¹ For combinations of radioactive materials, the licensee shall be required to consider whether a contingency plan is needed if the sum of the ratios of the quantity of each radioactive material authorized to the quantity listed in this table for that material exceeds one.

² Waste packaged in type B containers shall not require a contingency plan.

(Authorized by K.S.A. 48-1607; implementing K.S.A. 48-1602; effective Dec. 30, 2005; amended March 18, 2011.)

PART 14. THERAPEUTIC RADIATION MACHINES

28-35-450. General requirements. The provisions of “part X: therapeutic radiation machines” in volume I of the “suggested state regulations for control of radiation,” including appendix A, published by the conference of radiation control program directors, inc. and dated February 2005, are hereby adopted by reference, with the changes specified in this regulation. (a) Sec. X.2, “definitions,” shall be deleted.

(b) Sec. X.3(d)(vi) shall be deleted.

(c) Wherever the following phrases and references occur in part X, these phrases and references shall be replaced with the specified phrases and references to regulations and parts in this article:

(1) “Agency” shall be replaced with “department.”

(2) “[INSERT EFFECTIVE DATE OF THESE REGULATIONS]” shall be replaced with “the effective date of these regulations.”

(3) “G.14” shall be replaced with “part 6.”

(d) The following phrases in part X shall be replaced with the phrase “part 4”:

(1) In sec. X.3(i), “Parts D.1201, D.1205 and D.1502”;

- (2) in sec. X.4(a)(i)(1), "Part D.1201a.";
- (3) in sec. X.4(a)(i)(2), "Parts D.1301. and D.1301b.";
- (4) in sec. X.4(b), (b)(i), and (b)(iv), "Parts D.1301a. and D.1301b.";
- (5) in sec. X.4(b)(iv), "Part D.1301c.";
- (6) in sec. X.6(r)(vi), "Part D.1201";
- (7) in sec. X.9(a), "Parts D.1201 and D.1301"; and
- (8) in appendix A, sec. II(C), "Part D.1201."

(e) In sec. X.3(e), paragraph (i) shall be replaced with the following text: "Individuals operating a therapeutic radiation machine for healing arts purposes shall meet the requirements specified in the radiologic technologists practice act and shall have satisfactorily completed an education program in radiation therapy that meets the criteria specified in K.A.R. 100-73-3." (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended July 27, 2007.)

PART 15. PACKAGING AND TRANSPORTATION OF RADIOACTIVE MATERIAL

28-35-500. General license: NRC-approved packages. (a) A general license shall be deemed to have been issued to any licensee to transport, or to deliver to a carrier for transport, any licensed or registered material in a package for which a license, certificate of compliance (CoC), or other approval has been issued by the NRC.

(b) Each general license specified in subsection (a) shall apply only to a licensee who has a quality assurance program approved by the NRC.

(c) Each general license specified in subsection (a) shall apply only to a licensee who meets the following requirements:

(1) Has a copy of the specific license, certificate of compliance, or other approval by the NRC for the package and has the drawings and any other documents referenced in the approval relating to the use and maintenance of the package and to the actions to be taken before shipment;

(2) complies with the terms and conditions of the license, certificate of compliance, or other approval, as applicable, and with the applicable requirements of this part; and

(3) has registered with the NRC before the licensee's first use of the package.

(d) Each general license specified in subsection (a) shall apply only if the package approval authorizes the use of the package under this general license.

(e) Each general licensee specified in subsection (a) shall meet the requirements of K.A.R. 28-35-501 when using any type B or fissile material package approved by the NRC before April 1, 1996. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-501. Previously approved type B package. (a)(1) Any type B package previously approved by the NRC but not designated as "B(U)," "B(M)," "B(U)F," or "B(M)F" in the identification number of the NRC CoC and any type AF package approved by the NRC before September 6, 1983 may be used under the general license specified in K.A.R. 28-35-500(a), if the following additional provisions are met:

(A) The fabrication of the packaging was satisfactorily completed by August 31, 1986, as demonstrated by application of the model number on the package in accordance with 10 CFR 71.85(c).

(B) A serial number is assigned that is a unique identifier of each package that conforms to the approved design. The serial number shall be legibly and durably marked on the outside of each package.

(2) This subsection shall not apply to type B packages after October 1, 2008.

(b) Any type B(U) package, type B(M) package, or fissile material package may be used under the general license specified in K.A.R. 28-35-500(a), if the following provisions are met:

(1) The package has been previously approved by the NRC and does not have the designation "-85" in the identification number of the NRC CoC.

(2) The fabrication of the package was satisfactorily completed on or before April 1, 1999, as demonstrated by the application of the model number on the package in accordance with 10 CFR 71.85(c).

(3) The package used for a shipment to a location outside the United States is subject to multilateral approval as defined in the U.S. DOT regulations specified in 49 CFR 173.403.

(4) A serial number is assigned that is a unique identifier of the package conforming to the approved design. The serial number shall be legibly and durably marked on the outside of the package. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-502. Air transport of plutonium. (a) Notwithstanding any applicable provisions of any general licenses and notwithstanding any ap-

plicable exemptions stated in this part or in the U.S. department of transportation regulations, each licensee shall ensure that plutonium in any form, whether for import, export, or domestic shipment, is not transported by air or delivered to a carrier for air transport unless at least one of the following conditions is met:

(1) The plutonium is contained in a medical device designed for human application for one individual.

(2) The plutonium is contained in a material in which the specific activity is less than or equal to the activity concentration values for plutonium specified in K.A.R. 28-35-221b and in which the radioactivity is essentially uniformly distributed.

(3) The plutonium is shipped in a single package containing no more than an A_2 quantity of plutonium in any isotope or form and is shipped as specified in K.A.R. 28-35-196a.

(4) The plutonium is shipped in a package specifically authorized for the shipment of plutonium by air in the certificate of compliance issued by the NRC for that package.

(b) Nothing in subsection (a) of this regulation shall be interpreted as removing or diminishing the requirements of 10 CFR 73.24.

(c) For any shipment of plutonium by air that is subject to paragraph (a)(4), each licensee shall, through special arrangement with the carrier, require the carrier's compliance with 49 CFR 175.704. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-503. Package-opening instructions. Before delivering any package containing licensed or registered material to a carrier for transport, each licensee shall ensure that any special instructions that are needed to safely open the package have been sent to, or otherwise have been made available to, the consignee for the consignee's use in accordance with K.A.R. 28-35-221a. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

28-35-504. Advance notification of shipment of certain types of licensed or registered material. (a)(1) As specified in subsections (b), (c), and (d), each licensee shall provide advance notification to the governor or the governor's designee of each state of each shipment of licensed or registered material through or across the boundary of that governor's state. The licensee shall provide this advance notification before transporting, or deliv-

ering to a carrier for transport, any licensed or registered material outside the confines of the licensee's facility or other place of use or storage.

(2) As specified in subsections (b), (c), and (d), each licensee shall provide advance notification to the Indian tribal official or tribal official of participating tribes referenced in subsection (c), or the official's designee, of the shipment of licensed material within or across the boundary of the tribe's reservation before the transport or delivery to a carrier for transport of licensed material outside the confines of the licensee's plant or other place of use or storage.

(b)(1) The advance notification specified in subsection (a) shall be required for each shipment of irradiated reactor fuel containing 100 grams or less in net weight of irradiated fuel, exclusive of cladding and any other structural or packaging material, that has a total external radiation dose rate in excess of 100 rems per hour at a distance of three feet from any accessible surface without intervening shielding.

(2) The advance notification specified in subsection (a) shall also be required for each shipment of licensed or registered material, other than irradiated fuel, meeting all of the following conditions:

(A) The licensed or registered material is required to be shipped in a type B package for transportation as specified in this part.

(B) The licensed or registered material is being transported to or across a state boundary en route to a disposal facility or to a collection point for transport to a disposal facility.

(C) The quantity of licensed or registered material in a single package exceeds the smaller of the following:

(i) 3,000 times the A_1 value of the radionuclides as specified in 10 C.F.R. part 71, appendix A, which is adopted by reference in K.A.R. 28-35-221b, for special form radioactive material or 3,000 times the A_2 value of the radionuclides as specified in 10 C.F.R. part 71, appendix A, which is adopted by reference in K.A.R. 28-35-221b for normal form radioactive material; and

(ii) 1,000 TBq (27,000 Ci).

(c) The notification specified in subsection (b) shall meet the following requirements:

(1) The notification shall be submitted, in writing, to the office of each appropriate governor or governor's designee and each appropriate Indian tribal official and to the director of the division of nuclear security in the office of nuclear security and incident response.

(2) Each notification delivered by mail shall be postmarked at least seven days before the beginning of the seven-day period during which departure of the shipment is estimated by the licensee to occur.

(3) Each notification delivered by any means other than mail shall reach the office of each governor or governor's designee and each appropriate Indian tribal official at least four days before the beginning of the seven-day period during which departure of the shipment is estimated by the licensee to occur.

(4) Each licensee shall retain a copy of the notification as a record for three years.

(d) Each advance notification of any shipment of irradiated reactor fuel or nuclear waste shall contain the following information:

(1) The name, address, and telephone number of the shipper, carrier, and receiver of the irradiated reactor fuel or nuclear waste shipment;

(2) a description of the irradiated reactor fuel or nuclear waste contained in the shipment, as specified in the regulations of the United States department of transportation (USDOT) in 49 C.F.R. 172.202 and 172.203(d);

(3) a shipment schedule, which shall include the following information:

(A) The point of origin of the shipment and a specification of the seven-day period during which departure of the shipment is estimated by the licensee to occur;

(B) a specification of the seven-day period during which arrival of the shipment at the state boundaries is estimated by the licensee to occur; and

(C) the destination of the shipment and a specification of the seven-day period during which arrival of the shipment at the destination is estimated by the licensee to occur; and

(4) the name of a contact person, including a telephone number, for current shipment information.

(e) If any licensee finds out that the shipment schedule previously furnished to any governor, governor's designee, or Indian tribal official in accordance with this regulation will not be met, that licensee shall perform the following:

(1) Telephone a responsible individual in the office of the governor or governor's designee or the Indian tribal official as soon as practical after the licensee has found out that the shipment schedule will not be met and inform that individual of the revised schedule; and

(2) maintain a record of the name of the responsible individual contacted and the date of this contact for three years.

(f) Each licensee who cancels an irradiated reactor fuel or nuclear waste shipment for which advance notification has been sent shall send a cancellation notice to the governor of each state or the governor's designee or to the Indian tribal official who was previously notified and to the director of the division of nuclear security in the office of nuclear security and incident response. The licensee shall state in the notice that the notice is a cancellation and shall identify the advance notification that is being canceled. The licensee shall retain a copy of the notice as a record for three years. (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005; amended May 4, 2018.)

28-35-505. Quality assurance requirements. Each program for transport container inspection and maintenance that is limited to radiographic exposure devices, source changers, or any package transporting these devices or changers and that meets the requirements of K.A.R. 28-35-282a or equivalent NRC or agreement state requirements shall be deemed to meet the requirement specified in K.A.R. 28-35-500(b). (Authorized by and implementing K.S.A. 48-1607; effective Dec. 30, 2005.)

PART 16. RADON

28-35-600. Definitions. In addition to the terms defined in K.S.A. 48-16a02 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) "All reasonable times" means normal business hours and other times that radon services are being performed, or at a time convenient for the property owner.

(b) "Mitigation" means any action taken to reduce radon concentrations in the indoor atmosphere or to prevent the entry of radon into the indoor atmosphere. This term shall include application of materials, installation of systems, and any new repair or alteration of a building or design.

(c) "Mitigation system" means any set of devices, controls, or materials installed for reducing radon concentrations in a building.

(d) "Quality assurance and quality control plan" means a plan or design that ensures the authenticity, integrity, reproducibility, and accuracy of radon concentration measurements. Each quality

assurance and quality control plan shall include at a minimum procedures for the following:

- (1) Chain of custody;
 - (2) calibration of measurement devices in the field;
 - (3) checks for background;
 - (4) duplicates, blanks, and spikes; and
 - (5) representative sampling.
- (e) “Radon certification law” means K.S.A. 48-16a01 through 48-16a12, and amendments thereto.

(f) “Radon measurement technician” means an individual certified by the department who performs radon or radon progeny measurements for a radon measurement business or provides professional advice on radon or radon progeny measurements, health risks, radon-related exposure, radon entry routes, or other radon-related activities.

(g) “Radon mitigation technician” means an individual certified by the department who designs or installs radon mitigation systems or who performs and evaluates results of tests to determine appropriate radon mitigation systems. This individual may be employed or contracted by a radon mitigation business.

(h) “Radon progeny” means the short-lived radionuclides formed from the decay of radon-222 or radon-220.

(i) “Radon services” means any activity provided by a person that is subject to the radon certification law. This term shall include radon testing, the analysis of radon, radon testing or mitigation consultation, and radon mitigation.

(j) “Site” means a geographic location comprising leased or owned land, buildings, and other structures where radon services are performed. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03, 48-16a05, 48-16a06, and 48-16a08; effective Feb. 3, 2012.)

28-35-601. General provisions. Except as otherwise specifically provided by the radon certification law, K.A.R. 28-35-601 through 28-35-608 shall apply to any person that provides radon services.

(a) Any initial or renewal application to conduct radon services may be denied by the department for any of the following reasons:

- (1) Any false statement in the application;
- (2) revocation of a prior radon services certification in Kansas or another state; or
- (3) violation of any of the requirements of K.A.R. 28-35-601 through 28-35-608 or the radon certification law.

(b) Any certification to conduct radon services may be suspended or revoked or may have requirements or restrictions added by the secretary for any of the following reasons:

(1) Any condition revealed by an application, any statement of fact, or any report, record, or inspection that could result in the denial of any application; or

(2) violation of or failure to observe any of the terms and conditions of the certification, any requirement of the radon certification law and K.A.R. 28-35-601 through 28-35-608, or any order of the secretary.

(c) Initial certification and renewal certification shall be valid for 24 months.

(d) Requirements or restrictions that are necessary to ensure compliance with the radon certification law may be specified by the secretary at the time of initial certification or renewal certification or in connection with any radon services inspection.

(e) Failure to comply with all requirements for certification within 60 days of submittal of an application for initial or renewal certification shall void the application.

(f) An exemption to any requirement of K.A.R. 28-35-601 through 28-35-608 may be granted by the secretary if both of the following conditions are met:

(1) A person certified to conduct radon services submits a written request, including justification for the exemption and any supporting data or documentation, to the secretary for review and consideration for approval.

(2) The secretary determines that the exemption is protective of public health, safety, and the environment.

(g) Each person certified under the radon certification law and these regulations shall submit the reports required by K.S.A. 48-16a10, and amendments thereto, and any additional relevant information requested by the department in a format specified by the department.

(h) All records required to be kept by each person certified under the radon certification law and these regulations shall be retained for at least three years.

(i) Each radon measurement technician, radon mitigation technician, radon measurement business, radon mitigation business, and radon measurement laboratory shall allow the department access at all reasonable times to that person’s or that person’s employer’s facilities and files for inspection and examination of records of radon

services to determine compliance with the radon certification law and K.A.R. 28-35-601 through 28-35-608.

(j) Upon request by the department, each person certified under K.A.R. 28-35-601 through 28-35-608 or the radon certification law shall submit a list of scheduled measurement or mitigation activities to the department within two business days of receipt of the request. (Authorized by K.S.A. 2010 Supp. 48-16a03 and 48-16a04; implementing K.S.A. 2010 Supp 48-16a03 and 48-16a10; effective Feb. 3, 2012.)

28-35-602. Fees. (a) Application fees for 24-month certification:

- (1) Radon measurement technician:
 - (A) Initial certification \$100.00
 - (B) Renewal certification..... \$100.00
- (2) Radon mitigation technician:
 - (A) Initial certification \$100.00
 - (B) Renewal certification..... \$100.00
- (3) Radon measurement laboratory:
 - (A) Initial certification \$250.00
 - (B) Renewal certification..... \$250.00
 - (b) Fee for returned check..... \$50.00
- (c) Fee for late certification renewal,
for each month or part of a month \$25.00

Each fee specified in this regulation shall be nonrefundable. (Authorized by and implementing K.S.A. 2010 Supp. 48-16a03 and 48-16a04; effective Feb. 3, 2012.)

28-35-603. Requirements for radon measurement technician. (a) Each applicant for initial certification as a radon measurement technician shall meet the requirements of K.S.A. 48-16a05, and amendments thereto, and the following additional requirements:

- (1) Be at least 18 years of age;
 - (2) complete and show proof of completion to the department of a radon measurement training course with at least 16 hours of classroom instruction approved by the department pursuant to K.S.A. 48-16a05, and amendments thereto;
 - (3) pass a closed-book examination on radon measurement approved by the department pursuant to K.S.A. 48-16a05, and amendments thereto, with a score of at least 70 percent; and
 - (4) provide any additional relevant information requested by the department.
- (b) Each radon measurement technician shall meet the following requirements:

(1) Conduct radon measurement activities in accordance with the requirements of the following:

- (A) K.S.A. 48-16a05, and amendments thereto;
- (B) “protocols for radon and radon decay product measurements in homes,” EPA 402-R-92-003, including appendices, published by the environmental protection agency and dated June 1993, which is hereby adopted by reference;
- (C) “indoor radon and radon decay product measurement device protocols,” EPA 402-R-92-004, published by the environmental protection agency and dated July 1992, which is hereby adopted by reference; and
- (D) all applicable municipal, county, state, and federal laws and regulations;

(2) upon request from the department, provide documentation of proficiency including continuing education requirements specified in K.A.R. 28-35-605;

(3) notify the department of any name or address changes within 30 days; and

(4) maintain and adhere to a quality assurance and quality control plan. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03 and 48-16a05; effective Feb. 3, 2012.)

28-35-604. Requirements for radon mitigation technician. (a) Each applicant for initial certification as a radon mitigation technician shall meet the requirements of K.S.A. 48-16a06, and amendments thereto, and the following additional requirements:

- (1) Be at least 18 years of age;
- (2) complete and submit proof of completion to the department of a radon mitigation training course with at least 24 hours of classroom instruction that includes active participation in radon mitigation techniques approved by the department pursuant to K.S.A. 48-16a06, and amendments thereto;
- (3) pass a closed-book examination on radon mitigation approved by the department pursuant to K.S.A. 48-16a06, and amendments thereto, with a score of at least 70 percent; and
- (4) provide any additional relevant information requested by the department.

(b) Each radon mitigation technician shall meet the following requirements:

- (1) Conduct radon mitigation activities in accordance with the requirements of the following:
 - (A) K.S.A. 48-16a06, and amendments thereto;
 - (B) “protocols for radon and radon decay prod-

uct measurements in homes,” which is adopted by reference in K.A.R. 28-35-603;

(C) “indoor radon and radon decay product measurement device protocols,” which is adopted by reference in K.A.R. 28-35-603;

(D) “radon mitigation standards,” EPA 402-R-93-078, including the appendix, published by the environmental protection agency, dated October 1993, and revised April 1994, which is adopted by reference; and

(E) municipal, county, state, and federal laws and regulations;

(2) upon request from the department, provide documentation of proficiency including continuing education requirements specified in K.A.R. 28-35-605; and

(3) notify the department of any name or address changes within 30 days. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03 and 48-16a06; effective Feb. 3, 2012.)

28-35-605. Continuing education. (a) Before certification renewal, each radon measurement technician shall meet the following continuing education requirements:

(1) Complete and submit proof of completion to the department of at least 16 hours of department-approved continuing education; and

(2) maintain documentation, pursuant to K.A.R. 28-35-601(h), that the continuing education was successfully completed within the prior 24-month certification period.

(b) Before certification renewal, each radon mitigation technician shall meet the following continuing education requirements:

(1) Complete and submit proof of completion to the department of at least 24 hours of department-approved continuing education;

(2) maintain documentation, pursuant to K.A.R. 28-35-601(h), that the continuing education was successfully completed within the prior 24-month certification period.

(c) If a person is certified as both a radon measurement technician and a radon mitigation technician, continuing education credit shall be granted for both certifications if the person completes at least 24 hours of department-approved continuing education credits for radon services during the 24-month period that the certificates are valid.

(d) Continuing education credit shall be accepted only for the completion of each different con-

tinuing education training course during a current certification period. Training courses for continuing education credit that are repeated shall be accepted only for the initial successful completion of the course during a current certification period. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03, 48-16a05, and 48-16a06; effective Feb. 3, 2012.)

28-35-606. Radon measurement business. (a) Each radon measurement business shall maintain for inspection a list of the name and credentials of each radon measurement technician employed or retained as a consultant by the radon measurement business.

(b) A radon measurement technician shall be present on-site to directly supervise all measurement activities performed by each radon measurement business.

(c) A radon measurement technician shall perform all testing and consultation about radon or radon progeny measurements, health risks, radon-related exposure, radon entry routes, and other radon-related activities for each radon measurement business. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03 and 48-16a07; effective Feb. 3, 2012.)

28-35-607. Radon mitigation business. (a) Each radon mitigation business shall maintain for inspection a list of the name and credentials of each radon mitigation technician employed or retained as a consultant by the radon mitigation business.

(b) All radon mitigation activities and consultations about radon or radon progeny measurements, health risks, radon-related exposure, radon entry routes, or other radon-related activities for a radon mitigation business shall be directly supervised or performed on-site by a radon mitigation technician.

(c) Each person subject to K.A.R. 28-35-601 through 28-35-608, when performing radon mitigation, shall comply with the protocols in the document adopted by reference in K.A.R. 28-35-604(b)(1)(D) regarding the design and construction of mitigation systems. (Authorized by K.S.A. 2010 Supp. 48-16a03; implementing K.S.A. 2010 Supp. 48-16a03 and 48-16a08; effective Feb. 3, 2012.)

28-35-608. Renewal of certification. (a) Each certification renewal application for a radon measurement technician, radon mitigation tech-

nician, or radon measurement laboratory shall be submitted at least 60 days before expiration of the certificate.

(b) Each applicant for renewal of certification shall meet the following requirements:

(1) Submit a completed application to the department on a form provided by the department;

(2) provide any additional relevant information requested by the department documenting that all applicable continuing education requirements for certification renewal have been completed; and

(3) submit payment to the department for the applicable fee specified in K.A.R. 28-35-602.

(c) An applicant's failure to renew a certification within six months after certification has expired shall require that applicant's compliance with all requirements for initial certification.

(d) Each renewal application submitted after certification has expired shall require the payment of a late fee specified in K.A.R. 28-35-602. (Authorized by and implementing K.S.A. 2010 Supp. 48-16a03; effective Feb. 3, 2012.)

**PART 17. PHYSICAL PROTECTION
OF RADIOACTIVE MATERIAL
QUANTITIES OF CONCERN**

28-35-700. General requirements. The provisions of 10 C.F.R. part 37, 78 fed. reg. 17007-17020 (2013), as in effect on May 20, 2013, are hereby adopted by reference, with the changes specified in this regulation.

(a) The following sections or portions of sections in 10 C.F.R. part 37 shall be deleted:

- (1) 37.1;
- (2) 37.3;
- (3) 37.7;
- (4) 37.9;
- (5) 37.11(a) and (b);
- (6) 37.13;
- (7) 37.43(d)(9);
- (8) in 37.81(g), the third sentence;
- (9) 37.105;
- (10) 37.107; and
- (11) 37.109.

(b) In 10 C.F.R. 37.5, the following terms and the definition of each of these terms shall be deleted:

- (1) "Act";
- (2) "agreement state";
- (3) "becquerel";
- (4) "byproduct material";
- (5) "commission";
- (6) "curie";

- (7) "government agency";
- (8) "license";
- (9) "lost or missing licensed material";
- (10) "person";
- (11) "state"; and
- (12) "United States."

(c) Wherever the following words and phrases occur within the portions of 10 C.F.R. part 37 adopted in this regulation, these words and phrases shall be replaced with "department":

- (1) "Appropriate NRC regional office listed in §30.6(a)(2) of this chapter";
- (2) "Commission," except secs. 37.5, 37.27(a) and (c), 37.29(a) and 37.71;
- (3) "NRC," except secs. 37.25(b)(2), 37.27(c), 37.29(a), and 37.71;
- (4) "NRC regional office specified in §30.6 of this chapter";
- (5) "NRC's Operations Center"; and
- (6) "NRC's Operations Center (301-816-5100)."

(d) The following changes shall be made whenever the following text occurs within the portions of 10 C.F.R. part 37 adopted in this regulation:

- (1) "Part 73 of this chapter" shall be replaced with "10 C.F.R. Part 73."
- (2) "71.97(b) of this chapter" and "71.97 of this chapter" shall be replaced with "K.A.R. 28-35-504(b)."
- (3) "Governor's designee" shall be replaced with "division of emergency management of the office of the adjutant general." (Authorized by and implementing K.S.A. 48-1607; effective May 4, 2018.)

**Article 36.—FOOD SERVICE
ESTABLISHMENTS, FOOD VENDING
MACHINE COMPANIES AND LODGING
ESTABLISHMENTS**

MOBILE UNITS

28-36-1. (Authorized by K.S.A. 1978 Supp. 36-503; effective, E-77-45, Sept. 30, 1976; effective Feb. 15, 1977; amended, E-79-16, July 1, 1978; amended May 1, 1979; revoked Feb. 18, 2005.)

**FOOD VENDING MACHINES AND
FOOD VENDING MACHINE COMPANIES**

28-36-10 to 28-36-18. (Authorized by K.S.A. 1976 Supp. 36-507; effective, E-77-46, Sept. 30, 1976; effective Feb. 15, 1977; revoked Aug. 13, 1999.)

FOOD SERVICE ESTABLISHMENTS

28-36-20. (Authorized by K.S.A. 1978 Supp. 36-507; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; revoked Aug. 13, 1999.)

28-36-21. (Authorized by K.S.A. 36-507; implementing K.S.A. 36-508; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; amended Aug. 23, 1993; revoked Aug. 13, 1999.)

28-36-22 to 28-36-24. (Authorized by K.S.A. 1978 Supp. 36-507; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; revoked Aug. 13, 1999.)

28-36-25. (Authorized by K.S.A. 36-507; implementing K.S.A. 36-508, K.S.A. 1982 Supp. 36-503; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; amended, T-83-47, Dec. 8, 1982; modified, L. 1983 ch. 350, May 1, 1983; revoked Aug. 13, 1999.)

28-36-26 to 28-36-28. (Authorized by K.S.A. 1978 Supp. 36-507; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; revoked Aug. 13, 1999.)

28-36-29. (Authorized by K.S.A. 36-507; implementing K.S.A. 36-508, K.S.A. 1982 Supp. 36-515a; effective, E-79-29, Oct. 24, 1978; effective May 1, 1979; amended, T-83-47, Dec. 8, 1982; amended May 1, 1983; revoked Aug. 13, 1999.)

APPLICATION AND LICENSE FEES

28-36-30. (Authorized by and implementing K.S.A. 2002 Supp. 36-503; effective, E-79-16, July 1, 1978; effective May 1, 1979; amended, E-82-21, Nov. 16, 1981; amended May 1, 1982; amended Dec. 30, 1991; amended Sept. 27, 1993; amended Nov. 20, 1998; amended, T-28-7-2-01, July 2, 2001; amended Nov. 9, 2001; amended Oct. 24, 2003; revoked June 4, 2010.)

28-36-31. (Authorized by K.S.A. 1978 Supp. 36-502; effective, E-79-16, July 1, 1978; effective May 1, 1979; revoked June 4, 2010.)

28-36-32. (Authorized by K.S.A. 1978 Supp. 36-504; effective, E-79-16, July 1, 1978; effective May 1, 1979; revoked Feb. 18, 2005.)

LODGING ESTABLISHMENTS

28-36-33 through 28-36-45. (Authorized by K.S.A. 1978 Supp. 36-506; effective May

1, 1979; revoked, T-28-10-8-07, Oct. 8, 2007; revoked Feb. 1, 2008.)

28-36-46. (Authorized by and implementing K.S.A. 36-506; effective May 1, 1983; revoked, T-28-10-8-07, Oct. 8, 2007; revoked Feb. 1, 2008.)

28-36-47. (Authorized by and implementing K.S.A. 36-506; effective May 1, 1983; revoked, T-28-10-8-07, Oct. 8, 2007; revoked Feb. 1, 2008.)

28-36-48. (Authorized by and implementing K.S.A. 36-507; effective May 1, 1983; revoked, T-28-10-8-07, Oct. 8, 2007; revoked Feb. 1, 2008.)

28-36-49. (Authorized by and implementing K.S.A. 36-507; effective May 1, 1983; revoked, T-28-10-8-07, Oct. 8, 2007; revoked Feb. 1, 2008.)

28-36-60. (Authorized by and implementing 2001 SB 100, Secs. 2 and 3; effective, T-28-7-2-01, July 2, 2001; effective Nov. 9, 2001; revoked Feb. 18, 2005.)

28-36-70. (Authorized by K.S.A. 36-506; implementing K.S.A. 36-501 and 36-506; effective, T-28-10-8-07, Oct. 8, 2007; effective Feb. 5, 2008; revoked June 4, 2010.)

28-36-71. (Authorized by and implementing K.S.A. 36-502 and 36-506; effective, T-28-10-8-07, Oct. 8, 2007; effective Feb. 5, 2008; revoked June 4, 2010.)

28-36-72 through 28-36-89. (Authorized by and implementing K.S.A. 36-506; effective, T-28-10-8-07, Oct. 8, 2007; effective Feb. 5, 2008; revoked June 4, 2010.)

28-36-101 through 28-36-107. (Authorized by and implementing K.S.A. 36-507; effective Aug. 13, 1999; amended Nov. 30, 2007; revoked June 4, 2010.)

28-36-108. (Authorized by K.S.A. 36-507; implementing K.S.A. 2006 Supp. 36-503 and K.S.A. 36-507; effective Aug. 13, 1999; amended Nov. 30, 2007; revoked June 4, 2010.)

28-36-109. (Authorized by and implementing K.S.A. 36-507; effective Nov. 30, 2007; revoked June 4, 2010.)

28-36-120. (Authorized by and implementing 2001 SB 100, Secs. 2 and 3; effective, T-28-7-2-01, July 2, 2001; effective Nov. 9, 2001; revoked Feb. 18, 2005.)

Article 36a.—RESTAURANTS

28-36a-1. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 1, 1979.)

28-36a-2. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked Jan. 1, 1968.)

28-36a-3 to 28-36a-8. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 1, 1979.)

28-36a-9. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked Jan. 1, 1968.)

28-36a-10 to 28-36a-15. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 1, 1979.)

28-36a-16. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; amended, E-68-13, May 13, 1968; amended Jan. 1, 1969; revoked May 1, 1979.)

28-36a-17. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked Jan. 1, 1968.)

28-36a-18 to 28-36a-24. (Authorized by K.S.A. 36-302, 36-304, 36-305, K.S.A. 1967 Supp. 36-301, 36-303; effective Jan. 1, 1968; revoked, E-79-29, Oct. 24, 1978; revoked May 1, 1979.)

**Article 37.—HOTELS, MOTELS,
ROOMING HOUSES AND
APARTMENT HOUSES**

28-37-1 to 28-37-5. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 1, 1979.)

28-37-6. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked Jan. 1, 1968.)

28-37-7 and 28-37-8. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 1, 1979.)

28-37-9. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked Jan. 1, 1968.)

28-37-10 to 28-37-14. (Authorized by K.S.A. 36-304, 36-305; effective Jan. 1, 1966; revoked May 10, 1996.)

**Article 38.—LICENSURE OF ADULT
CARE HOME ADMINISTRATORS**

28-38-1. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-2. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; amended, E-81-4, Jan. 10, 1980; revoked May 1, 1981.)

28-38-3. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-4 to 28-38-7. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; amended, E-81-4, Jan. 10, 1980; revoked May 1, 1981.)

28-38-8. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-9. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; amended, E-81-4, Jan. 10, 1980; revoked, May 1, 1981.)

28-38-10 to 28-38-12. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-13. (Authorized by K.S.A. 60-2101; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-14 to 28-38-16. (Authorized by K.S.A. 65-3503; effective Feb. 15, 1977; revoked May 1, 1981.)

28-38-17. (Authorized by and implementing K.S.A. 65-3503; effective May 1, 1981; amended May 1, 1983; revoked Sept. 24, 1990.)

28-38-18. (Authorized by K.S.A. 2010 Supp. 65-3503; implementing K.S.A. 2010 Supp. 65-3503 and 65-3504; effective May 1, 1981; amended July 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Oct. 3, 2003; amended Dec. 5, 2008; amended Oct. 14, 2011; revoked Oct. 2, 2020.)

28-38-19. (Authorized by and implementing K.S.A. 2007 Supp. 65-3503 and K.S.A. 2007 Supp. 65-3504; effective May 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended May 1, 1983; amended May 1, 1984; amended May 1, 1987; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Oct. 3, 2003; amended Dec. 5, 2008; revoked Oct. 2, 2020.)

28-38-20. (Authorized by and implementing K.S.A. 2001 Supp. 65-3503 and K.S.A. 2001 Supp. 65-3504; effective May 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended May 1, 1983; amended May 1, 1984; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; revoked Oct. 2, 2020.)

28-38-21. (Authorized by and implementing K.S.A. 65-3502; effective May 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended May 1, 1983; amended May 1, 1984; amended May 1, 1987; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Dec. 5, 2008; revoked Oct. 2, 2020.)

28-38-22. (Authorized by K.S.A. 2007 Supp. 65-3503; implementing K.S.A. 2007 Supp. 65-3503 and K.S.A. 65-3505; effective May 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended May 1, 1984; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Dec. 5, 2008; revoked Oct. 2, 2020.)

28-38-23. (Authorized by K.S.A. 65-3501, K.S.A. 2007 Supp. 65-3503, and K.S.A. 65-3505; implementing K.S.A. 65-3501 and 65-3505; effective May 1, 1981; amended, E-82-12, June 17, 1981; amended May 1, 1982; amended May 1, 1984; amended Sept. 24, 1990; amended May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Dec. 5, 2008; revoked Oct. 2, 2020.)

28-38-24. (Authorized by K.S.A. 65-3503; implementing K.S.A. 65-3508; effective May 1, 1981; revoked Sept. 24, 1990.)

28-38-25. (Authorized by K.S.A. 65-3503; implementing K.S.A. 65-3508; effective May 1, 1981; revoked Sept. 24, 1990.)

28-38-26. (Authorized by and implementing K.S.A. 1999 Supp. 65-3503; effective May 1, 1981, amended May 1, 1984; amended Sept. 24, 1990; amended July 14, 2000; revoked Oct. 2, 2020.)

28-38-27. (Authorized by and implementing K.S.A. 65-3503; effective May 1, 1981; revoked May 1, 1984.)

28-38-28. (Authorized by and implementing K.S.A. 2001 Supp. 65-3503; effective May 1, 1981;

amended Sept. 24, 1990; amended July 14, 2000; amended Jan. 17, 2003; revoked Oct. 2, 2020.)

28-38-29. (Authorized by and implementing K.S.A. 2007 Supp. 65-3503; effective May 10, 1993; amended July 14, 2000; amended Jan. 17, 2003; amended Dec. 5, 2008; revoked Oct. 2, 2020.)

28-38-30. (Authorized by and implementing K.S.A. 2001 Supp. 65-3503 and 65-3505; effective July 14, 2000; amended Jan. 17, 2003; revoked Oct. 2, 2020.)

Article 39.—LICENSURE OF ADULT CARE HOMES

SKILLED NURSING HOMES

28-39-1 to 28-39-22. (Authorized by K.S.A. 39-932; effective Feb. 15, 1977; revoked May 1, 1982.)

INTERMEDIATE CARE HOMES

28-39-30 to 28-39-50. (Authorized by K.S.A. 39-932; effective Feb. 15, 1977; revoked May 1, 1982.)

PERSONAL CARE HOMES

28-39-60 to 28-39-75. (Authorized by K.S.A. 39-932; effective Feb. 15, 1977; revoked May 1, 1982.)

GENERAL

28-39-76. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; amended May 1, 1984; revoked Nov. 1, 1993.)

28-39-77. (Authorized by K.S.A. 39-932; implementing K.S.A. 39-927, 39-932, and K.S.A. 1990 Supp. 39-930; effective May 1, 1982; amended, T-84-17, July 26, 1983; amended May 1, 1984; amended, T-87-51, Dec. 19, 1986; amended May 1, 1987; amended, T-88-57, Dec. 16, 1987; amended May 1, 1988; amended April 3, 1989; amended Dec. 30, 1991; revoked Nov. 1, 1993.)

28-39-77a. (Authorized by and implementing L. 1985, Ch. 151, Sec. 1; effective May 1, 1986; revoked Nov. 1, 1993.)

28-39-78. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-79. (Authorized by K.S.A. 39-932, K.S.A. 1983 Supp. 39-936; implementing K.S.A. 1983 Supp. 39-936; effective, T-84-22, Aug. 30, 1983; effective May 1, 1984; revoked Feb. 28, 1994.)

28-39-80. (Authorized by K.S.A. 39-932, K.S.A. 1983 Supp. 39-936; implementing K.S.A. 1983 Supp. 39-936; effective, T-84-22, Aug. 30, 1983; effective May 1, 1984; revoked Feb. 28, 1994.)

28-39-81. (Authorized by K.S.A. 75-5625; implementing K.S.A. 65-1,120; effective May 1, 1984; amended Aug. 13, 1990; revoked Feb. 28, 1994.)

28-39-81a. (Authorized by K.S.A. 75-5625; implementing K.S.A. 1983 Supp. 65-1,121, 65-1124; effective May 1, 1984; revoked Feb. 28, 1994.)

28-39-81b. (Authorized by K.S.A. 75-5625; implementing K.S.A. 1983 Supp. 65-1,121; 65-1124; effective May 1, 1984; revoked Feb. 28, 1994.)

SKILLED NURSING FACILITIES AND INTERMEDIATE CARE FACILITIES

28-39-82. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-83. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; amended May 1, 1985; amended, T-88-57, Dec. 16, 1987; amended May 1, 1988; revoked Nov. 1, 1993.)

28-39-84. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-85. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-86. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-87. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; amended May 1, 1984; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended July 17, 1989; revoked Nov. 1, 1993.)

28-39-88. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-89. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-90. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-91. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-92. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-93. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-94. (Authorized by and implementing K.S.A. 39-932; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended May 1, 1984; revoked Nov. 1, 1993.)

28-39-95. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-96. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-97. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-98. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-99. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-100. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-101. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-102. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-103. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-103a. (Authorized by K.S.A. 29-932; implementing K.S.A. 1983 Supp. 39-927, 39-930 and K.S.A. 39-932; effective May 1, 1984; revoked Nov. 1, 1993.)

28-39-104. (Authorized by and implementing K.S.A. 39-932; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended, T-83-15, July 1, 1982; amended May 1, 1983; revoked Nov. 1, 1993.)

28-39-105. (Authorized by and implementing K.S.A. 39-932; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended, T-83-15, July 1, 1982; amended May 1, 1983; revoked Nov. 1, 1993.)

28-39-106. (Authorized by and implementing K.S.A. 39-932; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended, T-83-15, July 1, 1982; amended May 1, 1983; revoked Nov. 1, 1993.)

28-39-107. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-108. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-109. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-110. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-111. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; amended, T-87-51, Dec. 19, 1986; amended May 1, 1987; revoked Nov. 1, 1993.)

28-39-112. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

28-39-113. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Nov. 1, 1993.)

PERSONAL CARE FACILITIES

28-39-114 to 28-39-129. (Authorized by and implementing K.S.A. 39-932; effective May 1,

1982; revoked, T-88-57, Dec. 16, 1987; revoked May 1, 1988.)

28-39-130. (Authorized by and implementing K.S.A. 39-932; effective, May 1, 1982; amended T-83-15, July 1, 1982; amended May 1, 1983; revoked, T-88-57, Dec. 16, 1987; revoked May 1, 1988.)

28-39-131. (Authorized by and implementing K.S.A. 39-932, effective May 1, 1982; revoked, T-88-57, Dec. 16, 1987; revoked May 1, 1988.)

ONE-BED AND TWO-BED HOMES

28-39-132. (Authorized by K.S.A. 39-932; implementing K.S.A. 39-932, K.S.A. 1982 Supp. 39-927, 39-930; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended, T-83-28, Sept. 22, 1982; amended May 1, 1983; revoked May 1, 1984.)

28-39-133. (Authorized by and implementing K.S.A. 39-932; effective May 1, 1982; revoked Oct. 8, 1999.)

28-39-134 to 28-39-137. (Authorized by and implementing K.S.A. 39-932; effective, T-83-4, Jan. 7, 1982; effective May 1, 1982; amended, T-83-28, Sept. 22, 1982; amended May 1, 1983; revoked Oct. 8, 1999.)

BOARDING CARE HOMES

28-39-138. (Authorized by K.S.A. 39-932; implementing K.S.A. 1982 Supp. 39-927, 39-930; effective, T-83-28, Sept. 22, 1982; effective May 1, 1983; revoked May 1, 1984.)

28-39-139 to 28-39-143. Authorized by and implementing K.S.A. 39-932; effective, T-83-28, Sept. 22, 1982; effective May 1, 1983; revoked, T-88-57, Dec. 16, 1987; revoked May 1, 1988.)

28-39-144. Definitions. The following definitions shall apply to all adult care homes except nursing facilities for mental health and intermediate care facilities for the mentally retarded.

(a) "Activities director" means an individual who meets one of the following requirements:

- (1) Has a degree in therapeutic recreation;
- (2) has two years of experience in a social or recreational program within the last five years, one of which was full-time in a patient activities program in a health care setting;
- (3) is registered in Kansas as an occupational therapist or occupational therapy assistant;

(4) has a bachelor's degree in a therapeutic activity field in art therapy, horticultural therapy, music therapy, special education, or a related therapeutic activity field; or

(5) has completed a course approved by the department in resident activities coordination and receives consultation from a therapeutic recreation specialist, an occupational therapist, an occupational therapy assistant, or an individual with a bachelor's degree in art therapy, music therapy, or horticultural therapy.

(b) "Administrator" means any individual who is charged with the general administration of a nursing facility, nursing facility for mental health, assisted living facility, or residential health care facility, whether or not the individual has an ownership interest in the adult care home. Each administrator of an adult care home shall be licensed in accordance with K.S.A. 65-3501 et seq., and amendments thereto.

(c) "Adult day care" means an adult care home that meets the definition in K.S.A. 39-923, and amendments thereto.

(d) "Adult care home" means any of the following facilities licensed by the secretary of health and environment:

- (1) A nursing facility;
- (2) a nursing facility for mental health;
- (3) an intermediate care facility for the mentally retarded;
- (4) an assisted living facility;
- (5) a residential health care facility;
- (6) a home-plus facility;
- (7) an adult day care facility; or
- (8) a boarding care home.

(e) "Advanced registered nurse practitioner" means an individual who is certified by the Kansas board of nursing as an advanced registered nurse practitioner.

(f) "Alteration" means any addition, modification, or modernization in the structure or usage of a facility.

(g) "Ambulatory resident" means any resident who is physically and mentally capable of performing the following:

- (1) Getting in and out of bed; and
- (2) walking in a normal path to safety in a reasonable period of time without the assistance of another person.

(h) "Applicant" means any individual, firm, partnership, corporation, company, association, or joint stock association requesting a license to operate an adult care home.

(i) "Assisted living facility" means an adult care home that meets the definition found in K.S.A. 39-923, and amendments thereto.

(j) "Audiologist" means an individual who is licensed by the Kansas department of health and environment as an audiologist.

(k) "Basement" means the part of a building that is below grade.

(l) "Boarding care home" means an adult care home that meets the definition found in K.S.A. 39-923, and amendments thereto.

(m) "Change of ownership" means any transaction that results in a change of control over the capital assets of an adult care home.

(n) "Clinical record" means a record that includes all the information and entries reflecting each resident's course of stay in an adult care home.

(o) "Controlled substance" means any drug, substance, or immediate precursor included in any of the schedules designated in K.S.A. 65-4105, 65-4107, 65-4109, 65-4111, and 65-4113, and amendments thereto.

(p) "Day shift" means any eight-hour work period that occurs between the hours of 6 a.m. and 9 p.m.

(q) "Department" means the Kansas department of health and environment.

(r) "Dietetic services supervisor" means an individual who meets one of the following requirements:

- (1) Is licensed in the state of Kansas as a dietitian;
- (2) has an associate's degree in dietetic technology from a program approved by the American dietetic association;

(3) is a dietary manager who is certified by the board of the dietary managers' association; or

(4) has training and experience in dietetic services supervision and management that are determined by the secretary of health and environment to be equivalent in content paragraph (2) or (3) of this subsection.

(s) "Dietitian" means an individual who is licensed by the Kansas department of health and environment as a dietitian.

(t) "Direct care staff" means individuals employed by an adult care home who assist residents in activities of daily living. These activities may include the following:

- (1) Grooming;
- (2) eating;
- (3) toileting;
- (4) transferring; and

- (5) ambulation.
- (t) "Director of nursing" means an individual who meets the following criteria:
- (1) Is licensed in Kansas as a registered nurse;
 - (2) is employed full-time in a nursing facility; and
 - (3) has the responsibility, administrative authority, and accountability for the supervision of nursing care provided to residents in a nursing facility.
- (u) "Drug administration" means an act in which a single dose of a prescribed drug or biological is given by injection, inhalation, ingestion, or any other means to a resident by an authorized person in accordance with all laws and regulations governing the administration of drugs and biologicals. Drug administration shall entail the following:
- (1) Removing an individual dose from a labeled container, including a unit-dose container;
 - (2) verifying the drug and dose with the physician's orders;
 - (3) administering the dose to the proper resident; and
 - (4) documenting the dose in the resident's clinical record.
- (w) "Drug dispensing" means the delivery of one or more doses of a drug by a licensed pharmacist or physician. The drug shall be dispensed in a container and labeled in compliance with state and federal laws and regulations.
- (x) "Full-time" means 35 or more hours per week.
- (y) "Health information management practitioner" means an individual who has met the "standards for initial certification" as a registered record administrator or an accredited record technician adopted by the American medical record association, as in effect on October 1, 1990, and hereby adopted by reference.
- (z) "Home-plus" means an adult care home that meets the definition of K.S.A. 39-923, and amendments thereto.
- (aa) "Interdisciplinary team" means the following:
- (1) A registered nurse with responsibility for the care of the residents; and
 - (2) other appropriate staff, as identified by resident comprehensive assessments, who are responsible for the development of care plans for residents.
- (bb) "Legal representative" means an individual person who has been appointed by a court of law as a guardian or has been selected by a resident in a durable power of attorney for health care decisions.
- (cc) "Licensed mental health technician" means an individual licensed by the Kansas board of nursing as a licensed mental health technician.
- (dd) "Licensed nurse" means an individual licensed by the Kansas board of nursing as a registered professional nurse or licensed practical nurse.
- (ee) "Licensed practical nurse" means an individual who is licensed by the Kansas board of nursing as a licensed practical nurse.
- (ff) "Licensed social worker" means an individual who is licensed by the Kansas board of behavioral sciences as a social worker.
- (gg) "Licensee" means an individual, firm, partnership, association, company, corporation, or joint stock association authorized by a license obtained from the secretary of health and environment to operate an adult care home.
- (hh) "Medication" means any drug defined by K.S.A. 65-1626, and amendments thereto.
- (ii) "Medication aide" means an individual who has completed a training program in medication administration as prescribed in K.A.R. 28-39-169 through K.A.R. 28-39-171.
- (jj) "Non-ambulatory resident" means any resident who is not physically or mentally capable of getting in and out of bed and walking a normal path to safety without the assistance of another person.
- (kk) "Nurse aide" means an individual who has a nurse aide certificate issued by the Kansas department of health and environment according to K.A.R. 28-39-165.
- (ll) "Nurse aide trainee" means an individual who is in the process of completing a nurse aide training program as prescribed in K.A.R. 28-39-165 or K.A.R. 28-39-167 and has not been issued a nurse aide certificate by the Kansas department of health and environment.
- (mm) "Nursing facility" means an adult care home that meets the definition found in K.S.A. 39-923(a)(2), and amendments thereto.
- (nn) "Nursing facility for mental health" means an adult care home that meets the definition of K.S.A. 39-923 (a)(3), and amendments thereto.
- (oo) "Nursing personnel" means all of the following:
- (1) Registered professional nurses;
 - (2) licensed practical nurses;
 - (3) licensed mental health technicians in nursing facilities for mental health;
 - (4) medication aides;
 - (5) nurse aides; and
 - (6) nurse aide trainees.

(pp) “Nursing unit” means a distinct area of a nursing facility serving not more than 60 residents and including the service areas and rooms described in K.A.R. 28-39-162.

(qq) “Occupational therapist” means an individual who is registered with the Kansas board of healing arts as an occupational therapist.

(rr) “Occupational therapy assistant” means an individual who is registered with the Kansas board of healing arts as an occupational therapy assistant.

(ss) “Physical restraint” means any method or any physical device, material, or equipment attached or adjacent to the resident’s body and meeting the following criteria:

(1) Cannot be easily removed by the resident; and

(2) restricts freedom of movement or normal access to the resident’s body.

(tt) “Physical therapist” means an individual who is registered with the Kansas board of healing arts as a physical therapist.

(uu) “Physical therapy assistant” means an individual who is certified by the Kansas board of healing arts as a physical therapy assistant.

(vv) “Physician” means an individual who meets the requirements of the Kansas board of healing arts to practice medicine or osteopathy.

(ww) “Psychopharmacologic drug” means any drug prescribed with the intent of controlling mood, mental status, or behavior.

(xx) “Registered professional nurse” means an individual who is licensed by the Kansas state board of nursing as a registered professional nurse.

(yy) “Respite care” means the provision of services to a resident on an intermittent basis for periods of fewer than 30 days at any one time.

(zz) “Sanitization” means effective bactericidal treatment by a process that reduces the bacterial count, including pathogens, to a safe level on utensils and equipment.

(aaa) “Self-administration of drugs” means the determination by the resident of when to take a drug and the application or ingestion of the drug by the resident without assistance from nursing staff.

(bbb) “Significant change in condition” means a decline or improvement in a resident’s mental, psychosocial, or physical functioning that would result in the need for amendment of the resident’s comprehensive plan of care or negotiated service agreement.

(ccc) “Social services designee” means an individual who meets one of the following qualifications:

(1) Is licensed by the board of behavioral science as a social worker;

(2) has a bachelor’s degree in a human service field, including sociology, special education, rehabilitation counseling, or psychology, and receives supervision from a licensed social worker; or

(3) has completed a course in social services coordination approved by the department and receives supervision from a licensed social worker on a regular basis.

(ddd) “Speech language pathologist” means an individual who is licensed by the Kansas department of health and environment as a speech-language pathologist. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999; amended Nov. 26, 2001.)

28-39-145. (Authorized by K.S.A. 39-932; implementing K.S.A. 39-927, K.S.A. 39-930 and K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; revoked Oct. 8, 1999.)

28-39-145a. (Authorized by K.S.A. 39-930, 39-932, and 39-933; implementing K.S.A. 39-927, 39-930, 39-932, and 39-933; effective Oct. 8, 1999; revoked May 22, 2009.)

28-39-146. (Authorized by and implementing K.S.A. 39-954; effective Nov. 1, 1993; amended Feb. 21, 1997; revoked May 22, 2009.)

28-39-147 and 28-39-148. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; revoked May 22, 2009.)

28-39-149. Protection of resident funds and possessions in nursing facilities. The nursing facility shall have written policies and procedures which ensure the security of residents’ possessions and residents’ funds accepted by the facility for safekeeping. (a) The facility shall afford each resident the right to manage the resident’s own financial affairs and the facility shall not require any resident to deposit the resident’s personal funds with the facility.

(b) Upon written authorization of a resident, the resident’s legal representative or power of attorney or an individual who has been appointed conservator for the resident, the facility shall hold, safeguard, manage, and account for the personal funds of the resident deposited with the facility.

(c) The facility shall establish and maintain a

system that assures a full, complete, and separate accounting, according to generally accepted accounting principles, of each resident's personal funds entrusted to the facility on the resident's behalf.

(1) The facility shall designate in writing the person responsible for the accounting system.

(2) A record shall be made each time there is a disbursement or addition to the resident's personal fund.

(3) The facility shall provide a written report which includes accounting for all transactions and which states the current fund balance to the resident or the resident's legal representative at least quarterly.

(4) The facility shall deposit any resident's funds in excess of \$50 in one or more interest bearing accounts which are separate from any of the facility's operating accounts, and which credit all interest when earned on the resident's account to the personal account of the resident.

(5) All resident funds deposited by the facility shall be deposited in a Kansas financial institution.

(6) Within 30 days after the death of a resident with personal funds deposited with the facility, the facility shall convey the resident's funds and a final accounting of those funds to the individual or probate jurisdiction administering the resident's estate.

(7) The facility shall purchase a surety bond to assure the security of all residents' personal funds deposited with the facility.

(d) The facility shall have written policies and procedures which ensure the security of each resident's personal possessions.

(1) A written inventory of the resident's personal possessions, signed by the resident or the resident's legal representative shall be completed at the time of admission and updated at least annually.

(2) If a resident requests that the facility hold personal possessions within the facility for safe-keeping, the facility shall:

(A) Maintain a written record; and

(B) give a receipt to the resident or the resident's legal representative. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-150. Resident behavior and nursing facility practices. (a) Restraints. The resident shall be free from any physical restraints imposed or psychopharmacologic drugs admin-

istered for the purposes of discipline or convenience, and not required to treat the resident's medical symptoms.

(1) When physical restraints are used there shall be:

(A) a written physician's order which includes the type of restraint to be applied, the duration of the application and the justification for the use of the restraint;

(B) evidence that at least every two hours the resident is released from the restraint, exercised, and provided the opportunity to be toileted;

(C) regular monitoring of each resident in restraints at intervals of at least 30 minutes;

(D) documentation in the resident's clinical record which indicates that less restrictive methods to ensure the health and safety of the resident were not effective or appropriate; and

(E) evaluation of the continued necessity for the physical restraint at least every three months and more frequently when there is a significant change in the resident's condition.

(2) Equipment used for physical restraints shall be designed to assure the safety and dignity of the resident.

(3) Staff who work with residents in physical restraints shall be trained in the appropriate application of the restraint and the care of a resident who is required to be physically restrained.

(4) In the event of an emergency, a physical restraint may be applied following an assessment by a licensed nurse which indicates that the physical restraint is necessary to prevent the resident from harming him or herself or other residents and staff members. The nursing facility shall obtain physician approval within 12 hours after the application of any physical restraint.

(b) The facility staff and consultant pharmacist shall monitor residents who receive psychopharmacologic drugs for desired responses and adverse effects.

(c) Abuse. Each resident shall have a right to be free from the following:

(1) verbal, sexual, physical, and mental abuse;

(2) corporal punishment; and

(3) involuntary seclusion.

(d) Staff treatment of residents. Each facility shall develop and implement written policies and procedures that prohibit abuse, neglect, and exploitation of residents. The facility shall:

(1) Not use verbal, mental, sexual, or physical abuse, including corporal punishment, or involuntary seclusion;

(2) not employ any individual who has been identified on the state nurse aide registry as having abused, neglected, or exploited residents in an adult care home in the past;

(3) ensure that all allegations of abuse, neglect, or exploitation are investigated and reported immediately to the administrator of the facility and to the Kansas department of health and environment;

(4) have evidence that all alleged violations are thoroughly investigated, and shall take measures to prevent further potential abuse, neglect and exploitation while the investigation is in progress;

(5) report the results of all facility investigations to the administrator or the designated representative;

(6) maintain a written record of all investigations of reported abuse, neglect, and exploitation; and

(7) take appropriate corrective action if the alleged violation is verified. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-151. Resident assessment. Each nursing facility shall conduct at the time of admission, and periodically thereafter, a comprehensive assessment of a resident's needs on an instrument approved by the secretary of health and environment. (a) The comprehensive assessment shall include at least the following information:

(1) Current medical condition and prior medical history;

(2) measurement of the resident's current clinical status;

(3) physical and mental functional status;

(4) sensory and physical impairments;

(5) nutritional status and impairments;

(6) special treatments and procedures;

(7) mental and psychosocial status;

(8) discharge potential;

(9) dental condition;

(10) activities potential;

(11) rehabilitation potential;

(12) cognitive status; and

(13) drug therapy.

(b) A comprehensive assessment shall be completed:

(1) not later than 14 days after admission;

(2) not later than 14 days after a significant change in the resident's physical, mental, or psychosocial condition; and

(3) at least once every 12 months.

(c) The nursing facility staff shall examine each resident at least once every three months, and as appropriate, revise the resident's assessment to assure the continued accuracy of the assessment.

(d) Changes in a resident's condition which are self-limiting and which will not affect the functional capacity of the resident over the long term do not in themselves require a reassessment of the resident.

(e) The nursing facility shall use the results of the comprehensive assessment to develop, review, and revise the resident's comprehensive plan of care under subsection (h).

(f) The nursing facility shall conduct or coordinate each assessment with the participation of appropriate health professionals.

(g) A registered professional nurse shall conduct or coordinate each comprehensive assessment and shall sign and certify that the assessment has been completed.

(h) Comprehensive care plans.

(1) The facility shall develop a comprehensive care plan for each resident that includes measurable objectives and timetables to meet a resident's physical, mental, and psychosocial needs that are identified in the comprehensive assessment.

(2) The comprehensive care plan shall be:

(A) Developed within seven days after completion of the comprehensive assessment; and

(B) prepared by an interdisciplinary team including the attending physician, a registered nurse with responsibility for the care of the resident, and other appropriate staff in other disciplines as determined by the resident's needs, and with the participation of the resident, the resident's legal representative, and the resident's family to the extent practicable.

(i) The services provided or arranged by the facility shall:

(1) Meet professional standards of quality; and

(2) be provided by qualified persons in accordance with each resident's written plan of care.

(j) Discharge summary. When the facility anticipates discharge of a resident, a discharge summary shall be developed which includes the following:

(1) A recapitulation of the resident's stay;

(2) a final summary of the resident's status which includes the items found in the comprehensive assessment, K.A.R. 28-39-151 (a). This summary shall be available for release at the time of discharge to authorized persons and agencies, with the consent of the resident or the resident's legal representative; and

(3) a post-discharge plan to assist the resident in the adjustment to a new environment. The resident, and when appropriate, the resident's family, shall participate in the development of the plan. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-152. Quality of care. Each resident shall receive and the nursing facility shall provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being in accordance with the comprehensive assessment and the plan of care.

(a) Activities of daily living. Based on the comprehensive assessment of the resident, the facility shall ensure all of the following:

(1) Each resident's abilities in activities of daily living improve or are maintained except as an unavoidable result of the resident's clinical condition. This shall include the resident's ability to perform the following:

- (A) Bathe;
- (B) dress and groom;
- (C) transfer and ambulate;
- (D) toilet;
- (E) eat; and
- (F) use speech, language, or other functional communication systems.

(2) Each resident is given the appropriate treatment and services to maintain or improve the level of functioning as described above in paragraph (1).

(3) Any resident who is unable to perform activities of daily living receives the necessary services to maintain good nutrition, grooming, and personal and oral hygiene. The facility shall ensure all of the following:

(A) Residents are bathed to ensure skin integrity, cleanliness, and control of body odor.

(B) Oral care is provided so that the oral cavity and dentures are clean and odor is controlled.

(C) Residents are dressed and groomed in a manner that preserves personal dignity.

(D) Residents who are unable to eat without assistance are offered fluids and food in a manner that maintains adequate hydration and nutrition.

(E) The resident's abilities to obtain fluid and nutrition in a normal manner are preserved or enhanced.

(b) Urinary incontinence. The facility shall ensure all of the following:

(1) Residents who are incontinent at the time of admission or who become incontinent after

admission are assessed, and based on that assessment a plan is developed and implemented to assist the resident to become continent, unless the resident's clinical condition demonstrates that incontinence is unavoidable.

(2) Residents who are incontinent receive appropriate treatment and services to prevent urinary tract infections.

(3) Residents who are admitted to the facility without an indwelling catheter are not catheterized, unless the resident's clinical condition demonstrates that catheterization is necessary.

(4) Residents with indwelling catheters receive appropriate treatment and services to prevent urinary tract infections and to restore normal bladder function, if possible.

(c) Pressure ulcers. Based on the comprehensive assessment, the facility shall ensure all of the following:

(1) Any resident who enters the facility without pressure ulcers does not develop pressure ulcers, unless the resident's clinical condition demonstrates that they were unavoidable. The facility shall report in writing the development of any pressure ulcer to the medical director.

(2) Any resident with pressure ulcers receives the necessary treatment and services to promote healing, prevent infection, and prevent new ulcers from developing.

(3) A skin integrity program is developed for each resident identified to be at risk for pressure ulcers. The program shall include the following:

(A) Frequent changes of position at least one time every two hours;

(B) protection of the skin from items that could promote loss of skin integrity;

(C) the use of protective devices over vulnerable areas, including heels, elbows, and other body prominences; and

(D) methods to assist the resident to remain in good body alignment.

(d) Stasis ulcers. Based on the comprehensive assessment of the resident, the facility shall ensure both of the following:

(1) Any resident who is identified on the comprehensive assessment as being at risk for development of stasis ulcers does not develop stasis ulcers, unless the resident's clinical condition demonstrates that the stasis ulcers were unavoidable.

(2) Any resident with stasis ulcers receives the necessary treatment and services to promote healing, prevent infection, and prevent new ulcers from developing.

(e) Range of motion. Based on the comprehensive assessment of a resident, the facility shall ensure all of the following:

(1) Any resident who enters the facility without a limitation in range of motion does not experience a reduction in range, unless the resident's clinical condition demonstrates that a reduction in range of motion is unavoidable.

(2) Any resident with a decrease in range of motion receives appropriate treatment and services to increase range of motion, if practicable, and to prevent further decrease in range of motion.

(3) Any resident who is identified as at risk for experiencing a decrease in range of motion is provided appropriate treatment and services to prevent the decrease.

(f) Mobility. Based on the comprehensive assessment of the resident, the facility shall ensure all of the following:

(1) A resident's level of mobility does not decrease after admission, unless the resident's clinical condition demonstrates that a reduction in mobility is unavoidable.

(2) Any resident with a limitation in mobility receives the appropriate treatment and services to maintain or increase the resident's mobility.

(3) Any resident who is identified by the comprehensive assessment to be at risk for a reduction of function in the area of mobility is provided the treatment and services to prevent or limit that decrease in function.

(g) Psychosocial functioning. Based on the comprehensive assessment of the resident, the facility shall ensure both of the following:

(1) A resident's level of psychosocial functioning does not decrease after admission, unless the resident's clinical condition demonstrates that a reduction in psychosocial functioning is unavoidable.

(2) Any resident who displays psychosocial adjustment difficulty receives appropriate treatment and services to achieve as high a level of psychosocial functioning as possible within the constraints of the resident's clinical condition.

(h) Gastric tubes. Based on the comprehensive assessment of a resident, the facility shall ensure that each resident meets either of the following criteria:

(1) Has been able to eat enough to maintain adequate nutrition and hydration independently or with assistance is not fed by a gastric tube, unless the resident's clinical condition demonstrates that use of a gastric tube was unavoidable; or

(2) is fed by a gastric tube and receives the following appropriate treatment and services:

(A) To prevent the following:

(i) Aspiration pneumonia;

(ii) diarrhea;

(iii) vomiting;

(iv) dehydration;

(v) metabolic abnormalities;

(vi) nasal and pharyngeal ulcers; and

(vii) ulceration at a gastrostomy tube site; and

(B) to restore, if possible, normal feeding function.

(i) Accidents. The facility shall ensure both of the following:

(1) The resident's environment remains free of accident hazards.

(2) Each resident receives adequate supervision and assistive devices to prevent accidents.

(j) Nutrition. Based on the resident's comprehensive assessment, the facility shall ensure all of the following for each resident:

(1) Maintenance of acceptable parameters of nutritional status, including usual body weight and protein levels, unless the resident's clinical condition demonstrates that this is not possible;

(2) a therapeutic diet as ordered by the attending physician when there is a nutritional problem or there is a potential for a nutritional problem; and

(3) for residents at risk for malnutrition, the provision of monitoring and appropriate treatment and services to prevent malnutrition.

(k) Hydration. The facility shall provide each resident with sufficient fluid intake to maintain proper hydration and health.

(1) Fresh water, with or without ice according to the preference of the resident, shall be accessible to each resident at all times except when not appropriate due to resident's clinical condition.

(2) Any resident at risk for dehydration shall be monitored, and appropriate treatment and services shall be provided to prevent dehydration.

(1) The facility shall ensure that each resident receives proper treatment and care for special services, which shall include the following:

(1) Parenteral injections. Parenteral injections shall be performed by licensed nurses and physicians;

(2) Intravenous fluids and medications. Intravenous fluids and medications shall be administered and monitored by a registered nurse or by a licensed practical nurse who has documented successful completion of training in intravenous therapy;

- (3) colostomy, ureterostomy, or ileostomy care;
- (4) tracheostomy care;
- (5) tracheal suctioning;
- (6) respiratory care;
- (7) podiatric care;
- (8) prosthetic care;
- (9) skin care related to pressure ulcers;
- (10) diabetic testing; and
- (11) other special treatments and services ordered by the resident's physician.

(m) Drug therapy. The facility shall ensure that all drugs are administered to residents in accordance with a physician's order and acceptable medical practice. The facility shall further ensure all of the following:

(1) All drugs are administered by physicians, licensed nursing personnel, or other personnel who have completed a state-approved training program in drug administration.

(2) A resident may self-administer drugs if the interdisciplinary team has determined that the resident can perform this function safely and accurately and the resident's physician has given written permission.

(3) Drugs are prepared and administered by the same person.

(4) The resident is identified before administration of a drug, and the dose of the drug administered to the resident is recorded on the resident's individual drug record by the person who administers the drug.

(n) Oxygen therapy. The facility shall ensure that oxygen therapy is administered to a resident in accordance with a physician's order. The facility shall further ensure all of the following:

(1) Precautions are taken to provide safe administration of oxygen.

(2) Each staff person administering oxygen therapy is trained and competent in the performance of the required procedures.

(3) Equipment used in the administration of oxygen, including oxygen concentrators, is maintained and disinfected in accordance with the manufacturer's recommendations.

(4) A sign that reads "oxygen—no smoking" is posted and visible at the corridor entrance to a room in which oxygen is stored or in use.

(5) All smoking materials, matches, lighters, or any item capable of causing a spark has been removed from a room in which oxygen is in use or stored.

(6) Oxygen containers are anchored to prevent them from tipping or falling over. (Authorized by and implementing K.S.A. 39-932; effective Nov.

1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999.)

28-39-153. Quality of life. Each nursing facility shall care for its residents in a manner and in an environment that promotes maintenance or enhancement of each resident's quality of life.

(a) Dignity. Each facility shall promote respect of each resident and shall fully recognize each resident's individuality.

(b) Self-determination and participation. The nursing facility shall afford each resident the right to:

(1) Choose activities, schedules, and health care consistent with resident's interests, assessments and care plans;

(2) interact with members of the community both inside and outside the facility; and

(3) make choices about aspects of the resident's life that are significant to the resident.

(c) Participation in resident and family groups.

(1) The facility shall afford each resident the right to organize and participate in resident groups in the facility.

(2) The nursing facility shall afford each resident's family the right to meet in the facility with the families of other residents in the facility.

(3) Staff or visitors may attend meetings at the group's invitation.

(4) The facility shall designate a staff person responsible for providing assistance and responding to written requests that result from group meetings.

(5) When a resident or family group exists, the facility shall consider the views, grievances, and recommendations of residents and their families concerning proposed policy and operational decisions affecting resident care and life in the facility. The nursing facility shall maintain a record of the written requests and the facility responses or actions.

(d) Participation in other activities. The nursing facility shall afford each resident the right to:

(1) Participate in social, religious, and community activities that do not interfere with the rights of other residents in the facility; and

(2) reside and receive services in the facility with reasonable accommodation of individual needs and preferences, except when the health or safety of the individual or other residents would be endangered.

(e) Activities.

(1) The facility shall provide an ongoing program of activities designed to meet, in accordance

with the comprehensive assessment, the interests of and promote the physical, mental, and psychosocial well-being of each resident.

(2) A qualified activities director shall direct the activities program.

(3) The nursing facility shall employ activities personnel at a minimum weekly average of .09 hours per resident per day.

(f) Social services.

(1) The facility shall provide medically-related social services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.

(2) Any facility with more than 120 beds shall employ a full-time social service designee who:

(A) is a licensed social worker; or

(B) (i) meets the qualifications in K.A.R. 28-39-144 (bbb); and

(ii) receives supervision from a licensed social worker.

(3) Any facility with 120 beds or fewer shall employ a social services designee. If the social service designee is not a licensed social worker or meets the requirements in K.A.R. 28-39-144 (bbb)(2), a licensed social worker shall supervise the social service designee.

(4) The nursing facility shall employ social service personnel at a minimum weekly average of .09 hours per resident per day. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-154. Nursing services. Each nursing facility shall have sufficient nursing staff to provide nursing and related services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident as determined by resident assessments and individual plans of care. (a) Sufficient staff. The facility shall employ sufficient numbers of each of the following types of personnel to provide nursing care to all residents in accordance with each resident's comprehensive assessment and care plan.

(1) The nursing facility shall employ full-time a director of nursing who is a registered nurse. The director of nursing shall have administrative authority over and responsibility for the functions and activities of the nursing staff.

(2) A registered nurse shall be on duty at least eight consecutive hours per day, seven days per week. The facility may include the director of nursing to meet this requirement.

(3) A licensed nurse shall be on duty 24 hours per day, seven days per week.

(A) On the day shift there shall be the same number of licensed nurses on duty as there are nursing units.

(B) If a licensed practical nurse is the only licensed nurse on duty, a registered nurse shall be immediately available by telephone.

(4) At least two nursing personnel shall be on duty at all times in the facility. Personnel shall be immediately accessible to each resident to assure prompt response to the resident call system and necessary action in the event of injury, illness, fire, or other emergency.

(5) The nursing facility shall not assign nursing personnel routine housekeeping, laundry, or dietary duties.

(6) Direct care staff shall wear identification badges to identify name and position.

(7) The nursing facility shall ensure that direct care staff are available to provide resident care in accordance with the following minimum requirements.

(A) Per facility, there shall be a weekly average of 2.0 hours of direct care staff time per resident and a daily average of not fewer than 1.85 hours during any 24 hour period. The director of nursing shall not be included in this computation in facilities with more than 60 beds.

(B) The ratio of nursing personnel to residents per nursing unit shall not be fewer than one nursing staff member for each 30 residents or for each fraction of that number of residents.

(C) The licensing agency may require an increase in the number of nursing personnel above minimum levels under certain circumstances. The circumstances may include the following:

(i) location of resident rooms;

(ii) locations of nurses' stations;

(iii) the acuity level of residents; or

(iv) that the health and safety needs of residents are not being met.

(b) The nursing facility shall maintain staffing schedules on file in the facility for 12 months and shall include hours actually worked and the classification of nursing personnel who worked in each nursing unit on each shift. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-155. Physician services. Each resident in a nursing facility shall be admitted and shall remain under the care of a physician.

(a) The facility shall ensure that both of the following conditions are met:

(1) The medical care of each resident is supervised by a physician.

(2) Another physician supervises the medical care of residents when the resident's attending physician is not available.

(b) The physician shall perform the following duties:

(1) At the time of the resident's admission to the facility, provide orders for the immediate care of the resident, current medical findings, and diagnosis. The physician shall provide a medical history within seven days after admission of the resident;

(2) review the resident's total program of care, including medications and treatments at each visit;

(3) write, sign, and date progress notes at each visit; and

(4) sign all written orders at the time of the visit and all telephone orders within seven days of the date the order was given.

(c) A physician shall see the resident for all of the following:

(1) If it is necessary due to a change in the resident's condition determined by the physician or licensed nursing staff;

(2) if the resident or legal representative requests a physician visit; and

(3) at least annually.

(d) The physician may delegate resident visits to an advanced registered nurse practitioner or a physician assistant.

(e) At admission, the resident or the resident's legal representative shall designate the hospital to which the resident is to be transferred in a medical emergency. If the resident's attending physician does not have admitting privileges at the designated hospital, the facility shall assist the resident or the resident's legal representative in making arrangements with another physician who has admitting privileges to assume the care of the resident during hospitalization. This information shall be available on the resident's clinical record.

(f) Death of resident. The nursing facility shall obtain an order from a physician before allowing the removal of the body of a deceased resident. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Nov. 26, 2001.)

28-39-156. Pharmacy services. The nursing facility shall provide pharmaceutical services including policies and procedures that assure the

accurate acquisition, receipt, and administration of all drugs and biologicals to meet the needs of each resident. (a) Supervision by a licensed pharmacist.

(1) A pharmacist shall develop, coordinate, and supervise all pharmacy services.

(2) The pharmacist shall perform a monthly review of the methods, procedures, storage, administration, disposal, and record-keeping of drugs and biologicals.

(3) The pharmacist shall prepare a written report which includes recommendations for the administrator after each monthly review.

(b) Ordering and labeling.

(1) All drugs and biologicals shall be ordered pursuant to a written order issued by a licensed physician.

(2) The dispensing pharmacist shall label each prescription container in accordance with K.A.R. 68-7-14.

(3) Over-the-counter drugs. The facility shall ensure that any over-the-counter drug delivered to the facility is in the original, unbroken manufacturer's package. The pharmacist or licensed nurse shall place the full name of the resident on the package. If over-the-counter drugs are removed from the original manufacturer's package other than for administration, the pharmacist shall label the drug as required for prescription drugs.

(4) Physicians, advanced registered nurse practitioners, and physician assistants shall give verbal orders for drugs only to a licensed nurse, pharmacist or another physician. The licensed nurse, physician, or pharmacist shall immediately record the verbal order in the resident's clinical record. The physician shall counter-sign all verbal orders within seven working days after receipt of the verbal order.

(c) Automatic stop orders. Drugs not specifically limited as to time or number of doses when ordered shall be controlled by automatic stop orders in accordance with written policies of the facility. A licensed nurse shall notify the physician of an automatic stop order before the administration of the last dose so that the physician may decide if additional drug is to be ordered.

(d) Storage.

(1) The licensed pharmacist shall ensure that all drugs and biologicals are stored according to state and federal laws.

(2) The nursing facility shall store all drugs and biologicals in a locked medication room or a locked medication cart located at the nurses' sta-

tion. Only the administrator and persons authorized to administer medications shall have keys to the medication room or the medication cart.

(3) The nursing facility shall store drugs and biologicals under sanitary conditions.

(4) The temperature of the medication room shall not exceed 85°F. The nursing facility shall store drugs and biologicals at the temperatures recommended by the manufacturer.

(e) The nursing facility shall develop and implement policies and procedures to assure that residents who self-administer drugs do so safely and accurately.

(f) Accountability and disposition. The nursing facility shall control and dispose of drugs and biologicals in a manner that ensures the safety of the resident.

(1) The nursing facility shall maintain records of receipt and disposition of all controlled substances in order that there can be an accurate reconciliation.

(2) The licensed pharmacist shall determine whether the records of drug and biological administration are in order and that an accurate account of all controlled substances was maintained and reconciled.

(3) The licensed pharmacist shall identify any deteriorated, outdated, or discontinued drugs and biologicals and any drugs or biologicals that are unused remaining from a discharged or deceased resident during the monthly pharmacy services review. The licensed pharmacist shall destroy, if appropriate, any deteriorated, outdated, unused, or discontinued drugs and biologicals at the nursing facility and in the presence of one witness who is a licensed nurse employed by the facility. A record shall be on file in the facility which contains the date, drug name, quantity of drugs and biologicals destroyed, and signatures of the pharmacist and licensed nurse.

(4) The nursing facility shall return to the dispensing pharmacy any drugs and biologicals which have been recalled and shall maintain documentation of this action in the facility.

(5) Staff members who have authority to administer drugs may provide drugs to residents or a responsible party during short-term absences from the facility.

(A) A staff member who has the authority to administer drugs may transfer drugs to a suitable container.

(B) The staff member preparing the drugs shall provide written instructions for the admin-

istration of the drugs to the resident or responsible party.

(6) The staff member preparing the drugs shall document the drugs provided and the instructions given in the resident's clinical record.

(7) The nursing facility may send drugs with a resident at the time of discharge, if so ordered by the physician.

(g) Drug regimen review.

(1) The licensed pharmacist shall review the drug regimen of each resident at least monthly.

(2) The licensed pharmacist shall document in the resident's clinical record that the drug regimen review has been performed.

(3) The licensed pharmacist shall report any irregularities to the attending physician, the director of nursing, and the medical director. The pharmacist or a licensed nurse shall act upon any responses by the physician to the report.

(4) The pharmacist shall document the drug regimen review in the resident's clinical record or on a drug regimen report form. A copy of the drug regimen review shall be available to the department.

(5) Any deviation between drugs ordered and drugs given shall be reported to the quality assessment and assurance committee.

(h) Emergency drug kits. A nursing facility may have an emergency drug kit available for use when needed.

(1) The medical director, director of nursing, and licensed pharmacist shall determine the contents of the emergency drug kit. The contents of the kit shall be periodically reviewed and drugs added and deleted as appropriate. Written documentation of these determinations shall be available in the facility.

(2) Policies and procedures shall be available for the use of the emergency drug kit.

(3) The facility shall have a system in place which ensures that drugs used from the emergency drug kit are replaced in a timely manner.

(4) The emergency drug kit shall be in compliance with K.A.R. 68-7-10 (d). (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-157. Specialized rehabilitation services. Each nursing facility shall provide or obtain rehabilitative services for residents, including physical therapy, speech-language pathology, audiology, and occupational therapy. (a) Provision of services. If specialized rehabilitative services

are required in the resident's comprehensive plan of care, the facility shall:

- (1) Provide the required services; or
- (2) obtain the required services from an outside resource in accordance with K.A.R. 28-39-163 (h), from a provider of specialized rehabilitation services.
- (b) Qualified personnel shall provide specialized rehabilitation services under the written order of a physician.
- (c) The facility shall develop policies and procedures for the provision of specialized rehabilitation services. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-158. Dietary services. The nursing facility shall provide each resident with nourishing, palatable, attractive, non-contaminated foods that meet the daily nutritional and special dietary needs of each resident. A facility that has a contract with an outside food management company shall be found to be in compliance with this regulation if the company meets the requirements of these regulations. (a) Staffing.

(1) Overall supervisory responsibility for the dietetic services shall be the assigned responsibility of a full-time employee who is a licensed dietitian or a dietetic services supervisor who receives regularly scheduled onsite supervision from a licensed dietitian. The nursing facility shall provide sufficient support staff to assure adequate time for planning and supervision.

(2) The nursing facility shall implement written policies and procedures for all functions of the dietetic services department. The policies and procedures shall be available for use in the department.

(b) Menus and nutritional adequacy.

(1) Menus shall meet the nutritional needs of the residents in accordance with:

- (A) each resident's comprehensive assessment;
- (B) the attending physician's orders; and
- (C) the recommended dietary allowances of the food and nutrition board of the national research council, national academy of sciences as published in *Recommended Dietary Allowances*, 10th ed., 1989.

(2) Menus for all diets and therapeutic modifications shall be written at least two weeks in advance of service and shall be approved by a licensed dietitian.

(3) Menus shall ensure that not less than 20 percent of the total calorie intake is served at one meal.

(4) When a substitution is necessary, the substitute shall be of similar nutritive value, recorded, and available for review.

(5) Menus shall be followed.

(6) The nursing facility shall keep on file and available for review records of the foods purchased and meals and snacks actually served for 3 months.

(c) Food. Each facility shall comply with the following provisions.

(1) Dietary service staff shall prepare the food by methods that conserve nutritive value, flavor, appetizing aroma, and appearance.

(2) Food shall be attractive, flavorful, well-seasoned, and served at the proper temperature.

(A) Before serving, the facility shall hold hot foods at 140°F or above.

(B) Hot foods, when served to the resident, shall not be below 115°F.

(C) The facility shall hold and serve cold foods that are potentially hazardous at not more than 45°F.

(3) The facility shall prepare the food using standardized recipes adjusted to the number of residents served.

(4) The facility shall prepare the food in a form designed to meet individual resident needs.

(5) When a resident refuses a food served, the facility shall serve the resident food of similar nutritive value as a substitute.

(d) Therapeutic diets.

(1) The attending physician shall prescribe any therapeutic diets.

(2) A current diet manual approved by the licensed dietitian shall be available to attending physicians, nurses, and dietetic services personnel. The facility shall use the manual as a guide for writing menus for therapeutic diets.

(e) Frequency of meals.

(1) Each resident shall receive and the facility shall:

(A) Provide at least three meals daily, at regular times;

(B) offer nourishment at bedtime to all residents unless clinically contra-indicated; and

(C) provide between-meal nourishments when clinically indicated or requested when not clinically contra-indicated.

(2) There shall be no more than 14 hours' time between a substantial evening meal and breakfast the following day, except when a nourishing snack is provided at bedtime, in which instance 16 hours may elapse. A nourishing snack shall contain items from at least 2 food groups.

(f) Assistive devices. Each facility shall provide, based on the comprehensive assessment, special eating equipment and utensils for residents who need them.

(g) Sanitary conditions. Each facility shall comply with the following provisions.

(1) The facility shall procure all foods from sources approved or considered satisfactory by federal, state and local authorities.

(2) The facility shall store, prepare, display, distribute, and serve foods to residents, visitors and staff under sanitary conditions.

(A) The facility shall keep potentially hazardous foods at a temperature of 45°F or 7°C or lower, or at a temperature of 140°F or 60°C or higher.

(B) The facility shall provide each mechanically refrigerated storage area with a numerically scaled thermometer, accurate to +plus or -minus 3°F or 1.5°C, which is located to measure the warmest part of the storage area and is easily readable.

(C) The facility shall keep frozen food frozen and shall store the food at a temperature of not more than 0°F.

(D) The facility shall store each prepared food, dry or staple food, single service ware, sanitized equipment, or utensil at least six inches or 15 centimeters above the floor on clean surfaces and shall protect the food from contamination.

(E) The facility shall store and label containers of poisonous compounds or cleaning supplies and keep the containers in areas separate from those used for food storage, preparation and serving.

(F) The facility shall cover, label, and date each food item not stored in the original product container or package.

(G) The facility shall tightly cover and date each opened food item stored in the original product container or package.

(H) The facility shall not store prepared foods, dry or staple foods, single service ware, sanitized equipment or utensils and containers of food under exposed or unprotected sewer lines or water lines, except for automatic fire protection sprinkler heads. The facility shall not store food and service equipment or utensils in toilet rooms.

(I) The facility shall store food not subject to further washing or cooking before serving in a way that protects the food against cross-contamination.

(J) The facility shall not store packaged food subject to entry of water in contact with water or undrained ice.

(3) The facility shall prepare and serve food:

(A) with the least possible manual contact;

(B) with suitable utensils; and

(C) on surfaces that have been cleaned, rinsed and sanitized before use to prevent cross-contamination.

(4) The facility shall not prepare or serve food from containers with serious defects.

(5) The facility shall thoroughly wash each raw fruit and raw vegetable with water before being cooked or served.

(6) With the following exceptions, the facility shall cook potentially hazardous foods which require cooking to at least 145°F.

(A) The facility shall cook poultry, poultry stuffings, stuffed meats and stuffing containing meat to a minimum temperature of 165°F in all parts of the food with no interruption of the cooking process.

(B) The facility shall cook pork and any food containing pork to a minimum temperature of 150°F in all parts of the food.

(C) The facility shall cook ground beef and any food containing ground beef to at least 155°F in all parts of the food.

(7) When foods in which dry milk has been added are not cooked, the foods shall be consumed within 24 hours.

(8) The facility shall use only pasteurized fresh milk as a milk beverage and shall transfer to a glass directly from a milk dispenser or original container. When clinically indicated, non-fat dry milk may be added to fresh milk served to a resident.

(9) The facility shall use only clean whole eggs, with shells intact and without cracks or checks, or pasteurized liquid, frozen, or dry eggs or egg products, or commercially prepared and packaged hard cooked, peeled eggs. All eggs shall be cooked.

(10) The facility shall reheat rapidly potentially hazardous foods that have been cooked and then refrigerated to a minimum of 165°F throughout before being served or before being placed in a hot food storage unit.

(11) The facility shall use metal stem-type numerically scaled thermometers, accurate to +plus or -minus 3°F to assure the attainment and maintenance of proper internal cooking, holding, or refrigeration temperatures of potentially hazardous foods.

(12) The facility shall thaw potentially hazardous foods:

(A) Under refrigeration;

(B) under cold running water;

(C) in a microwave when the food will be immediately cooked; or

(D) as part of the cooking process.

(h) Service. The facility shall:

(1) provide dining room service for all capable residents;

(2) provide ice for beverages which shall be handled in a manner which prevents contamination;

(3) cover food distributed for room service and to dining rooms not adjacent to the dietetic services department; and

(4) protect food on display from contamination by the use of packaging or by the use of easily cleanable counter, serving line or salad bar protective devices or other effective means.

(i) Dietary employees shall:

(1) Thoroughly wash their hands and exposed portions of their arms with soap and water before starting work, during work as often as necessary to keep them clean, and after smoking, eating, drinking, or using the toilet. Employees shall keep their fingernails clean and trimmed;

(2) wear clean outer clothing;

(3) use effective hair restraints to prevent contamination of food and food-contact surfaces;

(4) taste food in a sanitary manner;

(5) use equipment and utensils constructed from and repaired with safe materials;

(6) clean and sanitize equipment and utensils after each use;

(7) use clean, dry cloths or paper used for no purpose but for wiping food spills on tableware such as plates or bowls; and

(8) use cloths or sponges for wiping food spills on food and non-food contact surfaces which are clean, rinsed frequently in a sanitizing solution and stored in the sanitizing solution which is maintained at an effective concentration.

(j) The facility shall ensure that only persons authorized by the facility are in the dietary services area or areas.

(k) The facility shall ensure that the food preparation area is not used as a dining area.

(l) Cleaning procedures. The facility shall:

(1) Establish and follow cleaning procedures to ensure that all equipment and work areas, including walls, floors, and ceilings are clean;

(2) perform cleaning and sanitizing of tableware and equipment by immersion, spray-type, or low-temperature dishwashing machines used according to the manufacturer's directions. Rinse temperature in hot water machines shall be a minimum of 160°F at the dish level;

(3) air dry all tableware, kitchenware, and equipment;

(4) store glasses and cups in an inverted position;

(5) cover or invert other stored utensils;

(6) provide for storage of knives, forks, and spoons so that the handle is first presented;

(7) provide mops and mop pails for exclusive use in the dietary department;

(8) provide a lavatory with hot and cold running water, soap, and single-service towels or a mechanical hand drying device in dietetic services;

(9) dispose of waste in a sanitary manner via a food disposal or in clean containers with tight-fitting covers; and

(10) cover waste containers except when in continuous use. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-159. Dental Services. Each nursing facility shall assist residents in obtaining routine and 24-hour emergency dental care. The facility shall: (a) Maintain a list of available dentists for residents who do not have a dentist;

(b) assist residents, if requested or necessary, in arranging for appropriate dental services; and

(c) assist residents in arranging transportation to and from the dentist's office. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997.)

28-39-160. Other resident services. (a) Special care section. A nursing facility may develop a special care section within the nursing facility to serve the needs of a specific group of residents.

(1) The facility shall designate a specific portion of the facility for the special care section.

(2) The facility shall develop admission and discharge criteria that identify the diagnosis, behavior, or specific clinical needs of the residents to be served. The medical diagnosis, physician's progress notes, or both shall justify admission to the section.

(3) A written physician's order shall be required for placement.

(4) Direct care staff shall be present in the section at all times.

(5) Before admission to a special care section, the facility shall inform the resident or resident's legal representative in writing of the services and programs available in the special care section that are different from those services and programs provided in the other sections of the facility.

(6) The facility shall provide a training program for each staff member before the member's assignment to the section. Evidence of completion of the training shall be on file in the employee's personnel records.

(7) The facility shall provide in-service training specific to the needs of the residents in the special care section to staff at regular intervals.

(8) The facility shall develop and make available to the clinical care staff policies and procedures for operation of the special care section.

(9) The facility shall provide a substation for use by the direct care staff in the special care section. The design of the substation shall be in accordance with the needs of the special care section and shall allow for visibility of the corridors from that location.

(10) Staff in the section shall be able to observe and hear resident and emergency call signals from the corridor and nurse substation.

(11) The facility shall provide living, dining, activity, and recreational areas in the special care section at the rate of 27 square feet per resident, except when residents are able to access living, dining, activity, and recreational areas in another section of the facility.

(12) The comprehensive resident assessment shall indicate that the resident would benefit from the program offered by the special care section.

(13) The resident comprehensive care plan shall include interventions that effectively assist the resident in correcting or compensating for the identified problems or need.

(14) Control of exits shall be the least restrictive possible for the residents in the section.

(b) Adult day care. A nursing facility may provide adult day care services to any individual whose physical, mental, and psychosocial needs can be met by intermittent nursing, psychosocial, and rehabilitative or restorative services.

(1) The nursing facility shall develop written policies and procedures for provision of adult day care services.

(2) The nursing facility shall develop criteria for admission to and discharge from the adult day care service.

(3) The nursing facility shall maintain a clinical record of services provided to clients in the adult day care program.

(4) The provision of adult day care services shall not adversely affect the care and services offered to residents of the facility.

(c) Respite care. A nursing facility may provide

respite care to individuals on a short-term basis of not more than 30 consecutive days.

(1) The facility shall develop policies and procedures for the provision of respite care.

(2) All requirements for admission of a resident to a nursing facility shall be met for an individual admitted for respite care.

(3) The facility may obtain an order from the resident's physician indicating that the resident may return to the facility at a later date for respite care.

(A) The facility may identify the resident's clinical record as inactive until the resident returns.

(B) Each time the resident returns to the facility for subsequent respite services, the resident's physician shall review the physician plan of care and shall indicate any significant change that has occurred in the resident's medical condition since the previous stay.

(C) The facility shall review and revise the comprehensive assessment and care plan, if needed.

(D) The facility shall conduct a comprehensive assessment after any significant change in the resident's physical, mental, or psychosocial functioning and not less often than once a year.

(E) Any facility with a ban on admissions shall not admit or readmit residents for respite care. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999.)

28-39-161. Infection control. Each nursing facility shall establish and maintain an infection control program designed to provide a safe, sanitary, and comfortable environment for residents and to prevent the development and transmission of disease and infection.

(a) Each facility shall establish an infection control program under which the facility meets the following requirements:

(1) Prevents, controls, and investigates infections in the facility;

(2) develops and implements policies and procedures that require all employees to adhere to universal precautions to prevent the spread of blood-borne infectious diseases based on "universal precautions for prevention of transmission of human immunodeficiency virus, hepatitis B virus, and other bloodborne pathogens in health-care settings," as published in the morbidity and mortality weekly report, June 24, 1988, vol. 37 no. 24 and CDC guidelines for "handwashing and hospital environmental control," as published in November 1985, are hereby adopted by reference;

(3) develops and implements policies and procedures related to isolation of residents with suspected or diagnosed communicable diseases based on the centers for disease control “guideline for isolation precautions in hospitals,” as published in January 1996, which is hereby adopted by reference;

(4) develops policies and procedures related to employee health based on the centers for disease control “guideline for infection control in hospital personnel,” as published in August 1983, which is hereby adopted by reference;

(5) assures that at least one private room that is well ventilated and contains a separate toilet facility is designated for isolation of a resident with an infectious disease requiring a private room. The facility shall develop a policy for transfer of any resident occupying the designated private room to allow placement of a resident with an infectious disease requiring isolation in the private room designated as an isolation room;

(6) includes in the orientation of new employees and periodic employees in-service information on exposure control and infection control in a health care setting; and

(7) maintains a record of incidents and corrective actions related to infection that is reviewed and acted upon by the quality assessment and assurance committee.

(b) Preventing the spread of infection.

(1) When a physician or licensed nurse determines that a resident requires isolation to prevent the spread of infection, the facility shall isolate the resident according to the policies and procedures developed.

(2) The facility shall prohibit employees with a communicable disease or infected skin lesions from coming in direct contact with residents, any resident’s food, or resident care equipment until the condition is resolved.

(3) Tuberculosis skin testing shall be administered to each new resident and employee as soon as residency or employment begins, unless the resident or employee has documentation of a previous significant reaction. Each facility shall follow the centers for disease control recommendations for “prevention and control of tuberculosis in facilities providing long-term care to the elderly,” as published in morbidity and mortality weekly report, July 13, 1990.

(4) Staff shall wash their hands after each direct resident contact for which handwashing is indicated by the centers for disease control guide-

line for “handwashing and hospital environmental control,” as published in November 1985, which is hereby adopted by reference.

(c) Linens and resident clothing.

(1) The facility shall handle soiled linen and soiled resident clothing as little as possible and with minimum agitation to prevent gross microbial contamination of air and of persons handling the items.

(2) The facility shall place all soiled linen and resident clothing in bags or in carts immediately at the location where they were used. The facility shall not sort and pre-rinse linen and resident clothing in resident-care areas.

(3) The facility shall deposit and transport linen and resident clothing soiled with blood or body fluids in bags that prevent leakage.

(4) The facility shall wash linen with detergent in water of at least 160°F. The facility shall follow the manufacturers’ operating directions for washing equipment.

(5) The facility may choose to wash linens and soiled resident clothing in water at less than 160°F if the following conditions are met:

(A) Temperature sensors and gauges capable of monitoring water temperatures to ensure that the wash water does not fall below 72°F are installed on each washing machine.

(B) The chemicals used for low temperature washing emulsify in 70°F water.

(C) The supplier of the chemical specifies low-temperature wash formulas in writing for the machines used in the facility.

(D) Charts providing specific information concerning the formulas to be used for each machine are posted in an area accessible to staff.

(E) The facility ensures that laundry staff receive in-service training by the chemical supplier on a routine basis, regarding chemical usage and monitoring of wash operations.

(F) Maintenance staff monitors chemical usage and wash water temperatures at least daily to ensure conformance with the chemical supplier’s instructions.

(6) The facility shall use methods for transport and storing of clean linen that will ensure the cleanliness of the linens. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999.)

28-39-162. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; revoked Jan. 7, 2011.)

28-39-162a. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999; revoked Jan. 7, 2011.)

28-39-162b. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; revoked Jan. 7, 2011.)

28-39-162c. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999; revoked Jan. 7, 2011.)

28-39-163. Administration. Each nursing facility shall be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident. (a) Governing body.

(1) Each facility shall have a governing body or shall designate a group of people to function as a governing body. The governing body shall be legally responsible for establishing and implementing policies regarding the management and operation of the facility.

(2) The governing body shall appoint an administrator who meets the following criteria:

(A) Is licensed by the state; and

(B) has full authority and responsibility for the operation of the facility and compliance with licensing requirements.

(3) The licensee shall adopt a written position description for the administrator that includes responsibility for the following:

(A) Planning, organizing, and directing the operation of the facility;

(B) implementing operational policies and procedures for the facility; and

(C) authorizing, in writing, a responsible employee 18 years old or older to act on the administrator's behalf in the administrator's absence.

(4) Each facility may request approval from the department for an administrator to supervise more than one nursing facility. Each request shall be submitted, in writing, by the governing bodies of the facilities on a form approved by the department. Each facility shall meet all of the following conditions:

(A) The facilities are in a proximate location that would facilitate on-site supervision daily, if needed.

(B) The combined resident capacity does not exceed 120 residents.

(C) The administrator appointed to operate the facilities has had at least two years of experience

as an administrator of a nursing facility and has demonstrated the ability to assure the health and safety of residents.

(D) When a change in administrator occurs, the facilities submit the credentials of the proposed new administrator for approval by the department.

(b) Policies and procedures.

(1) Each licensee shall adopt and enforce written policies and procedures to ensure all of the following:

(A) Each resident attains or maintains the highest practicable physical, mental, and psychosocial well-being.

(B) Each resident is protected from abuse, neglect, and exploitation.

(C) The rights of residents are proactively assured.

(2) The facility shall revise all policies and procedures as necessary and shall review all policies and procedures at least annually.

(3) Policies and procedures shall be available to staff at all times. Policies and procedures shall be available, on request, to any person during normal business hours. The facility shall post a notice of availability in a readily accessible place for residents.

(c) Power of attorney and guardianship. Anyone employed by or having a financial interest in the facility, unless the person is related by marriage or blood within the second degree to the resident, shall not accept a power of attorney, a durable power of attorney for health care decisions, guardianship, or conservatorship.

(d) Reports. Each administrator shall submit to the licensing agency, not later than 10 days following the period covered, a semiannual report of residents and employees. The administrator shall submit the report on forms provided by the licensing agency. The administrator shall submit any other reports as required by the licensing agency.

(e) Telephone. The facility shall maintain at least one non-coin-operated telephone accessible to residents and employees on each nursing unit for use in emergencies. The facility shall post adjacent to this telephone the names and telephone numbers of persons or places commonly required in emergencies.

(f) Smoking. If smoking is permitted, there shall be designated smoking areas.

(1) The designated areas shall not infringe on the rights of nonsmokers to reside in a smoke-free environment.

(2) The facility shall provide areas designated as smoking areas both inside and outside the building.

(g) Staff development and personnel policies. The facility shall provide regular performance review and in-service education of all employees to ensure that the services and procedures assist residents to attain and maintain their highest practicable level of physical, mental, and psychosocial functioning.

(1) The facility shall regularly conduct and document an orientation program for all new employees.

(2) Orientation of direct care staff shall include review of the facility's policies and procedures and evaluation of the competency of the direct care staff to perform assigned procedures safely and competently.

(3) The facility shall provide regular, planned in-service education for all staff.

(A) The in-service program shall provide all employees with training in fire prevention and safety, disaster procedures, accident prevention, resident rights, psychosocial needs of residents, and infection control.

(B) The facility shall provide direct care staff with in-service education in techniques that assist residents to function at their highest practicable physical, mental, and psychosocial level.

(C) Direct care staff shall participate in at least 12 hours of in-service education each year. All other staff shall participate in at least eight hours of in-service education each year.

(D) The facility shall maintain documentation of in-service education offerings. Documentation shall include a content outline, resume of the presenter, and record of staff in attendance.

(E) The facility shall record attendance at in-service education in the employee record of each staff member.

(h) Professional staff qualifications.

(1) The facility shall employ on a full-time, part-time, or consultant basis any professionals necessary to carry out the requirements of these regulations.

(2) The facility shall document evidence of licensure, certification, or registration of full-time, part-time, and consultant professional staff in employee records.

(3) The facility shall perform a health screening, including tuberculosis testing, on each employee before employment or not later than seven days after employment.

(i) Use of outside resources. Arrangements or agreements pertaining to services furnished by

outside resources shall specify in writing that the facility assumes responsibility for the following:

(1) Obtaining services that meet professional standards and principles that apply to professionals providing services; and

(2) assuring the timeliness of the services.

(j) Medical director.

(1) The facility shall designate a physician to serve as medical director.

(2) The medical director shall be responsible for the following:

(A) Implementation of resident care policies reflecting accepted standards of practice;

(B) coordination of medical care in the facility; and

(C) provision of consultation to the facility staff on issues related to the medical care of residents.

(k) Laboratory services. The facility shall provide or obtain clinical laboratory services to meet the needs of its residents. The facility shall be responsible for the quality and timeliness of the services.

(1) If the facility provides its own clinical laboratory services, it shall meet all of the following requirements:

(A) The services shall meet applicable statutory and regulatory requirements for a clinical laboratory.

(B) The facility staff shall follow manufacturer's instructions for performance of the test.

(C) The facility shall maintain a record of all controls performed and all results of tests performed on residents.

(D) The facility shall ensure that staff who perform laboratory tests do so in a competent and accurate manner.

(2) If the facility does not provide the laboratory services needed by its residents, the facility shall have written arrangements for obtaining these services from a laboratory as required in 42 CFR 483.75(j), as published on October 1, 1993, and hereby adopted by reference.

(3) All laboratory services shall be provided only on the order of a physician.

(4) The facility shall ensure that the physician ordering the laboratory service is notified promptly of the findings.

(5) The facility shall ensure that the signed and dated clinical reports of the laboratory findings are documented in each resident's clinical record.

(6) The facility shall assist the resident, if necessary, in arranging transportation to and from the source of laboratory services.

(1) Radiology and other diagnostic services. The facility shall provide or obtain radiology and other diagnostic services to meet the needs of its residents.

(1) If the facility provides its own radiology and diagnostic services, the services shall meet applicable statutory and regulatory requirements for radiology and other diagnostic services.

(2) If the facility does not provide the radiology and diagnostic services needed by its residents, the facility shall have written arrangements for obtaining these services from a licensed provider or supplier.

(3) All radiology and diagnostic services shall be provided only on the order of a physician.

(4) The facility shall ensure that the physician ordering the radiology or diagnostic services is notified promptly of the findings.

(5) The facility shall document signed and dated clinical reports of the radiological or diagnostic findings in the resident's clinical record.

(6) The facility shall assist the resident, if necessary, in arranging transportation to and from the source of radiology or diagnostic services.

(m) Clinical records.

(1) The facility shall maintain clinical records on each resident in accordance with accepted professional standards and practices. The records shall meet the following criteria:

- (A) Be complete;
- (B) be accurately documented; and
- (C) be systematically organized.

(2) Clinical records shall be retained according to the following schedule:

(A) At least five years following the discharge or death of a resident; or

(B) for a minor, five years after the resident reaches 18 years of age.

(3) Resident records shall be the property of the facility.

(4) The facility shall keep confidential all information in the resident's records, regardless of the form or storage method of the records, except when release is required by any of the following:

- (A) Transfer to another health care institution;
- (B) law;
- (C) third party payment contract;
- (D) the resident or legal representative; or
- (E) in the case of a deceased resident, the executor of the resident's estate, or the resident's spouse, adult child, parent, or adult brother or sister.

(5) The facility shall safeguard clinical record information against loss, destruction, fire, theft, and unauthorized use.

(6) The clinical record shall contain the following:

- (A) Sufficient information to identify the resident;
- (B) a record of the resident's assessments;
- (C) admission information;
- (D) the plan of care and services provided;
- (E) a discharge summary or report from the attending physician and a transfer form after a resident is hospitalized or transferred from another health care institution;

(F) physician's orders;

(G) medical history;

(H) reports of treatments and services provided by facility staff and consultants;

(I) records of drugs, biologicals, and treatments administered; and

(J) documentation of all incidents, symptoms, and other indications of illness or injury, including the date, the time of occurrence, the action taken, and the results of action.

(7) The physician shall sign all documentation entered or directed to be entered in the clinical record by the physician.

(8) Documentation by direct care staff shall meet the following criteria:

(A) List drugs, biologicals, and treatments administered to each resident;

(B) be an accurate and functional representation of the actual experience of the resident in the facility;

(C) be written in chronological order and signed and dated by the staff person making the entry;

(D) include the resident's response to changes in condition with follow-up documentation describing the resident's response to the interventions provided;

(E) not include erasures or use of white-out. Each error shall be lined through and the word "error" added. The staff person making the correction shall sign and date the error. An entry shall not be recopied; and

(F) in the case of computerized resident records, include a system to ensure that when an error in documentation occurs, the original entry is maintained and the person making the correction enters the date and that person's electronic signature in the record.

(9) Clinical record staff.

(A) The facility shall assign overall supervisory responsibility for maintaining the residents' clinical records to a specific staff person.

(B) The facility shall maintain clinical records in a manner consistent with current standards of practice.

(C) If the clinical record supervisor is not a qualified medical record practitioner, the facility shall provide consultation through a written agreement with a qualified medical record practitioner.

(n) Disaster and emergency preparedness.

(1) The facility shall have a detailed written emergency management plan to meet potential emergencies and disasters, including, fire, flood, severe weather, tornado, explosion, natural gas leak, lack of electrical or water service, and missing residents.

(2) The plan shall be coordinated with area governmental agencies.

(3) The plan shall include written agreements with agencies that will provide needed services, including providing a fresh water supply, evacuation site, and transportation of residents to an evacuation site.

(4) The facility shall ensure disaster and emergency preparedness by the following means:

(A) Orienting new employees at the time of employment to the facility's emergency management plan;

(B) periodically reviewing the plan with employees; and

(C) annually carrying out a tornado or disaster drill with staff and residents.

(5) The emergency management plan shall be available to staff, residents, and visitors.

(o) Transfer agreement. The facility shall have in effect a written transfer agreement with one or more hospitals that reasonably assures both of the following:

(1) Residents will be transferred from the facility to the hospital, and timely admitted to the hospital, when transfer is medically appropriate, as determined by the attending physician.

