amended May 1, 1983; amended May 1, 1987.)

28-30-10. Water well disinfection for wells constructed or reconstructed for human consumption or food processing. (a)

Gravel for gravel-packed wells shall be disinfected by immersing the gravel in a chlorine solution containing not less than 200 milligrams per liter, mg/l, of available chlorine before it is placed in the wells annular space.

(b) Constructed or reconstructed wells shall be disinfected by adding sufficient hypochlorite solution to them to produce a concentration of not less than 100 mg/l of available chlorine when mixed with the water in the well.

(c) The pump, casing, screen and pump column shall be washed down with a 200 mg/l available chlorine solution.

(d) All persons constructing, reconstructing, or treating, a water well and removing the pump or pump column, replacing a pump, or otherwise performing an activity which has potential for contaminating or polluting the groundwater supply shall be responsible for adequate disinfection of the well, well system and appurtenances thereto. (Authorized by and implementing K.S.A. 82a-1202, 82a-1205; effective, E-74-34, July 2, 1974; modified, L. 1975, ch. 481, May 1, 1975; amended May 1, 1980; amended May 1, 1987.)

EQUUS BEDS GROUNDWATER MANAGEMENT DISTRICT NO. 2

28-30-200. Definitions. In addition to the definitions in K.A.R. 28-30-2, the following definitions shall apply to the Equus Beds groundwater management district no. 2:

(a) "Bedrock" means shale, limestone, sandstone, siltstone, anhydrite, gypsum, salt, or other consolidated rock that can occur at the surface or underlie unconsolidated material.

(b) "Board" means the board of directors constituting the governing body of the Equus Beds groundwater management district no. 2.

(c) "Borehole" means any hole that is drilled, cored, bored, washed, driven, dug, or otherwise excavated, in which the casing and screen have been removed or in which the casing has not been installed.

(d) "Contaminate" means to engage in any act or omission causing the addition or introduction of substances to freshwater in concentrations that alter the physical, chemical, biological, or radiological properties of the freshwater, making the water unfit for beneficial use.

(e) "District" means the Equus Beds groundwa-

ter management district no. 2, which is organized for groundwater management purposes pursuant to K.S.A. 82a-1020 et seq., and amendments thereto.

(f) “Fluid” means any material or substance that flows or moves in a semisolid, liquid, sludge, gas, or any other form or state.

(g) “Free-fall” means a method used to place grout in a water well or borehole that meets all of the following conditions:

(1) The total grouting depth below ground level does not exceed 75 feet.

(2) The grouting interval is free of fluids.

(3) The diameter of the water well casing or borehole is sufficient to allow the unobstructed flow of grout throughout the entire grouting interval.

(4) Grout is poured or discharged into the water well or borehole at a controlled rate.

(h) “Fresh groundwater” means water containing not more than 1,000 milligrams of total dissolved solids per liter and 500 milligrams of chloride per liter.

(i) “Grout” has the meaning specified in K.A.R. 28-30-2.

(j) “Grout seal” means grout that is installed, placed, pumped, or injected to create a permanent, impervious watertight bond in a well casing, annular space, geologic unit, or any other apertures or apparatuses associated with a water well or borehole.

(k) “Inactive well” means a water well that meets the following conditions:

(1) Is not operational;

(2) is properly constructed as specified in K.A.R. 28-30-5 or K.A.R. 28-30-6;

(3) is equipped with a watertight seal; and

(4) is maintained in good repair until the water well is returned to service as an active water well.

(l) “Licensed geologist” means a geologist licensed to practice geology in Kansas by the Kansas board of technical professions.

(m) “Licensed professional engineer” means a professional engineer licensed to practice engineering in Kansas by the Kansas board of technical professions.

(n) “Monitoring well” means a water well used to monitor, obtain, or collect hydrologic, geologic, geophysical, chemical, or other technical data pertaining to groundwater, surface water, or other hydrologic conditions.

(o) “Test borehole” means a borehole used to obtain or collect hydrologic, geologic, geophysical, chemical, or other technical data pertaining

to groundwater, surface water, or other hydrologic conditions by means of placing sampling, logging, testing, casing, screen, or associated tools or equipment in the borehole for fewer than 30 days. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-201. Plugging operations; notification; report. (a) All plugging operations shall be supervised by one of the following:

(1) A water well contractor licensed by the department;

(2) a licensed professional engineer or licensed geologist; or

(3) the water well or borehole owner, or the landowner of the property on which the water well or borehole is located.

(b) Each water well or borehole owner, or the landowner of the property on which the water well or borehole is located, shall notify the district within 48 hours before any plugging operations occur.

(c) Within 30 days after the plugging operation is completed, one of the following requirements shall be met:

(1) The water well contractor, licensed professional engineer, or licensed geologist that supervised the water well or borehole plugging operations shall submit a completed report of the work on the department’s plugging record form WWC-5P or WWC-5 to the department, the district, and the landowner.

(2) The water well or borehole owner, or the landowner of the property on which the water well or borehole is located, shall submit a completed report of the work on the department’s plugging record form WWC-5P or WWC-5 to the department and the district. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-202. Plugging operations for an abandoned water well or borehole; responsibility. (a) Each water well or borehole shall be considered abandoned if at least one of the following conditions exists:

(1) The water well or borehole was not completed.

(2) The water well or borehole threatens to contaminate fresh groundwater.

(3) The water well or borehole poses a safety or health hazard.

(4) Uncontrolled fluid flow is encountered or present in the water well or borehole.

(5) The use of the water well or borehole has ceased.

(6) The borehole testing, sampling, or other operations are completed within 30 days of completion of the borehole drilling.

(7) The water well or borehole owner has not demonstrated the intention to use the water well or borehole.

(8) The water well can not be maintained in an active or inactive status.

(9) The water well or borehole is not operational or functional for the intended use.

(b) Each water well or borehole owner or the landowner of the property shall plug or cause an abandoned water well or borehole to be plugged as required in subsection (c) of this regulation.

(c) Except as specified in subsection (e), the minimum plugging operations for an abandoned water well or borehole shall include the following:

(1) Before plugging operations begin, the following water well or borehole data shall be recorded as follows:

(A) The legal description of the water well or borehole location, to the nearest 10-acre tract and, if available, the geographic coordinates consisting of the latitude, longitude, and base datum;

(B) the diameter of the water well or borehole;

(C) the static water level; and

(D) the total depth of the water well or borehole.

(2) The materials used to plug a water well or borehole shall be clean, free of defects, properly prepared, and installed according to the manufacturer's specifications.

(3) All plugging material that forms a bridge, entraps air or other fluids, or forms a blockage in the water well or borehole shall be freed or removed before continuing plugging operations.

(4) All pumping, sampling, logging, and related equipment and any other material or debris in the water well or borehole shall be removed from the water well or borehole.

(5) The annular space of the water well shall be grouted as specified in K.A.R. 28-30-203.

(6) Before plugging operations begin and when plugging operations are suspended or interrupted, the opening of the water well or borehole shall be secured to prevent fluids from entering the water well or borehole.

(7) Before placement of any plugging material, the water well or borehole shall be disinfected as specified in K.A.R. 28-30-205.

(8) Except as specified in subsection (d) of this

regulation, all of the following minimum grouting requirements shall be met:

(A) The water well or borehole shall be grouted from the bottom to three feet below ground level.

(B) Each water well meeting the requirements of subsection (d) shall be grouted from the top of the sand or gravel plugging material to three feet below ground level.

(C) Grout shall be placed in the water well or borehole using one of the following:

(i) A grout tremie pipe;

(ii) free-fall; or

(iii) a grouting procedure recommended by the grout manufacturer.

(D) Grout shall be allowed to cure as recommended by the grout manufacturer.

(9) Except as required by K.A.R. 28-30-203, the water well casing shall be cut off at a minimum of three feet below land surface and removed.

(10) From three feet below land surface to land surface, the water well or borehole shall be back-filled with clean, compacted topsoil and sloped so that drainage or runoff is directed away from the plugged water well or borehole.

(d) Any water well or borehole owner, landowner of the property, water well contractor, licensed geologist, or licensed professional engineer may utilize coarse sand or fine gravel to plug a water well by filling the water well casing to the static water level or six feet below ground level, whichever is the greater distance below ground level, if both of the following water well conditions are present:

(1) The water well is cased.

(2) The water well is completed in a single unconfined aquifer.

(e) Drill cuttings from the original borehole may be used to plug a borehole that meets all of the following conditions:

(1) The depth of the borehole is less than the highest historical groundwater level.

(2) The depth of the borehole is 25 feet or less below ground level.

(3) The borehole is not located in a contaminated area. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-203. Annular space grouting procedures. (a) Each water well or borehole owner or landowner of the property with an abandoned water well that was constructed on or after May 1, 1983 shall have the water well's annular space grouted as follows:

(1) From three feet below ground level to a minimum of 20 feet below ground level; or

(2) below the point at which a pitless well adapter attaches to the well casing to a minimum of 20 feet below the pitless well adapter.

(b) The annular space of each abandoned water well in which the water well was constructed before May 1, 1983 shall be grouted as follows:

(1) If the annular space does not contain grout or gravel pack and is free of debris, the grout shall be placed in the annular space in the following manner:

(A) From three feet below ground level to 20 feet below ground level; or

(B) below the point at which a pitless well adapter attaches to the well casing to a minimum of 20 feet below the pitless well adapter.

(2) If the annular space contains gravel pack or other material, all of the following requirements shall be met:

(A) The well casing shall be removed to a depth of four feet below ground level.

(B) The annular space shall be freed of gravel pack, any other material, and fluid from the top of the casing to six feet below the top of the well casing.

(C) The grout shall be placed in the annular space from six feet below the top of the well casing to one foot above the top of the well casing.

(c) From three feet below ground level to ground level, the water well or borehole shall be backfilled with clean, compacted topsoil and sloped so that the drainage or runoff is directed away from the plugged water well or borehole.

(d) If groundwater is encountered at a depth less than the minimum grouting requirement, the annular space grouting requirement may be modified by requesting a variance from the district as specified in K.A.R. 28-30-208. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-204. Inactive well; application; construction and extension. (a) Each owner of an inactive water well shall meet the following requirements:

(1) Submit a completed, signed, and notarized inactive water well agreement, on a form provided by the district, to the district manager 30 days before placing the well on inactive status. The form shall include a statement that the water well does not pose a public health or safety hazard and does not threaten to contaminate the groundwater;

(2) remove all pumping equipment from the water well;

(3) construct the water well and the annular space as specified in K.A.R. 28-30-6;

(4) seal and maintain the water well and the annular space to prohibit the entrance of surface fluids and materials and the vertical movement of subsurface water into the well and to prevent damage;

(5) post a sign that meets the following conditions within three feet of the water well:

(A) Has a minimum height of three feet above land surface;

(B) is easily visible;

(C) is continually maintained; and

(D) is constructed with the words "Inactive Water Well" and a legal description consisting of the 10-acre tract, section, township, and range description printed legibly; and

(6) securely install a watertight seal or cap on the water well casing opening a minimum of one foot above land surface that consists of one of the following:

(A) Steel plating that is a minimum of ¼ inch thick and is welded to the casing opening;

(B) a polyvinylchloride cap glued to the water well casing opening, with a minimum standard dimension ratio (SDR) of 21 or less on well casing less than four inches in diameter and a minimum SDR of 26 or less on well casing four or more inches in diameter. The SDR shall be calculated by dividing the casing's outside diameter (OD) by its minimum wall thickness (MWT); or

(C) any other seal or cap that is approved by the district manager.

(b) Each water well owner shall repair all damage to the water well within 30 days, unless the district manager determines that the water well poses a public health or safety hazard, in which case the district manager shall set the time period for fewer than 30 days.

(c) Each water well owner shall notify the district within 30 days after the water well is returned to service as an active water well.

(d) The district manager or a staff member of the district may inspect any inactive water well.

(e) Each water well owner shall be responsible for properly maintaining the water well in the inactive status.

(f) A radius of 50 feet around the inactive well shall be free of contamination.

(g) An inactive water well shall not be used for disposal or injection of any fluids or materials.

(h) Each inactive water well shall be easily accessible for routine maintenance and inspection.

(i) Each water well owner shall notify the district manager of any change in the condition of the water well.

(j) Each inactive water well that does not meet the requirements of these regulations shall be deemed abandoned and shall be plugged in accordance with these regulations.

(k) The expiration date of the inactive water well period may be extended beyond the date authorized in the approved inactive water well agreement or the date of any extension authorized by the district manager, if the water well is in good repair and meets the requirements of these regulations. The extension of time shall not exceed one year beyond the expiration date of the inactive well agreement or the date of any authorized extension.

(l) Each approved inactive water well request and each approved extension of time shall be reported by the district to the department, in writing, within 30 days of approval on a form provided by the district. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-205. Disinfection of an abandoned water well or borehole. (a) Except as specified in subsection (b), the following minimum quantities of sodium hypochlorite with 5.25 percent to 6.0 percent strength, manufactured under trade names including Clorox, Purex, Sno-White, and Topco, and other bleach products with similar properties, shall be used to disinfect each abandoned water well or borehole:

Water well casing or hole diameter (inches)	Sodium hypochlorite (fluid ounces per foot of water column)
1.25	0.015
1.5	0.023
2	0.041
2.5	0.064
3	0.094
3.5	0.127
4	0.165
5	0.259
6	0.381
8	0.660
10	1.036
12	1.490
14	2.031

Water well casing or hole diameter (inches)	Sodium hypochlorite (fluid ounces per foot of water column)
16	2.650
18	3.354
24	5.966
30	9.317

(b) Any concentration of sodium hypochlorite not specified in subsection (a) or any combination of calcium hypochlorite may be used to disinfect an abandoned water well or borehole, if a minimum concentration of 100 milligrams of chlorine solution per liter per foot of water column in the water well or borehole is produced. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028 and K.S.A. 82a-1213; effective Sept. 30, 2005.)

28-30-206. Administrative appeal to the board. (a) Any owner of a water well or borehole or any person whose legal rights, duties, privileges, immunities, or other legal interests are affected by an order issued by the district may request an appeal hearing with the board.

(b) The request for hearing shall be filed with the board within 30 days after service of the order on the owner or owners of the water well or borehole or any person whose legal rights, duties, privileges, immunities, or other legal interests are affected by the order. The request for hearing shall state the basis for requesting a hearing and shall be accompanied by documentation supporting the request.

(c) During the hearing, the board may take into consideration any relevant information or data, including information and data from any person whose legal rights, duties, privileges, immunities, or other legal interests may be affected by the order.

(d) After consideration of all information and data presented, the board shall issue one of the following:

(1) An order remanding the case to the district manager with instructions for additional investigation; or

(2) a final order that contains findings of fact and conclusions of law.

(e) Within 15 days of the service of a final order, the owner or owners of the water well or borehole or any person whose legal rights, duties, privileges, immunities, or other legal interests are affected may file a written petition for reconsideration to the board. The petition for reconsideration

shall state the basis and contain any facts and conclusions of law that are in dispute.

(f) The board shall render a written order denying the petition for reconsideration, granting the petition for reconsideration and modifying the final order, or granting the petition for reconsideration and setting the matter for further proceedings. After further proceedings, the petition for reconsideration may be denied or granted in whole or in part.

(g) Unless clear and convincing evidence is presented to the board, the board shall not render a written order if the order would result in any of the following:

(1) The impairment of an existing groundwater use;

(2) an adverse effect on public health, safety, or the environment;

(3) the threat of groundwater contamination;

(4) an adverse effect on the public interest; or

(5) the impairment of the board's ability to apply and enforce these regulations or the management program specified in K.S.A. 82a-1029, and amendments thereto.

(h) Any owner or owners or any person whose legal rights, duties, privileges, immunities, or other legal interests are affected by a final order or order rendered upon reconsideration may seek judicial review pursuant to the act for judicial review and civil enforcement of agency actions specified in K.S.A. 77-601 et seq., and amendment thereto.

(i) Each order issued by the board shall be mailed to the owner or owners; any person whose legal rights, duties, privileges, immunities, or other legal interests are affected by the order; and the department. Service shall be deemed complete upon mailing. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028; effective Sept. 30, 2005.)

28-30-207. Variance; extension of time.

(a) If an individual or party wants a variance from any of the regulations contained in K.A.R. 28-30-200 through K.A.R. 28-30-206 or an extension of time pursuant to K.A.R. 28-30-204, the individual or party shall submit a request, in writing, to the district.

(1) Each request shall include the following:

(A) The name, address, telephone number, and contact person of the individual or party requesting the variance or extension of time;

(B) the specific legal description of the site location to which the variance or extension of time would apply;

(C) the specific regulation from which the variance is sought or the amount of time requested; and

(D) the reason for requesting the variance or extension of time and any supporting data.

(2) A variance or extension of time may be granted by the district manager if the variance or extension is in keeping with the purposes of the Kansas groundwater exploration and protection act and the groundwater management district act.

(b) Each variance or extension of time granted by the district manager shall be reported by the district to the department within 30 days of approval.

(c) Each individual or party who wants an extension of time for the inactive water well period shall submit the request at least 30 days before the expiration date on a form provided by the district. (Authorized by and implementing K.S.A. 2004 Supp. 82a-1028; effective Sept. 30, 2005.)

Article 31.—HAZARDOUS WASTE MANAGEMENT STANDARDS AND REGULATIONS

28-31-1. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-2. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-3. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-4. EPA identification numbers; notification requirement for hazardous waste, universal waste, and used oil activities. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279.

(a) Each person who is required to obtain an EPA identification number by 40 CFR part 124 or 40 CFR parts 260 through 279 and each Kansas small quantity generator shall notify the department of their hazardous waste, universal waste, and used oil activities and shall obtain an EPA identification number by submitting to the department KDHE form 8700-12 or another form approved by the secretary.

(b) Each person that is newly subject to these notification requirements due to promulgation of a statute or regulation shall notify the department of that person's hazardous waste, universal waste, and used oil activities within 60 days of the effective date of the statute or regulation, unless a different date is specified in that statute or regulation.

(c) Each person shall update the information associated with that person's EPA identification number if there is a change in the information. The person shall submit these changes to the department on KDHE form 8700-12 or another form approved by the secretary, no more than 60 days after the change occurs. (Authorized by and implementing K.S.A. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended March 22, 1996; amended June 4, 1999; amended Sept. 20, 2002; amended April 29, 2011.)

28-31-5. (Authorized by and implementing K.S.A. 65-3431 and K.S.A. 65-3458; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-86-6, March 22, 1985; amended, T-86-32, Sept. 24, 1985; amended, May 1, 1986; amended May 1, 1987; amended Feb. 5, 1990; amended April 25, 1994; revoked April 29, 2011.)

28-31-6. Registration and insurance requirements for transporters of hazardous waste and used oil. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Applicability. This regulation shall apply to the following:

(1) Each person that transports hazardous waste and is subject to the requirements of K.A.R. 28-31-263a; and

(2) each person that transports used oil and is subject to the requirements of 40 CFR part 279, subpart E.

(b) Registration. Each transporter shall register with the secretary according to the following requirements:

(1) The transporter shall submit the registration application on forms provided by the department.

(2) The transporter shall obtain written acknowledgment from the secretary that registration is complete before transporting hazardous waste or used oil within, into, out of, or through Kansas.

(3) The transporter shall carry a copy of the written acknowledgment in all vehicles transporting hazardous waste or used oil and shall provide the written acknowledgment for review upon request.

(4) The transporter shall update the registration information if there is a change in that information. The transporter shall submit these changes on forms provided by the department within 60 days of the date of the change.

(c) Insurance requirements. Each transporter shall secure and maintain liability insurance on each of the transporter's vehicles transporting hazardous waste or used oil in Kansas.

(1) The limits of insurance shall not be less than \$1 million per person and \$1 million per occurrence for bodily injury or death and \$1 million for all damage to the property of others. When combined bodily injury or death and property damage coverage are provided, the total limits shall not be less than \$1 million.

(2) If any coverage is reduced or canceled, the transporter shall notify the secretary in writing at least 35 days before the effective date of the reduction or cancellation.

(3) The transporter shall, before the expiration date of the insurance policy, provide the secretary with proof of periodic renewal in the form of a certificate of insurance showing the monetary coverage and the expiration date.

(d) Denial or suspension of registration.

(1) Any application may be denied and any transporter's registration may be suspended if the secretary determines that one or more of the following apply:

(A) The transporter failed or continues to fail to comply with any of the following:

(i) Provisions of the air, water, or waste statutes relating to environmental protection or to the protection of public health or safety, including regulations issued by Kansas or by the federal government; or

(ii) any condition of any permit or order issued to the transporter by the secretary.

(B) Any state or territory or the District of Columbia has found that the applicant or transporter has violated that government's hazardous waste or used oil transporter laws or regulations.

(C) One or more of the following is a principal of another corporation that would not be eligible for registration:

(i) The transporter;

(ii) a person who holds an interest in the transporter;

(iii) a person who exercises total or partial control of the transporter; or

(iv) a person who is a principal of the parent corporation.

(2) Each notice of denial or suspension shall be issued in writing by the secretary and shall inform the applicant or transporter of the procedures for requesting a hearing pursuant to K.S.A. 65-3456a and amendments thereto. (Authorized by and implementing K.S.A. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; amended April 29, 2011.)

28-31-7. (Authorized by and implementing K.S.A. 1984 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; revoked April 29, 2011.)

28-31-8. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-8a. (Authorized by and implementing K.S.A. 65-3431, as amended by L. 1987, Ch. 295, Sec. 6; effective, T-85-42, Dec. 19, 1984; effec-

tive May 1, 1985; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; revoked April 6, 1992.)

28-31-8b. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-9. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-84-5, Feb. 10, 1983; amended May 1, 1984; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-10. Hazardous waste monitoring fees. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Fee requirement. Each of the following persons shall pay an annual monitoring fee to the department according to the requirements of subsections (b) through (e):

(1) Each owner or operator of a hazardous waste treatment, storage, or disposal facility;

(2) each hazardous waste transporter; and

(3) each hazardous waste generator.

(b) Hazardous waste treatment, storage, or disposal facilities. The owner or operator of each facility shall pay the annual monitoring fee before January 1 of each year.

(1) The fee for each active facility shall be based on the following schedule:

(A) On-site storage facility..... \$10,000

(B) Off-site storage facility \$10,000

(C) On-site nonthermal treatment facility \$10,000

(D) Off-site nonthermal treatment facility \$12,000

(E) On-site thermal treatment facility .. \$12,000

(F) Off-site thermal treatment facility .. \$18,000

(G) On-site landfill or underground injection well \$14,000

(H) Off-site landfill or underground injection well \$18,000

(2) The fee for each facility subject to postclosure care shall apply upon receipt by the department of the certification of closure specified in 40

CFR 264.115 or 40 CFR 265.115. This fee shall be \$14,000.

(3) The owner or operator of each facility conducting more than one of the hazardous waste activities specified in paragraphs (b)(1) and (2) shall pay a single fee. This fee shall be in the amount specified for the activity having the highest fee of those conducted.

(c) Hazardous waste transporters. Each hazardous waste transporter shall pay the annual monitoring fee when the transporter registers with the department in accordance with K.A.R. 28-31-6, and before January 1 of each subsequent year. This fee shall be \$200.

(d) Hazardous waste generators.

(1) Each large quantity generator shall pay the annual monitoring fee before March 1 of each year.

(A) The fee shall be based on all hazardous waste generated during the previous calendar year according to the following schedule:

Total Yearly Quantity Generated	Monitoring Fee
Less than or equal to 5 tons	\$300
Greater than 5 tons but less than or equal to 50 tons	\$900
Greater than 50 tons but less than or equal to 500 tons	\$2,800
Greater than 500 tons	\$8,000

(B) Each large quantity generator that reclaims hazardous waste on-site to recover substantial amounts of energy or materials shall be exempt from payment of monitoring fees for the amount of hazardous waste reclaimed. This exemption shall not apply to hazardous waste residues produced during reclamation.

(2) Each small quantity generator and each Kansas small quantity generator shall pay the annual monitoring fee of \$150 before April 1 of each year.

(e) Monitoring fee payments. Each monitoring fee payment that is made by check or money order shall be made payable to the “hazardous waste management fund - Kansas department of health and environment.”

This regulation shall be effective on and after July 1, 2012. (Authorized by and implementing K.S.A. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-85-2, Jan. 13, 1984; amended May 1, 1984; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended, T-86-32, Sept. 24, 1985; amended May 1, 1986; amended, T-87-49, Dec. 19, 1986; amended May

1, 1987; amended May 1, 1988; amended April 25, 1994; amended March 22, 1996; amended June 4, 1999; amended Sept. 20, 2002; amended Oct. 29, 2004; amended April 29, 2011; amended July 1, 2012.)

28-31-10a. Off-site hazardous waste treatment fees. (a) Each off-site hazardous waste treatment facility shall pay fees proportionate to the quantity of hazardous waste treated, subject to the caps set forth in K.S.A. 65-3431, and amendments thereto. These fees shall be based upon the following schedule:

Hazardous Waste Category	Fee
Dioxin	\$20 per ton
Fewer than 5,000 British Thermal Units (BTUs) per pound	\$10 per ton
Equal to or greater than 5,000 BTUs per pound	\$2 per ton

For the purpose of calculating these fees, “dioxin” shall mean hazardous wastes carrying EPA hazardous waste numbers F020, F021, F022, F023, F026, F027, or F028, or any combination of these hazardous waste numbers. “Ton” shall mean 2,000 pounds.

(b) Payment of the treatment fees assessed under subsection (a) of this regulation shall be made quarterly. The quarterly fee shall be paid on or before the last day of April, July, October, and January for the preceding three-month period ending the last day of March, June, September, and December.

(c) Each treatment fee payment shall meet these requirements:

(1) Be made by check or money order made payable to the “Kansas department of health and environment—attention: hazardous waste management fund”; and

(2) be accompanied by a form, furnished by the department and completed by the facility operator. The form shall state the total weight of hazardous wastes treated during the reporting period and shall provide sufficient information to verify findings that a treatment process qualified as material or energy recovery. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective April 6, 1992; amended July 7, 1997; amended Sept. 20, 2002.)

28-31-11. (Authorized by and implementing K.S.A. 65-3431; effective, E-82-20, Nov. 4, 1981; effective May 1, 1982; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended April 25, 1994; revoked Sept. 20, 2002.)

28-31-12. Inspections. (a) Upon presentation of credentials and stating the purpose of the visit, the following actions may be performed during the regular business hours of the facility by the secretary or the secretary's designee:

(1) Entering any factory, plant, construction site, hazardous waste storage, treatment, or disposal facility, or other location where hazardous wastes could potentially be generated, stored, treated, or disposed of, and inspecting the premises to gather information regarding existing conditions and procedures;

(2) obtaining samples of actual or potential hazardous waste from any person or from the property of any person, including samples from any vehicle in which hazardous wastes are being transported;

(3) stopping and inspecting any vehicle, if there is reasonable cause to believe that the vehicle is transporting hazardous wastes;

(4) conducting tests, analyses, and evaluations of wastes and waste-like materials to determine whether or not the wastes or materials are hazardous and whether or not the requirements of these regulations are being met;

(5) obtaining samples from any containers;

(6) making reproductions of container labels;

(7) inspecting and copying any records, reports, information, or test results relating to wastes generated, stored, transported, treated, or disposed of;

(8) photographing or videotaping any hazardous waste management facility, device, structure, or equipment;

(9) drilling test wells or groundwater monitoring wells on the property of any person where hazardous wastes are generated, stored, transported, treated, disposed of, discharged, or migrating off-site and obtaining samples from the wells; and

(10) conducting tests, analyses, and evaluations of soil, groundwater, surface water, and air to determine whether the requirements of these regulations are being met.

(b) If, during the inspection, unsafe or unpermitted hazardous waste management procedures are discovered, the operator of the facility may be instructed by the secretary or the secretary's designee to retain and properly store hazardous wastes, pertinent records, samples, and other items. These materials shall be retained by the operator until the waste has been identified and the secretary determines the proper procedures to be used in handling the waste.

(c) When obtaining samples, the facility operator shall be allowed to collect duplicate samples for separate analyses.

(d) During the inspection, all reasonable security, safety, and sanitation measures employed at the facility shall be followed by the secretary or the secretary's designee.

(e) A written report listing all deficiencies found during the inspection and stating the measures required to correct the deficiencies shall be prepared and sent to the operator. (Authorized by and implementing K.S.A. 65-3431; effective May 1, 1982; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended May 1, 1987; amended June 4, 1999; amended April 29, 2011.)

28-31-13. Variances. (a) Application. Any person may apply for a variance from one or more specific provisions of these regulations according to the following criteria:

(1) An application for a variance may be submitted for any provision that is determined by the U.S. environmental protection agency to be more stringent or broader in scope than the federal hazardous waste regulations.

(2) The application shall be submitted to the department on a form provided by the department.

(3) The applicant shall state the reasons and circumstances that support the application and shall submit all other pertinent data to support the application.

(b) Review and public comment. A tentative decision to grant or deny a variance shall be made by the secretary according to the following criteria:

(1) A tentative decision shall be made within 60 days of receipt of the application by the department.

(2) A notice of the tentative decision and the opportunity for written public comment shall be published by the department in the following publications:

(A) The Kansas register; and

(B) the official county newspaper of the county in which the variance is requested or, if there is no official county newspaper, a newspaper published as provided in K.S.A. 64-101, and amendments thereto.

(3) Upon the written request of any person, a public meeting may be held to consider comments on the tentative decision. The person requesting a public meeting shall state the issues to be raised and shall explain why written comments would not suffice to communicate the person's views.

(c) Final decision. After all public comments have been evaluated, a final decision shall be made by the secretary according to the following criteria:

(1) A variance may be granted by the secretary if the variance meets the following requirements:

(A) The variance shall not be any less stringent than the federal hazardous waste regulations.

(B) The variance shall be protective of public health and safety and the environment.

(2) A notice of the final decision shall be published by the department in the Kansas register.

(A) If the variance is granted, all conditions and time limitations needed to comply with state or federal laws or to protect public health or safety or the environment shall be specified by the secretary.

(B) The date the variance expires shall be provided in the final decision.

(d) Extension of a prior or existing variance. Any person may submit a request in writing to extend a prior or existing variance that meets the requirements of this regulation, according to the following criteria:

(1) The person shall demonstrate the need for continuation of the variance.

(2) The variance may be reissued or extended for another period upon a finding by the secretary that the reissuance or extension of the variance would not endanger public health or safety or the environment.

(3) The review, public comment, and the final decision procedures shall be the same as those specified in subsections (b) and (c).

(e) Termination of a variance. Any variance granted pursuant to this regulation may be terminated, if the secretary finds one or more of the following conditions:

(1) Violation of any requirement, condition, schedule, or limitation of the variance;

(2) operation under the variance that fails to meet the minimum requirements established by state or federal law or regulations; or

(3) operation under the variance that is unreasonably threatening public health or safety or the environment. Written notice of termination shall be provided by the secretary to the person granted the variance. (Authorized by and implementing K.S.A. 65-3431; effective May 1, 1982; amended, T-85-42, Dec. 19, 1984; amended May 1, 1985; amended May 1, 1987; amended June 4, 1999; amended April 29, 2011.)

28-31-14. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective May 1, 1988; amended Feb. 5, 1990; amended April 25, 1994; amended June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-15. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-16. (Authorized by and implementing K.S.A. 2001 Supp. 65-3431; effective June 4, 1999; amended Sept. 20, 2002; revoked April 29, 2011.)

28-31-100. Substitution of state terms for federal terms; internal references to federal regulations. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) References to federal regulations that are adopted by reference. Each reference to 40 CFR parts 124, 260 through 268, 270, 273, and 279 shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through K.A.R. 28-31-279.

(b) References to federal regulations that are not adopted by reference.

(1) 40 CFR part 124.

(A) Each reference to 40 CFR part 124 in its entirety shall be replaced with "K.A.R. 28-31-124 through 28-31-124e."

(B) Each reference to 40 CFR 124, subpart A in its entirety shall be replaced with "K.A.R. 28-31-124 through 28-31-124e."

(C) Each reference to 40 CFR 124.2 or any portion of 40 CFR 124.2 shall be replaced with "40 CFR 270.2."

(D) Each reference to 40 CFR 124.3 or any portion of 40 CFR 124.3 shall be replaced with "K.A.R. 28-31-124a."

(E) Each reference to 40 CFR 124.5 or any portion of 40 CFR 124.5 shall be replaced with "K.A.R. 28-31-124b."

(F) Each reference to 40 CFR 124.6 or any portion of 40 CFR 124.6 shall be replaced with "K.A.R. 28-31-124c."

(G) Each reference to 40 CFR 124.8 or any portion of 40 CFR 124.8 shall be replaced with "K.A.R. 28-31-124d."

(H) Each reference to 40 CFR 124.10 or any portion of 40 CFR 124.10 shall be replaced with “K.A.R. 28-31-124e,” except in 40 CFR 124.204(d) (10), where the phrase “§§ 124.10(c)(1)(ix) and (c)(1)(x)(A)” shall be replaced with “K.A.R. 28-31-124e(e)(1)(D) and (E).”

(I) The following phrases shall be replaced with “in accordance with K.S.A. 65-3440, and amendments thereto,”:

- (i) “[A]ccording to the procedures of § 124.19”;
- (ii) “pursuant to 40 CFR 124.19”;
- (iii) “under § 124.19”;
- (iv) “under § 124.19 of this chapter”;
- (v) “under § 124.19 of this part”;
- (vi) “under the permit appeal procedures of 40 CFR 124.19.”

(2) 40 CFR 260.20 through 260.23. Each reference to 40 CFR 260.20, 260.21, 260.22, or 260.23, or any combination of these references, shall be replaced with the phrase “EPA’s rulemaking petition program.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100a. Substitution of state terms for federal terms; administrator. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) The following terms and phrases shall be replaced with “secretary,” except as noted in subsection (b):

- (1) “Administrator”;
- (2) “[a]dministrator or State Director”;
- (3) “applicable EPA Regional Administrator”;
- (4) “appropriate Regional Administrator or state Director”;
- (5) “[a]ssistant Administrator”;
- (6) “[a]ssistant Administrator for Solid Waste and Emergency Response”;
- (7) “EPA Regional Administrator”;
- (8) “EPA Regional Administrator(s)”;
- (9) “EPA Regional Administrator (or his designated representative) or State authorized to implement part 268 requirements”;
- (10) “EPA Regional Administrator for the Region in which the generator is located”;
- (11) “EPA Regional Administrator(s) for the Region(s) in which the facility(ies) is(are) located”;
- (12) “EPA Regional Administrator(s) of the

EPA Region(s) in which the bonded facility(ies) is (are) located”;

(13) “EPA Regional Administrators of the Regions in which the facilities are located, or their designees”;

(14) “[r]egional Administrator”;

(15) “[r]egional Administrator(s)”;

(16) “[r]egional Administrator of every Region in which facilities for which financial responsibility is to be demonstrated through the financial test are located”;

(17) “[r]egional Administrator or state Director”;

(18) “[r]egional Administrator, or State Director, as the context requires, or an authorized representative (‘director’ as defined in 40 CFR 270.2)”;

(19) “[r]egional Administrator, or State Director (if located in an authorized state)”;

(20) “[r]egional Administrator(s) of the EPA Region(s) in which the facility(ies) is(are) located”;

(21) “USEPA Regional Administrator for Region [Region #].”

(b) The terms listed in subsection (a) shall not be replaced with “secretary” in the following federal regulations:

- (1) 40 CFR 260.10, in the following definitions:
 - (A) “Administrator”;
 - (B) “equivalent method”;
 - (C) “hazardous waste constituent”;
 - (D) “industrial furnace”; and
 - (E) “regional administrator”;
- (2) 40 CFR part 261, in the following locations:
 - (A) 40 CFR 261.10;
 - (B) 40 CFR 261.11; and
 - (C) 40 CFR 261.21;
- (3) 40 CFR part 262, subparts E and H and the appendix;
- (4) 40 CFR part 264, in the following locations:
 - (A) 40 CFR 264.12(a);
 - (B) 40 CFR 264.151(b), in the first paragraph of the financial guarantee bond;
 - (C) 40 CFR 264.151(c), in the first paragraph of the performance bond; and
 - (D) 40 CFR 265.12(a);
- (5) 40 CFR part 268, in the following locations:
 - (A) 40 CFR 268.5;
 - (B) 40 CFR 268.6;
 - (C) 40 CFR 268.40(b);
 - (D) 40 CFR 268.42(b); and
 - (E) 40 CFR 268.44; and
- (6) 40 CFR part 270, in the following locations:

- (A) 40 CFR 270.2, in the following definitions:
 - (i) “Administrator”;
 - (ii) “corrective action management unit or CAMU”;
 - (iii) “director”;
 - (iv) “major facility”;
 - (v) “regional administrator”; and
 - (vi) “state/EPA agreement”;
- (B) 270.5;
- (C) 270.10(e)(2) and (3);
- (D) 270.10(f)(3); and
- (E) 270.11(a)(3). (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100d. Substitution of state terms for federal terms; DOT, director. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) Department of transportation. The terms “Department of Transportation” and “DOT” shall be replaced with “U.S. department of transportation,” except in the following instances:

- (1) In an address;
- (2) in the term “DOT hazard class”;
- (3) in the term “U.S. Department of Transportation (DOT)”;
- (4) in the term “U.S. DOT.”

(b) Director.

(1) The following terms shall be replaced with “secretary” except as noted in paragraphs (b)(2) through (4):

- (A) “Director” and “Directors”;
- (B) “[d]irector of an EPA permitting agency”;
- (C) “[r]egional or State Directors to whom the claim was submitted”;

(D) “[r]egional or State RCRA and CAA Directors, in whose jurisdiction the exclusion is being claimed and where the comparable/syngas fuel will be burned”;

- (E) “[s]tate and Regional Directors”; and
- (F) “[s]tate Director.”

(2) The term “Director” shall not be replaced with “secretary” when used in the following terms:

- (A) “Director of the Federal Register”;
- (B) “[d]irector, Office of Hazardous Materials Regulations”; and

(C) “EPA Director of the Office of Solid Waste.”

(3) The term “directors” shall not be replaced with “secretary” in the term “Board of Directors.”

(4) The terms “Director,” “Directors,” and “State Director” shall not be replaced with “secretary” in the following locations:

- (A) 40 CFR part 262, in the appendix;
- (B) 40 CFR 266.201 and 266.210, in the definition of “director”; and

- (C) 40 CFR 270.2, in the following definitions:
 - (i) “Director”; and
 - (ii) “state director.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100e. Substitution of state terms for federal terms; engineer, environmental appeals board, EPA. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) Engineer. The following terms shall be replaced with “Kansas professional engineer”:

- (1) “[G]eotechnical engineer”;
- (2) “PE”;
- (3) “professional engineer”;
- (4) “qualified engineer”;
- (5) “qualified Professional Engineer”;
- (6) “qualified registered professional engineer”;
- (7) “qualified, registered professional engineer”; and

(8) “registered professional engineer.”

(b) Environmental appeals board.

(1) The term “Environmental Appeals Board” shall be replaced with “secretary.”

(2) The term “EPA’s Environmental Appeals Board” shall be replaced with “the secretary.”

(c) Environmental protection agency.

(1) The following terms shall be replaced with “department” or “the department” except as noted in paragraphs (2) through (6) of this subsection:

- (A) “Agency”;
- (B) “applicable EPA Regional Office, Hazardous Waste Division”;

(C) “appropriate regional EPA office”;

(D) “[e]nvironmental Protection Agency”;

(E) “[e]nvironmental Protection Agency (EPA)”;

(F) “EPA”;

(G) “EPA Headquarters”;

(H) “EPA region”;

(I) “EPA region or authorized state”;

(J) “EPA regional office”;

(K) “regulatory agency”;

- (L) “United States Environmental Protection Agency”;
- (M) “United States Environmental Protection Agency (EPA)”;
- (N) “U.S. Environmental Protection Agency”; and
- (O) “U.S. Environmental Protection Agency (EPA).”
- (2) The terms listed in paragraph (1) of this subsection shall not be replaced with “the department” in the following instances:
- (A) Where the term is used in an address; and
- (B) where the term is part of an EPA document name or number.
- (3) The term “Agency” shall not be replaced with “the department” when used as part of the following terms in the singular or plural:
- (A) “Agency of the Federal government”;
- (B) “agency of the Federal or State government”;
- (C) “[f]ederal Agency”;
- (D) “oversight agency”; and
- (E) “[s]tate agency.”
- (4) The term “Environmental Protection Agency” shall not be replaced with “the department” when used as part of the term “Environmental Protection Agency identification number.”
- (5) The term “EPA” shall not be replaced with “the department” when used as part of the following terms in the singular or plural:
- (A) “EPA Acknowledgment of Consent”;
- (B) “EPA Director of the Office of Solid Waste”;
- (C) “EPA facility ID number”;
- (D) “EPA Form”;
- (E) “EPA guidance”;
- (F) “EPA Hazardous Waste”;
- (G) “EPA Hazardous Waste Code”;
- (H) “EPA Hazardous Waste No.”;
- (I) “EPA Hazardous Waste Number”;
- (J) “EPA identification number”;
- (K) “EPA Manual”;
- (L) “EPA Publication”;
- (M) “EPA Protocol”;
- (N) “EPA standard method”;
- (O) “EPA test method”;
- (P) “EPA waste code”; and
- (Q) “U.S. EPA Identification Number.”
- (6) The terms listed in paragraph (c)(1) shall not be replaced with “the department” in the following locations:
- (A) 40 CFR part 124, in the following locations:
- (i) 124.200; and
- (ii) 124.207;
- (B) 40 CFR 260.10, in the following definitions:
- (i) “Administrator”;
- (ii) “EPA hazardous waste number”;
- (iii) “EPA identification number”;
- (iv) “EPA region”;
- (v) “federal agency”;
- (vi) “regional administrator”; and
- (vii) “replacement unit”;
- (C) 40 CFR part 261, appendix I;
- (D) 40 CFR part 262, in the following locations:
- (i) 40 CFR 262.21;
- (ii) 40 CFR 262.32(b); and
- (iii) 40 CFR part 262, subparts E, F, and H and the appendix;
- (E) 40 CFR part 264, in the following locations:
- (i) In 40 CFR 264.151, where only the term “agency” shall not be replaced; and
- (ii) in 40 CFR 264.1082(c)(4)(ii), the second occurrence of “EPA”;
- (F) in 40 CFR 265.1083(c)(4)(ii), the second occurrence of “EPA”;
- (G) 40 CFR part 266, appendix IX, sections 4 through 9, except that the first occurrence of the term “EPA” in section 8.0 shall be replaced with “the department”;
- (H) 40 CFR 267.143;
- (I) 40 CFR part 268, in the following locations:
- (i) 40 CFR 268.1(e)(3);
- (ii) 40 CFR 268.2(j);
- (iii) 40 CFR 268.5;
- (iv) 40 CFR 268.7(e); and
- (v) 40 CFR 268.44;
- (J) 40 CFR part 270, in the following locations:
- (i) 40 CFR 270.2, in the definitions of “administrator,” “application,” “approved program or approved state,” “director,” “environmental protection agency (EPA),” “EPA,” “final authorization,” “interim authorization,” “permit,” “regional administrator,” and “state/EPA agreement”;
- (ii) 40 CFR 270.5;
- (iii) 40 CFR 270.10(e)(2);
- (iv) 40 CFR 270.11(a)(3);
- (v) 40 CFR 270.51(d);
- (vi) 40 CFR 270.72(a)(5) and (b)(5); and
- (vii) 40 CFR 270.225; and
- (K) 40 CFR part 273, in the following locations:
- (i) 40 CFR 273.32(a)(3); and
- (ii) 40 CFR 273.52.
- (d) EPA form 8700-12. The term “EPA Form 8700-12” shall be replaced with “KDHE form 8700-12.”
- (e) EPA form 8700-13B. The term “EPA form 8700-13B” shall be replaced with “KDHE form

8700-13b.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100f. Substitution of state terms for federal terms; federal register. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the substitutions specified in this regulation shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279. The term “Federal Register” shall be replaced with “Kansas register” except in the following locations:

- (a) 40 CFR 266.203(c) and 266.205(e);
- (b) 40 CFR 268.5(e);
- (c) 40 CFR 268.6(j);
- (d) 40 CFR part 268, subpart D; and
- (e) 40 CFR 270.10(e)(2). (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100p. Substitution of state terms for federal terms; part B, permitting agency or authority. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) Part B. The following phrases shall be replaced with “part B application”:

- (1) “[P]art B of the RCRA application”; and
 - (2) “RCRA part B application.”
- (b) Permitting agency or authority. The following terms shall be replaced with “department” or “the department”:
- (1) “[P]ermitting agency”;
 - (2) “permitting authority”;
 - (3) “permitting authority for the facility”;
 - (4) “permitting authority of the state or territory where the facility is located”; and
 - (5) “permitting authority of the state or territory where the facility(ies) is(are) located.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100q. Substitution of state terms for federal terms; qualified geologist, qualified soil scientist. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) Qualified geologist. The term “qualified geologist” shall be replaced with “Kansas licensed geologist.”

(b) Qualified soil scientist. The term “qualified soil scientist” shall be replaced with “Kansas licensed geologist.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100r. Substitution of state terms for federal terms; RCRA. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) General references to the RCRA program and subtitle C.

(1) The following terms shall be replaced with “Kansas hazardous waste program” or “the Kansas hazardous waste program” except as noted in paragraphs (2) and (3) and subsections (o) through (q):

- (A) “RCRA”;
- (B) “RCRA hazardous waste”;
- (C) “RCRA hazardous waste management”;
- (D) “RCRA program”;
- (E) “RCRA subtitle C”;
- (F) “[r]esource Conservation and Recovery Act”;
- (G) “[r]esource Conservation and Recovery Act as amended (RCRA)”;
- (H) “[r]esource Conservation and Recovery Act of 1976 as amended”;
- (I) “[s]ubtitle C”;
- (J) “subtitle C of RCRA”; and
- (K) “subtitle C of the Resource Conservation and Recovery Act (RCRA).”

(2) The term “RCRA” shall not be replaced with “Kansas hazardous waste program” when used in the following terms, in the singular or plural:

- (A) “RCRA facility ID number”;
- (B) “RCRA hazardous waste code”;
- (C) “RCRA ID number”;
- (D) “RCRA identification number”;
- (E) “non-RCRA tank”;
- (F) “RCRA/Superfund Hotline”;
- (G) “RCRA waste code”; and
- (H) “RCRA Subtitle D.”

(3) The terms listed in paragraph (1) of this subsection shall not be replaced with “Kansas hazardous waste program” when used in the following locations:

(A) The parenthetical authority cited at the end of a section;

(B) 40 CFR 260.10, in the definition of “ ‘act’ or ‘RCRA’ ”;

(C) 40 CFR part 261, in the following locations:

(i) 40 CFR 261.4(e)(2)(iv); and

(ii) 40 CFR 261.38(c)(1)(ii);

(D) 40 CFR part 262, in the following locations:

(i) Subpart H; and

(ii) the appendix;

(E) 40 CFR part 266, in the following locations:

(i) 40 CFR 266.202(d); and

(ii) 40 CFR 266.210 and 266.240, where “RCRA hazardous waste” shall be replaced with “hazardous waste”; and

(F) 40 CFR 270.2, in the definition of “RCRA.”

(b) References to specific sections, subsections, or paragraphs of RCRA.

(1) Section 3010. The following phrases shall be replaced with “K.A.R. 28-31-4”:

(A) “RCRA section 3010”;

(B) “section 3010 of RCRA”;

(C) “section 3010 of the Act”; and

(D) “section 3010(a) of RCRA.”

(2) Section 7003. The following terms shall be replaced with “K.S.A. 65-3443 and 65-3445”:

(A) “[S]ection 7003”; and

(B) “section 7003 of RCRA.”

(c) References to RCRA and subtitle C facilities and disposal units.

(1) The term “RCRA hazardous waste land disposal unit” shall be replaced with “Kansas hazardous waste land disposal unit.”

(2) The term “RCRA hazardous waste management facility” shall be replaced with “Kansas hazardous waste management facility.”

(3) The term “Subtitle C landfill cell” shall be replaced with “Kansas hazardous waste landfill cell.”

(4) The term “Subtitle C monofill” shall be replaced with “Kansas hazardous waste monofill.”

(d) References to permits. The following substitutions shall apply in the singular and plural:

(1) The following phrases shall be replaced with “Kansas hazardous waste facility permit” except as noted in paragraph (d)(2):

(A) “Permit issued under section 3005 of this act”;

(B) “permit under RCRA 3005(c)”;

(C) “permit under RCRA section 3005(c)”;

(D) “permit under section 3005 of this act”;

(E) “RCRA hazardous waste permit”;

(F) “RCRA operating permit”;

(G) “RCRA permit”;

(H) “RCRA permit under RCRA section 3005(c)”;

(I) “RCRA, UIC, or NPDES permit”;

(J) “RCRA, UIC, PSD, or NPDES permit”; and

(K) “[s]tate RCRA permit.”

(2) In 40 CFR 270.51(d), the first occurrence of the phrase “RCRA permit” shall not be replaced with “Kansas hazardous waste facility permit.”

(3) The phrase “RCRA-permitted” shall be replaced with “Kansas-permitted.”

(4) The following phrases shall be replaced with “Kansas hazardous waste facility standardized permit”:

(A) “RCRA standardized permit”; and

(B) “RCRA standardized permit (RCRA).”

(5) The phrase “a final permit under RCRA section 3005” shall be replaced with “a final permit issued by EPA under RCRA section 3005 or a Kansas hazardous waste facility permit” in the following locations:

(A) 40 CFR 264.1030(c);

(B) 40 CFR 264.1050(c);

(C) 40 CFR 264.1080(c); and

(D) 40 CFR 265.1080(c). (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-100s. Substitution of state terms for federal terms; state. When used in any provision of 40 CFR part 124, parts 260 through 266, or part 268, 270, 273, or 279, as adopted by reference by K.A.R. 28-31-124 through 28-31-279, the following substitutions shall be made unless otherwise specified in K.A.R. 28-31-124 through 28-31-279:

(a) The following terms when used in the singular shall be replaced with “state of Kansas” or “the state of Kansas” except as noted in subsections (b) and (c):

(1) “State” and “a State” when referring to a political entity;

(2) “approved State” and “an approved State”; and

(3) “authorized State” and “an authorized State.”

(b) The term “State” shall not be replaced when used in the following terms in the singular or plural:

(1) “Agreement State”; and

(2) “[s]tate agency.”

(c) The terms listed in subsection (a) shall not be replaced in the following locations:

(1) 40 CFR 124.207(a)(3);

(2) 40 CFR 260.10, in the following definitions:

(A) “Designated facility”;

(B) “explosives or munitions emergency response specialist”;

(C) “person”;

- (D) “publicly owned treatment works”; and
- (E) “state”;
- (3) 40 CFR part 261, in the following locations:
 - (A) 40 CFR 261.4(g)(2)(i); and
 - (B) 40 CFR 261.5;
 - (4) 40 CFR part 262;
 - (5) 40 CFR part 264, in the following locations:
 - (A) 40 CFR part 264, subparts C and D;
 - (B) 40 CFR 264.71(e); and
 - (C) 40 CFR part 264, subpart H;
 - (6) 40 CFR part 265, in the following locations:
 - (A) 40 CFR part 265, subparts C and D;
 - (B) 40 CFR 265.71(e); and
 - (C) 40 CFR 265.147;
 - (7) 40 CFR 266.210, in the following definitions:
 - (A) “Agreement state”; and
 - (B) “naturally occurring and/or accelerator-produced radioactive material (NARM)”;
 - (8) 40 CFR part 267, subparts C, D, and H;
 - (9) 40 CFR part 270, in the following locations:
 - (A) 40 CFR 270.2, in the following definitions:
 - (i) “Approved program or approved state”;
 - (ii) “director”;
 - (iii) “final authorization”;
 - (iv) “interim authorization”;
 - (v) “person”;
 - (vi) “POTW”;
 - (vii) “state”;
 - (viii) “state director”;
 - (ix) “state/EPA agreement”;
 - (B) 40 CFR 270.10(g)(1)(ii), where only the term “approved State” shall not be replaced;
 - (C) 40 CFR 270.11(a)(3); and
 - (D) 40 CFR 270.13;
 - (10) 40 CFR 273.14(c)(1)(iii); and
 - (11) 40 CFR 279.24(a)(3). (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-124. Procedures for permitting; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR 124.11 through 124.17 and 40 CFR part 124, subparts B and G, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

- (1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;
 - (2) the exclusions from adoption listed in subsection (b); and
 - (3) the modifications listed in subsection (c).
- (b) Exclusions. The following portions of 40

CFR 124.12 through 124.17 and 40 CFR part 124, subpart G shall be excluded from adoption:

- (1) 40 CFR 124.12(b);
 - (2) 40 CFR 124.16(b)(2);
 - (3) 40 CFR 124.17(b);
 - (4) 40 CFR 124.204(d)(1), (4) through (7), and (9); and
 - (5) 40 CFR 124.205(a), (c), and (i) through (l).
- (c) Modifications. The following modifications shall be made to 40 CFR 124.11 through 124.17 and 40 CFR part 124, subparts B and G:
- (1) Each occurrence of the term “decisionmaking” shall be replaced with “permitting.”
 - (2) Each parenthetical statement starting with “Applicable to State programs” shall be deleted.
 - (3) In 40 CFR 124.11, the text “or the permit application for 404 permits when no draft permit is required (see § 233.39)” shall be deleted.
 - (4) In 40 CFR 124.12(a)(3), the phrase “For RCRA permits only,” shall be deleted.
 - (5) In 40 CFR 124.13, the term “EPA documents” shall be replaced with “EPA or department documents.”
 - (6) The first sentence of 40 CFR 124.14(a)(4) shall be deleted.
 - (7) In 40 CFR 124.14(b)(2), the phrase “a revised statement of basis under § 124.7,” shall be deleted.
 - (8) The following text shall be added to the end of 40 CFR 124.15(b)(2): “by a person who filed comments on the draft permit or participated in the public hearing through written or oral comments. Stays of contested permit conditions are subject to § 124.16.”
 - (9) In 40 CFR 124.16(a)(1), the following text shall be deleted:
 - (A) “(No stay of a PSD permit is available under this section.)”;
 - (B) “or new injection well, new source, new discharger or a recommencing discharger”; and
 - (C) “, injection well, source or discharger pending final agency action. See also § 124.60.”
 - (10) In 40 CFR 124.16(a)(2)(i), the following text shall be deleted:
 - (A) “, injection wells, and sources”; and
 - (B) “, injection well, or source.”
 - (11) In 40 CFR 124.16(a)(2)(ii), the following text shall be deleted:
 - (A) “[R]eceiving notification from the EAB of”;
 - (B) “the EAB,”; and
 - (C) “[f]or NPDES permits only, the notice shall comply with the requirements of § 124.60(b).”
 - (12) In 40 CFR 124.16(b), the text “and he or she has accepted each appeal” shall be deleted.

(13) In 40 CFR 124.17(a), the text “States are” shall be replaced with “The department is.”

(14) In 40 CFR 124.17(a)(2), the phrase “or the permit application (for section 404 permits only)” shall be deleted.

(15) In 40 CFR 124.31(a), 124.32(a), and 124.33(a), the following sentence shall be deleted: “For the purposes of this section only, ‘hazardous waste management units over which EPA has permit issuance authority’ refers to hazardous waste management units for which the State where the units are located has not been authorized to issue RCRA permits pursuant to 40 CFR part 271.”

(16) In 40 CFR 124.204(d)(3), the sentence shall be replaced with “All subsections shall apply.”

(17) In 40 CFR 124.205(d), the text “(b),” shall be deleted.

(18) In 40 CFR 124.208(e), the phrase “§ 124.12(b), (c), and (d)” shall be replaced with “§ 124.12(c) and (d).” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3440; effective April 29, 2011.)

28-31-124a. Procedures for permitting; application for a permit. Each reference in this regulation to 40 CFR part 270 shall mean 40 CFR part 270 as adopted by reference in K.A.R. 28-31-270. (a) Each person that is required to have a Kansas hazardous waste facility permit, as specified in 40 CFR part 270, K.S.A. 65-3433 and amendments thereto, or K.S.A. 65-3437 and amendments thereto, shall submit a completed, signed application to the department.

(b) Before submitting the application, the applicant shall submit to the department a disclosure statement that contains all information necessary for the secretary to conduct the background investigation required by K.S.A. 65-3437, and amendments thereto.

(1) The disclosure statement shall be submitted on forms provided by the department.

(2) If there is a parent company, the parent company shall submit a separate disclosure statement to the department on forms provided by the department.

(c) The application shall be reviewed by the department after the applicant has fully complied with the requirements of 40 CFR 270.10 and 270.13.

(d) The application signature and certification shall meet the requirements of 40 CFR 270.11.

(e) Applications shall not be required for permits by rule. (Authorized by K.S.A. 65-3431;

implementing K.S.A. 65-3431, 65-3433, and 65-3437; effective April 29, 2011.)

28-31-124b. Procedures for permitting; modification, revocation and reissuance, or termination of permits. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Reasons for modification, revocation and reissuance, or termination of a permit. A permit may be modified, revoked and reissued, or terminated by the secretary only for the reasons specified in 40 CFR 270.41, 40 CFR 270.43, and K.S.A. 65-3439 and amendments thereto.

(b) Request for modification, revocation and reissuance, or termination of a permit. Any person, including the permittee or the secretary, may request that a permit be modified, revoked and reissued, or terminated. Each request shall be submitted to the department in writing and shall contain the facts and reasons supporting the request.

(c) Procedures for modification or for revocation and reissuance of a permit. Modification of a permit, and revocation and reissuance of a permit, shall be subject to the following requirements:

(1) A draft permit shall be prepared by the department if either of the following occurs:

(A) The secretary tentatively decides to modify or to revoke and reissue a permit according to the criteria specified in 40 CFR 270.41, other than 40 CFR 270.41(b)(3).

(B) The permittee requests a modification in accordance with 40 CFR 270.42(c).

(2) The draft permit shall be prepared by the department according to the following criteria:

(A) The draft permit shall incorporate the proposed changes.

(B) Additional information from the permittee may be requested by the secretary.

(C) If a permit is modified, the permittee may be required by the secretary to submit an updated application.

(D) If a permit is revoked and reissued for a cause not listed in 40 CFR 270.41(b)(3), the permittee shall submit a new application to the department.

(E) If a permit is revoked and reissued in accordance with 40 CFR 270.41(b)(3), the requirements in 40 CFR part 124, subpart G for standardized permits shall be met by the secretary and the permittee.

(3) If a permit is modified, only those conditions to be modified shall be reopened by the department when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit.

(4) If a permit is revoked and reissued, the entire permit shall be reopened by the department as if the permit had expired and was being reissued. During the revocation and reissuance proceedings, the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.

(5) "Class 1 modifications" and "Class 2 modifications," as defined in 40 CFR 270.42 (a) and (b), shall not be subject to the requirements of this regulation.

(d) Termination of permit. If the secretary tentatively decides to terminate a permit in accordance with 40 CFR 270.43 and the permittee objects, a notice of intent to terminate shall be issued by the secretary. Each notice of intent to terminate shall be deemed a type of draft permit and shall be subject to the procedures specified in K.A.R. 28-31-124c and in K.S.A. 65-3440 and amendments thereto. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431, 65-3437, and 65-3439; effective April 29, 2011.)

28-31-124c. Procedures for permitting; draft permits. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Each permit application shall be reviewed by the secretary to determine compliance with the requirements of the hazardous waste regulations.

(b) If the permit application does not meet the requirements of this article, the application shall be denied by the secretary.

(c) If the application meets the requirements of this article, a draft permit shall be prepared by the secretary according to the following criteria:

(1) The draft permit shall contain the following information:

(A) All conditions specified in 40 CFR 270.30 and 270.32;

(B) all compliance schedules specified in 40 CFR 270.33;

(C) all monitoring requirements specified in 40 CFR 270.31; and

(D) standards for treatment, storage, or disposal, or any combination of these activities, and other permit conditions under 40 CFR 270.30.

(2) The draft permit shall be accompanied by a fact sheet that meets the requirements of K.A.R. 28-31-124d.

(3) Public notice shall be given as specified in K.A.R. 28-31-124e.

(4) The draft permit shall be made available for public comment as specified in 40 CFR 124.11.

(5) Notice of opportunity for a public hearing shall be given as specified in 40 CFR 124.12.

(d) A final decision to issue the permit shall be issued by the secretary if the findings of fact show that the facility or activity will be protective of human health and safety and the environment. A final decision to deny the permit shall be issued by the secretary if the findings of fact show that the facility or activity will not be protective of human health and safety and the environment.

(e) A response to comments shall be issued by the secretary in accordance with 40 CFR 124.17.

(f) Any person may appeal the decision in accordance with K.S.A. 65-3440 and K.S.A. 65-3456a(b), and amendments thereto. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431, 65-3433, 65-3437, and 65-3439; effective April 29, 2011.)

28-31-124d. Procedures for permitting; fact sheet. A fact sheet for each draft permit shall be prepared and distributed by the department according to the following requirements:

(a) The fact sheet shall be sent by the department to the applicant and to each person who requests the fact sheet.

(b) The fact sheet shall briefly describe the principal facts and the significant factual, legal, methodological, and policy questions considered in preparing the draft permit.

(c) The fact sheet shall include the following information:

(1) A brief description of the type of facility or activity that is the subject of the draft permit;

(2) the type and quantity of wastes, fluids, or pollutants that are proposed to be or are being treated, stored, disposed of, injected, emitted, or discharged;

(3) the reasons why each requested variance or alternative to required standards do or do not appear justified;

(4) a description of the procedures for reaching a final decision on the draft permit, including the following information:

(A) The beginning and ending dates of the comment period as specified in K.A.R. 28-31-124e and the address where comments will be received;

(B) the procedures for requesting a hearing and the nature of that hearing; and

(C) all other procedures by which the public may participate in the final decision; and

(5) the name and telephone number of a person to contact for additional information. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-124e. Procedures for permitting; public notice of permit actions and public comment period. Public notices shall be given by the department according to the following criteria:

(a) A public notice shall be given if one or more of the following actions have occurred:

(1) A permit application has been tentatively denied under K.A.R. 28-31-124c.

(2) A draft permit has been prepared under K.A.R. 28-31-124c.

(3) A hearing has been scheduled under 40 CFR 124.12, as adopted by reference in K.A.R. 28-31-124.

(b) No public notice shall be required if a request for permit modification, revocation and re-issuance, or termination is denied under K.A.R. 28-31-124b. Written notice of the denial shall be provided by the department to the person who made the request and to the permittee.

(c) The public notice may describe more than one permit or permit action.

(d) The public notice shall be given in accordance with the following time frames:

(1) The public notice of the preparation of a draft permit, including a notice of intent to deny a permit application, required under subsection (a) shall allow at least 45 days for public comment.

(2) The public notice of the public hearing shall be given at least 30 days before the hearing.

(3) The public notice of the hearing may be given at the same time as the public notice of the draft permit and the two notices may be combined.

(e) Public notice of the activities described in subsection (a) shall be given using the following methods:

(1) Mailing a copy of the notice to the following persons, except to any person that has waived the right to receive notices for the class or category of the permit described in the notice:

(A) The applicant;

(B) each agency that has issued or is required to issue a permit for the same facility or activity, including EPA;

(C) all federal and state agencies with jurisdiction over fish, shellfish, or wildlife resources, the advisory council on historic preservation, state historic preservation officers, and all affected states and Indian tribes;

(D) each person on the mailing list, which shall be developed by the department using the following methods:

(i) Each person who requests in writing to be on the mailing list shall be added to the mailing list;

(ii) participants in past proceedings in that area shall be solicited for inclusion on the mailing list;

(iii) the public shall be notified of the opportunity to be put on the mailing list through periodic publication in the public press and in publications which may include regional and state-funded newsletters, environmental bulletins, and state law journals; and

(iv) the mailing list may be updated by the department by requesting written indication of continued interest from persons on the list. The name of any person who fails to respond to such a request may be deleted from the list by the department;

(E) each unit of local government having jurisdiction over the area where the facility is proposed to be located; and

(F) each state agency having any authority under state law with respect to the construction or operation of the facility;

(2) publishing a notice in the official newspaper of the county in which the facility is located or proposed to be located or, if there is no official county newspaper, a newspaper published as provided in K.S.A. 64-101, and amendments thereto;

(3) broadcasting over local radio stations;

(4) giving notice in a manner constituting legal notice to the public under state of Kansas law; and

(5) using any other method chosen by the department to give notice of the action in question to the persons potentially affected by it, including press releases or any other forum or medium to elicit public participation.

(f) Each public notice shall contain the following information:

(1) The name and address of the office processing the permit;

(2) the name and address of the permittee or the permit applicant and, if different, of the facility or activity regulated by the permit;

(3) a brief description of the business conducted at the facility or the activities described in the permit application or the draft permit;

(4) the name, address, and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit, the fact sheet, and the application;

(5) a brief description of the comment procedures required by 40 CFR 124.11 and 124.12, as adopted by reference in K.A.R. 28-31-124;

(6) the time and place of each hearing that has been scheduled;

(7) a statement of the procedures to request a hearing, unless a hearing has already been scheduled;

(8) all other procedures required for public participation in the final permit decision;

(9) the times when the record will be open for public inspection and a statement that all data submitted by the applicant is available as part of the administrative record; and

(10) any additional information necessary to allow full public participation in the final permit decision.

(g) The public notice of each hearing held pursuant to 40 CFR 124.12, as adopted by reference in K.A.R. 28-31-124, shall contain all of the information described in subsection (f) of this regulation plus the following information:

(1) Reference to the date of previous public notices relating to the permit;

(2) the date, time, and place of the hearing; and

(3) a brief description of the nature and purpose of the hearing, including the rules and procedures.

(h) In addition to the general public notice described in subsection (f), a copy of each of the following documents shall be mailed by the department to all persons identified in paragraphs (e)(1)(A) through (D):

(1) The fact sheet; and

(2) the permit application or the draft permit. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3433; effective April 29, 2011.)

28-31-260. General provisions and definitions; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 260, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 260 shall be excluded from adoption:

(1) All comments and all notes;

(2) 40 CFR 260.1;

(3) in 40 CFR 260.10, the definition of “performance track member facility”;

(4) 40 CFR 260.11;

(5) 40 CFR 260.20 through 260.23;

(6) 40 CFR 260.40 and 260.41; and

(7) appendix I.

(c) Modifications. The following modifications shall be made to 40 CFR part 260:

(1) The text of 40 CFR 260.2 shall be replaced with the following: “The Kansas open records act and K.S.A. 65-3447 shall apply to all information provided to the department.”

(2) The following definitions in 40 CFR 260.10 shall be modified as follows:

(A) The definition of “existing tank system or existing component” shall be modified by replacing “on or prior to July 14, 1986” with “on or before July 14, 1986 for HSWA tanks and on or before May 1, 1987 for non-HSWA tanks.”

(B) The definition of “facility” shall be modified by deleting the phrase “under RCRA Section 3008(h).”

(C) The definition of “new tank system or new tank component” shall be modified by replacing both occurrences of “July 14, 1986” with “July 14, 1986 for HSWA tanks and May 1, 1987 for non-HSWA tanks.”

(D) The definition of “qualified ground-water scientist” shall be replaced with the following definition: “ ‘qualified ground-water scientist’ means a licensed geologist or professional engineer who has sufficient training and experience in ground-water hydrology and related fields. Sufficient training may be demonstrated by a professional certification or by the completion of an accredited university program that enables the individual to make sound professional judgments regarding groundwater monitoring, contaminant fate and transport, and corrective action.”

(E) The definition of “small quantity generator” shall be replaced by the following definition: “ ‘Small quantity generator’ means a generator who meets all of the following criteria:

“(i) Generates more than 100 kilograms (220 pounds) of hazardous waste in any single calendar month;

“(ii) generates less than 1,000 kilograms (2,200 pounds) of hazardous waste in any single calendar month; and

“(iii) generates and accumulates acutely hazardous waste and other waste listed in 40 CFR 261.5(e) in quantities less than the generation limits listed in 40 CFR 261.5(e).”

(d) Differences between state and federal definitions. If the same term is defined differently both in K.S.A. 65-3430 et seq. and amendments thereto or this article and in any federal regulation adopted by reference in this article, the definition prescribed in the Kansas statutes or regulations shall control, except for the term “solid waste.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-260a. General provisions and definitions; additional state definitions. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279.

(a) State definitions. The following definitions shall apply to K.A.R. 28-31-4 through 28-31-279:

(1) “Conditionally exempt small quantity generator” means a generator who meets both of the following criteria:

(A) Generates less than 25 kilograms (55 pounds) of hazardous waste in any single calendar month; and

(B) generates and accumulates acutely hazardous waste and other waste listed in 40 CFR 261.5(e) in quantities less than the generation limits listed in 40 CFR 261.5(e).

(2) “HSWA drip pad” means a drip pad associated with the handling of waste designated as F032 waste in 40 CFR 261.31.

(3) “HSWA tank” means any of the following tanks:

(A) A tank owned or operated by a generator of less than 1,000 kilograms (2,200 pounds) of hazardous waste in any single calendar month;

(B) a new underground tank; or

(C) an existing underground tank that cannot be entered for inspection.

(4) “Kansas hazardous waste facility permit” means a permit issued under the Kansas hazardous waste program.

(5) “Kansas hazardous waste program” means the hazardous waste management program operated by the state of Kansas in lieu of the U.S. environmental protection agency, authorized by and implementing K.S.A. 65-3430 et seq. and amendments thereto.

(6) “Kansas licensed geologist” means a person who has a current license to practice geology from

the state board of technical professions pursuant to K.S.A. 74-7001 et seq., and amendments thereto.

(7) “Kansas professional engineer” means a person who has a current license to practice engineering from the state board of technical professions pursuant to K.S.A. 74-7001 et seq., and amendments thereto.

(8) “Kansas small quantity generator” means a generator that meets all of the following criteria:

(A) Generates 25 kilograms (55 pounds) or more of hazardous waste in any single calendar month;

(B) generates no more than 100 kilograms (220 pounds) of hazardous waste in any single calendar month; and

(C) generates and accumulates acutely hazardous waste and other waste listed in 40 CFR 261.5(e) in quantities less than the generation limits listed in 40 CFR 261.5(e).

(9) “Large quantity generator” means a generator who meets either or both of the following criteria:

(A) Generates 1,000 kilograms (2,200 pounds) or more of hazardous waste in any single calendar month; or

(B) generates or accumulates acutely hazardous waste and other waste listed in 40 CFR 261.5(e) in quantities equal to or greater than the generation limits listed in 40 CFR 261.5(e).

(10) “Non-HSWA drip pad” means a drip pad for handling wastes designated as F034 and F035 wastes in 40 CFR 261.31.

(11) “Non-HSWA tank” means any tank except the following tanks:

(A) Tanks owned or operated by a generator of less than 1,000 kilograms (2,200 pounds) of hazardous waste in any single calendar month;

(B) new underground tanks; and

(C) existing underground tanks that cannot be entered for inspection.

(b) Differences between state and federal definitions. If the same term is defined differently both in K.S.A. 65-3430 et seq. and amendments thereto or this article and in any federal regulation adopted by reference in this article, the definition prescribed in the Kansas statutes or regulations shall control, except for the term “solid waste.” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3451; effective April 29, 2011.)

28-31-260b. General provisions and definitions; adoption of technical documents. In any federal regulation adopted by reference in

K.A.R. 28-31-260 through 28-31-279, each reference to any of the following documents shall mean that document as hereby adopted by reference:

(a) ASTM. The following documents published by the American society for testing and materials:

(1) ANSI/ASTM D 93-79, "standard test methods for flash point by Pensky-Martens closed tester," published October 1979;

(2) D 93-80, "standard test methods for flash point by Pensky-Martens closed tester," published October 1980 and updated July 1981;

(3) D 1946-82, "standard method for analysis of reformed gas by gas chromatography," published August 1982;

(4) D 2267-88, "standard test method for aromatics in light naphthas and aviation gasolines by gas chromatography," published December 1988;

(5) D 2382-83, "standard test method for heat of combustion of hydrocarbon fuels by bomb calorimeter (high-precision method)," published January 1984;

(6) D 2879-92, "standard test method for vapor pressure-temperature relationship and initial decomposition temperature of liquids by isoteniscope," published December 1992;

(7) ASTM D 3278-78, "standard test methods for flash point of liquids by setaflash closed tester," published March 1979;

(8) E 168-88, "standard practices for general techniques of infrared quantitative analysis," published July 1988;

(9) E 169-87, "standard practices for general techniques of ultraviolet-visible quantitative analysis," published April 1987;

(10) E 260-85, "standard practice for packed column gas chromatography," published November 1985; and

(11) in E 926-88, "standard test methods of preparing refuse-derived fuel (RDF) samples for analyses of metals," published May 1988, "test method C—bomb, acid digestion method" on pages 3 and 4;

(b) EPA. The following documents published by the United States environmental protection agency (EPA):

(1) EPA 450/2-81-005, APTI course 415, "control of gaseous emissions: student manual," published December 1981, except pages ii and 1-4;

(2) EPA 454/R-92-019, previously designated as EPA 450/R-92-019, "screening procedures for estimating the air quality impact of stationary sources, revised," published October 1992, except the preface on page iii, the acknowledgments on page iv, and the references in section 5; and

(3) the following methods published in the following updates to EPA publication SW-846, "test methods for evaluating solid waste," third edition, published November 1986:

(A) In "update III," dated December 1996, the following:

(i) Method 0011, "sampling for selected aldehyde and ketone emissions from stationary sources," dated December 1996;

(ii) method 0023A, "sampling method for polychlorinated dibenzo-*p*-dioxins and polychlorinated dibenzofuran emissions from stationary sources," dated December 1996;

(iii) method 0050, "isokinetic HCl/Cl₂ emission sampling train," dated December 1996;

(iv) method 0051, "midget impinger HCl/Cl₂ emission sampling train," dated December 1996;

(v) method 0060, "determination of metals in stack emissions," dated December 1996; and

(vi) method 0061, "determination of hexavalent chromium emissions from stationary sources," dated December 1996; and

(B) in "final update for IIIB to the SW-846: test methods for evaluating solid waste physical/chemical methods," published February 2007, the following:

(i) Method 1110A, "corrosivity toward steel," dated November 2004;

(ii) method 1310B, "extraction procedure (EP) toxicity test method and structural integrity test," dated November 2004;

(iii) method 1311, "toxicity characteristic leaching procedure," dated July 1992;

(iv) method 9010C, "total and amenable cyanide: distillation," dated November 2004;

(v) method 9012B, "total and amenable cyanide (automated colorimetric, with off-line distillation)," dated November 2004;

(vi) method 9040C, "pH electronic measurement," dated November 2004;

(vii) method 9060A, "total organic carbon," dated November 2004; and

(viii) method 9095B, "paint filter liquids test," dated November 2004;

(c) NFPA. Tables 2-1 through 2-6 in chapter 2 in the following documents published by the national fire protection association (NFPA):

(1) NFPA 30, "flammable and combustible liquids code 1977," 1977 edition; and

(2) NFPA 30, "flammable and combustible liquids code 1981," 1981 edition; and

(d) API. In API publication 2517, "evaporative loss from external floating-roof tanks," third edi-

tion, published February 1989 by the American petroleum institute, pages vii through ix and pages 1 through 61. (Authorized by and implementing K.S.A. 65-3431; effective May 10, 2013.)

28-31-261. Identification and listing of hazardous waste; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 261, including appendices I, VII, and VIII, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 261 shall be excluded from adoption:

(1) All comments and all notes;

(2) 40 CFR 261.4(b)(16) through (18); and

(3) 40 CFR 261.6(a)(2)(v).

(c) Modifications. The following modifications shall be made to 40 CFR part 261:

(1) Each occurrence of the following phrases shall be deleted:

(A) “(incorporated by reference, see § 260.11)”;

(B) “, and as incorporated by reference in § 260.11 of this chapter”;

(C) “, as incorporated by reference in § 260.11 of this chapter.”

(2) In 40 CFR 261.1(b)(2), the phrase “under sections 3007, 3013, and 7003 of RCRA” shall be deleted.

(3) In 40 CFR 261.1(b)(2)(i), the following replacements shall be made:

(A) The phrase “sections 3007 and 3013” shall be replaced with “K.S.A. 65-3431, 65-3437 and 65-3441, and K.A.R. 28-31-12.”

(B) The phrase “section 1004(27) of RCRA” shall be replaced with “40 CFR 261.2.”

(C) The phrase “section 1004(5) of RCRA” shall be replaced with “K.S.A. 65-3430.”

(4) In 40 CFR 261.4(e)(3)(iii), the text “in the Region where the sample is collected” shall be deleted.

(5) 40 CFR 261.5(a) shall be replaced by the definition of “conditionally exempt small quantity generator” in K.A.R. 28-31-260a.

(6) In 40 CFR 261.5(e), (f)(2), and (g)(2), the phrases “that acute hazardous waste” and “those accumulated wastes” shall be replaced with the phrase “the generator’s hazardous waste and acute hazardous waste.”

(7) In 40 CFR 261.5(g), the phrase “100 kilograms” shall be replaced with the phrase “25 kilograms (55 pounds).”

(8) In 40 CFR 261.5(g)(2), the phrase “generators of between 100 kg and 1000 kg of hazardous waste in a calendar month” shall be replaced with the phrase “small quantity generators.”

(9) In 40 CFR 261.5(g)(3), the phrase “or ensure delivery” shall be replaced with “or, subject to the restrictions of K.A.R. 28-31-262a, ensure delivery.”

(10) In 40 CFR 261.21(a)(3), the phrase “an ignitable compressed gas as defined in 49 CFR 173.300” shall be replaced with the phrase “a flammable gas as defined in 49 CFR 173.115(a).”

(11) In 40 CFR 261.21(a)(4), the phrase “49 CFR 173.151” shall be replaced with “49 CFR 173.127(a).”

(12) 40 CFR 261.23(a)(8) shall be replaced with the following: “It is a forbidden explosive as defined in 49 CFR 173.54, or it is a division 1.1, 1.2, or 1.3 explosive, as defined in 49 CFR 173.50 and 173.53.”

(13) In 40 CFR 261.33(e), the text “be the small quantity exclusion defined in” shall be deleted.

(14) In 40 CFR 261.33(f), the phrase “the small quantity generator exclusion defined in” shall be deleted.

(15) In 40 CFR 261.38(c)(1)(i), the introductory paragraph shall be replaced with “Notice to the secretary.”

(16) In 40 CFR part 261, appendix VII, the entries in both columns for “K064,” “K065,” “K066,” “K090,” and “K091” shall be deleted. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-261a. Identification and listing of hazardous waste; additional state requirements. Each conditionally exempt small quantity generator shall comply with K.A.R. 28-31-262a. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-262. Generators of hazardous waste; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 262, including the appendix, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 262 shall be excluded from adoption:

(1) All comments and all notes, except in the appendix;

(2) 40 CFR 262.10(j) and (k);

(3) 40 CFR 262.34(g) through (l);

(4) 40 CFR 262.89(e); and

(5) subparts I and J.

(c) Modifications. The following modifications shall be made to 40 CFR part 262:

(1) In 40 CFR 262.10(g), the phrase “and K.S.A. 65-3441(b) and (c) and 65-3444 through 65-3446” shall be inserted after the phrase “section 3008 of the Act.”

(2) 40 CFR 262.11(c)(1) shall be replaced with the following text: “Submitting the waste for testing according to the methods in 40 CFR part 261, subpart C, by a laboratory that is certified for these analyses by the department; or.”

(3) The first paragraph in 40 CFR 262.20(e) shall be replaced with the following text: “The requirements of this subpart do not apply to hazardous waste produced by Kansas small quantity generators and small quantity generators if all of the following criteria are met:”

(4) In 40 CFR 262.27(b), the phrase “or a Kansas small quantity generator” shall be inserted at the end of the first sentence.

(5) In 40 CFR 262.34(a)(2), the phrase “and tank” shall be inserted after the phrase “each container.”

(6) In 40 CFR 262.34(c)(1), the text “A generator may accumulate as much as 55 gallons of hazardous waste or one quart of acutely hazardous waste listed in § 261.33(e) in containers” shall be replaced with the following text: “Any generator may accumulate 55 gallons or less, in no more than one container, of each type of hazardous waste and one quart or less, in no more than one container, of each type of acutely hazardous waste listed in § 261.33(e).”

(7) 40 CFR 262.34(c)(1)(ii) shall be replaced with the following text: “Marks the containers with the words ‘Hazardous Waste.’”

(8) At the end of 40 CFR 262.34(d)(5)(ii)(C), the following text shall be inserted as new subparagraph (D): “If the generator relies solely on cell phones, the generator shall meet the following requirements: (1) Post the information addressed by subparagraphs (A) through (C) on walls so that they can be readily seen by employees; (2) train all employees that manage hazardous waste on the locations of these postings; and (3) program the

telephone numbers into the cell phones of management personnel.”

(9) In 40 CFR 262.42(b), the phrase “greater than 100 kilograms” shall be replaced with the phrase “25 kilograms or more.”

(10) In 40 CFR 262.43, the text “, as he deems necessary under sections 2002(a) and 3002(6) of the Act,” shall be deleted.

(11) In 40 CFR 262.44, the following modifications shall be made:

(A) In the title, the number “100” shall be replaced with the number “25.”

(B) In the first paragraph, the phrase “greater than 100 kilograms” shall be replaced with the phrase “25 kilograms or more.” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3451; effective April 29, 2011.)

28-31-262a. Generators of hazardous waste; additional state requirements. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Transportation requirements.

(1) Each generator that transports hazardous waste shall comply with K.A.R. 28-31-263a.

(2) Each generator that uses another person to transport hazardous waste shall use only a transporter who has registered with the department in accordance with K.A.R. 28-31-6.

(b) Reporting requirements. Each generator of hazardous waste, except conditionally exempt small quantity generators (CESQGs), shall submit a report to the department that indicates whether the generator is a large quantity generator (LQG), a small quantity generator (SQG), or a Kansas small quantity generator (KSQG). The generator shall comply with the following requirements:

(1) Submit the report on a form provided by the department;

(2) submit the monitoring fee required by K.A.R. 28-31-10 with the report;

(3) submit the report according to the following schedule:

(A) Each LQG report shall be due on or before March 1 of each year that the biennial report is not required;

(B) each SQG report shall be due on or before April 1 of each year; and

(C) each KSQG report shall be due on or before April 1 of each year; and

(4) keep a copy of each report for at least three years after the date of the signature on the report.

(c) Additional requirement for LQGs. Each LQG shall comply with 40 CFR 265.15(d).

(d) Additional requirements for SQGs.

(1) In addition to meeting the requirements of 40 CFR 262.34(d)(5)(iii), each SQG shall meet the following requirements:

(A) Provide the training to each employee no more than six months after the employee is hired or transferred to a new position;

(B) repeat the training at least annually;

(C) record the name of each employee, the date of the training, and the topics covered in the training; and

(D) keep training records for each employee that has received the training for at least three years from the date of the training. Training records may accompany personnel transferred within the same company.

(2) Each SQG shall comply with the following regulations:

(A) 40 CFR 265.15(d);

(B) 40 CFR 265.111(a) and (b); and

(C) 40 CFR 265.114.

(e) Additional requirements for KSQGs.

(1) In the waste minimization certification found in item 15 of the uniform hazardous waste manifest, the phrase "small quantity generator" shall include KSQGs.

(2) Each KSQG shall inspect each area where one or more hazardous waste containers are stored at least once every 31 days and shall look for deterioration and leaks.

(3) Each KSQG shall comply with the following regulations:

(A) 40 CFR part 262, subpart A;

(B) 40 CFR part 262, subpart B, except KSQGs that are exempt from the transporter requirements of K.A.R. 28-31-263a;

(C) 40 CFR 262.30 through 262.33;

(D) 40 CFR 262.34(a)(2) and (3), (c), and (d) (5);

(E) 40 CFR 262.44;

(F) 40 CFR part 262, subparts E through H;

(G) 40 CFR 265.15(d);

(H) 40 CFR part 265, subpart C;

(I) 40 CFR 265.171 through 265.173 and 265.177;

(J) 40 CFR 265.201; and

(K) 40 CFR 268.7(a)(5).

(4) In addition to meeting the requirements of 40 CFR 262.34(d)(5)(iii), each KSQG shall meet the following requirements:

(A) Provide the training to each employee no

more than six months after the employee is hired or transferred to a new position;

(B) repeat the training at least annually;

(C) record the name of each employee, the date of the training, and the topics covered in the training; and

(D) keep training records for each employee that has received the training for at least three years from the date of the training. Training records may accompany personnel transferred within the same company.

(5) Each KSQG that accumulates more than 1,000 kilograms (2,200 pounds) of hazardous waste shall comply with all of the requirements for SQGs.

(f) Additional requirements for CESQGs.

(1) No person shall send CESQG hazardous waste to a construction and demolition landfill located in Kansas.

(2) Each CESQG that accumulates 25 kilograms (55 pounds) or more of hazardous waste shall comply with all of the following requirements:

(A) The CESQG shall inspect each area where one or more hazardous waste containers are stored at least once every 31 days looking for deterioration and leaks.

(B) If the CESQG sends 25 kilograms (55 pounds) or more of hazardous waste at any one time to an off-site facility in Kansas, that waste shall be sent only to one of the following facilities:

(i) A Kansas household hazardous waste facility that has a permit issued by the secretary and is approved by the secretary to accept CESQG waste; or

(ii) a disposal facility that meets the requirements of 40 CFR 261.5(g)(3)(i), (ii), (iii), or (vii).

(C) The CESQG shall comply with the following regulations:

(i) 40 CFR 262.30 through 262.33;

(ii) 40 CFR 262.34(a)(2) and (3);

(iii) 40 CFR 265.15(d);

(iv) 40 CFR 265.171 through 265.173 and 265.177; and

(v) 40 CFR 265.201, if 25 kilograms (55 pounds) or more of hazardous waste is accumulated in one or more tanks. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3451; effective April 29, 2011.)

28-31-263. Transporters of hazardous waste; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 263, as in effect on July 1, 2006, are

hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. All notes shall be excluded from adoption.

(c) Modifications. The following modifications shall be made to 40 CFR part 263:

(1) In 40 CFR 263.10(a), the following modifications shall be made:

(A) The phrase “the United States” shall be replaced with “Kansas.”

(B) The phrase “or K.A.R. 28-31-262a” shall be inserted at the end of the sentence.

(2) In 40 CFR 263.20(h), the phrase “greater than 100 kilograms” shall be replaced with “25 kilograms (55 pounds) or more.” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3451; effective April 29, 2011.)

28-31-263a. Transporters of hazardous waste; additional state requirements. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Applicability. Each person that transports hazardous waste within, into, out of, or through Kansas shall comply with this regulation, except Kansas small quantity generators (KSQGs) and conditionally exempt small quantity generators (CESQGs) that meet the following conditions:

(1) The generator is transporting the generator’s own hazardous waste to a household hazardous waste (HHW) facility that meets one of the following conditions:

(A) If the generator is a KSQG, the HHW facility is permitted to accept KSQG waste.

(B) If the generator is a CESQG, the HHW facility is permitted to accept CESQG waste.

(2) The generator obtains a receipt for each load of hazardous waste delivered to the HHW facility.

(3) The generator keeps a copy of each receipt for a minimum of three years after the date of delivery.

(b) Registration and insurance. Each transporter of hazardous waste shall comply with the requirements of K.A.R. 28-31-6.

(c) Transportation restrictions. Each transporter shall transport hazardous waste only for hazardous waste generators and facilities that are in compliance with the requirement to obtain an

EPA identification number for the state in which the generator or facility is located.

(d) Routing restrictions.

(1) Each transporter of hazardous waste shall ensure that each vehicle containing hazardous waste is operated over a preferred route that minimizes risk to public health and safety and the environment. To select a preferred route, the transporter shall consider the following information, if available:

(A) Accident rates;

(B) the transit time;

(C) population density and activities; and

(D) the day of the week and the time of day during which transportation will occur.

(2) Each transporter shall confine the transportation of hazardous wastes to preferred routes. Unless notice to the contrary is published in the Kansas register, all portions of the major highway system may be used. For the purposes of this subsection, the major highway system shall be considered to be all interstate routes, U.S. highways, state highways, and temporary detours designated by the Kansas department of transportation. An interstate system bypass or beltway around a city shall be used when available.

(3) Any transporter of hazardous waste may deviate from a preferred route under any of the following circumstances:

(A) Emergency conditions that make continued use of the preferred route unsafe;

(B) rest, fuel, and vehicle repair stops; or

(C) deviations that are necessary to pick up, deliver, or transfer hazardous wastes. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3451; effective April 29, 2011.)

28-31-264. Hazardous waste treatment, storage, and disposal facilities; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 264, including appendices I, IV, V, VI, and IX, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 264 shall be excluded from adoption:

(1) All comments and all notes;

(2) 40 CFR 264.1(f) and (g)(12);

- (3) 40 CFR 264.15(b)(5);
- (4) 40 CFR 264.149 and 264.150;
- (5) 40 CFR 264.195(e);
- (6) 40 CFR 264.301(l);
- (7) 40 CFR 264.1030(d);
- (8) 40 CFR 264.1050(g); and
- (9) 40 CFR 264.1080(e), (f), and (g).

(c) Modifications. The following modifications shall be made to 40 CFR part 264:

(1) Each occurrence of the following text shall be deleted:

- (A) “(incorporated by reference, see § 260.11)”;
- (B) “(incorporated by reference as specified in § 260.11)”;
- (C) “(incorporated by reference under 40 CFR 260.11)”;
- (D) “40 CFR 260.11(11)”;
- (E) “as incorporated by reference in § 260.11 of this chapter.”

(2) In 40 CFR 264.1(g)(8)(D)(iii), the phrase “and K.A.R. 28-31-124a through 28-31-124e” shall be inserted after the phrase “through 124 of this chapter.”

(3) In 40 CFR 264.15(b)(4), the following text shall be deleted: “, except for Performance Track member facilities, that must inspect at least once each month, upon approval by the Director, as described in paragraph (b)(5) of this section.”

(4) In 40 CFR 264.112(d)(3), the phrase “under section 3008 of RCRA” shall be deleted.

(5) In 40 CFR 264.113(d)(2), the phrase “required under RCRA section 3019” shall be deleted.

(6) The phrase “determination pursuant to section 3008 of RCRA” shall be replaced with “determination by EPA pursuant to section 3008 of RCRA or by the state of Kansas under K.S.A. 65-3441, 65-3443, 65-3445, or 65-3439(e)” in the following locations:

- (A) 40 CFR 264.143(c)(5);
- (B) 40 CFR 264.143(d)(8);
- (C) 40 CFR 264.145(c)(5); and
- (D) 40 CFR 264.145(d)(9).

(7) The phrase “licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States” shall be replaced with “licensed to transact the business of insurance in Kansas or eligible to provide insurance as an excess or surplus lines insurer in Kansas” in the following locations:

- (A) 40 CFR 264.143(e)(1);
- (B) 40 CFR 264.145(e)(1);
- (C) 40 CFR 264.147(a)(1)(ii) and (b)(1)(ii); and

(D) 40 CFR 264.151(i) and (j).

(8) In 40 CFR 264.143(h) and 264.145(h), the text “If the facilities covered by the mechanism are in more than one Region, identical evidence of financial assurance must be submitted to and maintained with the Regional Administrators of all such regions” shall be replaced with the following: “If the facilities covered by the mechanism are in more than one state, identical evidence of financial assurance shall be submitted to and maintained with the state agency regulating hazardous waste, or with the appropriate regional administrator if the facility is located in an unauthorized state.”

(9) In 40 CFR 264.144(b) and (c), the phrase “and the post-closure period” shall be inserted after the phrase “During the active life of the facility.”

(10) In 40 CFR 264.144(b), the phrase “§ 264.145(b)(1) and (2)” shall be replaced with “paragraphs (b)(1) and (2) of this section.”

(11) In 40 CFR 264.147(a)(1)(i) and (b)(1)(i), the phrase “Regional Administrator, or Regional Administrators” shall be replaced with “secretary, and regional administrators.”

(12) In 40 CFR 264.151(a)(1), (m)(1), and (n)(1), the phrase “United States Environmental Protection Agency, ‘EPA,’ an agency of the United States Government,” shall be replaced with the phrase “Kansas department of health and environment, or ‘department.’”

(13) In 40 CFR 264.151(b) and (c), the phrase “U.S. Environmental Protection Agency (hereinafter called EPA)” shall be replaced with “Kansas department of health and environment (hereinafter called ‘department’).”

(14) In 40 CFR 264.151(d) and (k), the text between the title “Irrevocable Standby Letter of Credit” and “Dear Sir or Madam:” shall be replaced with the following:

“Name and address of issuing institution: _____
 “Secretary
 “Kansas department of health and environment.”

(15) In 40 CFR 264.151(d), the following text shall be deleted: “[insert, if more than one Regional Administrator is a beneficiary, ‘by any one of you’].”

(16) In 40 CFR 264.151(f) and (g), in section 3 of the “Letter From Chief Financial Officer,” the text “In States where EPA is not administering the financial requirements of subpart H of 40 CFR part 264 or 265,” shall be deleted.

(17) In 40 CFR 264.151(l), in paragraph (1) of the “Governing Provisions” of the “Payment Bond,” the phrase “Section 3004 of the Resource Conservation and Recovery Act of 1976, as amended” shall be replaced with “40 CFR 264.147 and 265.147.”

(18) In 40 CFR 264.174, the following text shall be deleted: “, except for Performance Track member facilities, that may conduct inspections at least once each month, upon approval by the Director. To apply for reduced inspection frequencies, the Performance Track member facility must follow the procedures identified in § 264.15(b)(5) of this part.”

(19) In 40 CFR 264.191(a), the phrase “January 12, 1988” shall be replaced with “January 12, 1988 for HSWA tanks or by May 1, 1988 for non-HSWA tanks.”

(20) In 40 CFR 264.191(c), the text “July 14, 1986, must conduct this assessment within 12 months after the date that the waste becomes a hazardous waste” shall be replaced with the following text: “July 14, 1986 for HSWA tanks, or May 1, 1987 for non-HSWA tanks, shall conduct this assessment within 12 months after the date that the waste becomes a hazardous waste regulated by the state.”

(21) The phrase “or RCRA Section 3008(h)” shall be deleted from the following locations:

(A) 40 CFR 264.551(a); and

(B) 40 CFR 264.552(a).

(22) In 40 CFR 264.553(a), the phrase “or RCRA 3008(h)” shall be deleted.

(23) In 40 CFR 264.555(a), the term “RCRA” shall be deleted.

(24) In 40 CFR 264.570(a), the following replacements shall be made:

(A) Each occurrence of the text “December 6, 1990” shall be replaced with “December 6, 1990 for HSWA drip pads and April 25, 1994 for non-HSWA drip pads.”

(B) Each occurrence of the text “December 24, 1992” shall be replaced with “December 24, 1992 for HSWA drip pads and April 25, 1994 for non-HSWA drip pads.”

(25) In 40 CFR 264.570(c)(1)(iv), the term “Federal regulations” shall be replaced with “federal and state regulations.”

(26) In 40 CFR 264.1033(a)(2)(iii) and 264.1060(b)(3), the term “EPA” shall be deleted.

(27) In 40 CFR 264.1080(b)(5), the text “required under the corrective action authorities of RCRA sections 3004(u), 3004(v), or 3008(h); CERCLA

authorities; or similar Federal or State authorities” shall be replaced with the following: “required by EPA under the corrective action authorities of RCRA sections 3004(u), 3004(v), or 3008(h) or under CERCLA authorities; required by the state under K.S.A. 65-3443, 65-3445, and 65-3453; or required under similar federal or state authorities.”

(28) In 40 CFR 264.1101(c)(4), the following text shall be deleted:

(A) “, except for Performance Track member facilities that must inspect at least once each month, upon approval by the Director,”; and

(B) “[t]o apply for reduced inspection frequency, the Performance Track member facility must follow the procedures described in § 264.15(b)(5).” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-264a. Hazardous waste treatment, storage, and disposal facilities; additional state requirements. Each reference in this regulation to a federal regulation shall mean that federal regulation as adopted by reference in K.A.R. 28-31-124 through 28-31-279. (a) Financial assurance.

(1) For the purposes of this subsection, the following definitions shall apply:

(A) “Captive insurance company” shall mean an insurance company that is established with the specific objective of financing risks emanating from its parent group or groups and that could or could not also insure risks of the parent groups’ customers.

(B) “Financial institution” shall mean a bank, an insurance company, a surety company, or a trust company.

(C) “Purchased financial instrument” shall mean a trust fund, a letter of credit, a surety bond, or an insurance policy.

(D) “Unrelated” shall mean that neither party has any ownership of the other party, or any controlling interest in the other party.

(2) Each financial institution that provides financial assurance for a hazardous waste facility in Kansas shall meet the following requirements, in addition to meeting the requirements of 40 CFR part 264, subpart H:

(A) Each bank and each trust company shall have the authority to issue letters of credit in Kansas or to act as trustee for the facility in Kansas, or both.

(B) Each insurance company shall meet the following criteria:

(i) Have a current minimum rating in the secure or investment grade category by the A.M. Best insurance rating agency; and

(ii) not be a captive insurance company.

(C) Each surety company shall meet the following criteria:

(i) Have a current minimum rating in the secure or investment grade category by the A.M. Best insurance rating agency; and

(ii) be licensed in Kansas.

(3) If the financial assurance required by 40 CFR part 264, 265, or 267 is a purchased financial instrument, the financial institution that provides the purchased financial instrument shall be unrelated to both the owner and the operator of the facility.

(4) Each person that is required to submit the information listed in one or more of the following regulations shall also submit a copy of the most recent corporate annual report:

(A) 40 CFR 264.143(f)(3);

(B) 40 CFR 264.145(f)(3);

(C) 40 CFR 265.143(e)(3);

(D) 40 CFR 265.145(e)(3); or

(E) 40 CFR 267.143(f)(2).