(2) Medical and other information needed for care and treatment of residents will be exchanged between the institutions.

(p) Quality assessment and assurance.

(1) The facility shall maintain a quality assessment and assurance committee consisting of these individuals:

(A) The director of nursing services;

(B) a physician designated by the facility; and

(C) at least three other members of the facility's staff.

(2) The quality assessment and assurance committee shall perform the following:

(A) Meet at least quarterly to identify issues with respect to what quality assessment and assurance activities are necessary; and

(B) develop and implement appropriate plans of action to correct identified quality deficiencies and prevent potential quality deficiencies. (Authorized by and implementing K.S.A. 39-932; effective Nov. 1, 1993; amended Feb. 21, 1997; amended Oct. 8, 1999.)

28-39-164. Definitions. (a) "Adult care home" means any facility that meets the definition specified in K.A.R. 28-39-144.

(b) "Clinical instruction" means training in which the trainee demonstrates knowledge and skills while performing tasks on an individual under the direct supervision of the course instructor. Clinical instruction may be performed in any of the following settings:

(1) An adult care home;

(2) a long-term care unit of a hospital; or

(3) a simulated laboratory.

(c) "Department" means Kansas department of health and environment.

(d) "Direct care" means assistance provided in activities of daily living. These activities shall include grooming, eating, toileting, transferring, and ambulation.

(e) "Direct supervision" means that the supervisor is on the facility premises and is readily accessible for one-on-one consultation, instruction, and assistance, as needed.

(f) "Eligible for employment," when describing a certified nurse aide, means that the certified nurse aide meets the following criteria:

(1) Has been employed to perform nursing or nursing-related services for at least eight hours in the preceding 24 months;

(2) has no record of abuse, neglect, and exploitation; and

(3) is not prohibited from employment based upon criminal convictions pursuant to K.S.A. 39-970, and amendments thereto.

(g) "Instructor" means an individual who has been approved by the secretary to teach nurse aide, home health aide, or medication aide training courses.

(h) "Licensed nursing experience" means experience as a registered nurse or licensed practical nurse.

(i) "Nurse aide trainee I" means an individual in the process of completing part I of a 90-hour nurse aide course as specified in K.A.R. 28-39-165.

(j) "Nurse aide trainee II" means an individual who has successfully completed part I of a 90-hour nurse aide course specified in K.A.R. 28-39-165 or

whose training has been endorsed as specified in K.A.R. 28-39-167.

(k) "Secretary" means secretary of the Kansas department of health and environment.

(l) "Simulated laboratory" means an enclosed area that is in a school, institution, adult care home, or other facility and that is similar to an adult care home residential room. In a simulated laboratory, trainees practice and demonstrate basic nurse aide skills while an instructor observes and evaluates the trainees. (Authorized by K.S.A. 2008 Supp. 39-925(d)(2); implementing K.S.A. 2008 Supp. 39-936; effective Feb. 28, 1994; amended Dec. 29, 2003; amended June 12, 2009.)

28-39-165. Nurse aide training program.

(a) Requirements. Unlicensed employees who provide direct individual care to residents shall be required to perform the following:

(1) Successfully complete at least a 90-hour nurse aide course that has been approved by the secretary; and

(2) pass a state test as specified in K.A.R. 28-39-168.

(b) Certification. Each person shall be issued a nurse aide certificate by the secretary and shall be listed on a public registry upon completion of the requirements specified in subsection (a).

(c) Employment as a trainee.

(1) Each nurse aide trainee I in an approved 90-hour course shall be required to successfully complete part I of the course to demonstrate initial competency before being employed or used as a nurse aide trainee II. A nurse aide trainee II may provide direct care to residents only under the direct supervision of a registered nurse or licensed practical nurse.

(2) Each nurse aide trainee II in an approved 90-hour course shall be issued a nurse aide certificate by the secretary, upon completion of the requirements specified in subsection (a), within four months from the beginning date of the initial course in order to continue employment providing direct care. Nurse aide trainee II status for employment shall be for one four-month period only.

(d) 90-hour nurse aide course.

(1) Each nurse aide course shall be prepared and administered in accordance with the guidelines established by the department in the "Kansas certified nurse aide curriculum guidelines (90 hours)," including the appendices, dated May 2008, and the "Kansas 90-hour certified nurse aide sponsor and instructor manual," pages 1

through 20 and the appendices, dated May 2008, which are hereby adopted by reference.

(2) Each nurse aide course shall consist of a combination of didactic and clinical instruction. At least 50 percent of part I and part II of the course curriculum shall be provided as clinical instruction.

(3) Each nurse aide course shall be sponsored by one of the following:

(A) An adult care home;

(B) a long-term care unit of a hospital; or

(C) a postsecondary school under the jurisdiction of the state board of regents.

(4) Clinical instruction shall be conducted in one or a combination of the following locations:

(A) An adult care home;

(B) a long-term care unit of a hospital; or

(C) a simulated laboratory.

(5) An adult care home shall not sponsor or provide clinical instruction for a 90-hour nurse aide course if that adult care home has been subject to any of the sanctions under the medicare certification regulations listed in 42 C.F.R. 483.151(b)(2), as in effect on October 1, 2007.

(e) Correspondence courses. No correspondence course shall be approved as a nurse aide course.

(f) Other offerings. Distance-learning offerings and computer-based educational offerings shall meet the standards specified in subsection (d). (Authorized by K.S.A. 2008 Supp. 39-925(d)(2); implementing K.S.A. 2008 Supp. 39-936; effective Feb. 28, 1994; amended Dec. 29, 2003; amended June 12, 2009.)

28-39-166. Nurse aide course instructor.

(a) Approval and qualifications.

(1) Each person who intends to be a course instructor shall submit a completed instructor approval application form to the department at least three weeks before offering an initial course and shall receive approval as an instructor before the first day of an initial course.

(2) Each course instructor shall be a registered nurse with a minimum of two years of licensed nursing experience, with at least 1,750 hours of experience in either or a combination of an adult care home or long-term care unit of a hospital. Each course instructor shall have completed a course in teaching adults, shall have completed a professional continuing education offering on supervision or adult education, or shall have experience in teaching adults or supervising nurse aides.

(b) Course instructor and course sponsor responsibilities.

(1) Each course instructor and course sponsor shall be responsible for ensuring that the following requirements are met:

(A) A completed course approval application form shall be submitted to the department at least three weeks before offering a course. Approval shall be obtained from the secretary at the beginning of each course whether the course is being offered initially or after a previous approval. Each change in course location, schedule, or instructor shall require approval by the secretary.

(B) All course objectives shall be accomplished.

(C) Only persons in health professions having the appropriate skills and knowledge shall be selected to conduct any part of the training. Each person shall have at least one year of experience in the subject area in which that person is providing training.

(D) Each person providing a part of the training shall do so only under the direct supervision of the course instructor.

(E) The provision of direct care to residents by a nurse aide trainee II during clinical instruction shall be limited to clinical experiences that are for the purpose of learning nursing skills under the direct supervision of the course instructor.

(F) When providing clinical instruction, the course instructor shall perform no other duties but the direct supervision of the nurse aide trainees.

(G) Each nurse aide trainee in the 90-hour nurse aide course shall demonstrate competency in all skills identified on the part I task checklist before the checklist is signed and dated by the course instructor as evidence of successful completion of part I of the course.

(H) The course shall be prepared and administered in accordance with the guidelines in the "Kansas certified nurse aide curriculum guidelines (90 hours)" and the "Kansas 90-hour certified nurse aide sponsor and instructor manual," as adopted in K.A.R. 28-39-165.

(2) Any course instructor or course sponsor who does not meet the requirements of this regulation may be subject to withdrawal of approval to serve as a course instructor or a course sponsor. (Authorized by K.S.A. 2008 Supp. 39-925(d)(2); implementing K.S.A. 2008 Supp. 39-936; effective Feb. 28, 1994; amended Dec. 29, 2003; amended June 12, 2009.)

28-39-167. Out-of-state and allied health training endorsement for nurse aide. (a) Each person whom the secretary has determined to have successfully completed training or passed a test, or both, that is equivalent to the training or test required by this state may be employed without taking this state's test.

(b) Each person whom the secretary has determined not to be exempt from examination pursuant to subsection (a) but who meets any one of the following requirements shall be deemed to have met the requirements specified in K.A.R. 28-39-165 if that person passes a state test as specified in K.A.R. 28-39-168:

(1) Each person who has received nurse aide training in another state, is listed on another state's registry as a nurse aide, and is eligible for employment as a nurse aide shall be deemed eligible to take the state test as specified in K.A.R. 28-39-168. Each person whose training in another state is endorsed and who has passed the state test shall be issued a nurse aide certificate.

(2) Each person who meets any of the following criteria shall be deemed eligible to take the state test as specified in K.A.R. 28-39-168:

(A) Has completed training deemed equivalent to the requirements specified in K.A.R. 28-39-165;

(B) is currently licensed in Kansas or another state to practice as a registered nurse, licensed practical nurse, or licensed mental health technician, with a license that has not been suspended or revoked; or

(C) has a license to practice as a registered nurse, licensed practical nurse, or licensed mental health technician that has expired within the 24-month period before applying for equivalency, but has not been suspended or revoked.

(3) Each person who has received training from an accredited nursing or mental health technician training program within the 24-month period before applying for equivalency and whose training included a basic skills component comprised of personal hygiene, nutrition and feeding, safe transfer and ambulation techniques, normal range of motion and positioning, and a supervised clinical experience in geriatrics shall be deemed eligible to take the state test as specified in K.A.R. 28-39-168.

(c) Each person qualified under subsection (a) shall receive written notification from the department of exemption from the requirement to take this state's test and the fact that the person is eligible for employment.

(d) Each person qualified under subsection (b) shall receive written approval from the department or its designated agent to take the state test. Upon receiving written approval from the department or its designated agent to take the state test, that person may be employed by an adult care home as a nurse aide trainee II to provide direct care under the direct supervision of a registered nurse or licensed practical nurse. Each person employed as a nurse aide trainee II shall be issued a nurse aide certificate by the secretary, upon completion of the requirements specified in K.A.R. 28-39-165, within one four-month period starting from the date of approval, in order to continue employment providing direct care. (Authorized by K.S.A. 2008 Supp. 39-925(d)(2); implementing K.S.A. 2008 Supp. 39-936; effective Feb. 28, 1994; amended Dec. 29, 2003; amended June 12, 2009.)

28-39-168. State nurse aide test. (a) Composition of state nurse aide test. The state test shall be comprised of 100 multiple-choice questions. A score of 75 percent or higher shall constitute a passing score.

(b) State nurse aide test eligibility.

(1) Only persons who have successfully completed an approved 90-hour nurse aide course or completed education or training that has been endorsed or deemed equivalent as specified in K.A.R. 28-39-167 shall be allowed to take the state test.

(2) Each person shall have a maximum of three attempts within 12 months from the beginning date of the course to pass the state test after completing an approved 90-hour course as specified in K.A.R. 28-39-165.

(3) If the person does not pass the state test within 12 months after the starting date of taking an approved 90-hour course, the person shall retake the entire course.

(4) If a person whose education or training has been endorsed or deemed equivalent as specified in K.A.R. 28-39-167 and the person does not pass the state test on the first attempt, the person shall successfully complete an approved 90-hour nurse aide course as specified in K.A.R. 28-39-165 to retake the state test. Each person whose training was endorsed or deemed equivalent, who failed the state test, and who has successfully completed an approved nurse aide course shall be eligible to take the test three times within a year after the beginning date of the course.

(c) Application fee.

(1) Each nurse aide trainee shall pay a nonrefundable application fee of \$20.00 before taking the state test. A nonrefundable application fee shall be required each time the test is scheduled to be taken. Each person who is scheduled to take the state test, but fails to take the state test, shall submit another fee before being scheduled for another opportunity to take the test.

(2) Each course instructor shall collect the application fee for each nurse aide candidate eligible to take the state test and shall submit the fees, class roster, application forms, and accommodation request forms to the department or its designated agent.

(d) Each person who is eligible to take the state test and who has submitted the application fee and application form shall be issued written approval, which shall be proof of eligibility to sit for the test.

(e) Test accommodation.

(1) Any reasonable test accommodation or auxiliary aid to address a disability may be requested by any person who is eligible to take the state test. Each request for reasonable accommodation or auxiliary aid shall be submitted each time a candidate is scheduled to take the test.

(2) Each person requesting a test accommodation shall submit an accommodation request form along with an application form to the instructor. The instructor shall forward these forms to the department or its designated agent at least three weeks before the desired test date. Each instructor shall verify the need for the accommodation by signing the accommodation request form.

(3) Each person whose second language is English shall be allowed to use a bilingual dictionary while taking the state test. Limited English proficiency shall not constitute a disability with regard to accommodations. An extended testing period of up to two additional hours may be offered to persons with limited English proficiency.

(f) This regulation shall not apply to any person who meets the requirement of K.A.R. 28-39-167(a). (Authorized by K.S.A. 2008 Supp. 39-925(d)(2) and 39-936; implementing K.S.A. 2008 Supp. 39-936; effective Feb. 28, 1994; amended Dec. 29, 2003; amended June 12, 2009.)

28-39-169. (Authorized by K.S.A. 75-5625; implementing K.S.A. 65-1,120; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

28-39-169a. Medication aide. (a) Each medication aide candidate shall be either a nurse aide who has been issued a certificate by the secretary or a qualified mental retardation professional as defined in 42 C.F.R. 483.430(a), revised October 1, 2010 and hereby adopted by reference, and shall meet the following requirements:

(1) Has completed a course in medication administration approved by the secretary; and

(2) has passed a state test as approved by the secretary.

(b) Each person who has met one of the following requirements shall be eligible to enroll in a medication aide course:

(1) Is a nurse aide who has a Kansas nurse aide certificate and who has been screened and tested for reading comprehension at an eighth-grade level; or

(2) is a qualified mental retardation professional employed by an intermediate care facility for the mentally retarded.

(c) A qualified mental retardation professional who is not a nurse aide, who has completed a course in medication administration as approved by the secretary, and who has passed the state test shall be allowed to administer medications only to residents in an intermediate care facility for the mentally retarded.

(d) (1) Each medication aide course shall meet the following requirements:

(A) Consist of a minimum of 75 total hours, which shall include a minimum of 25 hours of clinical instruction;

(B) be prepared and administered in accordance with the guidelines prescribed by the secretary and follow the content outlined in the "Kansas certified medication aide curriculum" and appendices, dated February 2011, and the "Kansas certified medication aide sponsor and instructor manual," pages 2 through 21, dated February 2011, which are hereby adopted by reference; and

(C) be sponsored by one of the following:

(i) A postsecondary school under the jurisdiction of the state board of regents;

(ii) a state-operated institution for the mentally retarded; or

(iii) a professional health care association approved by the secretary.

(2) No correspondence course shall be approved as a medication aide course.

(3) Distance-learning and computer-based educational offerings shall be required to meet the requirements specified in this subsection.

(e) Each medication aide course instructor shall meet the following requirements:

(1) Each person who intends to be a course instructor shall submit an instructor approval application form to the secretary at least three weeks before offering an initial course and shall be required to receive approval as an instructor before the first day of an initial course.

(2) Each instructor shall be a registered nurse with a current Kansas license and two years of clinical experience as a registered nurse. Any Kansas-licensed pharmacist actively working in the pharmacy field may conduct part of the training under the supervision of an approved instructor.

(f) Each course sponsor and course instructor shall be responsible for ensuring that the following requirements are met:

(1) Only persons who meet the qualifications specified in subsection (b) shall be eligible to take the course.

(2) Each trainee shall be screened and tested for comprehension of the written English language at an eighth-grade reading level before enrolling in the course.

(3) The course shall be prepared and administered in accordance with the guidelines and follow the content in the "Kansas certified medication aide curriculum" and the "Kansas certified medication aide sponsor and instructor manual," as adopted in subsection (d).

(4) The clinical instruction and skills performance involving the administering of medications shall be under the direct supervision of the course instructor.

(5) During the clinical instruction and skills performance, the course instructor shall perform no other duties than the provision of direct supervision to the trainees.

(g) Any course instructor or course sponsor who does not fulfill the requirements of this regulation may be subject to withdrawal of approval to serve as a course instructor or a course sponsor.

(h) Any person whose education or training has been deemed equivalent to the medication aide course by an approved sponsor as specified in paragraph (d)(1)(C) may apply to take the state test to become certified as a medication aide. Before requesting a determination of equivalency for a person's education or training, that person shall be a Kansas-certified nurse aide and shall meet one of the following conditions:

(1) The person is currently credentialed to administer medications in another state. The sec-

retary or the designated agent shall evaluate that state's credentialed training for equivalency in content and skills level to the requirements for certification as a medication aide in Kansas.

(2) The person is currently enrolled in an accredited practical nursing or professional nursing program and has completed a course of study in pharmacology with a grade of C or better.

(3) The person is currently licensed in Kansas or another state, or has been licensed within 24 months from the date of application, as a licensed mental health technician, and there are no pending or current disciplinary actions against the individual's license.

(4) The person has been licensed in Kansas or another state, within 24 months from the date of application, as a licensed practical nurse whose license is inactive or a registered nurse whose license is inactive, and there are no pending or current disciplinary actions against the individual's license. (Authorized by K.S.A. 75-5625; implementing K.S.A. 65-1,120 and K.S.A. 2010 Supp. 65-1124; effective Dec. 29, 2003; amended Oct. 14, 2011.)

28-39-169b. State medication aide test.

(a) The state test shall be administered by the secretary or the designated agent and in accordance with guidelines prescribed by the secretary as outlined in the "certified medication aide test manual" on pages 24 through 31 of the "Kansas certified medication aide sponsor and instructor manual," dated February 2011. These pages are hereby adopted by reference.

(1) Each person who has completed the medication aide course as specified in K.A.R. 28-39-169a shall have a maximum of two attempts to pass the state test within 12 months after the first day of the course. If the person does not pass the test within this 12-month period, the course shall be retaken. Each time the person successfully completes the course, the person shall have two attempts to pass the state test within 12 months after the first day of the course. The number of times a person may retake the course shall be unlimited.

(2) Each person who is a Kansas-certified nurse aide and whose training has been deemed equivalent to the Kansas medication aide course shall have a maximum of one attempt to pass the test within 12 months after the date the equivalency is approved. If the person does not pass the test within this 12-month period, the person shall be required to take the medication aide course.

(3) There shall be three different forms of the state test. The different forms of the test shall be used on an alternating basis. Each of the three forms shall be comprised of 85 multiple-choice questions. The passing score for each of the three forms of the test shall be 65 or higher.

(4) Only persons who have met the requirements specified in K.A.R. 28-39-169a(a)(1) and (h) shall be eligible to take the state test.

(5) Each person whose second language is English shall be allowed to use a bilingual dictionary while taking the state test. Limited English proficiency shall not constitute a disability with regard to accommodation. An extended testing period of up to two additional hours may be offered to persons with limited English proficiency.

(b) Each person shall be issued a medication aide certificate by the secretary and shall be listed on a public nurse aide registry upon successful completion of the requirements specified in K.A.R. 28-39-169a(a) and (h).

(c) The course instructor shall submit to the secretary a course roster of names, an application form, and a nonrefundable application fee of \$20.00 for each medication aide who has completed the course and passed the state test.

(d) A replacement medication aide certificate for a medication aide whose certification is current shall be issued by the secretary upon the receipt and processing of a certificate replacement form and a nonrefundable fee of \$20.00. (Authorized by K.S.A. 75-5625; implementing K.S.A. 65-1,120 and K.S.A. 2010 Supp. 65-1124; effective Dec. 29, 2003; amended Oct. 14, 2011.)

28-39-169c. Medication aide continuing education.

(a) Each person who has a certificate of completion for a medication aide training course as specified in K.A.R. 28-39-169a and who wishes to maintain the certificate shall complete, every two years, a program of 10 hours of continuing education approved by the secretary.

(b) The continuing education requirement shall include one or more of the following topics:

- (1) Classes of drugs and new drugs;
 - (2) new uses of drugs;
 - (3) methods of administering medications;
 - (4) alternative treatments, including herbal drugs and their potential interaction with traditional drugs;
 - (5) safety in the administration of medications;
- or
- (6) documentation.

(c) Each program of continuing education shall be sponsored by one of the following:

(1) A postsecondary school under the jurisdiction of the state board of regents;

(2) an adult care home;

(3) a long-term care unit of a hospital;

(4) a state-operated institution for the mentally retarded; or

(5) a professional health care association approved by the secretary.

(d) Each course instructor shall be a registered nurse with a current Kansas license and two years of clinical experience as a registered nurse or a licensed practical nurse. Any Kansas-licensed pharmacist actively working in the pharmacy field may be selected to conduct part of the training under the supervision of the instructor.

(e) Each person who intends to be a course instructor shall submit an instructor approval application form to the secretary at least three weeks before offering an initial course and shall be required to receive approval as an instructor before the first day of an initial course.

(f) Each sponsor and course instructor of continuing education shall be responsible for ensuring that the following requirements are met:

(1) The course shall be prepared and administered as prescribed by regulation and the "Kansas certified medication aide sponsor and instructor manual," as adopted in K.A.R. 28-39-169a.

(2) A course approval application form shall be submitted to the secretary at least three weeks before offering a course, and course approval shall be required to be received before beginning the course.

(3) A course roster of names, a renewal application form, and a nonrefundable renewal application fee of \$20.00 for each medication aide who has completed the course shall be submitted to the secretary.

(4) If clinical instruction in administering medications is included in the program, each student administering medications shall be under the direct supervision of the registered nurse instructor.

(g) Any sponsor or instructor who does not fulfill the requirements specified in subsections (d), (e), and (f) may be subject to withdrawal of approval to serve as a course instructor or a course sponsor.

(h) College credits or vocational training may be approved by the secretary as substantially equivalent to medication aide continuing education. The instructor or nursing program coordinator shall submit a department-approved form

attesting that the course content is substantially equivalent to the topics listed in paragraphs (b) (1) through (6).

(i) Each certified medication aide shall be responsible for notifying the secretary of any change in the aide's address or name.

(j) No correspondence course shall be approved for a medication aide continuing education course.

(k) Distance-learning educational offerings and computer-based educational offerings shall meet the requirements specified in subsections (b), (c), (d), (e), (f), and (g).

(l) Each medication aide certificate shall be renewed upon the department's receipt from the course instructor of the following:

(1) Verification of the applicant's completion of 10 hours of approved continuing education;

(2) a renewal application form; and

(3) a nonrefundable renewal application fee of \$20.00.

(m) Each medication aide certificate or renewed certificate shall be valid for two years from the date of issue.

(n) Each applicant for renewal of certification shall have completed the required number of hours of documented and approved continuing education during each certification period immediately preceding renewal of the certificate. Approved continuing education hours completed in excess of the requirement shall not be carried over to a subsequent renewal period.

(o) Each medication aide certificate that has been expired for three or fewer years shall be reinstated upon the department's receipt of the following:

(1) Verification of the applicant's completion of 10 hours of approved continuing education. This continuing education shall have been completed within the three-year period following expiration of the certification;

(2) a renewal application form; and

(3) a nonrefundable renewal application fee of \$20.00.

(p) Each lapsed certificate renewed within the three-year period specified in subsection (o) shall be valid for two years from the date of issuance.

(q) Each person whose medication aide certification has been expired for more than three years shall be required to retake the 75-hour medication aide course. (Authorized by K.S.A. 65-1,121 and 75-5625; implementing K.S.A. 65-1,121 and K.S.A. 2010 Supp. 65-1124; effective Dec. 29, 2003; amended Oct. 14, 2011.)

28-39-170. (Authorized by K.S.A. 75-5625; implementing K.S.A. 65-1124; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

28-39-171. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

28-39-172. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

28-39-173. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

28-39-174. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Feb. 28, 1994; revoked Dec. 29, 2003.)

INTERMEDIATE CARE FACILITIES FOR THE MENTALLY RETARDED

28-39-200. (Authorized by K.S.A. 39-932; effective May 1, 1979; revoked April 3, 1989.)

28-39-201. (Authorized by K.S.A. 39-932; effective May 1, 1979; amended, T-84-17, July 26, 1983; revoked May 1, 1984.)

28-39-202 through 28-39-218. (Authorized by K.S.A. 39-932; effective May 1, 1979; revoked April 3, 1989.)

28-39-219 to 28-39-223. (Authorized by K.S.A. 39-932; effective May 1, 1979, revoked May 1, 1984.)

28-39-224. (Authorized by K.S.A. 39-932; effective May 1, 1979; amended, E-81-29, Sept. 10, 1980; amended May 1, 1981; revoked May 1, 1982.)

28-39-225. Physical environment and complete construction; 16 beds or fewer.

(a) General provisions. The following provisions describe the physical environment and complete construction requirements for residential buildings in which not more than 16 residents are housed in one building. The facility shall provide for a safe, sanitary environment and for the safety and comfort of the residents. Residential buildings which house six or fewer residents are governed solely by the code of federal regulations, 42 CFR 483.470, as published in the Federal Register, Vol. 53, No. 107, Friday, June 3, 1988 and adopted by reference in K.A.R. 28-39-226.

(b) Each residential building shall consist of at least the following units, areas, and rooms which shall all be within a single building and under one roof.

(1) A bedroom unit which shall consist of not more than 16 beds. Each bed shall be located in a room designed for not more than four beds. At least one single-bed room shall be provided. Each resident bedroom shall meet the following requirements:

(A) Minimum room areas, excluding toilet rooms, closets, lockers, wardrobes, other built-in fixed items, alcoves, or vestibules, shall be 80 square feet in single-bed rooms and 60 square feet per bed in multi-bed rooms;

(B) Each toilet room shall contain at least a water closet and a lavatory but not more than two water closets. The lavatory may be omitted if the toilet adjoins bedrooms containing a lavatory. There shall be not less than one water closet for each five residents;

(C) Each resident room shall be provided with a fixed closet or freestanding wardrobe with doors. A shelf and hanging rod shall be provided;

(D) Each resident room shall be equipped with furnishings required to meet the developmental needs of the residents; and

(E) Each resident room shall be located not more than 75 feet from a toilet room and not more than 150 feet from any one of the other resident use areas contained within the residential building, except other bedrooms. Distance shall be measured from one foot outside the resident room door along the shortest line in the general corridor, within one foot of corners, to one foot of the door to each service area.

(2) Service areas required below shall be located in all residential buildings. Each service area shall have a door opening from the general corridor system for direct access without passing through any intervening use area. Exceptions shall include adjoining use areas which have closely related functions. Lounges, living rooms, dens, and large open or central living areas may be considered as corridors. Each facility shall contain:

(A) An administrative area with space for charting, records, and a telephone;

(B) A room with a water closet and lavatory for staff and visitors that is accessible without passing through a resident bedroom;

(C) A locked medication storage area with space for separate storage of each resident's medication. A separate locked compartment shall be

provided within the area for controlled drugs and narcotic storage;

(D) Space for storage of clean linen. This space shall be separate from the soiled linen area;

(E) Space for holding soiled laundry with provisions to prevent odors, contamination of clean linen, and spread of disease. In residential buildings where laundry processing is done, commercial or household-type washing and drying machines shall be provided to process soiled laundry in the workroom area. The workroom shall contain a flushing rim clinic sink, a work counter, and a storage cabinet for supplies. In resident buildings for eight or fewer residents, the flushing rim clinic sink shall not be required. Clean supplies and materials shall not be stored in this area;

(F) Space for storage of equipment for the facility's use. This space may be part of the janitor's closet;

(G) Bathing units at the rate of one bathtub or shower per five residents. There shall be separate bathing units for each sex. Each bathing unit shall be located in a room or area with access to a water closet and handwashing lavatory without entering the general corridor. Bathing units shall be located within enclosures which provide privacy;

(H) A janitor's closet with a utility sink, hot and cold water, a shelf, and mop hanging provision. In residential buildings for eight or fewer residents, the janitor's closet shall not be required if other provisions are made for sanitary storage of house-keeping equipment;

(I) Living, dining, and recreational areas at the rate of 27 square feet per bed. At least 14 square feet of this space shall be utilized for dining space;

(J) A separate quiet area unless all single-bed rooms are provided. Residents shall have access to this area for reading, meditation, and private consultation with family, guests, or other residents;

(K) Public areas which include:

(i) An entrance at grade level which is designed to accommodate the handicapped in wheelchairs;

(ii) at least one public toilet accessible to and usable by the physically handicapped; and

(iii) a public telephone accessible for use from a wheelchair;

(L) Dietary areas, including kitchen and pantry areas, in the size required to implement appropriate food service. The dietary area shall include:

(i) Storage for a four-day supply of food, including cold storage;

(ii) food preparation facilities which shall in-

clude equipment for thawing, portioning, cooking, and baking;

(iii) a two-compartment sink for vegetable preparation; and

(iv) a commercial or domestic type dishwasher with a sanitizing cycle for warewashing;

(M) Provision for disposal of waste by incineration, mechanical destruction, compaction, removal or by a combination of these techniques. Stored waste shall be in water-tight, closed containers;

(N) An equipment room or rooms or a separate building or buildings for boilers and mechanical and electrical equipment, and storage of building maintenance supplies; and

(O) If tools, supplies, or equipment used for yard or exterior maintenance are stored at the facility, a room which opens to the outside or which is located in a detached building for storage of such equipment.

(c) Details and finishes.

(1) Details.

(A) Rooms containing bathtubs, sitz baths, showers, and toilets subject to occupancy by residents shall be equipped with doors and hardware which will permit access from outside the room.

(B) Windows and outer doors left in an open position shall be provided with insect screens. Windows shall be designed to prevent accidental falls when open or shall be provided with security screens.

(C) Doors, sidelights, borrowed lights, and windows in which the glazing is within 18 inches (46 centimeters) of the floor shall be glazed with safety glass, wire glass, or plastic glazing material that will resist breaking and will not create dangerous cutting edges if broken. If glazing in any area does not meet the above requirement, protective barriers or railing shall be provided. Safety glass or plastic glazing materials as described above shall be used for shower doors and bath enclosures.

(D) Grab bars shall be provided for all residents' toilets, showers, tubs, and sitz baths. The bars shall have 1½ inch (3.8 centimeters) clearance to walls and shall have sufficient strength and anchorage to sustain a concentrated load of 150 pounds (113.4 kilograms).

(E) Shower bases and tubs shall have a nonslip surface.

(2) Finishes.

(A) Wall bases in kitchens, soiled workrooms, and other areas which are frequently subject to wet cleaning methods shall be tightly sealed and constructed without voids that can harbor insects.

(B) Wall finishes shall be washable and in the immediate area of plumbing fixtures shall be smooth and moisture resistant. Finish, trim, wall, and floor constructions in dietary and food preparation areas shall be free from spaces that can harbor rodents and insects.

(C) Floor and wall penetrations by pipes, ducts, and conduits shall be tightly sealed to minimize entry of rodents and insects. Joints of structural elements shall be similarly sealed.

(D) Ceilings in the dietary and food preparation areas shall be cleanable by vacuum cleaning, wet cleaning or other dustless methods. These areas shall not have exposed or unprotected sewer lines.

(d) Mechanical requirements.

(1) Heating, air conditioning, and ventilating systems.

(A) The system shall be designed to maintain a year-round indoor temperature range in resident care areas of 70°F. (21°C.) to 85°F. (29°C.) with a relative humidity range of 30 to 60 percent. The winter outside design temperature of the facility shall be -10°F. (-23°C.) dry bulb and the summer outside design temperature of the facility shall be 100°F. (38°C.) dry bulb.

(B) Each central ventilation or air conditioning system shall be equipped with filters having a minimum efficiency of 25 percent.

(2) Plumbing and piping systems.

(A) Backflow prevention devices (vacuum breakers) shall be installed on each bedpan flushing attachment and on each fixture to which hoses or tubing can be attached.

(B) Water distribution systems shall be arranged to provide hot water at hot water outlets at all times. The temperature of hot water shall range between 98°F. (36°C.) and 115°F. (46°C.) at shower, bathing, and handwashing facilities throughout the system except when a higher temperature, not to exceed 130°F. (54°C.), is provided as part of a written training program that provides for direct supervision.

(e) Electrical requirements.

(1) All spaces occupied by persons or machinery and equipment within the buildings, approaches to buildings, and parking lots shall have adequate lighting.

(2) Minimum lighting intensity levels shall be as required in Table 1.

(3) Portable lamps shall not be accepted as light sources, except as specifically permitted in Table 1.

(4) Corridors and stairways shall remain lighted at all times.

TABLE 1. ARTIFICIAL LIGHT REQUIREMENTS

Place	Light Measured in Foot Candles	Where Measured
Kitchen and other food preparation and serving areas	30	Counter level
Dining room	25	Table level
Living room and/or recreation room		
General	15	Three feet above floor
Reading and other specialized areas (<i>may be portable lamp</i>)	50	Chair or table level
Nurse's station and office		
General	20	Three feet above floor
Desk and charts	50	Desk level
Clean workroom	30	Counter level
Central bath and showers	30	Three feet above floor
Resident's room		
General	10	Three feet above floor
Bed (<i>may be portable lamp</i>)	30	Mattress top level
Laundry	30	Three feet above floor
Storage room		
General	5	Three feet above floor
Disinfectant or cleaning agent storage area	15	Three feet above floor
Corridors	10	Floor level
Stairways	20	Step level
Exits	5	Floor level
Heating plant space	5	Floor level

(5) All lights shall be equipped with shades, globes, grids, or glass panels that prevent direct glare to the residents' eyes.

(f) Site location requirements. Each facility shall be:

(1) Served by all-weather roads or streets;

(2) free from noxious or hazardous smoke or fumes;

(3) a minimum of 3,000 feet (914 meters) from feedlots, shipping or holding pens, or other concentrated livestock operations.

(4) free of flooding for a 20-year period; and

(5) sufficient in area and configuration to accommodate the facility, drives, parking, sidewalks, and a recreation area.

(g) Site development requirements.

(1) Final grading of the site shall provide topography for positive surface drainage away from the building and positive protection and control of surface drainage and freshets from adjacent areas.

(2) All drives and parking areas shall be surfaced with concrete, asphalt, or equivalent, smooth all-weather finish. Unsealed gravel surfaces shall not be used.

(3) Except for lawn or shrubbery which may be used in landscape screening, an unencumbered outdoor open area of at least 50 square feet per resident shall be provided for recreational use and shall be so designated on the plot plan. The licensing agency may approve equivalent facilities provided by terraces, roof gardens, or similar provisions for homes located in high density urban areas. (Authorized by K.S.A. 39-932; implementing K.S.A. 39-932; effective May 1, 1982; amended May 1, 1984; amended April 3, 1989.)

28-39-226. General licensure. The code of federal regulations 42 CFR 483.400 to CFR 483.480 inclusive, as published in the Federal Register, Vol. 53, No. 107, Friday, June 3, 1988, is adopted by reference. (Authorized by and implementing K.S.A. 39-932; effective April 3, 1989.)

28-39-227. General licensure. The code of federal regulations, 42 CFR 483.1 to 42 CFR 483.75 inclusive, as published in the federal register, Vol. 56, No. 187, Thursday, September 26, 1991, and as amended in Vol. 57, No. 185, Wednesday, September 23, 1992 is adopted by reference. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-228. Definitions. (a) "Activities director" means a person who meets the following requirements:

(1) Has completed the requirements for certification as a music therapist or has completed the requirements for graduation as a horticultural therapist; and

(2) has one year of experience in a patient activities program in a health care setting.

(b) "Administrator" means a person who is charged with the general administration of the nursing facility for mental health whether or not the individual has an ownership interest in the facility. Each administrator of a nursing facility for mental health shall be licensed in accordance with K.S.A. 65-3501 et seq., and amendments thereto.

(c) "Admission assessment" means that evaluation at facility admission which is used to guide the initial plan of care for the resident until the mental health plan of care is put in place.

(d) "Admitting physician" means the licensed physician who provides the order specifying the rationale for admission of a person to a nursing facility for mental health.

(e) "Behavior management program" means a therapeutic treatment regime identified by an

interdisciplinary team to change or maintain a specific behavior in the behavior repertoire of a resident in a nursing facility for mental health.

(f) "Case manager" means a person in a program authorized by the Kansas department of social and rehabilitation services assigned to monitor and participate in the treatment program of a resident living in a nursing facility for mental health.

(g) "Community mental health center" means an agency licensed by the state of Kansas pursuant to K.S.A. 19-4001 et seq., and in compliance with K.S.A. 65-211 et seq. and amendments thereto.

(h) "Comprehensive assessment" means:

(1) The minimum data set plus; and

(2) all related evaluations to identify a person's current functioning level and those factors which are barriers to maintaining the current level, or achieving a higher level of functioning.

(i) "Crisis intervention" means the allowable techniques to be utilized by facility staff in situations when:

(1) A resident's inappropriate behavior escalates beyond the definitions in the individualized behavior management program; and

(2) the resident, other residents, or staff are placed in a harmful situation.

(j) "Dietitian" means a person who is licensed by the Kansas department of health and environment as a dietitian.

(k) "Direct care staff" means those persons who assist or supervise residents in meeting the objectives in the mental health plan of care.

(l) "Discharge plan" means that section of each resident's mental health plan of care that identifies what placement opportunities are available to the resident and what necessary resources, skills and behaviors are required to facilitate the placement.

(m) "Guardian" means a person who has been appointed by a court of law to provide the functions and services for a ward as defined in K.S.A. 59-3018 and amendments thereto.

(n) "Informed consent" means receiving permission from the resident, or legal representative after the person has been presented with:

(1) The specific issue;

(2) the recommended treatment or procedure;

(3) the resident's specific mental or physical status with regard to the problem issue;

(4) any attendant risks regarding treating or not treating the problem issue;

(5) acceptable alternatives of treatment to the problem issue;

(6) the right to refuse treatment; and
 (7) any consequences of refusal.

(o) "Initial plan of care" means that plan which is put into place for each individual resident following the admission assessment and which is to be used until the mental health plan of care is put in place.

(p) "Interdisciplinary team" means the group of persons, including the resident or the resident's legal representative or both, who formulate, deliver and monitor the individual program plan for each resident.

(q) "Legal representative" means the person who has been appointed by a court of law as a guardian, or has been selected by a resident as a durable power of attorney for health care decisions.

(r) "Licensed mental health technician" means a person licensed by the Kansas board of nursing as a licensed mental health technician.

(s) "Licensed nurse" means a registered nurse or a licensed practical nurse.

(t) "Licensed practical nurse" means a person who is licensed by the Kansas board of nursing as a licensed practical nurse.

(u) "Living unit" means the specific section, wing, or pod where the resident is assigned to engage in the majority of activities of daily living.

(v) "Mental health plan of care" means those documents that describe for each resident:

(1) The basis for medical or mental health treatment or training;

(2) specific objectives identified for treatment or training;

(3) the staff members who formulated the plan; and

(4) the staff members who are responsible for carrying out the plan.

(w) "Mental health professional" means a physician, psychologist, social worker, or a psychiatric nurse.

(x) "Motivational system" means those procedures and intervention techniques that are applied to a resident group of residents to enhance and maintain positive behavioral change.

(y) "Nursing facility for mental health" means a facility licensed pursuant to K.S.A. 39-923 et seq. as a nursing facility and identified by the Kansas department of social and rehabilitation services as serving mentally ill persons.

(z) "Physician" means a person who is licensed by the Kansas board of healing arts as a medical doctor or a doctor of osteopathy.

(aa) "Psychiatric nurse" means a person who is licensed by the Kansas state board of nursing as a registered nurse and who has at least one year of experience as a registered nurse in the delivery of services to persons with mental illness.

(bb) "Psychiatric services" means those interventions and assessments held out to be exclusively in the practice of a physician who has completed additional training as a psychiatrist.

(cc) "Psychotropic medication" means those drugs that are used with the intent of controlling mood, mental status and behavior.

(dd) "Psychologist" means a person who is licensed or registered as a psychologist with the Kansas board of behavioral sciences.

(ee) "Registered nurse" means a person who is licensed by the Kansas board of nursing as a registered nurse.

(ff) "Resident" means a person who has been admitted to a nursing facility for mental health and who is in need of services provided by the facility.

(gg) "Restraint" means the control and limitation of a resident's movement by:

(1) Physical restraint, which is a technique involving the use of one or more staff person's arms, legs, hands or other body areas to restrict or control the movements of a resident;

(2) mechanical restraint, which is a device applied to a person's limbs, head or body, which restricts a person's movement and access to their body; or

(3) chemical restraint, which is the administration of an appropriate physician prescribed medication for the specific purpose of immediately calming a resident when there has been an assessment that the resident or others in the resident's environment are in danger.

(hh) "Seclusion" means the isolation of a resident in a locked room which cannot be opened by the resident.

(ii) "Social worker" means a person who is a social worker licensed by the Kansas board of behavioral sciences.

(jj) "Tardive dyskinesia" means an extrapyramidal syndrome characterized by rhythmic, repetitive stereotypic movements that can occur following prolonged treatment with neuroleptic medication. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-229. Resident rights. (a) No resident shall be presumed to be incompetent, to for-

feit any legal rights, responsibility or obligation, or to suffer any legal disability as a citizen, unless otherwise prescribed by law, as a consequence of receiving care or treatment in a nursing facility for mental health.

(1) Each resident shall have the right to be evaluated, treated and habilitated in the least restrictive environment possible.

(2) Each resident shall have the right to contact a representative at the local community mental health center about their care and treatment.

(3) Each resident shall be given free access to the surrounding local community.

(4) Each resident shall have the right to have daily opportunities for physical exercise and outdoor recreation.

(5) Each resident shall have the right to have access to current newspapers, magazines and radio and television programming.

(6) Each resident shall have, at a minimum, the right at all times to communicate by unopened mail with his or her immediate family, case manager, legal representative, and representatives from the Kansas department on aging, Kansas department of social and rehabilitation services and the Kansas department of health and environment.

(b) Resident work. Services performed by the resident shall be identified within the mental health plan of care.

(1) A resident engaged in work of benefit to the facility shall be paid wages according to U.S. department of labor requirements.

(2) Residents performing work for the facility shall not be used to replace paid employees to fulfill staffing requirements.

(3) Residents shall not be denied the opportunity to volunteer for work.

(4) Residents working outside the facility shall be protected by the facility from exploitation.

(c) Choice. Activities shall allow maximum flexibility for residents to exercise choice regarding what they will do and when they will do it. Residents' individual preferences regarding such things as menus, clothing, religious activities, friendships, activity programs, entertainment, sleeping, eating and times to retire at night and arise in the morning shall be elicited and considered by the facility.

(d) Communications. Each resident may communicate, associate, and meet privately with persons of the resident's choice, unless to do so would infringe upon the rights of other residents.

(e) Mail. Arrangements shall be made to provide aid to residents who require assistance in reading or sending mail.

(f) Visitors. Space shall be provided for residents to receive visitors in comfort and privacy.

(g) Activities. Residents who wish to meet with, or participate in, activities of social, religious or community groups in or outside the facility, shall be informed, encouraged, and assisted to do so.

(h) Residents shall be permitted to leave the facility and its surroundings at reasonable times unless there are justifiable reasons established in writing by the attending physician, mental health professional, or facility administrator for denying permission. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-230. Admission, transfer and discharge. (a) The commitment of a resident to a nursing facility for mental health shall not be permitted.

(b) Persons identified by the admitting physician as being a danger to themselves or others shall not be admitted to nursing facilities for mental health.

(c) Each resident shall have established at admission an initial plan of care based on the physician's admitting diagnosis.

(d) Each resident's mental health plan of care shall include a discharge plan.

(e) Each resident shall have the right to request a review of progress for discharge at any scheduled regular review. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-231. Resident behavior and facility practices. (a) Psychotropic medication shall only be prescribed and used for a resident's treatment program following:

(1) Receipt of informed consent from the resident, or the resident's legal representative;

(2) documentation in the resident's record of the rationale for the use of the medication; and

(3) implementation of an objective monitoring system to determine the impact of the medication on the resident's behavior.

(b) Seclusion shall not be utilized in nursing facilities for mental health.

(c) Restraints shall not be applied to a resident unless it is determined to be required to prevent substantial body injury to the resident or others, and a physician's order and informed consent for the use of the restraint has been obtained.

(1) The extent of the use of restraints shall be the least restrictive necessary to prevent injury.

(2) Standing or "prn" orders for restraint shall be prohibited.

(d) The record of each resident for whom restraint is used shall contain complete information about restraint use that includes:

(1) The informed consent of the resident or the resident's legal representative for the use of the restraint;

(2) the clinical assessment done before the resident was restrained;

(3) the circumstances that led to the use of the restraint;

(4) an explanation of less restrictive measures used before restraint was applied;

(5) the physician's orders for the restraint;

(6) recordings of consistent observation of the resident at least every 15 minutes, or more frequently if needed, to monitor general well-being including vital signs, respirations, circulation, positioning and alertness as medically indicated;

(7) a description of the resident's activity at the time of observation that includes verbal exchanges and behavior;

(8) a description of safety procedures taken at restraint implementation;

(9) a recording of release from the mechanical restraint and exercise and massage every two hours;

(10) recordings of intake of food and fluid; and

(11) recording of use of the toilet.

(e) A resident shall not be allowed to participate in the restraint of another resident.

(f) There shall be written policies that address the basic assumption and philosophy that govern the use of restraint and who may authorize the use of restraint.

(g) During any period of restraint, the facility shall provide for the emotional and physical needs of the resident.

(h) The resident shall be informed of the reason for the restraint and the conditions for release. The resident's legal representative shall be notified within 24 hours of initiation of the use of restraints.

(i) Only persons who have documented training in restraint theory and techniques shall be authorized to assist with the restraint of a resident.

(j) Behavior management programs shall emphasize positive modification practices utilizing current reinforcement theory standard of practice.

(k) Motivation systems shall be based on the principles of positive reinforcement.

(l) Facility motivational systems shall not implement group punishment for the inappropriate behavior of a resident or more than one resident. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-232. Quality of life; activity programs. (a) Each nursing facility for mental health shall have an organized activity program which is managed by an activity director and is directed toward community integration.

(b) The activity program plan for the facility shall be based on the needs identified in the comprehensive assessment of each resident and on interests expressed by individual residents.

(c) Activities shall be offered at least daily.

(d) Activities offered shall be varied and shall be planned for individuals, small groups or large groups with opportunities for involvement in the local community.

(e) Monthly calendars of activities offered shall be prepared in advance and shall be kept for three months. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-233. Resident assessment. (a) An assessment upon admission for each resident shall be completed and shall include, but not be limited to a statement of presenting problems.

(b) Prior to the development of the mental health plan of care, a comprehensive assessment shall be completed within 14 days after admission for each resident and shall include but not be limited to:

(1) The minimum data set plus prepared by a registered nurse;

(2) psychosocial assessment prepared by a mental health professional to determine strengths and weaknesses in:

(A) Living arrangements;

(B) financial resources;

(C) vocational and educational skills;

(D) leisure pursuits;

(E) social support structures; and

(F) previous compliance with treatment programs; and

(3) a social history which includes:

(A) Family background;

(B) educational history, and

(C) employment history. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-234. Quality of care. (a) Each facility shall develop and provide a system of mental health treatment and medical care for all residents including all aspects of care from admission through discharge. The system shall include the following provisions.

(1) Each facility shall conduct for each resident an admission assessment based upon information from available sources and document the findings in the resident's record.

(2) Each facility shall write an initial treatment plan for each resident based on the admission assessments which will be used to guide the treatment provided for the resident with necessary documented revisions until the implementation of the mental health plan of care.

(3) Each facility shall conduct and document in each resident's record comprehensive assessments that will be used to formulate the mental health plan of care.

(4) Each facility shall write and implement the mental health plan of care with necessary revisions through the course of each resident's stay.

(5) Each facility shall identify and document in each resident's record a discharge plan that integrates the wishes of the resident or legal representative.

(b) A mental health plan of care for each resident shall be developed by an interdisciplinary team including the resident or the resident's legal representative, or both, within 21 days after admission. The resident, or the resident's legal representative has the ultimate authority to accept or reject the plan. The mental health plan of care shall be approved and have its progress monitored by a mental health professional.

(1) The mental health plan of care shall be based on the comprehensive assessments and directed toward objective resident outcome.

(2) Each facility shall assist each resident in obtaining access to academic services, community living skills training, legal services, self-care training, support services, transportation, treatment and vocational education as needed. These services may be provided by the facility or obtained from other providers.

(3) Services to each resident shall be provided in the least restrictive environment and shall incorporate the use of community experiences when relevant.

(4) If needed services are not available and accessible, the facility shall document the actions taken to locate and obtain those services. The doc-

umentation shall identify needs which will not be met because of the lack of available services and why they cannot be met.

(5) The mental health plan of care shall be written, dated, signed by the interdisciplinary team members, including the resident, and maintained in the resident's record.

(6) The mental health plan of care shall include:

(A) Medical directives;

(B) behavioral directives;

(C) specific services to be provided;

(D) persons or agency responsible for providing services;

(E) beginning dates for services;

(F) anticipated duration of services; and

(G) a discharge plan.

(7) The mental health plan of care shall identify the procedure to be used to determine whether the objectives were achieved. This procedure shall incorporate a process for ongoing review and revision.

(8) The interdisciplinary team shall review the mental health plan of care for each resident at least quarterly and at the time a resident's condition changes. The interdisciplinary team review shall include a written report in the resident's record which addresses:

(A) The resident's progress toward objectives;

(B) the need for continued services;

(C) recommendations concerning alternative services or living arrangements; and

(D) those persons involved in the review and the date of the review.

(9) Each facility shall develop procedures for recording implementation and progress of the activities of the mental health plan of care and the resident's response. These procedures shall include the following provisions.

(A) A written progress note shall be placed in the resident's record following the delivery of each single service required by the mental health plan of care.

(B) A weekly summary shall be written by the staff and placed in the resident's record for services provided more than once a week.

(C) All progress and summary notes shall be signed and dated by the person who provides the service.

(D) Additional entries shall be provided in the resident's record when significant incidents occur.

(E) Notes shall be written in specific terms based on behavioral observations and activity responses of the resident. Entries that involve sub-

jective interpretations of a resident's behavior or progress shall be clearly identified and shall be supplemented with descriptions of behavior upon which the interpretation was based.

(c) There shall be written policies and procedures concerning crisis intervention. These policies and procedures shall be:

(1) Directed to maximizing the growth and development of the resident by listing a hierarchy of available alternative methods that emphasize positive approaches;

(2) available in each program area and living unit;

(3) available to residents and their families; and

(4) developed with the participation, as appropriate, of residents served. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-235. Nursing services. (a) Each nursing facility for mental health shall employ or have on contract a psychiatric nurse who shall perform a monthly written evaluation of each resident's response to the mental health plan of care.

(b) A registered nurse shall perform for each resident receiving psychotropic medication an annual evaluation for tardive dyskinesia based on an industry-wide accepted test.

(c) Each nursing facility for mental health shall have a licensed nurse on duty at all times.

(d) Each facility shall have a registered nurse on duty at least eight hours a day, seven days a week.

(e) Each facility with 41 or more beds shall have an additional licensed nurse on duty during the working shift of the director of nursing.

(f) Each facility shall provide sufficient direct care staff to manage and supervise residents in accordance with each resident's mental health plan of care.

(g) Each facility shall provide sufficient support staff so that direct care staff are not required to perform cleaning, dietary and maintenance tasks to the extent that those duties interfere with the exercise of their primary direct care duties. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-236. Dietary services. (a) Residents shall be encouraged to participate in meal planning, food purchasing, food preparation, table setting, serving, dishwashing and cleanup.

(b) The facility shall be responsible for assisting residents in learning what constitutes good nutritional practices.

(c) Menus shall be developed with input on food preferences from residents.

(d) Menus shall include a variety of foods prepared in various ways.

(e) Menu shall be written for a minimum of a three week cycle in which meals are not repeated. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-237. Physician services. For each resident having a psychiatric diagnosis, a written agreement for the provision of psychiatric services or consultation shall be entered into if primary services are provided by a physician other than a psychiatrist. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-238. Infection control. (a) Each facility shall provide a sanitary environment and shall follow proper techniques of asepsis, sterilization, and isolation.

(b) Each facility shall have written policies and procedures for aseptic and isolation techniques. Those policies and procedures shall be followed by all employees. If the facility does not have the capability of caring for a resident with an infectious disease, the written policies shall include provisions for handling the case until arrangements can be made to transfer the resident to an appropriate facility.

(c) Each facility shall have, and follows, written procedures to insure safe disposal of infectious waste and materials.

(d) Each facility shall have, and follow, written procedures to monitor the health status of all employees.

(e) Each ice storage container shall be kept clean, and ice and ice scoops shall be handled in a sanitary manner to prevent contamination. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-239. Administration. (a) Each licensed nursing facility for mental health shall have an administrator, duly approved by the Kansas department of health and environment who acts in a professional capacity in accordance with regulations governing the operation of a nursing facility for mental health.

(b) Each nursing facility for mental health shall adopt and enforce written policies relative to:

(1) The health care, safety, psychosocial, and self-esteem needs of the residents;

(2) the protection of personal and property rights of residents; and

(3) emergency medical procedures.

(c) Each nursing facility for mental health shall maintain an affiliation agreement with the community mental health center within its service area. Such affiliation agreement shall, at a minimum, address the following:

(1) Provisions for any services to be provided to the nursing facility for mental health or its residents by the community mental health center; and

(2) mechanisms which insure coordination and planning with the community mental health center for any resident being discharged from the nursing facility for mental health to the community, or to any other institution or hospital. (Authorized by and implementing K.S.A. 39-932; effective May 16, 1994.)

28-39-240. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; amended Oct. 8, 1999; revoked May 29, 2009.)

28-39-241 through 28-39-244. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; revoked May 29, 2009.)

28-39-245. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; amended Oct. 8, 1999; revoked May 29, 2009.)

28-39-246. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; revoked May 29, 2009.)

28-39-247. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; amended Oct. 8, 1999; revoked May 29, 2009.)

28-39-248 through 28-39-253. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997; revoked May 29, 2009.)

28-39-254. Construction; general requirements. (a) The assisted living facility or residential health care facility shall be designed, constructed, equipped and maintained to protect the health and safety of residents, personnel and the public.

(b) All new construction, renovation, remodeling and changes in building use in existing buildings shall comply with building and fire codes, ordinances and regulations enforced by city, coun-

ty, and state jurisdictions, including the state fire marshal.

(c) New construction, modifications and equipment shall conform to the following codes and standards:

(1) Title III of the Americans with disabilities act, 42 U.S.C. 12181, effective as of January 26, 1992; and

(2) "Food Service Sanitation Manual," health, education, and welfare (HEW) publication no. FDA 78-2081, as in effect on July 1, 1981.

(d) Site location requirements. The facility shall be:

(1) Served by all-weather roads and streets;

(2) free from noxious or hazardous smoke or fumes;

(3) at least 4,000 feet from concentrated livestock operations, including feedlots and shipping and holding pens;

(4) free of flooding for a 100-year period; and

(5) sufficient in area and configuration to accommodate the building or buildings, drives, parking, sidewalks, and an outdoor recreation area.

(e) Site development requirements.

(1) Final grading of the site shall provide for positive surface drainage away from the building and positive protection and control of surface drainage and freshets from adjacent areas.

(2) Except for lawn or shrubbery which may be used in landscape screening, an unencumbered outdoor open area shall be provided for recreation and shall be designated for that purpose on the plot plan. The licensing agency may approve outdoor areas provided by terraces, roof gardens, or similar provisions for facilities located in high density urban areas.

(f) General building exterior.

(1) Each exterior pathway or access to the facility's common use areas and entrance or exit ways shall be:

(A) made of hard smooth material;

(B) barrier free; and

(C) maintained in good repair.

(2) There shall be a means of monitoring each exterior entry and exit for security purposes.

(3) Outdoor recreation areas shall be provided and available to residents.

(g) General building interior.

(1) Each assisted living facility shall consist of apartments which contain at least the following:

(A) A sleeping area with a window which opens for ventilation and that conforms with minimum dimensions described in the uniform building

code, section 1204 as in effect on January 26, 1992 for egress to the outside;

(B) a living area;

(C) a storage area with a door or doors, a shelf and a hanging rod accessible to the resident;

(D) a kitchen area equipped with a sink, a refrigerator, a stove or a microwave and space for storage of utensils and supplies. Provision shall be available to disconnect the stove if necessary for resident safety;

(E) a toilet room which contains a toilet, lavatory, and a bath tub or shower accessible to a resident with disabilities;

(F) an entrance door which has only one locking device which releases with operation of the inside door handle. This lock shall be masterkeyed from the corridor side; and

(G) at least 200 square feet of living space not including the toilet room, closets, lockers, wardrobes, other built-in fixed items, alcoves and vestibules.

(2) Any assisted living facility licensed before January 1, 1995, as an intermediate personal care facility shall not be required to have kitchens and private baths in apartments.

(3) Each residential health care facility shall provide individual living units which include at least the following:

(A) A sleeping area with a window which opens for ventilation and that conforms with minimum dimensions described in the uniform building code, section 1204 as in effect on January 26, 1992 for egress to the outside;

(B) a toilet room which contains a toilet, lavatory and a bathing unit accessible to a resident with disabilities;

(C) a storage area with a door, a shelf and a hanging rod accessible to the resident;

(D) an entrance door which has only one locking device which releases with operation of the inside door handle. This lock shall be master-keyed from the corridor side; and

(E) at least 100 square feet of living space not including the toilet room, closets, lockers, wardrobes, other built-in fixed items, alcoves, and vestibules.

(4) If a resident in a residential health care facility shares an individual living unit with another resident, there shall be at least 80 square feet of living space per resident.

(5) Any facility licensed as intermediate personal care home before January 1, 1995 shall not be required to have a bathing unit in each toilet room.

(6) Any nursing facility licensed on or before July 1, 1995 which wishes to license a section of the facility as a residential health care facility shall have private bathing facilities in at least 20 percent of the individual living units.

(7) The individual living units in any wing or floor of the nursing facility licensed as residential health care shall be contiguous.

(8) Any nursing facility which has changed licensure level in a wing or floor of the facility as found in paragraph (g)(6) of this regulation may change that wing or floor back to a nursing facility as long as all environmental elements required at the time of the initial change are met.

(h) Common use areas.

(1) Each entrance shall be at ground level and shall be accessible to individuals with disabilities.

(2) Except for adjoining use areas which have closely related functions, each common use area shall have access from a general corridor without passing through any intervening use area. Large open areas or central living areas, including living rooms, dining rooms and dens, may be considered to be corridors.

(i) Bathing room.

(1) There may be a bathing room with a mechanical tub and sufficient floor space to allow accessibility for a resident using a wheelchair.

(2) The room shall contain provisions for an individual heat control or a supplemental heat source and shall have an exhaust to the outside.

(3) A toilet and lavatory shall be accessible without entering the general corridor.

(j) Public restroom.

(1) There shall be a public restroom accessible to individuals with disabilities on each floor of the facility. This restroom shall be available to staff and visitors.

(2) The restroom shall contain a toilet, lavatory, waste container and a non-reusable method of hand drying.

(k) Dining room. The facility shall have a dining room or dining rooms with the capacity to seat all residents.

(l) Social and recreation areas. The facility shall have common areas for social and recreational use by residents.

(m) Public telephone. There shall be a local access public telephone accessible to individuals with disabilities in a private area that allows a resident or another individual to conduct a private conversation.

(n) Smoking. If smoking is allowed:

(1) A public use area or areas shall be provided for residents, visitors and employees in which smoke is exhausted to the outside; and

(2) the facility shall ensure that residents who desire to live in a smoke-free environment may do so.

(o) The facility shall ensure that residents who desire to receive mail without staff intervention may do so.

(p) Any assisted living facility or residential health care facility which is physically attached to a nursing facility may share common use areas with the nursing facility. However, the facility shall provide for at least one common living or recreational area designated primarily for use by residents of the assisted living or residential health care facility. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997.)

28-39-255. Support service areas. (a) The assisted living or residential health care facility shall provide the following:

(1) Space with a desk and telephone which can be used by direct care staff to chart and maintain resident records; and

(2) a locked medication storage area with a sink and a refrigerator in the same area for medications. The facility shall provide a separate locked compartment within the area for controlled drugs. A drug cart with a double locking system shall be acceptable. The facility shall provide storage for necessary medical supplies.

(b) Housekeeping and sanitation.

(1) The facility shall provide a locked janitor closet for storing supplies and equipment, with a floor or service sink.

(2) The facility shall provide space for storage of clean linen if linen service is included in the negotiated service agreements.

(c) Laundry facility.

(1) The facility shall store soiled laundry in a manner which prevents odors and spread of disease.

(2) If laundry is processed in the facility, the facility shall provide washing and drying machines. The facility shall arrange the work area to provide a "one-way flow" of laundry from a soiled area to a clean area.

(3) The facility shall provide a work counter and a locked cabinet for storage of chemicals and supplies.

(4) The facility shall provide a handwashing lavatory with a non-reusable method of hand-drying within or accessible to the laundry facility.

(d) Dietary areas. A dietary area or areas shall provide for sanitary meal preparation or service for residents.

(1) The facility shall provide disposal of waste by incineration, mechanical destruction, removal or a combination of these. The facility shall use containers with tightly fitting lids to store waste.

(2) Ceilings in the dietary areas shall be cleanable by dustless methods, such as vacuum cleaning or wet cleaning. These areas shall not have exposed or unprotected sewer lines.

(e) Assisted living or residential health care facilities which are physically attached to a nursing facility may share support areas with the nursing facility. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997.)

28-39-256. Details and finishes. (a) Details for assisted living or residential health care facilities shall include the following:

(1) Rooms containing bathtubs, showers or toilets available for use by residents shall be equipped with doors and hardware capable of being opened from the outside and shall permit access from outside the room in an emergency.

(2) Windows and outer doors which may be left in an open position shall be provided with insect screens. Windows shall be designed to prevent accidental falls when open or shall be equipped with security screens.

(3) Doors, sidelights, borrowed lights, and windows in which the glazing is within 18 inches or 46 centimeters of the floor shall be glazed with safety glass, wire glass, or plastic glazing material that will resist breaking and will not create dangerous cutting edges if broken. Similar materials shall be used in wall openings of recreation rooms and exercise rooms unless required otherwise for fire safety.

(4) Safety glass or plastic glazing as described in paragraph (a) (3) shall be used for shower doors and bath enclosures.

(5) Grab bars, or sufficient blocking installed in the walls to support a grab bar, shall be provided at all toilets, showers, and tubs accessible to residents.

(b) Finishes.

(1) Wall bases in kitchens, janitor's closets, laundries and resident bathrooms shall be made tightly sealed, and constructed without voids that can harbor insects.

(2) Wall finishes shall be washable and, in the immediate area of plumbing fixtures, shall be smooth and moisture-resistant. Finish trim, and wall and floor construction in dietary and food

preparation areas shall be free from spaces that can harbor rodents and insects.

(3) Ceilings in the dietary, food preparation, and food storage areas shall be cleanable by dustless methods, such as vacuum cleaning or wet cleaning. Finished ceilings may be omitted in mechanical and equipment spaces, shops, general storage areas, and similar spaces unless required for fire protection purposes.

(4) Floor, wall and ceiling penetrations by pipes, ducts, and conduits shall be tightly sealed to minimize entry of rodents and insects. Joints of structural elements shall be similarly sealed.

(5) Shower bases and tubs shall provide non-slip surfaces.

(c) Mechanical requirements.

(1) Heating, air conditioning, and ventilating systems.

(A) The systems shall be designed to maintain a year-round indoor temperature range of 70°F or 21°C to 85°F or 26°C.

(B) Each apartment or individual living unit shall allow the resident to control the temperature.

(2) Plumbing and piping systems.

(A) Backflow prevention devices or vacuum breakers shall be installed on fixtures to which hoses or tubing can be attached.

(B) Water distribution systems shall be arranged to provide hot water at outlets at all times. The temperature of hot water shall range between 98°F and 120°F at bathing facilities, sinks, and lavatories in resident use areas.

(3) Electrical requirements.

(A) All spaces occupied by persons or machinery and equipment within the buildings, approaches to buildings, and parking lots shall have adequate lighting.

(B) Minimum lighting intensity levels shall be as required in Table 1.

Table 1
Artificial Light Requirements

Place	Light measured in foot candles	Where Measured
Kitchen and other food preparation and serving areas	50	Counter level
Dining room	25	Table level
Living room or other common areas	15	Three feet above floor
Areas for reading or specialized areas (may be provided by a portable lamp)	50	Chair or table area

Place	Light measured in foot candles	Where Measured
Corridors	10	Floor level
Stairways	20	Step level
Exits	5	Floor level
Resident Apartment or Individual living unit – General	20	Three feet above floor
Toilet room	50	Three feet above floor
Kitchen	50	Counter

(C) Each corridor and stairway shall remain lighted at all times.

(D) Each light in resident use areas shall be equipped with shades, globes, grids, or glass panels.

(4) Telephone service. Each unit or apartment shall have at least one telephone jack for each resident who desires phone service. (Authorized by and implementing K.S.A. 39-932; effective Feb. 21, 1997.)

28-39-275 through 28-39-288. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999; revoked May 29, 2009.)

28-39-289. Construction; general requirements. (a) Each adult day care facility shall be designed, constructed, equipped, and maintained to protect the health and safety of residents, personnel, and the public.

(b) All new construction, renovation, and remodeling or changes in building use in existing buildings shall comply with building and fire codes, ordinances, and regulations enforced by city, county, and state jurisdictions, including the state fire marshal.

(c) New construction, modifications, and equipment shall conform to the following codes and standards:

(1) Title III of the Americans with disabilities act, 42 U.S.C. 12181, as implemented by 28 C.F.R. part 36, as published on July 26, 1991 and hereby adopted by reference; and

(2) “food service sanitation manual,” health, education, and welfare (HEW) 1976 publication no. FDA 78-2081, which is hereby adopted by reference.

(d) Site location requirements. Each facility shall meet the following requirements:

(1) Be served by all-weather roads and streets;

(2) be free from noxious or hazardous smoke or fumes;

(3) be located a minimum of 4,000 feet from concentrated livestock operations, including feedlots and shipping and holding pens;

(4) be free of flooding for a 100-year period; and

(5) be sufficient in area and configuration to accommodate the building or buildings, drives, parking, sidewalks, and outdoor recreation area or areas.

(e) Building exterior.

(1) Each exterior pathway or access to the facility's common use areas and entrance and exit ways shall meet the following requirements:

(A) Be made of hard, smooth material;

(B) be free of barriers; and

(C) be maintained in good repair.

(2) There shall be a means of monitoring each exterior entry and exit used by residents for security purposes.

(3) Each facility shall provide outdoor recreation areas for residents.

(f) Common use areas.

(1) Each facility shall have sufficient common-use space to accommodate the full range of program activities and services.

(A) Space shall be provided for activities at a rate of 60 square feet per resident capacity of the facility. Reception areas, storage areas, offices, rest rooms, passageways, treatment rooms, service areas, or specialized space used only for therapies shall not be included when calculating activity space square footage.

(B) A private area equipped with a bed shall be available for residents who become ill, may require a rest period, or need a quiet area for treatment of behavioral symptoms.

(C) Each facility shall have social, recreational, and dining areas that provide for the activity needs of residents. The dining area shall have seating capacity for all residents in attendance at any one time.

(D) Rooms or areas used for resident services and activities shall have furniture appropriate to the needs of the residents attending the adult day care program.

(2) Each facility located in a building housing other services shall have a separate, identifiable space for adult day care activity areas provided during hours of operation. Space, including the kitchen and therapy rooms, may be shared.

(3) Rest room or rooms.

(A) Each rest room shall be accessible to residents with disabilities and shall contain a toilet or toilets, lavatory, waste container, and a nonreusable method of hand drying.

(B) The number of toilets and lavatories accessible to residents shall include the following:

(i) One to five residents: one toilet and lavatory;

(ii) six to 10 residents: two toilets and two lavatories; and

(iii) 11 or more residents: one toilet and lavatory for each 10 residents over 10.

(4) Bathing room.

(A) There may be a bathing room with a tub, shower, or mechanical tub.

(B) A toilet and lavatory shall be accessible without entering the general corridor.

(5) Public telephone. There shall be a public telephone locally accessible to individuals with disabilities in a private area that allows a resident or another individual to conduct a private conversation. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999.)

28-39-290. Support services areas. (a) Each adult day care facility shall provide the following:

(1) A work space with a desk and telephone that can be used by staff to chart and maintain resident records; and

(2) a locked medication storage area and a refrigerator for the storage of medications in the same area. If controlled drugs are stored at the facility, a separate double-locked compartment shall be provided. A drug cart with a double-locking system shall be acceptable. Each facility shall provide storage for necessary medical supplies.

(b) Each facility shall provide a locked closet or cabinet for the storage of cleaning chemicals and supplies used for facility housekeeping and sanitation.

(c) Laundry facility.

(1) If the facility processes laundry, the facility shall provide washing and drying machines. Each facility shall arrange the work area to provide a one-way flow of laundry from a soiled area to a clean area.

(2) Each facility shall store soiled laundry in a manner that prevents odors and the spread of disease.

(3) Each facility shall provide a lavatory with a nonreusable method of hand drying within or accessible to the laundry area.

(d) Dietary areas. A dietary area shall provide for sanitary meal preparation or service to residents.

(1) Each facility shall wash, rinse, and sanitize all tableware, kitchenware, and food preparation equipment in any of the following:

- (A) A dishwashing machine;
 - (B) a three-compartment sink;
 - (C) three separate containers; or
 - (D) any combination of the above.
- (2) Each facility shall provide the disposal of waste by incineration, mechanical destruction, removal, or a combination of these. Air-tight, closed containers shall be used to store waste.
- (3) Ceilings in the dietary area shall be cleanable by dustless methods, including vacuum cleaning or wet cleaning.
- (4) Dietary areas shall not have exposed or unprotected sewer lines. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999.)

28-39-291. Details and finishes. (a) Details for each adult day care facility shall include the following:

(1) Rooms containing bathtubs, showers, or toilets available for use by residents shall be equipped with doors and hardware capable of being opened from the outside and shall permit access from outside the room in an emergency.

(2) Windows and outer doors, when left in an open position, shall be provided with insect screens. Windows shall be designed to prevent accidental falls when open or shall be equipped with security screens.

(3) Grab bars shall be provided at all toilets, showers, and tubs accessible to residents.

(b) Finishes.

(1) Wall finishes shall be washable and, in the immediate area of plumbing fixtures, shall be smooth and moisture resistant. Finish trim, and wall and floor constructions in dietary and food preparation areas shall be free from spaces that can harbor rodents and insects.

(2) Floor, wall, and ceiling penetrations by pipes, ducts, and conduits shall be tightly sealed to minimize the entry of rodents and insects. Joints of structural elements shall be similarly sealed.

(3) Shower bases and tubs shall be provided with nonslip surfaces.

(c) Mechanical requirements.

(1) Heating, air conditioning, and ventilating systems.

(A) The system shall be designed to maintain a year-round indoor temperature range of 70°F to 85°F.

(2) Plumbing and piping systems.

(A) Backflow prevention devices or vacuum breakers shall be installed on fixtures to which hoses or tubing can be attached.

(B) Water distribution systems shall be arranged to provide hot water at hot water outlets at all times. The temperature of hot water shall range between 98°F and 120°F at showers, tubs, and lavatories accessible to residents.

(3) Electrical requirements.

(A) All spaces occupied by persons or machinery and equipment within buildings, approaches to buildings, and parking lots shall have adequate lighting.

(B) Each corridor and stairway shall remain lighted during the hours of operation.

(C) Each light in resident use areas shall be equipped with shades, globes, grids, or glass panels. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999.)

28-39-300 to 28-39-312. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988; revoked Oct. 8, 1999.)

28-39-400. Administration. The boarding care home shall be operated in a manner to ensure the delivery of all required administrative services. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-401. Administration; management standard. (a) The licensee shall have full authority and responsibility for the operation of the facility and for compliance with licensing requirements.

(b) The licensee shall operate the facility to assure the safety, psychosocial, and self-esteem needs of the residents; and to protect personal and property rights of residents.

(c) Admission.

(1) The facility shall admit and retain only persons in need of supervision. The facility shall accommodate a maximum of 10 residents.

(2) Before admission, the prospective resident or the legal guardian of the resident shall be informed, in writing, of the rates and charges and the resident's obligations regarding payment, including the refund policy of the facility.

(3) At the time of admission, the licensee shall execute a written agreement with the resident or the legal guardian of the resident which describes in detail the goods and services which the resident shall receive and which sets forth the obligations which the resident has toward the facility.

(4) The facility shall not admit persons with an infection or disease in communicable stage;

women who are pregnant or within three months following pregnancy; or persons in need of active treatment for alcoholism, mental condition, or drug addiction.

(d) Power of attorney and guardianship. A power of attorney from or legal guardianship for a resident shall not be accepted by anyone employed by or having a financial interest in the facility unless the person is related by marriage or blood within the second degree to the resident.

(e) Reports. The facility shall submit to the licensing agency, not later than 10 days following the period covered, a quarterly report of residents and employees. The report shall be submitted on forms provided by the licensing agency. The facility shall submit any other reports as required by the licensing agency. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-402. Health services. The boarding care home shall provide qualified personnel to meet the needs of the residents, including those services prescribed in K.A.R. 28-39-403 to K.A.R. 28-39-405. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-403. Health services; medical and dental services standard. (a) Residents shall provide for their own medical services through personal physicians and for dental services by their personal dentists.

(b) Residents may self-administer medications or facility personnel may supervise residents who self-administer medication by:

- (1) Reminding residents to take medication,
- (2) opening bottle caps for residents,
- (3) reading the medication label to residents,
- (4) observing residents while they take medications,
- (5) checking the self-administered dosage against the label of the container,
- (6) reassuring residents that they have obtained and are taking the dosage as prescribed,
- (7) assisting a resident with the taking of medications when the resident requires assistance,
- (8) keeping daily records of when residents receive supervision, and
- (9) immediately reporting noticeable changes in the condition of a resident to the resident's physician and nearest relative or legal guardian.

(c) Restraints shall not be used. (Authorized by

and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-404. Health services; records standard. (a) Resident records shall be maintained with pertinent information regarding care of the resident.

(b) Resident records shall include name, date of admission, birth date, nearest relative or legal guardian, personal physician, and whom to notify in case of illness or accident. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-405. Health services; dietetic services standard. The facility shall provide meal services that include:

(a) Menus planned and followed to meet the nutritional needs of residents; and

(b) Foods prepared by methods that conserve the nutritive value, flavor, and appearance and attractively served at the proper temperature. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-406. Environmental sanitation and safety. The boarding care home shall provide staff and services to ensure a clean, safe, and comfortable environment for residents and shall meet the environmental sanitation and safety requirements prescribed in K.A.R. 28-39-407 to K.A.R. 28-39-409, inclusive. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-407. Environmental sanitation and safety; housekeeping standard. (a) Housekeeping services shall be provided to maintain a safe, sanitary, and comfortable environment for residents and to help prevent the development or transmission of infections.

(b) The facility shall be kept free of insects, rodents, and vermin.

(c) The grounds shall be free from accumulation of rubbish and other health and safety hazards.

(d) The interior and exterior of the building shall be maintained in a clean, safe, and orderly manner. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-408. Environmental sanitation and safety; maintenance standard. (a) All buildings shall be maintained in good repair and free from hazards.

(b) All electrical and mechanical equipment shall be maintained in good repair and in safe operating condition.

(c) Resident care equipment shall be maintained in a safe and sanitary condition. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-409. Environmental sanitation and safety; disaster preparedness standard.

(a) The facility shall have a written plan with procedures to be followed if a disaster, such as fire, tornado, explosion, or flood, occurs inside or outside the facility. The facility shall ensure that the staff are prepared for a disaster.

(b) The disaster plan shall be available and posted for residents and staff.

(c) The plan shall include evacuation routes and procedures to be followed in case of fire, tornado, explosion, flood, or other disaster. The plan shall include procedures for the transfer of residents, casualties, medical records, medications, and notification of next of kin and other persons. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-410. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988; revoked March 23, 2001.)

28-39-411. Physical environment and complete construction.

(a) General provisions. The following provisions describe the physical environment and complete construction requirements for boarding care homes. The facility shall provide for a safe, sanitary environment and for the safety and comfort of the residents.

(b) Each boarding care home shall consist of at least the following units, areas, and rooms which shall all be within a single building and under one roof;

(1) All beds shall be located in rooms designed for not more than five beds. Each resident bedroom shall meet the following requirements:

(A) Minimum room areas, excluding toilet rooms, closets, lockers, wardrobes, other built-in fixed items, alcoves, or vestibules, shall be 60 square feet per bed. Visual privacy shall be provided for each bed in a multibed room;

(B) Each toilet room shall contain at least a toilet and a lavatory but not more than two toilets. The lavatory may be omitted if the toilet adjoins

bedrooms containing a lavatory. There shall be not less than one toilet for each five residents; and

(C) Each resident room shall be provided with space for resident clothing and personal items.

(2) Services areas or elements required below shall be located in all boarding care homes. Each facility shall contain:

(A) Space for storage of clean linen;

(B) Space for holding of soiled laundry;

(C) Space for storage of equipment for the facility's use.

(D) Bathing units at the rate of one bathtub or shower per five residents. Bathing units shall be located in rooms or areas with access to a toilet and lavatory without entering the general corridor. Bathing units shall be located within enclosures which provide for privacy;

(E) Living and dining areas;

(F) Food preparation areas in the size required to implement meal service. The area shall include provision for disposal of waste by incineration, mechanical destruction, compaction, removal, or by a combination of these techniques. Stored waste shall be in water-tight, closed containers; and

(G) If tools, supplies, or equipment used for yard or exterior maintenance are stored at the facility, a room which opens to the outside or which is located in a detached building for storage of such equipment.

(c) Details and finishes.

(1) Windows and outer doors left in an open position shall be provided with insect screens.

(2) Shower bases and tubs shall have a nonslip surface.

(3) Wall finishes shall be washable and in the immediate area of plumbing fixtures shall be smooth and moisture resistant. Finish, trim, wall, and floor constructions in food preparation areas shall be free from spaces that can harbor rodents and insects.

(4) Ceilings in the food preparation areas shall be cleanable by dustless methods, such as vacuum cleaning or wet cleaning. These areas shall not have exposed or unprotected sewer lines.

(d) Mechanical, plumbing, and electrical requirements.

(1) Heating, air conditioning, and ventilation systems. The system shall maintain a year-round indoor temperature range between 70°F. to 85°F.

(2) The temperature of hot water shall range between 98°F. and 115°F. at shower, bathing, and handwashing facilities throughout the system.

(3) All spaces occupied by persons or machinery and equipment within the buildings, approaches to buildings, and parking lots shall have adequate lighting. (Authorized by and implementing K.S.A. 39-932; effective, T-88-57, Dec. 16, 1987; amended May 1, 1988.)

28-39-425 through 28-39-436. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999; revoked May 29, 2009.)

28-39-437. Construction; general requirements. (a) Each home-plus facility shall be designed, constructed, equipped, and maintained to protect the health and safety of residents, personnel, and the public.

(b) All new construction, renovation, remodeling, and changes in building use in existing buildings shall comply with building and fire codes, ordinances, and regulations enforced by city, county, and state jurisdictions, including the state fire marshal.

(c) Site location requirements. Each facility shall meet the following requirements:

(1) Be served by all-weather roads and streets;

(2) be free from noxious or hazardous smoke or fumes;

(3) be located at least 4,000 feet from concentrated livestock operations, including feedlots and shipping and holding pens;

(4) be free of flooding for a 100-year period; and

(5) be sufficient in area and configuration to accommodate the building or buildings, drives, parking, sidewalks, and outdoor recreation area.

(d) General building exterior.

(1) Each exterior pathway or access to the facility's common use areas and entrance or exit ways shall meet the following requirements:

(A) Be made of hard, smooth material;

(B) be barrier free; and

(C) be maintained in good repair.

(2) Outdoor recreation areas shall be provided and available to residents.

(3) The exterior of the building and the grounds shall be maintained in good repair and in a clean, safe, and orderly manner.

(4) Each facility house address number shall be posted on the exterior of the facility using at least three-inch-high numbers. Address numbers shall be posted on any mailbox located away from the facility.

(e) General building interior.

(1) Resident bedrooms.

(A) Each resident shall be provided a separate bed with the following:

(i) A clean, comfortable mattress; and

(ii) bedding appropriate to the weather.

(B) Each facility shall provide visual privacy for each resident in a multi-bed room.

(C) A space of at least three feet shall be provided between beds in a multi-bed room.

(D) Each resident shall be provided with space for the storage of personal items.

(E) There shall be at least one window to the outside.

(F) Resident bedrooms shall not be located in a basement.

(G) Bedrooms for residents who require physical assistance in transferring from a bed to a wheelchair shall be located on the first floor of the facility.

(2) Toilet facilities.

(A) There shall be at least one toilet room with a lavatory, and a shower or tub, for each five individuals living in the facility.

(B) The facility shall provide grab bars or equivalent assistive devices at each toilet, tub, or shower if required for resident safety.

(C) Showers and tubs shall have nonslip surfaces or be provided with nonslip mats for resident safety.

(3) Living, dining, and activity areas. Each facility shall provide living, dining, and activity areas that meet the following requirements:

(A) Are well lighted;

(B) are adequately furnished;

(C) have sufficient space to accommodate all resident activities; and

(D) are located in an area or areas accessible to all residents.

(4) Laundry area.

(A) If the facility processes laundry, the facility shall provide a work area with a one-way flow of laundry from a soiled area to a clean area.

(B) The laundry area shall not be located in the same room where preparation and service of food occur.

(C) Each facility shall store laundry in a manner that prevents odors and the spread of disease.

(f) Sanitation and maintenance. Each facility shall provide a safe, functional, sanitary, and comfortable environment for residents, staff, and the public.

(g) Public telephone. There shall be a public telephone locally accessible to individuals with disabilities in a private area that allows a resident

or another individual to conduct a private conversation.

(h) The heating, air conditioning, and ventilation systems shall maintain a year-round indoor temperature range of 70°; F to 85°F in the resident use areas.

(i) Plumbing and piping systems.

(1) Backflow prevention devices or vacuum breakers shall be installed on fixtures to which hoses or tubing can be attached.

(2) Water distribution systems shall be arranged to provide hot water at hot water outlets at all times. The temperature of hot water shall range between 98°F and 120°F at showers, tubs, and lavatories accessible to residents.

(j) Each facility shall ensure that residents who desire to receive mail without staff intervention may do so. (Authorized by and implementing K.S.A. 39-932; effective Oct. 8, 1999.)

Article 40.—EMERGENCY MEDICAL SERVICES

CERTIFICATION OF AMBULANCE ATTENDANTS

28-40-1 to 28-40-6. (Authorized by K.S.A. 65-4320; effective, E-77-34, July 8, 1976; effective Feb. 15, 1977; revoked, E-81-33, Oct. 22, 1980; revoked May 1, 1981.)

AMBULANCE LICENSURE

28-40-51 to 28-40-58. (Authorized by K.S.A. 65-4320; effective, E-77-34, July 8, 1976; effective Feb. 15, 1977; revoked, E-81-33, Oct. 22, 1980; revoked May 1, 1981.)

28-40-61 and 28-40-62. (Authorized by K.S.A. 1979 Supp. 65-4320; implementing K.S.A. 1979 Supp. 65-4320, 65-4322; effective May 1, 1981; revoked May 1, 1985.)

28-40-63 to 28-40-65. (Authorized by K.S.A. 1979 Supp. 65-4320; implementing K.S.A. 1979 Supp. 65-4320; effective May 1, 1981; revoked May 1, 1985.)

28-40-66. (Authorized by K.S.A. 1979 Supp. 65-4320; implementing K.S.A. 1979 Supp. 65-4326; effective May 1, 1981; revoked May 1, 1985.)

28-40-67 and 28-40-68. (Authorized by K.S.A. 1979 Supp. 65-4320; implementing K.S.A. 1979 Supp. 65-4320; effective May 1, 1981; revoked May 1, 1985.)

28-40-69. (Authorized by and implementing K.S.A. 1982 Supp. 65-4318, as amended by L. 1983, ch. 286, § 6; effective May 1, 1984; revoked May 1, 1985.)

Article 41.—OIL FIELD WASTE DISPOSAL

28-41-1 to 28-41-3. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective July 1, 1966; amended May 1, 1984; revoked May 10, 1996.)

28-41-9. (Authorized by and implementing K.S.A. 65-171d; effective Dec. 31, 1947; amended July 1, 1949; amended Sept. 1, 1950; amended July 1, 1955; amended July 1, 1958; amended July 1, 1966; amended Feb. 15, 1977; amended May 1, 1982; amended, T-84-42, Jan. 1, 1984; amended May 1, 1984; revoked May 10, 1996.)

Article 42.—CERTIFICATES OF NEED FOR HEALTH FACILITIES

28-42-1. (Authorized by K.S.A. 65-4704 and 65-4821; implementing K.S.A. 1983 Supp. 65-4805, 65-4806, 65-4808, 65-4815; effective May 1, 1979; amended, E-81-7, March 12, 1980; amended May 1, 1980; amended, E-81-34, Nov. 12, 1980; amended May 1, 1981; amended, T-84-21, Aug. 30, 1983; amended May 1, 1984; revoked May 10, 1996.)

28-42-3. (Authorized by K.S.A. 65-4806, 65-4821; effective May 1, 1979; amended, E-81-34, Nov. 12, 1980; amended May 1, 1981; revoked May 10, 1996.)

28-42-4. (Authorized by K.S.A. 1978 Supp. 65-4806; effective May 1, 1979; revoked May 10, 1996.)

28-42-5. (Authorized by K.S.A. 65-4704, 65-4821, K.S.A. 1983 Supp. 65-4806; implementing K.S.A. 65-4806; effective May 1, 1979; amended, E-81-7, March 12, 1980; amended May 1, 1980; amended, E-81-34, Nov. 12, 1980; amended May 1, 1981; amended, T-84-21, Aug. 30, 1983; amended May 1, 1984; revoked May 10, 1996.)

28-42-6. (Authorized by K.S.A. 1979 Supp. 65-4704, 65-4804, 65-4808; effective May 1, 1979; amended, E-81-7, March 12, 1980; amended May 1, 1980; revoked May 10, 1996.)

28-42-7. (Authorized by K.S.A. 1979 Supp. 65-4704, 65-4807, 65-4808; effective May 1, 1979;

amended, E-81-7, March 12, 1980; amended May 1, 1980; revoked May 10, 1996.)

28-42-9. (Authorized by K.S.A. 1979 Supp. 65-4704, 65-4808; effective, E-81-7, March 12, 1980; effective May 1, 1980; revoked May 10, 1996.)

28-42-10. (Authorized by K.S.A. 1983 Supp. 65-4805, and K.S.A. 65-4821; implementing K.S.A. 1983 Supp. 65-4805; effective, E-81-34, Nov. 12, 1980; modified, L. 1981, ch. 411; effective May 1, 1981; amended, T-84-21, Aug. 30, 1983; amended May 1, 1984; revoked May 10, 1996.)

28-42-11. (Authorized by K.S.A. 1978 Supp. 65-4815; effective May 1, 1979; revoked May 10, 1996.)

28-42-12. (Authorized by K.S.A. 65-4704, 65-4804, 65-4815, 65-4821; effective May 1, 1979; amended, E-81-7, March 12, 1980; amended May 1, 1980; amended, E-81-34, Nov. 12, 1980; amended May 1, 1981; revoked May 10, 1996.)

28-42-13. (Authorized by K.S.A. 1979 Supp. 65-4704, 65-4808, 65-4815; effective May 1, 1979; amended, E-81-7, March 12, 1980; amended May 1, 1980; revoked May 10, 1996.)

28-42-14. (Authorized by K.S.A. 1978 Supp. 65-4802; effective May 1, 1979; revoked May 10, 1996.)

28-42-15. (Authorized by K.S.A. 65-4704, 65-4820, 65-4821; effective, E-81-34, Nov. 12, 1980; effective May 1, 1981; revoked May 10, 1996.)

28-42-16. (Authorized by K.S.A. 1979 Supp. 65-4704, 65-4808, 65-4815; effective, E-81-7, March 12, 1980; effective May 1, 1980; revoked May 10, 1996.)

Article 43.—CONSTRUCTION, OPERATION, MONITORING AND ABANDONMENT OF SALT SOLUTION MINING WELLS

28-43-1. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-2. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-3. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-4. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-5. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-6. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-7. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-8. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; amended May 1, 1984; revoked Aug. 6, 2010.)

28-43-9. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-10. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1979; amended May 1, 1981; revoked Aug. 6, 2010.)

28-43-11. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective, T-85-7, Feb. 15, 1984; effective May 1, 1984; amended May 1, 1985; revoked Aug. 6, 2010.)

Article 44.—PETROLEUM PRODUCTS STORAGE TANKS

28-44-1 to 28-44-10. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked Nov. 26, 1990.)

28-44-11. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective, T-85-7, Feb. 15, 1984; effective May 1, 1984; amended May 1, 1985; revoked Nov. 26, 1990.)

28-44-12. General provisions. (a) The following changes shall be made to any provision in 40 C.F.R. part 280 that is adopted by reference in these regulations:

(1) "The United States" shall be replaced with "the state of Kansas."

(2) “Environmental protection agency,” “implementing agency,” and “EPA” shall be replaced with “department” except as follows:

(A) “Environmental protection agency” shall not be replaced with “department” when used in 40 C.F.R. 280.103(b)(1) in the second sentence of the trust agreement.

(B) “Implementing agency” shall not be replaced with “department” when used in the following sections:

(i) 280.12 as stated in the definition of “implementing agency”; and

(ii) 280.92 as stated in the definition of “director of the implementing agency.”

(C) “EPA” shall not be replaced with “department” when used in the following sections:

(i) 280.92 as stated in the definition of “director of implementing agency”;

(ii) 280.92 as stated in the definition of “legal defense cost”;

(iii) 280.95(b)(1)(i) through (iii);

(iv) 280.95(d) as stated in the “Letter from Chief Financial Officer”;

(v) 280.103(b)(1); and

(vi) appendix III.

(3) “Administrator,” “regional administrator,” and “director” shall be replaced with “secretary” except as follows:

(A) In 40 C.F.R. 280.92 in the definition of “director of the implementing agency,” “regional administrator” shall not be replaced with “secretary.”

(B) In 40 C.F.R. 280.92 in the definition of “director of the implementing agency,” the first occurrence of the word “director” shall not be replaced.

(4) “Federal register” shall be replaced with “Kansas register.”

(5) “Must” shall be replaced with “shall.”

(6) “Will” shall be replaced with “shall.”

(7) “October 13, 2015” shall be replaced with “the effective date of these regulations.”

(8) “October 13, 2018” shall be replaced with “October 13, 2021,” except in 40 C.F.R. 280.36(a) as adopted in K.A.R. 28-44-19.

(b) Each owner or operator, or both, shall be assessed penalty fees by the department for non-compliance. The penalty fees shall be in addition to the required registration and permit fees specified in these regulations.

(c) Any UST license may be suspended or revoked if the requirements specified in K.A.R. 28-44-21 and K.A.R. 28-44-22 are not met. If any license is suspended or revoked, the licens-

ee shall meet the requirements established by the secretary as provided in the order issuing the suspension or revocation to be considered for reinstatement or renewal.

(d) The fees required by these regulations shall be submitted in the form of a check, money order, or electronic payment made payable to the Kansas department of health and environment. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-13. Program scope. The provisions of 40 C.F.R. 280.10 and 280.11, dated July 1, 2015, as amended by 80 fed. reg. 41624-41625 (2015) and effective on October 13, 2015, are hereby adopted by reference. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-14. Definitions. (a) Each of the terms defined in this regulation, as used in these regulations, shall have the meaning specified in this regulation.

(b)(1) The terms and definitions in the following federal regulations are hereby adopted by reference:

(A) 40 C.F.R. 280.12 and 280.92, dated July 1, 2015, as amended by 80 fed. reg. 41625-41627 and 41640-41641 (2015) and effective on October 13, 2015; and

(B) 40 C.F.R. 280.250, published at 80 fed. reg. 41667 (2015) and effective on October 13, 2015.

(2) If the same term is defined differently both in K.S.A. 65-34,100 et seq. and amendments thereto or these regulations and in any federal regulation adopted by reference in these regulations, the definition prescribed in the Kansas statutes or these regulations shall control.

(c)(1) “Drop ticket” shall mean a bill of lading, invoice, or similar document that reflects fuel delivery by a petroleum transport company to a specific facility and includes the deliverer’s name, the delivery date, and the quantity delivered.

(2) “EPA” shall mean United States environmental protection agency.

(3) “Installation” shall mean the work involved in placing a UST system or any part of a UST system in the ground, including excavation, tank placement, line placement, backfilling, and preparing a UST to be placed into service.

(4) “License” shall mean a document issued by the department to a qualified individual or contractor authorizing the person to engage in the

business of installing, removing, modifying, upgrading, repairing, or testing underground storage tanks. A license specifies the types of services that the individual or contractor is qualified to perform.

(5) “Out-of-service,” when used to describe a UST or UST system, shall mean that the UST or UST system is removed from use as a permitted UST or UST system storing a regulated substance.

(6) “Overfill” shall mean to supply a UST with more fuel than the UST can contain.

(7) “Site assessment” shall mean a determination of the presence or absence of petroleum contamination in areas where a release from a UST or UST system could have occurred or is suspected. This term shall include UST and UST system inspection in addition to the collection and analysis of samples from the areas surrounding and beneath the UST and UST system.

(8) “Storage tank operation” shall mean the use, storage, filling, or dispensing of petroleum contained in a UST or UST system.

(9) “These regulations” shall mean article 44 of the department’s regulations.

(10) “UST remover” shall mean a type of underground storage tank contractor. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-15. Application for installation or modification of an underground storage tank.

(a) Each owner shall obtain an installation or modification permit from the department before installing or modifying a UST or UST system. The application requirements and procedures for installation or modification of a UST or UST system shall be those specified in the department’s “Kansas storage tank program document,” dated July 22, 2019, which is hereby adopted by reference.

(b) Each owner shall submit a nonrefundable installation application fee of \$100.00 for each tank. The installation application fee for a new UST shall include the registration fee and the first year’s operating permit fee as required by K.A.R. 28-44-17. (Authorized by K.S.A. 65-34,105; implementing K.S.A. 65-34,105 and 65-34,106; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-16. Underground storage tank systems: design, construction, installation, modification, and notification.

(a) C.F.R. adoptions. The provisions of 40 C.F.R. 280.20, 280.21, and

280.22 and appendix III to part 280, dated July 1, 2015, as amended by 80 fed. reg. 41627-41630 and 41677 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes to the sections specified:

(1) In 280.20(a)(2)(iv), “in writing” shall be added after “or according to guidelines established by the implementing agency.”

(2) In 280.20(a)(5), (b)(4), and (c)(2)(i), “in writing” shall be added after “determined by the implementing agency.”

(3) In 280.20(b)(2)(iv), “in writing” shall be added after “or guidelines established by the implementing agency.”

(4) In 280.20(c)(3), “may not” shall be replaced with “shall not.”

(5)(A) 280.20(e)(1) shall be replaced with the following:

“(e)(1) Each owner or operator of a new UST system shall ensure that an installer licensed by the department certifies that the UST system has been properly installed.”

(B) 280.20(e)(2) shall be replaced with the following:

“(e)(2) Each owner or operator shall provide the completed manufacturer’s installation checklist and installation certification to the department with the UST registration notification form as required by K.A.R. 28-44-17.”

(C) 280.20(e)(3) through (6) shall be deleted.

(6) In 280.22(a), the last sentence shall be replaced with the following sentences: “Owners shall use the form provided by the department in accordance with paragraph (c) of this section. The form is available from the department upon request.”

(7) 280.22(b) shall be replaced with the following:

“(b) Within 30 days of acquisition, any person who assumes ownership of a regulated underground storage tank system, except as described in paragraph (a) of this section, shall submit notice of the ownership change to the department using forms provided by the department upon request.”

(8) 280.22(c) shall be replaced with the following:

“(c) Owners shall use forms provided by the department upon request in lieu of forms set forth in appendix I and appendix II of this part. The information prescribed in appendix I and appendix II shall be collected on forms provided by the department.”

(b) UST system requirements. The UST system requirements shall be those specified in the de-

partment's "Kansas storage tank program document," as adopted in K.A.R. 28-44-15.

(c) Verification. Each owner or operator shall submit verification of each installation or modification not later than 30 days after completion of the installation or modification. The verification shall be submitted to the department on forms provided by the department. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-17. Underground storage tank registration and operating permit. (a) Registration of each UST shall include notice of UST existence. Each owner or operator shall submit notice to the department and include the registration documentation specified in the department's "Kansas storage tank program document," as adopted in K.A.R. 28-44-15.

(b) Each owner of a UST shall remit a nonrefundable registration fee of \$20.00 for each tank, which shall be submitted to the department with the registration notification form provided by the department.

(c) Each owner shall be assessed a penalty fee of \$50.00 for each tank if the owner fails to submit the completed registration notification form within seven days of either of the following:

(1) Bringing a UST or UST system into use; or
(2) assuming ownership of a regulated UST or UST system.

(d) Each owner or operator shall submit an annual operating permit fee of \$25.00 for each tank before April 30 of each year. The operating permit requirements shall be those specified in the department's "Kansas storage tank program document," as adopted in K.A.R. 28-44-15.

(e) Each owner who fails to secure all necessary annual operating permits for each facility before April 30 of each year shall be assessed a penalty fee of \$50.00 for each tank. Each owner shall be assessed an additional penalty fee of \$100.00 for each tank if the owner fails to secure all necessary operating permits before August 1 of each year.

(f) An annual operating permit shall not be issued by the department until all permit fees and applicable penalty fees have been paid.

(g) No owner or operator shall operate a regulated UST system unless a valid operating permit issued by the department is displayed at the facility and is visible to the public. (Authorized by and implementing K.S.A. 65-34,105 and 65-34,106; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-18. Registration of nonregulated underground storage tanks. (a) Any owner or operator of a nonregulated tank may register that tank with the department for the purpose of qualifying the owner or operator to participate in the petroleum storage tank release trust funds. Each registration shall be submitted to the department with the following information on a form provided by the department:

(1) Owner's name, address, and telephone number;

(2) facility address or location;

(3) tank operating status;

(4) tank age;

(5) tank capacity;

(6) UST system construction details; and

(7) type of each regulated substance stored.

(b) Voluntary registration of each nonregulated UST shall not bring the owner or operator under the mandatory provisions of the Kansas storage tank act, K.S.A. 65-34,101 et seq. and amendments thereto. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-19. General operating requirements. (a) The provisions of 40 C.F.R. 280.30, 280.31, 280.32, 280.33, and 280.34, dated July 1, 2015, as amended by 80 fed. reg. 41630-41632 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes to the sections specified:

(1) In 280.31(b)(1), "or according to another reasonable time frame established by the implementing agency" shall be deleted.

(2) In 280.31(c), the cathodic protection inspection date of "every 60 days" shall be replaced with an inspection date of "every 30 days."

(3) In 280.32(b)(2), "in writing" shall be added after "Use another option determined by the implementing agency."

(4) In 280.33(b), "may" shall be replaced with "shall."

(5) In 280.33(c), the second sentence shall be replaced with the following: "Non-corrodible pipes and fittings shall be replaced or repaired in accordance with the manufacturer's specifications."

(6) In 280.33(d), "in writing" shall be added after "or according to requirements established by the implementing agency."

(7) In 280.33(d)(3), "in writing" shall be added after "determined by the implementing agency."

(8)(A) In 280.34, “Section 9005 of Subtitle I of the Solid Waste Disposal Act, as amended” shall be replaced with “K.S.A. 65-34,108, as amended.”

(B) In 280.34(b), the following changes shall be made:

(i) The word “and” shall be deleted from the end of paragraph (b)(8).

(ii) The period at the end of paragraph (b)(9) shall be replaced with “; and”.

(iii) The following paragraph shall be added after paragraph (b)(9):

“(10) The drop tickets for the preceding 12 months.”

(b) The provisions of 40 C.F.R. 280.35 and 280.36, published at 80 fed. reg. 41632-41633 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes to the sections specified:

(1) In 280.35(a)(1)(ii)(C), “in writing” shall be added after “requirements determined by the implementing agency.”

(2) In 280.36(a)(3), “in writing” shall be added after “developed by the implementing agency.”

(c) The general operating requirements shall be those specified in the department’s “Kansas storage tank program document,” as adopted in K.A.R. 28-44-15. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-20. Underground storage tank contractor licensing. (a) Each person installing, removing, or testing a UST or UST system shall be licensed in Kansas.

(b) Each person applying for a new UST contractor license shall submit the following to the department:

(1) A completed application on a form provided by the department; and

(2) a nonrefundable licensing fee of \$200.00 for a license effective for two years from the initial licensing date.

(c) Upon completion of the initial two years of licensure, each applicant for renewal of a UST contractor license shall submit the following to the department:

(1) A completed application on a form provided by the department; and

(2) a nonrefundable annual renewal fee of \$100.00. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-21. Underground storage tank installer and remover licensing. (a) Any individual may apply for one or a combination of licenses. The requirements for an installer license and a remover license shall be those specified in the department’s “Kansas storage tank program document,” as adopted in K.A.R. 28-44-15.

(b)(1) For each initial license, each applicant shall submit a nonrefundable license fee of \$100.00. Each initial license shall be effective for two years from the initial licensing date.

(2) For license renewal, each individual shall submit a nonrefundable annual renewal fee of \$50.00 for the 12-month period beginning on the effective date of each renewal license. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-22. Underground storage tank tester licensing. (a) No individual shall test a UST system unless that individual is licensed as required by this regulation. The requirements for a tester license shall be those specified in the department’s “Kansas storage tank program document,” as adopted in K.A.R. 28-44-15.

(b) Each individual who applies for any kind of tester license shall submit the following to the department:

(1) For each initial license, a nonrefundable licensing fee of \$100.00 for each license effective for two years from the initial licensing date; and

(2) for each license renewal, a nonrefundable annual renewal fee of \$50.00. The fee shall cover a 12-month period beginning on the effective date of the renewal of each license.

(c) Any license application may be denied or any license issued may be suspended or revoked for any UST or UST system tester license pursuant to these regulations if the applicant or licensee meets any of the following conditions:

(1) Has fraudulently or deceptively obtained or attempted to obtain a license;

(2) has failed at any time to meet the qualifications for a license or comply with any provision or requirement of these regulations; or

(3) has failed to submit to the department a copy of each UST or UST system test performed on a regulated tank in the state of Kansas. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-23. Release detection. The provisions of 40 C.F.R. 280.40, 280.41, 280.42, 280.43,

280.44, and 280.45, dated July 1, 2015, as amended by 80 fed. reg. 41633-41636 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes:

(a) In 40 C.F.R. 280.40(a)(3), “in writing” shall be added after “or requirements determined by the implementing agency.”

(b) In 40 C.F.R. 280.41, paragraph (a)(1)(i) shall be deleted.

(c) The following paragraph shall be added after 40 C.F.R. 280.43(a)(6):

“(7) Each standby generator tank of any size and each waste oil UST with a capacity of 2,000 gallons or less shall be exempt from the inventory control requirements of this section.”

(d) In 40 C.F.R. 280.43(b)(5), “may not” shall be replaced with “shall not.”

(e) The following paragraph shall be added after 40 C.F.R. 280.43(e)(7):

“(8) The provisions of 40 C.F.R. 280.43(e) shall apply only to field-constructed tanks and airport hydrant fuel distribution systems. Each owner or operator previously approved for vapor monitoring for other USTs governed by these regulations shall use an approved release detection method beginning not later than October 13, 2021.”

(f) In 40 C.F.R. 280.43, paragraph (f) shall be deleted.

(g) In 40 C.F.R. 280.43, paragraph (i)(2) shall be replaced with the following:

“(i)(2) If another method is proposed, the owner and operator shall demonstrate that the method can detect a release as effectively as any of the methods allowed in paragraphs (c) through (h) of this section. The owner and operator shall provide information to be reviewed by the department concerning the size of release that the method can detect and the frequency and reliability with which it can be detected. The owner and operator shall comply with any approval conditions to ensure the protection of human health and the environment.”

(h) Each occurrence of the following phrases shall be deleted:

(1) “, or for another reasonable period of time determined by the implementing agency”; and

(2) “, or for another reasonable time period determined by the implementing agency.” (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-24. Release reporting, investigation, and confirmation. The provisions of 40 C.F.R. 280.50, 280.51, 280.52, and 280.53, dated

July 1, 2015, as amended by 80 fed. reg. 41636-41637 (2015) and effective on October 13, 2015, are hereby adopted by reference with the following changes:

(a) Each occurrence of the following phrases shall be deleted:

(1) “, or another reasonable period specified by the implementing agency”;

(2) “, or another reasonable time period specified by the implementing agency”;

(3) “, or another reasonable time period established by the implementing agency”; and

(4) “, or another reasonable amount specified by the implementing agency.”