(5) The corporate annual report required by paragraph (a)(4) shall be submitted for both publicly and privately owned facilities and shall contain the following items:

(A) Financial statements;

(B) notes to financial statements; and

(C) a copy of the independent certified public accountant's report, including an unqualified opinion.

(b) Notice in deed to property. Each owner of property on which a hazardous waste treatment, storage, or disposal facility is located shall record, in accordance with Kansas law, a notice with the register of deeds in the county where the property is located. The notice shall include the following information:

(1) The land has been used to manage hazardous waste.

(2) All records regarding permits, closure, or both are available for review at the department.

(c) Restrictive covenant and easement. Any owner of property on which a hazardous waste treatment, storage, or disposal facility is or has been located may be required by the secretary to execute a restrictive covenant or easement, or both, according to the following requirements:

(1) The restrictive covenant shall be filed with the county register of deeds, shall specify the uses

that may be made of the property after closure, and shall include the following requirements:

(A) All future uses of the property after closure shall be conducted in a manner that preserves the integrity of waste containment systems designed, installed, and used during operation of the disposal areas, or installed or used during the postclosure maintenance period.

(B) The owner or tenant and all subsequent owners or tenants shall preserve and protect all permanent survey markers and benchmarks installed at the facility.

(C) The owner or tenant and all subsequent owners or tenants shall preserve and protect all environmental monitoring stations installed at the facility.

(D) The owner or tenant, all subsequent property owners or tenants, and any person granted easement to the property shall provide written notice to the secretary during the planning of any improvement to the site and shall commence any of the following activities only after receiving approval from the secretary:

(i) Excavating or constructing any permanent structures or drainage ditches;

(ii) altering the contours;

(iii) removing any waste materials stored on the site;

(iv) changing the vegetation grown on areas used for waste disposal;

(v) growing food chain crops on land used for waste disposal; or

(vi) removing any security fencing, signs, or other devices installed to restrict public access to waste storage or disposal areas.

(2) The easement shall state that the department, its duly authorized agents, or contractors employed by or on behalf of the department may enter the premises to accomplish any of the following tasks:

(A) Complete items of work specified in the site closure plan;

(B) perform any item of work necessary to maintain or monitor the area during the postclosure period; or

(C) sample, repair, or reconstruct environmental monitoring stations constructed as part of the site operating or postclosure requirements.

(3) Each offer or contract for the conveyance of easement, title, or other interest to real estate used for treatment, storage, or disposal of hazardous waste shall disclose all terms, conditions, and provisions for care and subsequent land uses that

are imposed by these regulations or the site permit authorized and issued under K.S.A. 65-3431, and amendments thereto. Conveyance of title, easement, or other interest in the property shall contain provisions for the continued maintenance of waste containment and monitoring systems.

(4) All covenants, easements, and other documents related to this regulation shall be permanent, unless extinguished by agreement between the property owner and the secretary.

(5) The owner of the property shall pay all recording fees.

(d) Marking requirements. Each operator of a hazardous waste container storage facility or a tank storage facility shall mark all containers and tanks in accordance with 40 CFR 262.34(a)(2) and (3).

(e) Environmental monitoring. All samples analyzed in accordance with 40 CFR part 264, subpart F or G or 40 CFR part 265, subpart F or G shall be conducted by a laboratory certified for these analyses by the secretary, except that analyses of time-sensitive parameters, including pH, temperature, and specific conductivity, shall be conducted at the time of sampling if possible.

(f) Laboratory certification. For hazardous waste received at a treatment, storage, or disposal facility with the intent of burning for destruction or energy recovery, all quantification analyses performed for the purpose of complying with permit conditions shall be performed by a laboratory certified for these analyses by the secretary, if this certification is available.

(g) Hazardous waste injection wells. The owner or operator of each hazardous waste injection well shall comply with the requirements of article 46 of these regulations. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-265. Interim status hazardous waste treatment, storage, and disposal facilities; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 265, including appendices I and III, IV, V, and VI, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 265 shall be excluded from adoption:

(1) All comments and all notes;

(2) 40 CFR 265.1(c)(4) and (15);

(3) 40 CFR 265.15(b)(5);

(4) 40 CFR 265.149 and 265.150;

(5) 40 CFR 265.195(d);

(6) 40 CFR 265.201(e);

(7) 40 CFR 265.1030(c);

(8) 40 CFR 265.1050(f); and

(9) 40 CFR 265.1080(e), (f), and (g).

(c) Modifications. The following modifications shall be made to 40 CFR part 265:

(1) Each occurrence of the following phrases shall be deleted:

(A) “(incorporated by reference, see § 260.11)”;

(B) “(incorporated by reference—refer to § 260.11 of this chapter)”;

(C) “(incorporated by reference as specified in § 260.11)”;

(D) “(incorporated by reference under § 260.11)”;

(E) “(incorporated by reference under § 260.11 of this chapter)”;

(F) “as incorporated by reference in § 260.11”; and

(G) “as incorporated by reference in § 260.11 of this chapter.”

(2) In 40 CFR 265.1(b), the phrase “issued under section 3005 of RCRA” shall be replaced with “issued by EPA under section 3005 of RCRA or a Kansas hazardous waste facility permit is issued by the department.”

(3) In 40 CFR 265.1(c)(11)(iii), the phrase “and K.A.R. 28-31-124a through 28-31-124e” shall be inserted after the phrase “through 124 of this chapter.”

(4) In 40 CFR 265.15(b)(4), the following text shall be deleted: “, except for Performance Track member facilities, that must inspect at least once each month, upon approval by the Director, as described in paragraph (b)(5) of this section.”

(5) In 40 CFR 265.90(e), the term “qualified professional” shall be replaced with “Kansas professional engineer.”

(6) In 40 CFR 265.112(d)(3)(ii), the phrase “under section 3008 of RCRA” shall be deleted.

(7) In 40 CFR 265.113(d)(2), the phrase “required under RCRA section 3019” shall be deleted.

(8) In 40 CFR 265.118(e)(2), the phrase “under section 3008 of RCRA” shall be deleted.

(9) In 40 CFR 265.143(c)(8) and 265.145(c)(9), the phrase “determination pursuant to section 3008 of RCRA” shall be replaced by “determination by EPA pursuant to section 3008 of RCRA or

by the state under K.S.A. 65-3441, 65-3443, 65-3445, or 65-3439(e).”

(10) In 40 CFR 265.143(g) and 265.145(g), the text “If the facilities covered by the mechanism are in more than one Region, identical evidence of financial assurance must be submitted to and maintained with the Regional Administrators of all such Regions” shall be replaced with the following: “If the facilities covered by the mechanism are in more than one state, identical evidence of financial assurance shall be submitted to and maintained with the state agency regulating hazardous waste, or with the appropriate regional administrator if the facility is located in an unauthorized state.”

(11) In 40 CFR 265.144(b) and (c), the phrase “and the post-closure period” shall be inserted after the phrase “During the active life of the facility.”

(12) In 40 CFR 265.144(b), the following replacements shall be made:

(A) The phrase “§ 265.145(d)(5)” shall be replaced with “§ 265.145(e)(5).”

(B) The phrase “§ 265.145(b)(1) and (2)” shall be replaced with “paragraphs (b)(1) and (2) of this section.”

(13) In 40 CFR 265.147(a)(1)(i), the text “Regional Administrator, or Regional Administrators” shall be replaced with “secretary, and regional administrators.”

(14) In 40 CFR 265.174, the following language shall be deleted: “, except for Performance Track member facilities, that must conduct inspections at least once each month, upon approval by the Director. To apply for reduced inspection frequency, the Performance Track member facility must follow the procedures described in § 265.15(b)(5) of this part.”

(15) In 40 CFR 265.191(a), the text “January 12, 1988” shall be replaced with “January 12, 1988 for HSWA tanks, and May 1, 1988 for non-HSWA tanks.”

(16) In 40 CFR 265.191(c), the text “July 14, 1986 must conduct this assessment within 12 months after the date that the waste becomes a hazardous waste” shall be replaced with the following: “July 14, 1986 for HSWA tanks, or May 1, 1987 for non-HSWA tanks, shall conduct this assessment within 12 months after the date that the waste becomes a hazardous waste regulated by the state.”

(17) In 40 CFR 265.201, the following modifications shall be made:

(A) In the title, the phrase “between 100 and 1,000 kg/mo” shall be replaced with “less than 1,000 kg/mo.”

(B) Paragraph (a) shall be replaced with the following: “The requirements of this section shall apply to each small quantity generator, and to each Kansas small quantity generator and conditionally exempt small quantity generator that accumulates 25 kg (55 pounds) or more of hazardous waste in one or more tanks.”

(C) In paragraphs (b), (f), (g), and (h), the phrases “generators of between 100 and 1,000 kg/mo hazardous waste” and “generators of between 100 and 1,000 kg/mo” shall be replaced with “generators identified in paragraph (a) of this section.”

(D) In paragraphs (c) and (d), the number “100” shall be replaced with “25.”

(18) In 40 CFR 265.340(b)(2), the phrase “§ 264.351” shall be replaced with “§ 265.351.”

(19) In 40 CFR 265.440(a), the following replacements shall be made:

(A) Each occurrence of the text “December 6, 1990” shall be replaced with “December 6, 1990 for HSWA drip pads and April 25, 1994 for non-HSWA drip pads.”

(B) Each occurrence of the text “December 24, 1992” shall be replaced with “December 24, 1992 for HSWA drip pads and April 25, 1994 for non-HSWA drip pads.”

(20) In 40 CFR 265.440(c)(1)(iv), the term “Federal regulations” shall be replaced with “federal and state regulations.”

(21) In 40 CFR 265.1080(b)(5), the text “required under the corrective action authorities of RCRA sections 3004(u), 3004(v), or 3008(h); CERCLA authorities; or similar federal or state authorities” shall be replaced by the following: “required by EPA under the corrective action authorities of RCRA sections 3004(u), 3004(v), or 3008(h) or under CERCLA authorities; required by the state under K.S.A. 65-3443, 65-3445, and 65-3453; or required under similar Federal or State authorities.”

(22) In 40 CFR 265.1101(c)(4), the following text shall be deleted:

(A) “, except for Performance Track member facilities, that must inspect up to once each month, upon approval of the director.”; and

(B) “[t]o apply for reduced inspection frequency, the Performance Track member facility must follow the procedures described in § 265.15(b)(5).” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-265a. Interim status hazardous waste treatment, storage, and disposal facilities; additional state requirements. Each owner or operator of an interim status hazardous waste treatment, storage, or disposal facility shall comply with K.A.R. 28-31-264a. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-266. Specific hazardous wastes and specific types of hazardous waste management facilities; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 266, including appendices I through IX and XI through XIII, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 266 shall be excluded from adoption:

(1) All notes, except in appendix IX;

(2) 40 CFR 266.103;

(3) in 40 CFR 266.210, the definition of “we or us”; and

(4) subpart O.

(c) Modifications. The following modifications shall be made to 40 CFR part 266:

(1) Each occurrence of the following phrases shall be deleted:

(A) “(incorporated by reference, see § 260.11)”;

(B) “(incorporated by reference, in § 260.11)”;

(C) “(incorporated by reference in § 260.11)”;

(D) “, as incorporated by reference in § 260.11 of this chapter”; and

(E) “, incorporated by reference in §260.11.”.

(2) In 40 CFR 266.23(a), the phrase “subparts A through N of parts 124, 264, 265, 268, and 270 of this chapter” shall be replaced with “subparts A through N of 40 CFR parts 264 and 265, 40 CFR parts 268 and 270, K.A.R. 28-31-124 through 124e.”.

(3) In 40 CFR 266.202(d), the following modifications shall be made:

(A) The phrase “For the purposes of RCRA section 1004(27),” shall be deleted.

(B) The text “or imminent and substantial endangerment authorities under section 7003” shall be replaced with “and the Kansas enforcement authorities at K.S.A. 65-3441(b) and (c), 65-3443, and 65-3445.”

(4) In 40 CFR 266.210 in the definition of “naturally occurring and/or accelerator-produced radioactive material (NARM),” the phrase “by the States” shall be replaced with “by the state of Kansas.”

(5) In 40 CFR part 266, subpart N, the following replacements shall be made:

(A) The term “us” shall be replaced with “the department.”

(B) The term “we” shall be replaced with “the secretary.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-267. Hazardous waste facilities operating under a standardized permit; adoption and modification of federal regulations.

(a) Adoption. The provisions of 40 CFR part 267, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 267 shall be excluded from adoption:

(1) All comments and all notes; and

(2) 40 CFR 267.150.

(c) Modifications. The following modifications shall be made to 40 CFR part 267:

(1) Each occurrence of the following phrases shall be deleted:

(A) “, as incorporated by reference in 40 CFR 260.11”; and

(B) “(incorporated by reference, see 40 CFR 260.11).”

(2) In 40 CFR 267.12, the text “your state hazardous waste regulatory agency or from your EPA regional office” shall be replaced with “the department.”

(3) In 40 CFR 267.112(d)(3), the phrase “under section 3008 of RCRA” shall be deleted.

(4) In 40 CFR 267.151(a) and (b), the text “[insert ‘subpart H of 40 CFR part 267’ or the citation to the corresponding state regulation]” shall be replaced with “K.A.R. 28-31-267.” (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-267a. Hazardous waste facilities operating under a standardized permit; additional state requirements. Each owner or operator of hazardous waste management facility that has been issued a standardized permit shall

comply with K.A.R. 28-31-264a. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431 and 65-3443; effective April 29, 2011.)

28-31-268. Land disposal restrictions; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 268, including appendices III, IV, VI through VIII, and XI, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 268 shall be excluded from adoption:

(1) All comments and all notes;

(2) 40 CFR 268.13; and

(3) 40 CFR 268.44(o).

(c) Modifications. The following modifications shall be made to 40 CFR part 268:

(1) Each occurrence of the following phrases shall be deleted:

(A) “(incorporated by reference, see § 260.11 of this chapter)”;

(B) “as incorporated by reference in § 260.11”;

(C) “as incorporated by reference in § 260.11 of this chapter”;

(D) “as incorporated by reference in 40 CFR 260.11”;

(E) “as referenced in § 260.11 of this chapter.”

(2) Paragraph 40 CFR 268.1(e)(1) shall be replaced with “Waste generated by conditionally exempt small quantity generators or Kansas small quantity generators (KSQGs), except KSQGs shall comply with 40 CFR 268.7(a)(5) and (10).”

(3) In 40 CFR 268.3(a), the phrase “RCRA section 3004” shall be replaced with “40 CFR part 268.”

(4) In 40 CFR 268.7(a)(9)(iii), the phrase “except for D009” shall be added to the end of the sentence.

(5) In 40 CFR 268.7(a)(10), the phrase “and Kansas small quantity generators” shall be inserted after the term “Small quantity generators.”

(6) In 40 CFR 268.7(d), the phrase “§ 261.3(e)” shall be replaced with “§ 261.3(f).”

(7) 40 CFR 268.7(d)(1) shall be replaced with the following: “A one-time notification, including the following information, shall be submitted to the department:”

(8) In 40 CFR 268.14(b) and (c), the phrase “section 3001” shall be replaced with “40 CFR part 261.”

(9) In 40 CFR 268.44(i), the phrase “in § 260.20(b)(1)-(4)” shall be replaced with “required by EPA’s rulemaking petition program.”

(10) In 40 CFR 268.50(a), the phrase “of RCRA section 3004” shall be deleted.

(11) In 40 CFR 268.50(e), the phrase “or RCRA section 3004” shall be deleted. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011; amended May 10, 2013.)

28-31-270. Hazardous waste permits; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 270, including appendix I to §270.42, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 270 shall be excluded from adoption:

(1) In 40 CFR 270.1, subsections (a) and (b) and paragraphs (c)(1)(iii) and (c)(2)(ix);

(2) 40 CFR 270.3;

(3) 40 CFR 270.6;

(4) 40 CFR 270.10(g)(1)(i);

(5) 40 CFR 270.14(b)(18);

(6) 40 CFR 270.42(i) and (l);

(7) 40 CFR 270.60(a); and

(8) 40 CFR 270.64.

(c) Modifications. The following modifications shall be made to 40 CFR part 270:

(1) In 40 CFR 270.1(c)(7), the following text shall be deleted: “including, but not limited to, a corrective action order issued by EPA under section 3008(h), a CERCLA remedial action, or a closure or post-closure plan.”

(2) In 40 CFR 270.2, the following definitions shall be modified as follows:

(A) Corrective action management unit.

(i) The phrase “or secretary” shall be inserted after the term “Regional Administrator.”

(ii) The word “and” shall be replaced with the term “or by the regional administrator under.”

(B) Emergency permit. The term “RCRA permit” shall be replaced with “RCRA or Kansas hazardous waste facility permit.”

(C) Permit.

(i) The reference to “124 of this chapter” shall be replaced with “124 of this chapter or K.A.R. 28-31-124 through 28-31-124e and 28-31-270.”

(ii) The term “RCRA” shall be deleted.

(iii) The term “agency” shall be replaced with the phrase “EPA or department.”

(D) Remedial action plan. The term “RCRA permit” shall be replaced with “RCRA or Kansas hazardous waste facility permit.”

(E) Standardized permit.

(i) The term “RCRA permit” shall be replaced with “RCRA or Kansas hazardous waste facility permit.”

(ii) The term “Director’s” shall be replaced with “director’s or secretary’s.”

(3) In 40 CFR 270.10(a), the following language shall be inserted after the title “Applying for a permit.”: “Each person that wants to apply for a permit to dispose of hazardous waste shall first petition the secretary for an exception to the Kansas prohibition against underground land burial under the requirements of K.A.R. 28-31-5.”

(4) In 40 CFR 270.10(e)(3), the text “, or the secretary may under the authority of K.S.A. 65-3445,” shall be inserted after the phrase “section 3008 of RCRA.”

(5) In 40 CFR 270.10(e)(4), the second sentence shall be deleted.

(6) In 40 CFR 270.10(f)(2), the second sentence shall be replaced with the following: “The application shall be filed with the secretary.”

(7) In 40 CFR 270.10(g)(1)(ii), the text “if the facility is located in a State which has obtained interim authorization or final authorization,” shall be deleted.

(8) In 40 CFR 270.10(g)(1)(iii), the text “if the State in which the facility in question is located does not have interim authorization or final authorization; otherwise it shall be filed with the State Director (if the State has an analogous provision)” shall be deleted.

(9) 40 CFR 270.12 shall be replaced with “K.S.A. 65-3447 shall apply to all information claimed as confidential.”

(10) In 40 CFR 270.13(k)(1), the term “RCRA” shall be replaced with “RCRA or the Kansas hazardous waste program.”

(11) In 40 CFR 270.14(b)(20), the phrase “Federal laws as required in § 270.3 of this part” shall be replaced with “laws.”

(12) In 40 CFR 270.24(d)(3) and 270.25(e)(3), the phrase “(incorporated by reference as specified in § 270.6)” shall be deleted.

(13) In 40 CFR 270.32(a) the text “, and for EPA issued permits only, 270.33(b) (alternate schedules of compliance) and 270.3 (considerations under Federal law)” shall be deleted.

(14) In 40 CFR 270.32(c), the following language shall be deleted:

(A) The second sentence, which starts “For a permit issued by EPA”;

(B) the term “EPA”;

(C) the phrase “and EPA administered programs.”

(15) In 40 CFR 270.43(b), the phrase “or part 22” shall be deleted.

(16) In 40 CFR 270.51(a), the title shall be replaced with “Kansas hazardous waste facility permits” and the phrase “under 5 U.S.C. 558(c)” shall be deleted.

(17) In 40 CFR 270.51(d), the title shall be replaced with “State continuation of an EPA permit” and the phrase “In a State with a hazardous waste program authorized under 40 CFR part 271,” shall be deleted.

(18) In 40 CFR 270.60, the phrase “facilities in Kansas” shall be inserted after the word “following” in the introductory paragraph.

(19) In 40 CFR 270.70(a) and 270.73(d), the phrase “under the Act” shall be deleted.

(20) 40 CFR 270.115 shall be replaced with the following: “K.S.A. 65-3447 shall apply to all information claimed as confidential.”

(21) In 40 CFR 270.155(a), the following phrases shall be deleted:

(A) “[T]o EPA’s Environmental Appeals Board”;

(B) “[i]nstead of the notice required under §§ 124.19(c) and 124.10 of this chapter,”;

(C) “by the Environmental Appeals Board”;

(D) “as provided by the Board”;

(E) “with the Board.”

(22) In 40 CFR 270.195, the phrase “in RCRA sections 3004 and 3005” shall be deleted.

(23) In 40 CFR 270.255(a)(3), each occurrence of the term “we” shall be replaced with “the secretary.”

(24) In 40 CFR 270.310(d)(3), the phrase “(incorporated by reference as specified in 40 CFR 260.11)” shall be deleted. (Authorized by K.S.A. 65-3431; implementing K.S.A. 65-3431, 65-3433, 65-3437, and 65-3439; effective April 29, 2011.)

28-31-270a. Hazardous waste permits; petition to be granted an exception to the prohibition against underground burial of hazardous waste. This regulation shall apply to each person that wants to apply for a permit for

the underground burial of hazardous waste. For the purposes of this regulation, this person shall be called a "potential applicant."

(a) Exception petition. Before applying for a permit according to the requirements of K.A.R. 28-31-124 through 28-31-124e and 28-31-270, each potential applicant shall submit to the secretary a petition for an exception to the prohibition against the underground burial of hazardous waste, as specified in K.S.A. 65-3458 and amendments thereto.

(b) Contents of the exception petition. Each exception petition shall include the following items:

(1) A complete chemical and physical analysis of the waste;

(2) a list and description of all technologically feasible methods that could be considered to treat, store, or dispose of the waste;

(3) for each method described in paragraph (b) (2), an economic analysis based upon a 30-year time period. The analysis shall determine the costs associated with treating, storing, disposing of, and monitoring the waste during this time period; and

(4) a demonstration that underground burial is the only economically reasonable or technologically feasible methodology for the disposal of that specific hazardous waste.

(c) Review and public notice for exception petitions. The review and public notice shall be conducted according to the following requirements:

(1) The potential applicant shall submit the exception petition to the department. If the exception petition is not complete, the potential applicant shall be notified of the specific deficiencies by the department.

(2) Upon receipt of a complete exception petition, a public notice shall be published by the department once each week for three consecutive weeks according to the following requirements:

(A) The notice shall be published in the following publications:

(i) The Kansas register; and

(ii) the official county newspaper of the county in which the proposed underground burial would occur or, if there is no official county newspaper, a newspaper published as provided in K.S.A. 64-101 and amendments thereto.

(B) The public notice shall include the following information:

(i) The name of the potential applicant;

(ii) a description of the specific waste;

(iii) a description of the proposed disposal methods;

(iv) a map indicating the location of the proposed underground burial;

(v) the address of the location where the exception petition and related documents can be reviewed;

(vi) the address of the location where copies of the exception petition and related documents can be obtained;

(vii) a description of the procedure by which the exception petition will be reviewed; and

(viii) the date and location of the public hearing.

(3) A copy of the public notice shall be transmitted by the department to the clerk of each city that is located within three miles of the proposed underground burial site.

(d) Public hearing and public comment period. The public hearing and public comment period shall be conducted according to the following requirements:

(1) The public hearing shall be conducted in the same county as that of the proposed underground burial facility.

(2) The public hearing shall be scheduled no earlier than 30 days after the date of the first public notice.

(3) A hearing officer shall be designated by the secretary.

(4) At the hearing, any person may submit oral comments, written comments, or data concerning the exception petition. Reasonable limits may be set by the hearing officer on the time allowed for oral statements, and the submission of statements in writing may be required by the hearing officer.

(5) The public comment period shall end no earlier than the close of the public hearing. The hearing officer may extend the public comment period at the hearing.

(6) A recording or written transcript of the hearing shall be made available to the public by the department upon request.

(7) A report shall be submitted by the hearing officer to the secretary detailing all written and oral comments submitted during the public comment period. The hearing officer may also recommend findings and determinations.

(e) Approval or denial of the exception petition. The following procedures shall be followed by the secretary and the department:

(1) If the secretary determines, based on the criteria specified in K.S.A. 65-3458 and amendments thereto, that the exception petition should be approved, an order shall be issued by the secretary. The order may require conditions that

the secretary deems necessary to protect public health and safety and the environment.

(2) If the secretary determines that there is not sufficient evidence to approve the exception petition, the potential applicant shall be notified by the department of the reasons why the exception petition is denied.

(3) A public notice of the final decision to approve or deny the exception petition shall be published by the department in the following publications:

(A) The Kansas register; and

(B) the official county newspaper of the county in which the proposed underground burial would occur or, if there is no official county newspaper, a newspaper published as provided in K.S.A. 64-101 and amendments thereto.

(4) A copy of the final decision shall be transmitted by the department to the clerk of each city that is located within three miles of the proposed underground burial site. (Authorized by K.S.A. 65-3431; implementing K.S.A. 2010 Supp. 65-3458; effective April 29, 2011.)

28-31-273. Universal waste; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 273, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s; and

(2) the exclusions from adoption listed in subsection (b).

(b) Exclusions. The following portions of 40 CFR part 273 shall be excluded from adoption:

(1) All comments and all notes; and

(2) subpart G. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-279. Used oil; adoption and modification of federal regulations. (a) Adoption. The provisions of 40 CFR part 279, as in effect on July 1, 2006, are hereby adopted by reference subject to the following:

(1) The substitution of terms listed in K.A.R. 28-31-100 through 28-31-100s;

(2) the exclusions from adoption listed in subsection (b); and

(3) the modifications listed in subsection (c).

(b) Exclusions. The following portions of 40 CFR part 279 shall be excluded from adoption:

(1) All comments and all notes; and

(2) 40 CFR 279.82.

(c) Modifications. The following modifications shall be made to 40 CFR part 279:

(1) In 40 CFR 279.10(a), the text “EPA presumes” shall be replaced with “EPA and the department presume.”

(2) In 40 CFR 279.12(b), the text “, except when such activity takes place in one of the states listed in § 279.82(c)” shall be deleted.

(3) The text “and which has occurred after the effective date of the recycled used oil management program in effect in the State in which the release is located” shall be deleted in the following locations:

(A) 40 CFR 279.22(d);

(B) 40 CFR 279.45(h);

(C) 40 CFR 279.54(g); and

(D) 40 CFR 279.64(g).

(4) The parenthetical text in paragraph (b)(1) concerning the “RCRA/Superfund Hotline” and the sentence in paragraph (b)(2) concerning the “RCRA/Superfund Hotline” shall be deleted in the following sections:

(A) 40 CFR 279.42;

(B) 40 CFR 279.51; and

(C) 40 CFR 279.62.

(5) In 40 CFR 279.81(b), the phrase “parts 257 and 258 of this chapter” shall be replaced with “K.S.A. 65-3401 et seq. and article 29.” (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

28-31-279a. Used oil; additional state prohibitions and requirements. (a) Prohibitions.

(1) No person shall dispose of used oil on or into any of the following:

(A) Sewers;

(B) storm drainage systems;

(C) surface water;

(D) groundwater; or

(E) the ground.

(2) No person shall apply used oil as any of the following:

(A) A coating;

(B) a sealant;

(C) a dust suppressant;

(D) a pesticide carrier; or

(E) any other similar application.

(b) Transporter registration and insurance. Each transporter of used oil shall comply with the requirements of K.A.R. 28-31-6. (Authorized by and implementing K.S.A. 65-3431; effective April 29, 2011.)

Article 32.—TESTING HUMAN BREATH FOR LAW ENFORCEMENT PURPOSES

28-32-1 and 28-32-2. (Authorized by K.S.A. 65-1,107; implementing L. 1986, Ch. 40, Sec. 7; effective, E-74-11, Dec. 14, 1973; effective, E-76-2, Jan. 1, 1975; effective May 1, 1976; amended, T-87-35, Nov. 19, 1986; amended May 1, 1987; revoked March 14, 2008.)

28-32-4 through 28-32-5. (Authorized by K.S.A. 65-1,107; implementing L. 1986, Ch. 40, Sec. 7; effective, E-74-11, Dec. 14, 1973; effective, E-76-2, Jan. 1, 1975; effective May 1, 1976; amended, T-87-35, Nov. 19, 1986; amended May 1, 1987; revoked March 14, 2008.)

28-32-6 through 28-32-7. (Authorized by K.S.A. 65-1,107; implementing L. 1986, Ch. 40, Sec. 7; effective, T-87-35, Nov. 19, 1986; effective May 1, 1987; revoked March 14, 2008.)

28-32-8. Definitions. The following terms and abbreviations as used in this article shall have the following meanings, unless the context requires otherwise.

(a) “Agency” means any law enforcement agency under whose authority evidential breath alcohol tests are performed.

(b) “Agency custodian” means the employee at a certified agency who is responsible for administering the certified agency’s EBAT program.

(c) “Alcohol” means any substance containing any form of alcohol, including ethanol, methanol, propanol, and isopropanol.

(d) “Alcohol concentration” means the number of grams of alcohol per 100 milliliters of blood or per 210 liters of breath.

(e) “Certified agency” means a law enforcement agency that meets the requirements of K.A.R. 28-32-9.

(f) “Certified operator” means an individual who meets the requirements of K.A.R. 28-32-10.

(g) “Department” means the Kansas department of health and environment.

(h) “Device custodian” means the certified operator employed by a certified agency who is responsible for oversight of the certified agency’s EBAT device.

(i) “Evidential breath alcohol test” and “EBAT” mean a quantitative chemical test for alcohol performed on a sample or samples of breath of an individual suspected of an offense that subjects the individual to the provisions of K.S.A.

8-1001 through K.S.A. 8-1022 and amendments thereto.

(j) “Evidential breath alcohol test device” and “EBAT device” mean an instrument designed to perform a quantitative chemical test for alcohol on a sample of breath of an individual, which yields test results that are admissible as evidence in a court of law.

(k) “Preliminary breath-screening test device” means an instrument designed to perform a qualitative or quantitative chemical test for alcohol on a sample of breath of an individual to determine the presence or absence of alcohol pursuant to K.S.A. 8-1012 and amendments thereto.

(l) “Quality control” means a test of an evidential breath alcohol test device that is administered at the direction of the secretary and that uses a known alcohol standard to evaluate the accuracy of the device.

(m) “Secretary” means the secretary of the Kansas department of health and environment and the secretary’s designee. (Authorized by and implementing K.S.A. 2006 Supp. 65-1,107; effective March 14, 2008.)

28-32-9. Agency certification. (a) Application. Each agency head seeking agency certification shall submit an application for agency certification on forms provided by the department.

(b) Certification requirements. Each agency for which certification is sought shall demonstrate to the secretary that all of the following requirements are met:

(1) The agency head shall specify each certified EBAT device proposed for conducting evidential breath alcohol testing.

(2) The agency head shall provide and maintain a roster of the certified operators who perform evidential breath alcohol testing for the agency.

(3) Each certified operator shall use only EBAT devices certified by the secretary.

(4) Each certified operator shall follow the standard operating procedure provided by the secretary for the EBAT device in use.

(5) For quality control, each device custodian or the device custodian’s designee shall test each EBAT device once each calendar week using the alcohol standards furnished by the department. The agency custodian shall report the test results to the department monthly on forms provided by the department.

(c) Inspection. An annual inspection of each certified agency shall be made by the secretary

or the secretary's designee to ensure compliance with this article.

(d) Certificate term. Each agency that meets the requirements of this regulation shall be issued a certificate by the secretary. Each certificate shall expire at midnight on December 31 of the year of the certificate's issuance.

(e) Certificate renewal. Each agency head of a certified agency seeking to renew the agency's certificate shall submit an application for renewal on forms provided by the department. If an application for renewal is submitted and approved before the expiration date, the certificate shall be considered renewed even if the agency does not have physical possession of the renewal certificate.

(f) Certificate suspension or revocation. The failure to comply with this regulation may be grounds for suspension or revocation of the agency's certification. (Authorized by and implementing K.S.A. 2006 Supp. 65-1,107; effective March 14, 2008.)

28-32-10. Operator certification. (a) Application. Each individual seeking certification shall submit an application for operator certification through that individual's certified agency on forms provided by the department. Each applicant shall be a duly appointed Kansas law enforcement officer or have the written endorsement of a supervisory law enforcement officer or an agency custodian.

(b) Certification requirements. Each applicant for operator certification shall be required to successfully complete the course of instruction and written examination approved by the secretary. Additional instruction may be required by the secretary to qualify a certified operator to perform evidential breath alcohol tests using additional EBAT devices.

(c) Certificate term. Each applicant that meets the requirements for conducting evidential breath alcohol testing shall be issued a certificate by the secretary. Each operator certificate that is issued in an even-numbered year shall expire at midnight on December 31 of the next even-numbered year. Each operator certificate that is issued in an odd-numbered year shall expire at midnight on December 31 of the next odd-numbered year.

(d) Certificate renewal. Each certified operator seeking to renew the operator certificate shall submit an application for renewal through that individual's certified agency on forms provided by

the department. As a condition of an operator's certificate renewal, each certified operator shall biennially complete EBAT continuing education as approved by the secretary. If an application for renewal is submitted and approved before the certificate's expiration date, the certificate shall be considered renewed even if the operator does not have physical possession of the renewal certificate.

(e) Effect of military service or official leave of absence.

(1) Any operator who returns from active military service or an official leave of absence that does not exceed two years may renew an inactive certification by meeting all of the following requirements and submitting the required information to the department on forms provided by the department:

(A) Provide proof of active military duty or official leave of absence;

(B) provide proof of the last operator certification before going on active duty or taking leave of absence;

(C) pass the current department-approved written operator examination; and

(D) provide proof of satisfactory performance of EBAT device operation in the presence of a device custodian.

(2) Any operator who returns from active military service or an official leave of absence that exceeds two years may renew an expired certification by meeting all of the following requirements and submitting the required information to the department on forms provided by the department:

(A) Provide proof of active military duty or official leave of absence;

(B) provide proof of the last operator certification before going on active duty or taking leave of absence;

(C) provide proof of completion of EBAT continuing education within 180 days of the date of return to the agency;

(D) pass the current department-approved written operator examination; and

(E) provide proof of satisfactory performance of EBAT device operation in the presence of a device custodian.

(f) Certificate denial, suspension, and revocation. The failure of an applicant or a certified operator to comply with this regulation may be grounds for denial of the application or renewal or for suspension or revocation of the operator's certificate. (Authorized by and implementing K.S.A. 2006 Supp. 65-1,107; effective March 14, 2008.)

28-32-11. EBAT device certification.

(a) Application. Each agency custodian seeking EBAT device certification shall submit an application on forms provided by the department for certification of each EBAT device that the certified agency intends to use in the certified agency's EBAT program.

(b) Initial certification requirements. Each EBAT device shall be certified by the secretary before being used by an agency.

(c) Inspection. Once an EBAT device is certified, an inspection of the EBAT device may be made by the secretary at any time. Any EBAT device may be removed from service at the time of the inspection if deemed necessary.

(d) Maintenance. Each EBAT device shall be maintained by the device custodian or the device custodian's designee as directed by the secretary.

(e) Repair. Each EBAT device removed from service for repair shall be repaired by the manufacturer or the manufacturer's authorized repair service. When the EBAT device is returned to the agency, the EBAT device shall be tested for accuracy by the device custodian or the device custodian's designee. The device custodian or the device custodian's designee shall notify the department of the date on which the instrument is placed back into service.

(f) Modification. No modification shall be made to any EBAT device without the prior written consent of the secretary. For purposes of this regulation, "modification" shall mean any change in the operating software of or any physical change to a certified EBAT device that alters the accuracy or precision of the EBAT device. (Authorized by and implementing K.S.A. 2017 Supp. 65-1,107; effective March 14, 2008; amended, T-28-12-18-17, Dec. 18, 2017; amended April 6, 2018.)

28-32-12. Certified operator instruction and continuing education requirements.

(a) Agency personnel may be trained to administer evidential breath alcohol tests by any of the following entities:

- (1) The department;
- (2) a certified agency;
- (3) a college or university; or
- (4) a law enforcement training center.

(b) Both of the following shall be approved in advance by the secretary:

- (1) Each course instructor; and
- (2) each course of instruction offered to fulfill operator certification and EBAT continuing education requirements. (Authorized by and imple-

menting K.S.A. 2006 Supp. 65-1,107; effective March 14, 2008.)

28-32-13. Records. (a)(1) Each agency custodian or the agency custodian's designee shall maintain the following records on file at the certified agency's office for at least three years:

- (A) Records of each current certified operator;
- (B) records showing that a quality control check was completed at least once each week for each EBAT device assigned to the agency; and
- (C) records documenting any maintenance or repair made to each EBAT device.

(2) The records specified in this subsection shall be subject to inspection by the secretary at least annually.

(b) Each agency custodian or the agency custodian's designee shall maintain a record of the number of individuals tested by each certified operator under the certified agency's supervision. (Authorized by and implementing K.S.A. 2012 Supp. 65-1,107; effective March 14, 2008; amended March 8, 2013.)

28-32-14. Preliminary breath-screening test devices.

(a) Each preliminary breath-screening test conducted shall be performed on a preliminary breath-screening test device approved by the secretary. The devices approved for use as preliminary breath-screening test devices in Kansas shall consist of the following devices and any other device approved by the secretary as specified in subsection (b):

Manufacturer	Model
Alcohol Countermeasure Systems Corp.	Alert J5
CMI, Inc.	Intoxilyzer 300
CMI, Inc.	Intoxilyzer 400
CMI, Inc.	Intoxilyzer S-D2
CMI, Inc.	Intoxilyzer S-D5
Draeger Safety, Inc.	Alcotest 6510
Draeger Safety, Inc.	Alcotest 6810
Draeger Safety, Inc.	Breathalyzer 7410
Guth Laboratories, Inc.	WAT89EC-1
Guth Laboratories, Inc.	Alcotector BAC-100
Intoximeters, Inc.	Alco-Sensor
Intoximeters, Inc.	Alco-Sensor Pass-Warn-Fail
Intoximeters, Inc.	Alco-Sensor III
Intoximeters, Inc.	Alco-Sensor Digital
Intoximeters, Inc.	Alco-Sensor IV Digital
Intoximeters, Inc.	Alco-Sensor IV Pass-Warn-Fail
Intoximeters, Inc.	Alco-Sensor FST
Lifeloc Technologies, Inc.	FC10
Lifeloc Technologies, Inc.	FC10Plus
Lifeloc Technologies, Inc.	FC20

Manufacturer	Model
Lifeloc Technologies, Inc.	PBA 3000
Sound-Off, Inc.	AlcoData

(b) Each agency custodian seeking to use a preliminary breath-screening test device that is not specified in subsection (a) shall submit the device to the secretary for examination and evaluation to determine if the device meets the criteria for approval. In order for a preliminary breath-screening test device to be approved, whether the device meets the following requirements shall be determined by the secretary:

(1) Each preliminary breath-screening test device shall meet the manufacturer's performance criteria when operated according to the procedures specified in the manufacturer's instruction manual for the device in use.

(2) Each reusable preliminary breath-screening test device shall have a disposable mouthpiece.

(c) Each approved preliminary breath-screening test device shall be operated according to the procedures specified in the manufacturer's instruction manual for the device in use.

(d) All training of preliminary breath-screening test device operators shall be the responsibility of each agency. All training shall follow the operational instructions supplied by the manufacturer for the device in use. (Authorized by and implementing K.S.A. 2006 Supp. 65-1,107; effective March 14, 2008.)

Article 33.—LABORATORIES PERFORMING OTHER TESTS

28-33-1. (Authorized by and implementing K.S.A. 1986 Supp. 65-1,107; effective Jan. 1, 1966; amended May 1, 1976; amended May 1, 1988; revoked May 3, 1996.)

28-33-2 to 28-33-6. (Authorized by K.S.A. 1975 Supp. 65-1,107; effective Jan. 1, 1966; amended May 1, 1976; revoked May 1, 1988.)

28-33-7. (Authorized by K.S.A. 1975 Supp. 65-1,107; effective Jan. 1, 1966; revoked May 1, 1988.)

28-33-8 to 28-33-9. (Authorized by K.S.A. 1975 Supp. 65-1,107; effective Jan. 1, 1966; amended May 1, 1976; revoked May 1, 1988.)

28-33-10. (Authorized by K.S.A. 1975 Supp. 65-1,107; effective May 1, 1976; revoked May 1, 1988.)

28-33-11. (Authorized by and implementing K.S.A. 1989 Supp. 65-1,107, as amended by L. 1990, Ch. 215, Sec. 1 and K.S.A. 1989 Supp. 65-6002, as amended by L. 1990, Ch. 234, sec. 2; effective Oct. 2, 1989; amended Feb. 4, 1991; revoked May 3, 1996.)

28-33-12. General provisions. (a) Definitions.

(1) "Department" means the department of health and environment.

(2) "Division" means the division of Kansas health and environmental laboratory.

(3) "Laboratory director" means the person responsible for the professional, administrative, organizational, and educational duties of a laboratory.

(4) "Laboratory supervisor" means the individual responsible for providing day-to-day supervision of testing personnel, including the proper performance of all laboratory procedures and reporting of test results.

(5) "Testing personnel" means individuals responsible for specimen processing, test performance, and reporting test results.

(6) "Test for controlled substance" means a procedure to evaluate a specimen for compounds identified in schedule I or II of the Kansas controlled substance act, K.S.A. 1996 Supp. 65-4105 and 65-4107.

(7) "Threshold" means a defined drug or metabolite concentration that is established at a level resulting in the following:

(A) a concentration at or above this level defines a positive result; and

(B) a concentration below this level defines a negative result.

(8) "Screening test" means a test designed to eliminate true negative specimens from further consideration. Threshold limits used for screening tests shall conform to the mandatory guidelines for federal workplace drug testing programs established by the substance abuse and mental health services administration of the department of health and human services in the federal register, volume 59, number 110, page 29921, published June 9, 1994.

(9) "Confirmatory test" means a mass spectrometry analytical procedure used to specifically identify the presence of a drug or drug metabolite. Threshold limits used for confirmatory testing shall conform to the mandatory guidelines for federal workplace drug testing programs established

by the substance abuse and mental health services administration of the department of health and human services in the federal register, volume 59, number 110, pages 29921-29922, published June 9, 1994.

(10) "Unsatisfactory performance" means a score for any analyte of less than 80% as determined by the proficiency testing provider.

(11) "Unsuccessful participation" means unsatisfactory performance for the same analyte in two consecutive or two out of three consecutive proficiency testing events.

(12) "CLIA" means the clinical laboratory improvement amendments of 1988, Public Law 100-578, as implemented by 42 CFR part 493, issued February 28, 1992, as amended and in effect on April 24, 1995.

(b) Approval procedure. (1) Except as provided in subsection (k), each laboratory located in Kansas seeking approval of the department to perform tests on biological specimens for controlled substances, as defined in schedule I and II of the Kansas controlled substance act, K.S.A. 1996 Supp. 65-4105 and 65-4107, shall be a laboratory that the division director or director's designee determines meets the requirements for certification under CLIA for the type and complexity of the tests being performed.

(2) (A) Except as set out in paragraph (C), each laboratory seeking approval to test biological specimens for the following drugs or their metabolites shall meet the requirements set out in paragraph (B):

- (i) amphetamines;
- (ii) cannabinoids or tetrahydrocannabinoids (THC);
- (iii) cocaine;
- (iv) opiates; and
- (v) phencyclidine.

(B) In addition to meeting requirements for certification under CLIA, each laboratory seeking approval under paragraph (A) shall submit the following:

- (i) a completed application on standard forms furnished by the division; and
- (ii) documents demonstrating successful performance in one testing event using a proficiency testing program approved by the division.

(C) Any laboratory facility testing specimens for emergency diagnosis and treatment may test for drugs listed on schedule I or II of the Kansas controlled substance act, K.S.A. 1996 Supp. 65-4105 and 65-4107, without meeting the requirements

of paragraph (B), if test results are used only for diagnosis and treatment.

(c) Upon receipt of a laboratory's application for approval, the laboratory shall be inspected by a representative of the division. The laboratory shall be evaluated to determine compliance using the following criteria.

(1) Screening test methods shall screen for the following five classes of drugs:

- (A) amphetamines;
- (B) cannabinoid or THC metabolites;
- (C) cocaine metabolites;
- (D) opiates; and
- (E) phencyclidine.

(2) Each test procedure shall be performed in accordance with a written protocol. The protocol shall be approved by the laboratory director. The protocol shall require that a blank control containing no drug and a control fortified with a known analyte concentration greater than the threshold limit for each analyte be included with each batch of specimens tested. At least one fortified control shall be at or near the threshold cutoff. The protocol shall insure that carryover between specimens does not occur.

(3) A laboratory quality assurance program shall be developed and implemented. The program shall contain the following components:

(A) requirements for sample collection that adhere to the criteria of the division director or the director's designee, or a signed statement that the specimen was properly collected according to these criteria, if collection is at a location other than the laboratory performing the test;

(B) identification and chain of custody procedures for specimens;

(C) procedures for assuring the security of the testing area, test records, and test reports;

(D) confirmation procedures for all positive screening tests unless evidenced by documentation that the testing is performed for one of the following:

(i) medical purposes on a hospital inpatient or patient currently undergoing treatment in a hospital emergency room;

(ii) a specimen from an individual currently under treatment for substance abuse; or

(iii) a correctional facility solely for the purpose of internal management of persons as defined in regulations promulgated by the secretary of corrections;

(E) a policy stating that only confirmed positive results shall be reported as positive;

(F) procedures for an internal quality control program that monitors the accuracy and precision of laboratory performance;

(G) procedures for an instrument maintenance program that, at a minimum, conforms to the manufacturer's specifications;

(H) provision for retention of all confirmed positive specimens for at least one year;

(I) policies requiring disposal of all medical wastes in accordance with K.A.R. 28-29-27; and

(J) documentation of adherence to the foregoing policies and procedures.

(4) Equipment required by the test system shall meet the specifications of the test system's manufacturer.

(5) Reagents, controls, and any other required materials for the procedure being performed shall be available and shall be stored according to the manufacturer's specifications.

(d) During the inspection by the division, one or more testing personnel may be required to demonstrate performance of the procedure under consideration.

(e) Except as provided in subsection (k), each approved laboratory located in Kansas shall be inspected by the division biennially. A follow-up inspection of any approved laboratory may be conducted by the division at any time.

(f) Each laboratory performing tests for controlled substances shall have an individual serving as laboratory director who holds one of the following credentials:

(1) current licensure as a physician in the state where the laboratory is located, with additional training in pharmacology, toxicology, clinical pathology or forensic pathology; or

(2) an earned doctoral degree from an accredited institution in a chemical or biological science and at least two years of laboratory experience in chemistry or analytical toxicology.

(g) Each laboratory performing tests for controlled substances shall have an individual or individuals serving as a laboratory supervisor. Each laboratory supervisor shall hold one of the following credentials:

(1) an earned doctoral degree from an accredited institution in a chemical or biological science and at least two years of laboratory experience in chemistry or analytical toxicology; or

(2) an earned baccalaureate degree from an accredited institution in a chemical or biological science or medical technology and at least four years of experience in chemistry or analytical toxicology.

(h) Each laboratory performing tests for controlled substances shall have one or more individuals serving as testing personnel. Each individual serving as testing personnel shall hold one of the following credentials:

(1) an earned baccalaureate degree from an accredited institution in a chemical or biological science or medical technology;

(2) an earned associate degree from an accredited institution in a chemical or biological science or medical technology; or

(3) have achieved a satisfactory grade in the health and human services written clinical laboratory technologist examinations offered between March 7, 1975 and August 28, 1987 by the professional examination service.

(A) The laboratory director shall document that testing personnel performing tests have been adequately trained in each test procedure being performed.

(B) Records of educational credentials and training shall be maintained for each individual qualified under subsections (f), (g), or (h) of this regulation.

(i) One copy of each test requisition, test record, and test report shall be maintained in a readily retrievable manner by the laboratory for a period of two years.

(j) Proficiency program. Each laboratory shall enroll and participate in an approved external proficiency testing program for opiates, cocaine, cannabinoids or THC, amphetamines, and phenylcyclidine. A list of approved proficiency testing programs shall be available from the division.

(1) The results of each laboratory's performance in the proficiency testing program shall be sent directly from the approved program provider to the division.

(2) The approval for any laboratory may be revoked by the director of the division or the director's designee when the laboratory meets the criteria for unsuccessful participation in an approved external proficiency testing program.

(3) Each laboratory shall undertake an investigation and institute corrective action for all incorrect responses identified in the proficiency testing program. The laboratory shall maintain documentation of the investigation and corrective action for a period of two years.

(k) (1) Any laboratory that is not located in the state of Kansas may apply for approval. Such a laboratory shall be added to the list of approved laboratories if it meets the following conditions.

(A) The laboratory shall be certified or approved by a federal, state, or independent agency having standards that are determined by the director of the division, or the director's designee, to be generally equivalent or more stringent than the standards set out in subsections (b) through (j) of this regulation.

(B) The laboratory seeking approval shall submit the following documentation for inspection by the department:

(i) a completed application on standard forms furnished by the division;

(ii) a report of the most recently completed on-site inspection by the approving agency addressing subsections (c) through (e);

(iii) proficiency testing results from the most recently completed proficiency challenge;

(iv) documents demonstrating that the laboratory personnel meet the qualifications set forth in subsections (f), (g), and (h); and

(v) any other documentation deemed necessary by the division.

(2) Any laboratory located in Kansas may seek approval under this subsection in lieu of following approval procedures in subsection (b) and meeting the on-site inspection requirements in subsections (c) through (e).

(l) List of approved laboratories. A current list of approved laboratories shall be maintained by the division. Each laboratory shall be approved biennially.

(m) Removal from approved list.

(1) A laboratory shall be removed from the approved list after voluntarily terminating or after notice and an opportunity for a hearing. All orders of revocation shall become final 15 days after service unless an appeal is filed in writing. All appeals shall be conducted according to the Kansas administrative procedure act, K.S.A. 77-501 et seq. and any amendments.

(2) Notification of removal of a laboratory from the approved list shall be made by certified mail. (Authorized by K.S.A. 1996 Supp. 65-1,107; implementing K.S.A. 1996 Supp. 65-1,107, 65-1,108, and 65-1,108a; effective Oct. 2, 1989; amended May 3, 1996; amended Oct. 10, 1997.)

Article 34.—HOSPITALS

PART 1. GENERAL

28-34-1. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-1a. Definitions. (a) "Authenticate" means to verify authorship by written signature, identifiable initials, or computer key. The use of rubber stamp signatures shall be acceptable if the following conditions are met.

(1) The practitioner whose signature the rubber stamp represents is the only individual who has possession of the stamp and who uses the stamp.

(2) The hospital maintains, in its administrative offices, a signed statement by the practitioner indicating that the practitioner is the only person who possesses and uses the stamp.

(b) "Chief executive officer" means the individual appointed by the governing body to act on its behalf in the overall management of the hospital.

(c) "Consultant" means a person who provides professional advice or services on request.

(d) "Covering practitioner" means a member of the hospital's medical staff who is authorized by the patient's attending physician or other practitioner to provide care and treatment for the patient in the absence of the attending physician or other practitioner.

(e) "Dentist" means a person licensed in Kansas to practice dentistry.

(f) "Dietitian" means a person who is licensed in Kansas as a dietitian.

(g) "Dietetic services supervisor" means an individual who meets one of the following requirements:

(1) Is licensed in the state of Kansas as a dietitian;

(2) has an associate's degree in dietetic technology from a program approved by the American dietetic association;

(3) is a dietary manager who is certified by the board of the dietary managers' association; or

(4) has training and experience in dietetic services supervision and management that are determined by the secretary of health and environment to be equivalent in content to paragraph (2) or (3) of this subsection.

(h) "Director" means a person with administrative responsibility for the direction of a service for the hospital. When this term is used in connection with a medical or clinical service, it shall be synonymous with "chairperson" and shall not imply a salaried individual.

(i) "Drug administration" means the direct application of a drug or biological, whether by injection, inhalation, ingestion, or any other means, to the body of a patient by either of the following:

(1) A practitioner, or pursuant to the lawful direction of a practitioner, who is acting within

the scope of that practitioner's license and who is qualified according to medical staff bylaws; or

(2) the patient at the direction and in the presence of a practitioner.

(j) "Drug dispensing" means delivering prescription medication to the patient pursuant to the lawful order of a practitioner.

(k) "Facilities" means buildings, equipment, and supplies necessary for the implementation of hospital services.

(l) "Licensed practical nurse" means an individual who is licensed in Kansas as a licensed practical nurse.

(m) "Licensing agency" means the Kansas department of health and environment.

(n) "Long-term care unit" means a unit that provides physician services and continuous nursing supervision for patients who are not in an acute phase of illness and who currently require nursing care that is primarily of a convalescent, restorative, or long-term nature. Medicare-certified, distinct-part, long-term care units shall be included.

(o) "Nursing care unit" means an organized jurisdiction of nursing services in which nursing services are provided on a continuous basis.

(p) "Nursing services" means patient care services pertaining to the curative, restorative, and preventive aspects of nursing that are performed or supervised by a registered nurse pursuant to the medical care plan of the practitioner and the nursing care plan.

(q) "Organized" means administratively and functionally structured.

(r) "Organized medical staff" means a formal organization of physicians and dentists, with the responsibility and authority to maintain proper standards for patient care as delegated by the governing body.

(s) "Outpatient services" means an organizational unit of the hospital that is designed to support the provision of nonemergency health care services to patients who do not remain in the hospital overnight. The term shall include a short-term procedure unit if applicable.

(t) "Pathologist" means either of the following:

(1) A person who is licensed in Kansas to practice medicine and surgery and who is a board-certified or board-eligible pathologist; or

(2) a person licensed in Kansas as a dentist and certified as an oral pathologist.

(u) "Patient" means a person admitted to the hospital upon the order of a member of the medical staff.

(v) "Physician" means a person licensed in Kansas to practice medicine and surgery.

(w) "Practitioner" means a member of the hospital's medical staff and may include a physician or dentist.

(x) "Qualified nurse anesthetist" means any of the following:

(1) A registered nurse who has been certified as a nurse anesthetist by the council on certification of the American association of nurse anesthetists and has been authorized as a registered nurse anesthetist by the Kansas board of nursing;

(2) a student enrolled in a program of nurse anesthesia by the council on accreditation of the American association of nurse anesthetists; or

(3) a graduate of an accredited program of nurse anesthesia who is awaiting certification testing or the results of the certification test and has been granted temporary authorization as a registered nurse anesthetist by the Kansas state board of nursing.

(y) "Registered nurse" means a person who is licensed in Kansas as a registered professional nurse.

(z) "Service" means either of the following:

(1) A functional division of the hospital or of the nursing or medical staff; or

(2) the delivery of care.

(aa) "Supervision" means authoritative procedural guidance provided by a qualified person for the accomplishment of a function or activity within that person's sphere of competence. Supervision shall include initial direction and periodic inspection of the actual act of accomplishing the function or activity.

(bb) "Survey" means the process of evaluation or reevaluation of a hospital's compliance with this article. (Authorized by and implementing K.S.A. 65-431; effective June 28, 1993; amended Feb. 9, 2001; amended Nov. 26, 2001.)

28-34-2. Licensing procedure. (a) Each applicant for an initial license to operate a hospital shall file an application on forms provided by the licensing agency at least 90 days prior to admission of patients. A license previously issued shall be renewed after the licensee has filed an annual report and the licensing agency has approved the same. The licensing agency shall approve the renewal after it has documented that the applicant is in substantial compliance with these regulations. Each application for license renewal shall be filed with the licensing agency at least 90 days before

the expiration date of the current license, and the annual report shall be filed no later than 60 days after the beginning of each calendar year. The annual report may include information relating to:

- (1) Administration and ownership;
 - (2) classification;
 - (3) allocation of beds;
 - (4) special care services;
 - (5) patient statistics;
 - (6) surgical facilities, services and procedures;
 - (7) outpatient and emergency room services;
- and
- (8) staff personnel.

(b) New construction, alterations or renovations that provide space for patient services or patient rooms shall not be used until authorization has been received from the licensing agency. The licensing agency may give such authorization orally or by telephone and shall provide the facility with written confirmation within 30 days.

(c) The license shall authorize a facility to operate only the number and classifications of beds that appear on the previous license application unless additional beds or reclassification of beds have been approved in accordance with K.A.R. 28-34-32a.

(d) If the facility is found to be in violation of any of these regulations, the licensing agency shall notify the applicant in writing of each violation and require that a plan of correction be submitted before a license is issued or renewed. The plan shall state specifically what corrective action will be taken and the date on which it will be accomplished.

(e) If during the term of its current license a facility is surveyed by the joint commission on accreditation of health care organizations (JCAHO) or the American osteopathic association (AOA), the facility shall submit the survey report to the licensing agency toward satisfying the survey requirements for licensure. After reviewing the survey report, the licensing agency may notify the facility that a licensing survey will be conducted.

(f) The licensing agency will document the extent of the facility's compliance with these regulations in at least one of the following ways:

- (1) The statement of a responsible, authorized administrator or staff member;
- (2) documentary evidence of compliance provided by the facility;
- (3) answers by the facility to detailed questions provided by the licensing agency concerning the implementation of any provisions of these reg-

ulations or examples of such implementation which will enable a judgment about compliance to be made;

- (4) on-site observations by surveyors; or
- (5) interviews with patients, employees or other persons or sources capable of providing reliable information. (Authorized by K.S.A. 65-428 and K.S.A. 65-431; implementing K.S.A. 65-428; K.S.A. 65-429 and 65-431; effective Jan. 1, 1969; amended Jan. 1, 1974; amended May 1, 1980; amended June 28, 1993.)

28-34-3. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1969; revoked May 1, 1986.)

28-34-3a. General requirements. (a) Patient limits. The number of patients admitted to any area of the hospital shall not exceed the number for which the area is designed, equipped, and staffed, except in cases of an emergency. In an emergency, patients shall be admitted in accordance with the emergency or disaster plan of the hospital.

(b) Emergency electrical service. Each hospital shall have an emergency source of power to provide electricity during an interruption of the normal electrical supply. The source of this emergency electrical service shall be:

- (1) An emergency generating set when the normal service is supplied by one or more central station transmission lines; or
- (2) An emergency generating set or a central station transmission line when the normal electrical supply is generated on the premises.

(c) Emergency electrical system. The emergency electrical system shall include a life safety branch and a critical branch. The life safety branch shall serve illumination, alarm, and alerting equipment which shall be operable at all times for protection of life during emergencies. The critical branch shall serve lighting and receptacles in critical patient care areas.

(d) Vital statistics. Each hospital shall comply with vital statistics statutes and regulations regarding the completion and filing of birth, death, and fetal death certificates within a specified period of time.

(e) Smoking. Smoking may be permitted only in designated areas. Patients shall have the right to choose to be assigned to a room in which smoking is not permitted. Smoking shall be prohibited in all other areas that are used for patient treatment

or diagnosis. The hospital shall establish written rules regarding smoking within the hospital. Rules shall be posted where they can be observed by the hospital staff and the public. Smoking shall be prohibited in any room or area where flammable liquid, combustible gas, or oxygen is being stored or used and in any other hazardous area of the hospital. Patients classified as not mentally or physically responsible for their actions shall be prohibited from smoking unless constant supervision is provided. The sale of any tobacco products shall be prohibited in any area of the hospital.

(f) Internal disaster plan. The hospital shall establish a workable plan with the nearest fire department for fire fighting service. The hospital shall provide the fire department with a current floor plan of the building. The floor plan shall show the location of fire fighting equipment, exits, patient rooms, places where flammable and explosive gases are stored, and any other information that the fire department requires. The hospital shall also develop an internal disaster and fire plan incorporating evacuation procedures. These plans shall be made available to all personnel and shall be posted throughout the building. Each employee shall participate in the duties delegated to them under the safety program and shall be instructed in the operation of the fire warning system, the proper use of fire fighting equipment, and the procedure to follow in the event that electrical power is impaired.

(g) External disaster plan. The hospital shall establish written plans, based on its capabilities, for the proper and timely care of casualties arising from external disasters. The disaster plan shall be developed in conjunction with other emergency facilities in the community so that adequate logistical provisions are made for the expansion of the activities of the hospital in coordination with the activities of other facilities. The external disaster plan shall be rehearsed at least twice a year, preferably as part of a coordinated drill in which other community emergency service agencies participate. The drills shall involve professional, administrative, nursing, and other hospital personnel. A written report and evaluation of all drills shall be maintained for at least two years. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986.)

28-34-3b. Patient rights. (a) Policies and procedures. The governing body shall ensure that the facility establishes policies and procedures which support the rights of all inpatients

and outpatients. At a minimum, each facility shall ensure that:

(1) Each patient has the right to respectful care given by competent personnel;

(2) each patient has the right, upon request, to be given the name of his attending physician, the names of all other practitioners directly participating in his care and the names and functions of other health care persons having direct contact with the patient;

(3) each patient has the right to make health care decisions. Each patient has the right to the information necessary to make treatment decisions reflecting the patient's wishes and to request a change in his physician or transfer to another health facility due to religious or other reasons;

(4) each patient has the right to accept medical care, to refuse treatment to the extent permitted by state law and to be informed of the medical consequences of refusing treatment;

(5) each patient has the right to formulate advance directives and appoint a surrogate to make health care decisions on the patient's behalf to the extent permitted by law;

(6) each patient has the right to assistance in obtaining consultation with another physician or practitioner at the patient's request and own expense;

(7) each patient has the right to hospital services without discrimination based upon his race, color, religion, sex, national origin or source of payment;

(8) each patient or patient's legally designated representative has access to the information contained in the patient's medical records within the limits of state law;

(9) each patient has the right to examine and receive a detailed explanation of the patient's bill; and

(10) each patient is informed of the facility's policies regarding patient rights during the admission process.

(b) Grievances. The facility's policies and procedures shall establish a mechanism for responding to patient complaints. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-4. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; revoked May 1, 1986.)

28-34-4a. Visitors. (a) Each hospital shall establish visitation policies which are in the interest of the patients. Children under 12 years of age shall not be admitted as visitors to the hospi-

tal except in the company of a responsible adult. Children under six years of age shall be admitted as visitors only when the hospital has a special family visiting program or when authorized in writing by the attending physician, or the chief executive officer of the hospital, or the professional nurse charged with the responsibility for the care of the patient.

(b) Each hospital shall post visiting regulations in a location where they can be easily viewed by the public. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986.)

28-34-5. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-5a. Governing authority. (a) Governing body. Each hospital shall have an organized governing body. The governing body shall be the ultimate authority in the hospital responsible for its organization and administration in a manner which is consistent with appropriate standards of patient care, environmental safety and institutional management.

(b) Bylaws. The governing body shall adopt its own set of bylaws. At a minimum, the bylaws shall contain the following provisions:

- (1) A statement of the mission of the hospital;
- (2) a description of the powers and duties of the governing body, officers and committees and of the responsibilities of the chief executive officer;
- (3) a statement of the qualifications for governing body membership, the procedures for selecting members and the term for members, officers and committee chairpersons;
- (4) a description of the authority delegated to the medical staff;
- (5) a requirement that the governing body review and approve the bylaws of the medical staff organization;
- (6) a requirement that the governing body approve or deny all applications for medical staff membership and for the granting of clinical and admitting privileges; and
- (7) a description of the mechanism by which the governing body bylaws are adopted, reviewed and revised.

(c) Functions. At a minimum, the governing body shall:

- (1) Provide adequate physical resources and personnel for appropriate patient care;
- (2) participate in planning to define and help meet the health needs of the community;

(3) formulate short-term and long-term plans for the development of the hospital;

(4) review the annual audit of the financial operations of the hospital;

(5) maintain effective communication with the medical staff;

(6) require the medical staff to establish controls that are designed to achieve and maintain appropriate standards of ethical professional practice;

(7) establish a structure to effectively fulfill the governing body's responsibilities and to evaluate the implementation of programs and policies;

(8) maintain a written record of governing body proceedings; and

(9) implement and maintain a risk management program in accordance with K.S.A. 65-4291 et seq.

(d) Conflict of interest. Members of the governing body shall not maintain personal or business interests which conflict with those of the hospital to an extent deemed by the governing body to present a threat of injury to or loss of the hospital's reputation, assets or ability to provide patient care. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-6. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-6a. Medical staff. (a) General provision. Each hospital shall maintain an organized medical staff. Admission to the staff and clinical privileges associated with membership shall be granted by the governing authority through a mechanism that evaluates each member's qualifications to engage in that member's area of clinical practice. Admitting privileges may be granted to any practitioner as defined in K.A.R. 28-34-1a(w).

(b) Membership. The medical staff shall be limited to practitioners who have made application in accordance with the bylaws of the medical staff and the governing body. The medical staff shall adopt bylaws that define the requirements for admission to staff membership and for the delineation and retention of clinical and admitting privileges. Each member shall be granted privileges that are commensurate with the member's qualifications, experience, and present capabilities and that are within the member's scope of practice. Although certification, fellowship, membership on a specialty board or society, or the completion of a general practice residency may be considered in determining an individual's qualifications for medical staff membership,

membership decisions shall not be made solely upon any one of these factors.

(c) Medical staff status.

(1) Each hospital shall have an active medical staff to deliver the preponderance of medical services within the hospital. The active medical staff shall have primary responsibility for the organization and administration of the medical staff. Each member of the active medical staff shall be eligible to vote at staff meetings, hold office, and serve on staff committees.

(2) In addition to the active medical staff, the hospital may provide for additional kinds of medical staff privileges. These additional staff categories shall in no way modify the privileges, duties, and responsibilities of the active medical staff. These additional staff categories may be eligible to vote at staff meetings, hold office, and serve on staff committees.

(d) Appointment and reappointment. After considering medical staff recommendations, the governing body shall affirm, deny, or modify each recommendation for appointment to the medical staff and the granting of clinical privileges to any practitioner. Formal application for membership and for the granting of clinical privileges shall follow established procedures set forth in the bylaws, policies, and procedures of the medical staff.

(e) Medical staff bylaws, policies, and procedures. The medical staff shall develop and adopt, subject to the approval of the governing body, a set of bylaws that shall provide for at least the following:

(1) The organizational structure of the medical staff;

(2) qualifications for staff membership and procedures for admission, retention, assignment, and either reduction or withdrawal of privileges;

(3) procedures and standards for the review of staff credentials;

(4) a mechanism for an appeal by a practitioner who receives an unfavorable medical staff recommendation;

(5) delineation of clinical privileges and duties of professional personnel who function in a clinical capacity and who are not members of the medical staff;

(6) methods for the selection of officers and department or service chairpersons and a description of their duties and responsibilities;

(7) the composition and function of standing committees;

(8) requirements regarding the completion of medical records, including a system of disciplinary action for failure to complete the records of discharged patients within 30 days after dismissal or current records within 48 hours of admission;

(9) a mechanism by which the medical staff consults with and reports to the governing body;

(10) medical staff meetings for the purpose of reviewing the performance of the medical staff and each department or service and reports and recommendations of the medical staff and multidisciplinary committees; and

(11) a mechanism for review of medical staff performance that shall include consideration of relevant ethics and statutory codes of conduct.

(f) Medical care review. The medical staff shall develop and implement a system to review medical services rendered, evaluate their quality, and provide an educational program for medical staff members. This system shall include written criteria for the evaluation of medical care that shall cover admission, length of stay, and professional services furnished and shall be conducted on at least a sample basis.

(g) Medical orders.

(1) Medication or treatment shall be administered only upon written and signed orders of a practitioner who is acting within the scope of that practitioner's license and who is qualified according to medical staff bylaws.

(2) A practitioner may give verbal orders, including telephone orders, for medication or treatment to personnel who are qualified according to medical staff bylaws. The person entering these orders into the medical record shall sign and date the entry as soon as possible. These orders shall be authenticated by the prescribing or covering practitioner within 72 hours of the patient's discharge or 30 days, whichever occurs first. (Authorized by and implementing K.S.A. 65-431; effective June 28, 1993; amended Feb. 9, 2001.)

28-34-7. Nursing personnel. (a) There shall be an organized nursing department, including a departmental plan of administrative authority with written delineation of responsibilities and duties of each category of nursing personnel.

(b) All registered nurses employed by the hospital to practice professional nursing shall be licensed in Kansas.

(c) All practical nurses employed by the hospital shall be licensed in Kansas.

(d) There shall be a director of nursing service.

(e) All licensed practical nurses and other ancillary personnel performing patient care services shall be under the supervision of a registered nurse.

(f) There shall be at least one registered nurse on duty in the hospital at all times.

(g) Nursing care policies and procedures shall be in writing and consistent with generally accepted practice and shall be reviewed and revised as necessary.

(h) Private duty nurses shall be licensed in Kansas and shall be subject to the policies, rules, and regulations of the hospital in which they are employed.

(i) Minutes shall be kept of nursing staff meetings. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-8. (Authorized by K.S.A. 1979 Supp. 65-431; effective Jan. 1, 1969; amended May 1, 1980, revoked June 28, 1993.)

28-34-8a. Administrative services. (a) General provisions. There shall be an adequate administrative staff to provide effective management of the hospital.

(b) The chief executive officer. The governing body shall appoint a chief executive officer. The qualifications, responsibilities, duties and authority of the chief executive officer shall be described in a written statement adopted by the governing body. The chief executive officer shall implement the policies established by the governing body for the operation of the hospital and shall act as a liaison between the governing body, the medical staff and the departments of the hospital.

(c) Personnel policies and procedures. The governing body, through the chief executive officer, shall establish and maintain written personnel policies and procedures which adequately support sound patient care. These policies and procedures shall be made available to all employees and shall be reviewed at least every two years. A procedure shall be established for advising employees of policy and procedure changes.

(d) Personnel records. Accurate and complete personnel records shall be maintained for each employee. Personnel records shall contain at least the following information for each employee:

(1) Information regarding the employee's education, training and experience that is sufficient to verify the employee's qualifications for the employee's job. The information shall indicate the employee's professional licensure status;

(2) current information regarding periodic work performance evaluations; and

(3) records of the initial health examination and of subsequent health services and periodic health evaluations.

(e) Education programs. Orientation and inservice training programs shall be provided to allow personnel to improve and maintain skills and to learn of new health care developments.

(f) Personnel health requirements. Upon employment, all hospital personnel shall have a medical examination which shall consist of examinations appropriate to the duties of the employee, including a chest X-ray or tuberculin skin test. Subsequent medical examinations or health assessments shall be given periodically in accordance with hospital policies. Each hospital shall develop policies and procedures for control of communicable disease, including maintenance of immunization histories and the provision of educational materials to the patient care staff. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-9. (Authorized by and implementing SCR 1657; effective May 1, 1982; revoked May 1, 1986.)

28-34-9a. Medical records services. (a) General provisions. Each hospital shall maintain medical records for each patient admitted for care. The records shall be documented and readily retrievable by authorized persons.

(b) Organization and staffing.

(1) Each hospital shall have a medical records service that is directed, staffed, and equipped to enable the accurate processing, indexing, and filing of all medical records. The medical records service shall be under the direction of a person who is a registered health information administrator or a registered health information technician as certified by the American health information management association, or who meets the educational or training requirements for this certification.

(2) If the employment of a full-time registered health information administrator or registered health information technician is impossible, the hospital shall employ a registered records administrator or an accredited records technician on a part-time consultant basis. The consultant shall organize the department, train full-time personnel, and make periodic visits to evaluate the

records. There shall be a written contract between the hospital and the consultant that specifies the consultant's duties and responsibilities.

(3) At least one full-time employee shall provide regular medical records service.

(c) Facilities. The medical records department shall be properly equipped to enable its personnel to function in an effective manner and to maintain medical records so that the records are readily accessible and secure from unauthorized use.

(d) Policies and procedures.

(1) Each medical record shall be kept on file for 10 years after the date of last discharge of the patient or one year beyond the date that the minor patient reached the age of majority, whichever is longer.

(2) If a hospital discontinues operation, the hospital shall inform the licensing agency of the location of its records.

(3) A summary shall be maintained of medical records that are destroyed. This summary shall be retained on file for at least 25 years and shall include the following information:

(A) The name, age, and date of birth of the patient;

(B) the name of the patient's nearest relative;

(C) the name of the attending and consulting practitioners;

(D) any surgical procedure and date, if applicable; and

(E) the final diagnosis.

(4) Medical records may be microfilmed after completion. If the microfilming is done off the premises, the hospital shall take precautions to assure the confidentiality and safekeeping of the records.

(5) Each record shall be treated as confidential. Only persons authorized by the governing body shall have access to the records. These persons shall include individuals designated by the licensing agency for the purpose of verifying compliance with state or federal statutes or regulations and for disease control investigations of public health concern.

(6) Medical records shall be the property of the hospital and shall not be removed from the hospital premises except as authorized by the governing body of the hospital or for purposes of litigation when specifically authorized by Kansas law or appropriate court order.

(e) Contents of medical records. Medical records shall contain sufficient information to identify the patient clearly, to justify the diagnosis

and treatment, and to document the results accurately. At a minimum, each record shall include the following:

(1) Notes by authorized house staff members and individuals who have been granted clinical privileges, consultation reports, nurses' notes, and entries by designated professional personnel;

(2) findings and results of any pathological or clinical laboratory examinations, radiology examinations, medical and surgical treatment, and other diagnostic or therapeutic procedures; and

(3) provisional diagnosis, primary and secondary final diagnosis, a clinical resume, and, if appropriate, necropsy reports.

(f) Each entry in each record shall be dated and authenticated by the person making the entry. Verbal orders, including telephone orders, shall include the date and signature of the person recording them. The prescribing or covering practitioner shall authenticate the order within 72 hours of the patient's discharge or 30 days, whichever occurs first. Records of patients discharged shall be completed within 30 days following discharge. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986; amended June 28, 1993; amended Feb. 9, 2001.)

28-34-10. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1969; amended Jan. 1, 1974; revoked June 28, 1993.)

28-34-10a. Pharmacy services. (a) General provisions. Each hospital shall provide pharmaceutical services which are administered in accordance with accepted ethical and professional practices.

(b) Organization and staffing. The pharmaceutical service shall be directed by a licensed pharmacist. If the hospital has a pharmacy, it shall be directed by a licensed pharmacist. If the hospital does not have a pharmacy or a full-time staff pharmacist, a pharmacist employed on a part-time or consultant basis shall be responsible for control and dispensing of drugs and for operation of the pharmacy or the pharmaceutical functions of nursing stations. In addition to meeting the standards in this regulation, services shall be provided in accordance with K.A.R. 68-7-11 and amendments thereto.

(c) Pharmacy facilities. Each hospital that maintains a pharmacy on its premises shall provide adequate equipment, supplies and facilities for the storage, safeguarding, preparation and dispensing

of drugs. Drugs and biologicals must be kept in locked storage areas. Drugs requiring refrigeration shall be stored in conveniently located refrigerators which shall be used for drug storage only.

(d) Pharmacy and therapeutics committee. Each hospital shall establish a pharmacy and therapeutics committee or its equivalent. The committee shall consist of at least physicians, nurses and pharmacists. This committee shall assist in the formulation of broad professional policies regarding evaluation, appraisal, selection, procurement, storage, distribution and use of drugs and safety procedures and all other matters relating to drugs in the hospital. This committee shall meet at least quarterly, record its proceedings and report to the medical staff.

(e) Policies and procedures. The pharmaceutical service shall develop written policies and procedures. These policies shall be reviewed by the medical staff at least annually and shall be dated to indicate the date of last review. Procedures shall be established for the recording of all drug dispensations or other pharmacy transactions of the pharmacy or nursing stations.

(f) Medications dispensed. The hospital pharmacy shall dispense from a formulary of drugs approved by the medical staff through its appropriate committees. Any drug approved by the food and drug administration for use as an experimental drug may be used in accordance with standards established by the hospital's medical staff.

(g) Commercial pharmaceutical service. Each hospital using an outside pharmacist or pharmaceutical service shall have a contract with that pharmacist or service. As part of the contract, the pharmacist or service shall be required to maintain at least the standards for operation outlined in these regulations. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-11. Laboratory. (a) Definitions.

(1) "CLIA" means Public Law 100-578 implemented by 42 CFR 493 issued Feb. 28, 1992, as in effect on Sept. 1, 1992; changes in subparts H, R and preamble to the Feb. 28, 1992 final rule issued Aug. 11, 1992, as in effect on Sept. 1, 1992; technical corrections made in subparts T, F, A, K, C, Q, M and R issued Jan. 19, 1993, as in effect on Sept. 1, 1992; and changes in subparts M and K issued July 22, 1993, as in effect on Jan. 19, 1993.

(2) "Clinical consultant" means the individual or individuals in the laboratory defined by 42

CFR 493.1417(b), as in effect on Sept. 1, 1992 or 493.1455(b), as in effect on Sept. 1, 1992.

(b) The laboratory or laboratories performing analytical tests within the hospital shall hold a valid CLIA certificate for the type and complexity of all tests performed.

(c) Clinical laboratory services shall be available on the hospital premises or provided by a CLIA certified laboratory.

(d) An "authorized individual" shall, through written or electronic means, request all tests performed by the laboratory. The individual or individuals serving as the laboratory's clinical consultant or consultants, defined by 42 CFR 493.1417(b), as in effect on Sept. 1, 1992 or 493.1455(b), as in effect on Sept. 1, 1992, shall clearly define in writing an "authorized individual."

(e) All tissues removed shall be macroscopically examined. If deemed necessary, by written hospital policies and procedures, tissues shall then be microscopically examined. A list of all tissues which routinely do not require microscopic examination shall be developed in writing by a pathologist and approved by the medical staff of each hospital.

(f) The original report or duplicate copies of written tests reports and supporting records shall be retained in a readily retrievable form by the laboratory for a period of at least:

- (1) two years for routine test reports;
- (2) five years for blood banking test reports; and
- (3) ten years for histologic or cytologic test reports.

(g) Facilities for procurement, safekeeping, and transfusion of blood, blood products or both shall be provided or readily available. If blood products or transfusion services are provided by sources outside the hospital, they shall be provided by a CLIA certified laboratory. The source shall be certified for the scope of testing performed or products provided.

(h) Laboratories shall release all proficiency test results to KDHE within seven days of a written request. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1969; amended Jan. 1, 1974; amended May 3, 1996.)

28-34-12. Radiology department. (a) Facilities for diagnostic radiology shall be available.

(b) Emergency radiological services shall be reasonably available at all times.

(c) The radiology department and all patient services rendered therein shall be under the supervision of a designated medical staff physician;

wherever possible, this physician shall be an attending or consulting radiologist.

(d) The technical personnel working in the department shall be qualified for the type of service performed.

(e) Written medical policies and procedures shall be developed under the direction of the physician responsible for the patient services of the department.

(f) Rooms in which ionizing radiation producing devices or equipment or radioactive materials are to be used or stored shall afford radiation protection in accordance with the Kansas radiation protection regulations and the recommendations of the national council on radiation protection and measurements.

(g) Radioactive materials and ionizing radiation producing devices and equipment shall be procured, stored, used, and disposed of in accordance with the Kansas radiation protection regulations and the license or registration required by the regulations as authorized by K.S.A. 48-1607.

(h) All control devices, switches, and electrical connections for radiological equipment shall conform to the requirements of the national board of fire underwriters.

(i) All X-ray and gamma beam therapy equipment shall be calibrated at least annually by a qualified expert according to definitions and procedures provided by the national council on radiation protection, as amended. All radiation producing equipment, therapeutic or diagnostic, shall be inspected at least every two years by the appropriate state agency. The designated radiation safety officer or physician in charge of the radiology department shall be furnished a signed copy of such inspection reports.

(j) Therapeutic radiation shall be administered to patients only at the direction and under the supervision of a radiologist.

(k) Diagnostic and therapeutic use of radioactive isotopes and radium therapy shall conform to applicable state and federal regulations, and shall be under the supervision of a radiologist or other qualified physician.

(l) The interpretation of all radiological examinations shall be made by physicians.

(m) A written report of the findings and evaluation of each radiological examination performed or course of treatment conducted shall be signed by the physician responsible for the procedure and shall be made a part of the patient's permanent medical record.

(n) Personnel exposure monitoring shall be maintained for each person regularly working in the radiation area. Regular periodic recording of cumulative exposure shall be maintained for each person so monitored, and shall contain at least all of the information required by the Kansas radiation protection regulations for such records. Records shall be retained for the periods of time required by Kansas radiation protection regulations.

(o) No person under 18 years of age shall be permitted to operate radiation producing equipment.

(p) Fluoroscopy shall be conducted by or under the direct supervision of a physician. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-13. Central sterilizing and supply.

(a) Policies and procedures shall be established in writing for storage, maintenance, and distribution of supplies and equipment.

(b) Sterile supplies and equipment shall not be mixed with unsterile supplies, and shall be stored in dust-proof and moisture-free units. They shall be properly labeled.

(c) Sterilizers and autoclaves shall be provided of appropriate type and necessary capacity to adequately sterilize instruments, utensils, dressings, water, operating and delivery room materials, as well as laboratory equipment and supplies. The sterilizers shall have approved control and safety features. The accuracy of instruments shall be checked periodically by an approved method. Adequate surveillance methods for checking sterilization procedures shall be employed.

(d) The date of sterilization or date of expiration shall be marked on all sterile supplies, and unused items shall be resterilized in accordance with written policies. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-14. Dietary department.

(a) The dietary department shall be under the supervision of qualified personnel. A consultant dietitian may supervise the dietary department of a small hospital which does not employ a full-time qualified dietitian; a properly qualified food service supervisor may substitute if a qualified dietitian is not available.

(b) In the absence of a full-time dietitian or food service supervisor, there shall be a cook manager who is responsible for the daily management of the department.

(c) There shall be written policies for food stor-

age, preparation, and service. Policies shall conform to good sanitation practices.

(d) The food and nutritional needs of patients shall be met in accordance with the recommended dietary allowance of the food and nutrition board of the national research council and in accordance with physician's orders.

(e) Regular menus and modifications for basic therapeutic diets shall be written at least one week in advance and posted in the kitchen.

(f) Adequate administrative, working, and storage space and facilities shall be provided. There shall be a separate storage area above floor level for food.

(g) There shall be a dining area appropriate to the needs of the hospital.

(h) Dumb-waiters or other transportation equipment shall not be used to transport simultaneously both clean and unclean dishes. Dumb-waiters and other transportation equipment shall be cleaned and disinfected daily.

(i) Equipment and facilities shall be adequate to allow storage, preparation, cooking, and serving of food and drink to patients, staff, and employees in a proper and sanitary manner. There shall be separate handwashing facilities in the food preparation and service area.

(j) Temperatures in food freezers shall be no higher than 0° Fahrenheit.

(k) Dishes and utensils shall be washed in water at 140° Fahrenheit, and shall be rinsed at 180° Fahrenheit.

(l) Food service personnel shall wear washable garments, hair nets covering all of the hair (for women), clean caps (for men), and shall keep hands and fingernails clean at all times.

(m) Foods being transported shall be protected from contamination and held at proper temperatures in clean containers or serving carts.

(n) All applicable codes and ordinances shall be met.

(o) Storage of toxic agents shall be prohibited in food preparation and food serving areas.

(p) Only grade "A" pasteurized milk shall be used. Milk and fluid milk products shall be served from the distributor's original containers or from a bulk container equipped with an approved dispensing device.

(q) All red meat and poultry shall be state or federally inspected and approved.

(r) Food returned on patient's trays shall not be re-used. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-15. Laundry. (a) The hospital shall make provisions for the proper laundering of linen and washable goods.

(b) When linen is laundered outside of the hospital, the hospital shall be responsible to assure that the requirements of these standards are covered in the terms of the contract or agreement.

(c) Hospital employees involved in transporting, processing, or otherwise handling clean or soiled linen shall be properly trained to ensure patient and employee safety.

(d) No laundry operations shall be carried out in patient care areas, nor in areas where food is prepared, served, or stored.

(e) All soiled linen shall be clearly identified.

(f) Soiled linen from infectious or isolation areas shall be bagged, marked, and laundered separately.

(g) Soiled diapers and nursery linen shall be washed separately.

(h) Soiled linen shall be sorted only in the sorting area.

(i) The washing and rinsing process shall be adequate to provide protection to patients and personnel. The temperature of water during the washing process shall be controlled to provide minimum temperature of 165° Fahrenheit for 25 minutes.

(j) Personnel handling soiled linen shall wash their hands after completing work with soiled linen.

(k) The finished "clean" linen and other washable goods shall be transported to the storage area or nursing units in conveyances used exclusively for "clean" goods.

(l) Clean linen stored in storage areas or on nursing units shall be in closets, shelves, conveyances, or rooms used exclusively for this purpose.

(m) All clean linen being transported shall be protected from contamination.

(n) Adequate space and equipment shall be provided for the laundry operation of the hospital.

(o) Sanitation controls shall be maintained.

(p) Laundry chutes shall be used only for soiled linen that has been properly bagged. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-16. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-16a. Emergency services. (a) Emergency services plans. Each hospital shall maintain a comprehensive, written emergency services plan based on community need and on

the capability of the hospital. This plan shall include procedures whereby an ill or injured person can be addressed and either treated, referred to an appropriate facility or discharged. Regardless of the scope of its services, each hospital shall provide and maintain equipment necessary to institute essential life-saving measures for inpatients and, when referral is indicated, shall arrange for necessary transportation.

(b) Organized emergency services. In hospitals with organized emergency services, the following shall apply.

(1) Emergency services shall be available 24 hours a day, and medical staff coverage shall be adequate so that the patient will be seen within a period of time which is reasonable relative to the severity of the patient's illness or injury.

(2) No patient shall be transferred until the patient has been stabilized. A written statement of the patient's immediate medical problem shall accompany the patient when transferred. Every patient seeking medical care from the emergency services who is not in need of immediate medical care or for whom services cannot be provided by the hospital shall be given information about obtaining medical care.

(3) The emergency service, regardless of its scope, shall be organized and integrated with other departments of the hospital.

(4) The service shall be directed by a physician. The governing body shall adopt a written statement defining the qualifications, duties, and authority of the director. In the absence of a single physician, the direction of emergency medical services may be provided through a multidisciplinary medical staff committee, including at least one physician. The chairperson of this committee shall serve as director.

(5) The emergency nursing service shall be directed and supervised by a registered nurse with training in cardiopulmonary resuscitation. At least one registered nurse with this training shall be available at all times.

(6) The emergency service area shall be located near an outside entrance to the hospital and shall be easily accessible from within the hospital. Suction and oxygen equipment and cardiopulmonary resuscitation units shall be available and ready for use. This equipment shall include equipment used for tracheal intubation, tracheotomy, ventilating bronchoscopy, intra-pleural decompression and intravenous fluid administration. Standard drugs, parental fluids, plasma substitutes and sur-

gical supplies shall be on hand for immediate use in treating life-threatening conditions.

(7) Written policies and procedures which delineate the proper administrative and medical procedures and methods to be followed in providing emergency care shall be established. A medical record shall be kept for each patient receiving emergency services and it shall be made a part of any other patient medical record maintained in accordance with K.A.R. 28-34-9a and amendments thereto.

(c) Cessation of organized emergency services. Any hospital ceasing to provide organized emergency services, at least 30 days prior to such action, or as soon as possible, shall:

(1) Document approval of the governing body of the closure of the organized emergency services;

(2) notify the licensing agency;

(3) place a legal public notice in the local newspaper of such cessation of services; and

(4) notify the Kansas department of transportation and the Kansas board of emergency medical services. (Authorized by and implementing K.S.A. 65-431; effective June 28, 1993.)

28-34-17. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-17a. Anesthesia services. (a) General provisions. Anesthesia care shall be regularly available when the hospital provides surgical or obstetrical services.

(b) Personnel.

(1) The department of anesthesia shall be responsible for all anesthetics administered.

(2) In hospitals where there is no department of anesthesia, the director of surgical services shall assume the responsibility for establishing general policies relating to administration of anesthetics. When there is a department of anesthesia, it shall be directed by a member of the medical staff with appropriate clinical and administrative experience.

(3) The responsibilities of the director shall be established by the governing body and shall include the following:

(A) Establishing criteria and procedures for the evaluation of the quality of all anesthesia care rendered in the hospital;

(B) making recommendations regarding necessary equipment for administering anesthesia and related resuscitation efforts;

(C) developing hospital rules concerning anesthesia safety; and

(D) participating in the hospital's program of cardiopulmonary resuscitation and in consultations regarding management of acute and chronic respiratory insufficiency.

(c) Anesthesia shall be provided only by a qualified individual licensed by the Kansas board of healing arts, the Kansas board of nursing, or the Kansas dental board to administer anesthesia. Anesthesia may also be administered by physicians who are residents in anesthesia or student nurse anesthetists under the supervision of an individual licensed to administer anesthesia.

(d) Policies.

(1) The governing body shall determine the extent of anesthesia services and shall define the degree of collaboration required for the administration of anesthesia. Certified registered nurse anesthetists shall work in an interdependent role with other practitioners.

(2) Each patient requiring anesthesia shall have a pre-anesthesia evaluation by a qualified anesthesia provider regarding the choice of anesthesia.

(3) Each patient's condition shall be reviewed immediately prior to induction. This shall include a review of the patient's medical record with regard to completeness of pertinent laboratory data and an appraisal of any changes in the condition of the patient as compared with that noted on the patient's medical record.

(4) Following the procedure for which anesthesia was administered, the anesthetist or a designee shall remain with the patient as long as required by the patient's condition relative to the patient's anesthesia status and until responsibility for proper patient care has been assumed by other qualified individuals.

(5) A record of events taking place during the induction and maintenance of and emergence from anesthesia, including the dosage and duration of all anesthetic agents, other drugs, intravenous fluids and blood or blood fractions, shall be made.

(e) Safety precautions. The governing body, through the director of anesthesia services, shall adopt rules for safe practice in anesthetizing locations. These rules shall be substantially similar to the requirements prescribed in appendix B of NFPA No. 56A (1973), "standard for the use of inhalation anesthetics," as published by the national fire protection association, Boston, Massachusetts. Separate rules shall be adopted for hospitals having flammable anesthetizing locations, nonflammable anesthetizing locations or mixed flammable

and nonflammable anesthetizing locations. Flammable anesthetizing agents shall include cyclopropane, divinyl ether, ethyl ether, fluroxene, ethyl chloride and ethylene. (Authorized by and implementing K.S.A. 65-431; effective June 28, 1993.)

28-34-17b. Surgical services. (a) General provisions. Surgical services shall be provided in a manner sufficient to meet the medical needs of the patients.

(b) Personnel.

(1) The director of surgical services shall be a qualified member of the medical staff with appropriate surgical and administrative experience.

(2) A roster of medical staff members, with a delineation of the surgical privileges granted to each, shall be maintained in the surgical suite and available to the surgical nurse supervisor.

(3) Surgical suite nursing services shall be under the direction and supervision of a registered nurse who is qualified by training and experience in operating room management and techniques. At least one registered nurse shall be on duty in the recovery room whenever the room is occupied.

(c) Facilities.

(1) Admission of patients, personnel and visitors to the surgical suite shall be controlled in accordance with written policies.

(2) The following equipment shall be immediately available to the surgical suite:

- (A) A call system;
- (B) a cardiac monitor;
- (C) a resuscitator;
- (D) a defibrillator;
- (E) an aspirator;
- (F) a thoracotomy set; and
- (G) a tracheotomy set.

(3) Facilities for blood transfusions shall be available at all times.

(d) Policies. The medical staff shall develop written policies and procedures governing surgical services. These shall include:

(1) Appointment procedures which fairly evaluate the quality and competence of each surgeon seeking appointment to the surgical staff;

(2) reappointment procedures which provide for the periodic reappraisal of the qualifications and competence of each surgeon;

(3) criteria to determine the circumstances which require the presence of an assistant during surgery and to determine whether the assistant should be a physician or professional or nonprofessional personnel;

(4) procedures requiring that preoperative and postoperative medical records are completed in a timely and accurate manner. An accurate and complete description of findings and techniques of operation shall be made within 24 hours after operation by the surgeon who performed the operation; and

(5) procedures requiring that all tissues removed at surgery be examined by a physician whose report shall become a part of the patient's medical record.

(e) Operating room register. An operating room register shall be provided and maintained on a current basis. This register shall contain the date of the operation, the name and number of the patient, the names of surgeons and surgical assistants, the name of the anesthetist, the type of anesthesia given, preoperative and postoperative diagnosis, the type of surgical procedure and the presence or absence of complications in surgery. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-18. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; revoked May 1, 1986.)

28-34-18a. Obstetrical and newborn services. (a) General provisions. If the hospital provides obstetrical and newborn services, they shall be provided in a manner sufficient to meet the medical needs of the patients.

(b) Personnel.

(1) The director of the obstetrical services shall be a member of the medical staff who has experience in obstetrics. The director of the newborn nursery service shall be a member of the medical staff who has experience in pediatrics. The obstetrical and newborn nursing services, including labor, delivery, recovery, and postpartum care, shall be under the supervision of a registered professional nurse qualified by education and experience to provide nursing care to the obstetric and newborn patients.

(2) Personnel qualified to administer inhalation and regional anesthesia shall be readily available. A registered professional nurse shall be available to supervise staff who are monitoring labor, delivery, recovery, and postpartum patients. Labor, delivery, and recovery rooms, when occupied, shall have continuous coverage by nursing staff qualified by education and experience in intrapartum and postdelivery care. The

newborn nursery shall be under the supervision of a registered professional nurse qualified by education and experience in the care of normal and high-risk infants.

(c) Facilities and equipment. The obstetrical and newborn services shall include facilities to provide for labor, delivery, recovery, postpartum, and newborn care in a designated area.

(1) Each labor room shall have access to the following:

- (A) Toilet facilities;
- (B) handwashing facilities in or immediately adjacent to each labor room;
- (C) oxygen and suction equipment;
- (D) a nurse call system;
- (E) an emergency delivery pack;
- (F) resuscitation equipment;
- (G) a fetal monitor;
- (H) intravenous therapy solutions and equipment; and

(I) emergency tray with drugs appropriate to obstetrical emergencies.

(2) Each delivery room shall have access to the following:

- (A) Equipment appropriate for maternal and newborn resuscitation, including suction, airways, endotracheal tubes, and ambubags;
- (B) equipment for administration of inhalation and regional anesthetics;
- (C) a functioning source of emergency electrical power;
- (D) an emergency call or intercommunication system;
- (E) oxygen and suction equipment which can be accurately regulated;
- (F) a fetal monitor;
- (G) supplies and instruments for emergency Cesarean section;
- (H) a scrub sink with foot, knee, or elbow control;

(I) prophylactic solution approved by the licensing agency for instillation into eyes of newborn pursuant to K.S.A. 65-153 and K.A.R. 28-4-73 and any amendments thereto;

(J) a method for identification of the newborn and mother;

(K) a movable, heated bassinet, a bassinet with a radiant warmer, or a transport isolette for the newborn while in the delivery room and during transport from the delivery room; and

(L) a sink with foot, knee, or elbow control.

(3) Each normal or neonatal intensive care nursery shall have access to the following:

(A) A bassinet or isolette for the exclusive use of each infant and for storage of individualized equipment and supplies;

(B) oxygen, oxygen analyzer, and suction equipment which can be accurately regulated;

(C) phototherapy light;

(D) intravenous infusion solutions and equipment. A pump shall also be available;

(E) sink with foot, knee, or elbow control; and

(F) newborn resuscitation equipment.

(d) General requirements.

(1) When an infected patient is delivered in the delivery room, an established infection control protocol shall be followed. An operating room may be used for delivery when the delivery rooms are occupied and for Cesarean sections or obstetrical complications.

(2) Any room may be used as a birthing room when the hospital has a birthing room program that is approved by the licensing agency.

(3) Newborn services shall provide for newborn recovery, observation, and isolation, and for high-risk infants, access to care in a neonatal intensive care nursery either at the hospital of birth or by transfer to a hospital with a neonatal intensive care unit.

(4) All necessary supplies shall be stored in covered containers to permit individualized care.

(e) Procedures and policies. The directors of the obstetrical and newborn services, in cooperation with nursing service, shall develop procedures and policies which shall be available to the medical and nursing staff. Minimal procedures shall include the following:

(1) Oxygen shall be administered only with proper apparatus for its safe administration and control of concentration. Concentrations of oxygen shall not exceed a safe level commensurate with current concepts of oxygen therapy.

(2) Identification shall be attached to the mother and newborn infant before they are removed from the delivery room.

(3) Hospital infection control protocol shall be followed with each patient admitted to the labor and delivery, nursery, or postpartum areas with suspected or confirmed transmissible infection.

(4) Each newborn shall be transported to the mother's room or other units outside the nursery in an individual bassinet.

(5) Each infant shall be tested for phenylketonuria, congenital hypothyroidism, and galactosemia prior to being discharged.

(6) Additional policies shall be adopted concerning, at minimum, the following:

(A) The use of oxytocic drugs and the administration of anesthetics, sedatives, analgesics, and other drugs;

(B) the development of a current roster of physicians with a delineation of their obstetrical privileges. The roster shall be maintained and made available to personnel;

(C) the housing of gynecology patients on the maternity unit;

(D) the presence of fathers or other support persons in the labor, delivery, and birthing rooms;

(E) the protocol for visitors to labor and recovery patients and to the nursery and postpartum units;

(F) attire and handwashing protocols for obstetrical and newborn unit staff and other hospital staff entering these units;

(G) the flow of hospital staff between the obstetric and newborn units and other patient care areas;

(H) the procedure for obtaining blood samples for newborn screening lists, in compliance with K.S.A. 65-180 et seq. and any amendments to it, prior to newborn discharge;

(I) the procedure for reporting to the licensing agency within 48 hours when two or more infants in a nursery demonstrate simultaneous evidence of an infectious disease of a similar nature;

(J) an infection control program for labor, delivery, postpartum, and nursery area which shall include specific procedures for patient isolation and the cleaning, disinfection, and sterilization of patient areas, equipment, and supplies.

(K) arrangements for implementing patient education programs and family-centered care and for promoting parental/sibling/newborn attachment and initiation of breastfeeding;

(L) a system to facilitate coordination of prenatal and postpartum referral and follow up for mothers and newborns at risk and those being discharged less than 24 hours post delivery;

(M) a defined routine for care of obstetrical and newborn patients;

(f) Perinatal Committee. The hospital shall establish an obstetrical and newborn services committee to monitor, evaluate, and recommend the provision of patient services. The committee membership shall include appropriate medical and nursing staff personnel. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986.)