(b) In 40 C.F.R. 280.51, “in writing” shall be added after “When required by the implementing agency.”

(c) In 40 C.F.R. 280.52, “in writing” shall be added after “or another procedure approved by the implementing agency.” (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-25. Release response and corrective action for UST systems. The provisions of 40 C.F.R. 280.60, 280.61, 280.62, 280.63, 280.64, 280.65, 280.66, and 280.67, dated July 1, 2015, as amended by 80 fed. reg. 41637-41639 (2015) and effective on October 13, 2015, are hereby adopted by reference with the following changes:

(a) The phrase “in writing” shall be added after each occurrence of the phrase “unless directed to do otherwise by the implementing agency.”

(b) Each occurrence of the following phrases shall be deleted:

(1) “or within another reasonable period of time determined by the implementing agency”;

(2) “, or within another reasonable period of time determined by the implementing agency.”; and

(3) “or another reasonable period of time determined by the implementing agency.”

(c) In 40 C.F.R. 280.63(b), “in writing” shall be added after “or in a format and according to the schedule required by the implementing agency.”

(d) In 40 C.F.R. 280.64, “in writing” shall be added after “to the maximum extent practicable as determined by the implementing agency.”

(e)(1) In 40 C.F.R. 280.65(a)(4), “in writing” shall be added after “The implementing agency requests an investigation.”

(2) In 40 C.F.R. 280.65(b), “in writing” shall be added after “or in accordance with a schedule established by the implementing agency.”

(f)(1) In 40 C.F.R. 280.66(a), “in writing” shall be added after “according to a schedule and format established by the implementing agency” and after “as determined by the implementing agency.”

(2) In 40 C.F.R. 280.66, paragraph (b) shall be replaced with the following paragraph:

“(b) Owners and operators shall not begin implementation of the corrective action plan until the department has determined that implementation of the plan would adequately protect human health, safety, and the environment. The following factors shall be considered in making this determination:”.

(3) In 40 C.F.R. 280.66(c), “in writing” shall be added after “or as directed by the implementing agency” and after “in accordance with a schedule and in a format established by the implementing agency.”

(4) In 40 C.F.R. 280.66(d)(2), “in writing” shall be added after “conditions imposed by the implementing agency.”

(g)(1) In 40 C.F.R. 280.67(a), the first sentence shall be replaced with the following sentence: “For each confirmed release that requires a corrective action plan, public notice provided by the department shall be designed to reach those members directly affected by the release and the planned corrective action.”

(2) In 40 C.F.R. 280.67, paragraph (b) shall be replaced with the following paragraph:

“(b) Site release information and decisions concerning the corrective action plan shall be made available to the public for inspection upon request to the department.”

(3) In 40 C.F.R. 280.67, paragraph (d) shall be replaced with the following paragraph:

“(d) If an approved corrective action plan implemented by the party or parties performing corrective action does not achieve the established cleanup levels in the plan and termination of that plan is under consideration by the department, the public shall receive notice in compliance with paragraph (a) of this section.” (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-26. Out-of-service UST systems and closure. (a) The provisions of 40 C.F.R. 280.70, 280.71, 280.72, 280.73, and 280.74, dated July 1, 2015, as amended by 80 fed. reg. 41639-41640 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes:

(1) The phrase “in writing” shall be added after each occurrence of “in a manner approved by the implementing agency” and “when directed by the implementing agency.”

(2) In 40 C.F.R. 280.70(c), “in writing” shall be added after “unless the implementing agency provides.”

(3)(A) In 40 C.F.R. 280.71(a), “or within another reasonable time period determined by the implementing agency” shall be deleted.

(B) In 40 C.F.R. 280.71(b), “in writing” shall be added after “or closed in place in a manner approved by the implementing agency.”

(C) The following sentence shall be added at the end of 40 C.F.R. 280.71(b): “Within 15 days of permanent closure, each owner or operator shall ensure that each contractor submits the completed permanent tank abandonment form to the department.”

(4) In 40 C.F.R. 280.72(a), the third sentence shall be deleted.

(5) In 40 C.F.R. 280.73, “based on the totality of the circumstances” shall be added after “in the judgment of the implementing agency.”

(b) The results of each site assessment shall be prepared and signed by an individual qualified to perform a site assessment in accordance with standard industry practices and the applicable requirements of the state board of technical professions. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-27. Financial responsibility. The provisions of 40 C.F.R. 280.90, 280.91, 280.93 through 280.99, and 280.102 through 280.115, dated July 1, 2015, as amended by 80 fed. reg. 41640, 41641-41648, and 41649-41662 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes to the sections specified:

(a) In 280.94(b), “Attorney(s) General of the state(s) in which the tanks are located” shall be replaced with “State Attorney General or attorneys within the department reviewing guarantees or surety bonds as Special Assistant Attorney(s) General.”

(b)(1) In 280.95, the first sentence in paragraph (f) shall be replaced with the following sentence: “When directed by the secretary in writing, the owner or operator, and/or guarantor shall submit reports of financial condition.”

(2) In 280.95(g), “written” shall be added before “notification by the Director of the implementing agency.”

(c)(1) In 280.96(b), “in writing” shall be added after “If the Director of the implementing agency notifies the guarantor.”

(2) In 280.96(d), “written” shall be added before “instructions from the Director of the implementing agency.”

(d)(1) In 280.97(b)(1), “in writing” shall be added after each occurrence of “Whenever requested by [a Director of an implementing agency].”

(2) In 280.97, paragraph (c) shall be replaced with the following paragraph:

“(c) Each insurance endorsement or certificate language shall be worded with the language specified in paragraph (b) of this subsection or shall be amended to evidence the coverage of corrective action by the underground petroleum storage tank release trust fund by submitting a statement of eligibility in accordance with K.S.A. 65-34,115, and amendments thereto. Amendments shall reflect the standards specified in K.S.A. 65-34,114, and amendments thereto.”

(e)(1) In 280.98(b), in the fourth paragraph of the “Performance Bond,” “written” shall be added after “the Director of the state implementing agency’s.”

(2) In 280.98(b), in the third and fourth paragraphs under subsection (e) of the “Performance Bond,” “written” shall be added before “notification” and “instructions.”

(3) In 280.98(d), “written” shall be added before “instructions.”

(f)(1) In 280.99(b) in the “Irrevocable Standby Letter of Credit,” “may not” shall be replaced with “shall not.”

(2) In 280.99(c), “written” shall be added before “instructions.”

(g) In 280.102, paragraph (f) shall be replaced with the following paragraph:

“(f) Within 60 days after receiving a request from the owner or operator for release of funds as specified in paragraph (d) or (e) of this section, the trustee shall release funds to the owner or operator as instructed by the secretary in writing.”

(h)(1) In 280.103(b)(1) in the paragraph immediately following the title “Section 3. Establishment of Fund,” “written” shall be added before “instruction.”

(2) In 280.103(b)(1), “Section 4. Payment for [‘Corrective Action’ and/or ‘Third-Party Liability Claims’],” the first indented sentence shall be replaced with the following sentence: “The Trustee shall make payments from the fund as directed by [the Director of the implementing agency].”

(3) In 280.103(b)(1) in the second sentence following the title “Section 4. Payment for [‘Corrective Action’ and/or ‘Third-Party Liability Claims’],” “may not” shall be replaced with “shall not.”

(4) In 280.103, paragraph (c) shall be replaced with the following paragraph:

“(c) When instructed by the secretary in writing, the trustee shall refund the balance of the standby trust fund to the provider of financial assurance if the secretary determines that no additional corrective action costs or third-party liability claims will occur as a result of a release covered by the financial assurance mechanism for which the standby trust fund was established.”

(i)(1) In 280.104(a) in the third sentence, “may not” shall be replaced with “shall not.”

(2) In 280.104(f), the first sentence shall be replaced with the following sentence: “When directed by the secretary in writing, the local government owner or operator, or local government guarantor shall submit reports of financial condition.”

(3) In 280.104(h), “written” shall be added after “within 30 days of.”

(j)(1) In 280.105(e), the first sentence shall be replaced with the following sentence: “When directed by the secretary in writing, the local government owner or operator shall submit reports of financial condition.”

(2) In 280.105(f), “written” shall be added after “within 30 days of.”

(k)(1) In 280.106(c)(1) and (c)(2), “in writing” shall be added after “as directed by the Director of the implementing agency.”

(2) In 280.106(d), each occurrence of “upon instructions” shall be replaced with “upon written instructions.”

(l)(1) In 280.107 in the first paragraph, the text “may not” shall be replaced with “shall not.”

(2) In 280.107(b) in the last sentence, “may not” shall be replaced with “shall not.”

(m)(1) In 280.109(a)(1), “may not” shall be replaced with “shall not.”

(2) In 280.109(a)(2), each occurrence of “may not” shall be replaced with “shall not.”

(n) In 280.110, paragraph (c) shall be replaced with the following paragraph:

“(c) When directed by the secretary, the owner or operator shall submit evidence of financial assurance as described in 40 C.F.R. 280.111(b) or other compliance information relevant to this subpart.”

(o)(1) In 280.112, paragraph (a) shall be replaced with the following paragraph:

“(a) Except as specified in paragraph (d) of this section, the guarantor, surety, or institution issuing a letter of credit shall place the amount of funds stipulated by the secretary in writing, up to the limit of funds provided by the financial assurance mechanism, into the standby trust if:”.

(2) In 280.112(b), the first sentence shall be replaced with the following: “A standby trust may be drawn on by the secretary when:”.

(3) In 280.112(c), the second sentence shall be replaced with the following sentence: “Third party liability claims shall be paid in the order in which the secretary receives certifications under paragraph (b)(2)(i) of this section and valid court orders under paragraph (b)(2)(ii) of this section.”

(4) In 280.112(d), “in writing” shall be added after “as directed by the Director.”

(p) In 280.113, “is no longer required” shall be replaced with “shall no longer be required.”

(q) In 280.115(a) in the first sentence, “written” shall be added before “instruction.” (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 26, 1990; amended July 6, 2020.)

28-44-28. (Authorized by and implementing K.S.A. 65-34,105; effective Nov. 22, 1993; revoked July 6, 2020.)

28-44-29. Aboveground storage tank operating permit. (a) Before an operating permit for an aboveground storage tank may be obtained or renewed, each owner shall comply with the following requirements:

(1) Each aboveground storage tank shall be registered with the department pursuant to K.S.A. 65-34,104, and amendments thereto. The registration application shall be submitted on forms provided by the department and shall include the following information:

(A) Owner’s name, address, and telephone number;

(B) facility address or location;

(C) tank status;

(D) tank age;

(E) tank capacity;

(F) storage tank construction details; and

(G) type of regulated substance stored.

(2) Each owner or operator shall pay to the department a nonrefundable annual registration fee of \$10.00 for each aboveground storage tank before December 31 of each year.

(3) A penalty fee of \$50.00 shall be charged for each tank if the owner or operator does not submit the required fees before December 31 of each year.

(b) A regulated substance shall not be placed in an aboveground storage tank unless a valid operating permit is displayed at the facility and is visible to the public. (Authorized by and implementing K.S.A. 65-34,105 and 65-34,106; effective Nov. 22, 1993; amended July 6, 2020.)

28-44-30. Operator training and requirements. (a) The provisions of 40 C.F.R. 280.240, 280.241, 280.242, 280.243, 280.244, and 280.245, published at 80 fed. reg. 41666-41667 (2015) and effective on October 13, 2015, are hereby adopted by reference with the following changes to the sections specified:

(1) In 280.242, the following changes shall be made:

(A) In the second sentence, “or comparable examination” shall be deleted.

(B) In paragraph (a), the following text shall be deleted: “either” and “or pass a comparable examination in accordance with paragraph (e) of this section.”

(C) After paragraph (a)(2), the following text shall be added:

“Each class A operator of a facility or group of facilities shall reside or be stationed within four hours of each managed facility to respond to emergencies as needed.”

(D) In paragraph (b), the following text shall be deleted: “either” and “or pass a comparable examination, in accordance with paragraph (e) of this section.”

(E) In paragraph (c), the first sentence shall be replaced with the following sentence: “Each designated Class C operator shall be trained by a Class A or Class B operator in accordance with paragraphs (c)(1) and (2) of this section and complete a training program in accordance with paragraphs (c)(1) and (2) of this section.”

(F) Paragraph (e) shall be deleted.

(2) In the first sentence of 280.244, “in writing” shall be added after “determined by the implementing agency.”

(b) Each class A operator, each class B operator, and each class C operator shall complete the training and testing required in the department’s “Kansas storage tank program document,” as adopted in K.A.R. 28-44-15. (Authorized by and implementing K.S.A. 65-34,105; effective July 6, 2020.)

28-44-31. UST systems with field-constructed tanks and airport hydrant fuel distribution systems. The provisions of 40 C.F.R. 280.251 and 280.252, published at 80 fed. reg. 41667-41669 (2015) and effective on October 13, 2015, are hereby adopted by reference, with the following changes to the sections specified:

(a) In 280.251, paragraph (b) shall be replaced with the following paragraphs:

“(b)(1) Each owner of an existing, out-of-service UST system with field-constructed tanks (FCTs) and airport hydrant fuel distribution systems (AHFDSs) shall submit to the department a one-time registration of UST system existence on a form provided by the department. This form shall be submitted to the department not later than 60 days after the effective date of these regulations, or upon discovery.

“(2) Each owner or operator of an active, in use UST system with FCTs and AHFDSs shall comply with the registration notification and operating permit requirements specified in K.A.R. 28-44-17. Each owner or operator of these UST systems shall demonstrate financial responsibility as required by K.A.R. 28-44-27 at the time of submission of the registration notification form.”

(b)(1) In 280.252(b)(1)(ii)(B), “in writing” shall be added after “another method determined by the implementing agency.”

(2) In 280.252(d)(1) and (d)(2), “in writing” shall be added after “approved by the implementing agency.”

(3) In 280.252(d)(1)(vi), the last sentence shall be replaced with the following sentence: “The owner and operator shall submit data showing the size of release that the method can detect, and the frequency and reliability of detection for the department’s consideration.”

(4) In 280.252(d)(2)(i)(B), the table titled “Phase In For Piping Segments \geq 100,000 Gallons In Volume” shall be replaced with the list titled “Phase-in testing for piping segments greater than or equal to 100,000 gallons in volume” on page 8 of the department’s “Kansas storage tank program document,” as adopted in K.A.R. 28-44-15.

(5) In 280.252(d)(2)(iv), the last sentence shall be replaced with the following sentence: “The owner and operator shall provide information to be reviewed by the department concerning the size of release that the method can detect and the frequency and reliability with which it can be detected.”

(6) In 280.252(e), the following changes shall be made:

(A) The phrase “in writing” shall be added after “When directed by the implementing agency.”

(B) The phrase “based on the totality of the circumstances” shall be added after “in the judgment of the implementing agency.” (Authorized by and implementing K.S.A. 65-34,105; effective July 6, 2020.)

Article 45.—UNDERGROUND HYDROCARBON STORAGE WELLS AND ASSOCIATED BRINE PONDS

28-45-1. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked May 1, 1984.)

28-45-2. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1981; amended May 1, 1984; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-2a. Definitions. (a) “Active well” means an unplugged well that is in service or in monitoring status.

(b) “Applicant” means the operator and the owner requesting a permit as specified in this article of regulations. If the operator and the owner are not the same person, the owner and the operator shall jointly submit an application for a permit.

(c) “Brine” means saline water with a sodium chloride concentration equal to or greater than 90 percent.

(d) “Brine pond” means the excavated or diked structure used for the surface containment of brine used in the creation, maintenance, and operation of an underground hydrocarbon storage well.

(e) “Cavern” and “storage cavern” mean the storage space created in a salt formation by solution mining.

(f) “Department” means the Kansas department of health and environment.

(g) “Director” means the director of the division of environment of the Kansas department of health and environment.

(h) “Draft permit” means a document that is pending approval by the secretary to be issued as a final permit.

(i) “Existing storage well” means a well authorized or permitted by the secretary before April 1, 2003.

(j) “Existing brine pond” means a brine pond authorized or permitted by the secretary before April 1, 2003.

(k) “Fracture gradient” means the pressure gradient, measured in pounds per square inch per foot, that will cause the geological formations to physically fracture.

(l) “Freshwater” means water containing not more than 1,000 milligrams per liter of total dissolved solids.

(m) “Hydrocarbon storage well,” “underground hydrocarbon storage well,” and “storage well” mean a well used for the injection or withdrawal of hydrocarbon or liquified petroleum gas into or out of an underground hydrocarbon storage cavern.

(n) “Licensed geologist” means a geologist licensed to practice geology in Kansas by the Kansas board of technical professions.

(o) “Licensed professional engineer” means a professional engineer licensed to practice engineering in Kansas by the Kansas board of technical professions.

(p) “Licensed professional land surveyor” means a professional land surveyor licensed to practice land surveying in Kansas by the Kansas board of technical professions.

(q) “Liner” means the casing normally installed within the production casing.

(r) “Liquified petroleum gas” and “LPG” mean by-products or derivatives of oil and gas, including propane, butane, isobutane, and ethane, maintained in a liquid state under pressure.

(s) “Maximum allowable operating pressure” means the maximum pressure authorized by the department and measured at the product side of the wellhead.

(t) “Maximum allowable synthetic membrane liner leakage rate” means a monitored or a calculated leakage rate of 10 percent of the collection and leak return system capacity.

(u) “Maximum operating pressure” means the maximum pressure monitored during a 24-hour period and measured at the product side of the wellhead.

(v) “Monitoring status” means temporary status for a well that has been placed out of service by removing the product and filling the cavern with brine.

(w) “Municipal population center” means an incorporated city.

(x) “Natural gas” means the gaseous form of hydrocarbon consisting primarily of methane.

(y) “Operator” means the person recognized by the secretary as being responsible for the physical operation of an underground hydrocarbon storage facility or a brine pond.

(z) “Owner” means the person owning all or part of any underground hydrocarbon storage facility or brine pond.

(aa) “Permit” means an authorization, license, or equivalent control document issued to the owner and the operator by the secretary.

(bb) “Permit holder,” “holder of a permit,” and “permittee” mean the owner and the operator issued a permit, as defined in this regulation, by the secretary.

(cc) “Person” means any individual, company, corporation, institution, association, partnership, municipality, township, and local, state, or federal agency.

(dd) “Porosity storage” and “underground porosity storage” mean the storage of hydrocarbon gas in underground porous and permeable strata that have been converted to hydrocarbon gas storage.

(ee) “Pressure gradient” means the ratio of pressure per unit depth expressed as pounds per square inch per foot of depth.

(ff) “Product” means any hydrocarbon, including products and by-products from crude oil, derivatives of oil and gas, and liquefied petroleum gas.

(gg) “Saturated brine” means saline water with a sodium chloride concentration that is equal to or greater than 90 percent.

(hh) “Secretary” means the secretary of the department of health and environment.

(ii) “Solutioning” means the process of injecting fluid into a well to dissolve salt or any other readily soluble rock or mineral.

(jj) “Supervisory control and data acquisition” means an automated surveillance system in which the monitoring and control of storage activities are accomplished at a central or remote location.

(kk) “Underground hydrocarbon storage cavern” means the storage of any hydrocarbon, including liquid petroleum gas and excluding natural gas, in caverns formed by solutioning in bedded salt.

(ll) “Underground hydrocarbon storage facility” and “facility” mean the acreage associated with the storage field with facility boundaries approved by the secretary. This term shall include the brine ponds, wells, wellbore tubular goods, the wellhead, and any related equipment, including any appurtenances associated with the well field.

(mm) “Unsaturated brine” means saline water with a sodium chloride concentration less than 90 percent.

(nn) "Usable water formation" means an aquifer or any portion of the aquifer that meets any of the following criteria:

- (1) Supplies any public water system;
- (2) contains a supply of groundwater that is sufficient to supply a public water system and that currently supplies drinking water for human consumption; or
- (3) contains fewer than 10,000 mg/L total dissolved solids and is not an exempted aquifer.

(oo) "Variance" means the secretary's written approval authorizing an alternative action to the requirements of these regulations or the standards adopted by these regulations and incorporated into the temporary or final permit. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d and K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-3. (Authorized by and implementing K.S.A. 65-171d; effective, May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-3a. Permit required. (a) No person shall create, operate, or maintain an underground storage well for liquified petroleum gas or hydrocarbon in bedded salt without obtaining a permit from the secretary. The requirements for permit issuance shall be as follows:

(1) Each operator and owner of an existing underground hydrocarbon storage facility shall initially obtain a temporary facility permit as specified in K.A.R. 28-45-5a.

(2) Each operator and owner of an existing underground storage well shall obtain a final permit as specified in K.A.R. 28-45-6a.

(3) The existing permit or authorization for the underground hydrocarbon storage facility shall remain in effect until a temporary facility permit is issued.

(4) The storage of liquified hydrocarbons in caverns constructed in any rock formations other than bedded salt shall be prohibited.

(b) A variance may be granted by the secretary if both of the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The applicant or permittee agrees to perform any additional testing, monitoring, or well improvements, or any combination, if required by the secretary.

(c) Each applicant or permittee seeking a variance shall submit a written request, including

justification for the variance and any supporting data, to the secretary for review and consideration for approval. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-4. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-4a. Well conversions and reentry.

(a) The conversion of an existing well to underground hydrocarbon storage shall be prohibited if the well was not originally designed for hydrocarbon storage, unless the secretary determines that the conversion is protective of public health, safety, and the environment.

(b) The conversion of an underground hydrocarbon storage well for other purposes shall be prohibited, unless the secretary determines that the conversion is protective of public health, safety, and the environment.

(c) The reentry of a plugged liquified petroleum gas or hydrocarbon storage well for the purpose of reactivating activities associated with the underground storage of natural gas, liquified petroleum gas, or liquid hydrocarbons shall be prohibited.

(d) A permittee may convert an unplugged underground hydrocarbon storage well to monitoring status if the following requirements are met:

(1) Each permittee shall verify the integrity of the storage well and cavern by conducting a mechanical integrity test before converting the well to monitoring status.

(2) Each permittee shall run a gamma-density log to verify the roof thickness prior to converting the well to monitoring status.

(3) Each permittee shall meet the requirements specified in the department's document titled "procedure for converting a hydrocarbon storage well to monitoring status, procedure #:UICLPG-4," dated June 2003, which is hereby adopted by reference.

(4) Each permittee of an underground storage cavern that is in monitoring status shall conduct a casing inspection evaluation before placing the cavern into service if a casing evaluation has not been conducted in the last five years. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-5. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-5a. Temporary facility permit. (a)

Each operator and owner of an existing underground hydrocarbon storage facility shall be required to have a temporary facility permit issued by the secretary.

(b) The temporary facility permit shall supersede any authorization or permit previously issued by the secretary.

(c) Each temporary facility permit application shall include the following information:

(1) The name and location of the facility;

(2) a site map of the facility showing the following:

(A) The facility boundaries and the location and well number of each well, including storage, observation, disposal, and any abandoned wells; and

(B) the location of buildings, roads, railways, right-of-ways, utilities, and any other appurtenances;

(3) the following information for each cavern:

(A) The depth of the top of the salt formation;

(B) the depth of the top of the underground storage cavern;

(C) the total depth of the underground storage cavern;

(D) a schematic of the well construction;

(E) the storage capacity;

(F) the type of product stored;

(G) the operating pressures; and

(H) a list of dates on which the required tests, logs, or monitoring reports for each underground hydrocarbon storage well were completed; and

(4) a list of requests for variances from the requirements of this article of regulations.

(d) Each applicant shall submit a compliance schedule with the temporary facility permit application, subject to the approval of the secretary, for conducting sonar surveys, integrity tests, and casing evaluations and for the installation of equipment. The compliance schedule shall be incorporated into the permit and may be modified as specified in K.A.R. 28-45-8a. The following requirements shall apply:

(1) The modification or installation of equipment associated with the wellhead, storage well, storage well system, or storage cavern shall be completed within five years after April 1, 2003 for existing underground hydrocarbon storage wells.

(2) A sonar survey shall be conducted for each underground hydrocarbon storage cavern. The following requirements shall apply:

(A) A sonar survey shall be conducted within five years after April 1, 2003 for any underground

hydrocarbon storage cavern that does not have a sonar survey or that had a sonar survey conducted before January 1, 1998.

(B) A sonar survey shall be conducted within 10 years after April 1, 2003 for any underground hydrocarbon storage cavern that had a sonar survey conducted on or after January 1, 1998.

(3) A mechanical integrity test and a casing inspection evaluation for each underground hydrocarbon storage well shall initially be conducted within seven years after April 1, 2003.

(e) Each temporary permittee for an underground hydrocarbon storage facility either shall be required to have a final permit for each underground hydrocarbon storage well within five years after April 1, 2003 or shall cease well operations and shall comply with abandonment and plugging requirements as specified in K.A.R. 28-45-20. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-6. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1981; amended May 1, 1984; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-6a. Final permit. (a) Each applicant shall submit a completed application for a final permit for each existing underground hydrocarbon storage well to the secretary, on a form furnished by the department, within three years after April 1, 2003.

(b) Each applicant who wishes to construct an underground hydrocarbon storage well shall submit a completed application to the secretary, on a form furnished by the department, at least 180 days before the proposed commencement date for the construction of the new underground hydrocarbon storage well. Well construction shall not begin until the secretary has issued the final permit.

(c) Upon review of each application, one of the following shall be issued by the secretary:

(1) A final permit, if the application is approved; or

(2) a notice that the final permit has been denied if the applicant has not complied with the requirements of this article of regulations. The notice shall include justification for the permit denial.

(d) Each temporary permit shall terminate on the effective date of the final permit.

(e) Each application for a final permit shall include a report prepared by a licensed geologist and shall include the following:

(1) An evaluation of the geology and hydrogeology, including cross-sections, isopach and structure maps of the salt formation, and water-level or potentiometric maps;

(2) a regional stratigraphic evaluation;

(3) local and regional structural analyses, including maps, cross-sections, and available geophysical data;

(4) a flood assessment identifying floodplain and flood-prone areas, including the following:

(A) Flood response procedures; and

(B) design criteria for the well and facility equipment; and

(5) an assessment of the potential for ground subsidence.

(f) Each applicant shall submit the following information with the application:

(1) A plan view map showing locations of all water, solution-mining, monitoring, disposal, injection, oil, and gas wells within a one-mile perimeter of the facility's boundary; and

(2) a plan view map of man-made surface structures and activities within a one-mile perimeter of the facility's boundary.

(g) Each permittee of an underground storage well shall submit a compliance audit every 10 years, on a form furnished by the department, for review and consideration for approval for the continued operation of the underground hydrocarbon storage well.

(h) Each permittee shall submit a sample log of well cuttings from any new well drilled at the facility, including new underground hydrocarbon storage wells, monitoring wells, and stratigraphic test holes.

(1) Cuttings shall be collected at 10-foot intervals from surface to total well depth or at an interval approved by the department.

(2) Well cuttings shall be collected, described and logged as specified in the department's document titled "procedure for sample logging, procedure #: UICLPG-9," dated July 2002, which is hereby adopted by reference.

(3) The collection of cuttings shall be supervised by a licensed geologist or a licensed geologist's designee.

(4) The description and logging of the sample cuttings shall be performed by a licensed geologist.

(5) Each permittee shall submit a sample log and a dry sample set to the department within 45 days after the completion of the well.

(i) Each permittee shall provide a minimum of one core from each facility. The following provisions shall apply:

(1) Each permittee shall submit a plan describing the coring interval, coring procedures, and core testing to the secretary for review and consideration for approval, at least 60 days before the coring event.

(2) Each permittee shall make the core available for inspection upon request by the secretary.

(3) Any permittee may submit existing core data if the secretary determines that the core is representative of the geology of the area.

(j) Each permittee shall submit a water analysis for any water-bearing formation encountered in drilling a new monitoring well. The water shall be analyzed for the following parameters:

(1) Chloride;

(2) total dissolved solids; and

(3) any parameter that the secretary determines could pose a potential threat to public health, safety, and the environment.

(k) Each permittee shall ensure that the stored hydrocarbons, formation water, lithology, and substances used in the solutioning of the storage caverns are compatible.

(l) Each permittee shall submit open-hole logs for any new underground hydrocarbon storage well. The logging interval shall be from the surface to 100 feet below the top of the salt section. At a minimum, the following logs shall be run:

(1) A gamma ray log;

(2) a neutron log if the source is registered in Kansas, or a sonic log;

(3) a density log; and

(4) a caliper log.

(m) Any permittee may use an alternative log if the secretary determines that the alternative log is substantially equivalent to one of the logs specified in subsection (l). The permittee shall submit the following information:

(1) A description of the log and the theory of operation for that log;

(2) a description of the field conditions under which the log can be used;

(3) the procedure for interpreting the log; and

(4) an interpretation of the log upon completion of the logging event.

(n) Each permittee of a new underground hydrocarbon storage cavern shall maintain a minimum salt roof thickness of 100 feet above the washed storage cavern.

(o) Each permittee of an existing underground

hydrocarbon storage cavern with a salt roof thickness greater than 50 feet but less than 100 feet shall meet the following provisions:

(1) Each permittee shall use only saturated brine to displace product.

(2) The permittee shall submit a schedule for monitoring brine salinity.

(3) The salt roof thickness shall be monitored with gamma ray and density logs, or any other log specified in subsection (m), every three years.

(4) Additional information, including a geomechanical study from core analysis, may be requested by the secretary to verify the integrity of the salt roof.

(p) Underground hydrocarbon storage caverns with a salt roof thickness of 50 feet or less shall be prohibited.

(q) Underground communication between underground hydrocarbon storage caverns in the upper 50 feet of the salt formation shall be prohibited.

(r) Underground communication between underground hydrocarbon storage caverns below the upper 50 feet of the salt formation shall be prohibited, unless the secretary determines that the communication is protective of public health, safety, and the environment. The permittee shall submit the following:

(1) A sonar survey for each cavern that is in communication with another cavern; and

(2) a plan describing the monitoring and testing that the permittee will conduct to ensure that the integrity of the underground hydrocarbon storage wells and caverns will be maintained.

(s) The horizontal distance separating new underground hydrocarbon storage caverns shall be at least 100 feet between cavern boundaries.

(t) Any existing underground hydrocarbon storage cavern with horizontal separation less than 100 feet may operate if the following requirements are met:

(1) Each permittee shall submit a justification for each existing underground hydrocarbon storage cavern with horizontal separation less than 100 feet. The following requirements shall apply:

(A) The justification shall include spacing-to-diameter ratios, cavern pressure differentials, and analyses of cavern shape, size, and depth.

(B) The horizontal spacing shall be reevaluated every five years.

(2) Horizontal spacing of less than 50 feet between caverns shall be prohibited.

(u) The maximum horizontal diameter of each cavern shall not exceed 300 feet.

(v) Each permittee shall ensure the integrity of the underground hydrocarbon storage wellhead, casing, and storage cavern before commissioning any new storage cavern into service. Storage operations may commence when the following requirements are met:

(1) Each permittee shall submit a notice of completion of construction on a form furnished by the department.

(2) Each new storage well shall be inspected by the secretary before storage operations commence. If the well fails the inspection, the permittee shall not commence storage operations. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-7. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-7a. Public notice. (a) Public notice shall be given by the secretary for any of the following permit actions:

(1) Any final permit application for an underground hydrocarbon storage well;

(2) any modifications that require a draft permit as specified in K.A.R. 28-45-8a;

(3) any modifications for an existing facility as specified in K.A.R. 28-45-8a;

(4) the denial of a permit; or

(5) a scheduled hearing.

(b) Public notice and, if applicable, a copy of the draft permit shall be mailed or electronically mailed by the department to the permit applicant.

(c) The public notice shall be mailed by the department to the following:

(1) Any person who submits a written request for placement on the mailing list;

(2) the official county newspaper of each county in which the lands affected by the application are located, for publication in at least two issues; and

(3) the Kansas register.

(d) The public notice shall include the following information:

(1) The name and address of the department processing the permit action for which the notice is being given;

(2) the name and address of the person or company seeking the permit;

(3) a brief description of the business conducted at the facility or the activity described in the permit application;

(4) the name, address, and telephone number of the departmental contact whom interested persons may contact for further information, including copies of the application, draft permit, or any other appropriate information;

(5) a brief description of the comment procedures for public notice; and

(6) a statement of the procedure to request a hearing and other procedures that allow public participation in the final permit decision.

(e) Any interested person may submit written comments to the secretary on any permit action during the 30-day public comment period. The following requirements shall apply:

(1) All comments shall be submitted by the close of the public comment period.

(2) All supporting materials submitted shall be included in full and shall not be incorporated by reference, unless the supporting materials are any of the following:

(A) Part of the administrative record in the same proceeding;

(B) state or federal statutes and regulations;

(C) state or environmental protection agency documents of general applicability; or

(D) other generally available reference materials.

(3) Commentators shall make supporting materials not already included in the administrative record available to the secretary.

(f) The response to all significant comments concerning any permit actions and the reasons for changing any provisions in the draft permit shall be issued when the final permit decision is issued.

(g) The response to comments shall be made available to the public upon request. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-8. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-8a. Modification and transfer of a temporary or a final permit. (a) The automatic transfer of a temporary or final permit shall be prohibited. The requirements for each permit transfer shall be as follows:

(1) Each person requesting a permit transfer shall submit a completed application to the secretary at least 60 days before the effective date of the proposed transfer.

(2) Each owner and each operator shall comply with the conditions of the existing permit until the secretary reissues the permit.

(b) Any temporary or final permit for an underground hydrocarbon storage well may be modified by the secretary under any of the following conditions:

(1) The secretary receives information that was not available when the permit was issued.

(2) The secretary receives a request for the modification of a permit.

(3) The secretary conducts a review of the permit file and determines that a modification is necessary.

(c) Only the permit actions subject to modification shall be reopened.

(d) Minor modifications that shall not require public notification include the following, except as otherwise specified:

(1) Correction of typographical errors;

(2) requirements for more frequent monitoring or reporting by the permittee;

(3) a date change in a schedule of compliance;

(4) a change in ownership or operational control of the facility, unless the secretary determines that public notification is necessary to protect the public interest;

(5) a change in construction requirements, if the secretary determines that the change is protective of public health, safety, and the environment; and

(6) any amendments to a facility plugging plan.

(e) A draft permit and notification to the public shall be required if any of the following conditions is met:

(1) A permittee proposes substantial alterations or additions to the facility or proposes an activity that justifies a change in the permit requirements, including cumulative effects on public health, safety, or the environment.

(2) Information has become available that would have initially justified different permit requirements.

(3) Standards of regulations on which the permit was based have changed due to the promulgation of new or amended standards or due to a judicial decision after the permit was issued.

(f) Any permittee may request a permit modification within 180 days after any of the following:

(1) The adoption of new regulations or standards;

(2) any deadline to achieve compliance with regulations or standards before the expiration date of the permit; or

(3) any judicial remand and stay of a promulgated regulation if the permit requirement was based on the remanded regulation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-9. (Authorized by K.S.A. 65-171d; implementing K.S.A. 65-171d; effective May 1, 1981; amended May 1, 1984; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-9a. Signatories for permit applications and reports. (a) Each permittee of an existing storage well and each applicant for a permit for a proposed storage well shall designate signatories to sign the permit applications and all reports required by the secretary.

(b) Positions that may be approved by the secretary to be signatories shall be the following:

- (1) Plant or operations manager;
- (2) cavern specialist;
- (3) superintendent; and

(4) a position with responsibility at least equivalent to that required by the positions listed in this subsection.

(c) Any signatory may submit written notification to the secretary specifying a position having responsibility for the overall operation of the regulated facility or activity to act as a designated signatory.

(d) Each signatory and each signatory's designee shall submit a signature statement, on a form furnished by the department, to the secretary with the temporary and the final permit applications. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-10. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1981; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-10a. Siting requirements for new underground hydrocarbon storage wells and facilities. (a) Each applicant shall assess the geographical, topographical, and physical data for any proposed underground hydrocarbon storage well location to determine whether siting requirements have been met. The following siting requirements shall be met:

(1) Each new underground storage facility shall be located at least three miles from the established boundaries of municipal population centers.

(2) Each proposed new facility or boundary ex-

pansion for an existing facility shall be located as follows:

(A) Not less than five miles from an active or abandoned conventional shaft mining operation; and

(B) not less than two miles from the facility's boundary of any solution mining operation.

(3) Each applicant shall assess the extent and nature of current or past conventional subsurface mining activities within five miles of the underground hydrocarbon storage facility's boundary to determine any potential impact to public health, safety, or the environment resulting from the proposed activities at the facility.

(4) Each applicant shall identify and assess all wells, including abandoned wells, from available sources of information, within a one-mile perimeter of the facility's boundary to determine if the following conditions exist:

(A) The wells have been constructed in a manner to protect public health, property, and the environment.

(B) The abandoned wells, including water, oil, gas, monitoring, and underground storage wells, have been properly plugged.

(b) Each applicant shall conduct a regional geological and evaluation to determine if the integrity of the proposed storage cavern will be adversely affected by either of the following:

(1) Salt thinning due to any stratigraphic change; or

(2) a dissolution zone in the bedded salt.

(c) Each applicant shall determine if the facility's location is in a floodplain or flood-prone area.

(d) No new underground hydrocarbon storage facility's boundary or the expansion of an existing facility's boundary shall be located less than one mile from any existing underground porosity storage facility.

(e) Each applicant shall identify potential risks to the storage operation from activities conducted at adjacent facilities.

(f) Each applicant shall identify all utilities having a right-of-way, including pipeline, railway, roadway, and electrical lines, and shall assess the potential impact of the utilities on the location or operation of the facility. If a facility is exposed and subject to hazards, including vehicular traffic, railroads, electrical power lines, and aircraft or shipping traffic, the facility shall be protected from accidental damage, by distance or barricades.

(g) No outer boundary of an underground hydrocarbon storage cavern shall be less than 100 feet from any of the following:

(1) The property boundary of any owners who have not consented to subsurface storage under their property;

(2) any existing surface structure not owned by the facility's owner; or

(3) any public transportation artery. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-11. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective, T-85-7, Feb. 15, 1984; effective May 1, 1984; amended May 1, 1985; revoked, T-28-4-1-03, April 1, 2003; revoked Aug. 8, 2003.)

28-45-11a. Financial assurance for underground hydrocarbon storage facility closure. (a) Each permittee of an underground hydrocarbon storage facility shall establish financial assurance for the following:

(1) Closure of the facility; and

(2) the plugging of any hydrocarbon storage well.

(b)(1) Each permittee of an existing underground hydrocarbon storage well shall submit proof of financial assurance to the secretary before April 1, 2004 and, thereafter, annually on or before January 31 of each year. Each applicant for a permit for a new underground hydrocarbon storage well shall submit proof of financial assurance with the final permit application and, thereafter, annually on or before January 31 of each year.

(2) Each permittee and each applicant shall meet the following requirements:

(A) Submit a detailed written estimate, in current dollars, of the cost to close all underground storage wells and storage caverns at the facility following the closure procedures specified in K.A.R. 28-45-20. The estimate shall be reviewed and approved by a licensed professional engineer or licensed geologist;

(B) prepare an estimate of the closure cost for all storage wells and storage caverns at the facility based on the cost charged by a third party to plug the underground storage wells; and

(C) increase the closure cost estimate and the amount of financial assurance provided if any change in the facility operation or closure plan increases the maximum cost of closure at any time.

(c) Each permittee shall provide continuous financial assurance coverage for closure until the secretary approves the facility closure.

(d) Each permittee shall comply with the provisions of the department's document titled "procedure for demonstrating financial assurance for an underground hydrocarbon storage well, procedure #: UICLPG-6," dated March 2003, which is hereby adopted by reference. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-12. Operations and maintenance plan. (a) Each permittee of an underground hydrocarbon storage facility shall submit a plan for the long-term operation and maintenance of the facility with the final permit application.

(b) Each operation and maintenance plan shall include the following information:

(1) A description of the methods to be used to prevent the overpressuring of wells and storage caverns;

(2) a plan view map of the location of any disposal wells and corrosion control wells; and

(3) the location, depth, and well construction for all shallow and deep groundwater monitoring and observation wells.

(c) Each permittee shall maintain at the facility and make available for inspection by the secretary the following information:

(1) A location map of all wells within the facility's boundaries and a listing of the global positioning system coordinates for each well;

(2) a schematic of the brine and product lines for each cavern; and

(3) a schematic of the gathering line system that connects all wells within the underground hydrocarbon storage facility to a central distribution point.

(d) Each permittee shall submit a plan for solutioning or washing any cavern to the secretary for review and consideration for approval. The plan shall include the following:

(1) A list of acceptable blanket pad materials;

(2) methods for monitoring the solutioning or washing process; and

(3) a monitoring schedule.

(e) Only saturated brine shall be used to displace any product.

(f) The maximum allowable operating pressure and test pressure shall not exceed 0.8 pounds per square inch per foot of depth measured at the higher elevation of either the casing seat or the highest interior elevation of the storage cavern roof. The following requirements shall apply:

(1) A maximum allowable operating pressure exceeding 0.75 pounds per square inch per foot of depth shall be prohibited unless the following conditions are met:

(A) Each permittee submits a justification to the department for exceeding a maximum allowable operating pressure of 0.75 pounds per square inch per foot of depth.

(B) The well is equipped with a continuous pressure-monitoring system, and a pressure history can be maintained.

(2) The underground hydrocarbon storage cavern shall not be subjected to pressures in excess of the maximum allowable operating pressure, including pressure pulsations and abnormal operating conditions.

(g) Each permittee shall maintain a minimum operating pressure that is protective of cavern integrity at each underground hydrocarbon storage well.

(h) Each permittee shall meet the notification requirements in the facility's emergency response plan, give oral notification to the department within two hours, and submit written notification within one week to the department if any of the following events occurs:

(1) The overpressuring or the overfilling of an underground hydrocarbon storage cavern;

(2) the loss of integrity for an underground hydrocarbon storage well or cavern;

(3) the release of brine, product, or any other chemical parameter that poses a threat to public health, safety, or the environment;

(4) any uncontrolled or unanticipated loss of product or brine that is detectable by any monitoring or testing;

(5) any other condition that could endanger public health, safety, or the environment;

(6) the establishment of communication between underground hydrocarbon storage caverns;

(7) the triggering of any alarms verifying that the permit safety requirements have been exceeded; or

(8) any equipment malfunction or failure that could result in potential harm to public health, safety, or the environment.

(i) Each permittee shall notify the secretary of any change in the type of product stored in any underground hydrocarbon storage cavern and shall certify that the compatibility of product types and the effect of pressure changes will not adversely affect the wellhead, casing, tubing, and cavern. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-13. Emergency response plan and safety and security measures. (a) Each permittee of an existing underground hydrocarbon storage facility and each applicant who wishes to operate a facility shall prepare an emergency response plan. The following requirements shall apply:

(1) Each permittee of an existing underground storage facility shall maintain the emergency response plan at the facility before April 1, 2004 and shall make the plan available for inspection by the secretary.

(2) Each applicant for a final permit for a new underground hydrocarbon storage facility shall make the emergency response plan available for inspection by the secretary when the final permit application is submitted to the department.

(b) Each permittee shall update the plan annually and also shall update the plan whenever new information regarding the requirements for the emergency response plan becomes available.

(c) Each plan shall include a description of the facility's response to the following events:

(1) Spills and releases;

(2) fires and explosions;

(3) cavern subsidence and collapse; and

(4) any other activity that endangers public health and safety, or that constitutes a threat to the environment.

(d) Each plan shall include the following information:

(1) A description of the warning systems in operation at the facility;

(2) a description of the facility's emergency response communication system that includes the following:

(A) A plat showing the location of all occupied buildings within a two-mile perimeter of the facility's boundaries; and

(B) a list of addresses and telephone numbers for all persons to contact within a two-mile perimeter of the facility's boundaries if a release or emergency condition occurs;

(3) the procedures for coordination of emergency response with local emergency planning committees, including emergency notification and evacuation of citizens and employees;

(4) a description of employee training for emergency response;

(5) a plat of the facility, showing the following locations:

(A) All hydrocarbon storage wells;

(B) all underground injection control wells;

(C) all monitoring wells;

(D) all brine and product lines;
 (E) railroad and transportation routes;
 (F) brine ponds; and
 (G) any other appurtenances at the facility; and
 (6) a plan map of man-made surface structures and any construction activities within a one-mile perimeter of the facility's boundaries.

(e) A copy of the plan shall be available at the facility, the company headquarters, and any coordinating agencies or committees involved in the emergency response plan.

(f) Each permittee shall establish an educational program for community safety and awareness of the emergency response plan.

(g) Each permittee of an underground hydrocarbon storage facility shall provide security measures to protect the public and to prevent unauthorized access. These security measures shall include the following:

(1) Methods for securing the facility from unauthorized entry and for providing a convenient opportunity for escape to a place of safety;

(2) clearly visible, permanent signs at all points of entry and along the facility's boundary, identifying the well or storage facility name, owner, and contact telephone number;

(3) security lighting;

(4) alarm systems;

(5) appropriate warning signs in areas that could contain accumulations of hazardous or noxious vapors or where physical hazards exist; and

(6) a direct communication link with the local control room or any remote control center for service and maintenance crews.

(h) Warning systems and alarms shall consist of the following:

(1) Combustible gas detectors, heat sensors, pressure sensors, and emergency shutdown instrumentation integrated with warning systems audible and visible in the local control room and at any remote control center;

(2) circuitry designed so that the failure of a detector or heat sensor, excluding meltdown and fused devices, will activate the warning; and

(3) a manually operated alarm, audible to facility personnel.

(i) Each wellhead and storage cavern shall be protected with safety devices to prevent pressures in excess of the maximum allowable operating pressure from being exerted on the underground hydrocarbon storage well or cavern and to prevent the backflow of any stored hydrocarbon if a flow-line ruptures.

(j) Each wellhead shall be equipped with manual isolation valves. Each port on a wellhead shall be equipped with either a valve or a blind flange. The valve or blind flange shall be rated at the same pressure as that for the wellhead.

(k) Each permittee shall install a supervisory control and data acquisition system approved by the secretary to monitor storage operations for individual storage wells. Each of the following instruments shall be connected to an alarm:

(1) Flow indicators for hydrocarbon;

(2) combustible gas detection indicators; and

(3) pressure indicators on both the product and brine lines of the wellhead.

(l) Each permittee shall install emergency shutdown valves on all hydrocarbon, brine, and water lines. Criteria for emergency shutdown valves shall include the following:

(1) (A) Be rated at least equivalent to 125% of the maximum pressure that could be exerted at the surface; or

(B) meet a pressure-rating standard equivalent to that specified to that in paragraph (1)(1)(A) and determined by the secretary to be protective of public health, safety, and the environment;

(2) fail to the closed position;

(3) be capable of remote and local operation; and

(4) be activated by the following:

(A) Overpressuring;

(B) underpressuring; and

(C) gas and heat detection.

(m) Each permittee shall conduct annual inspections of all wellhead instrumentation.

(n) Each permittee shall function-test each critical control system and emergency shutdown valve semiannually.

(o) Each permittee shall perform trip-testing of each loop, including the instrumentation, valves, shutdown equipment, and all wiring connections, to ensure the integrity of the circuit.

(p) Each permittee shall ensure that the equipment automatically closes all inlets and outlets to the storage cavern and safely shuts down or diverts any operation associated with the storage cavern, in case of overfilling or an emergency.

(q) Each permittee shall ensure that the automatic valve closure times meet the valve design limits for closure times.

(r) Each permittee shall cease operations or shall comply with the instructions from the secretary if the secretary determines that an imminent threat to public health, safety, or the environment exists due to any unsafe operating condition. The

permittee may resume operations if the secretary determines that the facility's operations no longer pose a risk to public health, safety, or the environment. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-14. Design and construction of underground hydrocarbon storage wells.

(a) Each permittee shall ensure that each underground hydrocarbon storage well is constructed with surface casing. The following requirements shall apply:

(1) The surface casing shall be set through all fresh and usable water formations and into competent bedrock.

(2) The surface casing shall be cemented by circulating cement through the bottom of the casing to the surface.

(3) The annular space between the casing and the formation shall be filled with cement.

(b) Each permittee of any existing underground hydrocarbon storage well without a surface casing shall perform the following:

(1) Verify the integrity of the existing casing with a casing inspection tool specified in K.A.R. 28-45-16; and

(2) (A) Provide double protection by installing either of the following:

(i) An intermediate casing and a production casing; or

(ii) a production casing with a tubing and packer assembly; or

(B) plug the well if double protection cannot be provided.

(c) Each permittee of a new underground hydrocarbon storage well shall install double casing protection with an intermediate casing and a production casing set into the upper part of the salt formation. The following provisions shall apply:

(1) The intermediate casing shall extend a minimum of 105 feet into the salt formation. The production casing shall extend at least to the depth of the intermediate casing.

(2) The annular space between the intermediate and production casings and between the intermediate casing and formation shall be filled with cement by circulating cement through the bottom of the casing to the surface.

(3) A tubing and mechanical packer assembly may be installed with the production casing as an alternative to the use of cemented intermediate and production casings.

(d) Each permittee of an existing underground hydrocarbon storage well that does not have double casing protection shall enhance casing monitoring by providing a casing inspection evaluation as specified in K.A.R. 28-45-16.

(e) The casing and tubing shall meet the performance standards for collapse resistance, internal yield pressure, and pipe body yield strength for the well's setting depths using criteria specified in the American petroleum institute's bulletin 5C2, twenty-first edition, dated October 1999, which is hereby adopted by reference.

(f) The brine tubing in each underground hydrocarbon storage well shall have a weep hole located a minimum of one foot above the bottom of the brine tubing. The following requirements shall apply:

(1) The brine tubing in a new underground hydrocarbon storage well shall have a weep hole before storage operations begin.

(2) The weep hole shall be added to the brine tubing in an existing underground hydrocarbon storage well when the brine tubing is pulled for any well work.

(g) Only new steel casing shall be installed in a new underground hydrocarbon storage well. Used parts, materials, and equipment that have been tested and certified for continued service may be used for repairs.

(h) Liners shall extend from the surface to a depth near the bottom of the production casing that allows room for workover operations.

(i) The following cementing requirements shall be met:

(1) The cement shall be compatible with the rock formation water and the drilling fluids. Salt-saturated cement shall be used when cementing through the salt section.

(2) The cement across the confining zone and to the surface shall have a compressive strength of not less than 1,000 pounds per square inch.

(3) Remedial cementing shall be completed if there is evidence of either of the following:

(A) Communication between the confining zone and other horizons; or

(B) annular voids that would allow either fluid contact with the casing or channeling across the confining zone or above the confining zone.

(4) The following requirements for cement evaluation shall apply:

(A) Samples shall be obtained at the start and end of the cementing operation for evaluation of cement properties. All cement samples collect-

ed shall be representative of the cement being utilized.

(B) All samples shall be tested for compressive strength.

(C) A cement bond log shall be run on the surface casing, intermediate casing, and cemented production casing after the neat cement has cured for a minimum of 72 hours.

(j) Casing patches shall be prohibited, unless the secretary determines that the use of casing patches is protective of public health, safety, and the environment. The following requirements shall apply:

(1) Each permittee shall submit a plan for the installation of the casing patch to the secretary.

(2) Each permittee shall meet the requirements specified in the department's document titled "procedure for internal casing repair, procedure #: UICLPG-12," dated February 2003, which is hereby adopted by reference.

(k) Each permittee shall pressure-test each production casing for leaks when the well construction is completed.

(l) Each permittee shall submit a casing inspection base log for the entire cased interval for the innermost casing string or for the cemented liner that extends the entire length of the casing after the well construction is completed.

(m) Each permittee shall contain, in a tank, all workover wastes, drilling fluids, drilling mud, and drill cuttings from any drilling operation or workover. Drilling fluids, drilling mud, and drill cuttings shall be disposed of in a manner determined by the secretary to be protective of public health, safety, and the environment.

(n) A licensed professional engineer or a licensed geologist, or the licensed professional engineer's or licensed geologist's designee, shall supervise the installation of each underground hydrocarbon storage well.

(o) Each permittee shall install and maintain a corrosion control system. The following requirements shall apply:

(1) The corrosion control system shall be capable of protecting the well casings.

(2) The corrosion control system shall be assessed according to the protocol and time schedule recommended by the corrosion control system manufacturer, and the results shall be reported to the secretary. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-15. Monitoring. (a) Each permittee shall install pressure sensors to continuously monitor wellhead pressures for both the product and brine sides of the wellhead for each underground hydrocarbon storage well. The following requirements shall apply:

(1) The pressure sensor shall be capable of recording the maximum and minimum operating pressures during a 24-hour period.

(2) The pressure sensor shall be capable of recording operating pressures at an interval approved by the secretary.

(3) Each permittee shall provide pressure data, including historic continuous monitoring, to the secretary upon request.

(4) Each underground hydrocarbon storage well shall have pressure gauges on both the product and brine sides at the wellhead, until continuous monitoring pressure sensors are installed.

(b) Each permittee of an underground hydrocarbon well equipped with a production casing with a tubing and packer assembly shall monitor the annular space. Each permittee shall submit the following to the secretary for review and consideration for approval:

(1) A diagram of the well construction; and

(2) a plan for monitoring the annulus that includes the following:

(A) A diagram of the instrumentation for monitoring the annular pressure and fluid levels;

(B) a description of how the annular pressure and fluid levels will be recorded; and

(C) a description of, and justification for, the testing methods to demonstrate the mechanical integrity of the system.

(c) Each permittee shall submit a plan for any monitoring activity, including logging and sonar surveys, to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, at least 60 days before the commencement of these monitoring activities.

(d) Each permittee shall submit a summary and the results of the monitoring activity to the secretary within 30 days after completion of the monitoring activity.

(e) Each permittee shall monitor the thickness of the salt roof for each cavern with a gamma ray log and a density log, or with another log as specified in K.A.R. 28-45-6a (m), as follows:

(1) Every five years;

(2) every three years, if the cavern meets criteria specified in K.A.R. 28-45-6a;

(3) at any time that the secretary determines that cavern integrity is suspect; and

(4) before plugging the well.

(f) Each permittee shall monitor the cavern storage capacity and the cavern geometry with a sonar survey. The sonar survey shall be conducted as follows:

(1) Before placing the underground hydrocarbon storage cavern in service;

(2) every 10 years;

(3) for determining the stability of the cavern and the overburden if the salt roof thickness and cavern geometry indicate that the stability of the cavern or overburden is at risk;

(4) after any growth of the cavern that results in a solution volume increase of 20 percent or more of cavern capacity; and

(5) before plugging the well if a sonar survey has not been run in the past five years.

(g) Any permittee may use an alternative method for the sonar survey if the secretary determines that the alternative method is substantially equivalent to the method specified in subsection (f). The permittee shall submit the following information for the secretary's consideration:

(1) A description of the proposed method and the theory for its operation;

(2) a description of the storage well and cavern conditions under which the log can be used;

(3) the procedure for interpreting the survey results; and

(4) an assessment of the capacity and stability of the cavern upon completion of the survey.

(h) Each permittee shall submit a ground subsidence monitoring plan to the secretary. The following requirements shall apply:

(1) Each permittee shall submit the plan at either of the following times:

(A) When the final permit application is submitted; or

(B) when the permittee conducts an elevation survey that is due before submittal of the final permit application.

(2) The ground subsidence monitoring plan shall include the following information:

(A) A description of the method for conducting an elevation survey; and

(B) the criteria for establishing monuments, benchmarks, and wellhead survey points.

(3) The criteria for subsidence monitoring shall be as follows:

(A) Level measurements to the accuracy of 0.01 foot shall be made.

(B) Surface elevation changes in excess of 0.10 foot shall be reported within 24 hours to the secretary.

(C) No established benchmark shall be changed, unless the permittee submits a justification that the change is protective of public health, safety, and the environment.

(D) If a benchmark is changed, the elevation change from the previous benchmark shall be noted in the elevation survey report.

(E) Each permittee shall submit the elevation before and after any wellhead work that results in a change in the survey point at the wellhead.

(4) The elevation survey shall be conducted by a licensed professional land surveyor.

(5) Biennial survey results, including certified and stamped field notes, shall be submitted to the department within 30 days after completion of the survey.

(i) Each permittee shall submit an inventory balance plan for measuring the volume of hydrocarbons injected into or withdrawn from each underground hydrocarbon storage well, including methods for measuring and verifying volume, with the permit application to the secretary for review and consideration for approval. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-16. Testing and inspections.

(a) Each permittee shall submit a plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, before conducting any underground hydrocarbon storage well or cavern testing. Testing shall not commence without prior approval from the secretary.

(b) Each permittee shall submit a summary of the testing to the secretary within 45 days after completing the test. The summary shall include the following:

(1) A chronology of the test;

(2) copies of all logs;

(3) storage well completion information;

(4) pressure readings;

(5) volume measurements; and

(6) an explanation of the test results.

(c) Each permittee shall test each unplugged underground hydrocarbon storage well and cavern for mechanical integrity. The following requirements shall apply:

(1) Integrity tests shall be conducted on the storage well and cavern as follows:

(A) Before the cavern is initially placed in service;
 (B) every five years, if the well is unplugged;

(C) before the underground hydrocarbon storage cavern is placed back in service after being in monitoring status, unless the mechanical integrity test has been performed in the last five years; and

(D) before the well is plugged, unless the mechanical integrity test has been performed in the last five years.

(2) Integrity tests shall be conducted on the underground hydrocarbon storage well after each workover that involves physical changes to any cemented casing string.

(3) Each underground hydrocarbon storage well shall be tested for mechanical integrity using a nitrogen-brine interface method.

(4) Each underground hydrocarbon storage cavern shall be tested for integrity by using a hydrostatic brine test.

(5) Each permittee shall submit a test procedure plan, on a form furnished by the department, to the secretary for review and consideration for approval, at least 30 days before test commencement. The plan shall include the following information:

(A) The justification for test parameters;

(B) the test sensitivities; and

(C) the pass and fail criteria for the test.

(6) Each permittee shall notify the secretary at least five days before conducting any integrity test.

(7) The integrity test shall be conducted at the maximum allowable operating pressure.

(8) All test procedures shall use certified gauges and pressure transducers that have been calibrated annually.

(d) Any permittee may use an alternative integrity test if the secretary determines that the alternative integrity test is substantially equivalent to the integrity tests specified in subsection (c). The permittee shall submit the following information for the secretary's consideration:

(1) A description of the test method and the theory of operation, including the test sensitivities, a justification for the test parameters, and the pass and fail criteria for the test;

(2) a description of the well and cavern conditions under which the test can be conducted;

(3) the procedure for interpreting the test results; and

(4) an interpretation of the test upon completion of the test.

(e) No underground hydrocarbon storage well and cavern shall be used for storage if the mechanical integrity is not verified.

(f) Each permittee shall submit a casing evaluation for each underground hydrocarbon storage well. Acceptable casing evaluation methods shall include magnetic flux and ultrasonic imaging.

(g) Any permittee may use an alternative casing evaluation method if the secretary determines that the alternative casing evaluation method is substantially equivalent to the casing evaluation methods specified in subsection (f). The permittee shall meet the following requirements:

(1) Each permittee shall submit a description of the logging method, including the theory of operation and the well conditions suitable for log use.

(2) Each permittee shall submit the specifications for the logging tool, including tool dimensions, maximum temperature and pressure rating, recommended logging speed, approximate image resolution, and hole size range.

(3) Each permittee shall describe the capabilities of the log for determining the following:

(A) The presence of any metal loss due to either of the following:

(i) Internal or external corrosion; or

(ii) internal wear;

(B) the degree of penetration of the corrosion or the casing defect; and

(C) the circumferential extent of the corrosion or the casing defect.

(4) Each permittee shall submit a log and an interpretation of the log to the secretary.

(h) Each permittee shall submit a casing evaluation according to the following time schedule:

(1) Every 10 years, for either of the following conditions:

(A) The underground hydrocarbon storage well has double casing protection; or

(B) an existing well has a liner and a production casing;

(2) after any workover involving the cemented casing; and

(3) every five years, if the underground hydrocarbon well does not have double casing protection or if a determination is made by the secretary that the integrity of the long string casing could be adversely affected by any naturally occurring condition or man-made activity.

(i) A variance for submitting a casing evaluation may be considered by the director if the well has a tubing and packer assembly in place.

(j) Each permittee shall submit a cement bond log with the casing evaluation if a cement bond log has not been previously submitted.

(k) A licensed professional engineer or licensed geologist, or licensed professional engineer's or licensed geologist's designee, shall supervise all test procedures and associated field activity.

(l) Each permittee shall have a licensed professional engineer or licensed geologist review all test results.

(m) Each permittee shall visually inspect the wellhead monthly for any leakage.

(n) Each permittee shall conduct an inspection of facility records, using a form furnished by the department, every two years to ensure that the required records are being properly maintained. The permittee shall maintain these records at the facility and shall make the records available to the secretary upon request. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-17. Groundwater monitoring. (a) Each permittee of an underground hydrocarbon storage facility shall submit a groundwater monitoring plan with the final permit application to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(b) Each permittee shall ensure that the groundwater monitoring wells meet the following requirements:

(1) Each permittee shall set the screen in each shallow monitoring well at a depth that is inclusive of the seasonal fluctuation of the water table.

(2) Each permittee shall ensure that all deep groundwater monitoring wells extend a minimum of 25 feet into the bedrock, or to a depth based on the geology and hydrogeology at the facility and approved by the secretary to ensure the protection of public health, safety, and the environment.

(c) All well locations and the spacing between all well locations shall be based on the geology and the hydrogeology at the facility and shall be required to be approved by the secretary to ensure the protection of public health, safety, and the environment.

(d) Each permittee of a facility shall submit a quality assurance plan, including techniques for sampling and analysis, with the final permit application to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(e) Each permittee shall collect groundwater samples and analyze the samples for chlorides and any other parameter determined by the secretary

to pose a threat to public health, safety, and the environment. The reporting format shall be determined by the secretary.

(f) Each permittee shall submit the results for chloride analyses from groundwater samples to the department on a quarterly basis.

(g) Each permittee shall monitor monthly for the presence of combustible gas in the headspace in monitoring wells and shall submit the results to the department quarterly.

(h) Each permittee shall submit a static groundwater level measurement for each monitoring well with the quarterly chloride analyses results specified in subsection (f).

(i) Any permittee of a facility where chloride concentrations in the groundwater exceed 250 milligrams per liter may be required by the secretary to submit a work plan, for review and consideration for approval, that describes the methods to delineate potential source areas and to control migration of the chloride contamination.

(j) Each permittee of a well in which combustible gas is detected shall submit a work plan to the secretary for review and consideration for approval. Each permittee shall describe the proposed methods to eliminate any source areas and return the combustible gas levels to levels that do not pose a potential threat to public health, safety, or the environment. The plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-18. Record requirements and retention. (a) Each permittee shall complete and submit an annual report, on a form furnished by the department, on or before April 1 of each year. The annual report shall include the following:

(1) A description of any incident of uncontrolled or unanticipated product loss;

(2) the well number and date of any logs or sonar surveys conducted;

(3) the estimated storage capacity for all unplugged caverns;

(4) a list of any caverns being washed;

(5) a list of the volume of product injected and withdrawn for each well;

(6) a list, by well number, of the type of product stored; and

(7) a list, by well number, of the maximum and minimum product storage pressures encountered during the report year.

(b) Each permittee shall maintain facility records at the facility or at a location approved by the secretary for the following time periods:

(1) A period of 10 years, for the following records:

(A) The maximum and minimum operating pressures for each well; and

(B) the annual inspections required by the secretary;

(2) the life of the well, for the following records:

(A) The casing records for each well;

(B) the cementing records for each well;

(C) the workover records;

(D) monitoring information, including calibration and maintenance records; and

(E) continuous monitoring data; and

(3) the life of the facility, for the following records:

(A) All logging events;

(B) all mechanical integrity tests and other testing;

(C) all groundwater monitoring data; and

(D) all correspondence relating to the permit, including electronic mail.

(c) Surface elevation surveys shall be maintained and retained for the life of facility plus 20 years after the facility's closure.

(d) All required facility records, reports, and documents shall be transferred to the new permittee with the transfer of the permit. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-19. Well workovers. (a) Each permittee shall submit a workover plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment. The following provisions shall apply:

(1) Each permittee shall submit the workover plan at least 10 days before performing any downhole or wellhead work that involves dismantling or removal of the wellhead.

(2) A permittee shall not be required to submit a workover plan for routine maintenance or replacement of gauges, sensors, or valves.

(3) Verbal authorization to initiate downhole or wellhead work may be issued by the secretary if the permittee has fulfilled the requirements of this subsection.

(b) Each permittee shall ensure that a blowout preventer with a pressure rating greater than the pressures anticipated to be encountered is used during each workover.

(c) Each permittee shall ensure that all logging procedures are conducted through a lubricator unit with a pressure rating greater than the pressures anticipated to be encountered.

(d) Each permittee shall provide to the person logging the well or performing a well workover all relevant information concerning the status and condition of the well and storage cavern before initiating any work. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-20. Plugging requirements. (a) Each permittee shall submit a plugging plan, including monitoring and testing requirements, to the secretary for review and consideration for approval at least 60 days before the plugging event.

(b) Each permittee shall follow the plugging procedure specified in the department's document titled "procedure for the plugging and abandonment of a hydrocarbon storage well, procedure #:UICLPG-3," dated March 2003, which is hereby adopted by reference.

(c) Each permittee shall restore and preserve the integrity of the site as follows:

(1) Dispose of all liquid waste in an environmentally safe manner;

(2) clear the area of debris;

(3) drain and fill all excavations;

(4) remove all unused concrete bases, machinery, and materials; and

(5) level and restore the site. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-21. Underground hydrocarbon storage fees. (a) Effective on and after January 1, 2004, each permittee shall submit an annual permit fee of \$18,890 per facility and \$305 per unplugged storage well on or before April 1 of each year.

(b) Each permittee shall submit a permit fee of \$305 for any unplugged storage well inadvertently omitted from the collection of permit fees for the year 2003.

(c) Each applicant for a permit for a proposed new underground hydrocarbon storage well shall submit a fee of \$700 with the permit application.

(d) Fees shall be made payable to the "Kansas department of health and environment—subsurface hydrocarbon storage fund."

(e) The fees collected under the provisions of this regulation shall not be refunded.

(f) If ownership of an underground hydrocarbon storage well or underground hydrocarbon storage facility changes during the term of a valid permit, no additional fee shall be required unless a change occurs that results in a new storage well or an expanded facility operation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-22. Permit required for a brine pond. (a) Since the underground storage of hydrocarbons and the access to and transfer of hydrocarbons is dependent on the safe and secure operation and maintenance of associated brine ponds, no person shall construct, operate, or maintain any brine pond associated with an underground hydrocarbon storage facility without obtaining a brine pond permit from the secretary.

(b) Each permittee of a brine pond in existence before April 1, 2003 shall meet the requirements for liner construction if either of the following conditions exists:

(1) A potential threat to public health, safety, or the environment exists.

(2) An existing brine pond is dewatered due to the repair, replacement, or expansion of the brine pond.

(c) A variance may be granted by the secretary if both of the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The applicant or permittee agrees to perform any additional monitoring or brine pond improvements, or both, if required by the secretary.

(d) Each applicant or permittee seeking a variance shall submit a written request, including a justification for the variance and any supporting data, to the secretary for review and consideration for approval. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-23. Brine pond application and permit. (a) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit an application for a permit to the secretary. Upon review of the application, either of the following shall be issued by the secretary:

(1) A final permit if the application is approved; or

(2) a notice that the permit has been denied if the applicant has not complied with the requirements of this article of regulations. The notice shall include justification for the permit denial.

(b) Each permit for a brine pond shall be authorized for a term not to exceed 10 years.

(c) Each permittee of an existing brine pond shall submit an application, on a form furnished by the department, to the secretary within six months after April 1, 2003.

(d) Each permittee shall submit a completed application to renew a permit not less than 90 days before the expiration date of the permit in effect.

(e) Each applicant for a permit for a new brine pond shall submit a completed application to the secretary not less than 90 days before the construction of the new brine pond commences. Brine pond construction shall not begin until the secretary has issued the permit.

(f) Each permit application for a new brine pond shall include a hydrogeological investigation conducted under the direction of a licensed geologist or a licensed professional engineer.

(g) Each hydrogeological investigation for a new brine pond shall include the following information:

(1) A site characterization for brine pond construction shall meet the following requirements:

(A) The bottom of the brine pond shall be determined by the lowest surface elevation of compacted or excavated soils used in creating the pond structure.

(B) All required excavations or boreholes shall be drilled to a depth of at least 10 feet below the bottom of the brine pond.

(C) A separation distance of at least 10 feet shall be maintained between the brine pond bottom and the water table.

(D) The surface area shall be measured at the interior top dike elevation.

(2) The location and elevation of each borehole or excavation, based on surface area, shall be determined by the following criteria:

(A) A minimum of two boreholes or excavations for each five acres of proposed brine pond surface area; or

(B) a minimum of two boreholes or excavations if the brine pond surface area is less than five acres.

(3) The following information shall be submitted for each borehole or excavation:

(A) A log of soil types encountered in each borehole or excavation; and

(B) a groundwater level measurement at each borehole or excavation.

(h) Each permittee shall notify the department at least five days before conducting any field activities for the hydrogeological investigation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-24. Public notice for a brine pond.

(a) Public notice shall be given by the secretary for the following permit actions:

(1) A permit application for any new brine pond associated with an underground hydrocarbon storage well;

(2) modifications that require a draft permit;

(3) modifications to an existing brine pond;

(4) a denied permit; and

(5) a scheduled hearing.

(b) The public notice and, if applicable, a copy of the draft permit shall be mailed or electronically mailed by the department to the permit applicant.

(c) The public notice shall be mailed by the department to the following:

(1) Any person who submits a written request for placement on the mailing list;

(2) the official county newspaper of each county in which the lands affected by the application are located, for publication in at least two issues; and

(3) the Kansas register.

(d) The public notice shall include the following information:

(1) The name and address of the department processing the permit action for which the notice is being given;

(2) the name and address of the person seeking the permit;

(3) a brief description of the activity described in the permit application;

(4) the name, address, and telephone number of the person that interested persons may contact for further information, including copies of the application, draft permit, or other appropriate information;

(5) a brief description of the comment procedures for public notice; and

(6) a statement of the procedure to request a hearing and other procedures that allow public participation in the final permit decision.

(e) Any interested person may submit written comments to the secretary on any permit action during the 30-day public comment period. The following requirements shall apply:

(1) Comments shall be submitted by the close of the public comment period.

(2) All supporting materials submitted shall be included in full and shall not be incorporated by reference, unless the supporting materials are any of the following:

(A) Part of the administrative record in the same proceeding;

(B) state or federal statutes and regulations;

(C) state or environmental protection agency documents of general applicability; or

(D) other generally available reference materials.

(3) Commentators shall make available to the secretary all supporting materials not already included in the administrative record.

(f) The response to all significant comments concerning any permit actions and the reasons for changing any provisions in the draft permit shall be issued at the time that the final permit decision is issued.

(g) The response to comments shall be made available to the public upon request. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-25. Renewal, modification, and transfer of a brine pond permit.

(a) The issuance or modification of a brine pond permit or the variance of the specific requirements of a brine pond permit may be authorized by the secretary for a term of less than 10 years.

(b) The automatic transfer of a brine pond permit shall be prohibited. The terms of a permit transfer shall include the following:

(1) Each person requesting a permit transfer shall submit a completed application to the secretary at least 60 days before the proposed effective date of the transfer.

(2) Each permittee shall comply with the conditions of the existing permit until the secretary reissues the permit.

(c) Any permit for a brine pond may be modified by the secretary for any of the following reasons:

(1) The secretary receives information not available when the permit was issued.

(2) The secretary receives a request for a modification.

(3) The secretary conducts a review of the permit file and determines that a modification is necessary.

(d) Only the permit actions subject to modification shall be reopened.

(e) Minor modifications that shall not require public notification shall include the following:

- (1) Correction of typographical errors;
- (2) requirements for more frequent monitoring or reporting by the permittee;
- (3) date change in a schedule of compliance;
- (4) change in ownership or operational control of the facility, unless the secretary determines that public notification is necessary to protect the public interest;

(5) change in construction requirements, if approved by the secretary; and

(6) amendments to a brine pond closure plan.

(f) A draft permit and notification to the public shall be required if any of the following conditions is met:

(1) A permittee proposes substantial alterations to the brine ponds or proposes any activity that justifies a change in permit requirements, including cumulative effects on public health, safety, or the environment.

(2) Information has become available that would have initially justified different permit conditions.

(3) The standards or regulations on which the permit was based have changed because of the promulgation of new or amended standards or because of a judicial decision.

(g) Any permittee may request a permit modification within 180 days after any of the following:

(1) The adoption of any new regulations or standards;

(2) any deadline to achieve compliance with regulations or standards before the expiration date of the permit; or

(3) any judicial remand and stay of a promulgated regulation, if the permit condition was based on the remanded regulation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-23-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-26. Signatories for brine pond permit applications and reports. (a) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall designate signatories to sign the permit applications and reports required by the secretary.

(b) Positions that may be approved by the secretary as signatories shall include either of the following:

- (1) Operations manager;
- (2) brine pond specialist; or
- (3) a position with responsibility at least equivalent

to that required by the positions listed in this subsection.

(c) Any signatory may submit written notification to the secretary specifying a position having responsibility for the overall operation of the regulated facility or activity to act as a designated signatory.

(d) Each signatory and each signatory's designee shall submit a signature statement, on a form furnished by the department, to the secretary with the brine pond permit application. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-27. Financial assurance for brine pond closure. (a) Each permittee of a brine pond shall establish financial assurance for the decommissioning and abandonment of any brine pond permitted by the secretary under this article of regulations.

(b) (1) Each permittee of an existing brine pond shall submit proof of financial assurance before April 1, 2004 and, thereafter, annually on or before January 31 of each year. Each applicant for a permit for a new brine pond shall submit proof of financial assurance to the secretary with the permit application and, thereafter, annually on or before January 31 of each year.

(2) Each permittee and each applicant shall meet the following requirements:

(A) Submit a detailed written estimate, in current dollars, of the cost to close any brine pond at the facility. The estimate shall be reviewed and approved by a licensed professional engineer or licensed geologist;

(B) develop an estimate of the closure cost for each brine pond at the facility as follows:

(i) The estimate shall be based on the cost charged by a third party to properly decommission the brine pond; and

(ii) the brine pond shall be assumed to be at maximum storage capacity; and

(C) increase the closure cost estimate and the amount of financial assurance provided if any change in the brine pond closure plan or in the operation increases the maximum cost of brine pond closure at any time.

(c) Each permittee shall provide continuous financial assurance coverage for closure until the secretary approves the brine pond closure.

(d) Each permittee shall comply with the provisions of the department's document titled "pro-

cedure for demonstrating financial assurance for a brine pond associated with a storage facility, procedure #: UICLPG-11,” dated March 2003, which is hereby adopted by reference. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-28. Design, construction, and maintenance of brine ponds. (a) Each applicant shall submit a design and construction plan for each new brine pond associated with an underground hydrocarbon storage facility to the secretary. The design and construction plan shall be approved if the secretary determines the plan is protective of public health, safety, and the environment. Each brine pond shall be designed by a licensed professional engineer.

(b) Each applicant shall ensure that the impermeable synthetic membrane liner system for each brine pond is comprised of primary and secondary impermeable synthetic membrane liners with an intermediate leak detection system. The following requirements shall apply:

(1) The primary and secondary liners shall be at least 30 mils in thickness.

(2) The engineer designing the brine pond shall obtain a certification from the liner manufacturer providing the following information:

(A) Confirmation that the specified liner is compatible for use with the brine;

(B) confirmation that the specified liner is ultraviolet-resistant; and

(C) data for the manufacturer’s estimated leakage, permeability, or transmissivity rate for specific liners, including the rate of movement of fluids through the synthetic membrane liner due to the properties and thickness of the liner material, expressed in units of volume per area per time;

(D) any normally expected manufacturing defects in the liner material; and

(E) any normally expected defects associated with the seaming and installation process.

(c) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit a contingency plan to the secretary that outlines the procedures for brine containment issues associated with brine pond maintenance and dewatering due to liner failure, repair, replacement, or expansion of the brine pond. The contingency plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment.

(d) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit a flood response plan if the brine pond is located in a floodplain or a flood-prone area.

(e) Each permittee shall immediately cease operations or shall comply with instructions from the secretary if the secretary determines that an imminent threat to public health, safety, or the environment exists due to any unsafe operating condition. The permittee may resume operations if the secretary determines that the brine pond operations no longer pose a risk to public health, safety, or the environment.

(f) Each permittee shall ensure that the primary and secondary liners for each brine pond are separated to provide a conduit for the movement of any fluid between the liners to the leak detection monitoring location for detection and removal.

(g) Each permittee shall ensure that all materials between the primary and secondary liners are capable of transmitting a minimum of 1/64 inch per acre per day of flow with a head of no more than two feet placed on the secondary liner. Acceptable materials shall include the following:

(1) Clean sand;

(2) pea gravel;

(3) geotextile fabric;

(4) geonet-type material; and

(5) any alternatives recommended by the liner manufacturer, if the secretary determines that the alternatives are substantially equivalent to materials listed in this subsection.

(h) Each permittee shall ensure that the leak detection system design for each brine pond limits the maximum travel time required for fluid penetrating the liner to reach the leak detection monitoring location to 24 hours or less.

(i) Each permittee shall ensure that each brine pond bottom has a slope adequate for the proper operation of the leak detection system with not less than 0.5 percent for the slope for the collection pipes and 1.0 percent for all other slopes.

(j) Each permittee shall ensure that the dewatering system design for each brine pond is capable of the following:

(1) Monitoring the volume of fluid removed from the intermediate space between the primary and secondary liners; and

(2) pumping the volume of fluid generated equal to 10 times the maximum allowable liner leakage rate.

(k) Each permittee shall ensure that the compaction of all brine pond embankments and of the upper six inches of the interior lagoon bottom below the secondary liner meets all of the following criteria:

(1) The maximum standard proctor density shall be a minimum of 95 percent at optimum moisture to optimum moisture plus three percent.

(2) The maximum thickness of the compacted material shall not exceed six inches.

(3) The moisture content range of the compacted soils shall be optimum moisture to optimum moisture plus three percent.

(4) The maximum size of dirt clods in the compacted soil shall be less than one inch in diameter.

(1) Each permittee shall ensure that the following requirements for the installation of the liners at each brine pond are met:

(1) The primary and secondary liners shall be anchored at the top of the brine pond dike in accordance with the liner manufacturer's instructions.

(2) Installation shall be performed in accordance with the liner manufacturer's instructions.

(3) Installation shall be performed by a contractor experienced in the installation of impermeable synthetic membrane liners.

(4) On-site supervision of the liner installation shall be provided by an individual that has experience in liner installation practices.

(m) Each permittee shall ensure that the volume of fluid monitored from the intermediate leak detection system at the brine pond is based on a rate of 10 percent of leak return system capacity and does not exceed 1,000 gallons per day per acre of pond area.

(n) Each permittee shall submit, to the secretary, a seam testing method to verify the adequacy of the seaming process for the liners at each brine pond. The following requirements shall apply:

(1) The testing method shall include the following:

(A) The methods for destructive and nondestructive seam testing;

(B) the protocol describing the number of tests per lineal foot of field seam;

(C) the size of the destructive test specimen required; and

(D) other pertinent quality control provisions recommended by the liner manufacturer.

(2) All field seams shall be subjected to nondestructive testing.

(o) Each permittee shall install a gas vapor control system to ignite or capture hydrocarbon vapors at each brine pond within five years after

April 1, 2003. The gas vapor control system shall consist of one of the following:

(1) A hydrocarbon liquid knockout vessel and degassifier; or

(2) an alternative method if the secretary determines that the alternative method is substantially equivalent to the hydrocarbon liquid knockout vessel and degassifier. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-29. Groundwater monitoring for brine ponds.

(a) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit a groundwater monitoring plan with the brine pond permit application to the secretary for review and consideration for approval. The monitoring plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment.

(b) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall meet the following requirements:

(1) Install monitoring wells around the perimeter of the brine pond. The well spacing shall be based on the geology and hydrogeology at the facility and shall be approved by the secretary if the secretary determines that the well spacing is protective of public health, safety, and the environment; and

(2) set the screen in all shallow groundwater monitoring wells at a depth that is inclusive of the seasonal fluctuation of the water table.

(c) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit, with the groundwater monitoring plan, a quality assurance plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(d) Each permittee shall collect groundwater samples and analyze the samples for chloride and any other parameter determined by the secretary as posing a potential threat to public health, safety, and the environment. The reporting format shall be determined by the secretary.

(e) Each permittee shall submit the results for the chloride analyses from groundwater samples to the department on a quarterly basis.

(f) Each permittee shall monitor monthly for the presence of combustible gas in the headspace in monitoring wells and submit the results to the department on a quarterly basis.

(g) Each permittee shall submit a static groundwater level measurement for each monitoring well with the quarterly chloride analyses specified in subsection (e).

(h) Any permittee of a brine pond where chloride concentrations in the groundwater exceed 250 milligrams per liter may be required by the secretary to submit a work plan, for review and consideration for approval, that describes proposed methods to delineate the extent of the contamination and to control migration of the chloride contamination. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45-30. Brine pond closure requirements.

(a) Each brine pond permittee shall submit a closure plan, including monitoring and testing requirements, to the secretary for review and consideration for approval at least 60 days before the closure of a brine pond. The closure plan shall be approved if the secretary determines that the closure plan is protective of public health, safety, and the environment.

(b) The permittee shall not commence closure activities without the secretary's approval.

(c) Each permittee shall include the following information in the brine pond closure plan:

(1) The procedure for deactivating the various brine lines employed at the facility;

(2) the procedures for the remediation, removal, or disposal of brine, accumulated sludge in the brine pond, contaminated soils, and contaminated groundwater;

(3) a description regarding the proposed maintenance, deactivation, conversion, or demolition of the brine pond structure; and

(4) procedures addressing the plugging of any water wells or groundwater monitoring wells associated with the brine pond. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

Article 45a.—UNDERGROUND NATURAL GAS STORAGE WELLS IN BEDDED SALT

28-45a-1. Definitions. (a) "Applicant" means the operator and the owner requesting a permit as specified in this article of regulations. If the operator and the owner are not the same person, the owner and the operator shall jointly submit an application for a permit.

(b) "Base gas" and "cushion gas" mean the vol-

ume of gas required as permanent storage inventory to maintain adequate storage cavern pressure for meeting minimum gas deliverability demands throughout the withdrawal season or for structural integrity of the storage cavern.

(c) "Brine" means saline water with a sodium chloride concentration equal to or greater than 90 percent.

(d) "Brine pond" means the excavated or diked structure used for the surface containment of brine used in the creation, maintenance, or operation of an underground storage well.

(e) "Department" means the Kansas department of health and environment.

(f) "Director" means the director of the division of environment of the department of health and environment.

(g) "Draft permit" means a document that is pending approval by the secretary to be issued as a permit.

(h) "In existence" and "existing," when used to describe an underground natural gas storage well, mean a natural gas storage well that has been authorized or permitted by the Kansas department of health and environment before April 1, 2003.

(i) "Kansas board of technical professions" means the state board responsible for licensing persons to practice engineering, geology, or land surveying in Kansas.

(j) "Licensed geologist" means a geologist licensed to practice geology in Kansas by the Kansas board of technical professions.

(k) "Licensed professional engineer" means a professional engineer licensed to practice engineering in Kansas by the Kansas board of technical professions.

(l) "Licensed professional land surveyor" means a professional land surveyor licensed to practice land surveying in Kansas by the Kansas board of technical professions.

(m) "Liner" means the casing normally installed within the production casing.

(n) "Liquified petroleum gas" and "LPG" mean by-products or derivatives of oil and gas, including propane, butane, isobutane, and ethane, maintained in a liquid state under pressure.

(o) "Maximum allowable operating pressure" means the maximum pressure authorized by the department and measured at the wellhead.

(p) "Maximum operating pressure" means the maximum pressure recorded during a 24-hour period and measured at the product side of the wellhead.

(q) "Municipal population center" means an incorporated city.

(r) "Natural gas" means the gaseous form of hydrocarbon consisting primarily of methane.

(s) "Operator" means the person recognized by the secretary as being responsible for the physical operation of an underground natural gas storage facility.

(t) "Owner" means the person owning all or part of any underground natural gas storage facility.

(u) "Permit" means an authorization, license, or equivalent control document issued by the secretary to the operator and owner.

(v) "Permittee," "permit holder," and "holder of a permit" mean the owner and the operator issued a permit, as defined in this regulation, by the secretary.

(w) "Person" means any individual, company, corporation, institution, partnership, municipality, township, or federal agency.

(x) "Product" means natural gas.

(y) "Secretary" means the secretary of the department of health and environment.

(z) "Solutioning" means the process of injecting fluid into a well to dissolve salt or any other readily soluble rock or mineral.

(aa) "Supervisory control and data acquisition" means an automated surveillance system in which monitoring and control of storage activities are accomplished at a central or remote location.

(bb) "Underground natural gas storage cavern" means a cavern formed by solutioning in bedded salt in which natural gas is stored.

(cc) "Underground natural gas storage facility" means the acreage associated with the storage field with facility boundaries approved by the secretary. This term shall include the wells, wellbore tubular goods, wellhead, and any related equipment, including any appurtenances associated with the well field.

(dd) "Underground natural gas storage well" means a well used for the injection or withdrawal of natural gas into or out of an underground natural gas storage cavern.

(ee) "Usable water formation" means an aquifer or any portion of the aquifer that meets any of the following criteria:

- (1) Supplies any public water system;
- (2) contains a supply of groundwater that is sufficient to supply a public water system and that currently supplies drinking water for human consumption; or
- (3) contains fewer than 10,000 mg/L total dissolved solids and is not an exempted aquifer.

(ff) "Variance" means the secretary's written approval authorizing an alternative action to the requirements of these regulations or the standards adopted by these regulations and incorporated into the permit.

(gg) "Working gas" means the gas placed in the storage cavern above the base gas. (Authorized by and implementing K.S.A. 65-171d; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-2. Permit required. (a) No person shall create, operate, or maintain an underground storage well for natural gas in bedded salt without obtaining a permit from the secretary.

(b) Underground storage caverns for natural gas shall be constructed only in bedded salt.

(c) A variance may be granted by the secretary if both of the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The applicant or permittee agrees to perform additional testing, monitoring, or well improvements, or any combination of these, if required by the secretary.

(d) Each applicant or permittee seeking a variance shall submit a written request, including justification for the variance and any supporting data, to the secretary for review and consideration for approval. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-3. Well conversions and reentry.

(a) The conversion of an existing well to underground natural gas storage shall be prohibited if the well was not originally designed for the underground storage of natural gas, unless the secretary determines that the conversion is protective of public health, safety, and the environment.

(b) The conversion of an underground natural gas storage well for other purposes shall be prohibited, unless the secretary determines that the conversion is protective of public health, safety, and the environment.

(c) The reentry of a plugged underground natural gas storage well for the purpose of reactivating activities associated with the underground storage of natural gas or liquid hydrocarbons shall be prohibited. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-4. Application for permit. (a) Each applicant shall submit a completed applica-

tion for a permit to create, operate, and maintain an underground natural gas storage well, on an application form furnished by the department. Upon review of the application, one of the following shall be issued by the secretary:

(1) A permit, if the application is approved; or
 (2) a notice that the permit has been denied if the applicant has not complied with the requirements of this article of regulations. The notice shall include justification for the permit denial.

(b) Each permittee of an existing underground natural gas storage well shall submit to the secretary, before April 1, 2004, either of the following:

(1) A permit application for the continued operation of the storage well; or

(2) a plan and schedule for plugging the well.

(c) The existing permit or authorization for the underground natural gas storage facility shall remain in effect until the requirement specified in subsection (b) is met and a permit for the underground natural gas storage well is issued. Each permittee of any existing underground natural gas storage cavern shall comply with the provisions of this article of regulations before injecting any working gas into the underground storage cavern.

(d) Each applicant for a permit for a new underground natural gas storage well shall submit a completed application to the secretary at least 180 days before the proposed commencement date for the construction of the new storage well. Construction shall not begin until the secretary has approved the permit application.

(e) Each permittee of an existing facility and each applicant for a proposed facility shall ensure that the underground natural gas storage facility will be operated and maintained in a manner that will preserve the integrity of the storage cavern and storage well and minimize any potential threat to public health, safety, and the environment.

(f) Each application for a permit shall include a report prepared by a licensed geologist that includes the following:

(1) An evaluation of the geology and hydrogeology, including cross-sections, isopach and structure maps of the salt formation, and water-level or potentiometric maps;

(2) a regional stratigraphic evaluation;

(3) local and regional structural analyses, including maps, cross-sections and available geophysical data;

(4) a flood assessment identifying floodplain and flood-prone areas, including the following:

(A) Flood response procedures; and

(B) design criteria for well and facility equipment; and

(5) an assessment of the potential for ground subsidence.

(g) Each applicant shall submit the following information with the permit application:

(1) A plan view map showing locations of all water, solution mining, monitoring, disposal, injection, oil, and gas wells within a one-mile perimeter of the facility's boundary; and

(2) a plan map view of man-made surface structures and construction activities within a one-mile perimeter of the facility's boundary.

(h) Each permittee shall submit a sample log of cuttings from each newly installed well at the facility to the secretary. The sample log shall be incorporated into the permit.

(1) Cuttings shall be collected at 10-foot intervals or an interval approved by the secretary from surface to total well depth.

(2) Well cuttings shall be collected, described, and logged as specified in department's document titled "procedure for sample logging, procedure #: UICLPG-9," dated July 2002, as adopted by reference in K.A.R. 28-45-6a.

(3) The collection of cuttings shall be supervised by a licensed geologist or a licensed geologist's designee.

(4) The description and logging of the sample cuttings shall be performed by a licensed geologist.

(5) Each permittee shall submit a sample log and a dry sample set to the department within 45 days after well completion.

(i) Each permittee shall provide a minimum of one core from each facility. The following provisions shall apply:

(1) The permittee shall submit a plan describing the coring interval, coring procedure, and core testing to the secretary for review and consideration for approval at least 60 days before the coring event.

(2) Each permittee shall make the core available for inspection upon request by the secretary.

(3) The permittee may submit existing core data if the secretary determines that the core is representative of the geology of the area.

(j) Each permittee shall submit open hole logs for any new underground natural gas storage well. The logging interval shall be from the surface to 100 feet below the top of the salt section. At a minimum, the following logs shall be run:

(1) A gamma ray log;

(2) a neutron log if the source is registered in Kansas, or a sonic log;

(3) a density log; and

(4) a caliper log.

(k) Any permittee may use an alternative log if the secretary determines that the alternative log is substantially equivalent to the logs specified in subsection (j). The permittee shall submit the following information:

(1) A description of the log and the theory of operation for that log;

(2) a description of the field conditions under which the log can be used;

(3) the procedure for interpreting the log; and

(4) an interpretation of the log upon completion of the logging event.

(l) Each permittee shall meet the following design requirements for each underground natural gas storage cavern:

(1) A minimum salt roof thickness of 100 feet above the washed storage cavern shall be maintained at all times.

(2) Underground communication between caverns through fracturing or coalescence shall be prohibited. Underground natural gas storage caverns where communication between caverns exists shall be plugged.

(3) The horizontal distance separating underground natural gas storage caverns shall be no less than 100 feet between cavern boundaries.

(4) The maximum horizontal diameter of each underground natural gas storage cavern shall not exceed 300 feet.

(m) Each permittee shall ensure the integrity of the storage well casing and the storage cavern before commissioning the storage cavern into service. Storage operations may commence when both of the following requirements are met:

(1) Each permittee shall submit a notice of completion of construction, on a form furnished by the department.

(2) Each new underground natural gas storage well shall be inspected by the secretary before storage operations commence. Storage operations shall not commence if the underground natural gas storage well fails the inspection. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-5. Public notice. (a) Public notice shall be given by the secretary for any of the following permit actions:

(1) A permit application for an underground natural gas storage well;

(2) any modifications that require a draft permit;

(3) any modifications for an existing storage facility;

(4) the denial of a permit; or

(5) a scheduled hearing.

(b) The public notice and, if applicable, a copy of the draft permit shall be mailed or electronically mailed by the department to the permit applicant.

(c) The public notice shall be mailed by the department to the following:

(1) Any person who submits a written request for placement on the mailing list;

(2) the official county newspaper of each county in which the lands affected by the application are located, for publication in at least two issues; and

(3) the Kansas register.

(d) The public notice shall include the following information:

(1) The name and address of the department processing the permit action for which the notice is being given;

(2) the name and address of the person or company seeking the permit;

(3) a brief description of the business conducted at the facility or the activity described in the permit application;

(4) the name, address, and telephone number of the person that interested persons may contact for further information, including copies of the application, draft permit, or any other appropriate information;

(5) a brief description of the comment procedures for public notice; and

(6) a statement of the procedure to request a hearing and other procedures that allow public participation in the final permit decision.

(e) Any interested person may submit written comments to the secretary on any of the permit actions during the 30-day public comment period. The following requirements shall apply:

(1) All comments shall be submitted by the close of the public comment period.

(2) All supporting materials submitted shall be included in full and shall not be incorporated by reference, unless the supporting materials are any of the following:

(A) Part of the administrative record in the same proceeding;

(B) state or federal statutes and regulations;

(C) state or environmental protection agency documents of general applicability; or

(D) other generally available reference materials.

(3) Commentators shall make supporting materials not already included in the administrative record available to the secretary.

(f) The response to all significant comments concerning any permit actions and the reasons for changing any provisions in the draft permit shall be issued when the final permit decision is issued.

(g) The response to comments shall be made available to the public upon request. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-6. Modification and transfer of a permit. (a) The automatic transfer of a permit shall be prohibited. The requirements for each permit transfer shall be as follows:

(1) Each person requesting a permit transfer shall submit a completed application to the secretary at least 60 days before the effective date of the proposed transfer.

(2) Each permittee shall comply with the requirements of the existing permit until the secretary reissues the permit.

(b) Any permit for an underground natural gas storage well may be modified by the secretary under any of the following conditions:

(1) The secretary receives information that was not available when the permit was issued.

(2) The secretary receives a request for a modification.

(3) The secretary conducts a review of the permit file and determines that modification is necessary.

(c) Only the permit actions subject to modification shall be reopened.

(d) Minor modifications that shall not require public notification include the following, except as otherwise specified:

(1) Correction of typographical errors;

(2) requirements for more frequent monitoring or reporting by the permittee;

(3) a date change in a schedule of compliance;

(4) a change in ownership or operational control of the facility, unless the secretary determines that public notification is necessary to protect the public interest;

(5) a change in construction requirements, if approved by the secretary; and

(6) any amendments to a plugging plan.

(e) A draft permit and notification to the public shall be required if any of the following conditions is met:

(1) A permittee proposes substantial alterations or additions to the facility or proposes an activity that justifies a change in the permit requirements, including cumulative effects on public health, safety, and the environment.

(2) Information has become available that would have initially justified different permit conditions.

(3) Standards or regulations on which the permit was based have changed due to the promulgation of new or amended standards or due to a judicial decision after the permit was issued.

(f) Any permittee may request a permit modification within 180 days after any of the following:

(1) The adoption of new regulations or standards;

(2) any deadline to achieve compliance with regulations or standards before the expiration date of the permit; or

(3) any judicial remand and stay of a promulgated regulation if the permit condition was based on the remanded regulation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-7. Signatories for permit applications and reports. (a) Each permittee of an existing underground natural gas storage well and each applicant for a permit for a proposed underground natural gas storage well shall designate signatories to sign the permit applications and all reports required by the secretary.

(b) Positions that may be approved by the secretary to be signatories shall include the following:

(1) Plant or operations manager;

(2) cavern specialist;

(3) superintendent; and

(4) a position with responsibility at least equivalent to that required by the positions listed in this subsection.

(c) Any signatory may submit written notification to the secretary specifying a position having responsibility for the overall operation of the regulated facility or activity to act as a designated signatory.

(d) Each signatory and each signatory's designee shall submit a signature statement, on a form furnished by the department, with the permit application. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-8. Siting requirements for new underground natural gas storage wells. (a) Each applicant shall assess the geographical, topographical, and physical data for any proposed natural gas storage well location to determine whether the siting requirements have been met. The following siting requirements shall be met:

(1) Each new underground natural gas storage facility shall be located at least three miles from the established boundaries of municipal population centers.

(2) Each proposed new facility or boundary expansion for any existing facility shall be located as follows:

(A) Not less than five miles from an active or abandoned conventional shaft mining operation; and

(B) not less than two miles from the facility's boundary of any solution mining operation.

(3) Each applicant shall assess the extent and nature of current or past conventional subsurface mining activities within five miles of the underground natural gas storage facility boundary to determine any potential impact to public health, safety, or the environment resulting from proposed activities at the facility.

(4) Each applicant shall identify and assess all wells, including abandoned wells, from available sources of information, within a one-mile perimeter of the facility's boundary to determine if the following conditions exist:

(A) All wells have been constructed in a manner to protect public health, safety, and the environment.

(B) All abandoned wells, including oil, gas, water, and monitoring wells, have been properly plugged.

(b) Each applicant shall conduct a regional geological evaluation to determine if the integrity of the proposed storage cavern will be adversely affected by either of the following:

(1) Salt thinning due to any stratigraphic change; or

(2) a dissolution zone in the salt.

(c) Each applicant shall determine if the facility's location is in a floodplain or flood-prone area.

(d) No new underground natural gas storage facility boundary or the expansion of an existing facility's boundary shall be located less than one mile from any existing underground porosity storage facility.

(e) Each applicant shall identify potential risks to the storage operation from activities conducted at adjacent facilities.

(f) Each applicant shall identify all utilities having right-of-way, including pipeline, railway, roadway, and electrical lines, and shall assess the potential impact of the utilities on the location or operation of the storage facility. If facilities are exposed and subject to hazards, including vehicular traffic, railroads, electrical power lines, and aircraft or shipping traffic, the facility shall be protected from accidental damage, by distance or barricades.

(g) No outer boundary of an underground natural gas storage cavern shall be less than 100 feet from any of the following:

(1) The property boundary of any owners who have not consented to subsurface storage under their property;

(2) any existing surface structure not owned by the facility's owner; or

(3) any public transportation artery. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-9. Financial assurance for underground natural gas storage facility closure.

(a) Each permittee of an underground natural gas storage facility shall establish financial assurance for the following:

(1) Closure of the facility; and

(2) the plugging of any underground natural gas storage well.

(b) Each permittee of an existing underground natural gas storage well and each applicant for a permit for a new underground natural gas storage well shall submit proof of financial assurance with the permit application and, thereafter, annually on or before January 31 of each year. The following requirements shall apply:

(1) Each permittee and each applicant shall submit a detailed written estimate, in current dollars, of the cost to close all underground natural gas storage wells and storage caverns at the facility with closure procedures specified in K.A.R. 28-45a-18. The estimate shall be reviewed and approved by a professional engineer or licensed geologist.

(2) Each permittee and each applicant shall develop an estimate of the closure cost for all underground natural gas storage wells and storage caverns at the facility based on the cost charged by a third party to plug the underground natural gas storage wells.

(3) Each permittee shall increase the closure cost estimate and the amount of financial assur-

ance provided if any change in the facility operation or closure plan increases the maximum cost of closure at any time.

(c) Each permittee shall provide continuous financial assurance coverage for closure until the secretary approves the facility closure.

(d) Each permittee and each applicant shall comply with the provisions of the department's document titled "procedure for demonstrating financial assurance for an underground natural gas storage well, procedure #: UICLPG-7," dated March 2003, which is hereby adopted by reference. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-10. Operations and maintenance plan.

(a) Each permittee of an existing underground natural gas storage facility and each applicant for a permit for a new underground natural gas storage facility shall submit a plan for the long-term operation and maintenance of the facility with the permit application.

(b) Each operation and maintenance plan shall include the following:

(1) A description of the methods to be used to prevent the overpressuring of wells and storage caverns;

(2) a plan map view of the location of any disposal wells or corrosion control wells; and

(3) the location, depth, and construction details for all shallow and deep groundwater monitoring wells.

(c) Each permittee shall maintain at the facility and make available for inspection by the secretary the following information:

(1) A location map of all wells within the facility's boundaries and a listing of the global positioning system coordinates for each well;

(2) a schematic of the gathering line system that connects all wells within the underground storage facility to a central distribution point; and

(3) a schematic of the product lines for each cavern.

(d) Each permittee shall utilize a blanket pad to prevent the uncontrolled leaching of the storage cavern roof during solutioning or washing. Each permittee shall submit the description of a procedure for solutioning or washing the cavern, with the operations and maintenance plan, to the secretary for review and consideration for approval. The procedure description shall include the following:

(1) A list of acceptable blanket pad materials;

(2) the methods for monitoring the solutioning or washing process; and

(3) a monitoring schedule.

(e) The criteria for determining the maximum allowable operating pressure shall be as follows:

(1) The maximum allowable operating pressure and test pressure shall not exceed 0.75 pounds per square inch per foot of depth measured at the higher elevation of either the casing seat or the highest interior elevation of the storage cavern roof.

(2) The storage cavern shall not be subjected to pressures in excess of the maximum allowable operating pressure, including pressure pulsations and abnormal operating conditions.

(f) Each permittee shall maintain a minimum operating pressure that is protective of cavern integrity at each underground natural gas cavern.

(g) Each permittee shall meet the notification requirements in the facility's emergency response plan, give oral notification to the department within two hours, and submit written notification within one week to the department if any of the following events occurs:

(1) The overpressuring of a storage cavern;

(2) the loss of integrity for the underground natural gas storage well;

(3) the release of product or any other parameter that poses a threat to public health, safety, or the environment;

(4) any other condition that could pose a risk to public health, safety, or the environment;

(5) the establishment of communication between caverns;

(6) the triggering of any alarms verifying that permit safety requirements have been exceeded; or

(7) any equipment malfunction or failure that could result in potential harm to public health, safety, or the environment. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-11. Emergency response plan and safety and security measures.

(a) Each permittee of an existing underground natural gas storage facility and each applicant for a permit for a proposed underground natural gas storage facility shall prepare an emergency response plan as part of the permit application or the plugging plan. The following requirements shall apply:

(1) Each permittee and each applicant shall maintain the emergency response plan at the fa-

cility and at the company headquarters and shall make it available for inspection by the secretary.

(2) Each permittee and each applicant shall make a copy of the plan available to all coordinating agencies or committees involved in emergency response.

(b) Each permittee shall update the plan annually and also shall update the plan whenever new information regarding the requirements for the emergency response plan becomes available.

(c) Each plan shall include a description of the facility's response to the following events:

- (1) Spills and releases;
- (2) fires and explosions;
- (3) cavern subsidence and collapse; and
- (4) any other activity that endangers public health and safety, or that constitutes a threat to the environment.

(d) Each plan shall include the following information:

(1) A description of the warning systems in operation at the facility;

(2) a description of the facility's emergency response communication system that includes the following:

(A) A plat showing the location of all occupied buildings within two miles of the facility's perimeter; and

(B) a list of addresses and telephone numbers for all persons to contact within two miles of the facility's perimeter if a release or emergency condition occurs;

(3) the procedures for coordination of emergency response with local emergency planning committees, including emergency notification and evacuation of citizens and employees;

(4) a description of employee training for emergency response;

(5) a plat of the facility, showing locations for the following:

- (A) All underground storage wells;
- (B) all underground injection control wells;
- (C) all monitoring wells;
- (D) all brine and product lines, if present;
- (E) railroad and transportation routes;
- (F) all brine ponds, if present; and
- (G) any other appurtenances at the facility; and
- (6) a plan map of all man-made surface structures and any construction activities within one mile of the facility's perimeter.

(e) Each permittee shall establish an educational program for community safety and awareness of the emergency response plan.

(f) Each permittee of an underground natural gas storage facility shall provide security measures to protect the public and to prevent unauthorized access. These security measures shall include the following:

(1) Methods for securing the facility from unauthorized entry and for providing a convenient opportunity for escape to a place of safety;

(2) clearly visible, permanent signs at all points of entry and along the facility's boundary, identifying the well or storage facility name, owner, and contact telephone number;

(3) security lighting;

(4) alarm systems;

(5) appropriate warning signs in areas that may contain accumulations of hazardous or noxious vapors or where physical hazards exist; and

(6) a direct communication link with the control room or remote control center for service and maintenance crews.

(g) Warning systems and alarms shall consist of the following:

(1) Leak detectors, fire detectors, heat sensors, pressure sensors, and emergency shutdown instrumentation shall be integrated with warning systems audible and visible in the local control room and at any remote control center;

(2) circuitry designed so that the failure of a detector or heat sensor, excluding meltdown and fused devices, will activate the warning; and

(3) a manually operated alarm, audible to facility personnel.

(h) Each wellhead and storage cavern shall be protected with safety devices to prevent pressures in excess of the maximum allowable operating pressure from being exerted on the storage well or storage cavern and to prevent backflow if a flow-line ruptures.

(i) Each wellhead shall be equipped with manual isolation valves. Each port on each wellhead shall be equipped with either a valve or a blind flange. The valve or blind flange shall be rated at the same pressure as that for the wellhead.

(j) Each permittee shall install a supervisory control and data acquisition monitoring system approved by the secretary to monitor storage operations for individual storage caverns. Each of the following instruments shall be connected to an alarm:

(1) Flow indicators for natural gas;

(2) gas indicators; and

(3) pressure indicators on the product lines of the wellhead.

(k) Each permittee shall install emergency shut-down valves on all natural gas lines and, if present, brine or water lines. Each emergency shutdown valve shall meet the following requirements:

(1) Meet either of the following pressure-ratings:

(A) Be rated at least equivalent to 125% of the maximum pressure that could be exerted at the surface; or

(B) Meet a pressure-rating standard equivalent to that specified in paragraph (k)(1)(A) and determined by the secretary to be protective of public health, safety, and the environment;

(2) fail to a closed position;

(3) be capable of remote and local operation; and

(4) be activated by any overpressuring in the natural gas system.

(l) Each permittee shall conduct annual inspections of all wellhead instrumentation.

(m) Each permittee shall function-test each critical control system and emergency shutdown valve semiannually.

(n) Each permittee shall perform trip testing of each loop, including the instrumentation, valves, shutdown equipment, and all wiring connections, to ensure the integrity of the circuit.

(o) Each permittee shall ensure that the equipment automatically closes all inlets and outlets to the storage cavern and safely shuts down or diverts any operation associated with the storage cavern, in case of overfilling or emergency.

(p) Each permittee shall ensure that the automatic valve closure times meet the valve design limits for closure times.

(q) Each permittee shall cease operations or shall comply with the instructions from the secretary if the secretary determines that an imminent threat to public health, safety, or the environment exists due to any unsafe operating condition. The permittee may resume operations if the secretary determines that the facility's operations no longer pose a risk to public health, safety, or the environment. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-12. Design and construction of underground natural gas storage wells. (a) Each permittee of an existing underground natural gas storage well and each applicant for a permit for a new underground natural gas storage well shall ensure that each underground natural gas storage well is constructed with surface casing. The following requirements shall apply:

(1) Surface casing shall be set through all fresh and usable water formations and into competent bedrock.

(2) Surface casing shall be cemented by circulating cement through the bottom of the casing to the surface.

(3) The annular space between the casing and the formation shall be filled with cement.

(b) Each new and each existing underground natural gas storage well shall have double casing protection. The following requirements shall apply:

(1) The production casing shall extend a minimum of 105 feet into the salt formation.

(2) A tubing and mechanical packer assembly shall be installed inside the production casing.

(3) The packer shall be set at a depth approved by the secretary for the protection of public health, safety, and the environment.

(c) Each permittee of an underground natural gas storage facility shall install and maintain a corrosion control system. The following requirements shall apply:

(1) The corrosion control system shall be capable of protecting the well casings.

(2) The corrosion control system shall be assessed according to the protocol and time schedule recommended by the corrosion control system manufacturer, and the results reported to the secretary.

(d) The casing and tubing shall meet the performance standards for collapse resistance, internal yield pressure, and pipe body yield strength for the well's setting depths using criteria specified in the American petroleum institute's bulletin 5C2, twenty-first edition, dated October 1999, as adopted by reference in K.A.R. 28-45-15.

(e) Only new steel casing shall be installed in new underground natural gas wells. Used parts, materials, and equipment that have been tested and certified for continued service may be used for repairs.

(f) Liners shall extend from the surface to a depth near the bottom of the production casing allowing room for any workover operations.

(g) The following cementing requirements shall be met:

(1) The cement shall be compatible with the rock formation waters and the drilling fluids. Salt-saturated cement shall be used when cementing through the salt section.

(2) The cement across the confining zone and to the surface shall have a compressive strength of not less than 1,000 pounds per square inch.

(3) Remedial cementing shall be completed if there is evidence of either of the following:

(A) Communication between the confining zone and other horizons; or

(B) annular voids that would allow either fluid contact with the casing or channeling across the confining zone or above the confining zone.

(4) The following requirements for cement evaluation shall apply:

(A) Samples shall be obtained at the start and end of the cementing operation for evaluation of cement properties. All cement samples collected shall be representative of the cement being utilized.

(B) All samples shall be tested for compressive strength.

(C) A cement bond log shall be run on the surface casing, intermediate casing, and cemented production casing after the neat cement has cured for a minimum of 72 hours.

(h) Casing patches shall be prohibited, unless the secretary determines that the casing patches are protective of public health, safety, and the environment.

(i) Each permittee shall pressure-test the production casing for leaks when the well construction is completed.

(j) Each permittee shall submit a casing inspection base log for the entire cased interval for the innermost casing string or for the cemented liner that extends the entire length of the casing after the well construction is completed.

(k) Each container utilized in drilling or workover operations to contain workover wastes, drilling fluids, drilling mud, and drill cuttings shall be required to be approved in advance by the secretary. Drilling fluids, drilling mud, and drill cuttings shall be disposed of in a manner determined by the secretary to be protective of public health, safety, and the environment.

(l) A licensed professional engineer or licensed geologist, or licensed professional engineer's or licensed geologist's designee, shall supervise the installation of each underground natural gas storage well. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-13. Monitoring. (a) Each permittee shall ensure that each underground natural gas storage well is equipped with pressure sensors to continuously monitor wellhead pressures on the product line at the wellhead. The following requirements shall apply:

(1) The pressure sensor shall be capable of recording the maximum and minimum operating pressures during a 24-hour period.

(2) The pressure sensor shall be capable of recording operating pressures at an interval approved by the secretary.

(3) The permittee shall provide pressure data, including historic continuous monitoring, to the secretary upon request.

(b) Each permittee shall submit a plan for any monitoring activity, including logging and sonar surveys, to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, at least 60 days before the commencement of these monitoring activities.

(c) Each permittee shall submit a summary and the results of the monitoring activity to the secretary within 30 days after completion of the monitoring activity.

(d) Each permittee shall monitor the thickness of the salt roof for each cavern with gamma ray and density logs or other log specified in K.A.R. 28-45a-4 (k) as follows:

(1) Every five years;

(2) at any time that the secretary determines that cavern integrity is suspect; and

(3) before plugging the well.

(e) Each permittee shall determine the cavern storage capacity and the cavern geometry with a sonar survey. The sonar survey shall be conducted as follows:

(1) Before placing the natural gas storage cavern in service;

(2) for determining the capacity of the natural gas storage cavern, if the capacity determined by the volume of gas injected into and withdrawn from the storage cavern does not correspond with the reported cavern capacity;

(3) before plugging the well, if a sonar survey has not been run in the past five years;

(4) for determining the stability of the cavern and the overburden, if the salt roof thickness and cavern geometry indicate that the stability of the cavern or overburden is at risk; and

(5) after any solutioning that results in a solution volume increase of 20 percent or more of cavern capacity.

(f) Any permittee may use an alternative method for the sonar survey if the secretary determines that the alternative method is substantially equivalent to the method specified in subsection (e). The permittee shall submit the following information:

(1) A description of the proposed method and the theory for its operation;

(2) a description of the storage well and cavern conditions under which the log can be used;

(3) the procedure for interpreting the survey results; and

(4) an interpretation of the capacity and stability of the cavern upon completion of the survey.

(g) Each permittee of an underground natural gas storage well equipped with a production casing and a tubing and packer assembly shall monitor the annular space. Each permittee shall submit the following to the secretary for review and consideration for approval:

(1) A diagram of the well construction; and

(2) a plan for monitoring the annulus that includes the following:

(A) A diagram of the instrumentation for monitoring the annular pressure and fluid levels;

(B) a description of how the annular pressure and fluid levels will be recorded; and

(C) a description of, and justification for, the testing methods to demonstrate the mechanical integrity of the system.

(h) Each permittee shall submit a survey plan for monitoring ground subsidence, with the permit application, to the secretary for review and consideration for approval.

(1) The survey plan shall include the following information:

(A) A description of the method for conducting the elevation survey; and

(B) the criteria for establishing monuments, benchmarks, and wellhead survey points.

(2) The criteria for subsidence monitoring shall be the following:

(A) Level measurements to the accuracy of 0.01 foot shall be made.

(B) Surface elevation changes in excess of 0.10 foot shall be reported within 24 hours to the department.

(C) No established benchmark shall be changed unless the permittee submits a justification that the change is protective of public health, safety, and the environment.

(D) If a benchmark is changed, the elevation change from the previous benchmark shall be noted in the elevation survey report.

(E) Each permittee shall submit the elevation before and after any wellhead work that results in a change in the survey point at the wellhead.

(3) The survey shall be conducted by a licensed professional land surveyor.

(4) Biennial survey results, including certified and stamped field notes, shall be submitted to the department within 30 days after completion of the survey.

(i) Each permittee shall submit an inventory balance plan for measuring the volume of natural gas injected or withdrawn from each underground natural gas storage well, including methods for measuring and verifying volume, to the secretary for review and consideration for approval. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-14. Testing and inspections. (a) Each permittee shall submit a plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment before conducting any underground natural gas storage well or cavern testing. Testing shall not commence without prior approval from the secretary.

(b) Each permittee shall submit a summary of the test to the secretary within 45 days after completion of the test. The summary shall include the following:

(1) A chronology of the test;

(2) copies of all logs;

(3) storage well completion information;

(4) pressure readings;

(5) volume measurements; and

(6) an explanation of the test results.

(c) Each permittee shall test each underground natural gas storage well and each underground natural gas storage cavern for integrity. The following requirements shall apply:

(1) Each permittee of any new underground natural gas storage cavern shall test for integrity using a nitrogen interface test before the cavern is initially placed in service.

(2) Each permittee shall conduct a hydraulic pressure test for each underground natural gas storage well every five years.

(3) Each permittee shall conduct a pressure test for each underground natural gas storage cavern every five years.

(4) Integrity tests shall be conducted as follows:

(A) After each workover;

(B) before injecting working gas into any existing underground natural gas storage well that was prohibited from being injected with working gas as specified in K.S.A. 55-1,117 and amendments thereto; and

(C) before plugging the well.

(5) Each permittee shall submit a test procedure plan to the secretary, on a form furnished by the department, for review and consideration for approval, at least 60 days before test commencement. The plan shall include the following:

- (A) The justification for the test parameters;
- (B) the test sensitivities; and
- (C) the pass and fail criteria for the test.

(6) Each permittee shall notify the secretary at least five days before conducting any integrity test.

(7) The integrity test shall be conducted at the maximum allowable operating pressure.

(8) All test procedures shall use certified gauges and pressure transducers that are calibrated annually.

(d) Any permittee may use an alternative integrity test method if the secretary determines that the alternative test method is substantially equivalent to the integrity test specified in subsection (c). The permittee shall submit the following information:

(1) A description of the test method and the theory of operation including the test sensitivities, a justification for the test parameters, and the pass and fail criteria for the test;

(2) a description of the well and cavern conditions under which the test can be conducted;

(3) the procedure for interpreting the test results; and

(4) an interpretation of the test upon completion of the test.

(e) Each permittee shall ensure the mechanical integrity of the underground natural gas storage cavern and well before placing the cavern and well into service.

(f) Each permittee shall submit a casing evaluation for each underground natural gas storage well. Acceptable casing evaluation methods shall include magnetic flux and ultrasonic imaging.

(g) Any permittee may use an alternative casing evaluation method if the secretary determines that the alternative casing evaluation method is substantially equivalent to the casing evaluation methods specified in subsection (f). The permittee shall meet the following requirements:

(1) Each permittee shall submit a description of the logging method, including the theory of operation and the well conditions suitable for log use.

(2) Each permittee shall submit the specifications for the logging tool, including tool dimensions, maximum temperature and pressure rating,

recommended logging speed, approximate image resolution, and hole size range.

(3) Each permittee shall describe the capabilities of the log for determining the following:

(A) The presence of any metal loss due to either of the following:

- (i) Internal or external corrosion; or
- (ii) internal wear;

(B) the degree of penetration of the corrosion or the casing defect; and

(C) the circumferential extent of the corrosion or the casing defect.

(4) Each permittee shall submit a log and an interpretation of the log to the secretary.

(h) Each permittee shall submit a casing evaluation according to the following schedule:

(1) Every 10 years;

(2) before the injection of working gas in an existing underground natural gas storage well; and

(3) after any workover in which the injection string is pulled, if present.

(i) A licensed professional engineer or a licensed geologist, or a licensed professional engineer's or licensed geologist's designee, shall supervise all test procedures and associated field activity.

(j) A licensed professional engineer or a licensed geologist shall review all test results.

(k) Each permittee shall visually inspect the wellhead monthly for any leakage.

(l) Each permittee shall conduct an inspection of facility records, using a form furnished by the department, every two years to ensure that the required records are being properly maintained. The permittee shall maintain these records at the facility and shall make the records available to the secretary upon request. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-15. Groundwater monitoring. (a)

Each permittee of an existing underground natural gas storage facility and each applicant for a permit for a new underground natural gas storage facility shall submit a groundwater monitoring plan with the permit application to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(b) Each permittee shall ensure that each groundwater monitoring well meets the following requirements:

(1) Each permittee shall set the screen in each shallow monitoring well at a depth that is inclusive of the seasonal fluctuation of the water table.

(2) Each permittee shall ensure that all deep groundwater monitoring wells extend a minimum of 25 feet into the bedrock, or to a depth based on the geology and hydrogeology at the facility and approved by the secretary.

(c) Each well location and the spacing between all well locations shall be based on the geology and the hydrogeology at the facility and approved by the secretary.

(d) Each permittee shall submit a quality assurance plan, including techniques prescribed for sampling and analysis, with the permit application to the secretary for review and consideration for approval to ensure protection of public health, safety, and the environment.

(e) Each permittee shall collect groundwater samples and analyze the samples for chlorides and any other parameter determined by the secretary to pose a threat to public health, safety, and the environment. The reporting format shall be determined by the secretary.

(f) Each permittee shall submit the results for chloride analyses from groundwater samples to the department on a quarterly basis.

(g) Each permittee shall monitor monthly for the presence of combustible gas in the headspace in monitoring wells and shall submit the results to the department on a quarterly basis.

(h) Each permittee shall submit a static groundwater level measurement for each monitoring well with the quarterly chloride results specified in subsection (f).

(i) Any permittee of an underground storage facility where groundwater chloride concentrations exceed 250 milligrams per liter may be required by the secretary to submit a work plan, for review and consideration for approval, that describes methods to delineate any potential source area and to control migration of the chloride contamination.

(j) Each permittee of a facility with any detection of combustible gas shall submit a work plan that describes the methods to eliminate any source areas and return the combustible gas levels to levels that do not pose a risk to public health, safety, and the environment. The plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-16. Record requirements and retention. (a) Each permittee shall complete and submit an annual report, on a form furnished by the department, on or before April 1 of each year. The annual report shall include the following:

(1) A description of any incident of uncontrolled or unanticipated product loss;

(2) the well number and date of any logs or sonar surveys conducted;

(3) the estimated storage capacity for all unplugged caverns;

(4) a list of any caverns being washed;

(5) a list of the product volume injected and withdrawn for each well; and

(6) a list, by well number, of the maximum and minimum product storage pressures encountered during the report year.

(b) Each permittee shall retain and maintain the following records at the facility for the following time periods:

(1) For 10 years, the following records:

(A) The maximum and minimum operating pressures for each well; and

(B) the annual inspections required by the secretary;

(2) for the life of the underground natural gas storage well, the following records:

(A) The casing records for each well;

(B) the cementing records for each well; and

(C) all workover records; and

(3) for the life of the facility, the following records:

(A) All logging events;

(B) all mechanical integrity tests and other testing;

(C) all groundwater monitoring data; and

(D) all correspondence relating to the permit, including electronic mail.

(c) Surface elevation surveys shall be maintained and retained for the life of facility plus 20 years after the facility's closure.

(d) All required facility records, reports, and documents shall be transferred to the new permittee with the transfer of the permit. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-17. Well workovers. (a) Each permittee shall submit a workover plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment. The following provisions shall apply:

(1) Each permittee shall submit the workover plan at least 10 days before performing any downhole or wellhead work that involves dismantling or removal of the wellhead.

(2) The permittee shall not be required to submit a workover plan for routine maintenance or replacement of gauges, sensors, or valves.

(3) Verbal authorization to initiate downhole or wellhead work may be issued by the secretary.

(b) Each permittee shall ensure that a blowout preventer with a pressure rating greater than the pressures to be encountered is used during each workover.

(c) Each permittee shall ensure that logging procedures are conducted through a lubricator unit with a pressure rating greater than the pressures anticipated to be encountered.

(d) Each permittee shall provide the person performing the logging or well workover with all relevant information concerning the status and condition of the well and storage cavern before initiating any work. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-18. Plugging requirements. (a) Each permittee shall submit a plugging plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, at least 60 days before the plugging event.

(b) Each permittee shall follow plugging procedures specified in the department's document titled "procedure for the plugging and abandonment of a natural gas storage well, procedure #: UICLPG-8," dated March 2003, which is hereby adopted by reference.

(c) Each permittee shall restore and preserve the integrity of the site as follows:

(1) Dispose of all liquid waste in an environmentally safe manner;

(2) clear the area of debris;

(3) drain and fill all excavations;

(4) remove all unused concrete bases, machinery, and materials; and

(5) level and restore the site. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

28-45a-19. Underground natural gas storage fees. (a) Effective on and after January 1, 2004, each permittee shall submit an annual

permit fee of \$18,890 per facility and \$305 per unplugged underground natural gas storage well on or before April 1 of each year.

(b) Each permittee shall submit a permit fee of \$305 for any unplugged underground natural gas storage well inadvertently omitted from the collection of permit fees for the year 2003.

(c) Each applicant for a permit for a proposed new underground natural gas storage well shall submit a fee of \$700 with the permit application.

(d) Fees shall be made payable to the "Kansas department of health and environment—subsurface hydrocarbon storage fund."

(e) The fees collected under the provisions of this regulation shall not be refunded.

(f) If the ownership of a storage well or storage facility changes during the term of a valid permit, no additional fee shall be required, unless a change occurs that results in a new storage well or an expanded facility operation. (Authorized by and implementing K.S.A. 2002 Supp. 55-1,117; effective, T-28-4-1-03, April 1, 2003; effective Aug. 8, 2003.)

Article 45b.—UNDERGROUND CRUDE OIL STORAGE WELLS AND ASSOCIATED BRINE PONDS

28-45b-1. Definitions. (a) "Active well" means an unplugged well that is in service or in monitoring status.

(b) "American petroleum institute gravity" and "API gravity" mean the specific gravity scale developed by the American petroleum institute for measuring the relative density of various petroleum liquids, expressed in degrees API.

(c) "Applicant" means the operator and the owner requesting a permit as specified in this article. If the operator and the owner are not the same person, the owner and the operator shall jointly submit an application for a permit.

(d) "Brine" means saline water with a sodium chloride concentration equal to or greater than 90 percent.

(e) "Brine pond" means the excavated or diked structure used for the surface containment of brine used in the creation, maintenance, and operation of an underground crude oil storage well.

(f) "Crude oil" means unrefined, liquid petroleum.

(g) "Crude oil reserve" means the storage of crude oil for future use.

(h) "Crude oil storage well," "underground crude oil storage well," and "storage well" mean a

well used for the injection or withdrawal of crude oil into or out of an underground crude oil storage cavern.

(i) “Department” means Kansas department of health and environment.

(j) “Draft permit” means a document that is pending approval by the secretary to be issued as a permit.

(k) “Fracture gradient” means the pressure gradient, measured in pounds per square inch per foot, that causes the geological formations to physically fracture.

(l) “Freshwater” means water containing not more than 1,000 milligrams per liter of total dissolved solids (TDS).

(m) “Licensed geologist” means a geologist licensed to practice geology in Kansas by the Kansas board of technical professions.

(n) “Licensed professional engineer” means a professional engineer licensed to practice engineering in Kansas by the Kansas board of technical professions.

(o) “Licensed professional land surveyor” means a professional land surveyor licensed to practice land surveying in Kansas by the Kansas board of technical professions.

(p) “Liner” means the casing normally installed within the production casing.

(q) “Maximum allowable operating pressure” means the maximum pressure authorized by the department and measured at the product side of the wellhead.

(r) “Maximum allowable synthetic membrane liner leakage rate” means a monitored or a calculated leakage rate of 10 percent of the collection and leak return system capacity.

(s) “Maximum operating pressure” means the maximum pressure monitored during a 24-hour period and measured at the product side of the wellhead.

(t) “Monitoring status” means temporary status for a well that has been placed out of service by removing the product and filling the cavern with brine.

(u) “Municipal population center” means an incorporated city.

(v) “Operator” means the person recognized by the secretary as being responsible for the physical operation of an underground crude oil storage facility or a brine pond.

(w) “Owner” means the person owning all or part of any underground crude oil storage facility or brine pond.

(x) “Permit” means an authorization, license, or equivalent control document issued to the owner and the operator by the secretary. A permit may be issued for any of the following:

(1) A new underground crude oil storage facility and the associated crude oil storage wells;

(2) an existing underground crude oil storage facility and the associated crude oil storage wells; or

(3) a brine pond.

(y) “Permittee” means the owner and the operator issued a permit, as defined in this regulation, by the secretary.

(z) “Person” means any individual, company, corporation, institution, association, partnership, municipality, township, and local, state, or federal agency.

(aa) “Plugged well” means a storage well that has been plugged or placed into plugging-monitoring status pursuant to K.A.R. 28-45b-18.

(bb) “Plugging-monitoring status” means the status of a storage well that will not be returned to active status but will be filled with brine to monitor cavern stabilization in lieu of plugging.

(cc) “Porosity storage” means the storage of hydrocarbon gas in underground porous and permeable strata that have been converted to hydrocarbon gas storage.

(dd) “Pressure gradient” means the ratio of pressure per unit depth, expressed as pounds per square inch per foot of depth.

(ee) “Product” means crude oil.

(ff) “Saturated brine” means saline water with a sodium chloride concentration that is equal to or greater than 90 percent.

(gg) “Secretary” means secretary of the department of health and environment.

(hh) “Solutioning” means the process of injecting fluid into a well to dissolve salt or any other readily soluble rock or mineral.

(ii) “Sour crude oil” means crude oil with a sulfur content greater than 0.5 percent.

(jj) “Supervisory control and data acquisition” means an automated surveillance system in which the monitoring and control of storage activities are accomplished at a central or remote location.

(kk) “Sweet crude oil” means crude oil with a sulfur content not greater than 0.5 percent by weight.

(ll) “Type” means the description of the product that includes American petroleum institute gravity, non-hydrocarbon impurities, and hydrogen sulfide content.

(mm) “Underground crude oil storage cavern,” “cavern,” and “storage cavern” mean the storage space for crude oil created in a salt formation by solution mining.

(nn) “Underground crude oil storage facility” and “facility” mean the acreage associated with the storage field, with facility boundaries approved by the secretary. This term shall include the brine ponds, storage wells, wellbore tubular goods, the wellheads, and any related equipment, including any appurtenances associated with the well field.

(oo) “Unplugged,” when used to describe a well, means a storage well that either is not plugged or is in plugging-monitoring status.

(pp) “Unsaturated brine” means saline water with a sodium chloride concentration less than 90 percent.

(qq) “Usable water formation” means an aquifer or any portion of the aquifer that meets any of the following criteria:

- (1) Supplies any public water system;
- (2) contains a supply of groundwater that is sufficient to supply a public water system and that currently supplies drinking water for human consumption; or
- (3) contains fewer than 10,000 milligrams per liter total dissolved solids and is not an exempted aquifer.

(rr) “Variance” means the secretary’s written approval authorizing an alternative action to one or more of the requirements of these regulations. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-2. Permit required for facilities and storage wells; variances. (a) No person shall create, operate, or maintain an underground crude oil storage facility or any crude oil storage well without first obtaining a permit from the secretary.

(b) The storage of crude oil in caverns constructed in any rock formations other than bedded salt shall be prohibited.

(c) A variance to any requirement of this article may be granted by the secretary if both of the following conditions are met:

- (1) The variance is protective of public health, safety, and the environment.
- (2) The applicant or permittee agrees to perform any additional testing, monitoring, or well improvements, or any combination, if required by the secretary.

(d) Each applicant or permittee seeking a variance shall submit a written request, including justification for the variance and any supporting data, to the secretary for review and consideration for approval. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-3. Well conversions and reentry.

(a) The conversion of an existing well that was not originally designed for crude oil storage to an underground crude oil storage well shall be considered for approval if both of the following conditions are met:

(1) The applicant submits a completed application as required by K.A.R. 28-45b-4.

(2) The secretary determines that the conversion is protective of public health, safety, and the environment.

(b) Any permittee may convert an unplugged underground crude oil storage well to monitoring status if all of the following requirements are met:

(1) Each permittee shall verify the integrity of the storage well and cavern by conducting a mechanical integrity test before converting the well to monitoring status.

(2) Each permittee shall run a gamma-density log, a thermal neutron decay time log, or a pulsed neutron log to verify the roof thickness before converting the well to monitoring status.

(3) Each permittee shall meet the requirements specified in the department’s document titled “procedure for converting a crude oil storage well to monitoring status,” procedure #UICLPG-27, dated October 2008, which is hereby adopted by reference.

(4) Each permittee of an underground crude oil storage cavern that is in monitoring status shall conduct a casing inspection evaluation before placing the cavern into service. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-4. Permit required for facility and associated storage wells.

(a) Each applicant who intends to construct a new underground crude oil storage well shall submit a completed permit application to the secretary, on a form approved by the department, at least 180 days before the proposed commencement date for the construction of the new crude oil storage well. Well construction shall not begin until the secretary has issued the permit.

(b) Each applicant who intends to convert an existing well to a crude oil storage well shall submit a completed permit application to the secretary, on a form approved by the department, at least 180 days before the proposed date for operation of the crude oil storage well. Well modifications and operations shall not commence until the secretary has issued the permit.

(c) Each applicant who intends to construct a new storage well for the purpose of creating a crude oil reserve shall submit a completed permit application to the secretary at least 180 days before the proposed commencement date for storage well construction. Well construction shall not begin until the secretary has issued the permit.

(d) Each applicant who wishes to convert an existing storage well for the purpose of creating a crude oil reserve shall submit a completed permit application to the secretary at least 180 days before the proposed date for operation of the crude oil storage well. Well modifications and operations shall not commence until the secretary has issued the permit.

(e) Each applicant who intends to create a crude oil reserve shall include the following with the permit application:

(1) A description of monitoring and testing methods to demonstrate that the quality of the crude oil is maintained during storage;

(2) a description of methods and a schedule for routinely testing the integrity of the wellhead, casing, and transfer equipment; and

(3) a description of the brine transfer system, including brine source, disposal method, and means of transfer.

(f) Upon review of each application, one of the following shall be issued by the secretary:

(1) A permit, if the application is approved; or

(2) a notice that the permit has been denied if the applicant has not complied with the requirements of this article. The notice shall include justification for the permit denial.

(g) Each application for a permit shall include a report prepared by a licensed geologist and shall include the following:

(1) An evaluation of the geology and hydrogeology, including cross-sections, isopach and structure maps of the salt formation, and water-level or potentiometric maps;

(2) a regional stratigraphic evaluation;

(3) local and regional structural analyses, including maps, cross-sections, and available geophysical data;

(4) a flood assessment identifying floodplain and flood-prone areas, including the following:

(A) Flood response procedures; and

(B) design criteria for the well and facility equipment; and

(5) an assessment of the potential for ground subsidence.

(h) Each applicant shall submit the following information with the application:

(1) A plan view map showing locations of all water, solution-mining, storage, monitoring, disposal, injection, oil, and gas wells within a one-mile perimeter of the facility's boundary; and

(2) a plan view map of man-made surface structures and activities within a one-mile perimeter of the facility's boundary.

(i) Each permittee shall submit a compliance audit every 10 years, on a form furnished by the department, for review and consideration for approval for the continued operation of each storage well.

(j) Each permittee shall submit a sample log of well cuttings from any new well drilled at the facility, including new crude oil storage wells, monitoring wells, and stratigraphic test holes.

(1) Cuttings shall be collected at 10-foot intervals from surface to total well depth or at an interval specified by the department.

(2) Well cuttings shall be collected, described, and logged as specified in the department's document titled "procedure for sample logging," which is adopted by reference in K.A.R. 28-45-6a.

(3) The collection of cuttings shall be supervised by a licensed geologist or a licensed geologist's designee.

(4) The description and logging of the sample cuttings shall be performed by a licensed geologist.

(5) Each permittee shall submit a sample log and a dry sample set to the department within 45 days after the completion of the well.

(k) Each permittee shall provide a minimum of one core from each facility. The following provisions shall apply:

(1) Each permittee shall submit a plan for a new core describing the coring interval, coring procedures, and core testing with the permit application to the secretary for review and consideration for approval. The plan shall be submitted at least 60 days before the coring event.

(2) Each permittee shall submit the core analysis for a new core after installing the first storage well and before developing the storage field.

(3) Any permittee may submit existing core data if the secretary determines that the core is representative of the geology of the area.

(4) Each permittee shall submit the core analysis for an approved existing core with the permit application.

(5) Each permittee shall make the core available for inspection upon request by the secretary.

(1) Each permittee shall submit a water analysis for any water-bearing formation encountered in drilling a new monitoring well. The water shall be analyzed for the following parameters:

(1) Chloride;

(2) total dissolved solids; and

(3) any parameter that the secretary determines could pose a potential threat to public health, safety, and the environment.

(m) Each permittee shall ensure that the stored crude oil, formation water, lithology, and substances used in the solutioning of the storage caverns are compatible.

(n) Each permittee shall submit open-hole logs for any new crude oil storage well. The logging interval shall be from the surface to at least 100 feet below the top of the salt section. At a minimum, the following logs shall be run:

(1) A gamma ray log;

(2) a neutron log, if the source is registered in Kansas, or a sonic log;

(3) a density log; and

(4) a caliper log.

(o) Any permittee may use an alternative log if the secretary determines that the alternative log is substantially equivalent to one of the logs specified in subsection (n). The permittee shall submit the following information:

(1) A description of the log and the theory of operation for that log;

(2) a description of the field conditions under which the log can be used;

(3) the procedure for interpreting the log; and

(4) an interpretation of the log upon completion of the logging event.

(p) If a facility has a new storage cavern, the permittee shall ensure that a minimum salt roof thickness of 100 feet is maintained above the storage cavern.

(q) Each permittee shall submit supporting data showing that a minimum crude oil inventory in each storage cavern shall be maintained to protect the salt roof during short time periods when changing service, conducting workover activities, or performing surface facility maintenance.

(r) If a facility has an existing cavern approved for crude oil storage with a salt roof thickness greater than 50 feet but less than 100 feet, the permittee shall meet the following requirements:

(1) The permittee shall use only saturated brine to displace product.

(2) The permittee shall submit a schedule for monitoring brine salinity.

(3) The salt roof thickness shall be monitored with gamma ray and density logs, or any other log specified in subsection (o), every three years.

(4) The permittee shall provide any additional information, including a geomechanical study from core analysis, that may be requested by the secretary to verify the integrity of the salt roof.

(s) Underground crude oil storage caverns with a salt roof thickness of 50 feet or less shall be prohibited.

(t) Underground communication between underground crude oil storage caverns in the upper 50 feet of the salt formation shall be prohibited.

(u) Underground communication between underground crude oil storage caverns below the upper 50 feet of the salt formation shall be prohibited, unless the secretary determines that the communication is protective of public health, safety, and the environment. The permittee shall submit the following:

(1) A sonar survey for each cavern that is in communication with another cavern; and

(2) a plan describing the monitoring and testing that the permittee will conduct to ensure that the integrity of the underground crude oil storage wells and caverns will be maintained.

(v) The horizontal distance separating new underground crude oil storage caverns shall be at least 100 feet between the cavern boundaries.

(w) Any existing cavern approved for crude oil storage with horizontal separation less than 100 feet may operate if the following requirements are met:

(1) Each permittee shall submit a justification for each existing underground crude oil storage cavern with horizontal separation less than 100 feet. The following requirements shall apply:

(A) The justification shall include spacing-to-diameter ratios, cavern pressure differentials, and analyses of cavern shape, size, and depth.

(B) The horizontal spacing shall be reevaluated every five years.

(2) Horizontal spacing of less than 50 feet between caverns shall be prohibited.

(x) The maximum horizontal diameter of each cavern shall not exceed 300 feet.

(y) Each permittee shall ensure the integrity of the storage well, including the wellhead and casing, and storage cavern before commissioning any new storage cavern into service. Storage operations may commence when the following requirements are met:

(1) The permittee shall submit a notice of completion of construction on a form furnished by the department.

(2) Each new storage well shall be inspected by the secretary before storage operations commence. If the well fails the inspection, the permittee shall not commence storage operations. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-5. Public notice. (a) Public notice shall be given by the secretary for any of the following permit actions:

(1) Any permit application for a crude oil storage well;

(2) the denial of a permit; or

(3) a scheduled hearing.

(b) Public notice and, if applicable, a copy of the draft permit shall be mailed or electronically mailed by the department to the permit applicant.

(c) Each public notice shall be mailed by the department to the following:

(1) Any person who submits a written request for placement on the mailing list;

(2) the official county newspaper of each county in which the lands affected by the application are located, for publication in at least two issues; and

(3) the Kansas register.

(d) Each public notice shall include the following information:

(1) The name and address of the department processing the permit action for which the notice is being given;

(2) the name and address of the person or company seeking the permit;

(3) a brief description of the business conducted at the facility or the activity described in the permit application;

(4) the name, address, and telephone number of the departmental contact whom interested persons may contact for further information, including copies of the application, draft permit, or any other appropriate information;

(5) a brief description of the comment procedures for public notice; and

(6) a statement of the procedure to request a hearing and any other procedures that allow public participation in the final permit decision.

(e) Any interested person may submit written comments on any permit action to the secretary during the 30-day public comment period. The following requirements shall apply:

(1) All comments shall be submitted by the close of the public comment period.

(2) All supporting materials submitted shall be included in full. The supporting materials shall not be incorporated by reference, unless the supporting materials are any of the following:

(A) Part of the administrative record in the same proceeding;

(B) state or federal statutes and regulations;

(C) state or environmental protection agency documents of general applicability; or

(D) other generally available reference materials.

(3) Commentators shall make supporting materials not already included in the administrative record available to the secretary.

(f) The response to all relevant comments concerning any permit actions and the reasons for changing any provisions in the draft permit shall be issued when the permit decision is issued.

(g) The response to comments shall be made available to the public upon request. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-6. Modification and transfer of a permit. (a) The automatic transfer of a permit shall be prohibited. The requirements for each permit transfer shall be as follows:

(1) Each person requesting a permit transfer shall notify the secretary at least 60 days before the effective date of the proposed transfer.

(2) Each owner and each operator shall comply with the conditions of the existing permit until the secretary reissues the permit.

(b) Any permit may be modified by the secretary under any of the following conditions:

(1) The secretary receives information that was not available when the permit was issued.

(2) The secretary receives a request for the modification of a permit.

(3) The secretary conducts a review of the permit file and determines that a modification is necessary.

(c) Only the permit actions subject to modification shall be reopened.

(d) Minor modifications that do not require public notification shall include the following, except as otherwise specified:

- (1) Correction of typographical errors;
 - (2) requirements for more frequent monitoring or reporting by the permittee;
 - (3) a date change in a schedule of compliance;
 - (4) a change in ownership or operational control of the facility, unless the secretary determines that public notification is necessary to protect the public interest;
 - (5) a change in construction requirements, if the secretary determines that the change is protective of public health, safety, and the environment; and
 - (6) any amendments to a facility plugging plan.
- (e) A draft permit and notification to the public shall be required if any of the following conditions is met:

(1) A permittee proposes substantial alterations or additions to the facility or proposes an activity that justifies a change in the permit requirements, including cumulative effects on public health, safety, or the environment.

(2) Information has become available that would have initially justified different permit requirements.

(3) Regulations on which the permit was based have changed due to the promulgation of new or amended regulations or due to a judicial decision after the permit was issued.

(f) Any permittee may request a permit modification within 180 days after any of the following:

- (1) The adoption of new regulations;
- (2) any deadline to achieve compliance with regulations; or
- (3) any judicial remand and stay of a promulgated regulation if the permit requirement was based on the remanded regulation. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-7. Signatories for permit applications and reports. (a) Each applicant for a permit shall designate at least one signatory to sign the permit applications and all reports required by the secretary.

(b) The positions that may be approved by the secretary to be signatories shall be the following:

- (1) Plant or operations manager;
- (2) cavern specialist;

(3) superintendent; and

(4) any position with responsibility at least equivalent to that required by the positions listed in this subsection.

(c) Any signatory may submit written notification to the secretary specifying a position having responsibility for the overall operation of the facility or activity to act as a designated signatory.

(d) Each signatory and each signatory's designee shall submit a signature statement, on a form furnished by the department, to the secretary with each permit application. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-8. Siting requirements for new storage wells and facilities. (a) Each applicant shall assess the geographical, topographical, and physical data for any proposed underground crude oil storage well location to determine whether siting requirements have been met. The following siting requirements shall be met:

(1) Each new storage facility shall be located at least three miles from the established boundaries of municipal population centers.

(2) Each proposed new facility or boundary expansion for an existing facility shall be located as follows:

- (A) Not less than five miles from an active or abandoned conventional shaft mining operation; and
- (B) not less than two miles from the facility's boundary of any solution mining operation.

(3) Each applicant shall assess the extent and nature of current or past conventional subsurface mining activities within five miles of the underground crude oil storage facility's boundary to determine any potential impact to public health, safety, or the environment resulting from the proposed activities at the facility.

(4) Each applicant shall identify and assess all wells, including abandoned wells, from available sources of information, within a one-mile perimeter of the facility's boundary to determine if the following conditions are met:

(A) The wells have been constructed in a manner to protect public health, property, and the environment.

(B) The abandoned wells, including water, oil, gas, monitoring, and underground storage wells, have been properly plugged.

(b) Each applicant shall conduct a regional geological evaluation to determine if the integrity of each proposed storage cavern will be adversely affected by any of the following:

(1) Salt thinning due to any stratigraphic change;
 (2) a dissolution zone in the bedded salt; or
 (3) abrupt changes in the lithology within the salt interval.

(c) Each applicant shall determine if the facility's location is in a floodplain or flood-prone area.

(d) No new facility's boundary or the expansion of an existing facility's boundary shall be located less than one mile from any existing underground porosity storage facility.

(e) Each applicant shall identify potential risks to the storage operation from activities conducted at adjacent facilities.

(f) Each applicant shall identify all utilities having a right-of-way, including pipeline, railway, roadway, and electrical lines, and shall assess the potential impact of the utilities on the location or operation of the facility. If a facility is exposed and subject to hazards, including vehicular traffic, railroads, electrical power lines, and aircraft traffic, the facility shall be protected from accidental damage, by distance or barricades.

(g) No outer boundary of an underground crude oil storage cavern shall be less than 100 feet from any of the following:

(1) The property boundary of any owners who have not consented to subsurface storage under their property;

(2) any existing surface structure not owned by the facility's owner; or

(3) any public transportation artery. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-9. Financial assurance for closure of underground crude oil storage facility. (a) Each applicant shall submit, with the permit application and annually thereafter on or before the permit renewal date, proof of financial assurance to the secretary for the following:

(1) Closure of the facility; and

(2) the plugging of any crude oil storage well.

(b) Each applicant shall meet the following requirements:

(1) Submit a detailed written estimate, in current dollars, of the cost to close all underground storage wells and storage caverns at the proposed facility following the closure procedures specified in K.A.R. 28-45b-18. The estimate shall be reviewed and approved by a licensed professional engineer or licensed geologist; and

(2) prepare an estimate of the closure cost for

all storage wells and storage caverns at the proposed facility based on the cost charged by a third party to plug the underground storage wells.

(c)(1) Each permittee shall increase the closure cost estimate and the amount of financial assurance provided if any change in the facility operation or closure plan increases the maximum cost of closure at any time.

(2) Each permittee shall provide continuous financial assurance coverage for closure until the secretary approves the facility closure.

(d) Each permittee shall comply with the provisions of the department's document titled "procedure for demonstrating financial assurance for an underground crude oil storage well," procedure #UICLPG-28, dated October 2008, which is hereby adopted by reference. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-10. Operations and maintenance plan. (a) Each applicant shall submit a plan for the long-term operation and maintenance of the facility with the permit application.

(b) Each operation and maintenance plan shall include the following information:

(1) A description of the methods to be used to prevent the overpressuring of wells and storage caverns;

(2) a plan view map of the location of any disposal wells and corrosion control wells; and

(3) the location, depth, and well construction for all shallow and deep groundwater monitoring and observation wells.

(c) Each permittee shall maintain at the facility and make available for inspection by the secretary the following information:

(1) A location map of all wells within the facility's boundaries and a listing of the global positioning system coordinates for each well;

(2) a schematic of the brine and product lines for each cavern; and

(3) a schematic of the gathering line system that connects all wells within the underground crude oil storage facility to a central distribution point.

(d) Each applicant shall submit a plan for solutioning or washing any cavern to the secretary for review and consideration for approval. The plan shall include the following:

(1) A list of acceptable blanket pad materials;

(2) methods for monitoring the solutioning or washing process; and

(3) a monitoring schedule.

(e) Only saturated brine shall be used to displace any product.

(f) The maximum allowable operating pressure and test pressure shall not exceed 0.8 pounds per square inch per foot of depth measured at the higher elevation of either the casing seat or the highest interior elevation of the storage cavern roof.

(g) Each permittee shall submit justification for a minimum operating pressure that is protective of cavern integrity and shall maintain the minimum operating pressure at each storage well.

(h) Each permittee shall meet the notification requirements in the facility's emergency response plan, give oral notification to the department within two hours, and submit written notification within one week to the department if any of the following events occurs:

(1) The overpressuring or the overfilling of an underground crude oil storage cavern;

(2) the loss of integrity for an underground crude oil storage well or cavern;

(3) the release of brine, product, or any other chemical parameter that poses a threat to public health, safety, or the environment;

(4) any uncontrolled or unanticipated loss of product or brine that is detectable by any monitoring or testing;

(5) any other condition that could endanger public health, safety, or the environment;

(6) the establishment of communication between storage caverns;

(7) the triggering of any alarms verifying that the permit safety requirements have been exceeded; or

(8) any equipment malfunction or failure that could result in potential harm to public health, safety, or the environment.

(i) Each permittee shall notify the secretary of any change in the type of product stored in any storage cavern and shall certify that the compatibility of product types and the changes in pressure will not adversely affect the wellhead, casing, tubing, and cavern. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-11. Emergency response plan and safety and security measures. (a)(1) Each applicant for a permit for an underground crude oil storage facility shall make the emergency response plan available for inspection by the secretary when the permit application is submitted to the department.

(2) Each permittee shall maintain the emergency response plan at the facility and at the company headquarters and shall make the plan available for inspection by the secretary.

(b) Each permittee shall update the emergency response plan annually and also shall update the plan whenever new information regarding the requirements for the emergency response plan becomes available.

(c) Each emergency response plan shall include a description of the facility's response to the following events:

(1) Spills and releases;

(2) fires and explosions;

(3) cavern subsidence and collapse; and

(4) any other activity that endangers public health and safety or that constitutes a threat to the environment.

(d) Each emergency response plan shall include the following information:

(1) A description of the warning systems in operation at the facility;

(2) a description of the facility's emergency response communication system that includes the following:

(A) A plat showing the location of all occupied buildings within a two-mile perimeter of the facility's boundaries; and

(B) a list of addresses and telephone numbers for all persons to contact within a two-mile perimeter of the facility's boundaries if a release or emergency condition occurs;

(3) the procedures for coordination of emergency response with local emergency planning committees, including emergency notification and evacuation of citizens and employees;

(4) a description of employee training for emergency response;

(5) a plat of the facility, showing the following locations:

(A) All crude oil storage wells;

(B) all underground injection control wells;

(C) all monitoring wells;

(D) all brine and product lines;

(E) railroad and transportation routes;

(F) brine ponds; and

(G) any other appurtenances at the facility; and

(6) a plan map of man-made surface structures and any construction activities within a one-mile perimeter of the facility's boundaries.

(e) A copy of the emergency response plan shall be available at the facility, the company headquarters, and the office of each coordinating

agency or committee involved in the emergency response plan.

(f) Each permittee shall establish an educational program for community safety and awareness of the emergency response plan.

(g) Each permittee of an underground crude oil storage facility shall provide security measures to protect the public and to prevent unauthorized access. These security measures shall include the following:

(1) Methods for securing the facility from unauthorized entry and for providing a convenient opportunity for escape to a place of safety;

(2) at least one visible, permanent sign at each point of entry and along the facility's boundary, identifying the storage well or facility name, owner, and contact telephone number;

(3) security lighting;

(4) alarm systems;

(5) appropriate warning signs in areas that could contain accumulations of hazardous or noxious vapors or where physical hazards exist; and

(6) a direct communication link with the local control room or any remote control center for service and maintenance crews.

(h) Warning systems and alarms shall consist of the following:

(1) Combustible gas detectors, hydrogen sulfide detectors, heat sensors, pressure sensors, and emergency shutdown instrumentation integrated with warning systems audible and visible in the local control room and at any remote control center;

(2) circuitry designed so that the failure of a detector or heat sensor, excluding meltdown and fused devices, will activate the warning; and

(3) a manually operated alarm that is audible to facility personnel.

(i) Each wellhead shall be protected with safety devices to prevent pressures in excess of the maximum allowable operating pressure from being exerted on the storage well or cavern and to prevent the backflow of any stored crude oil if a flowline ruptures.

(j) Each wellhead shall be equipped with manual isolation valves. Each port on a wellhead shall be equipped with either a valve or a blind flange. The valve or blind flange shall be rated at the same pressure as that for the wellhead.

(k) Each permittee shall ensure that the facility has a supervisory control and data acquisition system approved by the secretary to monitor storage operations for individual storage wells. Each of

the following instruments shall be connected to an alarm:

(1) Flow indicators for crude oil;

(2) combustible gas and hydrogen sulfide detection indicators; and

(3) pressure indicators on both the product and brine lines at the wellhead.

(l) Each permittee shall install emergency shutdown valves on all crude oil, brine, and water lines. Criteria for emergency shutdown valves shall include the following:

(1) (A) Be rated at least equivalent to 125 percent of the maximum pressure that could be exerted at the surface; or

(B) meet a pressure-rating standard equivalent to that specified in paragraph (1)(1)(A) and determined by the secretary to be protective of public health, safety, and the environment;

(2) fail to the closed position;

(3) be capable of remote and local operation; and

(4) be activated by the following:

(A) Overpressuring;

(B) underpressuring; and

(C) gas and heat detection.

(m) Each permittee shall conduct annual inspections of all wellhead instrumentation.

(n) Each permittee shall function-test each critical control system and emergency shutdown valve semiannually.

(o) Each permittee shall perform trip-testing of each loop, including the instrumentation, valves, shutdown equipment, and all wiring connections, to ensure the integrity of the circuit.

(p) Each permittee shall ensure that the equipment automatically closes all inlets and outlets to the storage cavern and safely shuts down or diverts any operation associated with the storage cavern, in case of overfilling or an emergency.

(q) Each permittee shall ensure that the automatic valve closure times meet the valve design limits for closure times.

(r) Each permittee shall cease operations or shall comply with the instructions from the secretary if the secretary determines that an imminent threat to public health, safety, or the environment exists due to any unsafe operating condition. The permittee may resume operations if the secretary determines that the facility's operations no longer pose a risk to public health, safety, or the environment. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-12. Design and construction of storage wells. (a) Each permittee shall ensure that each storage well is constructed with surface casing. The following requirements shall apply:

(1) The surface casing shall be set through all fresh and usable water formations and into competent bedrock.

(2) The surface casing shall be cemented by circulating cement through the bottom of the casing to the surface.

(3) The annular space between the casing and the formation shall be filled with cement.

(b) Each permittee shall install in each storage well double casing protection with an intermediate casing and a production casing set into the upper part of the salt formation. The following requirements shall apply:

(1) The intermediate casing shall extend at least 105 feet into the salt formation.

(2) The production casing shall extend at least to the depth of the intermediate casing.

(3) The annular space between the intermediate and production casings and between the intermediate casing and formation shall be filled with cement by circulating cement through the bottom of the casing to the surface.

(c) For each existing storage well that does not have double casing protection, the permittee shall provide a casing protection evaluation as specified in K.A.R. 28-45b-14.

(d) The casing and tubing shall meet the performance standards for collapse resistance, internal yield pressure, and pipe body yield strength for the well's setting depths using criteria specified in the American petroleum institute's bulletin 5C2, which is adopted by reference in K.A.R. 28-45-14.

(e) Each permittee shall designate and maintain a maximum fill level above the bottom of the brine string. The permittee shall submit the following information:

(1) A schematic of the well construction;

(2) the cavern capacity as determined from the most recent sonar survey;

(3) supporting data that shows calculations used to determine the maximum fill level; and

(4) the method that will be used to maintain the maximum fill level.

(f) Only new steel casing shall be installed in a new storage well. Used parts, materials, and equipment that have been tested and certified for continued service may be used for repairs.

(g) Liners shall extend from the surface to a

depth near the bottom of the production casing that allows room for workover operations.

(h) The following cementing requirements shall be met:

(1) The cement shall be compatible with the rock formation water and the drilling fluids. Salt-saturated cement shall be used when cementing through the salt section.

(2) The cement across the confining zone and to the surface shall have a compressive strength of not less than 1,000 pounds per square inch.

(3) Remedial cementing shall be completed if there is evidence of either of the following:

(A) Communication between the confining zone and other horizons; or

(B) annular voids that would allow either fluid contact with the casing or channeling across the confining zone or above the confining zone.

(4) The following requirements for cement evaluation shall apply:

(A) Samples shall be obtained at the start and end of the cementing operation for evaluation of cement properties. All cement samples collected shall be representative of the cement being utilized.

(B) All samples shall be tested for compressive strength.

(C) A cement bond log shall be run on the surface casing, intermediate casing, and cemented production casing after the neat cement has cured for at least 72 hours.

(i) Casing patches shall be prohibited, unless the secretary determines that the use of casing patches is protective of public health, safety, and the environment. The following requirements shall apply:

(1) Each permittee shall submit a plan for the installation of the casing patch to the secretary.

(2) Each permittee shall meet the requirements specified in the department's document titled "procedure for internal casing repair," which is adopted by reference in K.A.R. 28-45-14.

(j) Each permittee shall pressure-test each production casing for leaks when the well construction is completed.

(k) Each permittee shall submit a casing inspection base log for the entire cased interval for the innermost casing string or for the cemented liner that extends the entire length of the casing after the well construction is completed.

(l) Each permittee shall contain, in a tank, all workover wastes, drilling fluids, drilling mud, and drill cuttings from any drilling operation or workover. Drilling fluids, drilling mud, and drill cut-

tings shall be disposed of in a manner determined by the secretary to be protective of public health, safety, and the environment.

(m) A licensed professional engineer shall review and approve the construction plans for the crude oil storage well and cavern system.

(n) A licensed professional engineer or a licensed geologist, or the licensed professional engineer's or licensed geologist's designee, shall supervise the installation of each storage well.

(o) Each permittee shall maintain a corrosion control system. The following requirements shall apply:

(1) The corrosion control system shall be capable of protecting the well casings.

(2) The corrosion control system shall be assessed according to the protocol and time schedule recommended by the corrosion control system manufacturer, and the results shall be reported to the secretary. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-13. Monitoring. (a) Each permittee shall ensure that pressure sensors continuously monitor wellhead pressures for both the product and brine sides at the wellhead for each storage well. The following requirements shall apply:

(1) The pressure sensor shall be capable of recording the maximum and minimum operating pressures during a 24-hour period.

(2) The pressure sensor shall be capable of recording operating pressures at an interval approved by the secretary.

(3) Each permittee shall provide pressure data, including historic continuous monitoring, to the secretary upon request.

(b) Each permittee shall submit a plan for any monitoring activity, including logging and sonar surveys, to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, at least 60 days before the commencement of these monitoring activities.

(c) Each permittee shall submit a summary and the results of the monitoring activity to the secretary within 45 days after completion of the monitoring activity.

(d) Each permittee shall monitor the thickness of the salt roof for each cavern with a gamma ray log and a density log, or with another log as specified in K.A.R. 28-45b-4, as follows:

(1) Every five years;

(2) every three years, if the cavern meets criteria specified in K.A.R. 28-45b-4;

(3) at any time that the secretary determines that cavern integrity is suspect; and

(4) before plugging the well.

(e) Each permittee shall monitor the cavern storage capacity and the cavern geometry with a sonar survey. The sonar survey shall be conducted as follows:

(1) Before placing the underground crude oil storage cavern in service;

(2) every 10 years;

(3) for determining the stability of the cavern and the overburden if the salt roof thickness and cavern geometry indicate that the stability of the cavern or overburden is at risk;

(4) after any growth of the cavern that results in a solution volume increase of 20 percent or more of cavern capacity; and

(5) before plugging the well if a sonar survey has not been run in the past five years.

(f) Any permittee may use an alternative method for the sonar survey if the secretary determines that the alternative method is substantially equivalent to the method specified in subsection (e). The permittee shall submit the following information for the secretary's consideration:

(1) A description of the proposed method and the theory for its operation;

(2) a description of the storage well and cavern conditions under which the log can be used;

(3) the procedure for interpreting the survey results; and

(4) an assessment of the capacity and stability of the cavern upon completion of the survey.

(g)(1) Each applicant shall submit a ground subsidence monitoring plan to the secretary with the permit application. The ground subsidence monitoring plan shall include the following information:

(A) A description of the method for conducting an elevation survey; and

(B) the criteria for establishing monuments, benchmarks, and wellhead survey points.

(2)(A) Each permittee shall meet the following requirements:

(i) Ensure level measurements to the accuracy of 0.01 foot;

(ii) report any surface elevation changes in excess of 0.10 foot within 24 hours to the secretary;

(iii) for any change in established benchmarks, submit justification that the change is protective of public health, safety, and the environment; and

(iv) for each change in established benchmarks, note the elevation change from the previous benchmark noted in the elevation survey report.

(B) Each permittee shall submit the elevation before and after any wellhead work that results in a change in the survey point at the wellhead.

(C) The elevation survey shall be conducted by a licensed professional land surveyor.

(D) Each permittee shall submit biennial survey results to the department within 30 days after completion of the survey.

(h) Before commencing facility operations, each permittee shall submit to the secretary, for review and consideration for approval, an inventory balance plan for measuring the volume of crude oil injected into or withdrawn from each underground crude oil storage well, including methods for measuring and verifying volume. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-14. Testing and inspections. (a) Each permittee shall submit a plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment, before conducting any testing of a storage well or a cavern. Testing shall not commence without prior approval from the secretary.

(b) Each permittee shall submit a summary of the testing to the secretary within 45 days after completing the test. The summary shall include the following:

- (1) A chronology of the test;
- (2) copies of all logs;
- (3) storage well construction information;
- (4) pressure readings;
- (5) volume measurements; and
- (6) an explanation of the test results.

(c) Each permittee shall test each unplugged storage well and cavern for mechanical integrity. The following requirements shall apply:

(1) Integrity tests shall be conducted on the storage well and cavern as follows:

(A) Before the cavern is initially placed in service;

(B) every five years after the initial service date;

(C) before the storage well is placed back in service after being in monitoring status; and

(D) before the well is plugged, unless the mechanical integrity test has been performed in the last five years.

(2) Integrity tests shall be conducted on the underground crude oil storage well after each workover that involves physical changes to any cemented casing string.

(3) Each underground crude oil storage cavern shall be tested for mechanical integrity using a product-brine interface test.

(4) The nitrogen-brine test may be used if the surface equipment is rated for the nitrogen pressure on the upstream side of the well head valves.

(5) Each underground crude oil storage well shall be tested for mechanical integrity using one of the following:

(A) An interface test capable of identifying the location of a leak in the casing; or

(B) a hydraulic casing test.

(6) Each permittee shall submit a test procedure plan, on a form furnished by the department, to the secretary for review and consideration for approval at least 30 days before test commencement. The plan shall include the following information:

(A) The justification for test parameters;

(B) the test sensitivities; and

(C) the pass and fail criteria for the test.

(7) Each permittee shall notify the secretary at least five days before conducting any integrity test.

(8) The integrity test shall be conducted at the maximum allowable operating pressure.

(9) All test procedures shall use certified gauges and pressure transducers that have been calibrated annually.

(d) Any permittee may use an alternative integrity test if the secretary determines that the alternative integrity test is substantially equivalent to the integrity tests specified in subsection (c). The permittee shall submit the following information for the secretary's consideration:

(1) A description of the test method and the theory of operation, including the test sensitivities, a justification for the test parameters, and the pass and fail criteria for the test;

(2) a description of the well and cavern conditions under which the test can be conducted;

(3) the procedure for interpreting the test results; and

(4) an interpretation of the test upon completion of the test.

(e) No storage well and cavern shall be used for storage if the mechanical integrity is not verified.

(f) Each permittee shall submit a casing evaluation for each underground crude oil storage well. Acceptable casing evaluation methods shall include magnetic flux and ultrasonic imaging.

(g) Any permittee may use an alternative casing evaluation method if the secretary determines that the alternative casing evaluation method is substantially equivalent to the casing evaluation methods specified in subsection (f). The permittee shall meet the following requirements:

(1) Each permittee shall submit a description of the logging method, including the theory of operation and the well conditions suitable for log use.

(2) Each permittee shall submit the specifications for the logging tool, including tool dimensions, maximum temperature and pressure rating, recommended logging speed, approximate image resolution, and hole size range.

(3) Each permittee shall describe the capabilities of the log for determining the following:

(A) The presence of any metal loss due to either of the following:

- (i) Internal or external corrosion; or
- (ii) internal wear;

(B) The degree of penetration of the corrosion or the casing defect; and

(C) the circumferential extent of the corrosion or the casing defect.

(4) Each permittee shall submit a log and an interpretation of the log to the secretary.

(h) Each permittee shall submit a casing evaluation according to the following time schedule:

(1) Every 10 years for either of the following conditions:

(A) The storage well has double casing protection; or

(B) an existing storage well has a liner and a production casing;

(2) after any workover involving the cemented casing; and

(3) every five years, if the storage well does not have double casing protection or if a determination is made by the secretary that the integrity of the long string casing could be adversely affected by any naturally occurring condition or man-made activity.

(i) Each permittee shall submit a cement bond log with the casing evaluation if a cement bond log has not been previously submitted.

(j) A licensed professional engineer or licensed geologist, or licensed professional engineer's or licensed geologist's designee, shall supervise all test procedures and associated field activity.

(k) Each permittee shall have a licensed professional engineer or licensed geologist review all test results.

(l) Each permittee shall visually inspect each wellhead monthly for any leakage.

(m) Each permittee shall conduct an inspection of facility records, using a form furnished by the department, every two years to ensure that the required records are being maintained in accordance with these regulations. The permittee shall maintain these records at the facility and shall make the records available to the secretary upon request. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-15. Groundwater monitoring. (a)

Each applicant shall submit a groundwater monitoring plan with the permit application to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(b) Each permittee shall ensure that the groundwater monitoring wells meet the following requirements:

(1) Each permittee shall set the screen in each shallow monitoring well at a depth that is inclusive of the seasonal fluctuation of the water table.

(2) Each permittee shall ensure that all deep groundwater monitoring wells extend a minimum of 25 feet into the bedrock, or to a depth based on the geology and hydrogeology at the facility and approved by the secretary to ensure the protection of public health, safety, and the environment.

(c) All well locations and the spacing between all well locations shall be based on the geology and the hydrogeology at the facility and shall be required to be approved by the secretary to ensure the protection of public health, safety, and the environment.

(d) Before commencing facility operations, each applicant shall submit a quality assurance plan, including techniques for sampling and analysis, to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(e) Each permittee shall collect groundwater samples and analyze the samples for chlorides and any other parameter determined by the secretary to pose a threat to public health, safety, and the environment. The reporting format shall be determined by the secretary.

(f) Each permittee shall submit the results for chloride analyses from groundwater samples to the department on a quarterly basis.

(g) Each permittee shall monitor monthly for the presence of combustible gas in the headspace

in monitoring wells and shall quarterly submit the results to the department.

(h) Each permittee shall submit a static groundwater level measurement for each monitoring well with the quarterly chloride analyses results specified in subsection (f).

(i) Any permittee of a facility where chloride concentrations in the groundwater exceed 250 milligrams per liter may be required by the secretary to submit a work plan, for review and consideration for approval, that describes the methods to delineate potential source areas and to control migration of the chloride contamination.

(j) Each permittee of a well in which combustible gas is detected shall submit a work plan to the secretary for review and consideration for approval. Each permittee shall describe the proposed methods to eliminate any source areas and return the combustible gas levels to levels that do not pose a potential threat to public health, safety, or the environment. The plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-16. Record requirements and retention. (a) Each permittee shall submit an annual report, on a form approved by the department, on or before April 1 of each year. The annual report shall include the following:

- (1) A description of any incident of uncontrolled or unanticipated product loss;
- (2) the well number and date of any logs or sonar surveys conducted;
- (3) the estimated storage capacity for each cavern associated with an unplugged well;
- (4) a list of any caverns being washed;
- (5) a list of the volume of product injected and withdrawn for each storage well;
- (6) a list, by well number, of the type of product stored; and
- (7) a list, by well number, of the maximum and minimum product storage pressures encountered during the report year.

(b) Each permittee shall maintain facility records at the facility or at a location approved by the secretary for the following time periods:

- (1) A period of 10 years, for the following records:
 - (A) The maximum and minimum operating pressures for each storage well; and

(B) the annual inspections required by the secretary;

(2) the life of each storage well, for the following records:

- (A) The casing records for each storage well;
- (B) the cementing records for each storage well;
- (C) the workover records;
- (D) monitoring information, including calibration and maintenance records; and

(E) continuous monitoring data; and

(3) the life of the facility, for the following records:

- (A) All logging events;
- (B) all mechanical integrity tests and other testing;
- (C) all groundwater monitoring data; and
- (D) all correspondence relating to the permit, including electronic mail.

(c) Surface elevation surveys shall be maintained and retained for the life of facility plus 20 years after the facility's closure.

(d) If the facility permit is transferred, the former permittee shall provide all required facility records, reports, and documents to the new permittee. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-17. Well workovers. (a) Each permittee shall submit a workover plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment. The following provisions shall apply:

(1) Each permittee shall submit the workover plan at least 10 days before performing any downhole or wellhead work that involves dismantling or removal of the wellhead.

(2) A permittee shall not be required to submit a workover plan for routine maintenance or replacement of gauges, sensors, or valves.

(3) Verbal authorization to initiate downhole or wellhead work may be issued by the secretary if the permittee has fulfilled the requirements of this subsection.

(b) Each permittee shall ensure that a blowout preventer with a pressure rating greater than the pressures anticipated to be encountered is used during each workover.

(c) Each permittee shall ensure that all logging procedures are conducted through a lubricator unit with a pressure rating greater than the pressures anticipated to be encountered.

(d) Each permittee shall provide to the person logging a storage well or performing a well work-over all relevant information concerning the status and condition of the storage well and cavern before initiating any work. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-18. Plugging and plugging-monitoring requirements. (a) Each permittee shall submit a plugging plan, including monitoring and testing requirements, to the secretary for review and consideration for approval at least 60 days before each plugging event.

(b) Each permittee shall follow the plugging procedure for a plugging event specified in the department's document titled "procedure for the plugging and abandonment of a crude oil storage well," procedure #UICLPG-29, dated October 2008, which is hereby adopted by reference.

(c) Each permittee wishing to place a storage well and cavern into plugging-monitoring status shall submit a plugging-monitoring plan to the secretary for review and consideration for approval at least 60 days before the plugging-monitoring event. The plan shall include the following:

(1) A schematic of the storage well configuration;

(2) the most recent results from the gamma-density log, the casing inspection log, the cement bond log, and the sonar survey; and

(3) the procedure for placing the cavern into plugging-monitoring status.

(d) Each permittee of a crude oil storage well to be placed into plugging-monitoring status may be required to perform additional testing or logging before placing the cavern into plugging-monitoring status if either of the following conditions exists:

(1) The required logging and testing are not current.

(2) A lack of storage well or cavern integrity poses a threat to public health, safety, or the environment.

(e) Each permittee of a storage well and cavern placed into plugging-monitoring status shall monitor the cavern pressure with a gauge on a weekly basis or continue to monitor pressures with a pressure transducer connected to a supervisory control and data acquisition system.

(f) Each permittee shall report any unexpected increase or decrease in pressure at a well in plugging-monitoring status to the secretary within 24 hours. Testing, logging, or any other necessary

measures may be required by the secretary to determine if a threat to public health, safety, or the environment exists.

(g) Each permittee shall restore and preserve the integrity of the site as follows:

(1) Dispose of all liquid waste in an environmentally safe manner;

(2) clear the area of debris;

(3) drain and fill all excavations;

(4) remove all unused concrete bases, machinery, and materials; and

(5) level and restore the site. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-19. Underground crude oil storage fees. (a) Each permit applicant shall submit a fee of \$700 for each proposed storage well with the permit application.

(b) Each permittee shall submit an annual permit fee of \$18,890 per facility and \$305 per unplugged storage well on or before April 1 of each year.

(c) Fees shall be made payable to the "Kansas department of health and environment — subsurface hydrocarbon storage fund."

(d) The fees collected under the provisions of this regulation shall not be refunded.

(e) If ownership of an underground crude oil storage well or underground crude oil storage facility changes during the term of a valid permit, no additional fee shall be required unless a change occurs that results in a new storage well or an expanded facility operation. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-20. Permit required for a brine pond. Since the underground storage of crude oil and the access to and transfer of crude oil are dependent on the safe and secure operation and maintenance of associated brine ponds, no person shall construct, operate, or maintain any brine pond associated with an underground crude oil storage facility without first obtaining a brine pond permit from the secretary. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-21. Brine pond permit application; permit renewal. (a)(1) Each applicant for a permit for a new brine pond shall submit an appli-

cation to the secretary at least 90 days before the construction of the new brine pond commences. Brine pond construction shall not begin until the secretary has issued the permit.

(2) Upon review of the application, either of the following shall be issued by the secretary:

(A) A final permit if the application is approved; or

(B) a notice that the permit has been denied if the applicant has not complied with the applicable requirements of this article. The notice shall include justification for the permit denial.

(b) Each permit for a brine pond shall be authorized for a term not to exceed 10 years.

(c) Each permittee wanting to renew the permit shall submit a completed renewal application at least 90 days before the expiration date of the permit in effect.

(d) Each permit application for a new brine pond shall include a hydrogeological investigation conducted under the direction of a licensed geologist or a licensed professional engineer. Each hydrogeological investigation for a new brine pond shall include the following information:

(1) A site characterization for brine pond construction, which shall meet the following requirements:

(A) The bottom of the brine pond shall be determined by the lowest surface elevation of compacted or excavated soils used in creating the pond structure;

(B) all required excavations or boreholes shall be drilled to a depth of at least 10 feet below the bottom of the brine pond;

(C) the separation distance between the bottom of the brine pond and the water table, which shall meet one of the following requirements:

(i) A separation distance of at least 10 feet shall be maintained between the brine pond bottom and the water table; or

(ii) a separation distance of less than 10 feet shall require the installation of a clay tertiary sub-liner; and

(D) the surface area shall be measured at the interior top dike elevation;

(2) the location and elevation of each borehole or excavation, based on surface area, which shall be determined by the following criteria:

(A) At least two boreholes or excavations for each five acres of proposed brine pond surface area; or

(B) at least two boreholes or excavations if the brine pond surface area is less than five acres; and

(3) the following information for each borehole or excavation:

(A) A log of soil types encountered in each borehole or excavation; and

(B) a groundwater level measurement at each borehole or excavation.

(e) Each permittee shall notify the department at least five days before conducting any field activities for the hydrogeological investigation. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-22. Public notice for a brine pond.

(a) Public notice shall be given by the secretary for the following permit actions:

(1) A permit application for any new brine pond associated with an underground crude oil storage well;

(2) a denied permit; and

(3) a scheduled hearing.

(b) The public notice and, if applicable, a copy of the draft permit shall be mailed or electronically mailed by the department to the permit applicant.

(c) Each public notice shall be mailed by the department to the following:

(1) Any person who submits a written request for placement on the mailing list;

(2) the official county newspaper of each county in which the lands affected by the application are located, for publication in at least two issues; and

(3) the Kansas register.

(d) Each public notice shall include the following information:

(1) The name and address of the department processing the permit action for which the notice is being given;

(2) the name and address of the person seeking the permit;

(3) a brief description of the activity described in the permit application;

(4) the name, address, and telephone number of the person that interested persons may contact for further information, including copies of the application, draft permit, or other appropriate information;

(5) a brief description of the comment procedures for public notice; and

(6) a statement of the procedure to request a hearing and other procedures that allow public participation in the final permit decision.

(e) Any interested person may submit written comments to the secretary on any permit action

during the 30-day public comment period. The following requirements shall apply:

(1) Comments shall be submitted by the close of the public comment period.

(2) All supporting materials submitted shall be included in full. The supporting materials shall not be incorporated by reference, unless the supporting materials are any of the following:

(A) Part of the administrative record in the same proceeding;

(B) state or federal statutes and regulations;

(C) state or environmental protection agency documents of general applicability; or

(D) other generally available reference materials.

(3) Commentators shall make available to the secretary all supporting materials not already included in the administrative record.

(f) The response to all relevant comments concerning any permit actions and the reasons for changing any provisions in the draft permit shall be issued when the final permit decision is issued.

(g) The response to comments shall be made available to the public upon request. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-23. Modification and transfer of a brine pond permit; variance. (a) Any reissuance or modification of a brine pond permit and any variance may be authorized by the secretary for a term of less than 10 years.

(b) The automatic transfer of a brine pond permit shall be prohibited. The terms of a permit transfer shall include the following:

(1) Each person requesting a permit transfer shall submit a completed application to the secretary at least 60 days before the proposed effective date of the transfer.

(2) Each permittee shall comply with the requirements of the existing permit until the secretary reissues the permit.

(c) Any permit for a brine pond may be modified by the secretary for any of the following reasons:

(1) The secretary receives information not available when the permit was issued.

(2) The secretary receives a request for a modification.

(3) The secretary conducts a review of the permit file and determines that a modification is necessary.

(d) Only the permit actions subject to modification shall be reopened.

(e) Minor modifications that shall not require public notification shall include the following:

(1) Correction of typographical errors;

(2) requirements for more frequent monitoring or reporting by the permittee;

(3) date change in a schedule of compliance;

(4) change in ownership or operational control of the facility, unless the secretary determines that public notification is necessary to protect the public interest;

(5) change in construction requirements, if approved by the secretary; and

(6) amendments to a brine pond closure plan.

(f) A draft permit and notification to the public shall be required if any of the following conditions is met:

(1) A permittee proposes substantial alterations to the brine ponds or proposes any activity that justifies a change in permit requirements, including cumulative effects on public health, safety, or the environment.

(2) Information has become available that would have initially justified different permit conditions.

(3) The regulations on which the permit was based have changed because of the promulgation of new or amended regulations or because of a judicial decision.

(g) Any permittee may request a permit modification within 180 days after any of the following:

(1) The adoption of any new regulations;

(2) any deadline to achieve compliance with regulations before the expiration date of the permit; or

(3) any judicial remand and stay of a promulgated regulation, if the permit condition was based on the remanded regulation. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-24. Signatories for brine pond permit applications and reports. (a) Each applicant for a permit for a new brine pond shall designate at least one signatory to sign the permit applications and reports required by the secretary.

(b) The positions that may be approved by the secretary as signatories shall include any of the following:

(1) Operations manager;

(2) brine pond specialist; or

(3) any position with responsibility at least equivalent to that required by the positions listed in this subsection.

(c) Any signatory may submit written notification to the secretary specifying a position having responsibility for the overall operation of the facility or activity to act as a designated signatory.

(d) Each signatory and each signatory's designee shall submit a signature statement, on a form furnished by the department, to the secretary with the brine pond permit application. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-25. Financial assurance for brine pond closure. (a) Each applicant for a permit for a new brine pond shall submit, with the application and annually thereafter on or before the permit renewal date, proof of financial assurance to the secretary.

(b)(1) Each brine pond permittee shall establish financial assurance for the decommissioning and abandonment of any brine pond permitted by the secretary under this article.

(2) Each applicant and each permittee shall meet the following requirements:

(A) Submit a detailed written estimate, in current dollars, of the cost to close any brine pond at the facility. The estimate shall be reviewed and approved by a licensed professional engineer or licensed geologist;

(B) develop an estimate of the closure cost for each brine pond at the facility as follows:

(i) The estimate shall be based on the cost charged by a third party to decommission the brine pond in accordance with this article; and

(ii) the brine pond shall be assumed to be at maximum storage capacity; and

(C) increase the closure cost estimate and the amount of financial assurance provided if any change in the brine pond closure plan or in the operation increases the maximum cost of brine pond closure at any time.

(c) Each permittee shall provide continuous financial assurance coverage for closure until the secretary approves the brine pond closure.

(d) Each permittee shall comply with the provisions of the department's document titled "procedure for demonstrating financial assurance for a brine pond associated with a storage facility," procedure # UICLPG-30, dated October 2008, which is hereby adopted by reference. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-26. Design, construction, and maintenance of brine ponds. (a) Each applicant for a brine pond permit shall submit a design and construction plan for each new brine pond associated with an underground crude oil storage facility to the secretary. The design and construction plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment. Each brine pond shall be designed by a licensed professional engineer.

(b) Each applicant shall ensure that the impermeable synthetic membrane liner system for each brine pond consists of primary and secondary impermeable synthetic membrane liners with an intermediate leak detection system. The following requirements shall apply:

(1) The primary and secondary liners shall each be at least 30 mils in thickness.

(2) The engineer designing the brine pond shall obtain a certification from the liner manufacturer providing the following information:

(A) Confirmation that the specified liner is compatible for use with the brine;

(B) confirmation that the specified liner is ultraviolet-resistant; and

(C) data for the manufacturer's estimated leakage, permeability, or transmissivity rate for specific liners, including the rate of movement of fluids through the synthetic membrane liner due to the properties and thickness of the liner material, expressed in units of volume per area per time;

(D) any normally expected manufacturing defects in the liner material; and

(E) any normally expected defects associated with the seaming and installation process.

(c) Each brine pond permittee shall submit a contingency plan to the secretary that outlines the procedures for brine containment issues associated with brine pond maintenance and dewatering due to liner failure, repair, replacement, or expansion of the brine pond. The contingency plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment.

(d) Each permittee of an existing brine pond and each applicant for a permit for a new brine pond shall submit a flood response plan if the brine pond is located in a floodplain or a flood-prone area.

(e) Each permittee shall cease operations or shall comply with instructions from the secretary if the secretary determines that an imminent threat to public health, safety, or the environment

exists due to any unsafe operating condition. The permittee may resume operations if the secretary determines that the brine pond operations no longer pose a risk to public health, safety, or the environment.

(f) Each permittee shall ensure that the primary and secondary liners for each brine pond are separated to provide a conduit for the movement of any fluid between the liners to the leak detection monitoring location for detection and removal.

(g) Each permittee shall ensure that all materials between the primary and secondary liners are capable of transmitting at least $\frac{1}{64}$ inch per acre per day of flow with a head of no more than two feet placed on the secondary liner. Acceptable materials shall include the following:

- (1) Clean sand;
- (2) pea gravel;
- (3) geotextile fabric;
- (4) geonet-type material; and

(5) any alternatives recommended by the liner manufacturer, if the secretary determines that the alternatives are substantially equivalent to materials listed in this subsection.

(h) Each permittee shall ensure that the leak detection system design for each brine pond limits the maximum travel time required for fluid penetrating the liner to reach the leak detection monitoring location to 24 hours or less.

(i) Each permittee shall ensure that the bottom of each brine pond has a slope adequate for the proper operation of the leak detection system, with not less than 0.5 percent for the slope for the collection pipes and 1.0 percent for all other slopes.

(j) Each permittee shall ensure that the dewatering system design for each brine pond is capable of the following:

(1) Monitoring the volume of fluid removed from the intermediate space between the primary and secondary liners; and

(2) pumping the volume of fluid generated equal to 10 times the maximum allowable liner leakage rate.

(k) Each permittee shall ensure that the compaction of all brine pond embankments and of the upper six inches of the interior lagoon bottom below the secondary liner meets all of the following requirements:

(1) The maximum standard proctor density shall be at least 95 percent at optimum moisture to optimum moisture plus three percent.

(2) The maximum thickness of the layers of material to be compacted shall not exceed six inches.

(3) The moisture content range of the compacted soils shall be optimum moisture to optimum moisture plus three percent.

(4) The maximum size of dirt clods in the compacted soil shall be less than one inch in diameter.

(1) Each permittee shall ensure that the following requirements for the installation of the liners at each brine pond are met:

(1) The primary and secondary liners shall be anchored at the top of the brine pond dike in accordance with the liner manufacturer's instructions.

(2) Installation shall be performed in accordance with the liner manufacturer's instructions.

(3) Installation shall be performed by a contractor experienced in the installation of impermeable synthetic membrane liners.

(4) On-site supervision of the liner installation shall be provided by an individual that has experience in liner installation practices.

(m) Each permittee shall ensure that the volume of fluid monitored from the intermediate leak detection system at the brine pond is based on a rate of 10 percent of leak return system capacity and does not exceed 1,000 gallons per day per acre of pond area.

(n) Each permittee shall submit, to the secretary, a seam testing method to verify the adequacy of the seaming process for the liners at each brine pond. The following requirements shall apply:

(1) The testing method shall include the following:

(A) The methods for destructive and nondestructive seam testing;

(B) the protocol describing the number of tests per lineal foot of field seam;

(C) the size of the destructive test specimen required; and

(D) any other pertinent quality control provisions recommended by the liner manufacturer.

(2) All field seams shall be subjected to nondestructive testing.

(o) Each permittee shall install an oil-brine separator to separate entrained product from the brine used to transfer product. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-27. Groundwater monitoring for brine ponds. (a) Each applicant for a permit for a new brine pond shall submit a groundwater monitoring plan with the application for a brine pond permit to the secretary for review and con-

sideration for approval. The monitoring plan shall be approved if the secretary determines that the plan is protective of public health, safety, and the environment.

(b) Each applicant for a permit for a new brine pond shall meet the following requirements:

(1) Install monitoring wells around the perimeter of the brine pond. The well spacing shall be based on the geology and hydrogeology at the facility and shall be approved by the secretary if the secretary determines that the well spacing is protective of public health, safety, and the environment; and

(2) set the screen in all shallow groundwater monitoring wells at a depth that is inclusive of the seasonal fluctuation of the water table.

(c) Each applicant for a permit for a new brine pond shall submit, with the groundwater monitoring plan, a quality assurance plan to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(d) Each permittee shall collect groundwater samples and analyze the samples for chloride and any other parameter determined by the secretary as posing a potential threat to public health, safety, and the environment. The reporting format shall be determined by the secretary.

(1) Each permittee shall submit the following to the department on a quarterly basis:

(A) The results for the chloride analyses from groundwater samples; and

(B) a static groundwater level measurement for each monitoring well.

(2) Each permittee shall monitor monthly for the presence of combustible gas in the headspace in monitoring wells and submit the results to the department on a quarterly basis.

(e) Any permittee of a brine pond where chloride concentrations in the groundwater exceed 250 milligrams per liter may be required by the secretary to submit a work plan, for review and consideration for approval, that describes proposed methods to delineate the extent of the contamination and to control migration of the chloride contamination. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

28-45b-28. Brine pond closure requirements. (a) Each brine pond permittee shall submit a closure plan, including monitoring and testing requirements, to the secretary for review and

consideration for approval at least 60 days before the closure of a brine pond. The closure plan shall be approved if the secretary determines that the closure plan is protective of public health, safety, and the environment.

(b) The permittee shall not commence closure activities without the secretary's prior approval.

(c) Each permittee shall include the following information in the brine pond closure plan:

(1) The procedure for deactivating the various brine lines employed at the facility;

(2) the procedures for the remediation, removal, or disposal of brine, accumulated sludge in the brine pond, contaminated soils, and contaminated groundwater;

(3) a description regarding the proposed maintenance, deactivation, conversion, or demolition of the brine pond structure; and

(4) procedures addressing the plugging of any water wells or groundwater monitoring wells associated with the brine pond. (Authorized by K.S.A. 55-1,117 and K.S.A. 2008 Supp. 55-1,117a; implementing K.S.A. 55-1,117; effective July 6, 2009.)

Article 46.—UNDERGROUND INJECTION CONTROL REGULATIONS

28-46-1. General requirements. (a) Any reference in these regulations to standards, procedures, or requirements of 40 CFR Parts 124, 136, 144, 145, 146, or 261 shall constitute adoption by reference of the entire part, subpart, and paragraph so referenced, including any notes, charts, and appendices, unless otherwise specifically stated in these regulations, except for any references to NPDES, RCRA, PSD, ocean dumping permits, dredge and fill permits under section 404 of the clean water act, the non-attainment program under the clean air act, national emissions standards for hazardous pollutants (HESHAPS), EPA issued permits, and any internal CFR citations specific to those programs. Each reference to 40 CFR 146.04, 40 CFR 146.06, 40 CFR 146.07, and 40 CFR 146.08 shall mean 40 CFR 146.4, 40 CFR 146.6, 40 CFR 146.7, and 40 CFR 146.8, respectively.

(b) When used in any provision adopted from 40 CFR Parts 124, 136, 144, 145, 146, or 261, references to "the United States" shall mean the state of Kansas, "environmental protection agency" shall mean the Kansas department of health and environment, and "administrator," "regional administrator," "state director," and "director"

shall mean the secretary of the department of health and environment.

(c) When existing Kansas statutory and regulatory requirements are more stringent than the regulations adopted in subsection (a), the Kansas requirements shall prevail. (Authorized by and implementing K.S.A. 2009 Supp. 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-2. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; revoked March 2, 2007.)

28-46-2a. Definitions. (a) The following federal regulations, as in effect on July 1, 2008, are hereby adopted by reference, except as specified:

(1) 40 CFR 124.2, except for the following terms and their definitions:

- (A) "Application";
- (B) "director";
- (C) "draft permit";
- (D) "eligible Indian tribe";
- (E) "environmental appeals board";
- (F) "facility or activity";
- (G) "Indian tribe";
- (H) "major facility";
- (I) "owner or operator";
- (J) "permit";
- (K) "regional administrator";
- (L) "SDWA"; and
- (M) "state";

(2) 40 CFR 144.3, except for the following terms and their definitions:

- (A) "Application";
- (B) "approved state program";
- (C) "appropriate act and regulations";
- (D) "director";
- (E) "draft permit";
- (F) "eligible Indian tribe";
- (G) "Indian tribe";
- (H) "state";
- (I) "total dissolved solids"; and
- (J) "well";

(3) 40 CFR 144.61;

(4) 40 CFR 146.3, except for the following terms and their definitions:

- (A) "Application";
- (B) "director";

(C) "exempted aquifer";

(D) "facility or activity";

(E) "Indian tribe";

(F) "owner or operator";

(G) "permit";

(H) "SDWA";

(I) "site"; and

(J) "well"; and

(5) 40 CFR 146.61(b), except for the term "cone of influence" and its definition.

(b) In addition to the definitions adopted in subsection (a), the following definitions shall apply in this article:

(1) "Application" means the standard departmental form or forms required for applying for a permit, including any additions, revisions, and modifications to the forms.

(2) "Authorized by rule," when used to describe an injection well, means that the well meets all of the following conditions:

(A) The well is a class V injection well.

(B) The well is in compliance with this article.

(C) The well is not prohibited, as specified in K.A.R. 28-46-26a.

(D) The well is not required by the secretary to have a permit.

(3) "Cone of impression" means the mound in the potentiometric surface of the receiving formation in the vicinity of the injection well.

(4) "Cone of influence" means the area around a well within which increased injection pressures caused by injection into the well would be sufficient to drive fluids into an underground source of drinking water (USDW).

(5) "Department" means the Kansas department of health and environment.

(6) "Director" means director of the division of environment of the Kansas department of health and environment.

(7) "Draft permit" means a document prepared by the department after receiving a complete application or making a tentative decision that an existing permit shall be modified and reissued, indicating the secretary's tentative decision to either issue a permit or deny a permit. A draft permit is not required for a minor modification of an existing permit.

(8) "Existing salt solution mining well" means a well authorized and permitted by the secretary before the effective date of these regulations.

(9) "Fracture pressure" means the wellhead pressure that could cause vertical or horizontal fracturing of rock along a well bore.

(10) “Gallery” means a series of two or more salt solution mining wells that are artificially connected within the salt horizon and are produced as a system with one or more wells designated for withdrawal of solutioned salt.

(11) “Injection well facility” and “facility” mean the acreage associated with the injection field and with facility boundaries approved by the secretary. These terms shall include the injection wells, wellhead, and any related equipment, including any appurtenances associated with the well field.

(12) “Maximum allowable injection pressure” means the maximum wellhead pressure not to be exceeded as a permit condition.

(13) “Motor vehicle waste disposal well” and “MVWDW” mean a disposal well that received, receives, or has the potential to receive fluids from vehicular repair or maintenance activities.

(14) “Notice of intent to deny” means a draft permit indicating the secretary’s tentative decision to deny a permit.

(15) “Production casing,” when used for a class III well, means the casing inside the surface casing of a well that extends into the salt formation.

(16) “Salt roof” means a distance, determined in feet, from the highest point of a salt solution mining cavern to the top of the salt formation. This distance shall be approved by the secretary.

(17) “Secretary” means the secretary of the Kansas department of health and environment or the secretary’s authorized representative.

(18) “Transportation artery” means any highway, county road, township road, private road, or railroad, excluding any existing right-of-way, not owned or leased by the permittee.

(19) “Well” means any of the following:

(A) A bored, drilled, or driven shaft whose depth is greater than the largest surface dimension;

(B) A dug hole whose depth is greater than the largest surface dimension;

(C) A sinkhole modified to receive fluids; or

(D) A subsurface fluid distribution system. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective March 2, 2007; amended Aug. 6, 2010.)

28-46-3. Classification of injection wells. 40 CFR 144.6, 40 CFR 144.80, 40 CFR 144.81, and 40 CFR 146.5, as in effect on July 1, 2008, are adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec.

22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-4. Injection of hazardous or radioactive wastes into or above an underground source of drinking water. The injection of hazardous or radioactive wastes into or above an underground source of drinking water shall be prohibited. (Authorized by and implementing K.S.A. 2009 Supp. 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended Aug. 6, 2010.)

28-46-5. Application for injection well permits. (a) 40 CFR 124.3, except (d), and 40 CFR 144.31, except (c)(1), as in effect on July 1, 2008, are adopted by reference. In addition, the provisions of K.S.A. 65-3437, and amendments thereto, that relate to hazardous waste injection wells shall apply to class I hazardous waste injection wells.

(b) A draft permit shall not be prepared if an applicant fails or refuses to correct deficiencies in the permit application. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-6. Conditions applicable to all permits. 40 CFR 144.51(a) through (p), as in effect on July 1, 2008, are adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-7. Draft permits. (a) Once an application is complete, a draft permit shall be issued by the secretary.

(b) Each draft permit issued after the secretary’s decision to issue a permit shall contain the following information:

(1) All conditions under 40 CFR 144.51(a) through (p);

(2) all compliance schedules under 40 CFR 144.53;

(3) all monitoring requirements under 40 CFR 144.54; and

(4) all permit conditions under 40 CFR 144.52.

(c) If the secretary determines, after issuing a notice of intent to deny, that the decision to deny the permit application was incorrect, the notice of intent to deny shall be withdrawn and a draft permit issued under subsection (b). (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-8. Fact sheets. 40 CFR 124.8, except (b)(9), as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-9. Establishing permit conditions. 40 CFR 144.52, except for references to 40 CFR 144.4, 40 CFR 144.36, and part 145, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-10. Term of permits. (a) Class I, III, and V permits shall be effective for a fixed term not to exceed 10 years.

(b) If a permittee wishes to continue an activity regulated by the permit after the expiration date of the permit, the permittee shall submit an application to renew the permit. Each application to renew the permit shall be filed with the department at least 180 days before the permit expiration date. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended May 1, 1987; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-11. Schedules of compliance. 40 CFR 144.53, except references to 40 CFR part 145, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec.

19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-12. Requirements for recording and reporting of monitoring results. 40 CFR 144.54, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-13. Effect of a permit. 40 CFR 144.35, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-14. Transfer of permits. 40 CFR 144.38, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-15. Modification and reissuance of permits. (a) Any permit may be modified and reissued either at the request of any interested person, including the permittee, or upon the secretary's initiative after conducting a review of the permit file.

(b) Each request from any interested person or the permittee shall be submitted in writing and shall contain facts or reasons supporting the request.

(c) If at least one of the causes listed in subsection (d) for modification or reissuance exists, a draft permit including the modifications to the existing permit shall be issued.

(d) Each of the following shall be cause for modification and reissuance:

(1) There are material and substantial alterations or additions to the permitted facility or activity that occurred after permit issuance and justify the application of permit conditions that are different from or absent in the existing permit.

(2) The secretary has received information indicating that the terms of the permit need modifica-

tion because the information was not provided to the secretary when the permit was issued.

(3) The regulations on which the permit was based have been changed by promulgation of new or amended regulations or by judicial decision after the permit was issued.

(4) The secretary determines that good cause exists for modification of a compliance schedule, including an act of God, strike, flood, materials shortage, or any other event over which the permittee has little or no control and for which there is no reasonably available remedy.

(5) Cause exists for termination under K.A.R. 28-46-16, and the secretary determines that modification and reissuance is appropriate.

(6) The secretary determines that the waste being injected is a hazardous waste either because the definition of hazardous waste has been revised or because a previous determination has been changed.

(7) The secretary determines that the location of the facility is unsuitable because new information indicates that a threat to human health or the environment exists that was unknown at the time of permit issuance.

(e)(1) If the secretary decides to modify and reissue a permit, a draft permit under K.A.R. 28-46-7 shall be prepared by the secretary incorporating the proposed changes. Additional information may be requested by the secretary, and the submission of an updated application may be required by the secretary.

(2) If a permit is modified, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect.

(3) A permit may be modified to make minor modifications to a permit without the issuance of a draft permit. Minor modifications shall include the following:

(A) Correcting typographical errors;

(B) requiring more frequent monitoring or reporting by the permittee;

(C) changing an interim compliance date in a schedule of compliance, if the new date is not more than 120 days after the date specified in the existing permit and does not interfere with attainment of the final compliance date requirement;

(D) allowing for a change in ownership or operational control of a facility if the secretary determines that no other change in the permit is necessary, if a written agreement containing a specific date for transfer of permit responsibility, cov-

erage, and liability between the current and new permittee has been submitted to the secretary;

(E) changing quantities or types of fluids injected that are within the capacity of the facility as permitted, if the change meets the following conditions:

(i) The change would not interfere with the operation of the facility;

(ii) the change would not interfere with the facility's ability to meet conditions described in the permit; and

(iii) the change would not change the facility's classification;

(F) changing construction requirements previously approved by the secretary; and

(G) amending a plugging and abandonment plan that has been updated. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-16. Termination of permits. 40 CFR 144.40, as in effect on July 1, 2008, is adopted by reference. (Authorized by K.S.A. 2009 Supp. 55-1,117 and 65-171d; implementing K.S.A. 2009 Supp. 55-1,117 and K.S.A. 65-165; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-17. Minor modifications of permits. 40 CFR 144.41, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-18. Area permits. 40 CFR 144.33, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-19. Emergency permits. 40 CFR 144.34, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing

K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-20. Corrective action. 40 CFR 144.55, except reference to 40 CFR 146.33(b), 40 CFR 146.7, and 40 CFR 146.64, as in effect on July 1, 2008, are adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-21. Public notice, public comments, and public hearings. 40 CFR 124.10 through 40 CFR 124.12 and 40 CFR 124.17, except references to 40 CFR 145.11, as in effect on July 1, 2008, are adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-22. Signatories. 40 CFR 144.32, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-23. Claims of confidentiality. (a) Applicants for injection permits may claim confidentiality of information to protect trade secrets. These claims shall be submitted in writing at the time application is made for a permit. Upon agreement between the applicant and the secretary, the confidential information shall be stamped "confidential", and the documents shall not be released to the public by the secretary without the prior written consent of the applicant, to the extent provided by law.

(b) Claims of confidentiality shall not apply to release of confidential materials to governmental agencies with responsibilities in water pollution control or to the release of that material due to a court order.

(c) Prohibition of confidentiality. Claims of confidentiality shall not include the name and address of the applicant or permittee or information dealing with the existence, absence, or level of contaminants in drinking water. (Authorized by K.S.A. 1984 Supp. 65-171d; implementing K.S.A. 65-170g; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986.)

28-46-24. Requirements for wells injecting hazardous wastes. 40 CFR 144.14, as in effect on April 1, 1993, is adopted by reference. In addition to 40 CFR 144.14 the following requirements shall be applicable to class I hazardous waste injection wells.

(a) Liability coverage and long-term assurances. Insurance requirements, closure and postclosure requirements, and financial requirements shall be met by compliance with K.A.R. 28-31-8(a). Higher amounts for insurance, bonds or their equivalent may be required by the secretary.

(b) Injection fluids received from multiple generators. Hazardous waste injection wells shall be subject to the requirements in K.A.R. 28-31-8(d).

(c) Disclosure statement. Each applicant shall be subject to the requirements in K.A.R. 28-31-9(c).

(d) Monitoring fees. The monitoring fee schedule shall be as specified in K.A.R. 28-31-10(c).

(e) Pretreatment requirements. Prior to hazardous waste injection, the fluids shall meet minimum pretreatment requirements that are set by the secretary. To the extent feasible, pretreatment shall render the injected fluid compatible with the injection well tubing and casing and with the disposal formation. In setting minimum pretreatment requirements, the secretary shall consider values 100 times greater than the applicable drinking water standards and values 100 times greater than the applicable 10^{-5} cancer risk levels, or other values necessary to prevent contamination of underground drinking water supplies, to protect the public health, and to take into account environmental considerations. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994.)

28-46-25. Prohibition of unauthorized injection. (a) Class I and III injection wells shall not be constructed, and underground injection shall not take place, unless authorized by a permit issued by the secretary.

(b) A class V injection well shall no longer be authorized by rule if any of the following conditions is met:

(1) The well is not in compliance with this article.

(2) The well has been closed.

(3) The well has been abandoned.

(4) The secretary has issued a permit for the well. (Authorized by K.S.A. 2005 Supp. 65-171d; implementing K.S.A. 65-165 and K.S.A. 2005 Supp. 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 2, 2007.)

28-46-26. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; revoked March 2, 2007.)

28-46-26a. Prohibited class V wells. The following types of class V wells shall be prohibited:

(a) Motor vehicle waste disposal wells; and

(b) wells receiving untreated or inadequately treated domestic sewage, as specified in K.A.R. 28-5-5. (Authorized by and implementing K.S.A. 2005 Supp. 65-171d; effective March 2, 2007.)

28-46-27. Prohibition of fluid movement into underground sources of drinking water. 40 CFR 144.12, except references to 40 CFR 144.21 through 144.24, as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-28. Establishing maximum injection pressure. (a) A maximum allowable injection pressure for each injection well shall be established by the secretary as a permit condition.

(b)(1) All class I wells operating on other than gravity flow shall be prohibited.

(2) In the case of gravity flow, the positive well-head pressure for a class I well shall not exceed 35 pounds per square inch gauge.

(c) For all wells, the maximum operating pressure shall not be allowed to exceed fracture pressure, except under either of the following conditions:

(1) The development of fractures for well stimulation operations; or

(2) the connection of a class III salt solution mining well to any other class III well for operation as a salt solution mining gallery. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-29. Design and construction requirements. 40 CFR 146.12 and 40 CFR 146.65, governing class I wells, and 40 CFR 146.32, governing class III wells, as in effect on July 1, 2008, are adopted by reference. In addition, the following requirements shall apply to class III salt solution mining wells:

(a) Each salt solution mining well cavern wall shall meet the following requirements:

(1) Be located at least 50 feet from any other active or abandoned brine-supply wells or other holes or excavations penetrating the salt section, unless the wells, holes, or excavations have been properly plugged; and

(2) be located at least 50 feet from any existing surface structures not owned by the permittee, including any transportation artery.

(b) The cavern wall for each solution mining well shall be located at least 50 feet from the property boundaries of any owners who have not consented to the mining of salt under their property.

(c) Each salt solution mining wellhead shall be located at least 150 feet from the property boundaries of any owners who have not consented to the mining of salt under their property.

(d) For each new salt solution mining well, new steel surface casing shall be set through all freshwater formations and encased in cement from bottom to top by circulating cement through the bottom of the casing to the surface.

(e) For each new salt solution mining well, production casing shall be set into the upper part of the salt formation and encased in cement as specified in this regulation. The casing shall extend at least 55 feet into the salt formation. Centralizers shall be used on the outside of the production casing and shall not be spaced more than 100 feet apart. Before setting and cementing the production casing, the mudcake on the bore wall shall be removed by the use of scratchers or a washing method approved by the director. The cement for that part of the casing opposite the salt formation shall be prepared with salt-saturated cement.

(f) A variance for each well not meeting the requirements of this regulation may be granted by the secretary if all the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The permittee agrees to perform any additional monitoring or well improvements, or any combination of these, if required by the secretary.

(3) The permittee agrees to conduct a geomechanical study in support of the variance request. The geomechanical study shall be conducted by a contractor experienced in conducting and interpreting geomechanical studies.

(g) Each permittee seeking a variance shall submit a written request to the secretary for review and consideration for approval. Each request shall include justification for the variance, the geomechanical study and interpretation, and any additional supporting information.

(h) A cement bond log shall be conducted on the production casing after the cement mixture has cured for at least 72 hours and shall be submitted to the department within 45 days after completion of the test. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-29a. Operation of class III salt solution mining wells. (a) A class III salt solution mining well shall not be operated under any of the following conditions:

(1) The salt roof is less than 50 feet in thickness above the washed cavern.

(2) The solution cavern has been developed as a single well, and the dimensions of the cavern across a horizontal plane exceed 400 feet at any depth or 300 feet in the upper one-third of the potential cavern height.

(3) The top of the solution cavern is less than 250 feet from the ground surface.

(4) The solution cavern has been developed as part of a gallery, and the dimensions of the cavern across a horizontal plane exceed 400 feet at any depth or 300 feet in the upper one-third of the potential cavern height, except the route of interconnection between wells.

(5) The depth to the top of the salt section is less than 400 feet below land surface, and the dimensions of the cavern across a horizontal plane

exceed 300 feet in diameter, except the route of interconnection between wells.

(6) The distance between adjacent galleries is less than 100 feet from the wall of a cavern in an adjacent gallery.

(7) There are leaks or losses of fluid in the casing or surface pipe of a well.

(b) A variance for any well not meeting the conditions in paragraphs (a)(2) and (a)(4) through (a)(6) may be granted by the secretary if all of the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The applicant or permittee agrees to perform any additional monitoring or well improvements, or any combination, if required by the secretary.

(3) The applicant or permittee agrees to conduct a geomechanical study in support of the variance request. The geomechanical study shall be conducted by a contractor experienced in conducting and interpreting geomechanical studies.

(c) Each applicant or permittee seeking a variance shall submit a written request to the secretary that includes justification for the variance, a geomechanical study and interpretation, and any additional supporting information for review and consideration for approval. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective Aug. 6, 2010.)

28-46-30. Monitoring and reporting requirements for class I wells. 40 CFR 146.13, 40 CFR 146.67, 40 CFR 146.68, and 40 CFR 146.69, as in effect on July 1, 2008, are hereby adopted by reference. In addition to 40 CFR 144.14, as adopted in K.A.R. 28-46-24 and 28-46-31, and 40 CFR 146.70, as adopted in K.A.R. 28-46-31, all of the following requirements shall apply to each class I hazardous waste injection well:

(a) Records of the continuously monitored parameters shall be maintained in addition to the monthly average of and the minimum and maximum values of the following parameters:

(1) Injection pressure;

(2) flow rate;

(3) injection volume; and

(4) annular pressure.

(b) The monitoring results shall be reported to the department on a monthly basis on forms provided by the department.

(c) The necessary number of monitoring wells in appropriate geologic zones for the early detection

of contaminant migration shall be determined by the secretary to protect public health, safety, and the environment. (Authorized by and implementing K.S.A. 2009 Supp. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-30a. Monitoring and reporting requirements for class III salt solution mining wells. 40 CFR 146.33, as in effect on July 1, 2008, is hereby adopted by reference. In addition, all of the following requirements shall apply to each permittee of a class III salt solution mining well:

(a) Within two years of the effective date of this regulation, each permittee shall submit a facility plan for monitoring the injection and withdrawal volumes and injection pressures that meets the secretary's approval and ensures the protection of public health, safety, and the environment.

(b) Each permittee shall monthly submit the following monitoring records to the department on a form provided by the department:

(1) The weekly injection and withdrawal volume for each salt solution mining well or gallery;

(2) the weekly injection and withdrawal ratio for each salt solution mining well or gallery; and

(3) a summary of the weekly minimum and maximum injection pressures for each salt solution mining well or gallery.

(c) Each permittee shall annually submit a report to the department, on a form provided by the department, which shall include the following information:

(1) For each well, a percentage of the remaining amount of salt that can potentially be mined in accordance with these regulations; and

(2) a summary of facility activities regarding abnormal fluid loss, well drilling, well plugging, geophysical well logging, sonar caliper surveys, mechanical integrity testing, calibration and maintenance of flow meters and gauges, elevation survey results, and the description of the model theory used to calculate the percentage of the total amount of remaining salt that can potentially be mined in accordance with these regulations.

(d) If an unanticipated loss of fluid has occurred or the monitoring system indicates that leakage has occurred and has been verified, the permittee shall notify the department orally within 24 hours of discovery and shall provide written confirmation within seven days regarding the abnormal loss or leakage.

(e) A sonar caliper survey shall be conducted on each well when calculations based on a model, approved by the secretary, indicate that 20 percent of the total amount of remaining salt that can be potentially mined in accordance with these regulations has been mined. The well shall be checked by the permittee to determine the dimensions and configuration of the cavern developed by the solutioning. Thereafter, a sonar caliper survey shall be conducted when the calculations indicate that each additional 20 percent of the remaining salt that can be potentially mined in accordance with these regulations has been mined.

(f) Any permittee may use an alternative method for determining the dimensions and configuration of the solution mining cavern if the secretary determines that the alternative method is substantially equivalent to the sonar caliper survey. The permittee shall submit the following information for the secretary's consideration:

(1) A description of the survey method and theory of operation, including the survey sensitivities and justification for the survey parameters;

(2) a description of the well and cavern conditions under which the survey can be conducted;

(3) the procedure for interpreting the survey results; and

(4) an interpretation of the survey upon completion of the survey.

(g) More frequent monitoring of the cavern dimensions and configuration by sonar caliper survey may be required by the secretary if the secretary receives information that the cavern could be unstable. Each existing well shall meet the requirements of the survey frequency established in the well permit. The results of the survey, including logs and an interpretation by a contractor experienced in sonar interpretation, shall be submitted to the department within 45 days of completing the survey.

(h) Any permittee may submit a variance request regarding the sonar caliper survey frequency to the department, if both of the following conditions are met:

(1) The variance is protective of public health, safety, and the environment.

(2) The permittee agrees to perform any additional monitoring or well improvements, or any combination of these, if required by the secretary.

(i) Each permittee seeking a variance shall submit a written request, including justification for the variance and any supporting data to the secretary for review and consideration for approval.

(j) Each permittee shall check the thickness of the salt roof at the end of two years of use and biennially thereafter, unless otherwise permitted by the secretary, by gamma ray log or any other method approved by the secretary. A report of the method used and a copy of the survey shall be submitted to the department within 45 days from completion of the test.