28-34-19. Pediatric department. Hospitals with an organized pediatric department shall provide facilities for the care of children, apart

from the services for adult patients and from the newborn nursery, and there shall be proper facilities and procedures for the isolation of children with infectious, contagious or communicable conditions.

(a) The pediatric department shall be under the supervision of a designated staff physician.

(b) Hospitals providing pediatric care shall be evaluated and approved on the basis of the size of the service, the personnel, facilities, policies, and procedures.

(c) The newborn nursery and the pediatric department shall not be used for boarding care of illegitimate, dependent, neglected, or defective children. If, at the end of the period for which progressive medical care is indicated, the hospital is unable to properly discharge such infants, their presence shall be reported to the division of maternal and child health of the state department of health for suitable action by said department.

(d) Policies shall be established to cover conditions under which parents may stay with small children or "room-in" with their hospitalized child for moral support and assistance with care.

(e) There shall be appropriate referrals to public health nurses or other agencies for follow-up care as needed.

(f) Adolescents shall be separated from younger children. Reasonable privacy, without limiting necessary observation, shall be available for adolescents. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969.)

28-34-20. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked June 28, 1993.)

28-34-20a. Outpatient and short-term procedure services. (a) General provisions. If the hospital provides outpatient services, those services shall be rendered in an effective and timely manner and shall be given only on the order of a physician or practitioner.

(b) Outpatient services.

(1) The director of the outpatient service shall possess qualifications that are consistent with the criteria, authority and duties defined in a written statement adopted by the hospital. The service shall be staffed with sufficient qualified personnel to meet the needs of the patients.

(2) Each outpatient service facility in which patient medical care is delivered shall be designed to ensure the privacy of each patient and the confi-

dentiality of the patient's disclosures. Consultation and examination rooms or cubicles appropriate to the size of the service shall be available for the use of the staff.

(c) Short-term procedure services.

(1) If the hospital maintains a short-term procedure unit for treating patients requiring surgery on an outpatient basis, the unit shall be established and administered according to procedures developed by the medical staff and adopted by the governing body. Provision shall be made for back-up services by other departments in the case of emergencies or complications.

(2) The following basic facilities shall be provided when outpatient surgery is performed:

(A) An appropriately equipped and staffed operating room and postoperative recovery room;

(B) appropriate means of control against the hazards of infection, electrical or mechanical failure, fire or explosions;

(C) facilities for sterilizing equipment and supplies for maintaining sterile techniques;

(D) appropriate equipment and instrumentation for anesthesia, emergency cardiopulmonary resuscitation and other physiologic support;

(E) a readily available oxygen supply with emergency tanks; and

(F) readily available suction equipment.

The operating room shall be located so that it does not directly connect with a corridor used for general through traffic.

(d) Policies and procedures.

(1) Policies and procedures shall be developed to guide personnel in the effective implementation of the objectives of the outpatient services.

(2) Outpatient services shall be provided in accordance with established policies and procedures. In hospitals which do not provide an organized emergency service but provide outpatient services, outpatient services shall be provided during regularly scheduled hours. The hours of operation for the outpatient service shall be posted in the outpatient service waiting area. (Authorized by and implementing K.S.A. 1991 Supp. 65-431; effective June 28, 1993.)

28-34-21. (Authorized by K.S.A. 65-431; effective Jan. 1, 1969; revoked March 23, 2001.)

28-34-22. Physical therapy department.

In hospitals where organized departments of physical therapy are established the following shall apply:

(a) Physical therapy services shall be under the direction of a physician.

(b) At least one registered physical therapist shall be employed for the department. In hospitals where the day-to-day services are provided by a physical therapy assistant or other supportive personnel, a part-time or consulting physical therapist shall be utilized to provide general supervision of the department.

(c) Other professional or supportive personnel shall be included as required to assure adequate patient care. All personnel shall be qualified by training or experience for the services they are rendering.

(d) Policies for the physical therapy department shall be written and shall be reviewed and revised as necessary.

(e) When a patient is referred to the physical therapy department, the treatment to be administered shall be recorded on the patient's chart, including all pertinent details of the treatment procedure.

(f) Records of inpatients and outpatients treated in the physical therapy department shall be maintained. The date of each patient visit shall be recorded as well as modalities employed and the area or areas treated. Patient progress notes shall be maintained.

(g) Facilities, space, and equipment required shall depend upon the physical therapy services provided, but shall be sufficient to assure adequate care. The equipment shall be maintained in proper working condition to assure adequate patient benefit. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1969; amended Jan. 1, 1974.)

28-34-23. Inhalation or respiratory therapy department. In hospitals with an organized inhalation department, the following shall apply:

(a) Inhalation or respiratory therapy services shall be under the guidance of a designated staff physician.

(b) Equipment shall be appropriate for the services provided and shall be checked periodically by the hospital for performance.

(c) The personnel working in the department shall be qualified for the type of services performed.

(d) Supplies shall be kept and stored in a manner that promotes safety in the hospital. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974.)

28-34-24. Social services department. In hospitals with an organized department of social services, the following shall apply:

(a) The department shall be under the guidance of a qualified social worker.

(b) Appropriate facilities and personnel shall be provided in accordance with the hospital's program.

(c) Records shall be kept of the social services provided. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974.)

28-34-25. Occupational therapy department. In hospitals with an organized occupational therapy department, the following shall apply:

(a) The department shall be under the guidance of a qualified occupational therapist.

(b) Facilities and personnel shall be provided commensurate with the hospital's program.

(c) Records shall be kept on the services provided. (Authorized by K.S.A. 65-431; effective Jan. 1, 1974.)

28-34-26 through 28-34-28. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked March 23, 2001.)

28-34-29. (Authorized by and implementing K.S.A. 65-421; effective Jan. 1, 1974; revoked May 1, 1986.)

28-34-29a. Long-term care unit. (a) General provisions. If the hospital provides a long-term care service, such service shall be provided in a manner that meets the medical, rehabilitative, and social needs of the patient.

(b) Scope of services.

(1) The long-term service shall have a written program of restorative nursing care. This program shall be an integral part of nursing services and shall be directed toward assisting the patient to achieve and maintain an optimum level of self-care and independence.

(2) In addition to restorative services, the unit shall provide or arrange for specialized rehabilitation services by qualified personnel as needed by patients to improve and maintain functioning. Services shall include physical therapy, speech pathology, audiology, and occupational therapy and shall be provided by qualified personnel.

(3) A written, overall care plan shall be developed for each long-term care patient from an interdisciplinary assessment of the patient. The interdisciplinary assessment shall consist of med-

ical, nursing, dietary, activities, and psychosocial diagnoses or evaluations.

(c) Medical direction. A member of the medical staff shall be assigned responsibility for the medical direction of the service. The director shall be responsible for the overall coordination of medical care in the unit and shall participate in the development of policies and procedures for patient care, including the delineation of responsibilities of attending physicians.

(d) Nursing services.

(1) The nursing services director shall have the overall responsibility of providing nursing services. The immediate supervisor of nursing personnel assigned to long-term care services shall be a registered nurse employed on the day shift and whose responsibilities shall be limited to the long-term care unit. Licensed nursing personnel shall be in the building at all times to be available as needed to provide services in the long-term care unit.

(2) Nursing personnel shall be assigned duties consistent with their education and experience. Each nurse aide shall be trained and examined in accordance with K.A.R. 28-39-79 and K.A.R. 28-39-80. Each nurse aide trainee who provides direct, individual care to patients shall be under the direct, onsite supervision of a licensed nurse. Each nurse aide trainee shall complete requirements for and obtain certification as a nurse aide within six months of employment.

(3) Each patient shall receive direct, individual patient care at a minimum weekly average of 2.0 hours per 24 hours, and a daily average of not fewer than 1.85 hours during any 24-hour period. Only care provided by personnel exclusively assigned to the long-term care service, including nursing personnel, the activities director, and the social services designee, shall be considered in meeting the care requirements.

(e) Restraints. A signed physician's order shall be required for any restraint. The order shall include justification, type of restraint, and duration of application. A patient shall not be restrained unless, in the written opinion of the attending physician, restraints are required to prevent injury to the patient or to others.

(f) Patient care and hygiene. The long-term care service shall provide supportive services to maintain the patients' comfort and hygiene as follows:

(1) Patients confined to bed shall receive a complete bath every other day or more often as needed.

(2) Incontinent patients shall be checked at least every two hours and shall be given partial

baths and clean linens promptly when the bed or clothing is soiled.

(3) Pads shall be used to keep the patients dry and comfortable.

(4) Rubber, plastic, or other types of protectors shall be kept clean, completely covered, and not in direct contact with the patients.

(5) Soiled linen and clothing shall be removed immediately from the patients' rooms to prevent odors.

(6) Fresh water shall be available for each patient. For each non-ambulatory patient, fresh water or other fluids shall be available at the bedside at all times unless fluids are restricted by physician's order.

(7) Each patient shall be assisted with oral hygiene to keep mouth, teeth, or dentures clean. Measures shall be taken to prevent dry, cracked lips.

(8) A written, ongoing program for skin care shall be implemented as follows:

(A) Bony prominences and weight-bearing parts, such as heels, elbows, and back, shall be bathed and given care frequently to prevent discomfort and the development of pressure sores.

(B) Treatment for pressure sores shall be given according to written physician's orders.

(C) The position of each patient confined to bed shall be changed at least every two hours during the day and night.

(D) Each patient shall be positioned in good body alignment.

(E) Precautions shall be taken to prevent foot drop in bed patients.

(g) Restorative nursing care. Each nursing personnel shall receive regular staff development training sessions in restorative techniques. Documentation of such training shall be maintained.

(h) Specialized rehabilitative services.

(1) Rehabilitation needs shall be met either through services provided directly by the hospital or through arrangements with qualified outside resources.

(2) Commensurate with the services offered, adequate space and equipment shall be available.

(3) Each rehabilitative service performed shall be recorded in the patient's record and shall be signed and dated by the person providing the service.

(4) Written policies and procedures shall be developed for specialized rehabilitative services with input from qualified therapists and representatives of the medical, administrative, and nursing staffs.

(5) A written plan of care, initiated by the attending physician and developed in consultation

with the therapist or therapists involved and with nursing services, shall be developed for each patient receiving rehabilitative services. A report of the patient's progress shall be communicated to the attending physician within two weeks of the initiation of the service. Thereafter, the patient's progress shall be reviewed and revised on not less than a quarterly basis.

(i) Social services. The long-term care service shall have methods for identifying the medically-related, psychosocial needs of each patient. Needs shall be met by qualified staff of the hospital or by referral to an outside resource through established procedures. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986.)

28-34-30. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked March 23, 2001.)

28-34-31. General sanitation and house-keeping. (a) Hospitals shall comply with applicable codes.

(b) Suitable equipment shall be provided for the regular cleaning of all interior surfaces. Operating and delivery rooms shall be thoroughly cleaned after each operation or delivery. Patient rooms shall be thoroughly cleaned after discharge. No wax shall be applied to conductive floors which will render them nonconductive. Adequate and conveniently located spaces shall be provided for the storage of janitorial supplies and equipment.

(c) The premises shall be kept neat, clean, and free of rubbish.

(d) Housekeeping procedures shall be written.

(e) All garbage and waste shall be collected, stored, and disposed of in a manner that will not encourage the transmission of contagious disease. Containers shall be washed and sanitized before being returned to work areas or shall be disposable.

(f) All openings to the outer air shall be effectively protected against the entrance of insects and other animals by self-closing doors, closed windows, screening, controlled air currents, or other effective means. Screening material shall not be less than 16 mesh to the inch or equivalent.

(g) A sufficient supply of cloth or disposable towels shall be available so that a fresh towel can be used after every handwashing. Common towels are prohibited.

(h) There shall be adequate handwashing facilities conveniently located.

(i) Common drinking cups shall be prohibited.

(j) Dry sweeping and dusting shall be prohibited. Use of a rotary buffer shall be prohibited in areas such as isolation to aid in reducing the spread of pathogenic bacteria.

(k) Adequate and conveniently located toilet facilities shall be provided.

(l) Periodic checks shall be made throughout the buildings and premises to enforce sanitation procedures. The times and results of such checks shall be recorded. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974.)

28-34-32. (Authorized by and implementing K.S.A. 65-421; effective Jan. 1, 1974; revoked May 1, 1986.)

28-34-32a. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986; revoked June 28, 1993.)

28-34-32b. Construction standards. (a) General provisions. All hospital construction, including new buildings and additions or alterations to existing buildings, shall be in accordance with the standards set forth in the American institute of architects academy of architecture for health, publication no. ISBN 1-55835-151-5, entitled "1996-97 guidelines for design and construction of hospital and health care facilities," copyrighted in 1996, and hereby adopted by reference.

(b) Construction plans and specifications.

(1) Plans and specifications for each new hospital and each alteration and addition to any existing hospital, other than minor alterations, shall be prepared by an architect licensed in Kansas. "Minor alterations" means those projects that meet the following conditions:

(A) Do not affect the structural integrity of the building;

(B) do not change functional operation;

(C) do not affect fire safety; and

(D) do not add beds or facilities over those for which the hospital is licensed.

(2) The preliminary plan, plans and specifications at the outline specification stage, and plans and specifications at the contract document stage shall be made available to the licensing agency upon request.

(3) The preliminary plans shall include the following:

(A) Sketch plans of the basement, each floor, and the roof, indicating the space assignment, size, and outline of fixed equipment;

(B) all elevations and typical sections;

(C) a plot plan showing roads and parking facilities; and

(D) areas and bed capacities by floors.

(4) The outline specifications shall consist of a general description of the construction, air conditioning, heating, and ventilation systems.

(5) Contract documents shall consist of working drawings that are complete and adequate for bidding, contract, and construction purposes. Specifications shall supplement the drawings to fully describe the types, sizes, capacities, workmanship, finishes, and other characteristics of all materials and equipment. Before commencing construction, the architect shall certify, in writing, to the agency that the contract documents are in compliance with subsections (a), (b), and (c) of this regulation. The written certification shall also include the following:

(A) The name of the facility;

(B) a narrative description of extent of the project;

(C) the physical location of the project;

(D) any change in room numbers and bed assignments; and

(E) the expected completion date of the project to the licensing agency, which shall be provided at least 30 days before the project completion date.

(c) The administrator of the facility shall notify the state fire marshal's office of all hospital construction, alterations, or additions at the preliminary planning stage.

(d) Access. Representatives of the licensing agency shall, at all reasonable times, have access to work in preparation or progress, and the contractor shall provide proper facilities for the access and inspection. A complete set of plans and specifications shall be available on the job site for use by licensing agency personnel. (Authorized by and implementing K.S.A. 65-431; effective June 28, 1993; amended Feb. 9, 2001.)

PART 2. AMBULATORY SURGICAL CENTERS

28-34-50. Definitions. (a) "Administrator" means an individual appointed by the governing body to act on its behalf in the overall management of the ambulatory surgical center.

(b) "Ambulatory surgical center" means an establishment with the following:

(1) An organized medical staff of one or more physicians;

(2) permanent facilities that are equipped and operated primarily for the purpose of performing surgical procedures and do not provide services or other accommodations for patients to stay more than 24 hours;

(3) continuous physician services during surgical procedures and until the patient has recovered from the obvious effects of anesthesia, and at all other times with continuous physician services available whenever a patient is in the facility; and

(4) continuous registered professional nursing services whenever a patient is in the facility.

Before discharge from an ambulatory surgical center, each patient shall be evaluated by a physician for proper anesthesia recovery. Nothing in this regulation shall be construed to require the office of a physician or physicians to be licensed under this act as an ambulatory surgical center.

(c) "Anesthesiologist" means a physician who is licensed in Kansas to practice medicine and surgery and who has successfully completed a post-graduate medical education program and training program in anesthesiology.

(d) "Change of ownership" means any transaction that results in a change of control over the capital assets of an ambulatory surgical center.

(e) "Clinical laboratory improvement amendments" or "CLIA" is as published in 42 C.F.R. Part 493, as in effect on October 1, 1996 and hereby adopted by reference.

(f) "Dentist" means a person licensed in Kansas to practice dentistry.

(g) "Drug administration" means the direct application of a drug or biological, either by injection, inhalation, ingestion, or any other means, to the body of a patient by one of the following:

(1) A practitioner or individual pursuant to the lawful direction of a practitioner who is acting within the scope of that practitioner's license and who is qualified according to medical staff bylaws; or

(2) the patient at the direction and in the presence of a practitioner.

(h) "Drug dispensing" means delivering prescription medication to the patient pursuant to the lawful order of a practitioner.

(i) "Facilities" means buildings, equipment, and supplies necessary for delivery of ambulatory surgical center services.

(j) "Governing authority" means a board of directors, governing body, or individual in whom the ultimate authority and responsibility for management of the ambulatory surgical center is vested.

(k) "Licensing department" means the Kansas department of health and environment.

(l) "Licensed practical nurse (L.P.N.)" means an individual licensed in Kansas as a licensed practical nurse.

(m) “Medical staff” means a formal organization of physicians, dentists, and other practitioners who are appointed by the governing authority to attend patients within the ambulatory surgical center. Surgical procedures shall be performed only by practitioners within the scope of their practice who at the time are privileged to perform these procedures in at least one licensed hospital in the community in which the ambulatory surgical center is located, or the ambulatory surgical center shall have a written transfer agreement with the hospital.

(n) “Nursing services” means patient care services pertaining to the curative, restorative, and preventive aspects of nursing that are performed or supervised by a registered nurse pursuant to the medical care plan of the practitioner and the nursing care plan.

(o) “Organized” means administratively and functionally structured.

(p) “Organized medical staff” means a formal organization of physicians, dentists, and practitioners with the responsibility and authority to maintain proper standards of patient care as delegated by the governing authority.

(q) “Patient” means a person admitted to the ambulatory surgical center by and upon the order of a physician, or by a dentist in accordance with the orders of a physician who is a member of the medical staff.

(r) “Physician” means a person holding a valid license from the Kansas state board of healing arts to practice medicine and surgery.

(s) “Podiatrist” means a person holding a valid license from the Kansas state board of healing arts to practice podiatric medicine and surgery.

(t) “Practitioner” means a member of the ambulatory surgical center’s medical staff and may include a physician or dentist.

(u) “Qualified nurse anesthetist” means any of the following:

(1) A registered nurse who has been certified as a nurse anesthetist by the council on certification of the American association of nurse anesthetists and has been authorized as a registered nurse anesthetist by the Kansas state board of nursing;

(2) a student enrolled in a program of nurse anesthesia by the council on accreditation of the American association of nurse anesthetists; or

(3) a graduate of an accredited program of nurse anesthesia who is awaiting certification testing or the results of the certification test and has been granted temporary authorization as a regis-

tered nurse anesthetist by the Kansas state board of nursing.

(v) “Registered nurse (R.N.)” means a person who is licensed in Kansas as a registered professional nurse.

(w) “Supervision” means authoritative procedural guidance by a qualified person for the accomplishment of a function or activity within that person’s sphere of competence. Supervision shall include initial direction and periodic inspection of the actual act of accomplishing the function or activity.

(x) “Survey” means the process of evaluation or reevaluation of an ambulatory surgical center’s compliance with this article. (Authorized by and implementing K.S.A. 2000 Supp. 65-429 and K.S.A. 65-431; effective Jan. 1, 1974; amended April 20, 2001.)

28-34-51. Licensing procedure. (a) No construction shall begin until plans and specifications covering the construction of new buildings, additions, or material alterations to existing buildings are submitted to the department, in writing, in accordance with K.A.R. 28-34-62a. A written narrative describing the intended use of the proposed construction shall accompany the plans and specifications.

(b) Ambulatory surgical centers shall be licensed to provide only those services for which they are qualified. The extent of the facility’s compliance with this article may be documented by the department in one of the following ways:

(1) The statement of a responsible, authorized administrator or staff member, which shall include one of the following:

(A) Documentary evidence of compliance provided by the facility; or

(B) answers by the facility to detailed questions provided by the licensing department concerning the implementation of any provisions of this article or examples of this implementation that allow a judgement about compliance to be made; or

(2) on-site observations by surveyors.

(c) The application for a license to establish or maintain an ambulatory surgical center shall be submitted to the licensing department. Each application shall be made in writing on forms provided by the department for a license for a new facility or for the renewal of a license for an existing facility. Applications for a license for each new facility shall be submitted at least 90 days before opening.

(d) Upon application for a license from a facility never before licensed, an inspection shall be made by the representative of the licensing department. Every building, institution, or establishment for which a license has been issued shall be periodically surveyed for compliance with the regulations of the licensing department.

(e) A license shall be issued by the department when both the following requirements are met:

(1) Construction is complete.

(2) The facility has completed an application form and is found to be in substantial compliance with K.S.A. 65-425 et seq., and amendments thereto, and K.A.R. 28-34-51 through K.A.R. 28-34-62a.

(f) If the facility is found to be in violation of this article, the applicant shall be notified in writing of each violation, and the applicant shall submit a plan of correction to the department. The plan shall state specifically what corrective action will be taken and the date on which it will be accomplished.

(g) Each licensee shall file an annual report on forms prescribed by the department. The license may be suspended or revoked at any time for noncompliance with this article of the licensing department and in accordance with the Kansas administrative procedure act, K.S.A. 77-501 et seq., and amendments thereto.

(h) The licensing department shall be notified within 60 days of any change in ownership or location of an ambulatory surgical center, and a new application form shall be submitted to the licensing department in the event of such a change.

(i) Within 60 days of issuance of an initial license, or following a change of ownership, the administrator shall submit the following information to the licensing department:

(1) Verification of professional liability coverage for the ambulatory surgical center in compliance with K.S.A. 40-3401 et seq., and amendments thereto; and

(2) a risk management plan in compliance with K.A.R. 28-52-1.

(j) The current license certificate issued by the licensing department shall be framed and conspicuously posted on the premises. The license certificate shall remain the property of the licensing department. (Authorized by and implementing K.S.A. 2000 Supp. 65-429 and K.S.A. 65-431; effective Jan. 1, 1974; amended April 20, 2001.)

28-34-52. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-52a. Patient rights. (a) The governing authority shall ensure that the facility establishes policies and procedures that support the rights of all patients. At a minimum, each facility shall ensure that each patient has a right to the following:

(1) Receive respectful care given from competent personnel;

(2) receive information of the proposed treatment or procedures to be performed, potential complications, and expected outcomes;

(3) make health care decisions;

(4) access information contained in the patient's medical record, within the limits of state law, by each patient or patient's designated representative;

(5) maintain privacy and security of self and belongings during the delivery of patient care service;

(6) be informed of expected services and financial charges and receive an explanation of the patient's bill; and

(7) be informed of the facility's policies regarding patient rights.

(b) Grievances and complaints. The facility's policies and procedures shall establish a mechanism for responding to patient grievances and complaints.

(c) Reporting of grievances or complaints. Each person having a grievance or complaint pertaining to the provision of any patient services in an ambulatory surgical center may direct the grievance or complaint to the licensing department.

(d) Reporting of abuse, neglect, or exploitation.

(1) Each administrator of an ambulatory surgical center shall be responsible for reporting any incidents of abuse, neglect, or exploitation of any patient, in accordance with K.S.A. 39-1401 et seq., and amendments thereto.

(2) Each administrator of an ambulatory surgical center shall be responsible for reporting any incidents of abuse or neglect of children in accordance with K.S.A. 38-1521 et seq., and amendments thereto. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-52b. Assessment and care of patients. (a) Each patient admitted to the ambulatory surgical center shall be under the care of a practitioner who is a member of the medical staff.

(b) Patient care shall meet the needs of the patient and shall be provided by qualified personnel.

(c) An initial assessment of each patient shall be completed by qualified staff. The assessment shall include the following information:

- (1) The patient's current physical status;
 - (2) a history and physical completed within 30 days before any procedure performed at the ambulatory surgical facility;
 - (3) the results of clinical laboratory tests or diagnostic reports;
 - (4) a preanesthesia evaluation conducted by a licensed, qualified practitioner granted clinical privileges by the medical staff and governing body; and
 - (5) the patient's nutritional status.
- (d) Each patient's identity shall be verified before the administration of any medication.
- (e) Blood and blood products may be administered only by a physician or a registered nurse.
- (f) Each patient's status shall be evaluated during anesthesia administration and shall be evaluated by a physician for proper anesthesia recovery before discharge.
- (g) The ambulatory surgical center shall have a written transfer agreement with a local hospital for the immediate transfer of any patient requiring medical care beyond the capability of the ambulatory surgical center, or each physician performing surgery at the ambulatory surgical center shall have admitting privileges with a local hospital.
- (h) If a patient is transferred to another facility, essential medical information, including the diagnosis, shall be forwarded with the patient to ensure continuity of care.
- (i) Each patient shall be discharged in the company of a responsible adult, unless this requirement is specifically waived by the attending physician.
- (j) Discharge planning shall include education for each patient and caregiver. The patient education shall be interdisciplinary and include at least the following information:
- (1) The patient's medical condition;
 - (2) the procedure and outcome of procedures performed;
 - (3) the need and availability of follow-up care; and
 - (4) the use of prescribed medication and medical equipment. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-53. Governing authority. (a) The governing authority shall be the ultimate authority in the ambulatory surgical center, responsible

for its organization and administration, including appointment of the medical staff, employment of an administrator, review and revision of policies and procedures, and maintenance of a physical plant equipped and staffed to adequately meet the needs of the patients.

(b) The governing authority shall be organized in accordance with its approved bylaws, policies, and procedures and shall be in conformance with the Kansas statutes governing ambulatory surgical centers. A copy of the ambulatory surgical center's current bylaws shall be available for review by the licensing department.

(c) Bylaws of the governing authority shall provide for the selection and appointment of medical staff members based on defined criteria and in accordance with an established procedure for processing and evaluating applications for memberships. Each application for appointment and reappointment shall be submitted in writing and shall signify agreement of the applicant to conform with the bylaws of both the governing authority and medical staff and to abide by professional ethical standards.

(d) The governing authority shall demonstrate evidence of a liaison and close working relationship with the medical staff.

(e) The governing authority shall be responsible for the implementation of a risk management program, in accordance with K.S.A. 65-4921 et seq. and amendments thereto, and K.A.R. 28-52-1 through 28-52-4.

(f) The governing authority shall select and employ an administrator and shall notify the department of any change of administrator within five days after the change has been made.

(g) Each patient admitted to the ambulatory surgical center shall be under the care of a practitioner who is a member of the medical staff.

(h) The governing authority shall ensure that the ambulatory surgical center complies with the following:

- (1) Defines, in writing, the scope of services provided;
- (2) has an adequate number of qualified personnel; and
- (3) maintains effective quality control, quality improvement, and data management activities. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; amended April 20, 2001.)

28-34-54. Medical staff. (a) The ambulatory surgical center shall have an organized medical

staff, responsible to the governing authority of the ambulatory surgical center for the quality of all medical care provided to patients in the ambulatory surgical center and for the ethical and professional practices of its members.

(b) In each ambulatory surgical center, the medical staff, with the approval of and subject to final action by the governing authority, shall formulate and approve medical staff bylaws, policies, and procedures for the proper conduct of its activities and recommend to the governing authority practitioners considered eligible for membership on the medical staff, in accordance with K.A.R. 28-34-50(u).

(c) Each member of the medical staff shall be granted privileges that are commensurate with the member's qualifications, experience, and present capabilities and that are within the practitioner's scope of practice.

(d) Each member of the medical staff shall submit a written application for staff membership on a form prescribed by the governing authority. After considering medical staff recommendations, the governing authority shall affirm, deny, or modify each recommendation for appointment to the medical staff.

(e) Surgical procedures shall be performed only by practitioners who have been granted privileges by the governing authority to perform surgical procedures.

(f) The medical staff of each ambulatory surgical center shall develop a policy stipulating which surgically removed tissues will be sent to a pathologist for review. This policy shall be approved by the governing authority.

(g) The medical staff bylaws shall require at least one physician member of the medical staff to be available to the ambulatory surgical center at all times that a patient is receiving or recovering from local, general, or intravenous sedation. The staffing shall meet the needs of the patients.

(h) The medical staff shall hold regular meetings for which records of attendance and minutes shall be kept.

(i) Medical staff committee minutes and information shall neither be a part of individual patient records nor be subject to review by other than medical staff members, except as otherwise provided by the governing authority.

(j) The medical staff shall review and analyze at regular intervals the clinical experience of its members and the medical records of patients on a sampling or other basis. All techniques and pro-

cedures involving the diagnosis and treatment of patients shall be reviewed periodically and shall be subject to change by the medical staff.

(k) The medical staff shall participate in risk management activities, in accordance with K.S.A. 65-4921 et seq., and amendments thereto, and K.A.R. 28-52-1 through 28-52-4, and with the ambulatory surgical center's risk management plan. Any ambulatory surgical center having a medical staff with fewer than two physician members shall include provisions for outside peer review in the risk management plan.

(l) All medical orders shall be given by a practitioner and recorded in accordance with the medical staff policies and procedures. All orders shall be signed or either countersigned or initialed by the attending physician, dentist, or podiatrist.

(m) The medical staff and the governing authority shall review the medical staff privileges at least every two years. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; amended April 20, 2001.)

28-34-55. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-55a. Human resources. (a) The ambulatory surgical center shall provide an adequate number of qualified staff to meet the needs of the patients.

(b) All nursing and ancillary staff employed by or contracted with the ambulatory surgical center shall be qualified and shall provide services consistent with the scope of practice granted by the license, registration, or certification regulations.

(c) One registered nurse shall be on duty at all times whenever a patient is in the ambulatory surgical center.

(d) The ambulatory surgical center shall provide all nursing and ancillary staff services in accordance with written policies and procedures consistent with professional practice standards and reviewed and revised, as necessary.

(e) The governing authority shall ensure that all employees are provided information related to the reporting of reportable incidents in accordance with the ambulatory surgical center's risk management plan.

(f) The governing authority shall ensure that ongoing staff education and training are provided to continually improve patient care services.

(g) The ambulatory surgical center shall main-

tain personnel records on each employee that shall include the job application, professional and credentialing information, health information, and annual performance evaluations. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-56. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-56a. Anesthesia services. (a) If there is a department of anesthesia, it shall be directed by a member of the medical staff with appropriate clinical and administrative experience. The clinical privileges of qualified anesthesia personnel shall be reviewed by the director of anesthesia services and the medical staff and approved by the governing authority.

(b)(1) An anesthesiologist or physician shall be on the premises and readily accessible during the administration of anesthetics, whether local, general, or intravenous, and the postanesthesia recovery period until all patients are alert or medically discharged from the postanesthesia area. Qualified anesthesia personnel shall be present in the room through the administration of all general anesthetics, regional anesthetics, and monitored anesthesia care and shall continuously evaluate the patient's oxygenation, ventilation, circulation, and temperature.

(2) The following equipment shall be available as the scope of practice requires:

(A) Oxygen analyzers;

(B) a pulse oximeter; and

(C) electrocardiography, blood pressure, resuscitation, and suction equipment.

(c) The medical staff, in consultation with qualified anesthesia personnel, shall develop policies and procedures on the administration of anesthetics and drugs that produce conscious and deep sedation and on postanesthesia care. These policies and procedures shall be approved by the governing authority.

(d) Before undergoing general anesthesia, each patient shall have a history and physical examination by a physician entered in the patient's record, including the results of any necessary laboratory examination. A physician shall examine the patient immediately before surgery and shall evaluate the risk of anesthesia and of the procedure to be performed.

(e) The anesthesiologist or anesthesiologist shall dis-

cuss anesthesia options and risks with the patient or family before surgery.

(f) Qualified anesthesia personnel shall develop a plan of anesthesia care with the physician or dentist. The patient records shall contain a preanesthetic evaluation and a postanesthetic note by qualified anesthesia personnel. Anesthesia services shall write postanesthetic policies and procedures. Follow-up notes shall include postoperative abnormalities or complications.

(g) Flammable anesthetics shall not be used in the ambulatory surgical center.

(h) Anesthesia shall be provided only by a qualified individual licensed to administer anesthesia by the Kansas board of healing arts, the Kansas board of nursing, or the Kansas dental board. Each certified registered nurse anesthetist shall work in an interdependent role as a member of a physician- or dentist-directed health care team.

(i) All anesthetics shall be properly labeled and inventoried according to the facility's policies and procedures.

(j) All equipment for the administration of anesthetics shall be made available, cleaned with a facility-approved disinfectant and clean cloth, and maintained in good working condition.

(k) Written procedures and criteria for discharge from the recovery service shall be approved by the medical staff. Each patient who has received anesthesia shall be discharged in the company of a responsible adult, unless the requirement is specifically waived by the attending physician.

(l) There shall be a mechanism for the review and evaluation, according to the facility's policies and procedures, of the quality and scope of anesthesia services. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-57. Medical records. (a) A medical record shall be maintained for each patient cared for in the ambulatory surgical center. The records shall be documented and retrievable by authorized persons.

(b) Each medical record shall be the property of the ambulatory surgical center. Only persons authorized by the governing authority shall have access to medical records. These persons shall include individuals designated by the licensing department for verifying compliance with the state or federal regulations, and for disease control investigations of public health concern.

(c) Each medical record shall be maintained in

a retrievable form for 10 years after the date of last discharge of the patient, or one year after the date that the minor patient reaches the age of 18, whichever is greater.

(d) Each medical record shall contain the following information, if applicable:

- (1) Patient identification data;
- (2) patient consent forms;
- (3) patient history and physical;
- (4) clinical laboratory reports;
- (5) physician's or physicians' orders;
- (6) radiological reports;
- (7) consultations;
- (8) anesthesia records;
- (9) surgical reports;
- (10) tissue reports;
- (11) progress notes;
- (12) a description of the care given to that patient based on the type of surgical procedure;
- (13) the signature or initials of authorized personnel on notes or observations;
- (14) the final diagnosis;
- (15) the discharge summary;
- (16) discharge instructions to the patient;
- (17) a copy of transfer form; and
- (18) the autopsy findings.

(e) Each record shall be dated and authenticated by the person making the entry. Nursing notes and observations shall be signed and dated by the registered nurse or licensed practical nurse making the entry. Verbal orders by authorized individuals shall be accepted and transcribed only by designated personnel.

(f) The ambulatory surgical center shall furnish, to the appropriate authority, all available information on deceased patients for completion of a death certificate.

(g) The medical record shall be completed within 30 days following the patient's discharge.

(h) Statistical data, administrative records, and records of reportable diseases as required shall be maintained and submitted by the ambulatory surgical center to the licensing department, as requested.

(i) Adequate space, facilities, and equipment shall be provided for completion and storage of medical records.

(j) Nothing in this article shall be construed to prohibit the use of properly automated medical records or use of other automated techniques, if these regulations are met. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; amended April 20, 2001.)

28-34-58. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-58a. Infection control. (a) Each ambulatory surgical center shall establish and maintain an ongoing infection control program. The program shall be based upon guidelines established by the centers for disease control and the licensing department. The program shall include the following:

(1) Measures for the surveillance, prevention, and control of infections;

(2) the assignment of the primary responsibility for the program, as well as medical staff participation and review of findings, to an individual;

(3) written policies and procedures outlining infection control measures and aseptic techniques;

(4) orientation and ongoing education provided to all personnel on the cause, effect, transmission, and prevention of infections;

(5) policies and procedures that require all employees to adhere to universal precautions to prevent the spread of blood-borne infectious diseases;

(6) policies and procedures related to employee's health;

(7) review and evaluation, according to the facility's policies and procedures, of the quality and effectiveness of infection control throughout the ambulatory surgical center; and

(8) provisions for reporting, to the licensing department, infectious or contagious diseases in accordance with K.A.R. 28-1-2.

(b) Personnel health requirements. Upon employment, each individual shall have a medical examination consisting of examinations appropriate to the duties of the employee, including a tuberculin skin test. Subsequent medical examinations or health assessments shall be given periodically in accordance with the facility's policies. Each ambulatory surgical center shall develop policies and procedures for the control of communicable diseases, including maintenance of immunization histories and the provision of educational materials for patient care staff. Cases of employees with tuberculin skin test conversion shall be reported to the Kansas department of health and environment.

(c) Any personnel having a condition detrimental to patient well-being, or suspected of having such a condition, shall be excluded from work until the requirements of K.A.R. 28-1-6 are met.

(d) Sanitation and housekeeping. Each ambulatory surgical center shall comply with the following procedures:

- (1) Be kept neat, clean, and free of rubbish;
- (2) develop written housekeeping procedures;
- (3) provide hand-washing facilities; and
- (4) develop written procedures for the laundering of linen and washable goods.

(e) Soiled and clean linen shall be handled and stored separately.

(f) All garbage and waste shall be collected, stored, and disposed of in a manner that does not encourage the transmission of contagious disease. Containers shall be washed and sanitized before being returned to work areas, or the containers may be disposable.

(g) Staff shall make periodic checks, according to the facility's policies and procedures, throughout the premises to enforce sanitation procedures.

(h) Sterilizing supplies and equipment. The governing authority shall establish written policies and procedures for the storage, maintenance, and distribution of supplies and equipment.

(1) Sterile supplies and equipment shall not be mixed with unsterile supplies and shall be stored in dustproof and moisture-free units. These sterile units shall be labeled.

(2) Sterilizers and autoclaves shall be provided, of the appropriate type and necessary capacity, to sterilize instruments, utensils, dressings, water, and operating and delivery room materials, as well as laboratory equipment and supplies. The sterilizers shall have approved control and safety features. The accuracy of instruments shall be checked, and surveillance methods, according to the facility's policies and procedures, for checking sterilization procedures shall be employed.

(3) The date of sterilization or date of expiration shall be marked on all sterile supplies, and unused items shall be resterilized in accordance with written policies. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-59. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-59a. Ancillary services. (a) The ambulatory surgical center shall provide, either directly or through agreement, laboratory, radiology, and pharmacy services to meet the needs of the patients.

(b) Laboratory services. If the ambulatory sur-

gical center provides its own clinical laboratory services, the following criteria shall be met:

(1) The laboratory performing analytical tests within the ambulatory surgical center shall hold a valid CLIA certificate for the type and complexity of all tests performed.

(2) An authorized individual shall, through written or electronic means, request all tests performed by the laboratory. The individual or individuals serving as the laboratory's clinical consultant or consultants shall be as defined in 42 C.F.R. 493.1417(b), as in effect on October 1, 1996 and hereby adopted by reference.

(3) The original report or duplicate copies of written tests, reports, and supporting records shall be retained in a retrievable form by the laboratory for at least the following periods:

- (A) Two years for routine test reports;
- (B) five years for blood banking test reports; and
- (C) 10 years for histologic or cytologic test reports.

(4) Facilities for procurement, safekeeping, and transfusion of blood, blood products, or both shall be provided or available. If blood products or transfusion services are provided by sources outside the ambulatory surgical center, outside sources shall be provided by a CLIA-certified laboratory. The source shall be certified for the scope of testing performed or products provided.

(c) If the ambulatory surgical center contracts for laboratory services, the center shall have a written agreement with that CLIA-certified laboratory.

(d) Radiology services. If the ambulatory surgical center provides its own radiology services, the services shall meet the requirements specified in K.S.A. 48-1607, and amendments thereto.

(e) The ambulatory surgical center staff shall meet the following standards:

- (1) Allow only trained and qualified individuals to operate radiology equipment;
- (2) document annual checks and calibration of all radiology equipment and maintain records of such;

(3) ensure that all radiology and diagnostic services are provided only on the order of a physician; and

(4) document the presence of signed and dated clinical reports of the radiological or diagnostic findings in the patient's record.

(f) If the ambulatory surgical center contracts for radiology services, it shall have a written agreement with a medicare-approved radiology provider or supplier.

(g) Pharmacy services. Each ambulatory surgical center shall provide pharmaceutical services that are appropriate for the services offered by the ambulatory surgical center.

(h) The pharmaceutical service shall be under the direction of an individual designed responsible for the service and shall be provided in accordance with K.A.R. 68-7-11.

(i) Policies and procedures. There shall be policies and procedures developed by a pharmacist, and approved by the governing authority, related to the following:

- (1) Storage of drugs;
- (2) security of drugs;
- (3) labeling and preparation of drugs;
- (4) administration of drugs; and
- (5) disposal of drugs.

(j) All drugs and biologicals shall be ordered pursuant to a written order issued by a licensed physician.

(k) Each adverse drug reaction shall be reported to the physician responsible for the patient and shall be documented in the patient's record.

(l) Drugs requiring refrigeration shall be stored in a refrigerator that is used only for drug storage.

(m) Quality assurance. There shall be a mechanism for the ongoing review and evaluation of the quality and scope of radiological, laboratory, and pharmacy services. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-60. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-60a. Food services. (a) Food service and food service policies and procedures shall reflect the level of services offered to meet the needs of the patients.

(b) The food and nutritional needs of patients shall be met in accordance with physician's orders.

(c) There shall be written policies for food storage, preparation, and service. Policies shall meet the following standards:

(1) There shall be a separate storage area above the floor level for food.

(2) Food transportation equipment shall be cleaned and disinfected daily or after each use if uneaten food or unclean dishes are transported.

(3) There shall be separate hand-washing facilities in the food preparation and service area.

(4) The temperature in each food freezer shall be no higher than 0° Fahrenheit.

(5) Dishes and utensils shall be washed in water at 140° Fahrenheit and shall be rinsed at 180° Fahrenheit, or a ware-washing machine and its auxiliary components shall be operated in accordance with the machine's data plate and any other manufacturer's instructions.

(6) Foods being transported shall be protected from contamination and held at required temperatures in clean containers or serving carts.

(7) Except during preparation, cooking, or cooling, potentially hazardous food shall be maintained at or above 140° Fahrenheit or at or below 41° Fahrenheit.

(8) Storage of toxic agents shall be prohibited in food preparation and food serving areas.

(9) Food returned on patients' trays shall not be reused. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-61. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked April 20, 2001.)

28-34-61a. Physical environment. (a) Each ambulatory surgical center shall be designed, constructed, equipped, and maintained to protect the health and safety of patients, staff, and visitors.

(b) Each ambulatory surgical center shall include the following features:

- (1) A separate recovery area and waiting area;
- (2) business office facilities;
- (3) storage areas designated for janitorial supplies and equipment; and
- (4) separate toilet facilities designated for patients, staff, and visitors.

(c) Equipment.

(1) Patient resuscitation and suction equipment shall be available in the surgical area at all times.

(2) All equipment shall be clean, functional, and maintained in accordance with the manufacturer's instruction.

(3) Each fire extinguisher shall be the type approved by underwriters laboratories. Extinguishers shall be inspected and tagged annually to assure that nothing has been tampered with or moved from designated areas. All extinguishers shall be functional.

(d) Fire and disaster drills. Each ambulatory surgical center shall meet the following requirements:

(1) Develop a written fire evacuation plan. Drills shall be held according to the facility's policies and procedures to prepare employees for evacuation

of patients, staff, and visitors during a fire emergency. A record of each drill shall be kept on file.

(2) Develop a written plan for addressing the safety of patients, staff, and visitors during disasters. Periodic drills shall be held, and a record of each drill shall be kept on file.

(e) Smoking shall be prohibited in each ambulatory surgical center, and “no smoking” signs shall be posted in accordance with K.S.A. 21-4017, and amendments thereto.

(f) Use of space. The physical space licensed as an ambulatory surgical center shall be separate from any physician’s office. (Authorized by and implementing K.S.A. 65-431; effective April 20, 2001.)

28-34-62. (Authorized by and implementing K.S.A. 65-431; effective Jan. 1, 1974; amended June 12, 1979; revoked May 1, 1986.)

28-34-62a. Construction standards. (a) General provisions. All ambulatory surgical center construction, including new buildings and additions or alterations to existing buildings, shall be in accordance with standards set forth in sections 1, 2, 3, 4, 5, 6, and subsections 9.1, 9.2, 9.5, 9.9, 9.10, 9.31, and 9.32 in the American institute of architects academy of architecture for health publication no. ISBN 1-55835-151-5, entitled “1996-97 guidelines for design and construction of hospital and health care facilities,” copyrighted in 1996, and hereby adopted by reference.

(b) Provisions for handicapped. All construction shall be in compliance with K.S.A. 58-1301 et seq., and amendments thereto.

(c) Construction plans and specifications.

(1) Plans and specifications for each new ambulatory surgical center and each alteration and addition to any existing ambulatory surgical center, other than minor alterations, shall be prepared by an architect licensed in Kansas and shall be submitted to the licensing department before beginning construction. “Minor alterations” means those projects that do not affect the structural integrity of the building, do not change functional operation, and do not affect fire safety.

(2) Plans shall be submitted at the preliminary plan and outline specification stage.

(3) The preliminary plans shall include the following information:

(A) Sketch plans of the basement, each floor, and the roof indicating the space assignment, size, and outline of fixed equipment;

(B) all elevations and typical sections;

(C) a plot plan showing roads and parking facilities; and

(D) areas and bed capacities by floors.

(4) Outline specifications shall consist of a general description of the construction, air conditioning, heating, and ventilation systems.

(5) Contract documents and final plans shall be prepared by the architect and consist of working drawings that are complete and adequate for bidding, contract, and construction purposes. Specifications shall supplement the drawings to fully describe the types, sizes, capacities, workmanship, finishes, and other characteristics of all materials and equipment. Contract documents shall be submitted to the licensing department, if requested. The architect shall certify that contract documents and final plans are in compliance with subsections (a) and (b) of this regulation.

(d) Access. Representatives of the licensing department shall, at all reasonable times, have access to work in preparation or progress, and the contractor shall provide proper facilities for this access and inspection. A complete set of plans and specifications shall be available on the job site for use by licensing department personnel. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1986; amended, T-87-51, Dec. 19, 1986; amended May 1, 1987; amended Dec. 29, 1995; amended April 20, 2001.)

PART 3. RECUPERATION CENTERS

28-34-75. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked March 23, 2001.)

28-34-76. (Authorized by K.S.A. 1979 Supp. 65-428, 65-429, 65-431; effective Jan. 1, 1974; amended May 1, 1980; revoked March 23, 2001.)

28-34-77 through 28-34-93. (Authorized by K.S.A. 1973 Supp. 65-431; effective Jan. 1, 1974; revoked March 23, 2001.)

28-34-94. (Authorized by K.S.A. 1979 Supp. 65-431; effective Jan. 1, 1974; amended, E-80-8, June 12, 1979; amended May 1, 1980; revoked, T-87-51, Dec. 19, 1986; revoked May 1, 1987.)

PART 4. CONSTRUCTION STANDARDS

28-34-94a. (Authorized by and implementing K.S.A. 65-431; effective, T-87-51, Dec. 19, 1986; effective May 1, 1987; revoked March 23, 2001.)

28-34-125. (Authorized by and implementing K.S.A. 65-431; effective May 1, 1987; revoked June 28, 1993.)

28-34-126. Definitions. For the purposes of K.A.R. 28-34-126, 28-34-127, and 28-34-129 through 28-34-144, the following terms shall have the meanings specified in this regulation. (a) “Admitting privileges” means permission extended by a hospital to a physician to allow the physician to admit a patient to that hospital either as active or courtesy staff.

(b) “Ancillary services” means laboratory, radiology, or pharmacy services.

(c) “Ancillary staff member” means an individual who performs laboratory, radiology, or pharmacy services at a facility.

(d) “Applicant” means a person who has applied for a license but who has not yet been granted a license to operate a facility.

(e) “Clinical privileges” means permission extended by a hospital to a physician to allow the physician to provide treatment to a patient in that hospital.

(f) “Health professional” means an individual, other than a physician, who is one of the following:

(1) A nurse licensed by the Kansas state board of nursing; or

(2) a physician assistant licensed by the Kansas state board of healing arts.

(g) “Licensee” means a person who has been granted a license to operate a facility.

(h) “Medical staff member” means an individual who is one of the following:

(1) A physician licensed by the Kansas state board of healing arts;

(2) a health professional; or

(3) an ancillary staff member.

(i) “Newborn child” means a viable child delivered during an abortion procedure.

(j) “Person” means any individual, firm, partnership, corporation, company, association, or joint-stock association, and the legal successor thereof.

(k) “Reportable incident” means an act by a medical staff member which:

(1) Is or may be below the applicable standard of care and has a reasonable probability of causing injury to a patient; or

(2) may be grounds for disciplinary action by the appropriate licensing agency.

(l) “Risk manager” means the individual designated by the applicant or licensee to administer the facility’s internal risk management program

and to receive reports of reportable incidents within the facility.

(m) “Staff member” means an individual who provides services at the facility and who is compensated for those services.

(n) “Unborn child” means a living individual organism of the species homo sapiens, in utero, at any stage of gestation from fertilization to birth.

(o) “Viable” shall have the same meaning ascribed in K.S.A. 65-6701, and amendments thereto.

(p) “Volunteer” means an individual who provides services at the facility and who is not compensated for those services. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, sec. 1; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-127. Application process. (a) Any person desiring to operate a facility shall apply for a license on forms provided by the department.

(b) Each applicant shall submit a fee of \$500 for a license. The applicable fee shall be submitted at the time of license application and shall not be refundable.

(c) Before initial licensing each applicant shall submit to the department the following information:

(1) Written verification from the applicable local authorities showing that the premises are in compliance with all local codes and ordinances, including all building, fire, and zoning requirements;

(2) written verification from the state fire marshal showing that the premises are in compliance with all applicable fire codes and regulations;

(3) documentation of the specific arrangements that have been made for the removal of biomedical waste and human tissue from the premises; and

(4) documentation that the facility is located within 30 miles of an accredited hospital.

(d) The granting of a license to any applicant may be denied by the secretary if the applicant is not in compliance with all applicable laws, rules, and regulations. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, secs. 2 and 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-129. Terms of a license. (a) Each license shall be effective for one year following the date of issuance.

(b) Each license shall be valid for the licensee and the address specified on the license. When an initial, renewed, or amended license becomes

effective, all licenses previously granted to the applicant or licensee at the same address shall become invalid.

(c) Only one physical location shall be described in each license.

(d) Any applicant may withdraw the application for a license.

(e) Any licensee may submit, at any time, a request to close the facility permanently and to surrender the license.

(f) If a facility is closed, any license granted for that facility shall become void. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, sec. 2; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-130. Renewals; amendments. (a) No earlier than 90 days before but no later than the renewal date, each licensee wishing to renew the license shall submit the following:

(1) The nonrefundable license fee of \$500; and
(2) an application to renew the license on the form provided by the department.

(b) Each licensee shall submit a request for an amended license to the department within 30 days after either of the following:

(1) A change of ownership by purchase or by lease; or
(2) a change in the facility's name or address. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, secs. 2, 3, and 4; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-131. Operation of the facility. (a) Each applicant and each licensee shall be responsible for the operation of the facility.

(b) Each applicant and each licensee shall:

(1) Ensure compliance with all applicable federal, state, and local laws;
(2) serve as or designate a medical director who is a physician licensed by the Kansas state board of healing arts and who has no limitations to the license that would prohibit the physician's ability to serve in the capacity as a medical director of a facility; and
(3) ensure the following documents are conspicuously posted at the facility:

(A) The current facility license issued by the department; and

(B) the current telephone number and address of the department.

(c) Each applicant and each licensee shall ensure that written policies and procedures are de-

veloped and implemented for the operation of the facility. The policies and procedures shall include the following requirements:

(1) An organized recordkeeping system to meet the requirements in K.A.R. 28-34-144;

(2) documentation of personnel qualifications, duties, and responsibilities to meet the requirements in K.A.R. 28-34-132;

(3) that the facility is designed, constructed, equipped, and maintained to protect the health and safety of patients, staff, and visitors to meet the requirements in K.A.R. 28-34-133 through 28-34-136;

(4) ensure proper and adequate medical screening and evaluation of each patient to meet the requirements in K.A.R. 28-34-137;

(5) consent is obtained from each patient before the procedure;

(6) safe conduct of abortion procedures to meet the requirements in K.A.R. 28-34-138;

(7) the appropriate use of anesthesia, analgesia and sedation to meet the requirements in K.A.R. 28-34-138;

(8) ensure the use of appropriate precautions for any patient undergoing a second or third trimester abortion to meet the requirements in K.A.R. 28-34-138;

(9) post-procedure care of patients to meet the requirements in K.A.R. 28-34-139;

(10) identify and ensure a physician with admitting privileges at an accredited hospital located within 30 miles of the facility is available during facility hours of operation;

(11) if indicated, the transfer of any patient and newborn child to a hospital to meet the requirements in K.A.R. 28-34-140;

(12) follow-up and aftercare for each patient receiving an abortion procedure in the facility to meet the requirements in K.A.R. 28-34-141;

(13) a written plan for risk management to meet the requirements in K.A.R. 28-34-142, including policies and procedures for staff member or volunteer reporting of any clinical care concerns; and

(14) ensure that incidents that require reporting to the department are completed as required in K.A.R. 28-34-143. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, secs. 2 and 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-132. Staff requirements. (a) Each applicant and each licensee shall ensure that each physician performing surgery in a facility is approved by the medical director, licensed to prac-

tice medicine and surgery in the state of Kansas, and demonstrates competence in the procedure involved in the physician's duties at the facility. Competence shall be demonstrated through both of the following means and methods:

(1) Documentation of education and experience; and

(2) observation by or interaction with the medical director.

(b) Each applicant and each licensee shall ensure the following:

(1) A physician with admitting privileges at an accredited hospital located within 30 miles of the facility is available.

(2) Any physician performing or inducing abortion procedures in the facility has clinical privileges at a hospital located within 30 miles of the facility.

(c) Each applicant and each licensee shall ensure that each individual who performs an ultrasound is one of the following:

(1) A physician licensed in the state of Kansas who has completed a course for the type of ultrasound examination the physician performs; or

(2) an individual who performs ultrasounds under the supervision of a physician and who meets all of the following requirements:

(A) Has completed a course in performing ultrasounds;

(B) has completed a training for the specific type of ultrasound examination the individual performs; and

(C) is not otherwise precluded by law from performing ultrasound examinations.

(d) Each applicant and each licensee shall ensure that each staff member employed by or contracted with the facility is licensed, if required by state law, is qualified, and provides services to patients consistent with the scope of practice of the individual's training and experience.

(e) Each applicant and each licensee shall ensure that each surgical assistant employed by or contracted with the facility receives training in the specific responsibilities of the services the surgical assistant provides in the facility.

(f) Each applicant and each licensee shall ensure that each volunteer receives training as identified by the medical director in the specific responsibilities the volunteer provides at the facility.

(g) Each applicant and each licensee shall ensure that at least one physician or registered nurse is certified in advanced cardiovascular life support and is present at the facility when any patient who is having an abortion procedure or recovering

from an abortion procedure is present at the facility. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-133. Facility environmental standards. (a) Each applicant and each licensee shall ensure that the facility is designed, constructed, equipped, and maintained to protect the health and safety of patients, staff members, volunteers, and visitors.

(b) Each facility shall include the following rooms and areas:

(1) At least one room designated for patient interviews, counseling, and medical evaluations, located and arranged to preserve patient privacy;

(2) at least one dressing room for patients only and arrangements for storage of patient clothing and valuables;

(3) at least one dressing room for staff members, including a toilet, hand washing station, and arrangements for storage for staff member clothing and valuables;

(4) a toilet room and hand washing station designated for patients;

(5) hand washing stations for pre-procedure hand washing by staff members;

(6) private procedure rooms and doorways of those rooms of sufficient size to accommodate the following:

(A) The equipment, supplies, and medical staff members required for performance of an abortion procedure; and

(B) emergency equipment and personnel in the event of a transfer, as described in K.A.R. 28-34-140;

(7) a recovery area that meets all of the following requirements:

(A) Has a nurse station with visual observation of each patient in the recovery area;

(B) provides privacy for each patient in the recovery area with at least cubicle curtains around each patient gurney or bed; and

(C) has sufficient space to accommodate emergency equipment and personnel in the event of a transfer, as described in K.A.R. 28-34-140;

(8) a waiting area for patients and visitors;

(9) an administrative area, including office space for the secure filing and storage of facility patient records;

(10) a workroom separate from the procedure rooms for cleaning, preparation, and sterilization

of instruments, arranged to separate soiled or contaminated instruments from clean or sterilized instruments, including the following:

- (A) A hand washing station;
- (B) receptacles for waste and soiled items;
- (C) designated counter space for soiled or contaminated instruments;
- (D) a sink for cleaning soiled or contaminated instruments;
- (E) designated counter space for clean instruments; and
- (F) an area for sterilizing instruments, if sterilization is completed at the facility;
- (11) storage space for clean and sterile instruments and supplies; and
- (12) at least one room equipped with a service sink or a floor basin and space for storage of janitorial supplies and equipment. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-134. Health and safety requirements. (a) Each applicant and each licensee shall ensure that the facility meets the following health and safety requirements:

- (1) The temperature in each procedure room and in each recovery area shall be between 65 and 75 degrees Fahrenheit unless otherwise ordered by a physician in order to meet the comfort or medical needs of the patient.
- (2) Fixed or portable lighting units shall be present in each examination, procedure, and recovery room or area, in addition to general lighting.
- (3) Each emergency exit shall accommodate a stretcher or a gurney.
- (4) The facility shall be maintained in a clean condition.
- (5) The facility shall not be infested by insects and vermin.
- (6) A warning notice shall be placed at the entrance to any room or area where oxygen is in use.
- (7) Soiled linen and clothing shall be kept in covered containers in a separate area from clean linen and clothing.
- (b) A written emergency plan shall be developed and implemented, including procedures for protecting the health and safety of patients and other individuals in any of the following circumstances:
 - (1) A fire;
 - (2) a natural disaster;
 - (3) loss of electrical power; or
 - (4) threat or incidence of violence.

(c) An evacuation drill shall be conducted at least once every six months, including participation by all individuals in the facility at the time of the drill. Documentation shall be maintained at the facility for one year from the date of the drill and shall include the date and time of the drill. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-135. Equipment; supplies; drugs and medications. (a) Each applicant and each licensee shall ensure that supplies, equipment, drugs, and medications are immediately available for use or in an emergency.

(b) Equipment and supplies shall be maintained in the amount required to assure sufficient quantities of clean and sterilized durable equipment to meet the needs of each patient during any abortion procedure and for monitoring each patient throughout the procedure and recovery period.

(c) Each applicant and each licensee shall ensure that the following equipment and supplies are maintained in the facility for airway management:

- (1) An oxygen source with flowmeter;
- (2) face masks, in child and adult sizes for assisting ventilation;
- (3) a non self-inflating bag with face mask;
- (4) suction, either wall or machine;
- (5) suction catheters, in sizes 8, 10, 14F, and Yankauer;
- (6) oral airways, in child and adult sizes;
- (7) nasal cannulas, in child and adult sizes; and
- (8) the following additional equipment and supplies for airway management for any abortion procedure performed when the gestational age of the unborn child is 22 weeks or more:
 - (A) A self-inflating bag with reservoir, 500 cc and 1000 cc;
 - (B) oral airways, in infant sizes;
 - (C) a laryngoscope handle with batteries;
 - (D) straight blades or curved blades, in sizes 0, 1, 2, and 3;
 - (E) endotracheal tubes, uncuffed, in sizes 3.0, 3.5, 4.0, 4.5, 5.0, 6.0, 7.0, and 8.0;
 - (F) stylets, small and large; and
 - (G) adhesive tape to secure airway.
- (d) Each applicant and each licensee shall ensure that the following supplies are maintained in the facility for fluid management:
 - (1) Intraosseous needles, 15 or 18 gauge;
 - (2) intravenous catheters, 18, 20, 22, and 24 gauge;

- (3) butterfly needles, 23 gauge;
- (4) tourniquets, alcohol swabs, and tape;
- (5) isotonic fluids, either normal saline or lactated Ringer's solution; and

(6) for any abortion procedure performed when the gestational age of the unborn child is 22 weeks or more, pediatric drip chambers and tubing.

(e) Each applicant and each licensee shall ensure that the following miscellaneous equipment and supplies are maintained in the facility:

(1) Blood pressure cuffs, in small, medium and large adult sizes;

(2) adult nasogastric tubes;

(3) manual sphygmomanometer; and

(4) for any abortion procedure performed when the gestational age of the unborn child is 22 weeks or more, blood pressure cuffs in preemie and infant sizes.

(f) Each applicant and each licensee shall ensure that all equipment is safe for each patient and for the staff.

(g) Each applicant and each licensee shall ensure that each item of equipment is installed and used according to the manufacturer's recommendations for use.

(h) Each applicant and each licensee shall ensure that each item of equipment is checked annually to ensure safety and required calibration.

(i) Each applicant and each licensee shall ensure that equipment and supplies are clean and sterile, if applicable, before each use.

(j) Each applicant and each licensee shall ensure that the facility meets the following requirements for equipment:

(1) All equipment shall be clean, functional, and maintained in accordance with the manufacturer's instructions.

(2) The following equipment shall be available at all times:

(A) Ultrasound equipment;

(B) intravenous equipment;

(C) laboratory equipment;

(D) patient resuscitation and suction equipment;

(E) equipment to monitor vital signs in each room in which an abortion is performed;

(F) a surgical or gynecologic examination table;

(G) equipment to measure blood pressure;

(H) a stethoscope; and

(I) a scale for weighing a patient.

(k) Each applicant and each licensee shall ensure that, for any abortion procedure performed when the gestational age of the unborn child is

22 weeks or more, the following equipment and supplies are maintained in the facility:

(1) Equipment to monitor cardiopulmonary status; and

(2) drugs to support cardiopulmonary function.

(l) Each applicant and each licensee shall ensure that equipment and appropriate medications are located in the recovery area as needed for the provision of appropriate emergency resuscitative and life support procedures pending the transfer to a hospital of a patient or a newborn child.

(1) Each applicant and each licensee shall maintain a stock supply of drugs and medications for the use of the physician in treating the emergency needs of patients.

(2) The medications shall be stored in such a manner as to prohibit access by unauthorized personnel.

(3) The stock supplies of medications shall be regularly reviewed to ensure proper inventory control with removal or replacement of expired drugs and medications.

(4) Drugs and equipment shall be available within the facility to treat the following conditions consistent with standards of care for advanced cardiovascular life support:

(A) Cardiac arrest;

(B) a seizure;

(C) an asthma attack;

(D) allergic reaction;

(E) narcotic or sedative toxicity;

(F) hypovolemic shock;

(G) vasovagal shock; and

(H) anesthetic reactions.

(m) Drugs and medications shall be administered to individual patients only by a facility physician or a facility health professional.

(n) If a stock of controlled drugs is to be maintained at the facility, the applicant or licensee shall ensure that the facility is registered by the Kansas board of pharmacy. Each applicant and each licensee shall ensure the proper safeguarding and handling of controlled substances within the facility, and shall ensure that all possible control measures are observed and that any suspected diversion or mishandling of controlled substances is reported immediately.

(o) Records shall be kept of all stock supplies of controlled substances giving an accounting of all items received or administered. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-136. Ancillary services. (a) Each applicant and each licensee shall document that the facility maintains a certificate of compliance from the centers for medicare and medicaid services pursuant to section 353 of the public health services act, 42 U.S.C. 263a, as revised by the clinical laboratory and current clinical laboratory improvement amendments for the purpose of performing examinations or procedures.

(b) Each applicant and each licensee shall ensure that the facility meets the following requirements for radiology services:

(1) Allow only trained and qualified individuals to operate radiology equipment;

(2) document annual checks and calibration of radiology equipment and maintain records of the annual checks and calibrations;

(3) ensure that all radiology and diagnostic procedures are provided only on the order of a physician; and

(4) maintain signed and dated clinical reports of the radiological findings in each patient's record.

(c) Each applicant and each licensee shall ensure that written policies and procedures are developed and implemented relating to drugs, including the following:

(1) Storage of drugs;

(2) security of drugs;

(3) labeling and preparation of drugs;

(4) administration of drugs; and

(5) disposal of drugs.

(d) Each applicant and each licensee shall ensure that all drugs and medications shall be administered pursuant to a written order from a facility physician or a facility health professional.

(e) Each applicant and each licensee shall ensure that each adverse drug reaction is reported to the physician responsible for the patient and is documented in the patient record.

(f) Each applicant and each licensee shall ensure that each drug and each medication requiring refrigeration is stored in a refrigerator that is used only for drug and medication storage.

(g) Each applicant and each licensee shall ensure that there is a mechanism for the ongoing review and evaluation of the quality and scope of laboratory, radiology, and pharmaceutical services. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-137. Patient screening and evaluation. (a) Each applicant and each licensee shall

ensure written policies and procedures are developed and implemented for the medical screening and evaluation of patients. A medical screening and evaluation shall be completed on each patient before an abortion procedure is performed.

(b) The medical screening and evaluation shall consist of the following:

(1) A medical history shall be completed, including the following:

(A) Reported allergies to medications, antiseptic solution, or latex;

(B) obstetric and gynecologic history;

(C) past surgeries;

(D) medication currently being taken by the patient; and

(E) any other medical conditions.

(2) A physical examination shall be performed by a physician, including a bimanual examination to estimate uterine size and palpation of the adnexa.

(3) An ultrasound evaluation shall be completed for any patient who elects to have an abortion of an unborn child. The physician shall estimate the gestational age of the unborn child based on the ultrasound examination and obstetric standards in keeping with established standards of care regarding the estimation of the age of the unborn child and shall verify the estimate in the patient's medical history. The physician shall keep the original prints of each ultrasound examination for each patient in the patient's medical history file. The original prints may consist of a digitized record or an electronic record.

(4) The appropriate laboratory tests shall be completed, including the following:

(A) For an abortion performed in a medical emergency and in which an ultrasound examination is not performed before the abortion procedure, urine or blood tests for pregnancy, which shall be completed before the abortion procedure;

(B) a test for anemia as indicated;

(C) determination of Rh factor or Rh typing, unless the patient provides written documentation of blood type acceptable to the physician; and

(D) other tests recommended by the physician or the medical director on the basis of the physical examination, which may include tests for chlamydia and gonorrhea and other cultures, syphilis serology, and a papanicolaou procedure.

(c) Each licensee shall ensure that another individual is present in the room during a pelvic examination or an abortion procedure. If the physician conducting the examination or the procedure is male, the other individual in the room shall be female.

(d) The physician or health care professional shall review, at the request of the patient, the ultrasound evaluation results with the patient before the abortion procedure is performed, including the probable gestational age of the unborn child. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-138. Abortion procedure. (a) Each applicant and each licensee shall ensure that written policies and procedures are developed and implemented for the following procedures:

(1) Safe conduct of abortion procedures that conform to obstetric standards in keeping with established standards of care regarding the estimated gestational age of the unborn child;

(2) the appropriate use of local anesthesia, analgesia, and sedation if ordered by the physician; and

(3) the use of appropriate precautions, including the establishment of intravenous access for any patient undergoing a second or third trimester abortion, unless the physician determines that establishing intravenous access is not appropriate for the patient and documents that fact in the medical record of the patient.

(b) Each licensee shall ensure that the following procedures are followed for each patient after completion of all requirements for patient screening and evaluation required in K.A.R. 28-34-137 and before performance of an abortion:

(1) Information is provided to the patient on the abortion procedure, including alternatives, risks, and potential complications.

(2) Written consent is signed and dated by the patient.

(c) Each licensee shall ensure that a physician and at least one health professional is available to each patient throughout the abortion procedure.

(d) Each licensee shall ensure that an infection control program is established which includes the following:

(1) Measures for surveillance, prevention, and control of infections;

(2) policies and procedures outlining infection control and aseptic techniques to be followed by staff members and volunteers; and

(3) training on infection control and aseptic techniques for all staff members and volunteers.

(e) Each licensee shall ensure that each abortion is performed according to the facility's policies and procedures and in compliance with all applicable laws, rules, and regulations.

(f) Each licensee shall ensure that health professionals monitor each patient's vital signs throughout the abortion procedure to ensure the health and safety of the patient.

(g) Each licensee shall ensure that the following steps are performed if an abortion procedure results in the delivery of a newborn child:

(1) Resuscitative measures are used to support life;

(2) the newborn child is transferred to a hospital; and

(3) resuscitative measures and the transfer to a hospital are documented. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-139. Recovery procedures; discharge. (a) Each applicant and each licensee shall ensure that written policies and procedures are developed and implemented for the post-procedure care of patients who are administered local anesthesia, analgesia, or sedation, including the following:

(1) Immediate post-procedure care for each patient shall consist of observation in a supervised recovery area.

(2) The vital signs and bleeding of each patient shall be monitored by a physician or a health professional.

(3) Each patient shall remain in the recovery area following the abortion procedure for the following time periods, based on the gestational age of the unborn child:

(A) For a gestational age of 12 weeks or less, a minimum of 30 minutes;

(B) for a gestational age of 13 to 15 weeks, a minimum of 45 minutes; and

(C) for a gestational age of 16 weeks or more, a minimum of 60 minutes. The patient shall remain in the recovery area for a longer period of time when necessary based on the physician's evaluation of the patient's medical condition.

(b) Each licensee shall ensure that a physician or an individual designated by a physician shall discuss Rho(d) immune globulin with each patient for whom it is indicated and assure that it is offered to the patient in the immediate post-procedure period or that it will be available to the patient within 72 hours after completion of the abortion procedure. If the patient refuses the Rho(d) immune globulin, the refusal shall be documented on a form approved by the department, signed by the patient and a witness, and filed in the medical record of the patient.

(c) At the time of discharge from the facility, each patient shall receive the following written information:

- (1) Signs of possible complications;
- (2) when to access medical care in response to complications;
- (3) the telephone number to call in an emergency;
- (4) instructions and precautions for resuming vaginal intercourse; and
- (5) any other instructions specific to a patient's abortion or condition.

(d) Each licensee shall ensure that a physician signs the discharge order for each patient. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-140. Transfers. (a) Each applicant and each licensee shall ensure that written policies and procedures are developed and implemented for the transfer of patients and newborn children to a hospital.

(b) Each licensee shall ensure that a physician arranges the transfer of a patient to a hospital if any complications beyond the medical capability of the health professionals of the facility occurs or is suspected.

(c) Each licensee shall ensure that a physician arranges the transfer of a newborn child to a hospital if the child requires emergency care.

(d) A physician or a nurse who is certified in advanced cardiovascular life support shall remain on the premises of the facility to facilitate the transfer of an emergency case if hospitalization of a patient or a newborn child is required. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-141. Follow-up contact and care.

Each applicant and each licensee shall ensure that written policies and procedures are developed and implemented for follow-up and aftercare for each patient receiving an abortion procedure in the facility, including the following: (a) With the consent of the patient, a health professional from the facility shall make a good faith effort to contact the patient by telephone within 24 hours after the procedure to assess the patient's recovery.

(b) Each patient shall be offered a follow-up visit and, if requested by the patient, shall be scheduled no more than four weeks after completion

of the procedure. The follow-up visit shall include the following:

- (1) A physical examination;
- (2) a review of all laboratory tests performed as required in K.A.R. 28-34-137; and
- (3) a urine pregnancy test.

If a continuing pregnancy is suspected, a physician who performs abortion procedures shall be consulted.

(c) The physician who performs or induces the abortion, or an individual designated by the physician, shall make all reasonable efforts to ensure that the patient returns for a subsequent examination so the physician can assess the patient's medical condition. A description of the efforts made to comply with this regulation, including the date, time, and name of the individual making the efforts, shall be included in the patient's medical record. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-142. Risk management. (a) Each applicant and each licensee shall develop and implement a written risk management plan.

(b) The risk management plan shall be reviewed and approved annually by the licensee.

(c) Findings, conclusions, recommendations, actions taken, and results of actions taken shall be documented and reported through procedures established within the risk management plan.

(d) All patient services, including those services provided by outside contractors or consultants, shall be periodically reviewed and evaluated in accordance with the risk management plan.

(e) Each risk management plan shall include the following:

(1) Section I. A description of the system implemented by the facility for investigation and analysis of the frequency and causes of reportable incidents within the facility;

(2) Section II. A description of the measures used by the facility to minimize the occurrence of reportable incidents and the resulting injuries within the facility;

(3) Section III. A description of the facility's implementation of a reporting system based upon the duty of all medical staff members staffing the facility and all agents and staff members of the facility directly involved in the delivery of health care services to report reportable incidents; and

(4) Section IV. A description of the organizational elements of the plan, including the following:

- (A) Name and address of the facility;
- (B) name and title of the facility's risk manager; and
- (C) description of involvement and organizational structure of medical staff members as related to the risk management program, including names and titles of medical staff members involved in investigation and review of reportable incidents.

(f) The standards-of-care determinations shall include the following:

(1) Each facility shall assure that analysis of patient care incidents complies with the definition of a "reportable incident". Each facility shall use categories to record its analysis of each incident, and those categories shall be in substantially the following form:

- (A) Standards of care met;
- (B) standards of care not met, but with no reasonable probability of causing injury;
- (C) standards of care not met, with injury occurring or reasonably probable; or
- (D) possible grounds for disciplinary action by the appropriate licensing agency.

(2) Each reported incident shall be assigned an appropriate standard-of-care determination. Separate standard-of-care determinations shall be made for each involved medical staff member and each clinical issue reasonably presented by the facts. Any incident determined to meet paragraph (f)(1)(C) or (D) of this regulation shall be reported to the appropriate licensing agency. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-143. Reporting requirements. In addition to the reporting requirements for risk management required in K.A.R. 28-34-142, each licensee shall ensure that the following incidents are reported to the department, on a form provided by the department:

- (a) Each incident resulting in serious injury of a patient or a viable unborn child shall be reported to the department within 10 days after the incident.
- (b) The death of a patient, other than the death of an unborn child, shall be reported to the department not later than the next department business day. (Authorized by and implementing L. 2011, ch. 82, sec. 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

28-34-144. Records. (a) Each applicant and each licensee shall maintain an organized record-keeping system that provides for identification, security, confidentiality, control, retrieval, and preservation of all staff member and volunteer records, patient medical records, and facility information.

(b) Each applicant and each licensee shall ensure that only individuals authorized by the applicant or licensee have access to patient medical records.

(c) All records shall be available at the facility for review by the secretary or the authorized agent of the secretary.

(d) For staff member and volunteer records, each applicant and each licensee shall ensure that an individual record is maintained at the facility. The record shall include all of the following information:

- (1) The staff member's or volunteer's name, position, title, and the first and last date of employment or volunteer service;
- (2) verification of qualifications, training, or licensure, if applicable;
- (3) documentation of cardiopulmonary resuscitation certification, if applicable;
- (4) if a physician, documentation of verification of competence, as required in K.A.R. 28-34-132, signed and dated by the medical director;
- (5) if an individual who performs ultrasounds, documentation of ultrasound training required in K.A.R. 28-34-132;
- (6) if a surgical assistant, documentation of training required in K.A.R. 28-34-132; and
- (7) if a volunteer, documentation of training required in K.A.R. 28-34-132.

(e) For patient records, each licensee shall ensure that an individual record is maintained at the facility for each patient. The record shall include all of the following information:

- (1) Patient identification, including the following:
 - (A) Name, address, and date of birth; and
 - (B) name and telephone number of an individual to contact in an emergency;
- (2) medical history as required in K.A.R. 28-34-137;
- (3) the physical examination required in K.A.R. 28-34-137;
- (4) laboratory test results required in K.A.R. 28-34-137;
- (5) ultrasound results required in K.A.R. 28-34-137;

(6) the physician's estimated gestational age of the unborn child as required in K.A.R. 28-34-137;

(7) each consent form signed by the patient;

(8) a record of all orders issued by a physician, physician assistant, or nurse practitioner;

(9) a record of all medical, nursing, and health-related services provided to the patient;

(10) a record of all adverse drug reactions as required in K.A.R. 28-34-136; and

(11) documentation of the efforts to contact the patient within 24 hours of the procedure and offer and schedule a follow-up visit no more than four weeks after the procedure, as required in K.A.R. 28-34-141.

(f) For facility records, each applicant and each licensee shall ensure that a record is maintained for the documentation of the following:

(1) All facility, equipment, and supply requirements specified in K.A.R. 28-34-133 through 28-34-136;

(2) ancillary services documentation required in K.A.R. 28-34-136;

(3) risk management activities required in K.A.R. 28-34-142; and

(4) submission of all reports required in K.A.R. 28-34-143. (Authorized by L. 2011, ch. 82, sec. 9; implementing L. 2011, ch. 82, secs. 5 and 9; effective, T-28-7-1-11, July 1, 2011; effective Nov. 14, 2011.)

Article 35.—RADIATION

28-35-29 to 28-35-31. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-32. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-33 to 28-35-38. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-39. (Authorized by K.S.A. 48-1607, 48-1611; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-40 to 28-35-53. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-54. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-55. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-56. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-57. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-58 and 28-35-59. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-60 to 28-35-70. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-71. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-72. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-73 and 28-35-74. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-75 to 28-35-81. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-82. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-83 to 28-35-93. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-94. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-95 to 28-35-98. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-99. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-100 to 28-35-115. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-116. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-117. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-118 and 28-35-119. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-120 and 28-35-121. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-122. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-123. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-124. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-125 to 28-35-129. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; revoked Jan. 1, 1970.)

28-35-130. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1966; amended Jan. 1, 1967; revoked Jan. 1, 1970.)

28-35-131. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1967; revoked Jan. 1, 1970.)

PART I. DEFINITIONS

28-35-133. Persons protected. These regulations state the requirements that shall be applied in the use of all radiation, radiation machines, and radioactive materials to ensure the maximum protection of the public health and the maximum safety to all persons at, or in the vicinity of, the place of use, storage, or disposal of sources of radiation. These regulations are intended to be consistent with the best use of radiation machines and radioactive materials, and to encourage the constructive uses of radiation. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-134. Persons regulated and exempted. Except as otherwise specified, these regulations shall apply to all persons who receive,

possess, use, transfer, own or acquire any source of radiation. However, nothing in these regulations shall apply to any person to the extent that the person is subject to regulation by the United States nuclear regulatory commission. Regulation by the secretary of source material, by-product material, and special nuclear material in quantities not sufficient to form a critical mass is subject to the provisions of the agreement between the department and the U.S. nuclear regulatory commission and to part 150 of the commission's regulations (10 CFR Part 150), as in effect on January 29, 1982. The provisions of part 4 of these regulations shall not limit the exposure of patients to radiation for the purpose of diagnosis or therapy, by persons licensed to practice one or more of the healing arts within the authority granted to them by the Kansas healing arts statutes, or by persons licensed to practice dentistry or podiatry within the authority granted to them by Kansas licensing laws applying to dentists and podiatrists. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-135. (Authorized by K.S.A. 1992 Supp. 48-1607; implementing K.S.A. 1993 Supp. 48-1603, 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; revoked Dec. 30, 2005.)

28-35-135a. Definitions. As used in these regulations, each of the following terms shall have the meaning specified in this regulation: (a) "A₁" means the maximum activity of special form radioactive material permitted in a type A package.

(b) "A₂" means the maximum activity of radioactive material, other than special form radioactive material, permitted in a type A package. These values are listed in or may be derived as specified in 10 C.F.R. part 71, appendix A, which is adopted by reference in K.A.R. 28-35-221b.

(c) "Absorbed dose" means the energy imparted to matter by ionizing radiation per unit mass of irradiated material at the place of interest. The units of absorbed dose are the rad and the gray (Gy).

(d) "Absorbed dose rate" means the absorbed dose per unit of time or, for linear accelerators, the dose monitor unit per unit of time.

(e) "Accelerator-produced material" means any material made radioactive by exposing it in a particle accelerator.

(f) "Accessible surface" means the surface of equipment or of an equipment part that can be easily or accidentally touched by persons without the use of a tool.

(g) "Accident" means an unintended event, including an operating error, equipment failure, and other mishap, that could result in either of the following:

(1) A dose in excess of regulatory limits on site or for the public; or

(2) consequences or potential consequences that cannot be ignored from the point of view of protection or safety, including an actual or potential substantial degradation of the level of protection or safety of the facility or the release of radioactive material in sufficient quantity to warrant consideration of protective actions.

(h) "Act" means the "nuclear energy development and radiation control act," K.S.A. 48-1601 et seq., and amendments thereto.

(i) "Activity" means the rate of disintegration, transformation, or decay of radioactive material. Activity is expressed in the SI unit of becquerel (Bq) or in the special unit of curie (Ci), or the multiples of either unit.

(j) "Added filter" means the filter added to the inherent filtration.

(k) "Address of use" means the building or buildings that are identified on the license and each location where radioactive material could be produced, prepared, received, used, or stored.

(l) "Adult" means an individual who is 18 or more years of age.

(m) (1) "Agreement state" means any state with which the nuclear regulatory commission (NRC) enters, or has entered, into an effective agreement pursuant to subsection 274b of the atomic energy act of 1954, 68 Stat. 919, as amended.

(2) "Non-agreement state" means any other state.

(n) "Airborne radioactive area" means the following:

(1) Any room, enclosure, or operating area in which airborne radioactive material exists in concentrations in excess of the derived air concentrations (DAC) specified in "appendices to part 4: standards for protection against radiation," effective April 1994, published by the department and hereby adopted by reference; or

(2) any room, enclosure, or operating area in which airborne radioactive material exists in con-

centrations such that an individual present in the area without respiratory protective equipment could exceed, during the hours an individual is present in a week, an intake of 0.6 percent of the ALI or 12 DAC-hours.

(o) "Airborne radioactive material" means any radioactive material dispersed in the air in the form of dust, fumes, mists, vapors, or gases.

(p) "Air kerma" means the kinetic energy released in air by ionizing radiation. Kerma is determined by dividing dE by dM, where dE is the sum of the initial kinetic energies of all the charged ionizing particles liberated by uncharged ionizing particles in air of mass dM. The SI unit of air kerma is joule per kilogram, and the special name for the unit of kerma is the gray (Gy).

(q) "Alert" means a period during which one of the following could lead to a release of radioactive material that is not expected to require a response by off-site response organizations to protect persons off-site:

(1) Conditions have arisen that could cause an event.

(2) An event is in progress.

(3) An event has occurred.

(r) "Aluminum equivalent" means the thickness of type 1100 aluminum alloy that affords the same attenuation, under specified conditions, as that of the material in question. The nominal chemical composition of type 1100 aluminum alloy is a minimum of 99.00 percent aluminum and 0.12 percent copper.

(s) "Amendment" means any change to a license or registration issued under these regulations.

(t) "Analytical X-ray system" means a group of local and remote components utilizing X-rays to determine the elemental composition or to examine the microstructure of materials.

(1) Local components shall include those components that are struck by X-rays, including radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors, and shielding.

(2) Remote components may include power supplies, transformers, amplifiers, readout devices, and control panels.

(u) "Annual limit on intake" and "ALI" mean the derived limit for the amount of radioactive material taken into the body of an adult worker by inhalation or ingestion in a year. ALI is the smaller value of intake of a given radionuclide in a year by the reference man that would result in a committed effective dose equivalent of 5 rem (0.05 Sv) or

a committed dose equivalent of 50 rem (0.5 Sv) to any individual organ or tissue. ALI values for intake by ingestion and by inhalation of selected radionuclides are specified in appendix B, table I, published in “appendices to part 4: standards for protection against radiation,” which is adopted by reference in this regulation.

(v) “Annual refresher safety training” means a review conducted or provided by the licensee or registrant for its employees on radiation safety aspects of industrial radiography. The review shall include, at a minimum, any results of internal inspections, new procedures or equipment, new or revised regulations, and accidents or errors that have been observed. The review shall also provide opportunities for employees to ask safety questions.

(w) “ANSI” means the American national standards institute.

(x) “Applicator” means a structure that determines the extent of the treatment field at a given distance from the virtual source.

(y) “Area of use” means a portion of a physical structure that has been set aside for the purpose of producing, preparing, receiving, using, or storing radioactive material.

(z) “As low as is reasonably achievable” and “ALARA,” when used to describe exposures to radiation workers, mean that every reasonable effort has been made to maintain exposures to radiation workers as far below the dose limits specified in these regulations as is practical, consistent with the purpose for which the licensed or registered activity is undertaken, taking the following into account:

- (1) The state of technology;
- (2) the economics of improvements in relation to the state of technology;
- (3) the economics of improvements in relation to benefits to public health and safety and to other societal and socioeconomic considerations; and
- (4) the economics of improvements in relation to the utilization of nuclear energy and licensed or registered sources of radiation in the public interest.

(aa) “Assembler” means any person engaged in the business of assembling, replacing, or installing one or more components into an X-ray system or subsystem. The term shall include the owner of an X-ray system or any employee or agent of the owner who assembles components into an X-ray system that is subsequently used to provide professional or commercial services.

(bb) “Associated equipment” means equipment that is used in conjunction with a radiographic exposure device that makes radiographic exposures and that drives, guides, or comes in contact with the source.

(cc) “Attenuation block” means a block or stack, with dimensions of 20 cm by 20 cm by 3.8 cm, made of type 1100 aluminum alloy or other materials having equivalent attenuation.

(dd) “Authorized user” means an individual who is identified as an authorized user on a license issued by the department for the use of radioactive material or an individual who is designated by a registered facility as a user of X-ray machines or accelerators. This term shall not apply to part 6 of these regulations.

(ee) “Automatic exposure control” means a device that automatically controls one or more technique factors in order to obtain a required quantity of radiation, at one or more preselected locations. (Authorized by K.S.A. 48-1607; implementing K.S.A. 2017 Supp. 48-1603 and K.S.A. 48-1607; effective Dec. 30, 2005; amended July 27, 2007; amended May 4, 2018.)

28-35-135b. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) (1) “Background radiation” means the following:

- (A) Radiation from cosmic sources;
 - (B) naturally occurring radioactive materials, including radon, except for those radioactive materials that are a decay product of source material or special nuclear material; and
 - (C) global fallout as it exists in the environment from the testing of nuclear explosive devices.
- (2) The term “background radiation” shall not include radiation from radioactive materials regulated by the department.

(b) “Beam axis” means a line from the source through the centers of the X-ray fields.

(c) “Beam-limiting device” means a device that provides a means to restrict the dimensions of the X-ray field.

(d) “Beam-monitoring filter” means a filter used to scatter a beam of electrons.

(e) “Beam-monitoring system” means a system designed to detect and measure the radiation present in the useful beam.

(f) “Beam-scattering foil” means a thin piece of material, usually metallic, placed in a beam of electrons to scatter the beam in order to provide more uniform electron distribution in the useful beam.

(g) “Becquerel (Bq)” means the SI unit of activity. One becquerel is equal to one disintegration per second (dps) or transformation per second (tps).

(h) “Bent-beam linear accelerator” means a linear accelerator in which the accelerated electron beam must change direction by passing through a bending magnet.

(i) “Bioassay” means the determination of kinds, quantities, or concentrations and, in some cases, the locations of radioactive material in the human body, whether by direct measurement, in vivo counting, or analysis and evaluation of materials excreted or removed from the human body. For purposes of these regulations, “radiobioassay” shall be considered an equivalent term.

(j) “Brachytherapy” means a method of radiation therapy in which sealed sources are utilized to deliver a radiation dose at a distance of up to a few centimeters, by surface, intracavitary, or interstitial application.

(k)(1) “Byproduct material” means the following:

(A) Any radioactive material, except special nuclear material, yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material; and

(B) the tailings or wastes produced by the extraction or concentration of uranium or thorium from ore processed primarily for its source material content including discrete surface wastes resulting from uranium or thorium solution-extraction processes. Underground ore bodies depleted by these solution-extraction processes shall not constitute “byproduct material” within this definition.

(2) For the purposes of part 6, “byproduct material” shall mean all radioactive material regulated by the department. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135c. Definitions. As used in these regulations, each of the following terms shall have the meaning specified in this regulation: (a) “Cabinet radiography using radiation machines” means industrial radiography that is conducted in an enclosed, interlocked cabinet that prevents the radiation machine from operating unless all openings are securely closed and that is sufficiently shielded so that every location on the cabinet’s exterior meets the conditions for an unrestricted area as specified in K.A.R. 28-35-214a.

(b) “Cabinet X-ray system” means an X-ray system with the X-ray tube installed in an enclosure,

called a “cabinet,” that is independent from existing architectural structures except the floor on which the cabinet could be placed. The cabinet is intended for the following purposes:

(1) To contain at least that portion of a material being irradiated;

(2) to provide radiation attenuation; and

(3) to exclude personnel from the interior of the cabinet during the generation of X-rays.

This term shall include all X-ray systems designed primarily for the inspection of carry-on baggage at airline, railroad, and bus terminals, and in similar facilities. An X-ray tube that is used within a shielded part of a building, or X-ray equipment that may temporarily or occasionally incorporate portable shielding, shall not be considered a cabinet X-ray system.

(c) “Calendar quarter” means at least 12 but not more than 14 consecutive weeks. The first calendar quarter of each year shall begin in January. Subsequent calendar quarters shall be arranged so that no day is included in more than one calendar quarter and no day in any one year is omitted from inclusion within a calendar quarter. A licensee or registrant shall not change the method of determining and observing calendar quarters for purposes of these regulations except at the beginning of a calendar year.

(d) “Calibration” means the determination of either of the following:

(1) The response or reading of an instrument relative to a series of known radiation values over the range of the instrument; or

(2) the strength of a source of radiation relative to a standard.

(e) “Camera” means a radiographic exposure device.

(f) “Central axis of the beam” means a line passing through the virtual source and the center of the plane figure formed by the edge of the first beam-limiting device.

(g) “Cephalometric device” means a device intended for the radiographic visualization and measurement of the dimensions of the human head.

(h) “Certifiable cabinet X-ray system” means an existing, uncertified X-ray system that has been modified to meet the certification requirements specified in 21 C.F.R. 1020.40, as in effect on April 30, 1984.

(i) “Certified cabinet X-ray system” means a cabinet X-ray system that has been certified as manufactured and assembled as specified in 21 C.F.R. 1020.40, as in effect on April 30, 1984.

(j) "Certified components" means the components of X-ray systems that are subject to regulations promulgated under public law 90-602, the radiation control for health and safety act of 1968 as amended.

(k) "Certified system" means any X-ray system that has one or more certified components.

(l) "Certifying entity" means an independent certifying organization or state regulatory program meeting the requirements in K.A.R. 28-35-293.

(m) "Changeable filter" means any filter, exclusive of inherent filtration, that can be removed from the useful beam through any electronic, mechanical, or physical process.

(n) "Chelating agent" means amine polycarboxylic acids, hydroxycarboxylic acids, gluconic acids, and polycarboxylic acids.

(o) "Class" means a classification scheme for inhaled material according to its rate of clearance from the pulmonary region of the lung. For the purposes of these regulations, "lung class" and "inhalation class" shall be considered equivalent terms. Materials are classified as D, W, or Y, which applies to the following range of clearance half-times:

- (1) For class D, fewer than 10 days;
- (2) for class W, from 10 through 100 days; and
- (3) for class Y, more than 100 days.

(p) "Coefficient of variation" and "C" mean the ratio of the standard deviation to the mean value of a population of observations. This ratio is estimated using the following equation:

$$C = \frac{s}{\bar{x}} = \frac{1}{\bar{x}} \left(\sum_{i=1}^n \frac{(x_i - \bar{x})^2}{n-1} \right)^{1/2}$$

where

s = Estimated standard deviation of the population

\bar{x} = Mean value of observations in sample

x_i = *i*th observation in sample

(q) "Collective dose" means the sum of the individual doses received in a given period of time by a specified population from exposure to a specified source of radiation.

(r) "Collimator" means a radiation shield that is placed at the end of a guide tube or directly onto a radiographic exposure device to restrict the size of the

radiation beam when the sealed source is cranked into position to make a radiographic exposure.

(s) "Committed dose equivalent" and " $H_{T,50}$ " mean the dose equivalent to organs or tissues of reference (T) that will be received from an intake of radioactive material by an individual during the 50-year period following the intake.

(t) "Committed effective dose equivalent" and " $H_{E,50}$ " mean the sum of the products of the weighting factors applicable to each of the body organs or tissues that are irradiated and the committed dose equivalent to each of these organs or tissues ($H_{E,50} = \sum w_T H_{T,50}$).

(u) "Computed tomography" means the production of a tomogram by the acquisition and computer processing of X-ray transmission data.

(v) "Consortium" means an association of medical use licensees and a positron emission tomography (PET) radionuclide production facility in the same geographical area that jointly own or share the operation and maintenance cost of the PET radionuclide production facility that produces PET radionuclides for use in producing radioactive drugs within the consortium for noncommercial distributions among its associated members for medical use.

(w) "Contact therapy" means therapy in which the X-ray tube port is put in contact with, or within five centimeters of, the surface being treated.

(x) "Contact therapy system" means a therapeutic radiation machine with a short target-to-skin distance (TSD), usually less than five centimeters.

(y) "Control cable" means the cable that is connected to the source assembly and used to drive the source to and from the exposure location.

(z) "Control drive mechanism" means a device that enables the source assembly to be moved into and out of the exposure device.

(aa) "Controlled area" means an area outside of a restricted area but inside the site boundary, access to which can be limited by the licensee or registrant for any reason.

(bb) "Control panel" means that part of the X-ray system where the switches, knobs, push buttons, and other hardware necessary for manually setting the technique factors are mounted.

(cc) "Control tube" means a protective sheath for guiding the control cable. The control tube connects the control drive mechanism to the radiographic exposure device.

(dd) "Cooling curve" means the graphical relationship between the heat units stored and the cooling time.

(ee) “Curie” means a unit of activity. One curie (Ci) is the quantity of radioactive material that decays at the rate of 3.7×10^{10} transformations per second (tps). Commonly used submultiples of the curie are the millicurie and the microcurie. One millicurie ($_m\text{Ci}$) = 0.001 curie = 3.7×10^7 tps. One microcurie (μCi) = 0.000001 curie = 3.7×10^4 tps. (Authorized by K.S.A. 48-1607; implementing K.S.A. 2017 Supp. 48-1603 and K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-135d. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Deadman switch” means a switch constructed so that circuit closure can be maintained only by continuous pressure by the operator.

(b) “Declared pregnant woman” means a woman who has voluntarily informed her employer, in writing, of her pregnancy and the estimated date of delivery. The written declaration shall remain in effect until the declared pregnant woman withdraws the declaration in writing or is no longer pregnant.

(c) “Decommission” means to remove a facility or site safely from service and reduce residual radioactivity to a level that permits either of the following:

(1) The release of the property for unrestricted use and the termination of the license; or

(2) The release of the property under restricted conditions and the termination of the license.

(d) “Dedicated check source” means a radioactive source that is used to ensure the constant operation of a radiation detection or measurement device over several months or years. This source may also be used for other purposes.

(e) “Deep dose equivalent (H_d),” which applies to external whole body exposure, means the dose equivalent to a tissue depth of one centimeter ($1,000 \text{ mg/cm}^2$).

(f) “Deliberate misconduct” means a person’s intentional act or omission about which the person knows one of the following:

(1) If not detected, the act or omission would cause a licensee, a registrant, or an applicant to be in violation of any statute, regulation, or order or any term, condition, or limitation of any license issued by the secretary.

(2) The act or omission constitutes a violation of a requirement, procedure, instruction, contract, purchase order, or policy of a licensee, registrant, applicant, contractor, or subcontractor.

(3) The act or omission involves the person’s deliberate submission to the department, a licensee, a registrant, an applicant, or a licensee’s contractor or subcontractor of information relating to a licensee’s, a registrant’s, or an applicant’s operations that the person knows to be incomplete or inaccurate in some respect.

(g) “Dentistry” means the functions authorized by K.S.A. 65-1421 et seq., and amendments thereto.

(h) “Department” means the department of health and environment.

(i) “Depleted uranium” means source material uranium in which the isotope uranium 235 is less than 0.711 percent of the total weight of uranium present. This term shall not include special nuclear material.

(j) “Derived air concentration (DAC)” means the concentration of a given radionuclide in air that, if breathed by the reference man for a working year of 2,000 hours under conditions of light work, results in an intake of one ALI. For purposes of these regulations, the condition of light work is an inhalation rate of 1.2 cubic meters of air per hour for 2,000 hours in a year. The DAC are values specified in “appendices to part 4: standards for protection against radiation,” effective April 1994, which is adopted by reference in K.A.R. 28-35-135a.

(k) “Derived air concentration-hour (DAC-hour)” means the product of the concentration of radioactive material in air, expressed as a fraction or multiple of the derived air concentration for each radionuclide, and the time of exposure to that radionuclide, in hours. A licensee or registrant may assume that a total of 2,000 DAC-hours represents one ALI, which is equivalent to a committed effective dose equivalent of 5 rem (0.05 Sv).

(l) “Diagnostic clinical procedures manual” means a collection of written procedures that describes each method and other instructions and precautions by which the licensee performs diagnostic clinical procedures, each of which has been approved by the authorized user and includes the radiopharmaceutical, dosage, and route of administration.

(m) “Diagnostic source assembly” means the tube housing assembly with a beam-limiting device attached.

(n) “Diagnostic-type tube housing” means an X-ray tube housing constructed so that the leakage radiation, at a distance of one meter from the target, does not exceed 100 milliroentgens in one hour when the tube is operated at the maximum

rate of continuous tube current and the maximum rate of tube potential.

(o) “Diagnostic X-ray imaging system” means an assemblage of components for the generation, emission, and reception of X-rays and the transformation, storage, and visual display of the resultant X-ray image.

(p) “Diagnostic X-ray system” means an X-ray system designed for irradiation of any part of the human body for the purpose of diagnosis or visualization.

(q) “Direct scattered radiation” means scattered radiation that has been deviated in direction only by materials irradiated by the useful beam.

(r) “Dose” is a generic term that means the absorbed dose, dose equivalent, effective dose equivalent, committed dose equivalent, committed effective dose equivalent, total organ dose equivalent, or total effective dose equivalent. For purposes of these regulations, “radiation dose” shall be considered an equivalent term.

(s) “Dose equivalent (H_T)” means the product of the absorbed dose in tissue, quality factor, and all other necessary modifying factors at the location of interest. The units of dose equivalent are the rem and sievert (Sv).

(t) “Dose limits” means the permissible upper bounds of radiation doses established in accordance with these regulations. For purposes of these regulations, “limits” is an equivalent term.

(u) “Dose-monitoring system” means a system of devices for the detection, measurement, and display of quantities of radiation.