(k) Each permittee shall give oral notification to the department of a verified exceedence of the maximum permitted injection pressure within 24 hours of discovery of the exceedence and submit written notification within seven calendar days to the department.

(l) Each new well shall have a meter to measure injection or withdrawal volume. The permittee shall maintain records of these flow volumes at the facility and shall make the records available to the secretary upon request.

(m) Each permittee shall submit a ground subsidence monitoring plan to the secretary within two years after the effective date of these regulations. The following requirements shall apply:

(1) The ground subsidence monitoring plan shall include the following information:

(A) A description of the method for conducting an elevation survey; and

(B) the criteria for establishing monuments, benchmarks, and wellhead survey points.

(2) The ground subsidence monitoring plan shall meet all of the following criteria:

(A) Level measurements to the accuracy of 0.01 foot shall be made.

(B) Verified surface elevation changes in excess of 0.10 foot shall be reported within 24 hours of discovery to the department.

(C) No established benchmark shall be changed, unless the permittee submits a justification that the change is protective of public health, safety, and the environment.

(D) If a benchmark is changed, the elevation change from the previous benchmark shall be noted in the elevation survey report.

(E) Each permittee shall submit the elevation before and after any wellhead work that results in a change in the survey point at the wellhead.

(3) The elevation survey shall be conducted by a licensed professional land surveyor.

(4) All annual elevation survey results shall be submitted to the department within 45 days after completion of the survey.

(5) All certified and stamped field notes shall be made available by the permittee upon request by

the secretary. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective Aug. 6, 2010.)

28-46-30b. Groundwater monitoring for class III salt solution mining wells.

(a) Each permittee of a salt solution mining well shall submit a groundwater monitoring plan within two years after the effective date of these regulations to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(b) Within two years after the effective date of these regulations, each permittee shall submit a quality assurance plan, including techniques for sampling and analysis, to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment.

(c) Each permittee shall collect groundwater samples and analyze the samples for chloride and any other parameters determined by the secretary to ensure the protection of public health, safety, and the environment. The sampling results shall be submitted to the department on forms provided by the department.

(d) Each permittee shall submit the results for chloride analyses from groundwater samples to the department on an annual basis or on a more frequent basis as determined by the secretary to ensure the protection of public health, safety, and the environment. These results shall be submitted on forms provided by the department.

(e) Each permittee shall submit a static groundwater level measurement for each monitoring well with the chloride analyses results as specified in subsection (d).

(f) At any facility where chloride concentrations in the groundwater exceed 250 milligrams per liter or the established background chloride concentration, the permittee may be required to submit a workplan that describes the methods to delineate potential source areas and to control migration of the chloride contamination to the secretary for review and consideration for approval to ensure the protection of public health, safety, and the environment. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective Aug. 6, 2010.)

28-46-31. Information to be considered by the secretary. 40 CFR 146.14, except for reference to 40 CFR 122.42 (g), 40 CFR 146.62,

40 CFR 146.66, 40 CFR 146.70 and 40 CFR part 144, subpart F, for class I wells and 40 CFR 146.34, for class III wells, as in effect on July 1, 2008, are adopted by reference. In addition, all of the following requirements shall be applicable to class I hazardous waste injection wells:

(a) Each applicant shall demonstrate that the well meets the requirements of K.S.A. 65-3439, and amendments thereto, relating to hazardous waste injection wells and applicable to class I hazardous waste injection wells.

(b) Each applicant shall be responsible for providing information to the department necessary to substantiate that well injection of the hazardous waste liquid in question is the most reasonable method of disposal after all other options have been considered.

(1) Factors to be considered in determining the most reasonable method shall include those required by K.S.A. 65-3439, and amendments thereto.

(2) All factors considered shall be documented in a report submitted to the department for review and consideration for approval.

(c) Each applicant shall determine, through a detailed record search and field survey, the location of each abandoned oil and gas well and exploratory hole within the area of review, as specified in K.A.R. 28-46-32.

(1) An interview with those responsible for drilling, producing, plugging, or witnessing these activities shall be a part of the record.

(2) The results of the field survey shall be documented in a report submitted to the department.

(3) A map geographically documenting the location of all the holes and abandoned wells within the area of review, as specified in K.A.R. 28-46-32, shall be included as a part of the report specified in paragraph (c)(2). (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-32. Area of review. (a) The area of review for each class I hazardous waste injection well shall be no less than 2½ miles or shall extend to the limits of the calculated cone of influence, whichever is greater.

(b) The area of review for each class I nonhazardous waste injection well shall be no less than one mile or shall extend to the limits of the calculated cone of influence, whichever is greater.

(c) The area of review for each class III injection well shall be no less than ¼ mile.

(d) The area of review for each class V injection well shall be no less than ¼ mile. (Authorized by and implementing K.S.A. 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended May 1, 1987; amended March 21, 1994.)

28-46-33. Mechanical integrity testing.

(a) A mechanical integrity test consisting of a pressure test with a liquid to evaluate the absence of a significant leak in the casing, tubing, or packer and a test to determine the absence of significant fluid movement through vertical channels adjacent to the wellbore shall be required of each class I and class III permittee on each injection well at least once every five years.

(1) For class I hazardous waste injection wells, the mechanical integrity test shall be conducted in accordance with 40 CFR 146.8, except for reference to 40 CFR 146.33(b), as in effect July 1, 2008, which is hereby adopted by reference, and 40 CFR 146.68(d), as adopted in K.A.R. 28-46-30, by conducting all of the following:

(A) A pressure test with a liquid of the casing, tubing, and packer at least annually and if there has been a well workover;

(B) a test of the bottom-hole cement by use of an approved radioactive survey at least annually;

(C) a temperature, noise, or oxygen activation log to test for movement of fluid along the borehole at least once every five years; and

(D) a casing inspection log at least once every five years.

(2) For class I non-hazardous waste injection wells, the mechanical integrity test shall be conducted in accordance with 40 CFR 146.8.

(3) For class III injection wells, the mechanical integrity test shall be conducted in accordance with 40 CFR 146.8, except the casing shall be pressure tested by the use of a mechanical packer or retrievable plug.

(b) Each permittee shall be notified at least 30 days in advance by the secretary that a mechanical integrity test shall be performed, or a permittee may notify the department that a voluntary mechanical integrity test will be performed at least 14 days in advance of the test.

(c) Each permittee shall be required to cease injection operations immediately and to conduct a mechanical integrity test if continued use of an injection well constitutes a threat to public health

or to waters of the state. Injection operations shall not be resumed until all of the following conditions are met:

- (1) The test has been conducted.
- (2) The test has demonstrated that the well has mechanical integrity.
- (3) The well has been approved for use by the secretary.
- (d) The secretary's authorized representative shall witness all of the pressure mechanical integrity tests performed.
- (e) Each permittee shall submit results of all mechanical integrity tests to the secretary, in writing, within 30 days after the test has been conducted.
- (f) 40 CFR 144.51(q), as in effect on July 1, 2008, is adopted by reference. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-34. Plugging and abandonment. 40 CFR 144.51(n), 40 CFR 144.52(a)(6), 40 CFR 146.10, except for reference to 40 CFR 144.23(b) and 40 CFR 146.04, 40 CFR 146.71, 40 CFR 146.72, and 40 CFR 146.73, as in effect on July 1, 2008, are adopted by reference. In addition, both of the following requirements shall apply to class III salt solution mining wells:

- (a) The plugging of each salt solution mining well shall be conducted as specified in the department's document titled "procedure for plugging and abandonment of a class III salt mining well," procedure #: UICIII-7, dated March 2005, and hereby adopted by reference.
- (b) Any permittee may use an alternative method for the plugging of each salt solution mining well if the secretary determines that the alternative method is substantially equivalent to the procedure specified in subsection (a) and is protective of public health, safety, and the environment. The permittee shall submit a detailed description of the alternative plugging method for the secretary's consideration. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-34a. Closure of class V motor vehicle waste disposal wells (MVWDW) and large-capacity cesspools. (a) The following documents are hereby adopted by reference:

- (1) The following federal regulations as in effect on July 1, 2005:
 - (A) 40 CFR 144.12(a);
 - (B) 40 CFR 144.89; and
 - (C) 40 CFR 146.10(c); and
- (2) "class V underground injection control motor vehicle waste disposal well (MVWDW) sampling and closure procedures," procedure # UICV-2, published by the department and dated August 2006.
- (b) Each class V motor vehicle waste disposal well shall be closed in a manner that meets the requirements of all of the documents adopted by reference in subsection (a).
- (c) Each large-capacity cesspool shall be closed in a manner that meets the requirements of the federal regulations adopted by reference in paragraphs (a) (1) (A), (B), and (C). (Authorized by and implementing K.S.A. 2005 Supp. 65-171d; effective March 2, 2007.)

28-46-35. State inspection and right of entry. Each well owner or operator shall allow an authorized representative of the secretary access to the well facility for the purpose of determining compliance with these regulations. (Authorized by K.S.A. 2009 Supp. 55-1,117 and 65-171d; implementing K.S.A. 2009 Supp. 55-1,117 and K.S.A. 65-170b; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended Aug. 6, 2010.)

28-46-36. Waiver of requirements by secretary. 40 CFR 144.16, as in effect on April 1, 1993, is adopted by reference. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994.)

28-46-37. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; revoked March 21, 1994.)

28-46-38. Inventory and assessment of class V injection wells. 40 CFR 144.83(a)(1) and (a)(2)(i), as in effect on July 1, 2005, is adopted by

reference. Each well owner or well operator shall submit the required inventory information to the secretary on a form provided by the department. (Authorized by and implementing K.S.A. 2005 Supp. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended March 2, 2007.)

28-46-39. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; revoked March 21, 1994.)

28-46-40. Exempted aquifers. (a) An aquifer may be designated by the secretary as exempt from protection as an underground source of drinking water. Criteria for exemption may include whether the aquifer meets one of the following conditions:

(1) Contains water with more than 10,000 milligrams per liter of total dissolved solids;

(2) produces mineral, hydrocarbon, or geothermal energy; or

(3) is situated at a depth that makes the recovery of water economically impractical.

(b) Each request to exempt an aquifer under subsection (a) shall be first submitted to and approved by the administrator of the United States environmental protection agency. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective May 1, 1982; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended Aug. 6, 2010.)

28-46-41. Sharing of information. 40 CFR 145.14, as in effect on July 1, 2008, is adopted by reference. (Authorized by K.S.A. 2009 Supp. 55-1,117 and 65-171d; implementing K.S.A. 2009 Supp. 55-1,117 and 65-170g; effective May 1, 1982; amended, T-83-49, Dec. 22, 1982; amended May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994; amended Aug. 6, 2010.)

28-46-42. Exclusion of oil and gas related wells. The following class II injection wells shall be exempted from the provisions in article 46 of these regulations:

(a) any well which injects fluids brought to the surface in connection with the conventional production of oil or gas;

(b) any well which injects wastewaters from gas plants which are an integral part of production operations, unless those waters are classified hazardous at the time of injection; or

(c) any well which injects fluids to enhance the recovery of oil or natural gas. (Authorized by and implementing K.S.A. 65-171d; effective, T-83-7, April 29, 1982; effective May 1, 1983; amended, T-86-47, Dec. 19, 1985; amended May 1, 1986; amended March 21, 1994.)

28-46-43. Analyses to be performed by laboratory certified by the secretary. If a sample analysis is required by the secretary for the purposes of any permit or application for a permit under these regulations, the analysis shall be performed by a laboratory which has been certified and approved by the secretary for conducting such sample analysis. (Authorized by and implementing K.S.A. 65-171d; effective March 21, 1994.)

28-46-44. Sampling and analysis techniques. (a) Sampling and analysis shall be performed in accordance with the techniques specified in 40 CFR part 136 and the appendices, as in effect on July 1, 2008, which are adopted by reference.

(b) If 40 CFR part 136 does not contain sampling and analytical techniques for the parameter in question or if the sampling and analytical techniques in part 136 are inappropriate for the parameter in question, the sampling and analysis shall be performed using validated analytical methods or other appropriate sampling and analytical procedures approved by the secretary to ensure the protection of public health, safety, and the environment. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117 and 65-171d; effective March 21, 1994; amended Aug. 6, 2010.)

28-46-45. Salt solution mining well operations; fees. (a) Each permittee shall submit an annual permit fee of \$12,000 per facility and \$175 per unplugged salt solution mining well to the department on or before April 1 of each year.

(b) Payment shall be made to the "Kansas department of health and environment - subsurface hydrocarbon storage fund."

(c) The fees collected under this regulation shall be nonrefundable.

(d) If ownership of a salt solution mining well or salt solution mining facility changes during the

term of a valid permit, no additional fee shall be required unless a change occurs that results in a new salt solution mining well or expansion of the facility's operation. (Authorized by and implementing K.S.A. 2009 Supp. 55-1,117; effective Aug. 6, 2010.)

Article 47.—USE OF OIL AND GAS FIELD SALT WATER IN ROAD CONSTRUCTION AND MAINTENANCE PROJECTS

28-47-1. Scope. This article regulates the spreading of salt water, originating from the production of oil and gas, in road construction and maintenance projects. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-2. Definitions. (a) "Person" means any state, county, township or municipal governing body, and any individual, firm, corporation, partnership, or other association of persons.

(b) "Road" means any highway, county road, township road, or oil or gas company lease road, or any private road under jurisdiction of the applicant.

(c) "Road construction" means any activity connected with developing a subgrade or base during the construction of a road or segment of road.

(d) "Road maintenance" means any activity related to stabilization of the surface of any publicly traveled road or segment of road after construction activities have ceased.

(e) "Lease road" means any formally maintained access road to wells, tank batteries and petroleum and oil field and salt water storage facilities areas under control and operation of a company actively engaged in the production, storage or transportation of oil, gas, or disposal of salt water. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-3. Request for the use of salt water in road construction or maintenance. Any person desiring to use salt water, brought to the surface during the production of oil and gas, for purposes of road maintenance or road construction shall submit a request for the approval of such activity to the department of health and environment. The request shall be submitted 10 days prior to the time work is to begin and shall be accompanied by a plan meeting the requirements of K.A.R. 28-47-4. The request for approval may

be submitted to the appropriate district office of the department. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-4. Plan for use of salt water. A plan shall be submitted to the department prior to using salt water for road maintenance or road construction. The department shall, in writing, approve, deny or require any modification the department deems necessary in order to assure that the maintenance or construction operation will not cause surface or subsurface water pollution or soil pollution. A plan shall not be required for individual lease road maintenance projects which are limited to stabilizing lease roads. Each plan shall include at least the following: (a) A map outlining the roads included in the maintenance or construction project;

(b) a description of the method to be used in salt water spreading or incorporation;

(c) the amount of salt water estimated to be used per mile or fraction of a mile;

(d) the frequency of salt water use for each route described in (a);

(e) security methods to be used by the applicant to prevent unauthorized spraying, dumping, or discharge of salt water;

(f) a copy of any local or county regulation which also affects the applicant's activities; and

(g) the name of each authorized salt water hauler. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-5. Notification to department. Any authorized person spreading salt water in connection with road construction or maintenance shall notify the department, in writing, when any of the following situations arise: (a) The person ceases to use salt water in maintaining any or all of the roads designated on the plan submitted in fulfilling requirements set forth in K.A.R. 28-47-4(a);

(b) the person desires to amend the plan submitted under K.A.R. 28-47-4(a) to include additional roads not covered in the original plan;

(c) the person desires to use a salt water hauler other than the one designated in the original plan;

(d) upon completion of any designated phase of road construction during which the use of salt water was approved;

(e) upon discovery that an illegal act of salt water dumping, spraying, or discharge has occurred

on or adjacent to the road or road right-of-way covered under the plan; or

(f) when an accidental discharge of salt water occurs during road construction or road maintenance operations. In such a case, the applicant or contractor shall provide the appropriate district office of the department of health and environment with a written report of the incident. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-6. Discontinuance of salt water spreading. The secretary may order the discontinuance of salt water spreading if:

(a) A violation of the provisions of K.A.R. 28-47-5 occurs; or

(b) the potential exists for water pollution, due to conditions which were not apparent at the time the request to spread salt water was made. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

28-47-7. Waiver of specific requirements. The secretary may grant an exception to a requirement provided in these regulations if a person desiring a waiver can show good cause for the granting of such an exception, and the person presents an alternative to the requirements which will insure that the objectives of these regulations will be achieved. Requests for an exception shall be made, in writing, to the secretary. The secretary shall grant or deny the request within 15 days from the receipt of the request and shall notify the person requesting the exception, in writing, of the decision. If the request is denied, the secretary shall specify in the notice the reasons for the denial of the request. (Authorized by and implementing K.S.A. 1982 Supp. 55-904; effective, T-83-50, Dec. 22, 1982; effective May 1, 1983.)

Article 48.—SPILL REPORTING

28-48-1. Definitions. The following words and phrases when used in these regulations, have the meanings respectively ascribed to them in this section.

(a) “Owner” means individual, partnership, firm, trust, company, association, corporation, institution, political subdivision or agency which is financially responsible for the material or facility.

(b) “Person responsible” means person or organization which has been placed in control of the material or facility by the owner.

(c) “Waters of the state” means all streams and springs, and all bodies of surface or groundwater, whether natural or artificial, within the boundaries of the State. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective May 1, 1986.)

28-48-2. Action required. All sewage, substances, materials, or wastes, as set forth in 65-171d, regardless of phase or physical state, which are, or threaten to contaminate or alter any of the properties of the waters of the state or pollute the soil in a detrimental, harmful, or injurious manner or create a nuisance, shall be reported in the following manner:

(a) The owner or person responsible for the discharge or escape of materials detrimental to the quality of waters of the state or pollution of the soil under conditions other than provided by a valid permit issued by the secretary of health and environment, shall report the discharge or escape to the Kansas department of health and environment.

(b) Emergency or accidental discharge of materials which are detrimental to the quality of waters of the state or tend to cause pollution of the soil shall be immediately reported to the Kansas department of health and environment by the owner, owner’s representative, or person responsible. In the event the pollution causing material is in transit or in storage within the state, the owner, carrier, or person responsible for storage shall be responsible for immediate notification to the Kansas department of health and environment that the pollutant will gain admittance to the waters of the state or the soil. (Authorized by and implementing K.S.A. 1984 Supp. 65-171d; effective May 1, 1986.)

Article 49.—TRAUMATIC HEAD INJURY FACILITIES

28-49-1 to 28-49-8. (Authorized by and implementing K.S.A. 65-461; effective, T-87-18, July 1, 1986; effective May 1, 1987; revoked May 10, 1996.)

Article 50.—ASBESTOS CONTROL

28-50-1. Definitions. As used in this article, the following terms have these definitions: (a) “Accredited asbestos worker” means a person who has fulfilled the training requirements and successfully completed the written examination

requirements prescribed under federal law for persons who conduct response actions with respect to friable asbestos-containing material in either elementary and secondary schools or public and commercial buildings.

(b) "Agent" means any person who is not an employee of a business or public entity that has been specifically authorized by the entity to act in its behalf in regard to carrying out any activity that requires the person to be present in the work area while an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-related dismantling project is in progress.

(c) "Appropriate protective clothing" means outer clothing intended to be worn by a person who is engaged in asbestos-removal or asbestos-encapsulation activities. This clothing shall facilitate the removal of asbestos fibers from the person before that person moves from an area that contains asbestos fibers into an area that is intended to remain free of these fibers. Protective clothing shall consist of coveralls or a similar whole-body covering, head covers, gloves, and foot covers. Protective clothing shall be worn at all times that friable asbestos-containing materials are being handled directly and when otherwise required by OSHA or EPA regulations, work specifications governing the activities, or work plans submitted to the department in compliance with the requirements of K.A.R. 28-50-8.

(d) "Appropriate respirator" means an air-purifying or air-supplied respirator meeting either of the following criteria:

(1) A respirator approved by NIOSH for respiratory protection, under 42 C.F.R. Part 84, as in effect on October 1, 1998, for particulates and hazardous chemicals contained in encapsulants; or

(2) a respirator providing a higher protection factor if its use is specified by any of the following requirements applying to asbestos-removal or asbestos-encapsulation activities:

(A) OSHA and EPA regulations;

(B) work specifications governing the activities; or

(C) a work plan submitted to the department in accordance with the requirements of K.A.R. 28-50-8.

(e) "Appropriate warning sign" means any asbestos hazard warning sign that complies with federal OSHA or EPA regulations and is required when airborne concentrations of asbestos exceed the prescribed limits.

(f) "Approved waste disposal site" means a solid waste disposal area that is operated under a

permit issued by the department, as provided in K.S.A. 65-3407, and amendments thereto, and is authorized by the department to receive friable asbestos-containing solid wastes.

(g) "Asbestos-encapsulation project" means activities that include, and are incidental to, the coating of a friable asbestos-containing surface material with a coating or penetrating type of sealing substance, when the intended purpose of the activities is to prevent the continued release of asbestos fibers from the material into the air. The following activities shall be exempt from this definition:

(1) The repainting of a previously painted asbestos-containing surface primarily for the intended purpose of improving the appearance;

(2) the application of a sealing material to a surface after the removal of asbestos from it;

(3) the application of an encapsulant to asbestos-containing material while the material is being removed;

(4) the application of a sealing substance to 10 or fewer square feet of friable asbestos-containing material that is contiguous to other types of material;

(5) the application of a sealing substance to asbestos-containing material that has previously been enclosed or encapsulated; or

(6) the painting of friable asbestos-containing material located in a privately owned single-family residence.

(h) "Asbestos label" means a label that complies with applicable federal EPA, DOT, and OSHA regulatory requirements and is to be securely affixed to a waste container that contains friable asbestos materials.

(i) "Asbestos-related demolition project" means any activity that includes the razing of all or a portion of a structure that contains friable asbestos-containing materials or other asbestos-containing materials that may become airborne if the materials are crushed or broken. This definition shall not include the demolition of a residential structure or structures unless the demolition activity is subject to the requirements of 40 C.F.R. Part 61, subpart M, as adopted by reference in K.A.R. 28-19-735.

(j) "Asbestos-related dismantling project" means activities that include the disassembly, handling, and moving of the components of any structural or equipment item that has been covered with friable asbestos-containing material without first removing this material from the item. This

definition shall not include these activities when conducted for the purpose of repair, replacement, or maintenance of the item and require the removal of either 25 or fewer lineal feet of friable asbestos-containing materials from the surface of a pipe or 10 or fewer square feet of friable asbestos-containing materials from any other type of surface in order to dismantle the item.

(k) "Asbestos-related maintenance operation" means any operation that involves the removal or cleanup of either 25 or fewer lineal feet of friable asbestos-containing material from the surface of a pipe or 10 or fewer square feet of friable asbestos-containing material from any other type of a structural or equipment item in order to repair, replace, or maintain the item or any appurtenances to it.

(l) "Asbestos-removal project" means activities that involve, and are required by these regulations to be carried out in relation to, the removal of a friable asbestos-containing material from any of the following surfaces:

(1) A structural or equipment item that is intended to remain in place; or

(2) a structural or equipment item after its removal as a result of an asbestos-related dismantling operation.

This definition shall include activities associated with the cleanup of loose, friable asbestos-containing debris and refuse from floors and other surfaces.

This definition shall not include activities that are associated with the removal of friable asbestos-containing materials as part of an asbestos-related maintenance operation or the collection of samples for asbestos analysis.

(m) "Asbestos repair" means returning damaged friable asbestos-containing-material to an undamaged state or to an intact state to contain fiber release.

(n) "Class I asbestos worker" means a person who is certified to engage in asbestos-removal or asbestos-encapsulation projects in a nonsupervisory capacity.

(o) "Class II asbestos worker" means a person who is certified to supervise and direct asbestos-removal and asbestos-encapsulation projects in compliance with the requirements of these regulations and applicable federal regulations.

(p) "Control curtain" means either of the two following types of closure devices that are to be constructed of not less than four-mil-thick plastic sheeting material and installed in an entryway of

an area that is considered to be contaminated with free asbestos fibers:

(1) A ventilation curtain that is intended to allow unrestricted air flow movement into a contaminated area when it is being ventilated with an exhaust fan. This curtain shall consist of a single flap that opens into the contaminated area and is securely fastened across the top of the entryway framework in a manner that will allow it to overlap both sides of the entryway by a distance of no fewer than 12 inches and the base of the entryway by a distance of no fewer than three inches; or

(2) a confinement curtain that is intended to restrict the movement of air into, and from, an unventilated and contaminated area. This curtain shall consist of three constructed baffles that cover the entire area of the entryway and are securely fastened along the top of the entryway framework and along alternate sides of it at locations and in a manner that will allow two of the curtains to fully cover the entryway opening while a person passes through the third curtain. An airlock arrangement consisting of two baffle curtain entryways that are located at least three feet apart may be substituted for the triple baffle arrangement.

(q) "Department" means staff employed by the Kansas department of health and environment.

(r) "DOT" means the federal department of transportation.

(s) "EPA" means the federal environmental protection agency.

(t) "Emergency situation" means a condition that exists as the result of a sudden and unexpected event and is likely to cause immediate and substantial damage to persons or property.

(u) "Encapsulation" means the treatment of a friable asbestos-containing material with a substance to prevent the release of fibers into the air.

(v) "Enclosure" means the construction of an airtight, impermeable, permanent barrier around friable asbestos-containing material to control the release of fibers into the air.

(w) "Equipment" means any item that is designed or intended to perform any operation and shall include any item attached to it to assist in the operation.

(x) "Furnishings" means removable furniture, drapes, rugs, and decorative items.

(y) "Grade D breathing air" means an air supply that contains the following:

(1) 19.5-23.5 percent oxygen on a volumetric basis;

(2) not more than 10 volumes of carbon monoxide per million volumes of air;

(3) not more than 1,000 volumes of carbon dioxide per million volumes of air;

(4) not more than five milligrams of condensed hydrocarbons per cubic meter of air; and

(5) no objectionable odors.

(z) "HEPA filter" means a filter capable of trapping and retaining at least 99.97 percent of all mono-dispersed particles of 0.3 micrometers in diameter. The equivalent particulate filters, as referenced by NIOSH in 42 C.F.R. Part 84, as in effect on October 1, 1998, are the N100, R100, and P100 filters.

(aa) "NIOSH-approved respirator" means a respirator and any required attachments, including filters, that have been approved by the federal national institute for occupational safety and health under provisions of federal law.

(bb) "Occupied spaces" means a building, structure, or adjoining area that is accessible to the public, and in which a business entity, state agency, or political or taxing subdivision of the state is engaging in an asbestos project, as defined in subsections (g)(i), (j), (k), and (l) of this regulation.

(cc) "OSHA" means the federal occupational safety and health administration.

(dd) "Sealing material" means a liquid substance that does not contain asbestos and that is used to cover a surface that has previously been coated with a friable asbestos-containing material for the intended purpose of preventing any asbestos fibers remaining on the surface from being disbursed into the air. Sealants shall be colored a different color than the surface to which they are applied.

(ee) "Structural item" means roofs, walls, ceilings, floors, structural supports, pipes, ducts, fittings, and fixtures that have been installed as an integral part of any structure.

(ff) "Type C respirator system" means an airline respirator designed for atmospheres not immediately dangerous to life or health and consisting of a source of respirable breathing air, an air hose with a detachable coupling, flow control fittings, and a facepiece, helmet, or hood.

(gg) "Waste generator" means the business entity that is most directly responsible for the supervision of activities that result in the accumulation of friable asbestos-containing waste materials.

(hh) "Wet cleaning" means the process of using water or other liquid and a wet brush, mop, cloth, sponge, or similar wet cleaning device to completely remove any residue of asbestos-

containing materials from surfaces on which they may be located. This definition shall not include the use of a wet vacuum cleaner to pick up wet friable asbestos-containing debris, or asbestos-contaminated wastewater.

(ii) "Wetting agent" means any chemical that is added to water to decrease its surface tension and allow it to spread more easily over or penetrate into friable asbestos-containing materials.

(jj) "Work area" means a specific room or physically isolated portion of a room, other than the space enclosed within a glove bag, in which friable asbestos-containing material is required to be handled in accordance with the requirements of this article. These areas shall be designated as work areas from the time that the room, or portion of it, is being prepared in order to carry out the removal, encapsulation, or dismantling activity until the time that the area has been cleaned in accordance with any requirements applicable to these operations. (Authorized by and implementing K.S.A. 1998 Supp. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-2. Business entity license. (a) A business entity shall not engage in an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-related dismantling project unless the secretary has issued, or renewed, a license authorizing the business entity to engage in the activities. This requirement shall apply to business entities that conduct the activities in occupied spaces as defined in K.A.R. 28-50-1(bb).

(b) A business entity shall not be issued a license, or a license shall not be renewed or remain in effect, unless the business entity demonstrates that it has met the following requirements:

(1) The business entity shall be owned by, or shall employ, one or more identified individuals who shall be required to be physically present at, and directly supervise, each project for which the license is required and who shall be responsible for compliance with this article. This individual shall hold a currently valid certificate as a class II asbestos worker that has been issued in accordance with this article.

(2) Each employee or agent of the business entity who will come into contact with asbestos or who will engage in an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-

related dismantling project shall be certified and accredited as appropriate in accordance with this article.

(3) The business entity shall provide, or make available at its cost, medical examinations for all employees to the extent that the examinations are required by OSHA and EPA.

(4) The business entity shall designate an individual who is responsible for the establishment and maintenance of its respiratory protection program. The business entity shall submit a written description of the program to the department for its approval.

(5) The business entity shall own and maintain in operable condition, at minimum, the following equipment items for use in each asbestos-removal or asbestos-encapsulation project that it proposes to engage in:

(A) Two HEPA filter-equipped portable exhaust fan units with a minimum rated capacity of 500 cubic feet per minute;

(B) two HEPA filter-equipped portable vacuum-cleaning devices equipped with hoses and attachments necessary for cleaning dry surfaces;

(C) a type C pressure demand or continuous flow respirator system. The air supply equipment shall be capable of providing sufficient volumes and pressures of grade D breathing air to accommodate the manufacturer's specifications for all respirators intended to be connected to it. A sufficient number of respirators to meet all anticipated requirements shall be maintained for use with the compressor, and all respirators, hoses, and regulators shall be designated as being NIOSH approved; and

(D) a sufficient number of air-purifying respirators to meet all anticipated requirements. At least 10 filter cartridges specifically designated for use with each of these respirators shall be maintained on a continuing inventory basis.

(6) The business entity shall not prohibit the department from inspecting any work area where an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-related dismantling project is being conducted under a license issued in accordance with this regulation.

(c) Any requirement of paragraph (b)(5) of this regulation may be waived by the department if the business entity demonstrates to the satisfaction of the department that compliance with the requirement is not necessary in order to assure compliance with all requirements, procedures, and standards of OSHA, EPA, and K.A.R. 28-50-9 through 28-50-14 that are applicable to asbestos

abatement and encapsulation projects for which the application for license, or license renewal, has been submitted.

(d) Each application for a license, or license renewal, shall be made on a form provided by the department and shall be accompanied by a check or money order for the fee prescribed in subsection (e) of this regulation.

(e) Business entities applying for a license, or renewal of a license, to engage in asbestos-removal or asbestos-encapsulation projects shall pay an annual licensing fee of \$1,000.00. The fee shall cover a 12-month period beginning on the effective date of the issuance or renewal of the license. No portion of the fee shall be refunded if the license is suspended or revoked during the 12-month period or if the business entity otherwise discontinues the licensed activities within the state during the 12-month period.

(f) The applicant shall be notified by the department of each deficiency that it considers sufficient to deny the license or renewal of the license. The license shall be denied if the listed deficiencies are not corrected within 60 days of the mailing date of the notification. The application fee shall be retained by the department if a license is denied or the application is withdrawn. Each reapplication for a license shall be accompanied by the full fee prescribed in subsection (e) of this regulation. (Authorized by K.S.A. 1998 Supp. 65-5303; implementing K.S.A. 1998 Supp. 65-5303, K.S.A. 65-5304, 65-5305, 65-5306, 65-5309; effective, T-86-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Oct. 1, 1999.)

28-50-3. Public agency engaging in asbestos projects. A state agency or political or taxing subdivision of the state that engages in an asbestos removal, an asbestos encapsulation project, or an asbestos related dismantling project using its own employees shall comply with all requirements of K.A.R. 28-50-2 that are applicable to business entities, except that:

(a) A letter of approval issued by the department shall replace the license required by K.A.R. 28-50-2(a); and

(b) the fee payment requirements of K.A.R. 28-50-2(d) and 28-50-2(e) shall not be applicable.

The letter of approval shall remain in effect unless the public agency is notified, in writing, that the approval is being withdrawn because of the agency's failure to continue to comply with

applicable requirements of K.A.R. 28-50-2. The approval shall not be withdrawn until the department has conducted adjudicative proceedings that comply with the requirements of the Kansas administrative procedure act. (Authorized by K.S.A. 65-5303; implementing K.S.A. 65-5312; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987.)

28-50-4. (Authorized by K.S.A. 65-5303; implementing K.S.A. 65-5302, 65-5308; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; revoked Oct. 1, 1999.)

28-50-5. Asbestos worker certification. (a) A person shall not supervise or engage in an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-related dismantling project unless that person has a valid class I or class II asbestos worker certificate that has been issued in accordance with this regulation. Original certificates for each person who is engaged in a project that requires certification shall be available for inspection by the department at the project site.

(b) A class I or class II asbestos worker certificate shall not be issued to any person, or renewed for that person, unless the following requirements are met:

(1) The person has successfully completed a basic training or annual review course within the preceding year that has been approved in accordance with the requirements of K.A.R. 28-50-6 or otherwise approved by the department.

(2) The person applies for a certificate or renewal of a certificate on a form provided by the department and submits, along with this application, a check or money order for the fee prescribed in subsection (c) of this regulation. Failure to comply with all requirements of this subsection within 60 days of initial submittal of the application form shall void the application. Fees accompanying voided applications shall not be returned.

(3) The person has complied with requirements of paragraphs (1) and (2) of this subsection and has submitted an application for renewal of a certificate not later than six months after the certificate has expired. Failure to renew a certificate within this time period shall require compliance with all requirements applicable to initial application for a certificate.

(c) Persons applying for a class I or class II asbestos worker certificate or renewal of these cer-

tificates shall pay an annual fee of \$20.00 for a class I certificate or an annual fee of \$40.00 for a class II certificate. This fee shall cover a 12-month period beginning on the effective date of issuance of the certificate or renewal. No portion of this fee shall be refunded if the certificate is denied, suspended, or revoked during the 12-month period or if the person no longer plans to engage in asbestos-abatement or asbestos-removal projects during any portion of the 12-month period.

(d) A certificate issued under this regulation may be suspended or revoked by the secretary if the secretary determines that the holder has performed any of the following:

(1) Fraudulently or deceptively complied with the requirements of subsection (b) of this regulation;

(2) willfully disobeyed any instructions or written procedural policies provided by an employer for the purpose of complying with these regulations;

(3) knowingly permitted another person to represent that person as the holder of the certificate; or

(4) altered or modified the certificate in a manner to represent facts that are untrue.

(e) Other provisions of this regulation notwithstanding, a person shall not supervise or engage in removal, encapsulation, enclosure, or repair of any friable asbestos-containing material located in an elementary or secondary school or public and commercial building, except as part of an asbestos-related maintenance operation, unless that person is currently an accredited asbestos worker. Persons who engage in these activities shall provide evidence, acceptable to the department, that the person has been accredited by successfully completing a federal EPA-approved training course, has been certified under a state program that has been approved by the federal EPA, or has been certified in Kansas at the class I or class II level, as appropriate, after completing training in compliance with the requirements of this article. (Authorized by K.S.A. 1998 Supp. 65-5303; implementing K.S.A. 1998 Supp. 65-5303, 65-5308, K.S.A. 65-5309, 65-5310; effective, T-86-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-6. Asbestos worker training course approval. (a) Any person, business entity, state agency, political or taxing subdivision of the state, or other entity may develop and present a class I or class II asbestos worker certification train-

ing course that is intended to comply with the requirements of K.A.R. 28-50-5(b)(1). The training course shall be approved by the department before its official presentation for the purpose of complying with the regulatory requirements. Training courses shall be approved in writing, and the approval shall remain in effect until withdrawn in accordance with the provisions of subsection (f) of this regulation.

(b) Application for approval of a training course, as provided for in subsection (a) of this regulation, shall be made on forms provided by the department. The application shall include the following information:

(1) A listing of the persons who will present the training course, and their experience, education, and other qualifications;

(2) a description of the course, including the title and length of each lecture to be presented, the general nature of the information to be included in the lecture, the training aids and handouts intended to be used in its presentation, and the written examination to be given;

(3) the maximum number of students to be enrolled in each course presentation;

(4) the dates or time period over which individual courses are intended to be presented;

(5) the proposed charge for each course; and

(6) other information that the department considers necessary to evaluate the probable effectiveness and acceptability of the training course, including copies of the course manual and other handouts that are to be provided to the students and a copy of the written examination that is intended to be given.

Approval of a course may be denied by the department if the applicant fails to provide information required by this subsection within 60 days of receipt of written notice that an application is deficient.

(c) The applicant shall immediately inform the department, in writing, whenever there is any change in the information provided under subsection (b) of this regulation.

(d) Provisions shall be made to allow a representative of the department to attend one or more presentations of any course for which approval is required, at no cost to the department, and this course shall be given at a location within the state or at a border city as defined in K.A.R. 1-16-18. This attendance shall be for the purpose of determining compliance with this regulation and the correctness of the information being pre-

sented and shall be completed before a course is approved and any time thereafter that the department deems necessary. The applicant shall give the department at least 30-day notice before presenting the course, to allow time for scheduling departmental attendance. Approval of any course may be denied, withdrawn, or suspended by the department on the basis of findings resulting from this attendance.

(e) Training courses approved in accordance with these regulations shall meet the following criteria:

(1) Lectures shall be presented by persons who have education and experience that are appropriate for the subject matter presented.

(2) Training courses for class I asbestos workers may include respirator fit-testing of each student and shall provide a total of at least four training days of instruction consisting of the following:

(A) A discussion concerning the identification of asbestos, including its physical characteristics and a summary of its uses and the abatement procedures used for its control;

(B) a general discussion concerning the health hazards associated with exposure to asbestos, including special problems associated with smoking and a general description of common diagnostic procedures used to detect asbestos-related disease;

(C) a general description of state-of-the-art work practices used to reduce asbestos exposures to workers and the public during asbestos-removal and asbestos-encapsulation operations and emergency clean-up operations and maintenance operations, including use of wet removal methods, control of spraying operations, use of ventilation equipment, use of barriers and decontamination enclosures, use of glove bags, use of HEPA filtered vacuum-cleaning devices, and proper clean-up and waste disposal procedures;

(D) a general description of the use of personal protective clothing and the need for good personal hygiene practices, including a discussion of proper procedures for entering and exiting asbestos work areas and the need to abstain from eating, drinking, or smoking in these areas;

(E) a detailed description of the level of protection afforded by different types of respirators, the procedures for proper use and care of respirators, including donning, seal testing, cleaning, and storage, and the components of a proper respirator protection program;

(F) a general description of other hazards commonly encountered in asbestos control work,

including electrical shock, falls, cuts, fires, heat exhaustion or heat stroke, confined spaces, air contaminants other than asbestos, and measures that need to be taken to avoid and respond to them;

(G) a general description of state and federal regulations intended to provide protection to asbestos workers, including information on federal requirements pertaining to medical examinations and air monitoring and how people responsible for their enforcement may be contacted;

(H) no fewer than 14 hours of hands-on training in the proper use of work procedures identified in paragraph (e)(2) (C); and

(I) a separate final review session to discuss key information that is presented during the remainder of the course.

(3) Training courses for class II asbestos workers may include respirator fit-testing of each student and shall provide a total of at least five training days of instruction. The instruction shall include discussion of the following topics, in addition to the instruction required by paragraph (e)(2) of this regulation:

(A) A detailed discussion of asbestos-related notification and record-keeping requirements included in state and federal regulations and records recommended to be kept for legal and insurance purposes;

(B) a detailed discussion of Kansas and federal requirements concerning work procedures to be followed in asbestos-removal and asbestos-encapsulation projects, including the following requirements:

(i) Requirements of Title II of the federal toxics substance control act;

(ii) requirements of Kansas and federal air pollution control regulations that pertain to asbestos removal associated with the renovation and demolition of structures;

(iii) requirements of OSHA pertaining to respiratory protection practices and programs that are applicable to asbestos-control activities;

(iv) requirements of the OSHA construction and general industry standard pertaining to asbestos;

(v) requirements of the OSHA construction industry standards applicable to safe work practices at temporary work sites, including requirements concerning fire safety and hazard communication; the use of scaffolds, ladders, and electrical equipment; and working in confined spaces;

(vi) requirements of the EPA worker protection rule that applies to public employees who engage in asbestos-control activities; and

(vii) work practice requirements defined in K.A.R. 28-50-9 through 28-50-14;

(C) a general discussion of the principles and procedures involved in assessing the hazards associated with exposures to asbestos-containing building materials before undertaking abatement actions;

(D) a general discussion of the principles and procedures involved in collecting, analyzing, and interpreting the results of clearance-type airborne asbestos samples collected under federal EPA regulatory requirements after response actions have been completed in schools;

(E) a general discussion of insurance and liability issues that are encountered in relation to asbestos-control activities, including the type of coverage and exclusions associated with worker's compensation and other types of insurance and third party liabilities and defenses;

(F) a general discussion about the purpose, development, and use of contract specifications in asbestos-control work; and

(G) a general discussion about supervisory practices that are effective in the establishment and maintenance of proper and safe work practices at asbestos-control work sites.

(4) Training courses intended to provide annual review training required by state statute for class I and class II asbestos workers shall consist of at least one full training day and shall provide information on one or more topics listed in paragraphs (2) and (3) of this subsection, including a general presentation concerning new state and federal asbestos control-related regulatory requirements that are in effect or pending at the time that the training is presented and any other subject matter that may be prescribed by the department before the presentation of the training. The annual review training courses for class I and class II asbestos workers shall be conducted as separate and distinct courses and shall not be combined with any other training throughout the course.

(5) Training courses for initial certification of class I and class II asbestos workers shall include the administering and grading of a written, closed book examination for all persons who attend the course. The examinations shall adequately cover the subject matter prescribed by paragraphs (2) and (3) of this subsection and shall consist of 50 multiple-choice questions for class I worker training courses and 100 multiple-choice questions for class II worker training courses. Only persons who correctly answer 70 percent or more of the ques-

tions included in the examination shall be considered to have successfully completed the training course for the purpose of certification under the provisions of K.A.R. 28-50-5(b)(1).

(f) Approval of any training course that fails to comply with the requirements of this regulation or is otherwise deemed unacceptable may be withdrawn by the department. The person responsible for presentation of the training course shall be notified by the department of the basis for the proposed withdrawal in writing, and a 30-day time period shall be allowed for the identified deficiencies to be corrected before a final written notice is issued to indicate that the approval is withdrawn.

(g) Each person who has attended any asbestos control-related training course that is required for asbestos worker certification or accreditation in any other state where the person is certified or accredited or any other asbestos training course that has been approved by the federal EPA may be considered to have met the requirements of K.A.R. 28-50-5(b)(1) for initial certification or certification renewal if the department determines that the training course essentially complies with the requirements of subsection (e) of this regulation. Each person requesting that the determination be made shall submit the following information to the department:

(1) The date or dates that the course was attended and the location;

(2) the name and address of the business, organization, institution, or agency that presented the course;

(3) a schedule or outline of the course that indicates the subject matter that was presented and the amount of time devoted to each subject; and

(4) a written, personal certification that the person attended all course presentations in their entirety on the dates specified.

(h) Each person who applies for initial certification or certification renewal under the provisions of subsection (g) of this regulation may be required to complete additional training on topics included in subsection (e) before issuance or renewal of a certificate if the department determines that the credited course did not substantially comply with the requirements of subsection (e) of this regulation. (Authorized by K.S.A. 1998 Supp. 65-5303; implementing K.S.A. 1998 Supp. 65-5303, 65-5308; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-7. (Authorized by and implementing K.S.A. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; revoked Oct. 1, 1999.)

28-50-8. Asbestos project notification requirements. (a)(1) Each licensee, state agency, or political or taxing subdivision of the state that proposes to use its own employees to engage in an asbestos-removal project, an asbestos-encapsulation project, an asbestos-related dismantling project, or an asbestos-related demolition project shall notify the department of this intent by submitting a properly completed written notification in a manner that will reasonably assure its receipt at the department's offices not later than 10 working days before the project is intended to be started. This requirement shall apply to projects conducted in occupied spaces as defined in K.A.R. 28-50-1(bb). Improperly completed notifications may be returned for correction and required to be resubmitted in accordance with the requirements of this subsection. For the purpose of this regulation, "working days" means days other than Saturdays, Sundays, or legal holidays.

(2) The 10-day notification requirement may be waived by the department in emergency or other situations if the written notification required by subsection (b) is received a sufficient amount of time before initiation of the project to allow the department to complete any proposal reviews or inspections that it considers to be necessary. An emergency notification may be made verbally but shall be verified in writing within one working day afterwards.

(b) The notification required by subsection (a) of this regulation shall be submitted on forms provided by the department and shall be accompanied by a check or money order for payment of the fee prescribed by subsection (d) of this regulation, except as otherwise provided by that subsection. The notification shall include the following information and any additional information that is requested by the department in order to determine the nature of the project and to identify any state and federal laws or regulations that are applicable to it:

(1) A description of the structure in which the activities will be carried out;

(2) the anticipated dates during which the activities will be carried out;

(3) the anticipated amount and type of friable asbestos-containing material that will be involved in the activity;

(4) a general description of the work practices that will be followed, including containment and worker protection measures that are proposed;

(5) a listing of the employees that will be involved in the project or operation and information concerning whether or not the employees have been certified in accordance with these regulations or have received special asbestos-related work training; and

(6) the manner in which asbestos-containing materials are to be disposed of.

(c) Each notification that is provided in accordance with the requirements of subsections (a) and (b) of this regulation and indicates that the activity for which the notification has been provided will be, or is likely to be, carried out in violation of any of the requirements of an asbestos-control regulation that pertains to the project shall be considered to be an invalid notification. The person who submits the notification shall be notified by the department of the nature of the identified violation as quickly as practicable before the activity is scheduled to start. A notification that has been revised to eliminate the identified violation shall be submitted in accordance with the requirements of subsection (a) of this regulation and shall be approved by the department before the activity is initiated.

(d) Each business entity that engages in an asbestos-removal project, an asbestos-encapsulation project, an asbestos-related dismantling project, or an asbestos-related demolition project that is required to be reported under this regulation shall pay a project evaluation fee that has been calculated in accordance with the following requirements:

(1) A baseline fee of \$50 shall be paid for each activity required to be individually reported under this regulation.

(2) An additional fee shall be paid for each asbestos-removal project, asbestos-encapsulation project, asbestos-related dismantling project, and asbestos-related demolition project involving 260 lineal feet or more of friable asbestos-containing material that is installed on a pipe surface or 160 square feet or more of friable asbestos-containing material that is installed on the surface of any other type of structural or equipment item. The additional fee shall be based upon the amount of money proposed to be paid to the business entity for the completion of all project-related activities that are subject to the requirements of these regulations and shall be calculated

as 0.5 percent of the amount of this payment, except that the fee shall be rounded off to the nearest whole dollar and shall not exceed \$2,500. If the business entity is to be paid a lump sum to cover the work done on facilities that are required to be reported on more than one notification form, or a lump sum that will only be reasonably determinable upon completion of one or more reportable activities, an alternate schedule that will permit delayed payment of the fee established under this subsection may be approved by the department.

(3) If the department agrees to waive the normal 10-day notification period for other than emergency situations, under provisions of subsection (a) of this regulation, the project evaluation fee shall be two times the amount that is calculated in accordance with the provisions of paragraphs (d)(1) and (d)(2) of this regulation.

(4) If the payment used to calculate the fees established by paragraph (d)(2) of this regulation subsequently changes, the department shall be immediately advised of the reason for, and the amount of, this change. When the payment is proposed to be increased, the fee shall also be increased in accordance with the provisions of paragraphs (d)(1) and (d)(2). No portion of a fee that is initially paid shall be refunded if the payment to the contractor has been reduced below the amount that was used to originally calculate the fee. (Authorized by K.S.A. 1998 Supp. 65-5303; implementing K.S.A. 1998 Supp. 65-5302, 65-5303, K.S.A. 65-5307, 65-5312, 65-5309; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-9. Work practices for asbestos-removal projects in occupied spaces. (a) Each asbestos-removal project that involves the removal of friable asbestos-containing materials from a structural item or equipment that is located in any area that can be expected to subsequently be reoccupied by any person after the project is completed, or in an area that is only directly accessible from an area that is, or subsequently will be, occupied by any person other than persons directly involved in the project, shall be conducted in accordance with the following requirements:

(1) Each proposed work area shall be isolated from other areas of the building and outside areas by erecting temporary partitions that are rigid and airtight around the work area or by installing

airtight seals over doorways, windows, and ventilation system openings, except that doorways between the work area and decontamination facilities and waste load-out areas shall be closed off with a control curtain. At least one temporary partition or seal shall contain a clear viewing area that is 18 inches or more in height and width and is installed in a manner that will allow direct visual observation of the work area from a location outside of the work area. Plastic sheeting used for the construction of airtight seals shall be not less than four mils thick. Whenever possible, each heating and ventilation system serving the work area shall be shut down and locked out. If these systems cannot be shut down, special provisions shall be made to assure that airborne contamination from the work area cannot enter the ventilation system and be carried to other areas of the building. Appropriate warning signs shall be prominently posted at all entryways into the work area. Provisions shall be made to prevent any person other than those persons having responsibilities directly related to the project from entering the area before the requirements of paragraphs (9) and (12) of this subsection are met and the project is approved in accordance with all other applicable requirements.

(2) All movable furnishings, equipment, and fixtures in the proposed work area shall be pre-cleaned with a HEPA filter-equipped vacuuming device or wet cleaning methods. After cleaning, the items shall be removed from the work area and stored in an area that is not subject to contamination with asbestos fibers. The items shall not be returned to the work area until final room cleanup has been completed and approved in accordance with requirements applicable to the project.

(3) All structural item surfaces, other than those from which asbestos is to be removed, and all non-movable furnishings, equipment, and fixtures remaining in the proposed work area shall be pre-cleaned with a HEPA filter-equipped vacuuming device or wet cleaning methods and covered with not less than four-mil-thick plastic sheeting, except that floors shall be covered with a minimum of two layers of six-mil-thick plastic sheeting that extends up the walls at least 12 inches. Plastic sheeting on walls shall be affixed to the wall in a manner that assures that it will remain in position throughout the length of the project and shall overlap the floor sheeting at least 12 inches above the intersection of the walls with the floor. Any tears that are noted in the protective plastic

sheeting required by this subsection shall be immediately repaired.

(4) HEPA filter-equipped ventilation fans shall be installed in a manner that will continually exhaust air from all locations within the work area. The total capacity of the fans shall be sufficient to remove the entire volume of air contained in the workroom area within 15 minutes or less, unless a longer time period is specifically approved by the department. The removed air shall be discharged through a duct that has been installed through the plastic on the walls in a manner that will provide an airtight seal between the plastic and the outside surface of the duct. The exhausted air shall be discharged outside of the building whenever possible and shall not be discharged inside the building, unless this discharge is specifically approved by the department in writing. Each ventilation fan shall be continuously operated throughout the duration of the project until the action required by paragraph (12) of this subsection is completed. Each fan shall be operated in a manner that establishes, and maintains, a flow of air into the work area from all adjacent areas of the building as demonstrated by use of smoke-producing tubes. At a minimum, these determinations shall be made and the results recorded before initiation of asbestos-removal operations and at the start of each day's operation.

(5)(A) A decontamination facility shall be provided between the work area and building areas intended to remain uncontaminated with asbestos fibers generated by the asbestos-removal operations. All persons entering or leaving the work area shall pass through and use the decontamination facility. Each decontamination facility shall consist of the following designated areas, which are each to be entered through a doorway that is covered by a control curtain:

(i) A clean room that shall be maintained free of asbestos-containing debris and shall be first entered by any persons entering the work area. The clean room shall be constructed in a manner that provides adequate space for removing or putting on street clothing, putting on and fit-testing respirators, and putting on protective clothing and other protective equipment required to be worn in the work area.

(ii) A shower room that shall be first passed through by any person that moves from the work area into the clean room. These persons shall be required to shower before entering the clean room. Each shower room shall be provided with

at least one shower head that is supplied with hot and cold water. Adequate quantities of soap, hair shampoo, and towels shall be provided to accommodate each person who emerges from the work area. Shower enclosures shall be leak proof and constructed of disposable or easily washable material. Shower water may be drained directly into the building's plumbing system or collected for subsequent disposal in accordance with the requirements of K.A.R. 28-50-14.

(iii) An equipment room that shall be passed through before the shower room can be entered from the work area. The equipment room shall be used for temporary storage of contaminated tools, equipment, and protective clothing used in the work area. The floor and walls of the room shall be lined with not less than six-mil-thick plastic sheeting. Tools, equipment, and protective clothing shall be free of gross contamination before removal from the work area into the equipment room.

(B) All decontamination facility areas shall be fully enclosed and shall be contiguous to each other and the work area unless connected to one another by enclosed passageways that are effectively isolated from areas intended to remain free of asbestos contamination. Decontamination facilities shall remain in place and in functional condition until removal of airtight seals and partitions is authorized in accordance with the requirements of K.A.R. 28-50-9(a)(12).

(6) A waste load-out area may be constructed between the work area and the exit through which asbestos-containing waste materials are intended to be removed from the work area. If a waste load-out area is provided, it shall be totally enclosed, and the doorway between the work area and the waste load-out area shall consist of a combination of control curtain and rigid door. The floor of the load-out area shall be covered with not less than six-mil-thick plastic sheeting, which shall be kept clean and free of visible asbestos-containing debris. Floor covering shall be removed upon completion of the project and disposed of in compliance with the requirements of K.A.R. 28-50-14. Asbestos-containing waste shall not be transferred from the waste load-out area unless it has been placed in containers that comply with the requirements of K.A.R. 28-50-14(a). Waste containers shall be removed from the waste load-out area only by persons who enter the load-out area from an area that is intended to be maintained free of asbestos-containing debris generated by the re-

moval operations. The doorway between the work area and load-out area shall be kept secured except when waste materials are being transferred from the work area. The load-out area doorway shall not be used as an entrance or exit by persons who leave or enter the work area.

(7) All exposed surfaces of friable asbestos-containing materials shall be maintained in a wet condition while the material is being removed or cleaned up from structural or equipment items. Any friable asbestos-containing material shall be wetted with a water solution containing an effective wetting agent. The wetting solution shall be applied with a low pressure spraying system. The effectiveness of the solution in penetrating the asbestos-containing materials shall be determined by applying it to a small representative sample of the material before the gross removal operation is initiated. The removed friable asbestos-containing materials shall be maintained in a wet condition until placed in sealed containers for disposal in accordance with the requirements of K.A.R. 28-50-14. All accumulations of loose debris shall be removed from floors and other surfaces and placed in sealed bags or containers as quickly as practicable and at least daily.

(8) After the asbestos-containing materials have been removed from the structural or equipment items, all plastic sheeting, equipment, and surfaces in the work area shall be cleaned with a HEPA filter-equipped vacuuming device or by wet cleaning methods and shall be free of all visible debris, but if more than one layer of plastic sheeting has been used on walls and floors, this additional layer of sheeting may be removed and disposed of instead of being cleaned. Sheetting that is removed shall be disposed of in compliance with the requirements of K.A.R. 28-50-14. Any liquid or material that has leaked through these additional layers of sheeting shall be removed by wet cleaning methods.

(9) The surfaces from which the friable asbestos-containing materials have been removed shall be cleaned free of all visible residues and then covered with an effective sealing material before the final layer of plastic sheeting covering the floors, walls, and non-movable items is removed.

(10) After the sealant has dried, the plastic wall and floor coverings shall be removed and disposed of in compliance with the requirements of K.A.R. 28-50-14. After removal of the plastic wall and floor coverings, all surfaces in the work area shall be cleaned with a HEPA filter-equipped vacuum-

ing device or by wet cleaning methods and shall be free of all visible debris.

(11) After completing the requirements in paragraph (10) of this subsection, clearance monitoring, as described in 40 C.F.R. 763.90(i), as in effect on July 1, 1998 and hereby adopted by reference, may be conducted. In the absence of clearance monitoring, an air stream from a high speed leaf blower or equivalent device shall be swept across all surfaces within the work area for a period of not less than five minutes for each 1,000 square feet of surface area.

(12) Each temporary partition and airtight seal provided for doors, windows, and duct openings in accordance with paragraph (1) of this subsection shall remain in place until the sampling results from the clearance monitoring, referenced in K.A.R. 28-50-9(a)(11), indicate compliance or in the absence of clearance monitoring, the temporary partitions and airtight seals shall remain in place for no fewer than 24 hours after completion of the actions required by paragraph (11) of this subsection and until the cleanup is approved in accordance with any other special requirements applicable to the project.

(b) Any individual requirement of subsection (a) of this regulation may be waived by the department for asbestos-removal projects if the notification submitted in accordance with K.A.R. 28-50-8 identifies the requirements for which waiver is requested, the reason for requesting the waiver, and any alternate procedure that is proposed. A waiver shall not be granted unless the health and safety of the workers and building occupants are adequately protected. The following minimum requirements shall also be met:

(1) The work area in which the asbestos is to be removed shall be completely isolated from any other areas of the building by the construction or installation of airtight barriers that shall continually remain in place for the duration of the asbestos removal project until final cleanup is completed and approved in accordance with requirements applicable to the project.

(2) Appropriate warning signs shall be prominently posted at all entryways into the work area, and access to the work area shall be restricted to only those persons that are required to enter it because of responsibilities directly related to the project until the requirements of paragraphs (3) and (4) of this subsection are met and the project is approved in accordance with all other applicable requirements.

(3) The surfaces from which the asbestos-containing materials have been removed shall be cleaned free of all visible residue and covered with an effective sealant before the warning signs required by paragraph (2) of this subsection are removed and access to the work area of persons other than those directly involved in the project is permitted.

(4) All visible asbestos-containing debris shall be removed from the work area before the warning signs required by paragraph (2) of this subsection are removed or access to the work area of persons other than those directly involved in the project is permitted.

(5) Asbestos contamination shall be removed from all persons that have been in the work area before they leave the premises or enter any area intended to remain free from asbestos contamination. All equipment used on the project shall be cleaned free of visible debris before it is removed from the work area.

(6) The waiver and all proposed alternative procedures shall be approved by the department in writing before the project is initiated, except that verbal approval may be provided if the 10-day notification period has been waived in accordance with the provisions of K.A.R. 28-50-8(a).

(c) The requirements of subsections (a) and (b) of this regulation may be waived by the department for the removal of friable asbestos-containing materials from the surface of pipes, structural items, or other similar conduits if the following minimum requirements are met:

(1) All friable asbestos-containing materials proposed to be removed in the work area shall be removed using six-mil-thick or thicker leak-proof glove bags in accordance with the manufacturer's instructions. Glove bags shall not be used to remove asbestos-containing materials from surfaces having a temperature of 150°F or more unless written authorization to do so is provided by the department before the removal.

(2) Appropriate warning signs shall be prominently posted at all entryways into the work area. Provisions shall also be made to prevent any person other than those persons that have responsibilities directly related to the project from entering the work area until the actions required by paragraphs (6), (7), and (8) of this subsection are completed and the project is approved in accordance with all other applicable requirements.

(3) Each person using the glove bag shall avoid damaging or otherwise causing the release of

asbestos fibers from any other friable asbestos-containing materials that are located within the work area, including any debris that may have accumulated in the area before the start of the project. Each section of the pipe, structural item, or conduit from which damaged or loose hanging friable asbestos-containing material is to be removed that is not immediately enclosed within a glove bag shall be tightly enclosed in six-mil-thick plastic sheeting until a glove bag is placed over it and the asbestos-containing material is removed.

(4) Glove bags shall be sealed to the pipe, structural item, or conduit in a manner that provides an airtight seal around the area from which the asbestos is to be removed until the glove bag is removed, unless the manufacturer's instructions require air pressure within the bag to be maintained below the pressure outside of the bag. Glove bags shall not be moved and used for removal at more than one location except under written authorization provided by the department and in compliance with any special requirement imposed as a condition for granting the authorization.

(5) All exposed surfaces of friable asbestos-containing materials shall be wetted with a water solution containing an effective wetting agent while the material is removed, and the removed material shall be maintained in a wet condition while it remains in the glove bag until the bag is sealed for final disposal in accordance with the requirements of K.A.R. 28-50-14.

(6) Surfaces from which asbestos-containing materials have been removed shall be cleaned free of all visible residues before the glove bag is removed.

(7) A sealing material shall be applied to all surfaces from which the asbestos-containing material is removed, and to all friable asbestos-containing material surfaces that become exposed as a result of this removal before the warning signs required by paragraph (2) of this subsection are removed or access to the work area of persons other than those directly involved in the project is permitted.

(8) The work area shall be free of all visible asbestos-containing debris, including accumulations that existed before the start of the project and before the warning signs required by paragraph (2) of this subsection are removed or access to the work area of persons other than those directly involved in the project is permitted.

(9) Each project activity in the work area shall be immediately discontinued if any asbestos contamination of the general work area results from

damage or improper use of the glove bags or if there is damage to any other friable asbestos-containing materials located within the area. Project activities shall not be resumed until all surfaces in the area that are likely to have become contaminated with asbestos fibers have been thoroughly cleaned with a HEPA filter-equipped vacuuming device or by wet cleaning methods. Each person who is likely to be contaminated with asbestos fibers resulting from these sources, including the cleanup operation, shall remove, or use a HEPA filter-equipped vacuuming device or wet cleaning methods to clean all contaminated outer work clothing before leaving the work area.

(d) The requirements of subsections (a) and (b) of this regulation may be waived by the department for an asbestos-removal project that involves the removal of friable asbestos-containing materials from structural items or equipment that is installed in, and accessible from, outdoor areas, if the following minimum requirements are met:

(1) Each door, window, or other opening into enclosed areas that is adjacent to the work area shall be securely covered with not less than four-mil-thick plastic sheeting if the opening is located 100 or fewer feet from the work area.

(2) A person other than the persons that have responsibilities directly related to the project shall not be allowed to occupy or pass through any unenclosed area that is located 50 or fewer feet from the work area. This area shall be identified and defined by fences or other effective means. Appropriate warning signs shall be prominently posted at all entryways into the area until the requirements of paragraphs (4) and (5) of this subsection are met and the project is approved in accordance with all other applicable requirements.

(3) All exposed surfaces of friable asbestos-containing material shall be wetted with a water solution that contains an effective wetting agent while the material is being removed. All removed material, including debris on surfaces below the location from which the material is removed, shall be maintained in a wet condition until placed in sealed containers for disposal in accordance with the requirements of K.A.R. 28-50-14.

(4) All friable asbestos-containing debris, including accumulations that existed before the start of the project, shall be removed from the work area before the warning signs required by paragraph (2) of this subsection are removed or access to the area of persons other than those hav-

ing responsibilities directly related to the project is permitted.

(5) All surfaces from which asbestos-containing materials are removed shall be cleaned free of visible residues and covered with an effective sealant before the warning signs required by paragraph (2) of this subsection are removed or access to the area of persons other than those having responsibilities directly related to the project is permitted.

(6) Each person who removes asbestos-containing materials or otherwise occupies the restricted area identified in paragraph (2) of this subsection shall remove outerwear that is worn in the area before entering any enclosed area that is occupied by any person other than those persons engaged in the project.

(e) The requirements of subsections (a) and (b) of this regulation may be waived by the department for an asbestos project that involves the removal of friable asbestos-containing materials from structural items that are installed in, and accessible from, any structure or portion of a structure that is demolished after the material is removed, if the following minimum requirements are met:

(1) Appropriate warning signs shall be prominently posted at all areas into the work area, and persons other than the persons that have responsibilities directly related to the asbestos-removal project shall not be allowed to occupy or pass through the work area until the requirement of paragraph (4) of this subsection is met and the project is approved in accordance with any other applicable requirements.

(2) Each window, door, and other direct opening between any area where asbestos is to be removed and any other area of the structure that is not intended to be demolished shall be sealed airtight, with securely fastened plastic sheeting, until the project is completed. The plastic sheeting seals shall be not less than four mils thick.

(3) All exposed surfaces of friable asbestos-containing material shall be maintained in a wet condition while the material is being removed. The material shall be wetted with a water solution containing an effective wetting agent. All removed friable asbestos-containing material, including debris that falls on surfaces below the location from which the material is removed, shall be maintained in a wet condition until placed in sealed containers in accordance with the requirements of K.A.R. 28-50-14.

(4) All friable asbestos-containing debris, including accumulations that existed before the start of the project, shall be removed from the work area before the warning signs required by paragraph (1) of this subsection are removed or access to the work area of persons other than those having responsibilities directly related to the project is permitted.

(5) Each person who removes asbestos-containing materials or otherwise occupies the work area before the project is completed shall remove outerwear that is worn in the area before entering any enclosed area that is occupied by any person other than those persons engaged in the project.

(6) Structural items from which friable asbestos-containing material is removed shall not be sold or reused for any purpose unless the surfaces from which the material has been removed are free from visible residue and have been covered with an effective sealing material, unless the sealing requirement is waived by the department in writing.

(f) Each person engaged in an asbestos-removal project or entering an asbestos-removal project work area shall be provided with, and shall wear, an appropriate respirator and protective clothing.

(g) Airborne asbestos exposures of each person engaged in an asbestos-removal project shall be determined in accordance with applicable OSHA or EPA exposure-monitoring requirements. Copies of the results of the analyses of samples collected at a project subject to the requirements of this regulation shall be submitted to the department as soon as practicable, after receipt of a written request for the results of the analyses from the department. (Authorized by and implementing K.S.A. 1998 Supp. 65-5303; effective, T-86-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended, T-89-8, March 18, 1988; amended, T-89-15, April 26, 1988; amended Sept. 19, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-10. Work practices for asbestos-encapsulation projects. (a) Use of encapsulation as a method of controlling asbestos fiber release from friable asbestos-containing materials on structural items or equipment shall be subject to the following requirements:

(1) Encapsulating materials shall not be applied to fibrous, sprayed-on, asbestos-containing materials or to cementitious asbestos-containing materials that show signs of poor adhesion.

(2) Encapsulating material shall not be applied to friable asbestos-containing materials that are installed on surfaces in locations that are subject to frequent abrasive or other physical damage.

(3) Penetrating encapsulating agents shall be tested for, and shall demonstrate, acceptable adhesive and penetrating characteristics. Testing shall consist of applying the encapsulant to the surface of the material in the prescribed manner and then removing a core sample of this material for physical and visual inspection. Representative testing shall be conducted at one or more randomly selected locations within the structure before initiation of the project. Test core holes shall be repaired immediately after the visual inspection is completed.

(4) Encapsulant materials shall have acceptable flame retardant characteristics and shall not be noxious or toxic to applicators or to persons that occupy the structure after the project is completed.

(5) Each damaged portion of a surface to which the encapsulant material is to be applied shall be repaired with asbestos-free patching materials before it is applied.

(b) An encapsulation project that involves the encapsulation of friable asbestos-containing materials shall be conducted in accordance with the work practices contained in 29 C.F.R. 1926.1101, as in effect on July 1, 1998 and hereby adopted by reference.

(c) Each person engaged in an asbestos-encapsulation project or entering an asbestos-encapsulation project work area shall be provided with, and shall wear, an appropriate respirator and protective clothing. (Authorized by and implementing K.S.A. 1998 Supp. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended Feb. 4, 1991; amended Oct. 1, 1999.)

28-50-11. (Authorized by and implementing K.S.A. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; revoked Feb. 4, 1991.)

28-50-12. Work practices for asbestos related dismantling projects. (a) Structural or equipment items that are covered with friable asbestos containing materials and are intended to be moved without first removing the asbestos containing materials from the surfaces of them shall be handled in the following manner:

(1) The removal of friable asbestos containing materials from any portion of the surface of a structural or equipment item for the purpose of me-

chanically disassembling or cutting the item into smaller components shall be conducted in accordance with the requirements of K.A.R. 28-50-9.

(2) Structural or equipment items, or component parts of them, that are covered with friable asbestos containing material shall either be securely wrapped in not less than a double layer of six mil thick plastic sheeting or shall be placed in a disposable fiber or metal container that is equipped with a plastic bag liner and a tight fitting and firmly attached lid before being removed from the work area. All exposed surfaces of the friable asbestos containing material covering the item or component shall be wetted with a water solution containing a wetting agent before the item or component is wrapped or placed in a container. The exterior surface of the container or wrapping shall be cleaned free of all visible residues by wet cleaning methods before the item or component is moved and the item or component shall be handled in a manner that will prevent damage to the container or wrapping. If damage to a wrapping or container occurs, a new wrapping or container shall be immediately provided and all friable asbestos containing debris released from the damaged wrapping container shall be immediately cleaned up using wet cleaning procedures or a HEPA filter equipped vacuum cleaner.

(b) Structural or equipment items, or component parts of them, that have been removed in accordance with the provisions of subsection (a) of this regulation shall be disposed of in compliance with the requirements of K.A.R. 28-50-14(a) (4) unless the friable asbestos containing material covering the items is subsequently removed in compliance with the following requirements:

(1) Items, or component parts, from which asbestos containing material is removed shall not be sold or reused for any purpose until the surfaces from which the material has been removed are free of visible residue and have been covered with an effective sealing material, unless the sealing requirement is waived by the department in writing.

(2) The removal of the friable asbestos containing material outdoors shall be carried out in compliance with the requirements of K.A.R. 28-50-9(d).

(3) The removal of the friable asbestos containing material indoors shall only be done in an area specifically designated for this purpose and in compliance with the following requirements:

(A) Access to the area must be controlled to prevent any person other than those responsible

for the removal operations from entering it. An appropriate warning sign shall be posted at each entryway into the area.

(B) The area shall not be served by a common heating and ventilation system that serves other enclosed occupied areas on the premises.

(C) A local exhaust system that is approved by the department shall be provided. Air exhausted from the removal area shall be discharged to the outside air after being passed through an air cleaning device that has been approved by the department.

(D) Each person working in the area shall be provided a convenient area immediately adjacent to the removal area to take showers and change into uncontaminated clothing, unless other arrangements are approved by the department.

(E) Each person entering into the area shall be provided with and wear an appropriate respirator and protective clothing.

(F) The designated asbestos removal area shall not be used for any other purpose until the removal operations have been discontinued and the area has been cleaned of all visible residue and debris with a HEPA filter equipped vacuuming device or by wet cleaning methods.

(G) All exposed surfaces of the friable asbestos containing material shall be maintained in a wet condition while the material is being removed from the structural or equipment item, or component, unless dry removal is approved by the department. The friable material shall be wetted with a water solution containing an effective wetting agent.

(H) Friable asbestos containing materials that are removed from any structural or equipment item, or component, shall be handled in accordance with the requirements of K.A.R. 28-50-14. (Authorized by and implementing K.S.A. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987.)

28-50-13. Work practices for asbestos-related demolition projects. (a) The following requirements shall be met before a structure that contains structural items that are covered with friable asbestos-containing material is demolished:

(1) The structural items shall be removed from the structure in accordance with the requirements of K.A.R. 28-50-12; or

(2) all friable asbestos-containing materials covering the structural materials shall be removed from the materials while they remain in place in accordance with the requirements of K.A.R. 28-50-9.

(b) Any business entity, state agency, political or taxing subdivision of the state, or person that demolishes a structure which contains any structural item covered with, or composed of, asbestos fiber-containing material shall assure that the item is handled in a manner that will prevent the asbestos fibers from becoming airborne. (Authorized by K.S.A. 65-5303; implementing K.S.A. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended Feb. 4, 1991.)

28-50-14. Asbestos waste disposal. (a) All solid waste materials containing friable asbestos that result from an asbestos-removal project, an asbestos-encapsulation project, an asbestos-related dismantling project, or an asbestos-related demolition project shall be handled in the following manner:

(1) All friable asbestos-containing waste shall be placed in tightly sealed containers in a wet condition before it is removed from the work area. Waste containers shall be double bagged in not less than six-mil-thick, liquid-tight, clear plastic bags unless the waste contains rigid or heavy objects that are likely to tear the bags. If bag damage is likely to occur, the waste shall be placed in fiber or metal containers that are equipped with a plastic bag liner and a tight-fitting lid that can be firmly fastened in position. Large sections of structural items, including pipe or ductwork that has been removed with friable asbestos-containing materials left in place, may be tightly wrapped in not less than a double layer of six-mil-thick, clear plastic sheeting for disposal purposes if they cannot be placed in containers. All exposed surfaces of the friable asbestos-containing material shall be in a wet condition when each item is wrapped.

(2) The exterior surface of each container or individually wrapped object shall be cleaned free of all visible debris, and an asbestos label shall be securely attached before the container or wrapped object is removed from the work area to another area for storage or transport purposes.

(3) Before each container or wrapped object of friable asbestos-containing material is removed from the work area to another area for storage or transport purposes, the waste generator shall place on the exterior of each container or wrapped object specific information that will identify the asbestos-removal project, asbestos-encapsulation project, asbestos-related dismantling project, or asbestos-related demolition project at which the waste was generated. The identifying information

shall be legible and printed with indelible ink. The waste generator shall mark each container or wrapped object by any of the following methods:

(A) Printing or attaching to each container or wrapped object a label that contains the name of the licensed business entity or approved public agency that carried out the project and the project location at which the waste was generated;

(B) printing on the exterior surface of each container or wrapped object the identifying number provided by the department for each project upon receipt of a project notification submitted in compliance with the requirements of K.A.R. 28-50-8; or

(C) attaching to each container or wrapped object a label that meets the requirements of applicable federal EPA or OSHA regulations pertaining to the identification of containers or wrapped objects used for the disposal of asbestos-containing materials.

(4) Each waste container shall be carefully handled and transported in order to prevent breaking or opening. Whenever a container breaks or otherwise becomes unable to completely contain the waste, the waste shall be immediately transferred into another sealed container that complies with the requirements of paragraphs (a)(1) and (a)(2) of this regulation. Any friable asbestos-containing solid waste materials that come out of the original container shall be immediately cleaned up after being saturated with water and placed in the replacement container.

(5) Waste shall be transported in vehicles that have completely enclosed cargo areas, or a four-sided cargo area that shall be completely covered with six-mil-thick plastic sheeting or other equivalent covering while the waste is being transported. All visible debris remaining in the vehicle cargo area after the waste has been deposited at the disposal area shall be immediately removed by wet cleaning methods and disposed of in accordance with the requirements of this subsection.

(6) The waste generator shall remain responsible for storage, transport, and disposal of the waste in accordance with this subsection until the time that the waste is delivered to and accepted by the operator of an approved waste disposal site. The waste generator shall be released from further responsibility for handling of the waste when the disposal site operator acknowledges, in writing, that the delivered waste has been properly identified as friable asbestos-containing material and has been delivered in a manner and condition that is acceptable to the disposal site operator.

(b) Wastewater and other liquid waste that contains friable asbestos-containing materials that result from an asbestos-removal project, an asbestos-encapsulation project, or an asbestos-related maintenance, dismantling, or demolition operation may be disposed of by mixing them with solid waste materials and disposing of the mixture in accordance with the requirements of subsection (a) of this regulation. Wastewater that cannot be handled in this manner shall be disposed of by one of the following methods:

(1) Wastewater from decontamination showers and final cleanup of waste containers and equipment may be disposed of in public sewer systems either by discharge into the plumbing system where the waste is generated or by storing the waste and discharging it directly into the sewer system at a location designated by the operator of the system. The wastewater shall be free of any material that is likely to cause stoppage in the plumbing or sewer systems.

(2) Discharge of any other asbestos-contaminated wastewater or liquid waste or the use of any other method for the disposal of contaminated liquid wastes shall only be at a location and in a manner specifically approved by the department in writing. (Authorized by and implementing K.S.A. 1998 Supp. 65-5303; effective, T-87-1, Jan. 6, 1986; effective May 1, 1987; amended, T-88-54, Dec. 16, 1987; amended May 1, 1988; amended Feb. 4, 1991; amended Oct. 1, 1999.)

Article 51.—HOME HEALTH AGENCY LICENSURE

28-51-100. Definitions. (a) “Administrator” means either a person who has training and experience in health services administration and at least one year of supervisory or administrative experience in health care, or a qualified health professional.

(b) “Admission note” means a dated notation that is written by a professional member of the health team after the initial assessment of a patient and that documents the relevant diagnoses; the patient’s health history; environmental, safety, and social factors of the patient’s home; the patient’s nutritional requirements, medications, and treatments; and the patient’s physical and mental levels of functioning.

(c) “Branch office” means a location or site from which a home health agency provides services within a portion of the total geographic area

served by the parent agency. The branch office shall be part of the home health agency and shall be located close to share administration, supervision, and services in a manner that renders it unnecessary for the branch to independently meet the conditions of licensure as a home health agency. Each branch office shall be within 100 miles of the parent agency.

(d) "Bylaws" means a set of rules adopted by a home health agency for governing the agency's operation.

(e) "Clinical record" means a legal document containing facts that meet the following criteria:

(1) Provide a basis for planning and implementing the patient's care program;

(2) indicate the patient's status and response to treatment;

(3) serve as a record of communication for the professional groups responsible for the patient's care; and

(4) serve as a repository of data that can be used to review and evaluate the care provided.

(f) "Dietitian" means a person who is licensed by the Kansas department of health and environment as a dietitian.

(g) "Direct supervision" means that the supervisor is on the facility premises and is accessible for one-on-one consultation, instruction, and assistance, as needed.

(h) "Discharge summary report" means a concise statement, signed by a qualified health professional, reflecting the care, treatment, and response of the patient in accordance with the patient's plan of care and the final disposition at the time of discharge.

(i) "Home health aide" means an individual who has a home health aide certificate issued by the licensing agency as specified in K.A.R. 28-51-113.

(j) "Home health aide trainee" means an individual who meets either of the following:

(1) The individual has completed a 90-hour nurse aide course prescribed in K.A.R. 28-39-165.

(2) The individual's training has been endorsed as specified in K.A.R. 28-51-115.

(k) "Licensed nursing experience" means experience as a registered nurse or licensed practical nurse.

(l) "Licensing agency" means the Kansas department of health and environment.

(m) "Occupational therapist" means a person who is licensed with the Kansas state board of healing arts as an occupational therapist.

(n) "Occupational therapy assistant" means a person who is licensed with the Kansas state board of healing arts as an occupational therapy assistant.

(o) "Parent home health agency" means a home health agency that develops and maintains administrative control of subunits or branch offices, or both.

(p) "Physical therapist" means a person who is licensed with the Kansas state board of healing arts as a physical therapist.

(q) "Physical therapist assistant" means a person who is certified by the Kansas state board of healing arts as a physical therapist assistant.

(r) "Physician" means a person licensed in Kansas or an adjoining state to practice medicine and surgery.

(s) "Plan of care" means a plan based on the patient's diagnosis and the assessment of the patient's immediate and long-range needs and resources. The plan of care is established in consultation with the home health services team. If the plan of care includes procedures and services that, according to professional practice acts, require a physician's authorization, the plan of care shall be signed by a physician and shall be renewed every 62 days.

(t) "Progress note" means a dated, written notation by a member of the home health services team summarizing the facts about the patient's care and response during a given period of time.

(u) "Qualified health professional" means a physician, a registered nurse, a physical therapist, an occupational therapist, a respiratory therapist, a speech therapist, a dietitian, or a social worker.

(v) "Registered nurse" means a person who is licensed by the Kansas state board of nursing as a registered professional nurse.

(w) "Respiratory therapist" means a person who is licensed by the Kansas state board of healing arts as a respiratory therapist.

(x) "Simulated laboratory" means an enclosed area that is in a school, adult care home, or other facility and that is similar to a home setting. In a simulated laboratory, trainees practice and demonstrate basic home health aide skills while an instructor observes and evaluates the trainees.

(y) "Social worker" means a person who is licensed by the Kansas behavioral sciences regulatory board as a social worker.

(z) "Speech therapist" means a person who is licensed by the Kansas department of health and environment as a speech-language pathologist.

(aa) "Summary report" means a concise statement, signed by a qualified health professional, that reflects the care and treatment given and the response by the patient.

(bb) "Supervision" means the authoritative procedural guidance that is given by a qualified health professional. This term shall include initial direction and periodic inspection of the act of accomplishing the function or activity. (Authorized by and implementing K.S.A. 65-5109; effective, T-86-23, July 1, 1985; amended May 1, 1987; amended Feb. 28, 1994; amended Dec. 29, 2003; amended Oct. 27, 2006.)

28-51-101. Licensing procedure. (a) License application. Each application for an initial home health agency license shall be filed on forms provided by the licensing agency before the agency begins treating patients. A license shall remain in effect unless suspended or revoked by the licensing agency.

(b) Annual report and fees. Each licensed agency shall file an annual report and annual fee upon uniform dates and forms provided by the licensing agency.

(c) Change of administrator. Each licensee shall notify the licensing agency, in writing, within five days following the effective date of a change of administrator. The notification shall include the name, address, and qualifications of the new administrator.

(d) New services. Each licensee shall notify the licensing agency whenever it begins offering a new service covered under these regulations.

(e) Change of address or name. Each licensee shall notify the licensing agency, in writing, within five days following the change of address or name of the home health agency. The home health agency shall forward the previously issued license certificate to the licensing agency with a request for an amended license certificate reflecting the new address.

(f) Change of ownership. Each home health agency involved in a change of ownership shall comply with the provisions of K.S.A. 65-5104(e).

(g) Plan of correction. A license shall be granted if:

- (1) The applicant is found to be in substantial compliance with these regulations; and
- (2) the applicant submits an acceptable plan for correcting any deficiencies cited.

(h) Annual statistical report. Each home health agency shall submit an annual statistical report.

(Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5103, 65-5104, and 65-5106; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-102. License fee. (a) Each initial license application for an agency shall be accompanied by a fee in the amount of \$100.00.

(b) The annual report for each licensed agency shall be accompanied by a fee determined in accordance with the following schedule. The visits shall be all those performed by the agency during the calendar year prior to submittal of the annual report.

Visits	Fee
0-500	\$ 25.00
501-1,000	60.00
1,001-2,000	120.00
2,001-3,000	170.00
3,001-4,000	220.00
4,001-5,000	280.00
5,001-6,000	330.00
6,001-7,000	380.00
7,001-8,000	440.00
8,001-10,000	490.00
10,001-20,000	550.00
Over 20,000	580.00

(c) If an agency performs services on an hourly basis, four hours of service shall be considered the equivalent of one visit. All home visits made by county or regional public health department personnel that are public health services, as determined by the secretary of health and environment, shall not be required to be included in the number of visits used to determine the annual fee. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5103; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-103. Organization and administration. (a) Governing body. Each home health agency shall have a governing body or a clearly defined body having legal authority to operate the agency. The governing body shall:

- (1) Have bylaws or their equivalent which shall be renewed annually;
- (2) employ a qualified administrator as defined in K.A.R. 28-51-100(a);
- (3) adopt, revise, and approve procedures for the operation and administration of the agency as needed;

(4) provide the name and address of each officer, director, and owner of the agency to the licensing agency;

(5) disclose corporate ownership interests of 10 percent or more to the licensing agency; and

(6) disclose past home health agency ownership or management, including the name of the agency, its location, and current status, to the licensing agency.

(b) Administrator. The administrator shall be responsible for the management of the agency to the extent authority is delegated by the governing body. A qualified person shall be designated to act in the absence of the administrator. The administrator shall have at least the following responsibilities:

(1) Organize and direct the agency's ongoing functions;

(2) act as a liaison between the governing body and staff;

(3) employ qualified personnel in accordance with job descriptions;

(4) provide written personnel policies and job descriptions that are made available to all employees;

(5) maintain appropriate personnel records, administrative records, and all policies and procedures of the agency;

(6) provide orientation for new staff, regularly scheduled inservice education programs, and opportunities for continuing education of the staff;

(7) ensure the completion, maintenance, and submission of such reports and records as required by the secretary of health and environment; and

(8) ensure that each patient admitted to the home health agency receives, in writing, the patient's bill of rights listed at K.A.R. 28-51-111.

(c) Personnel records. Current personnel records shall be maintained for each employee. The personnel records for an employee shall include:

(1) The title of that employee's position and a description of the duties and functions assigned to that position;

(2) the qualifications for the position;

(3) evidence of licensure or certification if required;

(4) performance evaluations made within six months of employment and annually thereafter;

(5) documentation of reference checks and a personal interview prior to employment; and

(6) evidence of good general health and a negative tuberculin skin test or chest X-ray upon

employment. Subsequent periodic health assessments or physical examinations shall be given in accordance with agency policies.

(d) Personnel under hourly or per visit contracts. There shall be a written contract between the agency and personnel under hourly or per visit arrangements. The contract shall include the following provisions:

(1) A statement that patients are accepted for care only by the primary home health agency;

(2) a description of the services to be provided;

(3) a statement that each employee shall conform to all applicable agency policies, including those related to qualifications;

(4) a statement that the employee shall be responsible for participating in the development of plans of care;

(5) a description of the manner in which services will be controlled, coordinated, and evaluated by the primary agency;

(6) the procedures for submitting clinical and progress notes, scheduling patient care, and conducting periodic patient evaluations; and

(7) the procedures for determining charges and reimbursement.

(e) Abuse, neglect, or exploitation. Each employee of the agency shall be responsible for reporting in accordance with agency policies and K.S.A. 39-1430 et. seq., and amendments thereto, any evidence of abuse, neglect, or exploitation of any patient served by the agency. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5104; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-104. Home health services. (a) General provisions. Each home health agency shall accept a patient only when the agency reasonably expects that the patient's medical, rehabilitation, and social needs can be met adequately by the agency in the patient's place of residence.

(b) Provision of services.

(1) Patient care shall follow a written plan which is periodically reviewed by the supervising nurses or other appropriate health professionals.

(2) All personnel providing services to the same patient shall maintain a liaison with the supervising professional to assure that their efforts effectively complement one another and support the objectives as outlined in the plan of care.

(3) For each patient receiving professional services, including the services of a registered nurse, physical therapy, occupational therapy, speech

therapy, and dietary consultation, a written summary report shall be sent to the attending physician every 62 days. Services under arrangement with another agency shall be subject to a written contract conforming to these requirements.

(4) A registered nurse shall be available or on call to the staff during all hours that nursing or home health aide services are provided.

(c) Supervision of home health aide services.

(1) A physician, a registered nurse, or an appropriate qualified health professional shall visit each patient's home every two weeks to supervise home health aide services when skilled nursing or other therapy services, or both are also being furnished to a patient.

(2) This visit may be made less often if only home health aide services are being furnished to a patient and this is documented in the clinical record. A supervisory visit shall then be made at least every 60 days. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5104; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-105. Nursing services. (a) Nursing services shall be provided under the supervision of a registered nurse and in accordance with a plan of care.

(b) A registered nurse shall make an initial evaluation visit to each patient, shall regularly reevaluate the patient's nursing needs, and shall initiate the patient's plan of care and make any necessary revisions. (Authorized by K.S.A. 1984 Supp. 65-5109, as amended by 1985 H.B. 2468; implementing K.S.A. 1984 Supp. 65-5104, as amended by 1985 H.B. 2468; effective, T-86-23, July 1, 1985; effective May 1, 1986.)

28-51-106. Therapy services. (a) Therapy services offered directly or under arrangement shall be provided by the following:

- (1) A physical therapist;
 - (2) A physical therapist assistant functioning under the supervision of a physical therapist;
 - (3) An occupational therapist;
 - (4) An occupational therapist assistant functioning under the supervision of an occupational therapist;
 - (5) A speech therapist; or
 - (6) A respiratory therapist.
- (b) The therapist shall make an evaluation visit to each patient requiring services, shall regularly reevaluate the patient's therapy needs, and shall

initiate the patient's therapy plan of care and make any necessary revisions. (Authorized by K.S.A. 1984 Supp. 65-5109, as amended by 1985 H.B. 2468; implementing K.S.A. 1984 Supp. 65-5104, as amended by 1985 H.B. 2468; effective, T-86-23, July 1, 1985; effective May 1, 1986.)

28-51-107. Social services. (a) Services shall be given by a social worker according to the patient's plan of care.

(b) The social worker shall participate in the development of the patient's plan of care. (Authorized by K.S.A. 1984 Supp. 65-5109, as amended by 1985 H.B. 2468; implementing K.S.A. 1984 Supp. 65-5104, as amended by 1985 H.B. 2468; effective, T-86-23, July 1, 1985; effective May 1, 1986.)

28-51-108. Home health aide services. Each home health aide shall be supervised by a registered nurse and shall be given written instructions for patient care prepared by a qualified health professional. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5101; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended March 12, 1990; amended Feb. 28, 1994; amended Dec. 29, 2003.)

28-51-109. Nutritional and dietary consultation. (a) Nutritional and dietary consultation services offered directly or under arrangement shall be given in accordance with the written plan of care.

(b) If nutritional services are provided, a dietitian shall evaluate the nutritional needs of each patient requiring such services and shall participate in developing the plan of care for that patient. (Authorized by K.S.A. 1984 Supp. 65-5109, as amended by 1985 H.B. 2468; implementing K.S.A. 1984 Supp. 65-5104, as amended by 1985 H.B. 2468; effective, T-86-23, July 1, 1985; effective May 1, 1986.)

28-51-110. Clinical records. (a) General provisions. A clinical record containing pertinent past and current findings shall be maintained in accordance with accepted professional standards for each patient receiving home health services.

(b) Content of record. Each patient's clinical record shall contain at least the following:

- (1) The patient's plan of care;
- (2) the name of the patient's physician;
- (3) drug, dietary, treatment, and activity orders;
- (4) signed and dated admission and clinical

notes that are written the day the service is rendered and incorporated at least weekly;

(5) copies of summary reports sent to the physician;

(6) copies of progress notes; and

(7) the discharge summary.

(c) Retention. Clinical records shall be retained in a retrievable form for at least five years after the date of the last discharge of the patient. If the home health agency discontinues operation, provision shall be made for retention of records.

(d) Safeguard against loss or unauthorized use. Written policies and procedures shall be developed regarding use and removal of records and the conditions for release of information. The patient's or guardian's written consent shall be required for release of information not required by law. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5104; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-111. Patients' bill of rights. The governing body shall establish a bill of rights that will be equally applicable to all patients. At a minimum, the following provisions shall be included in the patients' bill of rights.

(a) Each patient shall have the right to choose care providers and the right to communicate with those providers.

(b) Each patient shall have the right to participate in planning of the patient's care and the right to appropriate instruction and education regarding the plan.

(c) Each patient shall have a right to request information about the patient's diagnosis, prognosis, and treatment, including alternatives to care and risks involved, in terms that the patient and the patient's family can readily understand so that they can give their informed consent.

(d) Each patient shall have the right to refuse home health care and to be informed of possible health consequences of this action.

(e) Each patient shall have the right to care that is given without discrimination as to race, color, creed, sex, or national origin.

(f) Each patient shall be admitted for service only if the agency has the ability to provide safe, professional care at the level of intensity needed.

(g) Each patient shall have the right to reasonable continuity of care.

(h) Each patient shall have the right to be advised in advance of the disciplines that will furnish

care and the frequency of visits proposed to be furnished.

(i) Each patient shall have the right to be advised in advance of any change in the plan of care before the change is made.

(j) Each patient shall have the right to confidentiality of all records, communications, and personal information.

(k) Each patient shall have the right to review all health records pertaining to them unless it is medically contraindicated in the clinical record by the physician.

(l) Each patient denied service for any reason shall have the right to be referred elsewhere.

(m) Each patient shall have the right to voice grievances and suggest changes in services or staff without fear of reprisal or discrimination.

(n) Each patient shall have the right to be fully informed of agency policies and charges for services, including eligibility for, and the extent of payment from third-party reimbursement sources, prior to receiving care. Each patient shall be informed of the extent to which payment may be required from the patient.

(o) Each patient shall have the right to be free from verbal, physical, and psychological abuse and to be treated with dignity.

(p) Each patient shall have the right to have his or her property treated with respect.

(q) Each patient shall have the right to be advised in writing of the availability of the licensing agency's toll-free complaint telephone number. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5104; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994.)

28-51-112. Home health aide training program.

(a) Each individual employed or contracted by a home health agency who is not licensed or registered to provide home health services but who assists, under supervision, in the provision of home health services and who provides related health care to patients shall meet the training requirements in K.A.R. 28-51-113 through K.A.R. 28-51-116.

(b) This regulation shall not apply to any individual providing only attendant care services as defined in K.S.A. 65-6201, and amendments thereto. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective, T-86-23, July 1, 1985; effective May 1, 1986; amended Feb. 28, 1994; amended Oct. 27, 2006.)

28-51-113. Home health aide training program. (a) Each home health aide candidate shall be a Kansas-certified nurse aide in good standing on the public nurse aide registry and complete a 20-hour home health aide course approved by the licensing agency.

(b) Upon completing a home health aide course as specified in subsection (a) of this regulation, each home health aide shall be required to pass a state test as specified in K.A.R. 28-51-116.

(c) Each person who completes the requirements specified in subsections (a) and (b) of this regulation shall be issued a home health aide certificate by the licensing agency and shall be listed on the public nurse aide registry.

(d) (1) Each home health aide trainee shall be allowed to provide home health aide services to clients of the home health agency under the supervision of a registered nurse.

(2) Each home health aide trainee who completes an approved 20-hour course shall be issued a home health aide certificate by the licensing agency, upon completion of the requirements specified in subsections (a) and (b) of this regulation, within 90 days from the beginning date of the initial course in order to continue employment providing home health aide services. Home health aide trainee status shall be for one 90-day period only.

(3) Any Kansas certified nurse aide who is eligible for employment and who is enrolled in a 20-hour home health aide course may work for a home health agency as a home health aide trainee. The home health agency's registered nurse shall retain in the trainee's personnel file a department-approved form attesting that the trainee has met the minimum competencies for a home health aide trainee.

(e) Each 20-hour home health aide course shall be administered according to the following criteria:

(1) Any person issued a nurse aide certificate by the licensing agency or enrolled in a 90-hour nurse aide course as specified in K.A.R. 28-39-165 may enroll in a 20-hour home health aide course after being prescreened and tested for reading comprehension at an eighth-grade level.

(2) Each 20-hour course shall be sponsored by one of the following:

- (A) A home health agency;
- (B) A postsecondary school under the jurisdiction of the state board of regents; or
- (C) A postsecondary school accredited by the north central association of colleges and schools.

(3) A home health agency shall not sponsor or provide clinical instruction for a 20-hour home health aide course if that home health agency meets any of the conditions listed in 42 C.F.R. 484.36(a)(2)(i), as in effect on October 1, 2001, which is hereby adopted by reference.

(4) Each 20-hour course shall be prepared and administered in accordance with the guidelines established by the licensing agency in the "Kansas certified home health aide guidelines (20 hours)," dated July 1, 2005, and the "Kansas home health aide sponsor and instructor manual," excluding the appendices, dated July 1, 2005, which are hereby adopted by reference.

(f) No correspondence course shall be accepted as a 20-hour home health aide course.

(g) Distance-learning educational offerings and computer-based educational offerings shall meet the requirements specified in subsection (e) of this regulation. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Dec. 29, 2003; amended Oct. 27, 2006.)

28-51-114. Home health aide course instructors. (a) Each instructor for the 20-hour course shall meet the following requirements:

(1) Each person who intends to be a course instructor shall submit a completed instructor approval application form to the licensing agency at least three weeks before offering an initial course and shall be required to receive approval as an instructor before the first day of an initial course.

(2) Each instructor shall be a registered nurse with a minimum of two years of licensed nursing experience, including at least 1,750 hours of experience in the provision of home health care services.

(b) Each instructor and course sponsor shall be responsible for ensuring that the following requirements are met:

(1) Each student in a 20-hour home health aide course shall be prescreened and tested for reading comprehension of the written English language at an eighth-grade reading level before enrolling in the course.

(2) A completed course approval application form shall be submitted to the licensing agency at least three weeks before offering the course. Approval of the course shall be obtained from the licensing agency at the beginning of each course whether the course is being offered initially or after a previous approval. Each change in course location, schedule, or instructor shall require prior approval by the licensing agency.

(3) All course objectives shall be accomplished.

(4) Health care professionals with appropriate skills and knowledge may be selected to conduct any part of the training. Each health care professional shall have at least one year of experience in the subject area in which the individual is providing training.

(5) Each person providing a portion of the training shall do so under the direct supervision of the instructor.

(6) If clinical instruction is included in the course, each student shall be under the direct supervision of the instructor.

(7) During the clinical instruction, the instructor shall perform no other duties than the provision of direct supervision to the students.

(8) The 20-hour home health aide course shall be prepared and administered in accordance with the guidelines in the "Kansas certified home health aide guidelines (20 hours)" and the "Kansas home health aide sponsor and instructor manual," as adopted in K.A.R. 28-51-113.

(c) Any instructor or course sponsor who does not fulfill the requirements of this regulation may be subject to withdrawal of approval to serve as a course instructor or a course sponsor. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Dec. 29, 2003; amended Oct. 27, 2006.)

28-51-115. Allied health training endorsement for home health aide. (a) Each person who meets one of the following conditions shall be deemed to have met the requirements of K.A.R. 28-51-113(a) and shall be eligible to take the state test as specified in K.A.R. 28-51-116:

(1) The person has been licensed in Kansas or another state, within 24 months from the date of application, as a licensed practical nurse whose license is inactive or a registered nurse whose license is inactive, and there are no pending or current disciplinary actions against the individual's license.

(2) The person is currently licensed in Kansas or another state, or has been licensed within 24 months from the date of application, as a licensed mental health technician, and there are no pending or current disciplinary actions against the individual's license.

(3) The person has received training from an accredited nursing or mental health technician training program within the 24-month period before applying for endorsement. Training shall have included a basic skills component comprised of personal hygiene, nutrition and feeding, safe

transfer and ambulation techniques, normal range of motion and positioning, and supervised clinical experience in geriatrics.

(b) Each person qualified under subsection (a) of this regulation shall receive written notice from the licensing agency that the person is eligible to take the state test. Upon receiving written approval from the licensing agency, that person may be employed by a home health agency as a home health aide trainee to provide patient care on behalf of the home health agency. Each person employed as a home health aide trainee shall be certified as a home health aide by the licensing agency, upon successful completion of the requirements specified in K.A.R. 28-51-113(a) or subsection (a) of this regulation, within one 90-day period starting from the date of approval, in order to continue employment providing home health aide services on behalf of the home health agency. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Dec. 29, 2003; amended Oct. 27, 2006.)

28-51-116. State home health aide test eligibility. (a) Each person shall have a maximum of three attempts per year from the beginning date of the course to pass the state written test after successfully completing an approved 20-hour course pursuant to K.A.R. 28-51-113.

(1) If the person does not pass the state test within one year from the starting date of taking an approved 20-hour course, the person shall retake the entire course to be eligible to retake the state test.

(2) If a person whose training has been endorsed as specified in K.A.R. 28-51-115 does not pass the state test on the first attempt, the person shall complete an approved 20-hour course as specified in K.A.R. 28-51-113 before retaking the state test.

(3) The state test shall be comprised of 30 multiple-choice questions for persons who have successfully completed an approved 20-hour course or have successfully completed training that has been endorsed as specified in K.A.R. 28-51-115. A score of 22 or higher shall constitute a passing score.

(b) Each home health aide trainee shall pay a nonrefundable application fee of \$20.00 before taking the state test. A nonrefundable test application fee shall be required each time the test is scheduled to be taken. Each person who fails to take the state test and who has made payment for the test shall submit another fee before being scheduled for another opportunity to take the test.

(c) Each course instructor shall collect the application fee for each home health aide trainee eligible to take the state test and shall submit the fees, class roster, and application forms to the licensing agency or its designated agent.

(d) Each person who is eligible to take the state test and who has submitted the application fee and application form shall be issued written approval, which shall be proof of eligibility to sit for the test.

(e) Any reasonable test accommodation or auxiliary aid to address a disability may be requested by any person who is eligible to take the state test.

(1) A request for reasonable accommodation or auxiliary aid shall be submitted each time a candidate is scheduled to take the test.

(2) No test shall be given orally or by a sign language interpreter since reading and writing instructions or directions is an essential job task of a home health aide.

(3) Each person requesting a test accommodation shall submit an accommodation request form along with an application form to the instructor. The instructor shall forward these forms to the licensing agency or its designated agent at least three weeks before the desired test date. Each instructor shall verify the need for the accommodation by signing the accommodation request form.

(f) Each person whose second language is English shall be allowed to use a bilingual dictionary while taking the state test. Limited English proficiency shall not constitute a disability with regard to accommodations. An extended testing period of up to one additional hour may be offered to persons with limited English proficiency. (Authorized by K.S.A. 65-5109; implementing K.S.A. 65-5115; effective Dec. 29, 2003; amended Oct. 27, 2006.)

Article 52.—MEDICAL CARE FACILITIES

28-52-1. General requirements. (a) Each medical care facility shall establish a written plan for risk management and patient care quality assessment on a facility-wide basis.

(b) The plan shall be approved and reviewed annually by the facility's governing body.

(c) Findings, conclusions, recommendations, actions taken, and results of actions taken shall be documented and reported through procedures established within the risk management plan.

(d) All patient services including those services provided by outside contractors or consultants

shall be periodically reviewed and evaluated in accordance with the plan.

(e) Plan format. Each submitted plan shall include the following:

(1) Section I—a description of the system implemented by the facility for investigation and analysis of the frequency and causes of reportable incidents within the facility;

(2) Section II—a description of the measures used by the facility to minimize the occurrence of reportable incidents and the resulting injuries within the facility;

(3) Section III—a description of the facility's implementation of a reporting system based upon the duty of all health care providers staffing the facility and all agents and employees of the facility directly involved in the delivery of health care services to report reportable incidents to the chief of the medical staff, chief administrative officer, or risk manager of the facility;

(4) Section IV, organization—a description of the organizational elements of the plan including:

(A) Name and address of the facility;

(B) name and title of the facility's risk manager;

(C) description of involvement and organizational structure of medical staff as related to risk management program, including names and titles of medical staff members involved in investigation and review of reportable incidents;

(D) organizational chart indicating position of the facility's review committee as defined in K.S.A. 65-4923 and L. 1986, Ch. 229, New Section 4(a)(2); and

(E) mechanism for ensuring quarterly reporting of incident reports to proper licensing agency.

(5) Section V—a description of the facility's resources allocated to implement the plan; and

(6) Section VI—documentation that the plan as submitted has been approved by the facility's governing body.

(f) Plan submittal. On and after November 1, 1986, each medical care facility shall submit the plan to the department at least 60 days prior to the license renewal date. After an initial plan is approved, any amendments to the plan shall be submitted to the department.

(g) Departmental review. Upon review of the facility's risk management plan or any amendments, the department shall notify the facility in writing if the plan of amendments have been approved or disapproved. The written notification will specify the reason for disapproval.

(h) Revised plan. Within 60 days of the date the

facility receives notification the plan has been disapproved, the facility shall submit a revised plan to the department.

(i) Plan publication. The plan shall be disseminated to personnel in accordance with the plan. (Authorized by and implementing L. 1986, Chapter 229, Sec. 3; effective, T-87-50, Dec. 19, 1986; effective May 1, 1987.)

28-52-2. Incident reporting. (a) Each medical care facility shall identify a written form on which employees and health care providers shall report clinical care concerns to the risk manager, chief of staff, or administrator. The original or complete copy of the incident report shall be sent directly to the risk manager, chief of staff, or administrator, as authorized in the facility's risk management plan.

(b) The risk manager, chief of staff, or administrator shall acknowledge the receipt of each incident report in writing. This acknowledgment may be made in the following manner:

- (1) file stamping each report;
- (2) maintaining a chronological risk management reporting log;
- (3) signing or initialing each report in a consistent fashion; or
- (4) entering pertinent information into a computer database.

(c) Incident reports, investigational tools, minutes of risk management committees, and other documentation of clinical analysis for each reported incident shall be maintained by the facility for not less than one year following completion of the investigation. (Authorized by and implementing K.S.A. 65-4922; effective Feb. 27, 1998.)

28-52-3. Risk management committee. (a) Each medical care facility shall designate one or more executive committees responsible for making and documenting standard-of-care determinations with respect to each incident report, pursuant to K.A.R. 28-52-2. The jurisdiction of each risk management committee shall be clearly delineated in the facility's risk management plan, as approved by the facility's governing body.