(v) “Dose monitor unit” means a unit response from the dose-monitoring system from which the absorbed dose can be calculated.

(w) “Dosimetry processor” means an individual or an organization that processes and evaluates individual monitoring devices in order to determine the radiation dose delivered to the monitoring devices.

(x) “Doubly encapsulated sealed source” means a sealed source in which the radioactive material is sealed within an inner capsule and that capsule is sealed within an outer capsule.

(y) “Drill” means a supervised, hands-on instruction period intended to test, develop, or maintain a specific emergency response capability. A drill may be a component of an exercise. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

28-35-135e. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Effective dose equivalent (H_E)” means the sum of the products of the dose equivalent to each organ or tissue (H_T) and the weighting factor (w_T) applicable to each of the body organs or tissues that are irradiated ($H_E = \sum w_T H_T$).

(b) “Embryo or fetus” means the developing human organism at any stage of development until the time of birth.

(c) “Emergency” means an event requiring prompt action to mitigate a threat to the health and safety of workers or the public or a threat of damage to the environment.

(d) “Emergency planning zone” means a geographic area surrounding a specific facility for which special planning and preparedness efforts are carried out to ensure that prompt and effective protective actions will reduce or minimize the impact of releases of radioactive material on public health and safety or the environment.

(e) “Energy compensation source (ECS)” means a small sealed source, with an activity not exceeding 3.7 Mbq (100 microcuries), used within a logging tool or other tool components to provide a reference standard to maintain the tool’s calibration when in use.

(f) “Entrance exposure rate” means the roentgens per unit of time at the point where the center of the useful beam enters any individual.

(g) “Entrance or access point” means any opening through which an individual or extremity of an individual could gain access to radiation areas or to licensed or registered radioactive materials. This term shall include entry and exit portals of sufficient size to permit human entry, irrespective of the intended use.

(h) “Evacuation” means the urgent removal of people from an area to avoid or reduce high-level, short-term exposure.

(i) “Event” means a situation reasonably discrete in time, location, and consequences.

(j) “Exercise” means a multifaceted activity that test the plans, procedures, adequacy of training, resources, and integrated capability of an emergency response system.

(k) “Existing equipment” means therapy systems subject to K.A.R. 28-35-250a that were manufactured on or before January 1, 1985.

(l) “Explosive material” means any chemical compound, mixture, or device that produces a substantial, instantaneous release of gas and

heat spontaneously or by contact with sparks or flame.

(m) "Exposure" means the quotient of dQ divided by dm . " dQ " is the absolute value of the total charge of the ions of one sign produced in air when all the electrons, negatrons, and positrons liberated by photons in a volume element of air having mass, expressed as " dm ," are completely stopped in air. The special unit of exposure is the roentgen (R). One roentgen equals 2.58×10^{-4} coulombs per kilogram of air.

(n) "Exposure head" means a device that locates the sealed source in the selected working position. For the purposes of these regulations, "source stop" is an equivalent term.

(o) "Exposure rate" means the exposure per unit of time, including roentgens per minute (R/min) and milliroentgens per hour (mR/hr).

(p) "External beam radiation therapy" means therapeutic irradiation in which the source of radiation is at a distance from the body.

(q) "External dose" means that portion of the dose equivalent received from any source of radiation outside the body.

(r) "Extremity dose" means the external dose equivalent to the hand, elbow, arm below the elbow, foot, knee, and leg below the knee.

(s) "Eye dose equivalent" means the external dose equivalent to the lens of the eye, at a tissue depth of 0.3 centimeter or 300 mg/cm^2 . (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135f. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Facility" means the specific location at which a person is licensed or registered to use radioactive material or radiation-producing devices. Separate physical locations shall be considered to be separate facilities.

(b) "Fail-safe characteristic" means a design feature that causes beam port shutters to close, or otherwise prevents emergence of the primary beam, upon the failure of a safety or warning device.

(c) "Field emission equipment" means equipment that uses an X-ray tube in which electron emission from the cathode is due solely to the action of an electric field.

(d) "Field-flattening filter" means a filter used to provide dose uniformity over the area of a useful beam of X-rays at a specified depth.

(e) "Field size" means the dimensions along the major axes of an area in a plane perpendicular to the specified direction of the beam of incident radiation at the normal treatment distance. Field size is defined by the intersection of the major axes and the 50 percent isodose line. Material shall be placed in the beam so that the maximum dose is produced at the normal treatment distance when the field size is being determined.

(f) "Field station" means a facility where radioactive sources or radiation-processing devices are stored or used and from which equipment is dispatched to temporary job sites.

(g) "Filter" means material placed in the path of the useful beam of X-rays to selectively absorb the less penetrating radiation.

(h) "Fluoroscopic imaging assembly" means a component that comprises a reception system in which X-ray photons produce a fluoroscopic image. This term shall include equipment housings, any electrical interlocks, the primary protective barrier, and structural material providing linkage between the image receptor and the diagnostic source assembly.

(i) "Focal spot" means the area projected on the anode of the X-ray tube by the electrons accelerated from the cathode and from which the useful beam originates.

(j) "Full-cost reimbursement" means reimbursement of the total cost of staff time and any contractual support services expended. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135g. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Gantry" means that part of the system supporting and allowing possible movements of the radiation head.

(b) "General emergency" means that an accident has occurred or is in progress, involving actual or imminent catastrophic reduction of facility safety systems with the potential for loss of containment or confinement integrity or release of radioactive material that can be reasonably expected to exceed off-site protective action guides.

(c) "Generally applicable environmental radiation standards" means standards issued by the U.S. environmental protection agency (EPA) under the authority of the atomic energy act of 1954, as amended, that impose limits on radiation exposures or levels, or concentrations or quantities of

radioactive material, in the general environment outside the boundaries of locations under the control of persons possessing or using radioactive material.

(d) "General purpose radiographic X-ray system" means any radiographic X-ray system that, by design, is not limited to the radiographic examination of specific anatomical regions.

(e) "Gonadal shield" means a protective barrier for the testes or ovaries.

(f) "Gray (Gy)" means the SI unit of absorbed dose. One gray is equal to an absorbed dose of one joule per kilogram. One gray is also equal to 100 rads.

(g) "Group I" means prepared radiopharmaceuticals that are used for diagnostic studies involving measurements of uptake, dilution, and excretion, as specified in 10 CFR 35.100, which is adopted by reference in K.A.R. 28-35-264.

(h) "Group II" means prepared radiopharmaceuticals that are used for diagnostic studies involving imaging and tumor localizations and any radioactive material in a radiopharmaceutical prepared from a group II kit or providing a single dose. With respect to radiopharmaceuticals prepared from group II kits or as single doses, group II shall refer to the unsealed byproduct material specified in 10 CFR 35.200, which is adopted by reference in K.A.R. 28-35-264.

(i) "Group III" means generators and reagent kits that are used following the manufacturer's instructions for the preparation of diagnostic radiopharmaceuticals. With respect to generators and reagent kits, group III shall refer to the unsealed byproduct material specified in 10 CFR 35.200, which is adopted by reference in K.A.R. 28-35-264.

(j) "Group IV" means prepared radiopharmaceuticals that are used for certain therapeutic uses that do not normally require hospitalization for purposes of radiation safety. With respect to uses that do not normally require hospitalization, group IV shall refer to the unsealed byproduct material specified in 10 CFR 35.300, which is adopted by reference in K.A.R. 28-35-264.

(k) "Group V" means prepared radiopharmaceuticals for certain therapeutic uses that normally require hospitalization for purposes of radiation safety. With respect to uses that normally require hospitalization, group V shall refer to unsealed byproduct material specified in 10 CFR 35.300, which is adopted by reference in K.A.R. 28-35-264.

(l) "Group VI" means sources and devices containing radioactive material used for medical diag-

nosis and therapy, as specified in 10 CFR 35.400, which is adopted by reference in K.A.R. 28-35-264.

(m) "Guide tube" means a flexible or rigid tube for guiding the source assembly and the attached control cable from the exposure device to the exposure head. This term may include the connections necessary for attachment to the exposure device and to the exposure head. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135h. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Half-life" means the time required for the activity of any given radioisotope to decay to one-half of its original activity.

(b) "Half-value layer (HVL)" means the thickness of specified material that attenuates the beam of radiation to an extent that the exposure rate is reduced to one-half of its original value.

(c) "Hands-on experience," as applied to industrial radiology, means experience in all areas considered to be directly involved in the radiography process. This term shall include taking radiographs, the calibration of survey instruments, operational and performance testing of survey instruments and devices, film development, the posting of radiation areas, transporting radiography equipment, the posting of records and radiation area surveillance, and other areas as applicable. A disproportionate amount of time spent in only one or two of these areas shall not be counted toward the 2,000 hours of hands-on experience required for a radiation safety officer or a radiographer.

(d) "Hazardous waste" shall have the meaning assigned in K.A.R. 28-31-3.

(e) "Healing arts" means the activities authorized in K.S.A. 65-2801 et seq., and amendments thereto.

(f) "Healing arts screening" means the testing of human beings using X-ray machines for the detection or evaluation of health indications when the test is performed without any prior examination and without any specific and individual order by a licensed practitioner of the healing arts who is legally authorized to perform examinations and to prescribe X-ray tests for the purpose of diagnosis or treatment.

(g) "Heat unit" means a unit of energy equal to the product of the peak kilovoltage, milliamperes, and seconds (kVp × mA × second).

(h) "High dose-rate remote afterloader" means a brachytherapy device that remotely delivers a dose rate in excess of 12 grays (1,200 rads) per hour at the point or surface where the dose is prescribed.

(i) "High-radiation area" means any area that is accessible to individuals, in which there exists radiation at such levels that a major portion of the body could receive, in any one hour and at 30 centimeters from the source of the radiation or any surface that the radiation penetrates, a dose to the whole body in excess of 100 millirems. For purposes of these regulations, rooms or areas in which diagnostic X-ray systems are used for healing arts purposes shall not be considered high-radiation areas.

(j) "Human use" means the intentional internal or external administration of radiation or radioactive material to any individual. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135i. Definitions. As used in these regulations, each of the following terms shall have the meaning specified in this regulation: (a) "Image intensifier" means a device that instantaneously converts, by means of photoemissive surfaces and electronic circuitry, an X-ray pattern into a light pattern of greater intensity than would have been provided by the original X-ray pattern.

(b) "Image receptor" means any device, including a fluorescent screen and radiographic film, that transforms incident X-ray photons into a visible image or into another form that can be made into a visible image by further transformations.

(c) "Image receptor support," for mammographic systems, means that part of the system designed to support the image receptor in a horizontal plane during a mammographic examination.

(d) "Immediate" means within not more than 15 minutes or as otherwise defined in a license condition.

(e) "Incident" means an individual event or series of related events that caused or threatened to cause any violation of these regulations or license conditions. For the purposes of part 13, "incident" shall mean any unintended event involving radioactive material for which the public dose is a fraction of regulatory limits and safety provisions are sufficient, but further degradation of safety systems could lead to an accident.

(f) "Independent certifying organization" means an independent organization that meets all of the criteria specified in K.A.R. 28-35-293.

(g) "Indian tribe" and "tribe" mean any Indian tribe, band, nation, or other organized group or community of Indians recognized as eligible for the services provided to Indians by the secretary of the United States department of the interior because of their status as Indians.

(h) "Indian tribal official" and "tribal official" mean the highest-ranking individual who represents tribal leadership, including the chief, president, and tribal council leader.

(i) "Individual" means any human being.

(j) "Individual monitoring" means the assessment of either of the following:

(1) A dose equivalent by the use of individual-monitoring devices or by the use of survey data; or

(2) a committed effective dose equivalent determined by bioassay or by computation of the number of DAC-hours to which an individual is exposed.

(k) "Individual-monitoring device" means any device designed to be worn by a single individual for the assessment of dose equivalent. "Individual-monitoring device" shall include any film badge, thermoluminescent dosimeter (TLD), optically stimulated dosimeter, pocket ionization chamber, and personal air-sampling device. For purposes of these regulations, "personnel dosimeter" and "dosimeter" shall be considered terms equivalent to "individual-monitoring device."

(l) "Industrial radiography" means the examination of the structure of materials by nondestructive methods utilizing sources of radiation.

(m) "Inherent filtration" means the filtration permanently mounted in the useful beam, including the window of the X-ray tube and any permanent tube or source enclosure.

(n) "Injection tool" means a device used for controlled subsurface injection of radioactive tracer material.

(o) "Inspection" means an official examination or observation that may include tests, surveys, and monitoring to determine compliance with federal rules, state regulations, orders, requirements, and license and registration conditions.

(p) "Installation" means the location where one or more sources of radiation are used, operated, or stored.

(q) "Interlock" means a device for precluding access by an individual to an area of radiation hazard without warning, either by preventing admission or by automatically removing the hazards.

(r) "Internal dose" means that portion of the dose equivalent received from radioactive material taken into the body.

(s) “Interruption of irradiation” means the stopping of irradiation with the possibility of continuing irradiation without the resetting of operating conditions at the control panel.

(t) “Ionizing radiation” means radiation capable of producing an ionization event, including gamma rays and X-rays, alpha and beta particles, high-speed electrons, neutrons, and other nuclear particles.

(u) “Irradiation” means the exposure of matter to ionizing radiation.

(v) “Irradiator” means a facility that uses radioactive sealed sources for the irradiation of objects or materials and in which radiation dose rates exceeding five grays (500 rads) per hour exist at one meter from the sealed radioactive sources in air or water, as applicable for the irradiator type. This term shall not include any irradiator in which both the sealed source and the area subject to irradiation are contained within a device and are not accessible to personnel.

(w) “Irradiator operator” means an individual who has successfully completed the required training and testing and is authorized by the terms of the license to operate an irradiator without a supervisor present.

(x) “Irretrievable well-logging source” means any sealed source containing licensed material that is pulled off or not connected to the wireline that suspends the source in the well and for which all reasonable effort at recovery has been expended.

(y) “Isocenter” means a fixed point in space that is located at the center of the smallest sphere through which the central axis of the beams passes under all conditions. (Authorized by K.S.A. 48-1607; implementing K.S.A. 2017 Supp. 48-1603 and K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-135k. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Kilovolts (kV)” means the energy equal to that acquired by a particle with one electron charge in passing through a potential difference of 1,000 volts in a vacuum.

(b) “Kilovolts peak (kVp)” has the meaning assigned to “peak tube potential.”

(c) “kWs” means kilowatt second. This term is calculated using the following equation:

$$\text{kWs} = (X)\text{kV} \times (Y)\text{mA} \times Z(\text{s}) \times \frac{\text{kWs}}{10^3\text{kV} \times \text{mA} \times \text{s}} = \frac{XYZ \text{ kWs}}{10^3}$$

(Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135l. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Lead equivalent” means the thickness of lead affording the same attenuation, under specified conditions, as the material in question.

(b) “Leakage radiation” means radiation emanating from the device source assembly, except for the following:

(1) The useful beam; and

(2) radiation produced when the exposure switch or timer is not activated for diagnosis or therapy.

(c) “Leakage technique factors” means the technique factors associated with the tube housing assembly that are used in measuring leakage radiation. The leakage technique factors shall be defined as follows:

(1) For diagnostic source assemblies intended for capacitor energy storage equipment, the maximum rated number of exposures in an hour for operation at the maximum rated peak tube potential, with the quantity of charge per exposure being 10 millicoulombs or the minimum obtainable from the unit, whichever is larger;

(2) for diagnostic source assemblies intended for field emission equipment rated for pulsed operation, the maximum rated number of X-ray pulses in an hour for operation at the maximum rated peak tube potential; and

(3) for all other diagnostic or therapeutic source assemblies, the maximum rated peak tube potential and the maximum rated continuous tube current for the maximum rated peak tube potential.

(d) “License” means a document issued in accordance with these regulations specifying the conditions of use of radioactive material.

(e) “Licensed or registered material” means radioactive material received, possessed, used, transferred, or disposed of under a general or specific license or registration issued by the department.

(f) “Licensee” means any person who is licensed in accordance with these regulations.

(g) “Licensing state” means any state that has been granted final designation by the conference of radiation control program directors, inc., for the regulatory control of NARM, as defined in K.A.R. 28-35-135n.

(h) "Light field" means that area of the intersection of the light beam from the beam-limiting device and one plane in the set of planes parallel to and including the plane of the image receptor, whose perimeter is the locus of points at which the illumination is one-fourth of the maximum in the intersection.

(i) "Line-voltage regulation" means the difference between the no-load and the load line potentials, expressed as a percent of the load line potential, using the following equation:

$$\text{Percent line-voltage regulation} = 100 (V_n - V_l) / V_l$$

where

V_n = No-load line potential and

V_l = Load line potential.

(j) "Local component" means any part of an analytical X-ray system. This term shall include components that are struck by X-rays, including radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors, and shielding. This term shall not include power supplies, transformers, amplifiers, readout devices, and control panels.

(k) "Logging supervisor" means the individual who uses sources of radiation or provides personal supervision of the utilization of sources of radiation at a well site.

(l) "Logging tool" means a device used subsurface to perform well logging.

(m) "Lost or missing licensed or registered source of radiation" means a licensed or registered source of radiation whose location is unknown. This term shall include licensed or registered material that has been shipped but has not reached its planned destination and whose location cannot be readily traced in the transportation system.

(n) "Lot tolerance percent defective" means the poorest quality, expressed as the percentage of defective units, in an individual inspection lot that may be accepted.

(o) "Low dose-rate remote afterloader" means a brachytherapy device that remotely delivers a dose rate of less than or equal to two grays per hour at the point or surface where the dose is prescribed. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended March 18, 2011.)

28-35-135m. Definitions. As used in these regulations, each of following terms shall have the meaning assigned in this regulation: (a) "mA" means milliamperere.

(b) "Major processor" means a user processing, handling, or manufacturing radioactive material exceeding type A quantities as unsealed sources or material, or exceeding four times the type B quantities as sealed sources. This term shall not include nuclear medicine programs, universities, industrial radiographers, and small industrial programs. Type A and B quantities are specified in K.A.R. 28-35-221b of these regulations.

(c) "Management" means the chief executive officer or other individual having the authority to manage, direct, or administer the licensee's activities, or that person's delegate or delegates.

(d) "Manual brachytherapy" means a type of brachytherapy in which the brachytherapy sources, including seeds and ribbons, are manually placed topically on or inserted either into the body cavities that are in close proximity to a treatment site or directly into the tissue volume.

(e) "mAs" means the product of milliamperes and seconds.

(f) "Maximum line current" means the root-mean-square current in the supply line of an X-ray machine operating at its maximum rating.

(g) "Medical event" means an event that meets the criteria specified in part 6 of these regulations.

(h) "Medical institution" means an organization in which several medical disciplines are practiced.

(i) "Medical use" means the intentional internal or external administration of radioactive material, or radiation, to humans in the practice of the healing arts.

(j) "Medium dose-rate remote afterloader" means a brachytherapy device that remotely delivers a dose rate of greater than two grays, but less than 12 grays per hour at the point or surface where the dose is prescribed.

(k) "Megavolt (MV)" means the energy equal to that acquired by a particle with one electron charge in passing through a potential difference of one million volts in a vacuum.

(l) "Member of the public" means an individual, except when that individual is receiving an occupational dose.

(m) "Mineral logging" means logging performed for the purpose of mineral exploration other than oil or gas.

(n) "Minor" means an individual younger than 18 years of age.

(o) "Mobile nuclear medicine service" means the transportation and medical use of radioactive material.

(p) "Mobile X-ray equipment" means X-ray equipment mounted on a permanent base with

wheels or casters, or both, for moving while completely assembled. This term shall include X-ray equipment mounted in a vehicle.

(q) "Monitoring" means the measurement of radiation, radioactive material concentrations, surface area activities, or quantities of radioactive material and the use of the results of these measurements to evaluate potential exposures and doses. For purposes of these regulations, "radiation monitoring" and "radiation protection monitoring" shall be considered terms equivalent to "monitoring."

(r) "Moving beam therapy" means radiation therapy with relative displacement of the useful beam and the patient during irradiation, including therapy, skip therapy, and rotational therapy. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135n. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "NARM" means any naturally occurring or

accelerator-produced radioactive material, not including byproduct, source, or special nuclear material.

(b) "Nationally tracked source" means a sealed source containing any quantity of radioactive material equal to or greater than any threshold listed in the table in this subsection. For purposes of the definition of "nationally tracked source," "sealed source" shall be defined as radioactive material that is sealed in a capsule or closely bonded, that is in a solid form, and that is not exempt from regulatory control. For purposes of the definition of "nationally tracked source," "sealed source" shall not include any radioactive material encapsulated solely for disposal and any nuclear material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet. Category I nationally tracked sources contain radioactive material in quantities equal to or greater than the category 1 threshold. Category 2 nationally tracked sources contain radioactive material in quantities equal to or greater than the category 2 threshold but less than the category 1 threshold.

Nationally tracked source thresholds

Radioactive material	Category 1 (TBq)*	Category 1 (Ci)**	Category 2 (TBq)*	Category 2 (Ci)**
Actinium-227	20	540	0.2	5.4
Americium-241	60	1,600	0.6	16
Americium-241/Be	60	1,600	0.6	16
Californium-252	20	540	0.2	5.4
Cobalt-60	30	810	0.3	8.1
Curium-244	50	1,400	0.5	14
Cesium-137	100	2,700	1	27
Gadolinium-153	1,000	27,000	10	270
Iridium-192	80	2,200	0.8	22
Plutonium-238	60	1,600	0.6	16
Plutonium-239/Be	60	1,600	0.6	16
Polonium-210	60	1,600	0.6	16
Promethium-147	40,000	1,100,000	400	11,000
Radium-226	40	1,100	0.4	11
Selenium-75	200	5,400	2	54
Strontium-90	1,000	27,000	10	270
Thorium-228	20	540	0.2	5.4
Thorium-229	20	540	0.2	5.4
Thulium-170	20,000	540,000	200	5,400
Ytterbium-169	300	8,100	3	81

* The Terabecquerel (TBq) values are the regulatory standard.

** The curie (Ci) values specified are obtained by converting from the TBq value. The curie values are provided for practical usefulness only and are rounded after conversion.

(c) "Natural radioactivity" means the radioactivity of naturally occurring nuclides.

(d) "New equipment" means any system subject to K.A.R. 28-35-249 that was manufactured after January 1, 1985.

(e) "Nonionizing radiation" means radiation not capable of producing ionization, including sound and radio waves and visible, infrared, or ultraviolet light.

(f) "Non-stochastic effect" means a health effect, the severity of which varies with the dose and for which a threshold is believed to exist. For purposes of these regulations, "deterministic effect" shall be considered an equivalent term.

(g) "Normal operating procedures" means operating procedures for conditions suitable for routine purposes with shielding and barriers in place, including routine alignment procedures. This term shall not include maintenance procedures and routine and emergency radiation safety considerations.

(h) "Normal treatment distance" means either of the following:

(1) For electron irradiation, the distance from the virtual source to the surface along the central axis of the useful beam, as specified by the manufacturer; or

(2) for X-ray irradiation, the distance from the virtual source to the isocenter along the central axis of the useful beam. For non-isocentric equipment, this distance shall be the distance specified by the manufacturer.

(i) "Nuclear regulatory commission (NRC)" means the U.S. nuclear regulatory commission or its duly authorized representatives.

(j) "NVLAP" means the national voluntary laboratory accreditation program. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

28-35-135o. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Occupational dose" means the dose received by an individual in the course of employment in which the individual's assigned duties involve exposure to radiation or radioactive material from licensed or unlicensed sources of radiation. The term "occupational dose" shall not include any dose received under any of the following circumstances:

(1) As background radiation;

(2) as a patient from medical practices;

(3) from voluntary participation in medical research programs; or

(4) as a member of the public.

(b) "Off-site response organization" means any non-licensee off-site organization that could be needed to respond to an emergency, including local fire, police, ambulance, and hospital emergency management services.

(c) "Open-beam configuration" means an X-ray system in which an individual could accidentally place some part of the individual's body in the primary beam path during normal operation.

(d) "Output" means the exposure rate or dose rate, or a quantity related in a known manner to these rates from a teletherapy unit for a specified set of exposure conditions. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135p. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Package" means a container and packing material, together with the radioactive contents, as presented for transport.

(b) "Panoramic dry-source-storage irradiator" means an irradiator in which the irradiations occur in air in areas potentially accessible to personnel and in which the sources are stored in shields made of solid materials. This term shall include beam-type dry-source-storage irradiators in which one narrow beam of radiation is produced for performing irradiations.

(c) "Panoramic wet-source-storage irradiator" means an irradiator in which the irradiations occur in air in areas potentially accessible to personnel and in which the sources are stored underwater in a storage pool.

(d) "Particle accelerator" means any machine capable of accelerating electrons, protons, deuterons, or other charged particles in a vacuum and of discharging the resultant particulate or other radiation into a medium at energies usually in excess of one mega electron volt (MeV).

(e) "Patient" means an individual subjected to examination, diagnosis, or treatment.

(f) "Patient intervention" means any action by the patient or human research subject, whether intentional or unintentional, that affects the prescribed treatment. This term shall include dislodging or removing any treatment device and prematurely terminating the prescribed treatment.

(g) “Peak tube potential” means the maximum value of the potential differences across an X-ray tube during an exposure. This term is also referred to as “kilovolts peak (kVp).”

(h) “Periodic quality-assurance check” means a procedure that is performed to ensure that the previous calibration continues to be valid.

(i) “Permanent radiographic installation” means an enclosed, shielded room, cell, or vault, not located at a temporary job site, in which radiography is performed.

(j) “Person” means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this or any other state, or political subdivision or agency, excluding federal government agencies.

(k) “Personnel-monitoring equipment” means any device designed to be carried or worn by an individual and used to measure the exposure of that individual to radiation. For purposes of these regulations, “PMD,” which means “personnel-monitoring device,” shall be an equivalent term.

(l) “Personnel supervision” means guidance and instruction by the supervisor who is physically present at the job site and who is watching the performance of the operation in such proximity that contact can be maintained and immediate assistance given, as required.

(m) “Phantom” means a volume of material behaving in a manner similar to that of tissue, with respect to the attenuation and scattering of radiation.

(n) “Pharmacist” means any individual licensed to practice pharmacy under K.S.A. 65-1626 et seq., and amendments thereto.

(o) “Phototimer” means a device used for controlling radiation exposures to image receptors by limiting the amount of radiation that reaches a radiation-monitoring device or devices. The radiation-monitoring device or devices are part of an electronic circuit that controls the period of time during which the tube is activated. For purposes of these regulations, “automatic exposure control” is an equivalent term.

(p) “Physician” means any individual licensed to practice the healing arts specified in K.S.A. 65-2869, K.S.A. 65-2870, or K.S.A. 65-2871, and amendments thereto.

(q) “Planned special exposure” means an infrequent exposure to radiation, separate from and in addition to the annual occupational dose limits.

(r) “Podiatry” means the activities authorized

and specified in K.S.A. 65-2001 et seq., and amendments thereto.

(s) “Pool irradiator” means any irradiator at which the sources are stored or used in a pool of water, including panoramic wet-source-storage irradiators and underwater irradiators.

(t) “Portable X-ray equipment” means X-ray equipment designed to be hand-carried.

(u) “Position indication device (PID)” means a device on dental X-ray equipment used to indicate the beam position and to establish a definite source-to-skin-surface distance. A PID can incorporate or serve as a beam-limiting device.

(v) “Positive beam limitation” means the automatic or semiautomatic adjustment of an X-ray beam to the size of the selected image receptor. Exposures cannot be made without this adjustment.

(w) “Practical examination” means a demonstration by personnel through the application of safety principles, including the use of all procedures and equipment.

(x) “Preceptor” means an individual who provides or directs the training and experience required for another individual to become an authorized user, an authorized medical physicist, an authorized nuclear pharmacist, or a radiation safety officer.

(y) “Prescribed dosage” means the quantity of radiopharmaceutical activity documented as follows:

(1) In a written directive; or

(2) either in the diagnostic clinical procedures manual or in any appropriate record in accordance with the directions of the authorized user for diagnostic procedures.

(z) “Prescribed dose” means any of the following:

(1) For gamma stereotactic radiosurgery, the total dose as documented in the written directive;

(2) for teletherapy, the total dose and dose per fraction as documented in the written directive; or

(3) for brachytherapy, either the total source strength and exposure time or the total dose, as documented in the written directive.

This term shall not apply to part 6 of these regulations.

(aa) “Primary beam” means ionizing radiation that passes through an aperture of the source housing by a direct path from the X-ray tube or a radioactive source located in the radiation source housing.

(bb) “Primary dose-monitoring system” means a system that monitors the useful beam during irradiation and that terminates irradiation when

a preselected number of dose monitor units are acquired.

(cc) "Primary protective barrier" means a barrier of attenuating materials used to reduce the useful X-ray beam to the required degree.

(dd) "Product conveyor system" means a system for moving the product to be irradiated to, from, and within the area where irradiation takes place.

(ee) "Projected dose" means a future dose calculated for a specified time period on the basis of estimated or measured initial concentrations of radionuclides or exposure rates and in the absence of protective actions.

(ff) "Protective action" means an action taken by members of the public to protect themselves from radiation from an accident involving radioactive material. This term may include sheltering, evacuation, relocation, control of access, administration of a radioprotective drug, decontamination of persons, decontamination of land or property, and controls placed on food or water.

(gg) "Protective action guide" means a projected dose from an accidental release of radioactive material at which protective action may be considered.

(hh) "Protective apron" means an apron made of radiation-absorbing materials used to reduce radiation exposure.

(ii) "Protective barrier" means a barrier of attenuating materials used to reduce radiation exposure to the required degree.

(jj) "Protective glove" means a glove made of radiation-absorbing materials used to reduce radiation exposure.

(kk) "Public dose" means the dose received by a member of the public from exposure to radiation, radioactive material released by a licensee or registrant, or any other source of radiation under the control of the licensee or registrant. This term shall not include an occupational dose, a dose received from background radiation, a dose received as a patient from medical practices, and a dose received from voluntary participation in a medical research program.

(ll) "Pulse dose-rate remote afterloader" means a special type of remote afterloading brachytherapy device that meets all of the following conditions:

(1) The device uses a single source capable of delivering more than 12 grays per hour.

(2) The source activity of the device is approximately one-tenth of the activity of typical high dose-rate remote afterloader sources.

(3) The device is used to stimulate the radiobiology of a low dose-rate treatment by inserting the source for a given fraction of each hour.

(mm) "Pyrophoric liquid" means any liquid that ignites spontaneously in dry or moist air at or below 130°F (54.4°C).

(nn) "Pyrophoric solid" means any solid material, other than one classified as an explosive, that under normal conditions results in the following:

(1) Is liable to cause fires through friction or retained heat from manufacturing or processing;

(2) is ignited readily; and

(3) if ignited, burns vigorously and persistently enough to create a serious transportation, handling, or disposal hazard, including spontaneously combustible and water-reactive materials. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

28-35-135q. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Qualified expert" means an individual having the knowledge and training to measure ionizing radiation, to evaluate safety techniques, and to advise regarding radiation protection needs.

(1) This term shall include any individual certified in the appropriate field by any of the following, or an individual with equivalent qualifications as determined by the secretary:

(A) The American board of radiology;

(B) the American board of health physics; or

(C) the American board of medical physics.

(2) With reference to the calibration of radiation therapy equipment, this term shall include any individual having, in addition to the qualifications specified in paragraph (1) of this subsection, training and experience in the clinical applications of radiation physics to radiation therapy, including any individual certified in either of the following, or an individual with equivalent qualifications as determined by the secretary:

(A) Therapeutic radiological physics by the American board of radiology; or

(B) X-ray and radium physics by the American board of radiology.

(b) "Quality factor (Q)" means the modifying factor, as listed in tables I and II in K.A.R. 28-35-144a, used to derive the dose equivalent from the absorbed dose.

(c) "Quarter" means a period of time that is equal to one-fourth of the year and is approximately 13

consecutive weeks. The beginning of the first quarter in each year shall coincide with the starting date of the year, and no day shall be omitted or duplicated in consecutive quarters. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135r. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Rad” means the unit of absorbed dose. One rad equals one-hundredth of a joule per kilogram of material or the absorption of 100 ergs per gram of material. One millirad (mrad) equals 0.001 rad.

(b) “Radiation area” means any area that is accessible to individuals, in which there exists radiation at such levels that, at 30 centimeters from the source of the radiation or any surface that the radiation penetrates, an individual could receive a dose equivalent in excess of five millirems in one hour.

(c) “Radiation detector” means a device that, in the presence of radiation, provides a signal or other indication suitable for use in measuring one or more quantities of incident radiation.

(d) “Radiation head” means the structure from which the useful beam emerges.

(e) “Radiation machine” means either of the following:

(1) Any device that is primarily intended to produce, and is capable of producing, ionizing radiation; or

(2) any device that is not primarily intended to produce, but does produce, ionizing radiation at a level greater than 0.5 mR/hr at any point five centimeters from its surface.

This term shall not mean any device that produces ionizing radiation only by use of radioactive materials.

(f) “Radiation room” means a shielded room in which irradiations take place. Underwater irradiations shall not be deemed to have radiation rooms.

(g) “Radiation safety officer” means an individual directly responsible for radiation protection. This term shall not apply to part 6 of these regulations.

(h) “Radiation therapy simulation system” means a radiographic or fluoroscopic X-ray system intended for localizing the volume of tissue to be exposed during radiation therapy and confirming the position and size of the therapeutic irradiation field.

(i) “Radioactive marker” means radioactive material placed subsurface or on a structure intend-

ed for subsurface use for the purpose of depth determination or direction orientation.

(j) “Radioactive material” means any material, in any chemical or physical form, that emits radiation spontaneously.

(k) “Radioactivity” means the disintegration of unstable atomic nuclei by the emission of radiation.

(l) “Radiograph” means an image receptor on which the image is created directly or indirectly by an X-ray pattern that results in a permanent record.

(m) “Radiographer” means any individual who meets the following conditions:

(1) Performs nonmedical radiographic operations or, while in attendance at the site where those radiographic operations are being performed, personally supervises the operations; and

(2) is responsible to the licensee or registrant, or both, for ensuring compliance with the requirements of these regulations or the conditions of the license, including any specific authorization by the department to provide training to radiographic trainees.

(n) “Radiographer certification” means the written approval received from a certifying entity stating that an individual has satisfactorily met the radiation safety, testing, and experience criteria.

(o) “Radiographer’s assistant” means any individual who, under the personal supervision of a radiographer, uses radiation machines, radiographic exposure devices, sealed sources, or related handling tools or survey instruments in industrial radiography.

(p) “Radiographic exposure device” means any instrument with a sealed source fastened or contained in the instrument in which the sealed source or shielding of the source can be moved or otherwise changed from a shielded to unshielded position for purposes of making a radiographic exposure.

(q) “Radiographic imaging system” means any system that produces a permanent or semipermanent image on an image receptor by the action of ionizing radiation.

(r) “Radiographic operations” means all activities performed with a radiographic exposure device or with a radiation machine. These activities shall include the following:

(1) Transporting, except by common or contract carriers;

(2) storing at a temporary job site;

(3) performing surveys to confirm the adequacy of boundaries;

- (4) setting up equipment; and
- (5) any activity performed inside restricted area boundaries.

This term shall not include transporting a radiation machine.

(s) "Radiological physicist" means an individual who meets at least one of the following requirements:

(1) Is certified by the American board of radiology in any of the following:

- (A) Therapeutic radiological physics;
- (B) roentgen ray and gamma ray physics;
- (C) X-ray and radium physics; or
- (D) radiological physics;

(2) is certified by the American board of medical physics in radiation oncology physics; or

(3) (A) Holds a master's or doctoral degree in physics, biophysics, radiological physics, or health physics; and

(B) has completed one year of full-time training in therapeutic radiological physics and an additional year of full-time work experience under the supervision of teletherapy physicist at a medical institution that includes duties that involve performing calibration and spot checks of a medical accelerator or a sealed source teletherapy unit.

(t) "Rating" means the operating limits specified by the component manufacturer.

(u) "Recordable event" means the administration of any of the following:

(1) A radiopharmaceutical or radiation without a written directive if a written directive is required;

(2) a radiopharmaceutical or radiation if a written directive is required, without the daily recording of each administered radiopharmaceutical dosage or radiation dose in the appropriate record;

(3) a radiopharmaceutical dosage greater than 1.11 megabecquerels (30 μ Ci) of sodium iodide I-125 or I-131 if the administered dosage of both differs from the prescribed dosage by more than 10 percent of the prescribed dosage and if the difference between the administered dosage and the prescribed dosage exceeds 555 kilobecquerels (15 μ Ci);

(4) a therapeutic radiopharmaceutical dosage, other than sodium iodide I-125 or I-131, if the administered dosage differs from the prescribed dosage by more than 10 percent of the prescribed dosage;

(5) a teletherapy radiation dose if the calculated weekly administered dose exceeds the weekly prescribed dose by 15 percent or more of the weekly prescribed dose; or

(6) a brachytherapy radiation dose if the calculated administered dose differs from the prescribed dose by more than 10 percent of the prescribed dose.

(v) "Recording" means producing a permanent form of an image resulting from X-ray photons.

(w) "Redundant beam-monitoring system" means a combination of two dose-monitoring systems in which each system is designed to terminate irradiation in accordance with a preselected number of dose monitor units.

(x) "Reference man" means a hypothetical aggregation of human physical and physiological characteristics determined by international consensus. These characteristics may be used by researchers and public health workers to standardize the results of experiments and to relate biological damage to a common base.

(y) "Registrable item" means any radiation machine.

(z) "Registrant" means any person who is registered with the department and is legally obligated to register with the department according to these regulations.

(aa) "Registration" means the process of completing and filing forms with the department as required by these regulations.

(bb) "Relocation" means the removal or, after a plume has passed, the continued exclusion of people from contaminated areas to avoid a chronic radiation dose.

(cc) "Rem" means the special unit of any of the quantities expressed as dose equivalent. One millirem (mrem) equals 0.001 rem.

(dd) "Research and development" means either of the following:

(1) Theoretical analysis, exploration, or experimentation; or

(2) the extension of investigating findings and theories of a scientific or technical nature into practical application for experimental purposes, including the experimental production and testing of models, devices, equipment, materials, and processes.

Research and development, as used in these regulations, shall not include the internal or external administration of radiation or radioactive materials to any individual.

(ee) "Respiratory protective equipment" means any apparatus used to reduce an individual's intake of airborne radioactive materials.

(ff) "Response time" means the time required for an instrument system to reach 90 percent of

its final reading when the radiation-sensitive volume of the instrument system is exposed to a step change in radiation flux from zero to a level sufficient to provide a steady-state midscale reading.

(gg) "Restricted area" means any area to which the access is limited by the licensee or registrant to protect individuals against undue risks from exposure to sources of radiation. This term shall not include areas used as residential quarters. However, separate rooms in a residential building may be set apart and designated as a restricted area. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

28-35-135s. Definitions. As used in these regulations, each of the following terms shall have the meaning specified in this regulation: (a) "Sanitary sewerage" means a system of public sewers to carry off waste water and refuse. This term shall exclude sewage treatment facilities, septic tanks, and leach fields owned or operated by the licensee or registrant.

(b) "Scattered radiation" means radiation that, during its passage through matter, is deviated in direction.

(c) "Sealed source" means any radioactive material that is permanently encased in a capsule designed to prevent the leakage or escape of the radioactive material.

(d) "Secondary dose-monitoring system" means a system that terminates irradiation if the primary system fails.

(e) "Secondary protective barrier" means a barrier sufficient to attenuate stray radiation to the required degree.

(f) "Secretary" means secretary of the department of health and environment.

(g) "Seismic area" means any area where the probability of a horizontal acceleration in rock of more than 0.3 times the acceleration of gravity in 250 years is greater than 10 percent, as designated by the U.S. geological survey.

(h) "Shallow dose equivalent" and "H_s," which apply to the external exposure of the skin or an extremity, mean the dose equivalent at a tissue depth of 0.007 centimeter (7 mg/cm²) averaged over an area of one square centimeter.

(i) "Sheltering" means using a structure for radiation protection from an airborne plume containing radioactive material.

(j) "Shielded position" means the location within the radiographic exposure device or storage

container that, by the manufacturer's design, is the proper location for storage of the sealed source.

(k) "Shielded-room radiography using radiation machines" means industrial radiography using radiation machines that meets the following conditions:

(1) Is conducted in an enclosed room, the interior of which is not occupied during radiographic operations;

(2) is shielded so that every location on the exterior meets the conditions specified in K.A.R. 28-35-214a; and

(3) is accessible only through openings that are interlocked so that the radiation machine will not operate unless all openings are securely closed.

(l) "SI" means the abbreviation for the international system of units.

(m) "Shutter" means a device attached to an X-ray tube housing assembly that can totally intercept the useful beam and that has a lead equivalency not less than that of the tube housing assembly.

(n) "Sievert" means the SI unit of any of the quantities expressed as a dose equivalent. The dose equivalent in sieverts is equal to the absorbed dose in grays multiplied by the quality factor (1 Sv = 100 rem).

(o) "Site area emergency" means an event that could occur, is in progress, or has occurred, that could lead to a significant release of radioactive material, and that could require a response by off-site response organizations to protect persons off-site.

(p) "Site boundary" means that line beyond which the land or property is not owned, leased, or otherwise controlled by the licensee or registrant.

(q) "Source" means the focal spot of the X-ray tube.

(r) "Source assembly" means an assembly that consists of the sealed source and a connector that attaches the source to the control cable.

(s) "Source changer" means a device designed and used for replacement of sealed sources in radiographic exposure devices, including those devices also used for transporting and storing sealed sources.

(t) "Source holder" means a housing or assembly into which a radioactive source is placed for the purpose of facilitating the handling and use of the source in well-logging operations.

(u) "Source-image receptor distance" and "SID" mean the distance from the source to the center of the input surface of the image receptor.

(v) "Source material" means the following:

(1) Uranium or thorium, or any combination of these, in any physical or chemical form; or

(2) ores that contain, by weight, 0.05 percent or more of uranium, thorium, or any combination of these.

The term "source material" shall not include special nuclear material.

(w) "Source material milling" means any activity that results in the production of by-product material.

(x) "Source of radiation" means any material, device, or equipment that emits or is capable of producing radiation.

(y) "Source-to-skin distance" and "SSD" mean the distance between the source and the patient's skin.

(z) "Special form" means any licensed material that meets either of the following conditions:

(1)(A) Is in solid form;

(B) has at least one dimension measuring at least five millimeters;

(C) does not melt, sublime, or ignite in air at a temperature of 1,000°F;

(D) does not shatter or crumble if subjected to the percussion test described in K.A.R. 28-35-144; and

(E) is not dissolved or converted into dispensable form to the extent of more than 0.005 percent by weight by immersion for one week in water at 68°F or in air at 86°F; or

(2)(A) Is in any physical form securely contained in a capsule;

(B) has at least one dimension measuring at least five millimeters;

(C) will retain its contents if subjected to the tests described in K.A.R. 28-35-144; and

(D) is constructed of materials that do not melt, sublime, or ignite in air at 1,475°F and do not dissolve or convert into dispensable form to the extent of more than 0.005 percent by weight by immersion for one week in water at 68°F or in air at 86°F.

(aa) "Special nuclear material" means either of the following:

(1) Plutonium, uranium-223, uranium enriched in the isotope 233 or in the isotope 235, and any other material that the department declares by order to be special nuclear material after the nuclear regulatory commission (NRC), pursuant to the provisions of section 51 of the atomic energy act of 1954, has determined the material to be special nuclear material, except for source material; or

(2) any material artificially enriched as specified in paragraph (aa)(1), except for source material.

(bb) "Special nuclear material in quantities not sufficient to form a critical mass" means any of the following:

(1) Uranium enriched in the isotope U-235, in quantities not exceeding 350 grams of contained U-235;

(2) uranium enriched in the isotope uranium-233, in quantities not exceeding 200 grams of contained U-233;

(3) plutonium not exceeding 200 grams; or

(4) any combination of these special nuclear materials in accordance with the following formula:

$$\frac{\text{grams of contained U-235}}{350} + \frac{\text{grams of contained U-233}}{200} + \frac{\text{gram of Pu}}{200} \leq 1$$

The sum of the ratios for all of the kinds of special nuclear material in combination shall not exceed one.

(cc) "Spot check" means a procedure that is performed to ensure that a previous calibration continues to be valid.

(dd) "Spot film" means a radiograph that is made during a fluoroscopic examination or radiation therapy treatment to permanently record conditions that exist during the procedure.

(ee) "Spot-film device" means a device intended either to transport and position a radiographic image receptor between the radiation source and image receptor or to position a radiographic image receptor between the radiation source and image receptor. This term shall include a device intended to hold a cassette over the input end of an image intensifier for the purpose of making a radiograph.

(ff) "Stationary beam therapy" means radiation therapy without relative displacement of the useful beam and the patient during irradiation.

(gg) "Stationary X-ray equipment" means X-ray equipment that is installed in a fixed location.

(hh) "Stereotactic radiosurgery" means the use of external radiation in conjunction with a stereotactic guidance device to very precisely deliver a therapeutic dose to a tissue volume.

(ii) "Stochastic effect" means a health effect that occurs randomly and for which the probability of the occurrence of the effect, rather than the severity of the effect, is assumed to be a linear function of dose without threshold. For purposes

of these regulations, “probabilistic effect” shall be considered an equivalent term.

(jj) “Storage area” means any location, facility, or vehicle that is used to store, transport, or secure a radiographic exposure device, radiation machine, storage container, or sealed source when not in use. Each storage area shall be locked or have physical barriers to prevent accidental exposure, tampering, or unauthorized removal of the device, machine, sealed source, or container.

(kk) “Storage container” means a device in which radioactive materials are transported or stored.

(ll) “Stray radiation” means the sum of leakage radiation and scattered radiation.

(mm) “Structured educational program” means an educational program designed to impart particular knowledge and practical education through interrelated studies and supervised training.

(nn) “S-tube” means a tube through which the radioactive source travels when inside a radiographic exposure device.

(oo) “Subsurface studies” means the evaluation of parameters below the surface of the earth.

(pp) “Subsurface tracer study” means the release of a substance tagged with radioactive material for the purpose of tracing the movement or position of the tagged substance in the well bore or adjacent formation.

(qq) “Survey” means an evaluation of a radiation hazard resulting from the production, use, transfer, release, disposal, or presence of sources of radiation. This term shall include a physical survey of the location of materials or equipment, or both, and either the measurements of levels of radiation or the concentrations or quantities of radioactive materials present. (Authorized by K.S.A. 48-1607; implementing K.S.A. 2017 Supp. 48-1603 and K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-135t. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) “Target” means the part of a radiation head that by design intercepts a beam of accelerated particles, with the subsequent emission of other radiation.

(b) “Target-to-skin distance (TSD)” means the distance measured along the beam axis from the center of the front surface of the X-ray target or electron virtual source to the irradiated object or patient.

(c) “Technique factors” means the conditions of operation specified as follows:

(1) For capacitor energy storage equipment, peak tube potential in kV and quantity of charge in mAs;

(2) for field emission equipment rated for pulsed operation, peak tube potential in kV and number of X-ray pulses; and

(3) for all equipment not specified in paragraphs (c)(1) and (2), peak tube potential in kV and either the tube current in mA and the exposure time in seconds or the product of the tube current and the exposure time in mAs.

(d) “Teletherapy” means therapeutic irradiation in which the source of radiation is located at a distance from the body.

(e) “Teletherapy physicist” means an individual identified as the qualified teletherapy physicist on a department license.

(f) “Temporary job site” means a location where operations are performed and where sources of radiation may be stored, other than the location or locations of use authorized on the license or registration.

(g) “Tenth-value layer (TVL)” means the thickness of a specified material that attenuates X-radiation or gamma radiation to the extent that the air kerma rate, exposure rate, or absorbed dose rate is reduced to one-tenth of the value measured without the material at the same point.

(h) “Termination of irradiation” means the stopping of irradiation in a fashion not permitting the continuance of irradiation without the resetting of operating conditions at the control panel.

(i) “Test” means the process of verifying compliance with an applicable regulation.

(j) “Therapeutic dosage” means a dosage of unsealed by-product material that is intended to deliver a radiation dose to a patient or human research subject for palliative or curative treatment.

(k) “Therapeutic dose” means a radiation dose delivered from a source containing by-product material to a patient or human research subject for palliative or curative treatment.

(l) “Therapeutic-type tube housing” means the following:

(1) For X-ray equipment not capable of operating at 500 kVp or above, an X-ray tube housing constructed so that the leakage radiation, at a distance of one meter from the source, does not exceed one roentgen in an hour when the tube is operated at its maximum rated continuous current for the maximum rated tube potential; and

(2) for X-ray equipment capable of operating at 500 kVp or above, an X-ray tube housing constructed so that the leakage radiation, at a distance of one meter from the source, does not exceed 0.1 percent of the useful beam dose rate at one meter from the source for any of the tube's operating conditions.

Areas of reduced protection shall be acceptable if the average reading over any area of 100 cm², at a distance of one meter from the source, does not exceed any of the values specified in this subsection.

(m) "These regulations" means article 35 in its entirety.

(n) "Tomogram" means the depiction of the X-ray attenuation properties of a section through the body.

(o) "Total effective dose equivalent" and "TEDE" mean the sum of the effective dose equivalent for external exposures and the committed effective dose equivalent for internal exposures.

(p) "Total organ dose equivalent" and "TODE" mean the sum of the deep dose equivalent and the committed dose equivalent delivered to the organ receiving the highest dose.

(q) "Traceable to a national standard" means that a quantity or a measurement has been compared to a national standard directly or indirectly through one or more intermediate steps and that all comparisons are documented.

(r) "Transport index" means the dimensionless number, rounded up to the first decimal place, placed on the label of a package to designate the degree of control to be exercised by the carrier during transportation. The transport index is the maximum radiation level in millirems per hour at one meter from the external surface of the package.

(s) "Tritium neutron-generator-target source" means a tritium source used within a neutron generator tube to produce neutrons for use in well-logging applications.

(t) "Tube" means an X-ray tube, unless otherwise specified.

(u) "Tube housing assembly" means the tube housing with a tube installed, including high-voltage transformers or filament transformers, or both, and other appropriate elements when contained within the tube housing.

(v) "Treatment site" means the anatomical description of the tissue intended to receive a radiation dose, as specified in a written directive.

(w) "Tube rating chart" means the set of curves that describes the rated limits of operation of the tube in terms of the technique factors.

(x) "Type A package" means packaging that, together with the radioactive contents limited to A₁ or A₂ as appropriate, is designed to retain the integrity of containment and shielding under normal conditions of transport as demonstrated by the tests specified in 49 CFR 173.465 or 49 CFR 173.466, as appropriate.

(y) "Type B package" and "type B transport container" mean packaging that meets the applicable requirements specified in 10 CFR 71.51. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended March 18, 2011.)

28-35-135u. Definitions. As used in these regulations, each of the following terms shall have the meaning specified in this regulation: (a) "Underwater irradiator" means an irradiator in which the sources always remain shielded underwater and humans do not have access to the sealed sources or the space that is subject to irradiation without entering the pool.

(b) "Underwater radiography" means industrial radiography performed when the radiographic exposure device or the related equipment is beneath the surface of the water.

(c) "Unit dose" means a dosage prepared for medical use for administration to a patient or human research subject as a single dosage, without any further manipulation of the dosage after the dosage is initially prepared.

(d) "Unrefined and unprocessed ore" means ore in its natural form before any processing, including grinding, roasting, beneficiating, and refining. "Processing" shall not include sieving or the encapsulation of ore or preparation of samples for laboratory analysis.

(e) "Unrestricted area" means an area to which access is neither limited nor controlled by the licensee or registrant. For purposes of these regulations, "uncontrolled area" shall be considered an equivalent term.

(f) "Useful beam" means the part of the radiation that passes through a window, aperture, cone, or other collimating device. (Authorized by K.S.A. 48-1607; implementing K.S.A. 2017 Supp. 48-1603 and K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-135v. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Variable-aperture beam-limiting device" means

a beam-limiting device that has the capacity for stepless adjustment of the X-ray field size at a given SID.

(b) "Very high radiation area" means an area that is accessible to individuals, in which radiation levels could result in an individual receiving an absorbed dose in excess of five Gy (500 rad) in one hour at one meter from a source of radiation or from any surface that the radiation penetrates.

(c) "Virtual source" means the point from which radiation appears to originate.

(d) "Visible area" means that portion of the input surface of the image receptor over which incident X-ray photons produce a visible image. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135w. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation: (a) "Waste" means any low-level radioactive waste that is acceptable for disposal in a land disposal facility. Low-level radioactive waste shall mean radioactive waste that meets both of the following conditions:

(1) Is not classified as any of the following:

(A) High-level radioactive waste;

(B) spent nuclear fuel;

(C) "byproduct material," as defined in paragraphs (2), (3), and (4) in the definition of "byproduct material" in 10 CFR 20.1003, dated December 1, 2009;

(D) uranium or thorium tailings; and

(E) transuranic waste; and

(2) is classified as low-level radioactive waste consistent with existing law and in accordance with paragraph (a)(1) by the nuclear regulatory commission.

(b) "Waste-handling licensee" means any person licensed to receive and store radioactive wastes before disposal, any person licensed to dispose of radioactive waste, or any person licensed to both receive and dispose of radioactive waste.

(c) "Wedge filter" means an added filter effecting continuous, progressive attenuation of all or part of the useful beam.

(d) "Week" means seven consecutive days, starting on Sunday.

(e) "Weighting factor (w_T) for an organ or tissue (T)" means the proportion of the risk of stochastic effects resulting from irradiation of that organ or tissue to the total risk of stochastic effects when the whole body is irradiated uniformly. For calcu-

lating the effective dose equivalent, the values of w_T shall be as follows:

ORGAN OR TISSUE DOSE WEIGHTING FACTORS	
Organ or Tissue (T)	w_T
Gonads	0.25
Breast	0.15
Red bone marrow	0.12
Lung	0.12
Thyroid	0.03
Bone surfaces	0.03
Remainder organs	0.30 ^a
Whole body	1.00 ^b

^a0.30 results from 0.06 for each of the five remainder organs that receive the highest doses, excluding the skin and the lens of the eye.

^bFor the purpose of weighting the external whole body dose in determining the total effective dose equivalent, a single weighting factor, $w_T = 1.0$, is specified. The use of other weighting factors for external exposure may be approved by the secretary if the licensee or registrant demonstrates that the effective dose to be received is within the limits specified in these regulations.

(f) "Well bore" means a drilled hole in which wireline service operations and subsurface tracer studies are performed.

(g) "Well logging" means the lowering and raising of measuring devices or tools that could contain sources of radiation into well bores or cavities for the purpose of obtaining information about the well or adjacent formations.

(h) "Wet-source-change irradiator" means an irradiator whose sources are replaced underwater.

(i) "Wet-source-storage irradiator" means an irradiator whose sources are stored underwater.

(j) "Whole body," for purposes of external exposure, means the head and trunk, including the male gonads, and shall include the arms above the elbow and the legs above the knee.

(k) "Wireline" means a cable containing one or more electrical conductors that is used to raise and lower logging tools in the well bore.

(l) "Wireline service operation" means any evaluation or mechanical service that is performed in the well bore using devices on a wireline.

(m) "Worker" means an individual, contractor, or subcontractor engaged in work that is performed under a license or registration, or both, issued by the department and that is controlled by a licensee or registrant, or both. This term shall not include a specific licensee or registrant.

(n) "Working level (WL)" means any combination of short-lived radon daughters in one liter

of air that will result in the ultimate emission of $1.3E+5$ MeV of potential alpha particle energy. The short-lived radon daughters are the following:

- (1) For radon-222, the following:
 - (A) Polonium-218;
 - (B) lead-214;
 - (C) bismuth-214; and
 - (D) polonium-214; and
- (2) for radon-220, the following:
 - (A) Polonium-216;
 - (B) lead-212;
 - (C) bismuth-212; and
 - (D) polonium-212.
- (o) "Working-level month (WLM)" means an exposure to one working level for 170 hours.

(p) "Written directive" means a written order for a specific patient that is dated and signed by an authorized user before the administration of a radiopharmaceutical or radiation and that contains any of the following sets of information:

- (1) For any administration of quantities greater than 1.11 megabecquerels (30 μ Ci) of sodium iodide I-125 or I-131, the radionuclide and dosage;
- (2) for a therapeutic administration of a radiopharmaceutical other than sodium iodide I-125 or I-131, the radiopharmaceutical, dosage, and route of administration;
- (3) for gamma stereotactic radiosurgery, the target coordinates, collimator size, plug pattern, and total dose;
- (4) for teletherapy, the total dose, dose per fraction, treatment site, and overall treatment period;
- (5) for high dose-rate remote afterloading brachytherapy, the radionuclide, treatment site, and total dose; or
- (6) for all other brachytherapy, the following information:

(A) Before implantation, the radionuclide, number of sources, and source strengths; and

(B) after implantation but before completion of the procedure, the radionuclide, treatment site, and either the total source strength and exposure time or the total dose. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005; amended March 18, 2011.)

28-35-135x. Definitions. As used in these regulations, each of the following terms shall have the meaning assigned in this regulation:

(a) "X-ray control" means a device that controls input power to the X-ray high-voltage generator or the X-ray tube, including timers, phototim-

ers, automatic brightness stabilizers, and similar devices that control the technique factors of an X-ray exposure.

(b) "X-ray equipment" means an X-ray system or subsystem, or component of the system or subsystem, which may be mobile, stationary, or portable.

(c) "X-ray exposure control" means a device, switch, button, or other similar means by which an operator initiates or terminates the radiation exposure. The X-ray exposure control may include associated equipment including timers and back-up timers.

(d) "X-ray field" means that area of the intersection of the useful beam and any one of the set of planes parallel to and including the plane of the image receptor, whose perimeter, as established by the beam-limiting device, is the locus of points at which the exposure rate is one-fourth of the maximum in the intersection.

(e) "X-ray high-voltage generator" means a device that transforms electrical energy from the potential supplied by the X-ray control to the X-ray tube. The device may also include the means for transforming alternating current to direct current, filament transformers for the X-ray tube or tubes, high voltage switches, electrical protective devices, and other appropriate elements.

(f) "X-ray system" means an assemblage of components for the controlled production of X-rays. The X-ray system shall include, at a minimum, an X-ray high-voltage generator, an X-ray control, a tube housing assembly, a beam-limiting device, and supporting structures. Additional components that function with the system shall be considered integral parts of the system.

(g) "X-ray table" means a patient-support device used during radiography and fluoroscopy. This term shall include any stretcher equipped with a radiolucent panel and any table equipped with a cassette tray or bucky, cassette tunnel, image intensifier, or spot-film device beneath the tabletop.

(h) "X-ray tube" means any electron tube that is designed for the conversion of electrical energy into X-ray energy. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-135y. Definition. As used in these regulations, "year" shall have the meaning assigned in this regulation.

“Year” means the period of time beginning in January and consisting of four consecutive quarters, as defined in K.A.R. 28-35-135q, that is used to determine compliance with the provisions of these regulations. Any licensee or registrant may change the starting date of the year used to determine compliance by the licensee or registrant if the change is made at the beginning of the year and if no day is omitted or duplicated in any consecutive year. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1603 and 48-1607; effective Dec. 30, 2005.)

28-35-136. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Dec. 30, 2005.)

28-35-137. Records. Each licensee or registrant shall keep records showing the receipt, transfer, and disposal of all sources of radiation, and any other records specifically required by these regulations. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-138. Inspections. (a) Each licensee or registrant shall afford, at all reasonable times, the secretary or the secretary’s duly authorized representative the opportunity to inspect sources of radiation and the premises and installations in which such sources of radiation are used or stored.

(b) Each licensee or registrant, upon reasonable notice, shall make available, for inspection by the secretary or the secretary’s duly authorized representative records maintained pursuant to these regulations. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1607, 48-1609; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-139. Testing and surveys. (a) Each licensee or registrant shall make, or cause to be made, those surveys that are necessary for the licensee or registrant to comply with these regulations.

(b) Each licensee or registrant shall perform, upon instructions from the department, or shall permit the department to perform, such reasonable tests as the department deems appropriate or necessary, including, but not limited to, tests of:

- (1) Sources of radiation;
- (2) installations in which sources of radiation are used or stored;
- (3) radiation detection and monitoring instruments; and
- (4) other equipment and devices employed during use or storage of licensed or registered sources of radiation. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-140. Exemptions. (a) Carriers. Each common carrier, each contract carrier, each freight forwarder, and each U.S. postal service carrier that only transports or stores radioactive material in the regular course of carriage or storage shall be exempt from parts 3, 4, 6, 7, 10, 11, and 12 of these regulations and from K.A.R. 28-35-700.

(b) U.S. department of energy contractors and U.S. nuclear regulatory commission contractors. Each U.S. department of energy contractor or subcontractor and each U.S. nuclear regulatory commission contractor or subcontractor operating in Kansas shall be exempt from these regulations to the extent that the contractor or subcontractor, under the contract, receives, possesses, uses, transfers, or acquires sources of radiation and if the contractor or subcontractor is included in one of the following categories:

(1) Prime contractors performing work for the U.S. department of energy at sites owned or controlled by the U.S. government, including the transportation of sources of radiation to or from these sites and the performance of contract services during temporary interruptions of transportation;

(2) prime contractors of the U.S. department of energy performing research in, or development, manufacture, storage, testing, or transportation of, atomic weapons or components of atomic weapons;

(3) prime contractors of the U.S. department of energy using or operating nuclear reactors or other nuclear devices in a U.S. government-owned vehicle or vessel; and

(4) any other prime contractor or subcontractor of the U.S. department of energy or the U.S. nuclear regulatory commission if the secretary determines that, under the terms of the contract or subcontract, there is adequate assurance that the work can be accomplished without undue risk to the public health and safety. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1,

1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended May 4, 2018.)

28-35-141. Additional requirements. At the time of registration, at the time of action upon application for license or amendment to the license, or upon inspection, the department shall specify any requirements or conditions of use, or both, that are necessary to ensure compliance with these regulations under the particular usage to which the licensee or registrant proposes to put the source of radiation. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-142. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-143. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Sept. 20, 1993.)

28-35-144. Appendix B—Tests for special form licensed material.

(a) “Free Drop” means releasing material, without thrust, from a point 30 feet above a flat, essentially unyielding, horizontal surface, so that the material strikes the surface.

(b) “Percussion” means impacting material with the flat, circular end of a one inch diameter steel rod weighing three pounds, by releasing the steel rod a distance of forty inches above the surface of the material. The material shall be placed on a sheet of lead, of hardness number 3.5 to 4.5 on the Vickers scale, and not more than one inch thick, supported by a smooth, essentially unyielding surface.

(c) Heating: heating in air to a temperature of 1,475°F. and remaining at that temperature for a period of 10 minutes.

(d) Immersion: immersion for 24 hours in water at room temperature. The water shall be at pH 6—pH 8, with a maximum conductivity of 10 micromhos per centimeter. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-144a. (a) As used in these regulations, the quality factors for converting absorbed dose to dose equivalent are shown in table I.

TABLE I
QUALITY FACTORS AND ABSORBED DOSE EQUIVALENCES

TYPE OF RADIATION	Quality Factor (Q)	Absorbed Dose Equal to a Unit Dose Equivalent*
X, gamma, or beta radiation and high-speed electrons	1	1
Alpha particles, multiple-charged particles, fission fragments and heavy particles of unknown charge	20	0.05
Neutrons of unknown energy	10	0.1
High-energy protons	10	0.1

*Absorbed dose in gray equal to 1 Sv or the absorbed dose in rad equal to 1 rem.

(b) If it is more convenient to measure the neutron fluence rate than to determine the neutron dose equivalent rate in sievert per hour or rem per hour, as provided in K.A.R. 28-35-144a(a), 0.01 Sv (1 rem) of neutron radiation of unknown energies may, for purposes of these regulations, be assumed to result from a total fluence of 25 million neutrons per square centimeter incident upon the body. If sufficient information exists to estimate the approximate energy distribution of the neutrons, the licensee or registrant may use the fluence rate per unit dose equivalent or the appropriate Q value from table II to convert a measured tissue dose in gray or rad to dose equivalent in sievert or rem.

TABLE II
MEAN QUALITY FACTORS, Q, AND FLUENCE PER UNIT DOSE EQUIVALENT FOR MONOENERGETIC NEUTRONS

	Neutron Energy (MeV)	Quality Factor (Q)	Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² rem ⁻¹)	Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² Sv ⁻¹)
(thermal)	2.5E-8	2	980E+6	980E+8
	1E-7	2	980E+6	980E+8
	1E-6	2	810E+6	810E+8
	1E-5	2	810E+6	810E+8
	1E-4	2	840E+6	840E+8
	1E-3	2	980E+6	980E+8
	1E-2	2.5	1010E+6	1010E+8
	1E-1	7.5	170E+6	170E+8
	5E-1	11	39E+6	39E+8
	1	11	27E+6	27E+8
	2.5	9	29E+6	29E+8

Neutron Energy (MeV)	Quality Factor ^a (Q)	Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² rem ⁻¹)	Fluence per Unit Dose Equivalent ^b (neutrons cm ⁻² Sv ⁻¹)
5	8	23E+6	23E+8
7	7	24E+6	24E+8
10	6.5	24E+6	24E+8
14	7.5	17E+6	17E+8
20	8	16E+6	16E+8
40	7	14E+6	14E+8
60	5.5	16E+6	16E+8
1E+2	4	20E+6	20E+8
2E+2	3.5	19E+6	19E+8
3E+2	3.5	16E+6	16E+8
4E+2	3.5	14E+6	14E+8

^a Value of quality factor (Q) at the point where the dose equivalent is maximum in a 30-centimeter diameter cylinder tissue-equivalent phantom.

^b Monoenergetic neutrons incident normally on a 30-centimeter diameter cylinder tissue-equivalent phantom.

(Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-145. Initial license and registration fees. (a) Each person required under part 3 of these regulations to obtain a license for the use of radioactive, by-product, source, or special nuclear materials shall submit to the department an application for a license and the applicable nonrefundable license fees specified in K.A.R. 28-35-147a.

(b) Each person required under part 2 of these regulations to register a radiation machine shall submit to the department a registration form and the applicable nonrefundable registration fees specified in K.A.R. 28-35-147a. The fee for each initial registration made after March 31 shall be prorated by the department based on the number of calendar quarters remaining in the annual registration period.

(c) Each person paying an initial license fee or registration fee specified in this regulation shall make the payment by check, draft, credit card, or money order payable to the Kansas department of health and environment. (Authorized by and implementing K.S.A. 48-1606, as amended by 2004 SB 396, § 1, and K.S.A. 48-1607; effective May 1, 1987; amended Oct. 8, 2004.)

28-35-146. Annual license and registration fees. (a) Payment method. Each licensee or registrant shall make annual fee payments by check, draft, credit card, or money order payable to the Kansas department of health and environment.

(b) Annual license fees. Each licensee shall submit to the department the applicable nonrefundable annual license fees specified in K.A.R. 28-35-147a on or before the last business day of the month corresponding to the anniversary date of the license.

(c) Annual registration fees. Each registrant shall submit to the department a registration form and the applicable nonrefundable annual registration fees specified in K.A.R. 28-35-147a on or before March 1. If March 1 falls on a Saturday, Sunday, or holiday, then the fee payment shall be due on or before the next business day following March 1. (Authorized by and implementing K.S.A. 48-1606, as amended by 2004 SB 396, § 1 and K.S.A. 48-1607; effective May 1, 1987; amended May 1, 1988; amended Oct. 8, 2004.)

28-35-146a. Determination of hourly rate and full cost; fee payments. (a) Hourly rate. If the department charges a fee to provide the following and there is no established fee category in K.A.R. 28-35-147a, the hourly rate charged shall be \$79.00:

(1) Any radiation protection service that the department provides to a nonlicensee or nonregistrant; and

(2) any radiation control program activity.

(b) Full cost. For each full-cost category specified in K.A.R. 28-35-147a(d)(1), the initial application fee, annual fee, and amendment fees shall be paid in accordance with the following requirements:

(1) Each applicant shall pay a nonrefundable initial application fee of \$500,000 to cover the actual costs incurred by the department to review the initial license application.

(A) If the initial application fee exceeds the actual cost of reviewing the initial application, the overage shall be credited to the annual fee for the following fiscal year.

(B) If the initial application fee is less than the actual cost of reviewing the initial application, the difference shall be due within 30 days of receipt of written notification from the secretary. No license shall be issued until all required fees are paid in full.

(2) Each licensee shall pay a nonrefundable annual fee to cover the actual cost incurred by the department to service the license and any amendments to the license.

(A) If the annual fee exceeds the actual cost of servicing the license and any amendments, the overage shall be credited to the annual fee for the following fiscal year.

(B) If the annual fee paid for any fiscal year is less than the actual cost to the department, the difference shall be due within 30 days of receipt of written notification from the secretary.

(c) Fee payments. Each fee payment specified in subsection (b) shall be made in accordance with the following requirements:

(1) Each initial application for which a license fee is required shall be accompanied by the full amount of the fee. Any application for which a fee is not received may be returned to the applicant.

(2) On or before June 1 of the fiscal year preceding the fiscal year for which the annual fee applies, the licensee shall be notified by the secretary of the amount of the annual fee.

(3) Each fee payment shall be submitted within 30 days of receipt of written notification from the secretary of the annual fee or by July 1, whichever date is earlier.

(4) Each fee payment shall be made by check, draft, money order, or electronic fund transfer payable to the department. (Authorized by and implementing K.S.A. 2018 Supp. 48-1606; effective Oct. 8, 2004; amended Feb. 22, 2019.)

28-35-147. (Authorized by and implementing K.S.A. 1990 Supp. 48-1606; effective May 1, 1987; amended May 1, 1988; amended March 16, 1992; revoked Oct. 8, 2004.)

28-35-147a. Schedule of fees. Each fee for an initial license application or initial registration shall be equal to the sum of the annual fees for all applicable categories. Each annual fee for a license or registration shall be equal to the sum of the annual fees for all applicable categories. The following fees shall be paid as specified in K.A.R. 28-35-145 and 28-35-146:

(a) Special nuclear material.

(1) Licenses for possession and use of special nuclear material in sealed sources contained in devices used in industrial measuring systems.

Annual fee \$950.00

(2) Any licenses not otherwise specified in this regulation for possession and use of special nuclear material, except licenses authorizing special nuclear material in unsealed form in combination that would constitute a critical mass.

Annual fee \$2,250.00

(b) Source material.

(1) Licenses that authorize only the possession, use, or installation of source material for shielding.

Annual fee \$365.00

(2) All other source material licenses not otherwise specified in this regulation.

Annual fee \$5,700.00

(c) Radioactive material or by-product material.

(1) Licenses of broad scope for possession and use of radioactive material or by-product material issued for processing or manufacturing items containing radioactive material or by-product material for commercial distribution.

Annual fee \$10,900.00

(2) Other licenses for possession and use of radioactive material or by-product material issued for processing or manufacturing items containing radioactive material or by-product material for commercial distribution.

Annual fee \$3,300.00

(3) Licenses authorizing the processing or manufacturing and the distribution or redistribution of radiopharmaceuticals, generators, reagent kits, sources, or devices containing radioactive material or by-product material. This category shall include the possession and use of source material for shielding when included on the same license.

Annual fee \$5,450.00

(4) Licenses and approvals authorizing distribution or redistribution of radiopharmaceuticals, generators, reagent kits, sources, or devices not involving processing of radioactive material or by-product material. This category shall include the possession and use of source material for shielding when included on the same license.

Annual fee \$2,350.00

(5) Licenses for possession and use of radioactive material or by-product material in sealed sources for irradiation of items in self-shielded units in which the source is not removed from its shield.

Annual fee \$1,800.00

(6) Licenses for possession and use of less than 10,000 curies of radioactive material or by-product material in sealed sources for irradiation of items in which the source is exposed for irradiation purposes. This category shall include underwater irradiators for irradiation of items in which the source is not exposed for irradiation purposes.

Annual fee \$3,300.00

(7) Licenses for possession and use of 10,000 curies or more of radioactive material or by-product material in sealed sources for irradiation of items in which the source is exposed for irradiation purposes. This category shall include underwater irradiators for irradiation of items in which the source is not exposed for irradiation purposes.

Annual fee \$12,050.00

(8) Licenses issued to distribute items containing radioactive material or by-product material that require device review to persons exempt from licensing, except specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from licensing.

Annual fee \$3,000.00

(9) Licenses issued to distribute items containing radioactive material or by-product material or quantities of radioactive material or by-product material that do not require device review to persons exempt from licensing, except for specific licenses authorizing redistribution of items that have been authorized for distribution to persons exempt from licensing.

Annual fee \$3,050.00

(10) Licenses issued to distribute items containing radioactive material or by-product material that require a safety review of the sealed source or device to any person with a general license, except specific licenses authorizing redistribution of items that have been authorized for distribution to any person with a general license.

Annual fee \$1,100.00

(11) Licenses issued to distribute items containing radioactive material or by-product material or quantities of radioactive material or by-product material that do not require a safety review of the sealed source or device to any person with a general license, except specific licenses authorizing redistribution of items that have been authorized for distribution to any person with a general license.

Annual fee \$700.00

(12) Licenses of broad scope for possession and use of radioactive material or by-product material issued for research and development that do not authorize commercial distribution.

Annual fee \$5,900.00

(13) Other licenses for possession and use of radioactive material or by-product material issued for research and development that do not authorize commercial distribution.

Annual fee \$2,800.00

(14) Licenses that authorize services for other licensees, except the following:

(A) Licenses that authorize only calibration or leak-testing services, or both, shall be subject to the fee specified in paragraph (c)(16).

(B) Licenses that authorize waste disposal services shall be subject to the applicable fees specified in subsection (d).

Annual fee \$3,050.00

(15) Licenses for possession and use of radioactive material or by-product material for industrial radiography. This category shall include the possession and use of source material for shielding when authorized on the same license.

Annual fee \$6,100.00

(16) All other specific radioactive material or by-product material licenses not otherwise specified in this regulation.

Annual fee \$1,250.00

(17) Registration of general licenses for devices or sources.

Annual fee \$225.00

(d) Waste disposal and processing.

(1) Licenses authorizing the possession and use of radioactive material, including by-product material, source material, and special nuclear material, for a commercial, low-level radioactive waste disposal facility.

Annual fee full cost,
as specified in K.A.R. 28-35-146a

(A) Amendment to license concerning safety and environmental issues.

Amendment fee full cost,
as specified in K.A.R. 28-35-146a

(B) Amendment to license concerning administrative questions with no safety or environmental issues.

Amendment fee full cost,
as specified in K.A.R. 28-35-146a

(2) Licenses specifically authorizing the receipt of radioactive material, including by-product material, source material, and special nuclear material, from other persons for the purpose of packaging or repackaging the radioactive material. The licensee shall dispose of the radioactive material by transfer to another person authorized to receive or dispose of the radioactive material.

Annual fee \$5,150.00

(3) Licenses specifically authorizing the receipt of prepackaged radioactive material, including by-product material, source material, and special nuclear material, from other persons. The licensee shall dispose of the radioactive material by transfer to another person authorized to receive or dispose of the radioactive material.

Annual fee \$3,700.00

(e) Well logging.

(1) Licenses for possession and use of radioactive material or by-product material, source material, or special nuclear material for well logging, well surveys, and tracer studies other than field flooding tracer studies.

Annual fee	\$2,350.00	Annual fee	\$650.00
(2) Licenses for possession and use of radioactive material or by-product material for field flooding tracer studies.		(i) Device, product, or sealed source safety evaluation.	
Annual fee	\$2,350.00	(1) Safety evaluation review of each device or product containing radioactive material or by-product material, source material, or special nuclear material, except any reactor fuel device, for commercial distribution. This fee shall apply to each device or product.	
(f) Nuclear laundries.		Fee.....	\$3,500.00
Licenses for commercial collection and laundry of items contaminated with radioactive material or by-product material, source material, or special nuclear material.		(2) Safety evaluation review of each device or product containing radioactive material or by-product material, source material, or special nuclear material manufactured in accordance with the unique specifications of, and for use by, a single applicant, except any reactor fuel device. This fee shall apply to each device or product.	
Annual fee	\$11,550.00	Fee.....	\$3,500.00
(g) Medical licenses.		(3) Safety evaluation of each sealed source containing radioactive material or by-product material, source material, or special nuclear material, except reactor fuel, for commercial distribution. This fee shall apply to each sealed source.	
(1) Licenses issued for human use of radioactive material or by-product material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category shall include the possession and use of source material for shielding when authorized on the same license.		Fee.....	\$1,100.00
Annual fee	\$5,500.00	(4) Safety evaluation of each sealed source containing radioactive material or by-product material, source material, or special nuclear material manufactured in accordance with the unique specifications of, and for use by, a single applicant. This fee shall apply to each sealed source.	
(2) Licenses of broad scope issued to medical institutions or two or more physicians authorizing research and development, including human use of radioactive material or by-product material, except licenses for radioactive material or by-product material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category shall include the possession and use of source material for shielding when authorized on the same license. Separate annual fees shall not be assessed for pacemaker licenses issued to medical institutions that also hold nuclear medicine licenses under categories in this paragraph or paragraph (g)(3).		Fee.....	\$365.00
Annual fee	\$12,350.00	(j) Reciprocity.	
(3) Other licenses issued for human use of radioactive material or by-product material, source material, or special nuclear material, except licenses for radioactive material or by-product material, source material, or special nuclear material in sealed sources contained in teletherapy devices. This category shall include the possession and use of source material for shielding when authorized on the same license. Separate annual fees shall not be assessed for pacemaker licenses issued to medical institutions that also hold nuclear medicine licenses under categories in this paragraph or paragraph (g)(2).		(1) Licensees who conduct activities under a reciprocal agreement.	
Annual fee	\$2,300.00	Annual fee	\$750.00
(h) Civil defense.		(2) Registrants who conduct activities under a reciprocal agreement.	
Licenses for possession and use of radioactive material or by-product material, source material, or special nuclear material for civil defense activities.		Annual fee	\$200.00
		(k) X-ray machines.	
		(1) Base registration fee per facility.	
		Annual fee	\$200.00
		(2) Registration fee for each x-ray tube at a facility. This fee shall be in addition to the base registration fee.	
		Annual fee per x-ray tube	\$50.00
		(l) Particle accelerators.	
		Annual fee	\$300.00
		(m) Noncontiguous sites.	
		(1) An additional annual fee of 50 percent of the annual fee specified in this regulation shall be assessed for each noncontiguous site where radioactive material is stored or used under the same license, per category.	

(2) "Noncontiguous site" shall have the meaning specified in K.S.A. 2018 Supp. 48-1606, and amendments thereto. (Authorized by and implementing K.S.A. 2018 Supp. 48-1606; effective Oct. 8, 2004; amended March 29, 2013; amended Feb. 22, 2019.)

28-35-148. Deliberate misconduct. (a) This regulation shall apply to the following:

- (1) Each licensee;
- (2) each registrant;
- (3) each applicant for a license;
- (4) each employee of a licensee, registrant, or applicant; and
- (5) each contractor, including each supplier, consultant, subcontractor, and employee of a contractor or subcontractor of any licensee, registrant, or applicant for a license.

(b) Each individual specified in subsection (a) who knowingly provides to any licensee, applicant, registrant, contractor, or subcontractor any components, equipment, materials, or other goods or services that relate to a licensee's, registrant's, or applicant's activities in this article shall be prohibited from engaging in deliberate misconduct, as defined in K.A.R. 28-35-135d.

(c) Any person who violates the requirements of this regulation may be subject to enforcement action pursuant to K.S.A. 48-1613, and amendments thereto. (Authorized by and implementing K.S.A. 48-1607 and 48-1613; effective Dec. 30, 2005.)

PART 2. RADIATION PRODUCING MACHINES

28-35-152. Persons registered. Any person possessing a registrable item shall register with the department in accordance with the rules and regulations in this part. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-153. Initial registration. Any person who is not registered and who acquires possession of a registrable item shall register with the department, within 30 days of the date of acquiring the item. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-154. Renewal of registration. Each registrant who possesses a radiation-producing device shall reregister with the department annually. This registration shall be submitted on or before March 1 of each year. (Authorized by and im-

plementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-155. Registration form. Registration shall be made upon forms devised and furnished by the department. Each registrant shall provide all the information called for by the form and any additional information requested by the department. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-156. Separate installations. Except as otherwise provided in K.A.R. 28-35-157, and any amendment to that rule and regulation, a separate registration form shall be completed for each installation. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-157. Special registration. If the reporting of each installation, or other information called for, is impractical, the secretary, upon the written request of a person and upon a finding that the public health and safety would not be adversely affected, may approve registration in such special form as the secretary may prescribe. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-158. Report of change. If a change is made on any x-ray equipment or other device producing radiation, or to any installation, so that information on file with the department is no longer accurate, the registrant shall notify the department, in writing, of the change, within 30 days of the date the change was made. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-159. Registration shall not imply approval. A person shall not refer, in any form of advertisement, to the fact a registrable item is registered with the department, or state or imply that any installation registered with the department is approved by the department. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-160. Vendor notification. (a) Each distributor, retailer, or other person who sells, leases, transfers, or lends any registrable item or items shall notify the department, at 90-day intervals, of the following:

(1) The names and addresses of all persons who have received the item or items;

(2) the name of the manufacturer and the model number of the item or items transferred; and

(3) the date on which the registrable item or items were transferred.

(b) No person shall make, sell, lease, transfer, lend, assemble, or install radiation machines or the supplies used in connection with these machines unless the machines and supplies, when properly placed in operation and used, meet the requirements of these regulations. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-161. Discontinuance of use. If a registrant ceases to use a registrable item or items, for any reason, the registrant or the duly authorized representative of the registrant's estate shall give written notice to the department of the cessation of use. The notice shall be provided within 30 days of the date that the registrant ceases to use the registrable item or items, and shall state the date on which use of the item or items was discontinued and the manner in which the registrable item or items were disposed. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-162. Exclusion from registration. The following equipment shall not be required to be registered: (a) Electronic equipment that produces radiation incidental to its operation for other purposes, if the dose equivalent rate averaged over an area of 10 square centimeters does not exceed five μSv (0.5 millirem) per hour at five centimeters from any accessible surface of the equipment.

(b) radiation-producing equipment that is in transit or is in storage incident to transit; and

(c) domestic television receivers. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-163. Excluded possessors. (a) Except as provided in subsection (b), a common car-

rier or contract carrier operating within this state who is in possession of a registrable item or items shall be exempt from the provisions of these regulations, if the carrier possesses the registrable item or items for another person, solely for the purpose of transporting or storing the item or items.

(b) Each common carrier or contract carrier shall be subject to the provisions of K.A.R. 28-35-228a and 28-35-229a, and any amendments of those rules and regulations. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-164. Temporary use or storage of registrable items. Any person desiring to bring a registrable item into this state for temporary use or storage shall give written notice to the department before bringing the item into this state. The notice shall be given to the department at least five days before the item is to be brought into this state and shall include the type and energy of the radiation source, the nature and scope of the use or storage, the proposed duration of use or storage, and the exact location where the radiation source is to be used or stored. If, in a specific case, the five day period would impose an undue hardship on the person, the person, upon application by letter or telegram to the department, may obtain permission to proceed at an earlier date.

In addition, the person shall:

(a) Comply with all applicable regulations for the department; and

(b) supply the department with such other information as it may request.

If a registrable item is kept in the state for a total of 30 days, in a period of 12 consecutive months, it shall be considered to be permanently located in the state and shall be subject to the registration provision of these regulations. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-165. Disposal of registered items. Whenever any person disposes of a registrable item, or items, by any method, the person, or in the event of the person's death, the representative of the person's estate, shall give written notice to the department of the disposal within 30 days. The notice shall include the date of disposal, the method of disposal, and, if transferred to another person, the name and address of the recipient.

(Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-166. Shoe fitting, fluoroscopic machines; prohibition of. No person shall install, operate or maintain any device or machine within the state of Kansas which uses fluoroscopic, X-ray or radiation principles for the purpose of fitting shoes. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-167. Shielding plan for radiation-producing devices. (a) Before construction, the floor plan or plans, shielding specifications, and equipment arrangement of all new installations, or modifications of existing installations, utilizing ionizing radiation machines shall be submitted to the department for review and consideration for approval, with the information specified in K.A.R. 28-35-168 and K.A.R. 28-35-169 of this part.

(b) If the applicant is not a qualified expert, then the applicant may be required to utilize the services of a qualified expert to determine the shielding specifications before the secretary's review and consideration for approval of the shielding plan.

(c) The approval of the shielding specifications shall not preclude the requirement of additional modifications if a subsequent analysis of operating conditions indicates the possibility that an individual could receive a dose in excess of the limits prescribed in K.A.R. 28-35-212a and K.A.R. 28-35-214a.

(d) After installation of each radiation machine, the registrant shall maintain the following records for inspection by the department:

(1) The maximum rated technique factors of the machine;

(2) a scale drawing of the room in which the stationary radiation machine system is located. This drawing shall indicate the use of areas adjacent to the room and an estimation of the extent of occupancy by an individual in these areas. The drawing shall include either of the following:

(A) The results of a survey for radiation levels present at the operator's position and at points surveyed outside the room, and the specific test conditions used; or

(B) the type and thickness of materials, or the lead equivalency, of each protective barrier.

(e) A qualified expert, who shall be approved by the department, shall be consulted in the design of each particle accelerator installation and shall be called upon to perform a radiation survey when the accelerator is first capable of producing radiation.

(f) Each particle accelerator installation shall be provided with any primary or secondary barriers, or both, that are necessary to ensure compliance with the following:

(1) K.A.R. 28-35-212a;

(2) K.A.R. 28-35-212c;

(3) K.A.R. 28-35-212d;

(4) K.A.R. 28-35-212f;

(5) K.A.R. 28-35-212g;

(6) K.A.R. 28-35-213a;

(7) K.A.R. 28-35-214a; and

(8) K.A.R. 28-35-214b. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-168. Information on radiation shielding required for plan reviews. Each registrant shall submit the following information as specified in K.A.R. 28-35-167:

(a)(1) Each plan showing, at a minimum, all of the following:

(A) The normal location of the system's radiation port;

(B) the port's travel and traverse limits;

(C) the general direction or directions of the useful beam;

(D) the locations of any windows and doors and any other openings;

(E) the location of the operator's booth; and

(F) the location of the control panel;

(2) the type and thickness of materials, or the lead equivalency, of all walls, doors, partitions, floors, and ceilings of each room;

(3) the dimensions of each room;

(4) the type of occupancy of all adjacent areas, inclusive of the space above and below each room. If there is an exterior wall, the distance to the closest area or areas where individuals are likely to be present shall be shown;

(5) the make and model of the equipment, the maximum technique factors, and the energy waveform; and

(6) each type of examination or treatment, or both, that will be performed with the equipment;

(b) information on the anticipated workload of the system or systems in mA-minutes per week; and

(c) a report showing all basic assumptions used in the development of the shielding specifications. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-169. Design requirements for an operator's booth. (a) Space requirements.

(1) Each operator shall be allotted adequate room to operate the unit effectively.

(2) In determining whether the allotted space is adequate, any encumbrance by the control panel, overhang, cables, or other similar encroachments shall be evaluated.

(3) The booth shall be located or constructed so that unattenuated direct scattered radiation originating on the examination table or at the wall cassette cannot reach the operator's station in the booth.

(b) Structural requirements. Shielding shall be provided to meet the requirements of K.A.R. 28-35-211a through K.A.R. 28-35-234a of these regulations.

(c) Control placement. The control for the system shall be fixed within the booth.

(1) The operation of the radiation-producing devices shall be possible only from within the booth.

(2) The location of the control shall allow the operator to use the majority of the available viewing systems.

(d) Viewing system requirements.

(1) Each booth shall have at least one viewing device positioned so that both of the following conditions are met:

(A) The operator can view the patient during any exposure.

(B) The operator can have full view of any occupant of the room and anyone who enters the room. If any door allowing access to the room cannot be seen from the booth, that door shall have an interlock control that prevents exposure if the door is not closed.

(2) If the viewing system is a window, the window shall have the same lead equivalence as that required for the booth's wall in which the window is mounted.

(3) If the viewing system is by mirrors, each mirror shall be positioned so that the requirements of K.A.R. 28-35-254(d)(1) are met.

(4) If the viewing system utilizes a camera, both of the following requirements shall be met:

(A) The camera shall be positioned so that the requirements of K.A.R. 28-35-254(d)(1) are met.

(B) An alternate viewing system shall be provided as a backup for the primary system. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 3. LICENSING OF SOURCES OF RADIATION

28-35-175. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-175a. Persons licensed. (a) A licensed person shall not manufacture, produce, receive, use, possess, acquire, own, transfer, or dispose of radioactive material, except as authorized in a specific or general license issued pursuant to these regulations. Each manufacturer, producer, or processor of any equipment, device, commodity, or other product containing source or "byproduct material," as defined in 10 CFR 20.1003, dated December 1, 2009, for which subsequent receipt, use, possession, acquisition, ownership, transfer, and disposal by any other person is exempted from these regulations shall obtain authority to transfer possession or control to the other person from the nuclear regulatory commission.

(b) In addition to the requirements of this part, each licensee shall be subject to the requirements of part 1, part 4, and part 10 of these regulations. In addition to being subject to part 1, part 4, and part 10, specific licensees shall be subject to all of the following requirements:

(1) Licensees using radioactive material in the healing arts shall be subject to the requirements of part 6.

(2) Licensees using radioactive material in industrial radiography shall be subject to the requirements of part 7.

(3) Licensees using radioactive material in wire-line and subsurface tracer studies shall be subject to the requirements of part 11 of these regulations. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended March 18, 2011.)

28-35-176. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-176a. Types of licenses. Licenses for radioactive materials shall be either of the following types:

(a) Each general license shall be effective without the filing of an application with the department or the issuance of a licensing document to a particular person, although the filing of a certification with the department may be a requirement of the license. Each general licensee shall be subject to all other applicable portions of these regulations and any limitations of the general license. Any licensee may be required by the secretary to register a general license to protect public health and safety and the environment.

(b) Each specific license shall require the submission of an application to the department and the issuance of a licensing document by the department. Each specific licensee shall be subject to all applicable portions of these regulations as well as any limitations specified in the licensing document. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005.)

28-35-177. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-177a. General licenses; source material. (a) A general license is hereby issued authorizing commercial and industrial firms, research, educational, and medical institutions, and federal, state, and local government agencies to receive, possess, use, and transfer uranium and thorium, in their natural isotopic concentrations and in the form of depleted uranium, for research, development, educational, commercial, or operational purposes in any of the following forms and quantities:

(1) Uranium and thorium in the following quantities and forms:

(A) Not more than 1.5 kg (3.3 lb) of uranium and thorium in dispersible forms, including gases, liquids, and powders, at any one time. All material processed by the general licensee that alters the chemical or physical form of the material containing source material shall be accounted for as a dispersible form. A person authorized to possess, use, and transfer source material under this paragraph shall not receive more than a total of 7 kg (15.4 lb) of uranium and thorium in any one calendar year; and

(B) not more than 7 kg (15.4 lb) of uranium and thorium at any one time. A person authorized to possess, use, and transfer source material under this paragraph shall not receive more

than 70 kg (154 lb) of uranium and thorium in any one calendar year. A person shall not alter the chemical or physical form of the source material possessed under this paragraph unless the source material is accounted for under the limits of paragraph (a)(1);

(2) not more than 7 kg (15.4 lb) of uranium, removed during the treatment of drinking water, at any one time. A person shall not remove more than 70 kg (154 lb) of uranium from drinking water during a calendar year under this paragraph; or

(3) not more than 7 kg (15.4 lb) of uranium and thorium at laboratories for the purpose of determining the concentration of uranium and thorium contained within the material being analyzed at any one time. A person authorized to possess, use, and transfer source material under this paragraph shall not receive more than 70 kg (154 lb) of source material in any one calendar year.

(b)(1) Each person who receives, possesses, uses, or transfers source material in accordance with the general license in subsection (a) shall be prohibited from the following:

(A) Administering source material, or the radiation from the source material, either externally or internally, to human beings except as authorized by a specific license issued by the department;

(B) abandoning the source material. Source material may be disposed of as follows:

(i) A cumulative total of 0.5 kg (1.1 lb) of source material in a solid, nondispersible form may be transferred each calendar year by a person authorized to receive, possess, use, and transfer source material under the general license to persons receiving the material for permanent disposal. The recipient of source material transferred under this paragraph shall be exempt from the requirements to obtain a license under part 3 of these regulations to the extent that the source material is permanently disposed of. This exemption shall not apply to any person who is in possession of source material under a specific license issued by the department; or

(ii) source material may be disposed in accordance with K.A.R. 28-35-190a; and

(C) exporting the source material to another country except in accordance with a license issued by the nuclear regulatory commission (NRC).

(2) Each person specified in paragraph (b)(1) shall respond to each written request from the department to provide information relating to the general license within 30 calendar days of the date of the request or other time specified

in the request. If the person cannot provide the requested information within the required time, the person shall, within the same time period, request a longer period to supply the information by providing the department with a written justification for the request.

(c) Each person who receives, possesses, uses, or transfers source material in accordance with subsection (a) shall minimize contamination of the facility and the environment. When activities involving source material are permanently ceased at any site, if evidence of significant contamination is identified, the general licensee shall notify the department about the contamination and may consult with the department regarding the appropriateness of sampling and restoration activities to ensure that any contamination or residual source material remaining at the site where source material was used under this general license is not likely to result in exposures that exceed the limits in these regulations.

(d) Each person who receives, possesses, uses, or transfers source material in accordance with the general license granted in subsection (a) shall be exempt from parts 4 and 10 of these regulations to the extent that the receipt, possession, use, and transfer are within the terms of this general license, except that the person shall meet the requirements of paragraph (b)(1)(B) and subsection (c). This exemption shall not apply to any person who also holds a specific license issued by the department.

(e) No person shall initially transfer or distribute source material to persons generally licensed under paragraph (a)(1) or (2) or equivalent regulations of an agreement state, unless authorized by a specific license issued by the NRC or equivalent provisions of an agreement state. This subsection shall not apply to analytical laboratories returning any processed sample to the client who initially provided the sample. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended July 27, 2007; amended May 4, 2018.)

28-35-178. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-178a. General license; certain ionization devices. (a) Each commercial and in-

dustrial firm, research, educational, and medical institution, individual in the conduct of the individual's business, and federal, state, or local government agency shall be deemed to have been issued a general license to acquire, receive, possess, use, or transfer radioactive material incorporated in any device or equipment as described in this subsection, if the device or equipment is manufactured, tested, and labeled by a manufacturer in accordance with the specifications of a specific license issued to the manufacturer by the secretary, the U.S. nuclear regulatory commission, or an agreement state. This general license shall apply to the following:

(1) Static elimination devices that are designed for ionization of air and that contain, as a sealed source or sources, radioactive material containing a total of not more than 500 microcuries of polonium-210 per device; and

(2) ion-generating tubes that are designed for ionization of air and that contain, as a sealed source or sources, radioactive material consisting of a total of not more than 500 microcuries of polonium-210 per device or a total of not more than 50 millicuries of hydrogen-3 (tritium) per device.

(b) The general license specified in subsection (a) shall be subject to the following regulations:

(1) K.A.R. 28-35-137 through 28-35-139;

(2) K.A.R. 28-35-192b;

(3) K.A.R. 28-35-184a;

(4) K.A.R. 28-35-190a;

(5) K.A.R. 28-35-191a;

(6) K.A.R. 28-35-196a; and

(7) all of parts 4 and 10 of these regulations. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended July 27, 2007.)

28-35-178b. General license; certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere. (a)(1) Subject to the provisions of subsections (b) and (c), each commercial and industrial firm, research, educational, and medical institution, individual in the conduct of the individual's business, and federal, state, or local government agency shall be deemed to have been issued a general license to acquire, receive, possess, use, or transfer radioactive material that is contained in any device designed, manufactured, and used for one or more of the following purposes:

(A) Detecting, measuring, gauging, or controlling thickness, density, level interface location, radiation leakage, or qualitative or quantitative chemical composition; or

(B) producing light or an ionized atmosphere.

(2) The general license specified in paragraph (1) of this subsection shall apply only to radioactive material contained in any device that has been manufactured and labeled by a manufacturer in accordance with the specifications of a specific license issued to that manufacturer by the secretary, the nuclear regulatory commission, or an agreement state.

(3) The general license specified in paragraph (1) of this subsection shall not apply to radioactive material in any device containing at least 370MBq (10 mCi) of cesium-137, 3.7 MBq (0.1 mCi) of strontium-90, 37 MBq (1 mCi) of cobalt-60, 3.7 MBq (0.1 mCi) of radium-226, or 37MBq (1mCi) of americium-241 or any other transuranic element, based on the activity indicated on the label.

(4) Each device shall have been received from one of the specific licensees described in paragraph (a)(2) or through a transfer made under paragraph (b)(9).

(b) Each person who acquires, receives, possesses, uses, or transfers radioactive material in a device pursuant to the general license specified in subsection (a) shall comply with all of the following requirements:

(1) Each person subject to this subsection shall ensure that all labels affixed to the device at the time of receipt and bearing a statement that removal of the label is prohibited are maintained and shall comply with all instructions and precautions provided by these labels.

(2) Each person subject to this subsection shall ensure that the device is tested for leakage of radioactive material and proper operation of the on-off mechanism and indicator, if any, at no longer than six-month intervals or at any other intervals specified in any manufacturer's label affixed to the device, except as follows:

(A) The person shall not be required to test devices containing only krypton for leakage of radioactive material.

(B) The person shall not be required to test, for any purpose, any device containing only tritium, not more than 100 microcuries of other beta-emitting or gamma-emitting material, or 10 microcuries of alpha-emitting material or any device held in storage in the original shipping container before initial installation.

(3) Each person subject to this subsection shall ensure that the tests required by paragraph (b) (2) and other operations involving testing, installation, servicing, and removal from installation of the radioactive material, its shielding, or containment are performed in compliance with one of the following:

(A) In accordance with instructions provided on labels affixed to the device; or

(B) by a person holding a specific license issued under this part or equivalent regulations of NRC or an agreement state to perform the tests and other operations.

(4)(A) Each person subject to this subsection shall maintain records showing compliance with the requirements of paragraphs (b)(2) and (b) (3). The records shall show the results of each test. The records also shall show the dates of the testing, installation, servicing, or removal from installation of the radioactive material, its shielding, or containment and the name of each person performing one or more of these tests and other operations.

(B) Each person shall maintain records of tests for leakage of radioactive material required by paragraph (b)(2) for three years after the next required leak test is performed or until the sealed source is transferred or disposed of. Each person shall maintain records of tests of the on-off mechanism and indicator, as required by paragraph (b) (2), for three years after the next required test of the on-off mechanism and indicator is performed or until the sealed source is transferred or disposed of. Each person shall maintain the records required by paragraph (b)(3) for three years from the date of the recorded event or until the device is transferred or disposed of.

(5) Upon a failure of or damage to, or any indication of a possible failure of or damage to, the shielding of the radioactive material or the on-off mechanism or indicator, or upon the detection of 0.005 microcurie or more removable radioactive material, each person subject to this subsection shall take the following actions:

(A) Immediately suspend operation of the device until either of the following conditions is met:

(i) The device has been repaired by the manufacturer or other person holding a specific license issued under this part or equivalent regulations of NRC or an agreement state to repair the device; or

(ii) the device is transferred to a person authorized by a specific license to receive the radioactive material contained in the device;

(B) within 30 days, furnish to the secretary a report containing a brief description of the event and the remedial action taken; and

(C) within 30 days, if contamination of the premises or the environs is likely, furnish to the secretary a plan for ensuring that the premises and environs are acceptable for unrestricted use. The criteria for unrestricted use specified in K.A.R. 28-35-205 may be applicable, as determined by the secretary.

(6) A person subject to this subsection shall not abandon the device.

(7) A person shall not export any device containing radioactive material except in accordance with 10 CFR part 110.

(8) (A) Each person shall transfer or dispose of any device containing radioactive material only by export as provided in paragraph (b)(7), by transfer to another general licensee as authorized in paragraph (b)(9), or to a person authorized to receive the device by a specific license issued under this part or equivalent regulations of NRC or an agreement state.

(B) Each person shall furnish a report to the department within 30 days after the export of the device or the transfer of the device to a specific licensee. The report shall contain the following information:

- (i) The identification of the device by manufacturer's name, model number, and serial number;
- (ii) the name, address, and license number of the person receiving the device; and
- (iii) the date of the transfer.

(C) Each person shall obtain written department approval before transferring the device to any other specific licensee not specifically identified in paragraph (b)(8)(A). The holder of a specific license may transfer a device for possession and use under its own specific license without approval, if the holder performs the following:

(i) Either verifies that the specific license authorizes the possession and use or applies for and obtains an amendment to the license authorizing the possession and use;

(ii) ensures that the device is labeled in compliance with these regulations. The label shall retain the name of the manufacturer, the model number, and the serial number;

(iii) obtains the manufacturer's or initial transferor's information concerning maintenance, including leak testing procedures that are applicable under the specific license; and

(iv) reports the transfer as required by paragraph (b)(8)(B).

(9) Any person subject to this subsection may transfer the device to another general licensee only if either of the following conditions is met:

(A) The device remains in use at a particular location. In this case, the transferor shall give the transferee a copy of this regulation and any safety documents identified in any label affixed to the device and, within 30 days of the transfer, provide a written report to the secretary containing identification of the device by manufacturer's name, model number, and serial number; the name and address of the transferee; and the name, telephone number, and position of an individual who can be contacted by the secretary concerning the device.

(B) The device is held in storage in the original shipping container at its intended location of use before initial use by a general licensee.

(10) Each person subject to this subsection shall comply with the provisions of K.A.R. 28-35-228a and K.A.R. 28-35-229a relating to reports of radiation incidents, theft, or loss of licensed material, but shall be exempt from the other requirements of parts 4 and 10 of these regulations.

(11) Each person shall respond to all written requests from the department to provide information relating to the general license within 30 calendar days of the date of the request or on or before any other deadline specified in the request. If the person cannot provide the requested information within the allotted time, the person, within that same time period, shall request a longer period to supply the information by submitting a letter to the department and shall provide written justification as to why the person cannot comply.

(12) Each general licensee shall appoint an individual responsible for having knowledge of the appropriate regulations and requirements and the authority for taking required actions to comply with appropriate regulations and requirements. The general licensee, through this individual, shall ensure day-to-day compliance with the appropriate regulations and requirements. This appointment shall not relieve the general licensee of any of the licensee's responsibility in this regard.

(13)(A) Each person shall register, in accordance with paragraph (b)(13)(B), each device generally licensed as required by this regulation. Each address for a location of use, as described in paragraph (b)(13)(B)(iv), shall represent a separate general licensee and shall require a separate registration and fee.

(B) In registering each device, the general licensee shall furnish the following information

and any other information specifically requested by the department:

(i) The name and mailing address of the general licensee;

(ii) information about each device as indicated on the label, including the manufacturer's name, the model number, the serial number, and the radioisotope and activity;

(iii) the name, title, and telephone number of the responsible person appointed as a representative of the general licensee under paragraph (b)(12);

(iv) the address or location at which each device is used or stored, or both. For each portable device, the general licensee shall provide the address of the primary place of storage;

(v) certification by the responsible representative of the general licensee that the information concerning each device has been verified through a physical inventory and a check of the label information; and

(vi) certification by the responsible representative of the general licensee that the person is aware of the requirements of the general license.

(14) Each person shall report any change in the mailing address for the location of use, including any change in the name of the general licensee, to the department within 30 days of the effective date of the change. For a portable device, a report of address change shall be required only for a change in the primary place of storage of the device.

(15) No person may store a device that is not in use for longer than two years. If any device with shutters is not being used, the shutters shall be locked in the closed position. The testing required by paragraph (b)(2) shall not be required to be performed during the period of storage only. If the device is put back into service or transferred to another person and was not tested at the required test interval, the device shall be tested for leakage before use or transfer, and all shutters shall be tested before use. Each device kept in storage for future use shall be excluded from the two-year time limit if the general licensee performs quarterly physical inventories of the device while the device is in storage.

(c) Nothing in this regulation shall be deemed to authorize the manufacture or import of any device containing radioactive material.

(d) The general license specified in subsection (a) shall be subject to the provisions of K.A.R. 28-35-184a and K.A.R. 28-35-184b. (Authorized by and implementing K.S.A. 48-1607; effective,

T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Nov. 1, 1996; amended March 24, 2006; amended July 27, 2007; amended March 18, 2011.)

28-35-178c. General license to install devices generally licensed in K.A.R. 28-35-178b.

Any person who holds a specific license issued by the U.S. nuclear regulatory commission or an agreement state authorizing the holder to manufacture, install, or service a device described in K.A.R. 28-35-178b is hereby granted a general license to install and service such a device in this state, if:

(a) The device has been manufactured, labeled, installed and serviced in accordance with the provisions of the specific licenses issued in regard to manufacturing, labeling, installing and servicing the device; and

(b) Such person assures that all labels required to be affixed to the device are in place. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-178d. Luminous safety devices for use in aircraft.

(a) A general license is hereby issued to acquire, possess, and use tritium or promethium-147 contained in luminous safety devices for use in aircraft if:

(1) the device contains not more than 10 curies of tritium or 300 millicuries of promethium-147; and

(2) the device has been manufactured, assembled or imported in accordance with a specific license, issued under the provisions of section 32.53 of the regulations of the United States nuclear regulatory commission or manufactured or assembled in accordance with a specific license issued by an agreement state, which authorizes manufacture or assembly of the device for distribution to persons generally licensed by the agreement state.

(b) Persons who acquire, possess or use luminous safety devices pursuant to the general license issued in subsection (a) of this regulation shall be exempt from the requirements of parts 4 and 10 of these regulations, except that they shall comply with the provisions of K.A.R. 28-35-228a and 28-35-229a.

(c) The general license issued in this regulation shall not authorize the manufacture, assembly or repair, or the importation or exportation,

of luminous safety devices containing tritium or promethium-147.

(d) The general license issued in this regulation shall not authorize the acquisition, possession or use of promethium-147 contained in instrument dials. (Authorized by and implementing K.S.A. 1985; effective May 1, 1986.)

28-35-178e. Americium-241 or radium-226 in the form of calibration or reference sources. (a) A general license to acquire, possess, use and transfer, in accordance with the provisions of subsections (b) and (c), americium-241 or radium-226 in the form of calibration or reference sources is hereby issued to any person who holds a specific license issued by the nuclear regulatory commission that authorizes the agency to acquire, possess, use, and transfer by-product material, source material, or special nuclear material.

(b) The general license issued in subsection (a) shall apply only to calibration or reference sources that have been manufactured or initially transferred in accordance with the specifications contained in a specific license issued by the secretary, the nuclear regulatory commission, or an agreement state.

(c) The general license issued in subsection (a) shall be subject to the provisions of K.A.R. 28-35-184a, and to all of the provisions of parts 4 and 10 of these regulations. In addition, persons who acquire, possess, use, and transfer one or more calibration or reference sources pursuant to this general license shall meet the following requirements:

(1) Not possess, at any one time, at any one location of storage or use, more than 5 microcuries of either americium-241 or radium-226 in such sources;

(2) not receive, possess, use, or transfer such a source unless the source, or the storage container, bears a label that includes the following statement or a substantially similar statement that contains the information called for in the following statement:

“The receipt, possession, use and transfer of this source, Model _____, Serial No. _____, are subject to a general license and the regulations of the United States Nuclear Regulatory Commission or of a State with which the commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label.

CAUTION—RADIOACTIVE MATERIAL—THIS SOURCE CONTAINS AMERICIUM-241 (or RADIUM-226). DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.

(Name of manufacturer or initial transferor)”;

(3) not transfer, abandon, or dispose of such source except by transfer to a person authorized by a license issued by the secretary, the nuclear regulatory commission, or an agreement state to receive the source;

(4) store such source, except when the source is being used, in a closed container designed and constructed to contain either americium-241 or radium-226 that might otherwise escape during storage; and

(5) not use the source for any purpose other than the calibration of radiation detectors or the standardization of other sources.

(d) The general license issued in this regulation shall not authorize the manufacture, or the importation or exportation, of calibration or reference sources containing either americium-241 or radium-226. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-178f. General license to own radioactive material. A general license is hereby issued to own radioactive material without regard to quantity. However, a general licensee under this regulation is not authorized to manufacture, produce, transfer, receive, possess, use, import or export radioactive material, except as authorized in a specific license. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-178g. General license for strontium-90 in ice detection devices. (a) A general license is hereby issued to own, acquire, possess, use and transfer strontium-90 contained in ice detection devices if each device contains not more than 50 microcuries of strontium-90 and if each device is manufactured or initially transferred in accordance with the specifications contained in a license issued to the manufacturer by the secretary, the U.S. nuclear regulatory commission or an agreement state.

(b) Persons who own, acquire, possess, use, or transfer strontium-90 contained in ice detection devices pursuant to the general license issued in subsection (a) of this section:

(1) Shall, if visually observable damage to the device occurs, including a bend or crack or discoloration from overheating, discontinue use of the device until it has been inspected, tested for leakage and repaired by a person holding a specific license issued by the secretary, the U.S. nuclear regulatory

commission or an agreement state to manufacture or service the device, or shall dispose of the device pursuant to the provisions of K.A.R. 28-35-223a;

(2) Shall assure that all labels affixed to the device at the time of receipt, and which bear a statement that prohibits removal of the labels, are maintained thereon;

(3) Shall be exempt from the requirements of parts 4 and 10 of these regulations, except that such persons shall comply with the provisions of K.A.R. 28-35-223a, 28-35-228a and 28-35-229a.

(c) This general license shall not authorize the manufacture, assembly, disassembly or repair, or the importation or exportation, of strontium-90 in ice detection devices. (Authorized by and implementing K.A.R. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-178h. General license for use of by-product material for certain in vitro clinical or laboratory testing. (a) A general license is hereby issued to any physician, veterinarian in the practice of veterinary medicine, clinical laboratory or hospital to acquire, possess, use and transfer in accordance with the provisions of subsections (b), (c), (d), (e), and (f) of this section, the following radioactive materials in prepackaged units for use in any of the following stated tests:

(1) Iodine-125, in units not exceeding 10 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(2) Iodine-131, in units not exceeding 10 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(3) Carbon-14, in units not exceeding 10 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(4) Hydrogen-3 (tritium), in units not exceeding 50 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(5) Iron-59, in units not exceeding 20 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(6) Selenium-75, in units not exceeding 10 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(7) Mock Iodine-125 reference or calibration sources, in units not exceeding 0.05 microcuries of Iodine-129 and 0.005 microcurie of americium-241 each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material, or the radiation therefrom, to human beings or animals.

(8) Cobalt-57, in units not exceeding 10 microcuries each, for use in in vitro clinical or laboratory tests not involving internal or external administration of radioactive material or the radiation therefrom, to human beings or animals.

(b)(1) A person shall not acquire, possess, use or transfer radioactive material pursuant to the general license issued in subsection (a) of this section until the person has filed form RH-31, "Registration Certificate—In Vitro Testing with Radioactive Material Under General License," with the secretary and has received from the secretary a validated copy of the form, with a registration number assigned, or until the person has been authorized pursuant to K.A.R. 28-35-181d(d) to use radioactive material under the general license issued in subsection (a) of this regulation.

(2) Each person who files a form RH-31 shall provide all the information requested by that form.

(c) Each person who acquires, possesses, or uses radioactive material pursuant to the general license issued in subsection (a) of this section:

(1) Shall not possess, at any one time, at any one location of storage or use, a total amount of iodine-125, iodine-131, selenium-75, cobalt-57 or iron-59 in excess of 200 microcuries;

(2) shall store the radioactive material, until used, in the original shipping container or in a container providing equivalent radiation protection;

(3) shall use the radioactive material only for the uses authorized in subsection (a) of this section;

(4) shall not transfer the radioactive material except by transfer to a person authorized to receive it under a license issued by the secretary, the U.S. nuclear regulatory commission or an agreement state, and shall not transfer the radioactive material in any manner other than in the unopened, labeled shipping container as received from a supplier; and

(5) shall dispose of mock iodine-125 reference

or calibration sources in accordance with the requirements of K.A.R. 28-35-223a.

(d) Each general licensee shall not receive, acquire, possess, or use radioactive material pursuant to subsection (a) of this section:

(1) Except as prepackaged units which are labeled in accordance with the provisions of a specific license issued by the secretary, the U.S. nuclear regulatory commission, or an agreement state; and

(2) Unless the following statement, or a substantially similar statement which contains the information called for in the following statement, appears on a label affixed to each prepackaged unit or appears in a leaflet or brochure which accompanies the package:

“This radioactive material may be received, acquired, possessed, and used only by physicians, veterinarians in the practice of veterinary medicine, clinical laboratories or hospitals and only for in vitro clinical or laboratory tests not involving internal or external administration of the material, or the radiation therefrom, to human beings or animals. Its receipt, acquisition, possession, use, and transfer are subject to the regulations and a general license of the U.S. nuclear regulatory commission or of a state with which the commission has entered into an agreement for the exercise of regulatory authority.

(Name of Manufacturer)”

(e) Each person possessing or using radioactive materials under the general license issued in subsection (a) of this section shall file a written report with the secretary of any change in the information furnished on form RH-31. The report shall be filed within 30 days after the effective date of any change.

(f) Any person using radioactive material pursuant to the general license issued in paragraph (1) of subsection (a) shall be exempt from the requirements of parts 4 and 10 of these regulations with respect to radioactive materials covered by that general license, except that any person using Mock Iodine-125 shall comply with the provisions of K.A.R. 28-35-223a, 28-35-228a and 28-35-229a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-178i. General licenses for certain units of radium-226. (a) Subject to the limitations in subsections (b), (c) and (d), a general license is hereby issued to any person to acquire, possess, use, and transfer radium-226 contained in the following products if manufactured before the effective date of this regulation:

(1) Antiquities originally intended for use by the general public. For the purposes of this paragraph, “antiquities” shall mean products originally intended for use by the general public and distributed in the late 19th and early 20th centuries, including radium emanator jars, revigators, radium water jars, radon generators, refrigerator cards, radium bath salts, and healing pads;

(2) intact timepieces containing more than 0.037 megabecquerel (1 microcurie), nonintact timepieces, and timepiece hands and dials no longer installed in timepieces;

(3) luminous items installed in air, marine, or land vehicles;

(4) all other luminous products not listed in this subsection, if not more than 100 items are used or stored at the same location at any one time; and

(5) small radium sources containing not more than 0.037 megabecquerel (1 microcurie) of radium-226.

(b) A person shall not acquire, possess, use, or transfer radium-226 pursuant to the general license issued in subsection (a) until the person has filed form RH-37 with the secretary and has received from the secretary a validated copy of the form, with a certification number assigned. Each person filing a form RH-37 shall provide all the information required by that form.

(c) Each person who acquires, receives, possesses, uses, or transfers by-product material in accordance with the general license issued in subsection (a) shall meet the following requirements:

(1) Notify the department of any indication of possible damage to the product that indicates a potential loss of the radioactive material. A report containing a brief description of the event and the remedial action taken shall be provided to the department within 30 days of the incident;

(2) not abandon any products containing radium-226. The product and any radioactive material from the product shall be disposed of only according to K.A.R. 28-35-165 or by transfer to a person authorized by a specific license to receive the radium-226 in the product or as otherwise approved by the department;

(3) not export any products containing radium-226 except in accordance with K.A.R. 28-35-178b;

(4) dispose of any products containing radium-226 at a disposal facility authorized to dispose of radioactive material in accordance with any federal or state solid or hazardous waste law, including the solid waste disposal act of 1965, 42 U.S.C.

6901 through 6992k as amended, as authorized under 42 U.S.C. 15801 et seq., by transfer to a person authorized to receive radium-226 by a specific license issued under K.A.R. 28-35-180a or equivalent regulations of an agreement state, or as otherwise approved by the department; and

(5) respond to any written request from the department to provide information relating to the general license within 30 calendar days of the date of the request or other time specified in the request. If the general licensee cannot provide the requested information within the allotted time, that licensee shall, within that same time period, request a longer period to supply the information by submitting a letter to the department and shall provide written justification as to why the person cannot comply.

(d) Each general licensee under this regulation shall file with the secretary a written report of any changes in the information filed in form RH-37. The report shall be furnished within 30 days after the effective date of the change.

(e) Each general licensee under this regulation shall be exempt from the requirements of parts 4 and 10 of these regulations with respect to the radioactive material covered by the general license.

(f) The general license specified in subsection (a) shall not authorize the manufacture, assembly, disassembly, repair, or import of any products containing radium-226, except that timepieces may be disassembled and repaired.

(g) Any general licensee under this regulation who is an individual member of the public may submit an application to the department for a waiver from the general license fee prescribed in K.A.R. 28-35-147a. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended May 4, 2018.)

28-35-178j. General license for use of radioactive material for certain in vivo clinical or laboratory testing. (a) Except as provided in subsections (b) and (c), each person shall be exempt from the license requirements in part 3 and part 6 of these regulations if the person receives, possesses, uses, transfers, owns, or acquires any capsules containing 37 kBq (1 μ Ci) of carbon-14 urea, allowing for nominal variation that may occur during the manufacturing process for in vivo diagnostic use for humans.

(b) Before using the capsules specified in subsection (a) for research involving human subjects,

each person shall apply and shall be considered for approval for a specific license. Each person shall be required to have a specific license before engaging in the research specified in this subsection.

(c) Before manufacturing, preparing, processing, producing, packaging, repackaging, or transferring the capsules specified in subsection (a) for commercial distribution, each person shall apply and shall be considered for approval for a specific license. Each person shall be required to have a specific license before performing any of the actions specified in this subsection.

(d) Nothing in this regulation shall exempt any person from applicable FDA requirements, other federal requirements, and state requirements governing receipt, administration, and use of drugs. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended March 18, 2011.)

28-35-179. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-179a. Application for specific license; renewal or amendment. (a) Any person may file a written application with the secretary for a specific license to acquire, possess, use, or transfer radioactive material. Each person shall file a written application with the secretary to renew or amend any specific license. Each application for a specific license, or a renewal or an amendment of an existing license, shall be submitted on the appropriate form furnished by the secretary. Each person filing an application shall provide all the information requested on the application form, and any additional relevant information requested by the secretary.

(b) Each application filed with the secretary shall be signed by the applicant or licensee, or by a person authorized to act for or on behalf of the applicant or licensee.

(c) Any application may incorporate, by reference, information provided in applications, reports, or other documents previously filed with the secretary. Each reference to information previously filed with the secretary shall be clear and specific.

(d) Any application for a specific license may include a request for a license authorizing activity at one or more installations or locations.

(e) Except as provided in subsections (f), (g), and (h), each application for a specific license to use radioactive material in the form of a sealed

source or in a device that contains the sealed source shall include either of the following:

(1) Identification of the sealed source or device by manufacturer and model number as registered with the department, nuclear regulatory commission (NRC), or an agreement state; or

(2) sufficient information about the design, manufacture, prototype testing, quality control program, labeling, proposed uses, and leak testing to provide reasonable assurance that the radiation safety properties of the sealed source or device are adequate to protect health and minimize danger to life and property. For a device, the application shall also include sufficient information about installation, service and maintenance, operating and safety instructions, and potential hazards, to provide reasonable assurance that the radiation safety properties of the sealed source or device are adequate to protect health and minimize danger to life and property.

(f) For any sealed source or device manufactured before October 23, 2012 that is not registered with the department, NRC, or an agreement state and for which the applicant is unable to provide the information specified in this regulation, the application shall include the following:

(1) All available information specified in K.A.R. 28-35-181e, concerning the sealed source, and, if applicable, the device; and

(2) sufficient additional information to demonstrate reasonable assurance that the radiation safety properties of the sealed source or device are adequate to protect health and minimize danger to life and property. The information shall include a description of the sealed source or device, a description of radiation safety features, the intended use and associated operating experience, and the results of the most recent leak test.

(g) For sealed sources and devices allowed to be distributed without the registration of safety information as required in this regulation, the applicant may supply only the name of the manufacturer, model number, and radionuclide quantity.

(h) If it is not feasible to identify each sealed source and device individually, the applicant may propose constraints on the number and type of sealed sources and devices to be used and the conditions under which the sealed sources and devices will be used, instead of identifying each sealed source and device. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended May 4, 2018.)

28-35-180. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-180a. General requirements for the issuance of specific licenses. Each application for a specific license shall be approved only if the application meets the requirements of these regulations.

(a) Each applicant shall be required to be qualified by reason of training and experience to use the material in question for the purpose requested, in accordance with these regulations, and in a manner that will protect public health and safety and the environment.

(b) The proposed equipment, facilities, and procedures used by each applicant shall protect public health and safety and the environment.

(c) A specific license shall be approved only if the secretary determines that the license is protective of public health and safety and the environment.

(d) Each applicant shall meet the requirements in these regulations for the particular license sought.

(e)(1) Each application for a license for commercial waste disposal, source material milling, or any other operation that the secretary determines will affect the environment shall meet the requirement specified in this paragraph. Each application shall include information that permits the secretary to weigh the environmental, economic, technical, and other benefits against the environmental costs and alternatives to ensure the protection of public health and safety and the environment.

(2) The approval of each application specified in paragraph (e)(1) shall be based upon the following:

(A) The information specified in paragraph (e)(1) and other information as necessary; and

(B) the information required by 10 C.F.R. 51.45, as in effect on April 30, 1992.

(f) Each applicant shall be authorized to begin construction only after the issuance of the license. Commencement of construction before issuance of the license shall be grounds for denial of the license application. "Commencement of construction," as used in this regulation, shall mean any clearing of land, excavation, or other substantial action that would adversely affect the environment of a site.

(g) Each applicant for a license, other than a renewal, shall describe in the application how the

facility design and procedures for operation will minimize, to the extent practicable, contamination of the facility and the environment, facilitate eventual decommissioning, and minimize, to the extent practicable, the generation of radioactive waste.

(h) Each licensee who manufactures a nationally tracked source shall assign a unique serial number to each nationally tracked source manufactured by the licensee. Each serial number shall be composed only of alphanumeric characters.

(i) Each licensee shall conduct operations to minimize the introduction of residual radioactivity into the facility out to the site boundary, including the subsurface, in accordance with the existing radiation protection requirements and radiological criteria for license termination in these regulations. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Sept. 20, 1993; amended Nov. 1, 1996; amended Dec. 30, 2005; amended July 27, 2007; amended May 4, 2018.)

28-35-180b. Financial assurance for decommissioning. (a) Each applicant for a specific license authorizing the possession and use of unsealed radioactive material with a half-life greater than 120 days and in quantities exceeding 10^5 times the applicable quantities specified in K.A.R. 28-35-201 shall submit a decommissioning funding plan as described in subsection (e) of this regulation. Each applicant shall also submit the decommissioning funding plan if a combination of isotopes is involved and if R divided by 10^5 is greater than one, where R is defined here as the sum of the ratios of the quantity of each isotope to the applicable value specified in K.A.R. 28-35-201.

(b) Each applicant for a specific license authorizing the possession and use of radioactive material with a half-life greater than 120 days and in quantities specified in table I shall submit either of the following:

(1) A decommissioning funding plan as described in subsection (e); or

(2) a certification that financial assurance for decommissioning has been provided in the amount prescribed by table I, using one of the methods described in subsection (f). The certification may state that the appropriate assurance is to be obtained after the application has been approved and the license has been issued, but before the receipt of licensed material. If the applicant defers execution of the financial instrument required under subsection (f) until after the license has been

issued, a signed original of the financial instrument shall be submitted to the department before the applicant receives the licensed material. If the applicant does not defer execution of the financial instrument required under subsection (f), the applicant shall submit to the department, as part of the certification, a signed original of the financial instrument.

(c) Each holder of a specific license that is a type specified in subsection (a) or (b) shall provide financial assurance for decommissioning in accordance with the following requirements:

(1) Each holder of a specific license that is a type specified in subsection (a) shall submit a decommissioning funding plan as specified in subsection (e) or a certification of financial assurance for decommissioning in an amount equal to at least \$1,125,000.00. Each licensee shall submit the plan or certification to the department in accordance with the criteria specified in this regulation. If the licensee submits a certification of financial assurance rather than a decommissioning funding plan, the licensee shall include a decommissioning funding plan in any application for license renewal.

(2) Each holder of a specific license that is a type specified in subsection (b) shall submit a decommissioning funding plan as specified in subsection (e) or a certification of financial assurance for decommissioning. Each licensee shall submit the plan or certification to the department, in accordance with the requirements specified in this regulation.

(d) The amounts of financial assurance required for decommissioning, by quantity of material, shall be those specified in table I.

Table I
Financial assurance for decommissioning
by quantity of material

If the possession limit is greater than 10^4 but less than or equal to 10^5 times the applicable quantities specified in K.A.R. 28-35-201, in unsealed form	\$1,125,000.00
For a combination of isotopes, in unsealed form, if R, as defined in subsection (a), divided by 10^4 is greater than one, but R divided by 10^5 is equal to or less than one	\$1,125,000.00
If the possession limit is greater than 10^3 but less than or equal to 10^4 times the applicable quantities specified in K.A.R. 28-35-201, in unsealed form	\$225,000.00
For a combination of isotopes, in unsealed form, if R, as defined in subsection (a), divided by 10^3 is greater than one, but R divided by 10^4 is less than or equal to one	\$225,000.00

If the possession limit is greater than 10^{10} times the applicable quantities specified in K.A.R. 28-35-201, in sealed sources or foils	\$113,000.00
For a combination of isotopes, in sealed sources or foils, if R, as defined in subsection (a), divided by 10^{10} is greater than one.....	\$113,000.00

(e) Each decommissioning funding plan shall contain the following:

(1) A cost estimate for decommissioning in an amount including the following:

(A) The cost of an independent contractor to perform all decommissioning activities;

(B) the cost of meeting the requirements for unrestricted use specified in K.A.R. 28-35-205. However, if the applicant or licensee can demonstrate the ability to meet the provisions of K.A.R. 28-35-205a, the cost estimate may be based on meeting the requirements in K.A.R. 28-35-205a;

(C) the volume of on-site subsurface material containing residual radioactivity that will require remediation to meet the requirements for license termination; and

(D) a contingency factor;

(2) identification of and justification for using the key assumptions contained in the decommissioning cost estimate;

(3) a description of the method of ensuring funds for decommissioning from subsection (f), including means for adjusting cost estimates and associated funding levels periodically over the life of the facility;

(4) a certification by the licensee that financial assurance for decommissioning has been provided in the amount of the cost estimate for decommissioning;

(5) a signed original of the financial instrument obtained to satisfy the requirements in subsection (f); and

(6) at the time of license renewal and at intervals not longer than three years, the decommissioning funding plan with adjustments necessary to account for changes in costs and the extent of contamination. The amount of financial assurance shall not be reduced without first obtaining the approval of an updated decommissioning funding plan. The decommissioning funding plan shall update the information submitted with the original or prior approved plan and shall specifically consider the effect of the following events on decommissioning costs:

(A) Spills of radioactive material producing additional residual radioactivity in on-site subsurface material;

(B) waste inventory exceeding the amount previously estimated;

(C) waste disposal costs exceeding the amount previously estimated;

(D) facility modifications;

(E) changes in authorized possession limits;

(F) actual remediation costs exceeding the previous cost estimate;

(G) on-site disposal; and

(H) use of a settling pond.

(f) Each licensee shall provide financial assurance for decommissioning by one or more of the following methods:

(1) Prepayment. "Prepayment" shall mean the deposit of cash or liquid assets before the start of operation into a trust account acceptable to the secretary that is segregated from the licensee's assets and outside of the licensee's administrative control. The deposit shall consist of an amount that is sufficient to pay decommissioning costs. The adequacy of the trust funds shall be based on an assumed annual rate of return of one percent on the funds deposited into the trust.

(2) A surety instrument, insurance policy, or other guarantee method. The licensee may use a surety instrument, insurance policy, or other similar means to guarantee that decommissioning costs will be paid. A surety instrument may be in the form of a surety bond, letter of credit, or line of credit. A parent company's guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test meet the requirements of K.A.R. 28-35-203. A parent company's guarantee shall not be used in combination with other financial methods to meet the requirements in this regulation. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test meet the requirements of K.A.R. 28-35-203. A guarantee by the applicant or licensee shall not be used in combination with any other financial methods to meet the requirements in this regulation or in any situation in which a parent company of the applicant or licensee holds majority control of the voting stock of the company. Each surety instrument or insurance policy used to provide financial assurance for decommissioning shall contain the following requirements:

(A) The surety instrument or insurance policy shall be open-ended or, if written for a specified term, shall be renewed automatically, unless 90 days or more before the renewal date, the insurer

notifies the department, the beneficiary, and the licensee of the insurer's intention not to renew. The surety instrument or insurance policy shall also provide that the full face amount will be paid to the beneficiary automatically before the expiration without proof of forfeiture if the licensee fails to provide a replacement that meets the requirements of this regulation within 30 days after receipt of notification of cancellation.

(B) The surety instrument or insurance policy shall be payable to an approved trust established for decommissioning costs. The trustee may include an appropriate state or federal agency or an entity that has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(C) The surety instrument or insurance policy shall remain in effect until the license is terminated by the department.

(3) External sinking fund. A licensee may provide financial assurance for decommissioning through an external sinking fund in which deposits are made at least annually, coupled with a surety instrument or insurance policy. The value of the surety instrument or insurance policy may decrease by the amount accumulated in the sinking fund. "External sinking fund" shall mean a fund that meets both of the following conditions:

(A) Is established and maintained by setting aside funds periodically in an account segregated from the licensee's assets and outside the licensee's administrative control; and

(B) contains a total amount of funds sufficient to pay the decommissioning costs when termination of the operation is expected. An external sinking fund may be in the form of a trust, escrow account, government fund, certificate of deposit, or deposit of government securities. The surety or insurance provisions shall meet the requirements specified in this subsection.

(4) Statement of intent. Any federal, state, or local government licensee may submit a statement of intent containing a cost estimate for decommissioning or an amount based on table I of this regulation and indicating that funds for decommissioning will be obtained when necessary.

(g) Each person licensed under subsections (a) through (f) shall keep records of all information that is relevant to the safe and effective decommissioning of the facility. The records shall be kept in an identified location until the license is terminated by the department. If records of relevant information are kept for other purposes,

the licensee may refer to these records and the location of these records within the records kept pursuant to this subsection.

(h) Each licensee shall maintain decommissioning records, which shall consist of the following information:

(1) Records of spills or other unusual occurrences involving the spread of contamination in and around the facility, equipment, or site. These records may be limited to records of instances in which contamination remains after any cleanup procedures or when there is reasonable likelihood that contaminants could have spread to inaccessible areas. These records shall include any known information identifying the nuclides, quantities, forms, and concentrations involved in the spill or occurrence;

(2) drawings of the following, both as originally built and, if applicable, as modified:

(A) The structures and equipment in restricted areas where radioactive materials are used or stored, or both; and

(B) the locations of possible inaccessible contamination. If the licensee refers to required drawings other than those kept pursuant to this regulation, the licensee shall not be required to index each relevant document individually. If drawings are not available, the licensee shall substitute available information concerning these areas and locations;

(3) a list of the following information, which shall be contained in a single document and updated every two years:

(A) All areas designated and formerly designated as restricted areas;

(B) all areas outside of restricted areas that require the documentation specified in this subsection;

(C) all areas outside of restricted areas where current and previous wastes have been buried and documented as specified in K.A.R. 28-35-227j; and

(D) all areas outside of restricted areas that contain material so that, if the license expired, the licensee would be required either to decontaminate the area to unrestricted release levels or to apply for approval for disposal as specified in K.A.R. 28-35-225a.

Those areas containing sealed sources only shall not be included in the list if the sources have not leaked, no contamination remains in the area after any leak, or the area contains only radioactive materials having half-lives of less than 65 days; and

(4) the following records:

(A) Records of the cost estimate performed for the decommissioning funding plan or records of the amount certified for decommissioning; and

(B) if either a funding plan or certification is used, records of the funding method used for as-suring funds.

(i) Each applicant for a specific license shall make available a long-term care fund necessary to provide for the long-term surveillance and care of the radioactive material or waste. Each applicant for any of the following types of specific licenses shall establish the long-term care fund before the issuance of the license or before the termination of the license if the applicant chooses, by providing a surety instrument in lieu of a long-term care fund:

(1) Waste-handling licenses;

(2) source material milling licenses; and

(3) licenses for any facilities formerly licensed by the U.S. atomic energy commission or the nuclear regulatory commission (NRC), if required.

(j)(1) Each applicant shall agree to notify the department, in writing, immediately following the filing of a voluntary or involuntary petition for bankruptcy under any chapter of title 11, bankruptcy, of the United States code by or against any of the following:

(A) The licensee;

(B) any person controlling the licensee or listing the license or licensee as property of the estate; or

(C) any affiliate of the licensee.

(2) The bankruptcy notification shall indicate the following:

(A) The name of the bankruptcy court in which the petition for bankruptcy was filed; and

(B) the date on which the petition was filed. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended March 18, 2011; amended May 4, 2018.)

28-35-181. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-181a. Specific licenses for human use of radioactive material in medical institutions. An application for a specific license for human use of radioactive material in institutions shall not be approved unless all of the following conditions are met:

(a) The applicant has appointed a radiation safety committee as specified in 10 CFR 35.24(f), which is adopted by reference in K.A.R. 28-35-264.

(b) The applicant possesses adequate facilities for the clinical care of patients.

(c) The physician or physicians designated on the application as the user or users have substantial experience in handling and administering radioactive materials and, if applicable, clinical management of radioactive patients.

(d) If the application is for a license to use unspecified quantities or multiple types of radioactive material, the applicant or applicant's staff has substantial experience in the use of a variety of radioactive materials for a variety of human uses. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-181b. Specific licenses to individual physicians for human use of radioactive material. (a) A specific license for the human use of radioactive materials outside of a medical institution shall not be issued to an individual physician unless:

(1) The applicant has access to a hospital and adequate facilities are available for the hospitalization and monitoring of the applicant's radioactive patients when such action is advisable; and

(2) the applicant has extensive experience in the proposed use, handling and administration of radioactive material, and where applicable, clinical management of radioactive patients. The physician shall furnish evidence of this experience with the application for the specific license.

(b) The secretary shall not approve an application by an individual physician or group of physicians for a specific license to receive, possess, or use radioactive material on the premises of a medical institution unless:

(1) The use of radioactive material is limited to:

(A) The administration of radiopharmaceuticals for diagnostic or therapeutic purposes;

(B) the performance of diagnostic studies on patients to whom a radiopharmaceutical has been administered;

(C) the performance of in vitro diagnostic studies; and

(D) calibration and quality control checks of radioactive assay instrumentation, radiation safety instrumentation and diagnostic instrumentation;

(2) the physician brings the radioactive material to the institution for each use and removes the radioactive material from the institution after each use; and

(3) the medical institution or institutions at which the radioactive materials are to be used by the phy-

sician or physicians do not hold a specific license under K.A.R. 28-35-181a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181c. Specific license for human use of radioactive material in sealed sources.

(a) A specific license for human use of radioactive materials in sealed sources shall not be issued unless the applicant, or if the application is made by an institution, each individual user of the radioactive material:

(1) Has specialized training in the diagnostic or therapeutic use of the sealed source device or extensive experience in the use of the device; and

(2) is a physician.

(b) The applicant shall furnish evidence of the training or experience required by subsection (a) at the time of filing the application for the specific license. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181d. Specific licenses for one or more groups of medical uses.

(a) Any institution, person, or group of persons meeting the requirements of K.A.R. 28-35-181a or 28-35-181b may file a written application with the secretary for a specific license to use radioactive material for any group or groups of medical uses. Each application shall meet the requirements of K.A.R. 28-35-179a and shall designate the intended group or groups of uses for the radioactive material.

(b) Each application for a specific license to use radioactive material for any group or groups of medical uses shall meet all of the following requirements:

(1) The applicant, or the physician or physicians designated in the application as the individual user or users, has adequate clinical experience in performing the medical use or uses for which application is made.

(2) The applicant's proposed radiation detection instrumentation is adequate for conducting the medical procedures specified in the group or groups of uses for which application is made.

(3) The applicant's radiation safety operating procedures are adequate for the proper handling and disposal of radioactive material involved in the group or groups of uses for which application is made.

(4) The applicant, or the physician or physicians designated in the application as the individual user or users, and all other personnel who will be

involved in the preparation and use of the radioactive material have adequate training and experience in the handling of radioactive material. The training and experience shall be appropriate for the conduct of the uses included in the group or groups of uses for which application is made.

(c) Each licensee who is licensed under this regulation shall be subject to the following limitations:

(1) A licensee who has been issued a license for group I, II, IV, or V uses shall not receive, possess, or use radioactive material, except those radiopharmaceuticals manufactured in the form to be administered to the patient, and labeled, packaged, and distributed in accordance with a specific license issued by the secretary, or the United States nuclear regulatory commission or an agreement state.

(2) A licensee who has been issued a license for group III uses shall not receive, possess, or use generators or reagent kits containing radioactive material and shall not use reagent kits that do not contain radioactive material to prepare radiopharmaceuticals containing radioactive material, except for the following:

(A) Reagent kits not containing radioactive material that are approved by the secretary, the United States nuclear regulatory commission, or an agreement state for use by persons licensed pursuant to this regulation for group III medical uses; or

(B) generators or reagent kits containing radioactive material that are manufactured, labeled, packaged, and distributed in accordance with a specific license issued by the secretary, the United States nuclear regulatory commission, or an agreement state.

(3) Each licensee who has been issued a license for group III uses and who uses generators or reagent kits shall elute the generator or process radioactive material with the reagent kit in accordance with instructions that are approved by the secretary, the United States nuclear regulatory commission, or an agreement state and furnished by the manufacturer on the label attached to, or in the leaflet or brochure that accompanies, the generator or reagent kit.

(4) Each licensee who has been issued a license for groups I, II, or III uses and who uses the radioactive material for clinical procedures other than those specified in the product labeling or package insert shall comply with the product labeling regarding the following:

(A) Chemical and physical form;

(B) route of administration; and

(C) dosage range.

(5) A licensee who has been issued a license for group IV uses shall not receive, possess, or use radioactive material unless contained in a source or device that has been manufactured, labeled, packaged, and distributed in accordance with a specific license issued by the secretary, the United States nuclear regulatory commission, or an agreement state.

(d) Each licensee who is licensed under this regulation shall be authorized to use radioactive material under the general license issued in K.A.R. 28-35-178h for the specified in vitro uses, without filing form RH-31 as otherwise required by that regulation. However, the licensee shall be subject to the other requirements of K.A.R. 28-35-178h.

(e) Each licensee who is licensed under this regulation shall be authorized, subject to the provisions of subsections (f) and (g), to receive, possess, and use the following for calibration and reference standards:

(1) Any radioactive material listed in groups I, II, or III that has a half-life of 100 days or less, in amounts not exceeding 15 millicuries;

(2) any radioactive material listed in group I, II, or III that has a half-life greater than 100 days, in amounts not exceeding 200 microcuries;

(3) technetium-99m, in amounts not exceeding 30 millicuries; and

(4) any radioactive material, in amounts not exceeding three millicuries per source, contained in calibration or reference sources that have been manufactured, labeled, packaged, and distributed in accordance with a specific license issued by the secretary, the United States nuclear regulatory commission, or an agreement state.

(f)(1) Each licensee who possesses sealed sources as calibration or reference sources pursuant to subsection (e) shall cause each sealed source containing radioactive material, other than hydrogen 3, that has a half-life greater than 30 days and that is in any form other than gas to be tested for leakage, contamination, or both at intervals not exceeding six months. In the absence of a certificate from a transferor indicating that a leak test has been made within six months before the transfer of a particular sealed source, that sealed source shall not be used until tested, unless one of the following conditions is met:

(A) The source contains 100 microcuries or less of beta-emitting, gamma-emitting, or beta-emitting and gamma-emitting material, or 10 microcuries or less of alpha-emitting material.

(B) The sealed source is stored and is not being used.

(2) Each leak test required under paragraph (f)(1) shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. The test sample shall be taken from sealed source or from the surfaces of the device in which the sealed source is permanently mounted or stored and on which contamination might be expected to accumulate. Records of leak test results shall be kept in units of microcuries and shall be maintained for inspection by the department.

(3) If the leak test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired, or to be disposed of in accordance with parts 3 and 4 of these regulations. A report shall be filed with the secretary within five days of the test, describing the equipment involved, the test results, and the corrective action taken.

(g) Each licensee who possesses and uses calibration and reference sources pursuant to subsection (e) shall perform the following:

(1) Follow radiation safety and handling instructions that are approved by the secretary, the United States nuclear regulatory commission, or an agreement state and furnished by the manufacturer on the label attached to the source, or permanent container thereof, or in the leaflet or brochure that accompanies the source;

(2) maintain the instructions referenced in paragraph (g)(1) in a legible and conveniently available form; and

(3) conduct a quarterly physical inventory to account for all sources received and possessed. Records of the inventories shall be maintained for inspection by the department and shall include the quantities and kinds of radioactive material, location of sources, and the date of the inventory. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended July 27, 2007.)

28-35-181e. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; revoked March 18, 2011.)

28-35-181f. Special licenses for the introduction of radioactive material into products in exempt concentrations. (a) An application for a specific license to introduce ra-

radioactive material into a product or material and to transfer the product or material to any person who is exempt from regulation under K.A.R. 28-35-192b(a) shall not be approved unless the applicant submits with the application for the specific license:

(1) A description of the product or material into which the radioactive material is to be introduced;

(2) an explanation of the intended use of the radioactive material;

(3) the method by which the radioactive material is to be introduced;

(4) the concentration of the radioactive material to be introduced;

(5) the control method or methods to be employed to assure that no more than the specified concentration is introduced;

(6) the estimated time interval between introduction of radioactive material into the product or material and the transfer of the product or material;

(7) the estimated concentration of radioactive material that will be present in the product or material at the time of transfer; and

(8) reasonable assurances that:

(A) the concentrations of radioactive material at the time of transfer will not exceed the limitations prescribed in K.A.R. 28-35-198a, Schedule C;

(B) reconcentration of the radioactive material concentrations exceeding the limitations prescribed in K.A.R. 28-35-198a, Schedule C is not likely to occur;

(C) use of lower concentrations of radioactive material is not practical or feasible; and

(D) the product or material is not likely to be incorporated in any food, beverage, cosmetic, drug or other commodity or product designed for ingestion or inhalation by, or application to, a human being.

(b)(1) Each person licensed under subsection (a) of this regulation shall file an annual report with the secretary describing the type and quantity of each product or material into which radioactive material has been introduced during the reporting period; the name and address of the person to whom possession of the product of material into which radioactive material has been introduced was transferred; the type and quantity of radioactive material which was introduced into each product or material; and the initial concentration of radioactive material in the product or material at time of transfer of the radioactive material by the licensee.

(2) If no transfers of radioactive materials have been made during a reporting period, the report shall indicate this fact.

(3) Each report shall cover the 12-month period commencing on July 1 of each year. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181g. Licensing for industrial radiography operations. (a) Each application for a specific license shall be considered for approval for the use of licensed material for industrial radiography only if the application contains the following:

(1) A description of a program for training radiographers and radiographer's assistants that meets the requirements of part 7 in these regulations;

(2) the procedures for verifying and documenting the certification status of radiographers and for ensuring that the certification of individuals acting as radiographers remains valid;

(3) the written operating and emergency procedures as specified in part 7 in this article;

(4) a description of a program for inspections of the job performance of each radiographer and radiographer's assistant at intervals not to exceed six months;

(5) a program for inspection and maintenance of radiographic exposure devices, equipment, and storage containers to ensure proper functioning;

(6) a description of the applicant's overall organizational structure as it applies to the radiation safety responsibilities in industrial radiography, including specified delegation of authority and responsibility;

(7) the qualifications of the individual designated as the radiation safety officer;

(8) if the applicant intends to perform leak testing of sealed sources or exposure devices containing depleted uranium (DU) shielding, a description of the procedures for performing the test. The description shall include the following:

(A) The methods of collecting the samples;

(B) the qualifications of the individual who analyzes the samples;

(C) the instruments to be used; and

(D) the methods of analyzing the samples;

(9) if the applicant intends to perform calibrations of survey instruments and alarming ratemeters, a description of the methods to be used and the experience of each person who will perform the calibrations. All calibrations shall be performed

according to the procedures described and at the intervals specified in part 7 in these regulations;

(10) identification and description of the location of each field station and permanent radiographic installation;

(11) identification of each location where all records required by this part and the other parts of these regulations will be maintained; and

(12) if the applicant intends to perform underwater radiography, a description of the following:

(A) Radiation safety procedures and radiographer responsibilities unique to the performance of underwater radiography;

(B) radiographic equipment and radiation safety equipment unique to underwater radiography; and

(C) methods of gas-tight encapsulation of equipment.

(b) Each licensee shall retain the records of each inspection for review by the department, for two years from the date the inspection is performed. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005.)

28-35-181h. Specific licenses to manufacture and distribute the devices specified in K.A.R. 28-35-178b.

An application for a specific license to manufacture and distribute one or more of the devices specified in K.A.R. 28-35-178b shall not be approved unless the applicant meets the requirements of subsections (a) and (b) of this regulation in addition to meeting all of the additional applicable requirements specified in these regulations.

(a) Each applicant shall submit information about the design, manufacture, prototype testing, quality control, labels, proposed uses, installation, servicing, leak testing, operating and safety instructions, and potential hazards of the device to provide reasonable assurance that the following conditions are met:

(1) The device can be safely operated by individuals not having training in radiological protection;

(2) under ordinary conditions of handling, storage, and use of the device, the radioactive material contained in the device will not be released or inadvertently removed from the device, and it is unlikely that any individual will receive a dose in excess of 10 percent of the limits specified in K.A.R. 28-35-212a; and

(3) under accident conditions, including fire and explosion, associated with handling, storage, and use of the device, it is unlikely that any individual

will receive an external radiation dose or dose commitment in excess of the following organ doses:

(A) Whole body; head and trunk; active blood-forming organs; gonads; or lens of eye 15 rems

(B) Hands and forearms; feet and ankles; localized areas of skin averaged over areas no larger than 1 square centimeter 200 rems

(C) Other organs 50 rems.

(b)(1) Each device shall bear a durable, legible, clearly visible label or labels that contain, in clearly identified and separate statements, the following information:

(A) Instructions and precautions necessary to ensure safe installation, operation, and servicing of the device. Operating and service manuals may be identified in the label and used to provide this information;

(B) specification of whether or not leak testing or testing of any on-off mechanism and indicator is required. The information shall include the maximum allowable time intervals between tests and shall identify the radioactive material by isotope, quantity of radioactivity, and date that the quantity was determined; and

(C) the information required in one of the following statements, as appropriate, in the same or a substantially similar form:

(i) "The receipt, possession, use, and transfer of this device, model _____, serial no. _____, are subject to a general license or the equivalent and the regulations of the U.S. nuclear regulatory commission or a state with which the U.S. nuclear regulatory commission has entered into an agreement for the exercise of regulatory authority. This label shall be maintained on the device in a legible condition. Removal of this label is prohibited.

CAUTION—RADIOACTIVE MATERIAL

(Name of manufacturer or distributor)";

or

(ii) "The receipt, possession, use, and transfer of this device, model _____, serial no. _____, are subject to a general license or the equivalent, and the regulations of a licensing state. This label shall be maintained on the device in a legible condition. Removal of this label is prohibited.

CAUTION—RADIOACTIVE MATERIAL

(Name of manufacturer or distributor)"

(2) The model, serial number, and name of the manufacturer or distributor may be omitted from the requirements specified in paragraphs (b)(1)(C)(i) and (ii) if the information is elsewhere specified in labeling affixed to the device.

(3) Each device having a separate source housing that provides the primary shielding for the source shall also bear, on the source housing, a durable label containing the device model number and serial number, the isotope and quantity, the words "Caution — Radioactive Material," the radiation symbol described in part 4 of these regulations, and the name of the manufacturer or initial distributor.

(4) Each device containing at least 370 Mbq (10 mCi) of cesium-137, 3.7 Mbq (0.1 mCi) of strontium-90, 37 Mbq (1 mCi) of americium-241 or any other transuranic element based on the activity indicated on the label shall meet the following criteria:

(A)(i) Bear a permanent label affixed to the source housing if the source housing is separable, including the words "Caution — Radioactive Material"; or

(ii) bear a permanent label affixed to the device if the source housing is not separable, including the words "Caution — Radioactive Material"; and

(B) if practicable, bear the radiation symbol described in part 4 of these regulations.

(C) If the device is required to be tested at intervals longer than six months, either for proper operation of the on-off mechanism and indicator, if any, or for leakage of radioactive material, or for both, the applicant shall include in the application sufficient information to demonstrate that the longer interval is justified by the performance characteristics of the device or of similar devices and by design features that have a significant bearing on the probability or consequences of leakage of radioactive material from the device or failure of the on-off mechanism and indicator. In determining the acceptable interval for the test for leakage of radioactive material, the applicant shall address the following in the application:

(1) The primary containment of the source capsule;

(2) protection of the primary containment;

(3) the methods of sealing the primary containment;

(4) the containment construction materials;

(5) the form of contained radioactive material;

(6) the maximum temperature withstood during prototype tests;

(7) the maximum pressure withstood during prototype tests;

(8) the maximum quantity of contained radioactive material;

(9) the radiotoxicity of contained radioactive material; and

(10) any prior operating experience with identical devices or similarly designed and constructed devices.

(d) If the general licensee under K.A.R. 28-35-178b, or under equivalent regulations of an agreement state, is authorized to install the device, collect the sample to be analyzed by a specific licensee for leakage of radioactive material, service the device, test the on-off mechanism and indicator, or remove the device, the applicant shall include in the application the written instructions to be followed by the general licensee, the estimated calendar-quarter doses associated with each operation, and the bases for the estimates. The submitted information shall demonstrate that performance of the specified operations by an individual untrained in radiological protection, in addition to other handling, storage, and use of devices under the general license, is unlikely to cause that individual to receive a dose in excess of 10 percent of the annual limits specified in part 4 of these regulations.

(e) Each device shall be listed on the nuclear regulatory commission's sealed source and device registry. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended May 4, 2018.)

28-35-181i. Special license to manufacture, distribute, assemble, or repair luminous safety devices for use in aircraft. Each applicant for a specific license to manufacture, assemble, or repair luminous safety devices containing tritium or promethium-147, for use in aircraft, and to distribute these devices to persons generally licensed under K.A.R. 28-35-178d shall meet the requirements of 10 C.F.R. 32.53, 32.54, 32.55, and 32.56, as in effect on December 2, 2015, which are hereby adopted by reference, except that wherever the term "commission" appears within the text of the federal regulations adopted by reference in this regulation, that term shall be replaced with the term "department." (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended May 4, 2018.)

28-35-181j. Specific licenses to manufacture and distribute calibration sources containing americium-241 or radium-226.

(a) An application for a specific license to manufacture or initially transfer calibration or reference sources containing americium-241 or radium-226 for distribution to persons generally licensed under K.A.R. 28-35-178e shall not be approved unless the following requirements are met:

(1) The applicant shall satisfy the general requirements of part 3 of these regulations.

(2) The applicant shall submit sufficient information regarding each type of calibration or reference source pertinent to evaluation of the potential radiation exposure, including the following:

(A) Chemical and physical form and maximum quantity of americium-241 or radium-226 in the source;

(B) details of construction and design;

(C) details of the method of incorporation and binding of the americium-241 or radium-226 in the source;

(D) procedures for and results of prototype testing of sources that are designed to contain more than 0.005 microcurie of americium-241 or radium-226, to demonstrate that the americium-241 or radium-226 contained in each source will not be released or be removed from the source under normal conditions of use;

(E) details of quality control procedures to be followed in manufacture of the source;

(F) description of labeling to be affixed to the source or the storage container for the source; and

(G) any additional information, including experimental studies and tests, required by the department to facilitate a determination of the safety of the source.

(3) Each source shall contain no more than 5 μ Ci of americium-241 or radium-226.

(4) The method of incorporation and binding of more than 0.005 μ Ci of the americium-241 or radium-226 in the source shall prevent the release or removal of americium-241 or radium-226 from the source under normal conditions of use and handling of the source.

(5) The applicant shall conduct prototype tests, in the order listed, on each of five prototypes of the source containing more than 0.185 kilobecquerel (0.005 microcurie) of americium-241 or radium-226, and the five prototype sources shall have passed the prototype test, as follows:

(A) Initial measurement. The quantity of radio-

active material deposited on the source shall be measured by direct counting of the source.

(B) Dry wipe test. The entire radioactive surface of the source shall be wiped with filter paper with the application of moderate finger pressure. Removal of radioactive material from the source shall be determined by measuring the radioactivity on the filter paper or by direct measurement of the radioactivity on the source following the dry wipe.

(C) Wet wipe test. The entire radioactive surface of the source shall be wiped with filter paper, moistened with water, with the application of moderate finger pressure. Removal of radioactive material from the source shall be determined by measuring the radioactivity on the filter paper after the paper has dried or by direct measurement of the radioactivity on the source following the wet wipe.

(D) Water soak test. The source shall be immersed in water at room temperature for 24 consecutive hours. The source shall then be removed from the water. Removal of radioactive material from the source shall be determined by direct measurement of the radioactivity on the source after the source has dried or by measuring the radioactivity in the residue obtained by evaporation of the water in which the source was immersed.

(E) Dry wipe test. On completion of the water soak test, the dry wipe test described in paragraph (a)(5)(B) shall be repeated.

(F) Observations. Removal of more than 0.005 microcurie of radioactivity in any test prescribed by paragraph (a)(5) shall be cause for rejection of the source design. Results of prototype tests submitted to the nuclear regulatory commission shall be given in terms of radioactivity in microcuries and percent of removal from the total amount of radioactive material deposited on the source.

(6) Each source or storage container for the source shall have a label affixed that contains sufficient information about safe use and storage of the source and includes the following or an equivalent statement:

"The receipt, possession, use and transfer of this source, Model _____, Serial No. _____, are subject to a general license and the regulations of the United States Nuclear Regulatory Commission or of a State with which the commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label.

CAUTION—RADIOACTIVE MATERIAL—THIS SOURCE CONTAINS AMERICIUM-241 (or RADIUM-226). DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.

(Name of manufacturer or initial transferor)."

(b) Each person licensed under this regulation shall perform a dry wipe test upon each source containing more than 3.7 kilobecquerels (0.1 microcurie) of americium-241 or radium-226 before transferring the source to a general licensee in accordance with K.A.R. 28-35-178e or equivalent regulations of an agreement state or the nuclear regulatory commission. This test shall be performed by wiping the entire radioactive surface of the source with a filter paper with the application of moderate finger pressure.

The radioactivity on the paper shall be measured by using radiation detection instrumentation capable of detecting 0.185 kilobecquerel (0.005 microcurie) of americium-241 or radium-226. If this test discloses more than 0.185 kilobecquerel (0.005 microcurie) of radioactive material, the source shall be deemed to be leaking or losing americium-241 or radium-226 and shall not be transferred to a general licensee in accordance with K.A.R. 28-35-178e or equivalent regulations of an agreement state or the nuclear regulatory commission. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-181k. Specific licenses to manufacture and distribute ice detection devices. Each applicant for a specific license to manufacture ice detection devices and to distribute those devices to persons generally licensed under K.A.R. 28-35-178g shall meet the requirements of 10 C.F.R. 32.61 and 32.62, as in effect on December 2, 2015, which are hereby adopted by reference, except that wherever the term “commission” appears within 10 C.F.R. 32.61, that term shall be replaced with the term “department.” (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended May 4, 2018.)

28-35-181l. Specific licenses to manufacture and distribute industrial products and devices containing depleted uranium.

(a) An application to manufacture industrial products and devices containing depleted uranium for mass-volume applications and to distribute those products or devices to persons generally licensed under K.A.R. 28-35-177a(c) shall not be approved unless all of the following conditions, in addition to all of the applicable requirements specified in these regulations, are met:

(1) The applicant submits sufficient information relating to the design, manufacture, prototype testing, quality control procedures, labeling or marking, proposed uses, and potential hazards of the industrial product or device to provide reasonable assurance that the possession, use, or transfer of the depleted uranium in the product or device is not likely to cause any individual to receive a radiation dose in excess of 10 percent of the limits specified in K.A.R. 28-35-212a.

(2) The applicant submits sufficient information regarding the industrial product or device and the presence of depleted uranium for a mass-volume application in the product or device to provide reasonable assurance that unique benefits will accrue to the public because of the usefulness of the product or device.

(3) The secretary finds that the product or device combines a high degree of utility with a low probability of uncontrolled disposal or dispersal of significant quantities of depleted uranium into the environment.

(4) The application states clearly the use or uses for which the product or device is intended.

(b) Each person licensed pursuant to subsection (a) of this regulation shall meet the following requirements:

(1) In the manufacture of the industrial product or device and in the installation of the depleted uranium into the product or device, maintain the level of quality control required by the license;

(2) label or mark each unit to meet the following requirements:

(A) Identify the manufacturer of the product or device and the number of the license under which the product or device was manufactured, identify the fact that the product or device contains depleted uranium, and indicate the quantity of depleted uranium in each product or device; and

(B) state that the receipt, possession, use, and transfer of the product or device are subject to a general license and the regulations issued by the secretary, the U.S. nuclear regulatory commission, or an agreement state;

(3) ensure that the depleted uranium, before being installed in each product or device, has been impressed with the following legend clearly legible through any plating or other covering: “depleted uranium”;

(4)(A) Furnish a copy of K.A.R. 28-35-177a and a form specified by the department to each person to whom the applicant transfers depleted uranium

in a product or device for use pursuant to the general license issued under K.A.R. 28-35-177a(c); or

(B) furnish the following to each person to whom the applicant transfers depleted uranium in a product or device for use pursuant to a general license issued by the U.S. nuclear regulatory commission or an agreement state:

(i) A copy of the regulation of the U.S. nuclear regulatory commission or an agreement state that is equivalent to K.A.R. 28-35-177a(c) and a copy of the certificate of the U.S. nuclear regulatory commission or agreement state;

(ii) a copy of K.A.R. 28-35-177a and a copy of the form specified by the department; and

(iii) a note explaining that the use of the product or device is regulated by the U.S. nuclear regulatory commission or an agreement state under requirements substantially the same as those in K.A.R. 28-35-177a;

(5) report to the department all transfers of industrial products or devices to another person for use under the general license specified in K.A.R. 28-35-177a(c). This report shall identify each general licensee by providing the following information:

(A) The name and address;

(B) the name of an individual, by name and position, if any, who shall be a point of contact between the department and the general licensee;

(C) the type and model number of the device transferred; and

(D) the quantity of depleted uranium contained in the product or device. Each licensee shall submit a report within 30 days after the end of each calendar quarter. If no transfers have been made to persons generally licensed under K.A.R. 28-35-177a(c) during the reporting period, the report shall indicate this fact;

(6)(A) Report to the U.S. nuclear regulatory commission all transfers of industrial products or devices to persons for use under a U.S. nuclear regulatory commission general license that is equivalent to the license specified in K.A.R. 28-35-177a(c);

(B) report to the appropriate state agency of each agreement state all transfers of devices manufactured and distributed pursuant to this regulation for use under a general license issued by that particular agreement state; and

(C) identify the following in each report required under paragraph (b) (6)(A) or (b) (6)(B):

(i) Each general licensee by name and address;

(ii) the name of an individual, by name and position, if any, who shall be a point of contact be-

tween the commission or state agency and the general licensee;

(iii) the type and model number of the device transferred; and

(iv) the quantity of depleted uranium contained in the product or device.

Each licensee shall submit the report within 30 days after the end of each calendar quarter. If no transfers are made to U.S. nuclear regulatory commission licensees during any reporting period, this information shall be reported to the U.S. nuclear regulatory commission. If no transfers are made to general licensees within a particular agreement state during the reporting period, this information shall be reported to the appropriate agency of the agreement state;

(7) keep and maintain, for two years, records showing the name, address, and point of contact for each general licensee to whom a transfer of depleted uranium in industrial products or devices has been made, including the date of the transfer and the quantity of depleted uranium in the product or device transferred; and

(8) keep and maintain, for two years, records showing compliance with the reporting requirements of this subsection. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005.)

28-35-181m. Specific licenses to manufacture, prepare, or distribute radiopharmaceuticals containing radioactive material for medical use. An application for a specific license to manufacture, prepare, or distribute radiopharmaceuticals containing radioactive material and used by persons as specified in part 6 of these regulations shall not be approved unless the applicant meets the requirements of this regulation and all other applicable requirements of these regulations.

(a) Each applicant shall meet the requirements in K.A.R. 28-35-180a.

(b) Each applicant shall submit evidence of either of the following:

(1) The radiopharmaceutical containing radioactive material is subject to the federal food, drug and cosmetic act or the public health service act and will be manufactured, labeled, and packaged in accordance with a new drug application (NDA) approved by the food and drug administration (FDA), a biologic product license issued by the FDA, or a "notice of claimed investigational exemption for a new drug" (IND) accepted by the FDA.

(2) The manufacture and distribution of the radiopharmaceutical containing radioactive material is not subject to the federal food, drug, and cosmetic act or the public health service act.

(c) Each applicant shall submit evidence of at least one of the following:

(1) The applicant is registered or licensed with the U.S. food and drug administration as a drug manufacturer.

(2) The applicant is registered or licensed with a state agency as a drug manufacturer.

(3) The applicant is licensed as a pharmacy by the state board of pharmacy.

(4) The applicant is operating as a nuclear pharmacy within a federal medical institution.

(5) The applicant is operating a positron emission tomography (PET) drug production facility.

(d) Each applicant shall submit the following information on the radionuclide:

(1) The chemical and physical form of the material;

(2) the packaging in which the radionuclide is shipped, including the maximum activity per package; and

(3) evidence that the shielding provided by the packaging of the radioactive material is appropriate for the safe handling and storage of radiopharmaceuticals by group licensees.

(e)(1) Each applicant shall submit a description of the following:

(A) A label that shall be affixed to each transport radiation shield, whether the shield is constructed of lead, glass, plastic, or other material, of a radioactive drug to be transferred for commercial distribution. The label shall include the following:

(i) The radiation symbol and the words "CAUTION—RADIOACTIVE MATERIAL" or "DANGER—RADIOACTIVE MATERIAL";

(ii) the name of the radioactive drug and the abbreviation; and

(iii) the quantity of radioactivity at a specified date and time. For radioactive drugs with a half-life greater than 100 days, the time may be omitted; and

(B) a label that shall be affixed to each syringe, vial, or other container used to hold a radioactive drug to be transferred for commercial distribution. The label shall include the radiation symbol and the words "CAUTION — RADIOACTIVE MATERIAL" or "DANGER — RADIOACTIVE MATERIAL" and an identifier that ensures that the syringe, vial, or other container can be correlated with the information on the transport radiation shield label.

(2) The labels, leaflets, or brochures required by this regulation shall be made in addition to the labeling required by the FDA. The labels, leaflets, or brochures may be separate from the FDA labeling, or with the approval of the FDA, the labeling may be combined with the labeling required by the FDA.

(f) All of the following shall apply to each licensee described in paragraph (c)(3) or (c)(4), or both:

(1) The licensee may prepare radioactive drugs for medical use, if each radioactive drug is prepared by either an authorized nuclear pharmacist, as specified in paragraphs (2) and (4) of this subsection, or an individual under the supervision of an authorized nuclear pharmacist.

(2) The licensee may allow a pharmacist to work as an authorized nuclear pharmacist if at least one of the following conditions is met:

(A) The pharmacist meets the requirements in 10 C.F.R. 35.55(b) and 35.59 as adopted by reference in K.A.R. 28-35-264, and the licensee has received an approved license amendment identifying this individual as an authorized nuclear pharmacist.

(B) The pharmacist is designated as an authorized nuclear pharmacist in accordance with paragraph (4) of this subsection.

(3) The actions authorized in paragraphs (1) and (2) of this subsection shall be permitted in spite of more restrictive language in license conditions.

(4) The licensee may designate a pharmacist as an authorized nuclear pharmacist if at least one of the following conditions is met:

(A) The individual was a nuclear pharmacist preparing only radioactive drugs containing accelerator-produced radioactive material.

(B) The individual practiced at a government agency or federally recognized Indian tribe pharmacy before November 30, 2007 or at any other pharmacy before August 8, 2009.

(5) Each licensee shall provide a copy of the state pharmacy license or registration for an individual to work as an authorized nuclear pharmacist and one of the following documents to the department:

(A) The individual's certification by a specialty board whose certification process has been recognized as specified in 10 C.F.R. 35.55(a), as adopted by reference in K.A.R. 28-35-264;

(B) a department, NRC, or agreement state license listing the individual as an authorized nuclear pharmacist;

(C) an NRC master materials licensee permit listing the individual as an authorized nuclear pharmacist;

(D) a permit issued by a licensee of broad scope or an NRC master materials permittee or the authorization from a commercial nuclear pharmacy that is authorized to list its own authorized nuclear pharmacist; or

(E) documentation that only accelerator-produced radioactive materials were used in the practice of nuclear pharmacy at a government agency or federally recognized Indian tribe before November 30, 2007 or at all other locations of use before August 8, 2009, or an earlier date noticed by the NRC as permitted by 10 C.F.R. 35.13(b)(5).

(g) Each licensee shall possess and use instrumentation to measure the radioactivity of radioactive drugs. Each licensee shall have procedures for using the instrumentation. Each licensee shall measure, by direct measurement or by combination of measurements and calculations, the amount of radioactivity in dosages of alpha-, beta-, or photon-emitting radioactive drugs before transfer for commercial distribution. Each licensee shall meet the following requirements:

(1) Perform tests before initial use, periodically, and following repair on each instrument for accuracy, linearity, and geometry dependence, as appropriate for the use of the instrument, and make adjustments if necessary; and

(2) check each instrument for constancy and proper operation at the beginning of each day of use.

(h) Each application from a medical facility, an educational institution, or a federal facility to produce positron emission tomography (PET) radioactive drugs for noncommercial transfer to licensees within the applicant's consortium authorized for medical use under part 6 of these regulations or equivalent agreement state requirements shall include the following:

(1) A request for authorization for the production of PET radionuclides or evidence of an existing license issued under these regulations or equivalent NRC or agreement state requirements for a PET radionuclide production facility within the applicant's consortium from which the applicant receives PET radionuclides;

(2) evidence that the applicant is qualified to produce radioactive drugs for medical use by meeting the requirements of this regulation;

(3) the name of each individual authorized to prepare PET radioactive drugs if the applicant is a

pharmacy and documentation that each individual meets the requirements of an authorized nuclear pharmacist; and

(4) the name of each PET radioactive drug for production and noncommercial distribution to the applicant's consortium, including the chemical and physical form of each drug.

(i) Nothing in these regulations shall exempt the licensee from the requirement to comply with applicable FDA requirements and other federal and state requirements governing radioactive drugs. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended July 27, 2007; amended March 18, 2011; amended May 4, 2018.)

28-35-181n. Specific licenses to manufacture and distribute generators or reagent kits for preparation of radiopharmaceuticals containing radioactive material. Each application for a specific license to manufacture and distribute generators or reagent kits containing radioactive material for preparation of radiopharmaceuticals by persons licensed as specified in K.A.R. 28-35-181d for the uses listed in group III shall meet the requirements of subsections (a), (b), (c), and (d).

(a) Each applicant shall meet the general requirements specified in K.A.R. 28-35-180a.

(b) Each applicant shall submit documentation of one of the following:

(1) The generator or reagent kit is subject to the federal food, drug and cosmetic act or the public health service act and will be manufactured, labeled, and packaged in accordance with a new drug application (NDA) approved by the food and drug administration (FDA), a biologic product license issued by FDA, or a "notice of claimed investigational exemption for a new drug" (IND) accepted by FDA.

(2) The manufacture and distribution of the generator or reagent kit is not subject to the federal food, drug, and cosmetic act and the public health service act.

(c) Each applicant shall submit information on the following:

(1) The radionuclide;

(2) the chemical and physical form of the material;

(3) packaging, including maximum activity per package; and

(4) shielding provided by the packaging of the radioactive material contained in the generator or reagent kit.

(d) The label affixed to the generator or reagent kit shall contain information on the radionuclide, quantity, and date of assay.

(e) The label affixed to the generator or reagent kit, or the leaflet or brochure that accompanies the generator or reagent kit, shall contain the following:

(1) Adequate information, from a radiation safety standpoint, on the procedures to be followed and the equipment and shielding to be used in eluting the generator or processing radioactive material with the reagent kit; and

(2) a statement that "this generator or reagent kit, as appropriate, is approved for use by persons licensed by the department according to K.A.R. 28-35-181d for group III uses, or under equivalent licenses of the United States nuclear regulatory commission or another agreement state." The labels, leaflets, or brochures required by this paragraph shall be in addition to the labeling required by the FDA. The labels, leaflets, or brochures may be separate from FDA labeling, or with the approval of FDA, the labeling may be combined with the labeling required by the FDA. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended July 27, 2007.)

28-35-181o. Specific licenses to manufacture and distribute sources and devices for use as a calibration, transmission, or reference source or for certain medical uses. (a)

Each application for a specific license to manufacture and distribute sources and devices containing radioactive material to persons licensed as specified in K.A.R. 28-35-181d for use as a calibration, transmission, or reference source or for one or more of the uses listed in 10 C.F.R. 35.400, 35.500, 35.600, and 35.1000, as adopted by reference in K.A.R. 28-35-264, shall include the following information regarding each type of source or device:

(1) The radioactive material contained, its chemical and physical form, and amount;

(2) details of design and construction of the source or device;

(3) procedures for, and results of, prototype tests to demonstrate that the source or device will maintain its integrity under stresses likely to be encountered in normal use and in accidents;

(4) for devices containing radioactive material, the radiation profile for a prototype device;

(5) details of quality control procedures to ensure that the production sources and devices meet the standards of the design and prototype tests;

(6) procedures and standards for calibrating sources and devices;

(7) legend and methods for labeling sources and devices as to their radioactive content;

(8) radiation safety instructions for handling and storing the source or device. These instructions shall be included on a durable label attached to the source or device. However, instructions that are too lengthy for the label may be summarized on the label and printed in detail on a brochure that is referenced on the label;

(9) the label that is to be affixed to the source or device or to the permanent storage container for the source or device. The label shall contain information on the radionuclide, quantity, and date of assay, and a statement that the source or device is licensed by the department for distribution to persons licensed under K.A.R. 28-35-181d or under an equivalent license of the nuclear regulatory commission (NRC) or an agreement state. Labeling for sources that do not require long-term storage may be on a leaflet or brochure that is to accompany the source; and

(10) documentation that the source or device is listed on the nuclear regulatory commission's sealed source and device registry.

(b)(1) If the applicant wants to have the source or device required to be tested for leakage of radioactive material at intervals longer than six months, the applicant shall include in the application sufficient information to demonstrate that the longer interval is justified by performance characteristics of the source or device, or similar sources or devices, and by design features that have a significant bearing on the probability or consequences of leakage of radioactive material from the source.

(2) In determining the acceptable interval between tests for leakage of radioactive material, information that includes the following shall be considered by the secretary:

(A) The nature of the primary containment;

(B) the method for protection of the primary containment;

(C) the method of sealing the containment;

(D) containment construction materials;

(E) the form of the contained radioactive material;

(F) the maximum temperature withstood during prototype tests;

(G) the maximum pressure withstood during prototype tests;

(H) the maximum quantity of contained radioactive material;

(I) the radiotoxicity of contained radioactive material; and

(J) the applicant's operating experience with identical sources or devices or with similarly designed and constructed sources or devices. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended July 27, 2007; amended March 18, 2011; amended May 4, 2018.)

28-35-181p. Specific license to manufacture or distribute radioactive material for use by persons generally licensed under K.A.R. 28-35-178h. An application for a specific license to manufacture or distribute, or to manufacture and distribute radioactive material for use by persons generally licensed under K.A.R. 28-35-178h, shall not be approved unless the applicant meets the requirements of subsections (a),(b),(c) and (d) of this regulation.

(a) The radioactive material shall be prepared for distribution in prepackaged units of:

(1) iodine-125 in units not exceeding 10 microcuries each;

(2) iodine-131 in units not exceeding 10 microcuries each;

(3) carbon-14 in units not exceeding 10 microcuries each;

(4) hydrogen-3 (tritium) in units not exceeding 50 microcuries each;

(5) iron-59 in units not exceeding 20 microcuries each;

(6) selenium-75 in units not exceeding 10 microcuries each;

(7) mock iodine-125 in units not exceeding 0.05 microcuries of iodine-129 and 0.005 microcuries of americium-241; or

(8) cobalt-57 in units not exceeding 10 microcuries each.

(b) Each prepackaged unit shall bear a durable clearly visible label:

(1) identifying the radioactive contents as to chemical form and radionuclide, and indicating that the amount of radioactivity does not exceed:

(A) 10 microcuries of iodine-125, iodine-131, carbon-14, cobalt-57, or selenium-75;

(B) 50 microcuries of hydrogen-3 (tritium);

(C) 20 microcuries of iron-59; or

(D) 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each; and

(2) Displaying the radiation caution symbol described in K.A.R. 28-35-219a and the words, "CAUTION—RADIOACTIVE MATERIAL",

and "not for internal or external use in humans or animals".

(c) The following statement, or a substantially similar statement, shall appear on a label affixed to each prepackaged unit, or in a leaflet or brochure to accompany the package:

"The radioactive material may be received, acquired, possessed, and used only by physicians, clinical laboratories or hospitals and only for in vitro clinical or laboratory tests not involving internal or external administration of the material or the radiation therefrom, to human beings or animals. Its receipt, acquisition, possession, use, and transfer are subject to the regulations and a general license of the United States nuclear regulatory commission or of a state with which the commission has entered into an agreement for the exercise of regulatory authority.

Name of manufacturer"

(d) The label to be affixed to the unit, or a leaflet or brochure which is to accompany the package, shall contain information concerning the precautions to be observed in handling and storing the radioactive material and regarding the waste disposal requirements of K.A.R. 28-35-223a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181q. Special licenses concerning gas and aerosol detectors containing radioactive material other than by-product, source or special nuclear material. (a) An application for a specific license to manufacture, process, produce or transfer gas and aerosol detectors which contain radioactive material other than source, by-product, or special nuclear material, and which are designed to protect life or property from fires and airborne hazards, shall not be approved unless the applicant submits the information required by the United States nuclear regulatory commission under 10 CFR sections 32.26 and 32.27, as in effect on March 31, 1983, for similar devices containing by-product material.

(b) Each person issued a license under subsection (a) of this regulation shall:

(1) develop and carry out adequate control procedures in the manufacture of the product to assure that each production lot meets quality control standards approved by the department;

(2) agree to label or mark each unit so that the manufacturer of the product and the radioactive material in the product can be identified and provide other information with each unit that may be required by the department, including disposal instruction when appropriate; and

(3) agree to file an annual report with the department, which shall include the following information on products imported for sale or distribution or transferred to other persons for use under K.A.R. 28-35-192a or an equivalent regulation of the United States nuclear regulatory commission or an agreement state:

(A) A description or identification of the type of each product imported or transferred;

(B) for each radionuclide in each type of product, the total quantity of the radionuclide imported or transferred; and

(C) the number of units of each type of product imported or transferred during the reporting period. If no imports or transfers of radioactive material have been made during a reporting period, the report shall so indicate.

(c) The report required by paragraph (3) of subsection (b) of this regulation shall cover the 12-month period commencing on July 1, and ending on June 30, and shall be filed by July 31 of each year. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181r. Special licenses to manufacture, process, import, distribute or transfer certain radioactive material to persons exempt from regulation pursuant to K.A.R. 28-35-192a.

(a) An application for a specific license to manufacture, process, produce, import, package, repackage, or transfer quantities of radioactive material other than source, byproduct, or special nuclear material for commercial distribution to persons exempt from these regulations pursuant to K.A.R. 28-35-192a or an equivalent regulation of the United States nuclear regulatory commission or an agreement state shall not be approved unless the applicant submits the information required in 10 CFR sections 32.18 and 32.19, as in effect on March 31, 1983.

(b) Each person licensed under subsection (a) of this regulation shall maintain records identifying, by name and address, each person to whom the licensee transfers radioactive material and stating the kinds and quantities of radioactive material transferred. An annual summary report stating the total quantity of each isotope transferred shall be filed with the department. Each report shall cover the 12-month period commencing on July 1 and ending June 30 and shall be filed by July 31 of each year. If no transfers of radioactive material have been made during a reporting period, the re-

port shall indicate this fact. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-181s. Specific licenses for well logging. Each application for a specific license for the use of licensed material in well logging shall be considered for approval only if the application contains the following:

(a) A description of the training program for logging supervisors and logging assistants that includes the following:

(1) The content of and method for initial training;

(2) on-the-job training;

(3) annual safety reviews provided by the licensee;

(4) the means that the applicant will use to demonstrate the logging supervisor's knowledge and understanding of and ability to comply with these regulations, the license conditions, and the applicant's operating and emergency procedures; and

(5) the means that the applicant will use to demonstrate the logging assistant's knowledge and understanding of and ability to comply with the applicant's operating and emergency procedures;

(b) a copy of the written operating and emergency procedures required by K.A.R. 28-35-383 or an outline or a summary of the procedures that includes the radiation safety aspects;

(c) a description of the program, which shall include records, for annual inspections of the job performance of each logging supervisor to ensure that these regulations, the license conditions, and the applicant's operating and emergency procedures are followed. The inspection records shall be retained for three years after each annual internal inspection;

(d) a description of the applicant's overall organizational structure as it applies to the radiation safety responsibilities in well logging, including any delegation of authority and responsibility; and

(e) the manufacturer's name and model numbers of the leak test kits to be used, if an applicant desires to perform leak testing of the sealed sources. If the applicant desires to analyze the applicant's own wipe samples, the application shall include a copy of the procedures to be followed. The procedures shall include the following:

(1) The instruments to be used;

(2) the methods of performing the analysis; and

(3) the applicable experience of the person who will analyze the wipe samples. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-181t. Requirements for license to initially transfer source material for use under the small quantities of source material general license.

(a) Each person submitting an application for a specific license to initially transfer source material for use in accordance with K.A.R. 28-35-177a, or equivalent regulations of an agreement state or the nuclear regulatory commission (NRC), shall meet the following requirements:

(1) Meet the general requirements specified in K.A.R. 28-35-190a; and

(2) provide information documenting that the NRC approves the methods for quality control, labeling, and providing safety instructions to recipients.

(b) Each person licensed under this regulation shall meet the following requirements:

(1) Label the immediate container of each quantity of source material with the type of source material, the quantity of source material, and the words "radioactive material";

(2) ensure that the quantities and concentrations of source material are labeled and indicated in any transfer records;

(3) provide the following information to each person to whom source material is transferred for use under K.A.R. 28-35-177a or equivalent regulations of an agreement state or the NRC before the source material is transferred for the first time in each calendar year to each person:

(A) A copy of K.A.R. 28-35-177a and K.A.R. 28-35-190a or relevant equivalent regulations of an agreement state or the NRC; and

(B) appropriate radiation safety precautions and instructions relating to the handling, use, storage, and disposal of the material;

(4) report transfers as follows, on or before January 31 of each year covering all transfers for the previous calendar year:

(A) File a report with the department. The report shall include the following information:

(i) The name, address, and license number of the person who transferred the source material;

(ii) the name and address of the general licensee to whom source material is distributed, a responsible agent by name or position, or both, the phone number of the general licensee to whom the material was sent, and the type, physical form, and quantity of source material transferred; and

(iii) the total quantity of each type and physical form of source material transferred in the reporting period to all generally licensed recipients; and

(B) file a report with each agreement state or the NRC if the transfer is to a person licensed by the NRC that identifies all persons operating under provisions equivalent to K.A.R. 28-35-177a to whom more than 50 grams (0.11 lb) of source material has been transferred within a single calendar quarter. The report shall include the following information:

(i) The name, address, and license number of the person who transferred the source material;

(ii) the name and address of the general licensee to whom source material was distributed, a responsible agent by name or position, or both, the phone number of the general licensee to whom the material was sent, and the type, physical form, and quantity of source material transferred; and

(iii) the total quantity of each type and physical form of source material transferred in the reporting period to each generally licensed recipient within the agreement state; and

(5) maintain all information that supports the reports required by this subsection concerning each transfer to a general licensee for one year after the transfer is included in a report to the NRC or to an agreement state.

(c) If no transfers were made to any person generally licensed under K.A.R. 28-35-177a, under an equivalent agreement state, or under NRC provisions during the period specified in paragraph (B)(4) of this regulation, a report shall be submitted to the NRC indicating that no transfers were made. If no transfers have been made to any general licensee in a particular agreement state during the reporting period, this information shall be reported to the agreement state upon request of the agency. (Authorized by and implementing K.S.A. 48-1607; effective May 4, 2018.)

28-35-182. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-182a. Specific licenses of broad scope; types of specific licenses.

(a) A "type A specific license of broad scope" is a specific license which is issued to a person who meets the requirements of K.A.R. 28-35-182b and which authorizes that person to acquire, own, possess, use and transfer radioactive material in a quantity not exceeding the quantity specified in the license.

(b)(1) A "type B specific license of broad scope" is a specific license issued to a person who meets the requirements of K.A.R. 28-35-182c and which authorizes that person to acquire, own,

possess, use and transfer a specified amount of one or more of the radionuclides listed in K.A.R. 28-35-200a.

(2) If only one radionuclide is acquired, owned, possessed, used and transferred, the quantity allowed under a type B specific license of broad scope shall be the quantity specified in column I of K.A.R. 28-35-200a.

(3) If two or more radionuclides are acquired, owned, possessed, used and transferred, the quantity of all the radionuclides allowed shall be determined as follows:

(A) Determine the ratio of the quantity of each radionuclide to the quantity of that radionuclide specified in column I of K.A.R. 28-35-200a.

(B) Add the ratios.

(C) The sum of those ratios shall not exceed unity.

(c)(1) A "type C specific license of broad scope" is a specific license which is issued to a person who meets the requirements of K.A.R. 28-35-182d and which authorizes that person to acquire, own, possess, use and transfer a specified amount of one or more of the radionuclides listed in K.A.R. 28-35-200a.

(2) If only one radionuclide is acquired, owned, possessed, used and transferred, the quantity allowed under a type C specific license of broad scope shall be the quantity specified in column II of K.A.R. 28-35-200a.

(3) If two or more radionuclides are acquired, owned, possessed, used and transferred, the quantity of all radionuclides allowed shall be determined as follows:

(A) Determine the ratio of the quantity of each radionuclide to the quantity of that radionuclide specified in column II of K.A.R. 28-35-200a.

(B) Add the ratios.

(C) The sum of the ratios shall not exceed unity. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-182b. Qualifications for a type A specific license of broad scope. A type A specific license of broad scope shall be issued only to an applicant who:

(a) has previously engaged in activities involving the use of radioactive materials. The applicant shall submit a summary of the previous activities that involved the use of radioactive materials; and

(b) has established administrative controls and provisions relating to organization and manage-

ment, procedures, record-keeping, material control and accounting, and management review to assure safe operations. These controls shall include:

(1) The establishment of a radiation safety committee composed of a radiation safety officer, a representative of management, and persons trained and experienced in the safe use of radioactive material;

(2) the appointment of a radiation safety officer who is qualified by training and experience in radiation protection, and who is available for advice and assistance on radiation safety matters; and

(3) the establishment of appropriate administrative procedures. These procedures shall assure that:

(A) the procurement and use of radioactive material is controlled;

(B) safety evaluations of proposed uses of radioactive material are completed. These evaluations shall take into consideration the adequacy of facilities and equipment, training and experience of the user, and proper operating or handling procedures; and

(C) prior to the use of the radioactive material, the safety evaluation of proposed uses, prepared in accordance with paragraph (3)(B) of this subsection, is reviewed, approved and recorded by the radiation safety committee. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-182c. Qualifications for a type B specific license of broad scope. A type B specific license of broad scope shall be issued only to an applicant who has established controls and provisions relating to organization and management, procedures, recordkeeping, material control and accounting, and management review that are sufficient to ensure safe operation. These controls and provisions shall include the following:

(a) The appointment of a radiation safety officer who is qualified by training and experience in radiation protection and who is available for advice and assistance on radiation safety matters; and

(b) the establishment of appropriate administrative procedures. These procedures shall ensure that all of the following conditions are met:

(1) The procurement and use of radioactive material are controlled.

(2) Safety evaluations of proposed uses of radioactive material are completed. These evaluations shall take into consideration the adequacy of facili-

ties and equipment, training and experience of the user, and proper operating or handling procedures.

(3) Before use of the radioactive material, the safety evaluation of proposed uses, prepared in accordance with paragraph (b)(2), is reviewed, approved, and recorded by the radiation safety officer. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended July 27, 2007.)

28-35-182d. Qualifications for a type C specific license of broad scope. A type C specific license of broad scope shall be issued only to an applicant who:

(a) submits a statement that radioactive material will only be used by, or under the direct supervision of, an individual or individuals who have:

(1) at least a bachelor's degree or equivalent training and experience in a physical or biological science or in engineering; and

(2) at least 40 hours of training and experience in the safe handling of radioactive materials, and in the characteristics of ionizing radiation, units of radiation dose and quantities, radiation detection instrumentation, and biological hazards of exposure to radiation. Such training and experience shall be appropriate to the type and forms of radioactive material to be used; and

(b) has established administrative controls and provisions relating to procurement of radioactive materials, procedures, record-keeping, material control and accounting, and management review to assure safe operations. These control provisions shall include appropriate administrative procedures which assure that:

(1) procurement and use of radioactive material is controlled; and

(2) safety evaluations of proposed uses of radioactive material are completed. Such evaluations shall take into consideration the adequacy of facilities and equipment and proper operating or handling procedures. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-182e. Restrictions on specific licenses of broad scope. (a) Any person who has been issued any type of specific license of broad scope shall not:

(1) Conduct tracer studies in the environment involving direct release of radioactive material;

(2) receive, acquire, own, possess, use, or transfer devices containing 100,000 curies or more of

radioactive material as sealed sources used for irradiation of materials;

(3) conduct activities for which a particular specific license is required; or

(4) add, or cause the addition of, radioactive material to any food, beverage, cosmetic, drug, or other product designed for ingestion or inhalation by, or application to, a human being.

(b) Any radionuclide or radionuclides possessed under a type A specific license of broad scope shall be only used by, or under the direct supervision of, a person or persons approved by a licensee's radiation safety committee.

(c) Any radionuclide or radionuclides possessed under a type B specific license of broad scope shall be only used by, or under the direct supervision of, a person or persons approved by a licensee's radiological safety officer.

(d) Any radionuclide or radionuclides possessed under a type C specific license of broad scope shall be used only by, or under the direct supervision of, a person or persons who meet the requirements of K.A.R. 28-35-182d(a). (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-183. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-183a. Conditions imposed upon any specific license. (a) Upon determining that an application meets the requirements of the act and these regulations, the secretary shall issue a specific license authorizing the activity proposed by the applicant and may impose any limitations or conditions to the specific license as the secretary deems appropriate or necessary.

(b) The secretary may incorporate in any license, at the time of its issuance or thereafter, any requirements and conditions with respect to the licensee's receipt, possession, use, or transfer of radioactive material as the secretary deems appropriate or necessary in order to:

(1) Protect health or to minimize danger to life and property;

(2) assure the proper reporting, record-keeping and inspection of activities by the licensee; and

(3) prevent loss or theft of material subject to these regulations. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-184. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-184a. Specific conditions on all licenses. (a) No license and no right under any license shall be assigned or otherwise transferred except as authorized under the act or these regulations and approved by the secretary in writing. Each request to assign or transfer a license shall include the following:

(1) The name and the technical and financial qualifications of the proposed transferee; and

(2) the financial assurance for decommissioning information required by K.A.R. 28-35-180b.

(b) Each person authorized under these regulations shall confine the use and possession of the radioactive material licensed to the locations and purposes authorized in the license.

(c) No person shall introduce radioactive material into any product or material knowing or having reason to believe that the product or material will be transferred to a person exempt from these regulations under K.A.R. 28-35-192a, 28-35-192b, 28-35-192c, 28-35-192e, 28-35-192f, or 28-35-192g or the equivalent regulations of the nuclear regulatory commission (NRC) or an agreement state, except in accordance with a specific license issued under K.A.R. 28-35-181f or the general license issued under K.A.R. 28-35-194a.

(d) Each licensee shall file written notice with the secretary 30 days before vacating any facility when the licensee decides to permanently discontinue all activities involving licensed materials authorized in that facility under the license.

(e) Each licensee authorized under K.A.R. 28-35-181h to distribute devices to generally licensed persons shall perform the following:

(1) Report to the department all sales or transfers of those devices to persons generally licensed under K.A.R. 28-35-178b. The report shall identify each general licensee by name and address, the type of device transferred, and the quantity and type of radioactive material contained in the device. A report shall be submitted within 90 days of the sale or transfer; and

(2) furnish, to each general licensee to whom the licensee transfers any such device, a copy of the general license issued under K.A.R. 28-35-178b.

(f)(1) Each general licensee that is required by this part to register and each specific licensee shall notify the department, in writing, immediately

following the filing of a voluntary or involuntary petition for bankruptcy under any chapter of title 11, bankruptcy, of the United States code by or against any of the following:

(A) The licensee;

(B) any person controlling the licensee or listing the license or licensee as property of the estate; or

(C) any affiliate of the licensee.

(2) The notification specified in paragraph (f)(1) shall indicate the following:

(A) The name of the bankruptcy court in which the petition for bankruptcy was filed; and

(B) the date of the filing of the petition.

(g) Each portable gauge licensee shall use at least two independent physical controls that form tangible barriers to secure each portable gauge from unauthorized removal whenever the portable gauge is not under the control and constant surveillance of the licensee. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005; amended July 27, 2007; amended May 4, 2018.)

28-35-184b. Reporting requirements. (a) Immediate report. Each licensee shall notify the department as soon as possible but not later than four hours after the discovery of any of the following types of events:

(1) An event that prevents immediate protective actions necessary to avoid exposures to radiation or radioactive materials that could exceed regulatory limits; or

(2) an event involving a release of licensed material that could exceed regulatory limits.

(b) Twenty-four hour report. Each licensee shall notify the department within 24 hours after the discovery of any of the following events involving licensed material:

(1) An unplanned contamination event in which the following conditions are met:

(A) Access to the contaminated area, by workers or the public, is restricted for more than 24 hours by imposing additional radiological controls or by prohibiting entry into the area;

(B) the quantity of material involved is greater than five times the lowest annual limit on intake specified for the material in appendix B of the "Appendices to part 4: standards for protection against radiation," effective April 1994; and

(C) access to the area is restricted for a reason other than to allow isotopes with a half-life of less than 24 hours to decay before decontamination;

(2) an event in which equipment is disabled or fails to function as designed when the following conditions are met:

(A) The equipment is required by regulation or license condition to prevent releases exceeding regulatory limits, to prevent exposures to radiation and radioactive materials exceeding regulatory limits, or to mitigate the consequences of an accident;

(B) the equipment is required to be available and operable at the time the equipment is disabled or fails to function; and

(C) no redundant equipment is available and operable to perform the required safety function;

(3) an event that requires unplanned medical treatment at a medical facility of an individual with spreadable radioactive contamination on the individual or the individual's clothing; and

(4) an unplanned fire or explosion damaging any licensed material or any device, container, or equipment containing licensed material when the following conditions are met:

(A) The quantity of material involved is greater than five times the lowest annual limit of intake specified for the material in appendix B of the "appendices to part 4: standards for protection against radiation," effective April 1994; and

(B) the damage affects the integrity of the licensed material or its container.

(c) Preparation and submission of reports. Each report made by a licensee submitting reports in response to the requirements of this regulation shall meet the following requirements:

(1) Each licensee shall submit the reports required by subsections (a) and (b) of this regulation by telephone to the Kansas department of health and environment, bureau of air and radiation, radiation control program. Each report shall include the following information, to extent it is available:

(A) The caller's name and a callback number;

(B) a description of the event, including the date and time;

(C) the exact location of the event;

(D) the isotopes, quantities, and chemical and physical forms of the licensed material involved; and

(E) any personnel radiation exposure data available.

(2) Each licensee submitting any report required by subsection (a) or (b) of this regulation shall submit a written follow-up report within 30 days of each initial report. A written report sub-

mitted pursuant to other requirements of these regulations shall be considered to fulfill this requirement if the report contains all of the information required by this paragraph. The report shall include the following:

(A) A description of the event, including the probable cause, and the name of the manufacturer and the model number, if applicable, of any equipment that failed or malfunctioned;

(B) a description of the exact location of the event;

(C) the isotopes, quantity, and chemical and physical form of the licensed material involved;

(D) the date and time of the event;

(E) a description of the corrective actions taken or planned and the results of any evaluations or assessments; and

(F) a description of the extent to which individuals were exposed to radiation or to radioactive materials, without identifying any individuals by name. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; amended Dec. 30, 2005.)

28-35-185. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-185a. Expiration of licenses. (a) Except as provided in K.A.R. 28-35-186a(b), each specific license shall expire at end of the day, in the month and year stated on the license.

(b) With respect to the possession of radioactive material and residual radioactive contamination, each specific license shall continue in effect beyond the expiration date until the department has notified the licensee, in writing, that the license is terminated, even if any of the following occurs:

(1) The licensee decides not to renew the license.

(2) No application for license renewal is submitted.

(3) An application for renewal is denied.

(4) The department modifies or suspends a license.

(c) After the expiration date specified in the license, each licensee to whom this regulation applies who possesses radioactive material, including residual radioactive material, shall meet the following requirements:

(1) Limit the licensee's actions involving radioactive material to those related to decommissioning; and

(2) continue to control entry to restricted areas until the areas meet the requirements of K.A.R. 28-35-205 or K.A.R. 28-35-205a. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005.)

28-35-186. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-186a. Renewal of licenses. (a) Each application for the renewal of a specific license shall be filed in accordance with K.A.R. 28-35-179a.

(b) When a licensee, not less than 30 days prior to the expiration of the licensee's existing license, has filed an application in proper form for renewal of the existing license, the existing license shall not expire until final action on the application has been made by the secretary. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-187. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-187a. Amendment of licenses at request of licensee. Each application for the amendment of an existing license shall be filed in accordance with K.A.R. 28-35-179a and shall specify the respects in which the licensee desires the license to be amended and the grounds for the amendment. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-188. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-188a. Department action on application to renew or amend. In considering whether to grant or deny an application to renew an existing license, the secretary shall apply the criteria which are applied to determine whether an initial license should be granted or denied. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-189. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-189a. Advance notification of transport of nuclear waste. (a) Prior to the transport of any nuclear waste outside the confines of the licensee's facility or any other place of use or storage, or prior to the delivery of any nuclear waste to a carrier for transport, each licensee shall provide advance notification of such transport to the governor, or the governor's designee, of each state through which the waste will be transported. For the purpose of this regulation, "nuclear waste" means any large quantity of source, by-product, or special nuclear material required to be in type B packaging while transported to, through, or across state boundaries to a disposal site, or to a collection point for transport to a disposal site.

(b) Each advance notification required by this regulation shall contain the following information:

(1) the name, address, and telephone number of the shipper, carrier and receiver of the shipment;

(2) a description of the nuclear waste contained in the shipment as required by regulation of the U.S. department of transportation 49 CFR 172.202 and 172.203(d), as in effect July 1, 1984;

(3) the point of origin of the shipment and the seven day period during which departure of the shipment is estimated to occur;

(4) the seven day period during which arrival of the shipment at state boundaries is estimated to occur;

(5) the destination of the shipment, and the seven day period during which arrival of the shipment is estimated to occur; and

(6) a point of contact with a telephone number for current shipment information.

(c) The notification required by this regulation shall be made in writing to the office of each appropriate governor or the governor's designee and to the Kansas department of health and environment. A notification delivered by mail shall be postmarked at least seven days before the beginning of the seven day period during which departure of the shipment is estimated to occur. A notification delivered by messenger shall reach the office of each governor, or the governor's designee, at least four days before the beginning of the seven day period during which departure of the shipment is estimated to occur. A copy of the notification shall be retained by the licensee for one year.