(b) The activities of each risk management committee shall be documented in its minutes at least quarterly, and this documentation shall demonstrate that the committee is exercising overall responsibility for standard-of-care determinations delegated by the committee to individual clinical reviewers and subordinate committees. (Autho-

rized by and implementing K.S.A. 65-4922; effective Feb. 27, 1998.)

28-52-4. Standard-of-care determinations. (a) Each facility shall assure that analysis of patient care incidents complies with the definition of a "reportable incident" set forth at K.S.A. 65-4921. Each facility shall use categories to record its analysis of each incident, and those categories shall be in substantially the following form:

- (1) Standards of care met;
- (2) standards of care not met, but with no reasonable probability of causing injury;
- (3) standards of care not met, with injury occurring or reasonably probable; or
- (4) possible grounds for disciplinary action by the appropriate licensing agency.

(b) Each reported incident shall be assigned an appropriate standard-of-care determination under the jurisdiction of a designated risk management committee. Separate standard-of-care determinations shall be made for each involved provider and each clinical issue reasonably presented by the facts. Any incident determined by the designated risk management committee to meet category (a) (3) or (a)(4) shall be considered a "reportable incident" and reported to the appropriate licensing agency in accordance with K.S.A. 65-4923.

(c) Each standard-of-care determination shall be dated and signed by an appropriately credentialed clinician authorized to review patient care incidents on behalf of the designated committee. In those cases in which documented primary review by individual clinicians or subordinate committees does not occur, standard-of-care determinations shall be documented in the minutes of the designated committee on a case-specific basis. Standard-of-care determinations made by individual clinicians and subordinate committees shall be approved by the designated risk management committee on at least a statistical basis. (Authorized by and implementing K.S.A. 65-4922; effective Feb. 27, 1998.)

Article 53.—CHARITABLE HEALTH CARE PROVIDERS

28-53-1. Definitions. (a) "Agreement" means a written understanding between the secretary and a "charitable health care provider," as defined in K.S.A. 75-6102 and amendments thereto, regarding the rendering of professional services to a medically indigent person.

(b) “Department” means Kansas department of health and environment.

(c) “Federally qualified health center” means one of the following:

(1) An entity that meets the requirements for federal funding in 42 USC 1396d(l)(2)(B) and has been designated as a “federally qualified health center” by the federal government; or

(2) an entity that, based on the recommendation of the federal health resources and services administration, is deemed to meet the requirements of the federal grant program and has been designated a “federally qualified health center look-alike” by the federal government but does not receive the federal grant funding specified in 42 USC 1396d(l)(2)(B).

(d) “Indigent health care clinic” has the meaning specified in K.S.A. 75-6102, and amendments thereto.

(e) “Local health department” has the meaning specified in K.S.A. 65-241, and amendments thereto.

(f) (1) “Point of entry” means an entity that performs the following:

(A) Determines whether an individual meets the criteria for a medically indigent person;

(B) refers any medically indigent person to a charitable health care provider;

(C) has submitted a completed application to the department on forms prescribed by the department; and

(D) agrees to maintain records and submit an annual activity report as prescribed by the secretary.

(2) This term may include any of the following:

(A) An entity meeting the definition of “federally qualified health center” or “federally qualified health center look-alike”;

(B) an entity meeting the definition of “indigent health care clinic”; or

(C) an entity meeting the definition of “local health department.”

(g) “Secretary” means secretary of the Kansas department of health and environment. (Authorized by K.S.A. 75-6120; implementing K.S.A. 2010 Supp. 75-6102 and K.S.A. 75-6120; effective April 1, 1991; amended July 13, 1992; amended March 20, 2009; amended May 6, 2011.)

28-53-2. Agreement. (a) Each person or entity applying for an agreement shall submit a completed application to the department on forms prescribed by the department.

(b) An agreement may be terminated by the secretary, the charitable health care provider, or the point of entry with 30 days of prior written notice to the department. Failure of the charitable health care provider to maintain the required licensure shall constitute concurrent cancellation of the agreement. (Authorized by K.S.A. 75-6120; implementing K.S.A. 2010 Supp. 75-6102 and K.S.A. 75-6120; effective April 1, 1991; amended July 13, 1992; amended March 20, 2009; amended May 6, 2011.)

28-53-3. Eligibility criteria for a medically indigent person. An individual shall qualify as a medically indigent person if a point of entry determines that the individual meets either of the following requirements:

(a) Is determined to be a member of a family unit earning at or below 200% of the current federal poverty level and is not indemnified against costs arising from medical and dental care by a policy of accident and sickness insurance, an employee health benefits plan, or any similar coverage; or

(b) is eligible for publicly funded health care programs administered by the Kansas health policy authority or the department or is qualified for Indian health services. (Authorized by and implementing K.S.A. 75-6120; effective April 1, 1991; amended March 20, 2009.)

28-53-4. Records and reports. (a) Each charitable health care provider either shall meet the following requirements or shall ensure that each point of entry through which the charitable health care provider delivers care meets the following requirements:

(1) Maintains the completed forms prescribed by the department; and

(2) submits a completed annual activity report to the department on a form prescribed by the department.

(b) Failure of the charitable health care provider or the point of entry to comply with this regulation shall be grounds for termination of the agreement with the charitable health care provider. (Authorized by K.S.A. 75-6120; implementing K.S.A. 2010 Supp. 75-6102 and K.S.A. 75-6120; effective April 1, 1991; amended March 20, 2009; amended May 6, 2011.)

28-53-5. Referrals. Each referral of professional services shall be documented in the records of the point of entry. (Authorized by and imple-

menting K.S.A. 75-6120; effective April 1, 1991; amended March 20, 2009.)

Article 54.—TRAUMA SYSTEM PROGRAM

28-54-1. Definitions. Each of the following terms used in this article shall have the meaning specified in this regulation:

(a) “ACS” means American college of surgeons.

(b) “Department” means Kansas department of health and environment.

(c) “Designation” means a determination by the secretary that a hospital shall provide the trauma care required of a level I trauma center, level II trauma center, level III trauma center, or level IV trauma center.

(d) “Level I trauma center” means a hospital that has the capability to provide the highest level of trauma care for every aspect of injury, from prevention through rehabilitation.

(e) “Level II trauma center” means a hospital that meets the following conditions:

(1) Provides initial trauma care, regardless of the severity of the injury;

(2) is not necessarily able to provide the same comprehensive care as that provided by a level I trauma center; and

(3) does not have trauma research as a primary objective.

(f) “Level III trauma center” means a hospital that provides initial trauma care or arranges for the appropriate transfer of trauma patients to a level I trauma center or a level II trauma center.

(g) “Level IV trauma center” means a hospital that provides urgent care for injured persons and the timely transfer of the seriously injured to a trauma facility capable of providing care necessary for the treatment of the patients’ injuries.

(h)(1) “On-site survey” means the secretary’s evaluation of a hospital’s compliance with the following:

(A) The level IV trauma center type I designation criteria and type II designation criteria identified in the department’s document titled “Kansas level IV criteria quick reference,” dated November 4, 2015, which is hereby adopted by reference; and

(B) all standards specified on pages eight through 31 in the department’s document titled “pre-review questionnaire (PRQ) guidance for Kansas level IV trauma center designation,” dated November 4, 2015. Pages eight through 33 of this document are

hereby adopted by reference, excluding all sections titled “reference” or “rationale.”

(2) Each hospital’s successful completion of the on-site survey shall require compliance with the following:

(A) All type I designation criteria;

(B) all type II designation criteria, except that a hospital may have no more than three type II critical deficiencies; and

(C) reporting trauma registry data and information pursuant to K.S.A. 75-5666, and amendments thereto.

(i) “Regional trauma council” means one of the six councils, as defined in K.S.A. 75-5663 and amendments thereto, in the state established to address trauma and emergency medical care issues within a specific geographic area and to coordinate services to meet the needs of trauma patients injured within that area.

(j) “Trauma” means any of the following:

(1) Any injury to a person that results from acute exposure to mechanical, thermal, electrical, or chemical energy;

(2) any injury to a person that is caused by the absence of heat or oxygen and that requires immediate medical intervention; or

(3) any injury to a person that requires surgical intervention or treatment to prevent death or permanent disability.

(k) “Trauma facility” means a hospital distinguished by the availability of surgeons, physician specialists, anesthesiology services, nurses, and resuscitation and life-support equipment on a 24-hour basis to care for persons with trauma. This term shall include the following:

(1) Level I trauma centers;

(2) level II trauma centers;

(3) level III trauma centers; and

(4) level IV trauma centers.

(l) “Trauma registry” means the database maintained and operated by the department to collect and analyze reportable patient data on the incidence, severity, and causes of trauma.

(m) “Verification” means the evaluation and confirmation by the ACS of a hospital’s trauma care capability to operate as a level I trauma center, level II trauma center, or level III trauma center. (Authorized by K.S.A. 2016 Supp. 75-5665; implementing K.S.A. 2016 Supp. 75-5665 and K.S.A. 2016 Supp. 75-5666; effective Nov. 2, 2007; amended March 16, 2012; amended Aug. 25, 2017.)

28-54-2. Standards for designation. The designation of a hospital as a level I trauma center, level II trauma center, level III trauma center, or level IV trauma center shall be made by the secretary based on the following:

(a) For level I trauma centers, level II trauma centers, and level III trauma centers, verification; and

(b) for each level IV trauma center, the successful completion of an on-site survey. (Authorized by and implementing K.S.A. 2016 Supp. 75-5665; effective Nov. 2, 2007; amended March 16, 2012; amended Aug. 25, 2017.)

28-54-3. Application for designation. (a) Each hospital administrator that seeks a certificate of designation for its hospital as a level I trauma care center, level II trauma care center, or level III trauma care center shall submit a designation application on a form provided by the department and the following to the secretary:

(1) A copy of the applicant's current one-year or three-year verification certificate; and

(2) a nonrefundable application fee of \$500.

(b) Each hospital administrator who seeks a certificate of designation for its hospital as a level IV trauma center shall submit a designation application on a form provided by the department and the following to the secretary:

(1) Documentation of successful completion of an on-site survey that occurred after submission of the application; and

(2) a nonrefundable application fee of \$250.

(c) Each hospital administrator specified in subsection (b) who receives notice that the initial designation as a level IV trauma center is denied shall comply with one of the following before submitting a subsequent application for designation:

(1) Allow at least six months after the date of the notice; or

(2) submit a written request for reevaluation to the advisory committee on trauma that is subsequently approved.

(d) Each certificate of designation shall be valid from the date of issuance and for the period specified on the certificate. (Authorized by and implementing K.S.A. 2016 Supp. 75-5665; effective Nov. 2, 2007; amended March 16, 2012; amended Aug. 25, 2017.)

28-54-4. Application for change of designation. (a) Any administrator of a designated trauma facility may request a change of designation by submitting an application for a change of

designation on the form provided by the department and the following to the secretary:

(1) Each applicant seeking a change of designation to a level I trauma center, level II trauma center, or level III trauma center shall submit the following:

(A) A copy of the applicant's current one-year or three-year verification certificate for the level of designation sought; and

(B) a nonrefundable fee of \$500.

(2) Each applicant seeking a change of designation to a level IV trauma center shall submit the following:

(A) Documentation of successful completion of an on-site survey that occurred after submission of the application; and

(B) a nonrefundable fee of \$250.

(b) Each change of designation certificate shall be valid from the date of issuance and for the period specified on the certificate. (Authorized by and implementing K.S.A. 2016 Supp. 75-5665; effective Nov. 2, 2007; amended March 16, 2012; amended Aug. 25, 2017.)

28-54-5. Certificate of designation; renewal. (a) Each administrator of a designated trauma facility wanting to renew the trauma facility's certificate of designation shall submit an application for renewal on a form provided by the department and either of the following:

(1) For a level I trauma center, level II trauma center, or level III trauma center, the following:

(A) A copy of the applicant's current one-year or three-year verification certificate; and

(B) a nonrefundable renewal fee of \$500; or

(2) for a level IV trauma center, the following:

(A) A nonrefundable renewal fee of \$250; and

(B) documentation of successful completion of an on-site survey that occurred after submission of the application.

(b) The renewal of a level IV trauma center designation may be denied for willful misrepresentation of information and documentation during the renewal application process.

(c) Each hospital administrator seeking designation as a level IV trauma center who receives notice that the renewal designation is denied shall comply with one of the following before submitting a subsequent application for renewal:

(1) Allow at least six months after the date of the notice; or

(2) submit a written request for reevaluation to the advisory committee on trauma that is subsequently approved.

(d) Each renewed certificate of designation shall be valid from the date of issuance and for the period specified on the certificate. (Authorized by and implementing K.S.A. 2016 Supp. 75-5665; effective Nov. 2, 2007; amended March 16, 2012; amended Aug. 25, 2017.)

28-54-6. Voluntary termination of certificate of designation. (a) Each administrator of a trauma facility that decides not to maintain the trauma facility's certificate of designation shall notify the secretary in writing of that decision.

(b) The notification shall include the anticipated date of termination, which shall be at least 60 days after the date on which the notice is mailed, and shall describe the procedures by which the administrator will notify the medical care service providers in the regional trauma council in which the trauma facility is located. (Authorized by and implementing K.S.A. 2006 Supp. 75-5665; effective Nov. 2, 2007.)

28-54-7. Misrepresentation of certificate of designation. (a) The certificate of designation shall apply only to the hospital for which the administrator submitted the designation application and shall not extend to any of the hospital's satellite facilities or affiliates.

(b) No hospital administrator shall represent that the hospital is a trauma facility unless the hospital has a current certificate of designation or certificate of verification by the American college of surgeons. (Authorized by and implementing K.S.A. 2006 Supp. 75-5665; effective Nov. 2, 2007.)

Article 55.—PCB FACILITY CONSTRUCTION PERMIT STANDARDS AND REGULATIONS

28-55-1. (Authorized by and implementing K.S.A. 65-3481 as enacted by L. 1986, Ch. 226, Sec. 2; effective, T-87-37, Nov. 19, 1986; effective May 1, 1987; revoked Aug. 30, 2019.)

28-55-2. (Authorized by and implementing K.S.A. 65-3481 as enacted by L. 1986, Ch. 226, Sec. 2; effective, T-87-37, Nov. 19, 1986; effective May 1, 1987; revoked Aug. 30, 2019.)

28-55-3. (Authorized by and implementing K.S.A. 65-3481; effective, T-87-37, Nov. 19, 1986; effective May 1, 1987; amended March 22, 2002; revoked Aug. 30, 2019.)

28-55-4. (Authorized by and implementing K.S.A. 65-3481 as enacted by L. 1986, Ch. 226, Sec. 2; effective, T-87-37, Nov. 19, 1986; effective May 1, 1987; revoked Aug. 30, 2019.)

28-55-5. (Authorized by and implementing K.S.A. 65-3481; effective, T-87-37, Nov. 19, 1986; effective May 1, 1987; amended March 22, 2002; revoked Aug. 30, 2019.)

Article 56.—REPORTING OF INDUCED TERMINATIONS OF PREGNANCY

28-56-1. Definitions. Each of the following terms shall have the meaning assigned in this regulation:

(a) "Abortion" has the meaning specified in K.S.A. 65-6701, and amendments thereto.

(b) "Abortion provider" means a physician that performs an abortion, a clinic comprised of legally or financially affiliated physicians, a hospital, or any other medical care facility where an abortion is performed.

(c) "Abortion report" means the information required to be submitted by an abortion provider to the department either electronically or on a paper form provided by the department.

(d) "Clinical estimate of gestation" means the number of completed weeks of gestation of an unborn child as determined through a sonogram.

(e) "Confidential code number" means a random five-digit identification number, along with subcategory letters, assigned by the department to an abortion provider for the purpose of submitting an abortion report to the department.

(f) "Correction" means the act of providing information to the department to correct errors or provide missing information to an abortion report.

(g) "Department" has the meaning specified in K.S.A. 65-6701, and amendments thereto.

(h) "Electronic abortion reporting system" means the department's vital events reporting system through which abortion reports are submitted electronically to the department.

(i) "Failed abortion" means an abortion procedure that was initiated but not completed and resulted in a live birth.

(j) "Failed abortion report" means the information on a failed abortion required to be submitted by the abortion provider to the department on a paper form provided by the department.

(k) "Hospital" has the meaning specified in K.S.A. 65-425, and amendments thereto.

(l) "ICD-9-CM" means volumes one and two, office edition, of the 2011 clinical modification of the "international classification of diseases," ninth revision, sixth edition, published by practice management information corporation, which is used to code and classify morbidity data from inpatient and outpatient records, physician offices, and most surveys from the national center for health statistics. This document, including the appendices, is hereby adopted by reference.

(m) "Late term" means the clinical estimate of gestation of at least 22 completed weeks.

(n) "Late term affidavit" means a department-provided form for each abortion that occurs at a clinical estimate of gestation of at least 22 weeks. The referring physician and the physician performing the abortion shall each submit a separate form, which shall be completed, signed, and notarized and shall meet the requirements of K.A.R. 28-56-6.

(o) "Live birth" has the meaning specified in K.S.A. 65-2401, and amendments thereto.

(p) "Medical basis" means the specific medical signs, symptoms, history, or other information provided by the patient or the results of clinical examinations, procedures, or laboratory tests used to make a medical diagnosis.

(q) "Medical care facility" has the meaning specified in K.S.A. 65-425, and amendments thereto.

(r) "Medical diagnosis" means a specific medical condition or disease as determined by a physician.

(s) "Medical emergency" has the meaning specified in K.S.A. 65-4a01, and amendments thereto.

(t) "Partial birth abortion" has the meaning specified in K.S.A. 65-6721, and amendments thereto.

(u) "Physician" has the meaning specified in K.S.A. 65-6701, and amendments thereto.

(v) "Physician's report on number of certifications received" means a monthly report that shall be submitted to the department on a form provided by the department specifying the number of voluntary and informed consent forms certified by each patient and received by the physician before the patient is to receive an abortion.

(w) "Referring physician" means a physician who refers a patient to an abortion provider and who is required to provide a late term affidavit.

(x) "Requirements related to reporting abortions" means the department's handbook containing instructions describing how abortions shall be reported to the department, either on a paper form or electronically, and copies of applicable state statutes and regulations.

(y) "Unborn child" means a living individual organism of the species *Homo sapiens*, in utero, at any stage of gestation from fertilization to birth.

(z) "User agreement" means the required document that entitles each abortion provider or the designee to access the department's electronic abortion reporting system.

(aa) "Viable" has the meaning specified in K.S.A. 65-6701, and amendments thereto.

(bb) "Voluntary and informed consent form" means the form provided by the department that is signed by the patient authorizing an abortion provider to perform an abortion. (Authorized by K.S.A. 2011 Supp. 65-445, 65-6701, and 65-6724; implementing K.S.A. 2011 Supp. 65-445 and 65-6703; effective June 15, 2012.)

28-56-2. General requirements for abortion reports. (a) Each abortion provider, before performing an abortion and before using the electronic abortion reporting system, shall obtain the following:

(1) A confidential code number from the department; and

(2) a copy of the requirements related to reporting abortions.

(b) Each abortion provider performing less than five abortions annually may use the paper form abortion report.

(c) Each abortion provider performing five or more abortions annually shall use the electronic abortion reporting system to file each abortion report and shall meet the following requirements:

(1) Submit an executed user agreement; and

(2) ensure that each individual authorized by the abortion provider to enter abortion data into the electronic abortion reporting system has a separate user account to access the electronic abortion reporting system.

(d) An abortion report shall be filed for each abortion performed. Each abortion report shall contain the following information:

(1) The confidential code number of the abortion provider filing the abortion report;

(2) the patient's unique identification number as maintained in the abortion provider's medical record. The patient's name and street address shall not be submitted;

(3) the patient's age in years on the patient's last birthday;

(4) the patient's marital status at the time of the abortion;

(5) the month, day, and year the abortion was performed;

(6) the state or United States territory of residence of the patient or, if the patient is not a resident of the United States, the patient's country of residence;

(7) the patient's county of residence if the patient is a resident of a state or territory of the United States or, if the patient is a resident of Canada, the province;

(8) the patient's city or town of residence;

(9) specification of whether the patient resided within the city limits of the city or town of residence;

(10) the hispanic origin of the patient, if applicable;

(11) the patient's ancestry;

(12) the patient's race;

(13) the highest level of education completed by the patient;

(14) the date when the patient's last normal menses began, including the month, day, and year as reported by the patient;

(15) clinical estimate of gestation;

(16) number of previous pregnancies, in the following categories:

(A) Children born live and now living;

(B) children born live and now dead;

(C) previous induced abortions; and

(D) previous spontaneous terminations, including miscarriages, or stillbirths;

(17) the primary abortion procedure used in terminating the pregnancy, including one of the following abortion procedures:

(A) Suction curettage;

(B) sharp curettage;

(C) dilation and evacuation;

(D) administration of mifeprestone;

(E) administration of methotrexate;

(F) prostaglandins delivered by intrauterine instillation or other methods;

(G) hysterotomy;

(H) hysterectomy;

(I) digoxin induction;

(J) partial birth abortion; or

(K) other procedure, which shall be specified;

(18) if applicable, all secondary abortion procedures used in terminating the pregnancy, including any of the following procedures that apply:

(A) Suction curettage;

(B) sharp curettage;

(C) dilation and evacuation;

(D) administration of mifeprestone;

(E) administration of methotrexate;

(F) prostaglandins delivered by intrauterine instillation or other methods;

(G) hysterotomy;

(H) hysterectomy;

(I) digoxin induction;

(J) partial birth abortion; or

(K) other procedure, which shall be specified;

(19) specification of the medical factors and methods used to determine the clinical estimate of gestation; and

(20) specification of whether there was a report of physical, mental, or emotional abuse or neglect filed pursuant to K.S.A. 38-2223, and amendments thereto. (Authorized by K.S.A. 2011 Supp. 65-445 and 65-6703; implementing K.S.A. 2011 Supp. 65-6703; effective June 15, 2012; amended Jan. 4, 2013.)

28-56-3. Reporting requirements for abortions performed at clinical estimate of gestation of at least 22 weeks. When performing an abortion at clinical estimate of gestation of 22 or more weeks, in addition to the requirements specified in K.A.R. 28-56-2, each abortion report shall contain the following information:

(a) Specification of whether the unborn child was viable;

(b) a detailed, case-specific description that includes the medical diagnosis and medical basis of the patient and unborn child if the unborn child was viable;

(c) specification of whether continuation of the pregnancy would cause a substantial and irreversible impairment of a major bodily function or the death of the patient;

(d) a detailed, case-specific description that includes the medical diagnosis and medical basis for the determination that the abortion was necessary to prevent the patient's death or irreversible impairment of a major bodily function; and

(e) a medical determination that includes all applicable medical diagnosis codes from the ICD-9-CM. (Authorized by K.S.A. 2011 Supp. 65-6703 and 65-6724; implementing K.S.A. 2011 Supp. 65-6703; effective June 15, 2012.)

28-56-4. Reporting requirements for partial birth abortions. For each procedure performed involving a partial birth abortion, in addition to the requirements specified in K.A.R. 28-56-2 and 28-56-3, each abortion report for a partial birth abortion shall contain the following information:

(a) Specification of whether the unborn child was viable;

(b) a detailed, case-specific description that includes the medical diagnosis, medical basis, and description of the medical conditions of the patient and unborn child if the unborn child was viable;

(c) specification of whether continuation of the pregnancy would cause a substantial and irreversible impairment of a major bodily function or the death of the patient;

(d) a detailed, case-specific medical diagnosis and medical basis for the determination that the abortion was necessary to prevent the patient's death or irreversible impairment of a major bodily function; and

(e) a medical determination that includes all applicable medical diagnosis codes from the ICD-9-CM. (Authorized by K.S.A. 2011 Supp. 65-445, 65-6703, and 65-6721; implementing K.S.A. 2011 Supp. 65-6721; effective June 15, 2012.)

28-56-5. Requirements for reporting failed abortions. If an abortion attempt fails and results in a live birth, each abortion provider shall complete and file the following information:

(a) A certificate of live birth pursuant to K.S.A. 65-2409a, and amendments thereto; and

(b) a failed abortion report meeting the following requirements:

(1) Meeting the requirements specified in K.A.R. 28-56-2; and

(2) specifying the medical basis and medical diagnosis for the reason the abortion was not completed. (Authorized by and implementing K.S.A. 2011 Supp. 65-445; effective June 15, 2012.)

28-56-6. Reporting requirements for abortions performed on minors in the case of a medical emergency. (a) Each abortion provider shall file an abortion report as specified in K.A.R. 28-56-2 and, if applicable, K.A.R. 28-56-3.

(b) Each abortion report for an abortion performed on a minor during a medical emergency shall contain the following information:

(1) If applicable, the information specified in K.A.R. 28-56-4 and K.A.R. 28-56-5;

(2) the medical basis for determining that a medical emergency exists;

(3) the medical methods used in determining the medical emergency;

(4) the patient identification number obtained from the patient's medical records where the abortion was performed; and

(5) the date on which the abortion was performed. (Authorized by K.S.A. 2011 Supp. 65-445, 65-6703, 65-6705 and 65-6721; implementing K.S.A. 2011 Supp. 65-6705; effective June 15, 2012.)

28-56-7. Physician's report on number of certifications received. (a) Each physician performing an abortion shall submit to the department the number of patient-completed voluntary and informed consent forms as specified in K.S.A. 65-6709, and amendments thereto. The report shall be submitted within five business days after the end of each month.

(b) Each physician's report on number of certifications received shall be submitted by United States mail or facsimile transmission. The report shall contain the following information:

(1) The physician's confidential code number;

(2) the date the report was submitted; and

(3) the number of voluntary and informed consent forms as specified in K.S.A. 65-6709, and amendments thereto, received during the previous calendar month, including any voluntary and informed consent form that was not followed by an abortion.

(c) Each correction to the physician's report on the number of certifications received shall be made within 15 business days of discovery of the error or omission. (Authorized by K.S.A. 2011 Supp. 65-445 and 65-6709; implementing K.S.A. 2011 Supp. 65-6709; effective June 15, 2012.)

28-56-8. Late term affidavits. (a) The referring physician and the physician performing an abortion shall each submit a late term affidavit to the department within 15 business days of the completion of the abortion procedure.

(b) The late term affidavit completed by the referring physician shall contain the following information:

(1) Name of the referring physician;

(2) the patient's identification number obtained from the patient's medical records where the abortion was performed;

(3) a statement that the referring physician and the physician performing the abortion have no legal or financial affiliation with each other as specified in K.S.A. 65-6703, and amendments thereto; and

(4) the date the late term affidavit was signed and notarized.

(c) The late term affidavit completed by the physician performing an abortion shall contain the

information required in subsection (b). (Authorized by K.S.A. 2011 Supp. 65-445, 65-6703, and 65-6724; implementing K.S.A. 2011 Supp. 65-445 and 65-6703; effective June 15, 2012.)

28-56-9. Correction in an abortion report. (a) In case of an error or missing information in an abortion report, each abortion provider shall report in writing to the department within 15 business days of discovery the specific information that needs to be corrected or provided.

(b) Each abortion provider shall review all relevant medical records after being advised by the department of an error or missing information on the abortion report and shall provide any correction or updated information on the abortion report within 15 business days of discovery of the error or omission.

(c) An abortion provider shall not make corrections or additions to an abortion report within the electronic abortion reporting system or create a new record to replace the incorrect or incomplete abortion report. (Authorized by and implementing K.S.A. 2011 Supp. 65-445; effective June 15, 2012.)

28-56-10. Medical information retained on each abortion performed. (a) Each abortion provider shall retain the following information in each patient's medical record for at least 10 years:

- (1) A copy of the abortion report and any subsequent corrections;
- (2) a copy of the voluntary and informed consent form;
- (3) a copy of the late term affidavit of the physician who performed the abortion;
- (4) a copy of a court-ordered bypass of parental consent as specified in K.S.A. 65-6705, and amendments thereto, or consent of both parents or the legal guardian if the minor is not emancipated;
- (5) the physical or mental medical history of the patient;
- (6) all sonogram results;
- (7) a copy of the medical basis and reasons related to partial birth abortion, late term abortion, or emergency abortion procedure on a minor;
- (8) a copy of the patient-specific counseling information provided in addition to state-required material;
- (9) a copy of the postabortion instructions;
- (10) a record and description of any complications;

- (11) the type and amount of anesthesia used;
- (12) any report of physical, mental, or emotional abuse or neglect of a minor pursuant to K.S.A. 38-2223, and amendments thereto;
- (13) a list of all medical tests performed and the results of each test;
- (14) a record of any return visit by patient, if indicated by the physician;
- (15) emergency contact information for the patient;
- (16) a copy of the medical referral from the referring physician; and
- (17) if known, the name, address, and telephone number of the father of the unborn child if the patient is less than 16 years old.

(b) Each referring physician shall retain a copy of that physician's late term affidavits for at least 10 years. (Authorized by K.S.A. 2011 Supp. 65-445, 65-6703, and 65-6724; implementing K.S.A. 2011 Supp. 65-445 and 65-6703; effective June 15, 2012.)

Article 59.—DIETITIAN

28-59-1. Application for a license or temporary license. (a) Each applicant for a license or temporary license shall submit a completed, department-approved application form and any requested supporting documentation to the department, together with the appropriate fee specified in K.A.R. 28-59-7.

(b) Each applicant for a license or temporary license shall provide the department with the applicant's academic transcripts and proof of receipt of a baccalaureate or postbaccalaureate degree. These documents shall be provided directly to the department by the academic institution.

(c) A temporary license may be issued for either of the following purposes:

- (1) The applicant's completion of the examination specified in K.A.R. 28-59-4; or
- (2) the applicant's accrual of continuing education credits required to reinstate a lapsed license.

(d) Each applicant for renewal of a temporary license shall submit a letter to the secretary requesting the renewal and describing why the applicant has failed to obtain a license in the last six months and what measures are being taken to secure a license, together with the temporary license renewal fee specified in K.A.R. 28-59-7. (Authorized by K.S.A. 65-5904; implementing K.S.A. 65-5906 and 65-5907; effective Feb. 18, 1991; amended March 16, 2001.)

28-59-2. Application for a person licensed in another state. (a) Each applicant who is presently or has been previously licensed in another state shall submit a completed, department-approved application form with the license fee specified in K.A.R. 28-59-7.

(b) Each applicant shall meet current requirements for licensure in Kansas. The requirements of one of the states that issued a license to the applicant shall be at least equal to Kansas licensure requirements at the time the applicant seeks a Kansas license.

(c) Each applicant shall be in good standing with each licensing agency that has issued a license to the applicant.

(d) "Good standing" means both of the following:

(1) The applicant's license is not under any administrative proceeding.

(2) The applicant's license is not under any disciplinary action. (Authorized by K.S.A. 65-5904; implementing K.S.A. 65-5910; effective Feb. 18, 1991; amended March 16, 2001.)

28-59-3. Educational and experience requirements. (a) To determine whether an applicant has complied with the requirement that the person has received a baccalaureate or postbaccalaureate degree pursuant to K.S.A. 65-5906, and amendments thereto, consideration shall be given to whether the course of study is accredited or approved by the American dietetic association or is deemed equivalent by the secretary.

(b) Each applicant who has received a baccalaureate or postbaccalaureate degree outside the United States or its territories and whose transcript is not in English shall submit an officially translated English copy of the applicant's transcript and, if necessary, supporting documents. The transcript shall be translated by a source and in a manner that are acceptable to the secretary. Each applicant shall pay any transcription fee directly to the transcriber.

(c) Each applicant who has received a baccalaureate or postbaccalaureate degree outside of the United States and its territories shall obtain an equivalency validation from an agency that is approved by the secretary and that specializes in educational credential evaluations. Each applicant shall pay the required equivalency validation fee directly to the validation agency.

(d) Each applicant who received a baccalaureate or postbaccalaureate degree and whose course

of study was not from an American dietetic association accredited or approved program shall obtain an equivalency validation from a college or university accredited or approved dietetics program approved by the secretary.

(e) To determine whether an applicant has complied with the requirement that a person complete 900 clock hours of dietetic experience pursuant to K.S.A. 65-5906, and amendments thereto, consideration shall be given to whether or not the supervised experience is acquired through an American dietetic association approved or accredited program for dietitians or is deemed its equivalent by the secretary.

(f) Each applicant who did not receive the supervised experience from an American dietetic association accredited or approved program shall obtain an equivalency validation from a college or university accredited or approved dietetics program approved by the secretary.

(g) Each applicant shall submit the necessary documentation for an equivalency validation to be made. Each equivalency validation evaluation and corresponding documentation shall be sent directly to the department by the agency providing the validation. After consideration of the evaluation and documentation, the applicant shall be notified in writing of the decision of the secretary.

(h) "American dietetic association" means the national professional association that accredits or approves educational programs and supervised experience programs in dietetics. (Authorized by K.S.A. 65-5904; implementing K.S.A. 65-5905 and 65-5906; effective Feb. 18, 1991; amended March 16, 2001.)

28-59-4. Examination requirement. The following shall be the procedures for the examination of applicants:

(a) Each applicant for a license shall pass an examination for dietitians approved by the secretary. The minimum passing score for the examination shall be 25.

(b) Each applicant shall have successfully completed a course of study and supervised experience pursuant to K.S.A. 65-5906, and amendments thereto, before submitting an application to sit for the examination.

(c) Each applicant shall pay the required examination fee directly to the testing agency. (Authorized by K.S.A. 65-5904; implementing K.S.A. 65-5906; effective Feb. 18, 1991; amended March 16, 2001.)

28-59-5. License renewal. This regulation shall not apply to temporary licenses. (a) Each applicant for renewal of a license shall submit a completed, secretary-approved application form and any requested supporting documentation with the license renewal fee specified in K.A.R. 28-59-7.

(b) Each applicant for renewal of a license shall have completed 15 clock-hours of documented and approved continuing education during each renewal period. Approved continuing education clock-hours completed in excess of the 15-hour requirement shall not be carried over to the subsequent renewal period. "One clock-hour" shall mean at least 50 minutes of direct instruction, exclusive of registration, breaks, and meals.

(c) Each application for renewal of a license shall be filed on or before the last day of February of the calendar year in which the license expires. Licenses shall be renewable biennially, with the day of expiration being the last day of February of the applicable year.

(d) "Sponsorship" means an approved, long-term sponsoring of programs for the purpose of fulfilling renewal or reinstatement continuing education requirements. Each approved sponsor shall be accountable for upholding the standards in place for the approval of continuing education programs under the authority of the secretary. Each sponsor shall make application and fulfill requirements as prescribed on secretary-approved forms. Failure to comply with sponsorship requirements shall result in one or more of the following actions or additional requirements by the secretary:

- (1) Supplementary documentation;
- (2) program restrictions; or
- (3) temporary or permanent suspension of long-term sponsorship approval.

(e) (1) Continuing education may be accrued from any of the following:

- (A) Academic courses;
- (B) workshops, seminars, video conferences, internet-based seminars, journal club meetings, or poster sessions, which are also called poster displays;
- (C) self-directed study materials;
- (D) presentations;
- (E) food exhibits;
- (F) publication of a journal article or book; or
- (G) initial certification in any of the following programs:

(i) Certified nutrition support dietitian (CNSD) with the American association of diabetes ed-

ucators/American nurses credentialing center (AADE/ANCC);

(ii) certified nutrition support dietitian (CNSD) with the American association of parenteral and enteral nutrition (ASPEN);

(iii) certification as a specialist in pediatric nutrition by the commission on dietetic registration (CDR);

(iv) certification as a specialist in renal nutrition by the commission on dietetic registration (CDR);

(v) certification as a lactation consultant by the international board of lactation consultant examiners (IBLCE);

(vi) certified diabetes instructor with the national certification board for diabetes educators (NCBDE); or

(vii) certified diabetes educator with the American association of diabetes educators (AADE).

(2) Academic courses shall be from a regionally accredited college or university.

(3) Self-study materials may include audio tapes, study kits, internet-based offerings, journal articles, DVDs, and videotapes. Journal articles shall include articles published in the "journal of the ADA" or "today's dietitian" or by a dietetic practice group. Any applicant may submit a maximum of seven journal articles for continuing education credit for each licensure period.

(f) The content and objective of the continuing education activity shall be primarily related to the practice of dietetics pursuant to K.S.A. 65-5902, and amendments thereto. The purpose of the educational activity shall be the furthering of the applicant's education and shall not be a part of the applicant's job responsibilities. In-service shall be considered to be part of the applicant's job responsibilities.

(g) (1) Approval for a continuing education activity may be obtained by either of the following methods:

(A) The instructor or sponsor of a single-offering continuing education activity submitting information and documentation on forms approved by the secretary before the activity's occurrence; or

(B) the applicant submitting information and documentation on forms approved by the secretary requesting approval for an activity before the program date.

(2) An organization, institution, agency, or individual shall be qualified for approval as a long-term sponsor of continuing education activities if, after review of the application, the secretary de-

termines that the applicant agrees to perform all of the following:

- (A) Present organized programs of learning;
- (B) present subject matter that integrally relates to the practice of dietetics;
- (C) approve and present program activities that contribute to the professional competency of the licensee; and
- (D) sponsor program presenters who are individuals with education, training, or experience qualifying them to present the subject matter of the programs.

(h) All continuing education sponsors that received approval as specified in paragraph (g)(2) shall provide a certificate of attendance to each licensee who attends a continuing education activity. This certificate shall state the following:

- (1) The sponsor's name and approval number;
- (2) the date of the program;
- (3) the name of the participant;
- (4) the total number of clock-hours of the approved activity attended, excluding introductions, registration, breaks, and meals;
- (5) the activity title and its presenter;
- (6) the location; and
- (7) an indication of whether or not the activity has been approved for dietetics continuing education.

(i) Assignment of clock-hours to approved continuing education activities shall be determined by the following criteria:

(1) One academic-semester credit hour course shall be equivalent to 15 clock-hours of continuing education. One academic-trimester credit hour course shall be equivalent to 14 clock-hours of continuing education. One academic-quarter credit hour course shall be equivalent to 10 clock-hours of continuing education.

(2) One academic-semester credit hour course audited shall be equivalent to eight clock-hours of continuing education. One academic-trimester credit hour course audited shall be equivalent to seven clock-hours of continuing education. One academic-quarter credit hour course audited shall be equivalent to five clock-hours of continuing education.

(3) One clock-hour of contact between a presentation instructor and the applicant shall be equivalent to one clock-hour of continuing education for the applicant.

(A) Contact time shall be rounded down to the nearest one-half hour.

(B) The presenting instructor may be given two clock-hours of continuing education for every one

clock-hour of contact between the instructor and the attendees for each first-time preparation and presentation of a new workshop, seminar, or poster session.

(C) If the presentation was presented by more than one instructor, the continuing education clock-hours shall be prorated among the instructors.

(4) One clock-hour of time required to complete the self-directed study material, as specified by the sponsor of the material, shall be equivalent to one clock-hour of continuing education. The criteria for approving self-directed study shall include the following:

(A) Contact time shall be rounded down to the nearest one-half hour.

(B) Each applicant shall provide validation of actual completion of the material.

(C) A maximum of 10 clock-hours shall be awarded for self-directed study material for each licensure period.

(5) One clock-hour shall be awarded for attendance at food exhibits upon verification of six poster sessions or six vendors at each exhibit. The licensee shall provide documentation of at least six vendor contacts for each food exhibit. A maximum of two clock-hours for attendance at food exhibits shall be awarded for each licensure period.

(6) Five clock-hours shall be awarded for the initial publication of an article in a peer-reviewed journal or a chapter of a book. Ten clock-hours shall be awarded for the initial publication of a book. Documentation of publication shall include a copy of any of the following:

(A) Each article published in a peer-reviewed journal;

(B) each chapter published in a book; or

(C) the title page, the page containing the copyright and copyright date, and the table of contents for each book.

(7) Fifteen clock-hours shall be awarded upon attainment of certification in each program as specified in paragraph (e)(1)(G).

(j) Each applicant shall maintain individual records of information and documentation on approved continuing education hours. If the licensee's application is selected for an audit, the licensee shall submit verification of these records to the secretary as part of the license renewal application.

(k) Each licensee whose initial licensure period is less than 24 months shall be required to obtain at least one-half hour of continuing education for

each month in the initial licensure period. (Authorized by and implementing K.S.A. 65-5904 and K.S.A. 65-5909; effective Feb. 18, 1991; amended Sept. 26, 1994; amended March 16, 2001; amended April 25, 2008.)

28-59-5a. Reinstatement of license. Each applicant for reinstatement of a license shall meet the following criteria:

(a) Submit an application on department-approved forms accompanied by the appropriate fee specified in K.A.R. 28-59-7; and

(b) document and verify the accumulation of not less than 15 hours of approved continuing education as specified in K.A.R. 28-59-5 for the previous complete or partial licensure period. The required hours of approved continuing education shall have been accumulated within the past two calendar years before the date of application for reinstatement. (Authorized by and implementing K.S.A. 65-5904 and K.S.A. 1999 Supp. 65-5909; effective Sept. 26, 1994; amended March 16, 2001.)

28-59-6. Unprofessional conduct. Any of the following acts shall be evidence of unprofessional conduct of a licensee, temporary licensee, or applicant:

(a) Misrepresenting any professional qualifications or credentials;

(b) promoting or endorsing products in a manner that is misleading or false;

(c) making false or misleading claims about the efficacy of any dietetic services;

(d) permitting the use of one's name or credentials for the purpose of certifying that dietetic services have been rendered when the licensee or applicant has not provided or supervised the provision of the services;

(e) failing to maintain the knowledge and skills required for continuing professional competence;

(f) failing to exercise appropriate supervision over persons if there is a supervisory relationship;

(g) impersonating another person who is licensed;

(h) knowingly allowing another person to use one's license;

(i) assisting another person to obtain a license under false pretense;

(j) failing to report to the department alleged violations of K.S.A. 65-5901, et seq., and amendments thereto, and article 59 of these regulations;

(k) failing to notify the department of any disci-

plinary action or limitation, restriction, or revocation of an individual's license, or of termination or suspension of employment in a dietetic practice for some form of misfeasance, malfeasance, or nonfeasance;

(l) refusing to cooperate in a timely manner with the department's investigation of complaints lodged against a licensee, temporary licensee, or applicant;

(m) acquiring or providing a commission or rebate or any other form of remuneration for referral to any other service or for the use of any services;

(n) failing to disclose to a client any interest in commercial enterprises that the licensee, temporary licensee, or applicant promotes for the purpose of personal gain or profit;

(o) using undue influence on a client, including the promotion of the sales of services and products in a manner that exploits the client for financial gain or personal gratification;

(p) failing to provide prospective clients with information, including obligation for fee payment and financial arrangements, that might affect the client's decision to enter into the relationship;

(q) misrepresenting professional competency by performing or offering to perform services that are clearly unwarranted on the basis of education, training, or experience; or

(r) failing to conform to generally accepted principles and standards of dietetic practice, which shall be those generally recognized by the profession as appropriate for the situation presented, including those promulgated or interpreted by professional or governmental bodies. (Authorized by and implementing K.S.A. 1999 Supp. 65-5911(a)(2); effective Feb. 18, 1991; amended March 16, 2001.)

28-59-7. Fees. (a) The license application fee shall be \$140.00. The license application fee for an initial licensure period of less than 24 months shall be prorated at \$5.50 per month for any full or partial month, until the last day of February of the calendar year that is not less than 12 months and not more than 24 months from the date of application.

(b) The license renewal fee shall be \$135.00.

(c) The license renewal late fee shall be \$50.00.

(d) The temporary license application fee shall be \$70.00.

(e) The temporary license renewal fee shall be \$70.00.

(f) The application fee for reinstatement of a lapsed or revoked license shall be \$100.00 in addition to the license renewal fee established in subsection (b) of this regulation.

(g) The wall or wallet card license replacement fee shall be \$10.00.

(h) The sponsorship application fee shall be \$150.00. (Authorized by and implementing K.S.A. 1999 Supp. 65-5913; effective Feb. 18, 1991; amended Dec. 7, 1992; amended Sept. 26, 1994; amended March 16, 2001.)

28-59-8. Change of name or address. (a) Each licensee shall notify the department of any changes in name or mailing address within 15 days of these changes.

(b) Notification of address changes shall be made directly to the department and shall include the name, old mailing address, new mailing address, and zip code.

(c) Within 90 days of the notification of name change, the following shall be received by the department:

(1) A copy of a marriage certificate, the court decree evidencing the change, or a social security card reflecting the new name; and

(2) payment of the applicable fee specified in K.A.R. 28-59-7 if a new wallet card is requested.

In addition, the previously issued identification card shall be returned to the department. (Authorized by and implementing K.S.A. 65-5904; effective Feb. 18, 1991; amended March 16, 2001.)

Article 60.—CREDENTIALING PROGRAM

28-60-1. Definitions. (a) “Applicant” means the organization or organizations who submit to the department of health and environment a notice of intent and a credentialing application requesting that a specific profession or occupation be credentialed. The organization or organizations need not be comprised of members of the specific profession or occupation that is the subject of the credentialing application.

(b) “Manual for applicant” means the “Kansas credentialing review program: manual for applicants,” which is produced by the department of health and environment and includes descriptions of the process, policies, procedures, and standards of the credentialing review program as established by K.S.A. 1987 Supp. 65-5001, as amended by L. 1988, Ch. 246, Sec. 22, *et seq.* and amendments thereto and K.A.R. 28-60-1, *et seq.*

(c) “Profession or occupation” means the specific vocation that is the subject of the credentialing application.

(d) “Record” means the evidence and testimony gathered during the technical committee meetings and the secretary’s review of the credentialing application. The record shall include but not be limited to the following:

(1) The application;

(2) the minutes of the technical committee meetings;

(3) the written materials, written testimony, and oral testimony presented in accordance with K.A.R. 28-60-6(c) at the technical committee meetings;

(4) the preliminary and final report of the findings and recommendations of the technical committee; and

(5) the secretary’s final report to the legislature.

(e) “Standards” means the conditions set by the secretary, as listed in the May 1987 manual for applicants, that the technical committee and secretary may use to aid in determining whether certain portions of the criteria have been met. (Authorized by and implementing K.S.A. 1987 Supp. 65-5009; effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-2. Notice of intent. (a) Each applicant seeking to have a credentialing application reviewed, according to the provisions of K.S.A. 1987 Supp. 65-5001, *et seq.*, as amended by L. 1988, Ch. 246, Sec. 22, and amendments thereto, shall first submit to the secretary a notice of intent.

(b) Each notice of intent shall contain the following information regarding the applicant:

(1) The names of the organizations and the number of members in each organization;

(2) the names of the national organizations, if the organizations are state affiliates of national organizations; and

(3) the names, addresses, organization affiliations, and telephone numbers of the persons designated to represent the applicant.

(c) Each notice of intent shall contain the following information regarding the profession or occupation that the applicant is seeking to have credentialed:

(1) Each name and title of the profession or occupation;

(2) the approximate number of members of the profession or occupation practicing in Kansas;

(3) the titles, addresses, and telephone numbers of all other organizations in Kansas consisting of members of the profession or occupation;

(4) a list and description of each function typically performed by members of the profession or occupation that pertain to services rendered directly or indirectly for the purpose of:

(A) Preventing physical, mental, or emotional illness;

(B) detecting, diagnosing, and treating illness;

(C) facilitating recovery from illness; and

(D) providing rehabilitative or continuing care following illness;

(5) the approximate percentage of time spent in each function listed in paragraphs (4), (A), (B), (C), and (D) of this subsection;

(6) the training, education, or experience required to perform the functions of the profession or occupation;

(7) the titles of all other health professions or occupations that:

(A) Perform the same type of functions as the profession or occupation, but at a different level of skill or training;

(B) perform different, but related, functions in association with the profession or occupation; and

(C) perform the same functions as the profession or occupation, but in a different setting or employment situation;

(8) a description of the relationship between the other health professions or occupations identified in paragraphs (7)(A), (B), and (C) of this subsection and the profession or occupation; and

(9) an approximate date on which a credentialing application will be submitted.

(d) Any additional information needed to make a determination as to whether the profession or occupation is properly classified as health care personnel may be requested by the secretary.

(e) A determination as to whether the profession or occupation meets the definition of health care personnel shall be made by the secretary on the basis of the contents of the notice of intent and any additional information requested by the secretary.

(f) Each notice of intent shall be approved or denied by the secretary within 60 days after receiving the notice of intent and any additional information requested, and the applicant shall be given written notice of the decision.

(1) If the secretary approves any notice of intent, the applicant may submit a credentialing application; and

(2) if the secretary denies any notice of intent, the applicant may appeal the secretary's decision.

(g) Any applicant may appeal to the secretary in writing within 60 days after receiving the written denial notification by the secretary.

(h) Each appeal to the secretary shall specify in detail the reasons the applicant disagrees with the decision.

(i) If, after examining the applicant's written appeal, the secretary finds the profession or occupation meets the definition of health care personnel, the applicant may submit a credentialing application to the secretary.

(j) If the secretary finds the profession or occupation does not meet the definition of health care personnel and after exhausting the review procedures outlined in the Kansas judicial review act, the applicant shall not submit a credentialing application to the secretary.

(k) Each applicant shall be given written notice of the final decision by the secretary. (Authorized by K.S.A. 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-5001, as amended by L. 1988, Ch. 246, Sec. 22, effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-3. Filing of the credentialing application. (a) Each applicant shall complete the forms of the credentialing application that are printed in the manual for applicants.

(b) "Kansas resident" means any person 18 years old or older who resides in Kansas.

(c) Each credentialing application received from an applicant whose notice of intent has been approved shall be reviewed by the department of health and environment to determine if the credentialing application is fully answered and complete.

(1) If the credentialing application is not complete, the applicant shall be requested by the department of health and environment to submit additional information.

(2) If the credentialing application is complete, an approximate date for the technical committee to begin the review of the credentialing application shall be selected by the secretary and the applicant shall be notified of the approximate date. (Authorized by K.S.A. 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-5002; effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-4. Withdrawing a credentialing application. (a) Each applicant that has withdrawn a credentialing application shall not submit a new notice of intent, application, and application fee for one year after the date the final report of the technical committee has been issued.

(b) The technical committee shall prepare a final report within 120 days after completing the technical committee meetings in accordance with K.A.R. 28-60-6.

(c) Each credentialing application already on file shall be reviewed by the technical committee before a new credentialing application submitted by an applicant group that has previously withdrawn a credentialing application will be reviewed. (Authorized by 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-5003; effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-5. Selection of a technical committee. (a) A written memorandum requesting nominations for individuals to serve on each technical committee shall be distributed by the secretary to:

(1) Persons who have asked the department of health and environment to keep them informed of credentialing activities; and

(2) various professional associations and state regulatory boards.

(b) The memorandum shall contain:

(1) A request for nominations;

(2) the names of the professions or occupations of the applications the technical committee will review;

(3) the review schedules;

(4) a description of the review process and responsibilities of the technical committee members; and

(5) instructions and a closure date for submission of nominations.

(c) Additional information shall be requested by the secretary from each nominee to determine whether the nominee has any direct, economic or personal interest in the credentialing or noncredentialing of the professions or occupations whose credentialing applications will be reviewed by the technical committee.

(d) Each nominee shall remain on the list of nominees for one year.

(e) Additional technical committees may be established if approved by the secretary.

(f) Each technical committee shall review only one credentialing application at a time. Each tech-

nic committee shall review a maximum of two applications. (Authorized by K.S.A. 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-5003; effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-6. Technical committee meetings.

(a) Each credentialing application shall be reviewed by a technical committee under the following sequential proceedings:

(1) Applicant review. A copy of each application shall be mailed by the department of health and environment to the technical committee members at least 30 days before the applicant review meeting. Each applicant shall present, in person, an overview and description of the profession or occupation and shall summarize the contents of the credentialing application. The applicant's response to each question in the credentialing application shall be discussed by the technical committee at this meeting. The committee may ask for clarification or additional information from the applicant.

(2) Analysis. Any information requested at the applicant review meeting by the technical committee that has not been previously accepted may be submitted by the applicant. The information gathered from the application and applicant review meeting shall be compared with the criteria and standards, and then prepared as a report by the department of health and environment. At the analysis meeting, the technical committee shall discuss the report and shall develop preliminary findings and recommendations as to whether the criteria have been met.

(3) Public hearing. At the public hearing meeting, both supporting and opposing comments and information about the application and the preliminary findings and recommendations of the technical committee may be presented by the public. Any information requested at the applicant review meeting and analysis meeting by the technical committee that has not been previously accepted may be submitted by the public and the applicant. No new information shall be accepted or considered by the technical committee after the public hearing meeting.

(4) Final findings and recommendations. At the final findings and recommendations meeting, information presented at the public hearing and the information contained in the record to date shall be discussed by the technical committee. The final findings and recommendations as to whether the

criteria have been met shall then be developed by the technical committee.

(b) Additional technical committee meetings may be held if approved by the technical committee chairperson.

(c) The rules of conduct for public hearings shall include the following:

(1) Information presented at the technical committee meetings shall be in the record and shall not be presented again at public hearing meeting.

(2) Materials already entered into the record from the technical committee meetings shall be available for inspection at the public hearing meeting.

(3) Each person interested in presenting oral testimony shall contact the department of health and environment to be placed on the appropriate public hearing meeting agenda.

(4) The technical committee chairperson shall determine the amount of time allotted for each oral presentation based on the number of speakers and the anticipated length of time of the public hearing.

(5) At the conclusion of the agenda, the technical committee chairperson may allow time for:

(A) Persons to testify who were not previously on the agenda; and

(B) the applicant to provide any additional comments.

(6) Each person who presents oral testimony shall provide a written copy of the testimony for insertion into the record at or within seven days after the public hearing.

(7) Any technical committee member may ask questions and request further information or documentation of anyone testifying or providing information during the technical committee meetings.

(8) Written testimony may be submitted in lieu of oral testimony.

(9) Written testimony shall be submitted to the department of health and environment prior to the public hearing or at the public hearing and shall be entered into the record of the public hearing.

(d) "Criteria" means the conditions established by K.S.A. 1987 Supp. 65-5006, and amendments thereto, and K.S.A. 1987 Supp. 65-5007, and amendments thereto. Each application shall meet the conditions in K.S.A. 1987 Supp. 65-5006, and amendments thereto, before credentialing may be recommended by the technical committee and secretary. (Authorized by K.S.A. 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-

5003; effective May 1, 1987; amended, T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

28-60-7. (Authorized by 1987 Supp. 65-5009(b); implementing K.S.A. 1987 Supp. 65-5003; effective May 1, 1987; amended T-88-36, Sept. 17, 1987; amended May 1, 1988; revoked Dec. 5, 1988.)

28-60-8. (Authorized by K.S.A. 65-5009(b), as amended by L. 1986, Ch. 246, Sec. 8; implementing K.S.A. 65-5004, as amended by L. 1986, Ch. 246, Sec. 4; effective May 1, 1987; revoked, T-88-36, Sept. 17, 1987; revoked May 1, 1988.)

28-60-9. The standards listed in the "Kansas credentialing review program manual for applicants," May 1987, pages 9-12, as jointly developed by the secretary and the statewide health coordinating council, and as in effect May 1, 1987, is hereby adopted by reference. (Authorized by and implementing K.S.A. 1987 Supp. 65-5009(b); effective T-88-36, Sept. 17, 1987; amended May 1, 1988; amended Dec. 5, 1988.)

Article 61.—LICENSURE OF SPEECH LANGUAGE PATHOLOGISTS AND AUDIOLOGISTS

28-61-1. Definitions. (a) "American academy of audiology" means a national professional association for audiologists that provides continuing education programs and approves continuing education sponsors in clinical audiology.

(b) "American speech-language-hearing association" means a national professional association that accredits academic and clinical practicum programs and continuing education sponsors in speech-language pathology and audiology and that issues a certificate of clinical competence in speech-language pathology and audiology.

(c) "Department" means the Kansas department of health and environment.

(d) "Licensure period" means the period of time beginning on the date a license is issued and ending on the date the license expires. All full licenses shall expire biennially on October 31.

(e) "Screening" means a pass-fail procedure to identify any individual who requires further assessment.

(f) "Sponsorship" means an approved, long-term sponsoring of programs for the purpose of fulfilling renewal or reinstatement continuing

education requirements. Each approved sponsor shall be accountable for upholding the department's standards for the approval of continuing education programs. Each sponsor shall submit an application and the sponsor's annual report on department-approved forms. The authority to sanction or otherwise discipline an approved sponsor shall be maintained by the department. These sanctions may include the following:

- (1) Supplementary documentation;
- (2) program restrictions; or
- (3) temporary or permanent suspension of long-term sponsorship approval.

(g) "Supervision of methods and procedures related to hearing and the screening of hearing disorders" means consultation on at least a monthly basis by a licensed audiologist, a licensed speech-language pathologist, or any person exempted by K.S.A. 65-6511(a), (b), or (c), and amendments thereto. Any consultation may include any of the following:

- (1) On-site visits;
- (2) review of written documentation and reports; or
- (3) conference calls. (Authorized by K.S.A. 65-6503; implementing K.S.A. 65-6501 and K.S.A. 65-6503; effective Dec. 28, 1992; amended March 16, 2001; amended Aug. 19, 2005; amended April 16, 2010.)

28-61-2. Qualifications for licensure. (a) To determine whether or not an applicant has completed the educational requirements in the area for which the applicant seeks licensure pursuant to K.S.A. 65-6505 and amendments thereto, consideration shall be given to whether or not the academic course of study and practicum content are accredited by the American speech-language-hearing association or are deemed equivalent to the course of study and practicum content of Kansas universities by the secretary.

(b) Each applicant who completed the educational requirements specified in K.S.A. 65-6505, and amendments thereto, in a program not accredited by the American speech-language-hearing association shall meet both of the following requirements:

(1) Obtain an equivalency validation of the academic course of study or practicum content, or both, from a Kansas college or university with a speech-language pathology or audiology program accredited by the American speech-language-hearing association; and

(2) provide transcripts and supervised practicum records verifying that the applicant has successfully completed coursework or supervised practicum experiences related to the principles and methods of prevention, assessment, and intervention for individuals with communication and swallowing disorders in the following subject areas:

- (A) Articulation;
- (B) fluency;
- (C) voice and resonance, including respiration and phonation;
- (D) receptive and expressive language in speaking, listening, reading, writing, and manual modalities;
- (E) hearing, including the impact on speech and language;
- (F) swallowing;
- (G) cognitive aspects of communication;
- (H) social aspects of communication; and
- (I) communication modalities, including oral, manual, augmentative, and alternative communication, and assistive technologies.

(c) To determine whether or not an applicant has complied with the requirement that the degree be from an educational institution with standards consistent with the standards of Kansas universities pursuant to K.S.A. 65-6505 and amendments thereto, consideration shall be given to whether or not the institution is accredited by an accrediting body recognized by either the council on postsecondary accreditation or the secretary of the U.S. department of education, or is deemed equivalent by the secretary.

(d) Each applicant who completed the educational requirements specified in K.S.A. 65-6505, and amendments thereto, outside the United States or its territories and whose transcript is not in English shall submit an officially translated English copy of the applicant's transcript to the secretary and, if necessary, supporting documents. The transcript shall be translated by a source and in a manner that are acceptable to the secretary.

(e) Each applicant who completed the educational requirements specified in K.S.A. 65-6505, and amendments thereto, outside the United States or its territories shall obtain an equivalency validation from an agency approved by the secretary that specializes in educational credential evaluations.

(f) Each applicant shall pay any transcription or equivalency validation fee directly to the transcriber or the validating agency.

(g) The supervised clinical practicum as specified in K.S.A. 65-6505, and amendments thereto, shall be at least 400 hours, 25 of which shall be observation and 375 of which shall be direct client contact. At least 325 of the 400 hours of supervised clinical practicum shall be earned at the graduate level in the area in which licensure is sought.

(h) Each applicant, after completing the requirements in K.S.A. 65-6505 and amendments thereto, shall successfully complete the supervised postgraduate professional experience requirement in the area for which the applicant seeks licensure. The applicant may complete the requirement on a full-time or part-time basis.

(1) "Full-time" means 35 hours per week for nine months.

(2) "Part-time" means 15 to 19 hours per week for 18 months, 20 to 24 hours per week for 15 months, or 25 to 34 hours per week for 12 months.

(3) Each applicant working full-time shall spend 80 percent of the week in direct client contact and activities related to client management.

(4) Each applicant working part-time shall spend 100 percent of the week in direct client contact and activities related to client management.

(5) "Direct client contact" means assessment, diagnosis, evaluation, screening, habilitation, or rehabilitation of persons with speech, language, or hearing handicaps.

(6) Each postgraduate professional experience supervisor shall be currently and fully licensed in Kansas for speech-language pathology or audiology or, if the experience was completed in another state, either be currently and fully licensed in that state or hold the certificate of clinical competence issued by the American speech-language-hearing association. The supervisor's license or certificate shall be in the area for which the applicant seeks licensure.

(7) The supervisor shall evaluate the applicant on no less than 36 occasions of monitoring activities with at least four hours per month. The supervisor shall make at least 18 on-site observations with at least two hours per month.

(8) Monitoring occasions may include on-site observations, conferences in person or on the telephone, evaluation of written reports, evaluations by professional colleagues, or correspondence.

(9) The supervisor shall maintain detailed written records of all contacts and conferences during this period. If the supervisor determines that the applicant is not providing satisfactory services at any time during the period, the supervisor shall

inform the applicant in writing and submit written reports to the applicant during the period of resolution.

(10) No licensee shall be approved to serve as a supervisor for a postgraduate professional experience once the secretary initiates a disciplinary proceeding pursuant to K.S.A. 65-6508, and amendments thereto. After the disciplinary action or actions have been concluded, a licensee whose license has been reinstated or otherwise determined to be in good standing may be considered as a supervisor.

(i) Each applicant shall be required to pass the specialty area test of the national teacher examination of the educational testing service in the area for which licensure is being sought. The passing score for the examination shall be 600.

(1) The educational testing service shall administer the examinations at least twice a year within Kansas.

(2) Each applicant shall register to take the examination through the educational testing service, pay the examination fee directly to the educational testing service, and request that the test score be sent directly to the department from the educational testing service. (Authorized by K.S.A. 65-6503; implementing K.S.A. 2010 Supp. 65-6505; effective Dec. 28, 1992; amended March 16, 2001; amended April 16, 2010; amended April 8, 2011.)

28-61-3. Application for a license. (a) Each individual applying for a license shall submit to the department a completed department-approved application form, the required supporting documentation showing completion of all qualifications for licensure, and the appropriate fee as specified in K.A.R. 28-61-9.

(b) Each applicant shall provide to the department the applicant's academic transcripts and proof of completion of the educational requirements specified in K.S.A. 65-6505, and amendments thereto. These documents shall be provided directly to the department by the academic institution.

(c) Each applicant who seeks licensure in both speech-language pathology and audiology shall submit a separate application for each license, meet the qualifications for each license, and pay the fee for each license as specified in K.A.R. 28-61-9. (Authorized by K.S.A. 65-6503; implementing K.S.A. 2010 Supp. 65-6505 and K.S.A. 65-6506; effective Dec. 28, 1992; amended March 16, 2001; amended April 8, 2011.)

28-61-4. Application for a temporary license. (a) Each applicant who has completed the education and clinical practicum pursuant to K.S.A. 65-6505, and amendments thereto, but has not completed a supervised postgraduate professional experience or examination, or both, shall apply for a temporary license. This temporary license shall be issued for a period of 12 months and may be renewed for one subsequent 12-month period upon request and with the secretary's approval.

(b) Each applicant applying for a temporary license shall submit to the department a completed department-approved application form, the required supporting documentation showing completion of education and clinical practicum, and the appropriate fee as specified in K.A.R. 28-61-9.

(c) Each applicant shall provide to the department the applicant's academic transcripts and proof of completion of the educational requirements specified in K.S.A. 65-6505, and amendments thereto. These documents shall be provided directly to the department by the academic institution.

(d) Each applicant seeking a temporary license for the purpose of completing a supervised postgraduate professional experience shall receive a temporary license before beginning the supervised postgraduate professional experience.

(1) Each applicant shall provide to the department a plan for completion of the supervised postgraduate professional experience that has been signed by a supervisor who is currently fully licensed in Kansas in the area in which the applicant seeks licensure.

(2) Each applicant shall report any changes in the plan to the department.

(3) At the conclusion of the supervised postgraduate professional experience, each supervisor shall sign and submit to the department a report that documents satisfactory completion of the supervised postgraduate professional experience.

(e) To renew a temporary license, each applicant shall submit to the secretary a letter of appeal, supporting documentation showing that the examination or supervised postgraduate professional experience, or both, was not completed, and the temporary licensure fee as specified in K.A.R. 28-61-9.

(f) Each applicant who seeks temporary licensure in both speech-language pathology and audiology shall submit a separate application for each temporary license, meet the qualifications for

each temporary license, and pay the fee for each temporary license.

(g) A temporary license may be issued to enable an applicant for reinstatement to complete the continuing education requirements. This license shall be valid for not more than 12 months and shall not be renewed. (Authorized by K.S.A. 65-6503; implementing K.S.A. 2010 Supp. 65-6505 and K.S.A. 65-6506; effective Dec. 28, 1992; amended March 16, 2001; amended April 8, 2011.)

28-61-5. License renewal. (a) Each applicant for renewal of a license shall submit the following to the secretary:

(1) A completed secretary-approved application form;

(2) the required supporting documentation; and

(3) the license renewal fee as specified in K.A.R. 28-61-9.

(b) Each applicant for renewal of a license shall have completed the required clock-hours of documented and approved continuing education during each licensure period immediately preceding renewal of the license. Approved continuing education clock-hours completed in excess of the requirement shall not be carried over to the subsequent renewal period. There shall be 20 hours of approved continuing education required for each applicant holding a single two-year license and 30 hours required if the applicant is licensed in both speech-language pathology and audiology.

(c) Each applicant shall maintain individual records consisting of documentation and validation of approved continuing education clock-hours, a summary of which shall be submitted to the secretary on the approved form as part of the license renewal application.

(d) For the purpose of measuring continuing education credit, "one clock-hour" shall mean at least 50 minutes of direct instruction, exclusive of registration, breaks, and meals.

(e) The content and objective of the continuing education activity shall be primarily related to the practice of speech-language pathology as defined by K.S.A. 65-6501, and amendments thereto, or the practice of audiology as defined by K.S.A. 65-6501, and amendments thereto.

(1) The educational activity shall be for the purpose of furthering the applicant's education in one of the following three content areas:

(A) Basic communication processes, including information applicable to the normal development and use of speech, language, and hearing.

Issues related to this content area may include any of the following:

(i) Anatomic and physiologic bases of the normal development and use of speech, language, and hearing;

(ii) physical bases and processes of the production and perception of speech, language, and hearing;

(iii) linguistic and psycholinguistic variables related to normal development and use of speech, language, and hearing; or

(iv) technological, biomedical, engineering, and instrumentation information;

(B) professional areas, including information pertaining to disorders of speech, language, and hearing. Issues related to this content area may include any of the following:

(i) Various types of communication disorders, their manifestations, classifications, and causes;

(ii) evaluation skills, including procedures, techniques, and instrumentation for assessment; or

(iii) management procedures and principles in habilitation and rehabilitation of communication disorders; or

(C) related areas, including study pertaining to the understanding of human behavior, both normal and abnormal, as well as services available from related professions that apply to the contemporary practice of speech-language pathology, audiology, or both. Issues related to this content area may include any of the following:

(i) Theories of learning and behavior;

(ii) services available from related professions that also deal with persons who have disorders of communications;

(iii) information from these professions about the sensory, physical, emotional, social, or intellectual states of child or adult; or

(iv) other areas, including general principles of program management, professional ethics, clinical supervision, counseling, and interviewing.

(2) Unacceptable content areas shall include marketing, personal development, time management, human relations, collective bargaining, and tours.

(3) The educational activity shall not be a part of the applicant's job responsibilities. In-service shall be considered part of the applicant's job responsibilities.

(f) Continuing education may be accrued by any of the following methods:

(1) Academic coursework related to the contemporary practice of speech-language pathology or audiology, offered by a regionally accredited

college or university and documented by transcript or grade sheet:

(A) One academic-semester credit hour shall be equivalent to 15 clock-hours of continuing education. One academic-trimester credit hour shall be equivalent to 14 clock-hours of continuing education. One academic-quarter credit hour shall be equivalent to 10 clock-hours of continuing education; and

(B) one audited academic-semester credit hour shall be equivalent to eight clock-hours of continuing education. One audited academic-trimester credit hour shall be equivalent to seven clock-hours of continuing education. One audited academic-quarter credit hour shall be equivalent to five clock-hours of continuing education;

(2) workshops, seminars, poster sessions, and educational sessions sponsored by an organization, agency, or other entity that has been approved by the secretary:

(A) One clock-hour of contact between either a presenter or instructor and the applicant shall be equivalent to one clock-hour of continuing education for the applicant;

(B) contact time shall be rounded down to the nearest one-half hour interval; and

(C) one-half clock-hour of continuing education credit shall be awarded for attendance at two poster displays, with a maximum of two clock-hours of continuing education awarded for attendance at poster displays per licensure period;

(3) preparation and presentation of a new seminar, lecture, or workshop according to the following criteria:

(A) "New" shall mean that the applicant is preparing and making the presentation for the first time in any setting;

(B) credit shall be awarded only for the first presentation at the rate of two clock-hours of continuing education for every one clock-hour of contact between the instructor and attendees; and

(C) if the presentation was given by more than one instructor, the continuing education clock-hours shall be prorated among the instructors;

(4) preparation and presentation of a new undergraduate or graduate course in speech-language pathology or audiology at an accredited college or university:

(A) "New" shall mean that the applicant is teaching the course for the first time in any setting;

(B) six clock-hours of credit shall be awarded per new course, up to a maximum of 12 clock-hours per licensure period; and

(C) if the course was prepared and presented by more than one instructor, the continuing education clock-hours shall be prorated among the instructors;

(5) the successfully completed supervision of a postgraduate professional experience as specified in K.A.R. 28-61-2 and K.A.R. 28-61-4:

(A) The licensee's name and signature shall appear as the supervisor on the temporary license application submitted by the supervisee as specified in K.A.R. 28-61-4(d)(1);

(B) five clock-hours of credit per supervisee shall be awarded to the licensee; and

(C) the maximum amount of credit awarded for the supervision of a postgraduate professional experience shall be five clock-hours per licensee per licensure period; or

(6) self-directed study courses that are directly oriented to improving the applicant's professional competence and that are approved by the secretary:

(A) Self-directed study courses shall receive prior approval from the secretary;

(B) courses shall be sponsored by a nationally recognized professional organization in audiology or speech-language pathology and shall be accompanied by an examination or measurement tool to determine successful completion of the course;

(C) self-study materials may include audiotapes, videotapes, study kits, digital video discs (DVDs), and courses offered through the internet or other electronic medium; and

(D) one clock-hour of time required to complete the self-directed study material, as specified by the sponsor of the material, shall be equivalent to one clock-hour of continuing education.

(g) Continuing education sponsors seeking prior approval for a single offering of a continuing education activity shall apply to the secretary. Approval may be granted by the secretary by one of the following methods.

(1) An organization, institution, agency, or individual shall be qualified for approval as a sponsor of a continuing education activity if, after review of the application, the secretary determines that the applicant meets all of the following conditions:

(A) The sponsor presents organized programs of learning.

(B) The sponsor presents subject matters that integrally relate to the practice of speech-language pathology or audiology, or both, as specified in subsection (e).

(C) The sponsor's program activities contribute to the professional competency of the licensee.

(D) The sponsor's program presenters are individuals who have education, training, or experience that qualifies them to present the subject matter of the program.

(2) An organization, institution, agency, or individual shall be qualified for approval as a sponsor of continuing education if the American speech-language-hearing association or the American academy of audiology has approved the organization, institution, agency, or individual as a continuing education sponsor and the sponsor presents subject matter as specified in subsection (e).

(h) Continuing education sponsors seeking long-term sponsorship for continuing education activities shall apply to the secretary. Approval may be granted by the secretary if the organization, institution, agency, or individual agrees to perform all of the following:

(1) Present organized programs of learning;

(2) present subject matter that integrally relates to the practice of speech-language pathology or audiology, or both, and subsection (e);

(3) approve and present program activities that contribute to the professional competency of the licensee; and

(4) sponsor program presenters who are individuals with education, training, or experience that qualifies them to present the subject matter of the programs.

(i) All approved continuing education sponsors that received approval by the method specified in subsection (g) shall provide the following:

(1) A certificate of attendance to each licensee who attends a continuing education activity. The certificate shall state the following:

(A) The sponsor's name and approval number;

(B) the date of the program;

(C) the name of the participant;

(D) the total number of clock-hours of the program, excluding introductions, registration, breaks, and meals;

(E) the program's title and its presenter;

(F) the program site; and

(G) a designation of whether the program is approved for speech-language pathology or audiology, or both; and

(2) a list of attendees, license numbers, and the number of continuing education clock-hours completed by each licensee upon request and in a format approved by the secretary.

(j)(1) Each licensee who attends any activities of continuing education sponsored by the American speech-language-hearing association or the American academy of audiology shall retain either of the following:

(A) The letter of confirmation received from the continuing education registry of the American speech-language-hearing association or the American academy of audiology that includes the following:

(i) The licensee's name, address, and social security number;

(ii) the course title;

(iii) the sponsor's name; and

(iv) the number of continuing education units awarded; or

(B) the licensee's transcript from the continuing education registry of the American speech-language-hearing association or the American academy of audiology.

(2) One continuing education unit shall be equivalent to 10 clock-hours of continuing education.

(k) All continuing education sponsors that received approval by the method outlined in subsection (g) shall report to the secretary annually to maintain the designation as an approved sponsor. The application shall require a list of all continuing education programs provided by the approved sponsor during the previous calendar year and any additional documentation deemed necessary by the secretary to ensure that the approved sponsor is meeting or exceeding the standards set forth in this article.

(l) Each licensee who completes a continuing education activity that was not sponsored by an approved continuing education sponsor shall retain course documentation for review by the secretary at the time of license renewal.

(m) Each licensee whose initial licensure period is less than 24 months shall be required to obtain at least one clock-hour of continuing education for each month in the initial licensure period if the licensee holds a single license and at least one and one-quarter clock-hours of continuing education for each month in the initial licensure period if the licensee holds a dual license. (Authorized by K.S.A. 65-6503; implementing K.S.A. 65-6506; effective Dec. 28, 1992; amended March 16, 2001; amended April 16, 2010.)

28-61-6. Application for person with license issued by another state. (a) Each applicant applying for a license who is presently or has

been licensed in another state shall submit a completed department-approved application form with the license fee as specified in K.A.R. 28-61-9.

(b) Each application shall be evaluated by comparing the qualifications met to obtain the original license, and any subsequent licenses, with the current qualifications for Kansas licensure. The qualifications of one of the states that issued a license shall be equal to or in excess of the Kansas licensure qualifications at the time the applicant seeks a Kansas license.

(c) Each applicant shall be in good standing with each licensing agency that has issued a license to the applicant.

(d) "Good standing" means both of the following:

(1) The applicant's license is not under any administrative proceeding.

(2) The applicant's license is not under any disciplinary action. (Authorized by K.S.A. 65-6503; implementing K.S.A. 1999 Supp. 65-6506; effective Dec. 28, 1992; amended March 16, 2001.)

28-61-7. Reinstatement of a lapsed license. (a) Each applicant whose license has lapsed shall pay the reinstatement fee and license renewal fee as specified in K.A.R. 28-61-9.

(b) Each applicant whose license has lapsed shall, within five years of the most recent expiration date, reinstate that license by submitting evidence that the applicant has accumulated, within the past two calendar years before the date of application for reinstatement, 20 contact hours of approved continuing education.

(c) Each applicant whose Kansas license has lapsed for more than five years beyond its expiration date shall reinstate by submitting any of the following types of evidence:

(1) Current licensure in another jurisdiction that requires completion of a number of contact hours of continuing education for license renewal that is equivalent to or greater than the number of hours required in Kansas;

(2) licensure in another jurisdiction sometime during the preceding five-year period, and completion of 20 contact hours of approved continuing education within two calendar years before the date of application for reinstatement; or

(3) satisfactory completion of a plan for reinstatement that has been submitted to and approved by the speech-language pathology and audiology advisory board and by the department. (Authorized by K.S.A. 65-6503; implementing

K.S.A. 1999 Supp. 65-6506; effective Dec. 28, 1992; amended March 16, 2001.)

28-61-8. Assistants. (a) Each speech-language pathology assistant and each audiology assistant shall meet the following criteria:

(1) Have received a high school diploma or equivalent;

(2) complete a training program conducted by a Kansas-licensed speech-language pathologist or audiologist. This training shall include the following:

(A) Ethical and legal responsibilities;

(B) an overview of the speech, language, and hearing disorders;

(C) response discrimination skills;

(D) behavior management;

(E) charting of behavioral objectives and recordkeeping;

(F) teaching principles, if applicable to the employment setting; and

(G) other skill training as required by the employment setting; and

(3) receive ongoing supervised training by a Kansas-licensed speech-language pathologist or audiologist for at least one hour per month.

(b) Any speech-language pathology assistant or audiology assistant may perform the following:

(1) Follow documented treatment plans and protocols that are planned, designed, and supervised by a Kansas-licensed speech-language pathologist or audiologist;

(2) record, chart, graph, report, or otherwise display data relative to client performance, including hearing screenings, and report this information to a supervising speech-language pathologist or audiologist;

(3) participate with a Kansas-licensed speech-language pathologist or audiologist in research projects, public relations programs, or similar activities;

(4) perform clerical duties, including preparing materials and scheduling activities as directed by a Kansas-licensed speech-language pathologist or audiologist;

(5) prepare instructional materials; and

(6) perform equipment checks and maintain equipment, including hearing aids.

(c) A speech-language pathology assistant or audiologist assistant shall not perform any of the following:

(1) Perform standardized or nonstandardized diagnostic tests, conduct formal or informal eval-

uations, or provide clinical interpretations of test results;

(2) participate in parent conferences, case conferences, or any interdisciplinary team without the presence of a supervising Kansas-licensed speech-language pathologist or audiologist;

(3) perform any procedure for which the assistant is not qualified, has not been adequately trained, or is not receiving adequate supervision;

(4) screen or diagnose clients for feeding or swallowing disorders;

(5) write, develop, or modify a client's individualized treatment plan in any way;

(6) assist clients without following the individualized treatment plan prepared by a Kansas-licensed speech-language pathologist or audiologist or without access to supervision;

(7) sign any formal documents, including treatment plans, reimbursement forms, or reports. An assistant shall sign or initial informal treatment notes for review and signing by a Kansas-licensed speech-language pathologist or audiologist;

(8) select clients for services;

(9) discharge a client from services;

(10) make referrals for additional services;

(11) use a checklist or tabulate results of feeding or swallowing evaluations;

(12) demonstrate swallowing strategies or precautions to clients, family, or staff; or

(13) represent that person as a speech-language pathologist or audiologist.

(d) Each assistant shall be supervised by a Kansas-licensed speech-language pathologist or audiologist. The supervisor shall be licensed to practice in the field in which the assistant is providing services.

(1) Each supervisor shall be responsible for determining that the assistant is satisfactorily qualified and prepared for the duties assigned to the assistant.

(2) Each supervisor shall obtain, retain, and maintain on file documentation of the assistant's qualifications and training outlined in subsection (a).

(3) Only the supervisor shall exercise independent judgment in performing professional procedures for the client. The supervisor shall not delegate the exercise of independent judgment to the assistant.

(4) A speech-language pathologist or audiologist who holds a temporary license shall not be eligible to supervise assistants.

(e) Each supervisor shall directly supervise at least 10 percent of the assistant's client con-

tact time. No portion of the assistant's direct client contact shall be counted toward the ongoing training required in subsection (a). No portion of the assistant's time performing activities under indirect supervision shall be counted toward client contact time.

(f) "Direct supervision" shall mean the on-site, in-view observation and guidance provided by a speech-language pathologist or audiologist to an assistant while the assistant performs an assigned activity.

(g) "Indirect supervision" shall mean the type of guidance, other than direct supervision, that a speech-language pathologist or audiologist provides to an assistant regarding the assistant's assigned activities. This term shall include demonstration, record review, and review and evaluation of audiotaped sessions, videotaped sessions, or sessions involving interactive television.

(h) Each supervisor shall, within 30 days of employing an assistant, submit written notice to the department of the assistant's name, employment location, and verification that the assistant meets the qualifications listed in subsection (a). Each supervisor shall notify the department of any change in the status of an assistant.

(i) Each supervisor shall perform all of the following tasks:

(1) Develop a system to evaluate the performance level of each assistant under the licensee's supervision;

(2) retain and maintain on file documentation of the performance level of each assistant supervised; and

(3) report to the department at the time of the supervisor's license renewal, on a department-approved form, the name and employment location of each assistant. (Authorized by K.S.A. 65-6503; implementing K.S.A. 65-6501; effective Dec. 28, 1992; amended March 16, 2001; amended April 16, 2010.)

28-61-9. Fees. (a) The license fee shall be \$135.00. The license application fee for an initial licensure period of less than 24 months shall be prorated at \$5.50 per month for any full or partial month, until October 31 of the calendar year that is not less than 12 months and not more than 24 months from the date of application.

(b) The temporary license fee and temporary license renewal fee shall be \$65.00.

(c) The license renewal fee shall be \$135.00.

(d) The late license renewal fee shall be \$50.00.

(e) The license reinstatement fee shall be \$135.00.

(f) The wall or wallet card license replacement fee shall be \$10.00.

(g) The sponsorship application fee shall be \$150.00. (Authorized by and implementing K.S.A. 1999 Supp. 65-6512; effective Dec. 28, 1992; amended March 16, 2001.)

28-61-10. Change of name or address.

(a) Each licensee shall notify the department of any name or address change within 15 days of the change. Each licensee who fails to comply with this regulation may be subject to disciplinary action by the department pursuant to K.S.A. 65-6508, and amendments thereto.

(1) Notice of each address change shall be submitted to the department and shall include the licensee's name, license number, previous mailing address, and new mailing address.

(2) Complete notification of each name change shall meet the following criteria:

(A) Be submitted to the department in writing within 90 days of the change;

(B) include the licensee's previous name, new name, and license number; and

(C) be accompanied by a copy of a marriage certificate, court decree evidencing the change, or a social security card reflecting the new name.

(b) Each licensee seeking a replacement license or license renewal card, or both, shall perform the following:

(1) Submit a department-approved form for each and payment of the applicable replacement fee; and

(2) return, if possible, the most recently issued license or license renewal card, or both. (Authorized by and implementing K.S.A. 65-6503; effective Dec. 28, 1992; amended March 16, 2001.)

28-61-11. Unprofessional conduct. Each of the following acts by a licensee shall be evidence of unprofessional conduct:

(a) Misrepresenting any professional qualifications or credentials, including any of the following:

(1) Impersonating another licensed professional;

(2) knowingly allowing the use of one's license or license number by another person; or

(3) using an academic title that has not been conferred by an accredited educational institution;

(b) improper certification of services rendered when these services were not provided or supervised by the licensee;

(c) falsifying documents of personal data or qualifications in the application for licensure;

(d) aiding in the submission of false information or sanctioning the submission of false information for the purpose of another person obtaining licensure;

(e) misrepresenting services provided under one's professional license;

(f) promoting or endorsing products in a false or misleading manner;

(g) making unsupported or misleading claims about the efficacy of any professional service;

(h) performing services that fall under the scope of practice but for which the licensee has not received training that can be documented by an academic transcript or a certificate of training completion;

(i) performing or offering to perform services that are unwarranted;

(j) billing or receiving remuneration for services not rendered;

(k) withholding or failing to provide information that might affect a client's decision regarding the establishment or continuation of the professional relationship;

(l) failing to disclose to a client a proprietary interest in any commercial enterprise that might affect the client's decision regarding services;

(m) using undue influence, the threat of harm, or any false claim of future risk in order to promote sales, services, or products for personal gain or profit;

(n) failing to exercise appropriate supervision over clinical practicum students, temporarily licensed postgraduate professionals, or assistants with whom the licensee has a supervisory relationship;

(o) failing to report to the department alleged violations by speech-language pathologists and audiologists of Kansas statutes or regulations pertaining to the practice of speech-language pathology and audiology; and

(p) refusing to cooperate in a timely manner with the investigation of complaints under the jurisdiction of the Kansas department of health and environment. (Authorized by K.S.A. 65-6503 and 65-6508; implementing K.S.A. 65-6508; effective March 16, 2001; amended April 25, 2008.)

Article 65.—EMERGENCY PLANNING AND RIGHT-TO-KNOW

GENERAL REGULATIONS

28-65-1. General provisions. (a) The provisions of 40 C.F.R. Parts 350, 355, 370, and 372, dated July 1, 2018, including any notes and appendices, unless otherwise specifically stated in this article of the department's regulations, are hereby adopted by reference. If the same term is defined both in the Kansas statutes or this article of the department's regulations and in any federal regulation adopted by reference in this article of the department's regulations and the term is defined differently, the definition prescribed in the Kansas statutes or this article of the department's regulations shall control.

(b) The following phrases and citations shall be replaced with the phrases and citations specified in this subsection wherever the phrases and citations appear in the text of the federal regulations adopted by reference in this regulation:

(1) "The United States" shall be replaced with "the state of Kansas."

(2) "Environmental protection agency," "EPA," and "agency" shall be replaced with "Kansas department of health and environment," "KDHE," and "department," respectively, unless the term is used in reference to the EPA web site.

(3) "Administrator" and "regional administrator" shall be replaced with "secretary of the department of health and environment."

(4) "Federal register" shall be replaced with "Kansas register."

(5) "40 C.F.R. 350.16" shall be replaced with "K.A.R. 28-65-3(f)."

(6) "This chapter" and "this section" shall be replaced by "these regulations."

(7) "5 U.S.C. 552(b)(4)" shall be replaced by "K.S.A. 65-3015, and amendments thereto."

(8) "18 U.S.C. 1905" shall be replaced by "K.S.A. 45-215 et seq., and amendments thereto."

(9) "The Office of General Counsel, U.S. Environmental Protection Agency, Mailcode 2310A, 1200 Pennsylvania Avenue, NW, Washington DC 20460" shall be replaced by "the Office of General Counsel, Kansas Department of Health and Environment, 1000 SW Jackson Street, Topeka, Kansas 66612."

(c) The following sections shall be deleted:

(1) 40 C.F.R. 350.3(c); and

(2) 40 C.F.R. 350.16. (Authorized by and implementing K.S.A. 65-5704; effective, T-88-62, Dec.

30, 1987; effective May 1, 1988; amended Nov. 22, 1993; amended June 4, 1999; amended March 26, 2021.)

28-65-2. Definitions. As used in this article of the department's regulations, each of the following terms shall have the meaning specified in this regulation: (a) "Commission" has the meaning specified in K.S.A. 65-5702, and amendments thereto.

(b) "Department" means Kansas department of health and environment.

(c) "Extremely hazardous substance" means a substance listed in the appendices to 40 C.F.R. Part 355, emergency planning and notification, dated July 1, 2018 or on the list of Kansas reportable chemicals authorized by K.S.A. 65-5704, and amendments thereto.

(d) "Facility" means all buildings, equipment, structures, and other stationary items that are located on a single site or on contiguous or adjacent sites and that are owned or operated by the same person, or by any person who controls, is controlled by, or is under common control with, that person. For purposes of emergency release notification, the term shall include motor vehicles, rolling stock, and aircraft. For the purposes of toxic release reporting, any facility may contain more than one establishment, as defined in 40 C.F.R. 372.3, which is adopted in K.A.R. 28-65-1.

(e) "Federal act" has the meaning specified in K.S.A. 65-5702, and amendments thereto.

(f) "Kansas tier II form" and "tier II form" mean the hazardous chemical inventory form developed by the department.

(g) "Kansas tier II software" means the computer software developed for the department to allow an owner or operator of a facility to file the Kansas tier II form by electronic submission.

(h) "Material safety data sheets," "MSDS," "safety data sheets," and "SDS" mean reporting sheets required under the occupational safety and health act, 29 U.S.C. 651 et seq., as amended, and 29 C.F.R. 1910.1200.

(i) "Operator" means the owner or owner's designee who is director of a business, service, or industrial concern and conducts the affairs or manages an activity.

(j) "Owner" means proprietor or the person in whom is vested ownership, dominion, possession, or title of property. (Authorized by and implementing K.S.A. 65-5704; effective, T-88-62, Dec. 30, 1987; effective May 1, 1988; amended Nov.

22, 1993; amended Nov. 28, 1994; amended June 4, 1999; amended March 26, 2021.)

28-65-3. Submitting notifications and reports. (a) Each notification and report required to be submitted to the commission under sections 302 and 311 of the federal act and this article of the department's regulations shall be completed using the Kansas tier II form, which shall be submitted to the department's radiation control program in hard copy or by electronic submission.

(b) Each notification and report required to be submitted to the commission under section 312 of the federal act and this article of the department's regulations shall be completed using the Kansas tier II software. The Kansas tier II form shall be submitted to the radiation control program of the department electronically.

(c) Each toxic chemical release form submitted pursuant to section 313 of the federal act shall be submitted to the department's radiation control program before July 1 of each year for the previous calendar year.

(d) Each emergency release notification submitted pursuant to section 304 of the federal act shall be submitted to the division of emergency preparedness of the adjutant general's department.

(e) Each owner or operator of a facility required to report under this regulation shall notify the department within 60 days after either of the following:

(1) A change in the name, address, or both, of the owner or operator responsible for filing the facility report; or

(2) facility closure.

(f) Each claim of trade secrecy under sections 311, 312, and 313 of the federal act and each public petition requesting disclosure of chemical identities claimed as a trade secret shall be filed on a form provided by the department. The address to send all claims of trade secrecy under sections 311, 312, and 313 of the federal act shall be the address on the form provided by the department. (Authorized by and implementing K.S.A. 65-5704; effective, T-88-62, Dec. 30, 1987; effective May 1, 1988; amended, T-89-19, May 27, 1988; amended Sept. 26, 1988; amended Nov. 22, 1993; amended Nov. 28, 1994; amended June 4, 1999; amended March 26, 2021.)

28-65-4. Fees. (a) Except as provided in subsection (d), each owner or operator of a facility

required to report under section 312 of the federal act and K.A.R. 28-65-3 shall pay an annual report fee based upon the sum of the maximum daily reportable quantities of extremely hazardous substances or hazardous chemicals, or both, present at the facility as reported on the Kansas tier II form. These fees shall be calculated on forms provided by the department using the tables in paragraphs (c)(1) and (c)(2) as appropriate. The fees required under this subsection shall be submitted to the department before March 1 of each year at the time of submission of the Kansas tier II form.

(b) Each owner or operator of a facility required to file the toxic chemical release form required under section 313 of the federal act and K.A.R. 28-65-3 shall pay an annual report fee based upon the total quantity of chemicals released as reported on the federal form R. These fees shall be calculated on forms provided by the department using table 3 in paragraph (c)(4). The fees required under this subsection shall be submitted to the department before July 1 of each year at the time of submission of the federal form R.

(c)(1) Fees on the total maximum daily reportable quantity of extremely hazardous substances listed on the Kansas tier II form required under subsection (a) shall be determined using table 1 as follows:

Table 1

Sum of the maximum daily amounts of all extremely hazardous substances reported (pounds)	Annual fee
1 - 9,999	\$25
10,000 - 999,999	\$50
1,000,000 or greater	\$150

(2) Fees on the total maximum daily reportable quantity of hazardous chemicals listed on the Kansas tier II form required under subsection (a) shall be determined using table 2 as follows:

Table 2

Sum of the maximum daily amounts of all hazardous chemicals reported (pounds)	Annual fee
10,000 - 99,999	\$25
100,000 - 999,999	\$50
1,000,000 - 9,999,999	\$150
10,000,000 or greater	\$300

(3) For the purposes of this subsection, the term "hazardous chemical" shall not include any extremely hazardous substances or sand, gravel, clay, salt, or brine or other comparable substances

as approved by the department in the calculation of fees.

(4) Fees payable under subsection (b) on the total quantity of chemicals released reported on the federal form R shall be determined as follows:

Table 3

Sum of the total chemical releases reported (pounds)	Annual fee
100 - 19,999	\$250
20,000 - 99,999	\$700
100,000 - 999,999	\$1,700
1,000,000 or greater	\$3,000

(d) Each owner or operator of an oil or gas well that is required to report under section 312 of the federal act and K.A.R. 28-65-3 shall pay an annual fee of \$25. For the purposes of this subsection, the term "well" shall have the meaning specified in K.S.A. 55-150, and amendments thereto. The fee required under this subsection shall be submitted to the department before March 1 of each year at the time of submission of the Kansas tier II form.

(e) All fees shall be remitted by check, draft, or money order payable to the department and shall be nonrefundable. Any owner or operator may make an aggregate payment covering more than one facility by a single check, draft, or money order if a statement that indicates each individual facility name, address, and the amount of the fee for which payment is made accompanies each aggregate payment.

(f) An owner or operator of a facility subject to this article of the department's regulations shall not be charged a fee for chemical information submitted on a voluntary basis beyond that required under K.A.R. 28-65-3 if the optional nature of the information is clearly marked in the appropriate box on the Kansas tier II form. (Authorized by and implementing K.S.A. 65-5704; effective Nov. 22, 1993; amended Nov. 28, 1994; amended March 26, 2021.)

Article 66.—LOCAL ENVIRONMENTAL PROTECTION GRANT PROGRAM

28-66-1. Definitions. As used in K.A.R. 28-66-1 through 28-66-4 unless otherwise specified:

(a) "Base grant" means state water plan fund monies allocated to the Kansas department of health and environment and awarded to local entities for the purpose of developing and implementing a local environmental protection plan for a term which coincides with the state fiscal year.

(b) "Core program" means services that shall be provided by each local entity that is awarded a base grant, and which include the following:

(1) The development and implementation of an annual local environmental protection plan;

(2) the development, implementation, and enforcement of an environmental code which has been approved by the secretary of KDHE and which establishes standards for the management of on-site wastewater systems for the treatment and disposal of domestic sewage only;

(3) the development, implementation and enforcement of an environmental code which has been approved by the secretary of KDHE and which establishes standards for the management water supply wells which do not meet the definition of a public water supply well pursuant to K.S.A. 65-162a (b);

(4) information, education, and technical assistance; and

(5) organization and coordination of a local environmental protection committee to provide advice and counsel to the local entity on the content and administration of the local environmental protection plan.

(c) "KDHE" means the Kansas department of health and environment.

(d) "Local environmental protection plan" means a document revised annually by the local entity which includes objectives and workplans intended to implement the environmental protection strategy of the state water plan and which serves as the application for a base grant.

(e) "Local entity" means a county health department formed pursuant to K.S.A. 19-3701 et seq. and amendments thereto, other local entity formed under the power of the board of county commissioners to conduct any of the business of the county pursuant to K.S.A. 1992 Supp. 19-101a, or a multi-county entity formed pursuant to K.S.A. 12-2901 et seq. and amendments thereto.

(f) "Program guidelines" means a document prepared by KDHE by April 1 of each year which establishes program priorities, grant application and program reporting procedures, and other pertinent grant instructions for the next state fiscal year.

(g) "Secretary" means the secretary of KDHE.

(h) "Supplemental program" means any of the following:

(1) The development and implementation of a plan for subdivision water and wastewater pursu-

ant to K.S.A. 1992 Supp. 12-747, K.S.A. 65-3311 and amendments thereto;

(2) the development and implementation of a solid waste management plan pursuant to K.S.A. 65-3405 and amendments thereto;

(3) the development and implementation of a hazardous waste management plan that is consistent with K.S.A. 65-3430 and amendments thereto;

(4) participation in the development and implementation of a nonpoint source pollution control plan which identifies the activities and responsibilities of the local environmental protection program in the management of nonpoint pollutant sources; and

(5) the development and implementation of a public water supply protection plan which at a minimum:

(A) specifies the duties of local government agencies, the public water supplier and other local entities in the development and implementation of a public water supply protection plan;

(B) defines the public water supply protection area;

(C) identifies all potential contaminant sources within the defined public water supply protection area;

(D) identifies management practices which may be implemented to prevent contamination of the public water supply by each identified contaminant source, including but not limited to information and education, technical assistance, financial assistance, and the use of local ordinances;

(E) establishes a contingency plan to provide an alternate source of drinking water for each public water supply in the case that the public water supply becomes contaminated;

(F) requires that for any new public water supply all potential contaminant sources within the expected protection area be identified and management practices for each contaminant source identified; and

(G) provides for public participation in the development of any public water supply protection plan.

(i) "Target grant" means funding which may be awarded to a local entity in addition to a base grant for the purpose of conducting an approved program objective for which base grant funds are not sufficient. (Authorized by and implementing K.S.A. 75-5657; effective Feb. 28, 1994.)

28-66-2. Base grants. (a) A local entity may apply for a local environmental protection base grant each year on forms provided by KDHE.

(b) Base grant amounts shall be subject to the availability of funding.

(c) All base grant payments shall be made contingent upon the submission to KDHE of quarterly program and fiscal reports, as required in the grant award agreement, which are determined by KDHE to demonstrate satisfactory progress toward completion of approved program objectives.

(d) Upon approval of its local environmental protection plan by KDHE, a local entity shall be eligible to receive a base grant for the implementation and maintenance of the approved local environmental protection plan.

(e) Allocation of base grants shall be made in accordance with the following formula where population is the population of the local entity as determined by the most recent United States census figures for the state of Kansas:

(1) Counties with a population less than 12,727 shall be eligible for a base grant which is equal to or greater than \$7,000;

(2) counties with a population greater than 227,273 shall be eligible for a base grant which is equal to or greater than \$125,000;

(3) for all other counties the base grant shall be equal to or greater than the product of the county's population \times \$0.55; and

(4) a local entity which consists of multiple counties shall receive a base grant equal to or greater than the sum of the base grants for which each individual county would be eligible under subsections (e) (1) through (e) (3) of this regulation.

(f) During a given grant period, if the appropriation from the state water plan is not adequate to award each local entity the base grant amount for which it is eligible under subsection (e) of this regulation, then the amount for which the local entity would be eligible under subsection (e) shall be divided by the total amount of funding for which all local entities have applied. The quotient shall then be multiplied by the total amount of funding appropriated for local environmental protection grants to determine the amount of the local entity's grant.

(g) Base grant awards shall be made in the form of an agreement which is signed by the secretary and the signatories of the local environmental protection plan as described in K.A.R. 28-66-4 (a)

(1). The agreement shall establish:

(1) A schedule for the payment of the base grant to the local entity;

(2) approved objectives of the local environmental protection plan which the local entity agrees to execute;

(3) quarterly reporting requirements; and

(4) general terms which are necessary to ensure that the grant funds are expended and accounted for in accordance with applicable state statutes.

(h) Local environmental protection grant monies that remain after all base grants have been awarded may be made available to:

(1) Increase the base level of funding for which local entities are eligible as described in subsection (e) of this regulation; or

(2) provide target grants to base grant recipients on a case-by-case basis.

(i) Local environmental protection grant funds may be used to complement but shall not be used to replace financial assistance which a local entity may be eligible to receive from a separate source of funding established to support any core or supplemental program activity.

(j) Eligible program activities and projects. Only those activities and projects which result in the protection and restoration of the waters of the state shall be eligible for base or target grant funding. Eligible program activities include development and implementation of the core program and any supplemental program activity approved by KDHE.

(k) Eligible expenditures. Eligible expenditures of the base grant may include the reasonable and necessary costs of:

(1) Salary of personnel responsible for the execution of a program activity or project included in an approved local environmental protection plan;

(2) in-state and out-of-state travel, except that out-of-state travel shall require prior approval by KDHE unless it is incidental to the implementation of routine program activities included in an approved local environmental protection plan;

(3) capital equipment and supplies necessary to implement all requirements of an environmental code approved by the secretary of KDHE and adopted by resolution by the board of county commissioners, except that all capital equipment purchases greater than \$75.00 shall require prior written approval of KDHE. If a local entity withdraws from the local environmental protection program within three years of any approved capital equipment purchase, KDHE retains the authority to recover the capital equipment;

(4) purchasing, printing, production and dissemination of brochures, educational and technical assistance materials, or surveys;

(5) subcontracts with other governmental entities or private business for the purpose of

completing any portion of an approved local environmental protection plan, except that all subcontracts must receive prior approval by KDHE.

(1) Ineligible expenditures. Ineligible expenditures of the base grant include, but are not limited to, the following:

(1) Costs incurred prior to the beginning of the state fiscal year for which the base grant is awarded unless written approval for reimbursement of such costs is provided by KDHE;

(2) costs incurred after the end of the state fiscal year for which the base grant is awarded unless grant funds have been properly encumbered by the local entity;

(3) vehicle purchases; and

(4) construction costs of any facility or structure. (Authorized by and implementing K.S.A. 75-5657; effective Feb. 28, 1994.)

28-66-3. Target grants. (a) Upon KDHE's announcement of the availability of target grant funds, a target grant may be requested by a base grant recipient to conduct an approved objective for which the base grant is inadequate, except that the following requests shall be considered ineligible:

(1) Salary for permanent staff; and

(2) any activity or item specified in K.A.R. 28-66-2 (k).

(b) Application for target grants shall be made on forms provided by KDHE. Forms for target grants shall not be made available until all base grants have been awarded.

(c) All terms of the base grant agreement shall apply to the target grant. (Authorized by and implementing K.S.A. 75-5657; effective Feb. 28, 1994.)

28-66-4. Local environmental protection plan. (a) A local environmental protection plan shall be developed annually by the local entity and shall be submitted and approved by KDHE prior to any grant award. The local environmental protection plan shall contain the following information:

(1) A cover sheet signed by the chairman of the county board of health and the program director appointed by the county board of health. If the grant applicant is a local entity other than a county health department, the local environmental protection plan shall be signed by the chairman of the board of county commissioners, a board formed pursuant to K.S.A. 12-2901 et seq. or K.S.A. 12-2908, or other legally formed board which has

been approved by KDHE as appropriate for the purposes of implementing a local environmental protection plan;

(2) a description of existing local ordinances and services in each of the core program and supplemental program areas identified in K.A.R. 28-66-1 (b) and K.A.R. 28-66-1 (h) respectively, including the name, address and phone number of the local person responsible for implementing the ordinances and services described;

(3) a statement of each objective for which funding is being requested, and a workplan which identifies the sequence of steps that will be completed in order to accomplish the stated objective and an approximate date of completion for each step; and

(4) a detailed program budget which identifies the costs of program operation including, but not limited to, personnel, travel, supplies, capital expenditures, and subcontracts.

(b) KDHE may issue a base grant after it has been determined that the local environmental protection plan is consistent with the environmental protection strategy of the state water plan, K.S.A. 75-5657, and all other statutes, regulations, documents or guidelines relevant to sanitary or environmental codes, or both, subdivision water and wastewater management, solid waste, hazardous waste, public water supply protection, and nonpoint source pollution.

(c) KDHE may withhold the approval of a local environmental protection plan if it is determined that the local entity has not satisfactorily completed the approved objectives under the previous year's local environmental protection plan, except that the applicant shall be given the opportunity to demonstrate compelling circumstances which prohibited the completion.

(d) Any local environmental protection plan may be amended during the state fiscal year. Each proposed amendment shall be submitted to KDHE in writing and KDHE shall provide written approval of the amendment. (Authorized by and implementing K.S.A. 75-5657; effective Feb. 28, 1994.)

Article 67.—HEALTH CARE DATABASE

28-67-1. Definitions. For purposes of the regulations in this article, the following words, terms and phrases are hereby defined as follows:

(a) "Aggregate data" means data which is obtained by combining like data in a manner which precludes specific identification of an individual.

(b) "Board" means the health care data governing board.

(c) "CHES" means the center for health and environmental statistics.

(d) "Compilation" means the arrangement of data collected by and furnished to the secretary acting under agreement with the secretary for release and dissemination to the public.

(e) "Fee fund" means the health care database fee fund created by K.S.A. 65-6804 and amendments thereto.

(f) "Health care data" means any data relating to health care, health status, including environmental factors, the health care system, costs and outcomes.

(g) "Health care information" means any health data that has been transformed from its raw form into a more general, less-technical form.

(h) "Health care provider" means any person, organization or entity that renders health care services as described in K.S.A. 65-6805 and amendments thereto.

(i) "Individual" means a single human being.

(j) "Patient or client" means an individual who receives any health care service.

(k) "Person" means any individual, association, partnership, corporation or other entity.

(l) "Primary data collection" means data that were previously unavailable for distribution to the public and are initially collected pursuant to this act.

(m) "Public domain data" means data that were previously collected and available to the public by another source.

(n) "Public health data" means data including epidemiological, health status and community health assessment data.

(o) "Public use data" means data that are available to the general public. This includes data available in electronic or any other form.

(p) "Record identifier" means a unique code generated and assigned to an individual record and used to identify that individual record among databases.