(d) The licensee shall notify each appropriate governor, or the governor's designee, and the Kansas department of health and environment of any changes to the schedule information provided

pursuant to this regulation. Such notification shall be by telephone to a responsible individual in the office of each appropriate governor, or to the governor's designee. The licensee shall maintain for one year a record of the name of the individual contracted.

(e) Each licensee who cancels a nuclear waste shipment for which advance notification has been sent shall send a cancellation notice to the governor, or the governor's designee, of each appropriate state and to the Kansas department of health and environment. A copy of the notice shall be retained by the licensee for one year.

(f) A list of the mailing addresses of each governor and each designee is available upon request from the director, office of state programs, U.S. nuclear regulatory commission, Washington, D.C. 20555. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-190. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-190a. Transfer of material. (a) A licensee shall not transfer radioactive material except as authorized in this regulation.

(b) Any licensee may transfer radioactive material, subject to the acceptance of the transferee:

(1) To the department;

(2) to the United States nuclear regulatory commission or its successor;

(3) to any person exempt from these regulations under K.A.R. 28-35-192a, 28-35-192b, 28-35-192c, 28-35-192d, 28-35-192e, 28-35-192f and 28-35-192g, as permitted under those regulations;

(4) to any person authorized to receive the material under an appropriate general or specific license issued by the secretary, the United States nuclear regulatory commission or an agreement state, or to any person otherwise authorized to receive the material by the federal government or any agency thereof, the secretary or an agreement state; or

(5) as otherwise authorized in writing by the secretary; or

(6) to the U.S. department of energy.

(c) Before transferring radioactive material to a specific licensee or to a general licensee who is required to register with the department, the United States nuclear regulatory commission, or an agreement state, the licensee transferring the

material shall verify that the transferee's license authorizes receipt of the type, form, and quantity of radioactive material to be transferred.

(d) The following methods for the verification required by subsection (c) shall be acceptable.

(1) The transferor may obtain, and read, a current copy of the transferee's specific license or registration certificate.

(2) The transferor may obtain a written certification by the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency, and expiration date;

(3) For emergency shipments, the transferor may accept oral certification by the transferee that the transferee is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred. The oral certification shall include the license or registration certificate number, the issuing agency, and expiration date. The oral certification shall be confirmed in writing within 10 days following the oral certification.

(4) The transferor may obtain other sources of information compiled by a reporting service from official records of the department, United States nuclear regulatory commission, or an agreement state as to the identity of licensees and the scope and expiration dates of licenses and registration.

(5) When none of the methods of verification described in paragraphs (1) to (4) are readily available, or when a transferor desires to verify that information received by one of those methods is correct or up-to-date, the transferor may obtain and record confirmation, from the department, the United States nuclear regulatory commission or an agreement state, that the transferee is licensed to receive the radioactive material.

(e) The radioactive material shall be prepared for shipment and transport in accordance with K.A.R. 28-35-196a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-191. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-191a. Modification, revocation, and termination of licenses. (a) Any license may be suspended or revoked by reason of amend-

ment to the act or these regulations or by an order of the secretary.

(b) Any license may be revoked, suspended, or modified, in whole or in part:

(1) For any material false statement in the application or any statement of fact required under provision of the act or these regulations;

(2) because of any condition, revealed by the application, or any statement of fact, or any report, record, or inspection or other means, which would warrant the denial of an original application; or

(3) for violation of, or failure to observe, any of the terms and conditions of the license, or any requirement of the act, or any rule and regulation or order of the secretary.

(c) Except in cases in which the public health, interest, or safety requires otherwise, no license shall be modified, suspended, or revoked unless, prior to the institution of such proceedings:

(1) those facts or conduct which appear to warrant such action have been called to the attention of the licensee in writing; and

(2) the licensee has been accorded an opportunity to demonstrate or achieve compliance with all lawful requirements.

(d) The secretary may revoke a specific license upon written request of a licensee. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-192. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-192a. Exemptions; source material. (a) Each person who only acquires, possesses, uses, or transfers source material in any chemical mixture, compound, solution, or alloy in which the source material, by weight, is less than 0.05 percent of the mixture, compound, solution, or alloy shall be exempt from these regulations.

(b) Each person who only acquires, possesses, uses, or transfers unrefined and unprocessed ore containing source material and does not refine or process the ore shall be exempt from these regulations.

(c) Each person who only acquires, possesses, uses, or transfers any of the following shall be exempt from the requirements for a license in part 3 of these regulations and the requirements of parts 4 and 10 of these regulations:

(1) Any quantities of thorium contained in any of the following:

(A) Incandescent gas mantles;

(B) vacuum tubes;

(C) welding rods;

(D) electric lamps for illuminating purposes, if each lamp does not contain more than 50 milligrams of thorium;

(E) germicidal lamps, sunlamps, and lamps for outdoor or industrial lighting, if each lamp does not contain more than two grams of thorium;

(F) rare earth metals and compounds, mixtures, and products containing not more than 0.25 percent thorium or uranium, or both, by weight; or

(G) personnel neutron dosimeters, if each dosimeter does not contain more than 50 milligrams of thorium;

(2) source material contained in any of the following:

(A) Glazed ceramic tableware, if the glaze contains not more than 20 percent source material, by weight;

(B) glassware containing not more than two percent of source material by weight or, for glassware manufactured before August 27, 2013, 10 percent of source material by weight. This exemption shall not include commercially manufactured glass brick, pane glass, ceramic tile or other glass, or ceramic used in construction;

(C) glass enamel or glass enamel frit that contains not more than 10 percent of source material, by weight, and that was imported or ordered for importation into the United States, or initially distributed by manufacturers in the United States, before July 25, 1983; or

(D) piezoelectric ceramic containing not more than two percent of source material by weight;

(3) photographic film, negatives, and prints containing uranium or thorium;

(4) any finished product or part of a product fabricated of, or containing, tungsten or magnesium-thorium alloys if the thorium content of the alloy does not exceed four percent, by weight. The exemption contained in this paragraph shall not be deemed to authorize the chemical, physical, or metallurgical treatment or processing of any product or part of a product;

(5) uranium used as shielding and constituting part of any shipping container. The uranium shielding shall be conspicuously and legibly impressed with the words "CAUTION—RADIOACTIVE SHIELDING—URANIUM" and shall be enclosed in steel containing no more than 0.25

percent carbon, or another equally fire-resistant metal, with a minimum wall thickness of one-eighth inch (3.2 mm);

(6) thorium or uranium contained in finished optical lenses, if each lens does not contain more than 30 percent of thorium or uranium by weight or, if manufactured after August 27, 2013, 10 percent of thorium or uranium by weight. The exemption in this paragraph shall not be deemed to authorize either of the following:

(A) The shaping, grinding, or polishing of the lens or any manufacturing processes other than the assembly of the lens into optical systems and devices without any alteration of the lens; or

(B) the receipt, possession, use, or transfer of thorium or uranium contained in contact lenses, or in eyeglasses, or in eyepieces in binoculars or other optical instruments;

(7) uranium contained in detector heads for use in fire detection units, if each detector head contains not more than 0.005 microcurie of uranium; or

(8) thorium contained in any finished aircraft engine part containing nickel-thoria alloy, if both of the following conditions are met:

(A) The thorium is dispersed in the nickel-thoria alloy in the form of finely divided thoria (thorium dioxide); and

(B) the thorium content in the nickel-thoria alloy does not exceed four percent by weight.

(d)(1) Each person who acquires, possesses, uses, or transfers uranium contained in counterweights installed in aircraft, rockets, projectiles or missiles or stored or handled in connection with installation or removal of these counterweights, except counterweights manufactured before December 31, 1969 under a specific license issued by the atomic energy commission and impressed with the legend required by that license, shall be exempt from the requirements for a license in part 3 of these regulations and the requirements of parts 4 and 10 of these regulations if both of the following conditions are met:

(A) Each counterweight has been impressed in a manner that is clearly legible through any plating or covering with the following words: "DEPLETED URANIUM."

(B) Each counterweight is durably and legibly labeled or marked with the identification of the manufacturer and the following words: "UNAUTHORIZED ALTERATIONS PROHIBITED."

(2) The exemption specified in this subsection shall not be deemed to authorize the chemical,

physical, or metallurgical treatment or processing of any counterweights, other than repair or restoration of any plating or other covering.

(e)(1) No person shall initially transfer for sale or distribution a product containing source material to any persons exempt under subsections (c) and (d) or equivalent regulations of an agreement state, unless authorized by a license issued by the nuclear regulatory commission (NRC) to initially transfer the products for sale or distribution.

(2) Each person authorized by an agreement state to manufacture, process, or produce materials or products containing source material and each person who imports finished products or parts for sale or distribution shall be authorized by a license issued by the NRC for distribution only. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended May 4, 2018.)

28-35-192b. Exemptions; exempt concentrations of radioactive materials. (a) Except as provided in K.A.R. 28-35-184a(e), a person shall be exempt from these regulations to the extent that the person acquires, possesses, uses, transfers, or owns products or materials containing radioactive material in concentrations not exceeding those specified in K.A.R. 28-35-198a.

(b) A person shall be exempt from these regulations to the extent that the person acquires, possesses, uses, or transfers products containing naturally occurring radionuclides of elements with an atomic number less than 82, in isotopic concentrations not in excess of those that occur naturally.

(c) This regulation shall not be deemed to authorize the import of radioactive material or products containing radioactive material.

(d) A person who manufactures, processes, or produces a product or material shall be exempt from the requirements for a license as set forth in these regulations to the extent that the transfer of the radioactive material contained in the product or material is in concentrations not in excess of the amounts specified in K.A.R. 28-35-198a and is introduced into the product or material by a licensee holding a specific license issued by the department expressly authorizing such introduction. This exemption shall not apply to the transfer of radioactive material contained in any food, beverage, cosmetic, drug, or other commodity or product designed for ingestion or inhalation by, or application to, a human being.

(e) No person shall introduce radioactive material into a product or material knowing, or having reason to believe, that the product or material will be transferred to a person exempt from these regulations under subsection (a) or under an equivalent regulation of the nuclear regulatory commission or an agreement state, except in accordance with a specific license issued under K.A.R. 28-35-181e or the general license issued in K.A.R. 28-35-194a. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-192c. Exceptions; other radioactive material. Except for persons who apply tritium, promethium-147, or radium to, or persons who incorporate tritium, promethium-147, or radium into, the products listed in this regulation, each person who only acquires, possesses, uses, or transfers any of the following products shall be exempt from these regulations:

(a) Timepieces or hands or dials containing radium, or timepieces, hands, or dials containing not more than the following specified quantities of other radioactive materials:

- (1) 25 millicuries of tritium per timepiece;
- (2) 5 millicuries of tritium per hand;
- (3) 15 millicuries of tritium per dial. Bezels, when used, shall be considered as part of the dial;
- (4) 100 microcuries of promethium-147 per watch or 200 microcuries of promethium-147 per any other timepiece;
- (5) 20 microcuries of promethium-147 per watch hand or 40 microcuries of promethium-147 per hand on other timepieces;
- (6) 60 microcuries of promethium-147 per watch dial or 120 microcuries of promethium-147 per dial on other timepieces. Bezels, when used, shall be considered as part of the dial. The levels of radiation from hands and dials containing promethium-147 shall not exceed the following, when measured through 50 milligrams per square centimeter of absorber:

(A) For wrist watches, 0.1 millirad per hour at 10 centimeters from any surface;

(B) for pocket watches, 0.1 millirad per hour at one centimeter from any surface; and

(C) for any other timepiece, 0.2 millirad per hour at 10 centimeters from any surface; and

(7) for intact timepieces manufactured before November 30, 2007, 0.037 megabecquerel (1 microcurie) of radium-226 per timepiece;

(b) balances of precision containing not more than one millicurie of tritium per balance or not more than 0.5 millicurie of tritium per balance part manufactured before December 17, 2007;

(c) marine compasses containing not more than 750 millicuries of tritium gas and other marine navigational instruments containing not more than 250 millicuries of tritium gas manufactured before December 17, 2007;

(d) ionization chamber smoke detectors containing not more than one microcurie (μCi) of americium-241 per detector in the form of a foil and designed to protect life and property from fires;

(e) electron tubes. The levels of radiation from each electron tube containing radioactive material shall not exceed one millirad per hour at one centimeter from any surface when measured through seven milligrams per square centimeter of absorber. For purposes of this subsection, "electron tubes" shall include spark gap tubes, power tubes, gas tubes including glow lamps, receiving tubes, microwave tubes, indicator tubes, pickup tubes, radiation detection tubes, and any other completely sealed tube that is designed to conduct or control electrical currents. An electron tube shall not contain more than one of the following specified quantities of radioactive material:

(1) 150 millicuries of tritium per microwave receiver protector tube or 10 millicuries of tritium per any other electron tube;

(2) 1 microcurie cobalt-60;

(3) 5 microcuries nickel-63;

(4) 30 microcuries krypton-85;

(5) 5 microcuries cesium-137; or

(6) 30 microcuries promethium-147; and

(f) ionizing radiation-measuring instruments containing, for purposes of internal calibration or standardization, sources of radioactive material. No source shall exceed the applicable quantity specified in K.A.R. 28-35-197b. No single instrument shall contain more than 10 sources. For the purposes of this subsection, 0.05 μCi of Am-241 shall be considered an exempt quantity. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011; amended May 4, 2018.)

28-35-192d. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; revoked March 18, 2011.)

28-35-192e. Exemptions; gas and aerosol detectors containing radioactive material.

(a) Except for persons who manufacture, process, or produce gas and aerosol detectors containing radioactive material or who initially transfer these products for sale or distribution, each person who acquires, receives, owns, possesses, uses, or transfers radioactive material in gas and aerosol detectors designed to protect life or property from fires and airborne hazards shall be exempt from these regulations. Each detector shall have been manufactured, processed, produced, imported, or initially transferred in accordance with a specific license issued by the secretary pursuant to K.A.R. 28-35-181q or a license issued by the nuclear regulatory commission or by an agreement state pursuant to an equivalent regulation of the nuclear regulatory commission or the agreement state.

(b) Gas and aerosol detectors previously manufactured and distributed before November 30, 2007 to general licensees in accordance with a specific license issued by an agreement state shall be exempt under subsection (a) if the device is labeled in accordance with the specific license authorizing distribution of the general licensed device and if the detectors meet the requirements of K.A.R. 28-35-181r.

(c) Each person who desires to manufacture, process, or produce gas and aerosol detectors containing radioactive material, or to initially transfer these products for use pursuant to this regulation, shall apply for a license pursuant to K.A.R. 28-35-181q. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-192f. Exemptions; self-luminous products containing tritium, krypton-85 or promethium-147.

(a) Except for persons who manufacture, process, or produce self-luminous products containing tritium, krypton-85, or promethium-147 and except as provided in subsection, (b) any person shall be exempt from these regulations to the extent that person acquires, possesses, uses, or transfers, tritium, krypton-85, or promethium-147 in self-luminous products manufactured, processed, produced, imported, or transferred in accordance with a specific license issued by the United States nuclear regulatory commission pursuant to Section 32.22 of Title 10 CFR 31, which authorizes the transfer of the product to persons who are exempt from regulatory requirements.

(b) The exemption in subsection (a) shall not apply to tritium, krypton-85, or promethium-147 used in toys, adornments, or similar items. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-192g. Exemptions; exempt quantities. (a) Except as provided in subsections (c) through (e), each person who acquires, possesses, uses, owns, receives, or transfers radioactive material in individual quantities that do not exceed the applicable quantity specified in K.A.R. 28-35-197b shall be exempt from these regulations.

(b) Each person who possesses radioactive material received or acquired before January 1, 1972 under the general license then provided in K.A.R. 28-35-178a shall be exempt from these regulations to the extent that the person possesses, uses, owns, or transfers that radioactive material. This exemption shall not apply to radium-226.

(c) This regulation shall not authorize the production, packaging, repackaging, or transfer of radioactive material for purposes of commercial distribution, or the incorporation of radioactive material into products intended for commercial distribution.

(d) No person shall, for purposes of commercial distribution, transfer radioactive material in the individual quantities specified in K.A.R. 28-35-197b knowing, or having reason to believe, that those quantities of radioactive material will be transferred to a person exempt under this regulation or an equivalent regulation of the nuclear regulatory commission (NRC) or an agreement state, except in accordance with a specific license issued by the secretary under K.A.R. 28-35-181r, an equivalent regulation of the NRC, or an equivalent regulation of an agreement state.

(e) No person shall, for purposes of producing an increased radiation level, combine quantities of radioactive material covered by this exemption so that the aggregate quantity exceeds the individual quantities specified in K.A.R. 28-35-197b. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011; amended May 4, 2018.)

28-35-192h. Certain industrial devices.

(a) Except as specified in subsections (b) and (c), each person who receives, possesses, uses, transfers, owns, or acquires any industrial device con-

taining by-product material designed and manufactured for either of the following purposes shall be exempt from these regulations:

(1) Detecting, measuring, gauging, or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition; or

(2) producing an ionized atmosphere if the industrial device is manufactured, processed, produced, or initially transferred in accordance with a specific license issued by the nuclear regulatory commission (NRC).

(b) Each person who manufactures, processes, produces, or initially transfers for sale or distribution any industrial device containing by-product material designed and manufactured for either of the following purposes shall be excluded from the exemption in subsection (a):

(1) Detecting, measuring, gauging, or controlling thickness, density, level, interface location, radiation, leakage, or qualitative or quantitative chemical composition; or

(2) producing an ionized atmosphere.

(c) The exemption in subsection (a) shall exclude any source not incorporated into an industrial device, including calibration and reference sources.

(d) Each person who manufactures, processes, produces, or initially transfers for sale or distribution any industrial device containing by-product material for use under subsection (a) shall apply for a license and a certificate of registration from the NRC. (Authorized by and implementing K.S.A. 48-1607; effective May 4, 2018.)

28-35-193. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-193a. Pre-licensing inspections. The department may request verification of information provided in any application or request additional information that is necessary to make a determination as to whether a license should be granted or denied and whether any special conditions should be attached to the license. This information may be obtained by visiting the facility or location where radioactive materials would be possessed or used, and by discussing details of proposed possession or use of the radioactive material with the applicant or the applicant's designated representatives. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-193b. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; revoked Dec. 30, 2005.)

28-35-194. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-194a. Reciprocal recognition of licenses. (a) Subject to other provisions in this regulation, any person may apply for a general license to conduct activities within this state without obtaining a specific license from the secretary, if all of the following conditions are met:

(1) The person possesses a specific license issued by the nuclear regulatory commission or an agreement state, other than this state, that authorizes the proposed activities.

(2) The person does not conduct any activities authorized by any general license issued under this regulation for a period totalling more than 180 days in a calendar year.

(3) The specific license does not limit the activity authorized to a specified installation or location.

(4) The person notifies the department in writing at least five days before engaging in the activity. The notification shall indicate the location, period, and type of proposed possession and use within the state and shall be accompanied by a copy of the specific license. If, for a specific case, the five-day period would impose an undue hardship, the person may, upon application to the department, obtain permission by letter, facsimile, or electronic communication to proceed.

(5) The person complies with all applicable regulations of the secretary and with all the terms and conditions of the specific license, except any term or condition of the license that is inconsistent with these regulations.

(6) The person supplies any information requested by the department.

(7) The person does not transfer or dispose of radioactive material possessed or used under the general license provided in this regulation except by transfer to a person who meets either of the following conditions:

(A) Is specifically licensed by the department or the nuclear regulatory commission to receive the material; or

(B) is exempt from the requirements for a license for that material under K.A.R. 28-35-192a,

28-35-192b, 28-35-192c, 28-35-192d, 28-35-192e, 28-35-192f, or 28-35-192g.

(b) Any person who holds a specific license issued by the nuclear regulatory commission, or an agreement state that authorizes the person to manufacture, transfer, install, or service a device described in K.A.R. 28-35-178b within areas subject to the jurisdiction of the licensing body is issued a general license to manufacture, install, transfer, or service those devices in this state subject to the following requirements:

(1) The person shall satisfy the requirements of K.A.R. 28-35-184a(e)(1) and (2).

(2) The device shall be manufactured, labeled, installed, and serviced in accordance with the provisions of the specific license issued to the person by the nuclear regulatory commission or the agreement state.

(3) The person shall ensure that any labels required to be affixed to the device, under regulations of the authority that licensed the manufacture of the device, and that bear the statement "Removal of this label is prohibited" are affixed to the device.

(4) The person shall furnish to each general licensee to whom the person transfers the device, or on whose premises the person installs the device, a copy of the general license issued in K.A.R. 28-35-178b.

(c) Acceptance of any specific license recognized under this regulation or any product distributed pursuant to such a license may be withdrawn, limited, or qualified by the secretary, upon determining that the action is necessary in order to protect health or minimize danger to life or property. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended March 18, 2011.)

28-35-195. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-195a. Intrastate transportation of radioactive materials.

(a) Each common or contract carrier shall be deemed to have been issued a general license to transport and store radioactive material in the regular course of its carriage for another, if the transportation and storage are performed in accordance with the regulations of the U.S. department of transportation. Each person who transports and stores radioactive material pursuant to the general license specified in this

subsection shall be exempt from the requirements of parts 4 and 10 of these regulations.

(b) Each private carrier shall be deemed to have been issued a general license to transport radioactive material, if the transportation is performed in accordance with the regulations of the U.S. department of transportation. Each person who transports radioactive material under the general license issued in this subsection shall be exempt from the requirements of parts 4 and 10 of these regulations.

(c) Each physician shall be exempt from the requirements of subsection (b) of this regulation to the extent that the physician transports radioactive material for use in the practice of medicine. (Authorized by and implementing K.S.A. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Dec. 30, 2005.)

28-35-196. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-196a. Preparation of radioactive material for transport.

(a) A licensee shall not deliver any radioactive material to a carrier for transport, or transport radioactive material as a private carrier, unless:

(1) The licensee complies with the applicable requirements of the regulations of the U.S. department of transportation that are appropriate to the mode of transport and that are related to the packing of radioactive material, and to the monitoring, marking, and labeling of those packages;

(2) the licensee has established procedures for opening and closing packages in which radioactive material is transported to provide safety and to assure that, prior to the delivery to a carrier for transport, each package is properly closed for transport; and

(3) prior to delivery of a package to a carrier for transport, the licensee has assured that any special instructions needed to safely open the package are sent to, or are available to, the consignee.

(b) The requirements in subsection (a) of this regulation shall not apply to the transportation of licensed material, or to the delivery of licensed material to a carrier for transport, when the transportation is subject to regulations of the U.S. postal service. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-196b. Transportation of radioactive material. (a) No person shall deliver radio-

active material to a carrier for transport or transport radioactive material except as authorized in a general or specific license issued by the department unless:

(1) That person's activities are exempted from licensure by Section 28-35-140(b) of these regulations;

(2) each of the packages delivered to a carrier for transport or transported contains radioactive materials bearing a specific activity of less than, or equal to, 0.002 microcurie (74 Bq) per gram; or

(3) the packages delivered to a carrier for transport are subject to the regulations of the U.S. Postal Service. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-197. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-197a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; revoked May 4, 2018.)

28-35-197b. Schedule B; exempt quantities of radioactive material. The provisions of 10 C.F.R. 30.71, as in effect on November 30, 2007, are hereby adopted by reference, except that the word "byproduct" shall be replaced with "radioactive." (Authorized by and implementing K.S.A. 48-1607; effective May 4, 2018.)

28-35-198. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-198a. Schedule C; Exempt concentrations.

Element (atomic number)	Isotope	Column I	Column II
		Gas Concentration uCi/ml ^l	Liquid and Solid Concentration uCi/ml ²
Antimony (51)	Sb 122		3 × 10 ⁻⁴

NOTE 1: Many radioisotopes disintegrate into isotopes which are also radioactive. In expressing the concentrations in 28-35-198a, Schedule C, the activity state is that of the parent isotope and takes into account the daughters.

NOTE 2: For purposes of 28-35-192b, when a combination of isotopes is involved, the limit for the combination shall be derived as follows: Determine for each isotope in the product the ratio between the concentration present in the product and the exempt concentration established in 28-35-198a, Schedule C, for the specific isotope when not in combination. The sum of those ratios may not exceed "1" (i.e., unity).

¹ Values are given only for those materials normally used as gases.

² uCi/gm for solids. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-199. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-199a. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Oct. 17, 1994; revoked Dec. 30, 2005.)

28-35-200. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-86-37, Dec. 11, 1985; revoked May 1, 1986.)

28-35-200a. Schedule E; Possession limits authorized under types b & c specific licenses of broad scope.

¹ Based on an alpha disintegration rate of Th-232, Th-230, and their daughter products.

² Based on an alpha disintegration rate of U-238, U-234, and U-235.

(b) Combinations of isotopes. For the purposes of K.A.R. 28-35-180b, when a combination of isotopes in known amounts is involved, the limit for the combination shall be derived by determining, for each isotope in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific isotope when not in combination. The sum of the ratios for all the isotopes in the combination shall not exceed one, which is also referred to as "unity." (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; amended July 27, 2007.)

28-35-202. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; revoked July 27, 2007.)

28-35-203. Schedule G; Criteria relating to use of financial tests and parent company guarantees for providing reasonable assur-

ance of funds for decommissioning. (a) Each applicant or licensee providing assurance of the availability of funds for decommissioning based on a parent company guarantee that funds will be available for decommissioning costs based on a demonstration that the parent company passes a financial test shall meet the following standards:

(b) Each licensee or applicant applying to the department for recognition of a parent company guarantee for the purposes of complying with the requirements of K.A.R. 28-35-180b shall be required to show that the parent company guarantee meets the following criteria:

(1) Each parent company shall meet two of the following three ratios:

(A) A ratio of total liabilities to net worth that is less than 2.0;

(B) a ratio of the sum of net income plus depreciation, depletion, and amortization to total liabilities that is greater than 0.1; or

(C) a ratio of current assets to current liabilities that is greater than 1.5.

(2) Each parent company shall have net working capital and tangible net worth each of which is equal a minimum of six times the current decommissioning cost estimates, or the prescribed amount if a certification is used based on the requirements of K.A.R. 28-35-180b.

(3) Each parent company shall have assets located in the United States amounting to at least 90 percent of the company's total assets or at least six times the current decommissioning cost estimates, or at least six times the prescribed amount if a certification is used based on the requirements of K.A.R. 28-35-180b.

(4) Each parent company shall have the following:

(A) A current rating for the company's most recent bond issuance of AAA, AA, A, or BBB as issued by standard and poor's or Aaa, Aa, A, or Baa as issued by moody's;

(B) a tangible net worth at least six times the current decommissioning cost estimate, or the prescribed amount if a certification is used based on the requirements of K.A.R. 28-35-180b;

(C) a tangible net worth of at least \$10 million; and

(D) assets located in the United States amounting to at least 90 percent of the company's total assets or at least six times the current decommissioning cost estimates, or at least six times the prescribed amount if certification is used based on the requirements of K.A.R. 28-35-180b.

(c) The parent company's independent certified public accountant shall compare the data used by the parent company in the financial test, which shall be derived from the independently audited, year-end financial statements for the latest fiscal year, with the amounts in the financial statement. If any matters come to the auditor's attention that cause the auditor to believe that the data specified in the financial test should be adjusted and that the company no longer passes the test, the licensee shall notify the department within 90 days of the date the auditor identifies the matter.

(d) After the initial financial test, the parent company shall be required to pass the test within 90 days after the close of each succeeding fiscal year.

(1) If the parent company no longer meets the requirements of subsection (a), the licensee shall notify the department of the licensee's intent to establish alternate financial assurance as specified in these regulations.

(2) The notice shall be sent by certified mail within 90 days after the end of the fiscal year for which the year-end financial data shows that the parent company no longer meets the financial test requirements.

(3) The licensee shall provide alternate financial assurance within 120 days after the end of a fiscal year for which the year-end financial data shows that the parent company no longer meets the financial test requirements.

(e) Each parent company guarantee obtained by an applicant or licensee shall contain terms that provide the following information:

(1) The parent company guarantee shall remain in force unless the guarantor sends notice of cancellation by certified mail to the licensee and the department. The guarantee shall not be canceled during the 120 days beginning on the date of receipt of the notice of cancellation by both the licensee and the department, as evidenced by the return receipts.

(2) If the licensee fails to provide alternate financial assurance within 90 days after receipt of a notice of cancellation of the parent company guarantee by the licensee and the department, the guarantor shall provide the alternative financial assurance in the name of the licensee.

(3) The parent company guarantee and financial test provisions shall remain in effect until the secretary has terminated the license.

(4) If a trust is established for decommissioning costs, the trustee and trust shall be acceptable to the secretary. An acceptable trustee may be an ap-

appropriate state or federal government agency or an entity that has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; amended July 27, 2007.)

28-35-204. Decommissioning plan. (a) Each licensee shall submit a decommissioning plan if at least one of the following conditions is met:

(1) The licensee intends to terminate the license using radiological criteria specified in K.A.R. 28-35-205a or K.A.R. 28-35-205b.

(2) A decommissioning plan is otherwise required by these regulations.

(3) A decommissioning plan is required by a license condition.

(4) The procedures and activities necessary to carry out decommissioning of the site or separate building or outdoor area have not been previously approved by the department, and these procedures could increase the potential health and safety impact on workers or on the public, including any of the following types of procedures:

(A) Procedures that would involve techniques not applied routinely during cleanup or maintenance operations;

(B) procedures permitting workers to enter areas not normally occupied where surface contamination and radiation levels are higher than routinely encountered during the operation for which the license was issued;

(C) procedures that could result in greater airborne concentrations of radioactive materials than are present during operation;

(D) procedures that could result in greater releases of radioactive material to the environment than those associated with the operation for which the license was issued; or

(E) procedures with a potential health and safety impact that could be carried out before approval of the decommissioning plan.

(b) The proposed decommissioning plan for the facility or site, or separate building or outdoor area, shall include the following:

(1) A description of the conditions of the facility or site sufficient to evaluate the acceptability of the plan;

(2) a description of the planned decommissioning operations;

(3) a description of the methods used to ensure the protection of workers and the environment against radiation hazards during decommissioning;

(4) a description of the radiation survey planned to demonstrate compliance with subsection (e) or with K.A.R. 28-35-205; and

(5) an updated, detailed cost estimate of decommissioning, comparison of that estimate with the present funds set aside for decommissioning, and a plan for ensuring the availability of adequate funds for completion of the decommissioning.

(c) For decommissioning plans calling for completion of decommissioning more than 24 months after plan approval, the plan shall include a justification for the delay. The proposed decommissioning plan shall not be approved unless the licensee demonstrates that the decommissioning will be completed as soon as practicable and that the health and safety of the workers and the public will be protected.

(d) Each licensee shall complete the decommissioning of the facility or site as soon as practicable but not more than 24 months following the initiation of decommissioning, unless an alternate schedule addressing the factors specified in subsection (f) is approved.

(e) If decommissioning involves the entire site, the licensee shall request license termination upon completion of the decommissioning operations.

(f) For decommissioning plans calling for the completion of decommissioning more than 24 months after plan approval, the plan shall include a written justification for the decommissioning schedule warranted by consideration of the following:

(1) Whether it is technically feasible to complete decommissioning within the allotted 24-month period;

(2) whether waste disposal capacity is available to allow the completion of decommissioning within the allotted 24-month period;

(3) whether a volume reduction of wastes requiring disposal will be achieved by allowing short-lived radionuclides to decay;

(4) whether a reduction in radiation exposure to workers can be achieved by allowing short-lived radionuclides to decay; and

(5) whether other site-specific factors exist. These factors may include the regulatory requirements of other government agencies, lawsuits, groundwater treatment operations, monitored natural groundwater restoration, and actions that could result in more environmental harm than deferred cleanup.

(g) Each licensee shall perform the following final steps in decommissioning:

(1) Conduct a radiation survey of the premises where the licensed operations were carried out and submit a report of the results of this survey, unless the licensee demonstrates that the premises are suitable for release in some other manner. Each licensee shall complete the following, as appropriate:

(A) Report the levels of gamma radiation in units of millisieverts or microrems per hour at one meter from surfaces and report the levels of radioactivity, including alpha and beta, in units of megabecquerels, disintegrations per minute, or microcuries per milliliter for water, and becquerels or picocuries per gram for solids, including soil and concrete; and

(B) specify the survey instrument or instruments used and certify that each instrument is calibrated and tested.

(2) Each licensee shall certify the disposition of all licensed material, including accumulated wastes, by submitting a completed form specified by the department or the equivalent information to the department. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-205. Termination of a license without restriction. (a) A site shall be considered acceptable for unrestricted use if both of the following conditions are met:

(1) The residual radioactivity that is distinguishable from background radiation results in a TEDE to an average member of the critical group that does not exceed 0.25 millisievert or 25 mrem per year, including the residual radioactivity from groundwater sources of drinking water.

(2) The residual radioactivity has been reduced to levels that are as low as reasonably achievable (ALARA). Any detriment, including any deaths from transportation accidents that could result from decontamination and waste disposal, shall be taken into consideration by the secretary.

(b) Each specific license, including any expired license, shall be terminated upon written notice to the licensee if the secretary determines that all of the following conditions are met:

(1) All radioactive material has been properly disposed of.

(2) A reasonable effort has been made to eliminate the residual radioactive contamination, if present.

(3) Documentation has been provided to the department demonstrating one of the following:

(A) A radiation survey has been performed and shows that the premises meet the requirements of this regulation.

(B) The other information submitted by the licensee is sufficient to show that the premises are suitable for release in accordance with this regulation. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-205a. License termination under restricted conditions. A site may be considered by the secretary to be acceptable for license termination under restricted conditions if all of the following conditions are met:

(a)(1) The licensee demonstrates that further reductions in residual radioactivity necessary to comply with the provisions of K.A.R. 28-35-205(a) would result in public or environmental harm or were not being made because the residual levels associated with restricted conditions are ALARA. The demonstration shall reflect the licensee's consideration of any detriment that could result from decontamination and waste disposal; and

(2) the licensee has made provisions for legally enforceable institutional controls that provide reasonable assurance that the TEDE from residual radioactivity distinguishable from background to the average member of the critical group will not exceed 0.25 millisievert or 25 mrem per year, including that from groundwater sources of drinking water.

(b) The licensee has provided sufficient financial assurance to enable an independent third party, including a governmental custodian of a site, to assume and carry out responsibilities for any necessary control and maintenance of the site. Each of the following financial assurance mechanisms shall be acceptable:

(1) Funds placed into an account segregated from the licensee's assets and outside the licensee's administrative control as specified in K.A.R. 28-35-180b;

(2) a surety method, insurance policy, or other guarantee method as described in K.A.R. 28-35-180b;

(3) a statement of intent in the case of federal, state, or local government licensees, as described in K.A.R. 28-35-180b; or

(4) when a governmental entity is assuming custody and ownership of a site, an arrangement that is deemed acceptable by the governmental entity.

(c) The licensee has submitted a decommissioning plan to the department indicating the licens-

ee's intent to decommission in accordance with K.A.R. 28-35-204 and specifying that the licensee intends to decommission by restricting the use of the site. The licensee shall document in the decommissioning plan how the advice of individuals and institutions in the community who could be affected by the decommissioning has been sought and incorporated, as appropriate, following analysis of that advice.

(1) Each licensee proposing to decommission by restricting the use of the site shall seek advice from the affected parties regarding the following matters concerning the proposed decommissioning:

(A) Whether the provisions for institutional controls proposed by the licensee will provide reasonable assurance of the following:

(i) That the TEDE from residual radioactivity distinguishable from background to the average member of the critical population will not exceed the applicable limit specified in part 4 of these regulations;

(ii) that the controls are enforceable; and

(iii) that the controls do not impose undue burdens on the local community or other affected parties; and

(B) whether or not the licensee has provided sufficient financial assurance to enable an independent third party, including a governmental custodian of a site, to assume and carry out the responsibilities for any necessary control and maintenance of the site.

(2) In seeking advice on the issues identified in this subsection, the licensee shall provide for the following:

(A) Participation by representatives of a broad cross section of community interests who could be affected by the decommissioning;

(B) an opportunity for a comprehensive, collective discussion of the issues by the participants represented; and

(C) a publicly available summary of the results of all discussions specified in paragraph (c)(2)(B), including a description of the individual viewpoints of the participants on the issues and the extent of agreement and disagreement among the participants on the issues.

(d) Residual radioactivity at the site has been reduced so that if the institutional controls were no longer in effect, there is reasonable assurance that the TEDE from residual radioactivity distinguishable from background to the average member of the critical group is as low as reasonably achievable and would not exceed either of the following:

(1) 1 millisievert (100 mrem) per year; or

(2) 5 millisieverts (500 mrem) per year if the licensee demonstrates the following:

(A) Further reductions in residual radioactivity necessary to comply with the limit specified in paragraph (d)(1) are not technically achievable, would be prohibitively expensive, or would result in additional public or environmental harm;

(B) provisions for ongoing, enforceable institutional controls exist; and

(C) sufficient financial assurance exists to enable a responsible government entity or independent third party, including a governmental custodian of a site, to carry out periodic rechecks of the site at least every five years to ensure that the institutional controls remain in place as necessary to meet the requirements in this regulation and to assume and carry out the responsibilities for any necessary controls and maintenance of those controls. The financial assurance mechanisms shall be those specified in subsection (b).

(e)(1) If the department receives a decommissioning plan from the licensee or a proposal by the licensee for the release of a site pursuant to this regulation or K.A.R. 28-35-205b, the following shall be notified by the department and solicited for comments:

(A) The local and state governments in the vicinity of the site and any Indian nation or other indigenous people that have treaty or statutory rights that could be affected by the decommissioning; and

(B) the EPA, if the licensee proposes to release a site pursuant to K.A.R. 28-35-205b.

(2) Subsequent notifications and solicitations for comments of the entities specified in paragraphs (e)(1)(A) and (B) may be made by the department if the secretary deems these actions to be in the public interest.

(3) The notifications specified in this subsection shall be published in the Kansas register and in a forum, which may consist of a local newspaper, letter to a state or local organization, or other appropriate forum, that is readily accessible to individuals in the vicinity of the site, and solicit comments from affected parties. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-205b. Alternate criteria for license termination. A license shall be terminated by the secretary using alternate criteria greater than the dose criteria specified in K.A.R. 28-35-

205a only if the licensee provides all of the following information:

(a) Evidence that public health and safety and the environment would continue to be protected and that it is unlikely that the dose from all man-made sources combined, other than medical, could be more than the limit of one millisievert per year or 100 mrem per year specified in part 4 of these regulations, by submitting an analysis of the possible sources of exposure;

(b) restrictions, to the extent practical, on site use according to the provisions of K.A.R. 28-35-205a to minimize exposure at the site;

(c) evidence that doses have been reduced to ALARA levels, taking into consideration any detriment, including any traffic accidents that could result from decontamination and waste disposal;

(d) a decommissioning plan indicating the licensee's intent to decommission in accordance with this part and specifying that the licensee proposes to decommission by the use of alternate criteria. The licensee shall document in the decommissioning plan how the advice of individuals and institutions in the community who might be affected by the decommissioning has been sought and addressed, as appropriate, following analysis of that advice. In seeking this advice, the licensee shall provide for the following:

(1) Participation by representatives of a broad cross section of community interests who could be affected by the decommissioning;

(2) an opportunity for comprehensive, collective discussions of the issues by the participants represented; and

(3) a publicly available summary of the results of all the discussions specified in paragraph (d) (2), including a description of the individual viewpoints of the participants on the issues and the extent of agreement and disagreement on the issues among the participants; and

(e) sufficient financial assurance, as specified in K.A.R. 28-35-180b, to enable an independent third party, including a governmental custodian of a site, to assume and carry out the responsibilities for any necessary control and maintenance of the site. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-206. Applicability of decommissioning requirements following license termination. If, after a site has been decommissioned and associated license has been terminated, new information shows that the requirements

specified in these regulations were not met or that the residual radioactivity at the site could result in a significant threat to public health and safety and the environment, then the former licensee shall be required to perform any additional decontamination that is deemed necessary by the secretary. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 4. STANDARDS FOR PROTECTION AGAINST RADIATION

28-35-211. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-211a. Persons to whom the standards apply. (a) Except as specifically provided in other parts of these regulations, these regulations shall apply to persons licensed or registered by the department to receive, possess, use, transfer, or dispose of sources of radiation. The limits in these regulations shall not apply to:

(1) doses due to background radiation;

(2) exposure of patients to radiation for the purpose of medical diagnosis or therapy; or

(3) voluntary participation in medical research programs.

(b) Nothing in these regulations shall be construed as limiting actions that may be necessary to protect health and safety. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Oct. 17, 1994.)

28-35-211b. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; revoked Sept. 20, 1993.)

28-35-211c. (Authorized by and implementing K.S.A. 1993 Supp. 48-1603, 48-1607; effective Oct. 17, 1994; revoked Dec. 30, 2005.)

28-35-211d. Radiation protection programs. (a) Each licensee or registrant shall develop, document, and implement a radiation protection program sufficient to ensure compliance with the provisions of these regulations.

(b) Each licensee or registrant shall use, to the extent practicable, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses and public doses that are as low as is reasonably achievable (ALARA).

(c) To implement the ALARA requirements of this regulation and the requirements in K.A.R. 28-35-214a, each licensee or registrant shall establish a constraint on the air emissions of radioactive material to the environment, excluding radon-222 and its daughters, so that the individual member of the public likely to receive the highest dose is not expected to receive a total effective dose equivalent in excess of 10 mrem (0.1 mSv) per year from these emissions. If a licensee or registrant subject to this requirement exceeds this dose constraint, the licensee or registrant shall report the exceedance as specified in K.A.R. 28-35-230a and shall take appropriate corrective action to ensure against recurrence.

(d) Each licensee or registrant shall, at intervals not to exceed 12 months, review the radiation protection program content and implementation. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-212. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-212a. Occupational dose limits for adults. (a) Each licensee or registrant shall control the occupational dose to individual adults, except for planned special exposures to the following dose limits:

(1) The annual limit shall be the more limiting of either of the following:

(A) The total effective dose equivalent being equal to 0.05 Sv (5 rem); or

(B) the sum of the deep dose equivalent and the committed dose equivalent to any individual organ or tissue other than the lens of the eye being equal to 0.50 Sv (50 rem).

(2) The annual limits to the lens of the eye, to the skin, and to the extremities shall be the following:

(A) An eye dose equivalent of 0.15 Sv (15 rem); and

(B) a shallow dose equivalent of 0.50 Sv (50 rem) to the skin or to any extremity.

(b) Doses received in excess of the annual limits, including doses received during accidents, emergencies, and planned special exposures, shall be subtracted from the limits for planned special exposures that the individual could receive during the current year and during the individual's lifetime.

(c) When the external exposure is determined by measurement with an external personal monitoring device, the deep dose equivalent shall be used in place of the effective dose equivalent, unless the effective dose equivalent is determined by a dosimetry method approved by the secretary. The assigned deep dose equivalent shall be for the portion of the body receiving the highest exposure. The assigned shallow dose equivalent shall be the dose averaged over the contiguous 10 square centimeters of skin receiving the highest exposure.

(1) The deep dose equivalent, eye dose equivalent, and shallow dose equivalent may be assessed from surveys or other radiation measurements for the purpose of demonstrating compliance with the occupational dose limits, if the individual monitoring device was not in the region of highest potential exposure or the results of individual monitoring are unavailable.

(2) If a protective apron is worn by medical fluoroscopists performing special and interventional fluoroscopic procedures and monitoring is conducted as specified in K.A.R. 28-35-217a, the use of weighting factors in determining the effective dose equivalent for external radiation may be approved by the secretary upon receipt of a written request. In no case shall the use of weighting factors be approved unless the request is accompanied by a list of the procedures to be used to ensure that exposures are maintained ALARA and the effective dose equivalent is determined as follows:

(A) If only one individual monitoring device is used and the device is located at the neck outside the protective apron, the reported deep dose equivalent shall be the effective dose equivalent for external radiation.

(B) If only one individual monitoring device is used, the device is located at the neck outside the protective apron, and the reported dose exceeds 25 percent of the limit specified in this regulation, then the reported deep dose equivalent value multiplied by 0.3 shall be the effective dose equivalent for external radiation.

(C) If individual monitoring devices are worn, both under the protective apron at the waist and outside the protective apron at the neck, the effective dose equivalent for external radiation shall be assigned the value of the sum of the deep dose equivalent reported for the individual monitoring device located at the waist under the protective apron multiplied by 1.5 and the deep dose equivalent

lent reported for the individual monitoring device located at the neck outside the protective apron multiplied by 0.04.

(3) All individuals who are associated with the operation of an X-ray system shall be subject to the occupational exposure limits and the requirements for the determination of the doses that are specified in this regulation. In addition, each individual shall meet the following requirements:

(A) When protective clothing or devices are worn on portions of the body and one or more monitoring devices are required, at least one monitoring device shall be utilized as follows:

(i) When an apron is worn, the monitoring device shall be worn at the collar outside of the apron;

(ii) the dose to the device, if one is used, shall be recorded as the whole-body dose based on the maximum dose attributed to any one critical organ, including the gonads, the blood-forming organs, the head and trunk, and the lens of the eye. If more than one device is used and a record is made of the data, each dose shall be identified with the area where the device was worn on the body;

(4) Exposure of a personnel-monitoring device to deceptively indicate a dose delivered to an individual shall be prohibited.

(5) If the individual is exposed during procedures not specifically approved, weighting factors shall not be applied.

(d) Derived air concentration (DAC) and annual limit on intake (ALI) values, in appendix B, table I, published in "appendices to part 4: standards for protection against radiation," which is adopted in K.A.R. 28-35-135a, shall be used to determine the individual's dose and to demonstrate compliance with the occupational dose limits.

(e) Notwithstanding the annual dose limits, the licensee shall limit the soluble uranium intake by an individual to 10 milligrams in a week in consideration of chemical toxicity, in accordance with footnote 3 of appendix B published in "appendices to part 4: standards for protection against radiation," which is adopted in K.A.R. 28-35-135a.

(f) Each licensee or registrant shall reduce the dose that an individual may be allowed to receive in the current year by the amount of occupational dose received while employed by any other person. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005; amended March 18, 2011.)

28-35-212b. Compliance with requirements for summation of external and internal doses. (a) If the licensee or registrant is required to monitor pursuant to both K.A.R. 28-35-217a (a) and (d), the licensee or registrant shall demonstrate compliance with the dose limits by summing external and internal doses.

(1) If the licensee or registrant is required to monitor pursuant to only K.A.R. 28-35-217a(a) or K.A.R. 28-35-217a(d), then the summation shall not be required to demonstrate compliance with the dose limits.

(2) The dose equivalents for the lens of the eye, the skin, and the extremities shall not be included in the summation and shall be subject to separate limits.

(b) Any licensee or registrant may demonstrate compliance with the requirements for summation of external and internal doses pursuant to the following:

(1) Intake by inhalation. If the only intake of radionuclides is by inhalation, the total effective dose equivalent limit shall not be deemed to be exceeded if the sum of the deep dose equivalent divided by the total effective dose equivalent limit, and one of the following, does not exceed one:

(A) The sum of the fractions of the inhalation ALI for each radionuclide;

(B) The total number of derived air concentration-hours (DAC-hours) for all radionuclides divided by 2,000; or

(C) the sum of the calculated committed effective dose equivalents to all significantly irradiated organs or tissues (T) calculated from bioassay data using appropriate biological models and expressed as a fraction of the annual limit. For purposes of this requirement, an organ or tissue shall be deemed to be significantly irradiated if, for that organ or tissue, the product of the weighting factors, w_T , and the committed dose equivalent, $H_{T,50}$, per unit intake is greater than 10 percent of the maximum weighted value of H_{50} .

(2) Intake by oral ingestion. If the occupationally exposed individual receives an intake of radionuclides by oral ingestion greater than 10 percent of the applicable oral ALI, the licensee or registrant shall account for this intake and include it in demonstrating compliance with the limits.

(3) Intake through wounds or absorption through skin. The licensee or registrant shall evaluate and, to the extent practical, account for intakes through wounds or skin absorption. The intake through intact skin is included in the cal-

culution of DAC for hydrogen-3 and shall not be required to be evaluated or accounted for pursuant to this subsection. (Authorized by and implementing K.S.A. 48-1607; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-212c. Determination of external dose from airborne radioactive material.

(a) When determining the dose from airborne radioactive material, the licensee or registrant shall include the contribution to the deep dose equivalent, eye dose equivalent, and shallow dose equivalent from external exposure to the radioactive cloud.

(b) Airborne radioactivity measurements and DAC values shall not be used as the primary means to assess the deep dose equivalent when the airborne radioactive material includes radionuclides other than noble gases or if the cloud of airborne radioactive material is not relatively uniform. The determination of the deep dose equivalent to an individual shall be based upon measurements using instruments or individual monitoring devices. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-212d. Determination of internal exposure.

(a) When assessing the dose used to determine compliance with occupational dose equivalent limits, each licensee or registrant shall, when required pursuant to K.A.R. 28-35-217b, take suitable and timely measurements of any of the following:

(1) Concentrations of radioactive materials in the air in work areas;

(2) quantities of radionuclides in the body;

(3) quantities of radionuclides excreted from the body; or

(4) any combination of the measurements specified in paragraphs (a)(1) through (3).

(b) Unless respiratory protective equipment is used, as specified in K.A.R. 28-35-212g, or the assessment of intake is based on bioassays, the licensee or registrant shall assume that an individual inhales radioactive material at the airborne concentration in which the individual is present.

(c) If specific information on the physical and biochemical properties of the radionuclides taken into the body or the behavior of the material in an individual is known, the licensee or registrant may perform the following:

(1) Use that information to calculate the committed effective dose equivalent, and if used, the

licensee or registrant shall document that information in the individual's record;

(2) before approval of the secretary, adjust the DAC or ALI values to reflect the actual physical and chemical characteristics of airborne radioactive material; and

(3) separately assess the contribution of fractional intakes of class D, W, or Y compounds of a given radionuclide to the committed effective dose equivalent.

(d) If the licensee or registrant chooses to assess intakes of class Y material using the measurements given in paragraph (a)(2) or (3), the licensee or registrant may delay the recording and reporting of the assessments for up to seven months, unless otherwise required by K.A.R. 28-35-229a or K.A.R. 28-35-230a, in order to make additional measurements basic to the assessments.

(e) If the identity and concentration of each radionuclide in a mixture are known, the fraction of the DAC applicable to the mixture for use in calculating DAC-hours shall be either of the following:

(1) The sum of the ratios of the concentration to the appropriate DAC value, from appendix B published in "appendices to part 4: standards for protection against radiation," as adopted in K.A.R. 28-35-135a, for each radionuclide in the mixture; or

(2) the ratio of the total concentration for all radionuclides in the mixture to the most restrictive DAC value for any radionuclide in the mixture.

(f) If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.

(g) If a mixture of radionuclides in air exists, a licensee or registrant may disregard certain radionuclides in the mixture if all of the following conditions are met:

(1) The licensee or registrant uses the total activity of the mixture in demonstrating compliance with the dose limits in K.A.R. 28-35-212b and in complying with the monitoring requirements in K.A.R. 28-35-217a (d).

(2) The concentration of any radionuclide disregarded is less than 10 percent of its DAC.

(3) The total concentration of all of the radionuclides disregarded in the mixture does not exceed 30 percent.

(h) When determining the committed effective dose equivalent, the following information may be considered.

(1) In order to calculate the committed effective dose equivalent, the licensee or registrant may assume that the inhalation of one ALI, or an exposure of 2,000 DAC-hours, results in a committed effective dose equivalent of 0.05 Sv (5 rem) for radionuclides that have their ALIs or DACs based on the committed effective dose equivalent.

(2) For an ALI and the associated DAC determined by the nonstochastic organ dose limit of 0.50 Sv (50 rem), the intake of radionuclides that would result in a committed effective dose equivalent of 0.05 Sv (5 rem), which is the stochastic ALI, is listed in parentheses in appendix B, table I in "appendices to part 4: standards for protection against radiation," as adopted in K.A.R. 28-35-135a. The licensee or registrant may, as a simplifying assumption, use the stochastic ALI to determine the committed effective dose equivalent. However, if the licensee or registrant uses the stochastic ALI, the licensee or registrant shall also demonstrate that the limit in K.A.R. 28-35-212a(1)(B) is met. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-212e. Determination of prior occupational dose. (a) For each individual who could enter the licensee's or registrant's restricted or controlled area and is likely to receive, in a year, an occupational dose requiring monitoring pursuant to K.A.R. 28-35-217a, the licensee or registrant shall perform the following:

(1) Determine the occupational radiation dose received during the current year; and

(2) attempt to obtain the records of lifetime cumulative occupational radiation dose.

(b) Before permitting an individual to participate in a planned special exposure, the licensee or registrant shall determine all of the following:

(1) The internal and external doses from all previous planned special exposures;

(2) all doses in excess of the limits, including the doses received during accidents and emergencies, by the individual; and

(3) all of the lifetime cumulative occupational radiation dose.

(c) In complying with the requirements of this regulation, a licensee or registrant may perform the following:

(1) Accept, as a record of the occupational dose that the individual received during the current year, a written signed statement from the individual, or from the individual's most recent employer

for work involving radiation exposure, that discloses the nature and the amount of any occupational dose that the individual received during the current year;

(2) accept, as the record of the lifetime cumulative radiation dose, an up-to-date record on a form prescribed by the department or an equivalent form, signed by the individual and countersigned by an appropriate official of the most recent employer for work involving radiation exposure, or the individual's current employer, if the individual is not employed by the licensee or registrant; and

(3) obtain reports of the individual's dose equivalent from the most recent employer for work involving radiation exposure, or the individual's current employer, if the individual is not employed by the licensee or registrant, by telephone, telegram, facsimile, electronic mail, or letter. The licensee or registrant shall request a written verification of the dose data if the authenticity of the transmitted report cannot be established.

(d)(1) The licensee or registrant shall record the exposure history on a form prescribed by the department, or on a clear and legible record that includes all the information required on that form. The form or record shall show each period in which the individual received occupational exposure to radiation or radioactive material and shall be signed by the individual who received the exposure. For each period for which the licensee obtains reports, the licensee or registrant shall use the dose shown in the report in preparing the history. For any period in which the licensee or registrant does not obtain a report, the licensee or registrant shall place a notation in the history indicating the periods of time for which data are not available.

(2) A licensee or registrant shall not be required to reevaluate the separate external dose equivalents and internal committed dose equivalents or intakes of radionuclides assessed before January 1, 1994. Although occupational exposure histories obtained and recorded before January 1, 1994 did not include effective dose equivalent, the histories may be used in the absence of specific information on the intake of radionuclides by the individual.

(e) If the licensee or registrant is unable to obtain a complete record of an individual's current and previously accumulated occupational dose, the licensee or registrant shall assume the following:

(1) That, in establishing administrative controls under K.A.R. 28-35-212a(f) for the current year, the allowable dose limit for the individual has been

reduced by 12.5 mSv (1.25 rem) for each quarter for which records were unavailable and the individual was engaged in activities that could have resulted in occupational radiation exposure; and

(2) that the individual is not available for planned special exposures.

(f) Each licensee or registrant shall retain the records of exposure history until the secretary terminates each pertinent license or registration requiring this record. Each licensee or registrant shall retain the information used in preparing records of exposure history for three years after the record is made. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-212f. Planned special exposures.

(a) A licensee or registrant may authorize an adult worker to receive doses in addition to and accounted for separately from the doses received under the limits specified in K.A.R. 28-35-212a.

(b) The authorization of doses under K.A.R. 28-35-212f(a), called planned special exposure, shall only be permitted if each of the following conditions is satisfied.

(1) The licensee or registrant shall authorize a planned special exposure only in an exceptional situation when alternatives that might avoid the higher exposure are unavailable or impractical.

(2) The licensee or registrant, and employer if the employer is not the licensee or registrant, shall specifically authorize the planned special exposure, in writing, before the exposure occurs.

(3) Before a planned special exposure, the licensee or registrant shall ensure that each individual involved is:

(A) informed of the purpose of the planned operation;

(B) informed of the estimated doses and associated potential risks and specific radiation levels or other conditions that might be involved in performing the task; and

(C) instructed in the measures to be taken to keep the dose ALARA considering other risks that may be present.

(4) Prior to permitting an individual to participate in a planned special exposure, the licensee or registrant shall ascertain prior doses as required by K.A.R. 28-35-212e during the lifetime of the individual for each individual involved.

(5) Subject to K.A.R. 28-35-212a(b), the licensee or registrant shall not authorize a planned special exposure that would cause an individual to

receive a dose from all planned special exposures and all doses in excess of the limits to exceed:

(A) the numerical values of any of the dose limits in K.A.R. 28-35-212a in any year; or

(B) five times the annual dose limits in K.A.R. 28-35-212a during the individual's lifetime.

(6) The licensee or registrant shall maintain records of the conduct of a planned special exposure in accordance with K.A.R. 28-35-227g and shall submit a written report in accordance with K.A.R. 28-35-230c.

(7) The licensee or registrant shall record the best estimate of the dose resulting from the planned special exposure in the individual's record and shall inform the individual, in writing, of the dose within 30 days from the date of the planned special exposure. The dose from planned special exposures shall not be considered in controlling future occupational dose of the individual pursuant to K.A.R. 28-35-212a but shall be included in evaluations required by K.A.R. 28-35-212f(b)(4) and (5). (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-212g. Respiratory protection and controls to restrict internal exposure in restricted areas.

(a) Use of process or other engineering controls. The licensee or registrant shall use, to the extent practicable, process or other engineering controls, such as containment or ventilation, to control the concentrations of radioactive material in air.

(b) Use of other controls. When it is not practicable to apply process or other engineering controls to control the concentrations of radioactive material in air to values below those that define an airborne radioactivity area, the licensee or registrant shall, consistent with maintaining the total effective dose equivalent ALARA, increase monitoring and limit intakes by one or more of the following means:

(1) control of access;

(2) limitation of exposure times;

(3) use of respiratory protection equipment; or

(4) other controls.

(c) Use of individual respiratory protection equipment. (1) If the licensee or registrant uses respiratory protection equipment to limit intakes pursuant to K.A.R. 28-35-212g(b), the following conditions shall apply.

(A) Except as provided in K.A.R. 28-35-212g(c)(1)(B), the licensee or registrant shall use only respiratory protection equipment that is tested and

certified or had certification extended by the national institute for occupational safety and health and the mine safety and health administration (NIOSH/MSHA).

(B) If the licensee or registrant wishes to use equipment that has not been tested or certified by the NIOSH/MSHA or has not had certification extended by the NIOSH/MSHA, or for which there is no schedule for testing extended by the NIOSH/MSHA, or for which there is no schedule for testing or certification, the licensee or registrant shall submit an application for authorized use of that equipment, including a demonstration by testing, or a demonstration on the basis of reliable test information, that the material and performance characteristics of the equipment are capable of providing the proposed degree of protection under anticipated conditions of use.

(C) The licensee or registrant shall implement and maintain a respiratory protection program that includes:

(i) air sampling sufficient to identify the potential hazard, permit proper equipment selection, and estimate exposures;

(ii) surveys and bioassays, as appropriate, to evaluate actual intakes;

(iii) testing of respirators for operability immediately prior to each use;

(iv) written procedures regarding selection, fitting, issuance, maintenance, and testing of respirators, including testing for operability immediately prior to each use; supervision and training of personnel; monitoring, including air sampling and bioassays; and recordkeeping; and

(v) determination by a physician prior to initial fitting of respirators, and at least every 12 months thereafter, that the individual user is physically able to use the respiratory protection equipment.

(D) The licensee or registrant shall issue a written policy statement on respirator usage covering:

(i) the use of process or other engineering controls, instead of respirators;

(ii) routine, nonroutine, and emergency use of respirators; and

(iii) length of periods of respirator use and relief from respirator use.

(E) The licensee or registrant shall advise each respirator user that the user may leave the area at any time for relief from respirator use in the event of equipment malfunction, physical or psychological distress, procedural or communication failure, significant deterioration of operating conditions,

or any other conditions that might require such relief; and

(F) the licensee or registrant shall use respiratory protection equipment within the equipment manufacturer's expressed limitations for type and mode of use and shall provide proper visual, communication, and other special capabilities, such as adequate skin protection, when needed.

(2) When estimating exposure of individuals to airborne radioactive materials, the licensee or registrant may make allowance for respiratory protection equipment used to limit intakes pursuant to K.A.R. 28-35-212g(b), provided that the following conditions, in addition to those in K.A.R. 28-35-212g(c)(1), are satisfied.

(A) (i) The licensee or registrant shall select respiratory protection equipment that provides a protection factor, specified in appendix A protection factor for registrant published in "Kansas Department of Health and Environment Appendices to Part 4: Standards for Protection Against Radiation," effective April, 1994, greater than the multiple by which peak concentrations of airborne radioactive materials in the working area are expected to exceed the values specified in appendix B, table I, column 3 published in "Kansas Department of Health and Environment Appendices to Part 4 Standards for Protection Against Radiation," effective April, 1994. However, if the selection of respiratory protection equipment with a protection factor greater than the peak concentration is inconsistent with the goal specified in K.A.R. 28-35-212g(b) of keeping the total effective dose equivalent ALARA, the licensee or registrant may select respiratory protection equipment with a lower protection factor provided that such a selection would result in a total effective dose equivalent that is ALARA.

(ii) The concentration of radioactive material in the air that is inhaled when respirators are worn may be initially estimated by dividing the average concentration in air, during each period of uninterrupted use, by the protection factor. If the exposure is later found to be greater than initially estimated, the corrected value shall be used; if the exposure is later found to be less than initially estimated, the corrected value may be used.

(B) The licensee or registrant shall obtain authorization from the department before assigning respiratory protection factors in excess of those specified in K.A.R. 28-35-232a appendix A. The department may authorize a licensee or registrant

to use higher protection factors on receipt of an application that:

(i) describes the situation for which a need exists for higher protection factors; and

(ii) demonstrates that the respiratory protection equipment provides these higher protection factors under the proposed conditions of use.

(3) In an emergency, the licensee or registrant shall use as emergency equipment only respiratory protection equipment that has been specifically certified or had certification extended for emergency use by the NIOSH/MSHA.

(4) The licensee or registrant shall notify the department in writing at least 30 days before the date that respiratory protection equipment is first used pursuant to either K.A.R. 28-35-212g(1) or (2). (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-213. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-213a. Occupational dose limits for minors. The annual occupational dose limit for a minor shall be 10 percent of the annual occupational dose limits specified for an adult worker in K.A.R. 28-35-212a. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994.)

28-35-213b. Dose to an embryo or fetus.

(a) Each licensee or registrant shall ensure that the dose to an embryo or fetus during the entire pregnancy, due to occupational exposure of a declared pregnant woman, does not exceed 5 mSv (0.5 rem).

(b) Each licensee or registrant shall make efforts to avoid substantial variation above a uniform monthly exposure rate to a declared pregnant woman in order to satisfy the limit in subsection (a).

(c) The dose to an embryo or fetus shall be the sum of the following:

(1) The dose to the embryo or fetus from radionuclides in the embryo or fetus and radionuclides in the declared pregnant woman; and

(2) either of the following doses that is more representative of the dose to the embryo or fetus from external radiation:

(A) If multiple measurements have not been made, assignment of the highest deep dose equivalent for the declared pregnant woman shall be the dose to the embryo or fetus as specified in K.A.R. 28-35-212e; or

(B) if multiple measurements have been made, assignment of the deep dose equivalent for the declared pregnant woman from the individual monitoring device that is most representative of the dose to the embryo or fetus shall be the dose of the embryo or fetus. Assignment of the highest deep dose equivalent for the declared pregnant woman to the embryo or fetus shall not be required unless that dose is also the most representative deep dose equivalent for the region of the embryo or fetus.

(d) If by the time the woman declares pregnancy to the licensee or registrant, the dose to the embryo or fetus has exceeded 4.5 mSv (0.45 rem), the licensee or registrant shall be deemed to be in compliance with subsection (a) if the additional dose to the embryo or fetus does not exceed 0.50 mSv (0.05 rem) during the remainder of the pregnancy. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-214. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-214a. Dose limits for individual members of the public. (a) Each licensee or registrant shall conduct operations so that:

(1) the total effective dose equivalent to individual members of the public from the licensed or registered operation does not exceed 1 mSv (0.1 rem) in a year, exclusive of the dose contribution from the licensee's or registrant's disposal of radioactive material into sanitary sewerage in accordance with K.A.R. 28-35-224a; and

(2) the dose in any unrestricted area from external sources does not exceed 0.02 mSv (0.002 rem) in any one hour.

(b) If the licensee or registrant permits members of the public to have access to controlled areas, the limits for members of the public shall continue to apply to those individuals.

(c) A licensee, registrant, or an applicant for a license or registration may apply for prior department authorization to operate up to an annual dose limit for an individual member of the public of 5 mSv (0.5 rem). This application shall include the following information:

(A) If multiple measurements have not been made, assignment of the highest deep dose equivalent for the declared pregnant woman shall be the dose to the embryo or fetus as specified in K.A.R. 28-35-212e; or

(B) if multiple measurements have been made, assignment of the deep dose equivalent for the declared pregnant woman from the individual monitoring device that is most representative of the dose to the embryo or fetus shall be the dose of the embryo or fetus. Assignment of the highest deep dose equivalent for the declared pregnant woman to the embryo or fetus shall not be required unless that dose is also the most representative deep dose equivalent for the region of the embryo or fetus.

(1) demonstration of the need for and the expected duration of operations in excess of the limit in K.A.R. 28-35-214a(a)(1) or (2);

(2) the licensee's or registrant's program to assess and control dose within the 5 mSv (0.5 rem) annual limit; and

(3) the procedures to be followed to maintain the dose ALARA. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993, amended Oct. 17, 1994.)

28-35-214b. Compliance with dose limits for individual members of the public. (a) The licensee or registrant shall make or cause to be made surveys of radiation levels in unrestricted and controlled areas and radioactive materials in effluents released to unrestricted and controlled areas to demonstrate compliance with the dose limits for individual members of the public in K.A.R. 28-35-214a.

(b) A licensee or registrant shall show compliance with the annual dose limit in K.A.R. 28-35-214a by:

(1) demonstrating by measurement or calculation that the total effective dose equivalent to the individual likely to receive the highest dose from the licensed or registered operation does not exceed the annual dose limit; or

(2) demonstrating that:

(A) the annual average concentrations of radioactive material released in gaseous and liquid effluents at the boundary of the unrestricted area do not exceed the values specified in appendix B, table II published in "Kansas Department of Health and Environment Appendices to Part 4: Standards for Protection Against Radiation," effective April, 1994; and

(B) if an individual were continually present in an unrestricted area, the dose from external sources would not exceed 0.02 mSv (0.002 rem) in an hour and 0.50 mSv (0.05 rem) in a year.

(c) Upon approval from the department, the licensee or registrant may adjust the effluent concentration values in appendix B, table II published in "Kansas Department of Health and Environment Appendices to Part 4: Standards for Protection Against Radiation," effective April, 1994, for members of the public, to take into account the actual physical and chemical characteristics of the effluents, including aerosol size distribution, solubility, density, radioactive decay equilibrium, and chemical form. (Authorized by

and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-215. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-215a. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; revoked Oct. 17, 1994.)

28-35-216. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-216a. Testing for leakage or contamination of sealed sources. (a) Each licensee in possession of any sealed source shall ensure that all of the following requirements are met:

(1) Each sealed source, except as specified in subsection (b), shall be tested for leakage or contamination, and the test results shall be received before the sealed source is put into use, unless the licensee has a certificate from the transferor indicating that the sealed source was tested within six months before transfer to the licensee.

(2) Each sealed source that is not designed to emit alpha particles shall be tested for leakage or contamination at intervals not to exceed six months or at alternative intervals approved by the secretary, an agreement state, a licensing state, or the nuclear regulatory commission.

(3) Each sealed source designed to emit alpha particles shall be tested for leakage or contamination at intervals not to exceed three months or at alternative intervals approved by the secretary, an agreement state, a licensing state, or the nuclear regulatory commission.

(4) For each sealed source required to be tested for leakage or contamination, whenever there is reason to suspect that the sealed source might have been damaged or might be leaking, the licensee shall ensure that the sealed source is tested for leakage or contamination before further use.

(5) Tests for leakage for all sealed sources shall be capable of detecting the presence at 185 Bq (0.005 μ Ci) of radioactive material on a test sample. Test samples shall be taken from the sealed source or from the surfaces of the container in which the sealed source is stored or mounted and on which one might expect contamination to accumulate. For a sealed source contained in a device,

test samples shall be obtained when the source is in the “off” position.

(b) The following sealed sources shall be exempt from testing for leakage and contamination:

(1) Sealed sources containing only radioactive material with a half-life of fewer than 30 days;

(2) sealed sources containing only radioactive material as a gas;

(3) sealed sources containing 3.7 Mbq (100 μ Ci) or less of beta-emitting or photon-emitting material or 370 kBq (10 μ Ci) or less of alpha-emitting material;

(4) sealed sources containing only hydrogen-3;

(5) seeds of iridium-192 encased in nylon ribbon; and

(6) sealed sources, except sources used in radiation therapy, that are stored, are not being used, and are identified as being in storage. The sources exempted from this test shall be tested for leakage before any use or transfer to another person, unless the source has been leak-tested within six months before the date of the use or transfer. The sources in storage shall be physically inventoried every six months and listed in the radioactive materials inventory. Each source in storage shall be tested for leakage at least every 10 years.

(c) Each test for leakage or contamination from sealed sources shall be performed by a person specifically authorized by the secretary, an agreement state, a licensing state, or the nuclear regulatory commission to perform these services.

(d) All test results shall be recorded in units of becquerel or microcurie and maintained for inspection by the department.

(e) If any test reveals the presence of 0.005 microcurie or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause the source to be decontaminated and repaired or to be disposed of in accordance with these regulations. The licensee shall file a report within five days of the test with the radiation control program, Kansas department of health and environment, describing the equipment involved, the test results, and the corrective action taken. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Dec. 30, 2005; amended July 27, 2007; amended March 18, 2011.)

28-35-217. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-217a. Conditions requiring individual monitoring of external and internal occupational dose.

(a) Each licensee or registrant shall monitor exposures from sources of radiation at levels sufficient to demonstrate compliance with the occupational dose limits of these regulations. At a minimum, each licensee or registrant shall monitor occupational exposure to radiation and shall supply and require the use of individual monitoring devices by the following:

(1) Any adult likely to receive, in one year from sources external to the body, a dose in excess of 10 percent of the limits specified in K.A.R. 28-35-212a;

(2) any minor or declared pregnant woman likely to receive, in one year from sources external to the body, a dose in excess of 10 percent of any of the applicable limits specified in K.A.R. 28-35-213a or K.A.R. 28-35-213b; and

(3) any individual entering a high or very high radiation area.

(b) Except as specified in this regulation, each personnel-monitoring device that requires processing to determine the radiation dose and is utilized by the licensee or registrant to comply with this regulation, with other applicable parts of these regulations, or with conditions specified in a license or a registration shall be processed and evaluated by a dosimetry processor accredited by the “national voluntary laboratory accreditation program” of the national institute of standards and technology, and approved in this accreditation process for each type of radiation that most closely approximates each type of radiation for which the individual wearing the dosimeter is monitored.

(c) The requirements of subsection (b) in this regulation shall not apply to personnel-monitoring devices used to measure the dose to hands and forearms or to feet and ankles.

(d) To determine compliance with K.A.R. 28-35-212d, each licensee or registrant shall monitor the occupational intake of radioactive material by and assess the committed effective dose equivalent to the following:

(1) Any adult likely to receive, in one year, an intake in excess of 10 percent of the applicable ALI in appendix B, table I, columns 1 and 2 in “appendices to part 4: standards for protection against radiation,” as adopted in K.A.R. 28-35-135a; and

(2) any minor or declared pregnant woman likely to receive, in one year, a committed effective dose equivalent in excess of 0.50 mSv (0.05 rem). (Authorized by and implementing K.S.A. 48-1607;

effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-217b. General monitoring requirements. (a) Each licensee or registrant shall make, or cause to be made, surveys of each area of use, including the subsurface, that meet the following requirements:

(1) Provide measurements or evaluations demonstrating compliance with these regulations; and

(2) are necessary under the circumstances to evaluate the following:

(A) Radiation and radiological contamination levels;

(B) concentrations or quantities of radioactive material; and

(C) the potential radiological hazards that could be present.

(b) Records from surveys describing the location and amount of subsurface residual radioactivity identified at the facility out to the site boundary shall be kept on file with records required for decommissioning.

(c) Each licensee or registrant shall ensure that instruments and equipment used for quantitative radiation measurements are calibrated at intervals not to exceed 12 months, for the type of radiation measured.

(d) Each licensee or registrant shall ensure that adequate precautions are taken to prevent a deceptive exposure of an individual-monitoring device.

(e) All personnel dosimeters, except for direct and indirect reading pocket ionization chambers and those dosimeters used to measure the dose to the extremities that require processing to determine the radiation dose and are used by licensees to comply with these regulations or with conditions specified in a license, shall be processed and evaluated by a dosimetry processor that meets the following requirements:

(1) Holds current personnel dosimetry accreditation from the national voluntary laboratory accreditation program (NVLAP) of the national institute of standards and technology; and

(2) is accredited for the type of radiation or radiations included in the NVLAP program that most closely approximates the type of radiation or radiations for which the individual wearing the dosimeter is monitored. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended May 4, 2018.)

28-35-218. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-218a. Bioassays. Where necessary or desirable in order to aid in determining the extent of an individual's exposure to concentrations of radioactive material, a licensee may be required by the department, through license provisions or an order, to make available to the individual appropriate bioassay services and to furnish a copy of the reports of those services to the department. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993.)

28-35-219. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-219a. Caution signs and labels. (a) General.

(1) Except as otherwise authorized by the department, the symbol prescribed by this regulation shall use the conventional radiation caution colors, which are magenta, purple, or black on a yellow background. The symbol shall be the conventional three-blade design with the phrases and graphic as follows:

CAUTION (or DANGER)
RADIATION SYMBOL

(A) Cross-hatch area shall be magenta, purple, or black.

(B) Background shall be yellow.

(2) In addition to the contents of signs and labels prescribed in this regulation, any licensee or registrant may provide on or near signs and labels any additional information that is appropriate in aiding individuals to minimize exposure to radiation.

(b) Radiation areas. Each radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the following words:

**CAUTION (or DANGER)
RADIATION AREA**

(c) High radiation areas.

(1) Each high radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the following words:

**CAUTION (or DANGER)
HIGH RADIATION AREA**

(2) Each registrant or licensee shall ensure that the entrance or access point to a high radiation area meets one or more of the following conditions:

(A) Is equipped with a control device that, upon entry into the area, causes the level of radiation to be reduced below that at which an individual might receive a deep dose equivalent of 100 millirems (1.0 mSv) in one hour at 30 centimeters from any surface that the radiation penetrates; or

(B) Is equipped with a control device that energizes a conspicuous visible or audible alarm signal in such a manner that the individual entering the high radiation area and the licensee or a supervisor of the activity is made aware of the entry; or

(C) Is required to be locked except during periods when access to the area is required, with positive control over each individual entry.

(3) The controls required by paragraphs (c)(2) and (d)(2) shall be established so that no individual will be prevented from leaving a high radiation area or a very high radiation area.

(4) If a high radiation area is established for a period of 30 days or less, direct surveillance to prevent unauthorized entry may be substituted for the controls required by paragraph (c)(2) of this regulation.

(5) Any licensee or registrant may apply to the department for approval of methods not included in paragraphs (c)(2), (4), and (6) of this regulation. The proposed alternatives shall be approved by the secretary if the licensee or registrant demonstrates that the alternative methods of control will prevent unauthorized entry into a high radiation area, and that the requirement of paragraph (c)(3) of this regulation is met.

(6) In place of the controls required by this regulation for a high radiation area, the licensee or registrant may substitute continuous direct or electronic surveillance that is capable of preventing unauthorized entry.

(7) The licensee or registrant shall not be required to control each entrance or access point to a room or other area that is a high radiation area solely because of the presence of radioactive materials prepared for transport and packaged and labeled in accordance with the regulations of the U.S. department of transportation if the following conditions are met:

(A) The packages do not remain in the area longer than three days.

(B) The dose rate at one meter from the external surface of any package does not exceed 0.1 mSv (0.01 rem) per hour.

(8) The licensee or registrant shall not be required to control entrance or access to rooms or other areas in hospitals solely because of the presence of patients containing radioactive material if there are personnel in attendance who are taking the necessary precautions to prevent the exposure of individuals to radiation or radioactive material in excess of the established limits in these regulations and to operate within the ALARA provisions of the licensee's or registrant's radiation protection program.

(9) The registrant shall not be required to control entrance or access to rooms or other areas containing sources of radiation capable of producing a high radiation area as described in this regulation if the registrant has met all the specific requirements for access and control specified in other applicable regulations, part 7 for industrial radiography, part 5 for X-rays in the healing arts, and part 9 for particle accelerators.

(d) Very high radiation areas.

(1) Each very high radiation area shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the following words:

**GRAVE DANGER
VERY HIGH RADIATION AREA**

(2) Each registrant or licensee shall institute measures to ensure that an individual is not able to gain unauthorized or inadvertent access to an area in which radiation levels could be encountered at five Gy (500 rad) or more in one hour at one meter from a source of radiation or any surface through which the radiation penetrates. This area is called a very high radiation area.

(A) Paragraph (d)(2) shall not apply to rooms or areas in which diagnostic X-ray systems are the only source of radiation, or to non-self-shielded irradiators.

(B) The registrant or licensee shall not be required to control entrance or access to rooms or other areas containing sources of radiation capable of producing a very high radiation area, as described in this regulation, if the registrant or licensee has met all the specific requirements for access and control specified in part 7 for industrial radiography, part 5 for X-rays in the healing arts, and part 9 for particle accelerators.

(3) Control of access to very high radiation areas; irradiators.

(A) Paragraph (d)(3) shall apply to licensees or registrants with sources of radiation in non-self-shielded irradiators and shall not apply to sources of radiation used in teletherapy, in industrial radiography, or in completely self-shielded irradiators in which the source of radiation is both stored and operated within the same shielding radiation barrier and, in the designed configuration of the irradiator, is always physically inaccessible to any individual and cannot create a high level of radiation in an area that is accessible to any individual.

(B) Each area in which there could exist radiation levels in excess of five Gy (500 rad) in one hour at one meter from a source of radiation that is used to irradiate materials shall be equipped with entry control devices that perform the following:

(i) Function automatically to prevent any individual from inadvertently entering a very high radiation area;

(ii) permit deliberate entry into the area only after a control device is actuated that causes the radiation level within the area, from the source of radiation, to be reduced below that at which it would be possible for an individual to receive a deep dose equivalent in excess of 1 mSv (0.1 rem) in one hour; and

(iii) prevent operation of the source of radiation if the source would produce radiation levels in the area that could result in a deep dose equivalent to an individual in excess of one mSv (0.1 rem) in one hour.

(C) Additional control devices shall be provided so that, upon failure of the entry control devices to function as required in this regulation, both of the following will occur:

(i) The radiation level within the area, from the source of radiation, is reduced below the level at

which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour.

(ii) Conspicuous visible and audible alarm signals are generated to make an individual attempting to enter the area aware of the hazard and at least one other authorized individual who is physically present, familiar with the activity, and prepared to render or summon assistance aware of the failure of the entry control devices.

(D) The licensee or registrant shall provide control devices so that, upon the failure or removal of physical radiation barriers other than the sealed sources shielded storage container, both of the following will occur:

(i) The radiation level from the source of radiation is reduced below the level at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour.

(ii) Conspicuous visible and audible alarm signals are generated to make potentially affected individuals aware of the hazard and to make the licensee, registrant, or at least one other individual who is familiar with the activity and prepared to render or summon assistance aware of the failure or removal of the physical barrier.

(E) If the shield for stored sealed sources is a liquid, the licensee or registrant shall provide the means to monitor the integrity of the shield and to automatically signal the loss of adequate shielding.

(F) Physical radiation barriers that comprise permanent structural components, including walls, that have no credible probability of failure or removal in ordinary circumstances shall not be required to meet the requirements of paragraphs (d)(3)(D) and (E).

(G) Each area shall be equipped with devices that automatically generate conspicuous visible and audible alarm signals to alert personnel in the area before the source of radiation can be put into operation and in time for any individual in the area to operate a clearly identified control device, which shall be installed in the area and which shall prevent the source of radiation from being put into operation.

(H) Each area shall be controlled by the use of any administrative procedures and devices necessary to ensure that the area is cleared of personnel before each use of the source of radiation.

(I) Each area shall be checked by a measurement of the radiation to ensure that, before the first individual's entry into the area after any use

of the source of radiation, the radiation level from the source of radiation in the area is below the level at which it would be possible for an individual to receive a deep dose equivalent in excess of one mSv (0.1 rem) in one hour.

(J) The entry control devices required in paragraph (d)(3) shall be tested for proper functioning.

(i) Testing shall be conducted before initial operation with the source of radiation on any day, unless operations were continued uninterrupted from the previous day.

(ii) Testing shall be conducted before resuming operation of the source of radiation after any unintentional interruption.

(iii) The licensee or registrant shall submit and adhere to a schedule for periodic tests of the entry control and warning systems.

(K) The licensee or registrant shall not conduct operations, other than those necessary to place the source of radiation in safe condition or to effect repairs on controls, unless the control devices are functioning properly.

(L) Entry and exit portals that are used in transporting materials to and from the irradiation area and that are not intended for use by individuals shall be controlled by those devices and administrative procedures necessary to physically protect and warn against inadvertent entry by any individual through these portals. Exit portals for irradiated materials shall be equipped to detect and signal the presence of any loose radioactive material that is carried toward such an exit and automatically to prevent any loose radioactive material from being carried out of the area.

(4) Licensees, registrants, or applicants for licenses or registrations for sources of radiation subject to paragraph (d)(3) that will be used in a variety of positions or in locations including open fields or forests that make it impracticable to comply with certain requirements of this regulation, including those for the automatic control of radiation levels, may apply to the department for approval of alternative safety measures. Alternative safety measures that are at least equivalent to those specified in paragraph (d)(3) shall be provided. At least one of the alternative measures shall include an entry-preventing interlock control based on a measurement of the radiation that ensures the absence of high radiation levels before an individual can gain access to the area where such sources of radiation are used.

(e) Airborne radioactivity areas. Each airborne radioactivity area shall be conspicuously posted

with a sign or signs bearing the radiation caution symbol and the following words:

**CAUTION (or DANGER)
AIRBORNE RADIOACTIVITY AREA**

(f) Additional requirements.

Each area or room in which any radioactive material is used or stored in an amount exceeding 10 times the quantity of radioactive material listed in appendix C in "appendices to part 4: standards for protection against radiation," as adopted by reference in K.A.R. 28-35-135a, shall be conspicuously posted with a sign or signs bearing the radiation caution symbol and the following words:

**CAUTION (or DANGER)
RADIOACTIVE MATERIAL**

(g) Containers.

(1) Except as otherwise provided in this subsection, each container of radioactive material shall bear a durable, clearly visible label identifying the radioactive contents.

(2) Each label required by paragraph (g) (1) shall bear the radiation caution symbol specified in paragraph (a) (1) and the following words:

**CAUTION (or DANGER)
RADIOACTIVE MATERIAL**

Each label shall also provide sufficient information to permit the individuals handling or using the containers, or working in the vicinity of the containers, to take precautions to avoid or minimize exposure. As appropriate, the label information may include radiation levels, description of the contents, an estimate of the activity, and the date for which the activity is estimated.

(3) The labeling required under paragraph (g) (1) of this regulation shall not be required for any of the following:

(A) Containers that do not contain radioactive material in quantities greater than the applicable quantities listed in appendix C in "appendices to part 4: standards for protection against radiation," which is adopted by reference in K.A.R. 28-35-135a;

(B) containers that do not contain radioactive material in concentrations greater than the applicable concentrations listed in appendix B, table I, column 2 in "appendices to part 4: standards for protection against radiation," which is adopted by reference in K.A.R. 28-35-135a;

(C) containers attended by an individual who takes the precautions necessary to prevent the exposure of any individual to radiation or radioac-

tive material in excess of the limits established by these regulations;

(D) containers in transport and packaged and labeled in accordance with the U.S. department of transportation regulations;

(E) containers that are accessible only to individuals authorized to handle or use the containers or to work in the containers' vicinity, if the contents are identified to those individuals by a readily available written record, including containers in water-filled canals, storage vaults, hot cells, and similar locations; or

(F) manufacturing and process equipment, including piping and tanks.

(4) Before disposing of an empty uncontaminated container in an unrestricted area, each licensee shall remove or deface the radioactive material label or otherwise clearly indicate that the container no longer contains radioactive material.

(h) Each radiation machine shall be labeled in a manner cautioning individuals that radiation is produced when the machine is being operated. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-220. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-220a. Exceptions from posting, labeling, and color requirements. (a) Notwithstanding the provisions of K.A.R. 28-35-219, the posting of a caution sign shall not be required in an area or room containing radioactive material for periods of less than eight hours if both of the following conditions are met:

(1) The material is constantly attended during those periods by an individual who takes the precautions necessary to prevent the exposure of any individual to radiation or radioactive material in excess of the limits established in this part.

(2) The area or room is subject to the licensee's or registrant's control.

(b) Notwithstanding the requirements of K.A.R. 28-35-219a, licensees and registrants shall be allowed to label sources, source holders, or device components containing sources of radiation that are subject to high temperatures, with conspicuously etched or stamped radiation caution symbols without a color requirement.

(c) The posting of a caution sign shall not be required in any room or other area in a hospital that is occupied by patients if either of the following occurs:

(1) A patient being treated with a permanent implant could be released from confinement pursuant to part 6.

(2) A patient being treated with a therapeutic radiopharmaceutical could be released from confinement pursuant to part 6.

(d) The posting of a caution sign shall not be required in any room or area because of the presence of a sealed source if the radiation levels at 30 centimeters from the surface of the sealed source or housing do not exceed 0.05 mSv (0.005 rem) per hour.

(e) The posting of a caution sign shall not be required in any room or area because of the presence of radiation machines used solely for diagnosis in the healing arts, dentistry, or podiatry. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-221. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-221a. Procedures for picking up, transporting, receiving, and opening packages. (a)(1) Each licensee or registrant who expects to receive a package containing quantities of radioactive material in excess of the type A quantities specified in K.A.R. 28-35-221b shall meet one of the following requirements:

(A) If the package is to be delivered to the licensee's or registrant's facility by the carrier, make arrangements to receive the package when it is offered for delivery by the carrier; or

(B) if the package is to be picked up by the licensee or registrant at the carrier's terminal, make arrangements to receive notification from the carrier of the arrival of the package, at the time of arrival.

(2) Each licensee or registrant who picks up a package of radioactive material from a carrier's terminal shall pick up the package upon receipt of notification from the carrier of the arrival of the package.

(b) Each licensee or registrant shall ensure that external radiation levels around any package specified in subsection (a) and, if applicable, external

radiation levels around the vehicle transporting the package do not exceed 200 millirems per hour (2 mSv/hr) at any point on the external surface of the package or vehicle at any time during transportation. The transport index shall not exceed 10.

(c)(1) For the purpose of this subsection, “exclusive use” shall have the meaning specified in 10 C.F.R. 71.4, dated January 1, 2015 and hereby adopted by reference.

(2) For each package specified in subsection (a) and transported in exclusive use, radiation levels external to the package may exceed the limits specified in subsection (d) but shall not exceed any of the following:

(A) 200 millirems per hour (2 mSv/hr) on the accessible external surface of the package unless the following conditions are met, in which case the limit shall be 1,000 millirems per hour (10 mSv/hr):

(i) The shipment is made in a closed transport vehicle. For the purposes of this subsection, “closed transport vehicle” shall mean a vehicle or conveyance equipped with a securely attached exterior enclosure that, during normal transportation, restricts the access of unauthorized persons to the cargo space containing a package specified in subsection (a). The enclosure can be either temporary or permanent and, in the case of packaged materials, can be the see-through type that limits access from top, sides, and bottom;

(ii) the package is secured so that its position within the closed transport vehicle remains fixed during transportation; and

(iii) no loading or unloading operations occur between the beginning and end of the transportation;

(B) 200 millirems per hour (2 mSv/hr) at any point on the outer surface of the closed transport vehicle, including the upper and lower surfaces, or for a flatbed-style closed transport vehicle with a personnel barrier, at any point on the vertical planes projected from the outer edges of the closed transport vehicle, on the upper surface of the load, and on the lower external surface of the closed transport vehicle;

(C) 10 millirems per hour (0.1 mSv/hr) at any point two meters from the vertical planes represented by the outer lateral surfaces of the closed transport vehicle, or, in the case of a flatbed-style closed transport vehicle, at any point two meters from the vertical planes projected from the outer edges of the closed transport vehicle; or

(D) two millirems per hour (0.02 mSv/hr) in any normally occupied positions in the closed

transport vehicle, except that this paragraph shall not apply to private motor carriers if each person occupying any of these positions in the closed transport vehicle is provided with a personnel-monitoring device and training in accordance with K.A.R. 28-35-333.

(d) Each licensee or registrant, upon receipt of any package of radioactive material, shall monitor the external surfaces of each package labeled with the U.S. department of transportation radioactive white I or radioactive yellow II or III labels, as specified in 49 C.F.R. 172.403 and 172.436-440, for radioactive contamination caused by leakage of the radioactive contents. Each licensee or registrant shall also monitor for radiation levels of each package containing quantities of radioactive materials that are equal to or more than the type A quantity specified in 10 C.F.R. part 71, appendix A, which is adopted by reference in K.A.R. 28-35-221b. Each licensee or registrant shall monitor each package known to contain radioactive materials for radioactive contamination and radiation levels if there is evidence of degradation of package integrity. The monitoring shall be performed as soon as practicable after receipt, but not later than three hours after the package is received at the licensee’s facility if received during the licensee’s normal working hours or three hours from the beginning of the next working day if received after normal working hours. The licensee or registrant shall immediately notify the final delivery carrier and, by telephone, the department under either of the following conditions:

(1) Removable radioactive surface contamination exceeds the following maximum permissible limits:

Contaminant	Maximum Permissible Limits		
	Bq/cm ²	uCi/cm ²	dpm/cm ²
Beta and gamma emitters and low-toxicity alpha emitters	4	10 ⁻⁴	220
All other alpha-emitting radionuclides	0.4	10 ⁻⁵	22

(2) External radiation levels exceed the limits specified in 10 C.F.R. part 71, appendix A, which is adopted by reference in K.A.R. 28-35-221b.

(e) Each licensee or registrant shall establish and maintain procedures for safely opening packages in which radioactive material is received and shall ensure that these procedures are followed and any special instructions are followed for the type of package being opened.

(f) Each licensee or registrant transferring special form sources in vehicles owned or operated by the licensee or registrant to and from a work site shall be exempt from the contamination monitoring requirements of this regulation. However, the licensee or registrant shall not be exempt from the monitoring requirement in this regulation for measuring radiation levels that ensures that the source is still properly lodged in its shield. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended May 4, 2018.)

28-35-221b. Appendix A; determination of A₁, A₂, and B quantities. The provisions of 10 C.F.R. part 71, appendix A, as in effect on July 13, 2015, are hereby adopted by reference, with the changes specified in this regulation.

(a) Wherever the term “commission” appears within 10 C.F.R. part 71, appendix A, that term shall be replaced with the term “department.”

(b) In 10 C.F.R. part 71, appendix A, paragraph II(c) shall be replaced with the following text: “The licensee shall submit requests for prior approval, described under paragraphs II(a) and II(b) of this appendix, to the department.” (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Oct. 17, 1994; amended May 4, 2018.)

28-35-222. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-222a. Security and control of sources of radiation. (a) Each licensee or registrant shall secure from unauthorized removal or access all licensed or registered sources of radiation that are stored in controlled or unrestricted areas.

(b) Each licensee or registrant shall control, maintain constant surveillance of, and use devices or administrative procedures to prevent the unauthorized use of all licensed or registered radioactive material that is in an unrestricted area and that is not in storage.

(c) Each registrant shall maintain control of radiation machines that are in a controlled or unrestricted area and that are not in storage. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-223. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-223a. Waste disposal; general requirements. (a) A licensee shall not dispose of any radioactive material except by one of the following means:

(1) By transferring the material to an authorized recipient as provided in K.A.R. 28-35-190a;

(2) pursuant to K.A.R. 28-35-214b, 28-35-223a(c)(1), or 28-35-224a; or

(3) by decay in storage.

(b) A person shall be specifically licensed or registered to receive waste containing licensed or registered material from other persons for any of the following:

(1) Treatment before disposal;

(2) treatment or disposal by incineration;

(3) decay in storage;

(4) disposal at a land disposal facility licensed pursuant to these regulations; or

(5) storage until transferred to a storage or disposal facility authorized to receive the waste.

(c)(1) Any person may apply to the secretary for consideration for approval of proposed procedures to dispose of radioactive material in a manner not otherwise authorized in this part. Each applicant shall include a description of the radioactive material, including the following:

(A) The quantities and kinds of radioactive material;

(B) the levels of radioactivity involved; and

(C) the proposed manner and conditions of disposal.

(2) The application, when appropriate, shall also include an analysis and evaluation of pertinent information concerning the following:

(A) A description of the waste containing the licensed or registered material to be disposed of, including the physical and chemical properties that have an impact on risk evaluation, and the proposed manner and conditions of waste disposal;

(B) the nature of the environment, including topographical, geological, meteorological, and hydrological characteristics;

(C) the usage of groundwater and surface waters in the general area;

(D) the nature and location of other potentially affected facilities; and

(E) the procedures to be observed to minimize the risk of unexpected or hazardous exposures.

(3) An application for a license to receive radioactive material from other persons for disposal on land not owned by a state or the federal government shall not be approved by the secretary.

(d)(1) Any licensee may dispose of the following licensed materials without regard to its radioactivity:

(A) 0.05 microcuries (1.850 kBq) or less of hydrogen-3 or carbon-14, per gram of medium used for liquid scintillation counting; and

(B) 0.05 microcuries or less of hydrogen-3 or carbon-14, per gram of animal tissue averaged over the weight of the entire animal. Tissue shall not be disposed of under this regulation in a manner that would permit its use either as food for humans or as animal feed.

(2) This regulation shall not exempt any licensee or registrant from the requirement to maintain records showing the receipt, transfer, and disposal of the radioactive material as specified in K.A.R. 28-35-227c.

(3) This regulation shall not exempt any licensee or registrant from the requirement to comply with other applicable federal, state, and local regulations governing any other toxic or hazardous property of waste materials. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-223b. Waste classification. (a) Classification of waste for near surface disposal. In classifying radiation waste, consideration shall be given to the concentration of long-lived radionuclides (and their shorter-lived precursors) whose potential hazard will persist long after such precautions as institutional controls, improved waste form, and deeper disposal have ceased to be effective. Consideration shall also be given to the concentration of short-lived radionuclides for which requirements on institutional controls, waste form, and disposal methods are efficient.

(b) Classes of waste.

(1) "Class A waste" is waste that is segregated from other waste classes at the disposal site. The physical form and characteristics of class A waste shall meet the minimum requirements set forth in K.A.R. 28-35-223c(a). If class A waste also meets the stability requirements set forth in K.A.R. 28-35-223c(b), the requirement that such wastes be separated shall be waived.

(2) "Class B waste" is waste that must meet

more rigorous requirements as to waste form to insure stability after disposal. The physical form and characteristics of class B waste shall meet both the minimum and stability requirements set forth in K.A.R. 28-35-223c.

(3) "Class C waste" is waste that must meet more rigorous requirements as to waste form to insure stability and that also requires additional measures at the disposal facility to protect against inadvertent intrusion. The physical form and characteristics of class C waste shall meet both the minimum and stability requirements set forth in K.S.A. 28-35-223c.

(4) "Waste that is not generally acceptable for near-surface disposal" is waste for which waste form and disposal methods must be different, and in general more stringent, than those specified for class C wastes. In the absence of specific requirements in this part, proposals for disposal of this waste may be submitted to the department for approval.

(c) Classification determined by long-lived radionuclides. If radioactive waste contains only radionuclides listed in Table 1, classification shall be determined as follows:

(1) If the concentration does not exceed 0.1 times the value in Table 1, the waste shall be assigned to Class A.

(2) If the concentration exceeds 0.1 times the value in Table 1, the waste shall be assigned to Class C.

(3) If the concentration exceeds the value in Table 1, the waste shall not be generally acceptable for near-surface disposal.

(4) For wastes containing mixtures of radionuclides listed in Table 1, the total concentration shall be determined by the sum of fractions rule described in subsection (g) of this regulation.

(d) Classification determined by short-lived radionuclides.

(1) If the radionuclides are not listed in Table 1, classification shall be determined based on the concentrations shown in Table 2. If a radionuclide is not listed in Table 2, it shall not be considered in determining waste classification.

(2) If the concentration does not exceed the value in Column 1 of Table 2, the waste shall be assigned to Class A.

(3) If the concentration exceeds the value in Column 1, Table 2, but does not exceed the value in Column 2, Table 2, the waste shall be assigned to Class B.

Table 1

Radionuclide	Concentration	
	Curies/Cubic Meter	
C-14	8	
C-14 in activated metal	80	
Ni-59 in activated metal	220	
Nb-94 in activated metal	0.2	
Tc-99	3	
Alpha emitting transuranic nuclides with half-life greater than 5 years	100°	
Pu-241	3,500°	
Cm-242	20,000	

*Units are nanocuries per gram

Table 2

Radionuclide	Concentration, Curies/Cubic Meter		
	Column 1	Column 2	Column 3
Total of all nuclides with less than 5 year half-life	700	°°	°°
H-3	40	°°	°°
Co-60	700	°°	°°
Ni-63	3.5	70	700
Ni-63 inactivated metal	35	700	7000
Sr-90	0.04	150	7000
Cs-137	1	44	4600

**There are no limits established for these radionuclides in Class B or Class C wastes. Practical considerations such as the effects of external radiation and internal heat generation on transportation, handling, and disposal will limit the concentrations for these wastes. These wastes shall be Class B unless the concentration of other nuclides in Table 2 independently determine the waste to be Class C.

(4) If the concentration exceeds the value in Column 2, Table 2, but does not exceed the value in Column 3, Table 2, the waste shall be assigned to Class C.

(5) If the concentration exceeds the value in Column 3, the waste is not generally acceptable for near-surface disposal.

(6) For wastes containing mixtures of the nuclides listed in Table 2, the total concentration shall be determined by the sum of fractions rule described in subsection (g) of this regulation.

(e) Classification determined by both long- and short-lived radionuclides. If radioactive wastes contains a mixture of radionuclides, some of which are listed in Table 1, and some of which are listed in Table 2, classification shall be determined as follows:

(1) If the concentration of a nuclide listed in Table 1 is less than 0.1 times the value listed in

Table 1, the class shall be that determined by the concentration of nuclides listed in Table 2.

(2) If the concentration of a nuclide listed in Table 1 exceeds 0.1 times the value listed in Table 1, the waste shall be Class C, if the concentration of nuclides listed in Table 2 does not exceed the value shown in Column 3 of Table 2.

(f) Classification of wastes with radionuclides other than those listed in Tables 1 and 2. If radioactive waste does not contain any nuclides listed in either Table 1 or 2, it shall be assigned to Class A.

(g) The sum of the fractions rule for mixtures of radionuclides. For determining the classification of waste that contains a mixture of radionuclides, it is necessary to determine the sum of fractions by dividing each nuclide's concentration by the appropriate limit and adding the resulting values. The appropriate limits shall all be taken from the same column of the same table. The sum of the fractions for the column shall be less than 1.0 if the waste class is to be determined by that column.

(h) Determination of concentrations in wastes. The concentration of a radionuclide may be determined by indirect methods. Such methods may include use of scaling factors which relate the inferred concentration of one radionuclide to another that is measured, or radionuclide material accountability, if there is reasonable assurance that the indirect methods can be correlated with actual measurements. The concentration of a radionuclide may be averaged over the volume of the waste, or weight of the waste if the units are expressed as nanocuries per gram. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-223c. Waste characteristics. (a)

The following requirements shall be the minimum requirements for all classes of waste:

(1) Radioactive wastes shall be packaged in conformance with the conditions of the license issued to the site operator to which the waste will be shipped. If the conditions of the site license are more restrictive than the provisions of these regulations, the site license conditions shall govern.

(2) Wastes shall not be packaged for disposal in cardboard or fiberboard boxes.

(3) Liquid waste shall be packaged in sufficient absorbent material to absorb twice the volume of the liquid.

(4) Solid wastes containing liquid shall contain as little free standing and non-corrosive liquid as

is reasonably achievable, but in no case shall the liquid exceed 1% of the volume.

(5) Waste shall not be readily capable of detonation or of explosive decomposition or reaction at normal temperatures and pressures, or of explosive reaction with water.

(6) Waste shall not contain, or be capable of generating, quantities of toxic gases, vapors, or fumes harmful to persons transporting, handling, or disposing of the waste. This requirement shall not apply to radioactive gaseous waste packaged in accordance with paragraph (8) of this subsection.

(7) Waste shall not be pyrophoric. Pyrophoric materials contained in wastes shall be treated, prepared, and packaged to be nonflammable.

(8) Wastes in a gaseous form shall be packaged at a pressure that does not exceed 1.5 atmospheres at 20°C. Total activity shall not exceed 100 curies per container.

(9) Wastes containing hazardous, biological, pathogenic, or infectious material shall be treated to reduce, to the maximum extent practicable, the potential hazard from the non-radiological materials.

(b) The requirements in this section are intended to provide stability of the waste:

(1) Waste shall have structural stability. A structurally stable waste form shall maintain its physical dimensions and its form, under the expected disposal conditions. Such proposed conditions may include weight of overburden and compaction equipment, the presence of moisture, and microbial activity, and internal factors, including radiation effects and chemical changes. Structural stability may be provided by the waste form itself, by processing the waste to a stable form, or by placing the waste in a disposal container or structure that provides stability after disposal.

(2) Notwithstanding the provisions of K.A.R. 28-35-223c(a)(2) and (3), liquid wastes, or wastes containing liquid, shall be converted into a form that contains as little free-standing and noncorrosive liquid as reasonably achievable. In no case shall the liquid exceed 1% of the volume of the waste when the waste is in a disposal container designed to ensure stability, or 0.5% of the volume of the waste for waste processed to a stable form.

(3) Void spaces within the waste and between the waste and its package shall be reduced to the extent practicable. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-223d. Labeling. Each package of waste must be clearly labeled to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with K.A.R. 28-35-223b. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986.)

28-35-224. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-224a. Disposal by release into sanitary sewage systems. (a) A licensee shall not discharge radioactive material into a sanitary sewage system unless the following requirements are met:

(1) The radioactive material shall be readily soluble or readily dispersible biological material, in water.

(2) The quantity of any radioactive material released into the system by the licensee in any month shall not exceed the quantity that, if diluted by the average monthly quantity of sewage released into the sewer by the licensee, would result in an average concentration no greater than the limits specified in appendix B, table III, as published in "appendices to part 4: standards for protection against radiation," which is adopted by reference in K.A.R. 28-35-135a.

(3) If more than one radionuclide is released, the following additional requirements shall be satisfied.

(A) The licensee or registrant shall determine the fraction of the limit in appendix B, table III, as published in "appendices to part 4: standards for protection against radiation" and adopted in K.A.R. 28-35-135a, represented by discharges into sanitary sewerage by dividing the actual monthly average concentration of each radionuclide released by the licensee or registrant into the sewer by the concentration of that radionuclide listed in appendix B, table III, as published in "appendices to part 4: standards for protection against radiation."

(B) The sum of the fractions for each radionuclide required by paragraph (a)(3)(A) shall not exceed one.

(4) The total quantity of licensed or registered radioactive material that the licensee or registrant releases into the sanitary sewerage in a year shall not exceed 185 Gbq (5 Ci) of hydrogen-3, 37 Gbq (1 Ci) of carbon-14, and 37 Gbq (1 Ci) of all other radioactive materials combined.

(b) A licensee shall not discharge radioactive material into an individual sewage disposal system used for the treatment of waste water serving only a single dwelling, office building, industrial plant, or institution except as specifically approved by the secretary pursuant to K.A.R. 28-35-214a and 28-35-223a(c).

(c) Excreta from individuals undergoing medical diagnosis or therapy with radioactive material shall be exempt from any limitations contained in this regulation. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-225. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-225a. Disposal by burial in soil. A licensee shall not dispose of radioactive material by burial in soil except as specifically approved by the department pursuant to K.A.R. 28-35-223a(c). (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994.)

28-35-225b. Disposal of certain radioactive material. The provisions of 10 CFR 20.2008, as in effect on October 1, 2007, are hereby adopted by reference. (Authorized by and implementing K.S.A. 48-1607; effective March 18, 2011.)

28-35-226. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-226a. Disposal by incineration. A licensee shall not incinerate radioactive material for the purpose of disposal or preparation for disposal, except as specifically approved by the department pursuant to K.A.R. 28-35-223a(c). (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994.)

28-35-227. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-227a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective,

T-85-43, Dec. 19, 1984; effective May 1, 1985; revoked Oct. 17, 1994.)

28-35-227b. General provisions. (a) Each licensee or registrant shall use the SI units becquerel, gray, sievert and coulomb per kilogram, or the special unit curie, rad, rem, and roentgen, including multiples and subdivisions, and shall clearly indicate the units of all quantities on records required by these regulations.

(b) Each licensee or registrant shall make a clear distinction among the quantities entered on the records required by these regulations, including total effective dose equivalent, total organ dose equivalent, shallow dose equivalent, eye dose equivalent, deep dose equivalent, or committed effective dose equivalent. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-227c. Records of radiation protection programs. (a) Each licensee or registrant shall maintain records of the radiation protection program, including:

- (1) the provisions of the program; and
- (2) audits and other reviews of program content and implementation.

(b) The licensee or registrant shall retain the records required by K.A.R. 28-35-227c(a)(1) until the department terminates each pertinent license or registration requiring the record. The licensee or registrant shall retain the records required by K.A.R. 28-35-227c(a)(2) for three years after the record is made. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-227d. Records of surveys. (a) Each licensee or registrant shall maintain records showing the results of surveys and calibrations required by K.A.R. 28-35-217b and K.A.R. 28-35-221a(b). Each licensee or registrant shall retain each of these records for three years after the record is made.

(b) Each licensee or registrant shall retain each of the following records until the secretary terminates each pertinent license or registration requiring the record:

- (1) Records of the results of surveys to determine the dose from external sources of radiation used, in the absence of or in combination with individual monitoring data, in the assessment of individual dose equivalents;

- (2) records of the results of measurements and calculations used to determine individual intakes

of radioactive material and used in the assessment of internal dose;

(3) records showing the results of air sampling, surveys, and bioassays required pursuant to K.A.R. 28-35-212g; and

(4) records of the results of measurements and calculations used to evaluate the release of radioactive effluents to the environment. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-227e. Records of tests for leakage or contamination of sealed sources. A record of each test for leakage or contamination of sealed sources shall be kept in units of becquerel or microcurie and maintained for inspection by the department for five years after the record is made. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-227f. Records of prior occupational dose. Each licensee or registrant shall retain the records of prior occupational dose and exposure history as specified in K.A.R. 28-35-212e on a form approved by the department, until the department terminates each pertinent license requiring this record. Each licensee or registrant shall retain each of the records used in preparing this form for three years after the record is made. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-227g. Records of planned special exposures. (a) For each use of the provisions of K.A.R. 28-35-212f for planned special exposures, each licensee or registrant shall maintain records that describe the following:

(1) The exceptional circumstances requiring the use of a planned special exposure;

(2) the name of the management official who authorized the planned special exposure and a copy of the signed authorization;

(3) any actions that were necessary;

(4) the reason why the actions were necessary;

(5) the precautions that were taken to ensure that doses were maintained ALARA;

(6) the expected individual and collective doses; and

(7) the doses actually received in the planned special exposure.

(b) Each licensee or registrant shall retain the records of a planned special exposure until the department terminates each pertinent license or registration requiring these records. (Authorized

by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-227h. Records of individual monitoring results. (a) Each licensee or registrant shall maintain records of the doses received by all individuals for whom monitoring was required pursuant to K.A.R. 28-35-217a and records of the doses received during planned special exposures, accidents, and emergency conditions. Assessments of dose equivalent and records made using units in effect before January 1, 1994 shall not be required to be changed. These records shall include the following, when applicable:

(1) The deep dose equivalent to the whole body, eye dose equivalent, shallow dose equivalent to the skin, and shallow dose equivalent to the extremities;

(2) the estimated intake of radionuclides;

(3) the committed effective dose equivalent assigned to the intake of radionuclides;

(4) the specific information used to calculate the committed effective dose equivalent pursuant to K.A.R. 28-35-212d(c);

(5) the total effective dose equivalent when required by K.A.R. 28-35-212b; and

(6) the total of the deep dose equivalent and the committed dose to the organ receiving the highest total dose.

(b) Each licensee or registrant shall make entries of the records specified in subsection (a) at least annually.

(c) Each licensee or registrant shall maintain the records specified in subsection (a) either on a form approved by the department and in accordance with the instructions from the department or in clear and legible records containing all the information required by the department-approved form.

(d) Each licensee or registrant shall maintain the records of dose to each embryo or fetus with the records of dose to the declared pregnant woman. The declaration of pregnancy, including the estimated date of delivery, shall also be kept on file, but may be maintained separately from the dose records.

(e) Each licensee or registrant shall retain each required form or record until the department terminates each pertinent license or registration requiring the record. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-227i. Records of dose to individual members of the public. (a) Each licensee or registrant shall maintain records sufficient to demonstrate compliance with the dose limit for individual members of the public.

(b) The licensee or registrant shall retain the records required by K.A.R. 28-35-227i(a) until the department terminates each pertinent license or registration requiring the record. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-227j. Records of waste disposal. (a) Each licensee or registrant shall maintain records of the disposal of licensed or registered materials made pursuant to K.A.R. 28-35-223a, 28-35-223e, 28-35-224a, 28-35-225a, or 28-35-226a, and disposal by burial in soil, including burials authorized by these regulations before May 1, 1986.

(b) Each licensee or registrant shall retain the records required by subsection (a) until the secretary terminates each pertinent license or registration requiring the record. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-227k. Records of testing entry control devices for very high radiation areas. (a) Each licensee or registrant shall maintain records of tests made pursuant to K.A.R. 28-35-219a(d)(3)(J) on entry control devices for very high radiation areas. These records shall include the date, time, and results of each test of function.

(b) The licensee or registrant shall retain the records required by K.A.R. 28-35-227k(a) for three years after the record is made. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-227l. Form of records. (a) Each record required by these regulations shall be legible throughout the specified retention period.

(1) The record shall be the original or a reproduced copy or a microform, provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period.

(2) The record may be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period.

(b) Records, including documents, letters, drawings, and specifications, shall include all per-

tinent information, including any stamps, initials, and signatures.

(c) The licensee shall maintain adequate safeguards against tampering with and loss of records. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-228. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-228a. Reports of theft or loss of sources of radiation. (a) Each licensee or registrant shall report by telephone, telegraph, electronic mail, or facsimile to the department the theft or loss of the following sources of radiation immediately after the occurrence becomes known to the licensee or registrant:

(1) Stolen, lost, or missing licensed or registered radioactive material in an aggregate quantity equal to or greater than 1,000 times the quantity specified in appendix C in "appendices to part 4: standards for protection against radiation," as adopted by reference in K.A.R. 28-35-135a, if an exposure could result to individuals in unrestricted areas; or

(2) a stolen, lost, or missing radiation machine.

(b) The licensee or registrant shall also submit a report, in writing, within 30 days after learning of stolen, lost, or missing sources of radiation described in paragraph (a)(1) or (2).

(c) The licensee or registrant shall submit a report, in writing, within 30 days after learning of any stolen, lost, or missing licensed or registered radioactive material in an aggregate quantity greater than 10 times the quantity specified in appendix C in "appendices to part 4: standards for protection against radiation" that is still missing.

(d) Each licensee or registrant required to make a report pursuant to this regulation shall, within 30 days after making the telephone, telegraph, electronic mail, or facsimile report, submit a written report to the department that provides all of the following information:

(1) A description of the licensed or registered source of radiation involved, including, for radioactive material, the kind, quantity, and chemical and physical form and, for radiation machines, the manufacturer, model and serial numbers, and the type and maximum energy of radiation emitted;

(2) a description of the circumstances under which the loss or theft occurred;

(3) a statement of the disposition, or probable disposition, of the licensed or registered source of radiation involved;

(4) for any exposure of an individual to radiation, the circumstances under which the exposure occurred and the possible total effective dose equivalent to individuals in unrestricted areas;

(5) the actions that have been taken, or will be taken, to recover the source of radiation; and

(6) the procedures or measures that have been, or will be, adopted to ensure against a recurrence of the loss or theft of licensed or registered sources of radiation.

(e) After filing the written report, the licensee or registrant shall also report to the department, within 30 days of the date on which the information becomes available, any substantive additional information on the theft or loss that becomes available.

(f) Each licensee or registrant shall prepare any report filed with the department pursuant to this regulation so that the names of individuals who could have received exposure to radiation are stated in a separate and detachable portion of the report. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-229. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-229a. Notification of incidents.

(a) Immediate notification. Each licensee or registrant shall immediately notify the department by telephone, telegraph, mailgram or facsimile of any incident involving any source of radiation possessed by the licensee or registrant which may have caused or threatens to cause:

(1) (A) a total effective dose equivalent to any individual of 25 rems (250 mSv) or more of radiation;

(B) an eye dose equivalent to any individual of 75 rems (.75 Sv) or more of radiation; or

(C) a shallow dose equivalent to the skin or extremities or a total organ dose equivalent to any individual of 250 rad (2.5 Gy) or more of radiation; or

(2) the release of radioactive material, inside or outside of a restricted area, so that, had an individual been present for 24 hours, the individual

could have received an intake five times the occupational ALI. This provision does not apply to locations where personnel are not normally stationed during routine operations, such as hot-cells or process enclosures.

(b) Twenty-four hour notification. Each licensee or registrant shall, within 24 hours of the discovery of the event notify the department by telephone, telegraph, mailgram or facsimile of any incident involving any source of radiation possessed by the licensee or registrant which may have caused or threatens to cause:

(1) (A) a total effective dose equivalent to any individual exceeding five rems (50 mSv);

(B) an eye dose equivalent exceeding 15 Rem (0.15 Sv); or

(C) a shallow dose equivalent to the skin or to the extremities or a total organ dose equivalent exceeding 50 Rem (0.5 Sv); or

(2) the release of radioactive material, inside or outside of a restricted area, so that, had an individual been present for 24 hours, the individual could have received an intake in excess of one occupational ALI. This provision shall not apply to locations where personnel are not normally stationed during routine operations, such as hot-cells or process enclosures.

(c) Each report filed with the department pursuant to this regulation shall be prepared in such a manner that names of individuals who have received excessive doses are stated in a separate and detachable portion of the report.

(d) The provision of K.A.R. 28-35-229a shall not apply to doses that result from planned special exposures, provided such doses are within limits for planned special exposures and are reported pursuant to K.A.R. 28-35-230c. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994.)

28-35-230. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-230a. Reports of overexposures and excessive levels and concentrations. (a) In addition to any notification required by K.A.R. 28-35-229a, each licensee or registrant shall submit a report to the department, in writing, within 30 days of learning of any of the following occurrences:

(1) Each exposure of an individual to radiation in excess of the applicable standards in K.A.R. 28-35-212a, K.A.R. 28-35-213a, K.A.R. 28-35-213b, K.A.R. 28-35-214a, or the license;

(2) each exposure of an individual to radioactive material in excess of the applicable limits in K.A.R. 28-35-212b (a)(1), K.A.R. 28-35-212b (a)(2), K.A.R. 28-35-213a, K.A.R. 28-35-213b, or K.A.R. 28-35-214a or in the license;

(3) each incident in which levels of radiation or concentrations of radioactive material in a restricted area exceeded any other applicable limit in the license;

(4) any incident for which notification is required by K.A.R. 28-35-229a; and

(5) each incident in which levels of radiation or concentrations of radioactive material in an unrestricted area exceeded 10 times any applicable limit set forth in this part or in the license, whether or not involving excessive exposure of any individual.

(6) For licensees subject to the provisions of the U.S. environmental protection agency's generally applicable environmental radiation standards in 40 CFR part 190, levels of radiation or releases of radioactive material in excess of those standards, or of license conditions related to those standards.

(b) Each report required under this regulation shall describe the extent of exposure of individuals to radiation or to radioactive material, including the following:

(1) The estimate of each individual's dose;

(2) the levels of radiation and concentrations of radioactive material involved;

(3) the cause of the exposure or excessive levels or concentrations; and

(4) the corrective steps taken or planned to ensure against a reoccurrence.

(c) Each report filed with the department under this regulation shall include for each individual exposed the individual's name, social security number, and date of birth, and an estimate of the individual's dose. With respect to the limit for the embryo or fetus specified in K.A.R. 28-35-213b, the identifiers shall be those of the declared pregnant woman. The report shall be prepared so that the identifier are stated in a separate and detachable part of the report. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-230b. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Sept. 20, 1993; amended Oct. 17, 1994; revoked Dec. 30, 2005.)

28-35-230c. Reports of planned special exposures. The licensee or registrant shall submit a written report to the department within 30 days following any planned special exposure conducted in accordance with K.A.R. 28-35-212f, which shall inform the department that a planned special exposure was conducted, indicate the date the planned special exposure occurred and contain the information required by K.A.R. 28-35-227g. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-230d. (Authorized by and implementing K.S.A. 48-1607; effective Oct. 17, 1994; amended Dec. 30, 2005; revoked May 4, 2018.)

28-35-230e. Notifications and reports to individuals. (a) When a licensee or registrant is required pursuant to K.A.R. 28-35-230a to report to the department any exposure of an individual to radiation or radioactive material, the licensee or registrant shall also notify the individual.

(b) Notice to the individual shall be transmitted at a time not later than the transmittal to the department, and shall comply with the provisions of K.A.R. 28-35-334 of these regulations. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-230f. Reports of leaking or contaminated sealed sources. If a test for leakage or contamination pursuant to K.A.R. 28-35-216a indicates a sealed source is leaking or contaminated, a report of the test shall be filed within five days with the department describing the equipment involved, the test results and the corrective action taken. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective Oct. 17, 1994.)

28-35-230g. Reports of transactions involving nationally tracked sources. (a) Each licensee who manufactures a nationally tracked source shall submit a report on each nationally tracked source containing the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the manufacturer, the model, and the serial number of the source;

(4) the radioactive material in the source;

(5) the initial source strength in becquerels or curies at the time of manufacture; and

(6) the manufacture date of the source.

(b) Each licensee that transfers a nationally tracked source to another person shall submit a report on each nationally tracked source containing the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the name and license number of the recipient facility and the shipping address;

(4) the manufacturer, the model, and the serial number of the source or, if not available, other information to uniquely identify the source;

(5) the radioactive material in the source;

(6) the initial or current source strength, in becquerels or curies;

(7) the date for which the source strength is reported;

(8) the shipping date;

(9) the estimated arrival date; and

(10) for nationally tracked sources transferred as waste under a uniform low-level radioactive waste manifest, the waste manifest number and the container identification.

(c) Each licensee that receives a nationally tracked source shall submit a report on each nationally tracked source containing the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the name, address, and license number of the person that provided the source;

(4) the manufacturer, the model, and the serial number of the source or, if not available, other information to uniquely identify the source;

(5) the radioactive material in the source;

(6) the initial or current source strength, in becquerels or curies;

(7) the date for which the source strength is reported;

(8) the date of receipt; and

(9) for material received under a uniform low-level radioactive waste manifest, the waste manifest number and the container identification.

(d) Each licensee that disassembles a nationally

tracked source shall submit a report on each nationally tracked source containing the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the manufacturer, the model, and the serial number of the source or, if not available, other information to uniquely identify the source;

(4) the radioactive material in the source;

(5) the initial or current source strength, in becquerels or curies;

(6) the date for which the source strength is reported; and

(7) the date on which the source was disassembled.

(e) Each licensee who disposes of a nationally tracked source shall submit a report on each nationally tracked source containing the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the waste manifest number;

(4) the container identification;

(5) the date of disposal; and

(6) the method of disposal.

(f) The reports required in subsections (a) through (e) shall be submitted by the close of the next business day after the transaction. A single report may be submitted for multiple sources and transactions. The reports shall be submitted to the nuclear regulatory commission's national source tracking system by one of the following means:

(1) The nuclear regulatory commission's on-line national source tracking system;

(2) electronic transmission, using a computer-readable format;

(3) facsimile;

(4) mail, sent to the address specified on the nuclear regulatory commission's national source tracking transaction report form; or

(5) telephone, with follow-up by facsimile or mail.

(g) Each licensee shall correct any error in previously filed reports or file a new report for any missed transaction within five business days of the discovery of the error or missed transaction. These errors can be detected by methods that may include administrative reviews or physical inventories required by these regulations.

(h) Each licensee shall reconcile the inventory of nationally tracked sources possessed by the licensee against that licensee's data in the national source tracking system. The reconciliation shall be conducted during the month of January in each year. The reconciliation process shall include resolving any discrepancies between the national source tracking system and the actual inventory by filing the reports required by subsections (a) through (e). Each licensee shall submit, to the national source tracking system, confirmation that the data in the national source tracking system is correct. This confirmation shall be submitted on or before January 31 of each year.

(i) Each licensee that possesses category 1 nationally tracked sources shall report its initial inventory of category 1 nationally tracked sources to the national source tracking system on or before November 15, 2007. Each licensee that possesses category 2 nationally tracked sources shall report its initial inventory of category 2 nationally tracked sources to the national source tracking system on or before November 30, 2007. The information may be submitted by using any of the methods specified in subsection (f). The initial inventory report shall include the following information:

(1) The name, address, and license number of the reporting licensee;

(2) the name of the individual preparing the report;

(3) the manufacturer, model, and serial number of each nationally tracked source or, if not available, other information to uniquely identify the source;

(4) the radioactive material in the sealed source;

(5) the initial or current source strength in becquerels or curies; and

(6) the date for which the source strength is reported.

(j) Compliance with the reporting requirements of this regulation shall be required on or before November 15, 2007 for category 1 sources and on or before November 30, 2007 for category 2 sources. (Authorized by and implementing K.S.A. 48-1607; effective July 27, 2007.)

28-35-231. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-231a. Vacating installations. (a) Notification. Each licensee, before vacating any

installation that could have been contaminated by radioactive material as a result of the licensee's activities, shall notify the department in writing of the intent to vacate, at least 30 days before vacating. Any licensee may be required by the secretary to decontaminate, or have decontaminated, the installation to a degree consistent with subsequent use as an uncontrolled area.

(b) Decommissioning timeliness.

(1) Each licensee in possession of a nonexempt source of radiation who decides to terminate all activities involving that source of radiation shall notify the department immediately, in writing.

(2) Each licensee responsible for a facility or site that includes a nonexempt source of radiation or that could be contaminated by residual radioactivity shall notify the department, in writing, of the intent to vacate, at least 30 days before vacating or relinquishing possession or control of the facility or site.

(3) Each licensee shall notify the department, in writing, within 60 days of the occurrence of any of the following:

(A) The licensee has decided to permanently cease principal operations at the entire site or in any separate building or outdoor area with residual radioactivity that renders the building or outdoor area unsuitable for uncontrolled use in accordance with these regulations.

(B) No principal operations under the license have been conducted during the previous 24 months.

(C) No principal operations have been conducted during the previous 24 months in any separate building or outdoor area with residual radioactivity that renders the building or outdoor area unsuitable for uncontrolled use in accordance with these regulations.

(4) From the date of notification of the department as required in subsections (a) and (b) of this regulation, the licensee shall perform either one of the following:

(A) Begin decommissioning activities; or

(B) within 12 months of notification, submit a decommissioning plan, if required by K.A.R. 28-35-204, and begin decommissioning upon the approval of that plan.

(5) Coincident with the notification of the department required in subsections (a) and (b) of this regulation, the licensee shall maintain in effect all decommissioning financial assurances established by the licensee in conjunction with a license issuance or renewal or as required by

this part. The amount of the financial assurance shall be increased, or may be decreased, in order to cover the detailed cost estimate for decommissioning, as specified in K.A.R. 28-35-204.

(6) An alternate schedule may be approved by the secretary for the submission of plans and for the completion of decommissioning required by this regulation if the secretary determines that both of the following conditions are met:

(A) An alternative schedule is necessary to effectively conduct decommissioning.

(B) An alternative schedule either presents no undue risks to public health and safety or is otherwise in the public interest.

The schedule for decommissioning shall not commence until the secretary has made a determination on the request. (Authorized by and implementing K.S.A. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Dec. 30, 2005.)

28-35-231b. (Authorized by and implementing K.S.A. 1993 Supp. 48-1607; effective, T-86-37, Dec. 11, 1985; effective May 1, 1986; amended Sept. 20, 1993; amended Oct. 17, 1994; revoked Dec. 30, 2005.)

28-35-231c. Transfer for disposal; manifests. The provisions of 10 CFR 20.2006 as in effect on October 1, 2007, including appendix G to 10 CFR part 20 as in effect on November 16, 2005, are hereby adopted by reference. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended March 18, 2011.)

28-35-232. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-232a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; revoked Oct. 17, 1994.)

28-35-233. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-233a. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; revoked Oct. 17, 1994.)

28-35-234. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-234a. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective, T-85-43, Dec. 19, 1984; effective May 1, 1985; amended Sept. 20, 1993; revoked Oct. 17, 1994.)

PART 5. USE OF X-RAYS IN THE HEALING ARTS

28-35-241. Applicability. This part shall establish requirements for the diagnostic use of X-rays in medicine, dentistry, osteopathy, chiropractic, podiatry, and veterinary medicine. The provisions of this part shall be in addition to, and not in substitution for, the other applicable provisions of these regulations. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended Dec. 30, 2005.)

28-35-242. General requirements. (a) Waiver of requirements. Compliance with the specific requirements of these regulations relative to an existing machine or installation may be waived by the secretary if the registrant provides an alternative to the requirement that provides radiation protection equal to that prescribed in part 4 of these regulations.

(b) Responsibility to meet requirements. A person shall not make, sell, lease, transfer, lend, or install X-ray or fluoroscopic equipment, or the supplies used in connection with this equipment, unless both of the following conditions are met:

(1) Those supplies and equipment, when properly placed in operation and properly used, will meet the requirements of parts 1, 4, and 5 and the applicable regulations under parts 7, 8, and 10 of these regulations.

(2) The person delivers, if applicable, cones or collimators, filters, appropriate timers, and fluoroscopic shutters.

(c) Limitations on human use. An individual shall not be exposed to the useful beam, unless the exposure is for healing arts purposes and each exposure has been authorized by one of the following:

(1) A licensed practitioner of the healing arts;

(2) a physician assistant licensed by the state board of healing arts, when working under the supervision and direction of a person licensed to practice medicine or surgery;

(3) an advanced registered nurse practitioner who holds a certificate of qualification from the state board of nursing, when working under the

supervision and direction of a person licensed to practice medicine or surgery; or

(4) an individual licensed to practice dentistry or podiatry within the authority granted to the individual by Kansas licensing laws applying to dentists and podiatrists.

(d) Prohibited uses. Deliberate exposure for the following purposes shall be specifically prohibited:

(1) Exposure of an individual for patient positioning, training, demonstration, or other purposes, unless a healing arts purpose exists and a proper prescription has been provided; and

(2) exposure of an individual for the purpose of healing arts screening without the prior written approval of the department, except mammography screening, if the facility is certified to perform mammography by the food and drug administration. Each person requesting approval for healing arts screening shall submit the information outlined in K.A.R. 28-35-255. Each person requesting approval for a healing arts screening shall notify the department within 30 days if any of the information submitted becomes invalid or outdated. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; amended Sept. 20, 1993; amended Dec. 30, 2005; amended March 18, 2011.)

28-35-242a. Administrative requirements. (a) Radiation safety requirements. Each registrant shall be responsible for directing the operation of each X-ray system under the registrant's administrative control. The registrant or the registrant's agent shall ensure that the requirements of this part, which shall include the following requirements, are met.

(1) An X-ray system not meeting the provisions of these regulations shall not be operated for diagnostic purposes.

(2) Each individual who operates any X-ray system shall be instructed in the safe operating procedures and shall be competent in the safe use of the equipment. This instruction shall include the relevant topics specified in K.A.R. 28-35-256. Any combination of interview, observation, and testing may be used by the secretary to determine compliance. Each individual that operates an X-ray system shall be licensed if required by the board of healing arts.

(3) A chart shall be made available to the operator of each diagnostic X-ray system that specifies, for each examination performed with the system, the following information:

(A) The technique factors to be utilized, taking into account the patient's body part and anatomical size, body part thickness, and age;

(B) the type and size of the film or film-screen combination to be used;

(C) the type and focal distance of the grid to be used, if any;

(D) the source-image receptor distance to be used, except for dental intraoral radiography; and

(E) the type and placement of patient shielding to be used.

(4) The registrant of a facility shall create and make available to all X-ray operators written safety procedures, including patient holding procedures and any restrictions on the operating techniques required for the safe operation of the particular X-ray system. The registrant shall ensure that the operator demonstrates familiarity with these procedures.

(5) Except for patients who cannot be moved out of the room, only the staff, ancillary personnel, and any other individuals required for the medical procedure or training shall be in the room during the radiographic exposure. All of the following requirements shall be met for each individual other than the patient being examined:

(A) Each individual shall be positioned so that no part of the body will be struck by the useful beam unless the body part is protected by not less than 0.5 millimeter of lead-equivalent material.

(B) The X-ray operator, other staff, ancillary personnel, and all other individuals required for the medical procedure shall be protected from the direct scattered radiation by protective aprons or whole-body protective barriers of not less than 0.25 millimeter of lead-equivalent material.

(C) All human patients who cannot be removed from the room shall be protected from the direct scattered radiation by whole-body protective barriers of not less than 0.25 millimeter of lead-equivalent material or shall be positioned so that the nearest portion of the body is at least two meters from both the tube head and the nearest edge of the image receptor.

(6) Gonad shielding of not less than 0.5 millimeter of lead-equivalent material shall be used during radiographic procedures in which the gonads are in the useful beam for all human patients who have not passed the reproductive age, except for cases in which this shielding would interfere with the diagnostic procedure.

(7) If a patient or film requires auxiliary support during a radiation exposure, all of the following safety requirements shall be met:

(A) Mechanical holding devices shall be used when the technique permits the use of these devices. The written safety procedures required by this regulation shall list the individual techniques for which holding devices cannot be utilized.

(B) The written safety procedures required by this regulation shall indicate the requirements for selecting a human holder and the procedure that the holder shall follow.

(C) The human holder shall be instructed in personal radiation safety and shall be protected in accordance with these regulations.

(D) No individual shall be used routinely to hold film or patients.

(E) If the patient holds the film, each portion of the body other than the area of clinical interest struck by the useful beam shall be protected by not less than 0.5 millimeter of lead-equivalent material, except during intraoral examinations.

(F) Each facility shall have a sufficient number of leaded aprons and gloves available to provide protection to all personnel who are involved with X-ray operations and who are otherwise not shielded.

(8) The procedures and auxiliary equipment designed to minimize patient and personnel exposure shall be commensurate with the needed diagnostic information and shall be utilized according to all of the following requirements:

(A) The speed of the screen and film combinations used shall be the fastest speed that is consistent with the diagnostic objective of the examinations. Film cassettes without intensifying screens shall not be used for any routine diagnostic imaging, with the exception of veterinary radiography and standard film packets for intraoral use in dental radiography.

(B) The radiation exposure to the patient shall be the minimum exposure required to produce images of good diagnostic quality.

(C) Portable or mobile X-ray equipment shall be used only for examinations during which transferring the patient or patients to a stationary X-ray installation is impractical.

(D) X-ray systems other than fluoroscopic dental intraoral systems and computed tomography X-ray systems shall not be utilized in any procedure in which the source-to-patient distance is less than 30 centimeters, unless specifically approved by the FDA. Veterinary systems shall not be subject to this limitation.

(E) If grids are used between the patient and the image receptor to decrease the amount of

scattered radiation to the film and improve contrast, the grid shall be as follows:

(i) Positioned properly, including the tube side facing the right direction, with the grid centered to the central ray; and

(ii) if of the focused type, positioned at the proper focal distance for the SIDs being used.

(9) Each individual who is associated with the operation of an X-ray system shall be subject to the requirements of part 4 of these regulations.

(b) Records. Each registrant shall maintain the following minimum information for each X-ray system, for inspection by the department:

(1) The maximum rating of technique factors;

(2) the model and serial numbers of all certifiable components;

(3) the aluminum-equivalent filtration of the useful beam, including any routine variation;

(4) tube rating charts and cooling curves;

(5) records of surveys, calibrations, maintenance, and modifications performed on the X-ray system after the effective date of this regulation, with the name of each person who performed these services;

(6) a scale drawing of the room in which a stationary X-ray system is located, indicating the use of areas adjacent to the room and an estimation of the extent of occupancy by any individuals in these areas. In addition, the drawing shall include one of the following:

(A) The results of a survey for radiation levels present at the operator's position and at pertinent points outside the room at specified test conditions; or

(B) the type of thickness of materials, or lead equivalency, of each system; and

(7) a copy of all correspondence with the department regarding that X-ray system.

(c) X-ray utilization log. Except for veterinary facilities, each registrant shall maintain an X-ray log containing each patient's identifier, the type of each examination, and the date on which each examination was performed. When the patient or film is provided with human auxiliary support, the name of the human holder shall be recorded.

(d) X-ray film-processing facilities and practice.

(1) Each facility using a radiographic X-ray system and analog image receptors shall have available suitable equipment for handling and processing radiographic film in accordance with all of the following requirements:

(A) Each manual film-developing system shall meet all of the following requirements:

(i) The processing tanks shall be constructed of mechanically rigid, corrosion-resistant material.

(ii) The temperature of the solutions in the tanks shall be maintained within the range of 60°F to 80°F. All film shall be developed in accordance with the time-temperature relationships recommended by the film manufacturer or, in the absence of these recommendations, with the following time-temperature chart:

Time-Temperature Chart

Thermometer Reading (Degrees)		Minimum Developing Time (Minutes)
°C	°F	
26.7	80	2
26.1	79	2
25.6	78	2 ½
25.0	77	2 ½
24.4	76	3
23.9	75	3
23.3	74	3 ½
22.8	73	3 ½
22.2	72	4
21.7	71	4
21.1	70	4 ½
20.6	69	4 ½
20.0	68	5
19.4	67	5 ½
18.9	66	5 ½
18.3	65	6
17.8	64	6 ½
17.2	63	7
16.7	62	8
16.1	61	8 ½
15.6	60	9 ½

(iii) Devices shall be utilized that indicate the actual temperature of the developer and signal the passage of a preset time appropriate to the developing time required.

(B) Each automatic processor and any other closed processing system shall meet all of the following requirements:

(i) All film shall be developed in accordance with the time-temperature relationships recommended by the film manufacturer. In the absence of these recommendations, the film shall be developed using the following chart:

Developer Temperature	Minimum Immersion Time ^a	Seconds
°C	°F	
35.5	96	19
35	95	20
34.5	94	21
34	93	22
33.5	92	23
33	91	24

Developer Temperature	Minimum Immersion Time ^a	
32	90	25
31.5	89	26
31	88	27
30.5	87	28
30	86	29
29.5	85	30

^a Reflects immersion time only, with no crossover time included.

(ii) The specified developer temperature and immersion time shall be posted in the darkroom or on the automatic processor.

(C) Each deviation from any requirements specified in paragraph (e)(1) shall be documented by the registrant in such a manner that the requirements are shown to be met or exceeded.

(2) In addition to the requirements specified in paragraph (e)(1), all of the following requirements shall be met:

(A) Pass boxes, if provided, shall be constructed to exclude light from the darkroom when cassettes are placed in or removed from the boxes and shall incorporate shielding from stray radiation to prevent any exposure of undeveloped film.

(B) The darkroom shall be lighttight and shall use safe lighting so that any film type exposed in a cassette to X-radiation sufficient to produce an optical density measuring from one to two when processed does not exhibit an increase in density greater than 0.1 when exposed in the darkroom for two minutes with all safe lights on. If daylight film-handling boxes are used, these boxes shall prevent any fogging of the film.

(C) Each darkroom typically used by more than one individual shall be equipped with a method to prevent accidental entry while undeveloped film is handled or processed.

(D) All film shall be stored in a cool, dry place and shall be protected from exposure to stray radiation. Film in open packages shall be stored in a lighttight container.

(E) All film cassettes and intensifying screens shall be inspected periodically and shall be cleaned or replaced as necessary to ensure radiographs of good diagnostic quality.

(F) Outdated X-ray film shall not be used for diagnostic radiographs, unless the film has been stored in accordance with the manufacturer's recommendations and a sample of the film passes a sensitometric test for the normal range of the base optical density plus fogging for the film speed.

(G) All film-developing solutions shall be main-

tained in strength by replenishment or renewal so that full development is accomplished within the time frame specified by the manufacturer. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-242b. General requirements for all diagnostic X-ray systems. In addition to meeting the other requirements of this part, each diagnostic X-ray system shall meet the following requirements:

(a) Warning label. The control panel containing the main power switch shall bear this or an equivalent warning statement, which shall be legible and accessible to view: "WARNING: This X-ray unit could be dangerous to patient and operator unless safe exposure factors and operating instructions are observed."

(b) Battery charge indicator. On each battery-powered X-ray generator, a visual means shall be provided on the control panel to indicate whether the battery is in a state of charge for proper operation.

(c) Leakage radiation from the diagnostic source assembly. The leakage radiation from the diagnostic source assembly measured at a distance of one meter in any direction from the source shall not exceed 25.8 $\mu\text{C}/\text{kg}$ (100 milliroentgens) in one hour when the X-ray tube is operated at the leakage technique factors specified by the manufacturer. Compliance shall be determined by measuring the leakage radiation averaged over an area of 100 square centimeters, with no linear dimension greater than 20 centimeters.

(d) Radiation from components other than the diagnostic source assembly. The radiation emitted by a component other than the diagnostic source assembly shall not exceed 0.5 $\mu\text{C}/\text{kg}$ (2 milliroentgens) in one hour at five centimeters from an accessible surface of the component in an assembled X-ray system operated under any design conditions. Compliance shall be determined by measuring the radiation averaged over an area of 100 square centimeters, with no linear dimension greater than 20 centimeters.

(e) Beam quality.

(1) Half-value layer.

(A) The half-value layer of a given X-ray tube potential shall not be less than the values shown in table I in this paragraph. Linear interpolation and extrapolation may be used if necessary to determine the half-value layer at an X-ray tube potential that is not listed in table I.

Table I

Operating range (kilovolts peak)	Measured potential (kilovolts peak)	Half-value layer (millimeters of aluminum)
Below 50	30	0.3
	40	0.4
	49	0.5
50 through 70	50	1.2
	60	1.3
	70	1.5
Above 70	71	2.1
	80	2.3
	90	2.5
	100	2.7
	110	3.0
	120	3.2
	130	3.5
	140	3.8
150	4.1	

(B) For capacitor energy storage equipment, compliance shall be determined with the system fully charged and set at 10 mAs for each exposure.

(C) The required minimal half-value layer of the useful beam shall include the filtration contributed by all materials that are permanently located between the source and the patient.

(2) Filtration controls. For each X-ray system that has variable kVp and variable filtration for the useful beam, a device shall link the kVp selector with the filter or filters and shall prevent an exposure, unless the minimum amount of filtration necessary to produce the required HVL is in the useful beam for the given kVp that has been selected.

(f) Multiple tubes. If two or more radiographic tubes are controlled by one exposure switch, each tube that has been selected shall be clearly indicated before initiation of the exposure. This indication shall be both on the X-ray control panel and at or near the tube housing assembly that has been selected.

(g) Mechanical support of the tube head. The tube housing assembly supports shall be adjusted so that the tube housing assembly remains stable during each exposure, unless tube housing movement is a designed function of the X-ray system.

(h) Technique indicators.

(1) The technique factors to be used during each exposure shall be indicated before the exposure begins. If automatic exposure controls are used, the technique factors that are set before the exposure shall be indicated.

(2) The requirements of paragraph (h)(1) may be met by permanent marking on equipment that has fixed technique factors. The indication of

technique factors shall be visible from the operator's position, except in the case of spot films made by the fluoroscopist.

(i) Maintaining compliance. All diagnostic X-ray systems and their associated components used on humans and certified pursuant to the federal X-ray equipment performance standard in 21 CFR part 1020 shall be maintained in compliance with the applicable requirements of that standard.

(j) Locks. All position-locking, holding, and centering devices that are on X-ray system components and systems shall function as intended and shall be maintained according to each manufacturer's recommendations. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-243. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; revoked Dec. 30, 2005.)

28-35-243a. Fluoroscopic X-ray systems. Each fluoroscopic X-ray system used shall be image-intensified and shall meet the following requirements:

(a) Limitation of useful beam.

(1) Primary barrier.

(A) The fluoroscopic imaging assembly shall be provided with a primary protective barrier that intercepts the entire cross section of the useful beam at any SID.

(B) The X-ray tube used for fluoroscopy shall not produce X-rays unless the barrier is in position to intercept the entire useful beam.

(2) Fluoroscopic beam limitation.

(A) For certified fluoroscopic systems with or without a spot film device, neither the length nor the width of the X-ray field in the plane of the image receptor shall exceed that of the visible area of the image receptor by more than three percent of the SID. The sum of the excess length and the excess width shall be no greater than four percent of the SID.

(B) For uncertified fluoroscopic systems with a spot film device, the X-ray beam with the shutters fully opened during fluoroscopy or spot filming shall be no larger than the largest spot-film size for which the device is designed. Measurements shall be made at the minimum SID available but at a distance of not less than 20 centimeters from the tabletop to the film plane.

(C) For uncertified fluoroscopic systems without a spot film device, the requirements of this regulation shall apply.

(D) Other requirements for fluoroscopic beam limitation shall include the following:

(i) A means shall be provided to permit further limitation of the field. Beam-limiting devices manufactured after May 22, 1979 and incorporated in equipment with a variable SID or a visible area of greater than 300 square centimeters, or both, shall be provided with a means for stepless adjustment of the X-ray field.

(ii) All equipment with a fixed SID and a visible area of 300 square centimeters or less shall be provided either with stepless adjustment of the X-ray field or with a means to further limit the X-ray field size, at the plane of the image receptor, to 125 square centimeters or less.

(iii) If provided, stepless adjustment shall, at the greatest SID, provide continuous field sizes from the maximum attainable to a field size of five centimeters by five centimeters or less.

(iv) For equipment manufactured after February 25, 1978, if the angle between the image receptor and beam axis is variable, a means shall be provided to indicate when the axis of the X-ray beam is perpendicular to the plane of the image receptor.

(v) For noncircular X-ray fields used with circular image receptors, the error in alignment shall be determined along the length and width dimensions of the X-ray field that pass through the center of the visible area of the image receptor.

(3) Spot-film beam limitation. Each spot-film device shall meet the following requirements:

(A) A means shall be provided between the source and the patient for adjustment of the X-ray field size in the plane of the film, to the size of that portion of the film that has been selected on the spot film selector. This adjustment shall be automatically accomplished except when the X-ray field size in the plane of the film is smaller than that of the selected portion of the film. For spot-film devices manufactured after June 21, 1979, if the X-ray field size is less than the size of the selected portion of the film, the means for adjustment of the field size shall be only at the operator's option.

(B) Neither the length nor the width of the X-ray field in the plane of the image receptor shall differ from the corresponding dimensions of the selected portion of the image receptor by more than three percent of the SID when adjusted for full coverage of the selected portion of the image

receptor. The sum of the length and width differences, without regard to sign, shall not exceed four percent of the SID.

(C) It shall be possible to adjust the X-ray field size in the plane of the film to a size smaller than the selected portion of the film. The minimum field size at the greatest SID shall be equal to or less than five centimeters by five centimeters.

(D) The center of the X-ray field in the plane of the film shall be aligned with the center of the selected portion of the film to within two percent of the SID.

(E) For spot-film devices manufactured after February 25, 1978, if the angle between the plane of the image receptor and beam axis is variable, a means shall be provided to indicate when the axis of the X-ray beam is perpendicular to the plane of the image receptor, and compliance shall be determined with the beam axis indicated to be perpendicular to the plane of the image receptor.

(4) Override. Each method used to override any of the automatic X-ray field size adjustments required in paragraphs (a)(2) and (3) shall meet the following requirements:

(A) Be designed for use only if system failure occurs;

(B) incorporate a signal visible at the fluoroscopist's position that indicates whenever the automatic field size adjustment is overridden; and

(C) be clearly and durably labeled with the following, or equivalent wording:

**FOR X-RAY FIELD
LIMITATION SYSTEM FAILURE**

(b) Activation of the fluoroscopic tube. All X-ray production in the fluoroscopic mode shall be controlled by a device that requires continuous manual activation by the fluoroscopist during the entire time of any exposure. When recording serial fluoroscopic images, the fluoroscopist shall be able to terminate the X-ray exposure or exposures at any time, but a means may be provided to permit completion of any single exposure of the series in process.

(c) Exposure rate limits.

(1) Allowable limits for the entrance exposure rate.

(A) Fluoroscopic equipment that is provided with an automatic exposure rate control shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam en-

ters the patient, except under either of the following conditions:

(i) When fluoroscopic images are being recorded; or

(ii) when an optional high-level control is provided. When provided, the X-ray system shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 1.3 mC/kg (5 roentgens) per minute at the point where the center of the useful beam enters the patient, unless the high-level control is activated. A special means of activation of high-level controls shall be required. The high-level control shall be operable only when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high-level control is being employed.

(B) Fluoroscopic equipment that is not provided with an automatic exposure rate control shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 1.3 mC/kg (5 roentgens) per minute at the point where the center of the useful beam enters the patient, except during either of the following:

(i) When fluoroscopic images are being recorded; or

(ii) when an optional high-level control is activated. A special means of activation of the high-level control shall be required. The high-level control shall be operable only when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high-level control is being employed.

(C) Fluoroscopic equipment that is provided with both an automatic exposure rate control mode and a manual mode shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute in either mode at the point where the center of the useful beam enters the patient, except under either of the following conditions:

(i) When fluoroscopic images are being recorded; or

(ii) when the mode or modes have an optional high-level control. The mode or modes shall not be operable at any combination of tube potential and current that will result in an exposure rate in excess of 1.3 mC/kg (5 roentgens) per minute at the point where the center of the useful beam enters the patient, unless the high-level control is activated. A special means of activating

of the high-level control shall be required. The high-level control shall be operable only when continuous manual activation is provided by the operator. A continuous signal audible to the fluoroscopist shall indicate that the high-level control is being employed.

(D) Fluoroscopic equipment manufactured after May 19, 1995 that can exceed 1.3 mC/kg (5 roentgens) per minute shall be equipped with an automatic exposure rate control. All entrance exposure rate limits shall be 2.6 mC/kg (10 roentgens) per minute with an upper limit of 5.2 mC/kg (20 roentgens) per minute when the high-level control is activated.

(E) Compliance with the requirements of this subsection shall be determined as follows:

(i) If the source is below the X-ray table, the exposure rate shall be measured at one centimeter above the tabletop or cradle.

(ii) If the source is above the X-ray table, the exposure rate shall be measured at 30 centimeters above the tabletop with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement.

(iii) For any fluoroscopy system capable of changing the X-ray beam orientation, which is also known as a C-arm system, the exposure rate shall be measured at 30 centimeters from the input surface of the fluoroscopic imaging assembly. The source may be positioned at any available SID, if the end of the beam-limiting device or spacer is no closer than 30 centimeters from the input surface of the fluoroscopic imaging assembly.

(iv) For a lateral-type fluoroscope, the exposure rate shall be measured at a point that is 15 centimeters from the centerline of the X-ray table and in the direction of the X-ray source, with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement. A moveable tabletop shall be positioned as closely as possible to the lateral X-ray source, with the end of the beam-limiting device or spacer no closer than 15 centimeters to the centerline of the X-ray table.

(2) Periodic measurements of the entrance exposure rate shall be taken by a qualified expert for both the typical and the maximum values according to all of the following requirements:

(A) The measurements shall be taken annually and after any maintenance of the system that might affect the exposure rate.

(B) The results of these measurements shall be posted at a location where any fluoroscopist has

ready access to the results while using the fluoroscope and in the record required by this regulation. The measurement results shall be stated in coulombs per kilogram (roentgens) per minute and shall include the technique factors used in determining the results. The name of the individual performing the measurements and the date on which the measurements were performed shall be included in the results.

(C) The conditions under which periodic measurements of the entrance exposure rate are taken shall meet the following requirements:

(i) Each measurement shall be made under the conditions that meet the requirements of this regulation.

(ii) The kVp, mA, and other selectable parameters shall be adjusted to those settings typical in clinical use for a patient with an abdomen that is 23 cm thick.

(iii) Each X-ray system that incorporates any automatic exposure rate controls shall have sufficient attenuative material placed in the useful beam to produce milliamperage and kilovoltage that meet the requirements of this regulation.

(D) The conditions under which periodic measurements of the maximum entrance exposure are taken shall meet the following requirements:

(i) The measurement shall be made under the conditions that meet the requirements of this regulation.

(ii) The kVp, mA, and other selectable parameters shall be adjusted to those settings that produce the maximum entrance exposure rate.

(iii) Each X-ray system that incorporates automatic exposure rate controls shall have sufficient attenuative material placed in the useful beam to produce the maximum entrance exposure rate of the system.

(d) Barrier-transmitted radiation rate limits.

(1) The exposure rate due to transmission through the primary protective barrier with the attenuation block in the useful beam, combined with radiation from the image intensifier, if provided, shall not exceed 0.5 μ C/kg (2 milliroentgens) per hour at 10 centimeters from any accessible surface of the fluoroscopic imaging assembly beyond the plane of the image receptor for each mC/kg (4 roentgens) per minute of entrance exposure rate.

(2) Measuring compliance of barrier transmission.

(A) The exposure rate due to transmission through the primary protective barrier combined with radiation from the image intensifier shall be

determined by measuring the radiation averaged over an area of 100 square centimeters, with no linear dimension greater than 20 centimeters.

(B) If the source is below the tabletop, the measurement shall be taken with the input surface of the fluoroscopic imaging assembly positioned at 30 centimeters above the tabletop.

(C) If the source is above the tabletop and the SID is variable, the measurement shall be taken with the end of the beam-limiting device or spacer placed as close to the tabletop as possible, but not closer than 30 centimeters.

(D) All movable grids and compression devices shall be removed from the useful beam during the measurement.

(e) Indication of potential and current. During fluoroscopy and cinefluorography, the kV and the mA shall be continuously indicated.

(f) Source-to-skin distance (SSD). Unless otherwise approved by the food and drug administration, the SSD shall not be less than the following:

(1) 38 centimeters on stationary fluoroscopic systems manufactured on or after August 1, 1974;

(2) 35.5 centimeters on stationary fluoroscopic systems manufactured before August 1, 1974;

(3) 30 centimeters on all mobile fluoroscopes; and

(4) 20 centimeters for all mobile fluoroscopes when used for specific surgical applications.

(g) Fluoroscopic timer.

(1) A method shall be provided to preset the cumulative amount of time during which the fluoroscopic X-ray tube is on. The maximum cumulative amount of time during which the fluoroscopic X-ray tube is on shall not exceed five minutes without resetting the timing device.

(2) A signal audible to the fluoroscopist shall indicate the completion of any preset cumulative time. The signal shall continue to sound while X-rays are produced until the timing device is reset.

(h) Control of scattered radiation.

(1) Each fluoroscopic table, when combined with the medical procedures performed, shall be such that no unprotected part of the body of any staff member or ancillary individual shall be exposed to unattenuated scattered radiation that originates from under the table. The attenuation required shall be not less than 0.25 millimeter lead-equivalent.

(2) The equipment configuration and operating procedures used shall prevent any portion of the body of any staff member or ancillary individual,

except the extremities, from being exposed to the unattenuated scattered radiation emanating from above the tabletop, unless either of the following conditions is met:

(A) The individual is at least 120 centimeters from the center of the useful beam.

(B) The radiation has passed through not less than 0.25 millimeter of lead-equivalent material including drapes, a bucky-slot cover panel, and self-supporting curtains, in addition to any lead equivalency provided by any protective apron.

(3) Exemptions to paragraph (h)(2) may be granted by the secretary if a sterile field does not permit the use of the normal protective barriers. If the use of prefitted sterilized covers for the barriers is practical, an exemption shall not be granted. Exceptions shall be automatically granted for the following fluoroscopic procedures only if a sterile field does not permit the use of the normal protective barriers:

(A) Angiograms;

(B) arthrograms;

(C) biliary drainage procedures;

(D) fluoroscopic biopsy procedures;

(E) myelograms;

(F) percutaneous cholangiograms;

(G) percutaneous nephrostomies;

(H) sinograms or fistulograms; and

(I) T-tube cholangiograms.

(i) Spot-film exposure reproducibility. Each fluoroscopic system equipped with a spot-film mode shall meet the exposure reproducibility requirements of K.A.R. 28-35-244a when operating in the spot-film mode.

(j) Radiation therapy simulation systems. Each radiation therapy simulation system shall be exempt from the requirements of subsection (c) of this regulation. In addition, this type of system shall be exempt from the following:

(1) The requirements of subsections (a) and (d) of this regulation, if the system is designed and used so that no individual other than the patient is in the X-ray room when the system is producing X-rays; and

(2) the requirements of subsection (g) of this regulation, if the system is provided with a means of indicating the cumulative time that an individual patient has been exposed to X-rays. Procedures shall be established to require that the cumulative time be reset between examinations. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-244. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked Dec. 30, 2005.)

28-35-244a. Radiographic systems other than fluoroscopic, dental intraoral, or computed tomography X-ray systems. (a) Beam limitation, except for mammographic systems. Each registrant shall ensure that the useful beam is collimated to the area of clinical interest. This requirement shall be deemed to have been met if a positive beam-limiting device meeting the manufacturer's specifications and the requirements of this regulation has been used or if evidence of collimation is shown on at least three sides or three corners of the film, including projections from the shutters of the collimator, cone cutting at the corners, and borders at the film's edge.

(1) General-purpose stationary and mobile X-ray systems including veterinary systems, other than portable systems, installed after the effective date of these regulations.

(A) Each registrant shall use only X-ray systems provided with the means for independent stepless adjustment of at least two dimensions of the X-ray field.

(B) Each registrant shall ensure that a method is provided for visually defining the perimeter of the X-ray field. The total misalignment of the edges of the visually defined field with the respective edges of the X-ray field along either the length or width of the visually defined field shall not exceed two percent of the distance from the source to the center of the visually defined field when the surface upon which the visually defined field appears is perpendicular to the axis of the X-ray beam.

(C) An exemption from paragraphs (a)(1)(A) and (B) may be granted by the secretary for non-certified X-ray systems if the registrant submits a written application for the exemption and that application meets the following conditions:

(i) Demonstrates that it is impractical to comply with paragraphs (a)(1)(A) and (B); and

(ii) demonstrates that the purpose of paragraphs (a)(1)(A) and (B) will be met by other methods.

(2) Additional requirements for stationary general purpose X-ray systems. In addition to the requirements of paragraph (a)(1), each registrant shall ensure that all stationary general-purpose X-ray systems, both certified and noncertified, meet all of the following requirements:

(A) A method shall be provided to indicate when the axis of the X-ray beam is perpendicular to the

plane of the image receptor, to align the center of the X-ray field with respect to the center of the image receptor to within two percent of the SID, and to indicate the SID to within two percent.

(B) The beam-limiting device shall indicate numerically the field size in the plane of the image receptor to which the device is adjusted.

(C) The indication of the field size dimensions and SID shall be specified in inches or centimeters, or both, and shall be such that aperture adjustments result in X-ray field dimensions in the plane of the image receptor that correspond to X-ray field dimensions indicated by the beam-limiting device to within two percent of the SID when the beam axis is indicated to be perpendicular to the plane of the image receptor.

(3) X-ray systems designed for one size of image receptor. Radiographic equipment designed for only one size of image receptor at a fixed SID shall be provided with the means to limit the field at the plane of the image receptor to dimensions no greater than those of the image receptor and to align the center of the X-ray field with the center of the image receptor to within two percent of the SID, or shall be provided with the means to both adjust the size of and align the X-ray field so that the X-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor.

(4) X-ray systems other than those described in this subsection and veterinary systems installed before the effective date of this regulation and all portable veterinary X-ray systems.

(A) A means shall be provided to limit the X-ray field in the plane of the image receptor so that the field does not exceed each dimension of the image receptor by more than two percent of the SID when the axis of the X-ray beam is perpendicular to the plane of the image receptor.

(B) A means shall be provided to align the center of the X-ray field with the center of the image receptor to within two percent of the SID, or the means shall be provided to both adjust the size of and align the X-ray field so that the X-ray field at the plane of the image receptor does not extend beyond any edge of the image receptor. Compliance shall be determined with the axis of the X-ray beam perpendicular to the plane of the image receptor.

(C) The requirements of paragraphs (a)(4)(A) and (B) may be met with a system that meets the requirements for a general-purpose X-ray system as specified in paragraph (a)(1) or, when align-

ment means are also provided, may be met with either of the following:

(i) An assortment of removable, fixed-aperture, beam-limiting devices sufficient to meet the requirements for each combination of image receptor size and SID for which the system is designed, with each such device having clear and permanent markings to indicate the image receptor size and SID for which the system is designed; or

(ii) a beam-limiting device having multiple fixed apertures sufficient to meet the requirements for each combination of image receptor size and SID for which the system is designed. Permanent, clearly legible markings shall indicate the image receptor size and SID for which each aperture is designed and shall indicate which aperture is in position for use.

(b) Radiation exposure control.

(1) Exposure initiation. A means shall be provided to initiate the radiation exposure by a deliberate action on the part of the operator, including the depression of a switch. Radiation exposure shall not be initiated without such an action. In addition, it shall not be possible to initiate an exposure when the timer is set to a "zero" or "off" position if either position is provided.

(2) Exposure indication. A means shall be provided for visual indication observable at or from the operator's protected position whenever X-rays are produced. In addition, a signal audible to the operator shall indicate that the exposure has terminated.

(3) Exposure termination. A means shall be provided to terminate the exposure at a preset time interval, preset product of current and time, a present number of pulses, or a preset radiation exposure to the image receptor. Except for dental panoramic systems, termination of each exposure shall cause the automatic resetting of the timer to its initial setting or to "zero."

(A) Manual exposure control. An X-ray control shall be incorporated into each X-ray system so that each exposure can be terminated by the operator at any time, except for either of the following:

(i) During any exposure of one-half second or less; or

(ii) during serial radiography, when a means shall be provided to permit the completion of any single exposure of the series in process.

(B) Automatic exposure controls. When an automatic exposure control is provided, all of the following requirements shall be met:

(i) The mode of operation selected shall be indicated on the control panel.

(ii) If the X-ray tube potential is equal to or greater than 50kVp, the minimum exposure time for field emission equipment rated for pulsed operation shall be equal to or less than a time interval equivalent to two pulses.

(iii) The minimum exposure time for all equipment other than that specified in paragraph (b)(2)(B) shall be equal to or less than one-sixtieth of a second or the time interval required to deliver 5 mAs, whichever is greater.

(iv) Either the product of the peak X-ray tube potential, current, and exposure time shall be limited to not more than 60 kWp per exposure, or the product of the X-ray tube current and exposure time shall be limited to not more than 600 mAs per exposure. However, when the X-ray tube potential is less than 50 kVp, the product of the X-ray tube current and exposure time shall be limited to not more than 2,000 mAs per exposure.

(v) A visible signal shall indicate when an exposure has been terminated at the limits required by paragraph (b)(2)(D), and manual resetting shall be required before further automatically timed exposures can be made.

(4) Exposure duration or timer linearity. For systems that provide for the independent selection of exposure time settings, the average ratios (X_1) of exposure to the indicated timer setting, in units of $C\ kg^{-1}s^{-1}$ (mR/s), obtained at any two clinically used timer settings shall not differ by more than 0.10 times their sum. This calculation is written as follows:

$$(X_{-1} - X_2) \leq 0.1 (X_{-1} + X_2)$$

where X_{-1} and X_2 are the average $C\ kg^{-1}s^{-1}$ (mR/s) values.

(5) Exposure control location. The X-ray exposure control shall be placed so that the operator can view the patient while making any exposure.

(6) Operator protection, except for veterinary systems.

(A) Stationary systems. Each stationary X-ray system shall be required to have the X-ray control permanently mounted in a protected area so that the operator is required to remain in that protected area during the entire exposure.

(B) Mobile and portable systems. Each mobile and each portable X-ray system shall meet the following requirements:

(i) If used for one week or more at the same location, including a room or a suite, meet the requirements of paragraph (b)(6)(A); or

(ii) if used for less than one week at the same location, be provided with either a protective barrier that is at least two meters or 6.5 feet high for operator protection during exposures or a means to allow the operator to be at least 2.7 meters or 9 feet from the tube housing assembly during the exposure.

(7) Operator protection for veterinary systems. All stationary, mobile, or portable X-ray systems used for veterinary work shall be provided with either a protective barrier that is at least two meters or 6.5 feet high for operator protection during exposures or a means to allow the operator to be at least 2.7 meters or nine feet from the tube housing assembly during exposures.

(c) Source-to-skin distance. Each mobile or portable radiographic system shall be provided with the means to limit the source-to-skin distance to equal to or greater than 30 centimeters, except for veterinary systems or systems specifically approved by the FDA.

(d) Exposure reproducibility. When all technique factors are held constant, including control panel selections associated with automatic exposure control systems, the coefficient of variation of exposure for both manual and automatic exposure control systems shall not exceed 0.05. This requirement shall apply to all clinically used techniques.

(e) Radiation from capacitor energy storage equipment in standby status. The radiation emitted from the X-ray tube when the system is fully charged and the exposure switch or timer is not activated shall not exceed a rate of 0.5 $\mu\text{C}/\text{kg}$ (2 milliroentgens) per hour at five centimeters from any accessible surface of the diagnostic source assembly, with the beam-limiting device fully open.

(f) Accuracy. Deviation of the measured technique factors from the indicated values of kVp and exposure time shall not exceed the limits specified for each system by its manufacturer. In the absence of manufacturer's specifications, the deviation shall not exceed 10 percent of the indicated value for kVp and 20 percent for exposure time.

(g) mA and mAs linearity. The following requirements shall apply when the equipment is operated with a power supply as specified by the manufacturer for any fixed X-ray tube potential within the range of 40 percent to 100 percent of the maximum rated mA or mAs.

(1) Equipment that provides for the independent selection of X-ray tube current (mA). The average ratios ($X_{.1}$) of exposure to the indicated milliamperere-seconds product $\text{C kg}^{-1} \text{ mAs}^{-1}$ (or mR/mAs) obtained at any two consecutive tube current

settings shall not differ by more than 0.10 times their sum. This calculation is written as follows:

$$(X_{.1} - X_{.2}) \leq 0.10 (X_{.1} + X_{.2})$$

where $X_{.1}$ and $X_{.2}$ are the average values obtained at each of two consecutive tube current settings, or at two settings differing by no more than a factor of two when the tube current selection is continuous.

(2) Equipment that has a combined X-ray tube current-exposure time product (mAs) selector, but not a separate tube current (mA) selector. The average ratios ($X_{.1}$) of exposure to the indicated milliamperere-seconds product, in units of $\text{C kg}^{-1} \text{ mAs}^{-1}$ (or mR/mAs), obtained at any two consecutive mAs selector settings shall not differ by more than 0.10 times their sum. This calculation is written as follows:

$$(X_{.1} - X_{.2}) \leq 0.10 (X_{.1} + X_{.2})$$

where $X_{.1}$ and $X_{.2}$ are the average values obtained at each of two mAs selector settings, or at two settings differing by no more than a factor of two when the mAs selector provides continuous selection.

(3) Measuring compliance. Determination of compliance shall be based on 10 exposures taken within one hour, at each of the two settings specified by this subsection. These two settings may include any two focal spot sizes, unless one is equal to or less than 0.45 millimeters and the other is greater than 0.45 millimeters. For purposes of this requirement, focal spot size shall mean the nominal focal spot size specified by the X-ray tube manufacturer.

(h) Additional requirements applicable to certified systems only. Diagnostic X-ray systems incorporating one or more certified components shall be required to meet the following additional requirements that relate to that certified component or components.

(1) Beam limitation for stationary and mobile general-purpose X-ray systems.

(A) A means of stepless adjustment of the size of the X-ray field shall be provided. The minimum field size at an SID of 100 centimeters shall be equal to or less than five centimeters by five centimeters.

(B) If a light localizer is used to define the X-ray field, the localizer shall provide an average illumination of not less than 160 lux or 15 foot-candles at 100 centimeters or at the maximum SID, whichever is less. The average illumination shall be based on measurements made in the approximate center of each quadrant of the light

field. Radiation therapy simulation systems manufactured on and after May 27, 1980 shall be exempt from this requirement.

(C) The edge of the light field at 100 centimeters or at the maximum SID, whichever is less, shall have a contrast ratio, when corrected for ambient lighting, of not less than four for beam-limiting devices designed for use on stationary equipment and a contrast ratio of not less than three for beam-limiting devices designed for use on mobile equipment. The contrast ratio shall be defined as I_1/I_2 where I_1 is the illumination at three millimeters from the edge of the light field toward the center of the field, and I_2 is the illumination at three millimeters from the edge of the light field away from the center of the field. Compliance shall be determined by using a measuring instrument that has an aperture of one millimeter in diameter.

(2) Beam limitation and alignment on stationary general-purpose X-ray systems equipped with positive beam limitation (PBL). If PBL is being used, all of the following requirements shall be met:

(A) The PBL shall prevent the production of X-rays when either of the following occurs:

(i) The length or width of the X-ray field in the plane of the image receptor differs, except as permitted by paragraph (h)(2)(C), from the corresponding image receptor dimensions by more than three percent of the SID.

(ii) The sum of the length and width differences as stated in paragraph (h)(2)(A)(i), without regard to sign, exceeds four percent of the SID.

(B) Compliance with paragraph (h)(2)(A) shall be determined when the equipment indicates that the beam axis is perpendicular to the plane of the image receptor. Compliance shall be determined no sooner than five seconds after insertion of the image receptor.

(C) The PBL system shall be capable of operation, at the discretion of the operator, so that the size of the field can be made smaller than the size of the image receptor through stepless adjustment of the field size. The minimum field size at an SID of 100 centimeters shall be equal to or less than five centimeters by five centimeters.

(D) The PBL system shall be designed so that if a change in image receptor does not cause an automatic return to PBL function as described in paragraph (h)(2)(A), then any change of image receptor size or SID shall cause the automatic return to PBL function.

(3) Beam limitation for portable X-ray systems. Beam limitation for each portable X-ray system shall meet the beam limitation requirements in paragraph (a)(1) or (h)(2).

(i) Tube stands for portable X-ray systems. A tube stand or other mechanical support shall be used for portable X-ray systems, so that the X-ray tube housing assembly does not need to be hand-held during exposures. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-245. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked Sept. 20, 1993.)

28-35-246. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked Sept. 20, 1993.)

28-35-247. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended May 1, 1976; amended Sept. 20, 1993; revoked Dec. 30, 2005.)

28-35-247a. Intraoral dental radiographic systems. In addition to K.A.R. 28-35-242a and 28-35-242b, this regulation shall apply to all X-ray equipment and the associated facilities used for dental radiography. The requirements for extraoral dental radiographic systems shall be those requirements specified in K.A.R. 28-35-244a. Each registrant shall use only systems meeting the requirements of this regulation.

(a) Source-to-skin distance (SSD). X-ray systems designed for use with an intraoral image receptor shall be provided with a means to limit the SSD to not less than either of the following:

- (1) 18 centimeters if operable above 50 kVp; or
- (2) 10 centimeters if operable at 50 kVp only.

(b) kVp limitations. Dental X-ray machines with a nominal fixed kVp of less than 50 kVp shall not be used to make diagnostic dental radiographs of humans.

(c) Beam limitation. Each radiographic system designed for use with an intraoral image receptor shall be provided with a means to limit the X-ray beam so that the beam at the minimum SSD is containable in a circle with a diameter of no more than seven centimeters.

(d) Radiation exposure control.

- (1) Exposure initiation.

(A) A means shall be provided to initiate the radiation exposure by a deliberate action on the part of the operator, including the depression of

a switch. Radiation exposure shall not be initiated without such an action.

(B) When the timer is set to a “zero” or “off” position, if either position is provided, an exposure shall not be possible.

(2) Exposure indication. A means shall be provided for a visual indication observable at or from the operator’s protected position whenever X-rays are produced. In addition, a signal audible to the operator shall indicate that the exposure has terminated.

(3) Exposure termination.

(A) A means shall be provided to terminate each exposure at a preset time interval, a preset product of current and time, a preset number of pulses, or a preset radiation exposure to the image receptor.

(B) An X-ray exposure control shall be incorporated into each X-ray system so that each exposure can be terminated by the operator at any time, except for exposures of one-half second or less.

(C) Each termination of an exposure shall cause the automatic resetting of the timer to its initial setting or to “zero.”

(4) Exposure duration or timer linearity. For each system that provides for the independent selection of exposure time settings, the average ratios (X_1) of exposure to the indicated timer setting, in units of $C\text{ kg}^{-1}\text{ s}^{-1}$ (mR/s), obtained at any two clinically used time settings shall not differ by more than 0.10 times their sum. The linearity is calculated using the following equation:

$$(X_1 - X_2) \leq 0.10 (X_1 + X_2)$$

where X_1 and X_2 are the average ratios of exposure to the indicated timer setting.

(5) Exposure control location and operator protection.

(A) Each stationary X-ray system shall be required to have the X-ray exposure control permanently mounted in a protected area so that the operator is required to remain in that protected area during the entire exposure.

(B) Each mobile or portable X-ray system used for one week or longer in the same location, including a room or suite, shall meet the requirements of this regulation.

(C) Each mobile or portable X-ray system used for less than one week in the same location shall be provided either with a protective barrier that is at least two meters (6.5 feet) high for operator protection or with the means to allow the operator to be at least 2.7 meters (9 feet) from the tube housing assembly while making exposures.

(e) Reproducibility. When the equipment is operated with an adequate power supply as specified by the manufacturer, the estimated coefficient of variation of radiation exposures shall be no greater than 0.05 for any specific combination of selected technique factors.

(f) mA and mAs linearity. The requirements specified in this subsection shall apply when the equipment is operated with a power supply as specified by the manufacturer for any fixed X-ray tube potential within the range of 40 percent to 100 percent of the maximum rated mA or mAs.

(1) Equipment that provides for the independent selection of X-ray tube current (mA). The average ratios (X_1) of exposure to the indicated milliamperere-seconds product, in units of $C\text{ kg}^{-1}\text{ mAs}^{-1}$ (or mR/mAs), obtained at any two consecutive tube current settings shall not differ by more than 0.10 times their sum. The linearity is calculated using the following equation:

$$X_1 - X_2 \leq 0.10 (X_1 + X_2)$$

where X_1 and X_2 are the average values obtained at each of two consecutive tube current settings, or at two settings differing by no more than a factor of two if the tube current selection is continuous.

(2) Equipment that has a combined X-ray tube current-exposure time product (mAs) selector but not a separate tube current (mA) selector. The average ratios (X_1) of exposure to the indicated milliamperere-seconds product, in units of $C\text{ kg}^{-1}\text{ mAs}^{-1}$ (or mR/mAs), obtained at any two consecutive mAs selector settings shall not differ by more than 0.10 times their sum. The linearity is calculated using the following equation:

$$X_1 - X_2 \leq 0.10 (X_1 + X_2)$$

where X_1 and X_2 are the average values obtained at any two mAs selector settings, or at two settings differing by no more than a factor of two if the mAs selector provides continuous selection.

(3) Measuring compliance. Determination of compliance shall be based on 10 exposures taken within one hour, at each of two settings. These two settings may include any two focal spot sizes, unless one is equal to or less than 0.45 millimeters and the other is greater than 0.45 millimeters. For purposes of this regulation, “focal spot size” shall mean the nominal focal spot size specified by the X-ray tube manufacturer.

(g) Accuracy. The deviation of technique factors from the indicated values for kVp and exposure time, if time is independently selectable, shall not

exceed the limits specified for that system by its manufacturer. In the absence of manufacturer's specifications, the deviation shall not exceed 10 percent of the indicated value for kVp and 20 percent for time.

(h) Administrative controls.

(1) Patient-holding and film-holding devices shall be used when the techniques permit.

(2) The tube housing and the position indication device (PID) shall not be handheld during an exposure.

(3) Each X-ray system shall be operated so that the useful beam at the patient's skin does not exceed the requirements of this regulation.

(4) Dental fluoroscopy without image intensification shall not be used. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-248. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976; revoked Sept. 20, 1993.)

28-35-248a. Computed tomography (CT) X-ray systems. (a) Definitions. In addition to the definitions in part 1 of these regulations, the following definitions shall be applicable to this regulation:

(1) "Computed tomography dose index" and "CTDI" mean the integral from -7T to +7T of the dose profile along a line perpendicular to the tomographic plane divided by the product of the normal tomographic section thickness and the number of tomograms produced in a single scan, as follows:

$$\overline{\text{CTDI}} = \frac{1}{nT} \int_{-7T}^{+7T} D(z) dz$$

where:

- z = Position along a line perpendicular to the tomographic plan;
- D(z) = dose at position z;
- T = nominal tomographic section thickness;
- n = number of tomograms produced in a single scan.

This definition assumes that the dose profile is centered around z=0 and that, for a multiple tomogram system, the scan increment between adjacent scans is nT.

(2) "Contrast scale" and "CS" mean the change in the linear attenuation coefficient per CTN relative to water, as follows:

$$\overline{\text{CS}} = \frac{\mu_x - \mu_w}{\overline{\text{CTN}}_x - \overline{\text{CTN}}_w}$$

where:

- μ_x = Linear attenuation coefficient of the material of interest;
- μ_w = linear attenuation coefficient of water;
- $\overline{\text{CTN}}_x$ = average CTN of the material of interest;
- $\overline{\text{CTN}}_w$ = average CTN of water.

(3) "CT conditions of operation" means all selectable parameters governing the operation of a CT X-ray system including nominal tomographic section thickness, filtration, and technique factors.

(4) "CT gantry" means the tube housing assemblies, beam-limiting devices, and detectors and the supporting structures and frames that hold these components.

(5) "CT number" and "CTN" mean the number used to represent the X-ray attenuation associated with each elemental area of the CT image, as follows:

$$\overline{\text{CTN}} = \frac{k(\mu_x - \mu_w)}{\mu_w}$$

where:

- k = A constant, which is normally 1,000 when the Hounsfield scale of CTN is used;
- μ_x = linear attenuation coefficient of the material of interest; and
- μ_w = linear attenuation coefficient of water.

(6) "Dose profile" means the dose as a function of position along a line.

(7) "Elemental area" means the smallest area within a tomogram for which the X-ray attenuation properties of a body are depicted.

(8) "Multiple tomogram system" means a computed tomography X-ray system that obtains X-ray transmission data simultaneously during a single scan to produce more than one tomogram.

(9) "Noise" means the standard deviation of the fluctuations in CTN expressed as a percentage of the attenuation coefficient of water. Noise is estimated using the following equation:

$$S_n = \frac{100 \times \overline{\text{CS}} \times s}{\mu_w}$$

where:

- \overline{CS} = Linear attenuation coefficient of the material of interest;
- μ_w = linear attenuation coefficient of water; and
- s = standard deviation of the CTN of picture elements in a specified area of the CT image.

(10) "Nominal tomographic section thickness" means the full width at half-maximum of the sensitivity profile taken at the center of the cross-sectional volume over which the X-ray transmission data are collected.

(11) "Picture element" means an elemental area of a tomogram.

(12) "Reference plane" means a plane that is displaced from and parallel to the tomographic plane.

(13) "Scan" means the complete process of collecting X-ray transmission data for the production of a tomogram. Data can be collected simultaneously during a single scan for the production of one or more tomograms.

(14) "Scan increment" means the amount of relative displacement of the patient with respect to the CT X-ray system between successive scans measured along the direction of the displacement.

(15) "Scan sequence" means a preselected set of two or more scans performed consecutively under preselected CT conditions of operation.

(16) "Scan time" means the period of time between the beginning and the end of X-ray transmission data accumulation for a single scan.

(17) "Single tomogram system" means a CT X-ray system that obtains X-ray transmission data during a scan to produce a single tomogram.

(18) "Tomographic plane" means the geometric plane that is identified as corresponding to the output tomogram.

(19) "Tomographic section" means the volume of an object whose X-ray attenuation properties are imaged in a tomogram.

(b) Requirements for equipment.

(1) Termination of exposure.

(A) A means shall be provided to terminate the X-ray exposure automatically by either de-energizing the X-ray source or shuttering the X-ray beam if equipment failure affecting data collection occurs. This termination shall occur within an interval that limits the total scan time to no more than 110 percent of its preset value

through the use of either a backup timer or devices that monitor equipment function.

(B) A visible signal shall indicate when the X-ray exposure has been terminated as specified in paragraph (b)(1)(A).

(C) Each operator shall be able to terminate the X-ray exposure at any time during a scan, or series of scans under CT X-ray systems control, of greater duration than one-half second.

(2) Tomographic plane indication and alignment.

(A) For any single tomogram system, a means shall be provided to permit the visual determination of the tomographic plane or a reference plane offset from the tomographic plane.

(B) For any multiple tomogram system, a means shall be provided to permit the visual determination of the location of a reference plane. This reference plane can be offset from the location of the tomographic planes.

(C) If a device using a light source is used, the light source shall provide illumination levels sufficient to permit the visual determination of the location of the tomographic plane or reference plane under ambient light conditions of up to 500 lux.

(3) Beam-on and shutter-status indicators and control switches.

(A) The CT X-ray control and gantry shall provide a visual indication whenever X-rays are produced and, if applicable, whether the shutter is open or closed.

(B) Each emergency button or switch shall be clearly labeled as to its function.

(4) Indication of CT conditions of operation. The CT X-ray system shall be designed so that the CT conditions of operation to be used during a scan or a scan sequence shall be indicated before the initiation of a scan or a scan sequence. This requirement may be met by permanent markings on equipment that has all or some of these conditions of operation at fixed values. An indication of the CT conditions of operation shall be visible from any position from which scan initiation is possible.

(5) Extraneous radiation. When data are not being collected for image production, the radiation adjacent to the tube port shall not exceed the levels permitted in these regulations.

(6) Maximum surface CTDI identification. The angular position where the maximum surface CTDI occurs shall be identified to allow for the reproducible positioning of a CT dosimetry phantom.

(7) Additional requirements applicable to CT X-ray systems containing a gantry manufactured after September 3, 1985.

(A) The total error in the indicated location of the tomographic plane or reference plane shall not exceed five millimeters.

(B) If the X-ray production period is less than one-half second, the indication of X-ray production shall be actuated for at least one-half second. Indicators at or near the gantry shall be discernible from any point external to the patient opening where insertion of any part of the human body into the primary beam is possible.

(C) The deviation of the indicated scan increment versus the actual increment shall not exceed plus or minus one millimeter for any mass weighing from 0 to 100 kilograms and resting on the support device. The patient-support device shall be adjusted in increments from a typical starting position to the maximum distance or 30 centimeters, whichever is less, and then returned to the starting position. Measurement of actual versus indicated scan increment may be taken anywhere along this range of positions.

(D) Premature termination of the X-ray exposure by the operator shall necessitate the resetting of the CT conditions of operation before the initiation of another scan.

(c) Facility design requirements.

(1) Aural communication. Provision shall be made for two-way aural communication between the patient and the operator at the control panel.

(2) Viewing systems.

(A) Windows, mirrors, closed-circuit television, or an equivalent shall be provided to permit continuous observation of the patient during irradiation and shall be located so that the operator can observe the patient from the control panel.

(B) If the primary viewing system is an electronic means, an alternate viewing system, which may be electronic, shall be available for use if the primary viewing system fails.

(d) Surveys, calibrations, spot checks, and operating procedures.

(1) Surveys.

(A) All CT X-ray systems installed after the effective date of this regulation and those systems not previously surveyed shall have a survey performed by, or under the direction of, a qualified expert. In addition, the surveys shall be performed after each change in the facility or equipment that might cause a significant increase in radiation hazard.

(B) Each registrant shall obtain a written report of the survey from the qualified expert. The registrant shall make a copy of the report available to the department upon request.

(2) Radiation calibrations.

(A) The calibration of the radiation output of the CT X-ray system shall be performed by, or under the direction of, a qualified expert who is physically present at the facility during the calibration.

(B) The calibration of each CT X-ray system shall be performed at the intervals specified by a qualified expert and after any change or replacement of components that, in the opinion of the qualified expert, could cause any change in the radiation output.

(C) The calibration of the radiation output of each CT X-ray system shall be performed with a calibrated dosimetry system. The calibration of the system shall be traceable to a national standard. The dosimetry system shall have been calibrated within the preceding two years.

(D) One or more CT dosimetry phantoms shall be used in determining the radiation output of a CT X-ray system. Each phantom shall meet all of the following requirements and conditions of use:

(i) Each CT dosimetry phantom shall consist of right-circular cylinders of polymethyl methacrylate with a density of 1.19 plus or minus 0.01 grams per cubic centimeter. Each phantom shall be at least 14 centimeters in length and shall have a diameter of 32.0 centimeters for testing CT X-ray systems designed to image any section of the body and 16.0 centimeters for systems designed to image the head or for whole-body scanners operated in the head-scanning mode.

(ii) Each CT dosimetry phantom shall provide a means for the placement of one or more dosimeters along the axis of rotation and along a line parallel to the axis of rotation at 1.0 centimeter from the outer surface and within the phantom. A means for the placement of dosimeters or alignment devices at other locations may be provided.

(iii) The effect on the doses measured due to the removal of phantom material to accommodate dosimeters shall be accounted for, through appropriate corrections to the reported data by inclusion in the statement of maximum deviation for the value obtained using the phantom.

(iv) All dose measurements shall be performed with the CT dosimetry phantom placed on the patient couch or support device without additional attenuation materials present.

(E) Calibration shall be required for each type of head, body, or whole-body scan performed at the facility.

(F) Calibration shall meet all of the following requirements:

(i) The dose profile along the center axis of the CT dosimetry phantom for the minimum, maximum, and midrange values of the nominal tomographic section thickness used by the registrant shall be measurable. If fewer than three nominal tomographic thicknesses can be selected, the dose profile determination shall be performed for each available nominal tomographic section thickness.

(ii) The CTDI along the two axes shall be measured. The CT dosimetry phantom shall be oriented so that the measurement point at 1.0 centimeter from the outer surface and within the phantom is in the same angular position within the gantry as the point of maximum surface CTDI identified. The CT conditions of operation shall correspond to typical values used by the registrant.

(iii) The required spot checks shall be made.

(G) The calibration procedures shall be in writing. Records of all calibrations performed shall be maintained for inspection by the department.

(3) Spot checks.

(A) The spot check procedures shall be in writing and shall have been developed by a qualified expert.

(B) The spot check procedures shall incorporate the use of a CT dosimetry phantom that has a capability of providing an indication of contrast scale, noise, nominal tomographic section thickness, and the resolution capability of the system for low-contrast and high-contrast objects, and of measuring the mean CTN for water or other reference material.

(C) All spot checks shall be included in the calibration and shall be made at time intervals and under system conditions specified by a qualified expert.

(D) The spot checks shall include acquisition of images obtained with the CT dosimetry phantom or phantoms using the same processing mode and CT conditions of operation that are used to perform calibrations. The images shall be retained in two forms as follows, until a new calibration is performed:

(i) Photographic copies of the images obtained from the image display device; and

(ii) images stored in digital form on a storage medium compatible with the CT X-ray system.

(E) Written records of the spot checks per-

formed shall be maintained for inspection by the department.

(4) Operating procedures.

(A) The CT X-ray system shall not be operated except by an individual who has been specifically trained in its operation.

(B) Information shall be available at the control panel regarding the operation and calibration of the system. This information shall include the following:

(i) The dates of the latest calibration and spot checks and the location within the facility where the results of those tests can be obtained;

(ii) instructions on the use of the CT dosimetry phantom or phantoms, including the schedule of spot checks appropriate for the system, the allowable variations for the indicated parameters, and the results of at least the most recent spot checks conducted on the system;

(iii) the distance in millimeters between the tomographic plane and the reference plane, if a reference plane is utilized; and

(iv) a current technique chart available at the control panel that specifies, for each routine examination, the CT conditions of operation and the number of scans per examination. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-249. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended Sept. 20, 1993; revoked Dec. 30, 2005.)

28-35-250. (Authorized by K.S.A. 1975 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; revoked Sept. 20, 1993.)

28-35-250a. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993; revoked Dec. 30, 2005.)

28-35-251. Veterinary medicine radiography. (a) Equipment.

(1) One or more diaphragms or cones shall be provided for collimating the useful beam to the area of clinical interest.

(2) A device shall be provided to terminate the exposure at a preset time.

(3) A dead-man type of exposure switch shall be provided, together with an electrical cord of sufficient length so that the operator can stand outside of the useful beam and at least two meters or six feet from the animal during each X-ray exposure.

(b) Structural shielding. All wall, ceiling, and floor areas shall be equivalent to, or provided with the shielding or applicable protective barriers that are necessary to ensure compliance with K.A.R. 28-35-212a and K.A.R. 28-35-214a.

(c) Operating procedures.

(1) The operator shall stand outside of the useful beam and away from the animal during each radiographic exposure.

(2) No individual other than the operator shall be in the X-ray room while exposures are being made unless the individual's assistance is required.

(3) When an animal must be held in position during radiography, mechanical supporting or restraining devices shall be used if practical. If the animal must be held by an individual, that individual shall be protected with appropriate shielding devices, which may include protective gloves and an apron, and shall be positioned so that no part of the individual's body will be struck by the useful beam. The thickness of each shielding device used shall be the same as that required by K.A.R. 28-35-242a (a)(5) and (7). The exposure of any individual who consistently assists with restraining animals during radiography shall be monitored. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended Sept. 20, 1993; amended Dec. 30, 2005.)

APPENDIX A

28-35-252. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976; revoked Dec. 30, 2005.)

28-35-253. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993; revoked Dec. 30, 2005.)

28-35-254. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993; revoked Dec. 30, 2005.)

28-35-255. Healing arts screening. Each person who wants to conduct a healing arts screening program shall be required to obtain the secretary's written approval before initiating the program. Each person requesting that the secretary approve a healing arts screening program shall submit the following information and evaluations:

(a) The name and address of the applicant and, if applicable, the names and addresses of the applicant's agents within this state;

(b) the diseases or conditions for which the X-ray examinations are to be used in diagnoses;

(c) a detailed description of the X-ray examinations proposed in the screening program;

(d) a description of the population to be examined in the screening program, including age, sex, physical condition, and any other relevant information;

(e) an evaluation of any known alternate methods not involving ionizing radiation that could achieve the goals of the screening program and the reason why these methods are not used instead of the X-ray examinations;

(f) an evaluation by a qualified expert of the X-ray system or systems to be used in the screening program. The evaluation by the qualified expert shall show that each system meets all requirements of these regulations;

(g) a description of the quality control program for diagnostic film;

(h) a copy of the technique chart for the X-ray examination procedures to be used;

(i) the qualifications of each individual who would be operating each X-ray system;

(j) the qualifications of the individual who would be supervising the operators of the X-ray systems. The extent of supervision and the method of work performance evaluation shall be specified;

(k) the name and address of the individual who would interpret each radiograph;

(l) a description of all procedures to be used in advising each individual screened and the individual's private practitioner of the healing arts of the results of the screening procedure and any further medical needs indicated;

(m) a description of all procedures to be used for the retention or disposition of the radiographs and other records pertaining to each X-ray examination; and

(n) a specification of the proposed frequency of screening and the proposed duration of the entire screening program. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-256. Training for X-ray system operators. The following subjects shall be included in the training of X-ray equipment operators, as applicable:

(a) Familiarization with the following:

- (1) Identification of controls;
- (2) the function of each control; and
- (3) how to use technique charts;

(b) radiation protection using the following:

- (1) Collimation;
- (2) filtration;
- (3) gonad shielding and, if used, other patient protection devices;
- (4) restriction of X-ray tube radiation to the image receptor;
- (5) personnel protection; and
- (6) grids;
- (c) film processing, including the following:
 - (1) Film speed as related to the patient's exposure to radiation;
 - (2) film processing parameters; and
 - (3) a quality assurance program;
 - (d) emergency procedures, which shall include the termination of exposure if an automatic timing device fails;
 - (e) the proper use of personnel dosimetry, if required; and
 - (f) understanding the units of radiation. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 6. USE OF SEALED RADIOACTIVE SOURCES IN THE HEALING ARTS

28-35-261. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Dec. 30, 2005.)

28-35-262. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Dec. 30, 2005.)

28-35-263. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Dec. 30, 2005.)

28-35-264. General requirements. The provisions of 10 C.F.R. part 35, as in effect on September 9, 2015, are hereby adopted by reference, with the changes specified in this regulation.

- (a) For the purposes of part 6, "byproduct material" shall mean all radioactive material regulated by the department.
- (b) All reports required by this regulation shall be submitted to the department.
- (c) The following sections shall be deleted:
 - (1) 35.1, "purpose and scope";
 - (2) 35.2, "definitions," except that the definitions of the following terms shall be retained:

- (A) "Authorized medical physicist";
- (B) "authorized nuclear pharmacist";
- (C) "authorized user";
- (D) "medical event";
- (E) "prescribed dose"; and
- (F) "radiation safety officer";
- (3) 35.8, "information collection requirements: OMB approval";
 - (4) 35.18, "license issuance";
 - (5) 35.19, "specific exemptions";
 - (6) 35.26(a)(1), "radiation protection program changes";
 - (7) 35.4001, "violations"; and
 - (8) 35.4002, "criminal penalties."
- (d) Wherever the following C.F.R. references occur within 10 C.F.R. part 35, these references shall be replaced with the specified references to regulations and parts in this article:
 - (1) "10 CFR 19.12" shall be replaced with "K.A.R. 28-35-333, 'instructions to workers.'" "
 - (2) "10 CFR part 20" shall be replaced with "part 4, 'standards for protection against radiation.'" "
 - (3) "10 CFR 20.1101" shall be replaced with "K.A.R. 28-35-211d, 'radiation protection programs.'" "
 - (4) "10 CFR 20.1301(a)(1) and 20.1301(c)" shall be replaced with "K.A.R. 28-35-214a."
 - (5) "10 CFR 20.1501" shall be replaced with "K.A.R. 28-35-217b."
 - (6) "10 CFR part 30" shall be replaced with "part 3, 'licensing of sources of radiation.'" "
 - (7) "10 CFR 32.72" shall be replaced with "K.A.R. 28-35-181m, 'specific licenses to manufacture and distribute radiopharmaceuticals containing radioactive material for medical use under group licenses,' and K.A.R. 28-35-181n, 'specific licenses to manufacture and distribute generators or reagent kits for preparation of radiopharmaceuticals containing radioactive material.'" "
 - (8) "10 CFR 32.74" shall be replaced with "K.A.R. 28-35-181o, 'specific licenses to manufacture and distribute sources and devices for use as a calibration or reference source, or for certain medical uses.'" "
 - (9) "10 CFR 33.13" shall be replaced with "K.A.R. 28-35-182b, 'qualifications for a type A specific license of broad scope.'" "
- (e) Wherever the following terms occur within 10 C.F.R. part 35, these terms shall be replaced with "department":
 - (1) "Commission";
 - (2) "NRC operation center"; and
 - (3) "NRC regional office."

(f) The following changes shall be made to the sections specified:

(1) 35.6(b)(1) and (c)(1) shall be replaced with the following text:

“Obtain review and approval of the research as specified in 45 CFR 46.111, ‘criteria for IRB approval of research’; and”.

(2) 35.6(b)(2) and (c)(2) shall be replaced with the following text:

“Obtain informed consent from the human research subject as specified in 45 CFR 46.116, ‘general requirements for informed consent.’”

(3) 35.10, subsection (a) shall be deleted.

(4) In 35.10(d), the date “October 24, 2002” shall be replaced with “the effective date of these regulations.”

(5) 35.12(b)(1) shall be replaced with the following text: “submitting a form specified by the department that includes the facility diagram, equipment, and training and experience qualifications of the radiation safety officer, authorized users, authorized physicists, and authorized pharmacists.”

(6) 35.12(c)(1)(i) shall be replaced with the following text: “a form specified by the department that includes the facility diagram, equipment, and training and experience qualifications of the radiation safety officer, authorized users, authorized physicists, and authorized pharmacists.”

(7) In 35.57(a)(1) and (b)(1), the date “October 24, 2002” shall be replaced with “the effective date of these regulations.”

(8) In 35.57(a)(2) and (b)(2), the date “April 29, 2005” shall be replaced with “the effective date of these regulations.”

(9) In 35.432(a), the date “October 24, 2002” shall be replaced with “the effective date of these regulations.”

(10) In 35.3045, the footnote shall be deleted, and in subsection (a) the words “or any radiation-producing device” shall be added before the words “results in.”

(11) 35.3047(d) shall be replaced with the following text: “The licensee shall submit a written report to the department within 15 days after discovery of a dose to the embryo or fetus, or nursing child that requires a report in paragraphs (a) or (b) in this section.”

(12) In 35.3067, the phrase “with the department” shall be inserted after the word “report” in the first sentence, and the second sentence shall be deleted. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended March 18, 2011; amended May 4, 2018.)

PART 7. SPECIAL REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC OPERATIONS

28-35-273. (Authorized by K.S.A. 48-1607; effective Jan. 1, 1970; revoked, T-85-43, Dec. 19, 1984; revoked May 1, 1985.)

28-35-274. Applicability. (a) The regulations in this part shall apply to all persons who utilize sources of radiation for industrial radiography, except those persons who are licensed or registered in the state of Kansas to engage in the practice of the healing arts, dentistry, podiatry, or veterinary medicine. The requirements of this part shall be in addition to, and not in substitution for, the other requirements of these regulations.

(b) The requirements of K.A.R. 28-35-275, K.A.R. 28-35-277a, K.A.R. 28-35-279, K.A.R. 28-35-280, K.A.R. 28-35-287, and K.A.R. 28-35-291 shall apply to sealed radioactive sources only. The requirements of the other regulations in this part shall apply to both radiation machines and sealed radioactive sources. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1601 and K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-275. Limits on levels of radiation for radiographic exposure devices and storage containers. Radiographic exposure devices measuring less than four inches from the sealed source storage position to any exterior surface of the device shall have no radiation level in excess of 50 milliroentgens per hour at six inches from any exterior surface of the device. Radiographic exposure devices measuring four or more inches from the sealed source storage position to any exterior surface of the device, and all storage containers for sealed sources or outer containers for radiographic exposure devices, shall have no radiation level in excess of 200 milliroentgens per hour at any exterior surface, or in excess of 10 milliroentgens per hour at one meter from any exterior surface. The radiation level emanating from a device or container shall be measured with the sealed source in the shielded position. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-276. Locking sources of radiation. (a) Each radiographic exposure device shall have a lock or outer locked container designed to prevent

unauthorized or accidental removal of the sealed source from its shielded position. The exposure device or its container, or both, shall be kept locked when not under the direct surveillance of a radiographer or a radiographer's assistant except at permanent radiographic installations as specified in K.A.R. 28-35-285. In addition, during radiographic operations the sealed source assembly shall be secured in the shielded position each time the source is returned to that position.