(q) "Secretary" means the secretary of the Kansas department of health and environment.

(r) "State agency" means any regents institution or department under the direction of a cabinet secretary, an elected official or regulatory board.

(s) "Third party payer" means any public or private payer of health care services and includes accident and sickness insurers, health maintenance organizations, health plans and alliances, nonprofit medical and hospital service organizations, and

fiscal intermediaries for government-funded programs. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-2. Health care database; information collected. Information regarding various health factors shall be obtained. The health factors shall include, but not be limited to:

(a) mortality and natality, including accidental causes of death;

(b) morbidity;

(c) health behavior;

(d) disability;

(e) health care costs and financing;

(f) health care human resources;

(g) health service utilization and availability;

(h) environmental contaminants;

(i) demographics;

(j) familial social and economic conditions affecting health status; and

(k) population-based health care outcomes. (Authorized by and implementing K.S.A. 65-6801, as amended by L. 1994, Ch. 90, sec. 2; effective Dec. 19, 1994.)

28-67-3. Health care data collection and submission. (a) Data shall be:

(1) collected and submitted under uniform parameters established by the secretary and approved by the board;

(2) obtained from existing data sources in the public and private sector, where available to minimize the imposition and cost of new reporting requirements;

(3) submitted by licensing boards and agencies, credentialing and registering agencies and health care providers on a schedule defined by the secretary and approved by the board;

(4) submitted by third party payers, on a calendar year basis, annually by July 1 of the following calendar year and shall:

(A) be derived from standard billing or data collection documents or their replacements; and

(B) include only information for services rendered in the calendar year; and adjustments made for 180 days after the close of the calendar year; and

(5) submitted in a manner that does not identify individuals except through the use of a record identifier established by the secretary and approved by the board; except for public domain data, where data may be submitted that includes identification of individuals.

(b) Special data collections.

(1) Special primary data collection and extrapolations may be used as an alternative to or to supplement collection of existing health data from health care providers. The use of primary data collection shall be approved by the board to the extent it can be shown that the information being requested is consistent with the act and will meet validity and quality standards established by the secretary and approved by the board.

(2) Data may also be collected by the secretary from third party payers and health care providers for the purposes of population-based health outcomes comparisons.

(c) The secretary may be delegated by the board the authority to carry out any of the responsibilities granted to the board under these regulations. (Authorized by and implementing K.S.A. 65-6805, as amended by L. 1994, Ch. 90, sec. 4; effective Dec. 19, 1994.)

28-67-4. Health care data release and re-release. (a) Data and information received by the secretary and maintained in the health care database shall be used for:

(1) health policy decisions;
 (2) health research;
 (3) consumer information; and
 (4) epidemiological and other public health functions necessary to protect and promote the health of the state.

(b) Public use data.

(1) Public use data shall be developed and compilation of data shall be made available for general distribution which shall not include:

(A) record identifiers;
 (B) social security numbers;
 (C) patient or client health insurance identification numbers; or
 (D) health care provider identifiers.

(2) The board shall review and approve the content and format of these public use data and compilation formats.

(3) The data and compilation shall be made public information and may be released on magnetic media or any other form.

(c) Special studies and analyses.

(1) Special studies and analyses may also be conducted by the secretary to:

(A) assist in health policy decision-making;
 (B) fulfill statutory mandates for health policy or public health purposes; or

(C) minimize the duplicate collection of similar data elements.

(2) Prior to the release of any special studies or analyses conducted by the secretary, the board shall review all products generated and approve those not mandated by statute.

(d) Persons or state agencies making requests for data or information from the database other than those from standard reports shall be required to respond to a set of questions developed by the secretary and approved by the board that defines the information needed, description of the project and the intentions for rerelease of the information. Any request which includes record identifiers, social security numbers, patient or client health insurance identification numbers or health care provider identifiers shall be specifically approved by the board. If the request indicates an appropriate use of the data according to the specifications in K.A.R. 28-67-4(a), the data shall be provided to the person making the request. The request shall be denied by the secretary if the request is not consistent with those specifications in K.A.R. 28-67-4(a). A written explanation for the denial shall be filed with the person making the request.

(e) Subject to K.S.A. 65-6804(d), when compilation and special studies are generated by the secretary which identify health care providers, the health care providers shall be provided a copy of the data referencing them and given the opportunity to submit written comments to the secretary. When comments are received by the secretary within 30 days of the postmark on the notification from the secretary, such comments received shall be released with the data.

(f) Data other than those provided in compilation, public domain and public use data, that includes record or health care provider identifiers may be released to persons or state agencies for research purposes. Any request for these data shall comply with K.A.R. 28-67-4(d) and be approved by the board. These data with record or health care provider identifiers shall not be rereleased by the person or state agency in any form with these identifiers that does not comply with K.A.R. 28-67-6 and approval of the board.

(g) Any person or state agency may apply to the secretary for data to be used in a research study. A research protocol shall be submitted which shall include, but not be limited to:

(1) a description of the proposed study;
 (2) the purpose of the study;

(3) a description of the data elements needed for the study;

(4) a description of the information medium or format requested;

(5) where applicable, a statement indicating whether the study protocol has been reviewed and approved by a human subjects review board;

(6) a description of data security procedures, including who shall have access to the data; and

(7) a description of the proposed use and release of the data.

(h) Any person or state agency requesting the data shall agree to the release, confidentiality, and security of data requirements in K.A.R. 28-67-4, K.A.R. 28-67-6 and K.A.R. 28-67-8.

(i) Prior to the release of a subset of data or compilation, a statement instructing the user or reader about the meaning and significance of the data and the restrictions about redisclosure of the information shall be included.

(j) A data provider may obtain data it has submitted to the database as well as aggregate data. A data provider shall not obtain data submitted by another data provider without approval from that provider. Agreement to grant access to data submitted by another provider shall be filed in writing with the secretary.

(k) Unauthorized use of health care data obtained or collected under K.S.A. 65-6805 and amendments thereto by any person or state agency shall result in termination of system access and no further provision of data.

(l) The board may delegate the secretary the authority to carry out any of the responsibilities granted to the board under these regulations. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-5. Electronic access to public use data. (a) Persons or state agencies may be granted electronic access to public use data. Definitions of allowable access for data submitted to the database shall be established by the secretary and approved by the board.

(b) All persons or state agencies requesting electronic access to public use data shall complete an application established by the secretary and approved by the board that describes the security procedures to be used to safeguard the data provided according to K.A.R. 28-67-6 and K.A.R. 28-67-8. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-6. Confidentiality of the health care database. (a) Data or information that in any manner identifies an individual shall not be released. Researchers demonstrating the need for data containing record identifiers or names of health care providers shall be subject to the release, confidentiality and security requirements pursuant to K.A.R. 28-67-4, K.A.R. 28-67-6, and K.A.R. 28-67-8 and approval of the board.

(b) Any information generated from manipulations of data provided by the database shall be subject to release, confidentiality and security requirements pursuant to K.A.R. 28-67-4, K.A.R. 28-67-6 and K.A.R. 28-67-8.

(c) The individual forms, computer tapes or other forms of data collected by and furnished to the database shall not be available to the public. Special reports prepared for any data requester shall not be made public if the report identifies an individual.

(d) Public domain data obtained for the health care database may be made public through compilation and as public use data in a manner that identifies health care providers.

(e) Primary data collected which identify individuals shall be kept confidential and shall not be made public. Individual data associated with patient numbers, social security numbers and patient or client health care coverage identification numbers, or any other data that can identify individuals shall be kept confidential and shall not be made public. Any release of primary data shall be subject to K.A.R. 28-67-4.

(f) Primary data collected that identifies health care providers shall be kept confidential and shall not be made public except that public health data which identifies health care providers may be released. Release of these data shall be subject to K.A.R. 28-67-4.

(g) In this subsection, "small number" means any number that is not large enough to ensure that the identity of individuals and health care providers is protected. Any data element category which contains small numbers shall be aggregated using procedures established by the secretary. The procedures shall follow commonly accepted statistical methodology. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-7. Fees established. (a) Routine compilations produced by the secretary shall be made available to state agencies, health care pro-

viders, purchasers, employers, consumers and other interested parties. A fee sufficient to recover the costs of production or duplication may be charged.

(b) Requests for non-routine compilation requiring special analyses shall be billed under contract between the requester and the secretary to include the hourly rate of the analyst or analysts plus all computer, printing and other costs. State agencies asking for data solely for the purposes of analysis may be exempt.

(c) Compilation of data made available on computer tape or other electronic media shall include the cost of the magnetic tape, diskette, or other electronic media.

(d) Providers of data, board members and interested parties shall receive one free copy of the secretary's routine annual and quarterly compilation.

(e) Persons and state agencies requesting electronic access to public use data may be charged a monthly fee for that access.

(f) Providers contributing data to the system may be charged reduced rates for special reports not to exceed seventy-five percent of the fees charged to the public.

(g) The secretary, on behalf of the health care database and as chairperson of the board, shall reserve the right to request a portion of revenues generated from use of data provided to any person that is above the cost of production of products.

(h) All fees collected pursuant to K.A.R. 28-67-7 shall be deposited in the health care database fee fund. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-8. Record security. (a) All staff engaged in the collection, handling, and dissemination of health care data shall be informed of the responsibility to protect the data and the consequences of failure to do so. When employees are hired, each employee shall be instructed on the current procedures used to assure the security and confidentiality of the data. A copy of the confidentiality policy shall be provided to all personnel and a statement of responsibility for data confidentiality shall be explained as a condition of employment.

(b) Employees shall be held accountable for the appropriate use of individual data and for safeguarding the information in their possession. Confidential data may be used only for purposes

reviewed and approved by the secretary. Any unauthorized use of health care data from the database shall be strictly prohibited and may subject an employee to termination.

(c) Access to the database shall be restricted to those who specifically require access in order to perform their assigned duties. Access policies and staff members needing to access the database shall be established by the secretary.

(d) Supervisors shall be responsible for maintaining the security for data in the area of their responsibility. Persons or state agencies engaged in the collection, handling, and dissemination of health care data shall develop procedures to govern the release of information. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-9. System security. (a) All health care data shall be maintained on computer systems administered by CHES. A password system shall be used to limit access to computer files. Passwords shall be changed on a schedule determined by CHES staff, and an individual account shall be deleted whenever a staff member terminates employment or is no longer authorized access to the system.

(b) Only CHES staff shall be authorized to load data tapes and install software and file servers. All software shall be checked for computer viruses before being installed.

(c) General access to the central computer area shall be limited to normal work hours only. Access shall be restricted to CHES staff at all other times unless an individual obtains authorization to access the computer area.

(d) Network tape backups shall be stored onsite in a secure fire retardant location. Additional copies of software, documentation, and backups shall be stored at a secure, off-site location.

(e) Non-Kansas department of health and environment staff shall set up a CHES user account in order to access the health care information system. Passwords shall only be issued to non-Kansas department of health and environment users if they are under contract to Kansas department of health and environment or under the terms of a data sharing agreement. Unauthorized use of health care data by any other person or governmental subdivision granted access to the database shall result in termination of system access and no further provision of data.

(f) Network backups shall be done weekly and at the end of each month. Two copies of the

monthly backup tape shall be produced. All network files shall be checked for computer viruses before backup. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-10. Eligible contractors. (a) A contractor may be designated to provide data processing services for the collection of health care information. The contractor may be a public or private organization. Eligible contractors shall provide to the secretary assurances that there are no conflicts of interest.

(b) Persons who shall not be contractors include, but shall not be limited to:

(1) a major purchaser, payer or provider of health care services in Kansas;

(2) a subcontractor of an organization in K.A.R. 28-67-10 (b)(1), except those commissioned to perform only data processing functions;

(3) a subsidiary or affiliate of an organization in K.A.R. 28-67-10 (b)(1) in which a controlling interest is held and may be exercised by that organization either independently or in concert with any other organization in K.A.R. 28-67-10 (b)(1); or

(4) an association of major purchasers, payers or providers of health care services.

(c) State agencies are exempt from the requirement under subsection (b) of this regulation regarding eligibility to contract and may offer a bid if the secretary decides to bid the contract for services.

(d) The contractor may be granted the authority to examine confidential materials and perform other functions authorized by the secretary and approved by the board. The contractor shall comply with all confidentiality and record security requirements pursuant to K.A.R. 28-67-6 and K.A.R. 28-67-8. The release of confidential information by the contractor shall constitute grounds for the secretary to terminate any agreement between the contractor and the secretary. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-11. Cooperative agreements. (a) Where the need for cooperative agreements and memoranda of understanding facilitate the cost-effectiveness of health care data collection, cooperative agreements and memoranda of understanding may be established by the secretary with organizations described in K.A.R. 28-67-10 (b).

(b) Organizations entering cooperative agreements and establishing memoranda of understanding shall provide the secretary assurances that the data will be collected and utilized for their intended purpose only.

(c) Organizations entering cooperative agreements and establishing memoranda of understanding shall be subject to the confidentiality and record security requirements in K.A.R. 28-67-6 and K.A.R. 28-67-8. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

28-67-12. Data validation. (a) All data submitted to the health care database shall be evaluated for accuracy and standardization.

(b) Any inconsistencies and non-standard reporting of data submitted to the database shall be documented and reported to the providers of the data. Data providers shall be given 30 days to reconcile the inaccuracies or inconsistencies identified by the secretary.

(c) Comments provided to the secretary pursuant to K.A.R. 28-67-4 (e) may be used to reconcile any inaccuracies or inconsistencies identified by the data provider. (Authorized by and implementing K.S.A. 65-6804, as amended by L. 1994, Ch. 90, sec. 3; effective Dec. 19, 1994.)

Article 68.—KANSAS DRYCLEANER ENVIRONMENTAL RESPONSE ACT

28-68-1. Definitions. For the purposes of K.A.R. 28-68-1 through K.A.R. 28-68-10, the following terms shall be defined as follows. (a) “Applicant” means any person or governmental entity that applies to the dry-cleaning facility release trust fund.

(b) “Contaminated dry-cleaning site” has the meaning specified in K.S.A. 65-34,148, and amendments thereto.

(c) “Dry-cleaning waste” means waste, including dry-cleaning wastewater, that is generated at a dry-cleaning facility and that contains dry-cleaning solvent.

(d) “Dry-cleaning wastewater” means separator water and all other water that is generated during the dry-cleaning process and contains dry-cleaning solvents.

(e) “Existing dry-cleaning facility” means a dry-cleaning facility that was in operation on or before January 3, 1997.

(f) “Floor drain” means any opening that is less than three inches above the floor surface and leads

to a septic tank, storage tank, sanitary sewer, storm sewer, or soils or waters of the state. An opening sealed with a removable seal that prevents dry-cleaning solvent and dry-cleaning wastewater from entering the opening shall not be considered a floor drain.

(g) "Hazardous waste" has the meaning specified in 40 C.F.R. part 261, subparts C and D, as in effect on July 1, 1999, and hereby adopted by reference.

(h) "New dry-cleaning facility" means a dry-cleaning facility that begins operation after January 3, 1997.

(i) "Operator" means any person who manages the daily activities or operations, or both, of a dry-cleaning facility.

(j) "Secondary containment structure" means a tank, tray, containment pallet, containment basin, a floor surface contained within a dike and the dike proper, or a similar structure that is designed to contain spills and leaks from dry-cleaning units, dry-cleaning solvent storage areas, or dry-cleaning waste storage areas. (Authorized by and implementing K.S.A. 1999 Supp. 65-34,143; effective Jan. 3, 1997; amended Dec. 22, 2000.)

28-68-2. Registration of facilities. (a) Each owner of any dry-cleaning facility shall annually submit to the department a separate registration for each operating dry-cleaning facility. Each registration shall be submitted on a form prepared by the department.

(b) Each owner of a new dry-cleaning facility shall submit a registration form not later than 30 days after operations begin.

(c) Each owner of any dry-cleaning facility shall submit a registration fee of \$100.00 with the registration form for each operating dry-cleaning facility. The registration fee shall cover a single calendar year. Registrations shall be submitted and fees paid on or before January 31, or the dry-cleaning facility shall be considered in violation of the Kansas dry cleaner environmental response act.

(d) Each owner of any dry-cleaning facility shall post the owner's registration number in a conspicuous location in the public area of each registered, operating dry-cleaning facility.

(e) If a change in ownership of an operating dry-cleaning facility occurs, the new owner shall submit a new registration form not later than 30 days after assuming ownership. (Authorized by K.S.A. 1999 Supp. 65-34,143; implementing

K.S.A. 1999 Supp. 65-34,145; effective Jan. 3, 1997; amended Dec. 22, 2000.)

28-68-3. Performance standards. (a) Storage and disposal of dry-cleaning wastes.

(1) Each owner or operator of a dry-cleaning facility that generates hazardous waste shall comply with the provisions specified in K.A.R. 28-31-1 through K.A.R. 28-31-4, with the following changes:

(A) Except as provided in paragraph (a)(2), the owner or operator of each dry-cleaning facility that is a small quantity generator as specified in K.A.R. 28-31-2(e), and that accumulates up to 25 kilograms of hazardous waste, shall treat the waste as follows:

(i) Either treat or dispose of the hazardous waste in an acceptable on-site facility, or ensure delivery to an off-site hazardous waste treatment, storage, or disposal facility, or to some other waste management facility approved by the department;

(ii) comply with 40 C.F.R. part 265, subpart I, as in effect on July 1, 1999 and hereby adopted by reference, except 265.176 and 265.178;

(iii) label or clearly mark each container and each tank in which hazardous waste is accumulated or stored with the words "Hazardous Waste"; and

(iv) clearly mark each container and each tank in which hazardous waste will be accumulated and stored for more than 72 hours with the date on which each period of accumulation begins. The date marking shall be in a place visible for inspection.

(B) Dry-cleaning wastewater shall not be stored at a dry-cleaning facility for more than 60 days.

(2) Each owner or operator of an existing dry-cleaning facility that is a small quantity generator and accumulates up to 25 kilograms of hazardous waste shall comply with paragraphs (a)(1)(A)(ii) through (a)(1)(A)(iv) of this regulation.

(b) Prohibition of the discharge of dry-cleaning solvents and waste.

(1) The owner or operator of a dry-cleaning facility shall not discharge dry-cleaning solvents, dry-cleaning wastewater, or both, either directly or indirectly, into any sanitary sewer, storm sewer, or septic tank, or to the soil or waters of the state. The owner or operator of a dry-cleaning facility shall not discharge dry-cleaning waste into any underground tank.

(2) The owner or operator of a dry-cleaning facility shall not locate floor drains within any

secondary containment structure required by paragraph (e)(1) of this regulation.

(c) The owner or operator of a dry-cleaning facility may evaporate dry-cleaning wastewater at the dry-cleaning facility at which it was generated if both of the following conditions are met:

(1) The evaporation unit is a heated unit or a nonthermal unit utilizing air atomization or misting, made of materials compatible with and impervious to the dry-cleaning wastewater being evaporated; and

(2) the dry-cleaning wastewater contains no free-phase dry-cleaning solvent. For the purposes of this paragraph, "free-phase dry-cleaning solvent" means dry-cleaning solvent that is not suspended or dissolved in the dry-cleaning wastewater.

(d) Air emission standards. Each owner or operator of a dry-cleaning facility using chlorinated dry-cleaning solvents shall comply with the provisions specified in K.A.R. 28-19-720, and K.A.R. 28-19-750 through K.A.R. 28-19-753.

(e) Dikes and secondary containment structures.

(1) Installation. Each owner or operator of a dry-cleaning facility shall install a dike or other secondary containment structure around each dry-cleaning unit and around each storage area for dry-cleaning solvent, dry-cleaning waste, or both. Each secondary containment structure shall be maintained in good condition.

(2) Construction materials.

(A) The materials used to construct each secondary containment structure shall be impervious to and compatible with the dry-cleaning solvents and dry-cleaning wastes used or stored within the secondary containment structure.

(B) For any dry-cleaning unit using chlorinated dry-cleaning solvents, and any storage area for chlorinated dry-cleaning solvents, chlorinated solvent dry-cleaning wastes, or both, materials other than epoxy or steel may be used for the construction of the secondary containment structure only upon approval by the department. Departmental approval for the use of a material other than epoxy or steel shall be granted upon demonstration to the department that the material is as compatible with and impervious to dry-cleaning solvent as epoxy or steel.

(C) For any dry-cleaning unit using petroleum dry-cleaning solvents, and any storage area for petroleum dry-cleaning solvents, petroleum dry-cleaning solvent wastes, or both, materials

other than epoxy, steel, or concrete may be used for the construction of the secondary containment structure only upon approval by the department. Departmental approval for the use of a material other than epoxy, steel, or concrete shall be granted upon demonstration to the department that the material is as compatible with and impervious to dry-cleaning solvent as epoxy, steel, or concrete.

(D) All sealant and all caulk used on each secondary containment structure shall be impervious to and compatible with the dry-cleaning solvent and dry-cleaning waste used or stored within the secondary containment structure.

(3) Storage capacity. Each secondary containment structure shall be capable of containing any leak, spill, or release of dry-cleaning solvents, dry-cleaning wastes, or both.

(4) Inspections. The owner or operator of each dry-cleaning facility shall inspect each secondary containment structure weekly.

(A) The owner or operator of each dry-cleaning facility shall repair each deficiency detected during an inspection not later than five calendar days after the deficiency is detected. The owner or operator may request an extension of this five-day time limit from the department.

(B) The owner or operator of each dry-cleaning facility shall keep a log of the following information and provide it to the department upon request:

(i) The dates of inspection for each secondary containment structure;

(ii) a brief description of each deficiency that is detected;

(iii) the date of repair of each deficiency; and

(iv) a brief description of each repair.

(C) Each inspection and repair log shall be kept at the dry-cleaning facility for not less than five years after the log has been completed.

(f) Delivery of solvents.

(1) Chlorinated dry-cleaning solvents. All chlorinated dry-cleaning solvents shall be delivered to dry-cleaning units and solvent storage containers by means of either of the following:

(A) A closed, direct-coupled delivery system; or

(B) a technology determined by the department to provide protection of human health and the environment equivalent to or greater than that provided by direct-coupled delivery systems.

(2) Petroleum-based solvent. All petroleum-based solvents shall be delivered to dry-cleaning units and solvent storage containers according to the requirements of K.A.R. 22-7-9.

(g) Each owner or operator of a new dry-cleaning facility shall comply with this regulation at the time operations begin and thereafter. (Authorized by and implementing K.S.A. 1999 Supp. 65-34,143; effective Jan. 3, 1997; amended May 8, 1998; amended Dec. 22, 2000.)

28-68-4. Removal of dry-cleaning solvents and dry-cleaning wastes from closed facilities. Each owner or operator of a dry-cleaning facility which has ceased operation for 45 continuous days shall remove all dry-cleaning solvents and dry-cleaning wastes from the dry-cleaning facility not later than 45 days after the last day of operation.

(a) Each owner or operator shall dispose of all dry-cleaning wastes in accordance with K.A.R. 28-68-3, subsection (a).

(b) Any owner or operator may request from the department a written extension of the 45-day time limit established in subsection (a). (Authorized by and implementing K.S.A. 1995 Supp. 65-34,143; effective Jan. 3, 1997.)

28-68-5. Application for ranking of contaminated dry-cleaning site. Any contaminated dry-cleaning site may be ranked by the department to establish priorities for fund expenditures based on information the department has at the department's disposal, information contained in an application to the department, or both. If an applicant desires to have a contaminated dry-cleaning site ranked that has not been ranked previously, the applicant shall submit to the department a completed, signed application on a form provided by the department.

(a) If the applicant is not the real property owner, the applicant shall provide proof that the real property owner has been notified of the application.

(b) If the property is leased, and the applicant is not the lessee, the applicant shall provide proof that the lessee has been notified of the application.

(c) The application shall contain the following information, as well as all other known information concerning environmental contamination at the contaminated dry-cleaning site;

(1) The applicant shall provide an analysis of one ground water sample which demonstrates that a release has occurred. The sample shall be taken as follows:

(A) from a water supply well;

(B) from a monitoring well;

(C) using hydraulic push probe sampling equipment; or

(D) using some other sample collection device approved by the department. Departmental approval for use of an alternate sampling device shall be granted upon demonstration that the alternate sampling device collects samples of quality equal to or greater than samples collected as described in paragraphs (A) through (C).

(E) The sample shall be collected and analyzed not more than one year prior to the day the application is received by the department. The analysis shall be performed by a laboratory which is certified for such analyses by the department. If the application is to accompany a request for reimbursement, as set forth in K.A.R. 28-68-7, the sample analysis indicating the highest level of contamination ever recorded at the site shall be submitted.

(F) With prior approval from the department, an analysis of a representative soil sample may be substituted for the groundwater sample analysis.

(2) Each applicant shall submit, if available, one of the following:

(A) a geologic well log or logs from at least one monitoring or supply well; or

(B) hydrogeologic information from the contaminated dry-cleaning site where the ground water sample or soil sample was collected.

(3) The applicant shall state the distance to the nearest known private domestic well, public water supply well, surface water, or other receptor.

(4) The applicant shall provide a description of the present use of the ground water in the area where the sample was collected.

(d) Any applicant may request that the department provide a written exemption from submittal of certain information set forth in subsection (c). An exemption may be granted by the department if the information:

(1) is not necessary for ranking; or

(2) is readily available to the department.

(e) The information set forth in subsection (c) shall be used by the department to rank the contaminated dry-cleaning site in relation to other contaminated dry-cleaning sites to aid in establishing priorities for fund expenditures as set forth in K.A.R. 28-68-8.

(f) The reasonable, direct costs incurred by the applicant to collect the information required by subsection (c) only shall be credited to payment of the deductible set forth in K.A.R. 28-68-6. On request by the department, the applicant shall

furnish invoices or other supporting information containing sufficient detail for the department to determine that the costs were incurred to collect the information and that the costs were paid.

(g) The completed application shall be reviewed and a determination of eligibility shall be made by the department.

(h) A written notice of the determination of eligibility shall be sent by the department to the applicant as soon as a determination is made. If the site is determined ineligible for the fund, the notice of the determination shall state the reason or reasons for ineligibility. (Authorized by and implementing K.S.A. 1995 Supp. 65-34,143; effective Jan. 3, 1997.)

28-68-6. Deductible payment. On initiation of corrective action by the department at a contaminated dry-cleaning site, the applicant shall pay to the department the applicable deductible, minus the reasonable, direct costs incurred by the applicant to collect the application information as specified in K.A.R. 28-68-5(f). The deductible shall be \$5,000.00 for each dry-cleaning facility that has contributed to the contamination of the contaminated dry-cleaning site. Under the conditions specified in K.S.A. 65-34,148, and amendments thereto, the owner of any property that includes an existing or former dry-cleaning facility may be responsible for up to 100% of the costs of corrective action attributable to the owner. (Authorized by K.S.A. 1999 Supp. 65-34,143; implementing K.S.A. 1999 Supp. 65-34,148; effective Jan. 3, 1997; amended Dec. 22, 2000.)

28-68-7. Reimbursement of corrective action costs. (a) Reimbursement. Any applicant may request reimbursement from the fund for the applicant's corrective action costs, minus the deductible set forth in K.S.A. 1995 Supp. 65-34,148, subsection (i), for work performed at a contaminated dry-cleaning site which is determined to be eligible for the fund.

(1) Reimbursable costs shall be limited to costs for corrective action approved by the department, including direct costs incurred by the applicant. Each applicant shall substantiate reimbursable costs with contractor and subcontractor invoices or other reasonably reliable documentation.

(2) For each contaminated dry-cleaning site, reimbursement for corrective action costs incurred prior to July 1, 1995, shall be limited to \$100,000.00, minus the applicable deductible.

(3) Reimbursement for corrective action costs incurred on or after July 1, 1995, for any contaminated dry-cleaning site shall be limited, in any year, to 10 percent of the fund's income for the previous fiscal year. The applicable deductible shall be subtracted from the first-year reimbursement.

(4) Each eligible site shall receive priority for reimbursement according to the ranking of the contaminated dry-cleaning sites set forth in K.A.R. 28-68-8, subsection (b).

(b) Application for reimbursement.

(1) If an application for ranking has not been submitted previously to the department, the applicant shall follow the application procedure set forth in K.A.R. 28-68-5.

(2) Each applicant shall submit a signed request for reimbursement to the department on a form prepared by the department.

(3) If the applicant is not the real property owner, the applicant shall provide proof that the real property owner has been notified of the request for reimbursement.

(4) If the property is leased, and the applicant is not the lessee, the applicant shall provide proof that the lessee has been notified of the request for reimbursement.

(5) Each request for reimbursement shall contain:

(A) a copy of the notice of eligibility from the department;

(B) the name and address of the entity or entities to receive the reimbursement;

(C) a copy of all work plans generated to perform the corrective action for which reimbursement is sought;

(D) a copy of all reports generated during the corrective action;

(E) a copy of the department approval documents for corrective action at the contaminated dry-cleaning site; and

(F) a copy of contractor and subcontractor invoices or other reasonably reliable documentation for work performed prior to July 1, 1995, and approved by the department.

(i) Each applicant shall provide invoices or other reasonable reliable documentation with sufficient detail and supporting information to document that the costs were incurred to perform work discussed in the work plans, corrective action plan, or other work approved by the department.

(ii) Each applicant shall be required to submit to the department copies of cancelled checks, if available, showing payment for the work.

(iii) If cancelled checks are not available, each applicant shall be required to submit to the department an affidavit of expenditures and supporting documentation showing that the costs were incurred and paid to perform work approved by the department. The form for the affidavit of expenditures shall be provided by the department. (Authorized by K.S.A. 1995 Supp. 65-34,143; implementing K.S.A. 1995 Supp. 65-34,148; effective Jan. 3, 1997.)

28-68-8. Prioritization of fund expenditure. Each work item approved by the department for contaminated dry-cleaning sites shall be prioritized to ensure that money from the fund is available for essential corrective action tasks.

(a) Priority shall be given to contaminated dry-cleaning sites requiring emergency action. Emergency status may be established by the department under any of the following conditions:

(1) when a public water supply well or one or more domestic wells, are contaminated, or are threatened with contamination levels above state or federal drinking water limits, and no alternative water source is readily available;

(2) when surface drinking water or a water supply intake is contaminated above acceptable limits, as defined by the department, or contamination is imminent, and no alternative water source is readily available; or

(3) when a high probability exists for direct human exposure to or contact with highly contaminated waste, soil, air, or water.

(b) Each contaminated dry-cleaning site not requiring emergency action shall be ranked by the department according to the risk to human health and the environment presented by the contaminants at the contaminated dry-cleaning site. Contaminated dry-cleaning sites for which an application is submitted for reimbursement of corrective action costs incurred prior to July 1, 1995 shall be ranked separately from other contaminated dry-cleaning sites.

(c) The appropriateness of corrective action alternatives for each contaminated dry-cleaning site shall be evaluated by the department according to the following criteria.

(1) Preference shall be given to the corrective action alternative which is most cost effective, considering both short-term and long-term costs, while adequately protecting human health and the environment.

(2) The incremental cost of the chosen correc-

tive action shall be justified and reasonably related to the incremental risk reduction benefits of the corrective action. (Authorized by and implementing K.S.A. 1995 Supp. 65-34,143; effective Jan. 3, 1997.)

28-68-9. Determining completion of corrective action. A determination of the level at which corrective action shall be considered complete shall be made by the department using the following criteria.

(a) The factors used in prioritizing fund expenditure as set forth in K.S.A. 1995 Supp. 65-34,143, section (d) shall be considered by the department.

(b) The characteristics of the contaminated dry-cleaning site shall be evaluated by the department.

(c) State and federal drinking water standards may be considered by the department in setting corrective action levels. A determination that corrective action levels less stringent than state water quality standards will apply at a contaminated dry-cleaning site may be made by the department based on:

(1) an evaluation or risk;

(2) the effectiveness of available technology; and

(3) the cost of implementation.

(d) Any other factors which the department considers relevant may be used in determining the level at which corrective action shall be considered complete. (Authorized by and implementing K.S.A. 1995 Supp. 65-34,143; effective Jan. 3, 1997.)

Article 70.—CANCER REGISTRY

28-70-1. Definitions. (a) “Adult care home” has the meaning specified in K.S.A. 39-923, and amendments thereto.

(b) “Cancer registry director” means the person at the university of Kansas medical center, department of preventive medicine and public health, who is authorized by the secretary to administer the operations of the cancer registry of the state of Kansas.

(c) “Clinic” means an establishment that meets the following conditions:

(1) Has an organized medical staff of one or more physicians;

(2) consists of a permanent facility that is equipped and operated primarily for the purpose of diagnosing and treating patients; and

(3) does not provide services or other accommodations for any patient to stay for more than 24 hours.

(d) “Confidential data” has the same meaning as in K.S.A. 65-1,168, and amendments thereto.

(e) “Hospice” means a public agency or private organization or subdivision of a public agency or private organization that is primarily engaged in providing care to terminally ill individuals.

(f) “Registry” means the cancer registry of the state of Kansas, as established by K.S.A. 65-1,169, and amendments thereto. (Authorized by and implementing K.S.A. 2004 Supp. 65-1,169; effective Feb. 27, 1998; amended Aug. 5, 2005.)

28-70-2. Reporting requirements. (a)(1) Each administrator of a hospital, an ambulatory surgery center, a radiology oncology center, or a pathology laboratory shall, within six months of the date of diagnosis, report to the registry each case of cancer diagnosed or treated, unless exempted under subsection (d).

(2) Each report shall provide all required information available in the medical or administrative records that are under the direct control of the reporting administrator. No administrator shall be required to contact the patient, the patient’s family, or another health care provider to obtain additional information not contained in the medical or administrative records.

(b) Each person who is either licensed to practice medicine and surgery or licensed to practice dentistry and who practices in a clinic or physician’s office and each administrator of a hospice or adult care home shall provide the following to the registry:

(1) If used to confirm each cancer diagnosis, a list of in-state and out-of-state pathologists, or pathology laboratories and dermatopathologists; and

(2) for each patient for whom a cancer diagnosis has been confirmed pathologically or clinically, a list that includes the name, social security number, date of birth, and cancer site. The social security number shall be used only for confirmation of patient identity.

(c) Upon receipt of any written request for information from the registry regarding a patient, each reporting party specified in subsection (a) or (b) shall provide the requested information that is contained in medical or administrative records under the direct control of the reporting party. The requested information may consist of either of the following:

(1) Any information specified in subsection (e), even if the patient’s cancer has not been diagnosed or treated by the hospice or adult care home or by

the health care provider or licensee specified in subsection (a) or (b); or

(2) annual follow-up information, including tumor recurrence and follow-up treatment.

(d) The reports specified in this regulation shall not be required for the following types of cancer:

(1) Squamous cell carcinoma of the skin, unless located on a lip of the face or in the genital area or unless spread beyond local tissues at the time of diagnosis;

(2) basal cell carcinoma of the skin, unless located on a lip of the face or in the genital areas or unless spread beyond local tissues at the time of diagnosis; and

(3) carcinoma in situ of the uterine cervix.

(e) Each report from any reporting party specified in subsection (a) or (b) shall include the following information, if available:

(1) Patient identifiers and demographics;

(2) cancer screening history;

(3) cancer diagnosis, including the cancer site and histology;

(4) personal and family history;

(5) vital status, including the date of death and cause of death, if applicable;

(6) cancer-related treatment information;

(7) follow-up information, including the date of last contact with the patient;

(8) third-party payer information; and

(9) risk factors for cancer.

(f) Each report to the registry shall be submitted in one of the following formats:

(1) American standard code for information interchange (ASCII) file in the North American association of central cancer registries (NAACCR) format;

(2) electronic or paper forms provided by the registry;

(3) any other format equivalent to any format specified in this subsection that is acceptable to the cancer registry director.

(g) All data transferred to the registry shall be secure and confidential.

(1) All paper data transferred to the registry shall be sealed in an envelope marked “CONFIDENTIAL” and addressed to the cancer registry director.

(2) Electronic data transfer shall be made by a secured electronic transmission, according to prior instructions from the cancer registry director. (Authorized by and implementing K.S.A. 65-1,169; effective Feb. 27, 1998; amended Aug. 5, 2005; amended Dec. 7, 2018.)

28-70-3. Use and access. (a) For purposes of ascertaining the accuracy and completeness of cancer data, the medical diagnosis of each person cared for by any health care provider or licensee specified in K.A.R. 28-70-2(a) or (b) by any hospice or adult care home and the medical or administrative records of any person with cancer may be reviewed by the cancer registry director. Each review shall be made by prearrangement with the appropriate administrator or licensee. Pursuant to K.S.A. 65-1,169 and amendments thereto, a copy of any death certificate may be requested by the cancer registry director from the secretary to ensure the completeness of cancer data and to achieve record closure.

(b) Each person who requests access to confidential registry data shall submit a written request to a review panel, as specified in K.S.A. 65-1,173, and amendments thereto. If the person meets the requirements specified in K.S.A. 65-1,172 and amendments thereto, the confidential data may be released by the review panel. (Authorized by K.S.A. 2004 Supp. 65-1,169; implementing K.S.A. 65-1,171, 65-1,172, and 65-1,173; effective Feb. 27, 1998; amended Aug. 5, 2005.)

28-70-4. Confidential data for follow-up patient studies. (a) For the purposes of this regulation, the following definitions shall apply:

(1) "Institutional review board" means an institutional review board established and conducted pursuant to 45 CFR 46.101 through CFR 46.117, as revised on October 1, 2008.

(2) "Person" shall mean a state university, a state agency, or a county health department.

(b) Each person with a proposal for a follow-up cancer study ("study") shall submit the proposal to each of the following for approval before the commencement of the study:

- (1) The person's institutional review board;
- (2) the department's health and environmental institutional review board;
- (3) the university of Kansas medical center's institutional review board; and
- (4) the cancer registry data release board.

(c) Each study not approved by each board specified in subsection (b) shall be returned to the person for revisions. Any unapproved study may be resubmitted to each board.

(d) After receiving the approvals required in subsection (b) and before commencing the study, the person proposing the study shall submit the

proposal for the study to the secretary or the secretary's designee for approval.

(e) Each person conducting an approved study shall reimburse the cancer registry for all costs pertaining to the retrieval of confidential data. The cancer registry shall be credited by the person on any publication or presentation when the cancer registry data is used.

(f) Before proceeding with each study, the cancer registry director shall obtain informed consent from each individual who is the subject of the data or from that individual's parent or legal guardian. The consent form shall accompany or follow the notice specified in subsection (g). Signing the consent form shall indicate that the individual has read and understands the information provided in the notice.

(g) The cancer registry director shall deliver a notice to each subject individual or the subject individual's parent or legal guardian. Each notice shall include the following information:

(1) All details of the study to be conducted, including the purpose, methodology, and public health benefit; and

(2) the following information:

(A) Participation in the study is voluntary;

(B) the method of data collection will be at the convenience of the subject individual. Data will be collected in writing, by telephone, or by personal interview; and

(C) the subject individual will be provided with a summary of the final report of the study. (Authorized by and implementing K.S.A. 2008 Supp. 65-1,172; effective June 12, 2009.)

Article 71.—VOLUNTARY CLEANUP AND PROPERTY REDEVELOPMENT PROGRAM

28-71-1. Definitions. In addition to the terms defined in K.S.A. 65-34,162 and amendments thereto, each of the following terms, as used in this article of the department's regulations, shall have the meaning specified in this regulation:

(a) "Anthropogenic levels" means concentrations of chemicals or substances that are present in the environment due to human activity.

(b) "Class one contamination" and "class I" mean that suspected or confirmed contamination exists on the property described in the application, but the property is not a source of the contamination.

(c) "Class two contamination" and "class II" mean that suspected or confirmed soil or ground-

water contamination, or both, resulting from operations that have occurred on the property is suspected or exists on or off the property described in the application, or both.

(d) “Days” means calendar days unless otherwise specified. Documents due on the weekend or a holiday shall be submitted on the first working day after the weekend or holiday.

(e) “Enforcement action” means an administrative or judicial claim made by a governmental agency pursuant to state, federal, or common law against the property described in the application, which enforcement action is based upon the contaminants to be cleaned up under the VCPRP.

(f) “Environmental site assessment” means an investigation of a property, performed in accordance with standard industry practices, that identifies and defines recognized environmental conditions at the property.

(g) “Environmental use control” has the meaning specified in K.S.A. 2016 Supp. 65-1,222, and amendments thereto.

(h) “Hazard index value” means the sum of more than one hazard quotient for multiple substances, multiple exposure pathways, or both.

(i) “Hazard quotient” means the ratio of a single substance exposure level over a specified time period to a reference dose for that substance derived from a similar exposure period.

(j) “Institutional control” means a legal mechanism that limits access to or use of property, or warns of a hazard, the purpose of which is to ensure the protection of human health and the environment.

(k) “Maximum contaminant level” and “MCL” have the meaning specified for “maximum contaminant level” in K.A.R. 28-16-28b.

(l) “Naturally occurring levels” means ambient concentrations of chemicals or substances present in the environment that are typical of background levels near the property subject to the voluntary agreement when not affected by the identified contamination source.

(m) “Nonresidential property” means any property that does not meet the definition of residential property.

(n) “Person” means an individual, firm, corporation, association, partnership, consortium, joint venture, commercial entity, state agency, unit of local government, school district, federal agency, tribal entity, interstate body, or other legal entity.

(o) “Potable water” has the meaning specified in K.A.R. 28-16-28b.

(p) “Remedial action” means those actions taken to address the effects of a release of a contaminant, so that it does not cause a significant risk to present or future public health or welfare, or to the environment.

(q) “Remediation” means the act of implementing, operating, and maintaining a remedial action.

(r) “Residential property” means any property currently used or proposed for use as one of the following:

(1) A residence or dwelling, including a house, apartment, mobile home, nursing home, or condominium; or

(2) a public use area, including a school, educational center, day care center, playground, unrestricted outdoor recreational area, or park.

(s) “Risk management plan” has the meaning specified in K.S.A. 2016 Supp. 65-34,176, and amendments thereto.

(t) “Voluntary cleanup and property redevelopment program” and “VCPRP” mean the implementation of the voluntary cleanup and property redevelopment act, as defined in K.S.A. 65-34,161 et seq. and amendments thereto, by the department.

(u) “Voluntary party” means an applicant whose property is determined by the secretary to be eligible for the voluntary cleanup and property redevelopment program. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,164, K.S.A. 65-34,165, K.S.A. 65-34,166, K.S.A. 2016 Supp. 65-34,167, K.S.A. 2016 Supp. 65-34,168, K.S.A. 2016 Supp. 65-34,169, and K.S.A. 65-34,172; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-2. Applicant. Each applicant shall include a person that has title, control, or access to the property described in the application and is one of the following:

(a) A person who owns the property;

(b) a person who operates a facility located on the property;

(c) a person who previously owned, operated, or otherwise controlled activities on the property;

(d) a prospective owner of the property;

(e) a prospective operator of a facility located on the property;

(f) a person or generator of hazardous or solid waste who by contract, agreement, or otherwise, directly or indirectly, arranged for the disposal of contaminants at the property;

(g) a person who legally controls the property; or

(h) any unit of government that acquired title or control of the property involuntarily through

bankruptcy, tax delinquency, abandonment, or other circumstances. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,164; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-3. Eligibility determination. (a) The property described in the application shall contain an actual, threatened, or suspected release of a contaminant or be impacted or threatened by contaminants from an off-property source.

(b) Properties that may be eligible for application to VCPRP shall include the following:

(1) Properties that have been assessed by the United States environmental protection agency, its contractors and agents, and the department, if the property meets the additional criteria required by K.S.A. 65-34,161 et seq., and amendments thereto, and this article of the department's regulations;

(2) contaminated properties that are currently under an existing department order or agreement, upon completion of the actions required by the department order or agreement, if the property meets the additional criteria required by K.S.A. 65-34,161 et seq., and amendments thereto. The determination of completion of the actions required by the order or agreement shall be made by the secretary;

(3) portions of a larger property that have or require a resource conservation and recovery act (RCRA) permit, but these portions do not require a permit in accordance with RCRA, which contains a corrective action component, as determined by the secretary, if the property meets the additional criteria required by K.S.A. 65-34,161 et seq., and amendments thereto;

(4) portions of a larger property that includes oil and gas activities regulated by the state corporation commission, but the specific portion is not regulated by the state corporation commission, if the property meets the additional criteria required by K.S.A. 65-34,161 et seq., and amendments thereto; and

(5) contaminated properties that are not statutorily excluded. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,164; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-4. Application process. (a) Each applicant shall submit to the department a complete application consisting of the following:

(1) An application form provided by the department;

(2) a nonrefundable application fee of \$200.00; and

(3) all documentation that supports the application, including environmental site assessments, investigation reports, or both.

(b) Determination of whether the property described in the application is eligible for participation in the VCPRP shall be made by the secretary pursuant to K.S.A. 65-34,161 et seq., and amendments thereto.

(c) The applicant shall submit a revised application package if the initial application is determined by the department to be incomplete.

(d) The applicant may submit an additional revised application package if the revised application is determined by the department to be incomplete. The applicant shall submit an additional application fee of \$200 with the additional revised application. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,164 and 65-34,165; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-5. Classification determination. (a) Each applicant shall include the following documentation for consideration by the secretary in determining placement of the property described in the application into one of two contamination classes, as defined in K.A.R. 28-71-1:

(1) The application and associated documentation that supports the voluntary party's application;

(2) review of available technical bulletins and scientific documents describing the geology and geohydrology of the property and surrounding area; and

(3) scientific information relating to the toxicity, mobility, persistence, and other characteristics of the contaminants suspected or identified at a property.

(b) Any applicant may provide additional information to support a reclassification of property subject to the voluntary agreement. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,165 and 65-34,166; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-6. Voluntary agreement. (a) Upon the secretary's approval of the application for the voluntary cleanup and property redevelopment program, the voluntary party shall enter into a voluntary agreement with the secretary. The voluntary agreement shall be developed by the department and submitted to the voluntary party for signature. The voluntary agreement shall specify

all of the terms and conditions for implementation of the work anticipated in the VCPRP.

(b) Oversight, management, and review activities pertaining to the property shall not be commenced by the department until the voluntary agreement is signed by both the secretary and the voluntary party.

(c) The voluntary agreement shall require the voluntary party to deposit one of the following with the department, as applicable:

- (1) For class I, an initial amount of \$2,000; or
- (2) for class II, an initial amount not to exceed \$5,000.

(d) The voluntary agreement shall require the voluntary party to provide the department with access to the property at all reasonable times, upon reasonable notice to the voluntary party during all the activities conducted under K.S.A. 65-34,161 et seq., and amendments thereto. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,165; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-7. Initial deposit and reimbursement. (a) The initial deposit made by the voluntary party shall be based on the contamination classification of the property described in the application. The voluntary party shall submit quarterly payments upon billing for direct and indirect costs to maintain the voluntary party's account at a balance of at least \$1,000 for class I and at least \$2,000 for class II.

(b) The voluntary party shall be subject to oversight performed by the department or its contractors. This oversight shall include the following:

- (1) The review of documents, studies, and test results;
- (2) collection of split samples, laboratory analysis, and sampling supplies;
- (3) travel;
- (4) per diem;
- (5) verification activities; and
- (6) associated indirect costs. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,165; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-8. Environmental site assessments. (a) Each environmental site assessment shall be prepared by an individual who possesses the education, experience, or licensure sufficient to prepare a competent environmental site assessment.

(b) Each environmental site assessment shall include the following information regarding the

property either described in the application or subject to a voluntary agreement:

- (1) The legal description and a map identifying the location, boundaries, and size of the property;
- (2) the physical characteristics of the property and areas contiguous to the property, including the location of any surface water bodies and groundwater aquifers;
- (3) the location of any water wells located on the property or in an area within a one-half mile radius of the property and a description of the use of the those wells;
- (4) the operational history of the property, based upon the best efforts of the applicant and the current use of areas in the vicinity of the property;
- (5) the present and proposed uses of the property;
- (6) information concerning the nature and extent of any contamination;
- (7) information on releases of contaminants that have occurred at the property, including any environmental impact on areas in the vicinity of the property;
- (8) any sampling results, evidence, or other data that characterizes the soil, groundwater, or surface water on the property; and
- (9) a description of the human and environmental exposures to contamination at the property, based upon current use and any future use proposed by the property owner as approved by the local zoning authority. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,165 and 65-34,166; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-9. Voluntary cleanup work plans and reports. (a) Upon signature of the voluntary agreement by the voluntary party and the secretary, the voluntary party shall submit each environmental site assessment, investigation report, or both, for review by the department to determine whether the following objectives have been met:

- (1) The sources for contaminants have been adequately identified and investigated.
- (2) The vertical and horizontal extent of contaminants has been determined.
- (3) The human health and environmental receptors have been identified.
- (4) The potential risks and impacts to receptors have been evaluated.
- (5) Quality assurance and quality control have been maintained.
- (6) The work has been performed in accordance with standard industry practices.

(b) If the secretary determines that further investigation is necessary to meet the objectives specified in subsection (a), the voluntary party shall submit a work plan to the department for review and approval. After approval of the work plan by the secretary, the following actions shall occur:

(1) The voluntary party shall implement the approved work plan for investigation.

(2) The voluntary party shall document and submit the results of the investigation in a report, which shall be submitted to the department for review.

(c) If the secretary determines that remediation is necessary to mitigate the risks posed by the property subject to the voluntary agreement, the voluntary party shall submit a proposal for remediation to the department for review and approval. The proposal for remediation shall meet the following requirements:

(1) Be protective of human health and the environment for documented present and proposed future land uses;

(2) meet applicable state standards or acceptable contaminant concentrations as determined by a risk analysis that evaluates the property subject to the voluntary agreement and surrounding properties as a whole and that is approved by the secretary;

(3) evaluate remedial alternatives that are proven reliable and are economically and technically feasible by completing the following activities:

(A) Comparing at least two alternatives, not including the “no action” alternative; and

(B) documenting the ability of each remedial alternative to attain a degree of cleanup and control of contaminants established by the department; and

(4) provide a description and evaluation of the voluntary party’s proposed remedial alternative.

(d) If the secretary approves the proposal for remediation, the applicant shall submit a cleanup plan. The cleanup plan shall include the following:

(1) A description of all tasks necessary to implement the preferred remedial alternative;

(2) preliminary or final design plans and specifications of the preferred remedial alternative;

(3) a description of all necessary easements and permits required for implementation of the cleanup;

(4) an implementation schedule;

(5) a plan to monitor the effectiveness of the cleanup during implementation; and

(6) a verification plan to document that clean-

up objectives have been achieved, which shall include sampling to be performed by the voluntary party, department, or both, as determined by the secretary. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 65-34,166, K.S.A. 2016 Supp. 65-34,167, and K.S.A. 2016 Supp. 65-34,168; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-10. “No further action” determination. (a) For the purposes of the regulations in this article of the department’s regulations, the term “no further action” determination shall mean that the secretary has determined, pursuant to K.S.A. 65-34,161 et seq. and amendments thereto, that no further action is necessary at the property subject to the voluntary agreement.

(b) Each voluntary party shall demonstrate to the department that the following conditions have been met to receive a “no further action” determination for class one contamination:

(1) The owner or operator of the property, or both parties, submit a complete application to the department, including environmental site assessments and investigation reports.

(2) A determination that the contamination on the property resulted from an off-property source is made by the secretary.

(3) A determination that there is no on-site source of contamination, including soil contamination, is made by the secretary.

(4) The owner or operator of the property, or both parties, document that the past and current use of the property did not contribute to the contamination of soils, surface water, or groundwater.

(c) Each voluntary party shall demonstrate to the department that the following conditions have been met to receive a “no further action” determination for class two contamination:

(1) No contamination was detected.

(2) Contamination was detected, and following review of the environmental site assessment, investigation reports, and remediation reports, or a combination of these, the secretary has determined that contamination levels do not present significant risk to human health and the environment and, based on those levels, are less than applicable federal or state standards or site-specific cleanup levels as specified in K.A.R. 28-71-11.

(3) Contamination does not exceed acceptable contaminant concentrations as determined by the secretary in a site-specific qualitative risk analysis that evaluates the property and surrounding properties as a whole.

(d) Each voluntary party shall demonstrate to the department that the following conditions have been met to receive a “no further action” determination for class two contamination with conditions:

(1) Site conditions described in paragraph (c)(2) or (c)(3) have been met.

(2) Secretary-approved controls, including institutional controls, environmental use controls, a risk management plan, or a combination of these restricting the use of a property, are in place to ensure continued protection of human health and the environment. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 2016 Supp. 65-34,169; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-11. Remedial standards and remedial actions. (a) All remedial alternatives performed by the voluntary party and approved by the secretary shall attain a degree of cleanup, control, or both, of contaminants that ensures protection of human health and the environment.

(b) All remedial actions to restore the environment to conditions before its altered state shall be considered by the department if protection of human health and the environment is maintained and the movement of contaminants is controlled.

(c) The voluntary party shall propose any one of the following approaches to determine cleanup levels for the property:

(1) Comparison to background levels;

(2) comparison to department-established risk-based levels;

(3) comparison to a site-specific, risk-based quantitative analysis conducted by the voluntary party or the department, based on formulas, exposure parameters, and land-use scenarios; or

(4) other risk analysis methods approved by the secretary.

(d) Responsibility for reviewing and approving the approach and final selection of cleanup levels for property subject to the voluntary agreement shall rest with the secretary.

(1) The selection of cleanup levels shall be based on the present and proposed future uses of the property and surrounding properties.

(2) Land use shall include two general categories: residential property and nonresidential property.

(3) Multiple media, exposure pathways, and contaminants shall be taken into account during the determination of cleanup levels.

(4) Existing and applicable federal or state standards shall be considered by the department during the determination of cleanup levels.

(e) Secretary-approved controls, including the controls specified in K.A.R. 28-71-10, may be required by the department to ensure continued protection of human health and the environment.

(1) Approved controls for property subject to the voluntary agreement shall not be proposed as a substitute for evaluating remedial actions that would otherwise be technically and economically practicable.

(2) Approved controls for property subject to the voluntary agreement shall be considered as remedial actions.

(f) Soil cleanup levels and the depths to which the cleanup levels shall apply shall be based on human exposure, the present and proposed uses of the property, the depth of the contamination, and the potential impact to groundwater, surface water, or both, and any other risks posed by the soil contamination to human health and the environment.

(g) Soil and groundwater property-specific cleanup levels may be determined by the secretary for contaminants for which there is insufficient toxicological evidence to support a regulatory standard for risk-based cleanup levels or for non-toxic contaminants for which cleanup is required as a result of other undesirable characteristics of those contaminants. The soil levels shall be based on the following:

(1) The ability of the impacted soil to support vegetation representative of unimpacted properties in the vicinity of property subject to the voluntary agreement; and

(2) the potential of the contaminant to impact and degrade groundwater, surface water, or both, through infiltration or runoff.

(h) If there are multiple contaminants in the soil, the cleanup level of each contaminant shall not allow the cumulative risks posed by the contaminants to exceed a cancer risk level of 1×10^{-4} , one in 10,000, or a hazard index value of 1.0.

(i) Soil cleanup levels shall ensure that migration of contaminants in the soil shall not cause the cleanup levels established for groundwater, surface water, or both, to be exceeded.

(j) Groundwater cleanup levels shall be based on the actual and most probable use of the groundwater considering present and future uses. The most probable use of the groundwater is for a potable water source, unless demonstrat-

ed otherwise by the voluntary party and approved by the secretary.

(k) Groundwater potentially or actually used as a potable water source and impacted by the site contamination shall require maximum protection in determining cleanup levels.

(l) Remedial action to restore contaminated groundwater shall, at a minimum, prevent additional degradation and migration.

(m) When the need for cleanup of a contaminant can be predicated on characteristics of that contaminant other than toxicity, including the contribution of an undesirable taste or odor, or both, the site-specific cleanup levels as determined by the department or secondary maximum contaminant levels (MCLs) may be used as cleanup levels for contaminants for which insufficient toxicological evidence has been gathered to support a regulatory standard for risk-based cleanup levels or nontoxic contaminants. These levels shall be based on the aesthetic quality and usability of the groundwater, surface water, or both, for the present and proposed future use.

(n) Surface water cleanup levels shall meet the Kansas surface water quality standards, as specified in K.A.R. 28-16-28e. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 2016 Supp. 65-34,167 and K.S.A. 2016 Supp. 65-34,168; effective June 26, 1998; amended Sept. 29, 2017.)

28-71-12. Public notification and participation. (a) The public shall have the opportunity during the public comment period to submit to the department written comments regarding the cleanup plan.

(b) The voluntary party or a member of the public may request a meeting following the 15-day public comment period.

(1) The public information meeting shall provide the public with information about relevant activities at the property associated with the voluntary cleanup and property redevelopment program. Public information meetings shall be attended by a member of the department and the voluntary party or designated representative, or both.

(2) A notice to the city, the county, or both, of the public information meeting shall be provided by the department. (Authorized by K.S.A. 65-34,163; implementing K.S.A. 2016 Supp. 65-34,168; effective June 26, 1998; amended Sept. 29, 2017.)

Article 72.—RESIDENTIAL CHILDHOOD LEAD POISONING PREVENTION PROGRAM

28-72-1. (Authorized by and implementing K.S.A. 2001 Supp. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; revoked April 9, 2010.)

28-72-1a. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Abatement project reinspection fee” means the sum of money assessed to a KDHE-licensed lead activity firm by KDHE when KDHE is unable to inspect an abatement project due to the fault of the lead activity firm or its personnel.

(b) “Accreditation” means approval by KDHE of a training provider for a training course to train individuals for lead-based paint activities.

(c) “Accredited course” means a course that has been approved by the department for the training of lead professionals.

(d) “Act” means the residential childhood lead poisoning prevention act, and amendments thereto.

(e) “Adequate quality control” means a plan or design that ensures the authenticity, integrity, and accuracy of samples, including dust, soil, and paint chip or paint film samples. Adequate quality control shall also include provisions for representative sampling.

(f) “Audit” means the monitoring by KDHE of a certified individual, a licensed lead activity firm, or an accredited training provider to ensure compliance with the act and this article. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1c. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Certified lead professional” means a person who is certified by the secretary as a lead inspector, elevated blood-lead level (EBL) investigator, lead abatement supervisor, lead abatement worker, project designer, or risk assessor.

(b) “Child-occupied facility” means a building, or portion of a building, constructed before 1978, that is visited regularly by the same child who is under six years of age on at least two different days within any calendar week, Sunday through Satur-

day, if each day's visit lasts at least three hours, the combined weekly visits last at least six hours, and the combined annual visits last at least 60 hours. This term may include residences, day care centers, preschools, and kindergarten classrooms. Child-occupied facilities may be located in target housing or in public or commercial buildings. For common areas in public or commercial buildings that contain child-occupied facilities, the child-occupied facility encompasses only those common areas that are routinely used by children under the age of six, including restrooms and cafeterias.

(c) "Classroom training" means training devoted to lecture, learning activities, small group activities, demonstrations, evaluations, or any combination of these educational activities.

(d) "Clearance levels" means the following values indicating the maximum amount of lead permitted in dust on a surface following completion of each abatement activity or lead hazard control:

- (1) 40 micrograms per square foot on floors;
- (2) 250 micrograms per square foot on window-sills; and
- (3) 400 micrograms per square foot on window troughs.

(e) "Common area" means the portion of a building that is generally accessible to all occupants. This term may include the following:

- (1) Hallways;
- (2) stairways;
- (3) laundry and recreational rooms;
- (4) playgrounds;
- (5) community centers;
- (6) garages;
- (7) boundary fences; and
- (8) porches.

(f) "Component" and "building component" mean building construction products manufactured independently to be joined with other building elements to create specific architectural design or structural elements or to act as fixtures of a building, residential dwelling, or child-occupied facility. Components are distinguished from each other by form, function, and location. These terms shall include the following:

- (1) Interior components, including the following:
 - (A) Ceilings;
 - (B) crown moldings;
 - (C) walls;
 - (D) chair rails;
 - (E) doors and door trim;
 - (F) floors;

- (G) fireplaces;
- (H) radiators and other heating units;
- (I) shelves and shelf supports;
- (J) stair treads, risers, and stringers; newel posts; railing caps; and balustrades;
- (K) windows and trim, including sashes, window heads, jambs, sills, stools, and troughs;
- (L) built-in cabinets;
- (M) columns and beams;
- (N) bathroom vanities;
- (O) countertops;
- (P) air conditioners; and
- (Q) any exposed piping or ductwork; and
- (R) any product or device affixed to an interior surface of a dwelling; and

(2) exterior components, including the following:

- (A) Painted roofing and chimneys;
- (B) flashing, gutters, and downspouts;
- (C) ceilings;
- (D) soffits and fascias;
- (E) rake boards, cornerboards, and bulkheads;
- (F) doors and door trim;
- (G) fences;
- (H) floors;
- (I) joists;
- (J) latticework;
- (K) railings and railing caps;
- (L) siding;
- (M) handrails;
- (N) stair risers, treads, and stringers;
- (O) columns and balustrades;
- (P) windowsills and window stools, troughs, casing, sashes, and wells; and
- (Q) air conditioners.

(g) "Containment" means a process to protect workers, residents, and the environment by controlling exposures to the lead-contaminated fumes, vapors, mist, dust, and debris created during lead abatement or lead hazard control.

(h) "Course agenda" means an outline of the main topics to be covered during a training course, including the time allotted to teach each topic.

(i) "Course exam blueprint" means written documentation identifying the proportion of course exam questions devoted to each major topic in the course curriculum.

(j) "Course test" means an evaluation of the overall effectiveness of the training, which shall test each trainee's knowledge and retention of the topics covered during the course. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1d. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Department” means the Kansas department of health and environment.

(b) “Deteriorated paint” means paint that is cracking, flaking, chipping, chalking, peeling, or otherwise separating from the substrate of a building component.

(c) “Discipline” means one of the specific types or categories of lead-based paint activities identified in the act and this article in which individuals may receive training from accredited courses and become certified by the secretary.

(d) “Distinct painting history” means the application history over time, as indicated by the visual appearance or a record of application, of paint or other surface coatings to a component or room.

(e) “Documented methodologies” means the methods or protocols used to sample for the presence of lead in paint, dust, and soil. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1e. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Elevated blood lead level (EBL) child” and “EBL child” mean any child who has an excessive absorption of lead with a confirmed concentration of lead in whole blood of 10 µg (micrograms) of lead per deciliter of whole blood, as specified in K.A.R. 28-1-18.

(b) “Encapsulant” means a substance that forms a barrier between lead-based paint and the environment using a liquid-applied coating, with or without reinforcement materials, or an adhesively bonded covering material.

(c) “Encapsulation” means the application of an encapsulant.

(d) “Enclosure” has the meaning specified in 40 CFR 745.223, as adopted in K.A.R. 28-72-2.

(e) “EPA” means the United States environmental protection agency. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1g. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

“Guest instructor” means an individual who is designated by the training manager or principal

instructor and who provides instruction specific to the lectures, hands-on work activities, or work practice components of a course. Each guest instructor shall be directly employed and monetarily compensated by the accredited training provider. A guest instructor shall not teach more than seven calendar days each quarter. Each guest instructor shall be KDHE-certified in the training course or in an associated advanced training course for which the guest instructor will be providing instruction. If a guest instructor is utilized, KDHE shall be notified at least 24 hours before the training course begins. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1h. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Hands-on skills assessment” means an evaluation of the effectiveness of the hands-on training that tests the ability of the trainees to demonstrate satisfactory performance and understanding of work practices and procedures as well as any other skills demonstrated in the course.

(b) “Hands-on training” means training that involves the actual practice of a procedure or the use of equipment, or both.

(c) “Hazardous waste” means any waste as defined in K.S.A. 65-3430, and amendments thereto.

(d) “HEPA vacuum” has the meaning specified in 40 CFR 745.83, as adopted in K.A.R. 28-72-2. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1i. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

“Interim controls” means a set of repair or maintenance activities designed to last less than 20 years that temporarily reduce human exposure or likely exposure to lead hazards, including the following:

- (a) Repairing deteriorated lead-based paint;
- (b) specialized cleaning;
- (c) maintenance;
- (d) painting;
- (e) temporary containment;
- (f) ongoing monitoring of lead hazards or potential hazards; and
- (g) the establishment and operation of management and resident education programs. (Au-

thorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1k. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

“KDHE” means the Kansas department of health and environment. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1l. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Large-scale abatement project” means lead abatement for 10 or more residential dwellings or multifamily dwellings for 10 or more units.

(b) “Lead abatement” means any repair or maintenance activity or set of activities designed to last at least 20 years or to permanently eliminate lead-based paint hazards in a residential dwelling, child-occupied facility, or other structure designated by the secretary.

(1) Lead abatement shall include the following:

(A) The removal of lead-based paint and lead contaminated dust, the permanent enclosure or encapsulation of lead-based paint, the replacement of lead-painted surfaces or fixtures, and the removal or covering of lead-contaminated soil;

(B) all preparation, cleanup, disposal, and post-abatement clearance testing activities associated with these measures;

(C) any project for which there is a written contract or other documentation requiring an individual, firm, or other entity to conduct activities in any structure that are designed to permanently eliminate lead hazards;

(D) any project resulting in the permanent elimination of lead hazards that is conducted by lead activity firms; and

(E) any project resulting in the permanent elimination of lead hazards that is conducted in response to a lead hazard control order.

(2)(A) Lead abatement shall not include renovation, remodeling, landscaping, and other activities if these activities are not designed to permanently eliminate lead hazards, but are designed to repair, restore, or remodel a given structure or dwelling, even though these activities could incidentally result in a reduction or an elimination of lead hazards.

(B) Lead abatement shall not include operations and maintenance activities, and other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.

(c) “Lead abatement supervisor” means an individual certified by the secretary to perform lead hazard control activities and to prepare occupant protection plans and abatement reports. Each applicant for a lead abatement supervisor shall meet all of the requirements specified in K.A.R. 28-72-8.

(d) “Lead abatement worker” means an individual certified by the secretary and meeting all of the requirements specified in K.A.R. 28-72-7.

(e) “Lead activity firm” means an individual or entity that meets all the requirements listed in K.A.R. 28-72-10.

(f) “Lead-based paint hazard” means any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-based paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces and that would result in adverse human health effects.

(g) “Lead-based paint inspection” means any effort to identify lead concentrations in surface coatings by means of a surface-by-surface investigation and the provision of a written report explaining the results of the investigation. The inspection shall not include any attempt to determine lead concentrations in soil, water, or dust.

(h) “Lead-based paint inspector” means an individual certified by the secretary to perform any efforts to identify lead concentrations in surface coatings by means of a surface-by-surface investigation. Each applicant for a lead-based paint inspector shall meet all of the requirements specified in K.A.R. 28-72-5.

(i) “Lead-contaminated dust” means surface dust in residential dwellings or child-occupied facilities that contains 40 micrograms per square foot or more on uncarpeted floors, 250 micrograms per square foot or more on windowsills, and 400 micrograms per square foot or more on window troughs or any other surface dust levels evidenced by research and determined by the secretary as contaminated.

(j) “Lead-contaminated soil” means bare soil on residential real property and on the property of a child-occupied facility that contains lead in excess of 400 parts per million for areas where child contact is likely and in excess of 1,200 parts per million in the rest of the yard, or any other lead in

soil levels evidenced by research and determined by the secretary as contaminated.

(k) "Lead hazard" means any lead source that is readily accessible to humans in, on, or adjacent to a residential property, including paint, as defined in these regulations, in any condition, contaminated soils, dust, or any other item that contains lead in any amount and has been identified through an environmental investigation or risk assessment as a source of lead that could contribute to the lead poisoning of an individual.

(l) "Lead hazard control" means any activity implemented to control known or assumed lead hazards on or in any structure covered by this act. All implemented lead hazard control activities, at a minimum, shall utilize lead-safe work practices and shall be subject to work practice inspections by the KDHE.

(m) "Lead hazard control notice" means the written notification to compel the owner of a child-occupied facility that has been identified by the secretary as the major contributing cause of poisoning an EBL child to eliminate or remediate the lead hazards to make the child-occupied facility safe from continued exposure to lead hazards.

(n) "Lead hazard screen" means a limited risk assessment activity that involves limited deteriorated paint and dust sampling as described in K.A.R. 28-72-13 and K.A.R. 28-72-15. In target housing or a child occupied facility, at least two samples shall be taken from the floors and at least one sample shall be taken from the windows in all of the rooms where one or more children could have access. Additionally, in multifamily dwellings and child-occupied facilities, dust samples shall be taken from any common areas where one or more children have access.

(o) "Lead inspector" means an individual certified by the secretary to perform a surface-by-surface investigation on a structure to determine the presence of lead-based paint and provide a written report explaining the results of the investigation as specified in K.A.R. 28-72-14.

(p) "Lead-safe work practices" means work practices standards established to work safely with lead-based surface coatings as presented in the joint EPA-HUD curriculum titled "lead safety for remodeling, repair, & painting," excluding the appendices, dated June 2003 and hereby adopted by reference, or an equivalent KDHE-approved curriculum.

(q) "Living area" means any area or room equivalent, as defined in the HUD "guidelines for the

evaluation and control of lead-based paint hazards in housing," which is adopted by reference in K.A.R. 28-72-13. This term shall include any porch of a residential dwelling used by at least one child who is six years of age and under or by a woman of childbearing age.

(r) "Local government" means a county, city, town, district, association, or other public body, including an agency comprised of two or more of these entities, created under state law. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1m. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

"Multifamily dwelling" means a structure that contains more than one separate residential dwelling unit used or occupied, or intended to be used or occupied, in whole or in part as the residence of one or more persons. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1n. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

"Nonprofit" means an entity that has been determined by the IRS to be not-for-profit as evidenced by a "letter of determination" designating the tax code under which the entity operates. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1o. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) "Occupant protection plan" means a plan developed by a lead abatement supervisor or project designer before the commencement of lead abatement or lead hazard control in any structure designated by the act that describes the measures and management procedures to be taken during lead abatement or lead hazard control to protect the building occupants from exposure to any lead hazards.

(b) "Occupation" means one of the specific disciplines of lead-based paint activities identified in this article for which individuals can receive training from training providers. This term shall include renovator, lead abatement worker, lead abatement supervisor, lead inspector, risk assessor, and project designer, and any combination of these.

(c) “Oral exam” means a test that is equivalent in content to a corresponding written exam but is read to the student by the principal instructor. Each student taking an oral exam shall be required to provide the answers to the exam in writing. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1p. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Paint” means all types of surface coatings, including stain, varnish, epoxy, shellac, polyurethane, and sealants.

(b) “Passing score” means a grade of 80% or higher on the third-party examination and training course examination for a lead occupation certificate.

(c) “Permanently covered soil” means soil that has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, including pavement and concrete. Soil covered with grass, mulch, and other landscaping materials shall not be deemed permanently covered soil.

(d) “Principal instructor” means an individual who meets the following requirements:

(1) Is directly employed and monetarily compensated by a training provider;

(2) is certified to perform the lead occupation in which the individual will provide instruction or has obtained certification in an advanced lead occupation; and

(3) has the primary responsibility for organizing and teaching a training course.

(e) “Project design” means lead abatement project designs, lead hazard control project designs, occupant protection plans, and lead abatement reports. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1r. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Reaccreditation” means the renewal of accreditation of a training provider for a training course after the expiration of the initial accreditation.

(b) “Recognized laboratory” means a laboratory recognized by the EPA pursuant to section 405(b) of the toxic substances control act (TSCA) as being capable of performing analyses for lead compounds in paint chips, dust, and soil samples.

(c) “Reduction” means any measure designed and implemented to reduce or eliminate human exposure to lead-based paint hazards including interim controls and abatement.

(d) “Refresher course” means a training course taken by a certified lead professional to maintain certification in a particular discipline.

(e) “Renewal” means the reissuance of a lead occupation certificate, a lead activity firm license, or a training provider accreditation.

(f) “Risk assessment” means an on-site investigation to determine the existence, nature, severity, and location of lead hazards in a residential dwelling or child-occupied facility and the provision of a written report explaining the results of the investigation and options for reducing lead hazards.

(g) “Risk assessor” means an individual certified by the secretary who meets the requirements in K.A.R. 28-72-6. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1s. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation. (a) “State” means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Canal Zone, American Samoa, the Northern Mariana Islands, or any other territory or possession of the United States.

(b) “Surface coatings” means paint as defined in K.A.R. 28-72-1p. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1t. Definitions. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, each of the following terms shall have the meaning assigned in this regulation: (a) “Target housing” means housing constructed before 1978, with the exception of housing for the elderly. If one or more children through the age of 72 months reside or are expected to reside in the housing built exclusively for the elderly, the housing shall be assumed to have been constructed before 1978 unless empirical data proves otherwise. This term shall include schools and any structure used for the care of children under six years of age.

(b) “Third-party examination” means a discipline-specific examination administered by the department to test the knowledge of a person who has completed the required training course and is applying for certification in a particular discipline.

(c) “Training course” means the approved course of instruction established by this article to prepare an individual for certification in a single discipline.

(d) “Training curriculum” means a set of course topics for instruction by a training provider for a particular occupation designed to provide specialized knowledge and skills.

(e) “Training hour” means at least 50 minutes of actual time used for learning, including time devoted to lectures, learning activities, small group activities, demonstrations, evaluations, and hands-on experience.

(f) “Training manager” means the individual who is a direct and monetarily compensated employee of a training provider, is subject to the employment standards of the fair labor standards act, and is responsible for administering a training program and monitoring the performance of principal instructors and guest instructors.

(g) “Training provider” means a person or entity who has met the requirements of K.A.R. 28-72-4 and provides training courses for the purpose of state certification or certification renewal in the occupations of lead-safe work practices, lead abatement worker, lead abatement supervisor, lead-based paint inspector, risk assessor, and project designer. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1v. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

“Visual inspection for clearance testing” means the visual examination of a residential dwelling, a child-occupied facility, or any other structure designated by the secretary following a lead abatement or lead hazard control to determine whether or not the lead abatement or lead hazard control has been successfully completed. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-1x. Definition. In addition to the definitions in K.S.A. 65-1,201 and amendments thereto, the following term shall have the meaning assigned in this regulation:

“X-ray fluorescence analyzer (XRF)” means an instrument that determines lead concentration in milligrams per square centimeter (mg/cm²) using the principle of X-ray fluorescence. (Authorized by and implementing K.S.A. 65-1,202; effective April 9, 2010.)

28-72-2. General requirements for accreditation, licensure, and certification; adoption by reference. (a) Waiver. Any applicant for certification and any certified individual

may authorize others, including the applicant’s or individual’s employer, to act on the applicant’s or individual’s behalf regarding the certification application. This authorization shall be indicated on the application form provided by KDHE. If at any time the applicant or certified individual decides to change this authorization, the applicant or certified individual shall notify KDHE in writing of the change.

(b) Change of address. Each certified individual shall notify KDHE in writing of a change of mailing address no later than 30 days following the change. Each lead activity firm shall notify KDHE in writing of a change in business mailing address no later than 30 days following the change. Until a change of address is received, all correspondence shall be mailed to the individual’s mailing address and the lead activity firm’s business address indicated on the most recent application form.

(c) Prior out-of-state certification. A lead occupation certificate may be issued by the secretary to any person if both of the following conditions are met:

(1) The person meets the following requirements:

(A) Has submitted a complete application;

(B) has taken the required third-party exam for the discipline applied for and received a passing score; and

(C) has provided proof of certification from another state, if KDHE has entered into an agreement with that state or if that state is a current EPA program state.

(2) All individual certification fees have been paid.

(d) Adoption by reference.

(1) 40 CFR 745.80 through 745.90, as in effect on July 1, 2008, are adopted by reference, except as specified in paragraph (d)(2). For the purpose of this regulation, each reference in the adopted CFRs to “EPA” shall mean “KDHE,” and each reference to “administrator” shall mean “secretary.”

(2) The following portions of 40 CFR 745.80 through 40 CFR 745.90 are not adopted:

(A) 40 CFR 745.81 and 40 CFR 745.82(c);

(B) in 40 CFR 745.83, the following terms and their definitions: child occupied facility, compo-

ment or building component, interim controls, recognized test kit, renovator, and training hour;

(C) 40 CFR 745.85(a)(3)(iii). The use of a heat gun to remove lead-based paint shall not be allowed;

(D) 40 CFR 745.86(b)(6) and (c);

(E) 40 CFR 745.87;

(F) 40 CFR 745.88;

(G) 40 CFR 745.89;

(H) 40 CFR 745.90(a), (b)(6), and (c);

(I) 40 CFR 745.91; and

(J) 40 CFR 745.225(c)(6)(vii). (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-3. Fees. The following fees shall apply:

(a) Training providers. A separate accreditation fee shall be required for each training course. If a training course is taught in more than one language, a separate accreditation fee shall be required for each of these versions of the training course.

(1) Accreditation fee.....	\$500
(2) Initial fee.	
(A) Lead abatement supervisor, lead abatement worker, and project designer courses...	\$1,000
(B) Risk assessor and lead inspector courses	\$1,000
(C) Lead-safe work practices	\$300
(3) Refresher course fee.	
(A) Lead abatement supervisor, lead abatement worker, and project designer courses...	\$500
(B) Risk assessor and lead inspector courses	\$500
(C) Lead-safe work practices	\$150
(4) Reaccreditation fee.....	\$500
(A)(i) Reaccreditation for lead abatement supervisor, lead abatement worker, and project designer courses	\$1,000
(ii) Reaccreditation for risk assessor and inspector courses	\$1,000
(B)(i) Refresher reaccreditation for lead abatement supervisor, lead abatement worker, and project designer courses	\$500
(ii) Refresher reaccreditation for risk assessor and lead inspector courses	\$500
(b) Lead inspector.	
(1) Individual certification	\$200
(2) Individual recertification	\$100
(c) Risk assessor.	
(1) Individual certification	\$300
(2) Individual recertification	\$150

(3) Local health department or clinic that has received a certificate from KDHE for elevated blood lead level investigation risk assessments

.....	\$0
(d) Lead abatement supervisor.	
(1) Individual certification	\$150
(2) Individual recertification	\$75
(e) Project designer.	
(1) Individual certification	\$150
(2) Individual recertification	\$75
(f) Lead abatement worker.	
(1) Individual certification	\$50
(2) Individual recertification	\$25
(g) Renovator.	
(1) Individual certification	\$0
(2) Individual recertification	\$0
(h) Third-party examination.....	\$50
(i) Lead activity firm.	
(1) License	\$500
(2) License renewal	\$250
(3) Lead abatement project fee	1% of each project or \$50, whichever is greater
(4) Abatement project reinspection fee	\$150
(j) Renovation firm.	
(1) License	\$200
(2) License renewal	\$100

(Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-4. Training provider accreditation.

(a) Good standing. Each applicant wishing to provide and teach lead activity training in Kansas shall be accredited as a training provider and licensed by KDHE as a lead activity firm. Each applicant desiring accreditation of the training courses for lead inspector, risk assessor, lead abatement worker, lead abatement supervisor, project designer, or lead-safe work practices, or any combination, under this regulation, who is required to be registered and in good standing with the Kansas secretary of state's office, shall submit a copy of the applicant's certificate of good standing to KDHE.

(b) Application to become a training provider for a training course. Completed applications shall be submitted to KDHE. Each application shall include the following:

(1) A completed training provider course accreditation application on a form provided by KDHE, which shall include the following:

(A) The training provider's name, address, and telephone number;

- (B) the lead activity firm license number;
 - (C) the name and date of birth of the training manager;
 - (D) the name and date of birth of the principal instructor for each course;
 - (E) the name and date of birth for any guest instructor for each course;
 - (F) a list of locations at which training will take place;
 - (G) a list of courses for which the training provider is applying for accreditation; and
 - (H) a statement signed by the training manager certifying that the information in the application for accreditation, and any additional information included with the application, is true and accurate to the best of the training manager's knowledge and understanding, that the training provider will comply with K.A.R. 28-72-4 through K.A.R. 28-72-4c, and that the training provider will conduct lead training only in those occupations in which the training provider has received accreditation;
- (2) a copy of the student and instructor manuals;
 - (3) the course agenda;
 - (4) the course examination blueprint;
 - (5) a copy of the quality control plan as described in paragraph (d)(9) of this regulation;
 - (6) a copy of a sample course completion diploma as described in paragraph (d)(8) of this regulation;
 - (7) a description of the facilities and equipment to be used for lectures and hands-on training;
 - (8) a description of the activities and procedures that will be used for conducting the skills assessment for each course;
 - (9) a payment to KDHE for the applicable non-refundable accreditation fees specified in K.A.R. 28-72-3, unless the training provider is a state, federally recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS, which shall accompany the application; and
 - (10) documentation supporting the training manager's, principal instructor's, and any guest instructor's qualifications.

(c) Procedure for issuance or denial of training provider accreditation for a training course. The applicant shall be informed by KDHE in writing that the application is approved, incomplete, or denied.

(1) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(A) Within 30 calendar days after the issuance date of the notice of incomplete application, the applicant shall submit to KDHE, in writing, the information requested in the written notice.

(B) Failure to submit the information requested in the written notice within 30 calendar days shall result in denial of the application for a training course accreditation.

(C) After the information in the written notice is received, the applicant shall be informed by KDHE in writing that the application is either approved or denied.

(2) If an application is approved, a two-year accreditation certificate shall be issued by KDHE.

(3) If an application for training course accreditation is denied, the specific reason or reasons for the denial shall be stated in the notice of denial to the applicant.

(A) Training course accreditation may be denied by the secretary pursuant to K.S.A. 65-1,207(c), and amendments thereto.

(B) If an application is denied, the applicant may reapply for accreditation at any time.

(C) If an applicant is aggrieved by a determination to deny accreditation, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(d) Requirements for accreditation of a training provider for a training course. For a training provider to maintain accreditation from KDHE to offer a training course, the training provider shall meet the following requirements:

(1) Training manager. The training manager shall be a monetarily compensated direct employee of the training provider who meets the requirements in subsection (e). The training manager shall be responsible for ensuring that the training provider complies at all times with the requirements in these regulations. The training manager may designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a course. The training manager shall ensure that each guest instructor meets the requirements in subsection (f).

(2) Principal instructor. The training provider, in coordination with the training manager, shall designate a qualified principal instructor who meets the requirements in subsection (f). The principal instructor shall be responsible for the organization of the course and oversight of the teaching of all course materials. The principal instructor shall be

present during all classes or presentations given by any guest instructor.

(3) Guest instructor. The training manager may designate a guest instructor on an as-needed basis. No guest instructor shall be allowed to teach an entire training course. Each guest instructor shall meet the requirements in subsection (f).

(4) Training provider. The training provider shall meet the curriculum requirements in K.A.R. 28-72-4a for each course contained in the application for accreditation of a training provider.

(5) Delivery of course. The training provider shall ensure the availability of, and provide adequate facilities for, the delivery of the lecture, course exam, hands-on training, and assessment activities. This requirement shall include providing training equipment that reflects current work practice standards in K.A.R. 28-72-13 through K.A.R. 28-72-21 and maintaining or updating the course materials, equipment, and facilities as needed.

(6) Course exam. For each course offered, the training provider shall conduct a monitored, written course exam at the completion of each course. An oral exam may be administered in lieu of a written course exam for the lead abatement worker course only. If an oral examination is administered, the student shall be required to provide the answers to the exam in writing.

(A) The course exam shall evaluate each trainee's competency and proficiency.

(B) Each individual shall be required to achieve a passing score on the course exam in order to successfully complete any course and receive a course completion diploma.

(C) The training provider and the training manager shall be responsible for maintaining the validity and integrity of the course exam to ensure that the exam accurately evaluates each trainee's knowledge and retention of the course topics.

(7) Hands-on skills assessment. For each course offered, except for project designers, the training provider shall conduct a hands-on skills assessment. The training manager shall maintain the validity and integrity of the hands-on skills assessment to ensure that the assessment accurately evaluates each trainee's performance of the work practice procedures associated with the course topics.

(8) Course completion diploma. The training provider shall issue a unique course completion diploma to each individual who passes the training course. Each course completion diploma shall include the following:

(A) The name, a unique identification number, and the address of the individual;

(B) the name of the particular course that the individual completed;

(C) the dates of course attendance; and

(D) the name, address, and telephone number of the training provider.

(9) Quality control plan. The training manager shall develop and implement a quality control plan. The plan shall be used to maintain or progressively improve the quality of the accredited provider.

(A) This plan shall contain at least the following elements:

(i) Procedures for periodic revision of training materials and the course exam to reflect innovations in the field;

(ii) procedures for the training manager's annual review of the competency of the principal instructor; and

(iii) a review to ensure the adequacy of the facilities and equipment.

(B) An annual report discussing the results of the quality control plan shall be submitted to KDHE within one year following accreditation and at each subsequent renewal.

(10) Access by KDHE. The training provider shall allow KDHE to conduct audits as needed in order for KDHE to evaluate the training provider's compliance with KDHE accreditation requirements. During this audit, the training provider shall make available to KDHE all information necessary to complete the evaluation. At KDHE's request, the training provider shall also make documents available for photocopying.

(11) Recordkeeping. The training provider shall maintain at its principal place of business, for at least five years, the following records:

(A) All documents specified in paragraphs (e)(2) and (f)(2) that demonstrate the qualifications listed in paragraph (e)(1) for the training manager, and paragraph (f)(1) for the principal instructor and any guest instructor;

(B) curriculum or course materials, or both, and documents reflecting any changes made to these materials;

(C) the course examination and blueprint;

(D) information regarding how the hands-on skills assessment is conducted, including the following:

(i) The name of the person conducting the assessment;

(ii) the criteria for grading skills;

- (iii) the facilities used;
- (iv) the pass and fail rate; and
- (v) the quality control plan as described in paragraph (d)(9);

(E) results of the students' hands-on skills assessments and course exams, and a record of each student's course completion diploma; and

(F) any other material not listed in this paragraph (d)(11) that was submitted to KDHE as part of the training provider's application for accreditation.

(12) Course notification. The training provider shall notify KDHE in writing at least 14 calendar days before conducting an accredited training course.

(A) Each notification shall include the following information:

(i) The location of the course, if it will be conducted at a location other than the training provider's training facility;

(ii) the dates and times of the course;

(iii) the name of the course; and

(iv) the name of the principal instructor and any guest instructors conducting the course.

(B) If the scheduled training course has been changed or canceled, the training provider shall notify KDHE in writing at least 24 hours before the training course was scheduled to begin.

(13) Changes to a training course. Before any one of the following changes is made to a training course, that change shall be submitted in writing to KDHE for review and approval before the continuation of the training course:

(A) The course curriculum;

(B) the course examination;

(C) the course materials;

(D) the training manager, principal instructors, or guest instructors; or

(E) the course completion diploma.

Within 60 calendar days after receipt of a change to a training course, the provider shall be informed by KDHE in writing that the change is either approved or disapproved. If the change is approved, the training provider shall include the change in the training course. If the change is disapproved, the training provider shall not include the change in the training course.

(14) Change of ownership. If a training provider changes ownership, the new owner shall notify KDHE in writing at least 30 calendar days before the change of ownership becomes effective. The notification shall include a new training course provider accreditation application, the appropriate fee or fees, and the date that the change of

ownership will become effective. The new training course provider accreditation application shall be processed according to this regulation. The current training provider's accreditation shall expire on the effective date specified in the notification of the change of ownership.

(15) Change of address. The training provider shall submit to KDHE a written notice of the training provider's new address and telephone number, and a description of the new training facility. The training provider shall submit this information to KDHE not later than 30 days before relocating its business or transferring its records.

(e) Training, education, and experience requirements for the training manager.

(1) The education or experience requirements for the training manager shall include one year of experience in lead or asbestos abatement, painting, carpentry, renovation, remodeling, safety and health, or industrial hygiene, and at least one of the following:

(A) A minimum of two years of experience in teaching or training adults;

(B) a bachelor's or graduate degree in building construction technology, engineering, industrial hygiene, safety, public health, business administration, or education; or

(C) a minimum of two years of experience in managing a training program specializing in environmental hazards.

(2) The following records of experience and education shall be recognized by KDHE as evidence that the individual meets or exceeds KDHE requirements for a training manager:

(A) Resumes, letters of reference from past employers, or documentation to evidence past experience that includes specific dates of employment, the employer's name, address, telephone number, and specific job duties, as evidence of meeting the experience requirements; and

(B) official academic transcripts or diplomas, as evidence of meeting the education requirements.

(f) Training, education, and experience requirements for the principal instructor and any guest instructor.

(1) The training, education, and experience requirements for the principal instructor and any guest instructor of a training course shall include the following:

(A) At least one year of experience in teaching or training adults; and

(B) at least one year of experience in lead or asbestos abatement, painting, carpentry, renovation,

remodeling, occupational safety and health, or industrial hygiene, or an associate degree or higher from a postsecondary educational institution in building construction technology, engineering, safety, public health, or industrial hygiene.

(2) The following records of experience and education shall be recognized by KDHE as evidence that the individual meets or exceeds KDHE requirements for a principal instructor:

(A) Course completion diplomas issued by the training provider as evidence of meeting the training requirements and a current copy of the KDHE certification for the disciplines that the principal instructor desires to teach;

(B) official academic transcripts or diplomas, as evidence of meeting the education requirements; and

(C) resumes, letters of reference from past employers, or documentation to evidence past experience that includes specific dates of employment, the employer's name, address, telephone number, and specific job duties, as evidence of meeting the experience requirements.

(g)(1) Training provider accreditation may be suspended or revoked by the secretary pursuant to K.S.A. 65-1,207(c), and amendments thereto.

(2) Before suspending or revoking a training provider's accreditation, a training provider shall be given written notice of the reasons for the suspension or revocation. The training provider may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(h) Renewal of accreditation.

(1) Unless revoked sooner, a training provider's accreditation shall expire two years after the date of issuance. If a training provider meets the requirements of this regulation and K.A.R. 28-72-4a, the training provider shall be reaccredited.

(2) Each training provider seeking reaccreditation shall submit an application to KDHE at least 60 calendar days before the provider's accreditation expires. If a training provider does not submit its application for reaccreditation by that date, the provider's reaccreditation before the end of the accreditation period shall not be guaranteed by KDHE.

(3) The training provider's application for reaccreditation shall contain the following:

(A) A completed training provider course accreditation application on a form provided by KDHE, which shall include the following:

(i) The training provider's name, address, and telephone number;

(ii) the name and date of birth of the training manager;

(iii) the name and date of birth of the principal instructor for each course;

(iv) a list of locations at which training will take place;

(v) a list of courses for which the training provider is applying for reaccreditation; and

(vi) a statement signed by the training manager certifying that the information provided in the application for reaccreditation, and any additional information included with the application, is true and accurate to the best of the training manager's knowledge and understanding, that the training provider will comply with K.A.R. 28-72-4 and K.A.R. 28-72-4a, and that the training provider will conduct lead training only in those occupations in which the training provider has received accreditation;

(B) a list of courses for which the training provider is applying for reaccreditation;

(C) a description of any changes to the training facility, equipment, or course materials since the training provider's last application was approved that adversely affects the students' ability to learn; and

(D) a payment to KDHE for the nonrefundable fees specified in K.A.R. 28-72-3, as applicable, unless the training provider is a state, federally recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS, which shall accompany the application.

(i) If the training provider has allowed its accreditation to expire and the provider desires to be accredited, it shall reapply in the same manner as that required for an application for an original accreditation in accordance with this regulation. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-4a. Curriculum requirements for training providers.

(a)(1) Each training provider of a lead inspector training course shall ensure that the lead inspector training course curriculum includes, at a minimum, 16 hours of classroom training and eight hours of hands-on training.

(2) Each lead inspector training course shall include, at a minimum, the following course topics:

(A) The role and responsibilities of an inspector;

(B) background information on lead, including the history of lead use and sources of environmental lead contamination;

(C) the health effects of lead, including the following:

(i) The ways that lead enters and affects the body;

(ii) the levels of concern; and

(iii) symptoms, diagnosis, and treatments;

(D) the regulatory background and an overview of lead in applicable state and federal guidelines or regulations pertaining to lead-based paint, including the current version of each of the following:

(i) 40 CFR part 745;

(ii) U.S. HUD guidelines for the evaluation and control of lead-based paint hazards in housing as adopted in K.A.R. 28-72-13;

(iii) 29 CFR 1910.1200;

(iv) 29 CFR 1926.62; and

(v) title X: the residential lead-based paint hazard reduction act of 1992;

(E) the regulations in this article pertaining to lead licensure, the Kansas work practice standards for lead-based paint activities specific to lead inspection activities, K.A.R. 28-72-2, and K.A.R. 28-72-51 through 28-72-54;

(F) quality control and assurance procedures in testing analysis;

(G) legal liabilities and obligations; and

(H) recordkeeping.

(3) Each lead inspector training course shall also include, at a minimum, the following course topics, the presentation of which shall require hands-on training as an integral component of the course:

(A) Lead-based paint inspection methods, including the selection of rooms and components for sampling or testing;

(B) preinspection planning and review, including developing a schematic site plan and determining inspection criteria and locations to collect samples in single-family and multifamily housing;

(C) paint, dust, and soil sampling methodologies, including the following:

(i) Lead-based paint testing or X-ray fluorescence paint analyzer (XRF) use, including the types of XRF units, their basic operation, and interpretation of XRF results, including substrate correction;

(ii) soil sample collection, including soil sampling techniques, the number and location of soil samples, and interpretation of soil sampling results; and

(iii) dust sample collection techniques, including the number and location of wipe samples and the interpretation of test results;

(D) clearance standards and testing, including random sampling; and

(E) preparation of the final inspection report.

(b) Each training provider of a risk assessor training course shall ensure that the risk assessor training course curriculum includes, at a minimum, 12 hours of classroom training and four hours of hands-on training.

(1) Each risk assessor training course shall include, at a minimum, the following course topics:

(A) The role and responsibilities of the risk assessor;

(B) the collection of background information to perform a risk assessment, including information on the age and history of the housing and occupancy by children under six years of age and women of childbearing age;

(C) sources of environmental lead contamination, including paint, surface dust and soil, water, air, packaging, and food;

(D) the regulations in this article pertaining to lead certification, Kansas work practice standards for lead-based paint specific to risk assessment activities, K.A.R. 28-72-2, and K.A.R. 28-72-51 through 28-72-54;

(E) development of hazard control options, the role of interim controls, and operations and maintenance activities to reduce lead-based paint hazards; and

(F) legal liabilities and obligations specific to a risk assessor.

(2) Each risk assessor training course shall also include, at a minimum, the following course topics, the presentation of which shall require hands-on training as an integral component of the course:

(A) Visual inspection for the purposes of identifying potential sources of lead hazards;

(B) lead-hazard screen protocols;

(C) sampling for other sources of lead exposure, including drinking water;

(D) interpretation of lead-based paint and other lead sampling results related to the Kansas clearance standards; and

(E) preparation of a final risk assessment report.

(c) Each training provider of a lead abatement worker course shall ensure that the lead abatement worker training course curriculum includes, at a minimum, 16 hours of classroom training and eight hours of hands-on training.

(1) Each lead abatement worker training course shall include, at a minimum, the following course topics:

(A) The role and responsibilities of a lead abatement worker;

(B) background information on lead, including the history of lead use and sources of environmental lead contamination;

(C) the health effects of lead, including the following:

(i) The ways that lead enters and affects the body;

(ii) the levels of concern; and

(iii) symptoms, diagnosis, and treatments;

(D) the regulatory background and an overview of lead in applicable state and federal guidelines or regulations pertaining to lead-based paint, including the current version of each of the following:

(i) 40 CFR part 745;

(ii) U.S. HUD guidelines for the evaluation and control of lead-based paint hazards in housing;

(iii) 29 CFR 1910.1200;

(iv) 29 CFR 1926.62; and

(v) title X: the residential lead-based paint hazard reduction act of 1992;

(E) the regulations in this article pertaining to lead certification, the Kansas work practice standards for lead-based paint activities specific to lead abatement activities, K.A.R. 28-72-2, and K.A.R. 28-72-51 through 28-72-54; and

(F) waste disposal techniques.

(2) Each lead abatement training course shall also include, at a minimum, the following course topics, the presentation of which shall require hands-on training as an integral component of the course:

(A) Personal protective equipment information, including respiratory equipment selection, air-purifying respirators, care and cleaning of respirators, respiratory program, protective clothing and equipment, and hygienic practices;

(B) lead hazard recognition and control, including site characterization, exposure measurements, medical surveillance, and engineering controls;

(C) preabatement set-up procedures, including containment for residential and commercial buildings and for superstructures;

(D) lead abatement and lead-hazard reduction methods for residential and commercial buildings and for superstructures, including prohibited practices;

(E) interior dust abatement methods and clean-up techniques; and

(F) soil and exterior dust abatement methods.

(d) Each training provider of a lead abatement supervisor training course shall ensure that the lead abatement supervisor training course curriculum includes, at a minimum, 28 hours of classroom training and 12 hours of hands-on training.

(1) Each lead abatement supervisor training course shall include, at a minimum, the following course topics:

(A) The role and responsibilities of a supervisor;

(B) background information on lead, including the history of lead use and sources of environmental lead contamination;

(C) the health effects of lead, including the following:

(i) The ways that lead enters and affects the body;

(ii) the levels of concern; and

(iii) symptoms, diagnosis, and treatments;

(D) the regulatory background and an overview of lead in applicable state and federal guidelines or regulations pertaining to lead-based paint, including the current version of each of the following:

(i) 40 CFR part 745;

(ii) U.S. HUD guidelines for the evaluation and control of lead-based paint hazards in housing;

(iii) 29 CFR 1910.1200;

(iv) 29 CFR 1926.62; and

(v) title X: the residential lead-based paint hazard reduction act of 1992;

(E) liability and insurance issues relating to lead abatement;

(F) the community relations process;

(G) hazard recognition and control techniques, including site characterization, exposure measurements, material identification, safety and health planning, medical surveillance, and engineering controls;

(H) the regulations in this article pertaining to lead certification and to the Kansas work practice standards for lead-based paint activities specific to lead abatement activities;

(I) clearance standards and testing;

(J) cleanup and waste disposal; and

(K) recordkeeping.

(2) Each lead abatement supervisor training course shall also include, at a minimum, the following course topics, the presentation of which shall require hands-on training as an integral component of the course:

(A) Cost estimation;

(B) risk assessment and inspection report interpretation;

(C) the development and implementation of an occupant protection plan and pre-abatement work

plan, including containment for residential and commercial buildings and for superstructures;

(D) lead hazard recognition and control;

(E) personal protective equipment information, including respiratory equipment selection, air-purifying respirators, care and cleaning of respirators, respiratory program, protective clothing and equipment, and hygienic practices;

(F) lead abatement and lead-hazard reduction methods, including prohibited practices, for residential and commercial buildings and superstructures;

(G) project management, including supervisory techniques, contractor specifications, emergency response planning, and blueprint reading;

(H) interior dust abatement and cleanup techniques;

(I) soil and exterior dust abatement methods; and

(J) the preparation of an abatement report.

(e) Each training provider of a project designer training course shall ensure that the project designer training course curriculum includes, at a minimum, eight hours of classroom training. Each project designer training course shall include, at a minimum, the following course topics:

(1) The role and responsibilities of a project designer;

(2) the development and implementation of an occupant protection plan for large-scale abatement projects;

(3) lead abatement and lead-hazard reduction methods, including prohibited practices, for large-scale abatement projects;

(4) interior dust abatement or cleanup or lead-hazard control, and reduction methods for large-scale abatement projects;

(5) soil and exterior dust abatement methods for large-scale abatement projects;

(6) clearance standards and testing for large-scale abatement projects;

(7) integration of lead abatement methods with modernization and rehabilitation projects for large-scale abatement projects; and

(8) the Kansas administrative regulations pertaining to lead-hazard disclosure. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-4b. (Authorized by K.S.A. 2001 Supp. 65-1,202; implementing K.S.A. 2001 Supp. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-

9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; revoked April 9, 2010.)

28-72-4c. Training provider accreditation; refresher training course. (a) Application for accreditation of a training provider for a refresher training course. A training provider may seek accreditation to offer refresher training courses in any occupation. To obtain KDHE accreditation to offer refresher training courses, each training provider shall meet the following minimum requirements:

(1) Each refresher course shall review the curriculum topics of the full-length courses listed in K.A.R. 28-72-4a as appropriate. In addition, each training provider shall ensure that the refresher course of study includes, at a minimum, the following:

(A) An overview of current safety practices relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate occupation;

(B) current laws and regulations relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate occupation; and

(C) current technologies relating to lead-based paint activities in general, as well as specific information pertaining to the appropriate occupation.

(2) Each refresher course, except for the project designer course and the lead-safe work practices course, shall last at least eight training hours. The project designer and lead-safe work practices refresher courses shall last at least four training hours.

(3) For each refresher training course offered, the training provider shall conduct a hands-on assessment, if applicable.

(4) For each refresher training course offered, the training provider shall conduct a course exam at the completion of the course.

(b) Any training provider may apply for accreditation of a refresher training course concurrently with its application for accreditation of the corresponding training course as described in K.A.R. 28-72-4. If the training provider submits both applications concurrently, the procedures and requirements specified in K.A.R. 28-72-4 shall be used by KDHE for accreditation of the refresher course and the corresponding training course.

(c) Each training provider seeking accreditation to offer only refresher training courses shall submit a written application to KDHE, which shall include the following:

(1) A completed training course accreditation application on a form provided by KDHE, which shall include the following:

(A) The training provider's name, address, and telephone number;

(B) the name and date of birth of the training manager;

(C) the name and date of birth of the principal instructor for each course;

(D) a list of locations at which training will take place;

(E) a list of courses for which the training provider is applying for accreditation; and

(F) a statement signed by the training manager certifying that the information provided in the application for accreditation, and any additional information included with the application, is true and accurate to the best of the training manager's knowledge and understanding, that the training provider will comply with K.A.R. 28-72-4 through K.A.R. 28-72-4c, and that the training provider will conduct lead training only in those occupations in which the training provider has received accreditation;

(2) a copy of the student and instructor manuals;

(3) the course agenda;

(4) the course examination blueprint;

(5) a copy of the quality control plan as described in K.A.R. 28-72-4(d)(9);

(6) a copy of a sample course completion diploma as described in K.A.R. 28-72-4(d)(8);

(7) a description of the facilities and equipment to be used for lecture and hands-on training; and

(8) a payment to KDHE for the applicable non-refundable reaccreditation fees, unless the training provider is a state, federally recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS, which shall accompany the application.

(d) The following shall apply to each training provider applying for the accreditation of refresher training courses:

(1) The good standing requirements in K.A.R. 28-72-4(a);

(2) the procedures for training provider accreditation issuance or denial in K.A.R. 28-72-4(c);

(3) the requirements for accreditation of a training provider for a training course;

(4) the training, education, and the experience requirements for training managers and principal instructors in K.A.R. 28-72-4(e) and (f); and

(5) the provisions relating to suspension or revocation of accreditation in K.A.R. 28-72-4(g).

(e)(1) Unless revoked sooner, each training provider's accreditation, including refresher training courses, shall expire two years after the date of issuance. If a training provider meets the requirements of subsections (a), (c), and (d), the training provider shall be reaccredited.

(2) Each training provider seeking reaccreditation of one or more refresher training courses shall submit an application to KDHE at least 60 calendar days before the training provider's accreditation expires. If a training provider does not submit its application for reaccreditation by that date, the provider's reaccreditation before the end of the accreditation period shall not be guaranteed by KDHE.

(3) The training provider's application for reaccreditation shall contain the following:

(A) A completed training provider course accreditation application on a form provided by KDHE, which shall include the following:

(i) The training provider's name, address, and telephone number;

(ii) the name and date of birth of the training manager;

(iii) the name and date of birth of the principal instructor for each course;

(iv) a list of locations at which training will take place;

(v) a list of refresher training courses for which the training provider is applying for reaccreditation; and

(vi) a statement signed by the training manager certifying that the information provided in the application for reaccreditation, and any additional information included with the application, is true and accurate to the best of the training manager's knowledge and understanding, that the training provider will comply with K.A.R. 28-72-4, K.A.R. 28-72-4a, and K.A.R. 28-72-4c, and that the training provider will conduct lead training only in those occupations in which the training provider has received accreditation;

(B) a list of refresher training courses for which the training provider is applying for reaccreditation;

(C) a description of any changes to the training facility, equipment, or course materials since the training provider's last application was approved that adversely affect the students' ability to learn; and

(D) a payment to KDHE for the nonrefundable fees specified in K.A.R. 28-72-3, as applicable, unless the training provider is a state, federal-

ly recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS, which shall accompany the application.

(4) If the training provider has allowed its accreditation to expire and the provider desires to be accredited, the training provider shall reapply in the same manner as that required for an application for an original accreditation in accordance with this regulation. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-5. Application process and requirements for the certification of lead inspectors.

(a) Application for a lead inspector certificate.

(1) Each applicant for a lead inspector certificate shall submit a completed application to KDHE before consideration for certificate issuance. All applications for certification shall be received by KDHE at least 30 days before the date of the third-party examination, but the deadline for filing applications may be waived by KDHE as particular circumstances justify.

(2) Each application shall include the following:

(A) A completed lead occupation certificate application on a form provided by KDHE, which shall include the following:

(i) The applicant's full legal name, home address, and telephone number;

(ii) the name, address, and telephone number of the applicant's current employer;

(iii) the applicant's state-issued identification number or federal employment identification number;

(iv) the county or counties in which the applicant is employed;

(v) the address where the applicant would like to receive correspondence regarding the application or certification;

(vi) the occupation for which the applicant wishes to be certified;

(vii) proof of any certification for lead occupations in other states, including the names of the other states, type of certification, certification expiration date, certificate number, and copies of the other states' certificate or license;

(viii) proof of any certification by the EPA, including the EPA region number, type of certification, certification expiration date, certificate number, and a copy of the EPA certificate;

(ix) the type of training completed, including the name of the training provider, certificate identification number, and dates of course attendance;

(x) any employment history or education that meets the experience requirements in subsection (b); and

(xi) the signature of the applicant, which shall certify that all information in the application is complete and true to the best of the applicant's knowledge and that the applicant will comply with applicable state statutes and regulations;

(B) a copy of the lead inspector training course completion diploma or equivalent EPA training course diplomas, and any required refresher course completion diplomas;

(C) documentation pursuant to subsection (b) as evidence of meeting the education or experience requirements for lead inspectors; and

(D) a payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a lead inspector certificate shall apply to KDHE within one year after the applicant's successful completion of the lead inspector training course, as indicated on the course completion diploma. Applicants failing to apply within one year after the date on the training course completion diploma shall, before making application for certification, be required to successfully complete the eight-hour lead inspector refresher training course accredited by KDHE.

(4) Each applicant who fails to apply within two years after the lead inspector training and who has not successfully completed refresher training shall be required to successfully complete the lead inspector training course before submitting an application for a lead inspector certificate.

(b) Training, education, and experience requirements for a lead inspector certificate.

(1) Each applicant for certification as a lead inspector shall complete a lead inspector training course or its equivalent and shall be required to achieve passing scores on the course examination and the third-party examination.

(2) Each applicant for certification as a lead inspector shall meet the minimum education or experience requirements for a certified lead inspector.

(A) The minimum education or experience requirements for a certified lead inspector shall include at least one of the following:

(i) A bachelor's degree;

(ii) an associate's degree and one year of experience in a related field, including housing repair

and inspection, and lead, asbestos, and environmental remediation work; or

(iii) either a high school diploma or a certificate of high school equivalency (GED), in addition to two years of experience in a related field, including housing repair and inspection, and lead, asbestos, and environmental remediation work.

(B) The following documents shall be recognized by KDHE as evidence of meeting the requirements listed in paragraph (b)(2)(A):

(i) Official academic transcripts or diplomas as evidence of meeting the education requirements;

(ii) resumes, letters of reference, or documentation of work experience, which at a minimum shall include specific dates of employment, each employer's name, address, and telephone number, and specific job duties, as evidence of meeting the work experience requirements;

(iii) course completion diplomas issued by the training provider as evidence of meeting the training requirements; and

(iv) appropriate documentation of certification or registration.

(c) Procedure for issuance or denial of a lead inspector certificate.

(1) The applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a lead inspector certificate by submitting a complete lead occupation

application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) Within 180 calendar days after application approval, the applicant shall be required to attain a passing score on the third-party examination for lead inspectors.

(A) An applicant shall not sit for the third-party examination for lead inspectors more than three times within 180 calendar days after the issuance date of the notice of an approved application.

(B) The applicant's failure to obtain a passing score on the third-party examination for lead inspectors within the 180-day period following the notice of an approved application for a certificate shall result in KDHE's denial of the individual's application for a certificate. The individual may reapply to KDHE pursuant to this regulation but only after retaking the lead inspector training course.

(3) After the applicant passes the third-party examination, a two-year lead inspector certificate shall be issued by KDHE.

(4) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-6. Application process and requirements for the certification of risk assessors.

(a) Application for a risk assessor certificate.

(1) Each applicant for a risk assessor certificate shall submit a completed application to KDHE before consideration for certificate issuance. All applications for certification shall be received by KDHE at least 30 days before the date of the third-party examination, but the deadline for filing applications may be waived by KDHE as particular circumstances justify.

(2) Each application shall include the information specified in K.A.R. 28-72-5(a)(2)(A) and the following:

(A) A copy of the risk assessor and lead inspector training course completion diploma, and any required refresher course completion diplomas;

(B) documentation pursuant to subsection (b) as evidence of meeting the education or experience requirements for risk assessors; and

(C) a payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a risk assessor certificate shall apply to KDHE within one year after the applicant's successful completion of the risk assessor training course, as indicated on the course completion diploma. Applicants failing to apply within one year after the date on the training course completion certificate shall, before making application for certification, be required to successfully complete the eight-hour risk assessor refresher training course accredited by KDHE.

(4) Each applicant who fails to apply within two years after the risk assessor training and who has not successfully completed the refresher training course shall be required to successfully complete the risk assessor training course before submitting an application for a risk assessor certificate.

(b) Training, education, and experience requirements for a risk assessor certificate.

(1) Each applicant for a certificate as a risk assessor shall complete a risk assessor training course and a lead inspector training course and shall be required to achieve passing scores on both the course examinations and the third-party examination for risk assessors.

(2) Each applicant for a certificate as a risk assessor shall meet the minimum education and experience requirements for a certified risk assessor.

(A) The minimum education and experience requirements for a certified risk assessor shall include at least one of the following:

(i) A bachelor's degree and at least one year of experience in a related field, including housing repair and inspection, and lead, asbestos, and environmental remediation work;

(ii) an associate's degree and two years of experience in a related field, including housing repair and inspection, and lead, asbestos, and environmental remediation work;

(iii) certification as an industrial hygienist, professional engineer, or registered architect, or certification in a related engineering, health, or environmental field, including a safety professional and environmental scientist; or

(iv) either a high school diploma or a certificate of high school equivalency (GED), in addition to three years of experience in a field, including housing repair and inspection, and lead, asbestos, and environmental remediation work.

(B) The following documents shall be recognized by KDHE as evidence of meeting the requirements listed in paragraph (b)(2)(A):

(i) Official academic transcripts or diplomas as evidence of meeting the education requirements;

(ii) resumes, letters of reference, or documentation of work experience, which at a minimum shall include specific dates of employment, each employer's name, address, and telephone number, and specific job duties, as evidence of meeting the work experience requirements;

(iii) course completion diplomas issued by the training provider as evidence of meeting the training requirements; and

(iv) appropriate documentation of certifications or registrations.

(c) Procedure for issuance or denial of a risk assessor certificate.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a risk assessor certificate by submitting a complete lead occupation application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) Within 180 calendar days after application approval, the applicant shall be required to attain a passing score on the third-party examination for risk assessors.

(A) An applicant shall not sit for the third-party examination for risk assessors more than three times within 180 calendar days after the issuance date of the notice of an approved application.

(B) The applicant's failure to obtain a passing score on the third-party examination for risk assessors within the 180-day period following the notice of an approved application for a certificate shall result in KDHE's denial of the individual's application for a certificate. The individual may reapply to KDHE pursuant to this regulation but only after retaking the risk assessor training course.

(3) After the applicant passes the third-party examination, a two-year risk assessor certificate shall be issued by KDHE.

(4) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-6a. Application process and requirements for the certification of an elevated blood lead level investigator. (a) Application for an elevated blood lead (EBL) level investigator certificate.

(1) Each applicant for an elevated blood lead level investigator certificate shall be selected by KDHE. Each selected applicant shall submit a completed application to KDHE before issuance of a certificate.

(2) Each application shall include the following:

(A) A completed lead occupation certificate application on a form provided by KDHE, which shall include the following:

(i) The applicant's full legal name, home address, and telephone number;

(ii) the name, address, and telephone number of the applicant's current employer;

(iii) the applicant's state-issued identification number or federal employment identification number;

(iv) the county or counties in which the applicant is employed;

(v) the address where the applicant would like to receive correspondence regarding the application or certification;

(vi) the occupation for which the applicant wishes to be certified;

(vii) proof of any certification for lead occupations in other states, including the names of the other states, type of certification, certification expiration date, certificate number, and copies of the other states' certificate or license;

(viii) proof of any certification by the EPA, including the EPA region number, type of certification, certification expiration date, certificate number, and a copy of the EPA certificate;

(ix) the type of training completed, including the name of the training provider, diploma identification number, and dates of course attendance;

(x) any employment history or education that meets the experience requirements in subsection (b);

(xi) any criminal history; and

(xii) the signature of the applicant, which shall certify that all information in the application is complete and true to the best of the applicant's knowledge and that the applicant will comply with applicable state statutes and regulations;

(B) a copy of the risk assessor and lead inspector training course completion diploma and any required refresher course completion diplomas; and

(C) documentation pursuant to subsection (b) as evidence of meeting the education or experience requirements for an elevated blood lead level investigator.

(b) Training, education, and experience requirements for an elevated blood lead level investigator certificate.

(1) Each applicant for a certificate as an elevated blood lead level investigator shall complete a risk assessor training course and a lead inspector training course and shall be required to attain passing scores on both course examinations.

(2) Each applicant for a certificate as an elevated blood level investigator shall complete a KDHE-sponsored EBL training course, shall meet the minimum education and experience requirements for a certified elevated blood lead level investigator, and shall be required to attain a passing score on the third-party elevated blood lead level investigator examination.

(3) (A) The minimum education and experience requirements for a certified elevated blood lead level investigator shall include at least one of the following:

(i) A bachelor's degree and experience in a related field, including nursing, public health, housing

repair and inspection, lead hazard investigation, or environmental remediation work; or

(ii) an associate's degree and experience in a related field, including nursing, public health, housing repair and inspection, lead hazard investigation, or environmental remediation work; or

(iii) certification as an industrial hygienist, or certification in public health or environmental health; or

(iv) a high school diploma or a certificate of high school equivalency (GED), in addition to experience in a related field, including nursing, public health, housing repair and inspection, lead hazard investigation, or environmental remediation work.

(B) The following documents shall be recognized by KDHE as evidence of meeting the requirements listed in paragraph (b)(3)(A):

(i) Official academic transcripts or diplomas as evidence of meeting the education requirements;

(ii) resumes, letters of reference, or documentation of work experience, which at a minimum shall include specific dates of employment, each employer's name, address, and telephone number, and specific job duties, as evidence of meeting the work experience requirements;

(iii) course completion diplomas issued by the training provider as evidence of meeting the training requirements; and

(iv) appropriate documentation of certifications or registrations.

(4) Upon receipt of a complete and qualifying application, an elevated blood lead level investigator certificate may be issued with specific restrictions pursuant to an agreement between the applicant, the applicant's employer or the applicant's controlling agency, and KDHE.

(c) Procedure for issuance or denial of an elevated blood lead level investigator certificate.

(1) Each applicant shall be informed in writing by the secretary that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the retraction of KDHE's request to the applicant to become an elevated blood lead level

investigator and result in the denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may, at the request of KDHE, reapply to KDHE for an elevated blood lead level investigator certificate by submitting a complete lead occupation application form.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) Within 180 calendar days after application approval, the applicant shall be required to attain a passing score on the third-party examination for elevated blood lead level investigators.

(A) An applicant shall not sit for the third-party examination for elevated blood lead level investigators more than three times within 180 calendar days after the issuance date of the notice of an approved application.

(B) The applicant's failure to obtain a passing score on the third-party examination for elevated blood lead level investigators within the 180-day period following the notice of an approved application for a certificate shall result in KDHE's denial of the individual's application for a certificate. At the request of KDHE, the individual may reapply to KDHE pursuant to this regulation, but only after retaking the KDHE risk-assessor training course.

(3) After the applicant passes the third-party examination, a two-year elevated blood lead level investigator certificate shall be issued by KDHE.

(4) The certificate shall be issued with specific restrictions pursuant to an agreement between the applicant or the applicant's employer and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203 and 65-1,207; effective April 9, 2010.)

28-72-7. Application process and requirements for the certification of lead abatement workers. (a) Application for a lead abatement worker certificate.

(1) Each applicant for a lead abatement worker certificate shall submit a completed application to KDHE before consideration for certificate issuance. Each application for certification shall be received by KDHE within one year after successful completion of the lead abatement worker training course.

(2) Each application shall include the information specified in K.A.R. 28-72-5(a)(2)(A) and the following:

(A) A copy of the lead abatement worker training course completion diploma, and any required refresher course completion diplomas; and

(B) A payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a lead abatement worker certificate shall apply to KDHE within one year after the applicant's successful completion of the lead abatement worker training course, as indicated on the certificate of completion. Applicants failing to apply within one year after the date on the training course completion diploma shall, before making application for certification, successfully complete the eight-hour lead abatement worker refresher training course.

(4) Each applicant who fails to apply within two years after the lead abatement worker training and who has not successfully completed refresher training shall be required to successfully complete the lead abatement worker training course before submitting an application for a lead abatement worker certificate.

(b) Training, education, and experience requirements for a lead abatement worker's certificate. Each applicant for a certificate as a lead abatement worker shall complete a lead abatement worker training course and shall be required to achieve a passing score on the course examination. The applicant shall submit a course completion diploma issued by the training provider as evidence of meeting this requirement.

(c) Procedure for issuance or denial of a lead abatement worker certificate.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in

writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by KDHE in writing that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a lead abatement worker certificate by submitting a complete lead occupation application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) If the application is approved, a two-year lead abatement worker certificate shall be issued by KDHE.

(3) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-7a. Application process for renovators and requirements for certification in lead-safe work practices. (a) Application for renovator certification.

(1) Each applicant seeking certification shall submit a completed application to KDHE before consideration for the certificate issuance. Each application for certification shall be received by KDHE within one year after successful completion of the "lead-safe work practices in Kansas" training course.

(2) Each application shall include the following:

(A) A completed certificate application on a form provided by KDHE, which shall include the following:

(i) The applicant's full legal name, home address, and telephone number;

(ii) the name, address, and telephone number of the applicant's current employer;

(iii) the applicant's state-issued identification number or federal employment identification number;

(iv) the county or counties in which the applicant is employed;

(v) the address where the applicant would like to receive correspondence regarding the application or certification;

(vi) proof of any certification as a renovator in other states, including the names of the other states, type of certification, certification expiration date, certificate number, and copies of the other states' certificate or license;

(vii) proof of any certification by the EPA, including the EPA region number, type of certification, certification expiration date, certificate number, and a copy of the EPA certificate;

(viii) the type of training completed, including the name of the training provider, diploma identification number, and date of course attendance; and

(ix) the signature of the applicant, which shall certify that all information in the application is complete and true to the best of the applicant's knowledge and that the applicant will comply with applicable state statutes and regulations;

(B) a copy of the "lead-safe work practices in Kansas" training course completion diploma, and any required refresher course completion diploma; and

(C) a payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a renovator certificate shall apply to KDHE within one year after the applicant's successful completion of the "lead-safe work practices in Kansas" training course, as indicated on the certificate of completion. Applicants failing to apply within one year after the date on the training course completion diploma shall, before making application for certification, be required to successfully complete the four-hour lead-safe work practices in Kansas refresher training course.

(b) Training, education, and experience requirements for a renovator certificate. Each applicant shall complete a "lead-safe work practices in Kansas" training course and shall be required to achieve a passing score on the course examination. The applicant shall submit a course completion certificate issued by the training provider as evidence of meeting this requirement.

(c) Procedure for issuance or denial of a renovator certificate.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the application shall be approved by the secretary, or the applicant shall be informed in writing that the application is denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a renovator certificate by submitting a complete lead occupation application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) If the application is approved, a five-year renovator certificate shall be issued by KDHE.

(3) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective April 9, 2010.)

28-72-8. Application process and requirements for the certification of lead abatement supervisors. (a) Application for a lead abatement supervisor certificate.

(1) Each applicant for a lead abatement supervisor certificate shall submit a completed application to KDHE before consideration for certificate issuance. Each application for certification shall

be received by KDHE at least 30 days before the date of the third-party examination, but the deadline for filing applications may be waived by KDHE as particular circumstances justify.

(2) Each application shall include the information specified in K.A.R. 28-72-5(a)(2)(A) and the following:

(A) A copy of the lead abatement supervisor training course completion diploma, and any required refresher course completion diplomas;

(B) documentation pursuant to subsection (c) as evidence of meeting the education or experience requirements for lead abatement supervisors; and

(C) a payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a lead abatement supervisor certificate shall apply to KDHE within one year after the applicant's successful completion of the lead abatement supervisor training course, as indicated on the course completion diploma. Each applicant failing to apply within one year after the date on the training course completion certificate shall, before making application for certification, be required to successfully complete the eight-hour lead abatement supervisor refresher training course.

(4) Each applicant who fails to apply within two years after the lead abatement supervisor training and who has not successfully completed refresher training shall be required to successfully complete the lead abatement supervisor training course before submitting an application for a lead abatement supervisor certificate.

(b) Training and experience requirements for a lead abatement supervisor certificate.

(1) Each applicant for a certificate as a lead abatement supervisor shall complete a lead abatement supervisor training course and shall be required to achieve passing scores on the course examination and the third-party examination.

(2) Each applicant for a certificate as a lead abatement supervisor shall meet the minimum experience requirements for a certified lead abatement supervisor.

(A) The minimum experience requirements for a lead abatement supervisor certificate shall include at least one of the following:

(i) At least one year of experience as a certified lead abatement worker certified by the secretary, the EPA, or an EPA-approved state;

(ii) at least two years of experience in asbestos abatement work as a construction manager or superintendent;

(iii) at least two years of experience as a manager for environmental hazard remediation projects; or

(iv) at least two years of experience as a supervisor in residential construction.

(B) The following documents shall be recognized by KDHE as evidence of meeting the requirements listed in paragraph (b)(2)(A):

(i) Resumes, letters of reference, or documentation of work experience, which shall include specific dates of employment, each employer's name, address, and telephone number, and specific job duties, as evidence of meeting the work experience requirements;

(ii) course completion diplomas issued by a training provider as evidence of meeting the training requirements; and

(iii) a copy of the lead abatement supervisor certificate or identification badge as evidence of having been a certified lead abatement supervisor.

(c) Procedure for issuance or denial of a lead abatement supervisor certificate.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a lead abatement supervisor certificate by submitting a complete lead occupation application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may re-

quest a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) Within 180 calendar days after application approval, the applicant shall be required to attain a passing score on the third-party examination for lead abatement supervisors.

(A) An applicant shall not sit for the third-party examination for lead abatement supervisors more than three times within 180 calendar days after the issuance date of the notice of an approved application.

(B) The applicant's failure to obtain a passing score on the third-party examination for lead abatement supervisors within the 180-day period following the notice of an approved application for a certificate shall result in the secretary's denial of the individual's application for a certificate. The individual may reapply to KDHE pursuant to this regulation but only after retaking the lead abatement supervisor training course.

(3) After the applicant passes the third-party examination, a two-year lead abatement supervisor certificate shall be issued by KDHE.

(4) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-9. Application for the certification of project designers. (a) Application for a project designer certificate.

(1) Each applicant for a project designer certificate shall submit a completed application to KDHE before consideration for certificate issuance. Each application for certification shall be received by KDHE within one year of successful completion of the project designer training course.

(2) Each application shall include the information specified in K.A.R. 28-72-5(a)(2)(A) and the following:

(A) A copy of the project designer training course completion diploma, and any required refresher course completion diplomas;

(B) documentation pursuant to subsection (b) as evidence of meeting the education or experience requirements for project designers; and

(C) a payment to KDHE for the nonrefundable fee specified in K.A.R. 28-72-3.

(3) Each applicant for a project designer certificate shall apply to KDHE within one year of the applicant's successful completion of the project designer training course, as indicated on the course completion diploma. Each applicant failing to apply within one year after the date on the training course completion diploma shall, before making application for certification, be required to successfully complete the four-hour project designer refresher training course.

(4) Each applicant who fails to apply within two years of the project designer training course and who has not successfully completed a refresher training course shall successfully complete the project designer training course before submitting an application for a project designer certificate.

(b) Training, education, and experience requirements for a project designer certificate.

(1) Each applicant for a certificate as a project designer shall complete a lead abatement supervisor training course and a project designer course and shall be required to achieve passing scores on both course examinations.

(2) Each applicant for a certificate as a project designer shall meet the minimum education and experience requirements for a certified project designer.

(A) The minimum education and experience requirements for a certified project designer shall include at least one of the following:

(i) A bachelor's degree in engineering, architecture, or a related profession, and one year of experience in building construction and one year of experience as a certified lead professional;

(ii) at least one year of experience as a certified lead hazard risk assessor, certified by the secretary, the EPA, or an EPA-approved state, and at least two years of experience in building construction and design; or

(iii) at least four years of experience as a lead abatement supervisor and four years of experience in building construction and design.

(B) The following documents shall be recognized by KDHE as evidence of meeting the requirements listed in paragraph (b)(2)(A):

(i) Official academic transcripts or diplomas, as evidence of meeting the education requirements;

(ii) resumes, letters of reference, or documentation of work experience, which shall include specific dates of employment, each employer's name, address, and telephone number, and specific job duties, as evidence of meeting the work experience requirements;

(iii) course completion diplomas issued by the training provider as evidence of meeting the training requirements; and

(iv) a copy of the project designer certificate or identification badge as evidence of having been a certified project designer.

(c) Procedure for issuance or denial of a project designer certificate.

(1) The applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the individual's application for certification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If an application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If an application is denied, the applicant may reapply to KDHE for a project designer certificate by submitting a complete lead occupation application form with another nonrefundable certification fee, as specified in K.A.R. 28-72-3.

(D) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(2) If the application is approved, a two-year project designer certificate shall be issued by KDHE.

(3) A certificate may be issued with specific restrictions pursuant to an agreement between the applicant and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-10. Application process and licensure renewal requirements for lead activity firms. (a) Application for a lead activity firm license.

(1) Each applicant for a lead activity firm license shall submit a completed application to KDHE for consideration for license issuance.

(2) The application shall include the following:

(A) A completed lead activity firm application on a form provided by KDHE, which shall include the following:

(i) The applicant's name, address, and telephone number;

(ii) if the applicant is a sole proprietorship, the applicant's social security number or, if the applicant is a corporation, the applicant's federal employee identification number;

(iii) the county or counties in which the applicant is located;

(iv) a description of any lead-based paint activities that the applicant will be conducting, including lead inspection, risk assessments, lead abatement projects, lead hazard control, and project design;

(v) a certification that the lead activity firm will directly employ only KDHE-certified individuals to conduct lead-based paint activities or any KDHE-approved lead hazard control; and

(vi) a certification that the lead activity firm and the firm's employees will follow the Kansas work practice standards for lead-based paint activities specified in K.A.R. 28-72-13 through K.A.R. 28-72-21;

(B) if the applicant is required to be registered and in good standing with the Kansas secretary of state's office, the applicant shall submit a copy of the applicant's certificate of good standing to KDHE; and

(C) payment to KDHE for the applicable nonrefundable fee specified in K.A.R. 28-72-3, unless the lead activity firm is a state, federally recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS, which shall accompany the application.

(b) Procedure for issuance or denial of a lead activity firm license.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the lead activity firm's application for licensure.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If an application is approved, a two-year lead activity firm license shall be issued by the secretary.

(C) If an application for licensure is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Licensure may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(D) If an application is denied, the applicant may reapply at any time to KDHE for a lead activity firm license by submitting a complete lead activity firm application form with another non-refundable license fee, as specified in K.A.R. 28-72-3.

(E) If an applicant is aggrieved by a determination to deny licensure, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(F) A license may be issued with specified restrictions pursuant to an agreement between the applicant and the secretary.

(2) If a licensed lead activity firm changes ownership, the new owner shall notify KDHE in writing no later than 30 calendar days before the change of ownership becomes effective. The notification shall include the following information:

(A) A new lead activity firm license application;

(B) the applicable nonrefundable fee specified in K.A.R. 28-72-3; and

(C) the date that the change of ownership will become effective.

(3) The new lead activity firm application shall be processed in the same manner as that required for an initial license in accordance with this regulation.

(4) The current lead activity firm's license shall expire on the effective date specified in the notification of the change of ownership.

(5) A completed application for a lead activity firm license renewal shall be submitted to KDHE

at least 60 days before the expiration date on the license, accompanied by the applicable nonrefundable renewal fee specified in K.A.R. 28-72-3. However, each lead activity firm that is a state, federally recognized Indian tribe, local government, or nonprofit organization as evidenced by a letter of determination issued by the IRS and accompanying the application shall be exempt from payment of this fee. If the licensee fails to apply at least 60 days before the license expiration date, renewal of the license by the secretary before the end of the licensing period shall not be guaranteed by KDHE.

(6) If a licensed lead activity firm allows the firm's license to expire, the firm shall be required to submit an application in the same manner as that required for an application for an initial license, in accordance with this regulation. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-10a. Application process and licensure renewal requirements for renovation firms. (a) Application for a renovation firm license.

(1) Each applicant for a renovation firm license shall submit a completed application to KDHE for consideration for license issuance.

(2) The application shall include the following:

(A) A completed renovation firm application on a form provided by KDHE, which shall include the following:

(i) The applicant's name, address, and telephone number;

(ii) if the applicant is a sole proprietorship, the applicant's social security number or, if the applicant is a corporation, the applicant's federal employee identification number;

(iii) the county or counties in which the applicant is located;

(iv) a description of any renovation activities that the applicant will be conducting, including remodeling, room addition, window-door removal or replacement, general repair projects, weatherization projects, interior and exterior paint projects, exterior siding installation, or other renovation activity;

(v) a certification that the renovation firm will employ KDHE-certified individuals to conduct renovation activities; and

(vi) a certification that the renovation firm and the firm's employees will follow the Kansas work practice standards for renovation activities specified in K.A.R. 28-72-2 and K.A.R. 28-72-51 through K.A.R. 28-72-54;

(B) if the applicant is required to be registered and in good standing with the Kansas secretary of state's office, a copy of the applicant's certificate of good standing; and

(C) a payment to KDHE for the applicable non-refundable fee specified in K.A.R. 28-72-3.

(b) Procedure for issuance or denial of a renovation firm license.

(1) Each applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is approved, a five-year renovation firm license shall be issued by the secretary.

(B) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days shall result in the secretary's denial of the firm's application for licensure.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(C) If an application for licensure is denied, the written notice of denial to the applicant shall specify the reason or reasons for the denial. Licensure may be denied by the secretary pursuant to K.S.A. 65-1,207(a), and amendments thereto.

(D) If an application is denied, the applicant may reapply at any time to KDHE for a renovation firm license by submitting a complete renovation firm application form with another nonrefundable license fee, as specified in K.A.R. 28-72-3.

(E) If an applicant is aggrieved by a determination to deny licensure, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(F) A license may be issued with specified restrictions pursuant to an agreement between the applicant and the secretary.

(2) If a licensed renovation firm changes ownership, the new owner shall notify KDHE in writing, no later than 30 calendar days before the change of ownership becomes effective. The notification shall include the following information:

(A) A new renovation firm license application;

(B) the applicable nonrefundable fee specified in K.A.R. 28-72-3; and

(C) the date that the change of ownership will become effective.

(3) The new renovation firm application shall be processed in the same manner as that required for an initial license in accordance with this regulation.

(4) The current renovation firm's license shall expire on the effective date specified in the notification of the change of ownership.

(5) A completed application for a renovation firm license renewal shall be submitted to KDHE at least 60 days before the expiration date on the license and shall be accompanied by the applicable nonrefundable renewal fee specified in K.A.R. 28-72-3. If the licensee fails to apply at least 60 days before the license expiration date, renewal of the license by the secretary before the end of the licensing period shall not be guaranteed.

(6) If a licensed renovation firm allows the firm's license to expire, the firm shall be required to submit an application in the same manner as that required for an application for an initial license, in accordance with this regulation. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective April 9, 2010.)

28-72-11. Renewal of lead occupation certificates. (a) Renewal application for lead inspector, risk assessor, elevated blood lead level investigator, lead abatement supervisor, lead abatement worker, renovator, and project designer.

(1) If a certified individual wishes to renew a lead occupation certificate, the individual shall submit a completed application for renewal of certificate, including the required supporting documentation, to KDHE at least 60 days before the certificate's expiration date as indicated on the certificate. Failure of the certified individual to submit an application at least 60 days before the certificate's expiration date may result in the certificate not being renewed before the current license expires.

(2) The certified individual applying for renewal shall complete the refresher training course for

the appropriate occupation within the 12-month period immediately preceding the certificate expiration date.

(3) Each renewal application shall include the following:

(A) A completed lead occupation certificate application on a form provided by KDHE, which shall include the following:

(i) The applicant's full legal name, home address, and telephone number;

(ii) the name, address, and telephone number of the applicant's current employer;

(iii) the certified individual's state-issued identification number or federal employment identification number;

(iv) the county or counties in which the certified individual is employed;

(v) the address where the certified individual would like to receive correspondence regarding the certification;

(vi) the lead occupation certificate that the applicant wishes to have renewed;

(vii) the type of refresher training course completed, including the name of the training provider, diploma identification number, and dates of course attendance; and

(viii) the signature of the applicant, which shall certify that all information in the application is complete and true to the best of the applicant's knowledge and that the applicant will comply with applicable state statutes and regulations;

(B) a copy of the refresher training course completion diploma for the appropriate occupation; and

(C) a payment to KDHE for the appropriate nonrefundable recertification fee, as specified in K.A.R. 28-72-3.

(b) Procedure for issuance or denial of a renewal lead occupation certificate.

(1) The applicant shall be informed by the secretary in writing that the application is approved, incomplete, or denied.

(A) If an application is incomplete, the notice shall include a list of additional information or documentation required to complete the renewal application.

(i) Within 30 calendar days after the issuance date of the notice of an incomplete application, the applicant shall submit, to the secretary in writing, the information requested in the written notice.

(ii) Failure to submit the information requested in the written notice within 30 calendar days

after the issuance of the notice shall result in the secretary's denial of the individual's application for recertification.

(iii) After receipt of the information requested in the written notice, the applicant shall be informed by the secretary in writing that the application is either approved or denied.

(B) If a renewal application for certification is denied, the written notice of denial to the applicant shall specify the reason or reasons for denial. Certification may be denied by the secretary pursuant to K.S.A. 65-1,207(b), and amendments thereto.

(C) If a renewal application is denied, the applicant may reapply to KDHE for a lead occupation certificate by submitting a complete lead occupation application form with the appropriate nonrefundable recertification fee, as specified in K.A.R. 28-72-3.

(2) If an applicant is aggrieved by a determination to deny certification, the applicant may request a hearing with the office of administrative hearings, in accordance with the Kansas administrative procedure act.

(3) If a renewal application is approved, a two-year certificate shall be issued by KDHE.

(4) A certificate may be issued with specific restrictions pursuant to an agreement between the certified individual and KDHE. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,203, and 65-1,207; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-12. Application process and requirements for reapplication after certificate expiration.

(a) Unless renewed or revoked sooner, each certificate shall expire two years after its effective date indicated on the current certificate. If a certified individual allows the certificate to expire before renewal but desires to be certified, the individual shall reapply to KDHE.

(b) Each application shall include the information specified in K.A.R. 28-72-5(a)(2)(A) and the following:

(1) Any employment history or education that meets the experience requirements in K.A.R. 28-72-5 through K.A.R. 28-72-9, as applicable;

(2) the signature of the applicant, which shall certify that all information in the application is complete and true to the best of the applicant's knowledge and that the applicant will comply with applicable state statutes and regulations;

(3) a copy of the lead occupation training course completion diploma for the appropriate occupation; and

(4) a payment to KDHE for the nonrefundable certification fee appropriate to the lead occupation, as specified in K.A.R. 28-72-3.

(c)(1) Each applicant who fails to reapply before the certificate expiration date and who has not successfully completed a refresher training course shall be required to successfully complete the appropriate refresher training course. The applicant may be required to complete the initial training course again.

(2) Each certified lead inspector, risk assessor, or lead abatement supervisor who allows the certification to expire before renewal shall retake the third-party examination for the appropriate occupation.

(d) The procedure for issuance or denial of a certificate after its expiration shall be that specified in K.A.R. 28-72-11(b). (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-13. Work practice standards; general standards. (a) Except as provided in K.S.A. 65-1,203 and amendments thereto, all lead-based paint activities, as defined in the act, shall be performed pursuant to the work practice standards in this article.

(b) Except as provided in K.S.A. 65-1,203 and amendments thereto, when performing any lead-based paint activity that involves an inspection, lead-hazard screen, risk assessment, or abatement, a certified individual shall perform that activity in compliance with the applicable requirements in this regulation.

(c) Certified lead inspectors and risk assessors conducting lead inspection activities shall avoid potential conflicts of interest by not being contracted, subcontracted, or employed by any lead activity firm performing lead abatement activities on the same lead abatement project.

(d)(1) Each certified individual shall comply with the following documented methodologies, which are hereby adopted by reference, when performing any lead-based paint activity:

(A) The U.S. department of housing and urban development (HUD) "guidelines for the evaluation and control of lead-based paint hazards in housing," dated June 1995, excluding chapters 1

and 2 and including appendices 7, 8, 11, 12, 13, and 14. Chapter 7 in the June 1995 edition is not adopted; instead, the 1997 revision of chapter 7 is adopted; and

(B) the EPA "residential sampling for lead: protocols for dust and soil sampling," EPA final report, MRI project no. 9803, published March 29, 1995.

(2) If a conflict exists between either of the methodologies listed in this subsection and any federal or state statute or regulation or any city or county ordinance, the most stringent of these shall be adhered to by the certified lead inspector or risk assessor. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-14. Work practice standards; inspection. (a) Except as provided in K.S.A. 65-1,203 and amendments thereto, a lead inspection or any portion of a lead inspection shall be conducted only by a lead inspector or risk assessor, and all inspections shall be conducted according to the procedures specified in this regulation.

(b) When conducting an inspection, the lead inspector or risk assessor shall select the following locations according to the documented methodologies in K.A.R. 28-72-13 (d)(1) and shall test for the presence of lead-based paint:

(1) In a residential dwelling and child-occupied facility, each interior component with a distinct painting history and each exterior component with a distinct painting history shall be tested for lead-based paint, except those components that the lead inspector or risk assessor determines to have been replaced after 1978 or not to contain lead-based paint; and

(2) in a multifamily dwelling or child-occupied facility, each component with a distinct painting history in every common area, except those components that the lead inspector or risk assessor determines to have been replaced after 1978 or not to contain lead-based paint.

(c)(1) Paint shall be sampled according to both of the following requirements:

(A) The analysis of paint to determine the presence of lead shall be conducted using the documented methodologies in K.A.R. 28-72-13 (d)(1).

(B) All collected paint chip samples shall be analyzed according to K.A.R. 28-72-19 to determine if the samples contain detectable levels of lead that can be quantified numerically.

(2) The lead inspector or risk assessor shall prepare an inspection report, which shall include the following information:

- (A) The date of each inspection;
 - (B) the address of the building;
 - (C) the date of the construction;
 - (D) apartment numbers, if applicable;
 - (E) the name, address, and telephone number of the owner or owners of each residential dwelling;
 - (F) the name, signature, and certificate number of each certified lead inspector or risk assessor, or both, conducting testing;
 - (G) the name, address, and telephone number of the lead activity firm employing each lead inspector or risk assessor, or both, if applicable;
 - (H) each testing method and device or sampling procedure, or both, employed for paint analysis, including quality control data and, if used, the serial number of any x-ray fluorescence (XRF) device and a copy of the XRF device user's certificate of training provided by the equipment manufacturer;
 - (I) a summary of laboratory results, categorized as positive or negative, and the name of each recognized laboratory that conducted the analysis, along with the laboratory's certification number;
 - (J) floor plans or sketches of the units inspected, showing the appropriate test locations and any identifying number systems;
 - (K) a summary of the substrates tested, including the identification of component, component integrity, paint condition and color, and test identification numbers associated with the results; and
 - (L) the results of the inspection expressed in terms appropriate to the sampling method used.
- (d) Time frame for submission of reports. The inspection report shall be provided to the owner of the property within 20 business days after completion of the lead inspection. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-15. Work practice standards; lead hazard screen. (a) Except as provided in K.S.A. 65-1,203 and amendments thereto, a lead hazard screen shall be conducted only by a risk assessor.

(b) If a lead hazard screen is conducted, the risk assessor shall conduct each lead hazard screen as follows:

(1) Background information regarding the physical characteristics of the residential dwelling or

child-occupied facility and occupant-use patterns that could cause lead-based paint exposure to one or more children through the age of 72 months shall be collected.

(2) An inspection of the residential dwelling or child-occupied facility shall be conducted to achieve the following:

(A) Determine if any deteriorated paint is present; and

(B) locate at least two dust sampling locations.

(3) If deteriorated paint is present, each surface with deteriorated paint that is determined, using one or more of the documented methodologies in K.A.R. 28-72-13 (d)(1), to be in poor condition and to have a distinct painting history shall be tested for the presence of lead.

(4) In residential dwellings, a dust sample shall be collected from the floor and from each window, and in rooms, hallways, or stairwells where one or more children through the age of 72 months are most likely to come in contact with dust.

(5) In multifamily dwellings and child-occupied facilities, in addition to the floor and window samples required in paragraph (b)(4), the risk assessor shall also collect dust samples from common areas where one or more children through the age of 72 months are most likely to come into contact with dust.

(c) Dust samples shall be collected and analyzed in the following manner:

(1) All dust samples shall be taken using one or more of the documented methodologies in K.A.R. 28-72-13 (d)(1).

(2) All collected dust samples shall be analyzed according to K.A.R. 28-72-19 to determine if the samples contain detectable levels of lead that can be quantified numerically.

(d) Paint shall be sampled according to both of the following requirements:

(1) The analysis of paint to determine the presence of lead shall be conducted using one or more of the documented methodologies in K.A.R. 28-72-13 (d)(1).

(2) All collected paint chip samples shall be analyzed according to K.A.R. 28-72-19 to determine if the samples contain detectable levels of lead that can be quantified numerically.

(e) The risk assessor shall prepare a lead hazard screen report, which shall include the following information:

(1) The date of the assessment;

(2) the address of each building;

(3) the date of construction of each building;

- (4) the apartment number, if applicable;
 - (5) the name, address, and telephone number of each owner of each building;
 - (6) the name, signature, and certificate number of the certified risk assessor conducting the assessment;
 - (7) the name, address, and telephone number of each recognized laboratory conducting analysis of collected samples, along with the laboratory's certificate number;
 - (8) the results of the visual inspection;
 - (9) the testing method and sampling procedure employed for the paint analysis;
 - (10) specific locations of each paint component tested for the presence of lead;
 - (11) all data collected from on-site testing, including quality control data and, if used, the serial number of any XRF device, and a copy of the XRF device user's certificate of training provided by the equipment manufacturer;
 - (12) all results of laboratory analysis on collected paint, soil, and dust samples;
 - (13) any other sampling results;
 - (14) any background information collected regarding the physical characteristics of the residential dwelling or multifamily dwelling and occupant-use patterns that could cause lead-based paint exposure to one or more children through the age of 72 months; and
 - (15) recommendations, if warranted, for a follow-up risk assessment and, as appropriate, any further actions.
- (f) Time frame for submission of reports. The lead hazard screen report shall be provided to the owner of the property within 20 business days after completion of the lead hazard screen. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-16. Work practice standards; risk assessment. (a) Except as provided by K.S.A. 65-1,203 and amendments thereto, a risk assessment shall be conducted only by a person certified by KDHE, according to K.A.R. 28-72-2 and K.A.R. 28-72-6 through K.A.R. 28-72-12 as a risk assessor. If a risk assessment is conducted, the assessment shall be conducted according to the procedures specified in this regulation.

(b) An inspection of the residential dwelling or child-occupied facility shall be undertaken to locate the existence of deteriorated paint, assess the

extent and causes of the deterioration, and assess other potential lead-based paint hazards.

(c) Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant-use patterns that could cause lead-based paint exposure to one or more children through the age of 72 months shall be collected.

(d) Each surface with deteriorated paint that is determined, using one or more of the documented methodologies in K.A.R. 28-72-13 (d)(1), to be in poor condition and to have a distinct painting history, shall be tested for the presence of lead. Each other surface determined, using one or more of the documented methodologies in K.A.R. 28-72-13 (d)(1), to be a potential lead-based paint hazard and to have a distinct painting history shall also be tested for the presence of lead.

(e) In residential dwellings, single-surface dust samples from at minimum one window and at minimum one floor area shall be collected in all living areas where one or more children through the age of 72 months are most likely to come into contact with dust.

(f) For multifamily dwellings and child-occupied facilities, the samples required in subsection (e) of this regulation shall be taken. In addition, window and floor dust samples shall be collected in the following locations:

(1) Common areas adjacent to the sampled residential dwelling or child-occupied facility; and

(2) other common areas in the building where the risk assessor determines that one or more children through the age of 72 months are likely to come into contact with dust.

(g) For child-occupied facilities, window and floor dust samples shall be collected in each room, hallway, or stairwell utilized by one or more children through the age of 72 months and in other common areas in the child-occupied facility where the risk assessor determines that one or more children through the age of 72 months are likely to come into contact with dust.

(h) Soil samples shall be collected and analyzed for lead concentrations in the following locations:

(1) Exterior play areas where bare soil is present; and

(2) dripline or foundation areas where bare soil is present.

(i) All paint, dust, or soil sampling or testing shall be conducted using one or more of the documented methodologies in K.A.R. 28-72-13(d)(1).

(j) All collected paint chip, dust, or soil samples shall be analyzed according to K.A.R. 28-72-19 to determine if the samples contain detectable levels of lead that can be quantified numerically.

(k) The risk assessor shall prepare a risk assessment report, which shall include the following information:

- (1) The date of the assessment;
- (2) the address of each building;
- (3) the date of construction of the buildings;
- (4) the apartment number, if applicable;
- (5) the name, address, and telephone number of each owner of each building;
- (6) the name, signature, and certificate number of the risk assessor conducting the assessment;
- (7) the name, address, and telephone number of each recognized laboratory conducting an analysis of collected samples, along with the laboratory's certificate number;
- (8) the results of the visual inspection;
- (9) the testing method and sampling procedure used for each paint analysis;
- (10) specific locations of each painted component tested for the presence of lead;
- (11) all data collected from on-site testing, including quality control data and, if used, the serial number of any XRF device and a copy of the XRF device user's certificate of training provided by the equipment manufacturer;
- (12) all results of laboratory analyses on collected paint, soil, and dust samples;
- (13) any other sampling results;
- (14) any background information collected pursuant to subsection (c);
- (15) to the extent that they are used as part of the lead-based paint hazard determination, the results of any previous inspections or analyses for the presence of lead-based paint, or other assessments of lead-based paint-related hazards;
- (16) a description of the location, type, and severity of identified lead-based paint hazards and any other potential lead hazards; and
- (17) a description of interim controls or abatement options, or both, for each identified lead-based paint hazard and the suggested prioritization for addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure.

(l) Time frame for submission of reports. The risk assessment report shall be provided to the owner of the property and to the person requesting the risk assessment within 20 business days

after completion of the lead-based paint hazard risk assessment. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-17. Work practice standards; elevated blood lead level investigation risk assessments. (a) In order to perform an elevated blood lead (EBL) level investigation risk assessment, the EBL inspector shall have a certificate from KDHE.

(b) The EBL inspector shall have the parents or guardians of the EBL child complete an approved KDHE questionnaire before sampling. Environmental testing shall be linked to the EBL child's history and may include the testing of a prior residence or other areas frequented by the EBL child.

(c) Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant-use patterns that could cause lead-based paint exposure to one or more children through the age of 72 months shall be collected.

(d) Each surface of the dwelling itself, furniture, or play structures frequented by the EBL child that has deteriorated surface coatings shall be tested for the presence of lead.

(e) Dust samples from areas frequented by the EBL child, including play areas, porches, kitchens, bedrooms, and living and dining rooms, shall be collected. Dust samples shall also be collected from automobiles, work shoes, and laundry rooms if occupational lead exposure is a possibility.

(f) Soil samples shall be collected from bare soil areas of play, areas near the foundation of the house, and areas from the yard. If the EBL child spends significant time at the park or other play area, samples shall be collected from these areas, unless the area has already been sampled and documented.

(g) If necessary, water samples of the first-drawn water from the tap most commonly used for drinking water, infant formula, or food preparation shall be collected. For the purpose of this regulation, the term "first-drawn water" shall mean water that is taken from the tap after an undisturbed period of at least six hours, during which time the water has been in contact with the pipes and fixtures allowing any available lead to dissolve into the water.

(h) All paint, dust, and soil collection and testing shall be conducted using the documented methodologies in K.A.R. 28-72-13 (d)(1).

(i) No later than 20 days following the completion of the environmental investigation, the EBL investigator shall issue a report to the secretary that details the findings of the investigation and includes all the empirical data gathered during the investigation.

(j) All environmental investigation reports shall be reviewed by KDHE to determine if the exposure to lead hazards found on the property are a contributing cause of the EBL in the child.

(k) If a determination is made by KDHE that lead hazards found on the property are a contributing cause of the EBL in the child, a lead hazard control notice shall be issued by the secretary to the owner and occupants of the property. The lead hazard control notice shall include the following:

(1) Detailed, specific actions that must be taken to make the property lead-safe and suitable for habitation by the EBL child or any other children through 72 months of age;

(2) detailed strategies for both abatement and interim control of the lead hazards found;

(3) the date by which the remediation activities will be concluded; and

(4) the method of proving that the remediation activities are successfully completed.

(l) The verified findings of the environmental investigation and the lead hazard control notice shall not be used to the detriment of occupants by the owner of the property. The failure of any person to comply with the lead hazard control notice shall be considered a violation of K.S.A. 65-1,210, and amendments thereto, and the person shall be subject to the penalties provided in that statute. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202, 65-1,208, and 65-1,210; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-18. Work practice standards; lead abatement. (a) Except as provided in K.S.A. 65-1,203 and amendments thereto, a lead abatement shall be conducted only by an individual certified by KDHE and shall be conducted according to the procedures specified in this article.

(b) A lead abatement supervisor shall be required for each lead abatement project and shall be on-site during all work-site preparation and during the postabatement cleanup of work areas.

(1) At all other times when lead abatement activities are being conducted, the lead abatement supervisor shall be on-site or available by telephone,

pager, or answering service and shall be able to be present at the work site in no more than one hour.

(2) The lead abatement supervisor shall report to the work site during each lead abatement work practice standards inspection performed by KDHE. The lead activity firm that employs the lead abatement supervisor shall be subject to an abatement project reinspection fee if the lead abatement supervisor fails to be present at the work site as specified in this regulation.

(c) The lead abatement supervisor and licensed lead activity firm employing that supervisor shall ensure that all lead abatement activities are conducted according to the requirements of the Kansas work practice standards in this article and all other federal, state, and local requirements.

(d) Notification of the commencement of lead-based paint activities in a residential dwelling or child-occupied facility or as the result of a federal, state, or local order shall be given to KDHE before the commencement of abatement activities. The procedure for this notification shall be as follows:

(1) Each person or lead activity firm conducting a lead abatement project in target housing or in any child-occupied facility shall submit a notification to KDHE at least 10 business days before the onset of the lead abatement project.

(2) The notification shall be submitted to KDHE with a payment to KDHE for the nonrefundable project fee specified in K.A.R. 28-72-3.

(3) The notification form provided to the department shall include the following:

(A) The street address, city, state, zip code, and county of each location where lead abatement will occur;

(B) the name, address, and telephone number of the property owner;

(C) an indication of the type of structure or structures being abated, including single-family or multifamily dwelling, child-occupied facility, or any combination of these types;

(D) the date of the onset of the lead abatement project;

(E) the estimated completion date of the lead abatement project;

(F) the work days and hours of operation during which the lead abatement project will be conducted;

(G) the name, address, telephone number, and license number of the lead activity firm;

(H) the name and certificate number of each lead abatement worker;

(I) the type or types of lead abatement strategy or strategies that will be utilized, including enclosure, encapsulation, replacement, removal, or any combination of these strategies, and the specific locations within the unit where these strategies will be utilized;

(J) the signature of each lead abatement supervisor, which shall certify that all information provided in the project notification is complete and true to the best of the supervisor's knowledge; and

(K) a written certification from the lead abatement supervisor, which shall include a copy of the clearance report, within 10 days after successfully achieving clearance, that clearly states that all abatement control options were conducted in accordance with all local, state, and federal regulations, as well as in accordance with the preabatement notification letter submitted to KDHE.

(e) Emergency notification. If the lead activity firm is unable to comply with the 10-day notification period due to an emergency situation, the lead activity firm shall perform the following:

(1) Notify KDHE by telephone, facsimile, or electronic mail within 24 hours after the onset of the lead abatement project; and

(2) submit written notification and payment of fees as described in subsection (d) no more than two business days after the onset of the lead abatement project.

(f) A written occupant protection plan, which shall be unique to each residential dwelling or child-occupied facility, shall be developed before the lead abatement begins. The occupant protection plan shall describe the measures and management procedures that will be taken during the lead abatement to protect the building occupants from exposure to any lead-based paint hazards.

(1) The certified lead abatement supervisor or project designer responsible for the project shall prepare the occupant protection plan.

(2) The occupant protection plan shall meet the following requirements:

(A) Describe the work practices and strategies that will be taken during the lead abatement project to protect the building occupants from exposure to any lead hazards;

(B) include the results of any lead inspections or risk assessments completed before the commencement of the lead abatement project;

(C) be provided to an adult occupant of each dwelling or dwelling unit being abated and to the property owner, or property owner's designated

representative, before the commencement of the lead abatement project; and

(D) be submitted to KDHE with the lead abatement project notification.

(g) The work practices listed below shall be restricted as follows:

(1) Open-flame burning or torching of lead-based paint shall be prohibited.

(2) Machine sanding or grinding, or abrasive blasting or sandblasting of lead-based paint shall be prohibited unless used with high efficiency particulate air (HEPA) exhaust control that removes particles of 0.3 microns or larger from the air at 99.97 percent or greater efficiency.

(3) Dry scraping of lead-based paint shall be permitted only within 12 inches of electrical outlets or when treating defective paint spots totaling no more than two square feet in any one room, hallway, or stairwell, or totaling no more than 20 square feet on exterior surfaces.

(4) Operating a heat gun on lead-based paint shall be prohibited.

(5) Hydro blasting or pressurized water washing of lead-based paint shall be prohibited.

(6) The use of methylene chloride-based chemical strippers shall be prohibited.

(7) Solvents that have flashpoints below 140 Fahrenheit shall be prohibited.

(8) Enclosure strategies shall be prohibited if the barrier is not warranted by the manufacturer to last at least 20 years under normal conditions or if the primary barrier is not a solid barrier.

(9) Encapsulation strategies shall be prohibited if the encapsulant is not warranted by the manufacturer to last at least 20 years under normal conditions or if the encapsulant has been improperly applied.

(h) Permissible lead abatement project strategies.

(1) The following strategies shall be permissible for lead abatement projects:

(A) Replacement;

(B) the use of an enclosure;

(C) encapsulation; and

(D) removal.

(2) Each lead abatement strategy not specified in this article shall be submitted to and approved by KDHE for evaluation before implementation. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-18a. Work practice standards; lead abatement: replacement. When conducting a lead abatement project using the replacement strategy, the certified lead professional or licensed firm shall meet the following minimum requirements: (a) The site shall be prepared by first establishing a regulated area using fencing, barrier tape, or other appropriate barriers. The regulated area shall be marked to prevent uncertified personnel and restricting the general public from approaching closer than 20 feet to the abatement operation.

(b) Signs shall be posted at all entrances to the regulated area and shall include the words "WARNING: LEAD AREA. POISON. NO SMOKING OR EATING" in bold lettering not smaller than two inches tall, with additional language or symbols prohibiting entry to the regulated area by uncertified personnel and the general public. All signs shall be in a language that is easily recognizable by all certified lead professionals and by members of the general public where the lead abatement activities are taking place.

(c) Any heating and cooling system within the regulated area shall be shut down and the vents sealed with 6-mil polyethylene sheeting to prevent lead dust accumulation within the system.

(d) All items shall be cleaned within the regulated area by HEPA vacuuming or wet wiping with a cleaning solution, or both. Items shall then be either removed from the area or covered with 6-mil polyethylene sheeting and sealed with duct tape, to provide an airtight and watertight seal.

(e) At least two layers of 6-mil, or thicker, polyethylene sheeting shall be placed on the floor at the base of the component and extend at least 10 feet beyond the perimeter of the component to be replaced.

(f) The component and the area adjacent to the component shall be thoroughly wetted using a garden sprayer, airless mister, or other appropriate means to reduce airborne dust.

(g) After removal of the component, the surface behind the removed component shall be thoroughly wetted to reduce airborne dust.

(h) The component shall be wrapped or bagged completely in 6-mil polyethylene sheeting and sealed with duct tape to prevent loss of debris or dust.

(i) Before installing a new component, the area of replacement shall be cleaned by HEPA vacuuming the area again. Cleaning shall begin at the end of the work area farthest from the main en-

trance to the area and from the top to the bottom of the regulated area. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-18b. Work practice standards; lead abatement: enclosure. When conducting a lead abatement project using the enclosure strategy, the certified lead professional shall meet the following minimum requirements: (a) The site shall be prepared by first establishing a regulated area using fencing, barrier tape, or other appropriate barriers. The regulated area shall be marked to prevent uncertified personnel and the general public from approaching closer than 20 feet to the abatement project.

(b) Signs shall be posted at all entrances to the regulated area and shall include the words "WARNING: LEAD AREA. POISON. NO SMOKING OR EATING" in bold lettering not smaller than two inches tall, with additional language or symbols prohibiting entry to the regulated area by uncertified personnel and the general public. All signs shall be in a language that is easily recognized by all certified lead professionals and by members of the general public where the lead abatement activities are taking place.

(c) Any heating and cooling systems within the regulated area shall be shut down and the vents sealed with 6-mil polyethylene sheeting to prevent lead dust accumulation within the system.

(d) All items shall be cleaned within the regulated area by HEPA vacuuming or wet wiping with a cleaning solution, or both. Items shall then be either removed from the area or covered with 6-mil polyethylene sheeting and sealed with duct tape.

(e) At least one layer of 6-mil, or thicker, polyethylene sheeting shall be placed on the floor at the base of the component and extend at least 10 feet beyond the perimeter of the component to be enclosed.

(f) The surface to be enclosed shall be permanently labeled behind the enclosure horizontally and vertically, approximately every two feet with this warning: "Danger: Lead-Based Paint." The lettering on the label shall be boldfaced, at least two inches tall, and in a contrasting color.

(g)(1) The enclosure shall be applied directly onto the painted surface, or a frame shall be constructed of wood or metal, using nails, staples, or screws. Glue may be used in conjunction with the aforementioned fasteners, but shall not be used

alone. All enclosure items shall be back-caulked at all edges, seams, and abutment edges.

(2) The material used for the enclosure barrier shall be solid and rigid enough to provide adequate protection. Wallpaper, contact paper, films, folding walls, drapes, and similar materials shall not meet this requirement.

(3) Enclosure systems and their adhesives shall be designed to last at least 20 years.

(4) The substrate or building structure to which the enclosure is fastened shall be structurally sufficient to support the enclosure barrier for at least 20 years. If there is deterioration of the substrate or building structure that may impair the enclosure from remaining dust-tight for a minimum of 20 years, the substrate or building structure shall be repaired before attaching the enclosure. This deterioration may include mildew, water damage, dry rot, termite damage, or any structural damage.

(h) Preformed steel, aluminum, vinyl, or other construction material may be used for window frames, exterior siding, trim casings, column enclosures, moldings, or other similar components if they can be sealed.

(i) A material equivalent to one-quarter inch rubber or vinyl may be used to enclose stairs.

(j) The seams, edges, and fastener holes shall be sealed with caulk or other sealant, providing a dust-tight system.

(k) All equipment used in the regulated area shall be thoroughly cleaned with a cleaning solution or vacuumed with a HEPA vacuum, or both, before removal from the regulated area.

(l) Before clearance, the installed enclosure and surrounding regulated area shall be cleaned by vacuuming with a HEPA vacuum, wiping down all surfaces with a cleaning solution, rinsing all surfaces, and then HEPA vacuuming the area again. Cleaning shall begin at the end of the work area farthest from the main entrance to the area and from the top to the bottom of the regulated area.

(m) All enclosure systems used shall meet the requirements of all applicable building codes and fire, health, safety, and environmental regulations. (Authorized by and implementing K.S.A. 65-1, 202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-18c. Work practice standards; lead abatement: encapsulation. (a) The encapsulation strategy of lead abatement shall not be used on the following:

(1) Friction surfaces, including window sashes

and parting beads, door jambs and hinges, floors, and door thresholds;

(2) deteriorated components, including rotten wood, rusted metal, spalled or cracked plaster, and loose masonry;

(3) impact surfaces, including doorstops, window wells, and headers;

(4) deteriorated surface coatings if the adhesion or cohesion of the surface coating is uncertain or indeterminable; and

(5) incompatible coatings.

(b) When conducting a lead abatement project using the encapsulation strategy, the certified personnel shall comply with the following minimum requirements:

(1) The certified lead professional or licensed firm shall select an encapsulant that is a low volatile organic compound (V.O.C.), that is warranted by the manufacturer to last for at least 20 years, and that meets the requirements of all applicable building codes as well as fire, health, and environmental regulations.

(2) Each surface to be encapsulated shall have sound structural integrity and sound surface coating integrity and shall be prepared according to the manufacturer's recommendations.

(3) The site shall be prepared by first establishing a regulated area using fencing, barrier tape, or other appropriate barriers. The regulated area shall be marked to prevent uncertified personnel and the general public from approaching closer than 20 feet to the abatement project.

(4) Signs shall be posted at all entrances to the regulated area and shall include the words "WARNING: LEAD AREA. POISON. NO SMOKING OR EATING" in bold lettering at least two inches tall, with additional language or symbols prohibiting entry to the regulated area by uncertified personnel and the general public. All signs shall be in a language that is easily recognized by all certified lead professionals and by members of the general public where the lead abatement activities are taking place.

(5) Any heating and cooling systems within the regulated area shall be shut down and the vents sealed with 6-mil polyethylene sheeting to prevent lead dust accumulation within the system.

(6) All items shall be cleaned within the regulated area by HEPA vacuuming or wet wiping with a cleaning solution, or both. Items shall then be either removed from the area or covered with 6-mil polyethylene sheeting and sealed with duct tape.

(7) At least two layers of 6-mil, or thicker, polyethylene sheeting shall be placed on the ground at the base of the component and shall extend at least 10 feet beyond the perimeter of the component to be encapsulated.

(8) A patch test shall be conducted in accordance with the HUD guidelines adopted by reference in K.A.R. 28-72-13 (d)(1) before general application of the encapsulant to determine the adhesive and cohesive properties of the encapsulant on the surface to be encapsulated. The encapsulant shall be applied in accordance with the manufacturer's recommendations.

(9) After the manufacturer's recommended curing time, the entire encapsulated surface shall be inspected by a lead abatement supervisor or a project designer. Each unacceptable area shall be evaluated to determine if a complete failure of the system is indicated or if the system can be patched or repaired. Unacceptable areas shall be evidenced by delamination, wrinkling, blistering, cracking, cratering, and bubbling of the encapsulant.

(10) After the encapsulation is complete, the regulated area shall be cleaned by vacuuming with a HEPA vacuum, wiping down all surfaces with a cleaning solution, rinsing all surfaces, and then HEPA vacuuming the area again. Cleaning shall begin at the end of the work area farthest from the main entrance to the area and from the top to the bottom of the regulated area.

(11) All equipment used in the regulated area shall be thoroughly cleaned with a cleaning solution or vacuumed with a HEPA vacuum, or both, before removal from the regulated area. (Authorized by and implementing K.S.A. 65-1, 202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-18d. Work practice standards; lead abatement: removal. (a) Removal strategies. Acceptable removal strategies shall include the following:

(1) Manual wet strategies. Manual wet scraping or manual wet sanding shall be acceptable for the removal of lead surface coatings.

(2) Mechanical removal strategies. Using power tools that are HEPA-shrouded or locally exhausted shall be acceptable removal strategies for lead surface coatings. HEPA-shrouded or exhausted mechanical abrasion devices, including sanders, saws, drills, roto-peens, vacuum blasters, and needle guns shall be acceptable.

(3) Chemical removal strategies. Chemical strippers shall be used in compliance with the manufacturer's recommendations.

(b) Soil abatement. When soil abatement is conducted, the lead-bearing soil shall be removed, tilled, or permanently covered in place as indicated in this subsection.

(1) Removed soil shall be replaced with fill material containing no more than 100 ppm of lead. Soil that is removed shall not be reused as topsoil.

(2) If tilling is selected, soil in a child-accessible area shall be tilled to a depth that results in less than 400 ppm lead of the homogenized soil, or other concentrations approved by the department. Soil in an area not accessible to children shall be tilled to a depth that results in less than 1,200 ppm lead of the homogenized soil.

(3) "Permanently covered soil" shall have the meaning specified in K.A.R. 28-72-1p(c).

(4) Soil abatement shall be conducted to prevent lead-contaminated soil from being blown from the site or from being carried away by water runoff or through percolation to groundwater.

(c) Interior removal. When conducting a lead abatement project using the removal strategy on interior surfaces, the certified lead professional or licensed firm shall meet the following minimum requirements:

(1) The site shall be prepared by first establishing a regulated area using fencing, barrier tape, or other appropriate barriers. The regulated area shall be marked to prevent uncertified personnel and the general public from approaching closer than 20 feet to the abatement project.

(2) Signs shall be posted at all entrances to the regulated area and shall include the words "WARNING: LEAD AREA. POISON. NO SMOKING OR EATING" in bold lettering at least two inches tall, with additional language or symbols prohibiting entrance to the regulated area by uncertified personnel and the general public. All signs shall be in a language that is easily recognized by all certified lead professionals and by members of the general public where the lead abatement activities are taking place.

(3) Each heating and cooling system within the regulated area shall be shut down and the vents shall be sealed with 6-mil polyethylene sheeting to prevent lead dust accumulation within the system.

(4) All items within the regulated area shall be cleaned by HEPA vacuuming or wet wiping with a cleaning solution, or both. Items shall then be either removed from the area or covered with

6-mil polyethylene sheeting and sealed with duct tape.

(5) All windows below and within the regulated area shall be closed.

(6) A critical barrier shall be constructed.

(7) At least two layers of 6-mil, or thicker, polyethylene sheeting shall be placed on the floor at the base of the component and shall extend at least 10 feet beyond the perimeter of the component being abated. If the chemical strategy is used, the certified lead professional or licensed firm shall follow the manufacturer's recommendations regarding a chemical-resistant floor cover.

(8) All equipment used in the regulated area shall be thoroughly cleaned with a cleaning solution or vacuumed with a HEPA vacuum, or both, before removal from the regulated area.

(9) At the end of each work shift, the top layer of 6-mil polyethylene sheeting shall be removed and used to wrap and contain the debris generated by the shift. The 6-mil polyethylene sheeting shall then be sealed with duct tape and kept in a secured area until final disposal. The second layer of 6-mil polyethylene sheeting shall be HEPA vacuumed, left in place, and used during the next shift. A single layer of 6-mil polyethylene sheeting shall be placed on this remaining polyethylene sheeting before lead abatement resumes.

(10) After the removal is complete, the regulated area shall be cleaned by vacuuming with a HEPA vacuum, wiping down all surfaces with a cleaning solution, rinsing all surfaces, and then HEPA vacuuming the area again. Cleaning shall begin at the end of the work area farthest from the entrance to the area and from the top to the bottom of the regulated area.

(d) Exterior removal. When conducting a lead abatement project using the removal strategy on exterior surfaces, these minimum requirements shall be met:

(1) The site shall be prepared by first establishing a regulated area using fencing, barrier tape, or other appropriate barriers. The regulated area shall be marked to prevent uncertified personnel and the general public from approaching closer than 20 feet to the abatement project.

(2) Signs shall be posted at all entrances to the regulated area and shall include the words "WARNING: LEAD AREA. POISON. NO SMOKING OR EATING" in bold lettering at least two inches tall, with additional language or symbols prohibiting entry to the regulated area by uncertified personnel. All signs shall be in a

language that is easily recognized by all certified lead professionals and by members of the general public where the abatement activities are taking place.

(3) All movable items shall be moved 20 feet from working surfaces. Items that cannot be readily moved 20 feet from working surfaces shall be covered with 6-mil polyethylene sheeting and sealed with duct tape.

(4) At least one layer of 6-mil, or thicker, polyethylene sheeting shall be placed on the ground and shall extend at least 10 feet from the abated surface, plus another five feet out for each additional 10 feet in surface height over 20 feet. In addition, the polyethylene sheeting shall meet the following criteria:

(A) Be securely attached to the side of the building, with cover provided to all ground plants and shrubs in the regulated area;

(B) be protected from tearing or perforating;

(C) contain any water, including rainfall, that may accumulate during the lead abatement; and

(D) be weighted down to prevent disruption by wind gusts.

(5) All windows in the regulated area and all windows below and within 20 feet of working surfaces shall be closed.

(6) Work shall cease if constant wind speeds are greater than 15 miles per hour.

(7) Work shall cease and cleanup shall occur if rain begins.

(8) All equipment used in the regulated area shall be thoroughly cleaned with a cleaning solution or vacuumed with a HEPA vacuum, or both, before removal from the regulated area.

(9) The regulated area shall be HEPA vacuumed and cleaned of lead-based paint chips, polyethylene sheeting, and other debris generated by the abatement project work at the end of each workday. Debris shall be kept in a secured area until final disposal. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-18e. Work practice standards; postabatement clearance procedures. Except as provided in K.S.A. 65-1-203 and amendments thereto, the following postabatement or lead hazard control clearance procedures shall be performed only by a risk assessor: (a) Following lead abatement or required lead hazard control, a visual inspection shall be performed to determine

if deteriorated painted surfaces or visible amounts of dust, debris, or residue are still present. These conditions shall be eliminated before continuation of the clearance procedures.

(b) Following the visual inspection and any post-abatement or lead hazard control cleanup required by subsection (a), clearance sampling for lead-contaminated dust shall be conducted. Clearance sampling shall be conducted by employing single-surface sampling techniques.

(c)(1) Dust samples for clearance purposes shall be taken using one or more of the documented methodologies in K.A.R. 28-72-13(d)(1).

(2) Dust samples for clearance purposes shall be taken a minimum of one hour after completion of final postabatement or lead hazard control cleanup activities.

(d) The following postabatement or lead hazard control activities shall be conducted as appropriate, based upon the extent or manner of lead abatement activities conducted in or to the residential dwelling or child-occupied facility:

(1) After conducting a lead abatement or lead hazard control with containment between abated and unabated areas, one dust sample shall be taken from one window, if available, and at least one dust sample shall be taken from the floors of no fewer than four rooms, hallways, or stairwells within the containment area. In addition, one dust sample shall be taken from the floor outside the containment area. If there are fewer than four rooms, hallways, or stairwells within the containment area, then all rooms, hallways, or stairwells shall be sampled.

(2) After conducting a lead abatement or lead hazard control in which no containment was utilized, two dust samples shall be taken from no fewer than four rooms, hallways, or stairwells in the residential dwelling or child-occupied facility. One dust sample shall be taken from one window, if available, and one dust sample shall be taken from the floor of each room, hallway, or stairwell selected. If there are fewer than four rooms, hallways, or stairwells within the residential dwelling or child-occupied facility, then all rooms, hallways, or stairwells shall be sampled.

(3) Following an exterior paint abatement or lead hazard control, a visual inspection shall be conducted. All horizontal surfaces in the outdoor living area closest to the abated surface shall be found to be free of visible dust and debris. In addition, a visual inspection shall be conducted to determine the presence of paint chips on the

dripline or next to the foundation below any exterior surface abated. If paint chips are present, they shall be removed from the site and properly disposed of, according to all applicable federal, state, and local requirements.

(e) The rooms, hallways, or stairwells selected for sampling shall be selected according to one or more of the documented methodologies in K.A.R. 28-72-13(d)(1).

(f) The risk assessor shall compare the residual lead level, as determined by the laboratory analysis, from each dust sample with applicable clearance levels for lead in dust on floors and windows as established below in this subsection. If the residual lead levels in a dust sample exceed the clearance levels, all the components represented by the failed sample shall be recleaned and retested until clearance levels are met. Following completion of a lead abatement activity, all dust, soil, and water samples shall comply with the following clearance levels:

(1) Dust samples:		
Media		Clearance Level
Floors		less than 40 µg/ft ²
Interior windowsills		less than 250 µg/ft ²
Window troughs and exterior walking surfaces		less than 400 µg/ft ²
(2) Soil samples:		
Media		Clearance Level
Bare soil (rest of yard)		less than 1,200 ppm or 1,200 mg/l
Bare soil (small, high-contact areas, including sand boxes and gardens)		less than 400 ppm
(3) Water		less than 15 ppb or 15µg/L

(g) In a multifamily dwelling with similarly constructed and maintained residential dwellings, random sampling for the purposes of clearance may be conducted if the following conditions are met:

(1) The certified individuals who abate, perform lead hazard control, or clean the residential dwelling do not know which residential dwelling will be selected for the random sample.

(2) A sufficient number of residential dwellings are selected for dust sampling to provide a 95 percent level of confidence that no more than five percent or 50 of the residential dwellings, whichever is smaller, in the randomly sampled population exceed the appropriate clearance levels.

(3) The randomly selected residential dwellings are sampled and evaluated for the clearance according to the procedures found in this regulation.

(h) A postabatement or post-lead hazard control clearance report shall be prepared by a lead abatement supervisor. The postabatement or post-lead hazard control clearance report shall include the following information:

(1) The start and completion dates of the lead abatement or lead hazard control;

(2) the name and address of each licensed lead activity firm conducting the lead abatement or lead hazard control and the name of each lead abatement supervisor assigned to the lead abatement or lead hazard control project;

(3) the name, address, and signature of each risk assessor conducting clearance sampling and the date of clearance testing;

(4) the results of clearance testing and soil analysis, if applicable, and the name of each recognized laboratory that conducted the analysis;

(5) a detailed written description of the abatement or lead hazard control, including the lead abatement or lead hazard control methods used, locations of rooms or components where abatement or lead hazard control occurred, reason for selecting particular abatement or lead hazard control methods for each component, and any suggested monitoring of encapsulants or enclosures; and

(6) a written certification from the firm stating that all lead abatement or lead hazard control has taken place in accordance with all applicable local, state, and federal laws and regulations.

(i) Time frame for submission of reports. The clearance report shall be provided to the owner of the property within 20 business days after completion of the clearance inspection. (Authorized by and implementing K.S.A. 65-1,202 and 65-1,203; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-19. Work practice standards; collection and laboratory analysis of samples. All paint chip, dust, and soil samples collected pursuant to the work practice standards contained in this article shall meet the following conditions:

(a) Be collected by a lead inspector, risk assessor, or elevated blood lead level investigator using adequate quality control; and

(b) be analyzed by a recognized laboratory. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-20. Work practice standards; composite dust sampling prohibited. Composite dust sampling shall not be allowed. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-21. Work practice standards; quarterly reports; recordkeeping. (a) All reports and plans required in this article shall be maintained for at least three years by the licensed lead activity firm or certified individual who prepared the report or plan.

(b) Each lead activity firm that employs or contracts with lead abatement professionals shall submit to KDHE a written report listing all lead abatement, lead hazard control, and lead abatement clearance projects occurring during each calendar quarter in the state of Kansas, on or before the following dates each year:

(1) January 10;

(2) April 10;

(3) July 10; and

(4) October 10.

(c) Each report shall include the following information:

(1) The name, address, and license number of the lead activity firm;

(2) the complete mailing address of the property where the lead activity work occurred, including the zip code;

(3) a description of the type of activity that occurred;

(4) the date the activity was completed;

(5) a listing of the names of all lead professionals who performed the work for the lead activity firm during the reporting period, including the complete names, certificate numbers, and certificate expiration dates; and

(6) the signature of the owner or authorized representative of the lead activity firm. (Authorized by and implementing K.S.A. 65-1,202; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended Dec. 6, 2002; amended April 9, 2010.)

28-72-22. Enforcement. (a) A notice of noncompliance (NON) may be issued by the secretary for any violation of the act or this article. A NON shall be the recommended response for a first-time violator of this article. Compliance assistance information shall be included in the NON to ensure future compliance with KDHE regulations.

(b)(1) The NON shall require the violator to take corrective action in order to comply with this article. The corrective action shall depend upon the specific violations. The NON may require that proof of action be submitted to the secretary by a date specified in the NON.

(2) Mitigating factors in each case in which a NON has been issued shall be documented in the case file. (Authorized by K.S.A. 65-1,202; implementing K.S.A. 65-1,202 and 65-1,208; effective, T-28-9-13-99, Sept. 13, 1999; effective Jan. 7, 2000; amended April 9, 2010.)

28-72-51. Definitions. For purposes of this article, the definitions in K.A.R. 28-72-1a through K.A.R. 28-72-1x, as well as the following definitions, shall apply:

(a) "Acknowledgment statement" means a form that is signed by the owner or occupant of housing confirming that the owner or occupant received a copy of the pamphlet and renovation notice before the renovation began.

(b) "Certificate of mailing" means a receipt from the postal service that provides evidence that the renovator mailed the pamphlet and a renovation notice to each owner or occupant. The pamphlet and renovation notice shall be mailed at least seven days before the start of renovation.

(c) "Compensation" means payment or goods received for services rendered. Payment may be in the form of money, goods, services, or bartering.

(d) "Emergency renovation operations" means unplanned renovation activities performed in response to a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard or threatens property with significant damage. Emergency renovation operations shall include renovations to repair damage from a tree that fell on a house and renovations to repair a water pipe break in an apartment complex.

(e) "EPA" is defined in K.A.R. 28-72-1e.

(f) "Housing for the elderly" means retirement or similar types of housing specifically reserved for households of one or more persons 62 years of age or older at the time the unit is first occupied.

(g) "Lead-based-paint-free housing" means target housing that has been determined by a certified inspector or certified risk assessor to be free of paint or other surface coatings that contain lead equal to or in excess of one milligram per square centimeter or 0.5 percent by weight.

(h) "Lessor" means any entity that offers target housing for lease, rent, or sublease, including the following:

- (1) Individuals;
- (2) partnerships;
- (3) corporations;
- (4) trusts;
- (5) government agencies;
- (6) housing agencies; and
- (7) nonprofit organizations.

(i) "Minor repair and maintenance" means activities including the following:

(1) Performing minor electrical work that disturbs six square feet or less of painted surface per component;

(2) drilling holes in the wall to run an electrical line; or

(3) replacing a light fixture.

(j) "Occupant" means any person or entity that enters into an agreement to lease, rent, or sublease target housing or any person that inhabits target housing, including the following:

- (1) Individuals;
- (2) partnerships;
- (3) corporations;
- (4) trusts;
- (5) government agencies;
- (6) housing agencies; and
- (7) nonprofit organizations.

(k) "Owner" means any person or entity that has legal title to housing, including the following:

- (1) Individuals;
- (2) partnerships;
- (3) corporations;
- (4) trusts;
- (5) government agencies;
- (6) housing agencies; and
- (7) nonprofit organizations.

(l) "Pamphlet" has the meaning specified in 40 CFR 745.83 as adopted in K.A.R. 28-72-2.

(m) "Record of notification" means a written statement documenting the steps taken to provide pamphlets and renovation notices to occupants and owners in residential dwellings.

(n) "Renovation" has the meaning specified in 40 CFR 745.83 as adopted in K.A.R. 28-72-2.

(o) "Renovation firm" means any individual, organization, or entity that has met the requirements for licensing by KDHE as specified in K.A.R. 28-72-10a.

(p) "Renovation notice" means a notice of renovation activities to occupants and owners of residential dwellings. The notice shall describe the

scope, location, and expected duration of the renovation activity.

(q) “Renovator” means a person who has received certification from the secretary, as specified in K.A.R. 28-72-7a, and is receiving compensation for a renovation.

(r) “Self-certification of delivery” means an alternative method of documenting the delivery of the pamphlet and renovation notice to the occupant. This method may be used whenever the occupant is unavailable or unwilling to sign a confirmation of receipt of pamphlet.

(s) “Supplemental renovation notice” means any additional notification that is required when the scope, location, or duration of a project changes.

(t) “Zero-bedroom dwelling” means any residential dwelling in which the living area is not separated from the sleeping area. This term shall include dormitory housing and military barracks. This term shall not include efficiency and studio apartments. (Authorized by and implementing K.S.A. 65-1,202; effective June 23, 2000; amended April 9, 2010.)

28-72-52. Applicability. (a) Except as provided in subsection (b) of this regulation, this article and the requirements of 40 CFR 745.80 through 745.91, as adopted in K.A.R. 28-72-2, shall apply to all renovation of target housing performed for compensation.

(b) This article shall not apply to renovation activities that are limited to any of the following:

(1) Minor repair and maintenance activities, including minor electrical work and plumbing, that disrupt six square feet or less of painted surface per component;

(2) emergency renovation operations; or

(3) if the renovator has obtained a copy of the determination, any renovation in target housing in which a written determination has been made by an inspector or risk assessor who has been certified in accordance with this article that the components affected by the renovation are free of paint and other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight. (Authorized by and implementing K.S.A. 65-1,202; effective June 23, 2000; amended April 9, 2010.)

28-72-53. Information distribution requirements. (a) Renovations in target housing. No more than 60 days before beginning renovation activities in any residential dwelling unit of

target housing, the renovator shall perform the following:

(1) Provide the owner of the unit with the pamphlet and renovation notice and comply with one of the following:

(A) Obtain, from the owner, a written acknowledgment that the owner has received the pamphlet and renovation notice; or

(B) obtain a certificate of mailing at least seven days before the renovation; and

(2) if the owner does not occupy the dwelling unit, provide an adult occupant of the unit with the pamphlet and renovation notice and comply with one of the following:

(A) Obtain from the adult occupant a written acknowledgment that the occupant has received the pamphlet and renovation notice, or certify in writing that the pamphlet and renovation notice have been delivered to the dwelling and that the renovator has been unsuccessful in obtaining a written acknowledgment from an adult occupant. This certification shall include the following:

(i) The address of the unit undergoing renovation;

(ii) the date and method of delivery of the pamphlet and renovation notice;

(iii) the names of persons delivering the pamphlet and renovation notice;

(iv) the reasons for lack of acknowledgment, including the occupant’s refusal to sign and unavailability of adult occupants;

(v) the signature of the renovator; and

(vi) the date of signature; or

(B) obtain a certificate of mailing at least seven days before the renovation.

(b) Renovations in common areas. No more than 60 days before beginning renovation activities in common areas of multifamily housing, the renovator shall perform the following:

(1) Provide the owner with the pamphlet and renovation notice and comply with one of the following:

(A) Obtain from the owner a written acknowledgment that the owner has received the pamphlet and renovation notice; or

(B) obtain a certificate of mailing at least seven days before the renovation;

(2) provide a pamphlet and a renovation notice to each unit of the multifamily housing before the start of renovation. This notification shall be accomplished by distributing written notice to each affected unit. The notice from the renovator shall describe the general nature and locations of the

planned renovation activities and the expected starting and ending dates; and

(3) if the scope, location, or expected starting and ending dates of planned renovation activities change after the initial notification, provide further written notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification shall be provided before the renovator initiates work beyond that which was described in the original notice.

(c) Written acknowledgment. Sample language for the written acknowledgments required in paragraphs (a)(1)(A), (a)(2)(A), and (b)(1)(A) shall be provided by the KDHE upon request from the renovator. These acknowledgments shall be written in the same language as that in the text of the contract agreement for the renovation or, in the case of non-owner-occupied target housing, in the same language as that in the lease or rental agreement or the pamphlet and shall include the following:

(1) A statement recording the owner or occupant's name and acknowledging receipt of the pamphlet and renovation notice before the start of renovation, the address of the unit undergoing renovation, the signature of the owner or occupant as applicable, and the date of the signature; and

(2) either a separate sheet or part of any written contract or service agreement for the renovation.

(d) Lead poisoning prevention poster.

(1) Each commercial establishment that offers paint or supplies intended for the removal or application of paint shall display, in a conspicuous location near the painting supplies, a poster containing a warning statement, with the following information at a minimum:

(A) The dry sanding and the dry scraping of paint in dwellings built before 1978 are dangerous.

(B) The improper removal of old paint is a significant source of lead dust and the primary cause of lead poisoning.

(C) Renovators are required by regulation to notify owners and occupants of the hazards associated with lead paint before doing work. The commercial establishment shall also include contact information so that consumers and renovators can obtain more information.

(2) Sample posters and materials that commercial establishments may use to comply with this subsection shall be available from KDHE.

(e) Compliance. A commercial establishment shall be deemed to be in compliance with this reg-

ulation if the commercial establishment displays the lead poisoning prevention poster as required in subsection (d) and makes the pamphlet available to its customers. (Authorized by and implementing K.S.A. 65-1,202; effective June 23, 2000; amended April 9, 2010.)

28-72-54. Recordkeeping requirements.

(a) Each renovator shall retain and, if requested, make available to KDHE all records necessary to demonstrate compliance with this article for a period of three years following completion of the renovation in target housing.

(b) Records shall be retained as specified in subsection (a) of this regulation, if applicable. These records shall include the following:

(1) Reports certifying that a determination had been made by an inspector who has been certified in accordance with this article that lead-based paint is not present in the area affected by the renovation as described in K.A.R. 28-72-52 (b)(3);

(2) signed and dated acknowledgments of receipt as described in K.A.R. 28-72-53 (a)(1)(A), (a)(2)(A), and (b)(1)(A);

(3) certifications of attempted delivery as described in K.A.R. 28-72-53 (a)(2)(A);

(4) certificates of mailing as described in K.A.R. 28-72-53, (a)(1)(B), (a)(2)(B), and (b)(1)(B); and

(5) records of renovation notices to tenants and owners of residential dwellings as described in K.A.R. 28-72-54. (Authorized by and implementing K.S.A. 1999 Supp. 65-1,202; effective June 23, 2000.)

Article 73.—ENVIRONMENTAL USE CONTROLS PROGRAM

28-73-1. Definitions. (a) "Act" means K.S.A. 65-1,221 et seq. and amendments thereto.

(b) "Applicant" means the owner, as defined in K.S.A. 65-1,222 (c) and amendments thereto, of an eligible property who submits to the secretary an application for approval of environmental use controls for the eligible property.

(c) "Eligible property" means real property that exhibits environmental contamination exceeding department standards for unrestricted use and that is being or has been investigated or remediated, or both, as a result of participating in a department-approved program.

(d) "Environmental contamination" means "pollution" or "contamination," as those terms are used in the following acts and statutes, as well as

any regulations adopted under the authority of those statutes, unless this act or any of the following acts specifically exclude or exempt certain forms of pollution or contamination from the provisions of this act:

(1) K.S.A. 65-3452a through K.S.A. 65-3457a, and amendments thereto, concerning hazardous substances;

(2) the voluntary cleanup and property redevelopment act, K.S.A. 65-34,161 through K.S.A. 65-34,174, and amendments thereto;

(3) the Kansas drycleaner environmental response act, K.S.A. 65-34,141 through K.S.A. 65-34,155, and amendments thereto;

(4) K.S.A. 65-3430 through K.S.A. 65-3447, and amendments thereto, concerning hazardous waste;

(5) K.S.A. 65-161 through K.S.A. 65-171y, and amendments thereto, concerning the waters of the state;

(6) the Kansas storage tank act, K.S.A. 65-34,100 through K.S.A. 65-34,130, and amendments thereto; and

(7) K.S.A. 65-3401 through K.S.A. 65-3427, and amendments thereto, concerning solid waste.

(e) "Environmental use control agreement" means a legal document specifically defining the environmental use controls and other related requirements for an eligible property according to K.A.R. 28-73-3. The agreement shall be issued by the secretary and shall be signed by the applicant. The signatures of the secretary and applicant shall be notarized, and as required by K.S.A. 65-1,225 and amendments thereto, the agreement shall be recorded by the register of deeds in the county where the eligible property is located.

(f) "Financial assurance" means any method of guaranteeing or ensuring adequate financial capability that is approved by the secretary as part of a long-term care agreement. One or more of the following methods of financial assurance may be required by the secretary as a part of a long-term care agreement:

- (1) An environmental insurance policy;
- (2) a financial guarantee;
- (3) a surety bond guaranteeing payment or performance or a similar performance bond;
- (4) an irrevocable letter of credit;
- (5) documentation of the applicant's qualification as self-insurer; and
- (6) other methods the secretary determines are adequate to ensure the protection of public health and safety and the environment.

Federal and state governmental entities that qualify as applicants under these regulations shall not be required to provide financial assurance.

(g) "Legal description" means identification of the land boundaries of an eligible property that is subject to an environmental use control agreement. The identification of land boundaries shall be provided by one or more of the following methods:

(1) A definite and unequivocal identification of lines and boundaries that contains dimensions to enable the description to be plotted and retraced and that describes the legal surveys by county and by at least one of the following additional identifiers:

- (A) Government lot;
- (B) aliquot parts; or
- (C) quarter section, section, township, and range;

(2) a metes and bounds legal survey commencing with a corner marked and established in the U.S. public land survey system; or

(3) the identifying number or other description of the subject lot, block, or subdivision if the land is located in a recorded subdivision or recorded addition to the subdivision.

(h) "Legal survey" means a boundary survey or land survey that is performed by a land surveyor licensed in the state of Kansas and that is conducted for both of the following purposes:

(1) Describing, documenting, and locating the boundary lines of an eligible property, a portion of an eligible property, or both; and

(2) plotting a parcel of land that includes the eligible property.

(i) "Long-term care agreement" means a legally binding document that is entered into as provided in K.A.R. 28-73-4 by an applicant and the secretary and that describes the responsibilities and financial obligations of the applicant to fund the department's inspection and maintenance activities at a category 3 property, as described in K.S.A. 65-1,226 and amendments thereto.

(j) "Residual contamination" means environmental contamination remaining at a property that prohibits the unrestricted use of that property.

(k) "Unrestricted use" means that there are no limits or conditions placed on the use of a property, including use for residential purposes. (Authorized by K.S.A. 2007 Supp. 65-1,232; implementing K.S.A. 2007 Supp. 65-1,224 and 65-1,228; effective April 7, 2006; amended Jan. 30, 2009.)

28-73-2. Application. (a) Each applicant shall submit an application to the secretary, as provided by the act and these regulations.

(b) If an application is determined by the secretary to be incomplete, written notification shall be provided to the applicant by the secretary identifying the documentation, data, or other information that is needed to complete the application, and the application shall be returned to the applicant. The applicant may then submit a revised application package, provide the additional information as required by the secretary, or withdraw the application.

(c) If the applicant is a person or entity that does not own the eligible property, but is the landowner's authorized representative, the applicant shall provide a notarized statement from the landowner or landowners specifically authorizing the applicant to act on the landowner's behalf or a judicial decree assigning this authority to the applicant.

(d) If the owner of the eligible property is a local, state, or federal governmental entity, the signature of an authorized governmental official shall be considered as a sufficient basis for executing and submitting the application. (Authorized by K.S.A. 2004 Supp. 65-1,232; implementing K.S.A. 2004 Supp. 65-1,221, 65-1,222, and 65-1,224; effective April 7, 2006.)

28-73-3. Environmental use control agreements. (a) If the secretary approves an application for environmental use controls, an environmental use control agreement for the eligible property shall be issued by the secretary in a standardized format that contains all of the following components, as applicable to that eligible property:

(1) A description of the control, restriction, prohibition, or limitation that constitutes each of the environmental use controls proposed by the applicant in the application package and approved by the secretary;

(2) a legal description of the eligible property;

(3) authorization for the department and the department's contractors to have access to the eligible property as required by the act;

(4) a statement of the funding requirements established by the secretary as specified in the act or, for category 3 property, a reference incorporating the long-term care agreement required by K.S.A. 65-1,226 and amendments thereto and K.A.R. 28-73-4;

(5) for category 3 property, a statement indicating whether financial assurance is required,

as specified in K.S.A. 65-1,224, and amendments thereto, K.A.R. 28-73-1, and K.A.R. 28-73-5;

(6) the length of time during which the environmental use control agreement is to be in effect;

(7) a description of any monitoring, inspection, or maintenance requirements;

(8) a description of the specific terms and conditions that are to be applied as part of the environmental use controls for the eligible property;

(9) a description of the enforcement provisions that are authorized by K.S.A. 65-1,229, and amendments thereto;

(10) a list of any local, state, or federal government restrictions, prohibitions, or zoning requirements that pertain to the eligible property;

(11) an acknowledgment of the environmental use control agreement that is to be endorsed with the seal of the register of deeds in and for the county where the eligible property is located, pursuant to K.S.A. 19-1206, and amendments thereto; and

(12) a description of any other requirements established for the eligible property by the secretary to ensure the protection of public health and safety and the environment.

(b) Upon approval of an application, the following documents shall be sent to the applicant by the secretary:

(1) A letter approving the application; and

(2) the environmental use control agreement with the notarized signature of the secretary.

(c) In order for the environmental use control agreement to be effective, upon receipt of the agreement the applicant shall return to the secretary the environmental use control agreement with the notarized signature of the applicant and the seal of the register of deeds indicating that the agreement has been recorded as required by K.S.A. 65-1,225, and amendments thereto. The applicant shall submit with the agreement any payment necessary to fulfill the funding requirements established by the environmental use control agreement.

(d) The recorded copy of the environmental use control agreement shall be tracked by the department as specified in K.S.A. 65-1,230, and amendments thereto. (Authorized by K.S.A. 2004 Supp. 65-1,232; implementing K.S.A. 2004 Supp. 65-1,224, 65-1,225, 65-1,226, and 65-1,228; effective April 7, 2006.)

28-73-4. Long-term care agreements for category 3 property. (a) As provided in K.S.A.

65-1,226, and amendments thereto, a long-term care agreement between the secretary and the applicant shall be required for each category 3 property.

(b) Each long-term care agreement for a category 3 property entered into by an applicant and the secretary as provided by K.S.A. 65-1,226, and amendments thereto, shall include a provision for a funding requirement in an amount that will reimburse the department for all direct and indirect costs incurred by the department in implementing and administering the environmental use control agreement and performing long-term care at the property, including costs for the following departmental activities conducted for the purpose of inspecting, monitoring, investigating, and evaluating environmental use controls and remedial progress at the property:

(1) Reviewing documents related to the site, including the following:

- (A) Inspection, monitoring, and progress reports;
- (B) operation and maintenance records;
- (C) reports related to spills of contaminants at the site;
- (D) reports related to permits issued for the eligible property; and
- (E) pertinent historical documents;

(2) monitoring and inspecting remediation activities and monitoring wells, protective structures, remedial systems, and any other features directly related to or associated with an environmental use control on the eligible property;

(3) searching and reviewing records and files related to the eligible property, including historical files, county tax records, county property records, and zoning records;

(4) collecting environmental samples, including quality assurance and quality control samples; and

(5) performing laboratory analyses on environmental samples collected to monitor and evaluate remedial progress at the eligible property.

(c) (1) If the applicant is required to provide financial assurance for a category 3 property, the long-term care agreement shall identify the initial amount of financial assurance required and one or more of the financial assurance methods established by the secretary in accordance with K.A.R. 28-73-5, which the applicant shall maintain for the period of time the long-term care agreement is in effect.

(2) The long-term care agreement shall state that, as the amount of the financial assurance or the financial assurance method is revised in sub-

sequent years as provided in K.A.R. 28-73-5, the most recent revised amount or method approved by the secretary shall be deemed to be incorporated into the long-term care agreement and shall supersede any prior amount or method.

(d) The long-term care agreement shall clearly define the requirements that apply to the secretary and the applicant and their respective responsibilities. (Authorized by K.S.A. 2004 Supp. 65-1,232; implementing K.S.A. 2004 Supp. 65-1,224, 65-1,226, and 65-1,230; effective April 7, 2006.)

28-73-5. Financial assurance. (a) Any applicant requesting approval of an environmental use control for a category 3 property may be required by the secretary to provide and maintain financial assurance in an amount equal to or greater than one or both of the following:

(1) The estimated amount of the funding requirement set out in the long-term care agreement as provided by K.A.R. 28-73-4; and

(2) the estimated amount of the funding necessary to implement contingent remedies that will be used to protect public health and safety and the environment if the proposed remedial activity fails.

(b) Each applicant required by the secretary to provide and maintain financial assurance shall submit a detailed written estimate to the secretary, in current dollars, of the estimated amount of financial assurance required as specified in subsection (a) and shall propose one or more methods of financial assurance. The written estimate and the proposed method or methods of financial assurance shall be reviewed by the secretary and either shall be approved or, if the secretary determines that either the written estimate or the proposed financial assurance method is inadequate, disapproved. If the secretary disapproves the written estimate or the proposed financial assurance method, or both, a written notice shall be provided by the secretary to the applicant explaining the basis for the disapproval. The applicant may correct the identified inadequacies and submit a revised written estimate and proposed financial assurance method to the secretary for further review.

(c) Once approved by the secretary, the initial amount and method of financial assurance shall be documented in the long-term care agreement for the eligible property.

(d) Each applicant required to provide and maintain financial assurance shall submit proof of the initial, approved financial assurance to the

secretary before the environmental use control agreement is issued.

(e) On or before March 31 of each calendar year, each owner, as defined by the act, who entered into a long-term care agreement that establishes a financial assurance requirement shall submit to the secretary a revised written estimate, in current dollars, of the amount of financial assurance required in subsection (a).

(f) The revised written estimate shall be reviewed by the secretary. Written notice that the revised written estimate has been approved or that additional adjustments are required to the revised written estimate or method of financial assurance shall be provided by the secretary. Adjustments to the amount of the required financial assurance or the financial assurance method, or both, may be required for any of the following reasons:

(1) Changes in the estimated costs of the funding requirement for the eligible property as specified in paragraph (a)(1);

(2) changes in the estimated costs of implementing contingent remedies that will be used to protect public health and safety and the environment if the proposed remedial activity fails as specified in paragraph (a)(2);

(3) changes in the risks to public health and safety and the environment posed by a potential release from the eligible property;

(4) documented changes in the financial viability of an owner or the provider of a financial assurance method; or

(5) changes in estimated costs based on inflation.

(g) Each owner required by the secretary to maintain financial assurance shall submit an updated proof of financial assurance within 45 days of receipt of the secretary's written notice in subsection (f). The proof shall be based on the approved amount and method of financial assurance described in the notice.

(h) Each applicant who enters into an environmental use control agreement for a category 3 property that includes a financial assurance requirement shall comply with the following conditions:

(1) Provide and continuously maintain financial assurance in an amount equal to or greater than the latest approved written cost estimate throughout the period the environmental use control agreement is in effect; and

(2) comply with the provisions of the document titled, "procedure for demonstrating financial

assurance at property with environmental use controls" as published by the department on August 31, 2005, and hereby adopted by reference. (Authorized by K.S.A. 2004 Supp. 65-1,232; implementing K.S.A. 2004 Supp. 65-1,224 and 65-1,226; effective April 7, 2006.)

28-73-6. Duration of environmental use controls. (a) Each environmental use control shall remain in effect in perpetuity, unless the secretary approves, in writing, the removal of an environmental use control or, by its own terms, the environmental use control agreement expires.

(b) Any applicant may submit with the application a written request for approval of a provision in the environmental use control agreement specifying the number of years the environmental use control is to remain in effect. The request shall be reviewed by the secretary, and the applicant shall be notified by the secretary of the secretary's approval or denial of the request.

(c) If an approved environmental use control agreement will expire after a stated term of years or the owner seeks to terminate an environmental use control agreement, the owner shall submit a detailed work plan to the secretary that outlines the proposed methods of sampling and evaluating the residual contaminant levels on the eligible property. The owner shall submit the work plan before the expiration or termination of the environmental use control agreement. After consideration and approval of the work plan by the secretary, all of the following shall occur:

(1) The owner shall execute the approved work plan.

(2) The owner shall document and submit the results of the sampling to the secretary in a report and include recommendations for future actions to protect public health and safety and the environment at the eligible property.

(3) Following the secretary's review of the report and recommendations for future actions, the report and recommendations shall be approved, approved with conditions, or disapproved by the secretary. (Authorized by K.S.A. 2004 Supp. 65-1,232; implementing K.S.A. 2004 Supp. 65-1,227; effective April 7, 2006.)

28-73-7. Restrictions, prohibitions, and zoning requirements. (a) Restrictions, prohibitions, and zoning requirements placed on an eligible property by a local, state, or federal government may be approved by the secretary in lieu of

or in addition to one or more environmental use controls if the restriction, prohibition, or zoning requirement meets the following conditions:

(1) Has been legally established;
 (2) is enforceable by a governmental entity; and
 (3) is determined by the secretary to be in effect and applicable to the environmental contamination for which a particular environmental use control is otherwise considered to be a necessary component of an environmental use control agreement for the eligible property.

(b) Use of these restrictions, prohibitions, or zoning requirements in lieu of or in addition to an environmental use control may be considered in either of the following cases:

(1) For contamination that is contained exclusively within the boundaries of an eligible property; or

(2) for contamination that is both contained within and extends beyond the boundaries of an eligible property if the local, state, or federal governmental restriction, prohibition, or zoning requirement is in effect and applies to all of the following areas:

(A) All of those contaminated areas that are beyond the boundary of the eligible property; and

(B) All of those areas surrounding or extending beyond the contaminated areas for a distance that is determined by the secretary to be necessary to ensure the protection of public health and safety and the environment.

(c) Each applicant submitting an application for an environmental use control agreement shall submit to the secretary a copy of any existing local, state, or federal governmental restrictions, prohibitions, or zoning requirements that are proposed for inclusion in the environmental use control agreement in lieu of or in addition to one or more of the proposed environmental use controls. Each applicant shall submit for the secretary's review documentation sufficient to demonstrate the applicant's compliance with each restriction, prohibition, or zoning requirement that is enforceable by a local, state, or federal governmental entity.

(d) If the secretary approves the inclusion of governmental restrictions, prohibitions, or zoning requirements in the environmental use control agreement, the agreement shall reference the appropriate local, state, or federal restriction, prohibition, or zoning requirement and shall identify the governmental unit establishing these requirements.

(e) Each owner who enters into an environmental use control agreement that incorporates

local, state, or federal governmental restrictions, prohibitions, or zoning requirements in lieu of or in addition to one or more environmental use controls shall remain subject to all other applicable requirements of the act and these regulations.

(f) An environmental use control agreement that incorporates local, state, or federal governmental restrictions, prohibitions, or zoning requirements shall be considered not to be effectively implemented and shall be subject to appropriate enforcement action in accordance with K.S.A. 65-1,229, and amendments thereto, if the secretary determines that both of the following conditions exist:

(1) The local, state, or federal governmental restrictions, prohibitions, or zoning requirements have been modified by the governmental entity after the environmental use control agreement was approved by the secretary.

(2) These modifications reduce the effectiveness of the environmental use control agreement to the extent that public health and safety and the environment are not protected adequately. (Authorized by K.S.A. 2005 Supp. 65-1,232; implementing K.S.A. 2005 Supp. 65-1,228; effective April 7, 2006.)

Article 74.—RISK MANAGEMENT PROGRAM

28-74-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation: (a) "Acceptance" means that an application for the risk management program has been approved by the secretary and a risk management plan agreement has been signed by the secretary.

(b) "Department" means Kansas department of health and environment.

(c) "Environmental contamination" has the meaning specified in K.A.R. 28-73-1. (Authorized by and implementing K.S.A. 2015 Supp. 65-34,176; effective May 13, 2016.)

28-74-2. Application. (a) Each prospective participant shall submit a completed application to the secretary on a form provided by the department. Each application shall include the following information:

(1) A map identifying the location of the site and the area within the site to which the risk management plan applies;

(2) a map identifying all parcels within the site

to which the risk management plan applies, including ownership of each parcel;

(3) documentation that the applicant provided written notification to all property owners and occupants within the site to which the risk management plan applies and proof that those property owners and occupants received the notification; and

(4) a draft risk management plan for review and consideration for approval.

(b) If an application is determined to be incomplete by the secretary, written notification shall be provided to the applicant, identifying the documentation, data, or other information that is needed to complete the application. The applicant may then submit the required information or withdraw the application. The application shall be considered void if a complete response has not been received from the applicant within 60 calendar days from the date of the written request for additional information from the department. (Authorized by and implementing K.S.A. 2015 Supp. 65-34,176; effective May 13, 2016.)

28-74-3. Risk management plan. (a) Each risk management plan shall include the following:

(1) Demonstration that all of the following conditions have been met:

(A) The extent of the environmental contamination has been determined;

(B) the source reduction has been completed, if necessary;

(C) the contaminant concentration trends are not dependent on the continued operation and maintenance of active remediation systems;

(D) the associated groundwater contaminant plume is stable or shrinking, if applicable;

(E) imminent future exposure is not likely; and

(F) all current complete exposure pathways have been addressed;

(2) any site-specific requirements for monitoring, inspection, or maintenance;

(3) a process for completing routine verification of and notices to property owners and occupants;

(4) a description of the specific terms and conditions that shall be in effect for the duration of the risk management plan; and

(5) a process for redefining the area within the site to which the risk management plan applies.

(b) Upon review of each draft risk management plan, a notification shall be issued to the applicant, either approving the draft risk management plan or noting deficiencies in the draft risk manage-

ment plan and describing the modifications necessary to address the deficiencies. The applicant may then submit a revised draft risk management plan for the secretary's approval.

(c) If the secretary and the applicant are unable to agree on an appropriate risk management plan, notification that the application is void shall be provided by the department to the applicant. An invoice for the costs incurred by the department to process the application package and review the draft risk management plan shall be included in the notification.

(d) Each risk management plan shall be implemented upon the effective date of the risk management plan agreement. (Authorized by and implementing K.S.A. 2015 Supp. 65-34,176; effective May 13, 2016.)

28-74-4. Risk management plan agreement. (a) Pursuant to K.S.A. 2015 Supp. 65-34,176 and amendments thereto, a risk management plan agreement shall be required for each site.

(b) Upon approval of a risk management plan, a risk management plan agreement shall be issued by the secretary and shall include the following information:

(1) A description of site conditions and specification of any monitoring, inspection, or maintenance requirements proposed by the participant and approved by the secretary;

(2) a description of the area within the site to which the risk management plan applies;

(3) authorization for agents of the department to have access to the site as necessary to monitor and inspect all risk management plan activities, as required by the act;

(4) identification of the one-time payment to reimburse the department for all direct and indirect costs incurred by the department in implementing and administering the risk management plan required by K.S.A. 2015 Supp. 65-34,176, and amendments thereto;

(5) a description of the specific terms and conditions that shall be applied as part of the risk management plan for the area within the site to which the risk management plan applies; and

(6) a description of the enforcement provisions authorized by K.S.A. 2015 Supp. 65-34,176, and amendments thereto.

(c) The risk management plan agreement shall be effective with the signature of the secretary.

(d) Any participant may request a transfer of the obligations specified in the risk management plan

agreement to another person. The following requirements for each transfer shall be met:

(1) Each participant requesting a transfer shall provide written notice to the department indicating that both the participant and the transferee agree to the transfer.

(2) A review of site conditions and consideration of the transferee's capacity to implement the risk management plan shall be factors in the secretary's determination of approving the transfer.

(3) The automatic transfer of risk management plan agreement obligations shall be prohibited. The participant and the transferee shall comply with the risk management plan agreement until an amendment conveying the responsibilities from the participant to the transferee has been executed.

(e) A long-term care agreement as required by K.S.A. 65-1,226, and amendments thereto, may replace a risk management plan agreement for a site where environmental use controls are es-

tablished in conjunction with a risk management plan if the long-term care agreement meets the requirements of the risk management plan.

(f) If site conditions change or new information that could warrant additional action becomes available, a risk management plan agreement shall not absolve any party of environmental liability associated with the site under state and federal law. (Authorized by and implementing K.S.A. 2015 Supp. 65-34,176; effective May 13, 2016.)

Article 75.—HEALTH INFORMATION

28-75-100. Authorization form. Pursuant to K.S.A. 65-6826 and amendments thereto, the Kansas department of health and environment's form titled "authorization to disclose protected health information," dated August 20, 2012, is hereby adopted by reference. (Authorized by and implementing K.S.A. 2011 Supp. 65-6826; effective Jan. 25, 2013.)