(b) Each sealed source storage container and source changer shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. Storage containers and source changers shall be kept locked when containing sealed sources except when under the direct surveillance of a radiographer or a radiographer's assistant or when being transported.

(c) The control panel of each radiation machine shall be equipped with a lock that prevents the unauthorized use of an X-ray system or the accidental production of radiation. Each radiation machine shall be kept locked with the key removed at all times, except when the machine is under the direct visual surveillance of a radiographer or a radiographer's assistant.

(d) Storage precautions. All locked radiographic exposure devices, storage containers, and source changers shall be physically secured to prevent tampering or removal by unauthorized personnel. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-277. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; revoked Dec. 30, 2005.)

28-35-277a. Conducting industrial radiographic operations. (a) If radiography is performed at a location other than a permanent radiographic installation, the radiographer shall be accompanied by at least one other qualified radiographer or an individual who has at a minimum met the requirements specified in K.A.R. 28-35-289. The additional qualified individual shall observe the operations and shall be capable of providing immediate assistance to prevent unauthorized entry. Radiography shall not be performed if only one qualified individual is present.

(b) All radiographic operations shall be conducted in a permanent radiographic installation unless otherwise specifically authorized by the secretary.

(c) Except when physically impossible, collimators shall be used in industrial radiographic operations that use radiographic exposure devices that allow the source to be moved out of the device.

(d) Any licensee or registrant may conduct lay-barge, offshore-platform, or underwater radiography only if the licensee's or registrant's procedures have been approved by the secretary, the nuclear regulatory commission, or another agreement state. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-278. Radiation survey instruments. (a) Each licensee or registrant shall maintain calibrated and operable radiation survey instruments to make physical radiation surveys as required by this part. The instrumentation required by this subsection shall have a range capable of measuring two milliroentgens per hour through one roentgen per hour.

(b) Each radiation survey instrument shall be calibrated as follows:

(1) At energies appropriate for use;

(2) at intervals not to exceed six months and after each instrument servicing;

(3) with a demonstrated accuracy within plus or minus 20 percent; and

(4)(A) For linear scale instruments, at two points located approximately one-third and two-thirds of full scale on each scale;

(B) for logarithmic scale instruments, at mid-range of each decade and at two points of at least one decade; and

(C) for digital instruments, at three points between two and 1,000 mrem per hour.

(c) Each licensee or registrant shall maintain records of the calibrations specified in this regulation for two years after the calibration date. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-279. Leak testing, repair, tagging, opening, modification, and replacement of sealed sources. (a) The replacement of any sealed source fastened to, or contained in, a radiographic exposure device, leak testing, repair, tagging, opening, and any other action involving a sealed source shall be performed only by persons

specifically authorized to do so by the department, the United States nuclear regulatory commission, or an agreement state.

(b) Each sealed source shall be tested for leakage at intervals not to exceed six months. In the absence of a certificate from a transferor that a leak test has been made within the six-month period before transfer, the sealed source shall not be put into use until leak tested.

(c) The leak test shall be capable of detecting the presence of 0.005 microcuries of removable contamination. Leak tests shall be performed by wiping appropriate accessible surfaces and measuring the level of transferred contamination on the wipes. Records of leak test results shall be kept in units of microcuries and maintained for two years.

(d) If any leak test reveals the presence of 0.005 microcuries or more of removable radioactive material, the sealed source shall be considered to be leaking. The licensee shall immediately withdraw the equipment involved from use and shall cause the equipment to be decontaminated and repaired, or to be disposed of, in accordance with these regulations. Within five days after obtaining results of any leak test indicating a leaking source, the licensee shall file a report with the department describing the equipment involved, the test results, and the corrective action taken, if any.

(e)(1) Each exposure device using depleted uranium (DU) shielding and an S-tube configuration shall be tested for DU contamination at least each 12 months. The test shall be capable of detecting the presence of 0.005 microcuries of radioactive material on the test sample and shall be performed by a person specifically authorized to perform the test by the department, the nuclear regulatory commission, or another agreement state. The records of each DU contamination test shall be retained for two years.

(2) If the test reveals the presence of DU contamination, the exposure device shall be removed from use until an evaluation of any degeneration of the S-tube is made. If the evaluation reveals that the S-tube is worn through, the device shall not be used again. DU-shielded devices shall not be required to be tested for DU contamination while in storage and not in use. Before using or transferring the device, the device shall be tested for DU contamination if the interval of storage exceeded 12 months. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec.

19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-280. Quarterly inventory. Each licensee shall conduct a quarterly inventory to account for all sealed sources and for all devices containing depleted uranium received or possessed by the licensee. The licensee shall maintain these inventory records for two years following the date of the inventory and shall include the following information:

(a) The quantities and kinds of sources and devices containing depleted uranium inventoried;

(b) the location of the sources and devices containing depleted uranium at the time of inventory; and

(c) the date on which the inventory was conducted. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-281. Utilization logs. (a) Each licensee or registrant shall maintain a log for each source of radiation, which shall contain the following information:

(1) The make and model number, or a detailed description, of the source of radiation or storage container to which the log pertains;

(2) the name and signature of the radiographer to whom the source or container is assigned;

(3) the plant or site where the source or container is used;

(4) the date or dates when the source or container is used; and

(5) the voltage, current, and exposure time for each radiographic exposure made with a radiation machine.

(b) Each licensee or registrant shall retain the logs required by this regulation for three years. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-282. General requirements. (a) Each radiographer's assistant shall be under the personal supervision of a radiographer when using any radiographic exposure device, any associated equipment, or a sealed source, or while conducting radiation surveys to determine that the sealed source has returned to the shielded position or that the radiation machine is shut off after each exposure. The personal supervision shall include the following:

(1) The radiographer's physical presence at the site where the sources of radiation are being used;

(2) the availability of the radiographer to provide immediate assistance, if required; and

(3) the radiographer's direct observation of the assistant's performance of the operations.

(b) Each licensee or registrant shall conduct an internal audit program to ensure that the agency's radioactive material license conditions and the licensee's or registrant's operating and emergency procedures are followed by each radiographer and radiographer's assistant. These internal audits shall be performed at least quarterly, and each radiographer shall be audited at least quarterly. A record of each internal audit shall be maintained for departmental inspection for two years after the date of the audit. (Authorized by and implementing K.S.A. 48-1607; effective Jan 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-282a. Inspection and maintenance of radiation machines, radiographic exposure devices, transport and storage containers, associated equipment, source changers, and survey instruments. (a) Each licensee or registrant shall perform visual and operability checks on the survey meters, radiation machines, radiographic exposure devices, each transport and storage container, and any associated equipment and source changers before each day's use, or each work shift, to ensure that all of the following conditions are met:

(1) The equipment is in good working condition.

(2) The sources are shielded.

(3) The required labeling is present.

(b) Survey instrument operability shall be performed by using check sources or other appropriate means.

(c) If equipment problems are found, the equipment shall be removed from service until repaired.

(d) Each licensee or registrant shall have written procedures for and shall perform inspections and routine maintenance on the radiation machines, radiographic exposure devices, source changers, associated equipment, transport and storage containers, and survey instruments. The inspections and maintenance shall occur at least every three months or before the next use to ensure the proper functioning of components

important to safety. If equipment problems are found, the equipment shall be removed from service until repaired.

(e) The licensee's inspection and maintenance program shall include procedures to ensure that type B packages are shipped and maintained in accordance with the certificate of compliance or other type of approval.

(f) Each licensee or registrant shall maintain records of inspection, equipment problems, and any maintenance performed under this regulation for three years. These records shall indicate the following:

(1) The date of the check or inspection;

(2) the name of the inspector;

(3) the equipment modified;

(4) any problems found; and

(5) any repairs needed and any maintenance and equipment problems found. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-282b. Permanent radiographic installations. (a) Each entrance that is used for access by personnel to the high-radiation area in a permanent radiographic installation shall have either of the following:

(1) An entrance control of the type described in K.A.R. 28-35-219a that causes the radiation level upon entry into the area to be reduced; or

(2) both conspicuous visible and audible warning signals to warn of the presence of radiation. The visible signal shall be actuated by radiation whenever the source is exposed or the machine is energized. The audible signal shall be actuated whenever an attempt is made to enter the installation while the source is exposed or the machine is energized.

(b) The alarm system shall be tested for proper operation with a radiation source each day before the installation is used for radiographic operations. The test shall include a check of both the visible and audible signals. Entrance control devices that reduce the radiation level upon entry as specified in paragraph (a) (1) shall be tested monthly.

(c) If an entrance control device or an alarm is operating improperly, the device or alarm shall be immediately labeled as defective and repaired within seven calendar days. The facility may continue to be used during this seven-day period, if the licensee or registrant implements the continuous surveillance requirements of K.A.R. 28-35-285 and uses an alarming ratemeter.

(d) The test records for entrance controls and audible and visual alarms shall be maintained for three years. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-282c. Labeling, storage, and transportation. (a) The licensee shall not use a source changer or storage container to store radioactive material unless the source changer or the storage container has securely attached to it a durable, legible, and clearly visible label that meets the following requirements:

- (1) Bears the standard trefoil radiation caution symbol in conventional colors, which shall include magenta, purple, and black on a yellow background;
- (2) has a minimum diameter of 25 mm; and
- (3) displays the following wording:

CAUTION [or "DANGER"]
RADIOACTIVE MATERIAL
NOTIFY CIVIL AUTHORITIES
[or "NAME OF COMPANY"]

(b) The licensee shall not transport radioactive material unless the material is packaged and the package is labeled, marked, and accompanied with appropriate shipping papers in accordance with U.S. department of transportation regulations.

(c) Radiographic exposure devices, source changers, storage containers, and radiation machines shall be physically secured to prevent tampering or removal by unauthorized personnel. The licensee shall store all radioactive material in a manner that will minimize danger from explosion or fire.

(d) The licensee shall lock and physically secure all transport packages containing radioactive material in the transporting vehicle to prevent accidental loss, tampering, and unauthorized removal.

(e) The licensee's name and the name of the city or town where the main business office is located shall be prominently displayed by affixing a durable, clearly visible label on each side of any vehicle used to transport radioactive material or radiation machines for temporary use at a job site. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-282d. Radiation safety officer. Each radiation safety officer shall ensure that radiation safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the licensee's or registrant's program.

(a) The minimum qualifications, training, and experience for a radiation safety officer for industrial radiography shall be the following:

- (1) Completion of the training and testing requirements of K.A.R. 28-35-289;
- (2) 2,000 hours of hands-on experience as a qualified radiographer in industrial radiographic operations; and
- (3) formal training in the establishment and maintenance of a radiation protection program.

(b) Alternatives to the requirements specified in subsection (a) may be considered by the secretary if the radiation safety officer has training and experience in the field of ionizing radiation and, in addition, has adequate formal training with respect to the establishment and maintenance of a radiation safety protection program.

(c) The specific duties and authorities of the radiation safety officer shall include the following:

(1) Establishing and overseeing all operating, emergency, and ALARA procedures as required by part 4 of these regulations and reviewing the procedures regularly to ensure that the procedures conform to the department's regulations and to the license or registration conditions;

(2) overseeing and approving the training program for radiographic personnel to ensure that appropriate and effective radiation protection practices are taught;

(3) ensuring that required radiation surveys and leak tests are performed and documented in accordance with these regulations, including any corrective measures when levels of radiation exceed established limits;

(4) ensuring that personnel monitoring devices are calibrated, if applicable, and used properly, that records are kept of the monitoring results, and that timely notifications are made as required by part 4 of these regulations; and

(5) ensuring that operations are conducted safely and for implementing corrective actions including terminating operations.

(d) Each licensee and registrant shall have two years after the effective date of this regulation to meet the requirements of K.A.R. 28-35-282a and K.A.R. 28-35-282b. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-283. Operating and emergency procedures. (a) At a minimum, the operating and emergency procedures of each licensee or registrant shall include instructions in the following areas:

(1) The proper handling and use of sources of radiation, so that no person is likely to receive a radiation exposure in excess of the limits specified in part 4 of these regulations;

(2) the methods of, and occasions for, conducting radiation surveys;

(3) the methods of controlling access to areas where radiography is being performed;

(4) the methods of, and occasions for, locking and securing sources of radiation, transport containers, storage containers, and exposure devices;

(5) personnel monitoring and the use of personnel-monitoring equipment, including steps that shall be taken immediately by radiography personnel if a pocket dosimeter is found to be off-scale;

(6) transporting sources of radiation to field locations, including packing sources of radiation in a vehicle, posting signs or placards on a vehicle in which a source of radiation is to be transported, and controlling sources of radiation during transportation;

(7) the procedures for minimizing the exposure of individuals if an accident, including a source disconnect, transport accident, or loss of a source of radiation, occurs;

(8) source recovery procedures if the licensee will perform source recoveries;

(9) the procedures for notifying the appropriate persons if an accident occurs;

(10) the maintenance of records; and

(11) the inspection, maintenance, and operability checking of radiographic exposure devices, storage containers, transport containers, radiation machines, survey instruments, and alarming ratemeters.

(b) Each licensee shall maintain a copy of the current operating and emergency procedures until the department terminates the license. A copy of all superceded operating and emergency procedures shall be maintained for three years after the procedures have been superceded. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005.)

28-35-284. Personnel monitoring. (a) The licensee or registrant shall not permit any individual to act as a radiographer or a radiographer's assistant unless, at all times during radiographic operations, each individual wears on the trunk of the body a personnel-monitoring device

(PMD) as specified in K.A.R. 28-35-217a, a direct reading dosimeter, and an alarming ratemeter. At permanent radiographic installations where other appropriate alarming or warning devices are in routine use and during radiographic operations using radiation machines, the use of an alarming ratemeter shall not be required.

(1) Each pocket ion-chamber dosimeter shall have a range from zero to 200 mrem and shall be recharged at the start of each work shift. Electronic personal dosimeters may be used in place of only pocket ion-chamber dosimeters.

(2) Each PMD shall be assigned to and worn by only one individual.

(3) Each PMD shall be exchanged at least monthly.

(4) After replacement, each PMD shall be returned to the supplier for processing within 14 calendar days after the end of the monitoring period, or as soon as practicable. In circumstances that make it impossible to return each PMD within 14 calendar days, these circumstances shall be documented and available for review by the department.

(b) Direct reading dosimeters, including pocket ion-chamber dosimeters and electronic personal dosimeters, shall be read and the exposures shall be recorded at the beginning and end of each work shift, and records shall be maintained for two years.

(c) All pocket ion-chamber dosimeters and electronic personal dosimeters shall be checked at least each 12 months for the proper response to and the accurate measurement of radiation, and records shall be maintained for two years. An acceptable reading on each dosimeter shall be within plus or minus 30 percent of the true radiation exposure.

(d) If an individual's pocket ion-chamber dosimeter is found to be off-scale or if an electronic personal dosimeter reads greater than 200 mrem, the individual's PMD shall be sent for processing within 24 hours. In addition, the individual shall not resume any work associated with the use of sources of radiation until a determination of the amount of individual's radiation exposure is made. This determination shall be made by the radiation safety officer or the radiation safety officer's designee. The results of this determination shall be included in the records.

(e) If an individual's PMD is lost or damaged, the individual shall cease work immediately until a replacement PMD is provided and the exposure

is calculated for the time period from issuance to loss or damage of the PMD. The results of the calculated exposure and the time period during which the PMD was lost or damaged shall be included in the records.

(f) Each licensee or registrant shall ensure that each alarming ratemeter meets the following requirements:

(1) Is checked to ensure that the alarm functions properly before using at the start of each shift;

(2) is set to give an alarm signal at a preset dose rate of 500 mrem per hour, with an accuracy of plus or minus 20 percent of the true radiation dose rate;

(3) requires a special means to change the pre-set alarm function; and

(4) is calibrated at least each 12 months for the accurate measurement of radiation.

(g) Records of personnel-monitoring procedures. Each licensee or registrant shall maintain the following exposure records:

(1) Direct reading dosimeter readings and yearly operability checks for two years after the record is made;

(2) records of alarm ratemeter calibrations for two years after the record is made;

(3) PMD results received from the accredited NVLAP processor until the department terminates the license; and

(4) records of exposure estimates as a result of any direct reading dosimeter that reads off-scale or any lost or damaged personnel-monitoring equipment, until the department terminates the license. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-285. Surveillance. During each radiographic operation, the radiographer or radiographer's assistant shall maintain direct visual surveillance of the operation to protect against unauthorized entry into the high-radiation area, except under either of the following circumstances:

(a) If the high-radiation area is equipped with a control device or an alarm system as specified in K.A.R. 28-35-219a; or

(b) if the high-radiation area is locked to protect against unauthorized or accidental entry. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19,

1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-286. Posting. Any area in which radiography is being performed shall be conspicuously posted in the manner required by K.A.R. 28-35-219a. (Authorized by and implementing K.S.A. 1984 Supp. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-287. Radiation surveys and survey records. (a) No radiographic operation shall be conducted unless calibrated and operable radiation survey instruments, as specified in K.A.R. 28-35-278, are available and used at each site where radiographic exposures are made.

(b) A survey using a radiation survey instrument shall be made after each radiographic exposure to determine that the sealed source has been returned to its shielded position. The entire circumference of the radiographic exposure device shall be surveyed. If the radiographic exposure device has a source guide tube, the survey shall include the guide tube.

(c) Before securing in a storage area any radiographic exposure device, storage container, or source changer in the manner specified in K.A.R. 28-35-276, a survey using a radiation survey instrument shall be made to determine that each sealed source is in the shielded position.

(d) A record shall be kept of each survey performed for two years to comply with this regulation. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended Jan. 1, 1972; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-288. Special requirements and exemptions for enclosed radiography. (a) Each licensee or registrant shall ensure that each system for enclosed radiography that is designed to allow the admittance of any individual meets the following requirements:

(1) Meets all applicable requirements of this part and K.A.R. 28-35-214a if the system is not a certified cabinet X-ray system;

(2) meets all applicable requirements of this part and has been certified by the U.S. food and drug administration (FDA) as compliant with the requirements in 21 C.F.R. 1020.40, if the system is a certified cabinet X-ray system; and

(3) is evaluated, at intervals not to exceed one year, to ensure compliance with the applicable

requirements specified in paragraphs (1) or (2) of this subsection. A record of each evaluation shall be maintained for two years after the evaluation.

(b) Each cabinet X-ray system designed to exclude any individual shall be exempt from the requirements of K.A.R. 28-35-276, K.A.R. 28-35-278, K.A.R. 28-35-281, K.A.R. 28-35-282, K.A.R. 28-35-283, K.A.R. 28-35-284, K.A.R. 28-35-285, K.A.R. 28-35-286, and K.A.R. 28-35-289, with the following exceptions:

(1) Operating personnel shall be provided with personnel-monitoring equipment as specified in K.A.R. 28-35-217a.

(2) A registrant shall not permit any individual to operate a cabinet x-ray system until that individual has received a copy of and instruction in the operating procedures for the unit and has demonstrated competence in its use. A record that demonstrates compliance with this paragraph shall be maintained for inspection by the department until disposition is authorized by the department.

(3) A test for proper operation of each high-radiation area control device or alarm system, where applicable, shall be conducted and recorded as specified in K.A.R. 28-35-288.

(c) Each permanent radiographic installation having any high-radiation area entrance control of the type specified in K.A.R. 28-35-219a shall also meet the following requirements:

(1) Each entrance that is used for personnel access to the high-radiation area in a permanent radiographic installation shall have both a visible and an audible warning signal to warn of the presence of radiation.

(2) The visible signal shall be activated by radiation whenever the source is exposed. The audible signal shall be activated if an attempt is made to enter the installation while the source is exposed.

(d) The control device or alarm system shall be tested for proper operation at the beginning of each period of use. A record of each test shall be prepared quarterly or before the first use after the end of the quarter. Each record shall be maintained for inspection by the department until the secretary authorizes disposal of the record. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Sept. 20, 1993; amended Dec. 30, 2005; amended May 4, 2018.)

28-35-289. Training requirements. (a) The licensee or registrant shall not permit any individual to act as a radiographer until the individual has completed both of the following:

(1) At least 40 hours of training in the subjects specified in subsection (g) of this regulation; and

(2) one of the following types of on-the-job training consisting of hands-on experience under the supervision of a radiographer and certification through a radiographer certification program by a certifying entity as specified in K.A.R. 28-35-293:

(A) If the individual will be performing industrial radiography utilizing radioactive material, on-the-job training that includes at least two months or 320 hours of active participation in the performance of industrial radiography utilizing radioactive material;

(B) if the individual will be performing industrial radiography utilizing radiation machines, on-the-job training that includes at least one month or 160 hours of active participation in the performance of industrial radiography utilizing radiation machines; or

(C) if the individual will be performing industrial radiography utilizing radioactive material and radiation machines, both segments of the on-the-job training specified in paragraphs (a)(2) (A) and (B).

(b) The licensee or registrant shall not permit any individual to act as a radiographer until the individual meets the following requirements:

(1) Has received the following:

(A) A copy of and instruction in the requirements contained in this part;

(B) a copy of the applicable portions of parts 4 and 10 of these regulations;

(C) the license or registration under which the radiographer will perform industrial radiography; and

(D) a copy of the licensee's or registrant's operating and emergency procedures;

(2) has demonstrated an understanding of the material listed in paragraphs (b)(1) (A) through (D) by successful completion of a written or oral examination;

(3) has received training in the use of the registrant's radiation machines, or the licensee's radiographic exposure services and sealed sources, in the daily inspection of devices and associated equipment and in the use of radiation survey instruments; and

(4) has demonstrated an understanding of the use of the equipment specified in paragraph (b)

(3) by successful completion of a practical examination.

(c) The licensee or registrant shall not permit any individual to act as a radiographer's assistant until the individual meets the following requirements:

(1) Has received the following:

(A) A copy of and instruction in the requirements contained in this part;

(B) a copy of the applicable portions of parts 4 and 10 of these regulations;

(C) the license or registration under which the radiographer's assistant will perform industrial radiography; and

(D) a copy of the licensee's or registrant's operating and emergency procedures;

(2) has demonstrated an understanding of the material listed in paragraphs (c)(1) (A) through (D) by successful completion of a written or oral examination;

(3) under the personal supervision of a radiographer, has received training in the use of the registrant's radiation machines, or the licensee's radiographic exposure devices and sealed sources, in the daily inspection of devices and associated equipment and in the use of radiation survey instruments; and

(4) has demonstrated an understanding of the use of the equipment specified in paragraph (c) (3) by successful completion of a practical examination.

(d) Each radiographer and radiographer's assistant shall receive the annual refresher safety training at least every 12 months.

(e) The radiation safety officer or designee shall conduct an inspection program of the job performance of each radiographer and radiographer's assistant to ensure that the department's regulations, the license or registration requirements, and the operating and emergency procedures are followed. Alternatives may be considered by the secretary if the individual serves as both radiographer and radiation safety officer. In those operations in which a single individual serves as both radiographer and radiation safety officer and performs all radiography operations, an inspection program shall not be required. The inspection program shall include the following:

(1) Observation of the performance of each radiographer and radiographer's assistant during an actual industrial radiographic operation, at least every six months; and

(2) a provision that, if a radiographer or a radiographer's assistant has not participated in an

industrial radiographic operation for more than six months since the last inspection, the radiographer shall demonstrate knowledge of the training requirements of paragraph (b)(3) and the radiographer's assistant shall demonstrate knowledge of the training requirements of paragraph (c)(3) by a practical examination before these individuals are allowed to participate in a radiographic operation.

(f) Each licensee or registrant shall maintain the following:

(1) Records of the training of each radiographer and radiographer's assistant. These records shall include radiographer certification documents and verification of certification status, copies of written tests, dates of oral and practical examinations, the names of individuals conducting and receiving the oral and practical examinations, a list of the subjects tested, and the results of the oral and practical examinations; and

(2) records of annual refresher safety training and semiannual inspections of job performance for each radiographer and each radiographer's assistant. These records shall list the topics discussed during the refresher safety training, the date or dates on which the annual refresher safety training was conducted, and the names of the instructors and attendees. For inspections of job performance, the records shall also include a list showing the items checked and any noncompliance observed by the radiation safety officer.

(g) The training of each licensee or registrant shall include information about the following:

(1) Fundamentals of radiation safety, including the following:

(A) The characteristics of gamma radiation and X-radiation;

(B) the units of radiation dose and activity;

(C) the hazards of exposure to radiation;

(D) the levels of radiation from different sources of radiation; and

(E) the methods of controlling radiation dose using time, distance, and shielding;

(2) radiation detection instruments, including the following:

(A) The use, operation, calibration, and limitations of radiation survey instruments;

(B) survey techniques; and

(C) the use of personnel-monitoring equipment;

(3) the equipment to be used, including the following:

(A) The operation and control of radiographic exposure equipment, remote handling equip-

ment, and storage containers, including pictures or models of source assemblies;

(B) the operation and control of radiation machines;

(C) the storage, control, and disposal of sources of radiation; and

(D) inspection and maintenance of equipment;

(4) the requirements of state and federal regulations; and

(5) case histories of accidents in radiography. (Authorized by and implementing K.S.A. 48-1607; effective Jan. 1, 1970; amended May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Dec. 30, 2005; amended July 27, 2007.)

28-35-290. Reports of incidents or of lost or stolen sources. (a) Each licensee or registrant shall provide a written report of all events involving radiography devices and licensed material as specified in K.A.R. 28-35-184b, K.A.R. 28-35-228a, K.A.R. 28-35-229a, and K.A.R. 28-35-230a.

(b) In addition to the requirements in subsection (a), each licensee or registrant shall provide a written report to the department within 30 days after the occurrence of any of the following incidents involving radiographic equipment:

(1) Unintentional disconnection of the source assembly from the control cable;

(2) inability to retract the source assembly to its fully shielded position and secure the source assembly in this position; or

(3) failure of any component that is critical to safe operation of the device to perform its intended function.

(c) Each licensee or registrant shall include the following information with each report submitted under subsection (b):

(1) A description of the equipment problem;

(2) a description of the cause of each incident, if known;

(3) the name of the manufacturer and the model number of the equipment involved in the incident;

(4) the place, time, and date of incident;

(5) a description of the actions taken to establish normal operations;

(6) a description of all corrective actions taken or planned to prevent reoccurrence; and

(7) a description of the qualifications of the personnel involved in the incident.

(d) Each report of overexposure submitted pursuant to these regulations that involves failure of the safety components of radiography equipment

shall also include the information specified in subsection (c).

(e) Each licensee or registrant conducting radiographic operations or storing sources of radiation at any location not listed on the license or registration for a period in excess of 180 days in a calendar year shall notify the department before exceeding the 180 days. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; amended Dec. 30, 2005.)

28-35-291. Performance requirements for radiography equipment. (a) Each radiographic exposure device and all associated equipment shall have been certified by the NRC as compliant with the requirements specified in “radiological safety for design and construction of apparatus for gamma radiography,” published by the American national standards institute as NBS handbook 136, issued January 1981, ANSI N432-1980 standards. As an alternative, any licensee or applicant may submit an engineering analysis demonstrating that testing previously performed on similar individual radiography components is adequate to support a finding that the previous testing is an acceptable substitute for that described in the N432-1980 standards.

(b) In addition to the requirements specified in subsection (a), the licensee shall ensure that each radiographic exposure device and all associated equipment meet the following requirements.

(1) Each user of a radiographic exposure device shall attach to the device a durable, legible, clearly visible label bearing the following information:

(A) The chemical symbol and mass number of the radionuclide in the device;

(B) the radioactive activity level and the date on which this activity was last measured;

(C) the model number and serial number of the sealed source;

(D) the manufacturer of the sealed source; and

(E) the licensee’s name, address, and telephone number.

(2) Each radiographic exposure device intended for use as a type B transport container shall have been certified by the NRC as compliant with the applicable requirements of 10 C.F.R. 71.51.

(3) The licensee shall not modify any exposure device or associated equipment in a manner that compromises the design safety features of the system.

(c) In addition to the requirements specified in subsections (a) and (b), the licensee shall ensure that each radiographic exposure device and the

associated equipment that allows the source to be moved out of the device for routine operation meet the following requirements.

(1) The coupling between the source assembly and the control cable shall be designed so that the source assembly cannot become disconnected if cranked outside the guide tube. The coupling shall be designed to prevent an unintentional disconnection under normal conditions and reasonably foreseeable abnormal conditions.

(2) The device shall automatically secure the source assembly when the source assembly is cranked back into the fully shielded position in the device. A deliberate operation on the exposure device shall be required to release the source assembly.

(3) The outlet fitting, lock box, and drive cable fittings on each radiographic exposure device shall be equipped with safety plugs or covers, which shall be installed during storage and transportation to protect the source assembly from water, mud, sand, and other foreign matter.

(4) Each sealed source or source assembly shall have attached to it or engraved on it a durable, legible, visible label with these words: "DANGER RADIOACTIVE." The label shall not interfere with the safe operation of the exposure device or the associated equipment.

(5) Each sealed source that is not fastened to, or contained in, a radiographic exposure device shall have a durable tag permanently attached to the sealed source. The tag shall measure at least one square inch and shall bear the radiation symbol described in K.A.R. 28-35-219a and, at a minimum, the following instructions: "Danger—Radioactive Material—Do Not Handle—Notify Civil Authorities If Found."

(6) The guide tube shall have passed the crushing tests for the control tube as specified in ANSI N432-1980 standards and a kinking resistance test that closely approximates the kinking forces likely to be encountered during use.

(7) Guide tubes shall be used when moving the source out of the device.

(8) An exposure head or similar device shall be used to prevent the source assembly from passing out of the end of the guide tube during radiographic operations.

(9) The guide tube exposure head connection shall be able to withstand the tensile test for control units specified in ANSI N432-1980 standards.

(10) Each source changer shall provide a system for ensuring that the source can not accidentally

be withdrawn from the changer when connecting or disconnecting the drive cable to or from a source assembly.

(d) Each licensee shall ensure that all newly manufactured radiographic exposure devices and the associated equipment acquired after January 10, 1995 meet the requirements of this regulation.

(e) Each licensee shall ensure that all radiographic exposure devices and associated equipment used by the licensee after January 10, 1995 meet the requirements of this regulation.

(f) Any licensee may use equipment in industrial radiographic operations that does not comply with section 8.9.2(c) of the endurance test in ANSI N432-1980 standards, if prototype equipment has been tested using a torque that an individual using the radiography equipment can realistically exert on the lever or crankshaft of the drive mechanism. (Authorized by and implementing K.S.A. 48-1607; effective Nov. 1, 1996; amended Dec. 30, 2005.)

28-35-292. Location of documents and records. (a) Each licensee or registrant shall maintain copies of records required by this part and other applicable parts of these regulations.

(b) Each licensee or registrant shall also maintain current copies of the following documents or records sufficient to demonstrate compliance at each applicable field station and each temporary job site:

(1) The license or registration authorizing the use of sources of radiation;

(2) a copy of parts 1, 4, 7, and 10 of these regulations;

(3) the utilization logs for each source of radiation dispatched from that location;

(4) the records of any equipment problems identified in daily checks of equipment;

(5) the records of alarm systems and entrance control checks, if applicable;

(6) the records of all dosimeter readings;

(7) the operating and emergency procedures;

(8) evidence of the latest calibration of the radiation survey instruments in use at the site;

(9) evidence of the latest calibrations of alarming ratemeters and operability checks of dosimeters;

(10) the survey records for the period of operation at the site;

(11) the shipping papers for the transportation of radioactive materials; and

(12) when operating under reciprocity pursuant to part 3 of these regulations, a copy of the applicable state license or registration, or nuclear

regulatory commission license authorizing the use of sources of radiation. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

28-35-293. Requirements for an independent certifying organization. (a) Each independent certifying organization shall be required to meet the following conditions in order to be recognized by the secretary:

(1) Be an organization, including a society or association, whose members participate in, or have an interest in, the field of industrial radiography;

(2) make membership in the organization available to the general public nationwide. Membership shall not be restricted because of race, color, religion, sex, age, national origin, or disability;

(3) have a certification program that is open to nonmembers as well as members;

(4) be an incorporated, nationally recognized organization that is involved in setting national standards of practice within its fields of expertise;

(5) have an adequate staff, a viable system for financing its operations, and a policy-making and decision-making review board;

(6) have a set of written organizational bylaws and policies that provide adequate assurance of lack of conflict of interest and a system for monitoring and enforcing those bylaws and policies;

(7) have a committee, whose members shall carry out their responsibilities impartially, to review and approve the certification guidelines and procedures and to advise the organization's staff in implementing the certification program;

(8) have a committee, whose members shall carry out responsibilities impartially, to review complaints against certified individuals and to determine appropriate sanctions;

(9) have written procedures describing all aspects of the organization's certification program and maintain records of the current status of each individual's certification and the administration of the organization's certification program;

(10) have procedures to ensure that certified individuals are provided due process with respect to the administration of its certification program, including the process of becoming certified and any sanctions imposed against certified individuals;

(11) have procedures for proctoring examinations, including qualifications for proctors. These procedures shall ensure that the individuals proctoring each examination are not employed by the same company or corporation, or by a wholly

owned subsidiary of the company or corporation, as that of any of the examinees;

(12) exchange information about certified individuals with the nuclear regulatory commission, other independent certifying organizations, and agreement states and allow periodic review of the organization's certification program and related records; and

(13) provide a description to the nuclear regulatory commission of the organization's procedures for choosing examination sites and for providing an appropriate examination environment.

(b) Each certification program recognized by the secretary shall meet the following requirements:

(1) Require applicants for certification to meet the following requirements:

(A) Receive training in the topics specified in K.A.R. 28-35-289 or in equivalent state or nuclear regulatory commission regulations; and

(B) satisfactorily complete a written examination covering the topics specified in paragraph (b) (1)(A);

(2) require each applicant for certification to provide documentation demonstrating that the applicant meets the following requirements:

(A) Receives training in the topics specified in K.A.R. 28-35-289 or in equivalent state or nuclear regulatory commission regulations;

(B) has satisfactorily completed a minimum period of on-the-job training as specified in K.A.R. 28-35-289; and

(C) receives verification by a state licensee or registrant or a nuclear regulatory commission licensee that the applicant has demonstrated the capability of independently working as a radiographer;

(3) include procedures to ensure that all examination questions are protected from wrongful disclosure;

(4) include procedures for denying an application and for revoking, suspending, and reinstating a certification;

(5) provide a certification period of at least three years and not more than five years;

(6) include procedures for renewing certifications and, if the procedures allow renewals without examination, require evidence of recent full-time employment and annual refresher training; and

(7) provide a timely response to inquiries from members of the public about an individual's certification status; and

(8) have requirements for written examinations that meet the following requirements:

(A) Are designed to test an individual's knowledge and understanding of the topics specified in K.A.R. 28-35-289 or in equivalent state or nuclear regulatory commission regulations;

(B) are written in a multiple-choice format; and

(C) have test items drawn from a question bank containing psychometrically valid questions based on the material specified in K.A.R. 28-35-289. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 8. RADIATION SAFETY REQUIREMENTS FOR ANALYTICAL X-RAY EQUIPMENT

28-35-296. Purpose and scope. This part provides special requirements for analytical x-ray equipment. The requirements of this part are in addition to, and not in substitution for applicable requirements in other parts of these regulations. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-297. Equipment requirements.

(A) *Safety device.* A device which prevents the entry of any portion of an individual's body into the primary x-ray beam path or which causes the beam to be shut off upon entry into its path shall be provided on all open-beam configurations. A licensee and/or registrant may apply to the department for an exemption from the requirement of a safety device. Such application shall include:

(1) a description of the various safety devices that have been evaluated,

(2) the reason each of these devices cannot be used, and

(3) a description of the alternative methods that will be employed to minimize the possibility of an accidental exposure, including procedures to assure that operators and others in the area will be informed of the absence of safety devices.

(B) *Warning devices.* Open-beam configurations shall be provided with a readily discernible indication of:

(1) x-ray tube status (on-off) located near the radiation source housing, if the primary beam is controlled in this manner; and/or

(2) Shutter status (open-closed) located near each port on the radiation source housing, if the primary beam is controlled in this manner. Warning devices shall be labeled so that their purpose is easily identified. On equipment installed after January 1, 1976, warning devices shall have fail-safe characteristics.

(C) *Ports.* Unused ports on radiation source housings shall be secured in the closed position in a manner which will prevent casual opening.

(D) *Labeling.* All analytical x-ray equipment shall be labeled with a readily discernible sign or signs bearing the radiation symbol and the words:

(1) "CAUTION—HIGH INTENSITY X-RAY BEAM," or words having a similar intent, on the x-ray source housing;

(2) "CAUTION RADIATION—THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED," or words having a similar intent, near any switch that energizes an x-ray tube if the radiation source is an x-ray tube; or

(3) "CAUTION—RADIOACTIVE MATERIAL," or words having a similar intent, on the source housing if the radiation source is a radionuclide.

(E) *Shutters.* On open-beam configurations installed after January 1, 1976, each port on the radiation source housing shall be equipped with a shutter that cannot be opened unless a collimator or a coupling has been connected to the port.

(F) *Warning lights.* An easily visible warning light labeled with the words "X-RAY ON," or words having a similar intent, shall be located:

(1) near any switch that energizes an x-ray tube and shall be illuminated only when the tube is energized; or

(2) in the case of a radioactive source, near any switch that opens a housing shutter, and shall be illuminated only when the shutter is open. On equipment installed after January 1, 1976, warning lights shall have fail-safe characteristics.

(G) *Radiation source housing.* Each x-ray tube housing shall be so constructed that with all shutters closed the leakage radiation measured at a distance of five (5) centimeters from its surface is not capable of producing a dose in excess of 2.5 millirem in one hour at any specified tube rating.

(H) *Generator cabinet.* Each x-ray generator shall be supplied with a protective cabinet which limits leakage radiation measured at a distance of five (5) centimeters from its surface such that it is not capable of producing a dose in excess of 0.25 millirem in one hour. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-298. Area requirements. (a) Radiation levels. The local components of an analytical X-ray system shall be located and arranged and shall include sufficient shielding or access control so that no radiation levels exist in any area surrounding the local component group that could

result in a dose to an individual present therein in excess of the dose limits specified in K.A.R. 28-35-214a. For systems utilizing X-ray tubes, these levels shall be met at each specified tube rating.

(b) Surveys. Radiation surveys, as specified in K.A.R. 28-35-139(a), of all analytical X-ray systems sufficient to show compliance with K.A.R. 28-35-298(a) shall be performed as follows:

(1) At the time of installation of the equipment;

(2) following any change in the initial arrangement, number, or type of local components in the system;

(3) following any maintenance requiring the disassembly or removal of a local component in the system;

(4) during the performance of maintenance and alignment procedures if the procedures require the presence of a primary X-ray beam when any local component in the system is disassembled or removed;

(5) any time a visual inspection of the local components in the system reveals an abnormal condition; and

(6) whenever personnel-monitoring devices show a significant increase over the previous monitoring period or the readings are approaching the limits specified in these regulations.

(c) Posting. Each area or room containing analytical X-ray equipment shall be conspicuously posted with a sign or signs bearing the radiation symbol and the words "CAUTION—X-RAY EQUIPMENT," or words having a similar meaning. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

28-35-299. Operating requirements. (a) Procedures. Normal operating procedures shall be written and available to all analytical X-ray equipment workers. No person shall be permitted to operate analytical X-ray equipment in any manner other than that specified in the normal operating procedures unless the person has obtained the prior written approval of the radiation safety officer.

(b) Bypassing. No person shall bypass a safety device unless the person has obtained the prior written approval of the radiation safety officer. If a safety device is bypassed, a readily discernible sign bearing the words "SAFETY DEVICE NOT WORKING," or words having a similar meaning, shall be placed on the radiation source housing.

(c) Repair or modification of X-ray tube systems. Except as specified in subsection (b), no op-

eration involving the removal of covers, shielding materials, or tube housings or any modifications to shutters, collimators, or beam stops shall be performed without ascertaining that the tube is off and will remain off until safe conditions have been restored. The main switch, rather than interlocks, shall be used for each routine shutdown in preparation for repairs.

(d) Radioactive source replacement, testing, or repair. Radioactive source housings shall be opened for source replacement, leak testing, or other maintenance or repair procedures only by individuals authorized to specifically conduct these procedures under a license issued by the U.S. nuclear regulatory commission, an agreement state, or a licensing state. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

28-35-300. Personnel requirements. (A) *Instruction.* No person shall be permitted to operate or maintain analytical x-ray equipment unless such person has received instruction in and demonstrated competence as to:

(1) Identification of radiation hazards associated with the use of the equipment;

(2) Significance of the various radiation warning and safety devices incorporated into the equipment, or the reasons they have not been installed on certain pieces of equipment and the extra precautions required in such cases;

(3) Proper operating procedures for the equipment;

(4) Symptoms of an acute localized exposure; and

(5) Proper procedures for reporting an actual or suspected exposure.

(B) *Personnel Monitoring.* Finger or wrist dosimetric devices shall be provided to and shall be used by: (1) Analytical x-ray equipment workers using systems having an open-beam configuration and not equipped with a safety device; and

(2) Personnel maintaining analytical x-ray equipment if the maintenance procedures require the presence of a primary x-ray beam when any local component in the analytical x-ray system is disassembled or removed. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

PART 9. RADIATION SAFETY REQUIREMENTS FOR PARTICLE ACCELERATORS

28-35-308. Applicability. (a) This part, which establishes procedures for the registration

and the use of particle accelerators, shall be in addition to, and not a substitute for, other applicable provisions of these regulations.

(b) In addition to the requirements of this part, all registrants shall be subject to the requirements of parts 1, 2, 4, and 10. Registrants engaged in industrial radiographic operations shall be subject to the requirements of part 7, and registrants engaged in the healing arts shall be subject to the requirements of parts 5, 6, and 14 of these regulations. Registrants engaged in the production of radioactive material shall be subject to the requirements of part 3. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005; amended July 27, 2007.)

28-35-309. Registration requirements.

No person shall receive, possess, use, transfer, own, or acquire a particle accelerator except as authorized in a registration issued pursuant to these regulations or as otherwise provided for in these regulations. The general procedures for registration of particle accelerator facilities are included in part 2 of these regulations. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-310. General requirements for the issuance of a registration for particle accelerators. In addition to the requirements of part 2, the registrant shall: (A) Be qualified by reason of training and experience to use the accelerator in question for the purpose intended in accordance with this part and part 4 and part 10 of these regulations and in such a manner as to minimize danger to public health and safety or property;

(B) The registrant's proposed equipment, facilities, operating and emergency procedures shall be adequate to protect health and minimize danger to public health and safety or property;

(C) The use of the particle accelerator shall not be inimical to the health and safety of the public and the users shall satisfy any applicable special requirement in regulation 28-35-311 of this regulation;

(D) The registrant shall appoint a radiation safety officer;

(E) The registrant and/or his staff shall have substantial experience in the use of particle accelerators for the intended uses;

(F) The registrant shall establish a radiation safety committee to approve, in advance, proposals for uses of particle accelerators, whenever deemed necessary by the department; and

(G) The registrant shall have an adequate training program for particle accelerator operators. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-311. Human use of particle accelerators. In addition to the requirements set forth in part 2, the registrant shall: (A) Whenever deemed necessary by the department, the registrant shall appoint a medical committee of at least three (3) members to evaluate all proposals for research, diagnostic, and therapeutic use of a particle accelerator. Membership of the committee should include physicians expert in internal medicine, hematology, therapeutic radiology, and a person experienced in depth dose calculations and protection against radiation;

(B) The individuals designated as the users shall have substantial training and experience in deep therapy techniques or in the use of particle accelerations to treat humans; and

(C) The user must be a physician. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-312. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 7, 1976; revoked Dec. 30, 2005.)

28-35-313. Limitations. (A) No registrant shall permit any person to act as a particle accelerator operator until such person:

(1) Has been instructed in radiation safety and shall have demonstrated an understanding thereof;

(2) Has received copies of and instruction in this part and the applicable requirements of part 4 and part 10, pertinent operating conditions and the registrant's operating and emergency procedures, and shall have demonstrated understanding thereof; and

(3) Has demonstrated competence to use the particle accelerator, related equipment, and survey instruments which will be employed in his assignment.

(B) Either the radiation safety committee or the radiation safety officer shall have the authority to terminate the operations at a particle accelerator facility if such action is deemed necessary to protect health and minimize danger to public health and safety or property. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-314. Shielding and safety design requirements. (a) An expert who is qualified in

shielding and safety design requirements shall be consulted in the design of each particle accelerator installation and shall perform a radiation survey when the accelerator is first capable of producing radiation.

(b) Each particle accelerator installation shall be provided with the primary barriers or secondary barriers, or both, necessary to ensure compliance as specified in K.A.R. 28-35-212a and K.A.R. 28-35-214a. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

28-35-315. Particle accelerator controls and interlock systems. (A) Instrumentation, readouts and controls on the particle accelerator control console shall be clearly identified and easily discernible.

(B) All entrances into a target room or other high radiation area shall be provided with interlocks that shut down the machine under conditions of barrier penetration.

(C) When an interlock system has been tripped, it shall only be possible to resume operation of the accelerator by manually resetting controls at the position where the interlock has been tripped, and lastly at the main control console.

(D) Each safety interlock shall be on a circuit which shall allow its operation independently of all other safety interlocks.

(E) All safety interlocks shall be fail safe, i.e., designed so that any defect or component failure in the interlock system prevents operation of the accelerator.

(F) A scram button or other emergency power cutoff switch shall be located and easily identifiable in all high radiation areas. Such a cutoff switch shall include a manual reset so that the accelerator cannot be restarted from the accelerator control console without resetting the cutoff switch. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-316. Warning devices. (a) Each location designated as a high-radiation area and each entrance to the high-radiation area shall be equipped with easily observable flashing or rotating warning lights that operate only if radiation is being produced.

(b) Except in facilities designed for human exposure, each high-radiation area shall have an audible warning device that shall be activated for 15 seconds before the possible creation of a high-

radiation area. The warning device shall be clearly discernible in all high-radiation areas and all radiation areas.

(c) All barriers, temporary or permanent, and all pathways leading to high-radiation areas shall be identified as specified in K.A.R. 28-35-219a. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

28-35-317. Operating procedures. (A) Particle accelerators, when not in operation, shall be secured to prevent unauthorized use.

(B) Only a switch on the accelerator control console shall be routinely used to turn the accelerator beam on and off. The safety interlock system shall not be used to turn off the accelerator beam except in an emergency.

(C) All safety and warning devices, including interlocks, shall be checked for proper operability at intervals not to exceed three (3) months. Results of such tests shall be maintained for inspection at the accelerator facility.

(D) Electrical circuit diagrams of the accelerator, and the associated interlock systems, shall be kept current and maintained for inspection by the department and available to the operator at each accelerator facility.

(E) If, for any reason, it is necessary to intentionally bypass a safety interlock or interlocks, such action shall be:

(1) Authorized by the radiation safety committee and/or radiation safety officer;

(2) recorded in a permanent log and a notice posted at the accelerator control console; and

(3) terminated as soon as possible.

(F) A copy of the current operating and the emergency procedures shall be maintained at the accelerator control panel. (Authorized by K.S.A. 1975 Supp. 48-1607; effective May 1, 1976.)

28-35-318. Radiation monitoring requirements. (a) Each particle accelerator facility registrant shall have available the appropriate portable monitoring equipment that is operable and is calibrated for the appropriate types and levels of radiation being produced at the facility. The equipment shall be tested for proper operation daily and calibrated at intervals not to exceed one year, and after each servicing or repair.

(b) A radiation protection survey shall be performed and documented by a qualified expert acceptable to the department each time that changes have been made in the shielding, oper-

ation, or equipment, or in the occupancy of adjacent areas.

(c) Radiation levels in each high-radiation area shall be continuously monitored. Each monitoring device shall be electrically independent of the accelerator control and interlock systems and capable of providing a remote and local readout with visual alarms or audible alarms, or both, at both the control panel and the entrance to high-radiation areas, and other appropriate locations, so that people entering or present become aware of the existence of the hazard.

(d) All area monitors shall be calibrated at intervals not to exceed one year, and after each servicing or repair.

(e) Whenever applicable, the registrant shall make periodic surveys to determine the amount of airborne particulate radioactivity present in areas of airborne hazards.

(f) Whenever applicable, the registrant shall make periodic smear surveys to determine the degree of contamination in target and other pertinent areas.

(g) All area surveys shall be made in accordance with the written procedures established by a qualified expert or by the radiation safety officer of the particle accelerator facility.

(h) Records of all radiation protection surveys, calibration results, instrumentation tests, and smear results shall be kept current and on file at each accelerator facility. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

28-35-319. Ventilation systems. (a) Adequate ventilation shall be provided in areas where airborne radioactivity could be produced.

(b) No registrant shall vent, release, or otherwise discharge airborne radioactive material to an uncontrolled area, except as specified in K.A.R. 28-35-214b. (Authorized by and implementing K.S.A. 48-1607; effective May 1, 1976; amended Dec. 30, 2005.)

PART 10. NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS; INSPECTIONS

28-35-331. Persons required to meet the requirements of this part. The requirements of this part apply to all persons who receive, possess, use, own or transfer material licensed by or registered with the department pursuant to part 2 or 3 of these regulations. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604,

48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-332. Posting of notices to workers.

(a) Each licensee or registrant shall post current copies of the following documents:

(1) The regulations in this part and part 4;

(2) the license, or certificate of registration, including any conditions on the license and any document or documents incorporated into the license by reference and also any amendment to the license;

(3) the operating procedures applicable to work under the license or registration; and

(4) any notice of violation involving radiological working conditions, any order issued pursuant to Part 1, and any response from the licensee or registrant.

(b) If the posting of a document specified in paragraph (a)(1), (2), or (3) is not practicable, the licensee or registrant may post a notice which describes the document and states where it may be examined.

(c) Department form RH-3 shall be posted by each licensee or registrant where individuals work in or frequent any portion of a controlled area.

(d) Documents, notices or forms shall be posted to allow individuals engaged in work under the license or registration to observe them on the way to or from any particular work location to which the document applies, shall be conspicuous, and shall be replaced if defaced or altered.

(e) Department documents posted pursuant to paragraph (a)(4) shall be posted within two working days after receipt of the documents from the department; the licensee's or registrant's response, if any, shall be posted within two working days after dispatch from the licensee or registrant. The documents shall remain posted for a minimum of five working days or until action correcting the violation has been completed, whichever is longer. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604, 48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-333. Instructions to workers.

(a) Each licensee or registrant shall ensure that each individual who is likely to receive in a year an occupational dose in excess of 100 mrem (1 mSv) is instructed as follows:

(1) Is kept informed of the storage, transfer, or use of radioactive material or of radiation in the restricted area;

(2) is instructed in all of the following subjects:

(A) Health protection problems associated with exposure to radioactive material or radiation to the individual and potential offspring;

(B) precautions or procedures to minimize exposure; and

(C) the purposes and functions of protective devices employed;

(3) is instructed in, and instructed to observe, to the extent within the worker's control, the provisions of these regulations and any licenses concerning the protection of personnel from exposures to radiation or radioactive material;

(4) is informed of the individual's responsibility to report promptly to the licensee or registrant any condition that has caused or could cause any of the following:

(A) A violation of these regulations;

(B) a violation of a license or registration; or

(C) unnecessary exposure to radiation or radioactive material;

(5) is instructed in the appropriate response to warnings made in the event of any unusual occurrence or malfunction that could involve exposure to radiation or radioactive material; and

(6) is informed of the radiation exposure reports that workers may request as specified in K.A.R. 28-35-334.

(b) In determining which individuals are subject to the requirements of subsection (a) of this regulation, each licensee or registrant shall take into consideration each individual's assigned activities during normal and abnormal situations involving exposure to radiation or radioactive material, or both, that can reasonably be expected to occur during the life of a licensed or registered facility. The extent of the instruction specified in subsection (a) shall be commensurate with the potential radiological health protection problems present in the workplace. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1607; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Oct. 17, 1994; amended Dec. 30, 2005.)

28-35-334. Reports to individuals. Radiation exposure data for an individual and the results of any measurements, analyses, and calculations of radioactive material deposited or retained in the body of an individual shall be reported to the individual as specified in this regulation.

(a) The information reported shall include data and results obtained pursuant to the requirements

of these regulations or any order of the secretary or license condition, as shown in records maintained by the licensee or registrant pursuant to K.A.R. 28-35-227h. Each report shall meet the following requirements:

(1) Be in writing;

(2) include appropriate identifying data, including the name of the licensee or registrant, the name of the individual, and the individual's identification number, preferably social security number;

(3) include the individual's exposure information; and

(4) contain the following statement:

"This report is furnished to you under the provisions of Kansas Administrative Regulation 28-35-334. You should preserve this report for further reference."

(b) Each licensee or registrant shall make dose information available to individual workers shown in records maintained by the licensee or registrant pursuant to K.A.R. 28-35-227h. Each licensee or registrant shall provide an annual report to each individual worker monitored pursuant to K.A.R. 28-35-217a of the dose received in that monitoring year if either of the following situations occurs:

(1) The individual's dose exceeds 1 mSv (100 mrem) TEDE or 1 mSv (100 mrem) to any individual organ or tissue.

(2) The individual requests an annual dose report.

(c) Each licensee or registrant shall furnish a written report of a worker's exposure to sources of radiation or radioactive material at the request of the worker if the worker was formerly engaged in activities controlled by the licensee or registrant. The report shall be furnished within 30 days from the date of the request or within 30 days after the dose of the individual has been determined by the licensee or registrant, whichever is later. The report shall cover, within the period of time specified in the request, the dose record for each year the worker was required to be monitored pursuant to K.A.R. 28-35-217a. The report shall also include the period of time in which the worker's activities involved exposure to sources of radiation and shall include the dates and locations of work under the license or registration in which the worker participated during this period.

(d) When a licensee or registrant is required pursuant to K.A.R. 28-35-229a(a)(1) and (b)(1) to report to the department any exposure of an individual to sources of radiation, the licensee or

the registrant shall also provide to the individual a written report of the individual's exposure data included in the report. This report shall be transmitted to the individual at a time not later than the transmittal of the report to the department.

(e) At the request of a worker who is terminating employment with the licensee or registrant that involves exposure to radiation or radioactive material or at the request of a worker who, while employed by another person, is terminating an assignment to work involving radiation dose in the licensee's facility, each licensee or registrant shall provide to the worker, or the worker's designee, a written report regarding the radiation dose received by that worker from operations of the licensee or registrant during the current year. The report shall be provided at the worker's termination. The licensee or registrant may provide a written estimate of that dose if the finally determined personnel monitoring results are not available at that time. Estimated doses shall be clearly indicated as such. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1607 and 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985; amended Oct. 17, 1994; amended March 18, 2011.)

28-35-335. Presence of representatives of licensees or registrants and workers during inspection. (a) Each licensee or registrant shall afford to the department, at all reasonable times, opportunity to inspect materials, machines, activities, facilities, premises, and records maintained by the licensee or registrant.

(b) During an inspection, department inspectors may consult privately with workers as specified in K.A.R. 28-35-336 and any amendment to that rule and regulation. The licensee or registrant may accompany department inspectors during other phases of an inspection.

(c) If, at the time of inspection, an individual has been authorized by the workers to represent them during department inspections, the licensee shall give the workers' representative an opportunity to accompany the inspectors during the inspection of physical working conditions.

(d) Each workers' representative shall be routinely engaged in work under control of the licensee or registrant and shall have received the instructions specified in K.A.R. 28-35-333 and any amendment of that rule and regulation.

(e) Different representatives of licensees or registrants and workers may accompany the in-

spectors during different phases of an inspection if there is no resulting interference with the conduct of the inspection. However, only one workers' representative at a time shall accompany the inspectors.

(f) With the approval of the licensee or registrant and the workers' representative, an individual who is not routinely engaged in work under control of the licensee or registrant shall be afforded the opportunity to accompany department inspectors during the inspection of physical working conditions.

(g) Department inspectors may refuse to permit accompaniment by an individual who deliberately interferes with a fair and orderly inspection. If an area to be inspected is a restricted area, the workers' representative for that area shall be an individual previously authorized by the licensee or registrant to enter that area. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604, 48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-336. Consultation with workers during inspections. (a) Department inspectors may consult privately with workers concerning matters of occupational radiation protection and other matters related to the provisions of these regulations or any condition of a license, to the extent the inspectors deem necessary for the conduct of an effective and thorough inspection.

(b) During the course of an inspection, any worker may bring privately to the attention of the inspectors, either orally or in writing, any past or present condition which that worker has reason to believe may have contributed to or caused any violation of the act, these regulations, or any license condition, or any unnecessary exposure of an individual to radiation from licensed radioactive material or a registered radiation machine under the licensee's or registrant's control. Any such notice in writing shall state clearly the condition complained of and be signed by the worker.

(c) The provisions of 28-35-336 subsection (b) shall not be interpreted as authorizing disregard of instructions given pursuant to K.A.R. 28-35-333 and any amendments of that rule and regulation. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604, 48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-337. Requests by workers for inspections. (a) Any worker or representative of workers who believes that a violation of the act, these regulations or a license conditions exists or has occurred in work under a license or registration with regard to radiological working conditions in which the worker is engaged may request an inspection by giving notice of the alleged violation to the department. Any such notice shall be in writing, shall set forth the specific grounds for the notice, and shall be signed by the worker or representative of the workers. A copy shall be provided to the licensee or registrant by the department no later than at the time of inspection except that, upon the request of the worker giving the notice, the worker's name and the name of individuals referred to shall not appear in the copy or on any record published, released, or made available by the department, except for good cause shown.

(b) If, upon receipt of the notice, the department determines that the complaint meets the requirements of subsection (a), and that there are reasonable grounds to believe that the alleged violation exists or has occurred, an inspection shall be made as soon as practicable, to determine if the alleged violation exists or has occurred. Inspections pursuant to this section need not be limited to matters referred to in the complaint.

(c) No licensee or registrant shall discharge or in any manner discriminate against any worker because the worker has filed any complaint, or instituted or caused to be instituted any proceeding under these regulations, or has testified or is about to testify in any proceeding, or because of the exercise by the worker on behalf of the worker or others of any option afforded by this part. (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604, 48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

28-35-338. Inspections not warranted; informal review. (a) If the department determines, with respect to a complaint filed under K.A.R. 28-35-337, and any amendments to that rule and regulation that an inspection is not warranted because there are no reasonable grounds to believe that a violation exists or has occurred, the department shall notify the complainant in writing of that determination. The complainant may obtain a review of the determination by submitting a written statement of position to the secretary, who will provide the licensee or registrant

with a copy of the statement by certified mail, excluding, at the request of the complainant, the name of the complainant. The licensee or registrant may submit an opposing written statement of position to the secretary, who will provide the complainant with a copy of that statement by certified mail. Upon the request of the complainant, the secretary or the secretary's designee may hold an informal conference in which the complainant and the licensee or registrant may orally present their views. An informal conference may also be held at the request of the licensee or registrant, but disclosure of the identity of the complainant shall be made only following receipt of written authorization from the complainant. After considering all written or oral views presented, the secretary shall affirm, modify, or reverse the determination of the department and furnish the complainant and the licensee or registrant a written notification of the decision and the reason for the decision.

(b) If the secretary determines that an inspection is not warranted because the requirements of K.A.R. 28-35-337(a) have not been met, the secretary shall notify the complainant in writing of the determination. That determination shall be without prejudice to the filing of a new complaint meeting the requirements of K.A.R. 28-35-337(a). (Authorized by K.S.A. 1984 Supp. 48-1607; implementing K.S.A. 1984 Supp. 48-1604, 48-1607, 48-1609; effective May 1, 1976; amended, T-85-43, Dec. 19, 1984; amended May 1, 1985.)

PART 11. WIRELINE AND SUBSURFACE TRACER STUDIES

28-35-341. Persons to whom these regulations apply. The regulations in this part shall apply to each licensee or registrant who uses any source of radiation for wireline service operations, including mineral logging, radioactive markers, or subsurface tracer studies. The requirements of this part shall be in addition to, and not in substitution for, the requirements of Parts 1, 2, 3, 4, and 10 of these regulations. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

28-35-342. Preoperational and use requirements. (a) Preoperational agreements. A licensee shall not perform any wireline service operation with a sealed source or source unless, before commencement of the operation, the licensee has a written agreement with the well operator,

well owner, drilling contractor, or land owner stating the following:

(1) If a sealed source is lodged downhole, a reasonable effort at recovery will be made.

(2) No person will attempt to recover a sealed source in a manner that, in the licensee's opinion, could result in a rupture of the sealed source.

(3) If a decision is made to abandon the sealed source downhole, the requirements of K.A.R. 28-35-362 (c) will be met.

(b) Limits on levels of radiation. All sources of radiation shall be used, stored, and transported so that the transportation and the dose limitation requirements of these regulations are met.

(c) Uranium sinker bars. Any licensee may use a uranium sinker bar in well-logging applications only if the sinker bar is legibly impressed with these words: "CAUTION RADIOACTIVE—DEPLETED URANIUM" and "NOTIFY CIVIL AUTHORITIES [or COMPANY NAME] IF FOUND."

(d) Energy compensation source. Any licensee may use either an energy compensation source (ECS) contained within a logging tool or other tool components, if the ECS contains quantities of licensed material not exceeding 3.7 Mbq (100 microcuries).

(1) For well-logging applications with a surface casing protecting freshwater aquifers, use of the ECS shall be subject only to the requirements of K.A.R. 28-35-346, K.A.R. 28-35-347, and K.A.R. 28-35-360.

(2) For well-logging applications without a surface casing protecting freshwater aquifers, use of the ECS shall be subject only to the requirements of K.A.R. 28-35-342, K.A.R. 28-35-346, K.A.R. 28-35-347, K.A.R. 28-35-360, and K.A.R. 28-35-362.

(e) Use of sealed source in a well without a surface casing. Any licensee may use a sealed source in a well without a surface casing for protecting freshwater aquifers if the licensee follows a procedure for reducing the probability that the source will become lodged in the well. This procedure shall be required to be approved by the U.S. nuclear regulatory commission or by an agreement state before the licensee uses the procedure.

(f) Use of a tritium neutron generator target source.

(1) Each licensee who uses a tritium neutron generator target source that contains a total quantity of tritium not exceeding 1,110 Mbq (30 curies) and is located in a well with a surface casing to protect freshwater aquifers shall be subject to

the requirements of this part, excluding K.A.R. 28-35-349 and K.A.R. 28-35-362.

(2) Each licensee who uses a tritium neutron generator target source that contains a total quantity of tritium exceeding 1,110 Mbq (30 curies) or is located in a well without a surface casing to protect freshwater aquifers shall be subject to the requirements of this part, excluding K.A.R. 28-35-349. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-343. Storage precautions. (a) Each source of radiation, except accelerators, shall be provided with a storage container and, if transported, a transport container. The same container may be used in both cases if the container meets the requirements for each use. The container shall be provided with a lock to prevent unauthorized removal of, or exposure to, the source of radiation.

(b) Each source of radiation shall be stored in a manner that minimizes danger from explosion or fire. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005; amended May 4, 2018.)

28-35-344. Transport precautions. Each licensee shall lock and physically secure each transport package containing licensed material in the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal of the licensed material from the vehicle. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended May 4, 2018.)

28-35-345. Radiation survey instruments. (a) Each licensee or registrant shall maintain a sufficient supply of calibrated and operable radiation survey instruments capable of detecting beta and gamma radiation at each field station and temporary job site to make any physical radiation survey required by this part and part 4 of these regulations. Instrumentation shall be capable of measuring a range of 0.1 milliroentgens through at least 50 milliroentgens per hour.

(b) Each licensee shall have available additional calibrated and operable radiation-detection instruments sensitive enough to detect the low radiation and contamination levels that could be encountered if a sealed source ruptures. Any licensee may own the instruments or may have a procedure to obtain them from a second party when needed.

(c) Within the previous six months and after each servicing or repair, each radiation survey instrument used shall be calibrated as follows:

(1) At energies and radiation levels appropriate for use;

(2) with a demonstrated accuracy of within plus or minus 20 percent of the true radiation level on each scale; and

(3) (A) At two points located approximately one-third and two-thirds of full scale on each scale if it is a linear instrument;

(B) at midrange of each decade, and at two points of at least one decade if it is a logarithmic scale instrument; and

(C) at appropriate points if it is a digital instrument.

(d) A calibration record for each instrument shall be maintained for two years for inspection by the department. (Authorized by and implementing K.S.A 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-346. Leak testing of sealed sources. (a) Requirements. Each licensee using any sealed source of radioactive material shall have the source tested for leakage as specified in subsection (c). A record of leak test results shall be kept in units of microcuries and maintained for inspection by the department. The licensee shall keep the records of the results for three years after the leak test is performed.

(b) Method of testing. Each test for leakage shall be performed only by a person specifically authorized to perform such a test by the department, the nuclear regulatory commission, an agreement state, or a licensing state. The test sample shall be taken from the surface of the source, the source holder, or the surface of the device in which the source is stored or mounted and on which one could expect contamination to accumulate. The test sample shall be analyzed for radioactive contamination. The analysis shall be capable of detecting the presence of 0.005 microcurie (185 Bq) of radioactive material on the test sample and shall be performed by a person specifically authorized to perform such a test by the department, the nuclear regulatory commission, an agreement state, or a licensing state.

(c) Interval of testing. Each sealed source of radioactive material, except an energy compensation source (ECS), shall be tested at intervals not to exceed six months. In the absence of a certificate from a transferor indicating that a test has

been made within the six months before the transfer, the sealed source shall not be put into use until tested. If, for any reason, it is suspected that a sealed source could be leaking, the sealed source shall be removed from service immediately and tested for leakage as soon as practical. Each ECS that is not exempt from testing in accordance with subsection (e) shall be tested at intervals not to exceed three years. In the absence of a certificate from a transferor that a test has been made within the three years before the transfer, the ECS shall not be used until tested.

(d) Leaking or contaminated sources. If the test reveals the presence of 0.005 microcurie (185 Bq) or more of leakage or contamination, the licensee shall immediately withdraw the source from use and shall cause it to be decontaminated, repaired, or disposed of in accordance with these regulations. Each licensee shall check the equipment associated with the leaking source for radioactive contamination and, if contaminated, shall have the equipment decontaminated or disposed of by a nuclear regulatory commission licensee or an agreement state licensee that is authorized to perform these functions. A report describing the equipment involved, the test result, and the corrective action taken shall be filed with the department within five days after receiving the test results.

(e) Exemptions. The following sources shall be exempt from the periodic leak test requirements of this regulation:

(1) Hydrogen-3 (tritium) sources;

(2) sources of radioactive material with a half-life of 30 days or less;

(3) sealed sources of radioactive material in gaseous form;

(4) sources of radioactive material emitting beta, beta-gamma, or gamma radiation, with an activity of not more than 100 microcuries (3.7 Mbq); and

(5) sources of alpha-emitting radioactive material with an activity of not more than 10 microcuries (0.370 MBq). (Authorized by and implementing K.S.A 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005; amended March 18, 2011.)

28-35-347. In-person inventory. Each licensee or registrant shall conduct an in-person inventory to account for all sources of radiation once every six months. A record of each inventory shall be maintained for two years from the date of the inventory for inspection by the department and shall include the quantities and kinds of sources of radiation, the location where sources of

radiation are assigned, the date of the inventory, and the name of the individual conducting the inventory. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended May 4, 2018.)

28-35-348. Utilization records. Each licensee or registrant shall maintain current utilization records, which shall be kept available for inspection by the department for two years from the date of the recorded event, showing the following information for each source of radiation:

- (a) make, model number, and a serial number or a description of each source of radiation used;
- (b) the identity of the well-logging supervisor or field unit to whom assigned;
- (c) each location where used and each date of use; and
- (d) the radionuclide and activity used in a particular well, when dealing with tracer materials and radioactive markers. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

28-35-349. Design, performance, and certification criteria for sealed sources used in downhole operations. (a) Each sealed source that is used in downhole operations and manufactured after May 1, 1991 shall be certified by the manufacturer or other testing organization to meet the following minimum criteria.

- (1) Each source shall be doubly encapsulated.
- (2) Each source shall contain radioactive material with a chemical and physical form that is insoluble and nondispersive as practical.
- (3) Each source's prototype shall have been tested and found to maintain its integrity after each of the following tests:

(A) Temperature. The test source shall be held at -40°C for 20 minutes and at 600°C for one hour. Then the test source be subjected to a thermal shock test with a temperature drop from 600°C to 20°C within 15 seconds.

(B) Impact test. A five-kg steel hammer with a diameter of 2.5 cm shall be dropped from a height of one meter onto the test source.

(C) Vibration test. The test source shall be subject to a vibration from 25 Hz to 500 Hz at five g (gravitational acceleration) amplitude for 30 minutes.

(D) Puncture test. A one-gram hammer with a pin having a diameter of 0.3 cm shall be dropped from a height of one meter onto the test source.

(E) Pressure test. The test source shall be subjected to an external pressure of 24,600 pounds per square inch absolute (1.695×10^7 pascal).

(b) No sealed source acquired after May 1, 1992 shall be put into use in the absence of a certificate from a transferor certifying that the sealed source meets the requirements of subsection (a), until the required determinations and testing have been performed.

(c) Each sealed source that is used in downhole operations after May 1, 1992 shall be certified by the manufacturer or other testing organization as meeting the sealed source performance requirements for oil well-logging contained in "sealed radioactive sources—classification," ANSI/HPS N43.6-1997, including the annexes, approved by the American national standards institute, inc. in November 1997, published by the health physics society, and hereby adopted by reference.

(d) Certification documents shall be maintained for inspection by the department for a period of two years after source disposal. If the source is abandoned downhole, the certification documents shall be maintained until the department authorizes disposition of these documents.

(e) The requirements in subsections (a), (b), (c), and (d) shall not apply to any sealed sources that contain licensed material in gaseous form.

(f) The requirements in subsections (a), (b), (c), and (d) shall not apply to any energy compensation sources (ECS). Each ECS shall be registered with the department, NRC, or an agreement state. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005; amended July 27, 2007.)

28-35-350. Labeling. (a) Each source, source holder, and logging tool containing radioactive material shall bear a durable, legible, and clearly visible marking or label that has, at a minimum, the standard radiation caution symbol, without the conventional color requirement, and the following wording:

DANGER (or CAUTION)
RADIOACTIVE MATERIAL

This labeling shall be on the smallest component transported as a separate piece of equipment.

(b) Each storage container that is transported shall have securely attached to the container a durable, legible, and clearly visible label that has, at a minimum, the standard radiation caution symbol and the following wording:

DANGER (or CAUTION)
 RADIOACTIVE MATERIAL
 NOTIFY CIVIL AUTHORITIES
 (or NAME OF COMPANY)

(c) No licensee may transport licensed material unless the material is packaged, labeled, marked, and accompanied by appropriate shipping papers in accordance with these regulations. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-351. Repair, opening, or modification. (a) Each licensee shall visually check for defects all source holders, logging tools, sinker bars, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars before each use to ensure that the equipment is in good working condition and that the required labeling is present. If any defects are found, the equipment shall be removed from service until repaired, and a record shall be made listing the following:

- (1) The date of inspection;
- (2) the name of the inspector;
- (3) the type of equipment involved;
- (4) the defects found; and
- (5) the repairs made.

(b) Each licensee shall have a program for semiannual visual inspections and routine maintenance of all source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars to ensure that the required labeling is legible and that no physical damage is visible. If any defects are found, the equipment shall be removed from service until repaired, and a record shall be made listing the following:

- (1) The date of the inspection;
- (2) the type of equipment involved;
- (3) the inspection and maintenance operations performed;
- (4) any defects found; and
- (5) any actions taken to correct the defects.

(c) Removal of a sealed source holder or logging tool, and maintenance on sealed sources or holders in which sealed sources are contained shall not be performed by the licensee unless a written procedure to perform this operation that is approved by the U.S. nuclear regulatory commission, an agreement state, or a licensing state is used.

(d) If a sealed source is stuck in the source holder, the licensee shall not drill, cut, chisel, or perform any other operation on the source holder

unless the licensee is approved by the U.S. nuclear regulatory commission, an agreement state, or a licensing state to perform this operation.

(e) The repair, opening, or modification of any sealed source shall be performed only by a person authorized to do so by the department, the U.S. nuclear regulatory commission, an agreement state, or a licensing state.

(f) Each licensee shall maintain the records required by this regulation for three years. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-352. Training requirements. (a) A licensee or registrant shall not permit any individual to act as a logging supervisor as defined in this part until that individual meets the following requirements:

(1) Has received, in a course recognized by the department, the U.S. nuclear regulatory commission, an agreement state, or a licensing state, instruction in each subject outlined in K.A.R. 28-35-363 and has demonstrated an understanding of the course material and of this subsection by successfully completing a written or oral test;

(2) (A) has received copies of and received instruction in the regulations contained in this part and the applicable regulations in parts 1, 4, and 10 of these regulations, the conditions of the appropriate license or certificate of registration, and the licensee's or registrant's operating and emergency procedures; and

(B) has demonstrated an understanding of these materials; and

(3) has demonstrated competence to use sources of radiation, related handling tools, and radiation survey instruments that will be used on the job.

(b) No licensee may permit an individual to act as a logging assistant until that person meets the following:

(1) Has received instruction in the applicable regulations in parts 4, 10 and 11;

(2) has received copies of, and instruction in, the licensee's operating and emergency procedures;

(3) has demonstrated understanding of the materials listed in paragraphs (1) and (2) of this subsection by successfully completing a written or oral test; and

(4) has received instruction in the use of licensed materials, remote handling tools, and radiation survey instruments, as appropriate for the logging assistant's intended job responsibilities.

(c) Each licensee or registrant shall maintain training records for each employee for inspection by the department for three years following termination of employment. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-353. Operating and emergency procedures. Each licensee shall develop and follow written operating and emergency procedures that cover the following:

(a) The handling and use of licensed materials, including the use of sealed sources in wells without surface casing for protecting freshwater aquifers, if appropriate;

(b) the use of remote handling tools for handling sealed sources and radioactive tracer material, except low-activity calibration sources;

(c) the methods and occasions for conducting radiation surveys, including surveys for detecting contamination;

(d) the ways to minimize personnel exposure, including exposures from inhalation and ingestion of licensed tracer materials;

(e) the methods and occasions for locking and securing stored licensed materials;

(f) personnel monitoring and the use of personnel-monitoring equipment;

(g) the transportation of licensed materials to field stations or temporary job sites, packaging of licensed materials for transport in vehicles, placarding of vehicles when needed, and physically securing licensed materials in transport vehicles during transportation to prevent accidental loss, tampering, or unauthorized removal;

(h) the procedures for picking up, receiving, and opening packages containing licensed materials;

(i) the use of tracers;

(j) decontamination of the environment, equipment, and personnel;

(k) the maintenance of records generated by logging personnel at temporary job sites;

(l) the inspection and maintenance of sealed sources, source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars;

(m) the actions to be taken if a sealed source is lodged in a well;

(n) the means of notifying the proper persons if an accident occurs; and

(o) the actions to be taken if a sealed source is ruptured, including actions to prevent the spread of contamination and minimize the inhalation and

ingestion of licensed materials and actions to obtain appropriate radiation survey instruments as required by K.A.R. 28-35-345. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-354. Personnel monitoring. (a) The licensee or registrant shall not permit any individual to act as a logging supervisor or to assist in the handling of sources of radiation unless each individual wears a personnel-monitoring device as specified in K.A.R. 28-35-217a. Each PMD shall be assigned to and worn by only one individual. Film badges shall be replaced at least monthly, and other personnel-monitoring devices shall be replaced at least quarterly. After replacement, each film badge or PMD shall be promptly processed.

(b) Each licensee shall provide bioassay services to individuals using licensed materials in subsurface tracer studies if required by the license.

(c) Personnel monitoring and bioassay results records shall be maintained for inspection until the secretary authorizes the disposition of these records. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-355. Security. (a) During each logging or tracer application, except when radiation sources are below ground or in shipping or storage containers, the logging supervisor or other designated employee shall maintain direct surveillance of the operation to protect against unauthorized or unnecessary entry into a controlled area.

(b) A logging supervisor shall be physically present at a temporary job site whenever licensed materials either are being handled or are not stored and locked in a vehicle or storage place. The logging supervisor may leave the job site in order to obtain assistance if a source becomes lodged in a well. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-356. Handling tools. Each licensee shall provide and require the use of tools that will assure remote handling of sealed sources other than low activity calibration sources. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

28-35-357. Subsurface tracer studies. (a) Protective gloves and other appropriate protective clothing and equipment shall be used by all per-

sonnel when handling radioactive tracer material. Precautions shall be taken to avoid ingestion or inhalation of radioactive material and to avoid contamination of field stations and temporary job sites.

(b) A licensee shall not intentionally cause the injection of radioactive material into freshwater aquifers. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-358. Particle accelerators. A licensee or registrant shall not permit above-ground testing of any particle accelerator, designed for use in well logging which results in the production of radiation, except in areas or facilities controlled or shielded so that the requirements of K.A.R. 28-35-212a and 28-35-214a of these regulations, as applicable, are met. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

28-35-359. Radiation surveys. (a) Each licensee shall make a radiation survey or calculation and record for each area where radioactive materials are stored.

(b) Each licensee shall make a radiation survey or calculation and record for the radiation levels in occupied positions and on the exterior of each vehicle used to transport radioactive material. The survey or calculation shall include each source of radiation or combination of sources to be transported in the vehicle.

(c) After removal of the sealed source from the logging tool and before departing the job site, the logging tool detector shall be energized, or a survey meter used, to ensure that the logging tool is free of contamination.

(d) If the licensee has reason to believe that, as a result of any operation involving a sealed source, the encapsulation of the sealed source could be damaged by the operation, the licensee shall conduct radiation surveys, including a contamination survey, during and after the operation.

(e) The licensee shall make a radiation survey at the temporary job site before and after each subsurface tracer study to confirm the absence of contamination.

(f) Each licensee shall make a radiation survey and record at the job site or wellhead for each tracer operation, except those using hydrogen-3, carbon-14, and sulfur-35. The survey shall include measurements of radiation levels before and after the operation.

(g) Each record required by subsections (a) through (f) of this regulation shall include the dates, the identification of the individual or individuals making the survey, the identification of the survey instrument or instruments used, and an exact description of the location of the survey. The record of each licensee's survey shall be maintained for inspection by the department for three years after completion of the survey. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-359a. Radioactive contamination control. (a) If the licensee detects any evidence that a sealed source has ruptured or that licensed materials have caused any contamination, the licensee shall immediately initiate the emergency procedures required by this part.

(b) If contamination results from the use of licensed materials in well logging, the licensee shall decontaminate all work areas, equipment, and unrestricted areas.

(c) During all efforts to recover a sealed source lodged in a well, the licensee shall continuously monitor, with an appropriate radiation-detection instrument or a logging tool with a radiation detector, the circulating fluids from the well, if any, to check for contamination resulting from damage to the sealed source. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-360. Documents and records required to be maintained at field stations. Each licensee or registrant shall maintain, for inspection by the department, the following documents and records for the specific devices and sources assigned to the field station:

(a) The appropriate license, certificate of registration, or equivalent document;

(b) operating and emergency procedures;

(c) applicable regulations;

(d) records of the latest survey instrument calibrations conducted according to K.A.R. 28-35-345;

(e) records of the latest leak test results conducted according to K.A.R. 28-35-348;

(f) quarterly physical inventories required by K.A.R. 28-35-359;

(g) utilization records required by K.A.R. 28-35-348;

(h) survey records required by K.A.R. 28-35-349;

(i) records of inspection and maintenance required by K.A.R. 28-35-351; and

(j) training records required by K.A.R. 28-35-352 (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Dec. 30, 2005.)

28-35-361. Documents and records required at temporary jobsites. Each licensee or registrant conducting operations at a temporary jobsite shall have the following documents and records available at that site for inspection by the department:

- (a) operating and emergency procedures;
- (b) survey records required pursuant to K.A.R. 28-35-359 for the period of operation at the site;
- (c) evidence of current calibration for each radiation survey instrument in use at the site;
- (d) when operating in the state under a reciprocity agreement, a copy of the appropriate license, certificate of registration, or equivalent documentation; and
- (e) shipping papers for the transportation of radioactive material. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

28-35-362. Notification of incidents, abandonment, and lost sources. (a) Each licensee shall notify the department of any incidents and any sources lost in other than downhole logging operations in accordance with K.A.R. 28-35-184b, 28-35-228a, 28-35-229a and 28-35-230a.

(b) Whenever a sealed source or device containing radioactive material is lodged downhole, the licensee shall monitor at the surface for the presence of radioactive contamination with a radiation survey instrument or logging tool during logging tool recovery operations.

(c) If the licensee knows or has reason to believe that a sealed source has been ruptured, the licensee shall notify the department immediately by telephone and subsequently, within 30 days, by confirmatory written report. This written report shall identify the well or other location, describe the magnitude and extent of the escape of radioactive material, assess the consequences of the rupture, and explain efforts planned or being taken to mitigate these consequences.

(d) If it becomes apparent that efforts to recover the radioactive source will not be successful, the licensee shall meet the following requirements:

(1) The licensee shall advise the well operator of the following requirements regarding the method of abandonment:

(A) The well operator shall immobilize and seal the radioactive source in place with a cement plug.

(B) The well operator shall set in place a whipstock or other deflection device.

(C) The well operator shall mount a permanent identification plaque at the surface of the well, containing the appropriate information required by this regulation.

(2) The licensee shall notify the department by telephone, giving the circumstances of the loss, and request approval of the proposed abandonment procedures.

(3) The licensee shall file a written report with the department within 30 days of the abandonment, providing the following information:

(A) The date of occurrence and a brief description of attempts to recover the source;

(B) a description of the radioactive source involved, including the radionuclide, quantity, and chemical and physical form;

(C) a description of the surface location and identification of the well;

(D) the results of efforts to immobilize and set the source in place;

(E) the depth of the radioactive source;

(F) the depth of the top of the cement plug;

(G) the depth of the well; and

(H) the information contained on the permanent identification plaque.

(e) Whenever a sealed source containing radioactive material is abandoned downhole, the licensee shall provide a permanent plaque on the well or well-bore. The plaque shall meet the following requirements:

(1) Be constructed of long-lasting material, which may include stainless steel or Monel metal; and

(2) contain the following information engraved on its face:

(A) The word "CAUTION";

(B) the radiation symbol, without the conventional color requirement;

(C) the date of abandonment;

(D) the name of the well operator or well owner;

(E) the well name and the well identification number or numbers or other designation;

(F) a description of the sealed source or sources, by radionuclide and quantity of activity;

(G) the source depth and the depth to the top of the plug; and

(H) an appropriate warning that, depending on the specific circumstances of that abandonment, shall include one of the following:

(i) "Do not drill below plug back depth";

(ii) “do not enlarge casing”; or
 (iii) “do not reenter the hole before contacting the Kansas department of health and environment radiation control program”; and

(3) be at least seven inches square. The word “CAUTION” shall be written in ½-inch letters and all other information shall be written in ¼-inch letters.

(f) If the licensee knows or has reason to believe that radioactive material has been lost in or to an underground potable water source, the licensee shall immediately notify the department by telephone and subsequently, within 30 days, by confirmatory letter. The notice shall designate the well location and shall describe the magnitude and extent of loss of radioactive material, assess the consequences of the loss, and explain efforts planned or being taken to mitigate these consequences. (Authorized by and implementing K.S.A. 48-1607; effective Sept. 20, 1993; amended Nov. 1, 1996; amended May 4, 2018.)

28-35-363. Appendix A; training courses for logging supervisors; subjects. (a) Each training course for logging supervisors shall cover the fundamentals of radiation safety, including:

- (1) characteristics of radiation;
- (2) units of radiation dose and quantity of radioactivity; and
- (3) significance of radiation dose, including:
 - (A) radiation protection standards; and
 - (B) biological effects of radiation dose;
- (4) levels of radiation from sources of radiation;
- (5) methods of minimizing radiation dose, including:
 - (A) working time;
 - (B) working distances; and
 - (C) shielding; and
- (6) radiation safety practices, including prevention of contamination and methods of decontamination.

(b) Each training course for logging supervisors shall cover radiation detection instrumentation to be used, including:

- (1) use of radiation survey instruments, including training as to their:
 - (A) operation;
 - (B) calibration; and
 - (C) limitations;
- (2) survey techniques; and
- (3) use of personnel monitoring equipment.

(c) Each training course for logging supervisors shall cover the equipment to be used, including:

- (1) handling equipment;
 - (2) sources of radiation;
 - (3) storage and control of equipment; and
 - (4) operation and control of equipment.
- (d) Each training course for logging supervisors shall include:

- (1) the requirements of pertinent federal and state regulations;
- (2) the licensee’s or registrant’s written operating and emergency procedures; and
- (3) the licensee’s or registrant’s record-keeping procedures. (Authorized by and implementing K.S.A. 1992 Supp. 48-1607; effective Sept. 20, 1993.)

PART 12. LICENSURE AND RADIATION SAFETY REQUIREMENTS FOR IRRADIATORS

28-35-375. General requirements. The provisions of 10 CFR part 36, as in effect on May 4, 2004, are hereby adopted by reference, with the changes specified in this regulation. (a) All reports required by this regulation shall be submitted to the department.

(b) The following sections shall be deleted:

- (1) 10 CFR 36.2, “definitions”;
- (2) 10 CFR 36.5, “interpretations”;
- (3) 10 CFR 36.8, “information collection requirements: OMB approval”;
- (4) 10 CFR 36.11, “application for a specific license”;
- (5) 10 CFR 36.91, “violations”; and
- (6) 10 CFR 36.93, “criminal penalties.”

(c) Wherever the following CFR references occur within 10 CFR part 36, these references shall be replaced with the specified references to regulations and parts in this article:

(1) “10 CFR part 19” shall be replaced with “part 10, ‘instructions and reports to worker: inspections.’”

(2) “10 CFR 20.1501(c)” shall be replaced with “K.A.R. 28-35-217a, ‘conditions requiring individual monitoring of external and internal occupational dose.’”

(3) “10 CFR 20.1902” shall be replaced with “K.A.R. 28-35-219a, ‘caution signs and labels.’”

(4) “10 CFR 30.33 of this chapter” shall be replaced with “K.A.R. 28-35-180a, ‘general requirements for the issuance of specific licenses.’”

(5) “10 CFR 30.35” shall be replaced with “K.A.R. 28-35-180b, ‘financial assurance for decommissioning.’”

(6) “10 CFR 30.41” shall be replaced with “K.A.R. 28-35-190a, ‘transfer of material.’”

(7) “10 CFR 30.50” shall be replaced with “K.A.R. 28-35-230a, ‘reports of over-exposures and excessive levels and concentrations.’”

(8) “10 CFR 30.51” shall be replaced with “K.A.R. 28-35-137, ‘records.’”

(9) “10 CFR 170.31” shall be replaced with “K.A.R. 28-35-147a, ‘schedule of fees.’”

(d) Wherever the following terms occur within 10 CFR part 36, these terms shall be replaced with “department”:

- (1) “Commission”;
- (2) “NRC operation center”;
- (3) “NRC regional office”; and
- (4) “NRC.”

(e) The following changes shall be made to the sections specified:

(1) In 10 CFR 36.51, paragraph (a)(2) shall be replaced with the following text: “the requirements of part 10 and part 12 of these regulations that are relevant to the irradiator.”

(2) In 10 CFR 36.57(d), the last sentence shall be replaced with the following sentence: “Radioactive concentrations shall not exceed those specified in ‘appendices to part 4: standards for protection against radiation,’ effective April 1994, table 2, column 2 or table 3 of appendix B, ‘annual limits on intake (ALIs) and derived air concentrations (DACs) or radionuclides for occupational exposure; effluent concentrations; concentrations for release to sewerage.’”

(3) In 10 CFR 36.59(c), the last sentence shall be replaced with the following sentence: “If a pool is contaminated, the licensee shall arrange to clean the pool until the contamination levels do not exceed the appropriate concentration in table 2, column 2 of ‘appendices to part 4: standards for protection against radiation,’ effective April 1994.” (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 13. CONTINGENCY PLANNING FOR RESPONSE TO RADIOACTIVE MATERIAL EMERGENCIES

28-35-400. Applicability; additional requirements. (a) Each person licensed to receive, possess, own, acquire, use, process, store, transfer, or dispose of radioactive material shall be subject to this part.

(b) In addition to conforming to the licensing requirements in part 3 of these regulations and the requirements for protection in part 4 of these regulations, each licensee with any of the quantities of radioactive material specified in K.A.R.

28-35-411 shall be required to evaluate and prepare to respond to an event involving the possible release of radioactive material. This requirement shall include, at a minimum, immediate activities including containment, rescue, notification, and securing the scene of an event. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-401. Dose evaluation and contingency plan. Each person seeking a license to possess radioactive material in unsealed form, on a foil or plated source, or sealed in glass shall submit an application containing either of the following, if the radioactive material is in excess of any of the quantities specified in K.A.R. 28-35-411:

(a) An evaluation, as specified in K.A.R. 28-35-402, showing that the projected dose to a person off-site due to a release of radioactive material would not exceed 0.01 sievert (1 rem) total effective dose equivalent or 0.01 sievert (1 rem) to the thyroid; or

(b) a contingency plan, as prescribed in K.A.R. 28-35-403, for responding to any event in which radioactive material could be released from the site. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-402. Evaluation of potential dose. (a) For purposes of this part, the following terms shall have the meanings specified in this subsection.

(1) “Release fraction” means the ratio of the quantity of radioactive material released to the quantity of radioactive material available for release.

(2) “Respirable size range” means the range of sizes of airborne particles that can be deposited anywhere in the respiratory tract.

(b) In evaluating the total effective dose equivalent to an individual as specified in K.A.R. 28-35-401, the applicant may take the following into account, as applicable:

(1) The radioactive material is physically separated so that only a portion could be involved in an alert, site area emergency, or general emergency.

(2) All or part of the radioactive material, because of the way the material is stored or packaged, is not subject to release during an alert, site area emergency, or general emergency.

(3) The release fraction in the respirable size range is predicted to be lower than the release fraction specified in K.A.R. 28-35-411, due to the chemical or physical form of the material.

(4) The solubility in body fluids of the radioactive material is predicted to reduce the dose received.

(5) The facility design or engineered safety features in the facility are predicted to cause the release fraction to be lower than the release fraction specified in K.A.R. 28-35-411.

(6) The operating restrictions or procedures are predicted to prevent any release fraction equal to or larger than that specified in K.A.R. 28-35-411. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-403. Contents of contingency plan. Each applicant or licensee shall ensure that the contingency plan that is submitted as specified in K.A.R. 28-35-401 includes information about the following, in separate sections:

(a) The facility, including a brief description of the applicant's or licensee's facility and surroundings;

(b) the types of accidents that the contingency plan addresses, including an identification of each type of alert, site area emergency, or general emergency involving radioactive material for which actions by applicant's or licensee's staff or off-site response organizations will be needed to protect members of the public;

(c) classification of accidents, consisting of a method for classifying and declaring each alert, site area emergency, or general emergency as defined in this part;

(d) detection of accidents, including the identification of the means for detecting each type of alert, site area emergency, or general emergency in a timely manner;

(e) mitigation of consequences, including a brief description of the means and equipment that are available for mitigating the consequences of each type of alert, site area emergency, or general emergency including the following:

(1) Means and equipment provided to protect workers on-site;

(2) a description of the program for maintaining the equipment;

(3) radiological exposure controls for on-site and off-site response personnel; and

(4) the readiness to carry out special efforts within any designated emergency planning zone;

(f) assessment of radioactive releases, including a brief description of the methods and equipment available to assess any releases of radioactive material;

(g) personnel responsibilities, including the following information:

(1) The names and titles of the applicant's or licensee's personnel responsible for developing, maintaining, and updating the contingency plan;

(2) a brief description of the responsibilities of the applicant's or licensee's personnel who will respond if an alert, site area emergency, or general emergency is declared, including identification of personnel responsible for promptly notifying off-site response organizations, which shall include the department; and

(3) a list of off-site response organizations, a description of their responsibilities and anticipated actions, and a copy of their formal commitments, if any;

(h) notification, coordination, and use of off-site response organizations, including the following information:

(1) A brief description of the means for promptly notifying the off-site response organizations specified in paragraph (g)(3) of this regulation if an alert, site area emergency, or general emergency occurs;

(2) a brief description of the arrangements made for requesting, and coordinating, and using off-site organizations capable of augmenting the planned on-site response, including arrangements for backup communications and 24-hour response capability. The types of assistance that could be requested may include medical treatment of contaminated or injured on-site workers;

(3) a description or drawing of designated locations from which control and assessment of an alert, site area emergency, or general emergency would be exercised; and

(4) provisions of notification and coordination if key personnel, parts of the facility, or any equipment is unavailable;

(i) information to be communicated, including the following information:

(1) A brief description of the information to be provided to off-site response organizations, which shall include the department, if an alert, site area emergency, or general emergency occurs. The types of information to be provided shall include the following:

(A) The declared status of the facility;

(B) a description of the actual or potential releases of radioactive material;

(C) the names and telephone numbers of personnel designated as points of contact;

(D) the population that has been affected; and

(E) any recommendations for protective action;
 (2) a brief description of the types of information to be provided to the public by facility staff and through off-site response organizations; and

(3) if protective action by the public is part of the contingency plan, a description of how the public will be trained to perform the action;

(j) training, including the following information:

(1) A brief description of the performance objectives and plans for the initial and annual training that the applicant or licensee will provide to workers and responders about how to respond to an emergency, including any special instructions and orientation tours that the applicant or licensee will provide for fire, police, medical, and other emergency response personnel;

(2) provisions for familiarizing radiation workers and non-radiation workers, including off-site responders, with site-specific hazards and emergency procedures; and

(3) provisions for preparing site personnel for their responsibilities during an alert, site area emergency, or general emergency, including the use of drills, exercises and team training;

(k) drills and exercises, including specifications for the following:

(1) Conducting quarterly communications checks with off-site response organizations that include the verification and updating of all necessary telephone numbers and other electronic communication addresses;

(2) conducting at least one radiological and health physics, medical drill, or fire drill every two years and conducting, between the required biennial drills, at least one drill involving a combination of some of the principal functional areas of the applicant's or licensee's on-site emergency response capabilities;

(3) inviting off-site response organizations to participate in on-site exercises conducted pursuant to K.A.R. 28-35-407;

(4) using several alert, site area emergency, or general emergency scenarios, including those involving many of the potential responders identified in the contingency plan and those postulated as most probable for the specific site, up to and including the maximum credible accident; and

(5) ensuring that scenarios are not known in advance by the exercise participants whose roles are prescribed in the contingency plan; and

(1) the criteria for determining when a safe condition exists, including a brief description of the site-specific criteria for a safe condition and the

means of restoring the facility and surroundings to a safe condition after an alert, site area emergency, or general emergency. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-404. Comment from off-site response organizations. (a) Each applicant or licensee shall provide the contingency plan for comment to off-site response organizations expected to respond in case of an alert, site area emergency, or general emergency including, at a minimum, local fire, ambulance, emergency management, and hospital emergency response officials. The applicant or licensee shall provide the contingency plan to these organizations at least 60 days before submitting the plan to the department. Each applicant or licensee shall submit any changes to the plan to off-site agencies for comment before resubmitting the plan to the department.

(b) Each applicant or licensee shall provide each comment received within the 60 days specified in subsection (a) to the department with the initial or amended contingency plan. The applicant or licensee shall also provide to the department any proposed response to the comment or comments. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-405. Certification of compliance. Each applicant shall certify to the department that the applicant is in compliance with the emergency planning and community right-to-know act of 1986, title III, pub. L. 99-499, at the proposed place of use of the radioactive material. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-406. Training. Each licensee required to submit a contingency plan in accordance with K.A.R. 28-35-401 shall provide training to facility staff and to personnel for each off-site response organization at least annually for each person who is responsible for responding to the types of accidents postulated in the contingency plan as most probable for the specific site. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-407. Conduct of drills and exercises. Each licensee that is required to submit a contingency plan in accordance with K.A.R. 28-35-401 shall meet the following requirements:

(a) Conduct drills and exercises at least every two years to test the response to simulated emergencies;

(b) perform critiques of drills and exercises and ensure that these critiques evaluate the appropriateness of the contingency plan, emergency procedures, facilities, equipment, training of personnel, and overall effectiveness of the response;

(c) unless the secretary approves otherwise, ensure that the critique of each exercise is performed by individuals who are not responsible for conducting the exercise; and

(d) correct any deficiencies noted in the critique of each drill and exercise within a time period for corrective action that is conveyed, in writing, to the department and approved by the secretary. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-408. Plan implementation. Each licensee required to submit a contingency plan in accordance with K.A.R. 28-35-401 shall meet the following requirements:

(a) Comply with the contingency plan submitted to the department;

(b) notify all off-site response organizations, including the department, not later than one hour after the licensee declares an alert, site area emergency, or general emergency; and

(c) promptly report any projected dose and protective action recommendation as required by the contingency plan. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-409. Contingency plan revision. Each licensee that is required to submit a contingency plan pursuant to K.A.R. 28-35-401 shall comply with the following:

(a) Update the contingency plan at least annually and provide the updated contingency plan to the department and to affected off-site response organizations within 30 days after the update is completed; and

(b) obtain the secretary's written approval before implementing any changes to the plan, except for updating individual names, titles, assignments of responsibility, and telephone numbers. All updates of individual names, titles, assignments of responsibility, and telephone numbers shall be reported to the department and to affected off-site response organizations within 30 days of these

changes. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-410. Documentation and record-keeping. Each licensee required to submit a contingency plan pursuant to K.A.R. 28-35-401 shall retain the following records in accordance with the recordkeeping requirements of part 3 of these regulations:

(a) The reports of contingency plan training, drills, and exercises as specified in K.A.R. 28-35-403; and

(b) the revisions and records of all notifications and reports as specified in K.A.R. 28-35-409 and part 3 of these regulations. (Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005.)

28-35-411. Table of quantities of radioactive material; need for contingency plan.

Quantities of Radioactive Materials Requiring Consideration of the Need for a Contingency Plan for Responding to a Release

Radioactive Material ¹	Release	Quantity	Quantity
	Fraction	(GBq)	(Ci)
Actinium-228	0.001	148,000	4,000
